## The Editor's Page

THE incorrect broadcasting of time signals by radio stations has reached a climax in the move taken by Congress toward the prosecution of sponsors who transmit "phony" time as an advertisement, and the cancellation of station licenses of broadcasters who permit it. The air has been cluttered for months with "standard time" signals, none of which were standard time. It appears that this is a violation of the federal regulations and at least one concern, under indictment, has brought a bunch of trouble to a number of stations by involving them in this spurious time service for the purpose of selling a few watches. Standard time is broadcast from only one place, on this coast at least, and that is Mare Island Naval Observatory. And only those stations which broadcast by direct wire from Mare Island can be rightly called "standard time."

THE Department of Commerce estimates that radio dealers will, during the year 1930, do a business of \$645,000,000. This ought to encourage a lot of concerns that have pinned crepe on their faith in sales conditions returning to normal. With 122,000,000 persons in the United States, of whom only one-four have radio sets, it would appear that there were still a few more sets to be sold, and a few more customers to be served. Even a sailor can't expect a smooth ocean all the time and a new industry is subject to more violent fluctuations than an

old one. Radio is the biggest demand of human existence aside from purely physical needs, that the world has yet seen.

PROMISE of a new radio network with WOR, New York, as the key station, to operate in competition to the National Broadcasting and Columbia networks, has come out of the East. WOR was formerly allied with the Columbia chain, but severed this connection and entered the field as an independent. It now purposes network connections of its own. This is a good move. Competition in the entertainment field is more to be desired than centralization and monopoly. A smaller network, competing with the larger ones, is apt to stimulate better programs all around.

THE courts seem to be able to block the administration of laws about as effectively as they enforce them. The Federal Radio Commission ordered KFKB, Milford, Kan., the "goat gland" broadcaster, off the air because of offensive medical publicity. The station secured an injunction in the federal court, and the station is back on the air again and will remain there, shooting its junk, until attorneys can argue the matter late in the year before the court. Congress could have equipped the Commission with adequate authority in the first place to prevent the four-wheeled brakes of an injunction tying its hands.

# The RADIO TATTLER

By EARLE ENNIS

MANHATTAN is going to have a radio city. It is to be a sixty-story building when finished, and every inch will be devoted to radio. The plan is to gather all the misery in one place. Announcers, sponsors, air advertisers, sopranos, service men—all will be kept inside the building. Relatives may go and see them on Saturdays. There will be an auditorium where they can all gather on Sundays and yell their heads off.

\* \* \*

The idea is to be financed by John D. Rockefeller, Jr., and a group of tired business men who like to sit at home and read the evening paper in peace. They are going to make this new insane asylum comfortable and all that, but they will curb the nut output just the same.

\* \* \*

Radio listening is not incurable. Sometimes people have a light attack and get over it. Others are affected for months or years. At the radio city the inmates will be examined and each given the work to do for which he is best suited. He can build sets, or solder wire, or take a radio set apart, or sit in a room and listen to a crooner. Scientists will squirt a ray on him while he is doing it in the hope that he will get better.

\* \* \*

Incurables will be given responsible positions in the radio city, the management making use of their disability for the benefit of the rest of humanity. Violent cases will be allowed to broadcast to each other. Padded rooms for announcers, orchestra lofts for musicians who have microphonitis and other modern scientific equipment is to be featured.

\* \* \*

Radio weddings will be permitted. Families can be raised in the radio city, but all babies must be portable. Cats or other pets will be permitted, but only with proper voice modulation with power detector input. Suppressors will be used everywhere to insure conformity with city rules. Nothing will be charged, the entire institution being run

on a cash a. c., basis. Dynamic results are expected.

\* \* \*

Television is to be used so that people may see how they look when they do what they are doing. This, it is believed, will cure a lot of folks who never know what they are doing until it is done. There will be no privacy in the city because an electrical eye is in every room, and a man can't even change his shirt without everybody in the auditorium seeing him.

\* \* \*

Musicians are to be specially treated in the radio city. When they come in they are given a hair cut and they are tested by a master tunning fork. If they are off pitch they are transferred to the Modern Music section for development. If they are on pitch, they are pensioned and given elevator jobs.

\* \* \*

Incoming musicians will be asked: "Saw, toot, yodel or twang?" Their answers will determine which section of the radio city will be their future residence. In order that patients may not become restless for outside contacts, yellow journals, stock swindles, sideshows and politics will be allowed on certain days. Executives accustomed to services of "yes" men will be allowed phonograph records which automatically agree with them, during their treatment in the radio city.

\* \* \*

Much thought has been given to the needs of the modern man in outlining the curriculum of the city's intensive educational phases. Courses in jackstraws, loud-speaker smashing, hit-running, and bigamy have been suggested. High speed divorces, synchronized by legal escapements, and radioactive bigotry may also be available when the city is fully established.

\* \* \*

There is no trick about getting into the city. Just walk up and knock. But—try and get out!

# MICROPHONE GOSSIP

Mountains and streams have lured Clarence Tolman, "Dobbsie's Cowboy Tenor," back to the Idaho hills. Tolman, who has appeared regularly over KPO for several years, has taken over a "Dude Hunting and Fishing Lodge" in Sawtooth National Forest. The last seen of Tolman he was hauling out his chaps and guns with a strange light gleaming in his optics, as he cleaned and dusted them.

\* \* \*

No, listeners Dell Perry is not a man.

Dell Perry, heard with Oscar Young during the NBC broadcast of "The Speedway to Happiness," is a young lady, blonde and pretty. Since Dell began playing before the microphone, dialers have thought she is a man. Probably it's her definite technique which stamps her playing as that of a man.

\* \* \*

Bill Wright brought in a Jamboree act for his character "Professor Hamburg," with a carbon copy attached, and showed it to Harrison Holliday. Harrison read both copies and then declared that the first one was a "natural," but he couldn't give the other one very much. This will no doubt cure Bill of the habit of using carbon paper.

\* \* \*

The reducing bug has hit the feminine artists at KTAB, the stars being Joan Ray and Georgette Schiller. They are on diets, and we have heard whisperings of tap dancing, but we wouldn't be quoted.

\* \* \*

Charlie Parker, "Big Noise" of the KJBS Alarm Klok Klub, returns to that station's microphone after a vacation trip to the Southland. He reports having had a wonderful time and managed to successfully evade seeing, or hearing, a single alarm clock. Charlie says the only cloud on the horizon was, that like Mary's little lamb, wherever he went the "Stein Song" was sure to go.

\* \* \*

It won't be long now. Bill Ray's Ragtime Revue, long a KFWB Sunday night attraction, is being unpacked from moth balls and cedar chest all ready to be sprung on the public at an early date from KGER.

Latest potential announcer in ranks of coast radio circles . . . Harlan Button Dobyns . . . weight at birth, six pounds and a half ounce . . . C. Merwin Dobyns.

owner of KGER, Long Beach, says . . . "Er-hem; well, of course, the boy is much too young to pick out a career for him as yet. Still, I can think of lots worse things to be than a radio announcer."

\* \* \*

Such wide demand for his services as master of ceremonies has grown in Denver that Clarence Moore, popular and jovial announcer at KOA, has found it necessary to turn down several score such jobs this summer. A convention of one kind or another will be in session in Denver every day throughout the summer, and many of the organizations have sought his services because of his ability to get delegates into real "convention spirit."

\* \* \*

Nadine Honeywell, winner of the San Jose Local Audition of the Atwater Kent Foundations National Radio Audition has been engaged by KPO for several broadcasts. Miss Honeywell, a soprano, has been besieged with many offers for stage, concert and radio work by virtue of her win. She has turned them all down, with the exception of her KPO appearances. Miss Honeywell has declared her intention of again entering the competition and will sing in the Fourth National Radio Audition, plans for which are now well under way.

The cheery voice of Ted Berlin, that you've been hearing on the Owl programs from KJBS on Wednesday nights, now pilots the Owls every night, excepting Wednesday, when owlish wisdom and entertainment will be brought to you by Frank Cope as relief announcer. Harry Wickersham, formerly the regular Owl, has returned to daylight hours at the microphone, and at present is wearing dark glasses until his eyes become used to the sunlight again.

A middle-aged man came to KFRC studios recently, just before a Jamboree, and when told he had to have reservations to get in asked to see Edna O'Keefe. "I'll go away happy if I can just see Edna," he said. (His wife was with him.)

\* \* \*

Mynard Jones, pianist, singer and director of the NBC Olympians, is a native of Santa Ana, Calif. Jones studied music first when he was 15 years old.

Emilie McCormack, veteran pianist of KPO, and her sister, Charlotte Owens, who play over KPO as "Knickerbocker Piano Duo" recently discovered that they could serve lunches and dinners appetizingly prepared, so they opened up the Marina Tea Room Cafe at 3254 Pierce Street, corner Chestnut. The sisters took over several apartments and transformed them into a distinctive and unusual dining palace with fireplace and lovely views from bay windows. Many radio stars make this their place to eat and are enthusiastic in their praise about the meals.

\* \* \*

Proof that KJBS Owl program listeners are highly enthusiastic over this service is borne out by the fact that one of the Owl members who is at present vacationing in Canada, and who had become so used to phoning in nightly for his particular request that he simply had to phone the Chief Owl all the way from Vancouver, B. C., to report reception of KJBS on a twelve-tube set, and enter his request for his pet tune. Needless to say he got it.

When Eugene Hawes of KFRC took unto himself the name of "Pedro Gonzales" he did not realize the indirect way in which it would boost his fan mail. There are so many Pedro Gonzaleses scattered about the state, and whenever one of them has an altercation with his wife, manages to make the local "hoosegow," bites a dog, or does any of the many things that the newspapers consider good copy, Pedro receives a sackfull of clippings from his fans. "What's this we read about you?" they ask, with mock seriousness.

\* \* \*

Helen Webster, of the NBC Woman's Magazine of the Air, is the mother of three attractive children. She is a San Diego woman who left a metropolitan newspaper to become WMA Home Science Editor.

\* \* \*

Helen Troy, the lisping, giggling Sally of the Cecil and Sally team of KPO, spent a three-day holiday at a mountain resort north of San Francisco. The first vacation she had enjoyed in more than a year, Helen wanted to get completely away from the radio, and made elaborate plans to conceal her identity. An out-of-the-way hotel was chosen and it was made sure that none of the other guests knew her. She enjoyed the three days of rest, but when she went to check out, the landlord of the inn said, "Well, we'll be

listening to you tonight. Hadn't missed a night for four months now." Helen is sure she didn't tell anybody and is still mystified. And she was so embarrassed that she forgot to ask the landlord how he knew who she was.

\* \* \*

Paul Pitman, KPO's Big Brother and Educational Director, is making an extended trip in the East. He is attending a Convention on Radio Education and has appeared as the principal speaker at a number of Bankers' Conventions in various cities.

\* \* \*

KTAB's newest announcer is Marion Y. Fonville, a "man from the South." Fonville was on the announcing staff of the famous Shreveport, Louisiana, station—KWKH; he was chief announcer at KSOO, Sioux Falls, South Dakota, and was guest announcer at the Columbia station, KMBC, Kansas City. Previous to his announcing experience, he was in San Francisco prologue singing under Max Dolin and Paul Ash at the California and Granada theaters. For three years Fonville sang at Tait's-at-the-Beach. He was also with Don Wilkins at the Grand Lake in Oakland, and played trumpet and sang with Gordon Henderson's band at the Palace Hotel in 1928 and '29, broadcasting over KPO.

Fonville hails from the University of Missouri, where he studied mechanical engineering. And his hobby is still mechanics, he says. He has a workshop where he spends his extra time just "fixing." Already he has become the "handy man" around the KTAB studio. Fonville has a pleasing southern voice, with a sincerity that gives it an added appeal.

L. M., Hilmar, Cal.—Kenneth Rowley, formerly of the Shell Hap-pytime program, is not broadcasting this summer, but will again be heard in the fall. He is at present in Los Angeles furthering his musical education.

\* \* \*

M. T., Sacramento, Cal.—Floyd Wright (KPO) is Oakland's great temptation to the sweet young things. While he sits at the organ in the Grand Lake Theatre concentrating on some intricate peddle effect they go into unrestrained rhapsodies over the back of his shapely head with the "divine" natural marcel. Older women sigh over his "beautiful manners . . . such a sweet boy, my deah" (you'll hate this, Floyd, but they mean it as a compliment). Floyd is about 24 years old, single, 6 feet tall, slender, decidedly agreeable, modest, obliging. His chief delight is commuting via the air from Oakland to San Francisco. Frequently this pleasure becomes a necessity when he has broadcasts on one side and shows to play on the other.

\* \* \*

J. G., San Francisco, Cal.—Hazel Warner (KFRC) is unmarried. Helen O'Neil (KTAB) is not related to the O'Neil Sisters of kiddie revue reputation. Jane Sargent Sands (KTAB) is single. A picture of Elsa Behlow Trautner (KPO) appeared in the July 6 to 12 issue of BROADCAST WEEKLY.

\* \* \*

M. B., Santa Rosa, Cal.—Bert Horton is ever so much better looking than his pictures. There is an intangible something about him which the camera does not catch. In his slender, idealistic face one finds warmth and understanding; tolerance and strength. He has kindly brown eyes, a generous, pleasant mouth and smooth, dark hair. His height is 5 feet 7 inches, his weight, 140 pounds. He is in the neighborhood of 30 and is not married. His hobbies are hiking and books. His father is a retired minister and he has a brother who is a celebrated organist. Although known to everyone as "Bert," his Christian name really is Horton. The surname was dropped when he launched forth upon a theatrical career some ten or

twelve years ago. Since his first broadcast in 1922, Bert has enacted to date over 500 radio roles.

\* \* \*

M. E. S., Walla Walla, Wash.—Cecil and Sally are just out of their teens. Ted Maxwell is in his thirties. Bobbe Deane and Bernice Berwin are at that interesting twenty-something stage. No, the Maxwells have no children. Write direct to your favorite artists for autographed pictures. You will find all regular broadcasts listed in this magazine. I sincerely hope you are entirely recovered by now and let me hear from you again.

\* \* \*

MRS. T. A., Yakima, Wash.—Eva De Vol (KPO) is an ideal example of matrimonial happiness and successful career. (Time out for the cynics to weep.) She was an immature fifteen when her Prince Charming came along. Because of his great love of music, his sympathy and understanding, he saw to it that his girl-wife's aspirations were fulfilled. She studied with the finest, most celebrated teachers of the country and is today justly proud of the distinction of having received her education through her husband. Between broadcasts and concert hours, Eva devotes her energies to the supervision of a beautiful family home in Marin County and to the rearing of two lovely daughters.

\* \* \*

MOLLY H., Sacramento, Cal.—If you happened to be on an East-bound train and Edward Fitzpatrick (NBC) happened to be sitting directly in front of you and you were all dolled up and sort of bored and everything . . . you'd catch yourself silently praying (providing you are true to your sex) that that square-shouldered, immaculate male with the black hair would turn around or move or something. And after an hour, still bored, still true to your sex, you'd stroll toward the front of the car and saunter back ever so casually and . . . in your mental catalogue would register "Business man. Absolutely unapproachable. Too preoccupied. Handsome. Wonderful brown eyes. Oh! dear, why does he keep staring straight ahead?" Violinists aren't at all like that, Molly. Stoic, I mean. It's probably just another case of stock market. Edward Fitzpatrick is very friendly and charming under the mask.

## “Phony” Time Signals Bring Federal Penalty

CONGRESS has taken steps at last to halt “phony” advertising on the air. It is also moving to stop the broadcasting of “bogus standard time signals,” a practice followed by many stations regardless of the truth. Full information of these two activities has been requested by Congressman Frank Reid of Illinois of the Federal Radio Commission.

The investigation deals particularly with one watch concern which is under federal scrutiny. In the order to the Commission, the Federal Trade Commission, the Attorney General, the Secretary of Labor and the Secretary of the Treasury, Congress asks for information regarding the smuggling and undervaluation of watches by thirty-three individuals, already indicted, and fourteen watch companies caught in violations of custom laws.

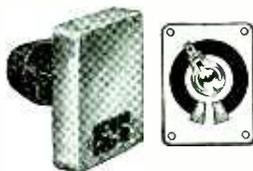

The Radio Commission comes into the picture because one of the watch companies has been using a radio network to advertise its wares. The radio advertising of this company was made the subject of an investigation by the Better Business Bureau, and a report was sent to the Radio Commission.

One of the radio advertisements of the company consisted of an exhortation to “listen in nightly for ‘blank’ time” which was represented as being given from the company’s observatory. Federal operatives discovered the “observatory” to be a five by eight foot room on top of a building and the time given instead of being observatory time, was taken from the Western Union time service by various broadcast stations.

The Radio Commission has full authority under the law to cancel the operating license of any station which broadcasts misinformation or false and misleading statements. The habit that operators have had of “filling in” local time from Western Union wires, and purveying to the public as “standard time” is a violation of this regulation and stations which have been following this practice may have their license cancelled.

Just what action the House of Representatives intends to take in the matter seems to be speculative at Washington. Congressional action may force cancellation of station license of those who have violated the above regulation as a means of enforcing the law, and of letting additional new stations on the air.

# Atwater Foundation Announces 4th National Radio Audition

WHO have the best young singing voices in Northern California?

Opportunity will be offered them to participate in the distribution of \$25,000 in cash awards and to obtain at least a year's scholarship in some great American conservatory of music or under a world-renowned teacher, according to plans for the Fourth National Radio Audition which has been announced by the Atwater Kent Foundation, of Philadelphia, through its Northern California Headquarters at KPO, San Francisco. In 1927, 1928 and 1929 the Foundation conducted nationwide searches for the best young men and young women, with the result that more than 150,000 youthful song-birds competed. In all three years California singers placed first, second or both, bringing fame and glory not only to themselves, but to the State of California, with the result that the Golden West again looks to its young singers to uphold the honor already established by its former winners.

With this in mind and a greater number of contestants expected, every village town and large city in Northern California will soon be hastening plans for local auditions. A young man and a young woman, between the ages of 18 and 25 years, are selected by competition in each city or community. These compete in a state audition which will be held over KPO Monday evening, Octo-

ber 20, 9 to 12 o'clock, in which one young man and one young woman are selected to participate in the District Audition also held over KPO, Monday, November 17, in which winners from nine western states will compete for the honor of representing the Fifth District at the Final Audition to be held at New York in December, in a coast to coast broadcast. The District Audition originating in the studios of KPO will be broadcast over the Pacific Coast network of the National Broadcasting Company.

The prizes to be awarded at the National Finals are:

First place (one boy and one girl), \$5000 each and two years' tuition in an American conservatory.

Second place (one boy and one girl), \$3000 each and one year's tuition.

Third place (one boy and one girl), \$2000 each and one year's tuition.

Fourth place (one boy and one girl), \$1500 each and one year's tuition.

Fifth place (one boy and one girl), \$1000 each and one year's tuition.

According to latest word from Northern California Headquarters the State Committee of Sponsorship will soon be released for publication together with the various local audition centers and the dates the auditions will be held.

## Commission Prepares for Summer

ONLY routine matters will be handled by the Federal Radio Commission during the next two months, and no further radical changes in allocations will be considered before September.

July and August will see the work of the Commission at its low point, as commissioners and such employees as can be spared leave sweltering Washington for cooler climes. Most of the time, however, it is expected that there will be at least one commissioner in Washington who, under an agreement reached by the commissioners, will take action on routine matters, such as renewal applications, requests for modifications of construction permits or licenses to cover permits, and applications for approval

of voluntary assignments, and also will deal with any emergency which may arise.

While Commissioner Lafont contemplates an inspection trip through his district and Commissioner Sykes will hold some hearings in the field, it is not planned to undertake any extensive activities during the summer, but the engineering and legal divisions, it is understood, will prepare data and plans for changes contemplated by the Commission to eliminate cross-talk interference, the first moves in which were held up by court orders this spring, and to comply more closely with the "equitable distribution" clauses of the radio act, when the Commission resumes its activities next fall.

# New Air Safety Network to Aid Flyers

**S**TIMULATED by the excellent radio work done by the plane, Southern Cross, in its trip across the Atlantic, and other developments in aircraft signaling, the Government is planning on an elaborate program of radio facilities for aviation protection with the next federal budget.

The program includes a nation-wide system of route-marking, weather forecasting and report distribution, compass and beacon installations, and ground to plane telephone service. The program represents the accumulation of five years of experimentation by a dozen branches of the government toward safe national flying. Protection of planes while in flight, to prevent them running into unexpected fogs and storms, apparatus by which planes off course may find their way back again, and emergency equipment designed to get immediate aid for flyers down in isolated sections, are all included in the federal plans.

There is practically no other means of communicating with planes in flight save by radio. The great development of the flying art in the past year, the growth of commercial lines, the heavy mail sent by air carriers, and all the tremendous expansion of the flying calls for a corresponding accompaniment of radio activities.

As nearly as possible airplane radio devices must be automatic, both in transmission and reception. They must produce visual indications for the aviator and immediate connections for ground stations, so devised as to show graphically a plane's position at any hour. Toward this end every technical facility of the government and a score of radio laboratories is being bent.

Two-way phone communication between planes and ground has been worked out, on frequencies set aside by the Federal Radio Commission, together with a special frequency for distress signals to which are tuned "listening posts" that are at all times, "on the air" for calls for help.

In conjunction with these developments, receiving sets for planes have been developed and are in use, by which pilots not only follow radiobeacon signals to a safe landing but get phone messages from ground stations as well. Many planes are already equipped to talk by phone and many more are in process of so being equipped.

Through governmental frequency allocations and airport connections, it will shortly be possible to talk to a passenger in a plane anywhere in the country, from a home telephone.

## Sunshine Program Popular

**K**EN STUART'S Thirty Minutes of Sunshine program, broadcast every evening, except Sunday and Monday, beginning at 10 o'clock, is bringing sunshine into the homes of many Pacific Northwest homes 24 hours a day.

A pot-pourri of music by the Sunbeams Orchestra, piano solos by Ivan Ditmars and songs, humor, philosophy and the reading of letters and original verse from listeners by Stuart make up the Sunshine program.

Stuart's Sunshine, broadcast for a year-and-a-half has become popular with shut-ins. Actually the program is bringing happiness to Pacific Northwest shut-ins in two ways.

The program itself is entertaining the shut-ins, and by means of the program he is raising money for radio sets for shut-ins

unable to own receivers so that the invalids can listen all day long.

Stuart has organized the 1930 Sunshine Club, and since its inception, only a short time ago, has placed 35 sets in the homes of shut-ins and blind persons.

Listeners are mailing in dollar subscriptions to become members of the Club. This money is used to change battery sets to electric receivers. The transformation is being done by a Seattle radio firm at the cost of the material.

Stuart's work with the Sunshine Club has grown out of broadcasting for the Sunshine and Smiles Society during the last Christmas season when he sold hundreds of boxes of cards for the famous Seattle shut-ins relief organization.

The program is broadcast over KJR and Northwest Broadcasting System stations.

# Improved Equipment Requires Greater Station Separation

WAST improvement in transmitting equipment is still to be desired, it is demonstrated by studies recently made by the Federal Radio Commission into the mileage separation necessary between broadcasting stations operating on close frequencies.

Pending the development of apparatus which will narrow the wave emitted by transmitting stations, elimination of cross-talk and heterodyne interference can be accomplished only by providing wide separation of stations not widely separated in frequency.

The need for greater separation between stations, it is explained by officials of the commission, was the underlying reason for its attempt this spring to shift twenty-six stations and re-assign several cleared channels, enforcement of which was held up by restraining orders secured by three of the broadcasters involved in the reallocation.

The original belief that stations in the same city but separated by 30 kilocycles or more would not interfere with each other has been discarded as a result of studies by the commission's experts, who now claim that two stations using as low as 50 watts power and separated by 30 kilocycles should be at least twenty-two miles apart to be absolutely free of interference from each other. This mileage-separation requirement, of course, increases as the power grows greater but, fortunately, not in proportion, and 500-watt stations on a 30-kilocycle separation are all right if ninety miles apart. Stations of 25,000 to 50,000 kilowatts power should be from 260 to 300 miles apart on a 30-kilocycle separation. Under the tables which have been worked out, the separation for stations on the same frequencies is ten times that required when they are 30 kilocycles apart.

Abandonment of the view that a separation of 30 kilocycles was sufficient for stations in the same city not using very great power, it is explained, is due to the great improvement in transmitter design and equipment. When the original allocations were made, the separations then provided were adequate, but since then the efficiency of transmitting equipment has been so increased that stations using modern apparatus have a much greater field without using increased power. This has caused interference between stations which originally had

no difficulty along this line, and has necessitated a total revision of the commission's ideas regarding mileage separation.

Further increase in the mileage separations may be necessary in the near future, it is indicated by Commissioner Harold A. Lafount. Pointing out that sunspots have been found to have an actual and measurable influence upon reception in the East of western radio programs, Mr. Lafount predicts that by the end of next year eastern listeners will be receiving with good volume western stations which they now cannot pick up.

"Nine years ago, when the radio broadcasting was just starting," Mr. Lafount declared, "we were in a minimum of solar activity—a sunspot minimum—and reception in the East from western stations was at its maximum. For the past several years we have been passing through a maximum of sunspots. Measurements made by Dr. Greenleaf Whittier Pickard at Newton Center, Mass., have shown low field values from western stations, in consequence of which but slight heterodyne interference has existed between East and West coast stations.

"Scientists tell us we are now rapidly passing through the sunspot maximum or period, with the result that field strength of West coast stations is increasing in the East, and an extrapolation of the curve indicates that within a year we shall again have high field strength from western stations."

## Lifts Radio Embargo

Once treated as contraband of war, radio equipment is now welcomed in China. The Chinese ministry of communications is building many new broadcasting stations, mostly with imported apparatus, and will soon begin encouraging those who can afford them to purchase radio receiving sets.

## "Statue" of "Amos Jones"

"This town has gone so nuts over the fact that one of the Amos 'n' Andy team was born here," reads a Peoria dispatch to the show business periodical *Variety*, "that it is contemplating pulling down the statue in front of the city hall, replacing it with one of Amos 'n' Andy."

# A Page from the NBC Woman's Magazine of the Air

By MADONNA M. TODD

**A**FTER reading a few of the letters Bennie Walker received last week, we've decided that it is time to devote a Woman's Magazine of the Air page to intimate glimpses of some of your radio favorites. Every letter asks about some microphone personality.

If the letters Bennie receives paint a true picture of the attitude of the WMA audience, it wouldn't be fair not to offer first a profile of that genial studio personality—The Editor.

"Keep That Old Smile Smiling . . . !"

How well NBC dialers know that slogan. It is identified with Bennie in the studio and outside. "More than 200 pounds of good humor" rightly described him. As the slogan suggests, he radiates happiness everywhere he goes. His eyes always are laughing and he refuses to take even an interview seriously.

"Tell the folks my name's really Ben Walker McLaughlin and that I've two of the handsomest kids you ever saw and a marvelous little wife. Oh yes, and that one of the funniest things of all to me is the time I spend being Little Bennie . . . picture 200-pound me imitating a five-year old!"

Ben has been identified with the theatre since he was 13 years old.

"An enthusiastic father staged benefit entertainments in our home-town for everybody from the fireman to the Methodist Church and I played in them," Bennie confesses. "Meanwhile, I became a baker. That was fortunate for when the World War was declared—and I enlisted—I was all equipped to bake biscuits for the doughboys. Just one officer had to test one of my biscuits, I was made camp cook."

After the Armistice, Bennie came West. He sang at the San Gabriel Mission Play and toured with various vocal groups coming to NBC with one of these—The Rounders. With the organization of the Woman's Magazine of the Air, he became editor—really a master-of-ceremonies. His business is to present the various performers and this week he has an unusual galaxy of stars to offer.

The list includes Annabelle Jones Rose, Irving Kennedy, Mary Groom, Harold Dana,

Harold Peary, Peggy Chapman, Gwynfi Jones, Eva Gruninger Atkinson, Gail Taylor and Austin Mosher.

Peggy Chapman is the only one of the group who offers popular songs exclusively. She has been singing them through the air since the earliest days of radio, when she made her debut in Los Angeles. Afterward Peggy starred on Radio's Broadway in New York City with Major Bowes' Capitol Theatre Family and Roxy's gang.

Miss Chapman is a native of San Francisco. Besides singing, she is an arranger and won no little success as a song writer with publication last year of "I'll Only Remember Your Love." Peggy wrote the music and Bennie, the lyric. She has made many records, too, among them, "I Can't Give You Anything But Love, Baby," "I Must Have That Man" and "Forgive Me."

Gwynfi Jones, on the Thursday program with Miss Chapman, is an inveterate motion picture fan. He probably hasn't missed a "four-star" picture this year.

Jones has been singing before a microphone since the inauguration six years ago of KGO. Before that, he devoted himself to concert singing in the United States and abroad.

A Welshman, Jones studied first in Treherbert, South Wales, and later at the London Conservatory of Music and with numerous British celebrities. Edward Davies, tenor, of the Carl Rosa Opera Company, was his instructor just prior to Jones' departure for America.

Enrolled to study voice at the London Conservatory, Jones devoted time also to piano and received a certificate as instrumentalist. He also is an excellent performer on the Frugel horn, an instrument seldom heard in the United States, and made several tours as Frugelist with English brass bands.

Besides his NBC performances, Gwynfi Jones is heard in Oakland churches and occasionally in recital. His numbers mostly are semi-classics though he interprets operatic roles effectively and is heard occasionally in the intriguing folk songs of his native land.

# Church Stations Giving Way

**B**ROADCASTING stations owned by religious institutions are gradually yielding their places in the radio spectrum to commercial interests. In recent months, no less than seven church stations were sold and the transfer of their licenses ratified by the Federal Radio Commission.

Efforts of other church groups to find a lodgement in radio are almost invariably resisted by the Commission, which has shown a decided preference for stations furnishing an all-round program service rather than for those with highly specified messages. However, even before the Commission came into being there were about fifty stations owned by churches, theological schools or evangelists.

The ranks of the fifty are slowly being depleted, though some of the religious stations, notably those owned and operated by evangelists, show no disposition whatever to abandon radio. For the most part, churches are depending for radio outlets upon affilia-

tions with their local broadcasting stations while their national organizations are being heard over the radio networks.

Most church stations are local, low-powered affairs. Among the sects represented in the list of those remaining are the Baptists, Methodists, Presbyterians, Catholics, Congregationalists, Lutherans and Seventh Day Adventists.

Only a few of the church stations themselves "sell time" to commercial sponsors of programs. Except for the evangelists, who often solicit funds for their stations over the air, the church stations have found the economic burden of operating a broadcasting station too great for them. This accounts for the willingness of many of them to sell out. On the other hand, others, like the Peoples Pulpit Association and Wilbur Glenn Voliva, have persistently sought better wave lengths and more time on the air from the Federal authorities.

## Putting "Clarion" Value in Radio

**T**HE real value and the retail cost of any manufactured article are generally the results of efficiency in management and producing ability of the factory organization.

Undoubtedly, these factors are reflected in the wonderful Clarion Radio manufactured by the Transformer Corporation of America, long known to the trade for their engineering skill and factory methods in making parts and units for other radio manufacturers. The accompanying illustration gives one a fair idea of the size of the TAC plant located in Chicago and which is said by many to be perhaps the most modern radio plant in the world.

W. E. & W. H. Jackson, Inc., of San Francisco and Oakland, have been appointed distributors for Northern California and Nevada. They are rapidly putting into effect new policies as far as radio merchandising is concerned, which are bound to concentrate attention on Clarion. A dealer organization is being rapidly built up with the result that this truly remarkable, low-priced set is now available to the public.

The line consists of two very attractive consoles and a most beautiful phonograph combination set and, according to W. H. Jackson, Clarion is by all odds the finest radio line their company has ever handled.

# CLARION

## MODEL AC-53

De Luxe cabinet of beautifully matched walnut, burl elm and satinwood . . . one of the handsomest radios that will be offered this season. 44 inches high, 28 inches wide and 14 $\frac{3}{4}$  inches deep. Standard chassis, local-distance switch. Electro-dynamic speaker.

# \$129.00

*Complete with tubes*  
\$156.00

## *A Few Clarion Features*

Beautiful cadmium plated, fully shielded chassis — every part built complete in our modern factory — 8 tubes (3 screen grid), power detector, push-pull audio amplification, electro-dynamic speaker, automatic line voltage control, power pack 40% above standard, separate from chassis, local-distance switch, phonograph jack. Sturdily built and practically trouble-proof.

# Clarion

# CLARION . . . .

## THE GREATEST RADIO VALUE AT ANY PRICE

**I**N RICHNESS and fidelity of tone, in clear powerful rendering of distant stations, in clean cut selectivity—in all that makes for complete radio enjoyment—CLARION out performs receivers of several times its price.

. . . . Check CLARION against any receiver in the world—you will find in CLARION a richer tone, fuller, more faithful and absolutely humless.

. . . . You will find CLARION an instrument of unusual beauty—cabinets of fine matched woods, gracefully designed by master craftsmen—rich enough to fit any home.

. . . . Test CLARION'S selectivity—there's no spilling over from adjacent channels.

. . . . Try it for distance—CLARION picks up the faintest signals and amplifies them to sonorous volume—brings you over long distances true recreation against background of silence—a delight to the most rabid DX fan.

## How Can Such a Wonderful Radio Be Sold For Such a Low Price?

The Transformer Corporation of America—makers of CLARION—have been for years among the leading manufacturers of high quality radio parts, used in many well-known radios.

. . . . Today, after long experience in Radio and equipped with the most modern automatic machinery, TCA is able to produce every part that goes into CLARION with unheard of economy—to put into it the highest quality—and still keep the cost phenomenally low . . . to give the purchaser of CLARION Radio a value which upsets all previous standards.

. . . . Before you purchase any radio at any price, hear and see CLARION—the greatest value on the market today.

## Outstanding Marvin Achievements

**T**here are millions and millions of radio tubes now doing yeoman service in the radio sets of America that were built by Marvin engineers.

The many contributions made by Marvin engineers during the past have built radio tube history and a reputation for highest quality.

Marvin tubes are truly named MASTER-BUILT. Insure your profits—put a Marvin Master-Built tube in each socket in every Radio Set you sell and *eliminate the service calls* that eat up profits.

The Marvin Line is complete, all types. Quick Heaters? Yes—6 seconds and NOISELESS!
