

CBS PROGRAM BOOK • SPRING, 1946

THE COVER: *From the antenna (white circle) of its new high frequency television transmitter, W2XCS, in the cone of New York's Chrysler Building, CBS has broadcast its notable demonstrations of high-definition television pictures in full natural color (See Page 31). A similar antenna occupies a comparable position on the opposite side of the cone. Visible above the high frequency antenna are the T-shaped prongs of Columbia's low-frequency antenna broadcasting the weekly black and white television programs from Station WCBW.*

CZECH

News in eight languages — plus more than 2¾ hours of entertainment for American troops abroad is directed seven days a week to Europe, Africa, the Near East and Asia by the CBS Shortwave Department. Daily programs are retransmitted by *Radio Luxembourg, Radio Bari, Radio Rome, Radio Naples, Radio Palermo, Radio Florence, The Voice of America in North Africa* (formerly known as *Radio Algiers*) and *The United Nations' Network*.

For more than a year, CBS has been operating at Delano, California the two new 50 kw. transmitters (KCBA and KCBF) and also the giant 200 kw. transmitter, KCBR, all equipped with a system of highly directional antennas. These transmitters provide a West Coast originating base for programs serving our troops and our allies in the Pacific and in carrying out the program of the occupation of Japan and the former Japanese-held territories.

Languages used on the West Coast transmissions include Chinese, Japanese, Korean, Malayan, Dutch and English.

SPECIAL BROADCASTS: WINTER, 1945-46

Listed here are a representative group of special CBS broadcasts under two general categories:

1. Sustaining broadcasts of distinctive program value.
2. Programs of public significance arranged by the CBS Talks Department.

These broadcasts are scheduled on a week to week, day to day, and even, on occasion, hour to hour basis. This flexibility helps to sharpen the broadcasts from the point of view of public service and timeliness.

NOTABLE BROADCASTS:

JANUARY 19. In a great labor crisis, Walter P. Reuther, vice president of UAW and Dr. Alfred P. Haake, consulting economist to General Motors, discussed their problems over *People's Platform*. A week later, on the same program, Leon Henderson and Ralph W. Robey supported opposing positions and the following week, Congressmen Francis Case (R. South Dakota) and Hugh Delacey (D. Washington) expressed different opinions. These six speakers gave new insight into the nation's tangled labor and industrial picture.

Two premiere performances marked musical milestones over CBS during the winter. On Sunday, January 27, Igor Stravinsky conducted the New York Philharmonic-Symphony Orchestra in a program devoted entirely to his works and featuring the first public performance of the new *Symphony in 3 Movements*. On February 9, *The Philadelphia Orchestra* under Eugene Ormandy played for the first time the Third Concerto for piano and orchestra by the Hungarian composer Bela Bartok, with Gyorgy Sandor as soloist. Bartok was at work on this concerto at the time of his death. The work was completed by his pupil, Tibor Serly.

JANUARY 30. CBS listeners heard the sounds of man's first contact with substance beyond the earth. When Army engineers at Belmar, N. J. on January 26 heard radar impulses reflected

from the moon, a CBS recorder caught it, preserved the occasion for a *Feature Story* broadcast.

FEBRUARY 2. After an absence of more than 4 years the *Columbia Workshop* returned to the air in the first of a regular weekly series. Its purpose, as always, is to add new dimensions to radio expression. Its by-product is superlative entertainment. Norman Corwin, the *Workshop's* most distinguished alumnus, directed the first program.

CBS TELEVISION

By now approximately 1000 business and industrial leaders, engineers, editors, radio critics and reporters have seen the first preview of CBS color television pictures broadcast on a commercial transmitter in the ultra high frequencies.

For twenty thrilling minutes they watched, on a new high frequency television receiver designed and made by CBS engineers, a football game, a horse race, a lotus blossom, a sleek negligee, a volcano in eruption — all in brilliant realistic color.

They recalled that CBS first proposed the probability of high frequency color television back in April, 1944. They recalled the first demonstration broadcast last October before members of the Federal Communications Commission. Now they have seen for themselves one of the bright and useful scientific miracles of our time.

Basing its estimate on the remarkable rate of technical accomplishment since V-J day, CBS believes that with the entire industry putting its shoulder to the wheel, ultra high frequency color television can be made available to the public early next year.

A SAMPLE OF PUBLIC OPINION:

"It was clearly — and colorfully — the most notable television demonstration of the year." — *Time*.

"...beautiful beyond description. The image is sharp, distinct, and completely realistic." — *New York World Telegram*.

"The pictures shown by CBS were clear and the color contrasts as good as those of the best color moving pictures." — *The Wall Street Journal*.

"Equally striking were films of a fashion show — the color pictures showing milady exactly how the prospective sponsor's gowns will look." — *Bridgeport Post*.

"...tests showing one of the most significant characteristics of ultra high frequency television — 'ghost-free' reception." — *The Boston Post*.

"Demonstration proved that color would be of immense value to the advertiser." — *Variety*.

"The new system provides increased brilliancy. Better detail is achieved... by incorporating numerous techniques learned in war research." — *Associated Press*.

"Particularly impressive was a sequence of football pictures; in color the team uniforms were easily identifiable." — *Tide*.

Retracing the coaxial path, the pictures sped back to New York and to Columbia's ultra-high-frequency transmitter W2XCS in the Chrysler Building which returned them, airborne, to the receiver at CBS.

In the meantime, too, the pictures had:

1. Demonstrated that today's coaxial cable system *can* carry television programs in full and vivid color.
2. Matched every step involved in network television.
3. Proved that color networks can be formed as rapidly as black-and-white networks.
4. Eliminated the last major objection to the workability of color television as a network service.

★ ★ ★

After a two-month lapse to adjust its transmitter to a new frequency channel, Columbia's black-and-white television station WCBW-NY is back on the air (channel 2, 54-60 megacycles) with a basic five-day, Wednesday-through-Sunday schedule. On Thursday, Saturday, and Sunday WCBW presents a series of live programs, beginning at 8:15 p.m. EDT. Wednesday and Friday: films at 8:15 p.m. or remote pickups in the afternoon or evening.

1. Sustaining broadcasts of distinctive program value.

2. Programs of public significance arranged by the CBS Talks Department. These broadcasts are scheduled on a week to week, day to day, and even, on occasion, hour to hour basis. This flexibility helps to sharpen the broadcasts from the point of view of public service and timeliness.

Contributors to this radio symposium included: Secretary of War Robert P. Patterson, Dr. J. R. Dunning, Dr. Harlow Shapley, Dr. George B. Pegram, Norman Cousins, Watson Davis, Bill Downs, Gill Robb Wilson, H. A. Winne, Dr. Rensis Likert, John Pfeiffer, Secretary of Commerce Henry A. Wallace, General H. H. Arnold, Vice Admiral W. H. P. CBS TELEVISION

One after another, pictures like those on our front and back covers will suddenly quicken and move. On television screens throughout the New York area they will come alive this Fall and Winter as track meets, horse shows, basketball and hockey games. The scene will be Madison Square Garden; the medium—Columbia's WCBW; the sponsor—The Ford Motor Company.

Everyone seems pleased with the arrangement. These are some of the things the principals had to say when plans for the series were completed in August:

JOHN R. DAVIS, Ford vice-president in charge of sales and advertising:

"Television has demonstrated itself as a practical advertising medium and will rapidly reach larger and larger numbers of automobile customers and prospects... The company assumes leadership in the automobile industry in the use of this dramatic medium for the presentation of automobile models, where the visual element is so important... As television color comes along, our experience in the effective use of black-and-white television should enable us to bring the public color television as well at the earliest practical moment."

NED IRISH, executive vice-president of Madison Square Garden Corporation:

"We are happy to join with CBS and The Ford Motor Company in bringing to the public the most extensive program

ever made available through television. Sporting events such as basketball, hockey, and track meets are of national interest and are particularly adaptable to television projection. We in sports can also look forward to an even greater popular appeal, since many television spectators will become fans through this new medium."

FRANK STANTON, CBS president:

"The Ford Company has chosen not merely to flirt with television, but to go in and do a realistic, constructive job. It is that sort of sound and foresighted thinking on the part of advertisers that will point the way to better programs faster... It makes available a wealth of the finest program material for the development of the kind of television everybody wants—color television, and it will give the whole television art a big push along the road to growing up."

SPECIAL BROADCASTS: FALL, 1946

Listed here are a representative group of special CBS broadcasts under two general categories:

1. Sustaining broadcasts of distinctive program value.
2. Programs of public significance arranged by the CBS Talks Department.

These broadcasts are scheduled on a week to week, day to day, and even, on occasion, hour to hour basis. This flexibility helps to sharpen the broadcasts from the point of view of public service and timeliness.

NOTABLE BROADCASTS:

SEPTEMBER 22 and 29. For an hour and a half on each of these two Sundays, in a special program titled *Stars in the Afternoon*, CBS introduced the major entertainment shows scheduled for its 1946-47 season. On both occasions part of a huge cast gathered in New York, part in Hollywood, and the spotlight moved from coast to coast as the drama unfolded. In the first program the central parts were played by Frank Sinatra and Dinah Shore; in the second by Ozzie and Harriet Nelson.

OCTOBER 16. On the night following the Nuremberg dawn that ended the lives of the ten remaining leaders of Nazi Germany, Columbia presented a special documentary program, *The Empty Noose*. Recalling some of the origins of the Second World War and the reasons for the war crimes trials, the program dramatized five episodes in the careers of key Nazi leaders. The program's theme and title suggested the essential implication of the Nuremberg trials: that similar punishment awaits the leaders of any future resurgence of fascism.

OCTOBER 23. On the occasion of the opening session of the United Nations General Assembly at Flushing Meadows, CBS broadcast President Truman's welcoming address. Then as the ceremonies continued, UN reporter Larry Lesueur called on five other Columbia newsmen to comment on the President's speech and to

help explain the problems and legislative machinery of the General Assembly.

NOVEMBER 5. After several preliminary reports through the early evening, at 10:30 p.m. EST Columbia's news staff took over the remainder of the Election Night schedule to continue a running commentary on the progress of voting returns until 2 a.m. Approximately every half-hour Robert Trout summed up national trends; in the intervals between his reports six others—Ned Calmer, Charles Collingwood, John Daly, Douglas Edwards, Bill Henry, and Quincy Howe—took turns analyzing regional returns in detail.

NOVEMBER 12, 19, and 26. On the first of these three Tuesdays (6:15-6:30 p.m. EST) an eminent biometrician, Dr. E. M. Jellinek, spoke on "A National Problem" and thus introduced a special 13-week CBS series of discussions on *You and Alcohol*. Dr. Jellinek is director of the Section on Alcohol Studies of the Laboratory of Applied Physiology at Yale University. He was followed on November 19 by Dr. Henry W. Newman, of the Stanford University Medical School, and on the 26th by Dr. Carney Landis of the New York State Psychiatric Institute. As the series progresses in later weeks, ten more authoritative voices from many professions will continue to explore the facts about alcohol and develop other social, medical, religious, and governmental aspects of the problem.

CBS TELEVISION

Columbia's steady development of the television art was given impetus in recent weeks by the following:

FCC HEARING ON COLOR. On December 9th the Federal Communications Commission will begin hearings on Columbia's proposal that commercial standards be established for ultra high frequency color television. The CBS petition said, in part:

"Color television in the ultra high frequencies is an advanced form of television, is technically feasible, and is an outstanding improvement... (it) is capable of rendering a truly nationwide and competitive television service—not possible on the lower frequencies because of the smaller number of channels... The greater appeal of color and ghost-free images will accelerate development of a television audience..."

KING'S PARTY LINE. The main ingredients of a new CBS black-and-white television show are John Reed King and a brace of telephones. With the help of six volunteers from the studio audience, King poses visual questions (charades, observation tests, and so on) and asks the television audience to phone in the answers. The first to call wins the prize; so far two operators and eleven lines cannot keep the calls from banking up. This "sock video presentation" (*Variety*) is available for sponsorship and is cur-

rently scheduled on Saturdays at 7:30-8 p.m. EST.

THOSE DODGERS. The Brooklyn Baseball Club has assigned to CBS the first exclusive long-term television rights to a major league team's schedule. Beginning with the 1947 season, Columbia will scout the Dodgers in Spring training in Havana for color and background material and will broadcast the team's home games. In announcing the agreement, Frank Stanton, CBS president, said:

"The addition of these baseball games to our schedule, which already includes a large number of television broadcasts of Madison Square Garden events, certainly assures CBS a dominant position in television sports programming."

NEW CALL. On November 2, the same day WABC became WCBS, Columbia's New York television station, WCBW, also changed its call letters, to: WCBS-TV.

RATE CARD. A new WCBS-TV rate card lists current charges for studio facilities, film service, time signals, and weather reports. With 15 minutes of studio time at \$60 and air time still free, this card is not only useful now but will certainly be something to show your grandchildren.
