Remember though, that our stocks are limited—order NOW and avoid disappointment.

Bass notes can be fully emphasized and "scratchy" high notes can be softened by means of the panel operated full range tone control.

A powerful Automatic Volume Control eliminates blasting and minimizes fading on distant stations.

**N**OW Lafayette gives you **AUTOMATIC TOUCH TUNING** on an auto set—a very important aid to **SAFE DRIVING**. No need to take your eyes off the road for an instant when you operate this powerful 5-tube superhet—just press one of the buttons with your finger and the desired station comes in perfectly tuned. The receiver is extremely sensitive and selective, and draws very little battery current—yet it is offered at a price that defies all competition. To get the very most and the best for your money, buy Lafayette.

**Tune Any One of Four Stations Automatically**  
Any one of your four favorite stations can be tuned **AUTOMATICALLY**, instantly, by just pressing one of the push-buttons. These buttons can be set accurately by anyone in a few moments without the necessity for using any tools and without opening the case. No electric motor or condensers are used, so that there is absolutely no possibility of drift. Once the button is set, no further adjustments are needed. Station settings can be changed easily.

### Powerful Superhet Circuit

Five specially selected tubes are used in the powerful superhet circuit as follows: 1-6A8G converter and oscillator; 1-6K7 1.1 amp; 1-6Q7G diode detector, a.v.c. and audio; 1-6K6G output tube; 1-6X5G rectifier. Power output is a full 2-watts.

A matched electro-dynamic speaker reproduces the set output with good fidelity, and is so designed that it will maintain maximum efficiency over a long period of time.

### Slide Rule Full Vision Dial

The dial is of the "slide rule" type and is extremely legible. It is calibrated in kilocycles (550 to 1600) and is fully illuminated. Stations can be tuned in manually by means of the control knob on the panel.

### Automatic Volume Control Circuit

A powerful a.v.c. circuit minimizes fading when traveling under steel structures and prevents annoying "blasting". Volume is automatically maintained at a constant level.

### Single Unit Construction

The receiver is housed in a single steel case designed for under-dash mounting. It is particularly easy to install and service. Detailed instructions are furnished. Finish in tan shrivel.

- ★ Super Power—Super Quality 1938's Super Amplifier Value
- ★ Coverage and Quality Reproduction For the Larger Gatherings and Installations
- ★ Low and High Frequency Equalization Controls for Acoustic Correction
- ★ 4 "Beam-Power" Tubes

In this De-Luxe 40-55 watt Amplifier Lafayette offers P.A. users one of the finest high-quality, high-power amplifiers its engineers have ever developed. Designed for coverage of very large groups, as in school auditoriums, political gatherings, large dance halls, nite clubs, swimming pools, banquet halls and small armories, individual bass and treble controls adjust the amplifier for perfect reproduction in any acoustical conditions, thus achieving tonal quality that will meet the most exacting requirements. All in all it is one of the greatest P.A. values on the market today.

**4 "Beam-Power" Tubes**  
To achieve such high quality with tremendous volume 4 beam-power tubes, capable of practically distortionless output, are used. Complete tube line-up includes: 2-6J7s, 2-6C8Gs, 1-6CS, 4-6L6Gs and an 83 rectifier.

**Four Input Channels**  
Two high-gain input channels and two low-gain input channels are provided for use with the modern mikes listed, as well as with phono pickups, photo-cells, electrical instrument sound sources, etc. Dual faders serve as controls for each high gain and low gain channel. Electronic mixer for blending.

**New Streamlined Design**  
The handsome platinum grey finished streamline style cover matches the overall modern circuit design. Set off by the slate grey chassis and chromium and red plastic handle. The final touch of modernity is added by the luminous "Neo-Dial" controls which permit adjustment when the amplifier is used in the dark.

**20 Watts Field Supply**  
A total of 20 watts of field current is supplied by the amplifier to serve 2 speaker fields of 5,000 ohms total resistance.

Fully shielded plugs are used for input, rubber capped plugs for output. Variable output impedances range from 2, 4, 8, 16, 25, 50, 250 to 500 ohms for all requirements.

### Choice of Mike

Lafayette offers, at no additional cost, your choice of above mikes. (1) Amperite-Velocity, with switch. (2) Shure Swivel Crystal. (3) Shure Spherical Crystal. (4) Shure Grille Crystal. (5) Shure Diaphragm Crystal. (6) American Dyaamic.

### Individual Bass-Treble Controls

An outstanding feature of this amplifier is the incorporation of individual bass and treble controls to permit full correction of all acoustical conditions, without affecting the middle tone register, either the bass or the treble may be adjusted to meet all circumstances. This permits a flexibility of operation and tonal quality second to no amplifier on the market today, and a rare value at the extremely low price.

### Reverse Feedback

Designed to make possible high outputs with a minimum of distortion, reverse feedback is featured in this amplifier, another Lafayette development making for perfect reproduction.

### "Co-ordinated" Sound System

Lafayette engineers have selected not only oversized, long-life components throughout but have co-ordinated every unit used in the complete sound system to afford matchless results.

- ★ 1938's Finest—Every Modern P.A. Development
- ★ For High Power, Large Scale, Quality Installations
- ★ 14 Tubes ★ Cathode-Ray "Eye" ★ 4 Inputs ★ AVC-AVE

This Super-Power Lafayette Amplifier is especially designed for use where more than a single large group or area must be covered from a single sound source, as in Exhibitions, Indoor and Outdoor Rinks, overflow political and other meetings, stockyards, multi-speaker call systems in industrial plants, hospitals, sanitoriums, etc. Will amply serve gigantic track and athletic meets in huge stadiums.

Equipped with EVERY modern development known to the science of sound reinforcement, this amplifier provides the ultimate in reproduction as well as tremendous power. Ruggedly built, with oversize components used throughout it will give long, trouble-free operation.

**Variable AVC-AVE**

Automatic control of volume expansion compensates for "compression" in modern recordings and provides high-fidelity reproduction at all volumes. Automatic volume control minimizes acoustic feedback and keeps a constant volume level as the person at the mike alters his position.

**Cathode "Eye" Indicator**

To adjust volume controls for the best results a cathode-ray "Eye" indicator is used.

**Four Input Channels**

Two low gain and two high gain channels for use with any type of microphone, phono pickup or other sound source are provided. Shielded input plugs are used throughout. Photo-cell, electric instrument or other sound source may be used with no change required in the amplifier.

**14 Modern Tubes**

4 "Beam-Power" tubes comprise the double push-pull audio output supplying full rated output with a minimum of distortion. Complete tube line-up is: 3-6J7s, 1-6L7, 1-6G5, 1-6F6, 1-6H6, 1-5N7, 4-6L6Gs and 2-83 rectifiers.

**Illuminated "Neo-Dials"**

Another exclusive Lafayette feature is the luminous, soft-glow "Neo-Dial" Controls which permit complete operation of the amplifier in darkened locations—a boon to night clubs, hotels and other establishments.

**Wide-Range Tone Control**

To adjust the amplifier for acoustical differences in various locations a fully variable, wide-range tone control is incorporated. Full control over the amplifier frequency response is thus possible.

# "Trans-Portable" AUDITORIUM SYSTEM

## 70 WATT SYSTEM "TRANS-PORTABLE"

This, the largest "trans-portable" auditorium sound system, is designed to be completely demountable for easy movement from installation to installation. No tools necessary for individual assembly. Everything in three readily movable, sturdily built and smartly covered, airplane-luggage carrying cases. Customer demand has moved us to place this in our regular line of P.A. systems. So many orchestra leaders, traveling shows, chateaus, political organizations, carnivals, circuses, traveling fairs and the like have had this system custom-built that we have placed it in production and can now offer it at a lower price.

### Four Heavy-Duty Auditorium Speakers

To afford the greatest possible coverage four heavy duty Cimaudagraph type FB-12-11 PM speakers are used. Requiring no field current these speakers afford high fidelity reproduction. They are encased in half sections of each of the speaker carrying cases and have the newest type inclined infinite baffle with elbow type catch for releasing the baffles for access to microphone and cable which is stored there during transportation.

### Automatic Volume Control—Automatic Volume Expansion

With automatic volume control speakers or performers may move freely at the microphone without affecting volume level which remains constant at all times. Automatic volume expansion compensates for compression of sound in recordings and film sound-tracks, affords real high fidelity quality.

### "Beam-Power" Tubes—Cathode Ray "Eye"

14 tubes are used in the 5-stage circuit of this amplifier, fully described on page 34. The output stage uses 4 modern "Beam-power" tubes to supply the great volume and excellent tone quality. Cathode-Ray "Eye" output indicator aids in adjusting volume level and acts as a check on the output.

## REVOLUTIONARY *Third Dimensional* SOUND

Lafayette now makes available for general use "Third-Dimensional" Sound Reproduction. This newest and finest P.A. development, which has been in successful use in the world's finest theatre, the Radio City Music Hall, affords a realism of tonal quality and an illusion of sound emanating from the position of its source which is startling in its approximation to the actual living artist. For theatres, concert halls, modern night clubs, audition studios and other installations where high-power and supreme quality are of utmost importance. The "Binaural" system is available in three sizes for every need. For medium sized installations use 25-35 watt model 380T (total output 50-70 watts); larger installations require 30-40 watt model 382T (total output 60-80 watts); largest installations require model 384T (total output 90-110 watts).

Lafayette's "Binaural" systems actually comprise TWO complete sound systems, with both amplifiers housed in a single metal cabinet finished in attractive platinum grey, with chromium and red enamel center stripe giving fine unity of design. Pictorial diagram illustrated shows the general design, with each microphone leading to its own amplifier. Speakers supplied by each amplifier are to be placed in corresponding position to its microphone. Since all "Binaural" systems are dual systems, actual output is doubled, thus permitting volume of a tremendous order with higher fidelity reproduction. The term "high fidelity", when used in conjunction with any type amplifier other than "Binaural" amplifiers, refers solely to frequency response and distortion level. In "Binaural" amplifiers, the term "high fidelity" includes sound dimension.

- ★ Complete Operating Facilities. Any Remote Station Can Call Master Station
- ★ Remote Can Have Privacy or Turn Complete Control Over to Master Station

This new Lafayette Inter-Communicating System features economical operation, simplicity of installation and a wide range of operating facilities. It affords the most efficient and speedy method of holding direct two-way amplified communication between two persons or departments. The system works equally well on 110 volts a.c. or d.c., and can be installed easily and quickly by anyone—no mechanical or electrical ability is necessary. Merely connect the cables, plug into the nearest light socket, and the system is ready to operate.

A system can be made up of one master station and one remote station, and additional remote stations can be added at any later date. Up to 5 remote stations can be used.

### Ample Volume For Distant Pick-Up

The master station includes a high power amplifier that makes use of the latest type "beam power" tube to insure ample power. Remote stations can be placed at any distance from the master station without affecting volume or quality. Tubes used in the circuit include: 1-6C8G cascade amplifier, 1-25L6 "beam power" output tube and 1-25Z6 rectifier. Excellent filtering insures hum-free reproduction. External electrical devices will not cause noise in the reproducers.

Both master and remote stations utilize high quality permanent magnet type reproducers that employ the latest type magnets.

### Handsome Walnut Cabinets

Master and remote stations are housed in attractive walnut cabinets that will go well with any furnishings. Extremely compact, measuring only 7" x 3 3/4" x 7", they can be placed on any desk where most convenient.

### Easy To Operate

The master station incorporates three controls: a selector switch, a combined volume control and "on-off" switch, and a "push-to-talk" switch. Master station can talk to any one remote station by depressing the talk switch; when released, the talk switch automatically returns to the listen position.

The remote station has one control, a three position switch. In position one, the remote can receive calls from the master station and can answer the master without any other adjustments. In position two (normal), the remote station can receive calls from the master, but neither master nor any other remote can listen in. In position three, the remote station can answer the master or call the master. Thus, by keeping the switch in position two, the remote station can maintain complete privacy.

### Easy to Install

Each remote station is connected to the master station by means of a three wire cable. Terminals on the rear of each unit make it unnecessary to disassemble the units to complete wiring. Complete instructions are furnished.

**HOW TO ORDER**—Use our convenient order blank. Please write legibly; not more than ONE item to a line. Make sure you write the exact stock number and that the price is the one quoted for item that you want. Specify how we shall make shipment. Check the preferred square: "Express", "Parcel Post", "Freight", "Boat", or "Best Way". We shall follow your instructions. If these are inadequate, we will change them if we feel that such a change is to your better interest. **Radio sets should be ordered shipped by express** or if quantity warrants, by freight. If you find it necessary to write for information, do not include your remarks on an order for parts—always use a separate sheet of paper.

**DOMESTIC**—Wholesale Radio Service Company, Inc. buys for cash and sells for cash. That explains our low-price policy. We cannot afford to carry credit accounts and we pass on to our customers the savings effected by the elimination of costly bookkeeping departments. We ship C.O.D. if desired, providing a deposit of 20% accompanies your order. C.O.D. parcels may be shipped ONLY to all parts of the United States and its territorial possessions.
