The enclosure is also equipped with a tuned "sonic tube" that makes use of the acoustic output from the rear of the woofer to produce deep, reinforced bass for which this type of system is famous. And best of all, this system is efficient enough for use even with low powered stereo components — actually make them sound better too! Yet, because it can handle up to 50 watts of power, you can also use this system safely with high powered components, either now or in the future. Includes continuously variable midrange and high frequency level controls and polarized terminals. Enclosure is

- 7.5 db True Forward Gain

"Maximum focus" design featuring large reflector element produces 7.5 db true forward gain — reduces interference drastically with 30db front-to-back ratio. Can be operated vertical or horizontal. Split-wire matching eliminates loading stubs. Rain, snow, and ice cannot detune the quad. Precision matching provides optimum VSWR at center, 1.3:1 or better at band edges. Sturdy, seamless aluminum tubing throughout. Dipoles are steel-core copper-clad cable. Fool-proof assembly — prealigned. Accepts masts up to 1 1/4" pipe or 2" tubing. Less coaxial cable. - Instant-On All Transistor Circuitry
- Balanced Input and Output to Virtually Eliminate Annoying Noise Interference

Designed to fulfill virtually every office, industrial, commercial or home intercom need, Lafayette's deluxe new 6 station intermix system provides complete flexibility and versatility with 3 separate types of installations: (1) MASTER TO MASTER HOOKUP: All Master intercom System incorporates up to 6 separate master stations enabling 3 private conversations or 6 station conferences to be held. Master can initiate calls to any other Master. (2) MASTER TO REMOTE HOOKUP: Enables 1 Master station to communicate with up to 5 remotes either separately or in a six station conference. Remote can be hooked-up private or non private. Remotes can initiate call back to Master, but cannot talk directly to other remotes. (3) INTERMIX SYSTEM USING UP TO 12 MASTERS AND REMOTES: The number of units in this system may be as high as 12 depending on how many masters are used. For example if 3 Masters are used, each Master has 3 of its selector switches available to call 3 remotes, thus giving a total of 3 Masters and 9 remotes or 12 units in the system. The maximum number of remotes associated with any 1 Master is 6 minus the number of Masters in the system. The Lafayette XL-6 intercom utilizes powerful advanced solid state cir-

cuitry for "instant on" operation. Incorporates a balanced 40 ohm input and output circuit design. The advantages of this type of design is that the entire system when operating is virtually not susceptible to noise interference. Master unit has 5 individual station selector slide switches, 2 position press to talk—talk/lock bar, and volume control. Remote unit has 2 position press to talk—talk/lock bar. Handsome walnut wood cabinet with brushed aluminum finish. Includes junction box for wiring.

WIRING INSTRUCTIONS: In a balanced input and output system both Master-to-Master or Master-to-Remote hook-ups use separate 4 conductor unshielded pairs for each master or remote used in the system. Dim.: Master & Remote 7¾"L x 2¼"H x 4¾"D. For 117VAC, 60 Hz. Imported.
