# Belt-Driven "Programmed" Turntables

With 6-Disc Capability—

Pickering 1¢ Cartridge Bonus Too!

B-I-C is a trademark of British Industries Co.,  
Division of Avnet, Inc.

**BELT DRIVE**—Same as on the finest manuals—PLUS slow-speed 24-pole 300-rpm motor for totally inaudible rumble!

Instead of a complicated automatic-play mechanism, these turntables use manual-play design with an entirely separate automatic-play "programmer" — LESS mechanical difficulty, LESS maintenance, LONGER LIFE for turntable and records!

**PROGRAM SYSTEM** — Play a record 1-6 times, play up to 6 records one at a time. Simply set the dial from 1 to 6.

**CARTRIDGE SHELL:** Adjustable overhang (with gauge supplied), adjustable stylus angle for 15° tracking regardless of depth! Foolproof cartridge connector, too!

**CUEING:** Two-way damped cueing with adjustable rate from 1 to 3 seconds!

**ANTI-SKATE and STYLUS FORCE:** Calibrated .25-gram increments on a single linear scale. No separate adjustments.

**FUNCTION CONTROL:** Short-travel touch button cannot jar turntable in motion—outstanding protection.

**TONEARM:** Low-friction, gimbal-mounted—tracks lower than lowest limit of any cartridge now available.

In addition, about six times a year we will offer some special selections (usually at a discount off regular Club prices). A response card will always be enclosed with each magazine.

... If you do not want any selection offered, just mail the response card provided by the date specified

... If you want only the Selection of the Month for your musical interest, do nothing — it will be shipped automatically

... If you want any of the other selections offered, just order them on the response card and mail it by the date specified.

# Resistors and Resistor Assortments

## FIXED COMPOSITION RESISTORS

Molded carbon resistors in 1/8- to 2-watt ratings, 5% and 10% tolerance. Made by leading American manufacturers such as Allen Bradley, Speer and IRC to high industry standards. Insulated to have high breakdown resistance. All have E.I.A. color-coded bands for positive identification of ohmage and tolerance. All are factory-fresh stock with full length leads.

### HOW TO ORDER

Specify Stock Number from the price line, code number and ohmage from the tolerance chart.

EXAMPLE: For a 1/2-watt, 3900-ohm, 10% resistor order as 52 F 3087, 3900 ohms. For the same resistor with 5% tolerance order as 52 F 8087, 3900 ohms.

## HOW TO ESTIMATE PARCEL POST CHARGES

Less than 16 oz., all zones allow 10¢ for first 2 oz., 8¢ for each additional 2 oz. Find the weight of your merchandise in the extreme left-hand column of the chart at right. (1.13). Over 40 lbs. shipped truck or express. See below.
