

TELEVISION SERVICE PARTS

USED ON CATALOG

**A GUIDE TO THE MOST USED
REPLACEMENT PARTS FOR . . .
G-E & HOTPOINT TV RECEIVERS**

**GENERAL ELECTRIC COMPANY
TELEVISION RECEIVER DEPARTMENT
SYRACUSE, NEW YORK**

We at General Electric are pleased to present . . .

the TV Used On Catalog

. . . A brand-new service aid for you!

- This book is designed to help you find—quickly—the correct catalog numbers of the most-frequently-used replacement parts for all television receivers produced by General Electric and Hotpoint since 1946. Make it your constant aid on all service calls and shop jobs!
- You'll find that regular use of this catalog will insure the best and fastest service in parts ordering for you and your customers. This book provides the key to prompt service by putting at your fingertips the correct order numbers for the replacement parts you'll need in most servicing jobs. (For complete parts listing, refer to the appropriate service guide or manual.)
- Contents of this catalog will be kept up to date as a regular part of your Plan D service.

Here are some catalog features . . .

The listing is indexed by model number and grouped by chassis series. It is divided into sections containing color and monochrome receivers.

The current catalog numbers (with the WT prefix) should be used in all of your parts ordering.

The former catalog sequence (3-letter prefix) is shown in *italics* immediately below the current number.

An asterisk (*) after the catalog number indicates that it supersedes the original part.

Replacement items which are no longer available are shown as NLA.

For your convenience . . .

An attractive binder for this text is available from your distributor at a modest price. Done in sturdy blue vinyl plastic with appropriate gold-embossed lettering, it features a five-ring holder for maximum holding power. You'll find it a convenient carrier for the Used On Catalog and for many other pieces of service literature as well!

* Denotes production change
 During production the UHF tuner was changed from ET85X31 (Tuner W/metal shaft) to ET85X33 (Tuner W/plastic shaft).
 The UHF tuner control knobs were also changed from metal to plastic.
