NATIONAL  
RADIO CLUB

Edited by R.H.Weaver

V O L . 2 - 3 6

D X N E W S

M A Y 1, 1935.

Well here it is time to begin work on the last to the regular weekly Bulletins for this season, hereafter during the summer months the Bulletins will be forthcoming around the 1st of each month. The reason we held this off until now was that we have been waiting for the Short Wave data to arrive from Rome and if it does not arrive until Friday of this week we shall send the Bulletins out without that information.

We want to welcome the following as new members of our club: Roger William, Box 543, South Berwick, Maine and Carl R. Rudolph, 54 Chapin St., Holyoke, Mass. We hope these two gentlemen will find their membership in our club very beneficial to their DXing activities.

We want to take this opportunity of thanking everyone who so loyally co-operated with our club this season, the CPC, the clubs that were in the Inter-Club Co-Operation Plan as well as several others that weren't in this plan. The various radio stations and newspapers that served us as publicity outlets and all of the stations that co-operated so generously in presenting many fine DX programs for our club. All of the CPC men having accounts for postage with us are requested to send this information as soon as possible. We want to especially thank the other officers of the club who were such loyal supporters of our club this season.

We want to congratulate Keith L. Freas, 115 Wabash Ave., Kenmore, N. Y. upon the event of the new Singleton which arrived about 10 days ago, named Norman Guilford. Be sure and make an ardent supporter for NRC out of him Keith and accept our heartiest congratulations.

We forgot to mention in our last Bulletin that our club also has another Official Listening Post Observer for Radio News in D. Floyd Smith, Greenville, Ill. who acts as Observer for Illinois.

James L. Trenton our California, Penna. member came the closest to presenting a correct solution to our last issue of Brain Teasers and is thereby entitled to receive the pack of stickers we offered as the prize. Unfortunately we will not have room with this edition for any of these Teasers as we have quite a bit of information on hand for you.

Luther Grim of Red Lion, Pa. sends us word that KFJB 1200 kycs. Marshalltown, Iowa will put on a big DX program on the morning of May 11th at 2:30 A.M., E.S.T. Thanks for this information Lutie.

John E. A. Sanderson of Dunedin, N. Z. sends us quite a bit of information regarding the Aussies and Zeddies. He says that 2YA is to have a 60 KW transmitter within the next year and that the new 3YA in Christchurch was to be on the air by the end of April with 10 KW. 4YA in Dunedin will shortly call for bids on the erection of a building to house their new 10 KW transmitter and it is hoped he says that their station will be on the air by the end of November. There has been a reallocation of the Australian stations which becomes effective on September 1 and information regarding these changes will be found elsewhere in this issue.

We are also printing a complete revised list of the frequency checks inasmuch as there have been so many changes and additions throughout this season, we felt that inasmuch as there isn't much news at this time that now would be a good time to print this list.

NEW AUSTRALIAN FREQUENCIES:- Effective September 1, 1935. We want to thank CDKR and John E. A. Sanderson for this information:-
