# National Radio Club's *AM Radio Log* 25th Edition

We lost a long time friend and dedicated AM Radio Logbook contributor. Through my years of editing the log, Andy Rugg VA3TEE could be counted on to help with contributions to its accuracy. So long Andy, you will be missed. (Wayne Heinen August 7th 2004)

Recent changes to the Log include call letters on FM simulcasts and listings of regional groups of stations in the groups section. The group tables will be found on page 12 of the instructions. We have expanded the listing of the Talk Radio syndications to include the Cox, Salem and WOR talk shows. The expanded indexes, as well as listing of which hosts are on which network, are also found in the instructions starting at page 10.

Formerly called the *National Radio Club Domestic Log*, the first edition of the *National Radio Club Domestic Log* was published by mimeograph and hand-typed stencil in Boston in 1968, with John Callarman providing the typing and the original Boston Publishing Committee the hand labor. The second and third editions were published in Boston as the Boston Publishing Committee changed the method of print for **National Radio Club** publications to commercial offset. A "mid-term" edition was published by the New Jersey Publishing Committee in 1975 and a new edition of the **National Radio Club Log** in the fall of 1976. The log also underwent another technological change when in 1978 the log information went from 3" x 5" cards to a computerized system. In order for us to keep you abreast of the ever-changing AM dial scene, the logbook is now published annually, just prior to the start of the fall listening season.

The roots of the **National Radio Club** *AM Radio Log*, though, date back to the 1930's when RADEX magazine published a log, and the '40's and '50's when the Newark News Radio Club BCB editor Carroll Weyrich produced an annual medium wave log.

The accuracy of an endeavor like the **National Radio Club** *AM Radio Log* cannot be guaranteed, primarily because changes occur daily in the vast amounts of information contained in this publication. Network, format, schedule, and address information is very volatile, and since there are no central sources to which all this information must be reported, it requires close monitoring by many people to keep this information up to date. Information from the FCC and from the stations themselves, as well as from you the user of this log, help to keep the information current and accurate.

The **National Radio Club** publishes *DX News* 30 times a year. By subscribing to *DX News* magazine, you will receive important AM station changes within 3 weeks after we first hear of them.

The **National Radio Club** is a non-profit organization beginning our 72nd year of service by radio enthusiasts for radio enthusiasts. The people who publish the **National Radio Club** *AM Radio Log*, *DX News* magazine and *DX Audio Service*, some with many years of background in the professional broadcasting field, are as interested as you are in the need for accurate and fast information. We hope you will consider joining us as we explore the ever-changing world of AM broadcasting and distant reception.

This edition has received numerous updates by many **National Radio Club** members and other interested AM radio hobbyists. Special thanks go to **Bill Hale** for an exhaustive effort to correct many errors to the Federal Communications Commission data that appear in the log. Bill's work on this edition assures you of the most up-to-date power and antenna information available anywhere. For our Canadian data, a special thanks to **Shawn Axelrod** for that information. Bill and Shawn were by no means the only participants in this Club effort to continue to bring you the best and most accurate log. Many updates were gathered from the FCC database and some network web pages that are available. However, we've found many web pages with data that are hopelessly outdated.

This log is updated through *DX News* Volume 71 Number 29 and IRCA's *SOFT DX Monitor* through the July 2004 Issue.

It is of great importance that the users of the *AM Radio Log* pass to us changes as they occur. The accuracy of the *AM Radio Log's* next edition will be due to the input of DX'ers which helps us keep this publication database up to date. Your input to the next addition can come to us by mail or by Internet e-mail:

# How to read the AM Radio Log

## Call

The call letters of the station or an indication that it is a Voice of America (VOA) station. Calls of stations that have not previously operated New Not on Air or CP FROM on a given frequency contain a #. W# C# K# (with a number for database integrity) indicate New Not on Air stations with no assigned call letters. A small “n” is a nighttime only operation.

## City of license

City of License is shown or in certain cases, cities of authorized station identification. These are shown as they appear in the FCC data base. Even though you may hear multiple cities announced during an ID, that is usually for promotional reasons. My local KCKK-1600 ID’s as “Lakewood-Denver”; Lakewood is the City of License, and Denver is the major market that is served.

## Station Classes

This discussion focuses on AM radio stations contained in the NRC AM Radio Log, specifically those in the United States and Canada. References are made to stations in other countries in North America as pacts were established between the nations’ regulatory agencies as to the enforcement of rules regarding broadcast stations in this region. Since signals in the AM broadcast band travel be-

yond political borders, such agreements were necessitated. Most of the definitions are those of the U.S. Federal Communications Commission.

The story of classes of radio stations goes back to the North American Regional Broadcasting Agreement, which divided the (then) Medium-Wave radio spectrum into three groups of stations: one which served large areas (clear channels); those which served a smaller geographic area (regional channels); and a third for small communities and rural areas (local channels).

Although signals in the medium-wave frequencies are absorbed into the ionosphere during daylight hours, hence ground wave DX is limited by strength of signal, its path, and the receiver. But, they bounce off this level of sky at night and travel hundreds, even thousands of miles.

Protection was granted to a select few stations which were designated I-A Clear Channel operations. These stations were allocated to frequencies upon which only one station was authorized to operate at night, and transmitted from a single, efficient tower with a power of 50,000 Watts (50 kW). These stations were afforded protection not only in their primary service area, they were also protected in their secondary service area. Most of these stations, especially those in the middle of the continent, could be heard coast-to-coast. In the late 1960s, it was determined that vast areas of the west which could not receive interference-free primary service from an authorized AM station nor did not receive a signal strength of at least 1 mV/m from an authorized FM station. These areas were called "white areas". A second nighttime facility, designated Class II-A, was authorized on each of these frequencies occupied by a I-A station. These stations were licensed with up to 50 kW day and night but had to protect the I-A station at night. By the early 1990s, the rules had been altered again whereby the former I-A stations received nighttime protection to only 750 miles from their transmitter, and now many stations occupy these frequencies.

All former Class I-A stations are now designated Class A. All newly-authorized nighttime operations on the former I-A channels, however, must protect the Class A stations so none of their signal will enter this imaginary 750-mile circle. In a couple of cases, this limitation has been shortened. Some of the new nighttime authorizations utilize as little as 1 Watt. Only two of the former I-A clear channel stations operate with directional antenna systems: WWL-870 in New Orleans, Louisiana; and WBZ-1030 in Boston, Massachusetts. In these cases, this decision was elective as both are coastal cities and the signal is directed inland, away from the adjoining bodies of water.

On each of the following channels, one Class A station is authorized in the U.S., operating with a power of 50 kW, non-directional, day and night: 640, 650, 660, 670, 700, 720, 750, 760, 770, 780, 820, 830, 840, 870, 880, 890, 1020, 1030, 1040, 1100, 1120, 1160, 1180, 1200, and 1210 kHz.

Canadian "Class A" stations are assigned to the following frequencies: 690, 740, 860, 990, 1010, and 1580 kHz.

Mexican "Class A" stations are assigned to the following frequencies: 730, 800, 900, 1050, 1220, and 1570 kHz.

The lone clear channel authorized for the Bahamas is 1540 kHz. Class A, Class B or Class D stations may be assigned on 1540 kHz but are restricted to limiting its signals in the direction of the Bahamas. Also, no station located less than 650 miles from the Bahamas is licensed to operate at night on 1540.

Canada and Mexico do not follow the same guidelines when assigning more than one station on these frequencies. And, a few Mexican stations on their clear channels have used power levels as high as 250,000 Watts.

On the frequencies 680, 1110, 1500, 1510, 1520, 1540, 1560, typically two "Class I-B" stations were authorized to operate with 50 kW at night, but each was restricted somewhat by utilizing directional antenna patterns which protected the other station. Other stations on these frequencies either had to reduce power and/or employ a directional pattern so as not to interfere with these stations, or shut down altogether during nighttime hours. Former Class I-B stations have also been designated as Class A. Class B and Class D stations are licensed on these frequencies.

Several frequencies were designated as shared clear channels. They are: 540 (Canada and Mexico), 940 (Canada and Mexico), 1000 (U.S. and Mexico), 1060 (U.S. and Mexico), 1070 (U.S. and Canada), 1090 (U.S. and Mexico), 1130 (U.S. and Canada), 1140 (U.S. and Mexico), 1190 kHz (U.S. and Mexico) and 1550 (Canada and Mexico). On these frequencies, the designated countries were allowed to assign "Class 1-B" stations, with the only restriction being they could not interfere with stations on the same frequency in the other country.

Even older stations on the regional channels received some degree of protection. Stations on these frequencies were limited to 5 kW of power. Although these regional channels were populated by 60-70 stations, only a few were authorized to operate at night. Most employed multiple tower systems to direct their signal away from the few other stations authorized on those channels at night. The majority of stations on these channels were licensed to operate during daylight hours only and were called "daytimers". Lobbying on behalf of the Daytime Broadcasters Association in the 1980s resulted in the authorization for almost every station on these regional channels to operate at night but with very low power, typically from 10 to 100 Watts. Today, a few stations on regional channels have been authorized to operate with up to 50 kW but must employ highly directional antenna systems, especially at night. Regional channels are 550, 560, 570, 580, 590, 600, 610, 620, 630, 790, 910, 920, 93, 950, 960, 970, 980, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, 1320, 1330, 1350, 1360, 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1590, 1600, and the new "expanded band" of frequencies (created in the mid-1990s) from 1610 through 1700 kHz. The majority of stations in the expanded band operate non-directional with 10 kW daytime and 1 kW nighttime.

The need for local radio service reached many small towns and the "Local Channel" was created. The six local channels are 1230, 1240, 1340, 1400, 1450, and 1490 kHz. Originally, these stations were authorized 250 Watts day and night, non-directional. But even these low-powered stations have seen change. In the early 1960s stations on the local channels were authorized to increase their daytime power to 1000 Watts while nighttime operation was limited to 250 Watts. Then in the 1980s, they were allowed to leave their 1000 Watts radiating 24 hours a day. The theory was that they were only going to interfere with one another. Even with their maximum power, signals on these frequencies rarely are heard greater than 20-30 miles. However, during rare opportunities, some of these stations have been logged by DXers several hundred miles away. There are a few U.S. stations on these Local Channels which use directional patterns, but generally they are in the Northeast where stations are spaced closer than other areas. Also, there are some Canadian stations on these frequencies which are authorized higher powers but also must utilize highly directional antenna patterns to avoid interference.

In 1987, all AM radio stations in the U.S. were classified as A, B, C, or D.

#### **Class A**

A "Class A" station is an unlimited-time station that operates on a clear channel and is designed to serve a primary and secondary over an extended area at relatively long distances. Its primary service area is protected from objectionable interference from other stations on the same and adjacent channels, and its secondary service area is protected from interference from other stations on the same channel. "Class A" stations must use not less than 10 kW, nor not more than 50 kW.

#### **Class B**

A "Class B" station is an unlimited time station which is designed to serve only a primary service area. "Class B" stations are authorized to operate with a minimum power of 0.25 kW (or, if less than 0.25 kW, an equivalent RMS antenna field of at least 141 mV/m at 1 km) and a maximum power of 50 kW, or 10 kW for stations that are authorized to operate from 1610-1700 kHz. There are some "Class B" stations in Canada on the "Local Channels".

### **Class C**

In the U.S., all stations on the Local Channels are "Class C".

### **Class D**

"Class D" stations operate either daytime, limited time or unlimited time with nighttime power less than 0.25 kW and an equivalent RMS antenna field of less than 141 mV/m at one km. Class D stations shall operate with daytime powers not less than 0.25 kW nor more than 50 kW. Nighttime operations of Class D stations are not afforded protection and must protect all Class A and Class B operations during nighttime hours.

## **Definitions of Operating Hours**

### **Daytime**

Daytime Hours is that time from sunrise to sunset, local time.

### **Nighttime**

Nighttime Hours is that time from sunset to sunrise, local time.

### **Critical Hours**

Critical Hours (CH) is that time from Sunrise to two hours after Sunrise, and from two hours before Sunset until Sunset, local time. During that time, certain stations may be operating with reduced facilities.

### **Canadian Restricted Hours**

Canadian Restricted (CR) Hours are similar to Critical Hours, except that the restriction is from one and one-half hours before Sunset until Sunset, local time. During that time, certain stations may be operating with reduced facilities.

Operation during Critical Hours and Canadian Restricted Hours is limited to stations on Clear Channels. When the rules were originally set forth, the times at which stations were required to lower their power level and/or change pattern, or in the case of a "daytimer", to shut down for the day were very strict. Since the length of each day varies and changes on a daily basis, the FCC instituted the policy of first determining the daily sunrise and sunset of each station, then averaging to the nearest quarter-hour for each month. The rules were relaxed to include CH and CR operation, whereby stations were allowed to operate with reduced power levels (in some cases, multiple steps) up to two hours before local sunrise and after local sunset. This made it possible for most stations to operate during the morning and evening drive times, especially in the winter months. For many stations, these times generated the most listeners and were instrumental in generating needed revenue.

### **Pre-Sunrise Authority (psra) and Post-Sunset Authority (PSSA) -**

Another relaxation of rules occurred in the 1980s which allowed stations to operate from 6 AM local time to the time of their local sunrise (psra) and from local sunset until 6 PM local time (PSSA), usually at a reduced power level. This again allowed stations to serve their communities during drive times.

Another point to remember is that originally all stations were licensed to operate with 250, 500, 1000, 5000, 10000, 25000, or 50000 Watts. Today, stations are not held to these strict requirements. This information is meant as a guideline to understanding the medium-wave broadcast band as it exists in North America. We as DX'ers have to be a vigilant group when trying to keep up with the numerous changes and seemingly endless array of anomalies associated with the stations we listen to, and pursue as a hobby.

## Antenna Designations

- D1** Daytime Operation Only - Non-Directional
- D2** Daytime Operation Only - Non-Directional during Daylight Hours; Directional during Critical Hours (CH)
- D3** Daytime Operation Only - Directional
- D4** Daytime Operation Only - Directional all operating hours, using one pattern during Daylight Hours and a second pattern during CH
- D5** Daytime Operation Only - Directional during Daylight Hours; Non-Directional during CH
- L1** Limited Time Operation - Non-Directional (Hours are based upon sunrise and sunset at the city in which the dominant station on the frequency is located)
- L3** Limited Time Operation - Directional
- N1** Night Time Operation only (LSS to LSR) - Non-Directional
- N2** Night Time Operation only (LSS to LSR) - Directional
- SHx** Specified Hours, as directed by the station license. The number corresponds with the designation for Unlimited stations. Specified Hours stations are those which would normally be Unlimited, but due to financial or other considerations have petitioned for a waiver of the minimum schedule of 0600 -2200 local time period.
- STx** Shared Time operation - Time is shared with a second station on the same frequency. The number corresponds with the designation for Unlimited stations.
- U1** Unlimited Time Operation - Non-Directional All Hours
- U2** Unlimited Time Operation - Non-Directional Days; Directional Nights
- U3** Unlimited Time Operation - Directional All Hours (same pattern)
- U4** Fulltime operation; different pattern day and night (If a station uses different power levels day and night, and the pattern is the same, the FCC recognizes this as two separate patterns.)
- U5** Unlimited Time Operation - Directional Days; Non-Directional Nights
- U6** Unlimited Time Operation - Non-Directional Days; Directional CH and Nights (same pattern)
- U7** Unlimited Time Operation - Directional All Hours with three (Day, CH and Night) different patterns
- U8** Unlimited Time Operation - Non-Directional Days; Directional CH and Nights (different patterns) [
- U9** Unlimited Time Operation - Directional Days and Nights (same pattern); Non-Directional CH
- U10** Unlimited Time Operation - Non-Directional Days and Nights; Directional CH [Example: 850 in Nome, AK]
- U11** Unlimited Time Operation - Directional Days and CH (different patterns); Non-Directional Nights
- U12** Unlimited Time Operation - Non-Directional Days and CH; , Directional Nights
- U13** Unlimited Time Operation - Directional Days and CH (same pattern); Directional Nights using a different pattern
- U14** Unlimited Time Operation - Directional Days and Nights (different patterns); Non-Directional CH

## Time Zones

A = Atlantic (E +1) or Alaskan (E -4) N = Newfoundland (E +1 1/2) E = Eastern C = Central (E -1) M = Mountain (E -2) P = Pacific (E -3) H = Hawaiian (E -5) (+) = Does not observe Daylight time

## Hours of Operation

|   |   |
|---|---|
| Listed in 24-hour format. Hours in () are Sunday or days specified. |   |
| 24 hr   | All-night operation Silent Period unknown               |
| 24 hr M0000-0555  | Indicates Monday morning silent period                  |
| NSP   | No Silent Period  |
| Silent  | Station was off the air at press time.                  |
| LSR   | Local Sunrise   |
| LSS   | Local Sunset  |
| LSS+  | Operates up to two hours after local sunset with a PSSA |

## Slogans and other Notes

//**CBK-540** indicates the station is parallel CBK which operates on 540khz. //**CFQC 92.9** would be operating in parallel CFQC FM 92.9.

//**La Cadena Cristiana** is a station that is in a larger group of stations that operate in parallel. These are listed in the Groups section of the instructions on page 12

**SX** Operates a synchronous transmitter on the same frequency in the location shown.

Some stations use a slogan instead of their call signs to identify themselves to their listening public. Slogans appear in quotes.

Also, some additional program information is listed here when a station may carry an unusual language or music type.

## Additional Powers

This column shows powers used in the special hour categories as outlined in the Definitions of Operating Hours section of these instructions. If known, we list PSSA powers here. Those stations that we know have no PSSA powers are also listed as having none.

Also found in this section are Special Operating Authorities designated as **STA**. The FCC under certain situations will allow a station to operate with facilities other than those show on their license. These include conditions such as lower power non-directional operation in the event of a tower being destroyed.

In some cases you will also find conflicts listed in this area. This occurs when the official FCC information doesn't currently match the station's claimed parameters.

## Application & Permit Codes

**Applications for New Stations;** Since many of these applications are never approved we have stopped trying to include them in the LOG. This information is available from the *AM Switch* column in both *DX News* and the *DX Audio Service*.

**New Not on Air;** The station has been granted permission to operate by the licensing authority but is not yet on the air.

**AP** = Application (AP U1 1000/1000) The station has applied to the licensing authority for a change to an on-the-air station. This is the first step in the process. If approved, a Construction Permit will be issued.

**CP** = Construction Permit (CP U1 1000/1000) The application was approved and the construction permit granted.

**FROM:** The station has applied for (AP FROM 700) or has been granted a Construction Permit (CP FROM 700) on this frequency; however, it is still currently operating under the frequency listed to the right of the "from". The call will end with a # sign.

**TO:** The station currently operates on this frequency and has either applied for the other frequency (AP TO 700) or has been granted a CP for the other frequency (CP TO 700).

## Formats

|                  |  |
|------------------|--|
| <b>AC</b>        | Adult Contemporary current hits  |
| <b>AC/EZL</b>    | Light Adult contemporary   |
| <b>AC/OLD</b>    | Adult Contemporary Based Oldies  |
| <b>AOR</b>       | Album Oriented Rock. Current and Classic Album cuts  |
| <b>Asian</b>     | Asian language ethnic broadcasts   |
| <b>BIZ</b>       | Business Format  |
| <b>Brokered</b>  | Programming sold to individuals and organizations in blocks. This can include infomercials, ethnic, religious or anything that the purchaser may want to air.  |
| <b>Bluegrass</b> | Bluegrass music  |
| <b>C&amp;W</b>   | Country & Western  |
| <b>CHR</b>       | Top 40 Rock  |
| <b>CLA</b>       | Classical Music  |
| <b>EDU</b>       | Educational Programming  |
| <b>EE</b>        | English Language Programming   |
| <b>ETH</b>       | Programming directed at various Ethnic groups  |
| <b>EZL</b>       | Also called "Middle of the Road"   |
| <b>FF</b>        | French Language Programming  |
| <b>FLK</b>       | Folk   |
| <b>GOS</b>       | Gospel   |
| <b>JAZ</b>       | Jazz Programming   |
| <b>JJ</b>        | Japanese Language Programming  |
| <b>KID</b>       | All Kids Programming   |
| <b>NAGE</b>      | New Age music some current jazz and folk   |
| <b>NOS</b>       | Nostalgia Music of the 30's, 40's, 50's; Big bands, "standards"  |
| <b>NWS</b>       | News   |
| <b>OLD</b>       | Oldies (Anything pertaining to Older Rock Music)   |
| <b>PP</b>        | Portuguese Language Programming  |
| <b>Pol</b>       | Polish Language Programming  |
| <b>Polka</b>     | Polka Music  |
| <b>RAP</b>       | Rap or Hip Hop style music   |
| <b>REL</b>       | Religious Programming  |
| <b>REL:AC</b>    | Contemporary Christian Music   |
| <b>Rock</b>      | Rock'n Roll of some form   |
| <b>ROK</b>       | Heavy Metal Music  |
| <b>SPT</b>       | Sports or Sports Talk Programming  |
| <b>SS</b>        | Spanish Language Programming   |
| <b>Tejano</b>    | A mix of English and Spanish language music and announcements  |
| <b>TLK</b>       | Talk Programming (generally telephone call-in programs)  |
| <b>Tourist</b>   | Travelers Information and tourist attraction promotion   |
| <b>UC</b>        | Programming for a Black audience "Urban Contemporary"  |
| <b>VAR</b>       | Variety (CBC net is a good example) a bit of everything - also "fill in" music or features when a brokered format station does not sell all its time. You never know from one day to the next what they'll do! |

Many specialty and foreign language formats are actually spelled out in the format area of the given station. The *AM Radio Log* is meant to be a DX'ers tool and is not intended to be an ultimate guide to the myriad of formats that have surfaced over the years.

":" indicates a combination of formats or language and format, e.g.=SS:REL would indicate that the station has religion in Spanish.

"/" is used to separate multiple formats and does not indicate day/night formats. e.g., C&W/CHR  
d= day format; n=night format; an = all night e.g., C&Wd/ACn

am = morning programming

## Notes on Networks

ABC, JRN and WW1 are suppliers of a great variety of specialty formats. These include almost every music format from NOS to ROK. WW1 and A also carry a variety of talk shows that are syndicated. There are stations that have news from one source and music programming from another source. In some instances, like the WW1 AM-only NOS format "Memories", slogans are used almost exclusively and there is never a mention of the actual network affiliation. Many network stations do their own newscasts, using only voice cuts from the audio services or the networks. Some will pick up the network commercials and integrate them into their own broadcasts without using network newscasts. Many stations carry specific services from a network. Many stations listed with A for ABC may only carry Paul Harvey.

|      |                                    |                                     |
|------|------------------------------------|-------------------------------------|

And all those who contribute their timely loggings to the National Radio Club's DX News Magazine and the National Radio Club's DX Audio Service

## About The National Radio Club

Our magazine, *DX News*, is a must for the serious or casual DX'er and is only available through the **National Radio Club**. Subscribing to either *DX News* magazine or to *DX Audio Service* entitles you to membership privileges, including discount prices on many **National Radio Club** products.

In the early days of radio broadcasting, when the listening audience was comprised of amateur operators, experimenters, engineers and the like, a new hobby had its beginning. DX, in the parlance of telegraphers, meant long distance, and gradually came to mean distant reception as well. The early listener had usually constructed his own receiver, and his big thrill was not just from the news or the music he heard, but the realization that his assortment of glass and wires with a bed-spring antenna was really bringing in voices and music all the way from Pittsburgh, Chicago or Los Angeles!

It was a natural development for the hobbyist to tune up and down the dial, logging the numerous station that could be heard. These stations were eager to hear from their listeners. This was the only way, at the time, that they could learn how well their signal was getting out. Listeners were asked to write letting the station know from where, how well, and under what conditions the station's signal had been heard. In return, stations began sending cards or letters thanking the listener and confirming his or her reception. With the collecting of these verifications (QSL's), the DX hobby was born.

Numerous clubs were formed in those early years for the sole purpose of exchanging information about equipment, antennas, tuning tips and general information about the hobby and the stations. The **National Radio Club** was one of these early pioneer clubs, getting its start in York, Pennsylvania in 1933, when a small group of DX'ers organized and began to mimeograph a bulletin, *DX News*. Now after 60 plus years of continuous operation, *DX News* is still the premier publication for the medium wave (AM) DX'er. Membership soon spread from York to all parts of the U.S. and Canada and now to members around the world.

Over the years the **National Radio Club** has gained recognition as a leader among DX clubs. The **National Radio Club** has pioneered many areas, the offset printing of bulletins, the *NRC Domestic Log* (now *AM Radio Log*), numerous books on antennas and receivers, and information books on the hobby. The **National Radio Club** is still growing and improving, with new books and the *DX Audio Service* one-of-a-kind Audio Magazine.

*DX News* offers 30 bulletins per year, weekly in winter, monthly in summer, over 750 pages a year of DX and radio information. The *DX Audio Service*, established in April 1985, is designed to serve the sight restricted, or traveling DX'er, and is popular with commuters, who listen as they drive to work. *DX Audio Service* consists of a 90 minute cassette and is issued once a month. Features are similar to *DX News* but extends its coverage to FM, a Travelogue and Marketscope features.

For a copy of *DX News* write **NRC - Box 5711 - Topeka, KS 66605-0711** and enclose a 37¢ stamp. For a sample copy of *DXAS's* cassette write **NRC, Box 164, Mannsville, NY 13661** and enclose \$3.00.

If you are interested in AM DX'ing, write for a sample of our magazine or our audio service. We would be happy to welcome you into the **National Radio Club** family!
