Dear Kermit,

It is with pleasure that we are in receipt of your recent report on reception of WNRC.

This letter is to VERIFY your hearing of WNRC, New Rochelle, New York, on the morning of March 15, 1954, from 3-5 A.M. EST. The records and announcements reported were correct in every detail.

WNRC uses a Gates 500 watt Xmitter, with Raytheon turntables, and a 120' antenna, non-directional. The weather at New Rochelle was clear and cold.

To date, we have received reports from about 50 persons, from about 25 states, and three from Canada. The most distant reports are from California.

Thanks for letting us know how we were coming in at Walnutport, and also thanks for the comments. They are appreciated.

Best of the better brand of DX to you, Kermit, and 73s.

BIG RIVER BROADCASTERS, INC.

527 BROADWAY

KINGSTON, NEW YORK

FEDERAL 1-6300

Kermit Geary  
R.D. 2, Box 298  
Walnutport, Pa.

Dear Kermit,

This is to verify your reception of our station at 6:03 AM on August 28, 1959.

WBAZ went on the air for the first time August 15, 1959, and your letter was one of the first to reach us with a DX report. As a new facility we are naturally pleased and anxious to receive signal strength and interference info. Starting September ninth and the second Wednesday of each month thereafter we will be making frequency checks with a 1000 cycle tone and ID's between 12:20 and 12:35 AM EST. We hope you will pass the word to your fellow club members to be listening for us.

WBAZ is a non-directional daytime station operating with 500 watts from a remote transmitter located just west of Kingston adjacent to the NY Thruway. All equipment is Gates including a BC 500T feeding a TCA  $\frac{1}{4}$  wave guyed tower 163 feet high. Besides the standard studio items we boast of our dualux dual channel console which includes two separate program amplifiers and meters, a monitor amplifier, an independent cue-intercom system and more functions than we know what to do with.

The unique feature of the WBAZ operation is the "Showroom Control Room" located in the heart of Kingston's main business thoroughfare. Next time you are vacationing in the Catskills be sure to stop in and say hello.

Sincerely,

Bill Draper, CE

-----  
September 24, 1960.

Chief Engineer,  
Radio Station W-O-T-T,  
Watertown, N. Y.

Dear Sir,

I have pleasure in reporting that I enjoyed fairly good reception of your Radio Station WOTT during its regular broadcasting schedule on the morning of Friday, September 23, 1960. I tuned in to the Big Sound as you signed on the air at 5:58½ A.M., Eastern Daylight Saving Time, and I heard the opening devotions, followed by a program of popular recorded music, the weather report, and commercial announcements until 6:25 A.M., E.D.S.T. WOTT was transmitting on its assigned frequency of 1410 kilocycles with an announced power of 5000 watts, and put a surprisingly good signal down here into Pennsylvania on this occasion. I am situated in the eastern part of the Keystone State, 60 miles North of Philadelphia and 90 miles West of New York City.

WOTT's signal in this area had excellent strength, S-9 +, with an input voltage into my receiver of 20 microvolts as measured on the signal-strength meter. Fading was negligible, and there was no atmospheric static. Some interference was encountered from station KQV, Pittsburgh, Pa. (235 miles West of here), which was also operating with a power of 5000 watts on your frequency of 1410 kc. However, your powerful transmission generally overrode the interference until 6:25 A.M. in a fairly clear condition (Readability-4), affording intelligible program reception at this distance from Watertown. After 6:25 A.M. station WING, Dayton, Ohio, began to cut in on the same channel, and around 6:29 A.M. our local station WLSH, Lansford, Pa., signed on the air on 1410 kc., thus ending DX reception on your frequency. During my reception it was noted that your carrier was steady, clean-cut, and fully modulated. The tonal quality of both speech and music was excellent. It was a pleasure to hear WOTT reaching down here into Pennsylvania in such fine shape on this occasion, and you are to be congratulated on the power and efficiency of your transmitting equipment.

I heard WOTT on my National "HRO" 9-tube communications-type superhet, 1935 model. My antenna is a single-wire inverted "L", 150 ft. long and 30 ft. high, extending toward the Southeast, with the lead-in to the receiver coming off the Northwest end. My ground connection is made to an iron water pump in a well 175 ft. deep. The weather here at the time of my reception was clear, with the temperature at 41 degrees Fahrenheit.

10 July 1985

Kermit Geary  
1266 Riverview Drive  
Walnutport, Penna. 18088

Dear Kermit,

Thank you for your letter of 29 June and copy of reception report of 5 June. I do apologize for getting back to you rather late on this but the intentions were good, I assure.

In your reception report, the other partner is Alan H. Andrews. Other than that, it was an excellent report and I am happy to confirm that it was indeed WQKA that you heard.

Enclosed is a copy of our coverage map and a couple of our new bumper stickers.

Thanks for your report and your patience.

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'Mark E. Feiock', is written over the typed name.

Yes, it was WRKL that you received on 2/14/65 at 5:23 PM.  
WRKL operates Directional Daytime on 910 KC from New City,  
New York with twin towers 270 feet tall. WRKL began broad-  
casting on July 3, 1964 with 1000 watts of power.

As we're still a young station please excuse the delay  
in answering your request for confirmation. We hope to have  
QSL cards in the near future and we will send you one as  
soon as we get them.

Thank you for taking the trouble to write to us. The  
technical information is useful to us in determining just  
how well our signal is getting out.

Good luck,

  
Peter P. Brooks  
Chief Engineer

Rome NY

Please confirm my reception of station WRNY, Rome. I shall be happy to receive your reply, kindly verifying the fact that I heard your broadcast as reported in this letter. Return postage is enclosed for your reply. As proof that I was tuned to WRNY, I give the following log of program items to which I listened:

WRNY, 1350 kc.; Saturday morning, April 29, 1961,

6:12 to 6:23 A.M., Eastern Standard Time:

6:12 A.M., Announcement that this portion of the program has been presented by a Livestock Exchange in Vernon, N.Y., "Central New York's largest livestock exchange".

6:13 to 6:15½ A.M., Country-style song.

6:15½ A.M., The temperature was announced as 38 degrees in downtown Rome. Weather forecast for to-day (Saturday), Sunday, and the outlook for Monday.

6:16 to 6:18 A.M., "Gonna Find Me a Bluebird", sung by Marvin Rainwater.

6:18 to 6:20½ A.M., Farm Market Report.

6:20½ A.M., The time was announced as "20½ minutes past 6 o'clock".

6:20½ to 6:23 A.M., "That Was Before I Met You", sung by a male vocalist.

Please compare the above data with your Station Log for the morning of Saturday, April 29th, and if my report is correct, kindly send me a reply confirming my reception of WRNY, Rome, on 1350 kc. Your attention to this request will be greatly appreciated.

Best wishes to you, sir, and to WRNY and its Personnel for continued success in broadcasting. I hope to have the pleasure of hearing your programs again on future occasions when atmospheric conditions are favorable. Looking forward to receiving your reply in confirmation of my reception of WRNY, for which I thank you,  
I am,

Very truly yours,

*Kermit Geary*

Dear Sir:

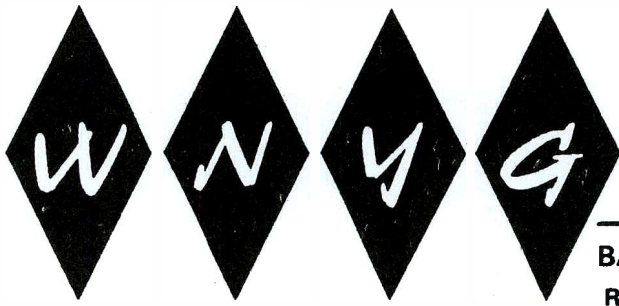

Thank you very kindly for your letter reporting reception of WNYB on Friday at 4:50 A.M. until 5:06 A.M., E.S.T. on 1080 kilocycles. Your letter is sufficient to indicate to us that our signal is doing all right, and that you have correctly logged the program material featured at that time.

Here is a wish that you continue to hear WNYB with clarity and good signal strength in the future.

Yours truly,

WESTERN NEW YORK BROADCASTING CO.

November 24, 1976

Dear Kermit:

Thank you for your November 21st letter of signal confirmation on 1440 Gospel Radio! We have received a few DX'ers in the past...one as far as Chicago! That was really a freak air skip, wasn't it?

This letter will confirm that your program log is correct for that Sunday at 6a.m. It's always a pleasure to receive outside mail like this in regards to our signal. Although your listening time is brief due to other incoming frequencies, we do appreciate you listening just the same.

I have enclosed a program schedule for your files and of course, you now have our letterhead for your club. I'm originally from West Reading and know the area well. Good luck DX-ing and we'll keep your letter on file. Thank you for your nice comments regarding our gospel broadcasting. May I personally take this opportunity to thank you on behalf of our Christian staff for such a lovely letter. It was very much appreciated by all.

Warmest regards,

Alan Fritch  
WNYG Program Director

Dear Mr. Geary:

This is a letter of confirmation of your reception on Saturday, February 13, 1982. Each Saturday we air an Italian Language Program called "The Continentals" from 3:00 PM - 8:00 PM. Your log kept from 6:11- 7:12 PM was incredibly accurate.

We deeply appreciate your notifying us of your reception of WNYM and hope to hear from you again in the future. WNYM operates on an assigned frequency of 1330 kilohertz as authorized by the Federal Communications Commission. WNYM is a 5000 watt station.

Thank you again for your response.

Sincerely Yours,

December 12, 1987

Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Kermit,

Thank you for your well-detailed report of reception for WXRA dated July 25, 1986. I apologize for the delay in responding to you; your report was put into a file in our operations manager's office, and brought to my attention by our new operations manager just yesterday. I do appreciate the enthusiasm you have for your hobby, as well as the service you provide to radio broadcasters, being also a National Radio Club member.

WXRA is licensed at 1000 watts during daylight hours, and 58 watts post-sunset. Our actual power is currently about 550 watts, as our transmitter is due to be overhauled shortly. Also in-the-works is our move to 1200 khz, with a nighttime power of 1000 watts, aimed to the south-southeast at night. With no interfering stations, you may be able to receive WXRA after sunset. The new two-tower array should be up, hopefully, in about six weeks, and testing on our nighttime pattern will begin.

WXRA runs the Satellite Music Network's "Stardust" format, plus carries ethnic programming, New York Giants football, and Syracuse Chief's baseball.

Again, Kermit, thanks for your report, and if you're ever passing through Syracuse, feel free to give me a call.

Sincerely,

A handwritten signature in blue ink, which appears to read "Phil Wayne". The signature is fluid and cursive, written over a white background.

Phil Wayne,  
Account Executive

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Mr. Geary,

I apologize for the delay in responding to your excellent and detailed reception report, but you can appreciate that starting up a new radio station with a small staff is a time consuming endeavor.

As you already know, WYSL operates from one-half hour before local sunrise to local sunset with 500 watts on 1030 kHz. We utilize a nondirectional, full one-quarter length tower, 247' in height. We run dual RCA BTA-1R 1KW transmitters in alternate-main configuration. These units are cut back to 500 watt operation by slight modification of the power supply to provide lower PA drive. It might interest you to learn that one of these transmitters was on the air in your neck of the woods --- and the transmitter you logged on February 20, 19987, was the standby unit for WYNS, 1150 kHz, in Lehighton, PA. I was in Lehighton last fall to inspect this unit for purchase, and enjoyed your area of Pennsylvania very much.

You may also be interested to learn that WYSL has applied for a power increase to a full 1 KW on 1030 kHz, which may improve your DX'ing. In any case, we at WYSL wish you best of luck and continued success in your hobby.

Of course, your report is excellent and is entitled to full verification.

Best Regards,

Robert C. Savage  
President/General Manager

---

April 13, 1967

Mr. Kermit Geary,  
R. D. 2, Box 298  
Walnutport, Pa. 18088

Dear Sir:

Thank you for your reception report of April 2, 1967 and please accept this as verification of your reception of WRRC.

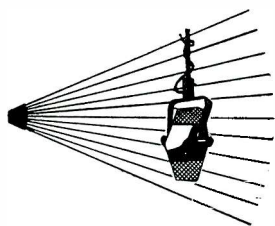

WRRC transmits with a power of 500 watts using a 3 tower directional array directed  $301.5^{\circ}$  or more or less northwest from Nanuet, N. Y., were the station is actually located. There is one major lobe in the northwest direction with three small local lobes. 15 miles (approx) south, splatter from WADO on 1280 kc. knocks us out. So, as you can see, you are approx. broadside to our lobe and in an area of weak signal strength.

The equipment here is Gates Radio Co. The transmitter is actually a kilowatt cut back to 500 watts. The transmitter is all transistors except for the one output tube.

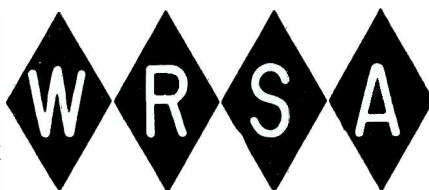

Again thanking you for your most detailed report.

Very truly yours

John C. Reynolds, c.e.

DAVE FROST, CHIEF ENGINEER

MEMBER: REGIONAL GROUP, INCORPORATED

MR. KERMIT GEARY  
1266 RIVERVIEW DRIVE  
WALNUTPORT, PENNSYLVANIA, 18088

February 3, 1986

Dear Mr. Geary,

We are pleased to confirm your reception of WRSG on JANUARY 27, 1986, from 4:57 PM to 5:02 PM, EASTERN STANDARD TIME. The program details you mentioned were confirmed by our program log, and by our News Director, Kathy Whyte. We do not have new Q.S.L. cards for the call letters WRSG, but I hope this confirmation on our new station letterhead will suffice.

I was interested in your note regarding confirmation of reception in 1947. I just spoke with Charlie Hallinan, WKOP's first Chief Engineer. He says "Hello" and says he remembers your first WKOP reception report. Charlie is looking for your report in his file. He is also trying to find an old Q.S.L. card for you. The original Raytheon transmitter that was used on 750 K.C. is still used at night on our present frequency of 1360 K.C. It is a 1000 watt transmitter operated at 500 watts into a three-tower directional array. During the day we use a 5000 watt C.C.A. transmitter with a slightly different directional pattern. Both patterns put the major signal lobe to the north.

I am enclosing a copy of a photograph taken in 1947 showing the WKOP tower being erected. From 1947 to 1950 WKOP operated during the day on 750 K.C. with 1000 watts power as you know. In 1950 the frequency was changed to 1360 K.C. and night operation was added. (1000 watts non-directional day, 500 watts directional at night.) It was necessary to remove the top 75 feet of the tower in the photograph and add two additional towers. In 1955 the daytime power was increased to 5000 watts with a directional pattern similar to that used at night.

In August of 1985, I was hired as Chief Engineer of WKOP-AM and WAAL-FM. Charlie Hallinan retired a couple of years ago but is still active in the local chapter of S.B.E. (Society of Broadcast Engineers). Charlie built much of the transmitter equipment still used at this time. He put the towers up, built the antenna phasing equipment, and designed the remote control switching equipment, used to control our transmitters from our downtown studio. I am striving to maintain the tradition of excellence started by Charlie.

Thanks again for your detailed reception report. I have no trouble confirming your reception of WRSG. I wish that all the reports we receive could be as detailed as yours. Occasionally I do some DXing in the Standard Broadcast Band. The main receiver I use is a Fisher direction finder with a shielded loop about 18 inches in diameter. I purchased it at a Hamfest a couple of years ago. It really pulls in the stations. Since I became Chief Engineer of WRSG I don't have as much time for DXing as I used to. I do my transmitter maintenance after midnight. When it is necessary to work on the 500 watt transmitter, I put the 5000 watt transmitter on the air. Listen for the Larry King Show on 1360 K.C. after midnight some night. 73's Dave Frost

Walnutport, Pa.

Dear Sir:-

This will verify your report of reception of WRWR as reported in your letter of February 28th. You are correct, that we have recently changed our call to WXXW, and we shall be pleased to receive a reception report from you of WXXW.

Your comments on the relative strength of our signals and of other signals on the same frequency were very helpful to us in testing our directional antenna.

Thank you for enclosing your log and the clipping. We are returning your log sheet as you requested.

Very truly yours,

Arthur F. Schoenfuss  
Chief Engineer

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Dear Mr. Geary,

Please allow me to apologize for length of time that it has taken, to get you this letter. It was certainly a pleasure to speak with you on your recent visit to Olean, NY.

This letter is to confirm your reception of WOEN-AM at 1360 kiloHertz on the mornings of November 12<sup>th</sup> & 13<sup>th</sup> in the year 2000.

At the time of your reception, the station was operating at 1000 watts.

The slogan "the Sunshine Station," that you heard during the early morning broadcast was probably a reference that was made by Mr. Bill Connelly, our AM "morning guy". Bill operates the AM, weekday mornings from 6am until 9am offering news, sports, & weather, along with a vignette, we call "Viewpoint" (News and Views on local issues.) a program that airs from 8:05am until 8:30, following the CBS radio network news. From 8:30 until 9am, we run a (T)radio program called "The Hotline". This program allows listeners to call in... to buy, sell or trade anything of value.

WOEN 1360AM is more commonly referred to as: "Hometown Radio". Offering a satellite music format, known as "The Music of Your Life", with celebrated personalities like Wink Martindale and Gary Owens.

As was stated in your initial letter, reception conditions may improve "with the colder winter weather," that is once again, on our doorstep.

Again, please allow this letter to serve as "long overdue" confirmation and please keep us posted on any future reception!

Yours in broadcasting,

John R. Sirianni, GM  
WMXO/WOEN Radio

Mr. Kermit Geary,  
RD # 4,  
Box 321,  
Walnutport, PA 18088

Dear Mr. Geary:

I am in receipt of your fine letter and transmitting log of our station's transmissions of Friday, January 8th and Saturday January 9th and Sunday, January 10th, 1982.

I am personally pleased with your DX report and you, along with several other listeners far beyond our primary, confirm my feelings about our transmitter's fidelity and exceptional range.

I have reviewed our program schedules and logs for the days monitored and find your log to be accurate in each detail.

I feel, as you obviously do that we must be doing something right to get 250 Khz out of Mechanicville, through the congested areas of NYC and into your listening post, 190 miles away (as the crow flies!)

I wish to thank you for taking the time to monitor us and to give us the reception log for the three days noted above. I'd be most happy to receive any future correspondence from you relative to our station's reception in the Walnutport area.

Sincerely,

  
Chris Martin,  
General Manager WMVI Radio.

Dear Sir:

Received your letter concerning your reception of WACK on 1420 kc. at closing time on 3/11/61. We were glad to hear of your reception at such a distance, particularly during daylight broadcast hours as we usually only carry this distance during night testing.

I can confirm your report of your Tuesday reception and am sending that "pass-book" as a souvenir, although you would have little use for it. A sheet of technical and general information is included for your interest in WACK.

Wish you good listening in the future and hope you will tune us in again.

Sincerely yours,

Alexis V. Muller III  
Engineer

Dear Sir,

Thank you very much for your fascinating letter. The power of radio and its ability to travel such distances and connect people is truly beguiling. The Anastos Media Group does in fact own WABY 1160 AM and WUAM 900 AM (Moon Radio) as well as numerous other stations throughout New England. Our format is a mix of Big Band music and Jazz, and we feature such talents as Dick Wood, Chris Martin, and David Allen. Talk Radio 1240 AM WVKZ is our newest radio station that focuses on business talk. We thank you again for your inquiry, and we would be more than happy to answer any further questions about our stations. You can send your questions to [radiohayes@msn.com](mailto:radiohayes@msn.com). We apologize for any delay in response, but our station is rapidly growing and free time has been absent from our schedules. Again, we apologize, but your letter was one of the first to respond to, and it is proudly displayed in our studios for the reading pleasure of our listeners.

Thanks again, and we hope to hear from you soon!

Your friends from Moon Radio and Anastos Media Group

ESTABLISHED 1964

March 27, 1965

Dear Sir:

We were very pleased to receive your reported reception of our station. I am very happy to confirm said reception.

Your report is very complete and leaves nothing to the imagination..Ours is a directional daytime station with the major lobe towards Toronto, Ont, thus you were receiving us from our secondary lobe. We protect stations in Fulton, NY., and in Cleveland, Ohio. Needless to say in those directions we have a very limited signal.

Our power is one KW., and we use RCA equipment, with a two tower array.

I was very impressed with your receiving setup. Being an old 'ham' of close to thirty years, I can really appreciate it. Yours is the best DX report we have received so far. Thank you very much and 'good hunting'

Yours truly,

# WPUT 1510 RADIO

## THE VOICE OF PUTNAM COUNTY

PROSPECT HILL ROAD • BREWSTER, NEW YORK 10509

(914) 279-7171

December 14, 1974

Mr. Kermit Geary  
R.D. 2, Box 298  
Walnutport, Pa. 18088

Dear Kermit;

Thank you very much for your recent report of reception of WPUT radio. I have shown the report to our news director, who was on the air at the time you were listening, and he said there was no doubt that it was his newscast you heard. Thus, I am pleased to verify your reception of WPUT radio on 1510 kilohertz on Sunday morning December 8, 1974 between 7:15am and 7:30am E.S.T.

WPUT operates with a non-directional antenna with 895 watts during daylight hours. In addition, Monday through Friday we operate with a pre-sunrise power of 4.2 watts between 6am and local sunrise. WPUT is the only broadcast station in Putnam County, New York state's fastest growing county.

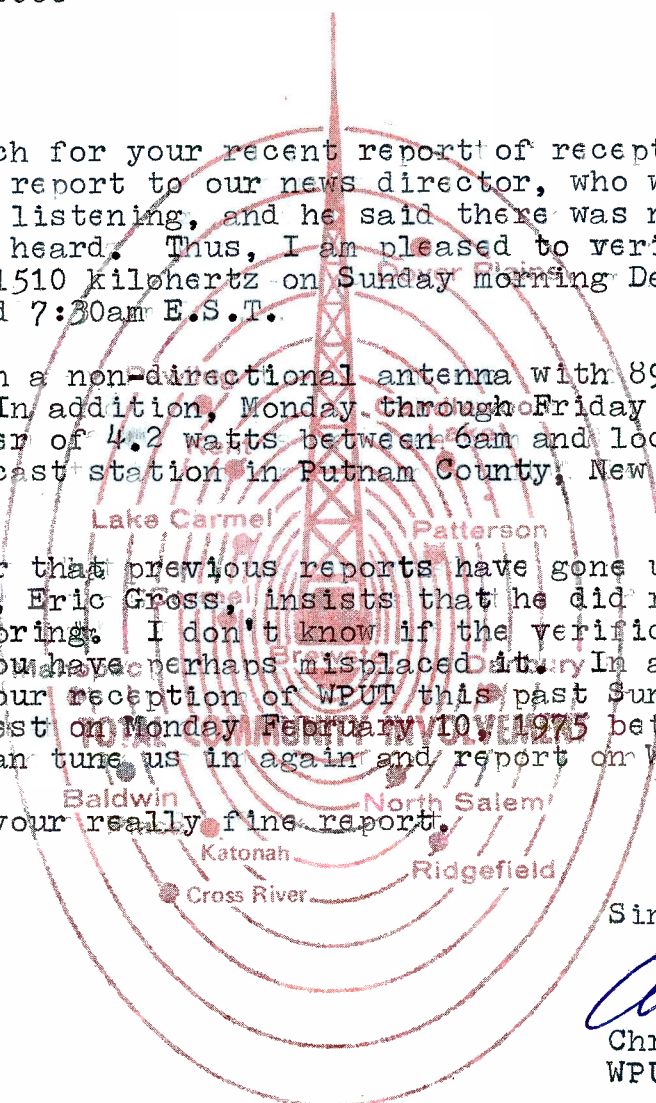

I am sorry to hear that previous reports have gone unverified. However, our news director, Eric Gross, insists that he did reply to a report of yours this past Spring. I don't know if the verification got lost in the mail, or if you have perhaps misplaced it. In any event, I am happy to verify your reception of WPUT this past Sunday. We are planning on running a DX Test on Monday February 10, 1975 between 2 and 3am, and perhaps you can tune us in again and report on WPUT's signal.

Thanks again for your really fine report.

Sincerely,

Chris Lucas  
WPUT/announcer

April 14, 1975

Mr. Kermit Geary  
R.D. 2, Box 298  
Walnutport, Pa/ 18088

Dear Kermit,

Thank you for your excellent report of reception of radio station WPUT during our recent test broadcast. We are most pleased to verify your reception of WPUT, 1510 kilohertz, on Monday morning February 10, 1975 between 2:00am and 2:29am, 2:41am and 2:48am, and 2:56am and 3:01am E.S.T.. During these periods WPUT was using its regular daytime power of 895 watts. We are also happy to confirm your reception of WPUT this same morning between 2:33am and 2:41am, during which time we were operating with 50 watts. This special power has been authorized by the Federal Communications Commission for a maximum of one hour ~~was between 6am and sunrise~~, due to the enactment of daylight time during months when standard time is normally observed. We are also very pleased to verify your truly remarkable reception of WPUT between 2:48am and 2:56am this same morning, when WPUT was employing its regular pre-sunrise power of 4.2 watts. We have a single tower, 140 feet high, located right outside our studio and office building, about 3/4 mile north of the downtown area of the village of Brewster, New York. We have heard from a total of 72 DXers as a result of this special broadcast, the most distant being in Lincoln, Nebraska. Quite a successful test!

Thanks again for your report, which was a delight to receive! Sorry for the delay in answering.

Best of DX,

*Chris Lucas*

We wish to thank you for the report and we are happy to verify your reception of our programs from Radio Station WAUB. WAUB is an independent Radio Station and operates on 1590 Kilocycles from its 500 Watt High Fidelity transmitter in Aurelius, New York,  $\frac{1}{2}$  mile southwest of Auburn.

We are a directional daytime station, broadcasting from two 188 foot towers. Our pattern has 2 major lobes; the more intense radiation toward the northwest and the second lobe to the southeast.

We hope you will continue to receive and enjoy our programs, and we appreciate your comments.

**Data:**

Confirming your reception report of August 24, 1960 from 0430 to 0440 EDT.  
To Kermit Geary, R.D. 2, Walnutport, Pa. Thank you for the information.

Mr. Kermit Geary  
R.D. 2, Box 298  
Walnutport, Pa,

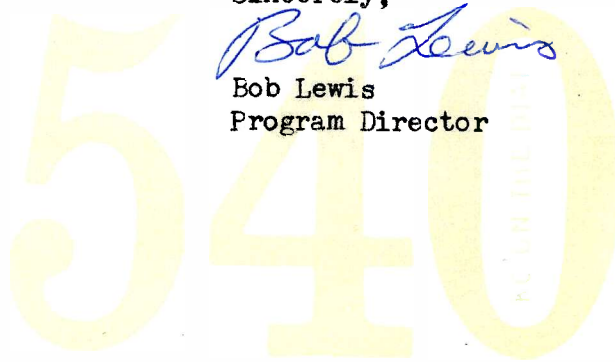

Dear Mr. Geary:

Thank you very much for your very fine informative, and helpful letter reporting your reception of WBIC radio. Your log for 10/15, 10/16 is correct to the last detail and to date, yours is the most complete and helpful reply of the many fine reports we have recieved from members of the National Radio Club(s).

Thank you again for the letter and the wishes of success.

Sincerely,

Bob Lewis  
Program Director

Dear Mr. Geary:

This is to confirm your reception of WCJW on the morning of Wednesday, July 4th and Sunday afternoon, December 2, 1973. We are very pleased to get your kind report, and hope that you will continue to listen in on us from time to time.

I would like to apologize for the long delay in answering the first report. We have been so busy getting organized, building as we go along, and making adjustments, that there is always something waiting to be taken care of.

If you are ever up our way, please stop in and see us. Thanks again for your report.

Very truly yours,

John B. Weeks

Mr. Kermit Geary  
R. D. 2, Box 298  
Walnutport, Pennsylvania 18088

Dear Mr. Geary,

It is indeed my pleasure to confirm your reception of station WGHT from 6:01 AM to 6:40 AM EDT, October 11, 1973 on 1380 kHz. Your letter came as a pleasant surprise to me as well as the staff of WGHT as we are in the middle of remodelling and rewiring the WGHT studios. I used to be quite an active AM DXer about 15 years ago and since then find answering DX reports a real treat. My 1937 Philco receiver is now used mainly to monitor my various AM clients & check clocks against CHU & WWV.

It is interesting to note the type of antenna/ground system you are using. That 200' inverted "L" is actually a .25 wave (90°) at 1230 kHz or .28 wave (101°) for 1380 kHz, just a bit more efficient. That 175' well no doubt serves as an excellent ground, especially since you are located in an area of relatively low ground conductivity. Now a bit of data re WGHT:

During the pre-sunrise hours that you heard WGHT, power is cut back to 106 watts to protect CKPC, Brantford, Ontario, Canada from excessive skywave interference. Radiation toward CKPC is held to 51.7 mv/m/mile, while along the ground is at 61.8 mv/m at 1 mile. If you look at the enclosed 10% skywave propagation report, radiation toward Walnutport is 48.25 mv/m/mile at 32.5° or 120uv/m 10% of the time (before sunrise) at the receiving point. The report might appear complex but was interesting to calculate just to find out how much signal you were getting. WGHT, formerly WFSR, was purchased by Taylor Aviation, Hammondsport, N.Y. about a year ago; the pre-sunrise modification was made last February to a stalwart 1962 Gates BC-500T transmitter. It has taken a liberal amount of cleaning & brazing at the tower, re-tubing & re-wiring at both xmtr and studio to produce a clean, undistorted sound. Since the audio section of the transmitter is 100% push-pull, careful attention was made to use only precision balanced pairs of tubes from Amperex & RCA; the husky 833A modulator tubes were precision-crafted by Philips in Holland to within 1% of each other. I've enclosed a technical fact sheet about WGHT, plus some other brochures for your interest. Incidentally, you might try to pick up another client, WGMF (1500 kHz 250-Day, no pre-sunrise) of Watkins Glen, New York, but expect some interference from WTOP, Washington. In closing, it was good to hear from you- thanks again for a precision report. Write again if you have questions.

Best regards,

  
Bill Sitzman, Jr.  
Consultant to WGHT  
encl.

Feb. 14, 1976

Dear Kermit;

This will confirm your reception of WSCP Country 1070, Sandy Creek-Pulaski, N.Y. on Nov. 26, 1974 at 6:27 AM, EST. I have checked your report against the station log of that time and find it correct.

WSCP began operations as a country music station in August 1974 and operates on 1070 khz with a power of 1,000 watts, non-directional, during daytime hours. During DST, WSCP is authorized to sign on up to  $\frac{1}{2}$  hour before sunrise with 500 watts. Your logging was at 1,000 watts.

WSCP's main studios are located at 9190 Main Street in Sandy Creek (pop. 700), Oswego County, N.Y. Our transmitter is on North Street half way between Sandy Creek and Pulaski. WSCP serves a largely rural area covering parts of Oswego, Jefferson, Lewis and Oneida Counties.

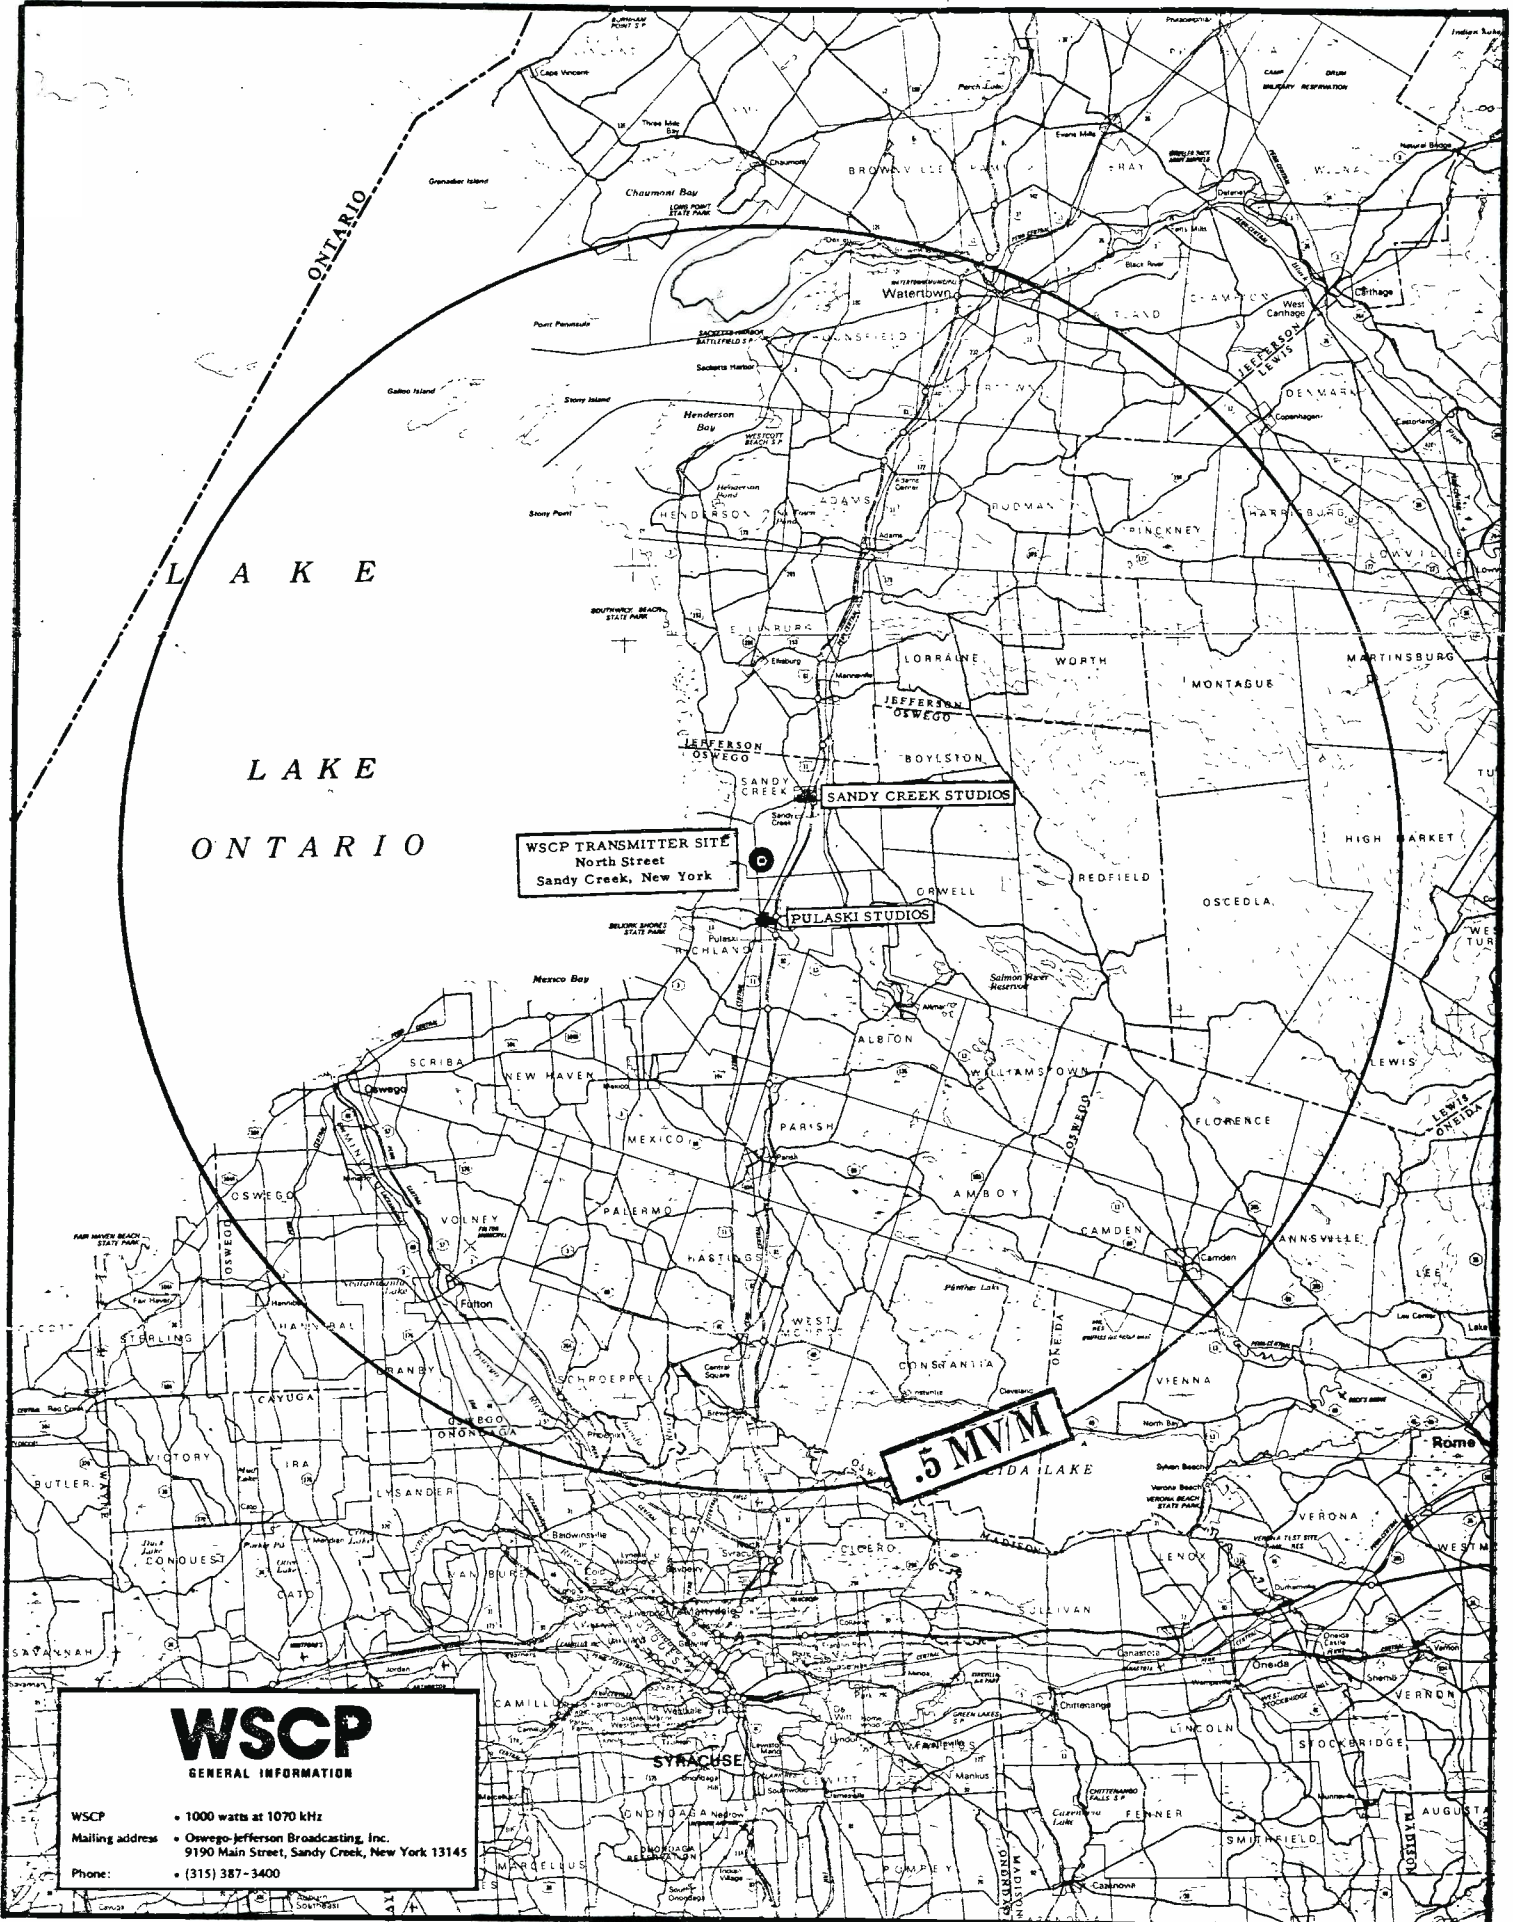

Thank you for your interest and good luck with your DXing.

73,

Ken Chatterton (NRC)

Dear Mr. Geary:

This is to verify your reception of WSCM on Friday, September 3rd and Saturday, September 4th. WSCM broadcasts with 500 watts on 1190 khz. on a daytime basis. We have recently received approval from the FCC to increase our power to 1000 watts, which we hope to have done in a couple of months.

Thanks for the excellent reception report and the complimentary words about our signal quality. It's always interesting to know the distance and quality of our signal under "dx" conditions.

I am enclosing a WSCM coverage map.

Thanks for listening!

RADIO STATION

WLSV

WELLSVILLE, NEW YORK

December 7, 1955

Kermit Geary,  
RD #2, Box 298,  
Walnutport, Penna.

Dear Kermit:

I hope you will forgive me for the lateness of my reply to your very interesting letter of the 1st of November. As you can possibly imagine, the duties of a station manager in setting up a new broadcast station are manifold and heavy. I'm just now beginning to get "breathers" from time to time and thought I would use such an opportunity to answer your letter.

Actually, we were a bit amazed by your letter as we had not thought too much about what we might be doing in that area. It was gratifying to learn that you had picked us up there in Walnutport even though we certainly have no aspirations toward that section of the country. In our own area we have daytime reports from extended areas too, far beyond what we had hoped for or can ever possibly to service commercially.

I see that you are a member of the National Radio Club and think that it would be interesting at some future date to run a two-hour DX pgm for your members. Would you please take this up with the national office and see if they could get a bit of advance publicity on it? We could begin at 4 A.M. and continue the DX until our regular sign-on at 5:58 A.M. It would certainly be an interesting experiment.

This will serve to verify that you did receive WLSV in Wellsville, New York on the morning of November 1, 1955 between the hours of 2:43 A.M. and 3:10 A.M. EST. The logged material you have shown is accurate and correct.

Thank you very much for your kind wishes on our future. You might be pleased to learn that we have begun our first month of operation in the black side of the ledger, a feat for a new station.

Cordially,

RADIO SERVICES OF WELLSVILLE

Kermit Geary  
R. D. 2, Box 298  
Walnutport, Pa. 18088

Dear Kermit:

Please accept this letter as confirmation that you did receive WLVL's New Year's Eve broadcast.

WLVL is tuned at 1340 kHz. We broadcast at 1000 watts daytime and 250 watts night-time. While we normally broadcast only 5 a.m. to 12 midnight, we did broadcast a Christmas and New Year's Eve special that kept us on all night those two nights.

While we don't expect you to become a regular WLVL listener, it's good of you to "tune" us in once in a while. You might be interested in knowing that we also have WBVP in Beaver Falls, Pa. as one of our group stations and are in the process of acquiring WGAL in Lancaster, Pa. Perhaps you can pick up them.

Again, good of you to write us. Hope the new year finds you well.

Best Regards,

David Reese  
General Manager

CANANDAIGUA, NEW YORK

May 8, 1961

Mr. Kermit Geary  
R D # 2 Box 298  
Walnutport, Pennsylvania

Dear Mr. Geary:

This is to verify your report of reception of this radio station on May 3, 1961 at 8:17 P.M.

WCGR broadcasts from Canandaigua, New York on a sunrise to sunset basis on 1550 kilocycles with a power of 250 watts on a non-directional pattern.

I was particularly interested in receiving your reception report since there is a station on 1550 in Towanda, Pennsylvania which should be blocking us during daytime hours. Another station WBAZ, 1550 in Kingston, New York also should be giving interference, and a third station in Reading, Pennsylvania on 1550 should be strong in your area if they are on the air now. It is reassuring to know that our signal is reaching out so far with only 250 watts. It speaks well of our engineering staff and the Gates Radio Company.

I am also curious to know how you obtained my name as General Manager of WCGR. It is rarely that people spell my first and last name correctly, even those who know me personally.

Thank you for your interest and we hope that you will be able to hear our programs in the future.

Sincerely,

CANANDAIGUA BROADCASTING CO., INC.

Westley G. Kimble

Mr. Kermit Geary  
R F D #2  
Walnutport, Pa.

Dear Sir:

I would like to take this opportunity to thank you on behalf of the management and staff of W C H N for your interest and the resulting report gratefully received.

This is to verify your report of Feb. 3rd '53 from 5:30 to 5:59 A. M. Everything checks as heard.

W C H N's transmitting equipment is as follows: Gates Radio Co. type BC-1F transmitter, direct crystal control with two 833A's in the final using high level modulation. Maximum radiated carrier output, 1 Kilowatt operating half power. The antenna is a 240' non-directional uniform cross section, guyed, series-excited, vertical steel radiator. The ground system consists of 120 buried copper radials 255' in length equally spaced about the tower base. All of which is located 1500' above sea level.

You might be interested to know the greatest reported distance W C H N has been heard to date. This report was sent in by Len Kruse of 816 Euclid St. Dubuque, Iowa, who used a SX-28A Hallicrafters with a 30' east west antenna. Len is a member of the National Radio Club.

I hope this will serve to verify your report and may I add that we here at W C H N appreciate your interest and wish you the best of DX'ing.

WKSJ BUILDING - 415 WEST FOURTH ST., JAMESTOWN, NEW YORK - 14701  
PHONE 4-9191

March 6, 1964

Mr. Kermit Geary  
R. D. 2, Box 298  
Walnutport, Pa. 18088

Dear Kermit:

Thank you for your report of reception of Station WKSJ on March 2, from 3:39 to 4:19 Eastern Standard time AM. Your report is clear and concise as to the program broadcast at that time, and is in full concurrence with our program log.

When I opened your letter your name struck me as being familiar, so in searching back in our DX files I found that you had reported reception of this station in 1962, on February 2, at 5:31 to 5:39 AM. At that time our call letters were WXYJ. We changed to WKSJ (kissin radio) on December 30, 1963, when new management took over here. We also went on a 24 hour schedule in 1963.

It is gratifying to know that our signal gets out so well. At a distance of 210 miles, things have to be just right to get as strong a signal as you report, and this is reflected in the transmission and receiving systems equally. Congratulations on your fine equipment and antenna system.

WKSJ operates 24 hours per day except from 3:00 to 8:00 AM Sunday mornings, on 1340 KC with 250 watts. The transmitter is a Western Electric 451-A. The tower is 150 foot self supporting, mounted on the roof of the WKSJ building in downtown Jamestown.

Once again, thanks for your report, Kermit. It is a pleasure to hear from you and others in the N.R.C. I am also happy to be able to answer your report in the affirmative. Best wishes to you and good luck with your Radio Club activities.

Very truly yours,

*Burton Waterman*

## WKSJ - Radio One in Jamestown

The great trend station in Jamestown - Trend Radio Inc.

- W K O L, 1570 kiloHertz;  
 Saturday morning, October 24, 1970,  
 7:15 to 7:36 A.M., Eastern Daylight Saving Time:  
 7:15 to 7:16½ A.M., "The Star Spangled Banner".  
 7:16½ A.M., Sign-on announcement:  
     "Good Morning. Radio Station W K O L  
     now resumes its broadcasting activities for  
     to-day....."  
 7:21 A.M., Announcement of action this Saturday on the W K O L  
 Sports Weekend.  
 7:22 to 7:25 A.M., Recorded song by a vocal group, "Lucky To  
 Be Lovers".  
 7:25 A.M., Announcement of the W K O L Sports Weekend. The  
 announcer said that there would be a report from  
 the Amsterdam High Coach.  
 7:25½ to 7:28 A.M., Recorded song by a vocal group, "I Think  
 I Love You".  
 7:28 to 7:31 A.M., Another recorded song by the above vocal group.  
 7:31 A.M., Announcement about the 1971 Corvette: "See it! Drive  
 it! Buy it!"  
 7:31½ A.M., Announcement of an offer to listeners; they were told  
 to write to W K O L, 2971 -----, Amsterdam, New  
 York, 1201?.  
 7:31½ A.M., Announcement:  
     "The W K O L Sports Parade", brought to you  
     by ----- Chevrolet; Mutual Of Omaha was also  
     mentioned.  
 7:32 A.M., The Sports Announcer opened by reporting "last night's  
 National Basketball Association scores".  
 7:33 to 7:36 A.M., Band music.  
 7:36 A.M., Additional sports news.

Please compare the above data with your Station Log for  
 Saturday, October 24th, and if my report is correct, kindly send me  
 a reply confirming my reception of WKOL on 1570 kHz. Your attention  
 to this request will be greatly appreciated.

Best wishes to you, sir, and to WKOL and its Personnel for  
 continued success in broadcasting. I hope to hear your signal again  
 on future occasions. Looking forward to receiving your reply in  
 confirmation of my reception, for which I thank you, I am,

Very truly yours,

Dear Mr. Geary,

It is with great pleasure that I verify beyond a doubt your reception of radio station WKIT. I am sorry for the delay in answering your request but the delay was unavoidable.

WKIT operates on a assigned frequency of 1520kc with a standard output power of 250 daytime watts. Our transmitter, a gates BC-250-GY, is located North 40-44'-58 " and West 73-38'-25" which is Maple Place in Mineola, New York. Our Studios are located on the concourse at Roosevelt Field, Garden City, Long Island, New York.

Thank you for the reception report and I hope that you will let me know when ever reception is better than usual or if you find something of outstanding interest on 1520kc.

Sincerely yours:

LONG ISLAND MUSIC

August 24, 1981

Mr. Kermit Geary  
R.D.4  
Box 321  
Walautport, PA 18088

Dear Mr. Geary:

Thank you for your very detailed reception report, and your nice comments about our signal.

As you may or may not know, WLIM is a relatively new station. What used to be WYFA, changed ownership last month and format and call letters were changed on July 13th.

Not that it probably matters to you, but the man on the sign on tape is Jack Ellsworth -- my partner, and I did the news. Most people misunderstand Jeff Shade's name -- thinking it "Shea" but you got that one right.

Thanks for listening.

Sincerely,

George Drake  
Vice President

Dear Mr. Coary —

Thank you for DX and QSL  
report dated 5 Feb this year.

All data verified as correct  
per our logs for 1 tests of that  
day.

Just in case you're curious, for tests  
of this sort, I crank our little RCA 250M  
Xmitter all the way up to a peak efficiency  
of between 80-91%, and go for the sky!

As you can see, it works.

Thanks for Buzzin'

Mr. Dennis H. Curley, President & Gen. Mgr.  
Radio Station W B Z A  
Box 928  
Glens Falls NY 12801

Dear Mr. Curley,

I trust that you have received my letter of April 19th in which I informed you of my reception of Radio Station WBZA here in Eastern Pennsylvania. While I have not yet heard from you, I am sure that you will be interested to know that I have been able to receive your broadcasts on two additional occasions since then.

On the morning of Friday, May 11, 1984, your signal on 1230 kiloHertz was tuned in at 6:10 A.M., Eastern Daylight Time, and I continued to hear programming as follows until 6:16 A.M., E.D.T.:

- 6:10 A.M., Announcement at the conclusion of the news:  
"W B Z A News, next report at 6:30." Mention of "AM 1230".
- 6:11 A.M., Announcement:  
"11 minutes after 6:00 is our W B Z A time."  
Announcement of the weekend weather for the "great Tri-County Area".
- 6:11½ A.M., Weather forecast.
- 6:12½ A.M., Advertisement of a 1-week bargain vacation at Disney World, with hotel accommodations "just 5 minutes from Disney World and EPCOT" for \$24 per person double occupancy and kids free, plus an air-conditioned car with unlimited mileage absolutely free for the whole week. The ad was by a travel agency located in the Hamilton Auto Park Mall.
- 6:13½ A.M., Advertisement of a book store with "a large selection of both paperback and hard-cover books for everyone".
- 6:14½ A.M., Announcement:  
"W B Z A, 25 years of Service to the North Country."
- 6:15½ A.M., Advertisement of a furniture store, with mention of "Regency" (either name or location), "open 6 days-a-week".

It is interesting to note that the above reception occurred well after sunrise in both Glens Falls, N.Y., and Walnutport, PA. It was still more of a surprise to obtain early-evening reception of WBZA on Wednesday, May 23, 1984. Your signal was tuned in at 8:20 P.M., Eastern Daylight Time, and I was able to hear the following program items:

31 May, 1984

Dear Kermit -

This is to acknowledge and  
confirm your 'DX' of May 11, 1984

Thank you

Regards

PREC - CH

November 30, 1963

Dear Sir:

We confirm your reception report of WLNK at 1600 KC on

Nov. 25, 1963 at 0020 in the AM

Your reception report matches that of our logs.

For your information we commenced broadcasting on August 13, 1963. We are a sunrise to sunset station with an output power of 500 watts.

A Gates console is employed along with an RCA BTA 1R1 transmitter. Our anticipated coverage is the eastern half of Suffolk County, on Long Island.

Thank you for your interest in our station. If we can be of any further help to you, please let us know. If you are ever in the Sag Harbor area, please stop in for a visit.

Very truly yours,

*Edward E. Eichhorn*
