Mr. Norman L. Maguire  
1420 Columbia Drive NE  
Albuquerque, New Mexico

Dear Norman:

This letter is to verify that the station you heard  
on Sept. 11, 1954 was KAWL in York, Nebraska.

We check frequency the first Monday of every month,  
from 5:05 to 5:20 A.M. Our broadcast hours are  
from 6:00 A.M. to sunset.

Regards,

Handwritten signature of Mel Gleason.

STUDIOS AND OFFICES, KAWL BUILDING . . . PHONE 33 . . . YORK, NEB.

January 7, 1957

Dear "D-Xer",

This is to confirm your reception of our station according to your letter of January 1, 1957, concerning the signal broadcast by KAWL on January 19 57 at 2:45 AM.

The information I received from your letter was correct according with the logging of that date.

We were established November 24, 1954 by the Prarie States Broadcasting corporation and at present are serving over 300,000. Our broadcasting beging with a standard sign on at 6AM and we sign off at local sunset.

If, by some chance, you are ever in our area, you're invited to stop by the station. We are located just south of the city limits on highway 81.

Thanks for your letter concerning our signal in your area.

*Ervin*  
Ervin Stenoneit KØICI  
Chief Engineer KAWL  
York, Nebraska.

By the way, I plan being on the air Jan 21st 2 till 3 AM on a speacail DX program. If you are monitoring that morning, crank in. Time is C-S-T.

PHONE 1450

May 25, 1949.

Norman L. Maguire,  
424 North Maple,  
Albuquerque, New Mexico.

Dear OM:

Received your report relative to  
the test broadcast of KBRL Saturday morning,  
May 14th, from 3:47 AM until after 4:00 AM.

Your reception, as reported, coincides  
with our log. Your report is exceptionally  
good due to the fact that we were making  
adjustments to our limiter amplifier and  
measuring our compression in db.

Very truly yours,

Leroy W. Lenwell,  
General Manager.

Albuquerque, N.M.

Dear DXer Maguire:

Here's something you've been waiting for. Station KFGT, 1340 kcs., 100 watts, Fremont, Nebraska takes pleasure in verifying your reception of this station on March 22nd, 1954, during our special DX program for the National Radio Club. We are indeed sorry for the delay, which was caused mainly by a change in personnel.

KFGT operates with unlimited time and 100 watts on a frequency of 1340 kcs. The station has been on the air for many years, beginning with the call-letters of KORN and a power of 250 watts on 1400 kcs. IN March of 1949, the call-letters were changed to the present KFGT, and frequency went to 1340 kcs. with 100 watts, as the 1400 kcs. frequency was given to Lincoln, Nebr. The station was at this time bought by the Fremont Guide and Tribune, hence, the last three letters F-G-T. KFGT operates from 6 am to 10 pm CST, and has no scheduled frequency check; instead it is measured during the regular programming by KOIL in Omaha,

The station utilizes a Collins 300A transmitter running a power of 100 watts. Only 100 watts is authorized because of the proximity of stations in Estherville, Iowa and Kearney, Nebraska on the same frequency. The antenna is a uniform cross-section, guyed, vertical radiator 182 feet high and is located a mile and a half north-east of the center of Fremont, just east of highway #275.

You might be interested to know that KFGT's 100 watts were reported by 53 DXers in 25 states and Canada. Leading states were Pa. with 8; N.Y. with 6, and Ohio and Illinois with 5 apiece.

Again, many thanks for your interesting report. Let us hear from you again sometime, wont you? Best of DX.

Sincerely,

Marvin E. Robbins NRC & WØVUT

Albuquerque, New Mexico

Dear Mr. Maguire;

This verifies your report on your reception of KJSK. We have been so flooded with mail from all sections of the country that we have been unable to answer you sooner. I trust you will understand. We were really pleasantly surprised to find that KJSK is reaching out into so many spots on the map during our test period.

Radio Station KJSK is a new station and has thus far only conducted equipment tests. Our power is 1000 watts. The transmitter is Gates 1000 watts BC1E. A quarter wave 260 foot series fed Wincharger tower is our antenna. The response from the many listeners during the wee hours of the morning made it possible for the engineering department to know that the coverage was complete for the antenna used.

We especially want to thank the members of the National Radio Club and other DX fans as well as occasional passing listeners which gave us such a complete report as to how the station was received at their listening point. Thank you again for writing.

Sincerely yours,

Geo. Basil Anderson  
Owner - Manager

and

checks with our log.

Sincerely yours,

RADIO STATION WJAG

  
By Art Thomas, Mgr.

AT/g

WJAG is one of the oldest radio stations in the west. Has a large, loyal and responsive audience in 22 counties in northeast Nebraska in which there are 268,000 people, 33,000 farms and 54,000 radio families. A survey by the Federal Communications Commission shows WJAG is the favorite station in its territory. Norfolk is 93 miles northwest of Omaha, 95 miles north of Lincoln, 61 miles west of Sioux City and 58 miles south of Yankton. You can reach more people in northeast Nebraska for less money over WJAG than through any other single medium.
