Slagle Radio

Slagle Radio

Beautiful—Faithful—Outstanding

SLAGLE RADIO is radio at its very best,—a veritable musical creation,—just as different from the ordinary in magnificence and performance as the present luxuriant, high-powered motor car is from the chugging runabout of other days.

Almost every conceivable feature, providing beauty, convenience, power, range, and richness of musical expression is abundantly supplied.

No parts are too good, no workmanship too painstaking in its manufacture. A standard closely approaching the custom-built is zealously maintained.

All Slagle models utilize the Technidyne Circuit, which, with its “feed forward” principle, provides a new and thrilling sensation to the owner, as stations click in and click out sharply and evenly,—and uniformly clear over the entire broadcast band.

Having a high degree of radio frequency amplification, the Slagle is extremely sensitive as to distant station pick-up; a unique method of controlling volume insures the same pure, undistorted tone on distant as well as local stations.

Slagle receivers are completely light-socket operated, and include such features as a self-shielded loop, (Model Nine excepted,) Dynamic Power Speaker, phonograph pick-up connection, push-pull audio amplification,—all fully housed in cabinet models which might well grace the most fastidious home.

Slagle Model Nine

BEAUTY, compactness, and true convenience are most happily combined in this nine tube Slagle, which so strikingly emphasizes the distinct difference between really good radio and the ordinary. It is wonderfully selective, and equally sensitive, possessing a tone quality so faithful as to challenge detection from the actual programs broadcast.

Price (less tubes) \$360.00
Tubes - - - 41.00

Price (less tubes) \$500.00

Slagle Model Ten 29-A

FOR those who will be satisfied with nothing but the best in radio reproduction, who demand the same certain action of their radio that they are accustomed to expect of a fine watch, this popular Slagle will hold a particular appeal and provide a world of brand new pleasure.

Slagle Model Ten 29-B

A MARVELOUS combination of all that is convenient, fine and beautiful in modern radio.

Complete light socket operation, a self-shielded directional loop, dynamic power speaker, phonograph pick-up connection,— these and many other handy features make its operation a pleasure and a marvel of simplicity.
