# electronics BUYERS' GUIDE

JUNE MID-MONTH • 1957

REFERENCE ARTICLE SECTION ..... R-1 to R-64

Useful features that provide shortcuts for busy design engineers

## DIRECTORY SECTION

ALPHABETICAL PRODUCT LISTING .....	D-1
REGISTERED TRADE NAMES .....	D-205
INDEX OF MANUFACTURERS .....	D-232
MANUFACTURERS' REPRESENTATIVES .....	700-714

SEARCHLIGHT SECTION .....	715-731
PROFESSIONAL SERVICES .....	732
INDEX TO ADVERTISERS .....	II

A McGRAW - HILL  
PUBLICATION

H. W. MATEER, Publisher. W. W. MacDONALD, Editor. Managing Editors: VIN ZELUFF, JOHN M. CARROLL. Feature Editor: JOHN MARKUS. Associate Editors: JOHN M. KINN, Jr., FRANK LEARY, MICHAEL F. TOMAINO, HOWARD K. JANIS, SYLVESTER P. CARTER, DAVID A. FINDLAY. Assistant Editors: WILLIAM P. O'BRIEN, HAIG A. MANOOGIAN, GEORGE SIDERIS, LAWRENCE KAMARCK, EDWARD DeJONGH, JOHN F. MASON. Pacific Coast Editor (Los Angeles): HAROLD C. HOOD. Midwestern Editor (Chicago): HAROLD HARRIS. New England Editor (Boston): ROLAND J. CHAREST. HARRY PHILLIPS, Art Director; ROY THOMPSEN, BARBARA ELLWOOD, JOHN C. WRIGHT, Jr., Production, JEAN L. MARTIN. Editorial Assistants: GLORIA J. FILIPPONE, ARLENE SCHILP, BERNICE DUFFY, BARBARA HEARST, NOREEN HENNESSY, PHYLIS A. CRONIN, BARBARA M. SHAW.

JAMES GIRDWOOD, Adv. Sales Mgr. R. S. QUINT, Assistant Sales Mgr. and Buyers' Guide Mgr. FREDERIC STEWART, Promotion Mgr. FRANK H. WARD, Business Mgr. G. E. POMEROY, Classified Mgr. JEAN W. HEIGES, Research. WALLACE B. BLOOD, Market Consultant. New York: DONALD H. MILLER, HENRY M. SHAW, MARTIN J. GALLAY. Boston: WM. S. HODGKINSON. Philadelphia: JAMES T. HAUPTLI. Chicago: BRUCE WINNER, WALTER M. LUCE. Cleveland: WARREN H. GARDNER. San Francisco: T. H. CARMODY, R. C. ALCORN. Los Angeles: CARL W. DYSINGER, RUSSELL H. ANTLES. Atlanta: M. MILLER. Dallas: GORDON L. JONES, London: HERBERT LAGLER. KEITH HENNY, Consultant.

June, 1957—Mid-Month

ELECTRONICS  
Member ABC and ABP

Vol. 30, No. 6C

Published three times a month, with an additional issue in June, by McGraw-Hill Publishing Company, Inc. James H. McGraw (1860-1948), Founder. Executive, Editorial, Circulation and Advertising Offices: McGraw-Hill Building, 330 W. 42 St., New York 36, N. Y. Longacre 4-3000. Publication Office: 239 So. American St., Philadelphia 5, Penna. See panel below for directions regarding subscription or change of address. Donald C. McGraw, President; L. Keith Goodrich, Vice President and Treasurer; John J. Cooke, Secretary; Nelson Bond, Executive Vice President, Publications Division; Ralph B. Smith, Vice President and Editorial Director; Joseph H. Allen, Vice President and Director of Advertising Sales; A. R. Venezian, Vice President and Circulation Coordinator.

Single copies 75¢ for Technical Edition and 50¢ for Business Edition in United States and possessions, and Canada; \$2.00 and \$1.50 for all other foreign countries. Buyers' Guide \$3.00. Subscription rates—United States and possessions, \$3.00 a year; \$9.00 for two years. Canada, \$10.00 a year. All other countries \$20.00 a year. Three-year rates accepted on renewals only, are double the one-year rate. Second class mail privileges authorized at Philadelphia, Penna. Printed in U.S.A. Copyright 1957 by McGraw-Hill Publishing Co., Inc.—All Rights Reserved. Title registered in U. S. Patent Office. BRANCH OFFICES: 520 North Michigan Avenue, Chicago 11; 68 Post Street, San Francisco 4; McGraw-Hill House, London E. C. 4; National Press Bldg., Washington, D. C. 4; Archi-

lects Bldg. 17th & Sansom Sts., Philadelphia 3; 1111 Henry W. Oliver Bldg., Pittsburgh 22; 1510 Hanna Bldg., Cleveland 15; 856 Penobscot Bldg., Detroit 26; 3615 Olive St., St. Louis 8; 350 Park Square Bldg., Boston 16; 1321 Rhodes Haverly Bldg., Atlanta 3; 1125 West Sixth St., Los Angeles 17. ELECTRONICS is indexed regularly in The Engineering Index.

Subscriptions: Address correspondence to Subscription Manager, Electronics, 330 W. 42nd St., New York 36, N. Y. Allow one month for change of address, stating old as well as new address. Subscriptions are solicited only from persons engaged in theory, research, design, production, maintenance and use of electronic and industrial control components, parts and products. Position and company connection must be indicated on subscription orders.

Post master: please send form 3579 to Electronics, 330 W. 42nd St., New York 36, N. Y.

Ratings	D-c Voltage	$\mu$ f
Case Style 53	100 to 1000	.05 to 4
Case Style 61	100 to 1000	.01 to 2
Case Style 70	100 to 1500	.1 to 10

## CAPACITORS

**PERMAFIL CAPACITORS:** Permafil high-temperature capacitors are designed to exceed the performance requirements of MIL-C-25A Characteristic K specifications, and are suitable for operation in ambient temperatures from  $-55$  to  $+125$  C at full rated voltage.

Permafil, used as the impregnant instead of mineral oil, is a solid resinous material having excellent electrical characteristics over a wide temperature range. Since it is a compound, the processing and manufacture of Permafil capacitors can be controlled to exacting requirements, and results in units that are more reliable at elevated temperatures. Because the impregnant is solid, it obviates possibilities of leaks.

## CAPACITORS

### STANDARD COMMERCIAL TYPES Fixed Paper-dielectric Capacitors

A-c/d-c dual-rated Pyranol\* capacitors for motors, controls, electronic equipments, and other applications will reduce inventories, simplify design problems, and increase standardization. Capacitors in the voltage ranges 236 through 660 volts, a-c, and 400 through 1500 volts, d-c, are now dual-rated and can be used for either a-c or d-c applications. Other a-c and d-c ratings available: 0.01 to 75  $\mu$ f, 236 to 660 volts, a-c, and 100 to 100,000 volts, d-c.

Write for Bulletin GEC-809.

### CAPACITORS TO MEET MIL-C-25A SPEC. 100 to 12,500 Volts D-c—0.01 to 15 Microfarads

These fixed paper-dielectric capacitors are designed to meet the rigid requirements of the Joint Army-Navy specifications for use in electronic equipment for the armed forces. Hermetically sealed in metallic containers, these capacitors for d-c applications are available in Characteristics E and F and in Case Styles CP-53, -54, -55, -61, -63, -67, -69, and -70. In addition to regular applications, these units may also be used at higher temperatures, higher voltages for short-life applications, and with a-c voltages. Write for Bulletin GEC-810.

\* Registered Trade-mark of General Electric Co.

## MOLDED PVZ\* TUBULAR CAPACITORS

\* Trade-mark of General Electric Co.

Write for Bulletin GEC-1452.

General Electric molded PVZ tubular capacitors have applications in computers, missiles, telephone equipment, and other high-grade military and commercial electronic equipment. Ratings: 100 to 400 volts. They can be supplied from 0.00047 to 0.022  $\mu\text{f}$  in the 400-volt range and from 0.00047 to 0.15  $\mu\text{f}$  in the 100-volt range. Tolerances:  $\pm 5\%$ ,  $\pm 10\%$ ,  $\pm 20\%$ . Temperature range is from  $-55\text{ C}$  to  $+125\text{ C}$ .

### ENERGY STORAGE

These d-c Pyranol capacitors for phototube and similar light-duty, energy-storage applications are the result of years of experience in the design and manufacture of capacitors for this type of service. They are relatively lightweight, small, stable capacitors having a life consistent with the application involved. Write for Bulletin GEC-1357.

## GENERAL ELECTRIC TANTALYTIC† CAPACITORS

† Registered trade-mark of General Electric Co.

Write for Bulletin GEA-6258.

The Tantalytic capacitor was developed to fit low-voltage applications where superior performance and small size are the major factors.

The Tantalytic capacitor is a foil-type, tantalum-electrode, electrolytic unit, similar in construction to an aluminum electrolytic capacitor, but, because of the characteristics of tantalum foil and the electrolyte employed, is smaller in size. The Tantalytic capacitor has lower leakage currents, longer shelf life, and a wider range of temperature operation, without derating, than the conventional aluminum electrolytic capacitor. Tantalytic capacitors, in a wide range of ratings, are currently being used in telephone equipment and military communication and electronic equipment. They are available for 85 C and 125 C service.

### MICRO-MINIATURE TANTALYTIC CAPACITORS

Designed for low-voltage d-c applications where superior characteristics and size are important. Applications: In miniaturized assemblies with transistors; In hearing aids, and military applications employing transistors. Write for Bulletin GEA-6065.

## GENERAL ELECTRIC DRAWN-OVAL CAPACITORS

Write for Bulletin GEA-5777.

Drawn-oval capacitors have found wide application in fluorescent-lamp ballasts, air-conditioning and refrigeration equipment, business machines, luminous-tube transformers, submersible pumps, and industrial control. They are smaller, lighter, stronger, and 10 to 20 per cent less costly than standard fabricated fixed paper-dielectric types. Ratings range from 1  $\mu\text{f}$  to 20  $\mu\text{f}$  at 236 to 660 volts, a-c, and 1  $\mu\text{f}$  to 20  $\mu\text{f}$  at 600 to 1500 volts, d-c. They are available in single- and double-section types with a wide range of terminal styles. Drawn-oval capacitors can be mounted in any position with suitable brackets available.

### PULSE-FORMING NETWORKS

These capacitor pulse-forming networks, Type E, are for applications in radar and industrial equipment where the normal (exponential) capacitor discharge shape is not suitable and where an impulse having a definite energy content and duration is required. Bulletin GEA-4996.

## COMPONENT RECTIFIERS, *Vac-u-Sel*,\* COPPER-OXIDE, GERMANIUM, AND SILICON

Rectifiers for practically any d-c power requirement are available. Vac-u-Sel rectifiers are a high-quality type of selenium rectifier produced by an exclusive

G-E sphere-type, vacuum-evaporation process. In addition, General Electric also makes a full line of copper-oxide, germanium, and silicon rectifiers.

Miniature Vac-u-Sel rectifiers

Standard Vac-u-Sel rectifier stack construction

Tube-mounted Vac-u-Sel rectifier stack construction

### GENERAL ELECTRIC *Vac-u-Sel* RECTIFIERS

• 63 VOLTS PEAK INVERSE

• 150 C PLATE TEMPERATURE

• 80,000 HOURS LIFE EXPECTANCY

The special vacuum-evaporation process employed in making Vac-u-Sel rectifiers makes possible the outstanding performance characteristic of this selenium rectifier. With G-E Vac-u-Sel rectifiers, you can now match performance requirements for life expectancy, ambient operating temperature, and atmospheric protection, as well as electrical characteristics. Two (2) rectifier cells make up the line of Vac-u-Sel rectifiers: a 26-volt and a 45-volt cell. Both are high-temperature cells.

The 26-volt cell is a long-life, standard industrial cell with a life expectancy of 80,000 hours at normal current rating at 35 C ambient. The 26-volt cell can meet operating requirements up to 150 C at full voltage. Current need not be derated where shorter life is acceptable. Life expectancy at 150 C is 1000 hours.

The 45-volt cell has a 63-volt peak inverse voltage. Unlike most 45-volt rectifiers, this is a true, long-life industrial cell. Frequently,

this rectifier may be substituted for those employing 26-volt cells. Since fewer cells are required, savings of up to 30 per cent in cost and up to 35 per cent in the size of the stacks are possible. Life expectancy of the 45-volt cells at normal current rating at 35 C ambient is 60,000 hours, and they can be used at ambient temperatures up to 110 C.

All Vac-u-Sel rectifiers operate with exceptionally low forward-voltage drop and low reverse leakage, and their margin of superiority in these characteristics increases with service. All Vac-u-Sel rectifiers undergo extensive testing and grading, and matched cells are used in assembling stacks. A variety of finishes and mounting arrangements are available to meet virtually any requirement. Write for Bulletins GEA-5935 (miniatures); GEA-6273 (standard); GEC-1330 (application manual).

#### COPPER-OXIDE RECTIFIER STACKS

G-E copper-oxide rectifier stacks offer these outstanding features:

- No unforming
- Ability to withstand momentary current overloads
- Ability to withstand momentary voltage overloads
- Longer life with little aging
- Highest efficiency at low voltages.

These features of General Electric copper-oxide rectifiers make them especially suited for certain types of magnetizing circuits, which require

the rectifier to withstand high current inrush and momentary voltage overload.

Perhaps the most widespread use of copper-oxide rectifiers is in the field of circuit-breaker operation. Here, the unique characteristics of copper-oxide rectifiers are especially important.

The above features also make copper-oxide rectifiers ideal for the following applications:

- Blocking
- Metering
- Polarizing relays
- High-speed relays
- Electroplating
- Electrolytic reduction
- Telephone and telegraph equipment
- Control contactors
- Low-voltage, high-current power supplies
- Testing equipment
- High-voltage surge protectors
- D-c welders.

Write for Bulletin GEA-5699.

\* Registered trade-mark of General Electric Co.

#### INDUSTRIAL GERMANIUM AND SILICON RECTIFIERS

With more than 1,000,000 amperes of large-area, single-crystal rectifiers now in service, G-E germanium and silicon power rectifiers have become a proven source of dependable d-c power. They offer these features:

- Hermetically sealed cells
- Negligible aging
- Small size and weight
- No unforming.

The application of these new monocrystalline rectifiers is backed up by operating experience both in the laboratory and in numerous field in-

stallations. The extensiveness of this knowledge makes it possible to predict accurately the performance characteristics of these rectifiers in many different types of service.

Both types are well suited whenever the optimum size, weight, and efficiency are desired in heavy current-type applications. Germanium will prove to be more practical at the lower levels and at normal ambient temperatures. Silicon is indicated at the higher voltage levels and at higher ambient temperatures. The General Electric Company is prepared to provide complete engineering and application assistance upon request.

Complete information on all of these rectifiers is available from your nearest G-E Apparatus Sales Office, or by writing to Section 640-472, General Electric Company, Schenectady 5, New York.

## SPECIALTY TRANSFORMERS

**HERMETICALLY SEALED:** A complete line of hermetic transformers in 22 standardized case sizes was specifically designed to meet the performance requirements of the government MIL-T-27 specifications. These units, featuring drawn-steel cases and silicone bushings, are the most dependable sealed transformers it is possible to provide and can be used on a wide range of applications.

**OPEN TYPE:** Usually applied where moisture resistance is not an important factor, and where size and weight must be kept to a minimum. Composed of automatically wound coils imposed on finest-grade silicon-steel core laminations, they are of the same uniform high quality as our encased transformers. Made to exacting tolerances to provide excellent electrical characteristics. Terminal boards top- or bottom-mounted, or with leads, and with mounting studs or brackets to meet special requirements.

**ENCAPSULATED TYPE:** Three new encapsulated transformer lines now permit designers in the electronic industry to choose the best and least-expensive encapsulation for their applications: (1) an extremely durable elastomer formula for Class H, (2) Class A modified epoxy resin, and (3) other combinations of varnishes and epoxys or polyesters for less-rigid environmental conditions.

### AIRCRAFT TRANSFORMERS

General Electric manufactures a complete line of standard 400-cycle aircraft transformers which includes general-purpose transformers, phase-changing transformers, high-temperature silicone transformers, ballasts for fluorescent lamps, ignition transformers for cabin heaters, de-icers, and jet engines. General Electric builds transformers to individual specifications, both military and commercial.

## SATURABLE REACTORS

Their features are: (1) provide control in an a-c circuit by means of a direct current, (2) provide a wide range of control with smooth adjustment over entire range, (3) d-c control power required is small, obtainable from any reasonable combination of available current and voltage, (4) very efficient, even at light loads, (5) voltage drop in reactor at full saturation is small, permitting 93% or more of the voltage to be applied to load, (6) compact, sturdy, no moving parts, (7) control power readily obtained from inexpensive rectifier, (8) conveniently installed in least-crowded part of the building for remote-control operation, (9) provide a means of insulating the d-c control from the a-c circuit. These units are for use as control devices for numerous automatic and manual control applications.

**APPLICATION:** The amplistat is a complete packaged d-c amplifier applicable to a wide range of control and instrumentation purposes. Standard ratings are available from 1 va to 930 va. The following are a few of the many possible combinations of **SIGNAL SOURCES** (Thermocouples, Strain gages, Thermistors, Photocells, Phototube amplifiers, Bismuth-wire magnetic-field sensitive resistors, Shunts, Resistance-type temperature bulbs, other Amplistats) with **CONTROLLED DEVICES** (Relays, Solenoids, Small-motor fields, Generators, Amplidyne fields, Power rectifiers, Lamps, Heating elements, other Amplistats).

**FEATURES:** High Gain—Isolation—Input windings galvanically isolated from output. Reliable—Rugged construction, little, if any, maintenance. Static—No moving parts. No warm-up time—Has no tubes. Compact—Fits easily on control panels and chassis.

## SUBMINIATURE TRANSFORMERS

Available in five construction types for pulse, blocking-oscillator, power, reactor, audio, and other miniature-transformer applications. Units are designed

to meet applicable grades of environmental and electrical requirements of MIL-T-27A in sizes of two cubic inches and less. Construction types include plug-in hermetic, flange-mounted hermetic, open core and coil, dip-encapsulated, and cast-encapsulated, as illustrated above.

## CONTROL, PANELBOARD, and SIGNAL TRANSFORMERS

Two lines of transformers for control and small, general-purpose loads designed to fit the needs of electronic-equipment and panel builders. Standard control transformers are available in dual-frequency, series-multiple ratings from 25 to 2000 va, enclosed construction, and from 25 to 250 va for open wiring. Panelboard transformers are available from 50 to 5000 va in a standardized line of 22 ratings featuring a choice of leads, circuit breakers, or 1-, 2-, and 4-fuse combinations. Special control transformers can be furnished for normal and high-reactance applications having special voltage and load requirements.

## HIGH-VOLTAGE TRANSFORMERS

Are used as components of radio and television transmitter equipment, and allied devices which require high operating voltages above ground. Construction type shown in the photograph permits a substantial reduction in size and weight—critical factors in many installations. A cost saving is also effected over similar ratings of enclosed-type construction.

## AMPLISTATS

## AUTOMATIC VOLTAGE STABILIZERS

For equipment which requires accurate line-voltage regulation in ratings of 15 to 10,000 va, standard G-E stabilizers can be used to cut costs and save space. Many of the standard models can be operated from either 115 or 230 volts and will deliver either 115 or 230 volts to the load, thus providing transformation, as well as regulation.

With line-voltage variations of 30 per cent, these stabilizers will maintain output voltages to within  $\pm 1$  per cent of the normal. Quiet, automatic, they provide correction within two cycles.

If your product is composed of one of the following items, it will pay you to investigate stabilizers: television and radio equipment; telephone apparatus; sound equipment; lighting circuits; photometers; x-ray equipment; rectifiers (full-wave); electrochemical apparatus; test equipment and precision processes; photographic equipment; electronic circuits; calibration devices; color comparators. Write for Bulletin GEA-5754. Special designs can be furnished in ratings in excess of 10,000 va, or with special voltages, if desired.

## INDUCTROL\* VOLTAGE REGULATORS

Automatic

Motor-driven

Hand-operated

### HAND-OPERATED      MOTOR-DRIVEN      AUTOMATIC

The Inductrol induction voltage regulator is designed for industrial use. Inductrols can be used to hold a constant load voltage accurately, when supplied from a fluctuating supply voltage or, conversely, can be used to provide a variable load or utilization voltage from a relatively constant supply voltage. Either of these functions can be automatically controlled, or can be manually controlled by means of motor drive or hand crank. Other Inductrol controls can be furnished to hold alternating current, or rectified alternating current or voltage. Inductrols are available for circuits up to 600 volts. Inductrols rated 120/240 volts give up to  $\pm 100$  per cent regulation. Write for Bulletins GEC-1450, GEA-6261.

**FEATURES**—No brushes to wear out! No routine maintenance! Drift-free controls! Absolutely stepless control! No wave-form distortion! Autotransformer efficiency!

\* Trade-mark of General Electric Company for induction voltage regulators

## SPECIALTY MOTORS

### FRACTIONAL-HORSEPOWER MOTORS

**Synchronous Induction Motors:** High torque at slow synchronous speed for remote-control devices, indicating instruments, timing devices, etc. For

low-inertia applications requiring rapid changes in rotation. Synchronous speed: 75 rpm, 75 oz-in. torque. Motor starts, stops, reverses, within  $\frac{1}{2}$  cycle of power supply. Smaller size delivers 2 oz-in. at 100 rpm. Write for Bulletin GEC-1294.

**Taxi Dynamotors:** Compact, lightweight units convert low-voltage, d-c power to high-voltage, d-c for mobile radio transmitters in taxis, police cars, trucks, buses, railroads, fire departments, forestry radio transmitters, etc.

Input: 6-28 volts. Output: up to 660 v, 165 watts, 5 min on, 15 min off-duty cycle.

**Permanent-magnet Motors:** Permanent-magnet, totally enclosed, shunt motors for aircraft operation (very high ambient), blower, actuator, tuner, and other applications. Can be dynamically braked by short-circuiting armature terminals, and reversed by use of relays. Explosion-proof, shock-resistant. 0.01 hp, 10,000 rpm, 27.5 v input. 130 rpm with gear reduction. With radio-interference filter. Write for Bulletin GEC-988.

### ELECTRONIC AMPLIDYNE

An extremely responsive amplifier combined with a motor-amplidyne set, useful in many types of motor control where precise regulation of current, voltage, and speed is necessary or desirable.

**APPLICATION:** Controls speed, limits loads, holds tension, speeds up acceleration, positions precisely, provides quick stopping. Readily adaptable to programming and processing control.

**RATED**—As a regulated, adjustable-voltage power supply for d-c motors up to  $1\frac{1}{2}$  hp. As regulated exciter for large, adjustable-voltage drives up to 200 hp. The unit has an output of  $1\frac{1}{2}$  kw, 250 volts. Can be arranged for use on 220- or 440-volt, 3-phase, 60-cycle power supply.

The G-E electronic amplidyne is applied as a part of a complete control system. Write for Bulletins GEA-4053, GEA-4889.

## SWITCHBOARD AND PANEL COMPONENTS

### TERMINAL BOARDS

Typical EB-5 board with short-circuit strips

Typical EB-6 board with hinged cover

For use where leads are brought to any point for permanent or temporary connection, especially if many wires are involved.

**Type EB-5** are fabricated terminal boards. Each is equipped with the necessary washer-head binding screws for circuit-wire connections.

**Type EB-6** are fabricated terminal boards of the same construction and size as the Type EB-5, except that clamp-type connectors are furnished.

Boards will accommodate wire sizes from No. 18 to No. 10 inclusive. Completely assembled boards can be furnished, with or without covers, for any number of poles, 2 through 18.

### CONTROL and TRANSFER SWITCHES

Type SB-1 design is extremely flexible and can be applied to meet special requirements. Features include: square operating shaft with cams to provide positive contact operation; silver-to-silver contacts; totally enclosed compact design; ample space for connecting leads; choice of operating handles; permanent-finish Textolite\* escutcheons; wide range of stages and contact positions, the number of circuits to be controlled determining the number of stages and contacts needed. Switches having up to 16 stages are commonly furnished. The maximum number of positions, or throws, is 12.

Rating of Type SB-1 switches is 600 v, 20 amp continuous, 250 amp for 3 seconds. Interrupting rating depends upon voltage and character of circuit, as well as number of contacts in series. Write for Bulletin GEA-4746.

\*Registered trade-mark of General Electric Co.

### INDICATING LAMPS

Types ET-5 and ET-6 offer high visibility, low wattage, and long life. Consist of telephone-type lamp with contacts mounted within an insulated tube and with a ceramic resistor for any standard voltage up to 600 v.

For any panel thickness up to 2 in, Color cap provides excellent vision from any angle. Available in 6 colors: red, white, amber, blue, yellow, and clear.

### AIR CIRCUIT BREAKERS

Switching and better protection of power circuits is secured by using air circuit breakers. Type AK-1 breakers are available for switchboard mounting for use, for example, as main power-supply breaker in TV transmitters or are individually enclosed for remote installations. Current ratings from 15 through 4000 amperes, up to 600 volts, a-c. and 250 volts, d-c. See GEA-5915 for full details.

### HIGH-INTERRUPTING-CAPACITY FUSES

The General Electric high-interrupting-capacity, current-limiting, Type CLF fuse provides efficient and economical short-circuit protection for control power circuits, motor starters, feeders, and similar applications on systems 600 volts and below. Not only will the CLF fuse isolate faulty apparatus and circuits, but it also affords better protection by reducing the destructive let-through energy associated with short circuits. Rated to interrupt available short circuits of 200,000 amp at 60 cycles, these fuses are available in ratings from 6 through 4,000 amp, 250 v and 600 v. Write for Bulletin GEA-6319.

## MOLDED-CASE CIRCUIT BREAKERS

Type R Plug-in

Molded-case circuit breakers comprise a complete line of fuseless protection for distribution, power, lighting, and appliance circuits. They are used in individual mountings, built-in applications, separate enclosures,

switchboards, panelboards, and load centers. The sturdy, molded-phenolic cases and trip units are sealed against tampering. The circuit breakers are quick-make, quick-break; they are trip-free and trip-indicating.

Type TQ Bolt-on

### REPRESENTATIVE 50-AMPERE FRAME TYPES

5000-ampere, a-c, interrupting ratings

**Type R**—single-pole, plug-in units for standard-duty applications from 15 to 50 amp, 120 v, a-c, 120/240 v, a-c, 2-wire, with thermal magnetic trip.

**Type ALB-1**—single-pole, plug-in unit meeting Navy Hi-shock requirements, 125 v, a-c/d-c, 5 to 50 amp, thermal and independent magnetic trip. Navy breakers not U/L listed.

**Type TQ**—single-pole, front and back mounting for applications from 10 to 50 amp, 120 v, a-c, 120/240 v, a-c, 2-wire, with thermal and independent magnetic trip.

**Type TQL**—single-, two-, or three-pole with common trip, plug-in units for applications from 10 to 50 amp: single-pole, 120 v, a-c, 120/240 v, a-c, 2-wire; two-pole, 120/240 v, a-c; two- and three-pole, 240 v, a-c, with thermal and independent magnetic trip.

Other circuit breakers are available in standard industry sizes from 10 to 800 amp for applications up to 600 v, a-c, 250 v, d-c. For further information, request Bulletin GEC-1032 from Circuit Protective Devices Department, 41 Woodford Avenue, Plainville, Connecticut.

Type TQL Plug-in

Type ALB-1 Plug-in

When ordering or seeking information please mention *Electronics Buyers' Guide*.

## CONTROL ACCESSORIES

### AC or DC SOLENOIDS, CR9500

Simplify complex installations: in direct or remote control requiring short, powerful thrusts. Wide selection: 24 different ratings, to 40 lb at 1/2-in. stroke or to 36 lb at 1-in. stroke, available in push- or pull-type operation and for use on a-c or d-c circuits up to 600 volts, maximum. Used to push or pull in a straight line, or to provide mechanical motion at a remote or inaccessible location. They may be operated remotely from a push-button station or automatically by limit switches, pressure switches, float switches, or other pilot-circuit devices. Write for Bulletin GEA-6215.

### GENERAL-PURPOSE RELAYS,

#### CR2790E

Used to control pilot circuits in response to remote-control switch or thermostat. Also, for direct control of small motors driving pumps, fans, etc; as a f-hp motor starter, and in conjunction with a magnetic switch controlling larger motors, and for signal systems. Comes in open-type or in general-purpose case. Explosion-proof and watertight cases available as kits. Three contact arrangements available: double-pole, double-throw; double-pole, single-throw; single-pole, single-throw. Protection against hazard from restarts after power failures can be provided with the double-pole form when one pole is used as a holding interlock in the coil circuit together with a momentary-contact, push-button station. Enclosed forms have convenient conduit entrances at top and bottom. Write for Bulletin GEC-257.

### PLATE RHEOSTATS,

#### IC8000 and IC8070

Back-of-panel or front-of-panel mounting or floor-mounted. Hand-, chain-, or motor-operated. Six-, nine-, and twelve-inch-square plates, providing 27 to 70 divisions.

IC8000

These rheostats consist essentially of one or more resistance plates with suitable contact mechanisms assembled in frames. Each resistance plate consists of a molded-compound plate in which resistor elements are welded, and, in turn, embedded in a special cement which provides excellent heat-conducting and electric-insulating qualities. Hand-wheels and sprockets are insulated from the switch parts.

Write for Bulletin GEA-6474.

### OILTIGHT PUSH-BUTTON UNITS, SELECTOR SWITCHES, INDICATING LIGHTS

Push-button unit

Selector switch

Indicating light

A push button with building-block construction. This provides flexibility to meet requirements for special units by simple combination of the basic elements, which consist of separable operators, a removable color ring for identification, and a basic contact block. Operators and contact blocks are furnished separately. Single, double, or tandem contact blocks are quickly and easily attached to any type of operator. A complete line of oiltight stations, units, selector switches, and indicating lights is offered. Write for Bulletin GEA-5779.

### PUSH-BUTTON STATIONS

For control circuits of magnetic controllers designed for push-button control. Standard- and heavy-duty stations available which may consist of various combinations of momentary-contact buttons, maintaining-contact buttons, selector switches, and indicating lights, for surface or flush mounting. Standard-duty station recommended for use with contactors rated up to and including 150 amp. Write for Bulletin GEA-6544.

### ENAMELED RESISTORS, IC9006

Fixed resistor

Slide-wire resistor

The IC9006 enameled resistor units employ a strong, high-heat-resisting, ceramic body developed to withstand sudden and extreme temperature changes. The low-temperature-coefficient resistance wire, after being wound on the body, is embedded in a vitreous enamel, which is fused at high temperatures to a uniform, glossy structure. The enamel is moisture-resistant and extremely durable and gives mechanical protection to the resistor windings.

Fixed and slide-wire resistors are supplied with push-in mounting feet or with alternate mounting arrangements, such as heavy duty mounting feet, through bolts, or multiresistor mounting brackets. Taps, as required, can be supplied on fixed resistors, and a choice of sliders can be supplied in the slide-wire type.

#### RATINGS AND DIMENSIONS

Continuous Watt Rating (Open)	Dimensions in Inches	
	Body Diameter	Length
5	5/16	1
10	5/16	1-3/4
20	5/16	2
25	3/8	2
50	3/4	4-1/2
100	1-1/8	6-1/2
160	1-1/8	8-1/2
200	1-1/8	10-1/2

Write for Bulletin GEA-6592.

When ordering or seeking information please mention Electronics Buyers' Guide.

## SPECIALTY CONTROL

### HERMETICALLY SEALED RELAYS

The General Electric family of hermetically sealed relays combine small size with unusual reliability under severe temperature, shock, and vibration conditions—making them ideal for all radio, radar, fire control, navigational equipment, and industrial electronic jobs.

Though initially designed for military applications, more and more General Electric sealed relays are being used for industrial jobs. Their extreme reliability and small size are being utilized by industrial designers. Resistance welding and other industrial electronic circuitry is being simplified and miniaturized with G-E sealed relays.

### MINIATURE

1. CR2791G121 series—For military and industrial applications; coil voltage 1 to 175 volts, d-c; coil resistance 10-16,000 ohms; AN 3304 type relay; designed for special reliability.
2. CR2790G126 series—For industrial and military applications; operates from 115 volts, a-c; for long-life switching, currents up to 5 amp resistive at 115/220 volts, a-c, or 30 volts, d-c. (Example: pulsing coil of similar relay, expected life, 50 million operations.)
3. CR2791K110 series—High-speed polarized relay; switching up to 10 milliamp; operates in as little as 1/4 millisecond (250 microseconds); AN 3304 size can—4PDT or 4 independent single-pole, double-throw elements.

### SUBMINIATURE

4. CR2791G152 series—Designed to give reliability of AN 3304 type relay in subminiature-size enclosure; weighs less than one

ounce; 3/4 inch in diameter and 1 1/4 inches long; single-pole, double-throw.

5. CR2790G125 series—Same size and weight as CR2791G152. Design is modified to permit operation from 400-cycle, a-c voltage.
6. 3S2791G160 series—High reliability in subminiature size; exceptionally resistant to shock and vibration; two-pole, double-throw.

### MICRO-MINIATURE

7. 3S2791G200 series—Voltage-calibrated model—two-pole, double-throw; weighs only 0.5 oz, measures 0.36 in. by 0.80 in. by 0.88 in.; contacts rated 2 amp resistive at 28 v, d-c, or 115 v, a-c; has a sensitivity of 340 milliwatts.
8. 3S2791G210 series—Current-calibrated model—has a sensitivity of 200 milliwatts; designed for lower operating power; possesses same features as voltage-calibrated model, but about 0.31 in. longer.

## PHOTOVOLTAIC CELLS

### SELF-GENERATING

For detecting, controlling, and measuring light or color where long life and stability are required, or where it is impractical to employ electronic amplifiers. Extensively used in light meters, reflectometers, colorimeters, densitometers, photometers, photographic exposure meters, headlight testers, phonograph pickups, etc. For complete information, contact your nearest General Electric Apparatus Sales Office.

Switches on lower panel of this instrument-standardization console are used to complete tests after controls on upper panel are set.

## INSTRUMENT-STANDARDIZATION CONSOLE

The instrument-standardization console is designed to be a basic unit in any operation concerning the development, design, standardization, or service calibration of various electric instruments. In large instrument servicing groups, it can be used as the basic or primary instrument-calibration equipment because of its high accuracy and versatility. In smaller electric-instrument servicing groups, its versatility makes it the most complete single facility available for general instrument-calibration activity.

The instrument-standardization console is most widely used for the calibration of portable, small panel, switchboard and recording types of electric instruments. The equipment supplies regulated power in the audio-frequency range of

50 to 3000 cycles per second and finds a definite application in the military, electronic, and aircraft industries as well as other industries making wide use of instruments.

Following are some typical portable, small panel, switchboard, and recording instruments which can be calibrated with this equipment. D-c: galvanometers, microvoltmeters, millivoltmeters, voltmeters, microammeters, milliammeters, ammeters, analyzers (instrument), multimeters, oscillographs, photoelectric recorders, current shunts, and standard cells. A-c: millivoltmeters, voltmeters, milliammeters, ammeters, frequency meters, ammeter with current transformer, voltmeter with potential transformer, and electronic voltmeters.

## PORTABLE TESTING AND RECORDING INSTRUMENTS

**PHOTOELECTRIC RECORDER—Type CE:** For temperature measurements, developmental testing, high-speed recording, laboratory investigations, physiological research, and equipment tests. Provides direct ink records, and is ideal for any test where only a small amount of energy is available for the operation of the recorder. Sensitivities obtained as low as 5.0 microamperes or 0.2 millivolt, full-scale. Response periods as fast as 1/5 second. Four different motor arrangements provide chart speeds from 1/2 inch per hour to 72 inches per minute. Write for Bulletin GEC-254.

**INSULATION-RESISTANCE METER:** An electronic instrument designed to measure insulation resistance over a range of 0 to 20,000 megohms. Measurements indicate poor insulating materials and materials contaminated by dirt or moisture. This instrument also makes possible the study of the effects of temperature and humidity on insulation. Consists of an electronic rectifier, a bridge circuit which contains Thyrite\* resistance material, and an electronic-tube voltmeter, all in one enclosure. Meter is available in range of 0 to 20,000 megohms and has four scales. Over the range of 5 to 20,000 megohms, tests are made at a constant 500-volt d-c potential; and from 0 to 5 megohms at 0 to 250 volts. The meter is small, compact, portable—convenient for production and service testing, simple to operate. Write for Bulletin GEC-753.

\* Registered trade-mark of General Electric Co.

**CURRENT-LIMITED HIGH-POTENTIAL TESTER:** By limiting the output current to a maximum of 5 milliamperes, the tester effectively minimizes most of the hazards encountered with high-potential testing equipment. Features: output current limited to below the maximum current which an operator can let go; nondestructive testing; line surges virtually eliminated in output; indicates voltage on sample regardless of wave shape, internal voltage drop, or variation in line voltage; faults indicated by glow lamp on panel. Output voltage: 0-3500 volts (peak  $\sqrt{2}$ ), milliamperes when shipped. Maximum load for full

Output current limited to less than 5 milliamperes when shipped. Maximum load for full output voltages: 0.005  $\mu$ i. Write for Bulletin GEC-700.

**GAUSS METERS:** Used for measuring: Flux density in gaps of instrument magnets; of blocked d-c relays and breakers; of blocked-rotor generators or motors. Field gradient across air gaps. Direction and density of leakage flux emitted from perimeter of magnets. Flux density in iron portions of magnetic circuits. Strength and direction of stray fields of many permanent and electromagnets. Magnetic properties encountered in laboratory work. Available in d-c ranges from 25 to 20,000 gaussess; a-c ranges—60 cycles from 0-2500 gaussess. Write for Bulletin GEC-777.

**INDICATING FLUXMETER:** A convenient means for accurately measuring flux densities and total flux. Determines magnetic properties of permanent magnets and d-c electromagnets. Measures flux distribution in a magnet gap, leakage flux along sections of a permanent magnet or electromagnet. Write for Bulletin GEC-777.

**LEAK-DETECTION EQUIPMENT:** A complete line of leak-detection equipment is available for detecting small leaks in any closed system (vacuum and pressure). Types available are helium and halogen leak detectors. Write for Bulletins GEC-233 and GEC-336.

## AC & DC PORTABLE INDICATING INSTRUMENTS

Types AP-11, DP-11, AP-12, DP-12

A line of instruments which is functionally designed to give the greatest convenience and readability. Precision components and spring-mounted moving elements are used to achieve sustained accuracy. These precision instruments are suitable for laboratory use, as well as for field applications and production tests.

**Types AP-11 (a-c) and DP-11 (d-c):** Designed for general testing where a dependable, easily read instrument with 1/2 of 1% accuracy is required. Ideal for trouble shooting and maintenance work where accurate readings must be taken under adverse lighting conditions. Size—7 3/8 by 7 7/8 by 3 1/4 in. Scale length—5.5 inches. Pointer—Knife edge with mirror scale. Damping—Magnetic. Zero Adjuster—External. Shielding—Excellent shielding from stray magnetic fields.

**Types AP-12 (a-c) and DP-12 (d-c):** Specifications are similar to DP-11 above, except accuracy is to 1/4 of 1% full-scale.

## GENERAL-PURPOSE OSCILLOGRAPH Type PM-20

Uniquely designed for fast operation and maintenance, the PM-20 will record up to 71 variables on one oscillogram. A wide range of frequencies, from d-c to 6000 cps, can be recorded. Record speed may be adjusted from 4 to 500 feet per minute. Many additional features are provided, including automatic record numbering, timing lines, trace interruption for identification, automatic record-length control adjustable from 1/2 to 5 feet, and remote control. Write for Bulletin GEA-6348.

**Type PM-18:** Records 2, 3, or 4 rapidly or slowly changing currents and voltages simultaneously. Transient phenomena of short duration can be recorded by means of a synchronizing switch. Records may be made using continuous-drive holder, film-pack holder, or Polaroid-Land film holder, which produces finished oscillograms in one minute without the use of a darkroom. Write for Bulletin GEC-580.

# INDUSTRIAL SOLDERING IRONS

General Electric soldering irons are highly efficient for all work requiring soft soldering. Reserve heat capacity of G-E irons makes them outstanding for continuous, high-speed production soldering. Write for Bulletin GEC-1318.

## FEATURES

### CALORIZED COPPER TIPS

Durable, interchangeable, designed for extra-long life. Calorized coating retards corrosion and oxidation, helps prevent freezing of tips to tip holder—increases tip life.

### IRONCLAD COPPER TIPS

Couple quick heat transfer of copper with long-wearing qualities of iron—for extra-long life.

### TUBULAR HEATING ELEMENTS

Provide quick, more dependable heating.

### STAINLESS-STEEL SHELL

Provides high corrosion resistance and low heat loss.

### MIDGET SOLDERING IRONS

Ironclad tips only

25-watt, 6-volt, 1/4-in.-dia chisel tip. Also available in 1/8-in.-dia pyramid tip and 3/16-in.-dia chisel and pyramid tips.

### LIGHTWEIGHT INDUSTRIAL IRONS

Ironclad tips only

60-watt, 120-volt, 3/16-in.-dia pyramid tip. Also available in 1/4- and 3/16-in.-dia chisel tips.

### INDUSTRIAL SOLDERING IRONS

75, 100, 110, 125, 200, 300 w  
Calorized or Ironclad tips  
115 or 230 v

## ALNICO PERMANENT MAGNETS

Provide constant, powerful magnetic field energy in a given space . . . with a minimum of volume and weight

G-E Alnico Permanent Magnets can simplify design, reduce size and cost of meters, instruments, controls, motors, and communications equipment. Guaranteed minimum external energy product up to 6,000,000 gauss-oersteds.

Available cast or sintered; stocked in a wide range of sizes and shapes. Other styles can be made to your specifications. Magnets can be furnished with steel inserts, close tolerance holes, die-cast aluminum sheaths or other coatings.

Complete magnet design and product development service available to work on your problems. Write for price lists, specifications, or Design Manual PM-125.

Demagnetization and energy product curves for General Electric Alnico Permanent Magnets

## THERMISTORS

Detect, measure, compensate for minute changes in temperature

G-E Thermistors have large *negative* temperature coefficients. As circuit elements, they provide highly sensitive responses to relatively minute temperature changes.

In addition to uses in thermometry, Thermistors can provide time delay, suppress surges, control warning circuits and sequence switching.

Two grades available; stocked in rods, disks, and washers, with or without leads. Write for design assistance or Thermistor Manual TH-13A.

Temperature resistance values of General Electric Thermistors compared to a representative metal

## THYRITE\* VARISTORS

Nonlinear resistance material provides current that varies as a power of applied voltage

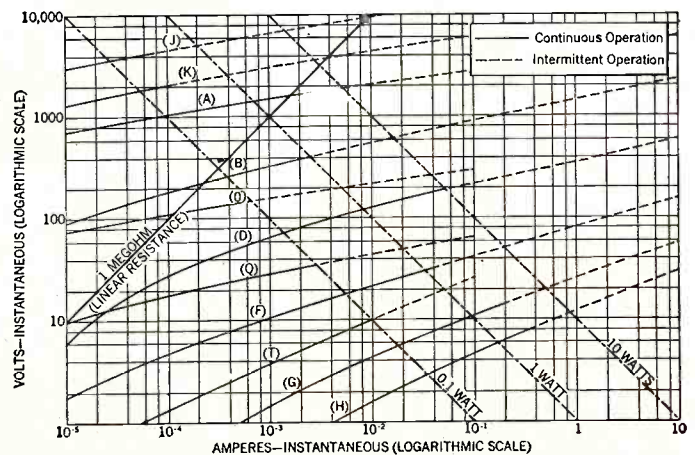

Because of their unique properties, G-E Thyrite Varistors can be used to limit voltage surges, to stabilize circuits supplied by rectifiers, to control voltage-sensitive circuits.

Also used as nonlinear resistance parameters, potentiometers, and frequency multipliers.

Thyrite Varistors are manufactured with a wide variety of volt-ampere characteristics. Stocked in disks and rods, with or without leads.

For help on your circuit-design problems, or for Thyrite Bulletin TY-101, write today.

\*Registered trademark of the General Electric Company.

Typical volt-ampere characteristics of representative General Electric Thyrite Varistors.

(Sizes range from 1/2" to 6" diameter disks and from 1" to 2" long, 1/4" diameter rods. Curves from Thyrite Bulletin TY-101.)

## ENGINEERING APPRAISAL KITS

for laboratory testing of Thermistors and Thyrite Varistors

### THYRITE VARISTOR KITS

Kit No. 1—Miniature disk-type varistors. Contains: two each in six ratings, color-coded with connecting leads. Price: \$5.00.\*

Kit No. 2—Rod-type varistors. Contains: two each in five ratings, color-coded with connecting leads. Price: \$5.00.\*

### THERMISTOR KITS

**Kit A contains:**  
12 low-resistance (10-500 ohms @ 25° C) disk thermistors; two of each in six sizes. Price: \$12.50.\*

**Kit B contains:**  
12 high-resistance (1,000-100,000 ohms @ 25° C) disk and rod thermistors; two of each in six sizes and two grades. Price \$12.50.\*

**Kit C contains:**  
12 washer thermistors (10-415 ohms @ 25° C); two of each in six sizes, two grades; 1 set of thermistor assembly hardware. Price: \$12.50.\*

**Kit D contains:**  
10 disk thermistors, 1,000-ohm resistance; two of each in five sizes (two grades). Price: \$12.50.\*

Order kits directly from:

Magnetic Materials Section of General Electric Co., 7780 N. Neff Road, Edmore, Michigan

\*Plus applicable sales and use taxes.

**GENERAL  ELECTRIC**

Free New

# three-part pack brings you three-way gains!

Output increases, costs drop, quality climbs—with these General Electric fast-assembly components!

WHETHER your domain is automobile dashboards, radio and TV receivers, temperature controls, or what-have-you, the three units in this free new Sample Test Kit can point the way to big advantages in product improvement and manufacturing economy!

Here's what you'll get...

### 1. ENCAPSULATED R-C Network...

This new G-E development is actually several components in one unit, with performance comparable to individual components. Its thin ceramic plate, with a variety of resistor and capacitor patterns and their leads applied to customer requirements, is encapsulated in a compact, uniform phenolic case. This unit thus cuts space and solder requirements under those for individual components, in such applications as coupling, pulse-forming, and R-C filter networks. The encapsulation feature provides excellent resistance to humidity and corrosive agents, and the uniform size and surface of the case is especially suited for mechanized placement.

### 2. "THRU-CON" Print Wire Board...

With this advanced print wire, you can design a compact wiring pattern on *both* sides of the board *without* the cost of further processing to connect them. You gain from the "Thru-Con" additive production technique, which plates *through* the holes at the same time it plates the wiring pattern on the board.

### 3. "WEJCAPS" Leadless Capacitors...

Besides eliminating bothersome lead problems, "Wejcaps" offer low cost, small size, high durability, and high moisture resistance for such applications as antenna coupling networks, AVC and AGC networks, screen by-pass, and other medium tolerance circuits. The "Wejcaps" are simply inserted in a slot in a print wire board and soldered directly to the connection point.

Try these components yourself! If you're after faster production, higher quality assemblies, and lower cost—for present or prospective equipment—send *today* for this free Sample Test Kit. Address, on your letterhead please, *General Electric Company, Specialty Electronic Components Department, Section 267, Auburn, N. Y.*

*Progress Is Our Most Important Product*

**GENERAL  ELECTRIC**

# GENERAL ELECTRIC HAS A WIDE SELECTION OF SEMICONDUCTORS...CHECK BELOW FOR YOUR APPLICATION!

## HIGH & LOW FREQUENCY GERMANIUM PNP TRANSISTORS

- High gain, medium power audio
- For USAF requirements
- Commercial equivalent to USAF requirements
- Computer switching
- Symmetrical switching
- Industrial & military linear amplifiers
- RF amplifiers
- Oscillator circuits
- Inexpensive audio amplifier types for the hobbyist

## HIGH FREQUENCY GERMANIUM NPN TRANSISTORS

- RF and IF amplifier types for broadcast receivers
- Converters
- Industrial & military linear amplifiers
- Computer switching
- Inexpensive high frequency types for hobbyists

## SILICON NPN HIGH FREQUENCY TRANSISTORS

- Computer switching, 150° C operating temperature, 200° C storage temperature
- High frequency amplifiers, 150° C operating temperature, 200° C storage temperature

Recent developments in germanium and silicon semiconductors are opening new applications every day. The Semiconductor Products Department of General Electric is continually expanding its line to meet new applications with ratings designed for your needs.

For more specific information on G-E semiconductor products which fill the applications you checked above, write the General Electric Company, Semiconductor Products, Section S2667, Electronics Park, Syracuse, New York.

## SILICON UNIUNCTION TRANSISTOR

- Operation up to 150° C, Replaces 2 junction transistors in computer circuits

## NPN TETRODE TRANSISTOR

- Up to 150 megacycle operation

## SILICON LEAD & STUD MOUNTED RECTIFIERS

- 1N536 series silicon rectifiers, 750 ma @ 50° C, 250 ma @ 150° C, PIV ratings 50, 100, 200, 300, 400 and 500 volts
- 1N1115 series silicon, stud mounted rectifiers, 1.5 amps @ 85° C, 600 ma @ 150° C, PIV ratings 100, 200, 300 and 400 volts

## GERMANIUM RECTIFIERS

- 1N91 series germanium rectifiers rated from 75 to 150 ma, maximum operating temperature 55° C, PIV ratings 100, 200 and 300 volts
- 1N315, USAF 1N315 & 1N368 germanium rectifiers characterized by an operating temperature up to 85° and low leakage current

## GERMANIUM STACK RECTIFIERS

Germanium stack rectifiers are available in stacks up to 12 fins. PIV ratings are 100, 200 and 300 volts. Extremely low power dissipation and forward voltage drop provide excellent efficiency and regulation.

- 4JA211 series, up to 1½ amps per fin
- 4JA3011 series, up to 10 amps per fin

## SILICON HIGH CURRENT RECTIFIERS

- 4JA60 series silicon stud mounted rectifiers provide an operating current up to 85 amperes. Low forward voltage drop
- 4JA6011 series silicon stack rectifiers give an output up to 76.5 kilowatts, without forced air cooling, from less than 1/3 cubic foot

### FREQUENCY RESPONSE Recorder - Model SL-4

#### Featuring

- Convenient rack-mounting
- Easy linkage to auxiliary apparatus like beat frequency oscillators, analyzers
- Ink recording, 4" wide chart
- Lever arrangement for chart speed selection
- Electronically controlled pen speed
- Interchangeable input potentiometers available for a variety of scale functions (db, Linear, square root, phon).

MODEL SL-4 can be supplied as MARINE RECORDER, in water-tight enclosure—for rugged naval and tropical requirements.

Bulletin will be sent upon request

## *The New* **TRANSFORMERS, INC.** *Plant*

### **SPECIAL PURPOSE TRANSFORMERS**

*to meet today's critical  
requirements demands highly  
specialized skills and equipment*

**VOLTAGE REFERENCE  
COMPUTER EXCITATION**  
voltage ratio accuracy up to .001 %

**INSTRUMENT  
AUDIO  
PULSE  
HYBRID  
POWER**

and all the sub-classifications

**MAGNETIC AMPLIFIERS  
RATIOMETERS  
BRIDGES**

and special test equipment

The accuracy required in voltage reference transformers and computer excitation transformers demands exacting specifications, supervision and material control. In order that high precision transformers be acceptable they must have predictable performance for all temperature and load conditions. A specialized method has been developed at Transformers, Inc. to make this possible. The measurement of voltage ratio is not sufficient, data must be also obtained which will indicate in which manner the variables of a particular transformer is affected by temperature and changes in the load.

### **Functionally Designed for the Manufacture of Transformers**

Manufacturing transformers requires special equipment which is unique in that it cannot be used for other purposes. In the layout of the plant of Transformers, Inc., three objectives have been closely aimed for: a laboratory capable, not only of measuring all the parameters of transformers, but making measurements on all types of electronic equipment in which transformers are to be used. The second objective was a Prototype plant or Sample Department complete and independent of the Production Department. The third objective was manufacturing space laid out in such a manner that complete control can be maintained on the quality of the transformer while it is in the various stages of manufacture.

## **MINIATURIZATION**

Airborne equipment may require the same accuracy as ground equipment with the additional requirement of miniaturization. Miniaturization can only be achieved by the use of higher operating temperatures with a resulting loss of efficiency. Thus highly accu-

rate transformers can be designed and manufactured which operate at very high temperatures and are extremely small. Methods of encapsulating transformers in order to reduce weight have been developed at Transformers, Inc.

## ENVIRONMENTAL TESTING

One chamber performs MIL-T-27 humidity cycling and Monmouth cold shock. Another chamber is a combination altitude and extreme cold chamber. Altitude up to 100,000 feet can be simulated. Temperatures as low as 100 degrees below zero Fahrenheit can be readily obtained. Another installation not yet completed will perform vibration testing up to 3,000 cycles at any simulated altitude up to 125,000 feet and at any temperature from 125 degrees below zero to 190 degrees above zero.

## PRETESTED PROTOTYPES

All operations necessary to the manufacture of a transformer can be performed independent of the Production Department. The personnel in the Prototype Department is specially trained to follow the design of new prototype transformers accurately. This highly specialized department is at your service to produce prototypes and samples at short notice.

## IMPORTANT FEATURES OF TRANSFORMERS, INC. PRODUCTS GREATER ACCURACY

Transformers, Inc. have developed special equipment to permit the measurements of ratio to a greater accuracy than heretofore possible. In our laboratory we can measure voltage ratio with an accuracy of 5 parts per million with a sensitivity of one part per million. In addition we have developed special equipment for the measurement of phase angles as low as .001 milliradian.

### RELIABILITY

The manufacturing processes adhered to by Transformers, Inc. insure greater reliability. First by the specialized impregnating methods (vacuum and pressure). Secondly, by the standards adopted to insure maximum rigidity of assembly. Thirdly, by the careful inspection of raw material.

### MECHANICAL ACCURACY

In order to insure the accuracies we require for the mechanical dimensions for transformers, Transformers, Inc. has incorporated a complete metal working department. Through these facilities we are assured of mechanical perfections to within 5 thousandths of an inch for can dimensions and to within 1 thousandth of an inch for studs and other transformer components.

### MINIMUM SIZE

It is of increasing importance for Airborne equipment to obtain optimum performance for minimum weight and size. The use of specialized core material and especially coated wires such as silicone coated wire and teflon insulated wire has permitted the design of transformers by Transformers, Inc. to minimum sizes. In addition we have developed special molded bobbins of high temperature material to obtain transformers without paper margins (which represent a loss of space) with resultant decrease in size and weight.

General laboratory covers approximately 5,000 sq. ft., has the necessary equipment to make measurements from .01 cycles to 50 megacycles. There is sufficient equipment available that all the set-ups can be operated simultaneously without interference.

Equipment used in the design of pulse transformers to eliminate the "cut and try" method generally employed.

Testing pulse transformers. This set-up can simulate the operating conditions of pulse transformers up to one million volts.

A detailed view of the automatic winding machines.

## MEASURED ACCURACY IN TRANSFORMER WINDING

**SEMI-AUTOMATIC WINDING MACHINE (PROTOTYPE WORK).** The Prototype and Sample Department covers approximately 2,500 square feet and is completely equipped to perform all operations from winding to finishing independently of the Production Department. The illustration shown is the hand winding of very heavy wire. The proper tension is obtained by a tension device behind the operator.

## VACUUM IMPREGNATION

Production vacuum impregnated in these tanks and then subjected to a pressure of 100 lbs. per square inch while they are still submerged in the varnish. This insures complete penetration of the varnish. The multiplicity of tanks permits simultaneous vacuum impregnation with different resins.

## TRANSFORMER POTTING

A section of the Production Potting Department. All transformers are pre-heated prior to potting to insure the removal of moisture and the absence of voids.

# DESIGN ENGINEERING FACILITIES

Transformers, Inc. is equipped with the most complete laboratory of any transformer company in the United States. It is possible to make measurements of all parameters at all frequencies from .01 cycles per second to 50 megacycles. In addition Transformers, Inc. has complete environmental test chambers which permit testing of transformers at simulated altitudes up to 100,000 ft. and at temperatures from 100 degrees below zero to 200 degrees above zero fahrenheit. There is vibration equipment which permits the vibration testing from 5 cycles up to 3,000 cycles per second. Standard transformers are designed on the basis of the experience gathered from nomographs and our standard design specifications. We are constantly confronted with design of radically different transformers. Such transformers can only be acceptable in the field if they are subjected to complete tests for electrical specifications and under all environmental conditions. The final design is only acceptable when it is thoroughly tested.

## FOR ALL BRANCHES OF THE MILITARY

Transformers, Inc. have been specialists in designing transformers for special military applications. These transformers must meet the rigid MS and MIL-T-27A requirements. We have been suppliers to government contractors on transformers that meet these exacting requirements.

## FOR ALL INDUSTRIAL APPLICATIONS

Computer transformers and magnetic amplifiers made by Transformers, Inc. have found wide application in industrial controls and automation equipment.

Transformers, Inc. has been a leading supplier for the highly specialized transformers required in computers. Transformers, Inc. is equipped to manufacture all types of magnetic memory equipment.

HEWLETT-PACKARD COMPANY • PALO ALTO, CALIFORNIA • U. S. A.

## -hp- Oscillators – 0.008 to 10,000,000 cps

Hewlett-Packard now offers 12 high quality, fast and accurate oscillators, each an exceptional value and each engineered to do a specific job best. Each incorporates the famous RC resistance capacity circuit pioneered by *-hp-*. This circuit makes possible instruments that are highly stable, wide range, compact and portable; instruments that are extremely simple to operate and require no tedious re-setting or adjustment during operation.

### -hp- 200 Series Audio Oscillators

For audio and ultrasonic measurements, *-hp-* offers popular Models 200AB and 200CD. Both have highest stability and accurate tuning circuits. Low impedance operating levels plus superior insulation guarantee long years of trouble-free dependability. Operation is simple; just three controls; no zero setting necessary. *-hp-*

200AB, 20 cps to 40 KC, \$130.00. *-hp-* 200CD, 5 cps to 600 KC, \$160.00.

### -hp- 207A Sweep Oscillator

This new audio oscillator provides continuous single-sweep frequency coverage from 20 cps to 20 KC. No band switching is needed; dial accuracy is 4%, and the instrument also provides a flexible 10 v/600 ohm output usable balanced or with one side grounded. Frequency response is  $\pm 1.0$  db full

range, distortion and hum are less than 1%. *-hp-* 207A may be swept by hand, motor driven, tuned remotely or coupled to a recorder. *-hp-* 207A, \$275.00.

Instrument	Primary Uses	Frequency Range	Output	Price
<i>-hp-</i> 200AB	Audio tests	20 cps to 40 KC	1 watt/24.5 v	\$130.00
<i>-hp-</i> 200CD	Subsonic through supersonic audio and ultrasonic tests	5 cps to 600 KC	160 mw or 10 v/600 ohms; 20 v open circuit	160.00
<i>-hp-</i> 200J	Interpolation, frequency measurements	6 cps to 6 KC	160 mw/10 v	275.00
<i>-hp-</i> 200T	Telemetry, carrier current tests	250 cps to 100 KC	160 mw or 10 v/600 ohms; 20 v open circuit	350.00
<i>-hp-</i> 201C	High quality audio tests	20 cps to 20 KC	3 w or 42.5 v/600 ohms	225.00
<i>-hp-</i> 202A	Low frequency measurements	0.008 to 1200 cps	28 mw or 30 v p-p/4000 ohms	465.00 $\Delta$
<i>-hp-</i> 202C	Servo equipment tests, measurements	1 cps to 100 KC	160 mw or 10 v/600 ohms	300.00
<i>-hp-</i> 205AG	High power audio tests, gain measurements	20 cps to 20 KC	5 watts	440.00 $\Delta$
<i>-hp-</i> 206A	High quality, high accuracy audio tests	20 cps to 20 KC	+ 15 dbm	565.00 $\Delta$
<i>-hp-</i> 207A	Audio sweep generation	20 cps to 20 KC	160 mw or 10 v/600 ohms	275.00
<i>-hp-</i> 233A	Carrier oscillator—current tests	50 cps to 500 KC	3 w/600 ohms	475.00
<i>-hp-</i> 650A	Wide range video tests	10 cps to 10 MC	15 mw/3 v	490.00 $\Delta$

$\Delta$  Rack mounted instruments available at \$15.00 less.

### -hp- 202A Function Generator

Compact, multi-purpose source of transient-free test voltages from 0.008 cps to 1,200 cps. Continuously variable through 5 bands; offers exceptional stability (within 1%) and distortion less than 1% to 100 cps. Sine, square or triangular waves may be selected by a front panel switch; the 30 volt output peak-to-peak is constant for all wave forms and over full frequency range. *-hp-* 202A, \$465.00.

### -hp- 650A Test Oscillator

Covering 10 cps to 10 MC, *-hp-* 650A is a highly stable, wide band instrument for audio, supersonic, video and rf measurements. Output is flat within 1 db full range; voltage range is 0.00003 to 3 v. In addition to 600 ohm impedance, voltage divider provides a 6 ohm impedance. Distortion less than 1% to 100 KC; stability  $\pm 2\%$  to 100 KC. \$490.00.

## -hp- Distortion, Wave Form Analyzers—20 cps to 20 KC

### -hp- 330B Distortion Analyzer

Measures distortion as low as 0.1% from 20 cps to 20 KC; also measures noise voltages down to 100  $\mu$ v. Sensitivity is high; distortions of 0.3% are measured full scale and levels of 0.1% are readable

accurately. Frequency calibration accurate within  $\pm 2\%$  full range. Includes a 20 db amplifier, oscilloscope terminals and precision 10 cps to 100 KC vacuum tube voltmeter usable separately. \$410.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
<i>-hp-</i> 300A	Wave form analyzer	30 cps to 16 KC	Variable selectivity; measuring range 1 mv to 500 v	\$775.00
<i>-hp-</i> 330B	Measures total audio distortion	20 cps to 20 KC	Includes input amplifier, VTVM	410.00 $\Delta$
<i>-hp-</i> 330C	For FM broadcast measurements	20 cps to 20 KC	Special VU meter to meet F.C.C. requirements	440.00 $\Delta$
<i>-hp-</i> 330D	For AM, FM broadcast measurements	20 cps to 20 KC	AM detector and VU meter to meet F.C.C. requirements	455.00 $\Delta$

$\Delta$  Rack mounted instruments available at \$15.00 less.

# -hp- Vacuum Tube Voltmeters - 10 to 700,000,000 cps

## -hp- 400D Vacuum Tube Voltmeter

Best *-hp-* voltmeter ever built! Covers all frequencies 10 cps to 4 MC. Extremely sensitive, wide range, accurate within 2% to 1 MC, measures 0.1 mv to 300 v. Direct reading in dbm. 10 megohm input impedance insures negligible loading on circuits under test. New amplifier circuit with mid-range feedback assures utmost stability, freedom from change due to external conditions. \$225.00.

under test. New amplifier circuit with mid-range feedback assures utmost stability, freedom from change due to external conditions. \$225.00.

Instrument	Primary Uses	Frequency Range	Voltage Range	Input Impedance	Price
-hp- 400AB	General purpose ac measurements	10 cps to 600 KC	0.003 to 300 v 11 ranges	10 megohms 25 $\mu$ mf shunt	\$200.00
-hp- 400D	Wide range ac measurements High sensitivity	10 cps to 4 MC	0.001 to 300 v 12 ranges	10 megohms 15 $\mu$ mf shunt	225.00
-hp- 400H	High accuracy wide range ac measurements	10 cps to 4 MC	0.001 to 300 v 12 ranges	10 megohms 15 $\mu$ mf shunt	325.00
-hp- 410B	Audio, rf, VHF measurements; dc voltages; resistances	dc; ac—20 cps to 700 MC	0.1 to 300 v 7 ranges	dc—122 megohms; ac—10 megohms/ 1.5 $\mu$ mf	245.00

## -hp- 410B Vacuum Tube Voltmeter

All-purpose test instrument, range 20 cps to 700 MC. Also serves as dc VTVM with over 100 megohms impedance, or ohmmeter for measurements 0.2 to 500 megohms. Input capacity 1.5  $\mu$ mf, 10 megohms input impedance; employs radical diode probe

which virtually eliminates circuit loading. Industry's most versatile precision voltmeter. \$245.00.

## -hp- 400H Vacuum Tube Voltmeter

Need extreme accuracy of 1%? New *-hp-* 400H covers 10 cps to 4 MC, has 5" meter with mirror scale, measures voltages 0.1 mv to 300 v. 10 megohm resistance minimizes circuit loading, amplifier with 56 db feedback insures lasting stability. Direct reading in db or v. Extremely high quality throughout. \$325.00.

## -hp- 400AB Vacuum Tube Voltmeter

Utmost utility, dependability, dollar value. Covers 10 cps to 600 KC, measures from 0.3 mv to 300 v. High stability, sensitivity, accuracy  $\pm 2\%$  full scale from 20 cps to 100 KC. High input impedance; meter reads direct in volts and dbm. \$200.00.

Instrument	Features	Price
-hp- 452A Capacitive Voltage Divider	For all <i>-hp-</i> ac VTVM. 25 cps to 20 MC. Division 1000:1	\$100.00
-hp- 452-95A Adapter	Connects <i>-hp-</i> 452A to <i>-hp-</i> 410B VTVM probe	10.00
-hp- 453A Capacitive Voltage Divider	For <i>-hp-</i> 410B VTVM only. Division 100:1	25.00
-hp- 454A Capacitive Voltage Divider	For <i>-hp-</i> 400D and 400H only. Division 100:1	25.00
-hp- 455A Probe Coaxial "T" Connector	For <i>-hp-</i> 410B VTVM. Measures voltages between conductor and sheath of 50 ohm transmission line.	35.00
-hp- 458A Probe Coaxial "N" Connectors	For <i>-hp-</i> 410B VTVM. Measures volts at open end of 50 ohm transmission line.	25.00
-hp- 459A DC Resistive Voltage Multiplier	For <i>-hp-</i> 410B VTVM. For measuring high dc voltages safely. Multiplies 1:100	25.00
-hp- 470 A to F Shunt Resistors	For <i>-hp-</i> 400 series VTVM. For measurement of current.	470A - 15.00 470B-F - 7.50

## Cabinet, End Frame or Rack Mounting

Most *-hp-* equipment with standard 19" panels can be mounted in lightweight, streamlined all metal cabinets. The same instruments are normally also usable with end frames. Smaller *-hp-* instruments such as 200 CD, 400D, 410B, 715A, etc., are also delivered normally in lightweight metal cabinets. However, many such instruments can be twin-mounted in *-hp-* AC-2A/B Dual Rack Mounts. See your *-hp-* field representative or write direct for details.

Data subject to change without notice. Prices f. o. b. factory.

Add plug-in units to fill future measuring needs

## -hp- 524B Counter with -hp- 525B Frequency Converter

Direct, instantaneous automatic readings, easy use by non-technical personnel, 0.1 microsecond resolution, accuracy 1/1,000,000  $\pm$  1 count, high sensitivity and high impedance—these are but a few of the unique quality and versatility features of -hp- 524B Counter and associated plug-in units.

With -hp- 524B, you buy only the counting facilities you need now; later add inexpensive plug-ins to triple or quadruple the usefulness of the instrument.

The basic -hp- 524B Counter reads frequency 10 cps to 10 MC over 5 selected periods. Display time is variable, counts are automatically reset, action is repetitive.

-hp- 525A Frequency Converter extends the 524B's direct-reading range to 100 MC with no loss in accuracy. -hp- 525B converts the 524B for direct readings 100 to 220 MC. -hp- 526A Video Amplifier increases sensitivity to 10 mv for low power frequency measurement.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 524B Frequency Counter	Frequency Period measurements	10 cps to 10 MC (Freq.) 0 cps to 10 KC (Period)	Direct reading, no interpolation, stability about 2/1,000,000/week	\$2,150.00 ■
-hp- 525A Frequency Converter	Extends 524B's range to 100 MC; increases basic sensitivity	10 cps to 100 MC	Accuracy $\pm$ 1 cps $\pm$ stability; 0.1 v rms min. input	250.00
-hp- 525B Frequency Converter	Extends 524B's range from 100 to 220 MC; high sensitivity	100 MC to 220 MC	Accuracy $\pm$ 1 cps $\pm$ stability; 0.2 v rms min. input	250.00
-hp- 526A Video Amplifier	Increases 524B's sensitivity to 10 millivolts	10 cps to 10 MC	Accuracy same as basic counter; 10 mv rms min. input	150.00
-hp- 526B Time Interval Unit	Measures interval 1 $\mu$ sec to 100 days	1 $\mu$ sec to 10 <sup>7</sup> sec	Accurate 0.1 $\mu$ sec $\pm$ 0.0001%	175.00
-hp- 526C Period Multiplier	Period measurement	Extends range of 524B to measure 10,000 periods	Greater accuracy in period measurement	225.00

■ Rack mounted instrument available for \$25.00 less.

-hp- 526B Time Interval Unit permits the 524B to measure interval 1.0  $\mu$ sec to 100 days with accuracy of 0.1  $\mu$ sec  $\pm$  0.001%; reads in seconds, msec or  $\mu$ sec. -hp- 526C

Period Multiplier allows period average measurements in steps of 10 to a 10,000 period average; thus insuring greater accuracy of midrange frequency measuring.

## -hp- 540A Transfer Oscillator

Measure frequency to 12 KMC on pulsed, AM, FM, CW and noisy signals!

With just two instruments -hp- 540A Transfer Oscillator and 524B Counter (plus 525B converter) you measure to 12 KMC; get counter accuracy and amazing convenience. Complex instrument arrangements and tedious trial-and-error "guesstimates" are eliminated. Even when the approximate frequency of a test signal is unknown; a simple calculation employing two or more harmonics leads to swift and accurate measurement.

The 540A-524B system's accuracy approaches 1 part per 1,000,000 for stable CW signals. On pulsed signals, accuracy is governed by carrier frequency and pulse lengths. On noisy or intense AM signals, the transfer oscillator system with -hp- 540A often provides the only means of accurate measurement. Over-all system accuracy is better than 10 times that of the best microwave wavemeters. Model 540A, \$615.00 $\Delta$ .

$\Delta$  Rack mounted instrument available at \$15.00 less.

# New -hp- 560A Digital Recorder

Frequency stability vs. line voltage; 150 MC oscillator

New -hp- 560A provides a continuous digital record for your -hp- frequency counter. Since 560A is a slave to its counter, it delivers accuracy identical with counter. Printing rate is five, 11-digit lines per second. Secondary or coding data may be printed on the same line as primary data. Instrument may be controlled by electronic or electro-

mechanical devices; it includes an analog output for strip chart recorders; strip chart will never be driven off scale. Expanded scale recordings may be made with full scale sensitivity as great as  $1/10^7$ .  
 -hp- 560A, \$1,390.00 (11-digit lines)  
 -hp- 560A, \$1,265.00 (6-digit lines)

## Other -hp- Frequency Measuring and Monitoring Equipment

### -hp- 500B/C Frequency Meters

Directly measures frequency of voltages 3 cps to 100 KC; expanded scale allows any 10% or 30% of range to be measured full scale. Sensitivity 0.2 v rms (sine waves) 1 v peak for pulses. Input impedance 1 megohm with 40  $\mu$ f shunt; accuracy independent of line voltage changes. Also available as -hp- 500C, calibrated for direct reading in rpm. -hp- 500B/C, \$285.00.

### -hp- 521A/C Industrial Counters

Most useful, accurate, low cost industrial counter. Measures frequency, speed, rpm, random events, other phenomena. Direct readings 1 cps to 120 KC. Time of count 0.1 or 1.0 seconds; variable display time. Also offered as 521C, 5-place registration, three gate times, crystal-controlled time base. -hp- 521C, \$650.00. -hp- 521A, \$475.00.

### -hp- 522B Electronic Counter

Compact, low cost, versatile instrument for frequency, period or time measurements. Measures frequency 10 cps to 120 KC, time interval 10  $\mu$ sec to  $10^5$  sec.

Reads direct in cps, KC, seconds or milliseconds. Count automatically reset, action repetitive. Stability of time base 10/1,000,000 per week. Easily used by untrained personnel. \$915.00 $\Delta$ .

### -hp- 523B Electronic Counter

Revolutionary all-purpose counter measures frequency 10 cps to 1.1 MC, time interval 3  $\mu$ sec to 27.8 hours, period 0.00001 cps to 10 KC. Stability 2/1,000,000 per week. Results displayed in sec, msec,  $\mu$ sec or KC; automatic decimal. Display time variable 0.1 sec to 5 sec or indefinitely. Accuracy  $\pm 1$  count plus crystal stability. 5 gate times, usable with 100 KC primary standard. \$1,175.00.

definitely. Accuracy  $\pm 1$  count plus crystal stability. 5 gate times, usable with 100 KC primary standard. \$1,175.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 100D Secondary Standard	Frequency, time measurements	100 KC, 10 KC, 1 KC, 100 cps, 10 cps	Stability 1/1,000,000 (short-time). Sine or rectangular output. Marker pips	\$ 615.00 $\Delta$
-hp- 335E TV Monitor	Aural and visual carrier monitoring; black and white or color	Channels 2 to 83	Aural deviation $\pm 3$ KC; video deviation $\pm 3$ KC; accuracy $\pm 500$ cps approx.	2,050.00
-hp- 500B Electronic Frequency Meter	Rapid frequency measurements	3 cps to 100 KC	9 ranges $\pm 2\%$ accuracy. Input 0.2 to 250 volts	285.00
-hp- 500C Electronic Frequency Meter	Rpm measurements	180 to 6,000,000 rpm	Similar to 500B but calibrated in rpm	285.00
-hp- 506A Optical Tachometer Pickup	Rps and rpm measurement	300 to 300,000 rpm	Phototube and light source; output 1 v rms	100.00
-hp- 508A Tachometer Generator	Shaft speed measurement	15 to 40,000 rpm	Output 60 cycles per revolution	100.00
-hp- 508B Tachometer Generator	Shaft speed measurement	15 to 40,000 rpm	Output 100 cycles per revolution	100.00
-hp- 508C Tachometer Generator	Shaft speed measurement	15 to 40,000 rpm	Output 120 cycles per revolution	100.00
-hp- 508D Tachometer Generator	Shaft speed measurement	15 to 5,000 rpm	Output 360 cycles per revolution	100.00
-hp- 520A Nuclear Scaler	For counting high-rate pulses	Capacity 100 counts in 2 decades. 10,000,000 pps counting rate	100:1 divider for operation of low speed scalars	615.00 $\Delta$
-hp- 521A Industrial Electronic Counter	Measure frequency, speed	1 cps to 120 KC	Direct reading, accurate within $\pm 1$ count $\pm 0.1\%$ . 4 place registration	475.00
-hp- 521C Industrial Electronic Counter	Measure frequency, speed	1 cps to 120 KC	Direct reading, accuracy within $\pm 1$ count $\pm 0.01\%$ . 5 place registration	650.00
-hp- 522B Electronic Counter	Frequency, period, time interval measurements	10 cps to 120 KC	Direct reading, accuracy $\pm 1$ count $\pm 0.001\%$	915.00 $\Delta$
-hp- 523B Electronic Counter	Frequency, period, time interval	10 cps to 1.1 MC	Direct reading, accuracy $\pm 1$ count $\pm 2/1,000,000$	1,175.00

$\Delta$ Rack mounted instrument available for \$15.00 less.

## -hp- Signal Generators - 10 to 21,000 MC

### -hp- 608D vhf Signal Generator

10 to 420 MC. Highest stability. No incidental FM or frequency drift. Calibrated output 0.1  $\mu$ v to 0.5 v throughout range. Built-in crystal calibrator provides frequency check accurate within 0.01% each 1 and 5 MC. Master-oscillator, intermediate and output amplifier circuit design. Premium quality

performance, direct calibration, ideal for aircraft communications equipment testing. \$1,050.00.

-hp- 608C vhf Signal Generator. High power (1 v max.) stable, accurate generator for lab or field use. 10 to 480 MC. Ideal for testing receivers, amplifiers, driving bridges, slotted lines, antennas, etc. \$950.00.

### -hp- 626/628A shf Signal Generators

New instruments, bringing high power, wide range, convenience and accuracy to 10 to 21 KMC range. Frequencies, output voltage directly set and read. Output 10 to 20 db better than previous spot-frequency sets

SWR better than 1.2 at 0 dbm and lower. Internal pulse, FM or square wave modulation; also external pulsing or FM'ing. -hp- 626A, 10 to 15.5 KMC, \$3,250.00. -hp- 628A, 15 to 21 KMC, \$3,000.00.

Instrument	Frequency Range	Characteristics	Price
-hp- 608C	10 to 480 MC	Output 0.1 $\mu$ v to 1 v into 50 ohm load. AM, pulse, or CW modulation. Direct calibration	\$ 950.00
-hp- 608D	10 to 420 MC	Output 0.1 $\mu$ v to 0.5 v. Incidental FM 0.001% entire range	1,050.00
-hp- 612A	450 to 1,230 MC	Output 0.1 $\mu$ v to 0.5 v into 50 ohm load. AM, pulse, CW or square wave modulation. Direct calibration	1,200.00
-hp- 614A	800 to 2,100 MC	Output 0.1 $\mu$ v to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration	1,950.00
-hp- 616A	1,800 to 4,000 MC	Output 0.1 $\mu$ v to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration	1,950.00
-hp- 618B	3,800 to 7,600 MC	Output 0.1 $\mu$ v to 0.223 v into 50 ohm load. Pulse, CW, FM or square wave modulation. Direct calibration	2,250.00
-hp- 620A	7,000 to 11,000 MC	Output 0.1 $\mu$ v to 0.223 v into 50 ohm load. Pulse, FM or square wave modulation. Direct calibration	2,250.00
-hp- 623B	5,925 to 7,725 MC	Output 70 $\mu$ v to 0.223 v into 50 ohm load. FM or square wave modulation. Separate power meter and wave meter section	1,750.00
-hp- 624C	8,500 to 10,000 MC	Output 3.0 $\mu$ v to 0.223 v into 50 ohm load. Pulse, FM or square wave modulation. Separate power meter and wave meter section	2,265.00 $\Delta$
-hp- 626A	10 to 15.5 KMC	Output 10 dbm to -90 dbm. Pulse, FM, or square wave modulation. Direct calibration	3,250.00
-hp- 628A	15 to 21 KMC	Output 10 dbm to -90 dbm. Pulse, FM, or square wave modulation. Direct calibration.	3,000.00

$\Delta$  Rack mounted instrument available for \$15.00 less.

## -hp- Swept Frequency Oscillators

### -hp- 686A Electronic Sweep Oscillator

Totally new kind of backward-wave device eliminating sweep motors, tuning plungers, range limitations, etc. Covers all or part of X-band with flexible, quiet electronic sweep.

Simple to operate, direct reading, continuously adjustable sweep width and rate, 10 mw output minimum, frequency sweep linear with time. Has slow sweep for recorders; fast for oscilloscope; single sweep manually started or externally triggered, external FM, AM modulation. Ultimate in X-band sweep oscillators, \$2,250.00.

Instrument	Frequency Range	Characteristics	Price
-hp- 670SM	2.6 to 4 KMC	Automatic adjustable motor-driven sweep, full frequency band coverage, output 10 mw full range, full modulation capabilities, direct-reading frequency dial.	\$1,175.00 with motor
-hp- 670GM	4 to 6 KMC		1,175.00 with motor
-hp- 670JM	5.85 to 8.2 KMC		1,175.00 with motor
-hp- 670HM	7 to 10 KMC		1,175.00 with motor
-hp- 686A	8.2 to 12.4 KMC	Electronically swept; variable sweep width and rate. Output 10 mw to 0. Pulse, square wave, FM and AM modulation.	2,250.00

## -hp- Square Wave and Pulse Generators

### -hp- 212A Pulse Generator

Provides continuously variable, high power "fast pulses" of superior wave form. Combines broad general usefulness with 0.02  $\mu$ sec rise and decay time to meet requirements

of radar, TV and nuclear work. Pulse length variable 0.07 to 10  $\mu$ sec; minimum overshoot; 50 watt peak power (50 v to 50 ohms load). Low impedance means accurate pulses can be delivered at a distance from the instrument. Repetition rate variable 50 to 5,000 pps; controlled internally or externally. Synchronizing pulse available in advance of, or following output pulse. \$565.00 $\Delta$ .

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 211A	Square Wave Generator	1 cps to 1 MC	Output 7 v p-p across 75 ohms or 55 v p-p across 600 ohms	\$265.00
-hp- 212A	Pulse Generator	50 to 5,000 pps. 0.02 $\mu$ sec rise time	Pulse length 0.07 to 10 $\mu$ sec, output 50 v to 50 ohm load	565.00 $\Delta$

$\Delta$  Rack mounted instrument available for \$15.00 less.

# Microwave Impedance Measuring Equipment

## -hp- 416A Ratio Meter

Automatically combines forward and reverse signals and displays their ratio directly, irrespective of amplitude

variations. Contains rf power monitor indicating proper power level. Rear terminal signal available to operate oscilloscope or recorder. Suitable for single and swept frequency operation. \$450.00△.

## -hp- 415B Standing Wave Indicator

For all waveguide and coaxial slotted sections. Gives readings in SWR or db. Single frequency operation; 315 to 2,000 cps. Low noise level, 0.1 μv (full scale) sensitivity, 60 db. calib. attenuator. \$200.00.

## -hp- 803A VHF Bridge

Provides direct impedance measurements in vhf range, 2 to 2,000 ohms, -90° to +90° phase angle. Wide frequency range 52 to 500 MC; makes measurements down to 5 MC and up to 1,000 MC. Fast, simple to use. \$495.00.

## -hp- 417A VHF Detector

Super-regenerative (AM) receiver covering all frequencies from 10 to 500 MC in 5 bands. Designed for use with -hp- 803A Bridge. 5 μv sensitivity full range. Single frequency control, reads direct in MC. \$250.00.

## Microwave Power Measuring Equipment

### -hp- 430C Microwave Power Meter

No computations! Provides instantaneous, automatic power readings *direct* in dbm or mw at all frequencies for which there are suitable bolometer mounts. For CW measurements, uses either 1/100 amp. fuse or Sperry 821 barretter. Also measures CW or pulsed power with negative coefficient thermistor. Provides up to 16

ma bias current. Operates with all mounts in adjacent table. \$250.00.

### -hp- 764D-767D Dual Directional Couplers

New high directivity dual coaxial couplers make reflectometer measurements practical in vhf and uhf coax systems. Flat response, high power capacity, low insertion loss. Four models, covering

216 to 4,000 MC collectively. \$125.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 360A-D Low Pass Filters	Eliminates harmonic voltages from uhf systems	Cutoff frequencies A- 700 MC C-2,200 MC B-1,200 MC D-4,100 MC	50 db rejection at 1.25 cutoff freq.	\$ 40.00
-hp- 415B Standing Wave Indicator	SWR indicator or null indicator	315 to 2,000 cps. Normal freq. 1,000 cps	0 to 70 db attn. Max. sensitivity 0.3 μv	200.00
-hp- 416A Ratio Meter	Reflection coefficient measurements	1,000 cps ±40 cps	Continuous swept frequency presentation; accuracy ±3%	450.00△
-hp- 417A vhf Detector	vhf bridge detector (for -hp- 803A)	10 to 500 MC	Approx. 5 μv sensitivity	250.00
-hp- 803A vhf Bridge	Measurement of vhf impedance, SWR	52 to 500 MC	2 to 2,000 ohms impedance -90° to +90° phase angle	495.00
-hp- 805A Coaxial Slotted Section	Measurement of SWR	500 to 4,000 MC	For Type N Connectors flexible cables	475.00
-hp- 805B Coaxial Slotted Section	Same as above	Same as above	For rigid 7/8" RG44/U line	475.00
-hp- 806B Coaxial Slotted Section	Same as above (mounts in 809B)	3,000 to 12,000 MC	For Type N Connectors flexible cables	200.00
-hp- 809B Universal Probe Carriage	G, J, H, X and P 810 Waveguide Sections Supports 806B section, also		Accepts 442B, 444A probes	160.00
-hp- 814A Universal Probe Carriage	Supports P, K and R 815A Waveguide Slotted Sections		Accepts Untuned Probe 446A	225.00

△ Rack mounted instruments \$15.00 less.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 430C Microwave Power Meter	Measurement of rf power	Depends on Bolometer Mount	0.02 to 10 mw ±5% accuracy	\$250.00
-hp- 475B Tunable Bolometer Mount	Measurement of rf power (with 430B/C)	1,000 to 4,000 MC	Matches 50 ohm line to 100 or 200 ohms	200.00
-hp- 476A Universal Bolometer Mount	Measurement of rf power (with 430B/C)	10 to 1,000 MC	No tuning required SWR less than 1.25	85.00
-hp- 477B Coaxial Thermistor Mount	Measurement of rf power (with 430C)	10 MC to 10 KMC	No tuning required SWR less than 1.5	75.00
-hp- 485 Waveguide Detector Mount	Measurement of rf power	2,600 to 18,000 MC	Full coverage of waveguide band	See Table page 8
-hp- 487B Waveguide Thermistor Mount	Measurement of rf power	3,950 to 26,500 MC	Full coverage, no tuning, 1.5 SWR except K487B, 2.5	See Table page 8
-hp- 764D Dual Directional Coupler	Reflectometer and rf power measurements	216 to 450 MC	Coupling attenuation* 20 db, directivity 30 db	125.00
-hp- 765D Dual Directional Coupler	Reflectometer and rf power measurements	450 to 945 MC	Coupling attenuation* 20 db, directivity 30 db	125.00
-hp- 766D Dual Directional Coupler	Reflectometer and rf power measurements	940 to 1,975 MC	Coupling attenuation* 20 db, directivity 26 db	125.00
-hp- 767D Dual Directional Coupler	Reflectometer and rf power measurements	1,900 to 4,000 MC	Coupling attenuation* 20 db, directivity 26 db	125.00

\*Power handling capacity all 764/767 series couplers 50 watts CW, 10 Kw peak.

### -hp- 477B Coaxial Thermistor Mount

For frequency range 10 MC to 10 KMC. SWR less than 1.5. Thermistor element is 200 ohm negative. \$75.00 (including thermistor).

° Includes barretter; checked for square law characteristics.

## -hp- Offers World's Most Complete Array of Microwave Equipment

### -hp- 809B/814A Universal Probe Carriages

Models 809B and 814A are precision built mechanical assemblies operating, respectively, with -hp- 810B and 815A series slotted sections.

Combination of the 809B carriage and 810B slotted sections covers

2.6 to 18.0 KMC. Combination of 814A carriage and 815A series sections covers 12.4 to 40.0 KMC.

On either carriage, waveguides can be interchanged in seconds for real savings on engineering time. Only one probe is required for each carriage to cover full frequency range. Manufacture is of highest quality to assure positive mechanical positioning of interchangeable waveguides and precise installation of mating -hp- probes (see opposite page). -hp- 809B has a vernier scale reading to 0.1 mm and is equipped for dial gauge mounting. -hp- 814A has a cylindrical dial which may be read directly to 0.1 mm and interpolated at 0.01 mm.

-hp- 810B Slotted Sections. -hp- 810B, for mounting in 809B carriage, is a flanged, waveguide section with accurately machined slot. Slot is tapered at ends to minimize reflection. Available in 5 waveguide bands, 3.95 through 18.0 KMC.

-hp- S810A. Complete slotted section assembly including probe carriage. In 2.6 to 3.95 KMC (s-band) size only.

-hp- 815A Slotted Sections. For mounting in 814A carriage. Available P, K and R bands, 12.4 to 40.0 KMC. To insure positive positioning when mounting in carriage, these sections seat on two eccentric rods. Rods are factory-adjusted so longitudinal plane of guide is always parallel to probe travel.

# Equipment below available for most waveguide frequencies

**-hp- 752 Multi-Hole Couplers**

Precision directional couplers available in 3 models with coupling factors of 3, 10 and 20 db. Coupling accuracy  $\pm 0.4$  db except K, R bands which are  $\pm 0.7$  db. Directivity better than 40 db full range, coupling variation not over  $\pm 0.5$  db full range. Primary guide SWR less than 1.05. S, G, J, H, X, P, K, R bands, 2.6 to 40.0 KMC. \$75.00 to \$375.00.

**-hp- X532A Frequency Meters**

5 MC. Resettability 0.01%. \$150.00.

Direct reading, 8.2 to 12.4 KMC X-band wavemeter, highest quality at low cost. Reads direct in KMC, accuracy 0.08%. No interpolation or charts. No sliding contacts; approx. 1.5 db dip in transmitted power at resonance. Scale length approx. 77" calibrated every

**-hp- 382A Precision Attenuators**

Precision broadband attenuation to 50 db. Completely independent of frequency; phase shift constant at all attenuations. Calibrated range 0 to 50 db, maximum error  $\pm 2\%$  of db reading. G, J, H, X and P bands available covering 3.95 to 18.0 KMC. SWR less than 1.15 full range. \$250.00 to \$500.00.

**-hp- 487B Thermistor Mounts**

For fast, accurate waveguide power measurements. Each unit covers full range of its waveguide frequency. No tuning needed, SWR 1.5 max., except K487B, SWR 2.5 max. Max. power 10 mw. Rugged construction, high temperature coefficient thermistors virtually eliminate burnout. For G, J, H, X and K bands, 3.95 to 26.5 KMC. \$75.00 to \$95.00.

For fast, accurate waveguide power measurements. Each unit covers full range of its waveguide frequency. No tuning needed, SWR 1.5 max., except K487B, SWR 2.5 max. Max. power 10 mw. Rugged construction, high temperature coefficient thermistors virtually eliminate burnout. For G, J, H, X and K bands, 3.95 to 26.5 KMC. \$75.00 to \$95.00.

**-hp- 420A/B Crystal Detectors**

Employs a silicon crystal to detect rf signals in Type N coaxial lines. Covers frequencies 10 MC to 12.5 KMC, sensitivity approx. 0.01 v/0.1 mw, frequency response  $\pm 3$  db full range. Uses modified 1N26 crystal, max. SWR 3. \$50.00 each. Also available in matched pairs as -hp- 420B, \$150.00 pair.

**-hp- 281A Waveguide - Coax Adapters**

12.4 KMC. \$15.00 to \$65.00.

For convenient transition between waveguide and coax systems. Each unit covers a full waveguide range with SWR less than 1.25. Type N coax plug, AN waveguide flange. For S, G, J, X and P bands, 2.6 to

**-hp- 870A Slide Screw Tuners**

For flattening waveguide systems, matching, etc. Probe position and penetration adjusts to set up SWR cancelling existing SWR. Precision lead screw or micrometer varies probe insertion; vernier adjusts probe position. Corrects SWRs of 20 with accuracy of 1.02 SWR. For S, G, J, H, X, P, K, R bands, 2.6 to 40.0 KMC. \$125.00 to \$225.00.

**-hp- 885A Phase Shifters**

Provide accurate, controllable phase variation throughout frequency band. Ideal for microwave impedance, transmission measurements, antenna and system design. Direct reading, low power absorption, 360° electrical range. For J, X and P bands, 5.3 to 18.0 KMC. \$300.00 to \$400.00.

**-hp- 444A/446A Untuned Probes**

New -hp- 446A, for -hp- 814 Probe Carriage, similar but covers P, K and R bands, 12.4 to 40.0 KMC. -hp- 444A, \$35.00. -hp- 446A, \$145.00.

-hp- 444A is modified crystal (1N76 or 1N26) plus small antenna in convenient housing. Probe penetration easily variable; may be locked in position. No tuning needed; sensitivity superior to most elaborate single or double tuned probes. Range 2.4 to 18 KMC; fits  $\frac{3}{4}$ " bore.

**-hp- 485 Detector Mounts**

Three basic series offered; 5485A for S band (no tuning, 1.35 SWR, 821 element); 485B, for G, J, H, X bands (tunable, 1.25 SWR full range, 1N23, 1N21 or 821 element); 485D for S, G, J bands (factory-installed 821 barretter). Also P485C, like 485B but for P band only, has installed 200 ohm 3 mw thermistor. \$75.00 to \$145.00.

Three basic series offered; 5485A for S band (no tuning, 1.35 SWR, 821 element); 485B, for G, J, H, X bands (tunable, 1.25 SWR full range, 1N23, 1N21 or 821 element); 485D for S, G, J bands (factory-installed 821 barretter). Also P485C, like 485B but for P band only, has installed 200 ohm 3 mw thermistor. \$75.00 to \$145.00.

**-hp- 914A Moving Loads**

Waveguide section containing sliding, tapered low-reflection load. Plunger controls position of load; position is variable at least  $\frac{1}{2}$  wavelength at lowest frequency of given band. Residual reflection phase is thus reversed to separate from other minor reflection in the system. For S, G, J, H, X, P, K, R bands, 2.6 to 40.0 KMC. \$50.00 to \$100.00.

Data subject to change without notice. Prices f. o. b. factory.

# Amplifiers for General Use and Fast Circuit Work

## -hp- Travelling-Wave Tube Amplifiers

-hp- offers Traveling-Wave Tube Amplifiers for all frequencies 2 to 12.4 KMC. -hp- 490B, 492A and 494A are low level, high gain amplifiers with 30 and 25 db gain; they offer amplitude, pulse, phase or FM modulation. -hp- 491A is a high power traveling-wave tube amplifier

having a rated output of 1 watt, 2 to 4 KMC. All amplifiers have exclusive -hp- helical coupling system, and employ encapsulated traveling-wave tubes that can be readily replaced. -hp- 490B/491A, \$1,100.00. -hp- 492A/494A, \$1,500.00.

## -hp- 460A/B Fast Pulse Amplifiers

-hp- 460A Wide Band Amplifiers, in cascade with -hp- 460B Fast Pulse Amplifiers, provide up to 90 db gain, 125 v open circuit. This permits direct connection to oscilloscope deflection plates. Rise time 0.0026  $\mu$ sec. Will amplify millimicrosecond pulses. Over 100 MC band width for 'scopes. -hp- 460A, \$185.00. -hp- 460B, \$225.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 450A Amplifier, Stabilized	General purpose lab amplifier	10 cps to 1,000,000 cps	20 and 40 db gain, frequency response $\pm 1/2$ db	\$ 140.00
-hp- 460A Amplifier, Wide Band	Wide band, pulse amplification	100 KC to 140 MC	20 db gain, rise time 0.0026 $\mu$ sec	185.00
-hp- 460B Amplifier, Fast Pulse	Pulse amplification high output	100 KC to 140 MC	15 db gain, 125 peak volts	225.00
-hp- 490B Traveling-Wave Tube Amplifier	Amplification throughout "S" band	2 to 4 KMC	30 db gain; Millimicrosec rise time; 10 mw output	1,100.00
-hp- 491A Traveling-Wave Tube Amplifier	High power "S" band amplification	2 to 4 KMC	30 db gain; millimicrosec rise time; 1 watt output	1,100.00
-hp- 492A Traveling-Wave Tube Amplifier	Amplification through most of "G" and "J" bands	4 to 8 KMC	30 db gain; millimicrosec rise time; 10 mw output	1,500.00
-hp- 494A Traveling-Wave Tube Amplifier	Amplification throughout "X" band	7 to 12.4 KMC	25 db gain; millimicrosec rise time; 5 mw output	1,500.00

## -hp- Regulated and Klystron Power Supplies

### -hp- 715A Power Supply

-hp- 715A is a versatile source of regulated beam and reflector voltage for operating most test bench klystron tubes. Beam voltage 250 to 400 v; reflector voltage 0 to 900 v; 6.3 v filament. Internal, 1,000 cps square wave modulation, and 60 cps sine wave modulation of reflector voltage. \$300.00.

### -hp- 712B Power Supply

This -hp- instrument features high regulation of 50 mv no load to full load, 0.1 millisecond transient response, internal impedance 0.1 ohms in series with 25  $\mu$ H; full-load maximum

hum less than 500  $\mu$ v, sealed transformers, chokes and condensers. 0 to 500 v, 200 ma supply and fixed -300 v tap providing a 50 ma, 300 to 800 v variable supply for klystron operation. \$365.00 $\Delta$ .

Instrument	Primary Use	Characteristics	Price
-hp- 710B Power Supply	General Purpose regulated dc supply for lab and field use	100 to 360 volts @ 75 ma	\$100.00
-hp- 711A Laboratory Power Supply	Same as 710B	0 to 500 volts @ 100 ma	225.00
-hp- 712B Power Supply	Same as 710B	0 to 500 volts @ 200 ma	365.00 $\Delta$
-hp- 715A Klystron Power Supply	Regulated beam, reflector source for low power klystrons	250 to 400 volts @ 50 ma	300.00
-hp- 717A Klystron Power Supply	Powering Type 5721 klystrons	800 to 1,000 volts @ 25 ma	375.00

$\Delta$ Rack mounted instrument available for \$15.00 less.

## COMPLETE COVERAGE

In 1957, *-hp-* will occupy the first two of six 80,000 square foot buildings forming a complete new laboratory and manufacturing plant. New site is approximately one mile west of previous plant on a 40-acre site just south of Stanford University. Your visit is invited.

Won't you agree it is simple and more time-saving when you can turn to one source for your test equipment needs?

*-hp-* engineers are continually working to produce new equipment that anticipates your future needs, yet functions smoothly with your existing *-hp-* instruments. Today, *-hp-*

makes over 300 instruments; you can choose from the world's largest and most complete line just the equipment you need. In making this choice, you are assured of *-hp-* quality; today the standard of the world in electronic test instruments.

To give you personal help with measuring problems, you have available over 150 electronics specialists in every major U. S. metropolitan area, and around the world. These men, trained and annually re-trained by *-hp-*, are experts in applying as well as selling and servicing *-hp-* instruments. Call them when you can use personal, competent help, in your plant, today.

### *-hp-* Sales and Service Representatives in the United States and Canada

# -hp- Low Frequency, High Frequency Oscilloscopes

## ◀ -hp- 150A High Frequency Oscilloscope

Dc to 10 MC. Plug-in pre-amplifiers.  
Sweeps 0.02  $\mu\text{sec/cm}$  to 15 sec/cm

## -hp- 130A Low Frequency Oscilloscope

High sensitivity, dc to 300 KC.  
Sweeps 1  $\mu\text{sec/cm}$  to 12.5 sec/cm

Never before in *-hp-* history have two instruments gained such immediate and wide-spread usage as the all-new *-hp-* oscilloscopes.

Based on a completely fresh philosophy of oscilloscope design, new *-hp-* 130A and 150A establish new standards of oscilloscope usefulness, convenience, dependability. Important feature is universal automatic triggering arrangement where one preset adjustment provides optimum triggering for most conditions. Other appreciated features include direct-reading calibrated sweeps, brilliant, high resolution trace without halo or bloom, etched circuits with unitized construction, concentric, color-coded controls, highest quality components and ultra conservative design, twistoff bezel, easy CRT or filter interchange, tilt bail.

*-hp-* 150A, dc to 10 MC, has plug-in vertical amplifiers offering either high gain or dual trace. The instrument sweeps 0.02  $\mu\text{sec/cm}$  to 15 sec/cm; there are 24 direct reading calibrated sweep ranges. May be triggered internally, by line voltage, or externally. Horizontal amplifier's magnification feature expands horizontal sweep 5, 10, 50 or 100 times. Vertical amplifier has rise time of less than 0.035  $\mu\text{sec}$ ; signal delay permits leading edge of triggering signal to be viewed. For maximum flexibility; 18 calibrating voltages in 2, 5, 10 sequence, 0.2 mv to 100 v peak-to-peak, are available at the front panel.

zontal amplifiers with sensitivity 1 mv/cm to 50 v/cm. Instrument sweeps 1  $\mu\text{sec/cm}$  to 12.5 sec/cm, may be triggered internally by line voltage, or by a 0.5 volt or larger external source. 21 sweep times may be directly set; no interpolation required. Includes input attenuator with calibrated ranges in 1, 2, 5, 10 sequence; continuous adjustment vernier between ranges. Attenuator, plus instrument's high stability, permits use of 130A as millivoltmeter or voltmeter accurate to within 5%.

*-hp-* 130A, dc to 300 KC, has similar vertical and hori-

*-hp-* Model 130AR is similar to the 130A but is designed specifically for rack mounting. This instrument has a x5 magnifier for all internal sweeps increasing the fastest sweep time to 0.2  $\mu\text{sec/cm}$ .

Instrument	Primary Uses	Characteristics	Price
<i>-hp-</i> 130A	General laboratory and production testing	Dc to 300 KC—High sensitivity	\$ 650.00
<i>-hp-</i> 150A	General laboratory high frequency and TV work	Dc to 10 MC—Plug-in vertical amplifiers	1100.00
<i>-hp-</i> 151A	High sensitivity—Plug-in for 150A	Dc to 10 MC—High sensitivity	200.00
<i>-hp-</i> 152A	Dual Trace—Plug-in for 150A	Dc to 10 MC—Presents two phenomena for simultaneous viewing	250.00

**AIRCRAFT**  
and **ELECTRONIC**  
**INSTRUMENTS**

### TYPICAL DESIGNS

**AN, AN-A, AN-B, AN-C...** Conforming to Specification MIL-C-5015C. 15 insert diameters and 260 contact layouts. 6 shell styles, AN3100 to AN3108 with all accessories. Also (AN) F, O(\*) AF.

for **VIBRATION**  
**RESISTANCE**  
and **MOISTURE-**  
**PROOF** applications

**AN-E SERIES** ... environment resisting. Replaces AN-M. Meets Specification MIL-C-5015C. Resilient inserts. Integral cable clamp. New grounding lugs. Interfacial sealing, improved grommet and new grommet follower.

for **GENERAL**  
**CIRCUITRY** and  
**QUICK DISCONNECT**  
in more rugged  
applications

**K, RK SERIES** ... **SPECIAL ACME THREAD**. The All-Purpose Series. Conduit and cable clamp entry types. 1 to 82 contacts in 213 different contact layouts. 10-, 15-, 30-, 40-, 60-, 80-, 115-, and 200-amp. silver-plated contacts. High quality phenolic, melamine, and formica insulators. Cadmium-plated aluminum alloy shells.

for  
**UNIT-PLUG-IN**  
applications ...

**DP, DPB, DPD, DPD2, DPD2R, DPJ, AND DPS SERIES** ... Rack/panel/chassis. With and without shells; coaxial and high voltage contacts. Permit quick disconnect, interchange, replacement, testing and inspection of assemblies and sub-assemblies.

for **AUDIO**  
and **LOW LEVEL**  
circuits

**P, XLR, XL, XK, O, UA, BRS SERIES** ... many shell styles and insert layouts. Straight and angle 90° plugs. Latch-lock types. Wall-mounting, panel, lock-nut mounting, and adapter receptacles, single- and two-gang. 10- to 30-amp. contacts, coaxials. UA Series features 3 gold-plated contacts.

for **RADIO** and  
**SUB-MINIATURE**  
applications

**D, MC, DPA, DPX, AND K MINIATURES** ... miniatures and sub-miniatures designed for amplifiers, miniature indicators, computer circuits, telemetering equipment, small pre-amps, and general instrumentation where space is limited and current requirements are generally not over 5 amperes. Variety of shell styles, junction shell, and insert arrangements. 3 to 50 contacts, plus coaxials.

for **HERMETICALLY**  
**SEALED**  
applications

**GS (AN TYPE), KH, RKH, DAH, BFH, TBFH, DBH, KH30** ... with steel shells and contacts to withstand high pressures from within or without. Insulation is a glass material, fused under high temperature to shell and contacts, thus forming a hermetic seal.

for **HIGH**  
**TEMPERATURE**  
and **firewall**  
applications

**AN-K, AN-FW, AND CANNON K-FW STEEL SHELL CONNECTORS** ... Open flame protection offered in the greatest variety of this type of connector. Wall- or box-mounting receptacles. Straight or angle 90° plugs. Crimp-type contacts. Inserts of glass-filled materials.

Send for AR Condensed Catalog containing illustrations and technical information on all principal series of connectors in the extensive Cannon Line.

CANNON ELECTRIC COMPANY, 3208 Humboldt St., Los Angeles 31, California. Factories in Los Angeles, Salem, Mass., Toronto, Can., London, Eng., Melbourne, Austl. Manufacturing licensees Paris, Tokyo. Representatives and distributors in all principal cities.

### with **NEW-IMPROVED FEATURES**

- ★ **FAST RECOVERY TIME**
- ★ **GOOD STABILITY**
- ★ **LOW OUTPUT IMPEDANCE**

Kepeco **KR** Voltage Regulated Power Supplies are conservatively rated and are designed for continuous duty at 50°C ambient.

**REGULATION:** Less than 0.2 volts for line fluctuation from 105-125 volts and less than 0.2 volts for load variation from 0 to maximum current.

**RIPPLE:** Less than 3 mv. rms.

**STABILITY:** The output voltage variation is less than the regulation specification for a period of 8 hours.

**RECOVERY TIME:** Less than 50 microseconds. The excursion in the output voltage during the recovery period is less than the regulation specification.

**OUTPUT IMPEDANCE:** Less than 0.1 ohms from 20 cycles to 100KC. Less than 0.5 ohms from DC to 20 cycles. Many units have very much lower output impedance.

*featuring*

- Fast recovery time, suitable for square wave pulsed loading.
- Advanced vacuum tube regulator circuitry
- Terminations on rear of unit.
- Voltage range continuously variable without switching.
- Power requirements 105-125 volts, 50-65 cycles.
- Oil filled condensers.
- Either positive or negative may be grounded.
- Locking type voltage control AC, DC switches, fuses, and pilot lights.
- Color Grey Hammettone.
- Guarantee one year.

All models available for 400 cycle operation on special order.

FOR WIDE RANGE UNITS SEE LAST PAGE

# SEMI-CONDUCTOR REGULATED POWER SUPPLIES

- Transistorized (Tubeless) ● Fast Recovery Time ● Good Stability ● Low Output Impedance
- Suitable for Square Wave Pulsed Loading ● Voltage range continuously variable without switching
- Either positive or negative may be grounded
- Power requirements  
105-125 volts  
50-400 cycle
- Terminations on front and rear of unit

## **NEW MAGNETIC TUBELESS**

### **VOLTAGE REGULATED POWER SUPPLIES**

**MODEL  
KM 236-15**

## **2-36 VOLTS 15 AMPS.**

*featuring*

**Output voltage within 0.5% during recovery time for line transients 105-125 volts.**

**Short circuit will not damage supply.**

**Full current may be drawn at any voltage from 2-36 volts.**

**OUTPUT VOLTAGE DC:** 2-36 volts continuously variable.

**OUTPUT CURRENT DC:** 0-15 amperes continuous duty.

**REGULATION:** In the range 2-36 volts the output voltage variation is less than 0.5% for line fluctuation from 105-125 volts, and less than 0.5% or 25 millivolts, whichever is greater, for load variations from minimum to maximum current.

**RIPPLE VOLTAGE:** Less than 0.5% or 25 millivolts RMS, whichever is greater.

**FUSE PROTECTION:** Input fuses on front panel.

**OVERLOAD PROTECTION:** An automatic current limiting device allows direct shorting of the output terminals without damage to the supply.

**POWER REQUIREMENTS:** 105-125 volts, 57-63 cycles.

**OUTPUT TERMINATIONS:** DC terminals are clearly marked on the front panel. Either positive or negative terminal of the supply may be grounded. DC terminals are isolated from the chassis. A binding post is available for connecting to the chassis. All terminals are also brought out at the rear of the chassis. Two terminals are mounted at the rear of the chassis to provide for picking up the error signal directly at the load. This connection compensates for the voltage drop in the wires connecting the power supply to the load.

**METERS:** Ammeter: 0-15 amperes, 4" rectangular  
Voltmeter: 0-50 volts, 4" rectangular.

**CONTROLS:** Power on-off switch, DC on-off switch, remote error signal on-off switch, coarse and fine voltage controls.

**PHYSICAL SPECIFICATIONS:** Rack panel construction. Panel height 12¼", width 19", depth 17". Color Kepeco standard gray hammertone. This unit is designed for relay rack mounting or bench use. Carry handles are provided.

**OPERATIONAL CHARACTERISTICS:** This regulated unit consists of a ferro-resonant line regulator followed by a magnetic amplifier regulator. The ferro-resonant line regulator furnishes well regulated transient free AC power. The high gain magnetic amplifier is used to regulate the DC output voltage to compensate for voltage changes in the power unit for varying load currents. The response time for pulse loads is less than 0.2 seconds.

**REGULATION:** In the output voltage range the output voltage variation is less than the figure shown in the table for line fluctuations from 105 to 125 volts and load variations from 0 to maximum current.

**RIPPLE:** Less than the value shown in the table.

**STABILITY:** The output voltage variation is less than the regulation specification for a period of 8 hours.

**RECOVERY TIME:** Less than 50 microseconds. The excursion in the output voltage during the recovery period is less than the regulation specification for line fluctuations from 105 to 125 volts and load variations from 0 to maximum current. For Models 2000B, 2600, 2650 and 3100B the excursion in output voltage during the recovery time is less than 50 millivolts.

For Model 3200B the recovery time is less than 100 microseconds for line fluctuations and less than 0.1 seconds for load variations, with an output voltage excursion of less than 1 volt during the recovery period.

**OUTPUT IMPEDANCE:** Less than 0.1 ohms from 20 cycles to 100K. Less than 0.5 ohms from DC to 100K. Many units have very much lower output impedance. Write for exact data specifying model.

**\*REGULATION FOR BIAS VOLTAGE:** In the range 0 to 150 volts the output voltage variation is less than 10 millivolts for line fluctuation from 105 to 125 volts. At 150 volts the output voltage variation is less than 1/2% for load variation from 0 to 5 ma. At settings below 150 volts the internal resistance of the supply will increase to a maximum of 25,000 ohms.

† All AC Voltages are unregulated.

◇ These units are supplied in cabinets. The chassis, when removed from their cabinets, will mount directly in to a standard 19" wide relay rack. All units are designed for relay rack mounting or bench use.

All units contain voltage and current meters except Models 103, 315B, 450D, and 2500. The Model 150 contains a voltmeter only.

- Fast recovery time. Suitable for square wave pulsed loading.
- Voltage Range continuously variable without switching.
- Either positive or negative may be grounded.
- Advanced vacuum tube regulator circuitry.
- Oil filled condensers.
- Wire harness and resistor board construction.
- Power requirements 105-125 volts, 60 cycles.
- Terminations on front and rear of unit.
- Voltage controls, AC, DC switches, fuses and pilot lights on front panel.
- Color Grey Hammertone.
- Guarantee one year.

Most models available for 400 cycle operation on special order.

## ALL-ANGL MOUNTS — for jets and missiles

The practical solution to mounting problems in jets and missiles; work at any angle, in maneuvers through every position; have high damping in all directions, low transmissibility at resonance. Built to handle the new jobs that are too tough for MIL-standard mounts. Available in all MIL sizes.

Type	MIL size	Max. load rating
B22	0	3 lbs.
B44	1	10 lbs.
B64	2	40 lbs.

ASK FOR BULLETIN 56-01.

## ALL-METL MOUNTS

— for MIL-spec service

Types M24, M44, and M64. Have non-packing wire-mesh damper; meet latest Government specifications for air-borne electronic equipment; ruggedized; lightweight; operate over wide temperature range; load ratings 0.1 to 40 pounds.

ASK FOR BULLETINS 534, 536, and 542.

## RACKS and MOUNTING BASES

### Standard MIL-C-172B Units

Meet dimensional and material requirements of MIL-C-172B; in special sizes to fit customers' needs. With ALL-METL mounts, ask for Bulletins 534 & 536; with AIR-DAMPED mounts, ask for Bulletin 523-B.

## CUP-MOUNTS

for shipboard, vehicular, and industrial use

Barry cup-mounts, Series 1000, 2000, 4000, and 3000; protect sensitive equipment against shock and vibration in shipboard, vehicular, railway, and industrial service; load ratings up to 1800 pounds.

ASK FOR BULLETIN 56-02.

## Special Designs

Barry prototype service can help you with all necessary design, development, testing, and production of special mounting bases specifically engineered to your equipment and service requirements. Typical Barrymount® specials using standard isolators, or new integral isolation systems, are shown here. To learn all about this service,

ASK FOR "DESIGN NOTES - EBG".

When you need transformers or other electronic assemblies for special purposes, Caledonia offers:

1. Engineers, experienced in communications circuitry and transformer design, who know how to *design* for special problems of weight, size, temperature, high voltage, etc.
2. A streamlined plant, equipped to *produce* your specialty in the quantity you want.
3. Strict standards of quality control, with complete facilities to *test* the product in our plant, including facilities for qualification tests in accordance with MIL-T-27A.

ACTUAL  
SIZE

**MINIATURE LOW LEVEL AUDIO TRANSISTORS (25 mw)**  
**2N207** general purpose micro-miniature low level transistor, typical beta of 100, 15 db maximum noise figure  
**2N207A** 10 db maximum noise figure version of 2N207  
**2N207B** 5 db maximum noise figure version of 2N207  
**T0031** 50 volt version of 2N207  
Special versions of the 2N207 to selected beta ranges are available.

**HIGH FREQUENCY, HIGH GAIN (MICRO ALLOY) TRANSISTOR**  
**T1166** combines high frequency response with high gain for general purpose high frequency applications and switching circuits, typical  $f_{max}$  60 mc

**HIGH FREQUENCY SILICON TRANSISTORS (150 mw)**  
**T1025** general purpose, 10 mc silicon transistor  
**T1159** high speed silicon switch for speeds up to 5 mc characterized by extremely low switch resistance

**HIGH FREQUENCY SURFACE BARRIER TRANSISTORS**  
**SB100** general purpose, minimum  $f_{max} = 30$  mc, beta over 10.5  
**2N344/SB101** general purpose, good beta control (11-33)  
**2N345/SB102** general purpose, higher beta (25-110)  
**2N346/SB103** general purpose, higher minimum  $f_{max}$  (60 mc)  
**2N128** general purpose, with military specifications, beta 19-66, minimum  $f_{max}$  45 mc  
**2N129** general purpose, with military specifications, beta over 11.5  
**2N240** switching transistor,  $f_{\alpha b} > 30$  mc  
**2N299** for tuned amplifiers, military specifications, 20 db minimum power gain at 10 mc, minimum  $f_{max}$  90 mc  
**2N300** for video amplifiers, 50 mc minimum current gain bandwidth product,  $f_{max}$  over 85 mc  
**T1050** high frequency transistor for 50 mc oscillator mixers and 10-15 mc bandpass amplifiers, 22 db typical power gain at 10 mc  
Other types with special parameter controls are available.

ACTUAL  
SIZE

**MEDIUM POWER ALLOY JUNCTION AUDIO TRANSISTORS (100 mw)**  
**2N223** 39-120 beta driver transistor  
**T1000** 45-85 beta version of 2N223  
**T1001** 70-120 beta version of 2N223  
**2N224** high gain output transistor, 2N225 is a matched pair  
**2N226** medium gain version of 2N224, 2N227 is a matched pair  
Versions of the 2N224 with various beta ranges and higher betas are available singly or in matched pairs.

ACTUAL  
SIZE

**AUDIO POWER TRANSISTORS**  
**T1040** 40 volt, 7 watt power transistor, thermal drop  $3^{\circ}\text{C}/\text{w}$  maximum  
**T1041** 40 volt, 10 watt power transistor, thermal drop  $2.5^{\circ}\text{C}/\text{w}$  maximum  
**T1167** 60 volt, 12.5 watt power transistor  
**T1168** 80 volt, 12.5 watt power transistor

Proven performance of Philco Hermetically Sealed Transistors has made them the basis for design in commercial and military applications where reliability is the major consideration. Philco transistors range from the world's smallest germanium transistors now in production to silicon transistors with excellent performance at temperatures from  $-60^{\circ}\text{C}$  to  $+150^{\circ}\text{C}$ .

Philco produces a wide range of transistors designed for special applications in accordance with customer requirements. The Philco Micro-Alloy Transistor is in production. Specifications and design quantities are available. New and exciting transistor types, such as the Philco Micro-Alloy Graded Base Transistor, are now in development. In keeping with our policy, specifications will be made available as soon as these units reach pilot production and are available in design quantities.

**Make Philco your prime source for complete transistor application information... write to Lansdale Tube Company, Dept. 1-2, Lansdale, Penna.**

Regional offices—Merchandise Mart Plaza, Chicago 54, Ill.—10589 Santa Monica Blvd., Los Angeles 25, Calif.

Get unprecedented performance —

See for yourself why the new  
**LEACH BALANCED-ARMATURE RELAYS**  
outperform all other types in resistance  
to shock, acceleration and vibration

AIRCRAFT AND  
MISSILE DESIGNERS,  
PLEASE NOTE

**ONE-PIECE DIE CAST ALUMINUM HOUSING** for maximum strength and vibration resistance with minimum weight.

**MAGNET COIL** wound with Teflon insulated magnet wire on one-piece Kel F bobbin assures reliability at elevated ambients.

**DUAL COIL** construction is the most efficient magnetic circuit for minimum height and maximum resistance to vibration and shock.

**BIFURCATED CONTACTS** assure high reliability in contact making circuits. Overtravel and high contact pressures produced by the pivoted armature result in immunity to shock and vibration.

**ARC BARRIER** of Kel F molded construction provides long arc path for use on 3 phase ac circuits, prevents phase-to-phase flashover.

**BALANCED-ARMATURE DESIGN.** In a *Balanced-Armature* construction, shock and vibration forces cannot cause the relay armature to move. This eliminates faulty operation of contacts due to vibration and shock forces.

**HEADER AND CONTACT ASSEMBLY** features simplified construction which eliminates internal wiring, lowers lead resistance, provides maximum resistance to vibration. Contacts and working parts are readily accessible throughout assembly, so that Leach is able to measure contact gap, contact pressure and overtravel, prior to sealing, on 100 per cent of production. Customers are assured of maximum performance from every production relay. Patent Pending.

**MEETS ALL REQUIREMENTS OF THE MOST EXACTING OPERATING ENVIRONMENTS**

The Leach Balanced-Armature Relays meet or exceed requirements of MIL-R-5757, MIL-R-6106, MIL-E-5272. Typical ratings include: vibration, 20 G's to 500 cps (higher ratings available); shock and acceleration, more than 50 G's; temperature,  $-50^{\circ}$  to  $+125^{\circ}$ C; life, 50,000 continuous operations minimum at rated load; coils, any resistance to 10,000 ohms — also available for 115 vac, 400 cps operation.

Write today for your copy of the Leach Balanced-Armature Relay Catalog.

Shown  $\frac{1}{2}$  size  
Crystal Filter Model 13MA

## **HYCON CRYSTAL FILTERS**

HYCON EASTERN, Inc., Cambridge, Mass., elected to use JFD Variable Trimmer Piston Capacitors because of the following advantages:

1. Convenient, smooth tuning adjustment.
2. Stability with temperature variation.
3. Stability under conditions of vibration and shock.
4. Ease of mounting on printed wiring boards.

These are some of the reasons why JFD VC9GW Trimmers are specified in Hycon Eastern Crystal Filters noted for their high stability, extremely sharp cut off and linear transfer characteristic. Used in single side band communication systems, Hycon Eastern Crystal Filters are available to select either the lower or upper side band. In VHF and UHF receivers Hycon filters provide all the required selectivity at the first intermediate frequency, thereby eliminating the complexity of multiple conversions.

JFD Trimmer VC9GW is one of many precision capacitors available to provide the stability, shock resistance, ultra linear tuning and wide operating temperature range necessary in your critical circuits.

Its sub-miniature size is also a welcome asset where space saving is a must in printed or chassis circuits.

Why don't you take advantage of JFD Variable Trimmer Piston Capacitors in solving your circuit tuning problems?

Sierra 121A Wave Analyzer

### LINE BRIDGING TRANSFORMER

Converts voltmeter and wave analyzer inputs from single-ended to balanced operation. Model 130D bridges both 135 and 600 ohm balanced lines. Frequency range 3 KC to 500 KC. Write for details.

### LINE FAULT ANALYZER

Sierra 124A Line Fault Analyzer

Operates on most open wire power, communications lines. Instantly pinpoints shorts, opens, grounds. Direct reading, easy to use, range 1/2 to 200 miles. Sweep marker continuously adjustable from 5 to 100 miles; locates faults with accuracy of 1/4 mile. Request Bulletin 102.

(Sierra now offers Model 169 Line Coupling Network rated at 5 KV. Ideal for coupling Model 124A to "dead" power lines. Affords protection to personnel and equipment.)

### REFLECTION COEFFICIENT METER

Compact, moderately-priced instrument giving great speed, convenience for measuring coaxial transmission line reflection coefficient, VSWR, or matching loads to line. High accuracy. Sensitivity permits operation with any standard CW signal generator. Provides continuous monitoring at any frequency over the range 32 MC to 1125 MC. Employs Sierra wideband directional couplers to sample incident and reflected voltage. Attenuator calibrated in reflection coefficient and VSWR. Request Bulletin 106.

### COAXIAL READOUT DEVICES

Insure sensitive readout for Sierra vhf-uhf Directional Couplers. Model 148 Crystal Detector, low VSWR, higher sensitivity to 1200 MC. Incorporates 50 ohm input impedance and filtered output. Type N input, BNC output connectors. Request Bulletin 113.

### DOUBLE STUB TUNERS

New tuners match to a 50 ohm line any load having a 2:1 VSWR. Three models: 151 (155 MC to 300 MC); 152 (380 MC to 825 MC); 153 (900 MC to 1750 MC). Operates up to 1.5 KW peak power. Request Bulletin 110.

### CALIBRATED RF LOAD

Sierra 141 Calibrated RF Load

Model 141 Variable Impedance Calibrated RF Load provides for direct power measurements from 25 to 250 watts at 2 MC to 30 MC. Load impedance resistance and reactance adjustable over wide range. High accuracy instrument with comprehensive individual impedance calibration charts for all frequencies, or typical charts for general purpose use. Accuracy:  $\pm 5\%$  (impedance magnitude),  $\pm 10\%$  (power). Request Bulletin 105.

## WAVE ANALYZERS

Model	Frequency Range	Selectivity		Accuracy		Direct Reading in dbm	
		Down 3db	Down 45db	Frequency	Measuring	Balanced	Unbalanced
I21A	15 KC-500 KC	$\pm 100$ cps	$\pm 1000$ cps	$\pm 3$ KC	$\pm 2$ db	Note D	600 ohms
I58A	500 KC- 10 MC	$\pm 2000$ cps	$\pm 5000$ cps	$\pm 0.08$ MC	$\pm 2$ db	—	600 ohms

### CARRIER FREQUENCY VOLTMETERS

I01C	20 KC-500 KC	$\pm 550$ cps	$\pm 2900$ cps	Note A	$\pm 3$ db	Note D	600 ohms
I03B†	3 KC- 40 KC	$\pm 400$ cps	$\pm 3000$ cps	$\pm 0.5$ KC	$\pm 3$ db	Note D	600 ohms
I04A	5 KC-150 KC	$\pm 300$ cps	$\pm 1500$ cps	$\pm 1$ KC	$\pm 3$ db	Note D	600 ohms
I08B	15 KC-500 KC	$\pm 550$ cps	$\pm 2900$ cps	$\pm 3$ KC Note B	$\pm 2$ db Note C	I35 ohms Note D	600 ohms
I14A	100 KC-800 KC	$\pm 550$ cps	$\pm 2900$ cps	Note A	$\pm 3$ db	Note D	600 ohms

All Models feature built-in calibration oscillators and circuits for level calibration have aural monitoring jacks, and (except I03B) are furnished with Sierra Model I49A Precision Spiral Scale Dials.

†Contains carrier re-insertion oscillator for monitoring suppressed carrier systems. Furnished with planetary drive dial. Note A. Ranges from  $\pm 2$  KC at low end of dial to  $\pm 3$  KC at upper end. Note B.  $\pm 1$  KC in the 48 KC to 256 KC region. Note C.  $\pm 1$  db for + 30 db to -40 db attenuator steps on I35 ohm balanced measurements. Note D. All models may be converted for 135 and 600 ohm balanced line measurements by convenient plug-in bridging transformer, Model 130D.

### IMPEDANCE METER

Sierra Model 166 Carrier Systems Impedance Meter is specifically designed for the measurement of impedances on circuits with high noise levels at any frequency over the range 30 KC to 300 KC. Either high or low power signal sources may be used. Measurements may be made on "hot" power lines through a series carrier coupling capacitor. Request Bulletin 112.

### LOW PASS FILTERS

Model 184 Series Low Pass Filters have an insertion loss of not more than 0.4 db in pass band, sharp cut-off, 1.5 VSWR or less, and rejection greater than 60 db from 1.25 to 10 times cut-off frequency. Five models: for cut-off frequencies of 44, 76, 135, 230, 400 MC.

Power range 250 watts in pass band, 25 watts in rejection band. Request Bulletin 115.

### WIDEBAND DIRECTIONAL COUPLERS

Coupling Factor: (in db  $\pm 1$  db)

Model	10 KC	3 MC	10 MC	30 MC	100 MC	300 MC	1000 MC	2000 MC
I37, I37A				73	63	53	43	37
I38, I38A				59	49	39	29	
I45		52	42	32	22	12		
I50				53	43	33	23	
I39	50	50						

Directivity: 12 db  $\pm 3$  db greater than coupling factor at each frequency.

Impedance: Models I37 and I38 are 51.5 ohms. Models I37A, I38A, I45 and I50 are 50.0 ohms. Model I39 may be matched to most impedances.

Power: Usable to 1000 watts throughout frequency range.

### PHASE CHANGER

Model 191 Phase Changers, ideal for life-testing tubes, are offered with ac or dc motor for 1 1/4" x 3/8" or 1" x 1/2" waveguides. VSWR preset at 1.5 but adjustable from 1.02 to 1.6. For powers to 200 Kw peak, average power rating 500 watts. Request Bulletin 117.

## TERMINATION WATTMETERS

Sierra 195A-Z  
Termination Wattmeter

Sierra 185A Series Average Reading Termination Wattmeters and Sierra 195A Series Peak-Reading Termination Wattmeters are broadly useful, dependable new instruments for terminating rf coaxial transmission systems and measuring rf powers. All models are ruggedly built, conservatively rated, and ideal as dummy loads for testing and adjusting transmitters and oscillators. Request Bulletins 120 (average reading) and 121 (peak-reading).

### Model 185A Average-Reading and 195A Peak-Reading Wattmeters

Model Number	Connector	Frequency Range, MC	Power Range, Watts	Accuracy % of F. S.	Max. Power Dissipation	Max. VSWR
185A-15FN	N	20-1000	0-5/15	± 5%	15 watts	1.2
185A-100FN	N	20-1000	0-30/100	± 5%	100 watts	1.2
185A-500FN	N	20-1000	0-150/500	± 5%	500 watts	1.2
Model Number	Connector	Frequency Range, MC	Peak Power Range, KW	Max. Average Power	Pulse Width, $\mu$ sec	Repetition Rate, PPS
195A-Z	N	250-1000	0-1/3/10	15 watts	1.0 minimum	400 minimum
195A-X	LC	250-1000	0-10/30/100	100 watts	1.0 minimum	400 minimum
195A-Y	LC	250-1000	0-100/300/1000	500 watts	1.0 minimum	400 minimum
195A-W*	N	950-1250	0-1 and 0-3	15 watts	3.0 to 5.0	48 to 300
195A-V*	N	450-1250	0-3 and 0-10	100 watts	3.0 to 5.0	300 to 7200
195A-U*	HN	450-1250	0-5 and 0-15	500 watts	3.0 to 5.0	300 to 7200

NOTE: Female connectors are standard. \*Available on special order only.

## BI-DIRECTIONAL POWER MONITORS

Sierra 164  
Power Monitor

Model 164 Series. Two plug-in elements cover 25 MC to 1,000 MC, measure incident and reflected power of 10, 50, 100 and 500 watts full scale. Also four lower power elements covering same range at 1, 5, 10 and 50 watts full scale. Power is read direct on linear scale

accurate within  $\pm 5\%$ . Insertion VSWR less than 1.08 (Type N connectors) except on 1 watt ranges where VSWR is 1.15. 50 ohm impedance. Model 164 available with Type N, Type C or UHF connectors, male or female. Request Bulletin 111.

**Plug-In Elements for Model 164** (Note: Model 164 does not include plug-ins. Order separately as needed.)

**180 Series** — 1, 5, 10, 50 watts full scale

180-52: 25 MC to 52 MC  
180-148: 50 MC to 148 MC  
180-470: 144 MC to 470 MC  
180-1000: 460 MC to 1000 MC

**181 Series** — 10, 50, 100, 500 watts full scale

181-250: 25 MC to 250 MC  
181-1000: 200 MC to 1000 MC

**270 Series** — 50, 100, 500, 1000 watts full scale

270-75: 10 MC to 75 MC

**Accessories Available:** Model 164-LS Equivalent Transmission Line Section; Model 164-CC Carrying Case.

## THERMOPILE

Model 189A Differential Thermopile converts differential temperatures in flowing liquids to electrical energy. Internal resistance approx. 5 ohms, output voltage approx. 1 mv per  $^{\circ}$ C, max. pressure 75 psi. Request Bulletin 119.

## 50 OHM COAXIAL TERMINATIONS

New compact, light weight Model 160 series coaxial terminations feature stable operation over a wide frequency range and up to high ambient temperatures. High surface to volume ratio provide a very low VSWR from dc to 3300 MC.

Model 160-5: 5 watts; Model 160-20: 20 watts; Model 160-100: 100 watts; Model 160-500: 500 watts. Request Bulletin 114.

## CALORIMETER, X-BAND WATER LOAD

Model 190A Calorimeter and XB187A Water Load provide fast, accurate power measurement from a few watts to kilowatts. Accuracy  $\pm 2\%$ . Calorimeter ranges 300, 600, 1,500, 3,000 watts, max. 50 psi, sensitivity 1.5 mv. Water Load range 7 KMC to 10 KMC, VSWR less than 1.2, power 1 Kw CW, 300 Kw peak. Request Bulletin 116.

## MODEL 194A-A PEAK-READING POWER MONITOR

New bi-directional instrument for radar and other pulsed measurements. Quickly measures incident and reflected powers. Measures peak power directly, independently of duty cycle. Write for Bulletin 122.

## IONIZATION GAUGE AND AMPLIFIER

Model 193A Ionization Gauge and Model 192A Ionization Gauge Amplifier provide convenient, dependable and accurate monitoring of pressures during processing from  $10^{-1}$  to  $10^{-7}$  mm Hg. Monel-encased Phillips type ion gauges operate for months without attention; amplifier includes high voltage rf power supply, VTVM, heater transformer and low voltage supply. Request Bulletin 118.

Data subject to change without notice.

1140 MODEL

# line of mercury plunger-type relays

## 1040 MODEL

Contact arrangement: Normally open or Normally closed. Single pole—Single throw

Available in:

Time delay types of    Slow operate—Quick release  
                                   Slow operate—Slow release  
                                   Quick operate—Slow release

Maximum time delay: 20 minutes

Contact rating: Time delay relays to 15 amps.

Load type: Quick operate—Quick release

Load relays to 50 amps. Non-inductive, 115 v, 60 cy.

Voltage Coil: Up to 440 volts A.C. (25-50-60 cy.)

Maximum size: Height 5<sup>5</sup>/<sub>8</sub>"—width 2<sup>1</sup>/<sub>2</sub>"—projection 2-19/32"

Also available in quick acting, contact normally open or contact normally closed.

## 1101 MODEL

Available with same features as Companion 1040 Model. Complete information on all relays illustrated available on request. Height is 5<sup>1</sup>/<sub>2</sub>".

## 1123 MODEL

Double Pole Load Relay

(Also available with time delay contacts)

Contact Arrangement: 2 contacts Normally open or  
                                   2 contacts Normally closed  
                                   Double pole—Single throw

Contact rating: Time delay contacts up to 15 amperes. Load relays to 50 amperes. Non-inductive 115 v, 60 cy.

Voltage Coil: Up to 440 v., 50/60 cy. or 220 v. d.c.

Maximum size: Height, 3<sup>3</sup>/<sub>4</sub>"—width, 3<sup>3</sup>/<sub>4</sub>"—projection, 2<sup>5</sup>/<sub>8</sub>"

## 1140 MODEL "MIGHTY MIDGET"

Contact Arrangement: Normally open or normally closed—Single pole—Single throw.

Available in: Quick acting load type only.

Contact rating: 30 amperes non-inductive 115 volts, 60 cy.

Voltage Coil: Up to 440 v, 60 cy. and 220 v. d.c.

Maximum size: Height, contact normally closed, 3<sup>7</sup>/<sub>8</sub>"; contact normally open, 4<sup>1</sup>/<sub>4</sub>"—width 2-17/32"—projection 2<sup>3</sup>/<sub>8</sub>".

Equipped with compression type terminals to simplify installation.

### Special mounting arrangements for Adlake mercury plunger type relays

(A) Type No. 1040

(B) Type No. 1040

(C) Type No. 1040

(D) Type No. 1040

(E) Type No. 1101

(A) Type No. 1040—Normally open relay with back panel equipped with screw terminals for back connecting. (No. 1040-83 series)

(B) Type No. 1040—Normally open time delay or quick-acting relay with back panel equipped with compression type terminals. (No. 1040-44 series)

(C) Type No. 1040—Normally closed time delay or quick-acting relay with back panel equipped with compression type terminals. (No. 1040-45 series)

(D) Type No. 1040—Normally open time delay relay with back panel equipped with screw terminals for front connecting. (No. 1040-85 series)

(E) Type No. 1101—Double unit relay assembly. Can be made with two-time delays, or time delay and load relay, or two-load relays. (No. 1101-53 series)

These are but a few of the possible mounting arrangements. Our engineering department is at your disposal to assist in developing any ideas to fit your requirements.

# You'll find the Type and Size Fuse you need

## • • • IN THE COMPLETE LINE OF BUSS AND FUSETRON FUSES

The following is a representative selection of the complete BUSS line of fuses that includes standard, dual-element (slow blowing), renewable and one-time types — in sizes from 1/500 ampere up . . . plus a companion line of fuse clips, blocks and holders.

### BUSS AGX FAST ACTING FUSES

1/4 x 1 in. Glass tube 1/500 to 2 amp.

### BUSS IBM SIGNAL ACTIVATING FUSES

1/4 x 1 1/4 inch. Silverplated pin pops out when fuse is blown and activates signal or alarm.

### FUSETRON MDL FUSES

1/4 x 1 1/4 inch. Dual-element — slow blowing type 1/100 to 30 amp.

### BUSS ABC CERAMIC TUBE FUSES

1/4 x 1 1/4 inch. High interrupting capacity fuses 1/4 to 30 amp.

### BUSS GJV PIG TAIL FUSES

1/8 to 6 amp. Solder into circuit wires.

### BUSS SFE STANDARD FUSES

Fuses of different amperages are different lengths — to make it impossible to insert too large a size.

### FUSETRON FNM FIBRE TUBE FUSES

1 3/32 x 1 1/2 inch. Dual-element — slow blowing type.

### FUSETRON TYPE N and TYPE C FUSES and FUSEHOLDERS

Especially suitable for protection of TV

Ears on fuses match slots in holder.

Marking on fuse and fuseholder in direct view.

Safeguard against use of wrong size and type of fuse.

### BUSS KLM HIGH INTERRUPTING CAPACITY FUSES

1 3/32 x 1 1/2 inch. Capable of safely interrupting 68,000 amps.

### FUSETRON ACK CLAMP TYPE FUSES

20 to 300 amp., Dual-element type.

### BUSS ACO AIRCRAFT FUSES

Mechanical Indicating — Limiter type 1 to 75 amp.

### BUSS Series HJ and HK Non-Indicating FUSEHOLDERS

Panel mounted for 1/4 x 1 inch and 1/4 x 1 1/4 inch fuses.

### BUSS Series HJ and HK Lamp Indicating FUSEHOLDERS

Panel mounted for 1/4 x 1 inch and 1/4 x 1 1/4 in. fuses.

### BUSS No. 4051 ONE-PIECE CLIP and TERMINAL

Solder type terminal for 1/4 inch fuses.

### BUSS No. 4409 FUSE BLOCKS

Small Base, solder type Side Terminals.

### BUSS No. 4512 FUSE BLOCKS

Full Base, Screw type Terminals.

For more detailed information to help you select fuses and fuseholders to meet your electrical protection needs . . . Write for bulletin SFB.

Or tell us your problem and let our Fuse Engineers assist you in getting the protection you require.

Makers of a complete line of fuses for home, farm, commercial, electronic and industrial use.

# NEED A *Special* REGULATED POWER SUPPLY ?

**MERCURY** can supply any input voltage — output voltage — current — regulation — ripple — size — finish — quantity.

For a long time the MERCURY organization has been designing and producing reliable REGULATED POWER SUPPLIES for general use. These units were considered catalog items although frequently modifications were made to suit customers requirements.

In recent years we have received many inquiries for SPECIAL POWER SUPPLIES. Now we have established a new department to handle these special requirements of our customers. You are invited to submit inquiries relative to your special problems. All inquiries will receive a prompt reply.

Some typical units designed and manufactured by **MERCURY**

**Electronic Inverter**  
 Input: 220 V. D.C.  
 Output: 115 V. A. C. 60 Cycles  
 1000 Watts  
 Regulation: 5%  
 Special Features included  
 Size, weight, shape, finish  
 and application

**Model 508-A**  
 Input: 117 volts AC  
 50/60 cycles  
 Output: 0-600 volts DC at  
 1 amp.  
 Regulation: .25% from  
 10-600 volts

**Model 721-A**  
 Input: 117 volts AC  
 50/60 cycles  
 Output: 0-500 volts DC at  
 300 Ma.  
 Regulation: .25% from  
 10-500 volts

**Model E-1A Converter**  
 400 cycle Regulated Power  
 Supply  
 Input: 110 volts AC  
 380/1000 cycles  
 Output: 300 volts DC at  
 400 Ma.  
 Regulation: 1% at 300 volts  
 300 volts  
 Ripple: 80 millivolts

**Model E-1B Converter**  
 400 cycle Regulated Power  
 Supply  
 Input: 117 volts AC  
 380/1000 cycles  
 Output: 150 volts DC at  
 100 Ma.  
 Regulation: .1% at  
 150 volts  
 Ripple: Less than 3 millivolts

DEVELOPMENT

DESIGN

PRODUCTION

**Model 610-A**  
 Regulated Power Supply  
 Input: 117 volts AC  
 50/60 cycles  
 Output: 0-600 volts DC at  
 600 Ma.  
 Regulation: .25% from  
 10-600 volts  
 Ripple: 5 millivolts

## STANDARD ITEMS TOO!

MERCURY, long a recognized leader in the Continuously Variable Regulated D. C. Power Supply field, would like to send you their latest catalog of Standard Regulated Power Supplies and related items.

## WIRE FORMS AND METAL STAMPINGS

**Straightening and Cutting:** Perfect straight lengths to 12 ft. Diameters: .0015 to .125.

**Wire Forms:** .0015 to .125 diameter.

**Small Metal Stampings:** .0025 to .035 thickness, .062 to 3 inches wide.

We specialize in production of parts for electronic, cathode ray tubes and transistors.

### TERMINAL LEADS FOR RESISTORS, TRANSISTORS, CAPACITORS, ETC.

These components can be supplied with coiled heads, flatted heads, wound heads, heads upset and flanged—with wide possibilities for variation in size and length.

### FOR THE HERMETIC SEAL INDUSTRY

Headed pins, flanged pins, base pins. Straight wires with rounded ends. Parts made of Kovar, Rodar, Therlo and other glass seal alloys.

## UPSET PINS

Continuous uniformity from the first to the millionth unit. In a wide variety of metals and alloys, diameters from .010 to .090. Thickness of upset flange on head can vary from .010 inch on fine wire to .062 inch on heaviest wire. Flanges precision-positioned to your specifications. Flanges and heads with rounded edges.

Send for literature  
 with complete information.

Important Question No. 3

Which company offers maximum savings on custom-built delay lines?

In delay lines you waste money if "over-specification" of custom engineering service and lab facilities is the field. ESC specializes in fixed and variable delay lines with realistic and economical well-stocked equipment backlogs.

- 1st in sales!
- 1st company devoted to manufacture of delay lines
- 1st in research, design and development of custom-built delay lines
- 1st to submit the most complete laboratory reports with all custom-built delay line prototypes

Exceptional employment opportunities for engineers experienced in pulse techniques  
ESC CORPORATION 534 BERGEN BOULEVARD

Important Question No. 2

Who submits the most complete laboratory reports with all custom-built delay line prototypes?

It is a known fact that ESC Corporation submits the most complete laboratory reports. Each report includes submitted electrical input and output pulse shape and output characteristics of the electrical characteristics.

- 1st in sales!
- 1st company devoted to manufacture of delay lines
- 1st in research, design and development of custom-built delay lines

Exceptional employment opportunities for engineers experienced in pulse techniques  
ESC CORPORATION 534 BERGEN BOULEVARD

Important Question No. 1

Who produces more custom-built delay lines than any other company in America?

- 1st in sales!
- 1st company devoted exclusively to the manufacture of delay lines!
- 1st in research, design and development of custom-built delay lines!

Exceptional employment opportunities for engineers experienced in pulse techniques  
ESC CORPORATION 540 BERGEN BOULEVARD • PALISADES PARK • NEW JERSEY

MANUFACTURERS OF CUSTOM-BUILT AND STANDARD-CATALOGED...

- LUMPED-CONSTANT DELAY LINES
- DISTRIBUTED CONSTANT DELAY LINES
- VARIABLE DELAY NETWORKS
- PULSE TRANSFORMERS

# Tailor-Made Fasteners in Volume Quantities

## MINIATURE BATTERY CONNECTORS

For use with small "B" batteries; afford quick and positive polarized electrical connections and worthwhile space savings on small electronic equipment.

## POLYETHYLENE MOUNTING FOOT

No mar no scratch glide for use on TV receivers, record changers and small appliances. Assembles into round hole in either wood or metal cabinets.

## FISHTAIL RATCHET PLATE

Made in a wide range of sizes to hold on smooth metal, die-cast or plastic studs. For use on refrigerators, radio cabinets, washing machines and other products to hold medallions, name plates, etc.

## VIBRATOR GROUNDING FASTENERS

Holds 1 1/2" dia. beaded or non-beaded vibrator. Vibrator Can grounded to chassis. Holding prongs designed to hold several types of Cans.

## RUBBER FOOT

Snap-in Rubber Foot for Record Changers and Phonograph Mountings eliminates threaded member, lock washer and nut thereby speeding assembly time and reducing costs.

## NYLON COIL NUT

Designed to snap into a TV tuner and receive a 4-40 or 4-48 coil adjusting screw. No coil form or coil form fastener required.

## SPEAKER MOUNTING BOLT

Pronged head prevents bolt from turning in speaker panel during application of nut and lock washer, permits one-side attachment providing production-line savings.

## NYLON SNAP-IN NUT

Serves as insulator between "hot TV chassis" and cabinet. Snaps into square chassis hole and secures to cabinet with sheet metal screw.

## PLUG BUTTONS

Made to snap into hole sizes 1/8" to 3". Can be embossed with ornamental or functional designs. Removable. Supplied with various finishes, in a variety of shapes and sizes.

## QUICKEY FASTENER

Eliminates need for welding or swaging studs to sheet metal stampings, facilitates nesting, eliminates damage in transit because Quickey snaps in just before final assembly.

## TRIMOUNT STUDS

Designed to hold two or more thicknesses of material together. Easily installed by hand. Insure vibration proof attachment. Permanent or removable attachment. Wide variety of shapes and sizes.

**DOT**

Parts illustrated are representative of the thousands of different specialized fasteners and allied devices designed and manufactured in volume by United-Carr and its subsidiaries for leading manufacturers of electronic equipment. United-Carr's wide and varied experience with special fastening problems in the automotive, aviation and appliance fields provides an unequalled background of technical knowledge which may well be applicable to your special needs.

**UNITED-CARR**  
FASTENER CORP.  
CAMBRIDGE 42, MASSACHUSETTS

# Ucinite Electrical Assemblies

## BATTERY CONNECTORS

Wired snap-on units for use with batteries equipped with United-Carr electrical snap fasteners. Wiring to customer's specifications.

## BANANA PINS

Four sizes of plugs with one-piece beryllium copper springs. Adaptable mounting ends in threaded, staking, or solder lug types. Similar Mating Jacks also available.

## SHOCK MOUNTS

Offered in several sizes — brackets and durometer of rubber bushings can be varied. With threaded Teenuts or plain bushings. Insulated versions if needed.

## ANODE CONNECTORS

Plug button contacts for positive firm connections. Corona resistant neoprene or silicon shields in straight or right angle types. Wiring to customer's specifications.

## TUBE CAPS

Positive gripping, heat treated steel springs in corona resistant metal housing. Insulated or non-insulated. Wired to specifications. Type shown has silicon shield for special application.

## MAGNETRON CONNECTORS

For heater and heater cathode terminals of magnetrons. Available in many variations to answer specific needs.

## SWITCHES

Oak type switches manufactured as a licensee. Variety of rotary and push-button assemblies to specifications.

## SNAP SWITCHES

Precision, momentary contact push-button switches. Small and dependable. Several circuit arrangements. Water tight version shown.

## TEST JACK

Ucinite's quality jack for .080 probes. Beryllium copper contacts. Nylon insulation in colors. Metal shell for firm dependable mounting.

## VIBRATION ISOLATORS

Equiflex (1 to 1 ratio) metal mounts ensure long life, fit small spaces, can be used in any direction. Three sizes, cup or plate mountings.

## METAL STAMPINGS

Volume production in Metal stampings. Years of engineering and tooling skill available to solve your particular problem.

With years of specialized experience in the electronics field and complete facilities for the volume production of small metal stampings as well as the assembly of metal to plastic and ceramic components, Ucinite is fully equipped to supply you with special electrical parts and assemblies...designed, assembled, wired and marked to your specifications. For complete design, engineering and production service, call your nearest Ucinite field engineer.

## The UCINITE Company

DIVISION OF UNITED-CARR FASTENER CORP.

Newtonville 60, Massachusetts

### 9 TUBE TESTERS FILL ALL REQUIREMENTS

MODEL 123A

#### CARDMATIC TUBE TESTER

##### Automatic Tube Testing Machine

Model 123A: An automatic tube test to laboratory accuracy that instantly selects any tube to meet the exact requirements of your specific circuit application. Ideal for production line use by factory personnel, or for TV service companies.

MODEL 539B

#### PORTABLE TUBE TESTER

##### Most Accurate

Model 539B: Features simplicity of operation in providing a complete and accurate evaluation of electron tubes. Has Mutual Conductance circuits, 6 micromho ranges, 4 AC Signal voltages, metered line voltage, metered grid voltage and other important features.

### 7 OSCILLOSCOPES MEET SPECIALIZED REQUIREMENTS

#### LABORATORY CATHODE RAY OSCILLOSCOPE

##### Wide Range . . . Versatile

MODEL 770

Model 770: Provides unusually wide range of DC to 5 MC. 10 M.V. RMS per inch sensitivity. Built-in calibrating voltages. New flat-faced tube. Illuminated calibrated screen. Mu-metal shield. Shock mounted. This highly stable 'Scope is laboratory quality throughout.

MODEL 685

#### INDUSTRIALS' 5-INCH PORTABLE

Model 685: DC amplifiers and DC to 750KC response. Sensitivity is 20 MV RMS per inch. Shock mounted amplifiers and good circuit design provide excellent stability for use in all phases of electronic work. The illuminated calibrated screen and ideal design features will please many an industrial who would expect to pay much more for this quality and completeness.

MODEL 385

#### SMALLER SIZE LABORATORY OSCILLOSCOPE

##### 3-Inch Portable

Model 385: DC to 4 MC, within 3 db, 0.75 RMS volts per inch sensitivity. Sweep circuit oscillator; 3 cycles to 50 KC. Input impedance; vertical and horizontal amplifiers; 2.2 megohms—25 mmf. Features replaceable circuit sections. High quality throughout. Also available in portable, moisture-proof, weather-proof aluminum carrying case as preferred by field engineers.

MODEL 387R

#### INDUSTRIAL LABORATORY OSCILLOSCOPE

##### 3-Inch Rack Mount

Model 387R: Popular rack-mount style in an accurate 3-inch oscilloscope. Features identical vertical and horizontal amplifiers. DC to 500 KC response. 10 MV RMS sensitivity. Designed to permit versatile use in all phases of electronic work.

### 11 GENERATORS WITH SPECIALIZED FUNCTIONS

MODEL 710

#### SINE-SQUARE WAVE GENERATOR

##### For Laboratory & Industrial Use

Model 710: Provides an accurately calibrated source of sine wave and square wave functions over a wide frequency range. Sine wave total harmonic distortion below 1%. Hum level better than 90 db down. Square wave rise time less than .1 Microsecond. 20 cycles to 1 MC in five ranges on both sine and square waves.

MODEL 295X

#### MICROVOLT SIGNAL GENERATOR

##### 125 KC to 175 MC on Fundamentals

Model 295X: Ideal for mobile radio and other communication equipment design and maintenance. Output 0.1 microvolt to 100,000 microvolts. 125 KC to 175 MC continuous on fundamentals. 400 cycle modulation—approximately 30%. Attenuation down to 0.1 microvolt—no external attenuator pad required. Vernier Control permits hairline settings. Silverplated copper cage shielding. Test leads are furnished.

### 5 VTVM and VOM INSTRUMENTS

MODEL 209A

#### TRUE VACUUM TUBE

##### Laboratory Size and Accuracy

Model 209A: Contains large 9" meter with zero-center scale. Highly accurate for servicing industrial electronic equipment. DC Volts: 0-1200 in 6 ranges. AC Peak-to-Peak Voltage: 0-1200 V. in 6 ranges. Capacitance 0.1 to 10,000 MMF in 2 ranges, 0-1000 MF in 5 ranges. 50 MH to 100 henries. 0.1 ohm to 10,000 megohms in 7 ranges.

MODEL 455

#### NEW VOLT-OHM-MILLIAMMETER

##### You Can't Burn It Out!

Model 455: New design portable VOM. Includes all practical ranges. Features patented protection system which protects both the meter and associated circuits from damage due to accidental overload. Quality designed for utility and attractiveness. Neoprene carrying case available.

### HIGHLY ACCURATE DC and AC PORTABLE INSTRUMENTS

MODEL 14

Accuracy to 0.2%. Also available is a complete line of pocket portables.

### METERS

The many special movements developed by HICKOK are: electro-dynamometers, self-contained frequency meters, galvanometers, true logarithmic deflections, special curves for special purposes and ruggedized designs for highest shock tests. Full technical information on the complete line of HICKOK instruments and test equipment is available on request. Kindly list details of your requirements and ask for Catalog No. 32 and 33.

## DC POWER SUPPLIES

No Moving Parts • No Vibrating Contacts

IMMEDIATE  
DELIVERY  
FROM STOCK

Model MR532-15A

#### 2-36 VOLTS @ 15 AMPS SPECIFICATIONS

Regulation: 5-32 Volt Range: ± 1/2%  
2-5 Volt and 32-36 Volt Range: ± 2%  
AC Input: 105-125 Volts, (for 2-32 V.DC), 110-125 V, (for 32-36 V.DC), 1 phase, 60 cps (8 amps)  
Ripple: 1% rms max. (@ 36 volts and full load. Increases to 2% @ 2 volts and full load).

Remote Sensing • Vernier Control

Model M60V

#### 0-32 VOLTS @ 25 AMPS SPECIFICATIONS

Regulation: ± 1% @ 28 Volts (Regulation increases to 2% over range of 24-32 volts; does not exceed 2 volts over 4-24 volt range. Not stabilized for AC line changes.)  
AC Input: 115 Volts, 1 phase, 60 cps (12 amps).  
Ripple: 1% rms (@ 32 volts and full load—2% rms max. @ any voltage above 4 volts).

Model MR1040-30A

#### 5-40 VOLTS @ 30 AMPS SPECIFICATIONS

Regulation: ± 1% (over entire 5-40 volt range)  
AC Input: 100-130 Volts, 1 phase, 60 cps  
Ripple: 1% rms

Model 28-30 WXM

#### 24-32 VOLTS @ 30 AMPS SPECIFICATIONS

Regulation: ± 1/2%  
AC Input: 100-125 Volts, 1 phase, 60 cps (20 amps). (Unit rated for DC output of 28 volts ± 10% for 95-130 volt input.)  
Ripple: 1% rms

Model MR2432-100XA

#### 24-32 VOLTS @ 100 AMPS SPECIFICATIONS

Regulation: ± 1/2%  
AC Input: 208, 230 or 460 Volts, ± 10%, 3 phase, 60 cps (14, 12 and 6 amps respectively). 230 volt input will be supplied unless otherwise specified.  
Ripple: 1% rms

# COUNTING, TIMING, FREQUENCY MEASURING EQUIPMENT

Beckman/Berkeley Division, now in its second decade, supplies industry and science throughout the world with two hundred types of electronic counting, control and computing equipment. An organization of highly skilled and experienced engineers, designers and production workers, Berkeley is equipped to mass produce a wide range of instruments for science and industry. Techniques for the mass production and assembly of high speed counters, timers and frequency measuring equipment originated at Berkeley.

Facilities at Berkeley are by no means limited to quantity production of standard type instruments. The Engineering Department conducts research development and product design operations in four major fields of electronic interest—counting,

timing, and frequency measuring equipment, analog computers, nuclear test instruments and special products.

Naturally this stress on research and development has resulted in important electronic "firsts" at Berkeley. Some of these include:

- The first 1,000,000 count per second events-per-unit-time meter (EPUT®)
- The original electronic decade unit (DCU)
- The first direct reading time interval meter for measuring time intervals to one microsecond.
- The first console style push-button analog computer (EASE\*)
- The first direct reading frequency meter
- The first digital recorder with printed readout
- The first in-line, in-plane digital indicator
- The FERRISTOR\*, miniature vacuum tube replacement

## \* EPUT® meters

Berkeley EPUT® Meters automatically count and display the number of events that occur during a precise time interval. Events may be any physical occurrences that can be represented by changing voltages occurring either regularly or at random rates to 1,000,000 per second.

New Model 5210 100KC EPUT® Meter for industrial and field application. Light, small, portable. Simple to operate. Straightforward design and construction. Reliable. The 5200 Series use same DCUs as other Berkeley equipment.

7000 Series units may be used to measure frequency or period, and also as high speed electronic counters with manual on-off control. Model 7160 shown.

## APPLICATIONS

Precision tachometry; measurement of pressure, flow, temperature, viscosity, velocity, frequency, frequency period; process control or data reduction systems; calibration of frequency generating equipment; measurement of any electrical, mechanical, optical or other physical event occurring during a precise time interval.

BRIEF SPECIFICATIONS	Model 5210	Model 7150	Model 7151	Model 7160	Model 7161	Model 7650
Count Capacity:	4 digits	5 digits	5 digits	6 digits	6 digits	5 digits
Count Rate:	0 cps to 100 KC	0 cps to 100 KC	0 cps to 100 KC	0 cps to 1 mc	0 cps to 1 mc	0-40,000 cps
Time Bases: (decade steps)	0.1 and 1 sec	10 μsec to 1 sec	Time Interval Generator	1 μsec to 1 sec	Time Interval Generator	0.1 to 10 sec
Binary coded output to drive digital printer	optional \$30.00 extra	yes	yes	yes	yes	yes
Price:	\$475.00	\$775.00	\$1195.00	\$995.00	\$1345.00	\$1495.00

New Models 7151 and 7161 Preset EPUT® Meters feature a variable time base. Time base dividers have been replaced by preset DCUs. In addition to specifications below, these instruments feature several unique operating functions: Totalize — divides frequency between 0 and 10 KC by any number from 1 to 10,000; T1G — generates frequencies from 0.1 to 10<sup>1</sup> milliseconds.

\*T.M.

Model 7650 Long Life Magnetic EPUT® Meter performs the same function as models described above. Uses Berkeley FERRISTORS\* in all critical circuits to assure continuous-duty reliability. Ideally suited to industrial test applications such as jet and piston-engine test cells, etc. Has digital "count-down" time base for precise gating; no adjustment of time base required.

These truly universal instruments combine high-speed electronic counting with a precision time base in multi-purpose circuitry. They function as counters, timers, time-interval meters, EPUT® meters, frequency, frequency ratio or period meters, or as secondary frequency standards.

## APPLICATIONS

Counting, time interval, events-per-unit time measurements for precision tachometry, measurement of pressure, flow, frequency, velocity, viscosity, elasticity; timing relay, shutter action, etc. Measurement of unknown frequencies, frequency ratios, periods, etc.

BRIEF SPECIFICATIONS	Model 5230	Model 7350	Model 7351	Model 7360	Model 7361
Ranges-Frequency:	0 cps to 100 kc	0 cps to 100 kc	0 cps to 100 kc	0 cps to 1 mc	0 cps to 1 mc
Time Interval:	100 μsec to 10 <sup>4</sup> sec	10 μsec to 10 <sup>6</sup> sec	10 μsec to 10 <sup>2</sup> sec	1 μsec to 10 <sup>7</sup> sec	10 μsec to 10 <sup>3</sup> sec
Period:	0 cps to 10 kc	0 cps to 100 kc	0 cps to 10 kc	0 cps to 1 mc	0 cps to 10 kc
Time Bases:	0.1 and 1 sec	10 μsec to 10 sec	Time Interval Generator	1 μsec to 10 sec	Time Interval Generator
Binary coded output information for driving digital recorder	\$30.00 extra	yes	yes	yes	yes
Price:	\$575.00	\$945.00	\$1295.00	\$1245.00	\$1445.00

New Model 5230 100 kc Universal EPUT® Meter for industrial and field application. Light, small, portable. Simple to operate. Straightforward design and construction. Reliable. The 5200 Series uses same DCUs as other Berkeley equipment.

New Models 7351 and 7361 Preset Universal EPUT® Meters features are similar to Models 7150 and 7160 with variable time base feature, etc. In addition, TIM and A/B functions are offered.

Model 7360 Universal EPUT® and Timer.

## Frequency Measuring Equipment

Basic instrument is the Model 5571, capable of measuring frequencies from 0 cps to 42 mc. Addition of the Model 5580 UHF-VHF converter and suitable plug-ins extends the range to 515 mc; Model 5582B VHF converter with plug-ins extends the range to 1,005 mc. Results are displayed in direct-reading digital form. Unit will drive a Model 1452 digital printer to provide a complete frequency logging system in which results are printed on standard adding machine tape. Model 5571 is also a Universal EPUT® Meter with same specifications as Model 7360.

New Model 905 WWV receiver is most convenient, reliable method of utilizing standard time and frequency broadcasts from NBS stations WWV and WWVH. Features: covers all six WWV and WWVH frequencies, crystal controlled, separate crystal for each channel, built-in audio filters. Price: \$525.00 (Rack) \$550.00 (Cabinet).

Model 5571 with 5580 converter and 5580 series plug-ins for frequencies to 515 mc. Model 5571 price, \$1825. Model 5580 converter, \$300.00. 5581 series plug-ins, \$125.00 to \$175.00 each. All are FCC-approved. Model 5571 shown.

Complete frequency logging system for frequencies to 1,000 mc. Model 5571 (with 5582B converter and plug-ins), drives Model 1452 digital printer to record results automatically on adding machine tape, 905 WWV receiver.

## \* Time Interval Meters

Any event delineated by varying voltages may be timed. All models may be standardized against WWV or other external standards. Provisions are also made to measure period of input signals, use as a high-speed electronic counter, or frequency ratio meter.

## APPLICATIONS

Timing of relays, shutters, solenoids, controls; ballistics research; measurement of viscosity, elasticity, velocity; accurate low frequency and period measurements, frequency ratio measurements, etc.

BRIEF SPECIFICATIONS	Model 5220	Model 7250	Model 7260
Range:	100 $\mu$ sec to 1 sec	10 $\mu$ sec to 1 sec	1 $\mu$ sec to 1 sec
Accuracy:	$\pm$ 100 $\mu$ sec $\pm$ 1 part in 10 <sup>4</sup>	$\pm$ 10 $\mu$ sec, $\pm$ 1 part in 10 <sup>5</sup>	$\pm$ 1 $\mu$ sec, $\pm$ 1 part in 10 <sup>6</sup>
Input Requirements:	0.25v rms, 1 megohm dc-coupled.	0.1v rms, 10 megohms, ac or dc-coupled.	
Display Time:	Adjustable .05 to 5 sec.	Adjustable, 0.1 to 10 seconds (automatic reset). Manual reset also provided.	
Binary-coded output to drive Digital Printer	Optional \$30.00 extra	yes	yes
Price: (f.o.b. Factory)	\$475.00	\$595.00	\$830.00

New Model 5220 100  $\mu$ sec to 1 sec time interval meter for industrial and field applications.

Model 7250 Berkeley Time Interval Meters provide a direct digital reading of elapsed time between any two events, or the duration of a single event, in micro-second (Model 7260) or 10-microsecond increments.

## \* Electronic Counters

BRIEF SPECIFICATIONS	Model 5001	Model 5010	Model 7050	Model 7060
Counting Rate:	0-125 cps	0-10,000 cps	0-100KC	0-1 mc
Sensitivity:	0.5 volts peak	0.5 volts peak	0.1 volts rms.	0.1 volts rms
Binary coded output to drive Digital Printer	no	no	yes	yes
Price:	\$195.00	\$330.00	\$545.00	\$645.00

Model 5001 (125 cps) industrial type electronic counter for use where speed requirements are in excess of the limitations on mechanical registers (10 cps).

The Berkeley Industrial Counter, Model 5010 (10 KC), is a highspeed electronic counting instrument designed to fill general counting needs, where speed requirements are greatly in excess of those possible with mechanical counters.

New Models 7050 (100 kc) and 7060 (1mc) gating counters offer both manual and electronic gating. Gate control signals may be of any frequency from d-c to maximum counting rate of the instrument with no input waveform restrictions. For use as frequency ratio meters, digital flow computers, slave EPUT® or time interval meters, high speed counters. Shown Model 7060.

## Preset Counter-Controllers

Counts at rates to 40,000 cps, yields output signals at any desired preset total (or any two preset counts with dual preset models). Operates on input pulse of  $\pm 1$  volt peak, or more. Instantaneous reset to zero after final count. Reliable, simple to operate. Available in 2, 3, 4, 5, and 6-digit capacities. Long-life magnetic Model 5840 dual preset features FERRISTOR\* circuitry for continuous-duty reliability. Typical applications: coil winding, automatic packaging, sorting to length, motor speed control.

Series 5840 long-life magnetic dual preset counter features FERRISTOR\* circuitry; 4-digit, \$1115.00; 5-digit, \$1200.00; 6-digit, \$1295.00.

Series 5420 single preset models range in price from \$435.00 for 2-digit capacity to \$740.00 for 6-digit capacity. Dual preset Series 5440 range from \$650.00 (2-digit) to \$895.00 (6-digit).

## Nuclear Scalers

Berkeley's long experience in counting techniques has been carried over to the nuclear field to produce a line of high quality scalars. Model 2025, basically a gated decimal counter, will count, store and record any phenomena occurring in a random fashion. It features automatic reset and start, uses DCUs instead of mechanical registers, and is designed for use with an electronic timer (Model 811) for increased accuracy.

BRIEF SPECIFICATIONS	
Model 2025	
Input:	Pulse Height discriminator with range +5 to +50 volts
Scaling Circuit:	Paired Pulse Resolution: Better than 1 $\mu$ sec
Integral Amplifiers:	Input Sensitivity: 1 millivolt $\pm$ 20%
Controls:	Preset Count Selector — 100 to 4 million in 1-2-4 steps
Price:	\$950

BRIEF SPECIFICATIONS	
Model 2101	
Input Sensitivity:	0.25 volts
Resolving Time:	5 $\mu$ seconds
Reset:	Reset of register and counting units by single lever
Timer:	Indicates and times automatically to closest second up to 60 min. Accuracy $\pm$ 0.2 sec
Price:	\$595.00

This scalar weighs only 24 pounds and offers maximum convenience for laboratory work and medical diagnosis. Can be used directly with G-M tubes and scintillation counters. Extremely reliable and simple to operate.

## Digital Recorders, Inline Readouts & Transducers

MODEL 1452 DIGITAL PRINTER. Automatically and permanently records information from any Berkeley 5510, 5571 or 7000 Series instrument, prints data in digital form on standard adding machine tape from printer and scanner in one compact unit. May be modified to print "Time" or "Code" information simultaneously with data. Rack or bench mounted; available in up to 8 digits. One printout every 0.85 seconds. Price (6-digit), \$950.00.

MODEL 5916 IN-LINE READOUT. Large, illuminated in-line IN-PLANE figures reduce fatigue and error. Ideal for remote observation of data. Connects directly to any Berkeley 5510, 5571 or 7000 Series instrument. Presentation rate up to 15 per second; accepts binary voltages. Price \$775.00.

TRANSDUCERS. A large number of transducers especially designed for use with Berkeley counting, timing, and frequency measuring equipment are available. These include tachometer, pickups, photocells, and light sources. Specifications and technical description on request.

## SPECIAL AND GENERAL PURPOSE TEST INSTRUMENTS

### \* Expanded Scale Voltmeter

Model 101R Rack Mount.

Model 101-50 expanded scale voltmeter. Featuring:  $\pm 0.25\%$  accuracy, true rms reading, easy to read expanded scale, direct connection for 1 MA recorder.  
 Brief Specifications: Accuracy— $\pm 0.25\%$  of input voltage; Voltage Indicated—True rms; Voltage Range—100-500 (50-250v); Frequency Range—50-2,000 cps; Scale Range—12v ( $\delta v$ ); Price: \$360.00 (rack mounted \$400.00).

### \* Expanded Scale Frequency Meter

Expanded Scale Frequency Meters are designed for fast accurate monitoring of frequencies near 400 cps. They were originally intended for use in making production inspection measurements of the frequency regulation of motor and engine driven generating units, but many other applications where a record of frequency is desired have been found.

The Model 404 expanded scale frequency meter features Accuracy of  $\pm 1/2$  cycle, 1 MA Recorder Connection Provided; Expanded Scale for easy, error-free reading.  
 Brief Specifications: Base Frequency—400 cps; Span— $\pm 25$  cycles; Accuracy— $\pm 1/2$  cycle; Price—\$330.00 (rack mount \$380.00).

The Model 100 Transformation Ratio Meter is an RMS reading expanded scale voltmeter designed to read the primary and secondary voltages of synchros faster and easier than by conventional methods. The method of operation is ideally suited for production testing as well as for inspection of synchros and control transformers.  
 Features:  $\pm 0.2\%$  Accuracy; RMS Reading; Expanded Scale; Read Directly in % Deviation; Simple To Operate For Rapid Production Checks. Price \$400.00.

### \* Wide Range Resistance Bridge

The Model 605 wide range resistance bridge provides a means for rapidly and easily checking resistances to a high degree of accuracy. Seven ranges for full scale resistance values are selectable by front panel push button switches. Features: 5 ohms to 100 megohms, push button operation, high accuracy, negligible drift.

Brief Specifications: Resistance Scales—100, 1K, 10K, 100K, 1M, 10M, 100M, Full Scale; Accuracy— $\pm 1.15\%$  of resistance measured + .05% Full Scale; Drift—Negligible after 30 minute warm-up; Batteries—1-45 Volt, 2-7 1/2 Volt; Price—\$170.00.

### \* Berkeley Double Pulse Generators

Model 4904 Double Pulse Generator

BRIEF SPECIFICATIONS	Model 903	Model 4904
Pulse Width:	0.15 to 1.8 $\mu$ sec	0.3 to 10 $\mu$ sec
Rise Time:	0.035 $\mu$ sec	0.08 $\mu$ sec
Decay Time:	0.15 $\mu$ sec	0.26 $\mu$ sec
Pulse Spacing:	0 to 10 $\mu$ sec. Single control	0 to 100 $\mu$ sec. Coarse and fine adjustments
Price:	\$498.00	\$645.00

Produce paired or single pulses. Pulse amplitude, width, polarity, repetition rate and pulse-to-pulse spacing are independently adjustable. Outputs may be mixed internally or externally. Model 903 can be driven externally by pulses; Model 4904 by pulses or sine wave generators.

#### APPLICATIONS

Measurement of paired pulse resolution time of counting circuits. Measurement of rise time, decay time and transient response of pulse forming circuits, electronic switches, gates and wide band amplifiers. Calibration of input sensitivity of counting instruments. Frequency calibration of counting rate meters. Measurements of overload characteristics and dynamic range of pulse amplifiers. Delayed coincidence work.

**New EASE\* 1100 Series Analog Computers** \*

The 1100 Series introduces a digital output-input translator system (DO/IT) that uses punched tape to set up and check problems, taking much of the human element out of computing and saving hours of operating time. Other new features include automatic static or dynamic problem checking, complete pushbutton monitoring system, and a fully shielded, color-coded patch board. Patch bay capacity 2188 to 3,600 terminals.

A typical setup would include:

- ★ 100 dc amplifiers
- ★ 16 servos
- ★ 300 DO/IT controlled attenuators
- ★ 30 electronic multipliers
- ★ 250 spare terminals
- ★ Required number of trunk lines and terminals for limiters, biases, etc.

Computing resistors are maintained at an accuracy of better than .005% in a temperature controlled oven. Long-term accuracy of capacitors exceeds .05%. New servo-set potentiometer system permits adjustment of 50K Helipot precision potentiometers to an accuracy of better than 0.01% in less than 3 seconds average time.

**EASE\* Precision Components for Control Systems** \*

**Model 1191 General Purpose Servo Multiplier**

Up to five variables are multiplied by a sixth in the Model 1191 Servo Multiplier. One, two, or three of the five computing potentiometers can be supplied as sine-cosine resolvers. Amplifiers are removeable for ease of maintenance. The front panel contains servo gain and damping controls, as well as servo error light and a shaft position indicator.

No dither is employed, thus minimizing potentiometer wear. Selection of internal or external feedback reference is made through a relay. Servo Multipliers can also be supplied with such special features as a synchro or one extra potentiometer mounted on the potentiometer shaft, additional taps up to 33 total per potentiometer, and various non-linear resolvers.

**Model 1048B DC Amplifier**

This new version of the Model 1048 amplifier, which has become a standard component for industry, features higher out-put current (better than 20 ma) and premium tubes with redesigned circuits for increased tube life.

\*T.M.

### Model 1157 High Accuracy Electronic Multiplier

Features .02% static accuracy on each of two independent products. Its chopper-stabilized amplifiers are available as inverters and its operation is switched by relay from multiplication to division. Two ranges are available—high accuracy, with a 10KC carrier, and wide band, with a 40KC carrier. This extends the usefulness of the multiplier well beyond the limitations imposed by a single compromise frequency carrier.

Specifications on other 1100 Series components and technical data on the complete computer are available on request. Prices on computer systems may be obtained by writing Sales Manager, Computer, Berkeley Division of Beckman Instruments, Inc., Richmond 3, California.

## \* Customer Services From Beckman/Berkeley

Technical information on all instruments and applications data will gladly be supplied on request. There is no charge or obligation for this service. All literature is prepared by a staff of technical writers who work closely with Berkeley research and applications engineers. Recent literature includes:

**Data File 110—FERRISTORS\*, Their Use and Application**  
**Data File 111—How to Make Frequency Measurements**  
**Data File 112—How to Make Time Interval Measurements**  
**Data File 10—How to Make WWV Measurements**  
**Data File 123—Analog Computer Solutions for Feedback Control Systems**

## \* Beckman/Berkeley Representatives

Berkeley's world-wide staff of factory trained engineering representatives work closely with our sales office and the customer. They help the customer set up newly-purchased equipment, acquaint personnel with its operation and application, and make sure that it stays

in operating order. The representative's job is not completed until he has "followed-up" to insure that the customer receives maximum use from his instruments. These men will be glad to give you personal assistance at any time. A list of Berkeley representatives follows.

Creative papers from the mills of **MOSINEE**

Because they can be custom-designed with uniform, predictable resin absorbency, Mosinee papers permit careful control of resin impregnation processes. This quality minimizes machine adjustments, keeps production costs low, assures product effectiveness.

In the electronics industry...

# low-cost papers replace expensive traditional materials

Offering a combination of economy and versatility, Mosinee creative papers are proving their worth throughout industry. These special sulphate papers are being used where paper was never before even considered. And they're performing as well or better than the more costly materials previously used.

With scientifically controlled processes, Mosinee can produce papers possessing an amazing variety of chemical and physical properties including high dielectric strength . . . mold, flame, water and corrosion resistance . . . resin holdout or absorbency. Especially important, Mosinee can quantity-produce these papers with dependable uniformity.

## HERE ARE 6 GOOD REASONS FOR CALLING ON MOSINEE FOR YOUR SPECIAL SULPHATE PAPERS:

1. A proven record for creating outstanding custom-tailored papers
2. Extensive research facilities
3. Specially developed quality controls
4. Nearly 50 years of experience
5. Technical consultants in your area
6. Flexible production capacity

Chances are Mosinee may already have answers to fabricating, processing or packaging problems you are now working on! Mail the coupon below for more complete details.

# Superior makes the parts

New tapered hole aperture mask—an actual photograph at 18X magnification.

## NEW, TAPERED HOLE APERTURE MASKS<sup>1</sup>

... for sharper, truer color TV

Here's a way to reduce beam diffusion, minimize false color and get better color TV pictures—in your present-design picture tubes.

Ideally, an aperture mask should have zero thickness. Electrons impinge on the walls of

Standard disc cathodes. (EDI-2) Most widely used cathodes in TV, radar test equipment, computer storage tubes and special beam type tubes.

Narrow neck disc cathodes. For 110° cathode ray tubes (EDI-5). Make possible shorter, narrower neck tubes and wider beam deflection angle. In growing use for portable TV.

Miniature disc cathodes. (EDI-6 and EDI-7) Save up to 50% heater power. Ideal for tri-gun color TV tubes. Make possible use of smaller deflection yokes and smaller cabinets.

## DISC CATHODES

... three types, to cover all applications

In all Superior Tube disc cathodes, the critical "E" dimension (distance from top of ceramic to top of emission cap) is guaranteed accurate within  $\pm .0005$ ". Hence makers of TV picture tubes and other cathode ray tubes can save the time and cost of compensating for "E" dimension

## THE CATHALOYS<sup>2</sup>

... cathode alloys free from sublimation and interface impedance

When ordering or seeking information please mention Electronics Buyers' Guide.

The Cathalloys are not only the world's most versatile cathode alloys, but they offer advantages not available in any other: high strength, high activity, or a combination of both plus low sublimation and freedom from interface impedance. In addition, they give electron tube manufacturers the assurance that they can produce tubes with new uniformity in performance characteristics. Even before being approved for production, each heat of a Cathaloy metal must be tested in an electron tube.

Of the five Cathalloys developed so far, A-32, the all-around active alloy and P-50, the all-around passive alloy, fill the vast majority of applications requirements. The others offer special advantages in countless applications. Principal characteristics are as follows:

# that make electron tubes better

cylindrical holes, and are deflected out of the narrow beam. Instead of striking a single dot, they sometimes strike adjacent color dots. The result is a hazy picture or false color. But with these new Superior Tube tapered-hole aperture masks, beam diffusion is practically eliminated. The walls of the tapered holes lie outside the path of beam electrons—even at the extreme edges of the picture. The electrons see only the holes.

See how electron beam passes through hole without diffusion. There are nearly 500,000 of these holes in each mask—all controlled to close tolerance.

Notice how old cylindrical hole aperture mask can diffuse electron beam. Electrons striking aperture walls are scattered over several dots.

variations on the assembly line. Because of this close dimensional control, cathodes can be used universally in different tubes and are interchangeable with each other during electron gun assembly. Both manufacturing efficiency and quality control can be significantly improved.

In addition, Superior Tube precision disc cathodes offer these four important advantages:

1. *Separate cap alloy.* Permits the choice and use of best alloys for both cap and shank in varying applications.
2. *Slight flare of shank opening.* Easier insertion of heater. Less abrasion of heater coating during normal expansion and contraction.
3. *Shadow groove in ceramic.* Inhibits electrical leakage between cathode and No. 1 grid.
4. *Chemically clean shank interior.* Minimizes heater-cathode leakage.

**Cathaloy A-32.**<sup>3</sup> Suitable for active alloy applications. Can be used for ruggedized tubes. Contains tungsten. Approximately 50% stronger than tungsten-free alloys.

**Cathaloy P-50.** Suitable for applications requiring a passive alloy. Available in Weldrawn<sup>2</sup> tubing. The only alloy commercially available in Weldrawn as well as in Lockseam.<sup>4</sup>

**Cathaloy A-31.** Specially designed for extreme stress applications. Contains 4% tungsten. Approximately twice as strong at high temperatures as tungsten-free alloys.

**Cathaloy A-30.** An active alloy. Versatile, yet not as strong as A-32. A good material for entertainment-type tubes.

**Cathaloy P-51.** 100% stronger than Cathaloy P-50. Ideal for ruggedized tubes. Available in seamless, Weldrawn and Lockseam forms.

## SPECIAL ALLOYS

Superior Tube is equipped also with melting facilities to supply on special order cathodes made from other alloys of specified composition. If you have a need for such cathodes, write for detailed information on this extra Superior Tube service.

## SEND FOR NEW COMPLETE CATALOG

Superior Tube's new Catalog 51—recently revised and supplemented with the most up-to-the-minute facts on cathodes, disc cathodes, tubular parts and glass sealing alloys. Gives standard cathode dimensions and tolerances, complete chemical and physical data on materials. Tells how to order. Write Superior Tube Company, 2504 Germantown Ave., Norristown, Pa.

## DEEP-DRAWN PARTS

Parts made by drawing the metal into the desired shape. These parts include cups, eyelets, rings, flanges and grommets.

# Precision Metal Stampings

*Untrimmed or trimmed, depending on available tooling.*

## TOOLING ON HAND FOR ROUND CUPS IN THESE SIZES

Save cost. Johnson & Hoffman can make round cups in these sizes from existing tooling, saving you the high cost of special dies. A small tooling charge may be necessary to accommodate different end shapes. These parts are available in low carbon steel, stainless steel, glass sealing alloys, nickel, aluminum, brass and titanium. When ordering, please specify material, wall thickness, diameter, length, and shape of open end.

## STAMPINGS

Parts made of flat strip which is bent or curved to the shape desired or cut to a particular shape. These machines can also perform embossing or drawing operations within certain limits.

## MICRO-MINIATURE PARTS

A typical example is this group of parts made for use in the new General Electric 6BY4 ceramic electron tube.\* These parts, with a maximum diameter of only 1/4 in., are held within .0005 in. tolerance.

\*Reproduced by permission of General Electric Co., Electronic Components Division.

# at Low Cost

**Johnson & Hoffman ingenuity can save you money while insuring product quality**

The ability of Johnson & Hoffman to make precision metal stampings and deep-drawn parts at low cost is a result of its emphasis on creative engineering . . . ingenious design and tooling . . . combining two parts into one . . . or reducing the number of operations required to produce a given part.

Whatever your requirements, look to Johnson & Hoffman as your fast, reliable source of supply. We have an extensive line of standard designs and are equipped to develop new tooling for special parts you may need.

### MATERIALS

Titanium, molybdenum, tungsten, stainless steel, brass, carbon steel, copper, aluminum, Berylco,\* phosphor bronze, Inconel,† HC-4, 52 alloy, Kovar,‡ nickel silver, silver, Rodar.§

### FINISHES

Electropolished, tumbled, plated.

### SIZE LIMITATIONS

Johnson & Hoffman has facilities to produce a wide variety of parts to exacting close tolerances. Deep-drawn parts, for example, can be supplied from strip metals from .003 to .060 in. thick in sizes up to

2.75 in. OD and 3.75 in. in depth. These include plain or contoured cups, pierced or closed. Materials of other thicknesses can be used, depending on the contour of the part and the particular material. There is virtually no limit to the variety of stampings that can be produced. Complete information on these parts, plus micro-miniature parts, can be supplied on request.

### WRITE FOR ESTIMATE

If you currently buy precision stampings or deep-drawn parts, ask Johnson & Hoffman for an estimate. Find out just how much you can save, while maintaining or possibly improving your product quality.

# TUNE IN ON RADIO CONDENSER

## For Variable Capacitors Tuners Electromechanical Assemblies

The experience of Radio Condenser in producing tuners and variable capacitors to individual requirements has consistently proved its value to manufacturers through the right combination of quality and cost. However unusual a problem may be, chances are that R/C specialists have faced a similar problem and solved it.

The products shown on this page are only a brief sampling of units designed, engineered, and manufactured by Radio Condenser. A more complete description of products in each category is given in our catalog, available on request. Or, we will be happy to arrange a direct interview with a Radio Condenser Engineer at your convenience.

### STANDARD HOME RADIO TYPE CAPACITORS

R/C units cover every standard application, including AM-FM receivers. Each is a product of high quality, performance-proved, and well adapted to rapid, low cost quantity production.

### CAPACITORS FOR LIMITED SPACE

Among the most recently announced R/C developments is a miniature variable capacitor for transistorized radio receivers, also adaptable to color TV phasing control. R/C accomplished important reductions in size with no sacrifice of stability or calibration accuracy.

### MINIATURE AIR TRIMMER CAPACITORS

For every type of electronic equipment—printed wiring board or conventional chassis—Radio Condenser miniature trimmers permit more circuit in less space. All are equipped with plug-in tabs as well as two holes for screw mounting. Ruggedly constructed, the tiny trimmers also have excellent insulation resistance, "Q", and thermal stability.

### AUTOMOTIVE RADIO TUNERS

Approximately one-third of all American automobiles are equipped with R/C tuners. Because every automobile radio tuner is an individual case, R/C custom manufacturing experience is an important asset to the radio manufacturer in this specialized field.

### STANDARD CAPACITORS FOR SPECIAL APPLICATIONS

Always an important part of R/C activities, design and manufacture of variable capacitors of a special nature are handled by a special division. Products include units for every type of military service, test equipment, etc.

### LOW COST MAGNETIC CLUTCHES

Originally designed by R/C to meet the rigid price-performance requirements of the automotive industry. Replace cumbersome mechanical assemblies to save space . . . cut costs . . . eliminate costly production steps. Two basic designs can be modified to meet individual volume requirements.

C-1581, C-1581M	125-325 VDC	0-1500 MA
C-1582, C-1582M	325-525 VDC	0-1500 MA

<sup>1</sup>Voltage range for each model is completely covered in four continuously variable bands as follows:

Models	Voltage Bands
C-280, 480, 880, 1580	0-50, 50-100, 100-150, 150-200
C-281, 481, 881, 1581	125-175, 175-225, 225-275, 275-325
C-282, 482, 882, 1582	325-375, 375-425, 425-475, 475-525

<sup>2</sup>Current rating applies over entire voltage range.

Regulation (line) ..... Better than 0.15% or 0.3 Volt (whichever is greater). For input variations from 105-125 VAC.

Regulation (load) ..... Better than 0.25% or 0.5 Volt (whichever is greater). For load variations from 0 to full load.

Transient Response (line) ..... Output voltage is constant within regulation specifications for step-function line voltage change of plus (+) 10 volts or minus (-) 10 volts rms within the limits of 105-125 VAC.

Transient Response (load) ..... Output voltage is constant within regulation specifications for step-function load change from 0 to full load or full load to 0.

Internal Impedance .....  
 C-200 Series ..... Less than 6 ohms.  
 C-400 Series ..... Less than 3 ohms.  
 C-800 Series ..... Less than 1.5 ohms.  
 C-1500 Series ..... Less than 0.75 ohms.

Ripple and Noise ..... Less than 3 millivolts rms.

Polarity ..... Either positive or negative may be grounded.

AMBIENT TEMPERATURE AND DUTY CYCLE ..... Continuous duty at full load up to 50°C (122°F) ambient.

### AC OUTPUT

(unregulated) ..... 6.5 VAC (at 115 VAC Input).<sup>3</sup>  
 C-200 Series ..... 10 AMP.  
 C-400 Series ..... 15 AMP.  
 C-800 Series ..... 20 AMP.  
 C-1500 Series ..... 30 AMP.

<sup>3</sup>Allows for voltage drop in connecting leads. Isolated and ungrounded.

AC INPUT ..... 105-125 VAC, 50-400 CPS

Models	Input Power <sup>4</sup>	Output Power
C-280	300 Watts	C-880 670 Watts
C-281	330 Watts	C-881 850 Watts
C-282	390 Watts	C-882 1070 Watts
C-480	410 Watts	C-1580 1180 Watts
C-481	480 Watts	C-1581 1420 Watts
C-482	595 Watts	C-1582 1850 Watts

<sup>4</sup>With all outputs loaded to full ratings and input at 125 VAC.

### OVERLOAD PROTECTION:

External Overload Protection ..... AC and DC fuses, front panel, with built-in blown-fuse indicators.

Internal Failure Protection ..... Fuse, rear of chassis.

### INPUT AND OUTPUT CONNECTIONS

..... Heavy duty barrier terminal block, rear of chassis. 8 foot heavy duty rubber covered line cord with integral molded plug, also supplied.

### METERS:

Output Voltage ..... 3 1/2" rectangular voltmeter on metered models.

Output Current ..... 3 1/2" rectangular milliammeter on metered models.

### CONTROLS:

DC Output Controls ..... Band-switches and screw-driver adjusting vernier-control, rear of chassis.

AC and DC Switches ..... Front panel.

VOLTAGE REFERENCE ..... A stable 5651 reference tube is used to obtain superior long-time voltage stability.

### PHYSICAL DATA:

Mounting ..... Standard 19" rack mounting.

#### Size:

C-200 Series	..... 5 1/4" H x 19" W x 14 3/8" D.
C-400 Series	..... 5 1/4" H x 19" W x 14 3/8" D.
C-800 Series	..... 7" H x 19" W x 14 3/8" D.
C-1500 Series	..... 8 3/4" H x 19" W x 14 3/8" D.

#### Weight:

C-200 Series	..... 53 lb. Net 80 lb. Shipping Wt.
C-400 Series	..... 53 lb. Net 80 lb. Shipping Wt.
C-800 Series	..... 84 lb. Net 100 lb. Shipping Wt.
C-1500 Series	..... 120 lb. Net 140 lb. Shipping Wt.

Panel Finish ..... Black ripple enamel (standard). Special finishes available to customers' specifications at moderate surcharge.

- \* LESS PANEL SPACE
- \* IMPROVED PERFORMANCE
- \* LONG, TROUBLE-FREE SERVICE

Lambda's COM-PAK series wins immediate and enthusiastic acceptance. Engineers welcome advanced thermal, mechanical design; praise economy of panel space.

The new COM-PAK models fill the need for compact, regulated DC power supply units. You'll find their economy of panel space matched by their functional simplicity. You'll appreciate their quick-service features. All wiring, tubes and other components are readily accessible. You can reach them easily, service them fast.

All COM-PAK models are made with hermetically-

sealed transformers, chokes and capacitors. The 400 MA, 800 MA and 1.5 ampere models include new, high-efficiency, long-life, hermetically-sealed semi-conductor rectifiers.

Demand for COM-PAK power supplies is the greatest in our history. Place your order now for a better priority in shipment.

## ONLY THE NEW COM-PAK SERIES INCLUDES ALL 31 OF THESE IMPORTANT DESIGN AND PERFORMANCE FEATURES

## FAST IN-RACK SERVICING

Quick rear access to tubes and controls.

Rear panel swings open for servicing.

# MINIATURE INSTRUMENT BALL BEARINGS

## STANDARD RETAINER BEARINGS

FIG. 1

FIG. 3

FIG. 4

**NOTES**

\*RADIUS shown is maximum size of shaft or housing fillet that bearing will clear.  
 TOLERANCES shown are ABEC 5 or better.  
 Bearings can also be supplied to ABEC 7. The tolerance on width is for individual rings only.  
 MATERIAL is Type 440 C stainless steel. Unshielded bearings (Figures 1 and 2 only) can be supplied in SAE 52100 chrome steel at same prices.  
 LOAD CALCULATIONS — Use C Rating and nomograph in our catalog. For chrome steel (Figures 1 and 2 only) multiply C by 1.2.  
 WIDTHS shown have been accepted as standard by the AFBMA for SINGLE or DOUBLE shields.

**HOW TO ORDER**

Use bearing numbers shown. \*\*For single shield (Figures 3 and 4) use the following suffixes instead of PP:  
 Figure 3, suffix P1 — Shield on flanged side.  
 Figure 4, suffix P2 — Shield on side opposite flange.  
 In all cases, the following should be specified:  
 1. Radial Play (see our catalog).  
 2. Lubrication (see our catalog).  
 The following should be specified only if they are essential to the application:  
 3. Coding (see our catalog).  
 4. ABEC 7 tolerances (see our catalog).  
 5. Other special specifications should be checked with the Plant before ordering.

**TYPE 2PF10**  
INPUT: 120 volts, 60 cycle, 1 phase. OUTPUT: 0-132 volts, 1.0 amperes, .132 KVA

# POWER

## VARIABLE TRANSFORMERS

**Standard types meet the most unusual conditions**

The most extensive line of variable transformers is POWERSTAT. And now a complete standard line of POWERSTATS for high frequency use is offered in addition to the innumerable standard air-cooled types for manually-operated or motor-driven duty . . . oil-cooled models . . . and explosion-proof units. You'll find 120, 240 and 480 volt, single phase and 3-phase models. They all provide excellent regulation with high efficiency. Their conservative ratings and rugged construction assure precise plus long, dependable service. Look to POWERSTAT for the complete line of variable transformers of the highest quality.

**TYPE 136**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-120/140 volts, 20.0 amperes, 2.8 KVA. Exposed Terminal Connections.

**TYPE 0-1126**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 30 amperes, 4.2 KVA. For Oil-Cooled Operation.

**TYPE X-1126**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 12 amp., 1.7 KVA. Explosion-Proof for Hazardous Locations.

**TYPE 10-1002**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-120 volt, 1.25 amp., .15 KVA. Complete Rotation.

**TYPE 2106LC**  
INPUT: 95-135 volts, 50/60 cycle, 1 phase. OUTPUT: 115 volts, 52 amperes, 6.0 KVA. Limited Output Range or a Line Corrector.

### New, Standard Line for HIGH FREQUENCY Applications

One-third the weight . . . one-half the size of 60 cycle units, these POWERSTATS are ideal for ship, aircraft, guided missile and other 400/800 cycle applications. Here are some of the new models. There are many others. We will be glad to develop special units to meet your special needs.

#### HS SERIES

For 400/800 cycle, single phase use. Units for 28 and 120 volt service. The 120 volt types can be connected for 0-120 or 0-140 volts output. Reduced voltage types have a double winding and operate from 120 volts to deliver an output of 0-28 volts. A fixed tap provides a non-adjustable 28 volt supply.

Precision products of

**TYPE 20**  
INPUT: 120 volts, 60 cycle, 1 phase. OUTPUT: 0-120/140 volts, 3.0 amperes, .42 KVA for Back-of-Panel.

**TYPE 116U**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-120/140 volts, 7.5 amperes, 1 KVA for Back-of-Panel.

**TYPE 116**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 7.5 amp., 1 KVA. Enclosed with Cord-Plug, Receptacle, Fuse, Switch.

**TYPE 3PN116**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 7.5 amperes, 1 KVA. Third Wire Grounded.

# STAT<sup>®</sup>

**TYPE 2PF136**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-120/140 volts, 20.0 amperes, 2.8 KVA. With Cord-Plug, Fuse, Receptacle.

**TYPE LW136 (and LW136-3)**  
Double wound assembly with isolated secondary. One phase 120 or 240 volt input. Three uses: (1) One phase 120 or 240 volt input; 3-phase 240 or 480 volt input; low voltage isolated output. (2) 120 or 240 volt 1-phase, or 240 or 480 volt 3-phase line corrector. (3) 120 or 240 volt, 1-phase, or 240 or 480 volt, 3-phase limited range "buck-boost" variable transformer.

**TYPE 15M136-3Y**  
INPUT: 240 volts, 60 cycle, 3 phase. OUTPUT: 0-240/280 volts, 20 amperes, 9.7 KVA. Motor-Driven for Remote Control.

**TYPE MW1156-6Y**  
INPUT: 240 volts, 60 cycle, 3 phase. OUTPUT: 0-280 volts, 90 amperes, 43.6 KVA. Motor-Driven for Easy Operation.

**TYPE 1126-1001**  
INPUT: 115 volts, 400/800 cycle, 1 phase. OUTPUT: 0-130 volts, 15 amperes, 1.95 KVA. With a Dust-Proof Container.

**TYPE 1156**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 45 amperes, 6.3 KVA. For Heavy Duty.

**TYPE MZ1156**  
INPUT: 120 volts, 50/60 cycle, 1 phase. OUTPUT: 0-140 volts, 45 amperes, 6.3 KVA. Motor-Driven for Remote Control.

## HM SERIES

For 400/800 cycle, single and 3-phase use. Units for 120 and 240 volts, 1-phase . . . 240 and 480 volts 3-phase service. All units with terminal connections to provide output voltages limited to input voltages . . . or output voltages above input voltages.

## HL SERIES

For 400/800 cycle, single and 3-phase use. Manually-operated and motor-driven models. Units for 120 and 240 volt service. Three phase models are wye connected to operate from 240 or 480 volt lines. Input terminals provide choice equal to or 17% higher than line voltage.

## Automatic VOLTAGE REGULATORS

MODELS OF  
EACH TYPE  
FOR HIGH  
FREQUENCY  
APPLICATIONS

Have you a *special* voltage regulation requirement? Chances are it can be handled by a *standard* STABILINE. Look at the range of characteristics shown here. STABILINES maintain a constant output voltage regardless of line or load changes. Type IE is completely electronic without moving parts; Type EM corrects faster than most regulators and maintains constant voltage to large loads without waveform distortion; Type TM is without tubes, transistors, or moving parts.

OTHER  
STANDARD TYPES  
TO FULFILL  
THE MOST  
EXACTING  
REQUIREMENTS

### Temperature Limited DIODE type 1236C

characteristics

	AVERAGE	MAXIMUM
CATHODE (Tungsten)		
VOLTAGE	1.9 v/pts a-c or d-c	2.6 volts a-c or d-c
CURRENT	440 MA	520 MA
PLATE		
VOLTAGE	600 volts d-c	700 volts d-c
CURRENT	0.7 MA d-c	1.0 MA d-c

Applications:  
RMS detector for differential volt  
meters  
RMS detector for a-c voltage and  
current stabilizers  
Detector for d-c voltage and  
current stabilizers

### TYPE IE51002

INPUT: 95-135 volts, 60 cycle, 1 phase.  
OUTPUT: 115 volts, 2.2 amperes, .25 KVA.  
Completely Electronic, Portable with Cord-  
Plug, Receptacle.

### TYPE EMD4208

Two Type EM units with *individual* control and power circuits in one cabinet. One phase, 2 or 3 wire, 120 or 240/120 volt, 45-66 cycle service. Output from 2.1 to 8.4 KVA depending on input connections.

### TYPE EMD4208S

Same as Type EMD4208 except with *common* control . . . added 240 volt service . . . and output from 4.2 to 16.8 KVA depending on input connections.

Precision products of

**TYPE IE5101R**  
 INPUT: 95-135 volts, 60 cycle, 1 phase. OUTPUT: 115 volts, 8.5 amperes, 1.0 KVA. Instantaneous Electronic. No Moving Parts.

**TYPE EM4102R**  
 INPUT: 95-135 volts, 50/60 cycle, 1 phase. OUTPUT: 115 volts, 17.5 amperes, 2.0 KVA. Electro-Mechanical with zero waveform distortion.

**TYPE TM7101R**  
 INPUT: 95-135 volts, 60 cycle, 1 phase. OUTPUT: 115 volts, 1.0 KVA. Tubeless Magnetic without Transistors, Tubes or Moving Parts. TYPE TM7105 the same characteristics except 5.0 KVA output.

# LINE<sup>®</sup>

**TYPE IEH5101**  
 INPUT: 95-130 volts, 1 phase, 400 cycle. OUTPUT: 115 volts, 1.0 KVA.

**TYPE EM10009**  
 INPUT: 187-229 volts, 3 phase, 400 cycle. OUTPUT: 208 volts, 5.0 KVA.

**TYPE TMH7101**  
 INPUT: 95-130 volts, 1 phase, 400 cycle. OUTPUT: 115 volts, 1.0 KVA.

**TYPE EM64100Y**  
 INPUT: 420-500 volts, 50/60 cycle, 3 phase. OUTPUT: 460 volts, 131 amperes, 100 KVA. Electro-Mechanical for Large Industrial Loads.

**TYPE EM10002**  
 INPUT: 105-135 volts per phase, 55/65 cycle, 3 phase. OUTPUT: 120 volts, 55.5 amperes, 20 KVA. Electro-Mechanical Meets MIL-E-4158.

**TYPE EM10006**  
 INPUT: 385-490 volts, 45/65 cycle, 1 phase. OUTPUT: 440 volts, 2.2 KVA. Electro-Mechanical Meets U. S. Navy Specifications 16-E-4 and 40-T-9.

**TYPE EM10004**  
 INPUT: 195-255 volts, 50/60 cycle, 1 phase. OUTPUT: 230 volts, 24 KVA. Electro-Mechanical Designed for MIL-E-16400.

**TYPE EM10003**  
 INPUT: 80-115 volts, 50/60 cycle, 1 phase. OUTPUT: 115 volts, 2.0 KVA. Electro-Mechanical for Normally Low Input Voltages.

**TYPE IE20003**  
 INPUT: 95-135 volts, 60 cycle  $\pm 10\%$ , 1 phase. OUTPUT: 115 volts, 8.5 amperes, 1.0 KVA. Completely Electronic for Military Applications.

**TYPE IE20002**  
 INPUT: 190-250 volts, 50/60 cycle, 1 phase. OUTPUT: 230 volts, .15 KVA. Completely Electronic, withstands High Humidity.

# Shallcross

## PRECISION WIREWOUND RESISTORS

Small, Shallcross "P-Type" encapsulated resistors offer unmatched stability and reliability for critical applications. All are reverse-pi wound on multiple-section epoxy resin bobbins, then hermetically-sealed in a tough epoxy coating. "P-Type" resistors are offered in a complete range of commercial and military

types with radial leads, axial leads, or lug terminals. Military types meet or exceed MIL-R-93A (85°C ambient) and MIL-R-9444 (125°C ambient) requirements—including salt water immersion tests. Standard tolerances—1%, 0.5%, 0.25%, 0.1%, and 0.05%. Close tolerances and matched pairs a specialty. Write for Bulletin L-30.

## ROTARY SELECTOR SWITCHES

### STANDARD SWITCHES

Single-Pole, instrument-type switches using silicone-impregnated steatite or phenolic decks. 1/4" laminated silver or solid brass contacts and multiple-leaf wiper arms. Positive, long-life ball-bearing detent. Up to 4 decks. Many optional special features. Bulletin L-31.

### OVAL CERAMIC SWITCHES

Assembled by Shallcross from stock, interchangeable parts, the "12,000" Series offers custom-built quality without the delay and cost of specials. Solid silver contacts and collector rings on steatite decks. 0.0025 Ω contact resistance. 1 to 3 poles per deck, up to 10 decks. Adjustable stop. Optional detent. Bulletin L-32.

### MINIATURE SWITCHES

Only 1 1/4" square by 1" deep for first deck, 5/8" for additional decks. Silver alloy button contacts and multi-leaf wipers maintain low contact resistance. Glass fibre Silicone-laminate decks for outstanding humidity, moisture and salt-spray resistance. 1 to 4 poles per deck. 1 or 2 hole mounting. Easily-positioned, adjustable stops. Bulletin L-45A.

Model Number	Measurement Accuracy	Maximum Setting	Minimum Setting	Circuit	Special Features
6100	±0.1% +0.01Ω (1Ω to 1.011 MegΩ)	1.011 MegΩ	0.001Ω	Fault Location—Wheatstone	Fault Location by Murray, Varley, Hilborn & Fisher Loop Tests.
6101	±0.1% +0.01Ω (1Ω to 11.11 MegΩ)	11.11 MegΩ	0.001Ω	Wheatstone	Four dial rheostat usable as decade box.
6320	±0.02% +0.01Ω (1Ω to 11.11 MegΩ)	111.11 MegΩ	0.00001Ω	Wheatstone	Most accurate five dial Shallcross bridge for direct resistance measurement.
	±0.05% to ±20% on separate "+" and "-" selector.	11.111 MegΩ	0.0001Ω	Percent Limit	Rapid "GO-NO GO" percent limit testing. Built-in adjustable comparison standard.
638-R	±0.75% or better (.001Ω to 1Ω)	11.11Ω	0.000001Ω	Kelvin	Overlapping Kelvin and Wheatstone ranges selected with single ratio dial.
	±0.2% +0.01Ω (1Ω to 11.11 MegΩ)	11.11 MegΩ	.001Ω	Wheatstone	
6350	±1%, (10Ω to 10 MegΩ) ±2%, (10 MegΩ to 10,000 MegΩ) ±5%, (above 10,000 MegΩ)	1.111 x 10 <sup>6</sup> MegΩ	0.01Ω	Wheatstone with d-c Amplifier	Modular construction dual range power supply, null indicator-amplifier, for 115V. 60 cycle operation.
617 Series	±0.1% to ±20% on separate "+" and "-" selectors from a minimum resistance consistent with number of dials in use to the maximum settings.	111,111Ω 1,111,110Ω 11,111,100Ω	0.1Ω *1Ω 10Ω	Percent Limit	For rapid "GO-NO GO" percent limit testing. Hand or foot operated for production testing. All models also usable for direct resistance measurements. Binding post for external d-c power supply.
	±0.2% +0.01Ω from a minimum consistent with number of dials in use to the maximum setting.	111,111Ω 1,111,110Ω 11,111,100Ω	0.1Ω *1Ω 10Ω	Wheatstone	

† Except 617B and 617J ±0.1% ±0.01Ω.

\* Except 617G, 0.01Ω.

## DECADE RESISTANCES

Available as single unmounted decades or as complete decade resistance boxes with 1 to 6 dials. Steps as low as 0.01 ohm; total resistance as high as 11,111,100 ohms.

Remarkably rugged and accurately-calibrated for maintained stability in rough lab, classroom and production line work. Uses impregnated Shallcross precision wirewound resistors mounted on steatite switch decks. Large button contacts of silver or brass. Write for Bulletin L-17A.

## DECADE VOLTAGE DIVIDERS

Laboratory-type voltage dividers used in bridge circuits, for measuring rotary potentiometer linearity, in synchro-test delta bridge circuits, and in other uses requiring maintained accuracy and high resolution. Kelvin-Varley or Potentiometer circuits available in eight 4 and 5 dial models.

Impregnated Shallcross precision wirewound resistors used throughout. Steatite instrument switches assure uniformly low contact resistance. Bulletin L-16B.

## HIGH VACUUM COMPONENTS, EQUIPMENT, and SYSTEMS

### Mechanical Vacuum Pumps

**NRC Model 100M**

Because of the Gas Ballast feature, these pumps maintain their original high efficiency even when pumping 100% water, or other condensable vapors. Therefore, expensive oil purifiers and frequent and costly oil changes are not needed. NRC pumps have paid for themselves in three years from oil savings alone.

Model	Capacity CFM	Ultimate Vacuum Gas Ballast Off mm. Hg (A)	Ultimate Vacuum Gas Ballast On mm. Hg (A)	Price (B)	
<b>SINGLE STAGE</b>					
2-S	1.25	$3 \times 10^{-3}$	Less than one half millimeter of mercury	\$155	
4-S	3.3	$3 \times 10^{-3}$		225	
6-S	6.75	$3 \times 10^{-3}$		315	
15-S	11.6	$3 \times 10^{-2}$		475	
30-S	29.5	$3 \times 10^{-3}$		800

200M	202	$3 \times 10^{-3}$	$3 \times 10^{-3}$	3500	
400M	403	$3 \times 10^{-3}$	$3 \times 10^{-3}$	5900	

Note A: McLeod gauge reading

Note B: F.O.B. Newton, Mass. Price includes pump, base, v-belt drive, and motor

### Diffusion and Booster Pumps

**NRC Booster and Diffusion Pumps**

While NRC high vacuum diffusion and booster pumps are unsurpassed for through-put, blank off, and forepressure tolerance, they are especially outstanding for reliability. They offer long, trouble-free life, and are easy to maintain. Narcoil pumping fluids are unusually stable, have excellent pumping characteristics, and are low-priced. Narcoil-10 is \$10.50 per gallon and Narcoil-40 is \$38.50 per gallon.

Model	Blank-Off, mm. Hg (C)	Max. Speed Liters/Sec.	Tolerable Fore-pressure mm. Hg	Pumping Fluid	Price (D)
<b>DIFFUSION PUMPS</b>					
G-2-M (A)	$8 \times 10^{-7}$	30	0.50	Mercury	\$225
H-2-P	$2 \times 10^{-7}$	80	0.25	Narcoil 40	125
A-2-P (B)	$2 \times 10^{-6}$	85	0.20	DC 703	165
H-4-P	$5 \times 10^{-7}$	300	0.31	Narcoil 40	235
H-6-P	$5 \times 10^{-7}$	730	0.20	Narcoil 40	410
H-10-P	$5 \times 10^{-7}$	1900	0.19	Narcoil 40	820
H-16-P	$5 \times 10^{-7}$	5500	0.30	Narcoil 40	1450
<b>BOOSTER PUMPS</b>					
B-1	$1 \times 10^{-4}$	8	0.30	Narcoil 10	\$ 70
B-2	$1 \times 10^{-4}$	85	0.85	Narcoil 10	205
B-4	$1 \times 10^{-4}$	260	1.30	Narcoil 10	360

B-12	$1 \times 10^{-4}$	3500	0.90	Narcoil 10	2250

Note A: Glass pump

Note B: Air-cooled. Price includes blower

Note C: Untrapped ion gauge, except for G-2-M

Note D: Includes initial charge of pumping fluid

### Vacuum Gauges

**NRC Model 520**

NRC vacuum gauges are outstanding for their accuracy and ability to withstand hard usage. The NRC Model 520 shown above is an all-purpose gauge with uniquely wide range and accuracy. Its ruggedized new circuitry eliminates troublesome components, minimizes contamination effects and provides highly stable linear amplification.

Model	Type	Range mm. Hg	Price complete with head(s)
<b>NRC HIGH VACUUM GAUGES</b>			
501	Thermocouple Head	$10^{-3}$ to 1.0	\$11.00
507	Ionization Head	$2 \times 10^{-8}$ to $5 \times 10^{-3}$	24.00
510	Alphatron® Ionization	$10^{-3}$ to 10.	545.00
515	Logarithmic Alphatron® Ionization	$10^{-3}$ to 10.	275.00
516	Pirani	$10^{-3}$ to 1.0	175.00
520	Alphatron® Ionization	$10^{-4}$ to $10^3$	575.00
701	Thermocouple	$10^{-3}$ to 1.0	120.00
710	Thermocouple Ionization	$2 \times 10^{-8}$ to 1.0	481.00

## NRC HIGH VACUUM SYSTEMS

Write us about your problem if you are seeking ways to improve your product quality and cut costs.

As one of the pioneers and leaders in the design and manufacture of many kinds of high

vacuum systems, NRC Equipment also can supply standard and specially engineered equipment such as:

Vacuum Furnaces, Vacuum Coaters  
Freeze Driers, Impregnators, Vacuum Driers

Vacuum Analytical Equipment  
(for measuring gas content of metals)

Specially engineered vacuum systems

Leak detection apparatus

# PRECISION SINGLE-TURN POTENTIOMETERS

TIC offers a complete selection of all types of single-turn potentiometers with a wide range of sizes from 7/8" to 3" diameters . . . accuracies . . . and linearities. All units are designed for unique, one-piece clamp rings to join adjacent cups securely, yet allow each cup to be precisely phased. Up to 15 cups can be ganged on a single shaft.

Patented resistance-element design offers greater flexibility in linear and nonlinear function design. Precision-bored, phosphor-bronze sleeve bearings or low-friction stainless-steel ball-bearing construction . . . centerless ground stainless-steel shaft . . . servo or tapped-hole mounting . . . and complete environmental protection.

# PRECISION TRIMMER POTENTIOMETERS

TIC provides a complete selection of trimmer potentiometers for precise, stable adjustments under all forms of adverse environmental conditions. The variety of sizes and shapes available, in addition to the wide range of power and temperature capabilities with the specific application.

Among the trimmers available is the original metal-film potentiometer, the TIC RFT Metfilm. Use of metallic film as the resistance element provides infinite resolution for ultra-

fine trimming. Extremely compact and stable with an over-all size that permits stacking 7 to the square inch. A 25-turn lead screw provides extreme accuracy of adjustment.

Latest addition to the TIC Trimmer Line is the low-cost, wire-wound RWT. This unit incorporates the same compact design as the RFT. Its wire-wound resistance element design provides low-cost.

# GUIDE TO THE WORLD'S FINEST PRECISION Potentiometers

## PRECISION LOW-COST P-SERIES POTENTIOMETERS

Low-cost P-series precision potentiometers are designed to meet the growing demand for economical precision potentiometers in commercial instrumentation. Precision features developed for stringent military applications have been retained in the low-cost P-series. In addition, the moulded bakelite housing minimizes distributed capacitance providing wide frequency response and stability in extremes of humidity.

Low temperature coefficient of resistance wire produces stability in extremes of temperature. Up to 6 cups can be ganged on a single shaft. Specially designed clamp rings permit independent phasing of each cup.

TYPE	DESCRIPTION	CASE SIZE	RESIS. RANGE	STAND. IND. LIN.	SPEC. IND. LIN.	STAND. WIND. ANGLE	CONSERV. POW. RAT. WATTS AT 25°C	MOUNTINGS AVAILABLE

# TECHNOLOGY INSTRUMENT CORP.

569A Main St., Acton, Mass., COLONIAL 3-7711 7229 Atoll Ave., North Hollywood, Calif. POplar 5-8620 STanley 7-0286

# PRECISION MULTI-TURN POTENTIOMETERS

TIC manufactures a complete line of precision multi-turn potentiometers of the highest quality for precision computer, servomechanisms and electromechanical instrumentation service. The M10T provides wide temperature and resistance ranges . . . extreme electrical accuracy and stability. Extremely precise tolerances in shaft diameter, concentricity, and perpendicularity assures complete transfer of M10T accuracy to external systems. One-piece unit of all functional parts . . .

stainless-steel cover . . . and bonding of cover to one-piece base provides complete environmental protection.

The 10-turn M10T-09 precision potentiometer combines miniaturization with performance. Wide temperature range (-55°C to +130°C) and wide resistance range (1K to 50K ohms) of the M10T-09 provide versatility.

# PRECISION TRANSLATORY POTENTIOMETERS

TIC Precision Translatory Series differs from other potentiometers in that resistance variation is attained by means of linear (translatory) motion rather than the conventional shaft rotational method. Unique design permits up to three completely isolated resistance elements with separate brush arms and take-offs in a single housing. The RVT translatory can be provided with both linear and nonlinear resistance functions.

# SINE-COSINE AND OTHER PRECISION POTENTIOMETERS

The RVP3-S59 Precision Sine-Cosine Potentiometer represents another first for Technology Instrument Corporation. Patented double-contoured resistance element card makes possible the extreme accuracy of the RVP3-S59 and other standard non-linear potentiometers. Double-contoured card (resistance element card is contoured symmetrically on both edges) also permits greater flexibility in the design of nonlinear functions. TIC's precision sine-cosine variable resistor RVP3-S59 is

especially designed for precision resolution of voltages into sine and cosine components. High resolution adds to the high conformity of the output to a sine function to achieve the extreme accuracy of the RVP3-S59. Because of the fact that the RVP3-S59 is a resistive device no compensation is required for reactive elements or frequency characteristics. May also be used on both AC and DC systems . . . over wide frequency ranges.

# ROTARY METLFILM POTS

Type MFR — Hermetically sealed Rotary Metfilm Precision Potentiometer features super tested reliability, infinite resolution, high accuracy, operation at temperatures up to 145°C, low torque, and long life exceeding 1,000,000 cycles. A wholly new concept in potentiometer construction withstanding extremes of environmental conditions.

# MODULAR DESIGN POTS

Type PVR — New modular design pots for high temperature and accuracy. A complete line ranging from 1/2" diameter to 3" diameter linear and non-linear pots with a new concept of flexibility. Modular design permits a choice of mountings, ganging without clamp rings, variable number of taps, selection of terminal types and a delivery schedule to meet any demands.

## ▶ Thermal Time Delay Relays

Stainless steel mechanism welded into a single integral structure for unequalled resistance to vibration and shock. Heater built inside expanding member for maximum efficiency and protection. Rolling contact action for positive operation.

**RED DOT RELAYS**—NEW low cost timing relay for Industrial Controls, Heating Equipment, Communications, Air Conditioning, Electronics. Available from stock in standard heater voltages and time delays.

**HERMETICALLY SEALED TYPE**—Adjustable time delay • Miniature and octal sizes—metal shells • Time Delays—1/10 sec. to 5 min. • Heater voltages up to 230 • Fully temperature compensated • For industrial and military applications • Contact ratings up to 6 amp.

**TYPICAL USES** Delaying plate voltage application • Producing hold-over interval after interruption of power • Delaying automatic shut-down until a fault has continued for a specified period.

*Notably Efficient • Widely Used*

# G-V Precision Thermal Devices

*A quality line skillfully designed and thoroughly field-tested.*

### G-V Thermal Relays Have Proved Performance Advantages—

- So reliable that the country's principal producers of electronic equipment have adopted them as production components!
- So reliable that they have been used on hundreds of government contracts!
- So reliable that they have been in successful field use for over three years!

*And G-V offers you helpful engineering cooperation and the most complete technical data service.*

## ▶ Electrical Thermostats

**Features:** Hermetically sealed • Adjustable or fixed temperature • Rapid in response—metal shell is the sensing element • Wide variety of sizes and mounting forms • Exposure to  $-70^{\circ}\text{C}$ . does not change setting • High shock and vibration resistance • Current rating—1 amp. to 10 amp. • Stable setting and precise control.

## Voltage Sensing and Current Sensing Relays—Thermal Type

**Features:** Responds to changes in current or voltage • Currents .015 to 5 amp • Voltages 2 to 230 volts • Time constants—1 sec. to 200 sec. • Adjustable operating point • Minimum differential • Independent of ambient temperature • Independent of frequency • Hermetically sealed in metal shell • Miniature size • Small, light, and noiseless.

**Typical Uses:** Over- or under-voltage alarm or cut-off • Overload protection • Voltage or current regulation.

*Write for bulletin and help with your particular problems.*

**G-V G-V CONTROLS INC.**

# Stupakoff

## Products of Quality

Manufactured by **STUPAKOFF** DIVISION OF

For many years Stupakoff has specialized in the manufacture of precision ceramic parts, involving production runs into the tens of thousands. They are made in plain, ground, metallized and assembled types—for any voltage, frequency or temperature.

Stupakoff Hermetic Seals are made with Kovar alloy and hard glass. Oxidation of these materials at their interfaces forms a strong, vacuum- and pressure-tight, corrosion-proof bond.

Stupakoff facilities include large, well-equipped laboratories; extensive modern production and testing equipment; and an experienced staff of quality-conscious engineers and technicians.

### CERAMIC TUBING

For applications requiring low-cost, high quality ceramic tubing, Stupakoff offers an attractive selection of standard sizes and lengths. Available from stock in a wide variety of sizes, from .015 to 5.125-in. OD, .006 ID to 2.625-in. ID, and any length up to 15 inches.

**PRECISION CERAMICS**—In the assembly of electrical or electronic equipment, the use of precision-made components means faster production and the correct functioning of the equipment in service.

Through the application of experience-developed engineering and technical skills and modern equipment, Stupakoff produces, in large volume, parts that meet most exacting tolerances and specifications.

Stupakoff precision ceramics may be simple or complex; and made from various ceramic materials.

**CERAMIC PARTS**—Stupakoff is a leading manufacturer of ceramic products for electrical and electronic applications for all voltages, frequencies and temperatures. Parts are made by modern production methods of Alumina, Cordierite, Forsterite, Magnesia, Zircon, Stupalith® and Steatite—plain, ground, metallized or assembled.

Where thermal shock conditions prevail, parts made of Stupalith will withstand extremely severe service.

Coil forms, insulators, brazing fixtures and vacuum tube spacers are among the popular items.

**METALLIZED ASSEMBLIES**—Combine a specially developed metal bond and rigidly controlled alumina to give a strong, durable, vacuum-tight product. Terminals are supplied with Stupakoff Metal Bond which significantly reduces assembly costs by withstanding exposure to soldering temperature for prolonged period without losing bond strength.

# FOR ELECTRICAL and ELECTRONIC applications

The **CARBORUNDUM** Company, Latrobe, Pennsylvania

**KOVAR GLASS SEALS**—Single terminals with tubular, solid or flattened and punched center lead; high voltage terminals for feed-through applications; multi-header terminals for applications requiring a number of leads in limited area; stand-off terminals; strain relief terminals and Special Seals made for exacting applications.

**COMPRESSION SEALS**—Thermally pre-stressed compression seals designed to provide the strength, durability and electrical properties needed for the most demanding applications. Dimensionally controlled for ease of welding and soldering, choice of tin-nickel-silver or gold plating for appearance and corrosion resistance.

**METAL-CERAMIC SHAFTS**—Made in a wide variety of sizes and designs, Stupakoff Metal-Ceramic Shafts consist of metal bands permanently attached to ceramic rods. Through care in manufacture, exceptional precision is maintained on a mass-production basis. For example, it is not unusual to hold the concentricity of components to a T. I. R. of 0.001 in.

**KOVAR ALLOY**—The ideal alloy for glass sealing, Kovar matches the expansivity of hard glass over the entire working temperature range. It resists mercury attack, has ample mechanical strength and seals readily with simple oxidation procedure. It is available as sheet, strip, foil, rod, tube, wire—or fabricated into cups, eyelets, leads and other shapes. Kovar produces a permanent vacuum-tight seal, is usable in any thickness, and can be welded, soldered and brazed to other metals.

# INSTRUMENTS & COMPONENTS

precision engineered by **CURTISS-WRIGHT**

## The Curtiss-Wright DISTORTION ELIMINATING VOLTAGE REGULATOR

- Furnishes 1.4 KVA of distortion-free,  $\pm 1\%$  regulated power without phase shift
- 330 microseconds recovery time —fastest regulation available
- Reduces line distortion to less than 0.3%
- Simultaneously provides 4 KVA of  $\pm 1\%$  electromechanically regulated power
- Model EE 100A \$1,689.00 F.O.B., Carlstadt, N. J.

### Applications:

Provides simpler, more accurate calibration of meters . . . better design of transformers, synchros, motors, magnetic amplifiers . . . easier testing with fewer rejects . . . more accurate measurement of magnetic properties . . . better computer performance . . . elimination of fast line transient effects.

## The Curtiss-Wright "SNAPPER" THERMAL TIME DELAY RELAYS

- Eliminate chatter with snap action
- Single-pole, double throw contacts
- Wide temperature range ( $-65^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$ )
- Metal envelope (7 or 9 pin) miniature or (8 pin) octal
- Glass envelope in 9 pin miniature
- Preset time delays in metal from 3 seconds to 3 minutes, glass from 5 to 60 seconds

### Applications:

For military or commercial applications, "Snapper" Relays are providing positive, reliable action in circuits requiring time delays.

### Other Components:

Curtiss-Wright also manufactures "Snapper" Thermostats, "Memory" Relays and Magnetic Amplifiers.

## The Curtiss-Wright DYNAMIC CAPACITOR ELECTROMETER

- A micro-microammeter and millivoltmeter in one instrument
- Measures currents from  $10^{-16}$  to  $10^{-5}$  amperes
- 10, 100 and 1,000 mv ranges
- Exclusive diaphragm-type dynamic capacitor
- Extremely high input impedance —  $10^{15}$  ohms
- Better than 2% accuracy, high stability
- Price \$1,075.00 F.O.B., Carlstadt, N. J.

### Applications:

Measurement of semi-conductor parameters, low-level voltages, static charges, floating grid potentials, grid currents and insulation resistance. Used in mass spectrometry and pH measurements; nuclear reactor control and radiation monitoring systems; beta and gamma gauge control systems.

### Nuclear Instrumentation and Controls

The Electronics Division is now working on contracts for nuclear control systems. You are cordially invited to discuss your nuclear instrumentation and control problems with us.

Detailed data sheets and application information available on all products.

Curtiss-Wright has career positions open for qualified engineers and technicians.

**ANTENNAS**  
**ANTENNA SYSTEMS**  
**TRANSMISSION LINES**

The ANDREW product line covers the related fields of antennas for communication and broadcasting, and transmission lines to connect these antennas to transmitters, receivers or other electronic equipment.

**PARABOLIC ANTENNAS**

A wide selection of standard models in a complete range of sizes and frequencies is stocked for immediate delivery. Special antennas are designed and manufactured to meet individual requirements. Here is a representative selection of stock antennas.

Type PT4-59 4-foot antenna with waveguide horn for 5925-6425 mc.

TYPE NUMBERS OF STOCK PARABOLIC ANTENNAS

Frequency Range (MC)	ANDREW Type Number			
	4 ft. dia.	6 ft. dia.	8 ft. dia.	10 ft. dia.
890 - 920	1004A-1	1006A-1		1010A-1
920 - 960	1004A-2	1006A-2		1010A-2
1700-1850	2004A-1	2006A-1	2008A-1	2010A-1
1850-1990	2004A-2	2006A-2	2008A-3	2010A-3
1990-2110	2004A-3	2006A-3	2008A-3	2010A-3
2450-2700		P6-24		P10-24
3750-4200			PS8-37	
5925-6425	P4-59	P6-59	P8-59	P10-59
6575-7125	P4-65	P6-65	P8-65	P10-65
7125-7425	P4-71	P6-71	P8-71	P10-71

Tower or roof mounts are included as part of the antenna. Most standard mounts include elevation and azimuth adjustments of at least  $\pm 5^\circ$ . Special heating equipment is available and recommended for antennas operating above 5000 mc in ice areas.

For antennas requiring tower mounts, specify prefix PT for all sizes: example, PT4-59. Roof mounts for 4' and 6' sizes use prefix PM; example, PM6-71. 8' and 10' mounts are designed for either tower or roof mounting.

**COMMUNICATIONS ANTENNAS**

**FOLDED UNIPOLES**—(25 mc to 174 mc), omnidirectional. The ideal fixed station transmitting and receiving antenna. Inexpensive, lightweight and easy to install. Some lower frequency models incorporate new design changes which increase windload ratings and eliminate field cutting of vertical elements to frequency.

**HIGH GAIN**—for 148-174 mc, 400-470 mc. ANDREW High Gain omnidirectional antennas will increase your coverage and multiply benefits by the number of mobile units in the system. Type numbers, frequency and gain are shown below.

Omnidirectional Pattern		
Type 3000	148-174 mc	6.3 db
Type 3006	148-174 mc	9.0 db
Type 4000	450-470 mc	7.6 db
Type 4002	450-470 mc	5.0 db
Type 4010	400-420 mc	7.5 db
Offset Omnidirectional Pattern		
Type 201	450-470 mc	10.8 db in max. dir.
Type 3004	148-174 mc	8.1 db in max. dir.

**CORNER REFLECTORS.** Unidirectional antennas for 25-174 mc and 400-960 mc. Preferred for their high gain and stable operation under severe weather conditions. Also may be utilized for low power TV transmitting in directional and omnidirectional arrays.

**ANTENNA SYSTEMS AND PLANNING**

ANDREW Corporation offers engineering assistance in the planning of your antenna-transmission line

system at no cost to you. Contact the nearest ANDREW office for this consulting service.

Be sure your library contains Andrew catalog 21 and the new product supplement, 215.

**TRANSMISSION LINES**

**HELIAX**, flexible air dielectric cable combines the efficiency of the finest copper cables with handling ease of solid dielectric types. Available in two sizes,  $\frac{7}{8}$ " Type HO and  $1\frac{5}{8}$ " Type H1, with complete series of pressurized end fittings. Type HO may now be used up to 5000 mc.

**RIGID AND SEMI-FLEXIBLE.** Complete range of sizes for UHF and VHF systems. Semi-flexible soft copper cable in  $\frac{3}{8}$ " and  $\frac{7}{8}$ " sizes, rigid copper line  $\frac{7}{8}$ " to 9" sizes. Adaptors and fittings available from stock. New 50 ohm,  $6\frac{1}{8}$ " line now available for high power applications.

**WAVEGUIDE.** High efficiency copper clad steel waveguide in sizes ranging from  $7\frac{1}{2}$ " to 15" for pressurized UHF systems. Includes accessories for complete line installation.

**COAXIAL SWITCH.** Automatic, 50 ohm,  $3\frac{1}{8}$ ", UHF and VHF. This new, automatic switch now allows high power communication systems, as well as VHF and UHF television stations, the convenience of four-second switching of  $3\frac{1}{8}$ " coaxial transmission line at powers up to 10 kw at 1000 mc. Both automatic and manual models include automatic high voltage disabling switch and remote position indicating lights.

**ASSOCIATED ANDREW PRODUCTS**

Antenna Reflectors, Parabolic Antennas, Tropospheric Antennas, Yagi Antennas, Mobile Antennas, UHF and VHF Cable, Transmission Line (all types) Connectors, Coaxial Cable

Controls, Photoelectric Dehydrators, Automatic Filters, Microwave Filters, UHF and VHF Lighting Equipment, Tower Lines, Slotted Masts, Telescoping Phasing and Tuning Equipment.

# MAGNETIC AMPLIFIERS AND TRANSFORMERS

## MAGNETIC AMPLIFIERS

Custom computer amplifiers with high stability and linearity can be designed having single or multiple inputs to your specific needs. Servo drives and relay actuators are also available. Frequency selective networks can be integrally designed to provide additional useful control functions. Proven packaging techniques insure minimum size—proven toroidal construction assures highest performance.

Typical Temperatures..... -60°C. to +150°C.  
Typical Line Frequencies..... 60cps to 6000cps

## MISSILE POWER TRANSFORMERS

Recommended for supply frequencies above 400 cps and where size performance and reliability are factors. Thin nickel alloy toroidal cores reduce core losses. Toroid structure cures stray field problems.

**SEALED MISSILE POWER SUPPLIES** combining toroidal power transformers, toroidal filter chokes, hi temp capacitors and silicon rectifiers. These units offer multiple outputs and low ripple. Low stray field of toroidal elements obviate usual internal shielding. Mag regulation where required.

## LAMINATED TRANSFORMERS AND INDUCTORS

A complete line of laminated constructed units are now available through CAC. Our highly qualified engineering staff, a well complimented laboratory, humidity controlled production facility with modern manufacturing equipment guarantees conformance with any specifications. Both power and audio transformers employing advanced techniques can be supplied either hermetically sealed or encapsulated to 150° C. ambients. Catalogues, supplied upon request, cover a wide range of standardized designs including omni-range and ILS Filters.

## PRECISION RATIO COMPUTER TRANSFORMERS

Toroidal form of construction is ideal for designing precision ratio transformers since the turns of wire are applied to and adjusted on the core. Normal production procedure of zero turn accuracy, high permeability cores, low phase shift, and near unity coupling will yield laboratory quality on any production run. Advanced design and newest packaging methods provide optimum performance with minimum size and rugged construction.

*Catalogs on Individual Components are Available on Request.*

### PERMEABILITY-TUNED VFO's (Mfd. by Collins Radio Co.)

Mechanically stable — sealed against atmospheric changes — temperature and voltage compensated. Available as complete packages for incorporation into your equipment. Superior accuracy, stability and linear dial calibration for your transmitters, receivers, test equipment or frequency standards.

### AUTOTUNES (Mfd. by Collins Radio Co.)

Electro-mechanical position systems. Ideally suited for components requiring rotary or linear motion. Positioning accuracies of 0.05 angular degrees with reset accuracy to 0.0001 inch relative to 1/4 inch shaft size. Designed for the lifetime of any equipment. Fast — versatile — high torque — accurate — dependable.

## Communication Accessories Company

A Subsidiary of Collins Radio Company

LEE'S SUMMIT, MISSOURI  
PHONE KANSAS CITY BRoadway 1-1700

### FERRITE CORES (Mfd. by Collins Radio Co.)

Requirements for extreme temperature stability and consistently reproducible cores encouraged the Collins Radio Company to enter the magnetic materials field. Now, after several years of intensive research and development, these cores are available through CAC in many standard or custom forms for all applications. Temperature characteristics developed exhibit 10 times improvement over previous materials. Special saturation and other properties are presently available. Technical bulletins upon request.

### HEAT DISSIPATING TUBE SHIELDS (Mfd. by Collins Radio Co.)

Heat treated beryllium copper corrugated liner and socket insert are highly resilient and accommodate wide variations of tube diameter. Base liner reduces bulb temperature in most critical tube area. Interchangeable with standard JAN equipment. Tube cannot work out of socket through long term vibration. Maximum electrostatic shielding.

**US-KON** INDUSTRIAL HEATING BLANKETS

# LET US HELP ENGINEER BETTER HEATING AT LOWER COST INTO YOUR PRODUCT

**ARE YOU IN THE REFRIGERATION FIELD?** Leading firms such as Larkin, Bush and Bohn, are among the many that use Us-Kon® Heating Blankets to prevent ice formation in drain pans of unit coolers. Us-Kon also does many other jobs in refrigeration.

Drainpan of unit cooler with Us-Kon heating blanket in place.

**ARE YOU IN PLASTIC LAMINATION?** Us-Kon Blankets are used on hot presses to speed up production, save working space and capital outlays. In some instances the Us-Kon does as much work as equipment that might cost 33 to 50 times as much.

**WHAT ABOUT FURNITURE VENEERING?** For rapid curing of glue lines, veneering of wooden products of flat or curved construction, it's flexible Us-Kon Electrical Blankets.

Examples of Us-Kon Conductive Cards.

**THE AMAZING US-KON ELECTRICALLY CONDUCTIVE CARDS** are used in radar micro-wave assemblies to control the attenuation of electromagnetic energy by such concerns as Convair and Texas Instrument.

## UNIFORM HEAT OVER LARGE OR SMALL AREAS

Us-Kon conductive rubber electrical heating blankets give quick, uniform heat. They are less than 1/8" thick, weigh less than 8 oz. per square foot and are in sizes from 1" to 56" wide and 6" to 50 ft. or more in length. They are so flexible they conform to curves of as little as 1/4" radius. There are no wires. Temperature can be thermostatically controlled.

# PILOT LIGHTS

*perform vital functions...Assure maximum dependability—specify:*

**THE COMPLETE LINE** designed to meet every requirement. *Dialco* offers the most extensive selection of Pilot Lights — from *sub-miniature* types to *giant* units with 1½" lenses. Special features such as MIL spec insulation, water-tightness, special finishes, etc. can be furnished as standard. For NEON lamps, *Dialco* provides Pilot Lights with **built-in resistors** (patent #2,421,321) for operation on 105-125 V, or 210-250V; also simple external resistors for higher voltages.

**Every assembly is available complete with lamp:** Assure complete satisfaction — let the *Dialco* Engineering Dept. assist in selecting the *right* lamp and *most suitable* pilot light for your needs.

Illustrations approximately actual size.

**DISCS tell the story!**

In both military and civilian equipment, *Discs* inserted behind lenses can be used to deliver specific messages. A significant safety feature!

**Sub-Minature Units:** (A) No. TT-51; No. TT-51A with No. 327 lamp. For edge lighting. Red or other color filters, black top... (B) No. 8-3730-111, for MIL-P-7788 panel... (C) No. 101-3830-951 two-terminal unit with omnidirectional lens... (D) No. 4-1930, light shield... (E) Patented "Press-to-Test" unit with dimming or non-dimming lens cap... (F) No. 8-1930-111, non-dimming... (G) No. 11-1930-111, mechanical dimmer; No. 3-1930-111, polaroid dimmer. (H) No. 521308-991, for neon lamps, with multi-view cap... (I) No. 313502-111, a 1" unit with friction cap.

**SAMPLES ON REQUEST — at once — no charge**

**FREE:** Brochure on "Selection and Application of Pilot Lights." Contains consolidated information on pilot light assemblies and small lamps, working tables, data, photographs, and product information.

### STABILITY

*Locked in!*

### WITH CHOPPER AMPLIFIERS

- $\pm 2$  Microvolt Drift
- Extremely Low Noise
- High Input Impedance
- Low Output Impedance
- $\pm 35$  Volt,  $\pm 40$ ma Output
- 10 Accurate Gain Ranges
- 6 Unit Rack-Mounting
- Integral Power Supply

### AMPLIFY MICROVOLTS WITH STABILITY

KIN TEL Model 111A amplifiers provide the lowest drift of any commercially available wideband DC amplifiers. They utilize KIN TEL's proven chopper amplifier circuitry to provide unsurpassed dynamic performance — unaffected by load or gain changes.

### OPERATIONAL AMPLIFIER

The Model 111AO is an operational version of the Model 111A amplifier. In this unit, the "0" gain position is an open loop position, and the user may employ his own external networks to provide up to 100% resistive or capacitive feedback around the amplifier. By choosing the proper attenuator, input, and feedback components the user may obtain whatever amplifier characteristics are desired, such as limiting the gain or bandwidth, performing integrations, and generating complex linear transfer functions.

### FLOATING INPUT AMPLIFIER

The Model 111AF is a floating input version of the Model 111A which permits its use with transducers, particularly thermocouples, which are grounded at the pickup location. The Model 111AF differs from the Model 111A only in that it eliminates the problem of ground loops resulting from grounding at both the amplifier and the pickup location.

### APPLICATIONS

These amplifiers make dynamic, high-accuracy, low-level DC instrumentation systems practical. In comparison to AC systems, DC strain gage systems offer greater accuracy, wider bandwidth, operational simplicity, reduced maintenance, and eliminate capacitive balance problems. In one installation alone, KIN TEL DC amplifiers have logged over a million hours of accurate, trouble-free operation. The Model 111 series is ideally suited to telemetering, data reduction and all types of instrumentation facilities utilizing transducer measuring systems. They are excellent as scope preamplifiers, recorder and galvanometer driver amplifiers, or general purpose laboratory amplifiers.

### SPECIFICATIONS

Gain (Phase Inverting).....	0, 20, 30, 50, 70, 100, 200, 300, 500, 700, 1000
Gain Accuracy.....	$\pm 1\%$ , DC to 2 KC; $\pm 3\%$ , DC to 10 KC; $\pm 30\%$ , DC to 40 KC
Input Impedance.....	100,000 ohms
Output Impedance.....	Less than 1 ohm in series with 25uh
Equivalent Input Drift.....	$\pm 2\text{uv}$ when used with regulated line voltage, $\pm 10\%$ change in AC input causes less than $\pm 5\text{uv}$ change. 10 minute warm-up period required.
Equivalent Input Noise.....	0 to 3 cps, less than 5uv peak to peak. 0 to 750 cps, less than 5uv RMS. 0 to 50 kc, less than 12uv RMS.
Chopper Intermodulation.....	Less than 0.1%
Maximum Output Cable Capacity.....	0.02uf (external)
Linearity.....	Better than 0.1% to 2KC
DC Output Capability.....	0 to 35v where RL > 1000 ohms 0 to 40 ma where RL is 10 to 400 ohms
Frequency Response.....	0.3 db ( $\pm 3\%$ ) DC to 10KC, less than 3 db down at 40KC
Rise Time.....	Less than 10 u sec.
Phase Shift.....	Less than 5° to 2KC
Overload Recovery Time.....	Less than 3 seconds
Dimensions:	
Amplifier Unit.....	27 $\frac{1}{8}$ " wide, 7 $\frac{5}{8}$ " high, 14 $\frac{5}{8}$ " deep
Unit in Cabinet.....	5 7/16" wide, 10" high, 18 $\frac{1}{4}$ " deep
Rack Adapter Module for 6 Units.....	19" wide, 8 $\frac{3}{4}$ " high, 18 $\frac{1}{4}$ " deep (Width of cabinet behind 19" front panel is 17 $\frac{5}{8}$ " )
Net Weight (Amplifier).....	11 pounds
Price:	
111A Amplifier.....	\$550.00*
111AO Amplifier.....	\$560.00*
111AF Amplifier.....	\$575.00*
111CF Cabinet for single 111A, AO, or AF Amplifier, with fan and connector.....	\$105.00
111RF Rack Adaptor Module for six 111A, AO, or AF Amplifiers, with fans and connectors.....	\$200.00

\* Amplifier must be used with cabinet or rack adapter module.

### KIN TEL

[KAY LAB]

MODEL 203

**STABILITY**

*Locked in!*

WITH CHOPPER AMPLIFIERS

**The ONE Universal Meter**

MICROVOLTS TO KILOVOLTS - MICROAMPS TO MILLIAMPS

- 100uua to 100ma Full Scale
- 100uv to 1000v Full Scale
- High, Fixed Input Impedance
- 15 Voltage, 10 Current Ranges
- Zero Center Meter
- Use as 80db DC Amplifier

The Model 203 microvolt-ammeter-amplifier utilizes KIN TEL's unique chopper circuit to provide accurate measurement of DC from 10uv to 1000 volts or 10uua to 100ma. A zero-center, mirrored scale provides instant polarity indication. It may also be used as an exceptionally stable

DC amplifier with up to 80db gain, high input impedance, low output impedance, and only 10uv drift. The Model 203 is the ideal general purpose laboratory meter, production test set, null meter, or amplifier for extending the range of recording instruments.

**SPECIFICATIONS**

Voltage Range (full scale).....100uv to 1000v  
 Current Range (full scale).....100uua to 100ma  
 Input Impedance.....10 megohms below 10 mv, 30 megohms at 30 mv, 100 megohms above 30 mv  
 Impedance Accuracy.....± 1.5%  
 Accuracy on all Ranges.....± 3% of full scale

Maximum Gain as Amplifier.....80db ± 1.5%  
 Output Rating.....1 v across 1000 ohms  
 Output Impedance.....Less than 2 ohms  
 Drift (after 15 min. warm-up).....10uv equivalent input  
 Price.....\$550.00

MODEL 203AR

The Model 203AR is an extremely compact, 5¼" x 19", rack mountable version of the Model 203 microvolt-ammeter-amplifier. Specifications and operating features are the same as the Model 203 except current ranges are 1 milli-microamp to 1 amp in 19 ranges and, as an amplifier, output capability is 1 volt output into 500ohms. PRICE \$550.00.

The Model 202B is a combination microvoltmeter and amplifier for use where the lowest voltage range and the current ranges of the Model 203 are not required. Fourteen DC voltage ranges cover from 300 microvolts to 1000 volts full scale.

MODEL 202B

Drift, after 15 minute warm-up, is less than 15 microvolts equivalent input; maximum gain as a DC amplifier is 70 db; and output capability is 1 volt across 2000 Ω. Other operating features are the same as the Model 203. PRICE \$350.00.

MODEL 204A

**New Electronic Galvanometer**

- DC Null Detector
- Micro-Microammeter
- Microvoltmeter
- Microvolt Level DC Amplifier

Functionally equivalent to suspension galvanometers, the Model 204A is ideal for DC null detection in low-level bridge and potentiometer circuits, production testing, or low-level DC amplification. KIN TEL's chopper stabilized, all transistor circuit combines extreme sensitivity with immunity to shock, microphonics or overload. Current sensitivity is 20 times greater than high quality, mechanical current galvanometers. As a voltage galvanometer, its extremely high power sensitivity makes the 204A superior to low impedance moving coil instruments.

**SPECIFICATIONS**

Sensitivity.....± 10uv to ± 10 volts or ± 0.001ua (20uua/div.) to ± 1 ma full scale. Positions provided for shorted input (Zero) and open input (Inf.)  
 Power Sensitivity.....10-14 watts, full scale  
 Input Resistance.....Constant 10,000 ohms except on "Zero" and "Inf."  
 Response Time.....Approx 2 sec FS  
 Source Resistance.....No restrictions  
 Zero Adjust.....± 15uv equivalent input on 10 and 100 uv ranges; ± 15% of FS on other ranges.  
 Zero Drift.....< 2 microvolts

Output as amplifier.....± 1 volt at 1 ma (Inverting)  
 Noise Level.....1uv P-P equivalent input on 10uv range  
 Accuracy.....3% of FS on 2 lower ranges, 4% above  
 Isolation.....Very high isolation from line and chassis  
 Over-Range.....100 volts on highest range, 100 times full-scale on other ranges.  
 Dimensions:  
 204A.....9½" H x 6½" W x 12" D  
 204AR.....5½" H x 19" W x 11" D  
 Price.....\$325.00

**STABILITY**

WITH CHOPPER AMPLIFIERS

MODEL 301

**DC SUPPLIES PROVIDE STANDARD CELL ACCURACY**  
**0.01% Stability - 0.002% Regulation - Lowest Ripple**

### New DC Standard and Nullmeter

The Model 301 is a combination variable DC secondary standard, DC voltmeter, and high accuracy null voltmeter. KIN TEL's chopper stabilized circuit constantly compares the output with an internal standard cell to provide stability, accuracy, and excellent dynamic characteristics. Excellent for production calibration of precision measuring instruments and power supplies or as a versatile precision reference for laboratories.

### SPECIFICATIONS

Output Voltage.....	1.00 to 501 volts, Dial Selection
Output Current.....	.0 to 20 ma
DC Supply Output & DC Input Meter Ranges.....	±500, 50 volts
DC Null Meter Ranges.....	±50, 5, 0.5, 0.05 volts
Long Time Stability.....	±100 parts per million
Short Time Stability (several hours).....	±50 parts per million
Output Voltage Calibration.....	±0.02% or 2mv
Output Hum and Noise.....	Less than 100uv RMS

Load Regulation.....	0.002% no load to full load
Line Regulation.....	0.002% for ±10% line voltage change
Meter Accuracy.....	4% of full scale
DC Output Impedance.....	0.01 ohm
Response Time.....	0.2 millisecond
Net Weight.....	29.5 pounds
Price.....	\$625.00

### SPECIFICATIONS

	Model M30B-1Z	Model M10A-10*	Model M100A-20*
Long Time Stability	±0.01%	±0.01%	±0.01%
Regulation for ±10% line voltage change	.002% or 0.5mv	±0.01% of FS	±0.01% of FS
Hum and Noise	Less than 0.5mv	Less than 2mv	Less than 2mv
Voltage	1.02-302	0-100	0-1000
Current	0-20ma	0-100ma	0-200ma
Calibration Tolerance	0.02%	0.05%	0.05%
Price	\$495.00	\$1190.00	\$1950.00

\* Both current and voltage regulated.

### Meter Calibrators

Meter calibrators utilize KIN TEL's unique chopper circuit to continuously compare the output against internal standard cell, providing unequalled stability, accuracy, and dynamic characteristics—regardless of line or load changes. Calibrated dials permit instant voltage selection. Excellent for all laboratory and production calibration.

MODEL M100A-20

### Power Supplies

Merely dial the voltage desired, and, regardless of load changes, KIN TEL absolute DC power supplies instantly provide the desired voltage to an accuracy normally attained only with standard cells. Ideal in the design of complex electronic circuitry or wherever a precision voltage source with unequalled dynamic characteristics is required.

### SPECIFICATIONS

Long Time Stability.....	±100 parts per million
Short Time Stability.....	±50 parts per million
Output Voltage Calibration.....	±0.02% or 5 millivolts
Output Voltage Variation.....	Variable in 100, 10 and 1v steps; between 1v steps with a potentiometer
Output Impedance.....	DC impedance, less than 0.01 ohm, AC impedance, up to 200 kc, less than 0.5 ohms
Output Hum and Noise.....	Less than 0.5 millivolt
Load Regulation Factor.....	±0.01%
Line Regulation Factor.....	±0.002% or 0.5 millivolt
Response Time.....	0.2 millisecond

MODEL 30B-25

### VARIABLE SUPPLIES\*

Model	Voltage Range	Current 0.0 to	Filament Current Amps (6.3V AC)	Price
3B-200	2-32	2 amp	0	\$1,045.00
30B-25†	1.02-302	250 ma	5	725.00
30B-50†	1.02-302	500 ma	10	830.00
30B-100†	1.02-302	1 amp	10	940.00
50B-25†	1.02-302	250 ma	5	780.00
50B-50†	1.02-502	500 ma	10	940.00

[KAY LAB]

**Good-ALL**

# FLIGHTWEIGHT

## FOIL WOUND COILS

**Higher Operating Temperatures, Smaller Size and Lighter Weight are the outstanding characteristics of GOOD-ALL Foil Wound Coils. Foil Construction permits maximum design flexibility, eliminates Hot Spots and offers increased resistance to shock and vibration.**

- ✓ **TEMPERATURE**—as high as 200°C
- ✓ **SIZE**—50% SMALLER than equivalent wire wound coils
- ✓ **WEIGHT**—up to 80% LIGHTER
- ✓ **MECHANICAL**—any configuration—drilled or slotted
- ✓ **THERMAL PROPERTIES**—each turn is exposed

FOIL WINDING TECHNIQUES lend themselves more readily to low voltage, high current applications. Coils may be wound from less than 1" to more than 7' in diameter. Foil designs make possible many coils not now available in wire wound designs. When replacing wire wound coils foil is applicable only for wire sizes of 26 AWG and larger. Coils may be housed or potted. Each turn is exposed to a cooling medium, eliminating hot spots and making higher operating current possible.

**ALUMINUM FOIL** is suggested for applications requiring medium flux density from a moderate amount of power. Substantial Weight and Volume Savings are possible.

**COPPER FOIL** is suggested where higher flux densities and minimum volume are required.

Initial costs of foil wound coils are from one to three times greater than equivalent wire wound coils, although ultimate engineering and production savings have been proven thru reduced packaging costs and improved engineering designs.

*Our engineers are ready to work with you on any component problem or application. Write, wire or phone today for more information.*

## 1. SYSTEMS

BASIC "150" assemblies housed in either vertical mobile cabinets or separate portable cases are available in 1-, 2-, 4-, 6- and 8-channel models. Each is equipped with driver amplifiers of current feedback design and regulated power supplies for *each* channel, and a recorder featuring *nine* extremely accurate paper speeds on 2- to 8-channel models, five on single channel units. Appropriate plug-in preamplifiers quickly and efficiently equip a basic assembly for recording virtually any 0-100 cps phenomena.

**new 6- and 8-channel analog readout systems**  
In addition, complete Sanborn systems from 2- to 8-channels are available for recording analog computer outputs. These are equipped with dual-channel DC amplifiers for single-ended or push-pull signals — input impedance 5 megohms each input lead to ground — drift less than 0.5 mm/hr. — frequency response down 2 db at 60 cycles for all amplitudes to 4 cm peak to peak. Newest of the computer readout recorders are the 6- and 8-channel console systems (8-channel illustrated). The Model 183 Programmer in a Model 184 case, shown top right, is optional for use with the 6- and 8-channel consoles. The Programmer automatically turns on chart drive, feeds calibrated signals to all channels, reads computer DC levels, determines the length of record, and shuts off the paper drive.

# SANBORN

## OSCILLOGRAPHIC RECORDING EQUIPMENT

## 2. PREAMPLIFIERS

## 3. UNIT INSTRUMENTS

All Sanborn Preamplifiers and Recorders, as well as various other units, are available separately for specialized applications or use as "original equipment" in other apparatus. Instruments include the Model 150-300/700 Wide Band Driver Amplifier and Power Supply, for use with low power galvanometer elements, a 'scope and/or panel meter. When equipped with suitable "150" preamplifier, this amplifier provides a portable indicator for strain, force, pressure, temperature, AC watts, audio level, etc. Other units include the Model 150-1900 Master Oscillator Power Amplifier; Model 150-3100 Triplexer; Model 601 and 602 galvanometers; Model 150-2900 Dual-Channel DC Amplifier.

A choice of *twelve* "150 Series" plug-in preamplifiers is now available, to equip systems for any of numerous recording problems. Improved control of input signals results from attenuator ratios of 1, 2, 5, etc., and calibrated zero suppression on AC-DC, Carrier, and Low Level DC Coupling, Frequency Meter, and Chopper Stabilized DC models. Other "150" preamplifiers include: Servo Monitor, Log-Audio, AC Wattmeter, RMS Volt/Ammeter, 400 cycle Frequency Deviation, and Triplexer.

Added to these three aspects of Sanborn Oscillographic Recording Equipment are the basic advantages of inkless recording in true rectangular coordinates, to provide accurate, easily interpreted records; high torque galvanometer (10 ma develops 200,000 dyne cm.); one percent linearity resulting from current feedback driver amplifiers and high torque galvanometers (maximum error is 1/4 mm in middle 4 cm of chart, 1/2 mm across entire chart); controls for timing, manual and remote coding.

Take advantage of the scope and flexibility of Sanborn equipment to answer your recording requirements. Sanborn engineers will be glad to provide further information and application assistance whenever you wish. Contact your local representative or write to the main office below.

**EITEL-McCULLOUGH, INC.**  
SAN BRUNO, CALIFORNIA

# Motor - Gear - Trains

3:1 to 150,000:1 Ratio Range • Up to 18 Foot Pounds Torque

- Motors available: DC, 60 or 400 cycle, PM, split series, series, shunt, single phase and 2-phase. All are reversible.
- Available with either governor or brake.
- 1000 hour life minimum.
- Designed to meet MIL-E-5272A.
- Precision gearing throughout.
- Can be furnished up to 125°C.
- Designed for continuous duty or intermittent duty applications.

# CINCH

## NEW DEVELOPMENTS IN PRINTED CIRCUIT SOCKETS:

These sockets for the three types of receiving tubes. Miniature, Flat Press and Button.

The contacts are so spaced that they can be mounted in an incremental drill pattern. This fact together with the exact precision and uniformity of Cinch sockets make them ideal for automatic assembly.

**No. 22920**—7 contact miniature molded vertically mounted socket with JAN type shield base. Mica insulation. Silver plated phosphor bronze contacts drop through .062" dia. clearance holes arranged on a .1" X and Y axis.

**EXP-9553** — 8 contact button base subminiature molded, vertically mounted socket. Mica insulation. Silver plated beryllium copper contacts drop through .070" dia. clearance holes arranged on a .1" X and Y axis.

**EXP-9553A**—Same as above except insulation to withstand temperatures above 200° Centigrade.

**No. 22024**—7 contact flat press subminiature molded, vertically mounted socket for conventional wiring. Assembled with a special shield base to accept a subminiature shield with the "J" lock. Flat sided retaining nuts and screws are provided for mounting. Mica insulation. Silver plated beryllium copper contacts.

**No. 22023**—Same as above except insulation to withstand temperatures above 200° Centigrade.

**No. 22022** — 8 contact button base subminiature molded vertically mounted socket for conventional wiring. Assembled with special shield base to accept a subminiature shield with the "J" lock. Mica insulation. Silver plated beryllium copper contacts.

**No. 22021**—Same as above except insulation to withstand temperatures above 200° Centigrade.

**EXP-9542**—7 contact miniature molded right angle socket with JAN shield base. Mica insulation. Silver plated beryllium copper contacts drop through .062" dia. clearance holes arranged on a .1" X and Y axis.

EXP-9542

**EXP-9561** — 7 contact flat press subminiature molded right angle socket. Mica insulation. Silver plated beryllium copper contacts drop through .046" dia. clearance holes arranged on a .1" X and Y axis.

**EXP-9561A**—Same as above except insulation to withstand temperatures above 200° Centigrade.

**EXP-9562**—8 contact button base subminiature molded, right angle mounted socket. Mica insulation. Silver plated beryllium copper contacts drop through .046" dia. clearance holes arranged on .1" X and Y axis.

**EXP-9562A** — Same as above except insulation to withstand temperatures above 200° Centigrade.

# SOCKETS

## MINIATURE SOCKETS

Saddles and shield bases of these Cinch miniature sockets are brass, nickel plated. All contacts are silver plated; tails are hot tin dipped. Molded castings are type MFE material; ceramic castings are grade L4B material or better.

## NOVAL SOCKETS

The saddles and shield bases of Cinch noval sockets are brass, nickel plated. Contacts are silver plated; tails are hot tin dipped. Molded castings are type MFE material; ceramic castings are grade L4B or better.

## CINCH MIL SOCKETS MEET AND SURPASS RIGID MILITARY REQUIREMENTS. MIL SHIELDS:

# JONES

## JONES PLUGS AND SOCKETS

Jones 300 Series are small in size with good separation between contacts. Made in two to thirty three contacts. Plugs and sockets are polarized. A popular, inexpensive connector adaptable to a thousand uses. Phosphor bronze "knife switch" socket contacts engage both sides of heavy brass plug contacts for positive connections. Molded Bakelite insulation. Can also be supplied with contacts that will take the Faston or Quick Connect solderless terminals.

Jones 2400 Series are designed for highest electrical and mechanical efficiency. Ideal for Public Address, Radio, Electronic Controls, Vending Machines, or wherever a quality connector is required. Maximum creepage distances between contacts and contact to ground makes this series a must when Underwriter label is required. Made in 2, 4, 6, 8, 10 and 12 contact. Molded Bakelite insulation. Caps are of steel with black wrinkle finish.

Jones 202 Series: Shielded type low loss plugs and sockets for high frequency connections. Ideal for antenna connections, photo-cell work, microphone connections. Phosphor bronze knife-switch type socket contacts engage both sides of flat plug contact—double contact area. Plugs and sockets have molded Bakelite insulation.

## JONES FANNING STRIPS

Jones fanning strips simplify connections to the barrier strips. Makes the replacement of units an easy matter and assures correct connections after servicing. Supplied with straight or right angle terminals.

The steadily expanding variety of plugs and sockets produced at the JONES Division has a wide range of the highest quality electrical and mechanical parts to efficiently fill every need.

## JONES MEANS PROVEN QUALITY!

Hundreds of standard JONES terminal panels available; complete latest equipment for specials, send your specifications for prompt quotation.

No. 6-172

Jones 172 Series—A miniature barrier strip  $\frac{3}{8}$ " wide with terminals mounted on  $\frac{1}{4}$ " centers. Screw size: 2-56 x  $\frac{1}{4}$ ". Molded Bakelite insulation. Made in one to fourteen contacts. Also supplied in the  $\frac{3}{4}$ W and W types.

No. 6-173

Jones 173 Series—A small single contact barrier strip with terminals mounted on  $\frac{3}{8}$ " centers. Made in one to eight contacts. Screw size: 4-40 x  $\frac{5}{16}$ ". Molded Bakelite insulation.

The components are shown here for variety, types and uses, and are not necessarily in comparative size.

## BLUE RIBBON CONNECTORS

### Barrier Polarization Type Insure Quick Positive Contact With Ease

The Wedge principle with the strong spring action of the contacts holds the connector in positive contact, and provides ease of insertion and withdrawal. The protective barriers between ribbon contacts insure the spacing.

(Above) Improved Military Type; design of plug and socket casting eliminate any possible breakage.

40 contact connector "A" style for applications where plug is "live voltage" side.

# CINCH

## COMPRESSION TYPE MICRO CONNECTOR

28, 32, 40, 48 and 52 contacts. Center engaging screw with wing nut or screw driver slot and spring action contacts — permits easy, quick and reliable engagement and disengagement. Receptacle side available for pressurized applications.

52 contact connector "B" style for applications where receptacle is "live voltage" side.

# GRAPHIK CIRCUITS

Graphik Circuits Reduce Wiring Costs • Cut Down Assembly Time • Eliminate Errors • Miniaturize • Guarantee Uniformity

Solderless wrapped connections. CINCH Graphik Circuits is tooled to provide wire wrap terminals on etched circuit boards. Reduction in cost of component assembly is accomplished by speeding up production and the elimination of soldering. Complete facilities for engineering production design, drafting, artwork, development, prototyping and manufacturing photo-printing, silk screen, etching, machining and punching, fabricating, mechanical assembly, electrical assembly, encapsulating, quality control, and fluoroscopic inspection.

Developed and produced for right angle application. The right angle board accommodates all of the CINCH socket sizes, and can be bonded with epoxy resin or snapped in and retained by newly developed CINCH hardware. All units meet or exceed Military Specifications. Sockets, terminals and other hardware installed to customer specifications using the latest equipment in automatic assembly.

Eight different contact tail terminations provide for use of A.M.P. "78" or "98" solderless taper tab connections. A standard solder slot is also provided.

The 25 contact printed wiring edge connector.

Centrally located plants at Chicago, Illinois; Shelbyville, Indiana; LaPuente, California; St. Louis, Missouri.

## BARRIER STRIPS FOR SOLDERLESS TERMINALS.

The 164, 141 and 142 series are now available for the solderless "Faston" or "Quick Connect" terminals. Illustration shows various angles that the terminals can be supplied. The terminal is of the extruded type so that it can be tapped making the addition of screw terminals. A most flexible line of barrier strips for every requirement.

RIGHT ANGLE BOARD

Quantity production of low loss Mica components. Finest molding machines and equipment operated under most experienced guidance and engineering supervision with adequate and unequalled facilities has advanced CINCH to the foremost in production of low loss Mica components in quantity.

CINCH will design, or re-design, components to fit specific needs, and will assist in the assembly of components through proven automation technique.

SYNCHROS  
*are our business*

In addition to the wide variety of standard units shown, we also produce an equally large number of special units on special order in production quantities for which we are already tooled.

For more complete information on our synchros including Typical System Measurements, write for booklet SC-3 or phone MADison 6-2101 (Suburban Philadelphia).

## NAVY BuOrd SYNCHROS

1/2 Actual Size

Contact Clifton Precision for standard Navy BuOrd units. If your specification requires conformance to BuOrd drawings and your system can take advantage of exceptional accuracy, CPPC can hold extra close error spread and accuracy tolerances. See CG-15-MS-1 in the tables.

## PRECISION RESOLVERS

Precision Computing Resolvers with functional accuracies of the order of .1% and transformation ratios 1:1 are currently being constructed in the size 15 class for special applications. Contact CPPC for applications involving the use of Precision Resolvers in all sizes.

# SIGMA SENSITIVE RELAYS

Prices shown are list, for quantities from 1-19. Discounts are available for quantities above 19, unless otherwise noted. Price range is stated, since the price of a particular relay depends on coil resistance, mounting style, enclosure, etc., and is subject to change.

GENERAL CLASSIFICATION	SIGMA SERIES	ELECTRICAL CHARACTERISTICS				APPLICATION NOTES
		Maximum Contact Arrangement	Contact Rating (amp.)	Sensitivity Range (mw. unless specified)	Price Range (List)	
General Purpose Sensitive DC	4	SPDT	2.0	20 or 50	5.50-11.50	Medium price, sensitivity, and precision.
	5	SPDT	.25-3.0	1-100	7.50-22.25	High sensitivity, shock resistance, stability, and vibration resistance.
	11	SPDT	1 or 5	50 or 200	1.50- 2.20	Low price, small, light, four mounting styles, including one for printed circuits. Unenclosed form only.
	41	SPDT	1-5	35-200	3.50-10.15	Low price, long mechanical life.
	42	DPDT	2 or 5	100 or 200	5.75-13.75	Double-pole version of Series 41 with many of its features.
Miniature General Purpose DC	22	SPDT or DPDT	1 or 2	20-80	16.00-22.50	Miniature hermetically sealed relay. Vibration and shock resistant.
	26	SPDT	.5-2	4-20	6.80-13.80	"Stripped down" 22; can be used without enclosure; small, considering sensitivity.
Sensitive AC	5	SPDT	0.5-3	20-150	10.00-19.75	Series 5 DC with internal rectifiers for various AC voltages.
	41	SPDT	2 or 5	.06-0.4 v-a	3.50- 9.45	Sensitive shaded pole, low price, long life, extremely quiet; voltage or current-operated, 16 — 400 cycle versions.
	42	DPDT	2 or 5	0.3 or 0.5 v-a	5.75-16.00	More economical of power than most competitive types; (Also, see note above.)
Polar 3 Position (Null-seeking, center-stable)	6	4PDT	2 or 5	8-44	22.00-38.00	High gain (ratio of controlled power to input power); also available as spring biased (Form Y) and latching or side-stable (Form Z).
	23	SPDT or DPDT	2.0	6-24	30.00-36.00	Compact, sensitive; center-stable by virtue of magnetic configuration; also available biased polar (Form Y).
	72	SPDT	1.0	0.2-1.0	30.00 up	Center-stable version of high speed pulse relay. Best for "dithering" systems. Proportional armature motion without detent.
High Speed	41	SPDT	1.0	35-150 (static)	3.50-10.15	Keying relay; clean, bounce-free pulses on normally open circuit at speeds up to 100 pps.
	72	SPDT	0.5	0.15-1.5 (static)	30.00 up	Polar, side-stable (Form Z). Fast clean switching up to 500 operations per second for telegraphy, computers, etc. Life of 500,000,000 operations at 60 ma. 120VDC inductive load without maintenance.
25 Amp. Sensitive Contactors	51	SPST (NC)	25	100	9.00- 9.50	Developed for switching 10 amp. incandescent lamp loads, with inrush ratio of 10:1. Coil circuit signal failure closes circuit, thus useful in fail safe alarms. Unenclosed only.
	61	DPDT	20	225 or 450	18.00-26.50	Polarized permanent magnetic latching contactor; useful in battery-energized control systems, production machinery controls, etc.
Relays for Radio-Controlled Models, Toys, etc.	4F	SPDT	2.0	20 or 50	5.50- 6.50	Medium sensitivity, high reliability, easy mounting and adjustment. Balanced armature — operates in any position.
	5F	SPDT	.025-3	1-100	7.50-12.50	Extreme precision; rugged — undamaged by 500 g shock. Good in condenser time delay circuits, holding during pulse trains.
	11F	SPDT	1 or 5	50 or 200	1.50- 2.20	Midget, low cost DC relay. For its ratings, a good combination of high quality and low cost.
	26F	SPDT	0.5	4	6.80- 9.80	New, miniature version of Series 5 designed especially for low power R-C circuits. Rugged, weighs 2 oz., allows use of less plate current thus prolonging tube life.
	41F	SPDT	1 or 5	35-200	3.50- 4.85	More switching capacity than 11F. Special versions to handle even higher load currents.

## OTHER SIGMA PRODUCTS

DEFINITION	SIGMA DESIGNATION	PRICE RANGE (List)	BASIC DESCRIPTION
High Speed electrically-operated counter	Cyclonome* Pulse Counter Series 9	85.00 up	Counting speed 8000/min. (max.). Stepping motor with one moving part drives 6-figure Veeder-Root register.
Stepping Motor	Cyclonome* Stepping Motor Series 12	35.00 up	Used in Series 9 Counter above. Analogous to synchronous AC motor capable of starting and stopping each half cycle, at frequencies from 0-130 cps. Can be arranged to operate on DC pulses.
Magnetic-Amplifier Relay	Series 8000	60.00 up	Magnetic amplifier combined with Sigma relays. For control of 1 amp. outputs on inputs too low to operate relays directly, in the order of .1 microwatt.
CdS Photocell-Relay Unit	CdS Photorelay, Model 1	12.00	Tubeless, plug-in control package consisting of broad area cadmium sulfide cell and Series 41 relay. For "light-no light" applications such as flame-out controls, elevators, automatic bottle washing machines.
Telegraph Relay Test Set	Model 4501 Test Set	325.00 net only	For operational checking of Sigma Series 72, 7; WE 255A, WE 215, and similar telegraph relays. Measures operating values, bias, contact efficiency, insulation. Standard relay rack panel.

## DEFLECTION YOKES TRANSFORMERS

**For... Military and Commercial Avionics**

Leading system manufacturers now depend on CELCO for their difficult and critical applications on many of these components.

Our design development, production and quality control experience — combined with CELCO's highly skilled operators, production foremen and engineers — comprises a team that has proven their outstanding performance for quality components.

Apply the CELCO "know-how" to your production requirements!

**Celco**

We specialize in the design and manufacture of **PRECISION DEFLECTION YOKES** for military and commercial applications. CELCO can give you immediate engineering evaluation on your critical display problems.

**Celco**

**COILS FOR TRAVELING WAVE TUBES** — precision wound for minimum transverse magnetic fields. High temperature windings are a CELCO engineering development —

Unit illustrated is 12" long.

**Celco**

**HIGH TEMPERATURE TRANSFORMERS** — high temperature windings and impregnations on CELCO TRANSFORMERS permit high operating temperature with reduced size and weight.

**Celco**

**MINIATURE TRANSFORMERS & SATURABLE REACTORS** — specially produced for the Transistor and Plug-in type amplifier assembly. CELCO designs these units wherever reduction in size and weight must be made.

**Celco**

**TOROIDAL COILS** — CELCO is equipped to cover an extremely wide range of toroidal windings.

No. 50 wire on a .062" ID Toroid

No. 15 wire on 9" OD Toroid

and Production of:

# MAGNETIC AMPLIFIERS AIRCRAFT MOTOR COMPONENTS

.. Nuclear and Computer Industries

**Celco**

**MAGNETIC AMPLIFIERS**—encapsulated with epoxy resins or silicone rubber. CELCO experience with proper treatment of Toroidal Coils assures designed performance.

**Celco**

**TOROIDAL COMPONENTS** — for use in system assemblies. Sub-assemblies of chokes, Transformers and Saturable Reactors are manufactured at CELCO for packaging into a single unit.

**Celco**

**PRECISION TRANSFORMERS** — CELCO develops Precision Transformers for such applications as Computer Components with high accuracy of turns ratio and output voltages.

**Celco**

**HERMETICALLY SEALED MAGNETIC AMPLIFIERS & TRANSFORMERS** — with various types of terminations, evacuation and inert gas pressurization give CELCO components minimum weight with high-breakdown voltage resistance.

**Celco**

**R.F. CHOKES, TRANSFORMERS**—specialized universal winding types of coils and assemblies. These CELCO windings are used when minimum distributed capacitance is required and space does not permit use of mechanical supports.

**Celco**

**MOTOR COMPONENTS**—Centrifugally cast squirrel cage rotors for low inertia motors, armatures, stators, field coils and special type rotor coils — are a CELCO production specialty.

Call DAVIS 7-1123 — for immediate engineering evaluation price and delivery quotations on any of these component requirements.

Your plant is only hours away by the Celco Air Fleet

# DESIGN ACHIEVEMENTS WITH SUPRAMICA\* ceramoplastics

## SUPRAMICA ceramoplastics . . . . .

### MOLDED OR MACHINABLE HIGH TEMPERATURE INSULATION

Supramica ceramoplastics, the world's most nearly perfect high temperature insulations, are formulated with SYNTHAMICA\* synthetic mica. Supramica possesses high temperature and thermal shock resistance, and complete dimensional stability. Thermal expansion coefficients are the same as steel. They have low electrical loss, excellent arc resistance, high dielectric strength, and are impervious to moisture, oil and organic solvents, with permanent resistance to radiation.

**SUPRAMICA\* 560** — New insulation for continuous operation at 500° C (932° F). Lightweight material can be precision molded with fragile inserts . . . specified for conditions which no other material can meet! Specific gravity similar to that of aluminum or mineral-filled polyesters . . . perfect for relay bases, connectors, radomes, tube sockets and other components for high temperature use.

**SUPRAMICA\* 555** — Precision-molded ceramoplastic having high-temperature endurance up to 750° F. Moldable with or without inserts.

**SUPRAMICA\* 500** — Compression-molded ceramoplastic sheets and rods for use at temperatures up to 900° F. Readily machinable; not precision moldable. Inserts must be cemented.

High-temperature relay and switch parts precision molded of SUPRAMICA 560 ceramoplastic

Stable tuner base precision molded from SUPRAMICA 555 ceramoplastic with fragile silver ribbon insert

Insulated spark gap cover plate fabricated from SUPRAMICA 500 ceramoplastic

High shock potentiometer parts precision molded with steel supporting inserts — MYCALEX 410 glass-bonded mica

Radar insulating parts fabricated from MYCALEX 400 glass-bonded mica

Circuit breaker arc chute fabricated from MYCALEX 385 glass-bonded mica

## MYCALEX\* glass-bonded mica . . .

### MOLDED OR MACHINABLE ELECTRICAL INSULATION

Mycalex glass-bonded mica formulations have been recognized for many years as high-temperature, high-frequency insulation . . . impervious to oil and water, resistant to high temperatures, with total, permanent dimensional stability and thermal expansion coefficient equivalent to that of insert metals . . . resistant to radiation.

**MYCALEX 410\*** Glass-bonded mica precision-molded with or without inserts, for applications involving temperatures up to 650° F.

**MYCALEX 400\*** Standard compression molded glass-bonded mica for operating temperatures to 850° F. Readily machinable, but not moldable. Inserts must be cemented.

**MYCALEX\* 385** Glass-bonded mica with excellent resistance to circuit breaker arcing and thermal shock, for continuous operating temperatures up to 700° F. Readily machinable, but not moldable in intricate shapes.

**MYCALEX\* K** (machinable) and **KM** (moldable) Glass-bonded mica capacitor dielectrics with higher dielectric constant indicated by numbers 10, 20, 30.

\* "SUPRAMICA", "MYCALEX", "400", "410", are registered trade-marks of MYCALEX CORPORATION OF AMERICA; "500", "555", "560" and "385" are trade-marks of MYCALEX CORPORATION OF AMERICA

"SYNTHAMICA" is a trade-mark of SYNTHETIC MICA CORPORATION, a subsidiary of MYCALEX CORPORATION OF AMERICA.

# AND MYCALEX\* glass-bonded mica . . . . .

MYCALEX TM Commutation Switch with commutator plates precision molded of SUPRAMICA 555 ceramoplastic. Plate is CP-346, 2-poles, 360 contacts.

## MYCALEX TM telemetering switches

WITH SUPRAMICA CERAMOPLASTIC COMMUTATOR PLATES ASSURE RELIABLE OPERATION UNDER EXTREME CONDITIONS

Precision-molded Supramica ceramoplastic commutator plates have introduced a degree of accuracy and sustained dependability never before approached in telemetry. Where warpage of only .0002" of the commutator plate will distort and destroy the value of the signal, these precision switches withstand extremes of temperature, altitude, shock and vibration and deliver a clean, unvarying signal . . . tests show completely satisfactory performance of these switches after more than 1000 hours at 1200 RPM.

In military and industrial applications, Mycalex TM Telemetering Switches with Supramica ceramoplastic commutator plates have made significant contributions to the reliability of electronic equipment.

MYCALEX ELECTRONICS CORPORATION

## SYNTHAMICA\* synthetic mica . . . .

Available in commercial quantities, as powder, flake or crystal, and in chemically bonded sheets for all applications in the electronic, communications and related industries. Manufactured from readily available native raw materials, Synthamica synthetic mica is an important contribution to the development of military and civilian electronics.

Synthamica synthetic mica is chemically pure, hydroxyl free, and will withstand temperatures almost twice as high as its natural counterpart. One of the outstanding properties of this crystal clear material is the freedom from outgassing at elevated temperatures and pressures.

SYNTHETIC MICA CORPORATION

A Subsidiary of MYCALEX CORPORATION OF AMERICA

## MYCALEX tube sockets . . . . .

High temperature tube sockets made from Supramica ceramoplastic and Mycalex glass-bonded mica are produced under exclusive license of Mycalex Corporation of America.

Supramica 560 ceramoplastic tube sockets have successfully passed operating tests at 500° C.

MYCALEX TUBE SOCKET CORPORATION

Crystals of SYNTHAMICA synthetic mica

MYCALEX precision molded tube sockets withstand high temperatures and rugged service. Standard miniature and subminiature types.

## PRECISION IS OUR BUSINESS

900  
series

The new standard of high-precision potentiometers. Advantages include greater accuracy, finer resolution, lower torque, longer life and better performance under adverse environmental conditions. 48 standard models meet most special design requirements.

1100  
series

Precision potentiometers that offer your products a price advantage in today's competitive markets. Engineered for easy installation with readily accessible terminals. Accurate, dependable, long lived.

205  
series

Long a favorite for both military and commercial purposes. Has proved itself exceptionally rugged and dependable in years of use on many mobile and stationary applications.

# BORG MICROPOTS

*precision potentiometers with*

**UNLIMITED DESIGN APPLICATIONS...**

**MORE PROFITABLE PRODUCTION POSSIBILITIES**

Your job is made easier when you use Borg Micropots. They're versatile... they're flexible. Standard models can be readily adapted to meet the special requirements of a wide variety of applications. What is more they have many exclusive advantages: — — absolute linearity, permanent accuracy, long life, and dependability. You can rely on them to meet your

most rigid commercial and/or military specifications. They're readily available too. Production has been stepped up to assure prompt delivery of any model in any quantity. We invite consultation with your Borg "Tech-Rep". His helpful advice can often save you time and money. Write us today for his name and address. It will pay you to know him.

**STANDARD AND CUSTOM-DESIGNED MINIATURE, HI-TEMP SERVO SYSTEMS AND COMPONENTS**

The Edison Instrument Division is now offering design engineers an extensive line of miniature and subminiature Hi-Temp Servos Motors and Servo Components... in addition to a complete facility for custom designed units and servo sub-systems.

Precision production and rigid quality control inspection have made these "customized" components possible. In addition to these special units, Edison also manufactures an extensive line of standard servo motor and servo motor-generator combinations from size 8-up.

EDISON SIZE 8 SERVO MOTOR

**OPERATING CHARACTERISTICS:**

1. Type of motor: Two phase servo
2. No load speed (min. RPM): 6500
3. Stalled torque (min. oz. in.): .30
4. Power input at stall (nom. watts/phase): 3.1
5. Speed at max. power output (RPM): 4000
6. Torque at max. power output (oz. in.): .18
7. Theoretical acceleration at stall: 20,600 radians/sec.<sup>2</sup>
8. Time constant: .036 sec.
9. Duty: Intermittent at stall

TYPICAL EDISON MAGNETIC RECORDING HEAD

EDISON SYNCHRO CONTROL TRANSFORMER S211-2-1

**NOMINAL CHARACTERISTICS**

- Input Voltage: 11.8 volts, 400 cycles, single phase.  
Excitation supplied by the stator output voltage from a Presyn transmitter.
- Rotor Resistance: 90 ohms
  - Brush Contact Resistance: .5 ohm
  - Stator Resistance: 15 ohms
  - Rotor Output Voltage: 22.5 volts
  - Accuracy: 7 minutes max.
  - Operating Temperature: -55°C to +95°C
  - Friction at 25°C: 3 gm. cm.
  - Shaft End Play: .0015 inch max.
  - Shaft Radial Play: .0005 inch max.

Edison also manufactures a quality line of synchro transmitters, synchro receivers, synchro resolvers, and synchro differentials.

**HERMETICALLY SEALED THERMOSTATS**

Exact temperature control requirements can be fulfilled using Edison's precision-made, bimetallic thermostats. These hermetically sealed units, filled with an inert, arc quenching gas, are ideal for such critical applications as crystal oven ambient control and other electronic component requirements. Edison thermostats have been used for many years as fire detectors in marine and other industrial applications because of their lifetime protection from corrosion and contamination.

S1-1A  
S1-2A

**STANDARD TYPES**

- S1-1A**  
Manufacturing tolerance: ±0.5°C  
Control sensitivity: Will hold temperature within ±0.6°C at low contact load when properly applied  
Maximum load: 1.0 ampere  
Maximum voltage: 250 a-c  
Maximum temperature: 150°C  
Diameter: .388 inch  
Length: 2 1/2 inches
- S1-2A**  
Manufacturing tolerance: ±2.5°C  
Maximum load: 0.5 ampere;  
1.0 ampere in alarm service  
Maximum voltage: 250 a-c  
Maximum temperature: 190°C  
Diameter: .388 inch  
Length: 2 1/2 inches

D8-2A

- D8-2A**  
Manufacturing tolerance: ±2.5°C  
Maximum load: 8.0 amperes  
Maximum watts: 1000  
Maximum voltage: 250 a-c  
Maximum temperature: 320°C  
Diameter: .550 inch  
Length: 2 3/4 inches

MECHANICALLY SEALED MINIATURE TYPE MODEL 210

- Manufacturing tolerance: ±5°F  
Maximum load: 1 ampere at 115 volts a-c;  
0.5 ampere at 115 volts d-c  
Maximum voltage: 125 a-c or d-c  
Maximum temperature: 350°F  
Adjustability: ±60°F from original setting  
Diameter: .318 inch  
Length: 1 1/4 inches

When ordering any thermostat give following information:  
Operating voltage and current  
Temperature setting  
Contact arrangement — are contacts to open or close on rising temperature?  
Medium to be used in Load — resistive or inductive

# A. Edison

INSTRUMENT DIVISION WEST ORANGE N.J.

## FOR AIRCRAFT, MISSILES AND INDUSTRY

### NEW EDISON MINIATURE TIME DELAY RELAY - MODEL 250

One of the oldest names in relays continues to improve the state of the art . . . now from Edison, a new miniature time delay relay specifically designed for missile and jet aircraft applications. This vibration resistant unit incorporates many design features.

MODEL 250

#### SPECIFICATIONS:

- 1) virtual elimination of contact chatter up to 1500 cps at 10 g's.
- 2) no resonance to 500 cps.
- 3) ambient compensation between  $-65^{\circ}\text{C}$  and  $+85^{\circ}\text{C}$  . . . operation at higher temperatures when necessary.
- 4) contacts rated for 1 ampere at 27.5 VDC or 3 amperes at 115 volts AC.
- 5) extra-rigid construction for exceptionally high contact pressure.
- 6) can be mounted in any position without affecting operating characteristics. 7-pin plug-in or solder hook base.
- 7) hermetically sealed.

For more information, write for Bulletin #250.

### EDISON STANDARD OCTAL TIME DELAY RELAY - MODEL 501

Ten years of Edison research and engineering have produced a widely-accepted line of hermetically sealed thermal relays . . . more than a half million have already been manufactured for use in cathode protection circuits, autopilots, gyro stabilizers, and other electronic equipment.

MODEL 501

#### SPECIFICATIONS:

- Time delays: 2 seconds to 300 seconds  
Heater voltages: 6.3, 26.5, and 117 (intermediate voltages available in special circumstances)  
Heater input: 5 Watts nominal (continuous excitation)  
Contacts: SPST normally open or closed.  
Rated for 6 amperes max. at 450 volts a-c or d-c.  
Ambient: compensated for  $-60^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$   
Shock: resists impact of 50 g's  
Vibration: resists 1/16" overall amplitude at 55 cps  
Tolerances: heater voltage: positive contact operation with variation of  $\pm 10\%$ .  
Operating time at  $25^{\circ}\text{C}$ :  $\pm 15\%$  max.  
Weight: 1 1/4 to 2 1/4 oz.  
Sealed height: 3 1/4"  
Diameter: 1.275" max.  
Base: intermediate octal

For more information, write for Bulletin #2007.

### EDISON SENSITIVE MAGNETIC RELAY

Polarized operating characteristic of this magnetic DC Relay makes it ideal for use as a null detector in ordinary bridge circuits. It can operate directly from a thermocouple or photocell. Both coils brought out to separate pins in base make it easy to calibrate and versatile to apply. Hundreds of thousands of these relays are now in use in airborne control equipment.

MODEL 220

#### SPECIFICATIONS:

- Contacts: SPST or SPDT normally open or closed.  
Rated for 1/3 ampere at 28 volts d-c.  
Hermetically sealed: Model 220  
Gasket sealed: Model 219  
Vibration and shock resistant: relay unenergized will withstand shock of 50 g's in all planes without damage or change in calibration  
Closing current: contacts close on input currents from 30 microamperes d-c to 12.5 milliamperes d-c. Lower closing currents available in special circumstances.  
Coils: Formvar-coated copper. Resistances from 0.5 ohm to 23,600 ohms. Normal closing power may be increased 10,000 times without adverse effects.  
Weight: .15 lb. max.  
Sealed height: 2-1/32" max.  
Base: plug-in, printed circuit or solder hook

For more information, write for Bulletin #3037.

### EDISON CURRENT RATIO INDICATOR - MODEL 222-1J

Designed with a DC galvanometer type movement having fixed coils and a moving magnet, this meter indicates the ratio of two direct currents.

With equal current in both field coils the pointer will indicate unity ratio (1). Increasing one current over the other pulls the pointer right or left of center to indicate a ratio. A proportional increase or decrease in current through both coils does not affect the indication because the pointer assumes the resultant rather than the absolute measure of either magnetic field.

MODEL 222-1J

#### SPECIFICATIONS:

- Accuracy: Scale tolerances are based on an angular tolerance of  $1^{\circ}$ .  
Coil Current Strength: For accurate calibration the current in either coil should be between 2 ma. minimum and 50 ma. maximum.  
Depth: 3-1/16"  
Dial Diameter: 2 3/4"

# OTHER EDISON ELECTRONIC AND ELECTRICAL CONTROL COMPONENTS AND EQUIPMENT

## EDISON RESISTANCE TEMPERATURE DETECTORS

Edison RTD's are designed to measure temperature in all types of industrial and military applications. They form one arm of a Wheatstone bridge in ratio resistance temperature indicators, overtemperature alarm systems and systems for temperature control.

Model 232N90-2 (MIL-B-7990) hermetically sealed, stem-sensitive.  
Model 232N90-4 Temp. range:  $-70 +300^{\circ}\text{C}$ .

Model 176N90D (Dual winding) hermetically sealed, stem-sensitive.  
Temp. range:  $-70 +300^{\circ}\text{C}$ .

Model 179N90 (MIL-B-7370A) hermetically sealed, stem-sensitive.  
Temp. range:  $-70 +300^{\circ}\text{C}$ .

Model 233N50 tip-sensitive, cylinder head. Temp. range:  $-50 +300^{\circ}\text{C}$ .

## HERMETICALLY SEALED CURRENT LIMITING SWITCH

Designed particularly to protect input circuits of radio receivers from over-currents induced by nearby transmitting equipment, this SPST normally closed, hot wire switch limits the current flow through the wire when a critical value is revealed.

### SPECIFICATIONS:

Operating current: 125 milliamperes  $\pm 25$   
Ambient: Compensated for 0 to  $90^{\circ}\text{C}$   
Shock: No damage under 60 g in all directions  
Diameter: 9/16 inch nominal  
Length: 2 1/8 inches

## FIRE AND OVERHEAT SYSTEMS FOR AIRCRAFT

Edison Fire and Overheat Systems are available in three styles including continuous cable, thermocouple, and RTD's. Each style is approved for both military and civil aircraft in accordance with the latest applicable specifications.

## EDISON MONITORING SYSTEMS

### SPECIFICATIONS:

Control Assembly  
Voltage: 28 volts d-c\*  
Dimensions: 3 1/2 x 2 1/2 x 1 5/8 inches (approx.)  
Weight: 0.8 lb. (approx.)  
\* also available for 115 v. a-c 400 cycle power.

TYPE B CONTINUOUS CABLE FIRE DETECTION

(SAME CONTROL USED WITH RTD'S GIVES ALARM AND/OR INDICATION OF OVERHEAT CONDITIONS)

## PRESSURE INDICATING SYSTEMS FOR AIRCRAFT

This system gives the pilot a continuous indication of oil pressure for jet and/or reciprocating type engines. This non-electronic, shock proof unit can be mounted directly on the engine without external tubing connections. Pressure signal is carried through three copper wires to the indicator on the instrument panel.

### SPECIFICATIONS:

**SYSTEM**  
Power: 26 volts single phase 400 cps  
Accuracy:  $\pm 2.75\%$  full scale  
Pressure altitude: 85,000 ft. (0.65" Hg)  
Distance between components: 500 ft. of AWG20 lead wire between indicator and transmitter will affect reading no more than 1.0%

**TRANSMITTER, MODEL 218-100**  
Power consumption: 0.9 watt max.  
Weight: 2.0 lbs.  
Diameter: 2-3/16"  
Length: 4-13/16" overall  
Pressure range: 0 to 100 psi  
Environmental  
Max. temperature:  $+232^{\circ}\text{C}$   
Low temperature:  $-65^{\circ}\text{C}$   
Vibration: Passes MIL-E-5272, Procedure II 5.0 to 500 cps continuously changing  
Acceleration: 20 g

**INDICATOR, MODEL 217-100**  
Power consumption: 0.6 watt max.  
Weight: 0.5 lb.  
Dial: standard 2-inch diameter  
Length: 2 1/2" overall  
Pressure range: 0 to 100 psi  
Environmental:  
Max. temperature:  $+71^{\circ}\text{C}$   
Low temperature:  $-65^{\circ}\text{C}$   
Vibration: Passes MIL-E-5272, Procedure IV 5.0 to 55.0 cps, amplitude .018 to .020"

TRANSMITTER, MODEL 218-100

INDICATOR, MODEL 217-100

## OMNIGUARD TEMPERATURE INDICATING AND ALARM SYSTEMS FOR INDUSTRY

Omniguard is specifically designed for constant protection against damage caused by excessive temperatures throughout industry. This monitor unit is designed in modular units of 4 points each. A single indicator plugs into any point for temperature reading. This inherently simple system has no moving parts (except for alarm relay contacts), no electronic tubes and no expensive wiring between components. A small plug-in control box, an indicator and resistance temperature detectors make up the entire system.

### SPECIFICATIONS:

Voltage: 115 volts, 60 cycles  
Power drain: 25 VA maximum  
Voltage error:  $\pm 2^{\circ}\text{F}$  maximum from 100 to 130 volts  
External alarm: 1 per monitor. Contact rating 150 watts or 3 amp. non-inductive load.  
Indicator requires no electrical connections. Power and resistance reading is carried through reeled cord when plugged into jack in face of monitor.

# B.F. Goodrich

## Best long range investment for indoor antenna testing and free space chambers

Manufactured to Military Specifications ... B. F. Goodrich Microwave Absorbers provide the most accurate reflection-free rooms for the measurement of microwave antenna patterns. As a result of thorough quality control and factory testing, B. F. Goodrich Microwave Absorbers consistently duplicate free space conditions indoors better than any other product.

In addition to outstanding electrical qualities, our absorber is light-weight, fire-retardant, easy to install. It will not deteriorate in performance when walked upon and has excellent water and weather resistant properties.

The material is currently being produced in a number of thicknesses providing broadband operation as low as 50 megacycles. Material can be furnished

List of B. F. Goodrich Broadband Absorbers			
Designation	Lowest Frequency*	Thickness	Maximum Reflection
12 CM	2500 mc	1½"-2"	2%
12 CM - 1%	2500 mc	1½"-2"	1%
12 CM - 30db	2500 mc	1½"-2"	0.1% at X-band. 2% elsewhere.
6 CM	5000 mc	1"	2%
30 CM	1000 mc	3½"-4"	2%
30 CM - 1%	1000 mc	3½"-4"	1%
60 CM	500 mc	7"-8"	2%
60 CM - 1%	500 mc	7"-8"	1%
100 CM	300 mc	10"-11"	2%
200 CM	150 mc	26"	2%
600 CM	50 mc	69"	2%
8 CM-glass fiber	3600 mc	1"-1½"	2%
4 CM-glass fiber	7500 mc	¾"	2%

Most of the above absorbers can be furnished with 0.1% maximum reflection at selected points in the frequency band.

\*All perform up to 30,000 mc

having less than 0.1% reflection at specific frequencies. For darkroom use, a special white compound can be applied to the surface of the pads to increase light reflectance.

When you're investing thousands, start right—specify B. F. Goodrich—the company with the *longest* experience and record for *consistently* high quality microwave material.

For new booklet on these absorbers write B. F. Goodrich Sponge Products, a division of The B. F. Goodrich Company, 386 Derby Place, Shelton, Connecticut.

*UAP-built*  
**heat exchanger,  
 chassis-case assembly for  
 compact pressurized airborne electronics\***

UAP dip-brazed heat exchanger is an integral part of the electronic components, chassis and principal structural member. All electronic components are mounted to the heat exchanger. Some assemblies dissipate heat from their surfaces to internal air circulated by a blower through the heat exchanger.

Others function as a "cold plate" by dissipating heat through their mountings by direct conduction to the cooling air flow. Ram air or refrigerated air may be used for cooling. The heat exchanger—electronic assembly may be removed from the case as a unit for ease of servicing.

*\*Unit shown designed by Ohio State University Research Foundation

# Looking for reliability?

Where there must be no slipups, there will be no slipups, if you depend on CTC.

These components are guaranteed unconditionally in quantities from one to millions.

For samples, prices, write CAMBRIDGE THERMIONIC CORPORATION, 438 Concord Ave., Cambridge 38, Mass. West Coast stocks maintained by E. V. Roberts & Associates, 5068 West Washington Blvd., Los Angeles 16 and 988 Market St., San Francisco, California.

## CTC

CAMBRIDGE THERMIONIC CORPORATION

makers of guaranteed electronic components  
custom or standard

### CTC QUALITY SHIELDED COIL FORMS

Miniaturized. Highly shock resistant. Mechanically enclosed, completely shielded for maximum reliability.

### CTC QUALITY CAPACITORS

Miniaturized Variable Ceramic Capacitors that outperform much bigger capacitors. (Extreme right): Stand-Off Capacitors with ceramic dielectric. Rugged R-F by-pass capacitors for high quality equipment. Shock-, vibration-, humidity-resistant.

### CTC QUALITY DIODE CLIPS

Seven different types, including spring-loaded units primarily for holding fragile diode pigtail leads from .005" to .085" in diameter. CTC also offers lines of quality battery clips and miniature plugs and jacks.

### CTC QUALITY TERMINAL BOARDS

Custom-made, standard all-sets, standard ceramics. Variety of materials available — paper, cloth, nylon, glass laminates — phenolic, melamine, epoxy, silicone resins. Moisture — and fungus-proofed.

### CTC QUALITY PERMA-TORQ COIL FORMS

Constant-tensioning devices for tuning cores of standard CTC ceramic coil forms. Keeps coils tuned as set despite shock, vibration.

### CTC QUALITY KNOBS AND PANEL HARDWARE

Selected materials, carefully processed and finished. Metal parts polished before plating. Hard-wearing surfaces, lasting lusters.

### CTC QUALITY INSULATED TERMINALS

Wide variety of stand-off and feed-through models in Teflon and ceramic. Extremely resistant to shock, vibration, moisture and temperature. Solder terminals hold even after prolonged soldering operations.

### CTC QUALITY PRINTED CIRCUIT COIL FORMS

Phenolic and ceramic types. Can be soldered after mounting. Available as forms alone or wound as specified. Two- to six-terminal models.

Model E-6-15A

**NOBATRONS** (Reg. U.S. Pat. Off.)  
 (low-voltage, high-current, regulated DC sources).  
 Closely regulated, efficient and stable DC supplies ideally suited for laboratory and industrial applications.

Models available (numbers indicate voltage & current)  
 E-6-15A, E-6-40A, E-6-100A, E-12-5, E-12-15, E-12-50A, E-12-75, E-28-5, E-28-10, E-28-30, E-28-70, E-28-150, E-48-15, E-125-10, E-200-5.

**ELECTRICAL CHARACTERISTICS**

Input 95-130 VAC, 1  $\phi$ , 50-60 cycles.  
 190-260 VAC, 1  $\phi$ , for E-28-70.  
 120/208, 3  $\phi$ , 4-wire wye for E-28-150.  
 Reg. accuracy  $\pm 0.2\%$  against line (105-125 volts or 200-240 volts).  
 $\pm 0.2\%$  against load (1/10 to full)  
 Ripple 1% max. at 60 cycles (0.1% with Filter Sections available for units up to 50 amps.)  
 Output voltage adjustment range 6 volt units, 5.4 to 7.7 volts.  
 E-12-50A, 9.0 to 17.6 volts.  
 E-12-75, 10.0 to 15.5 volts.  
 E-200-5,  $\pm 50\%$ .  
 all others  $\pm 10\%$ ,  $-20\%$   
 Recovery time 0.2 seconds on all models but E-28-70 (0.25 sec.) and E-28-150 (0.3 sec.)

Model SR2

**NOBATRON-RANGERS**

(wide-range-variable regulated DC sources).

These versatile and popular instruments have electrical characteristics similar to the standard Nobatrons, except that output voltage is continuously adjustable.

**ELECTRICAL CHARACTERISTICS**

Input 95-130 VAC, 1  $\phi$ , 50-60 cycles for SR30 and SR100.  
 190-260 VAC, 1  $\phi$ , 50-60 cycles for the SR2.  
 Reg. accuracy  $\pm 0.25\%$  at any voltage setting  
 Ripple 1% RMS max.  
 Output: Model SR100 SR30 SR2  
 VDC 5-135 5-30 100-300  
 Amps 1-10 3-30 1-10

Model Q6-2

**ALL-TRANSISTOR DC SUPPLY**

Newest development in light, compact low-voltage power supplies. Completely transistorized, the Q6-2 is a well-regulated DC supply with excellent ripple and transient response characteristics. Two units may be racked side-by-side in standard 19" rack.

**ELECTRICAL CHARACTERISTICS**

Input 105-125 VAC, 50-60 cps  
 Output 6 VDC, adjustable  $\pm 10\%$ \*  
 0-2 amperes  
 Regulation  $\pm 0.25\%$  for any combination of line and load changes  
 Ripple 0.02% max.  
 Time constant 100 microseconds max.  
 \* $\pm 20\%$  adjustment possible at half load.

Model T50-1.5

**T-NOBATRONS**

Variable voltage, low cost tubeless supplies especially designed for transistor circuit work. Excellent line voltage regulation and transient response for line and load pulses. For normal line voltage surges, the DC output voltage will remain within regulation limits.

**ELECTRICAL CHARACTERISTICS**

Model	T50-1.5	T60-5	T120-2.5
AC Input (60 ~, 1 $\phi$ )	95-130	95-130	95-130
DC Output Voltage (three ranges)	0-10	0-10	0-25
	0-25	0-25	0-50
	0-50	0-60	0-120
Output Current (amps.)	0-1.5	0-5	0-2.5
Regulation, line: 105-125 V	$\pm 1\%$	$\pm 0.5\%$	$\pm 0.5\%$
for wider input	$\pm 2\%$	$\pm 1.0\%$	$\pm 1\%$
Internal Resistance, typical (ohms)			
low-voltage range	1.2	.35	1.3
middle range	2.1	.55	2.0
high range	4.5	1.0	4.0
Ripple (mv)	50 max.	50 max.	50 max.
Time Constant (line)	0.08 sec.	0.08 sec.	0.08 sec.
(load)	0.15 sec.	0.15 sec.	0.15 sec.

**400-CYCLE INPUT NOBATRONS**

These instruments are not normal production items but are available on an extended delivery schedule.

**ELECTRICAL CHARACTERISTICS**

Output voltage and load range Model DE-6-40 — 6 VDC at 4 to 40 amperes.  
 Model DE-12-10 — 12 VDC at 1 to 10 amperes.  
 Model DE-28-10 — 28 VDC at 1 to 10 amperes.  
 Input voltage 105-125 VAC, 1  $\phi$ , 360-440 cycles.  
 Reg. accuracy  $\pm 0.25\%$ .  
 Ripple 1% RMS maximum.  
 Recovery time 0.2 seconds.

**FILTER SECTIONS FOR 50 & 60 CYCLE NOBATRONS**

The ripple voltage of all Nobatrons is 1% of the nominal output voltage setting, under worst conditions. This is adequate for most applications. If, however, less ripple is required, Filter Sections are available for use with units rated up to 50 amperes, which will reduce the ripple to 0.1%.

Model 600B

**B-NOBATRONS**

(high-voltage, low-current, regulated DC supplies).

Designed to meet the broadest technical and economical requirements. Conservatively rated, and requiring minimum service, these wide-range B-Supplies feature exceptional adaptability and rugged construction. The internal impedance figures given are from measurements in accordance with IRE specifications for measurement of power supply internal impedance.

**ELECTRICAL CHARACTERISTICS**

Model MA65A

**TUBELESS REGULATED DC SOURCES**

Designed for industrial applications and unattended installations, these regulated supplies utilize magnetic amplifiers and provide the utmost in long life and reliable maintenance-free service.

**ELECTRICAL CHARACTERISTICS**

Model	MA65A	MA640	MA1220	MA2850
Input (VAC, 60 ~)	105-125, 1 $\phi$	105-125, 1 $\phi$	105-125, 1 $\phi$	190-230, or 210-250, 3 $\phi$ 4 wire, wye
Output (VDC)	5.4-6.6, adj.	4.5-7.7, adj.	11-15 or 12-16, adj.	23-32, adj.
Load Range	0-5 amp.	0-40 amp.	0-20 amp.	0-50 amp.
Reg. accuracy	$\pm 0.2\%$ for line or load	$\pm 1.0\%$ for any combination of line and load		
Ripple	1% max.	1% max.	1% max.	3% max.
Recovery Time	0.15 sec.	0.20 sec.	0.30 sec.	0.50 sec.

Model MA6501

**PRECISION REGULATED TUBELESS DC SOURCE**

A transistorized precision regulated DC source utilizing magnetic amplifier principles. This highly-stable, temperature-compensated unit is Sorensen's new design for use with the Beckman Model DU Spectrophotometer.

**ELECTRICAL CHARACTERISTICS**

Input 105-125 VAC, 1  $\phi$ , 60 cycle.  
 Output #1 — 6 VDC adjustable internally  $\pm 5\%$ , 5 amperes load.  
 #2 — 6 VDC, 100 milliamperes load.  
 #3 — 2 VDC, 30-60 milliamperes  
 Reg. accuracy  $\pm 0.01\%$  against line  
 $\pm 0.1\%$  against load  
 Ripple 30 mv RMS max. on #1 and #2  
 10 mv RMS max. on #3  
 Stability Typical stability after a 30 minute warm-up is .01% for an eight hour period.

Model MR3215

**MAGNETIC RANGERS**

Rugged tubeless DC power supplies requiring negligible maintenance, Magnetic Rangers provide wide range, continuously adjustable, well-regulated voltage at high current. One versatile instrument can satisfy a wide variety of your DC needs.

**ELECTRICAL CHARACTERISTICS**

Input 105-125 VAC, 1  $\phi$ , 50-60 cycles  
 Output voltage 5-36 VDC, continuously adjustable  
 Output current MR3215: 0-15 amps  
 MR3230: 0-30 amps  
 Reg. accuracy  $\pm 0.5\%$  against line  
 $\pm 0.5\%$  against load  
 Ripple 1% RMS at 36 volts  
 Recovery time 0.2 sec.

Model 1000S

## AC REGULATORS (electronic).

Utilizing the original Sorensen circuit and incorporating the Safety Diode, these regulators are noted for accuracy, economy of operation, easy maintenance. Models available with capacities from 150VA to 15KVA, single phase.

Models available (Numbers denote VA capacities) 150S, 250S, 500S (-25 also), 1000S (-25 also), 2000S, 3000S (-25 also), 5000S (-25 also), 10000S (-25 also), 15000S (-25 also).

### ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 $\phi$ , 50 or 60 cycles $\pm$ 10%. 190-260 VAC in "-25" models.
Output	115 VAC adj. 110-120; 230 VAC with "-25" models.
Reg. accuracy	$\pm$ 0.1% against line, $\pm$ 0.1% against load.
P.F. range	Unity to 0.7 lagging.
Distortion	Varies to 3% max. under worst conditions.
Load range	0 to full load.

Model 2501

## PRECISION AC REGULATORS (electronic).

Giving ultra-precise,  $\pm$ 0.01% regulation, these instruments are rugged and serviceable, as proved by hundreds of applications in the field. Models available with capacities of 1000VA and 2500VA.

### ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 $\phi$ , 50 and 60 cycles.
Output	115 VAC, 1 $\phi$ , adj. 110-120.
Reg. accuracy	$\pm$ 0.01% against line, $\pm$ 0.01% against load.
Distortion	3% maximum.
P.F. range	Unity to 0.7 lagging.
Load range	0 to full load.

Model APR 1010

## TUBELESS MULTI-PURPOSE AC LINE REGULATOR

(Average, peak, or RMS regulation)

First regulator of its kind. Designed to regulate average, peak, or RMS value as selected. May also be used as DC controller. Saves space, eliminates instrument duplication, means greater economy. Five principal sensing arrangements: Internal, external, remote, constant current, DC.

### ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 $\phi$ (50 or 60 cps $\pm$ 10%)
Output	115 VAC, adj. 110-120 v. $\pm$ 0.1% against line, $\pm$ 0.1% against load
Reg. accuracy (RMS, average, or peak, switch selected)	$\pm$ 0.1% against line, $\pm$ 0.1% against load
Distortion	3% max.
Load	0-1000 VA
P.F. range	Unity to 0.7 lagging
Recovery time	0.1 sec.

## SPECIAL EQUIPMENT

Sorensen also manufactures a wide range of special equipment including computer power supplies and militarized units. For unusual climatic conditions, many standard and special designs are available with "Fosterited" or potted wound components.

### MILITARIZED UNITS

Over the years, many versions of standard Sorensen products have been designed for military applications. While there is no all-encompassing military specification for voltage regulators, Sorensen can provide equipment with MIL-preferred components throughout, designed to meet MIL-T-27A for wound components and in accordance with MIL-E-4158A or MIL-E-16400A. Typically, the newest militarized units to be featured as standard catalog items are the 500MIL and the soon-to-be-released 1500MIL. These are rugged 500 and 1500 VA militarized regulators conforming as above, and offering 1% total regulation accuracy against line, load, and frequency changes, with an ambient temperature range of  $-40^{\circ}\text{C}$  to  $+55^{\circ}\text{C}$ .

### COMPUTER POWER SUPPLIES

In the design of standard and special equipment, Sorensen is outstanding in its application of alternate engineering approaches to the specific customer requirement. Rather than concentrate on any one particular design—electronic, tubeless magnetic amplifier, magnetic voltage regulator, etc.—Sorensen can draw

on all types without prejudice or limitation.

In the area of computer power supplies, for instance, broad experience has been gained in the design and production of regulated and semi-regulated supplies using each of these approaches, singly or in combination.

Let Sorensen apply its experience to your computer supply problems. We can provide a complete solution through our separate facilities, engineering, and production personnel specifically devoted to the design and volume production of computer power supplies.

### AIRBORNE ELECTRONIC FREQUENCY CHANGERS AND INVERTERS

Sorensen has designed and built a wide variety of frequency changers and inverters for incorporation in military aircraft. For the most part, the changers convert variable (3200-1000~) input power to precision ( $\pm$ 0.05%) output frequency. Most models are also voltage regulated ( $\pm$ 1%) with minimum distortion (5-10%).

Airborne inverters are built to convert 28 VDC input to 400-cycle, 3-phase output, with output frequency accurate to 0.05% over wide ambients.

Sorensen's wide experience with commercial and military frequency changers may well supply the answer to your precision frequency problems. Our complete line of standard frequency changers is outlined on the next page.

Typical multi-voltage computer power supply

Typical militarized power supply

Model VRS-AC751

## AC VOLTAGE REFERENCE SOURCE

Provides highly stable AC voltage for many laboratory and industrial uses such as direct calibration of voltmeters and oscilloscopes, servo testing, amplifier gain checks. Compact, large power capacity, precisely regulated, finely calibrated.

### ELECTRICAL CHARACTERISTICS

Input	105-125 VAC, 1 $\phi$ , 60 $\pm$ 0.5 cps
Output	0.1 to 799.9 VAC in 0.1-volt steps
Load	240 VA
Output voltage accuracy	$\pm$ 0.25% (Much greater accuracy possible through correction curves)
Generated distortion	1% maximum

Model MVR1000

## MVR's (magnetic voltage regulators)

These low-cost magnetic voltage regulators are tubeless, give utmost reliability with good regulation. Very compact, they are ideally suited for incorporation as components. Available in capacities of 15, 30, 60, 120, 250, 500, 1000, and 2000 VA (designated MVR15, MVR30, etc.). Also available with 6.3 volt isolated output in 30, 60, and 160 VA capacity, (-6 models). For low-distortion requirements up to 120 VA, specify harmonic-filtered MVRH120 (less than 3% distortion). 12.6 volt MVR's and a more complete extension of 6.3 volt and harmonic-filtered lines will be available shortly.

Input	95-130 VAC, 1 $\phi$ , 60 cycles.
Output	115 VAC nominal (except 6.3 volt filament regulators)
Reg. accuracy	$\pm$ 0.5% against line.
Load range	0 to full load.

Model D2500SAN

## 400-CYCLE AC REGULATORS

Designed especially for airborne and ground testing installations for aircraft, missiles, gyros and related 400-cycle applications. Military type components and construction; all wound components are Fosterited. Available in models D250SAN, D500SAN, D1200SAN, D2500SAN (numbers 250, etc. denote VA capacities).

### ELECTRICAL CHARACTERISTICS

Input	95-130 VAC, 1 $\phi$ , 400 cycles $\pm$ 10%.
Output	115 VAC, 1 $\phi$ , adj. 110-120.
Reg. accuracy	$\pm$ 0.25% against line, $\pm$ 0.25% against load
Distortion	5% maximum.
P.F. range	Unity to 0.7 lagging.
Load range	0 to full load.

# CONTROLLED POWER FOR RESEARCH AND INDUSTRY

## FREQUENCY FLEXIBILITY

Sorensen electronic frequency changers convert 50 or 60 cycle line to well-regulated AC output at 60 cycles, 400 cycles, or a wide range of output frequencies. These convenient, portable sources have found general application in aviation, missile, automatic control and related fields.

## 1000VA FREQUENCY CHANGERS

Model FC 1000 (45-65 cps out.)  
Model FCD 1000 (360-440 cps out.)

Model FCD1000

### ELECTRICAL CHARACTERISTICS

Input	208 or 230 VAC $\pm 10\%$ 1 $\phi$ , 50 or 60 cycles
Output voltage	115 VAC, adj. 105-125V
Voltage regulation	$\pm 1\%$
Output frequency	(FCD 1000) 360-440 cps (FC 1000) 45-65 cps
Regulation accuracy	$\pm 1\%$ ( $\pm 0.01\%$ with auxiliary frequency standard fixed at 50, 60 or 400 cps.)
Load range	0-1000 VA

## WIDE RANGE FREQUENCY CHANGERS

Model FCR250

Latest, most versatile additions to the Sorensen line of regulated electronic frequency changers. Operating from 50 or 60 cycle line, these voltage- and frequency-regulated units permit simple dial selection of any frequency within a wide output range. Portable and practical, these instruments offer unique solutions to a wide variety of your laboratory, test, or production requirements.

	FCR100	FCR250
Input	105-125VAC, 1 phase, 45-65 cps	105-125VAC, 1 phase, 48-65 cps
Output voltage	115VAC, adj. 0-130V (specs below for 105-125V)	115VAC, adj. 105-125V
Output frequency	Range 1 45-300 cps Range 2 300-2000 cps	320-570 cps 560-1000 cps
Voltage Regulation	$\pm 1\%$ for line $\pm 1\%$ for load	$\pm 1\%$ for all variations
Frequency Regulation	$\pm 1\%$ (provision for ext. freq. standard of greater precision.)	$\pm 1\%$ ( $\pm 0.01\%$ with aux. freq. standard fixed at 400 cycles.)
Load range	0-100 VA	0-250 VA (up to 500 watts with improved reg. at 400 and 800 cps)

## CONTACT THESE LOCAL REPRESENTATIVES

Whatever your power control requirements—for industry, military applications or research—you will find a unit which meets your exact specifications in Sorensen's wide variety of instruments, coupled with the extensive line of high-voltage equipment produced by the Beta Electric Division. In addition to their many standard products, both

Sorensen and Beta have unusual experience in the engineering and production of special equipment to meet unique requirements. The authorized local representatives listed below are at your service; call the one nearest you for advice on Sorensen or Beta equipment.

## WRITE FOR LITERATURE

Send for complete information, including specifications, performance data and quotations. Product data sheets are issued on all new units as they become available. Inquiries regarding special applications and specifications are invited. Address Sales Engineering Department, Sorensen & Co., Inc., Richards Ave., South Norwalk, Conn., or (for high voltage applications) write Beta Electric Division, 333 East 103rd Street, New York 29, New York; or contact the local representative shown above. In Europe, please contact directly Sorensen-Ardag, Eichstrasse 29, Zurich 3, Switzerland.

### SERIES 200 PORTABLE HIGH VOLTAGE DC POWER SUPPLIES

0-30 KV, 2 & 5 ma  
**FEATURES:**  
 • Lightweight and Portable  
 • Air Insulation  
 • Reversible Polarity  
 • Safe and Reliable  
**SPECIFICATIONS:**  
**OUTPUT VOLTAGE**—0-30,000 volts DC, continuously variable.  
**OUTPUT CURRENT**—2.0 ma at 30 KV, 3 ma below 28 KV (Model 230-2); 5ma at 30 KV, 7 ma below 24 KV (Model 230-5).  
**HIGH VOLTAGE POLARITY**—Reversible  
**RIPPLE**—Approximately 1.0% per ma at 30 KV.  
**OUTPUT CAPACITANCE**—0.005 mf in series with 0.5 megohm, plus output lead capacitance (app. 150 mmf).  
**REGULATION**—Internal resistance 2.5 megohms.  
**METERS**—KV meter 0-30 KV DC,  $\pm 2.5\%$  initial accuracy. Ammeter 0-1 amp AC,  $\pm 3\%$  initial accuracy (Model 230-2), Load current meter 0-10 ma DC (Model 230-5).  
 In addition to standard models in this Series, BETA offers more elaborate versions for research, development and similar exacting work.

### MODEL 301-A ELECTRONIC MICROAMMETER

**FEATURES:**  
 • Highly sensitive  
 • Rugged; impervious to overloads  
 • No moving parts  
 • Self-calibrating  
**SPECIFICATIONS:**  
**POWER**—95-125 volts, 50-60 cycle AC, 60 VA.  
**RANGES** — 0.001/0.01/0.1/1.0/10/100  $\mu$ a, full scale.  
**ACCURACY**—5% full scale on 0.001 range. 3% on all other ranges.  
**INPUT VOLTAGE SENSITIVITY**—40 millivolts DC, full scale; constant for all ranges.  
**METER**—4"-square bakelite case, 50 dial graduations, 1.0  $\mu$ a full scale.

### SERIES 800 PORTABLE AC HIPOT TESTERS

0-2 KV to 0-20 KV, 1-5 ma  
**FEATURES:**  
 • Automatically-limited maximum short circuit current  
 • High-speed overload cutoff relay  
 • Direct indication of insulation breakdown  
 • Direct reading kilovoltmeter across output  
**SPECIFICATIONS:**  
**WAVEFORM DISTORTION** — Less than 5% sine wave at no load.  
**METER**—4" square bakelite-cased,  $\pm 5\%$  full scale accuracy.  
**HV CONTROL**—On-Off pushbutton.  
**OUTPUT VOLTAGE & CURRENT**—0-2 KV, 1 ma; 0-5 KV, 2 ma; 0-10 KV, 3 ma; 0-15 KV, 4 ma; 0-20 KV, 5 ma.

# BETA HIGH VOLTAGE EQUIPMENT

### SERIES 4000 AIR-INSULATED, SELENIUM-RECTIFIED HIGH VOLTAGE POWER SUPPLIES

250 KV, 2 ma  
**FEATURES:**  
 • Lightweight, easily maneuverable  
 • Components unusually accessible for servicing  
 • Low corona  
 • Extremely long operational life  
**SPECIFICATIONS:**  
**INPUT VOLTAGE** — 105-125 volts, 50-60 cycles, single phase.  
**INPUT VOLTAMPERES**—Approximately twice rated maximum output power.  
**OUTPUT VOLTAGE** — Continuously variable from zero to 250 KV.  
**OUTPUT CURRENT**—2 ma can be drawn continuously at maximum voltage.  
**POLARITY**—Reversible via manual positioning of rectifier ladders.  
**REGULATION**—Unregulated, with internal impedance of 11 megohms; However, full-rated voltage and current are obtainable.  
 In addition to standard models in this Series, BETA offers more elaborate versions for research, development and similar exacting work.

### SERIES 6000 REGULATED HIGH VOLTAGE DC POWER SUPPLIES

**FEATURES:**  
 • Electrostatic generator  
 • Electronic voltage regulation and stabilization  
 • Unusually compact and lightweight  
 • Low-short-circuit current  
**SPECIFICATIONS:**  
**POWER INPUT**—220 volts, 50-60 cycle, 3 phase.  
**OUTPUT VOLTAGE** — 50-150 KV and 5-150 KV (cont. var.)  
**OUTPUT CURRENT**—2.4 ma maximum.  
**REGULATION**— $\pm 2\%$  (load) or  $\pm 0.2\%$  (load)  $\pm 4\%$  (line) or  $\pm 0.1\%$  (line)  
**POLARITY**—Negative (standard)

### SERIES 9000 "HI-SEL" DC POWER PACKS

5-15 KV, 2.5 & 5 ma  
**FEATURES:**  
 • Air-insulated  
 • Selenium rectifiers  
 • Low ripple in all current ratings  
 • Good dynamic load regulation  
**SPECIFICATIONS:**

OUTPUT VOLTAGE (KV)	OUTPUT CURRENT (ma)	DIMENSIONS	WEIGHT (lbs.)	RIPPLE (rms)
0-5	5	7 $\frac{3}{4}$ "h" x 4 $\frac{1}{4}$ "w x 3"d	6	1.5%
0-10	2.5	8"h x 6"w x 5"d	10 $\frac{1}{2}$	1.0%
0-10	5	8"h x 6"w x 5"d	10 $\frac{1}{2}$	2.0%
0-15	2.5	9"h x 8 $\frac{1}{2}$ "w x 6"d	13	0.5%
0-15	5	9"h x 8 $\frac{1}{2}$ "w x 6"d	13	1.0%

Models with ratings up to 30 KV available shortly.

### SERIES 1000 RACK-MOUNTED HIGH VOLTAGE DC POWER SUPPLIES

0-1 to 0-50 KV, 2-500 ma

#### FEATURES:

- Rugged construction
- Conservative design
- Fully self-protected
- Minimum operational hazards

#### SPECIFICATIONS:

**REGULATION**—Unregulated, but full rated current is available at maximum voltage. Regulation at maximum output voltage varies 15-50%.

**RIPPLE**—At maximum rated voltage and current in any voltage range, ripple is below 2.5% rms for the maximum current in that range.

**SELENIUM RECTIFIERS**—Employed in most designs with current ratings below 10 milliamperes.

**POLARITY**—Reversible standard, center-tapped on special order.

**METERS**—3½" output voltage and current meters, ±3% full-scale accuracy on all ranges.

**VOLTAGE & CURRENT RANGE**—0-1 KV, 500 ma; 0-3 KV, 200 ma; 0-5 KV, 10 ma; 0-5 KV, 50 ma; 0-5 KV, 100 ma; 0-10 KV, 2 ma; 0-10 KV, 10 ma; 0-10 KV, 50 ma; 0-15 KV, 2 ma; 0-15 KV, 5 ma; 0-15 KV, 10 ma; 0-30 KV, 2 ma; 0-30 KV, 5 ma; 0-30 KV, 10 ma; 0-50 KV, 2 ma; 0-50 KV, 5 ma.

### SERIES 2000 AIR AND OIL INSULATED HIGH VOLTAGE DC POWER SUPPLIES

0-1 to 0-250 KV, 5-3000 ma

#### FEATURES:

- Two-unit construction for remote operation
- Maximum personnel and equipment protection
- Conservatively rated
- Simple to operate

#### SPECIFICATIONS:

**POLARITY**: Reversible by interchanging links in the high voltage section.

**REGULATION**: Unregulated. However, full-rated voltage and current are obtainable from all units.

**OUTPUT VOLTAGE & CURRENT**: 0-1000 V, 3000 ma; 0-3000 V, 1000 ma; 0-5000 V, 400 ma; 0-10KV, 200 ma; 0-20 KV, 150 ma; 0-30 KV, 30 ma; 0-50 KV, 10 ma; 0-50 KV, 50 ma; 0-100 KV, 5 ma; 0-120 KV, 5 ma; 0-150 KV, 5 ma; 0-250 KV, 10 ma; 0-250 KV, 5 ma (Cockroft-Walton).

*In addition to standard models in this Series, BETA offers more elaborate versions for research, development and similar exacting work.*

### SERIES 3000 DC OVERPOTENTIAL TESTERS

0-30 to 0-150 KV, 1-5 ma

#### FEATURES:

- Minimum size and weight
- Non-destructive, qualitative and quantitative dielectric testing
- "Burn" currents available for positive fault identification
- Effective personnel and equipment protection

#### SPECIFICATIONS FOR ALL MODELS

**INPUT VOLTAGE** — 105-125 volts, 50-60 cycles, single phase.

**OUTPUT VOLTAGE** — Continuously variable from zero to maximum rated voltage, adjustable to 0.03% of maximum rating. 30KV, 5ma; 50KV, 5ma; 80KV, 2ma; 120KV, 1ma; 80KV, 5ma; 120KV, 5ma; 150KV, 5ma.

**OUTPUT CURRENT** — Maximum rated current can be drawn continuously at maximum voltage.

**POLARITY**—Reversible.

### SERIES PKV PEAK-READING KILOVOLTMETERS

0-20 to 0-50 KV

#### FEATURES:

- High accuracy and sensitivity
- High stability—dependable long-term readings
- Narrow pulsewidth measurement—as low as 1 μsec
- Optional despiking—eliminates wave overshoots

#### SPECIFICATIONS:

**DUTY CYCLE RANGE**—From DC (1.0) to as low as 0.00025.

**REPETITION RATE RESPONSE**—Charging time constant of less than 1 μsec and discharge constant of approximately 1 second, for repetition rates between 5 cps and all radio frequencies.

**ACCURACY** — ±1% or ±3% (optional), with 100 μa DC full-scale sensitivity.

**INPUT IMPEDANCE** — Approximately 8 mmf with high voltage positive, 38 mmf with high voltage negative.

**POLARITY** — Reversible via internal lead interchange.

**VOLTAGE RANGES**—0-20 KV, 30 KV and 50 KV.

### SERIES KV PORTABLE & SEMI-PORTABLE, SINGLE & DUAL RANGE KILOVOLTMETERS

0-15 to 0-200 KV

#### FEATURES:

- Linear scales
- Stabilized multipliers
- Ample overload factor
- Compact, Convenient, Rugged

#### LOW-DRAIN PORTABLE KILOVOLTMETERS

0-15 to 0-50 KV

**VOLTAGE RANGES** — 0-15, 0-30, 0-50, 0-15/30, 0-25/30 KV.

**SENSITIVITY**—25,000-50,000 ohms/volt.

**ACCURACY**—±1% or ±3% full-scale (optional).

#### LOW-DRAIN SEMI-PORTABLE KILOVOLTMETERS

0-100 to 0-200 KV

**VOLTAGE RANGES**—0-100, 0-150, 0-200 KV.

**SENSITIVITY**—10,000 and 20,000 ohms/volt.

**ACCURACY**—±3% full-scale, ±1% ⅓-scale.

# BETA

first in  
high  
voltage

Beta Electric has, for more than 10 years, specialized in the research, design, development and production of DC and AC high voltage equipment. The unique experience gained through these years of custom manufacture of compact, reliable equipment for specialized applications has resulted in efficient standardization of design, with the retention of flexibility and versatility inherent in custom design.

WRITE Sales Engineering Dept. for individual product data sheets, or for consultation on special requirements.

**HAYDON**  
AT TORRINGTON

HEADQUARTERS FOR  
**TIMING**

# Precision Timing for SUPERIOR PRODUCT PERFORMANCE

## HAYDON TIMING MOTORS • HAYDON TIMING DEVICES

Recently re-designed and re-engineered for even finer performance, this is the most complete timing motor line ever offered. New models include the Clutch Type (exclusive with Haydon) and the Heavy Duty Inductor Type. Featuring slow rotor speed, controlled lubrication and total enclosure, all Haydon Timing Motors offer you the advantages of unusual compactness and small size, long life, dependability and quiet operation.

Built around the proved-by-performance Haydon Timing Motors, these timing devices offer the same advantages of compactness, accuracy, dependability and long life. They are available in a complete line for every type of military, commercial and industrial application.

### HYSTERESIS TYPE

... is a general purpose motor ideal for a very wide range of standard duty applications. Two torque ranges: 6 ounce inches with speeds from 1/60 to 60 rpm, and 10 ounce inches with speeds from 1 to 60 rpm. For 120 and 240 volts, 50 and 60 cps.

### INDUCTOR TYPE

... is compact, fast-starting and has the extra power (30 ounce inches torque) needed for display and similar heavy-duty applications where other timing motor types are inadequate. Speeds from 1 to 60 rpm. For 120 or 240 volt operation, 50 and 60 cps.

### CLUTCH TYPE

... exclusive with Haydon, is so designed that the rotor pinion, when de-energized, disengages from the gear train. This allows automatic resetting of the train without the use of external clutches. Speeds from 1/10 to 15 rpm. For 120 and 240 volts, 50 and 60 cps.

### REVERSIBLE TYPE

... is a hysteresis motor with 2 coils. When energized, each produces opposite rotation of the output shaft. Speeds from 1/60 to 60 rpm. For 120 and 240 volt operation, 50 and 60 cps.

### DIRECT-CURRENT TYPE

... utilizes permanent magnets with commutator and long-wearing brushes. Reversible by changing polarity. Speeds from 1/15 to 60 rpm. Windings available for 6 to 32 volts.

### 400 CPS TYPES

... offer an inherently accurate approach for instrumentation in military equipment. Two models: Miniature with 5 gram millimeters torque at rated voltage, and Heavy Duty with 18 gram millimeters. Speeds are 3000 rpm, 115 volts nominal.

### TIME DELAY TIMERS

... provide time delay or interval timing in various ranges up to 4.5 minutes maximum for such applications as protecting power tubes or timing parts of a complete operating cycle. For 120 and 240 volts, 50 and 60 cps.

### INTERVAL TIMERS

... incorporate heavy-duty, cam-operated switches and are used to directly control heavy loads in motor-operated food processing and laundry equipment, home appliances, battery chargers, etc. Intervals from 1 minute to 24 hours.

### CYCLE TIMERS

... repeat a set cycle or sequence of operations as long as the motor circuit is energized. Use of Haydon "Torque-Rated" Motors in a wide choice of speeds makes possible a very broad range of timing intervals. Up to 8 enclosed SPDT switches can be specified.

### ELAPSED TIME INDICATORS

... consisting of a synchronous motor and a non-resettable counter, register elapsed time in hours, hours and tenths, minutes, and minutes and tenths. Total register ranges up to 10,000 hours. For 120 and 240 volts, 50 and 60 cps.

## APPLICATION ENGINEERING SERVICE

Haydon is the only manufacturer of timing motors and devices that offers you both a complete product line and a complete Field Engineering Service . . . through the Haydon Representative conveniently located in your area. A specialist in Time and Timing, this man can help you save time and costs by helping you get the RIGHT TIME for your needs the FIRST TIME!

# BALLANTINE VOLTMETERS

Famous for **SENSITIVITY** • **ACCURACY** • **STABILITY**

## AUDIO to 150 kc MODEL 300

Voltage Range..... 1mv—100v  
Frequency Range..... 10cps—150kc  
Accuracy..... 2% ENTIRE RANGE  
Input Impedance..... ½ meg shunted by 30µf

## TRUE RMS INDICATION MODEL 320

Voltage Range..... 100 µv—320 v  
Frequency Range..... 5 cps—500 kc  
Accuracy..... 3% 15 cps—150 kc  
5% elsewhere  
Stability of Internal Calibrator..... 0.5%  
Input Impedance ..  
10 megs shunted by 25 µf below 10 mv  
10 megs shunted by 8 µf above 10 mv

## SUB-AUDIO to 150 kc MODEL 302C

Battery Operated

Voltage Range..... 100 µv—1000v  
Frequency Range..... 2cps—150kc  
Accuracy..... 3% 5cps—100kc  
5% elsewhere  
Input Impedance..... 2 meg shunted by 25 µf\*

\*Shunt capacitance, 10 µf on all ranges except two most sensitive ranges

## DC & AC PRECISION CALIBRATOR MODEL 420

Voltage Range..... 0-10 v RMS; Pk-to-Pk; or DC  
Frequency (Std. Model)..... 1 kc  
(other values on special order)  
Accuracy (long term)..... Better than 0.5% above 1 mv  
Distortion and Hum..... Less than 0.5%  
Setting Resolution... Approaches 0.01% above 10 mv  
Output Impedance (AC)..... 2-20 ohms depending on range setting

## PEAK-to-PEAK MODEL 305

Voltage Range..... 1mv—1000v pk-to-pk  
Frequency Range..... 10cps—100kc (sine wave)  
Pulse width..... 3µsec—250µsec  
Min Rep Rate..... 20 pulses per sec  
Accuracy..... 5% for pulses  
Input Impedance..... 2 meg shunted by 15 µf\*

\*Shunt capacitance, 8 µf on all ranges except two most sensitive ranges

## SENSITIVE INVERTER MODEL 700

For Measuring DC Voltages when combined with any AC Voltmeter

Voltage Range..... 1µv—100v DC  
Ratios DC Input to RMS Output..... 1:100 & 10:1  
Accuracy..... 1% 100µv—100v  
Input Resistance..... >10 meg for 1:100  
50 meg for 10:1

## AUDIO to 2 mc MODEL 310A

Voltage Range..... 100 µv—100 v  
Down to 40 µv at reduced accuracy  
Frequency Range..... 10 cps—2 mc  
As null detector 5 cps, < 4 mc  
Accuracy..... 3% 10 cps—1 mc  
5% elsewhere  
Input Impedance..... 2 meg shunted by 15 µf\*

\*Shunt capacitance, 8 µf on all ranges except two most sensitive ranges

## DECADE AMPLIFIER MODEL 220B

For Increasing the Sensitivity of any AC Voltmeter by 10 or 100 times

Voltage Range..... 10µv—50mv  
Frequency Range..... 10cps—150kc  
Accuracy..... 2% ENTIRE RANGE  
Input Impedance..... 5 meg shunted by 15µf

## AUDIO to 6 mc MODEL 314

Voltage Range..... 1mv—1000v  
(100µv—1mv without probe)  
Frequency Range..... 15cps—6mc  
Accuracy..... 3% 15cps—3mc  
5% elsewhere  
Input Impedance..... 11 meg shunted by 7.5 µf  
(1 meg shunted by 25 µf without probe)

## DIRECT READING CAPACITANCE METER MODEL 520

Capacitance Range..... 0.01 µf to 12 µf  
in 9 decade ranges covering over a billion to 1  
Accuracy..... 2% above 0.1 µf  
5% below 0.1 µf  
Capacitor Power Factor..... 0.15  
Test Frequency..... 1 kc

## INFRASONIC to 30 kc MODEL 316

Voltage Range..... 20 mv—200 v pk-to-pk  
Frequency Range..... 0.05 cps—30 kc  
(Down to .01 cps with corrections)  
Accuracy..... 3% ENTIRE RANGE  
Input Impedance..... 10 meg shunted by 19 µf  
or 40 µf depending on setting

Each Ballantine Voltmeter has only one voltage scale, with decade range switching, which provides the same accuracy of reading at all points on the logarithmic voltage scale. A linear decibel scale is also provided for use by acoustical engineers. Each Voltmeter also may be used as a high gain wide band amplifier.

**ACCESSORIES** are available for all voltmeters to extend voltage measurements down to 20 µv and up to 10 kv, and to measure currents from 0.1 µamp to 10 amp, and to provide DC from the Model 300 Voltmeter to drive external recorders or remotely located meters.

**ELECTRONIC  
DESIGNERS  
GO FIRST  
TO  
THE "GUIDE"**

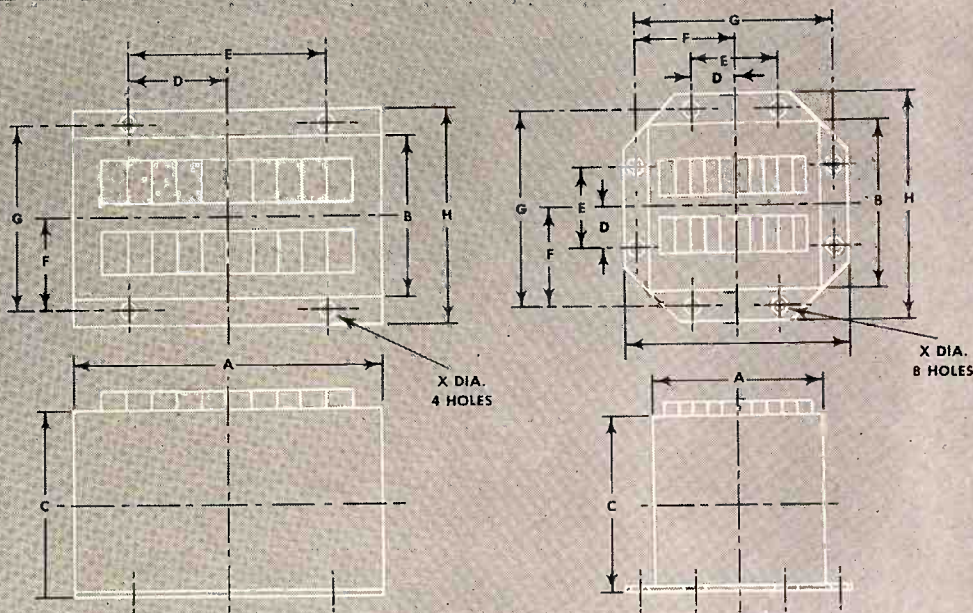

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past seventeen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

*The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.*

1. Average DC output at 110% of nominal AC supply voltage.
2. Resistance for 40° C. ± 2° C. rise above 35° C. ambient at 110% of nominal AC supply

3. Taken at 120 volts AC supply for Types 4052 to 4062 and at 240 volts AC supply for Types 3902 and 3912.

4. Total control required to change the output voltage from 5 to 95 per cent of maximum.
5. All dimensions are in inches.

### RELIABILITY BEGINS WITH CONTROL

CONTROL, a division of Magnetics, Inc., manufactures a complete line of 240-volt and 120-volt standard high permeability magnetic devices which give designers greater flexibility in selection of equipment for their particular application.

**HOW TO ORDER:** To order standard reactor assemblies, the following information must be specified:

1. Reactor type number.
2. Voltage (number of turns on each control winding).
3. Current (wire size of each control winding).

To determine number of turns and wire size of each control winding:

1. Choose the size of reactor which will meet requirements.
2. From the table, select the ampere-turns of control needed to control the reactor from full-on to full-off. If additional forcing is required, please write CONTROL for reactor curves.
3. Divide the ampere-turns needed by the maximum control current needed to control the reactor. This is the number of turns needed to control the reactor.

4. Multiply maximum control current by 1,000 to determine circular-mil area of bare copper wire needed.

5. Select a wire size whose circular-mil area is equal to or greater than the calculated value.

**NOTE:** A maximum of eight control windings can be supplied, provided the total circular-mil area of the wire of the control windings does not exceed maximum mil area available as shown in the table.

For full details, write for Catalog R-10

## MICROWAVE PROGRESS

At this time, in place of our usually scheduled scientific discussions, we'd like to introduce our specially skilled field representatives to you. These men are highly qualified engineers, capable and willing to sit down with you to discuss any microwave equipment problems you may have. They'll see to it that your problems are answered promptly and completely.

## I. POLYSTYRENE

with these outstanding properties:

- Tolerances as close as 0.1%
- Insulation Resistance as HIGH as  $1 \times 10^{12}$
- Dielectric Absorption as LOW as .0001
- Dissipation Factor as LOW as .0002
- Temperature Coefficient... 100PPM per °C
- Stability as close as .05% drift in 1 yr.
- Voltage Derating... none to 170°F.
- Hermetically sealed for enduring accuracy!

also available:

- Many other case styles or mounting brackets
- Any capacitance from .001 to 50 MFD (incl. special values)
- Voltages from 50 to 5000

## 2. POLYESTER

with these outstanding properties:

- Tolerances as close as 1%
- Insulation Resistance as HIGH as  $1 \times 10^{11}$
- Dielectric Absorption as LOW as .001
- Dissipation Factor as LOW as .003
- Temperature Coefficient... 800 PPM per °C
- Temperature range..... to 150°C.
- Hermetically sealed for enduring accuracy!

4 MFD — 300V (2 x 2 x 1)

120 MFD ± 10% 50V

Plug in (4 MFD — 150V)

2 MFD — 100V (1 3/16 x 1 1/16 x 7/16)

1 MFD — 400V (1 3/4 x 1 1/4 x 1)

.01 Tubular (.175 x 3/4)

.1 Tubular (.312 x 1)

Printed Circuit Small .11 MFD — 50V

10 MFD — 100V (2 x 2 x 1 1/8)

## 3. RC NETWORKS

- Close tolerances
- Hi-grade precision resistors

- Potted units
- Meet mil specs

Many other types of precision RC Networks available!

PIONEERS IN CUSTOM PRECISION CAPACITOR ENGINEERING

#### TRUFLEX THERMOSTAT METALS

TRUFLEX thermostat metals are manufactured in a wide variety of types, each with a different reaction to temperature. Uniformity of metal insures accurate and consistent performance. Precision parts fabricated to exact specifications.

#### CLAD METALS

Available in practically any combination of precious to precious, precious to base or base to base metals. Combinations for electronics include aluminum-clad iron, nickel-clad iron for anode materials.

COPPER  
ALUMINUM  
COPPER  
COPPER  
ALUMINUM

#### ALCUPLATE

Copper-clad aluminum for component cases or cans, chassis, cooling fins, etc., light weight, excellent conductivity. Copper surface is ideal for soft soldering and electroplating.

#### CLAD CONTACT MATERIAL

Precious metals and alloys bonded to base metals available in following types — overlay, single and double edgelay, single and double inlay, Top-lay, ready for you to fabricate into contacts.

#### CLAD CONTACTS

General Plate can supply all types of fabricated clad contacts, buttons, rivets, contact assemblies made to customer's specifications. These contacts give electrical conductivity and long life at reduced costs.

#### WAVE GUIDE and COLLECTOR RINGS

RECTANGULAR WAVE GUIDES. Solid silver, silver lined brass or aluminum. Sizes to government specifications.  
COLLECTOR RINGS. Solid silver or precious metal on base metal. All sizes.

# General Plate Products

## that solve your Electronic Design Problems

General Plate Clad Metals, made by metallurgically bonding one metal to another, are available in sheet, strip, tubing or wire in various widths, thicknesses and diameters.

Silver, gold and platinum-group metals bonded on base metals give solid precious metal performance at a fraction of the cost of solid precious metal. The precious metal provides specific performance requirements such as electrical conductivity and corrosion resistance while the base metal provides workability, strength, and solderability.

Clad base metals provide a new group of engineering metals with properties not available in solid metals. Their use frequently results in lower material costs as compared to solid metals.

In many electronic applications further economy results when General Plate supplies fabricated parts ready for assembly into your product. General Plate makes an infinite variety of fabricated parts, such as electrical contacts, collector rings and TRUFLEX thermostat metal parts to customer's exact specifications.

General Plate Engineers will gladly help you with your problems.

**You can profit by using General Plate Clad Metals**

### Precision Resistors Printed Circuit

To meet the requirements for printed circuitry, RPC has developed Type P Encapsulated Wire Wound Precision Resistors. Miniature, single ended units designed for easy rapid mounting on printed circuit panels with no support other than the wire leads. Many newly developed techniques are employed in the manufacture of Type P Resistors. These units can be operated in ambient temperatures up to 125°C. and will withstand all applicable tests of MIL-R-93A, Amdt. 3. Available in 6 sizes, rated from 1/10 watt to .4 watt, 1/4" diameter by 3/8" long to 3/4" diameter by 3/4" long. Resistance values to 3 megohms. Tolerances from 1% to 0.05%.

### Encapsulated Precision Wire Wound Resistors

RPC Type L Encapsulated Resistors will withstand temperature and humidity cycling, salt water immersion and extremes of altitude, humidity, corrosion and shock without electrical or mechanical deterioration. Type L resistors are available in many sizes and styles ranging from sub-miniature to standard with lug terminals, axial or radial wire leads. Available for operation at 105° C. or 125° C. ambient temperatures. These resistors will meet all applicable requirements of MIL-R-93A, Amdt. 3. Type L can be furnished with all resistance alloys and resistance tolerances from 1% to .02%.

### Unsealed

### Precision Wire Wound Resistors

Unsealed precision resistors are wound on steatite forms and are used for all general requirements. They can be furnished with all resistance alloys in tolerances from 1% to .02%. These resistors will meet the requirements of MIL-R-93A, Amdt. 2, characteristic B. Special winding techniques, impregnation and thermal aging result in resistors of exceptional stability. They are available in a wide variety of sizes, styles and terminal types. Matched resistors, networks and special assemblies can be supplied.

# HIGH QUALITY RESISTORS FOR ELECTRONICS

RPC is a widely recognized supplier of high quality resistors to industry, Government Agencies and the Armed Forces. Advanced production methods, modern equipment and scientific skill enables RPC to manufacture resistors of highest quality in large quantities at reasonable cost. Modern manufacturing plant is completely air conditioned and equipped with electronic dust precipitators to insure highest production accuracy. RPC resistors are specified for use in instruments, electronic computers, radiation equipment, aircraft equipment and scientific instruments.

Test equipment and standards for checking and calibrating are equalled by only a few of this country's outstanding laboratories. Our ability to produce resistors of highest quality coupled with prompt delivery have established RPC as a leading manufacturer of resistors. Small or large orders are promptly filled.

Representatives in principal cities. For full information send for latest catalog.

### High Frequency Resistors

Used where requirements call for very low inductance, capacitance and skin effect in circuits involving pulses and steep wave fronts. Depending on size and resistance value, these resistors are usable at frequencies to over 400 mc. Resistance values range from 20 ohms to 100 megohms with tolerance of 20% to 5%. 2 types available.

TYPE G resistors (shown) are tubular, in 6 sizes from 4 1/2" long x 3/4" diameter to 18 1/2" long x 2" diameter. With band terminals or ferrules. Power rating 10 to 100 watts.

TYPE F resistors (not shown) in 8 sizes from 9/16" long x 0.10" diameter to 6 1/2" long x 9/16" diameter. Lugs or wire leads. Power rating 1/4 to 10 watts.

### High Voltage Resistors

Type B Resistors are stable compact units for use up to 40 KV. These resistors are used for VT voltmeter multipliers, high resistance voltage dividers, bleeders, high resistance standards and in radiation equipment. They can be furnished in resistance to 100,000 megohms. Available as tapped resistors and matched pairs. Sizes range from a 1 watt resistor 1 inch long x 3/8 inch diameter rated at 3500 volts, to a 10 watt resistor 6 1/2 inches long x 3/8 inch diameter rated at 40 KV. Low temperature and voltage coefficients. Standard resistance tolerance 15%. Tolerances of 10%, 5% and 3% available. Tolerance of 2% available in matched pairs.

### High Megohm Resistors

Type H Resistors are used in electrometer circuits, radiation equipment and as high resistance standards. Resistance available to 100 million megohms, (10<sup>14</sup> ohms). For utmost stability under adverse conditions Type HSD and HSK Hermetically Sealed are recommended. Eight sizes from 1/4 inch to 3 inches long are available. Voltage rating to 15,000 volts. Low temperature and voltage coefficients. Standard resistance tolerance 10%. Tolerance of 5% and 3% available. Also matched pairs 2% tolerance.

S-14-C

S-4-C

S-5-C

S-14-B

S-15-A

**S-14-C COMPUTER POKETSCOPE** is a portable oscilloscope, especially designed for computers and business machine service. Lightweight and small size together with simplicity of operation makes this instrument IDEAL for field servicing. In addition . . . signal amplifier with  $0.35 \mu\text{s}$  pulse rise from dc, with signals of 1 mv observable . . . calibrated fixed sweeps and continuously adjustable linear time base from  $20 \mu\text{s}$  to 2 seconds . . .  $5\times$  stable time base expansion with complete parading for accurate pulse position . . . sync limiting . . . special intensification circuits permits observation of pulses shorter than  $10 \mu\text{s}$  at repetition rates slower than 1 pps . . . accessory attenuating and amplifying probes . . . make this instrument a MUST for computer type service.

**S-4-C SAR PULESCOPES** are improved JANized equivalents to the Gov't Model AN/USM-25. These portable instruments (only 31.5 lbs. each) are for precision pulse time measurements in radar, TV and all electronics equipment. Portray all attributes of the pulse . . . internal crystal controlled markers of 10 and  $50 \mu\text{s}$  available for self-calibration . . . in R operation a small segment of the A sweep is expandable for detailed observation with a direct-reading calibrated dial accurate to 0.1%. Video amplifier band-pass up to 11 mc . . . optional video delay  $0.55 \mu\text{s}$  . . . pulse rise time better than  $0.05 \mu\text{s}$  . . . R pedestal (sweep) 2.4 to  $24 \mu\text{s}$  . . . video sensitivity of 0.1 v rms/in. Easily convertible from  $\mu\text{s}$  to yards. Operates from 50 to 400 cycles at 115 volts.

**S-5-C LAB PULESCOPES** are JANized equivalents to the Gov't Model AN/USM-24C. These portable, AC, wide band-pass laboratory oscilloscopes are ideal for pulse as well as general purpose measurements. Internal delay of 0.55 us permits observation of pulse leading edge. Includes precision amplitude calibration, 10X sweep expansion, internal trace intensity time markers, internal trigger generators and many other features. Video amplifier .06 v RMS/inch . . . pulse rise time of 0.07 us or response to 11 mc . . . 5 to 50,000 us/in. triggered or repetitive sweep . . . internally generated markers from 0.2 to 500 us . . . trigger generator from 50 to 5000 pps. for internal and external triggering. Operates from 50 to 400 cycles at 115 volts AC.

**S-11-A INDUSTRIAL POKETSCOPE** is a small, compact, and lightweight instrument for observing electrical circuit phenomena. The flexibility of the POKETSCOPE permits its use for ac measurements as well as for dc. The vertical and horizontal amplifiers are capable of reproducing within  $-2$  db from dc to 200 kc with a sensitivity of 0.1 v rms/in. . . repetitive time base from 3 cycles to 50 kc continuously variable throughout its range . . . variations of input impedance, line voltage or controls do not "bounce" the signal—the scope stabilizes immediately.

**S-14-A HI-GAIN POKETSCOPE** provides the optimum in oscilloscope flexibility for analysis of low-level electrical impulses. Vertical and horizontal channels: 10 mv rms/inch with response within  $-2$  db from dc to 200 kc and pulse rise of  $1.8 \mu\text{s}$  . . . non-frequency discriminating attenuators and gain controls with internal calibration of trace amplitude . . . repetitive or trigger time base with linearization from  $\frac{1}{2}$  cycle to 50 kc with  $\pm$  sync or trigger.

**S-14-B WIDE BAND POKETSCOPE** is ideal for investigations of transient signals, dc signals, aperiodic pulses or recurrent waveforms. Vertical channel: 50 mv rms/in. within  $-2$  db from dc to 700 kc . . . pulse rise time of  $0.35 \mu\text{s}$ . Horizontal channel: 0.15 v rms/in. within  $-2$  db from dc to 200 kc . . . pulse rise of  $1.8 \mu\text{s}$ . Attenuators and gain controls are non-frequency discriminating . . . trace amplitude calibration . . . repetitive or triggered time base from  $\frac{1}{2}$  cycle to 50 kc . . .  $\pm$  sync or trigger . . . trace expansion, filter graph screen and many other features.

**S-15-A POKETSCOPE** is a portable, twin tube, high sensitivity oscilloscope with two independent vertical as well as horizontal channels. It is indispensable for investigation of electronic circuits in industry, school and laboratory. Vertical channels 10 mv rms/in. with response within  $-2$  db from dc to 200 kc and pulse rise time of  $1.8 \mu\text{s}$  . . . horizontal channels 1 v rms/in. within  $-2$  db from dc to 150 kc . . . non-frequency discriminating controls . . . internal signal amplitude calibration . . . linear time base from  $\frac{1}{2}$  cycle to 50 kc, triggered or repetitive, for both horizontal channels.

**S-12-B RAKSCOPE** admirably fills the need for a small oscilloscope of wide versatility. With all the features of the S-11-A POKETSCOPE, the RAKSCOPE is JANized (Gov't Model No. OS-11), and has many additional advantages; the sweep, from 5 cycles to 50 kc, is either repetitive or triggered . . . vertical and horizontal amplifiers are 50 mv rms/inch with band-pass from 0 to 200 kc . . . special phasing circuitry for frequency comparison.

**SYSTEMS CONCEPT**

**RAKSCOPE S-12-C**

The Waterman SYSTEMS RAKSCOPE, S-12-C series is a rack mounted oscilloscope with SYSTEMS CONCEPT. Systems concept is a basic means for rapid monitoring of desired signals with minimum operative effort and without the use of auxiliary switching or jack panels. S-12-C series provide the following:

1. BASIC UNIT—The basic S-12-C SYSTEMS RAKSCOPE is a complete combination systems monitoring and trouble-shooting oscilloscope with outstanding physical and electrical characteristics. The RAKSCOPE occupies but 7 inches of a standard 19" rack and extends only 10 inches behind the front panel. Identical vertical and horizontal amplifiers are DC type having rise times better than 0.35 usec, and 50 or 71 millivolts rms per inch of deflection respectively. Signal calibration method uses a direct reading accurate meter. Time base sweeps are from 1/2 cps to 50KC in trigger or repetitive operation. Sync from internal or external sources provide stable operation by means of new sync lockout circuits. Special plug-in elliptical sweep circuit for easy phase and frequency checks greatly increase its systems utility. Construction is ruggedized throughout. Tube type options include standard commercial, ruggedized commercial or ruggedized military. Operable from 50 to 400 cycles.

2. CUSTOM MODIFICATION—Desired flexibility is obtained with the optional signal input selector. For the first time it is possible to select up to eleven different signal sources with the necessary built-in attenuation (supplied by us or by you) for each source. Thus the entire switching panel can be omitted from an overall system resulting in circuit and space economics. Standard elliptical sweep is 60 cycles, but plug-in units for other frequencies can be supplied. Accessories such as attenuating, direct, and amplifying probes are available.

Improve your existing or contemplated systems by including the S-12-C SYSTEMS RAKSCOPE as an integral part. Your local Waterman representative is ready to assist you in determining specific requirements.

**PANELSCOPE<sup>®</sup>**

The Waterman PANELSCOPE is a custom-built cathode ray tube oscilloscope, with simplified operation, and yet available at a low price. The PANELSCOPE concept provides for the following:

(1) MINIATURIZATION—Panel space required is only 5 1/4" x 5-3/16"—depth is 10" and the weight is less than 7 lbs. The PANELSCOPE can be installed in practically any equipment—mobile or stationary—air, sea, or land—military or commercial.

(2) SIMPLICITY OF OPERATION—Twist of a single rotary switch provides a synchronized pattern of desired incoming signal (up to 11 circuits) against proper linear time base. This is ideal for monitoring and trouble shooting, as it removes the need of fiddling with knobs as is done now on general purpose oscilloscopes. The static controls, such as beam, focus, positioning, and graticule brightness are located in tube escutcheon.

(3) CUSTOM DESIGN—A wide variety of—signal amplifiers with response from dc to megacycles and sensitivities from 5 millivolts—synchronized or triggered linear time base generators from 1/2 cycle (and lower if need be) to 2 microseconds—can be specified by you to fit your needs for particular equipment.

(4) PARTIAL KIT FORM—the PANELSCOPE comes fully wired and tested with chosen signal amplifier, linear time base generator and attendant sync. amplifier. The desired signal attenuators, frequency and amplitude determining components, and method of synchronization can be installed either by us or by you.

(5) POWER REQUIREMENT—Less than 10 watts of line power for built-in high voltage supply—The required B+ and heater current as selected by your requirements. For those cases where B+ and heater power is not available, auxiliary power pack can be supplied.

There is a place in your equipment for Waterman PANELSCOPE, a custom built oscilloscope at production prices, although your needs may be but one or two. Ask for specification sheets either from our representatives or direct from the factory.

**RAYONIC CATHODE RAY TUBES BY WATERMAN**

TUBE	PHYSICAL DATA		STATIC VOLTAGE		DEFLECTION*		LIGHT OUTPUT**

\*Brazed-on external cavity. Bold face type numbers indicate recommended microwave tubes for new equipment design.

# SILICON DIODES

## FEATURES

- Recovery times under .15  $\mu$ sec
- High voltage ratings
- Operation up to 200°C
- High Inverse Resistance
- Subminiature size

### MILITARY AND HIGH CONDUCTANCE TYPES

# SILICON VOLTAGE REGULATORS and REFERENCES

## FEATURES

- Excellent long-term stability
- High current handling ability
- Operation to 150°C
- Extended operating current range
- Small size, easy mounting
- Hermetically sealed

Reference assemblies are available with temperature coefficients to .002%. They are also available with voltage tolerances to 1% from 10 to over 100 volts. The assemblies are encapsulated in a miniature axial lead package.

"Leadership in semiconductors"

## SILICON TRANSISTORS

HIGH FREQUENCY TYPES

### FEATURES

- Low  $I_{cor}$  typically under  $.02 \mu a$
- Operation to  $175^{\circ}C$
- Power Ratings of 200 mw
- High Frequency Operation
- Welded Hermetic Seal

**SPECIFY**

**Bliley**

**SOLID ULTRASONIC  
DELAY LINES by BLILEY ...  
FROM 3 TO 4500 MICROSECONDS**

Solid ultrasonic delay lines by Bliley are supplied for any specified delay interval from 3 to 4500 microseconds.

Without resorting to temperature control and temperature adjustment, the following table shows practical tolerances that can be maintained with Bliley delay lines.

2-10	microsecond	delay	$\pm .05\%$	at 25°C
10-50	microsecond	delay	$\pm .03\%$	at 25°C
50-100	microsecond	delay	$\pm .05\%$	at 25°C
100-500	microsecond	delay	$\pm .07\%$	at 25°C
500-4500	microsecond	delay	$\pm .1\%$	at 25°C

Special bonding methods (transducers to fused quartz) and hermetically sealed cases assure permanent performance characteristics from -60°C to +85°C.

**Knowles ELECTRONICS, INC.**  
MANUFACTURING ENGINEERS

The leader in **MINIATURE** audio transducers

Knowles audio transducers have set new performance and size standards.

The microphone and receiver shown here have made possible the miniature head-worn and eye-glass transistor hearing aids.

We are custom designers and manufacturers of products geared to particular requirements. Because of our diversified experience and numerous designs, we can often engineer and produce a product for a specific use faster and at lower cost.

Design Engineers! Write for details on company letterhead.

**KNOWLES ELECTRONICS, INC.**  
9400 Belmont Avenue, Franklin Park, Illinois

**OUR PRODUCTS ARE SUPPLIED TO MANUFACTURERS ONLY**

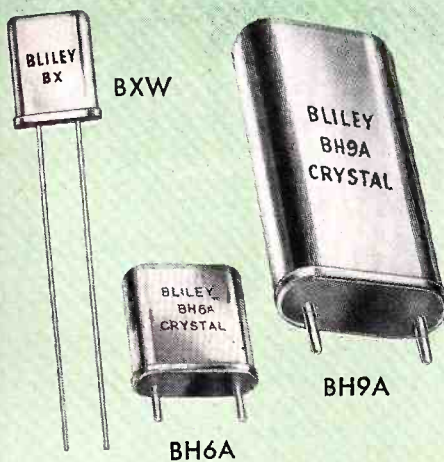

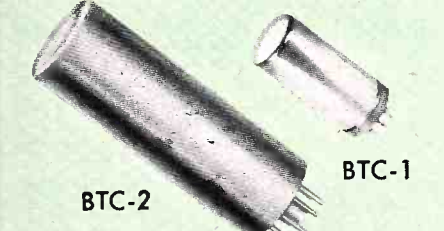

*Manufacturers with products to sell in the Field of Nuclear Energy find that advertising in NUCLEONICS is a sure-fire method of moving those products because they reach 16,000 potential purchasers through the advertising pages of NUCLEONICS. From Absorbent Paper to Zinc Bromide... products in the Field of Nuclear Energy are SOUGHT and BOUGHT by important Physicists, Metallurgists, Geologists, Biologists, Physicians, Radiologists, Bio-Chemists, Engineers, Technicians and Management because these important buying influences go first to the sales pages of NUCLEONICS for product data in Nuclear Energy.*

Bulletins #491 (1000kc) and #492 (100kc).	<b>DIMENSIONS</b>  2-1/2" long x 1-9/32" dia. (excl. pins) Octal Base
	<b>BG6 SERIES</b>	All glass, vacuum mounted crystal unit for tight tolerance performance with minimum change due to ageing. Advance process techniques assure high reliability. Freq. Range: 3mc to 125mc. Bulletin #496.	1-3/8" long x 3/4" dia. (excl. pins) Small Button Miniature Base
	<b>BG12 SERIES</b> BG12G-S, 100kc Std.	For primary frequency standards. Precision sealed-in-glass crystal unit combines high stability performance with minimum ageing. Temp. coefficient: Less than 0.2ppm per degree C. between +65°C. and +75°C. Bulletin #498.	3-11/16" long x 1-23/32" dia. (excl. pins) Octal Base
	<b>BTC-1</b>	Subminiature hermetically sealed package combines crystal control and temperature stabilization in a single plug-in unit. Freq. Range: 5mc to 125mc. Stability: ±.0003%. Bulletin #494.	1-5/8" long x 51/64" dia. (excl. pins) Std. Noval 9-Pin Base
	<b>BTC-2</b>	Hermetically sealed package combines all-glass vacuum mounted crystal with precise temperature control. Freq. Range: 4kc to 125mc. Stability: ±.00004% in range 800kc to 125mc. Bulletin #497.	3-3/4" long x 1-1/4" dia. (excl. pins) Octal Base
	<b>BLILEY TYPE</b>	<b>DESCRIPTION</b>	
	<b>TCO-1 OVEN SERIES</b>	Plug-in ovens for temperature control of single crystal unit in Bliley BH6A or MIL HC-6/U holder. Stability: ±3°C. at 75°C. or 85°C. Supplied for 6.3 volt, 12.6 volt or 26.5 volt operation. Dimensions: 1-9/16" long x 1-3/16" dia. (excl. pins). Octal Base. Bulletin #499.	
	<b>TCO-2 OVEN SERIES</b>	Plug-in ovens for temperature control of two crystal units in Bliley BH6A or MIL HC-6/U holders. Stability: ±3°C. at 75°C. or 85°C. Supplied for 6.3 volt, 12.6 volt, or 26.5 volt operation. Dimensions: 1-9/16" long x 1-3/16" dia. (excl. pins). Octal Base. Bulletin #499.	
	<b>TCO-21 OVEN SERIES</b>	Plug-in ovens for temperature control of two crystal units in Bliley BH6A or MIL HC-6/U holders. Stability: ±2°C. at 75°C. or 85°C. Supplied for 6.3 volt, 12.6 volt or 26.5 volt operation. Dimensions: 1-9/16" long x 1-3/16" dia. (excl. pins). Octal Base. Bulletin #499.	
	<b>TCO-2L TCO-2P OVENS</b>	Plug-in ovens for temperature control of two crystal units in Bliley BH9A or MIL HC-13/U holders. Stability: ±4°C. at 75°C. TCO-2L for 6.3 volt operation; TCO-2P for 12.6 volt operation. Dimensions: 2-3/16" long x 1-3/16" dia. (excl. pins). Octal Base. Bulletin #499.	
	<b>TC91 TC92 TC93 OVEN SERIES</b>	Precision temperature control ovens for Bliley crystal units: FM6, BH81A, MC7, BH8, MC75, MS46A, AR23W, BG9A series and BG9D series. Stability: ±1°C. Supplied for 6.3 volt, 18 volt or 115 volt operation. Dimensions: 4-7/16" long x 3-3/4" dia. (excl. pins). Giant 7-pin base. Bulletin #500.	
	<b>TC97 OVEN SERIES</b>	High precision temperature control ovens for Bliley crystal units: BH8, MC75, MS46A, and BG12G-S. Stability: ±0.25°C. Supplied for 6.3 volt operation. Dimensions: 4-23/32" long x 4-1/2" dia. (excl. pins). Giant 7-pin base. Bulletin #500.	

# ELMENCO

# DUR-MICA

## The Revolutionary Development In Mica Capacitors

The Dur-Mica Capacitor is a silvered mica capacitor coated with a specially developed material which provides maximum protection at environmental extremes of moisture and temperature. This combination provides a reliability and life expectancy which far surpasses anything heretofore obtained.

### OPERATING TEMPERATURE RANGE

-55°C. to +125°C.

### MINIMUM INSULATION RESISTANCE:

25000 megohms at 25°C.  
1000 megohms at 125°C.

STABILITY (Capacity Drift):  
±0.05% +0.1 mmf. MAX.

### COMPONENT RELIABILITY

Life tests presently being performed at 125°C. and 150% rated voltage have passed 10,000 hours without a single failure. This is roughly equivalent to more than 20 years of operation under normal operating conditions.

DUR-MICA NOW AVAILABLE: DM-15, DM-19, DM-20, DM-30

**ANNOUNCING**  
a new addition  
to the DUR-MICA  
family ... **DM-42**

### CAPACITY VALUES UP TO:

.025 MFD.—500VDCW  
.04 MFD.—300VDCW  
.07 MFD.—100VDCW

### DIMENSIONS:

1 1/2 x 7/8 x 1/4

Packed in individual transparent plastic snap boxes properly identified for ease of handling.

## NEW

## ARCO DUR-MICA KITS

### ARCO DM-15 KIT #10

This handy DM-15 kit consists of five each of 51 capacity values from 1 mmf. to 820 mmf. Tolerance ±5%.

SPECIAL KIT LIST PRICE \$95<sup>00</sup>

If purchased individually the actual list price is \$103.31.

### ARCO DUR-MICA KIT #11

This Dur-Mica kit contains five each of 72 capacity values from 2 mmf. to 10,000 mmf. all 500VDCW and ±5% tolerance.

SPECIAL KIT LIST PRICE \$250<sup>00</sup>

If purchased individually the actual list price is \$286.35.

# PRECISION SYSTEMS AND COMPONENTS *in production*

## NAVIGATION SYSTEMS

Kearfott Systems include 3 gyro, 3 and 4 gimbal platforms. They provide precise azimuth and vertical reference. Also Directional Gyro Compass Systems.

The Gyro Guide System shown provides Latitude Corrected Gyro and Magnetic Slaved Heading information. Weighs 20 lbs. Max. random drift 3°/hour.

## GYROS, SERVO MOTORS, SYNCHROS

Kearfott produces a complete line of gyros, servo motors, and synchros to satisfy every aircraft control requirement.

FLOATED INTEGRATING GYRO

3 Gyro Platforms, Floated Rate Integrating Gyros, Vertical, Free, Directional, Rate Gyros and Gyro operated rate switches—compact, lightweight, hermetically sealed.

SERVO MOTORS, SYNCHROS

High torque, low inertia Servo motors, Servo-motor-Generators, inertial and viscous damped Servo motors 3/4" to 1-3/4" diameter, Synchro Transmitters, Control Transformers, Resolvers, Repeaters and Differentials in size 8, 11 and 15

## MICROWAVE EQUIPMENT

Kearfott offers engineering-design service, manufacturing facilities and a wide experience in the production of microwave components and test sets.

COMPONENTS

Including attenuators, directional couplers, crystal mixers, twists and tees for S, C, Xb, X and Ku bands.

TEST SETS (for X, C, and Ku)

A four-in-one instrument for functional testing of radar or beacon. Includes Wavemeter, Spectrum Analyzer, Power Monitor, and signal generator.

Bulletins giving physical and technical data on the various Kearfott Products will be sent on request. The Kearfott organization is available to assist in the development and manufacture of other precision components you may require.

A SUBSIDIARY OF

**Librascope  
Instrumentation**  
for highest accuracy  
in graphic  
data processing

Exclusive features designed and developed by Librascope have made these plotters and accessories dependable instruments for top performance and sustained accuracy.

Digital or analog data can be automatically translated and recorded with Librascope's X-Y Plotter and associated instruments. Permanent representation of two independent variables can be accurately plotted for analysis and control.

**MODEL 200-B X-Y PLOTTER**, used for DC signal input, has full-scale sensitivities of five millivolts, and an input impedance of 1,000 megohms. Utilizing standard reference cells, this model provides drift-free operation. Available external reference voltages may be substituted. Quick interchangeability of input sections is provided. Continuous or point plotting... Rack or case mounted.

**MODEL 200-A** uses an input of 10,000 ohm resistance potentiometers as an input translator providing 10 to 1 scale expansion and origin positioning. Available standard digital input accessories are essentially inputs of this type. Any resistance potentiometer will provide an analog input for this configuration. Continuous or point plotting... Rack or case mounted.

**LIBRASCOPE XY DECIMAL KEYBOARD** — This keyboard consists of a three-decimal bank for each axis with associated plus-minus keys. Depressing of the plotting bar initiates plot and clears keyboard automatically. Manual "clear" button is also provided. This unit features Librascope-developed positive-action non-sticking, self-wiping contacts.

**LIBRASCOPE BINARY CONVERTER, MODEL 252** consists of two banks of relays and precision resistors simulating a precision potentiometer. The resistors weight the relays in straight binary so that each bank serves as an input to one axis of the XY plotter. Total resistance is 10,000 ohms per bank. Relays within the converter control the plot cycle.  
Mounting: Standard RCA, RMA rack mounts.

**LIBRASCOPE PUNCHED CARD CONVERTER** — This relay-operated converter accepts three-decimal digit and sign, two channel, IBM punched card information and converts it to analog form for input to XY plotters. Cards can be manually fed through the IBM reading brushes one at a time or automatically read at rates to 50 cards per minute with an accuracy of 0.1%.  
Mounting: Standard RCA or RMA rack mounts or in case.

**LIBRASCOPE PUNCHED TAPE CONVERTER** operates from punched tape reader. Can be modified to operate with any digital computers furnishing a punched tape output. If printed listing desired, unit may be operated from tape-actuated typewriter, such as the Flexowriter. Programming need not be specified on tape. Sequence operation. A particular tape may be programmed to accommodate various tape formats.  
Accuracy,  $\pm 0.1\%$ .

Career opportunities exist at Librascope for qualified engineers, physicists and mathematicians. Learn about Librascope's new "Creative Project Development Teams." Contact Glenn Seltzer, Employment Manager.

**FREQUENCY METER MODEL 802B**

Range of 2350 to 10,500 megacycles covers the most used frequencies. Veeder-root digital counter provides accurate, legible readings which are referred to calibration charts for frequency in megacycles to rated accuracy of 0.2% without calculation. Completely self-contained with built-in detector and indicating meter.

**SLOTTED LINES  
MODELS 219 THROUGH 224**

Six portable models, incorporating carriage drive mechanism integral with wave guide assembly measures VSWRs and impedances from 2600 to 18,000 megacycles per second, covering wave guide sizes from 3 X 1½ inches to .702 X .391 inches. Can be used with all standard military and commercial RF probes and detectors.

**COMPLETE LINE OF COAXIAL AND WAVEGUIDE INSTRUMENTS INCLUDES:**

- |                      |                      |
|----------------------|----------------------|

# TUBES AND COMPONENTS

**3** Bomac offers a complete line —  
over 750 different tubes and components.

**ATR** ... All standard types. Many more developed in our laboratories. Fixed-tuned — highly specialized as required: low Q, or high Q, miniaturized, special shapes and mounts.

**TR** ... A type for every known application — all bands — fixed-tuned or tunable — special types: shorted, dual and triple.

**SILICON DIODES**  
The most sensitive, uniform and stable diodes (1N23D). Also available in matched pairs for X-band and S-band. Also supplied as mixer diodes with either normal or reverse polarity.

**PRESSURIZING WINDOWS** ... for all wave guide sizes, broad band characteristics with low insertion loss, temperature range  $-55^{\circ}\text{C}$  to  $100^{\circ}\text{C}$  and 30 lb./sq. in. gage pressure in either direction.

**HIGH FREQUENCY TRIODE OSCILLATOR** ... This triode, for oscillator use at high frequencies, is extremely reliable and will withstand high shock and vibration.

**REFERENCE CAVITIES** ... Dentent with multiple frequencies and dual mode with fixed frequency. Temperature compensated to  $\pm 0.3$  MC from  $0^{\circ}\text{C}$  to  $100^{\circ}\text{C}$ .

**KLYSTRONS** ... Bomac offers a line of reflex klystrons. They offer maximum performance at high altitudes without pressurization.

**SHUTTERS** ... Bomac was first to develop shutter tubes and integral TR combinations for continuous crystal protection. All waveguide sizes available.

**MAGNETRONS** ... High frequency, tunable and fixed-tuned magnetrons are a Bomac specialty. Frequencies from X band to classified millimeter bands. Special types designed to meet your requirements.

**NOISE SOURCE TUBE** ... A gas discharge tube for use as a noise generator in noise measuring test equipment.

**SURGE PROTECTORS** ... Bomac surge protectors are hold-off diode tubes. In a wide range of breakdown voltages: from 100 to 33000. Consult our engineering department for your applications.

**PRE-TR** ... Wherever attenuation is required in the duplexer before the TR, pre-TR's are available. Will operate as high as 10 megawatts.

**HYDROGEN THYRATRONS** ... Bomac thytrons provide the following advantages: precise triggering — high repetition rates — high power levels — zero bias operation — electrical stability.

**DUPLEXERS** ... Bomac will design, develop, and produce complete duplexers to customer specifications.

# HYCOR precision components

## WAVE FILTERS

Low, high and band-pass types with high "Q" toroid elements. Ranges up to 100 kc., up to 10,000 ohms impedance. Stack types. Also designed for special circuitry or miniaturization.  
send for bulletin F-P

## TOROID COILS

High "Q" factor, excellent current and temperature stability. Encapsulated, fully protected from shock and environmental conditions. Also in encapsulated and metal cased types.  
send for bulletin STP

## MAGNETIC AMPLIFIERS

Toroid construction. Standard types with 10,000 or 50,000 power gain. Also designed for specified power, impedance, and response requirements. Cased per military specs.  
send for bulletin MA

## RATIO TRANSFORMERS

0.1% accurate even with wide changes in load, frequency, ambient temperature. Up to 1000:1 ratio. Special accuracies to .005%. Miniature encapsulated and hermetically sealed MIL-T-27 types.  
send for bulletin RT

## TELEMETERING FILTERS

Low and band-pass filters. Negligible hum pickup in low level circuits. Excellent phase linearity and attenuation accuracy. Standard and sub-miniature sizes.  
send for bulletin TF

## RESISTORS

Encapsulated, for 0.1 watt to 4 watts. Standard tolerance  $\pm 0.1\%$ . Fully protected. Exceed

MIL-R-93A spec. With axial or radial leads, lugs, or leads for printed circuitry.  
send for bulletin PH

## DECADE INDUCTOR UNITS

Accurate, stable inductance values for design or experimental work at 150 to 20,000 cps. Four types: .001, .01, .1 or 1 Henry per step. 2% accuracy per step.  
send for bulletin D-2

## POWER TRANSFORMERS

Miniature encapsulated types rated 14 V.A. Precise regulation—no external fields. 375 to 525 cps, primary voltage 115, 28 or 12.6 V. Multiple secondaries. Specials supplied.  
send for bulletin WT

## PROGRAM EQUALIZER

Bridged T constant impedance type, low and high selectors. Impedance: 500/600 ohms in-out. 14 db insertion loss. Pad compensation with key in "out" position.  
send for bulletin E

## MAGNETIC CLUTCHES

Only 1" o.d., but deliver torque of 15 oz. in. on 2 watts. 5 millisecond response. Gear, cable or direct-in-line drives. Economical for multiple clutching assemblies.  
send for bulletin C-2

# HYCOR

## VARIABLE FILTER

Low-pass, high-pass with negligible hum pickup, distortion and aging. Same eight cutoff frequencies, about 16 db attenuation per octave on both high and low.  
send for bulletin S-1

DIVISION OF INTERNATIONAL RESISTANCE CO.

12970 BRADLEY AVENUE, SYLMAR 1, CALIFORNIA

# 1957-1958 Electronic Components Guide

## AMPLIFIERS, magnetic

Toroid construction throughout; standard catalogued types available—special designs to suit requirements. Line frequencies of 60, 400 and 800 c.p.s. Operating temperatures:  $-55^{\circ}\text{C}$ . to  $+100^{\circ}\text{C}$ . Cased per military specs. (Hycor MA)

## ATTENUATORS, audio

Available as: Bridged T Attenuators, Ladder Network, Potentiometers, Precision Decade Attenuators, and VU Meter Multipliers. Resistive elements and contacts imbedded in specially prepared plastic compound—provides protection against extreme humidity, mechanical shock, and wide temperature variations. Switch contacts are flush in plastic, providing smooth, easy to clean surface • BRUSHES CANNOT TRIP • Switch noise level extremely low. "Lubricated for life" oilite bearings. Available with or without detents. (A-2)

## CLUTCHES & DRIVES, magnetic

ONLY TWO WATTS OF POWER REQUIRED to develop 15 oz. in. of torque with a response time of 5 milliseconds—only two moving parts. Minimum dimensions (only 1" o.d.) facilitate use in compact assemblies, extremely low cost. (Hycor C-2) (special design applications).

## COILS, Toroid (cased & uncased)

Hermetically molded in special tough plastic compound. Will withstand military temperature requirements, 95% humidity—boiling salt water, high degree of mechanical shock, MIL-C-16923, Type C, specification tests. (Hycor—STP)

## COMPUTER COMPONENTS

ACCUMULATORS  
AMPLIFIERS, MAGNETIC AND SERVO

## POTENTIOMETERS—

**Standard Multi-Turn**—Type H—Combine advantages of reliability, sturdiness and miniaturization. Standard sizes from 1" dia. to  $\frac{3}{4}$ " dia.; 1, 5 and 10 turn models—other degrees of rotation available on special order. (A-5)

**Moisture-Sealed**—Type MS—All cases half hard brass with all joints rolled and bonded. "O" ring seal between shaft and bushing—1" and  $\frac{3}{4}$ " dia.—5 and 10 turn models. (A-6)

**Hermetically-Sealed**—Type HS—Where moisture sealing as above is not sufficient, these precision potentiometers are completely independent of atmospheric conditions—special bellows drive system— $\frac{3}{4}$ " and 1" dia.—1, 5 and 10 turn models. (A-7)

**Subminiature**—Type SM—Offer rugged construction and dependable service where space is at a premium. Both single and multi-turn units available with case dia. of only  $\frac{1}{2}$ ". (A-8)

**High Temperature Operation**—Type H—HT—Operate at ambient temperatures up to  $150^{\circ}\text{C}$ .— $\frac{3}{4}$ " and 1" dia.—1, 5 and 10 turn models. (A-9)

**High Precision Single Turn**—Type B—Incorporates maximum accuracy and reliability with ultra low torque ball bearings and ganging for in-the-field phasing,  $\frac{7}{8}$ " to 3" dia. (A-10)

## DECADE INDUCTORS

For design and experimental work on audio filters, equalizers, and tuned circuits at frequencies between 150 to 20,000 cycles. Four units available in ranges from  $10 \times .001$  Henry to  $10 \times 1.0$  Henry. When all 4 units are connecting in series, 11, 110 steps from .001 Henry to 11.11 Henries are obtained. Excellent current and temperature change stability. (Hycor D-2)

## DELAY LINES, Distributed-Constant (new)

For time delays of less than 1.0 microsecond at impedance levels of 4,000 ohms and less. (S-2)

## EQUALIZERS, program

Standard rack panel, slotted,  $3\frac{1}{2}$ " high, max. depth  $7\frac{1}{2}$ ". Bridged T constant impedance. 500/600 ohms, in-out. Low and high frequency selector switches. Low and high frequency controls in 2 db steps, in-out key. All capacitors and inductors hermetically sealed for lifetime service. Variable attenuators are of "bridged T" type with precision wire wound resistors—1% accuracy. (Hycor E)

**RESISTORS, current pulse viewing (new)** 

For viewing current-wave forms with rise times from 0.5 to 0.01μ seconds with minimum distortion. 0.47 ohms to 100.0 ohms—20% tolerance. 150 volts max. pulse voltage. Inductance not greater than .01 microhenries. (S-4)

**FILTERS** 

**Precision Wave**—Low-pass, high-pass, band-pass. Excellent characteristics due to use of high "Q" toroid inductor elements. Available over wide impedance and frequency ranges. (Hycor F)

**Telemetry**—Complete line for every bandwidth and channel. Standard and sub-miniature sizes. Specially designed to conform to new specs for phase linearity and attenuation accuracy. (Hycor TF)

**Variable**—Low-pass, high-pass. Standard rack panel, slotted, 3 1/2" high, max. depth 7 1/2". Low and high frequency cutoff controls cover 100, 250, 500, 1000, 2000, 3000, 4000, and 5000 cycles. Approx. 16 db attenuation per octave; 500/600 ohms, in-out impedance. (Hycor S-1)

**LAMINATES, FLUOROPLY** 

Copper foil bonded to a fluorocarbon plastic base—available in 12" x 12" sheets copper clad on one or both sides. Base thicknesses .031" to 1/8" copper, 1, 2, 3, 5 and 7 oz. Special thicknesses can be supplied. (LT-2)

**RECTIFIERS AND DIODES** 

Miniature selenium rectifiers and diodes in the microampere and milliampere range. Voltage ratings—26 to 36 VIP/cell rms. Inverse resistance up to 20 megohms at 20 volts D.C./cell. 125°C. max. operating temperature. (SR-1)

Special designs 9 KR 2 dual diodes.

**TERMINALS, hermetic seal** 

Four body sizes; six lead types—available in any combination. Bodies of molded Fluorocarbon plastic. 232°C. melting point solder. Copper ring and annular copper ring bonded to plastic body. All exposed metal plated with 30/70 tin-lead alloy. Overall lengths from 4 5/64" to 1 1/16"; overall body dia. from .203" to .281". (LT-1)

**TRANSFORMERS** 

**Toroid power**—miniature—plastic encapsulated. Up to 15 V.A. available. Frequencies from 400 c.p.s., 115 V. and higher. Multiple secondaries for heater and plate voltages. (Special designs available to suit your specification.) (Hycor WT)

**Precision ratio**—accurate voltage division and multiplication to accuracies of .01%. Accuracy maintained with moderate loading. Stock catalog types—specials to order. Miniature sizes, plastic encapsulated, and hermetically cased to MIL-T-27 specification. (Hycor RT)

\*Also supplied with adjustable feature.

†Non-inductive—all other types are inductive to varying degrees. See data bulletin for more details.

‡See data bulletin.

<sup>o</sup>MP and MV resistors can be encapsulated to improve voltage and moisture characteristics. Several types are now available. IRC offers engineering assistance for your design and application problems.

•All IRC products may be purchased through Electronic Parts Distributors. Those identified with a • are normally carried in their stocks.

(new), indicates new items since January 1957.

✕Check catalog for spacing.

# CIRCUIT

INSTRUMENTS INC.

### TYPES HS-100 and HS-105

Hermetically sealed, 1" diameter precision instruments. 5 and 10 turn types. Type HS-100 3600  $-0 +4^\circ$  rotation, 4 watts. Type HS-105 1800  $-0 +4^\circ$  rotation, 3 watts. Stupakoff Type 95-1048 terminals. Standard resistance values 250 to 100,000 ohms. Hermetic sealed case is nitrogen filled.

### TYPE H-151

Only  $1\frac{1}{2}$ " diameter x  $\frac{3}{16}$ ", exclusive of shaft and turret terminals. Continuous rotation; stops available on special order. Standard linearity  $\pm 0.5\%$ . Power rating 3 watts. Standard resistance values from 50 to 15,000 ohms. Weight 2 ounces.

### TYPES H-100 and H-105

Slim 1" diameter. 5 and 10 turn types. Rotation: Type H-100 3600,  $-0 +4^\circ$ ; Type H-105 1800,  $-0 +4^\circ$ . Power rating 4 watts and 3 watts respectively. Flexible silver plated terminals or rigid turrets available.

### TYPE H-101

Tiny 1" diameter by  $\frac{3}{16}$ ", exclusive of shaft and turret terminals. Weight is 1 ounce. Power rating  $1\frac{1}{2}$  watts. Standard resistance values from 50 to 10,000 ohms. Continuous rotation; stops available on special order.

### TYPES H-750 and H-755

Ultra-thin  $\frac{3}{4}$ " diameter size. Type H-750 3 watts, standard resistance values from 250 to 50,000 ohms. Type H-755, standard resistance values from 125 to 25,000 ohms. Either flexible silver plated terminals or rigid turrets available.

### TYPE SM500

Sub-miniature  $\frac{1}{2}$ " diameter by  $1\frac{5}{32}$ " size; exclusive of shaft and turret type terminals. Weight only 1 ounce. 3600  $-0 +4^\circ$  rotation. Power rating 1.5 watts. Standard resistance values from 250 to 100,000 ohms.

for long life and reliable performance*

## HOT-MOLDED COMPOSITION FIXED RESISTORS

Standard resistors rated at 70°C. In 2, 1, 1/2, 1/4, & 1/10 watt ratings. Hermetically sealed units encased in ceramic tubes. In 1 and 1/8 watt ratings. Copper clad units mount on metal panel. Rated 3 and 4 watts, 70°C; or 4 and 5 watts, 40°C. Values: 2.7 ohms to 22 megohms.

Standard Resistors

Hermetically Sealed

Copper Clad

Industrial Type

Dual Unit with Switch

Single Unit

Triple Unit

## HOT-MOLDED COMPOSITION VARIABLE RESISTORS

Industrial Type H rated 5 watts at 40°C. Operating life over 100,000 cycles. Type J rated 2 watts at 70°C. Type K rated 2 watts at 100°C—derate to zero at 150°C. Types J and K made in single, dual, & triple units with various shafts. Total values: 50 ohms to 5 megohms.

## SMALL HOT-MOLDED COMPOSITION VARIABLE RESISTORS

Type G rated 1/2 watt. Diameter 1/2". Made with plain or lock bushing, also with line switch. Type F for printed circuits rated 1/4 watt. Diameter 1/2". Type T for hearing aids rated 1/2 watt. Molded cover serves as actuator. All ratings at 70°C. Total values: 100 ohms to 5 meg.

Type G with Switch

Type G with Lock Nut

Type F

Type T

Feed-thru & Stand-off

Bare Disc Type

General Purpose, Stable, TC

Ceramic Encased

## CERAMIC CAPACITORS

Feed-thru and stand-off units exhibit no parallel resonance effects up to 1000 mcs. Solder tab or screw mounting. Values: 4.7 to 1000 mmf. Disc units made in GP (no run-down on leads), stable, and TC types. Ceramic encased rated to 150°C. Values: 10 mmf to 0.02 mf.

## FERRITE CORES

Available in various shapes and sizes, including new lightweight flared yoke. Uniform magnetic characteristics and physical dimensions for black and white, color TV, and general applications. Class WO-1 for deflection yokes and class WO-3 for flyback transformers.

### BROADBAND SPECTRUM ANALYZER

Type L701A: 950 to 2000 Mc/s (Fund.)  
 Type S701A: 1900 to 4000 Mc/s (Fund.)  
**Direct Reading:** One Knob Freq. Control  
**Swept IF:** 7 Kc and 50 Kc  
**Sweep Width:** 50 Mc

771

### SIGNAL SOURCES

Type L771A: 950 to 2000 Mc/s  
 Type S771A: 1900 to 4000 Mc/s  
**Output Power:** 50 mw (average)  
**Direct Reading Frequency Dial:** 1%  
**Internal Modulation:** Pulsed, Square Wave, C.W.  
 Integral RF Level Set Attenuator

810

### STANDING WAVE AMPLIFIER

**VSWR Ranges:** 1-3, 3-10, 10-30, 30-100  
**Modulation:** 1000 cps and 300-4000 cps  
**Sensitivity:** 0.1 $\mu$  volts (max.)  
**Output:** Cathode Follower, 10 volts (max.)  
**Bolometer Bias:** 3.5 to 9.0 ma (front panel control and meter)  
 Bolometer protection circuit prevents transient burnout

815

### UNIVERSAL KLYSTRON POWER SUPPLY

**Direct Reading Voltage Dials:**  $\pm 1\%$   
**Beam:** 200 to 2000V and 1800 to 3600V (250 watts, max.)  
**Ripple:** 3mv RMS (max.); Regulation: 0.03%  
**Reflector:** 0 to 1000V (negative)  
**Control Grid:** 0 to +150V and 0 to -300V (0 to 5 ma)  
**Internal Modulation:** Pulsed, square wave, saw tooth and sine wave

# MICROWAVE and ELECTRONIC TEST EQUIPMENT

### KLYSTRON POWER SUPPLY

**Beam:** 300 to 500 Volts (65 ma)  
**Ripple:** 7 mv RMS (max.)  
**Regulation:** 1% (105 to 125V)  
**Reflector:** 0 to 600 Volts (10 $\mu$ a, max.)  
**Ripple:** 5 mv RMS (max.); Diode Protected  
**Internal Modulation:** Square wave (250 to 2500 cps), saw tooth (40 to 120 cps)

816

### UNIVERSAL POWER METER

**Power Ranges:** 0.1, 1, 10, 100 mw Full Scale; -10, 0, +10, +20, dbm Full Scale  
**Accuracy:**  $\pm 5\%$  of Full Scale  
**Bolometer Bias:** 3 to 10 ma and 10 to 40 ma  
**Bolometer Temperature Coefficient:** Positive or Negative  
**Bolometer Resistance Ranges:** 50, 100, 150, 200, 250 ohms,  $\pm 10\%$

830

### AUDIO FUNCTION GENERATOR

**Frequency Range:** 5 to 50,000 cps (in 4 ranges)  
**Frequency Response:** Constant within  $\pm 0.2$  db (all ranges)  
**Frequency Calibration:**  $\pm 2\%$  of Dial and Range Switch  
**Output Shapes:** Sine wave, square wave, triangular wave  
**Output Meter:** Voltage,  $\pm 3\%$  of Full Scale  
**Hum Level:** 60 db below maximum output voltage

850

# CUSTOM MODULATORS

## from STANDARD

### DESIGNS . . .

**FXR** High-Power Pulse Modulators are custom-built to meet the specific requirements of each application through the use of FXR standard designs, developed by our skilled modulator engineering group. Our staff of experienced application engineers cannot be surpassed in the close integration of the most recent engineering developments with packaged design and standard procedures. You benefit, with a precision instrument at economical cost.

FXR's competent and efficient research, design and development staff, augmented by ultra-modern manufacturing facilities capable of production-quantity fabrication welcomes the opportunity to aid you in the design and construction of the most intricate pulse modulators and high-voltage power supplies.

Send for the "Preliminary Questionnaire" to assist you in planning the design of your next High-Power Pulse Modulator!

High Power Modulator Type No.	Power (peak mega-watts)	Voltage (peak kilovolts)	Current (peak plate-amperes)	Impedance (output-ohms)	Duty Cycle (maximum)	Pulse Shape (μsec/pps)	Input 60 CPS (Ø/volts)	Tubes Operated

Modulator Loads and Exhaust Ovens are also available.

## X845A FXR's MICROWAVE TRAINING KIT

**FXR** presents a complete packaged training program, the first in the industry specifically designed to teach the fundamentals of microwave techniques. This field-tested FXR Microwave Training Kit consists of a complete receiver, transmitter, and accessory group in a convenient carrying-case. Text material, including instructor's demonstration

notes with extensive student laboratory exercises, are also furnished. By interchanging the accessories, the students learn fundamentals of propagation and the method and effects of such phenomena as shielding, polarization, reflection, focusing and bending of microwaves.

The Microwave Training Kit, an FXR exclusive, trains students to take numerical data and learn the methods and techniques of microwave measurements. This simple, efficient training program provides the student with a foundation of practical knowledge and experience necessary to his work in the microwave field.

Data subject to change without notice. Prices on application.

# ELECTRICAL - ELECTRONIC WIRE • CABLE INSULATING TUBING • IDENTIFICATION MARKERS

## WIRE

**HOOK-UP WIRE:** Turbotherm plastic insulated wires manufactured by William Brand and Company are normally supplied uncovered. They can be furnished with textile overbraids, with extruded vinyl or nylon jackets, and with braided or spiral copper shields. Color coding is in accordance with RETMA or MIL-STD-104 requirements. One, two or three spiral stripes can be applied over base colors where necessary for positive circuit identification. Turbotherm wires are resistant to the effects of water, oils, aircraft engine fuels, hydraulic fluids ethylene glycol, dilute acids and alkalis. They remain flexible over a wide range of operating temperatures, have low surface leakage and permanent color retention.

Several types of hook-up wires are available to meet different requirements and specifications:

- A. Underwriters' Laboratories Approved for 80°, 90° and 105° C at 300, 600 and 1000 volt operation.
- B. C. S. A. Approved appliance wires for 80° and 90°C operation; radio and electronic wiring (types TR-64, TR-32, TRB-64 and TRB-32).
- C. MIL-W-76A — Types LW, MW, and HW for 300, 1000 and 2500 volt operation respectively at 80°C.  
JAN-C-76 — Types WL, SRIR and SRHV for 600, 1000 and 2500 volts respectively at 80°C.  
MIL-W-16878B — Types B, C and D for 600, 1000 and 3000 volts respectively at 100°C. Type F, a silicone rubber insulated wire available with or without glass overbraids for operation at 200°C.
- D. Turbo Instrument Wire: a thin-walled uncovered wire for use in low current, low voltage instruments such as high accuracy indicators, meters and servo-mechanisms. Turbotherm 80

instrument wire is recommended where a high value of insulation resistance is required; Turbothers 105 instrument wire is recommended where varnish impregnation and high temperatures are encountered.

- E. Turbo Miniaturization Wire: a thin-walled plastic insulated wire with nylon jacket, specifically designed for equipment operating at temperatures from -55°C to +105°C. Ideal for use in miniaturized equipment both as hook-up wire and leads for transformers, chokes and other components where space is at a premium and operating temperatures are high. Insulation resistance values exceed 1000 volts per mil and dielectric strength exceeds 900 volts per mil. This wire is recommended for potting operations and varnish dipping and baking.
- F. High Voltage Leads: Two types are presently manufactured; an unjacketed flame-retardant polyethylene insulated wire, U/L approved for 10,000 and 20,000 volts D.C., and a vinyl jacketed polyethylene type made to individual specification.

## CABLES

**MULTI-CONDUCTOR CABLES:** Precisely made to specification from any of the conductor types above, but including also, where required, coaxial cables. These cables can be furnished with exact positioning within the cable of individual coaxials, twisted pairs, triples or groups. Constructions are available using fillers, tapes, wraps, shields and jackets either over the entire cable or any portion of the cable.

## TURBO TUBING AND SLEEVINGS

The many varieties of quality controlled, electrical insulating tubing manufactured by William Brand and Company fall into two general categories: coated tubings and extruded plastic tubings. Within each of these categories many types exist, each engineered to do a specific job.

- A. **COATED TUBING:** All coated tubings are available in standard AWG sizes from #20 to #0 inclusive and fractional sizes up to 1½" I.D. Generally stocked in Black, these tubings are also available in Brown, Red, Orange, Yellow, Green and Blue. Tubings are supplied in five standard grades meeting applicable ASTM, NEMA and MIL specifications as shown below.

Grade Designation	Average Dielectric Strength
A-1	7000 volts
B-1	4000 volts
C-1	2500 volts
C-2	1500 volts
C-3	No dielectric guarantee

1. **Class A Tubing:** An excellent general purpose tubing with smooth inner surfaces to facilitate snaking and assembly. Turbo Varnished Tubing is a cotton or rayon braid impregnated with organic varnishes.
2. **Class B Tubing:** Turbofuf Tubing . . . a vinyl coated glass tubing with exceptional flexibility, abrasion resistance, dielectric properties and good heat endurance characteristics. Turbofuf is used extensively in electronic equipment as insulation over bare leads. Furnished in two grades: Turbofuf-8 and Turbofuf-4 with minimum dielectric strengths of 8,000 volts and 4,000 volts respectively.
3. **Class H Tubing:** The trend toward miniaturization has intensified heat problems within electronic apparatus and has created serious problems in soldering in close quarters without injury to conventional insulations. Turbosil silicone var-

nished glass tubing and Turbo 117 silicone rubber coated glass tubing have been used successfully to overcome these difficulties. These tubings retain their physical and electrical properties at temperatures of from -80°F to +500°F. Turbosil has great physical toughness and is abrasion and peel resistant. Turbo 117 is extremely flexible and retains its dielectric properties under severe mechanical stress. Both are chemically inert and fungus resistant.

- B. **EXTRUDED PLASTIC TUBING:** The various formulations of vinyl plastic tubings have been established to meet the wide range of Underwriters' Laboratories or military specification requirements. Tubings are available in standard AWG sizes #24 to #0 inclusive and in fractional sizes up to 2" I.D. Special sizes and wall thicknesses can be supplied to meet specific requirements. While generally stocked in Black and Transparent, all RETMA colors are available.
  1. **High Temperature:** Turbotherm 105 and Turbothers 105 are Underwriters' Laboratories approved for continuous operation at 105°C. Both combine high dielectric strength with optimum physical properties at elevated temperatures. Turbothers 105, especially formulated to withstand potting and baking temperatures, will also meet the requirements of MIL-I-631B, Grade c.
  2. **General Purpose:** Two types are available: Turbolex 85 recommended for applications where moderate heat may be encountered with occasional exposure to oil. It is adequate for most low temperature work. Turbolex 76, meeting the MIL-I-631B requirements for Grade a tubing is optically clear when unpigmented, and is fungus resistant.

## COAXIAL CABLE

**TURBO "RG" TYPE TRANSMISSION LINE CABLES** are fabricated in exact accordance with the military specifications for this type of product. Continuous quality control testing during every phase of the manufacturing process insures a final product which will pass all requirements with ample safety margins.

**TURBO "RG" TYPE TRANSMISSION LINES** have high dielectric and high impulse strength, high resistance to corona cutting and low power loss. The typical cables are of standard design construction. The "A/U", "B/U" and "C/U" types are covered with low temperature type IIA non-contaminating vinyl jackets, as specified in JAN-C-17A Amendment 2 and MIL-C-17B. Others can be manufactured in accordance with this specification or in accordance with individual or special requirements.

## TURBO IDENTIFICATION MARKERS

Turbo Identification Markers are manufactured from Turbo Varnished Tubing and Turbo Extruded Plastic Tubing of all types. This product will meet applicable Army-Navy and Air Force specifications. Their tubular form insures positive, permanent identification once applied and eliminates time-consuming, injurious crimping operations and the flammability of paper and similar devices.

Turbo Identification Markers are available in all standard sizes from #14 to 1½" I.D. The extruded plastic type can also be furnished in special non-standard sizes. Markers are normally furnished in lengths of ¾" to 4" inclusive, but longer lengths can be supplied on request.

**WILLIAM BRAND & COMPANY, INC. • Willimantic, Connecticut**

# Northern Radio FREQUENCY SHIFT TERMINAL EQUIPMENT

## FREQUENCY and SHIFT MONITOR SYSTEM

This system consists of a Type 106 Frequency and Shift Monitor and a Type 127 Frequency Meter. It is designed as a secondary standard to monitor the frequency and amount of shift of transmitter carrier outputs. It is particularly intended to measure the frequency shift of a mark and space (FS) signal either when setting up for traffic or under normal keying conditions.

The Monitor's stability is better than 2 cycles per megacycle over an ambient temperature range of 0-50° C—using crystals having a temperature coefficient of only 3 parts/million/degree C. Range is 2.5-30 mc with 10 crystal-controlled frequencies (separate panel trimmers for each); use of external oscillator also provided for. Frequency Shift range is 10-10,000 cps. Less than 100 millivolts RF input needed for 2 volts audio output.

The Frequency Meter is specially designed with selectable normal and fast-acting damping factors, permitting frequency measurements of signals while keying. Its accuracy is 2% of full scale for the ranges 0-200, 500, 2000, 5000, 20,000 cps.

METER: TYPE 127, MODEL 2  
MONITOR: TYPE 106, MODEL 4

## TYPICAL TRANSMITTER TERMINAL for TWINPLEX OPERATION

TYPE 105, MODEL 6

## FREQUENCY SHIFT KEYS

Supersedes and replaces its leader predecessor, Type 105 Model 4.

- Highest stability achieved by any FS Keyer.
  - Increased frequency range 1.0 to 7.0 mc.
  - Pre-selection of proper FS for any particular transmitter frequency multiplication.
  - Permits use with external oscillator without need of adapters.
  - Improved accessibility for even easier maintenance.
- Direct-reading frequency calibration of shift from 0 to 1000 cps.
  - FS dial adjusts "Mark" and "Space" frequencies equally above and below the carrier position.
  - Direct-reading frequency calibration of mixer and output tuning dials from 1.0 to 7.0 mc.
  - Direct reading calibration of output frequency vernier  $\pm 600$  cps.
  - Pulse-shaping circuit permits operation within assigned band-width with no adjacent channel radiation.
  - Linear carrier shift up to 1400 cps for Fax operations.

## TWINPLEX COMBINER TYPE 177 MODEL 1

For twinplex operation, the transmitting terminal includes a Twinplex Combiner Type 177 Model 1.

The Twinplex communication system makes possible a 2-channel radio circuit whereby 2 non-synchronous or synchronous telegraph transmissions modulate a single radio carrier wave causing the carrier to assume one of four specific frequencies with 400 cps separations.

The Combiner converts the four possible conditions of two telegraph signals (M1-M2, M1-S2, S1-M2, S1-S2) respectively into one of four voltages related in a 0-1-2-3 manner. The Combiner output voltage modulates the Frequency Shift Keyer.

The two telegraph channels provide the same operational flexibility as that of two separate single channel FS systems. One can, for example, simultaneously use channel #1 on 60 wpm teletype and channel #2 on high-speed Morse or Time-Division Multiplex.

### TECHNICAL DATA:

**Keying Inputs:** 1. Contacts; 2. DC current pulses, positive, negative, or polar; 3. DC voltage pulses, positive, negative, or polar.  
**Input Level:** 1. DC Voltages:  $\pm 10$  volts minimum; 2. DC Current: 45 ma. minimum.  
**Keying Speed:** 240 Words per minute maximum.  
**Output Impedance:** 10,000 ohms.  
**Keying Input Impedance:** 1. DC Voltage: 100,000 ohms. 2 DC Current: 220 ohms.  
**Output Level:** Neutral: 0 to 25 volts; Polar: +6 to -6 volts

**Output Voltage Conditions:** Four output voltages are to be proportioned as follows assuming linear P.S. Keyer characteristic.  
**Input:** M<sub>1</sub> M<sub>2</sub>, M<sub>1</sub> S<sub>2</sub>, S<sub>1</sub> M<sub>2</sub>, S<sub>1</sub> S<sub>2</sub>; Output 0, 1, 2, 3.

Individual level adjustments provided.  
**Power Requirements:** 110/220 volts, 50/60 cycles. Approximately 50 watts. Connections at rear of chassis.  
**Dimensions:** 3 1/2" High x 19" Wide x 10" Deep.

## VARIABLE MASTER OSCILLATOR TYPE 173 MODEL 1

The Northern Radio Company Variable Master Oscillator provides a continuously variable source of radio frequency energy with a stability of approximately 1 cycle per megacycle in the range of 2 to 4 megacycles. It may be used as the basic control oscillator for diversity receivers, high frequency transmitters and other communications devices, or as a laboratory standard for test and measurement functions.

Its ease of operation and direct reading of frequency make it an outstandingly useful device where precise frequency control must be maintained by completely unskilled personnel. No curves, interpolations or calculations of any kind are required in its use. Frequency is set approximately to the desired value by rotating the oscillator dial. The last three digits of the frequency automatically pulls in to the valve pre-set on the switches and holds with an accuracy that exceeds that of most temperature-controlled crystal oscillators.

### HIGH FREQUENCY OSCILLATOR

Output Frequency: 2—4 MC continuously variable.  
Stability for any combination of temperature range from 0 to 50° C., and line voltage of 115 to 230 ± 10%: Approximately 1 cycle per megacycle.  
Output level: 1/2 watt into 75 ohm load. Lever control on rear of chassis.  
Readability: ± 2.5 cycles per second. Direct digital readout on mechanical and electronic counters.  
Resettability: Absolute.

### BEAT FREQUENCY OSCILLATOR

Output Frequency: 400—800 KC crystal controlled.  
Output Level: 3.5 volts into 1000 ohm load. Level control on rear of chassis.

### TIME BASE CRYSTAL OSCILLATOR

Output Frequency 100 KC  
Stability for 0 to 50° C and ± 10% Line Voltage change: 0.2 part per million for any 12 hour period; 1.0 part per million for thirty days.  
Output Level: Approximately 2 volts.  
Output Impedance: Approximately 100,000 ohms.

**TWINPLEX CONVERTER  
TYPE 178 MODEL 1**

This Twinplex communication system makes possible a 2-channel radio circuit whereby 2 non-synchronous or synchronous telegraph transmissions modulate a single radio carrier wave by causing the carrier to assume one of four specific frequencies with 400 cps separations.

The receiving equipment consists of the Twinplex Converter Type 178 Model 1 and a single or diversity receiver such as the Northern Radio Type 110 Dual Diversity Receiving System. The Converter demodulates and separates the four audio tones from the radio receiver(s) into two channels each carrying the originally transmitted intelligence. The Twinplex Converter replaces the standard FS Converter for this purpose.

The two telegraph channels provide the same operational flexibility as that of two separate single channel FS systems. One can, for example, simultaneously use channel #1 or 60 wpm teletype and channel #2 on high-speed Morse or Time-Division Multiplex. It further permits the reception of channel #1 signals on all standard FS converters (tunable to 400 cps shift) without need for a Twinplex Converter: this is valuable for "Forked Circuit Operation" where the intelligence of channel #1 is intended for pick-up by other receiving stations which are not equipped for Twinplex Reception in addition to the main receiving stations which are so equipped. Reception of channel #2 (or of both channels) requires the receiving end to be equipped with a Twinplex Converter.

**TYPICAL RECEIVER  
TERMINAL  
for TWINPLEX  
OPERATION**

**VARIABLE MASTER OSCILLATOR  
TYPE 115, MODEL 1**

The Variable Master Oscillator Type 173 (above) may be replaced by this Variable Master Oscillator Type 115 Model 1 which is designed principally for use in diversity reception to supply variable or crystal HFO voltage to the receivers. Its variable frequency has a stability equivalent to that obtained by non-temperature-controlled crystal oscillators. It also provides 3 HFO crystals for operation of diversity receivers where fixed frequencies are required, and 2 BFO crystals.

**FREQUENCY SHIFT  
DIVERSITY CONVERTER  
TYPE 174, MODEL 1**

For use with either single-receiver frequency diversity systems or 2-receiver space diversity systems. By means of plug-in units, any reasonable number of channels is available between the frequencies of 425 and 3315 cps for either frequency or space diversity operation. For standard FS operation, the plug-in networks provide shift adjustments from 100 to 1000 cps shift.

Normal input Level: -40 to +10 VU (Zero VU = 1mW into 600 ohms). (Satisfactory operation on fades to -60 VU.)  
Limiter Recovery Time: Negligible for a 40 VU differential between Mark and Space frequencies.  
Output: 65 ma into 2000 ohms floating (self-contained line battery).  
Keying Speed: Maximum of 40 dot cycles with narrow band frequencies diversity. Up to 400 dot cycles with the wide band networks.  
Monitor: 2-inch Cathode Ray tube  
Input phone jack  
2 input volume level indicators  
1 output current indicator

## MULTI-CHANNEL FREQUENCY SHIFT TONE TELEGRAPH SYSTEMS

These Multi-Channel Telegraph Systems are audio carrier systems capable of multiplexing such circuits as telephone lines, VHF, UHF, or radio frequency links—or practically any type circuit from which a two-wire audio circuit can be derived. Designed to meet any speed requirements, these systems are fully electronic, without relays or moving parts to wear. They can be used for high-speed printer, Morse or time division Multiplex circuits, as well as such application as Telemetering, Control Circuits and Servo-Mechanisms. Instantaneous and complete sending and channel control permits any binary code groups, either "Clear Text" or "Cryptographic," to be channelized without need for additional phasing or synchronizing equipment, while paralleling of channels will allow for transmission of other type codes, such as 3 element cable code. The completely independent operation of each channel, including its own power supply, localizes faults to one channel only, leaving other channels unaffected. Individual

DUAL FS TONE KEYS; TYPE 153 MODEL 3:

Keying Input. . . . Relay contacts,  $\pm$  DC current or voltage pulses, neutral or polar.

Input Level. . . . DC voltage:  $\pm$  10 volts min. DC current: 45 ma min.,  $\pm$  or polar. Relay: contact rating 5 ma min.

Keying input Z. . . . DC voltage: 100K ohms. DC current: 220 ohms.

TRANSMITTER

RECEIVER

channel separation filters are used at both transmitting and receiving ends. This arrangement allows for sending telegraph or control signals over a circuit carrying, simultaneously, other forms of intelligence; or for two-way communications on the same line. The audio frequency shift principle of transmission provides for high fidelity of signal reproduction over a wide range of signal levels as well as under severe noise or interference conditions. Circuit requirements of any speed, shift and center frequency can readily be met. The systems illustrated are for use on printer circuits up to 100 WPM channel capacity. The system arrangement is very flexible, permitting grouping of the basic units into various arrangements of Multiplex Systems. These systems can be made to accommodate a large variety of channel numbers and speeds to meet any individual requirements. The flexibility is further improved by the fact that the racks, power control units, and terminal connection panels are the same for both transmitting and receiving terminals.

DUAL FS TONE CONVERTER: TYPE 152 MODEL 3:

Input Z: 600 ohms, unbalanced.

Input Level: —40 dbm to 0 dbm.

Input Frequencies: 18 channels, 425-3315 cps, 170 cycle spacing.

Keying Speed: 45 dot cycles.

### DUPLEX TELEGRAPH SYSTEM FOR MULTI-CHANNEL TONE EQUIPMENT

SEVEN NEW FEATURES in this system—simple 4-position switch selects from 12 possible duplex combinations; duplex operation between stations connected via carrier telegraph channels; all-electronic, without relays or moving parts; polar or neutral for either half duplex or full duplex; break-in now also possible for all half-duplex circuits; provided with positive feature to prevent space signal lock-out; includes individual line battery for each channel.

The Northern Radio Duplex Telegraph System consists of one each Dual Frequency Shift Tone Keyer, Type 153 Model 3; Dual Duplex Selector Panel, Type 200 Model 1; Dual Loop switch Panel, Type 200A Model 1; and Dual Frequency Shift Tone Converter, Type 152 Model 3.

DUAL DUPLEX SELECTOR PANEL  
Type 200  
Model 1

The Dual Selector Panel provides 12 loop options, patching facilities for monitoring purposes and channel routing, including the possibility of patching-in another teleprinter loop circuit (T-junction). Any of the 12 loop options are available and may be selected for the Dual Loop Switch Panel by simple strapping arrangement. It has an individual line battery for each channel for greatest circuit flexibility. Battery and line fuses are also provided for maximum protection.

DUAL LOOP SWITCH PANEL,  
Type 200A  
Model 1

The Dual Loop Switch Panel rapidly selects half-duplex and/or full duplex mode of operation for any of the 4 standard loop options by front panel switching available from the 12 loop options in the Dual Duplex Selector Panel.

### NEW! REGENERATIVE REPEATER

TYPE 207  
MODEL 1

This new Regenerative Repeater—the most advanced in the industry—is designed for use in telecommunication circuits to re-shape and re-time distorted signals for local use or retransmission. Special provision has also been made for its use on half duplex where it will not only regenerate the ordinary teleprinter signals but also faithfully reproduce such special signals as "break" signals and "mark restoration" information. Outstanding features include: . . . maximum acceptable signal distortion: new circuitry accepts up to 47% mark or space distortion; "floating" input & output circuits; completely electronic output, no relays; greater timing circuit stability: time base derived from highly stabilized L-C oscillator; adaptable to any speed: low-pass filter & frequency-determining elements are plug-in units; completely self-contained: includes power supply & line battery.

#### TECHNICAL DATA

Input Keying Signal Requirements: (1) Neutral keying, positive or negative sense, (a) on-off 60 ma pulses, (b) on-off voltage pulses 10-100V into 100K ohms, (2) Polar keying, (3) Dry contact keying.

Frequency Stability of Time Base Generator: Less than 1 point range loss for  $\pm$  10% line voltage variation or  $\pm$  20° C ambient change from 25° C.

Sampling Time: Approximately 50 microseconds.

Output: Electronic tube outputs: (a) neutral 65 ma max. into 2K ohms, (b) polar 33 ma (max.) into 2K ohms.

Power Requirement: 125 watts approx: 110/220V, 50/60 cps.

Mounting: Standard 19" rack mounting, 5/4" panel.

## MODERN COMPONENTS FOR MAINTENANCE FREE ELECTRONICS USE

### SEMICONDUCTOR RECTIFIERS

Westinghouse silicon and germanium rectifier cells are characterized by long life, very good reliability, no detectable aging, and excellent mechanical stability. All devices are ruggedly designed to withstand a wide range of operating conditions. They are hermetically sealed to protect the junctions from atmospheric contamination. More power output is obtainable with Westinghouse semiconductors which means considerable reductions in space and weight.

#### 302(N5051), 303(N5091)

The 302 and 303 silicon rectifying cells are used for medium and high power applications where d.c. current is required. The 302 diode is rated at 35 amperes, half wave, forward current with forced air cooling and mounted on a suitable heat dissipating plate. It is available in voltage classifications up to 500 (P. I. V.) peak inverse voltage. 303 is available in the same voltage classifications but is rated at 22 amperes forward current, half wave circuit. *Additional information:* 302, technical data 54-164, pg. 1-2; 303, technical data 54-163, pg. 3-4

#### 304

The 304 is a silicon rectifying cell used for medium power application where d.c. current is required and space is a factor. It is rated at 12 amperes half wave, average forward current with forced air cooling and mounted on a suitable heat dissipating plate. It is available in voltage classifications up to 500 (P. I. V.) peak inverse voltage and also available in low leakage classification for Magamp application with the same voltage ratings. *Additional information:* technical data 54-163, pg. 1-2

#### 305, 307, 308, 320, 1N1169

Low power silicon rectifying cells for applications such as magnetic amplifiers, computers, control circuits and power supplies. Available in voltages up to 600 P. I. V. The 1N1169 is for high voltage radio and TV applications. *Additional information:* technical data 54-161, page 1-2.

#### 322(N5082), 319, 326

The 319, 322 and 326 are high power diodes of very rugged construction. These units are rated at 150 amperes average current, half wave with forced air cooling and mounted on a suitable heat dissipating plate. It is available in voltage classifications up to 500 (P. I. V.) peak inverse volts. Mounting versatility is achieved through the variety of case configurations. *Additional information:* technical data 54-167, pg. 1-2, 3-4, 5-6

#### WA-4051

WA-4051 Semitron is a high current, low voltage germanium rectifying cell designed for special applications. The cell is liquid cooled and rated 90 volts P. I. V. and 250 amperes half wave average forward current.

#### 100

A family of low power germanium PNP transistors designed for audio frequency applications, class A and class B amplifiers, switching, or general applications. It is capable of dissipating 150 milli-watts.

#### 102

102 is a germanium power transistor designed for audio and switching applications. It is rated at collector voltage - 35 volts and collector current - 2 amperes. It has a very high, large signal current gain throughout the operating range up to 75° C.

## SILICON BRIDGES

Silicon bridge assemblies are available in a variety of standard as well as special designs. The low power diodes are available in assemblies with 1½" copper plate. Special devices are mounted as shown in the picture on insulated fixtures used primarily for mounting where the current requirements are low but the voltage requirement is extremely high. It is not unreasonable to have an application for 25,000 volts to meet communication or precipitation requirements.

The medium power diodes are also available in the insulated plates, 2", 3", and 5" copper plates depending upon the space and electrical requirements of the customer. The medium power diodes bridge the gap between this high voltage, low amperage and high power devices. These high power devices have been assembled with currents up to 40,000 amperes. The higher power diode is mounted on 5" or 7" copper plates and

follows the fundamental rectifier circuits as designated in the AIEE standards.

Some of these typical rectifier circuits are: Single-phase half wave, single-phase full wave center tap, single-phase full wave bridge, single-phase or three phase half wave, three-phase full wave bridge, six-phase half wave, six-phase with interphase, six-phase full wave bridge, and six-phase full wave with interphase.

As an example of the variety of circuits in actual existence, the photos at left show units ranging up to a (12-1-1-B) six-phase full wave with interphase connection which has a rating of approximately 450 amperes at 400 peak inverse voltage.

It is a fundamental principle that multiples of any of these basic configurations can be used in series or parallel in order to achieve the voltage and current required for the particular application.

## SELENIUM STACKS

**Application:** Listed below are a few applications for which selenium stacks are ideally suited:

Battery chargers—all types, industrial and automotive, telephone repeater stations—d-c power supplies, business machine power supplies, communication equipment—teletype, teletype, facsimile, radio transmitters and radar equipments, electroplating power supplies and control, general purpose d-c power supplies, variable voltage power supply units, circuit breaker closing and tripping, cathodic protection power supplies, airborne and ground power supplies, blocking, dynamic braking for a-c motors, magnetic brakes, clutches, pulleys, chucks, etc., electrostatic precipitation—high voltage d-c, d-c motor power supplies—synchronous motor excitation, arc welders.

**Advantages:** Long life; outstanding characteristic of the Westinghouse selenium cell is the low rate of forward aging—unmatched in the industry. This is the one characteristic of a selenium stack that assures many years of trouble-free service.

**High temperature operation:** Westinghouse inorganic barrier layer combined with high temperature alloy permits operation at cell temperatures above 75° C.

**High efficiency:** Maintains good efficiency over wide range of load at rated volts.

**Uniformity:** Uniform cell quality is maintained through precise quality control and engineering supervision of each process step, in a modern air-conditioned factory.

**Maintenance eliminated:** Selenium stacks are static devices with no moving parts, nothing to wear out.

**Versatility:** Cell sizes and stack combinations are available for a wide range of d-c voltages and currents.

**Instantaneous d-c:** Power flows instantly on application of a-c—no "warm-up" time required.

**Easy installation:** Lightweight, compact design simplifies handling and installation.

**TYPE K SELENIUM RECTIFIERS** Type K selenium rectifiers fill the need for versatile, low-cost, highly reliable rectifying elements for low and medium current applications. They are packaged in several different forms to meet the diverse requirements of military and commercial equipment. Cells for all units are made by the Westinghouse vacuum process, which assures the best possible characteristics of long life, low forward drop, and very low reverse current.

**Advantages:** Low reverse current: Particularly in the 15 to 30-volt range, reverse current is extremely low compared with that of most selenium power rectifiers.

**Temperature stability:** Electrical characteristics of type K selenium rectifiers are relatively constant over an ambient temperature range of -55° C to +85° C.

**Minimum aging:** Electrical characteristics of type K rectifiers are remarkably stable both in storage and in service.

**Environmental protection:** Each type of rectifier is available with various degrees of protection to meet environmental conditions.

**Printed circuitry:** Miniature rectifiers are designed for convenient application to printed circuit boards.

**Proved in Magamp applications:** Type K rectifiers have proved their dependability and trouble-free operation in thousands of Magamp and Cypak applications.

For additional information see descriptive bulletins 19-101 and 52-655

HIPERSIL CORES

Hipersil<sup>®</sup> Type C Cores

The Hipersil Type C core was developed and introduced 16 years ago by Westinghouse. Continual development since then has produced major improvements in magnetic quality toward lower core loss and higher permeability. These along with improvements in construction such as a lower loss etched butt joint and the recent grooved core construction insures better performance and transformer stability.

Available in 1, 2, 4, and 12 mil thicknesses of material for applications using frequencies of 60 cycles to several megacycles.

For additional information refer to descriptive bulletin 44-550.

Listed below are the cores normally carried in stock:

\* Trademark.

Table with columns: 4 mil, dimensions (strip width, build up, window width, window length), weight (pounds), gross area (sq. in.), mean length magnetic path (Lc). Rows include models H-115 to H-55.

Table with columns: 2 mil, dimensions (strip width, build up, window width, window length), weight (pounds), gross area (sq. in.), mean length magnetic path (Lc). Rows include models L-1 to L-25.

Table with columns: 12 mil, dimensions (strip width, build up, window width, window length), weight (pounds), gross area (sq. in.), mean length magnetic path (Lc). Rows include models A-4 to A-480.

**HIPERMAG CORES**

**60 AND 400 CYCLES**

Hipermag cores—Toroidal cores tape wound with high permeability magnetic material and encased in nylon or aluminum boxes. Damping agents are used to protect the cores in their cases. Either silicone grease or silicone oil as is required. When oil filled, the cases are hermetically sealed to allow encapsulation or vacuum impregnation. Cores are available in Hipernik (50% iron-

nickel) and 4-79 Permalloy in gauges of 1, 2 or 4 mils. Cores are tested by the Roberts test method and test values guaranteed to assure proper performance for your magnetic amplifier application. *Cores can be supplied matched in pairs, quads or sixes by the Roberts test method.*

For additional information refer to descriptive bulletin 44-750.

**PULSE TRANSFORMERS**

**HERMETICALLY SEALED**

Oil-filled output pulse transformers for peak voltage ratings 7 Kv and higher, and pulse widths from 1/4 to 10 microseconds are

available in standard ratings and are also designed to customer specifications.

\*Design includes a filament transformer mounted in the H. V. bushing to transform 115 volt supply and Bifilar amps to magnetron heater requirements.

Low Power: Designed for use in low power, low voltage pulse circuits. Four general types are: (1) Blocking oscillator or regenerative drive, (2) Pulse trigger of current trans-

former, (3) Low power pulse output transformer, and (4) Coupling transformers. See Catalog Section 45-210.

**CHARGING CHOKES**

**HERMETICALLY SEALED**

Used between D-C power supply and Pulse-forming network in high power pulse modu-

lators. Types, based on circuit operation, are resonant, hold-off diode, and linear.

**WESTMOLD TRANSFORMERS**

**WESTMOLD**

Filament—Plate—Power—Filter Choke —Low Power Pulse Transformers. Westmold transformers utilize type C Hipersil® cores in a one loop design to achieve a standard design transformer that will fit most applications with minor adaptations. Also available in 3 phase designs. WESTMOLD transformers have greater resistance to moisture penetration than previously available resin encapsulated transformers. The molding operation permits a thicker coating of resin. This coupled with completely filled, void-free coils increases the transformer's ability to withstand

high humidity and thermal aging. These transformers are cast in a mold with a material developed by Westinghouse Research Laboratories. This material maintains its flexibility at low temperatures and passes the type "C" thermal shock test of MIL-C-16923. The new molding material has less weight loss on heat aging than any other material tested.

The WESTMOLD transformer further offers dimensional stability and good appearance—the shape of the transformer is fixed by the mold in which it is poured.

TYPICAL DESIGN DATA 380-420 cycles —75° rise by resistance. 160° C maximum operating temperature in windings (with fosterite encapsulation or equivalent). Single coil-single core open type construction. Maximum regulation 15% 3,000 volts, rms, test. Class B insulation 2,000 hours life.

LEGEND: (1) Voltampere rating based on 115 volt primary, 380 cycle minimum frequency, single secondary having a 3,000 volt insulation level and electrostatic shield for each additional secondary winding core. Rating must be decreased 10%. For 5 KV rms working voltage decrease core ratings in table by 33%. (2) Mounting centers conform to standard MIL-T-27A mounting dimensions.

**MAGNETIC AMPLIFIERS**

**MAGAMP\***

Westinghouse MAGAMP magnetic amplifiers can be used to advantage in most applications requiring reliable static power amplifiers that need little attention or maintenance and that will withstand high shock or vibration. MAGAMP amplifiers give high ratios of power output per unit volume and weight, high sensitivity and power gain, and good amplifier linearity.

The Westinghouse type K MAGAMP selenium rectifiers used have low reverse leakage currents necessary to assure long life and minimum aging in amplifiers utilizing high gain core materials. The thermo-setting resin protective coating and winding impregnation results in a reactor assembly that will present a maximum of environmental protection and yet be comparatively small and lightweight. These Westinghouse components and materials of known and proven quality combine to make MAGAMP magnetic amplifiers capable of long, high performance operation. MAGAMP amplifiers have been applied in servo systems as complex as aircraft auto-

pilots, in the control of motors from the smallest fractional horsepower size to the largest steel mill drive, in the regulation of generator voltages from the miniature aircraft unit to the central station generator. They have been used to amplify the minute outputs of thermocouples, photocells, ionization chambers, and strain gauges. Other applications have included arc welding controls, ignitron firing controls, paper mill reel control, automatic battery chargers, and isolation metering of d-c voltages and currents. MAGAMP amplifiers are available in the 3700 series under seven general numbers, as shown in the table below. They may also be engineered for specific applications. This service is available through your Westinghouse representative. For complete descriptive information on the 3700 series of amplifiers request Technical Data 52-600. Other magnetic amplifiers are covered in Technical Data 52-601, 52-602, 52-603, 52-604, 52-605, and 52-606.

 § RMS value if output is a-c; average if output is d-c.

**CYPAK** \*

**MAGNETIC CONTROL**

The name CYPAC, applied to Westinghouse logic elements for industrial control, is derived from the new science of Cybernetics. The name stands for packaged Cybernetics—CY for Cybernetics, PAK for package.

CYPAC elements are definitely a replacement for relays, but not on a one-for-one basis. Relays accept only one input, and provide a number of isolated outputs. CYPAC elements, on the other hand, accept a number of inputs, and provide a single output. This output can be used for a number of functions.

Unlike relays, CYPAC elements have no moving parts, contacts, springs or other elements subject to wear or erosion. The result is a tremendous increase in control life and reliability. Since CYPAC is a static

device, there is no indication that life can be given in terms of the number of operations. However, the life of CYPAC elements is estimated as ten or fifteen times that of a conventional relay.

The operation of CYPAC elements is based primarily on magnetic amplifier principles, but with the addition of the unique Ramey circuit.

CYPAC static control is applicable to every type of industrial application involving sequential or contingent operation. It consists of a number of logic or "decision" devices which provide all functions that are performed by relays, along with auxiliary devices that form a complete system.

For additional information see technical data 52-760

\* Trademark.

**LOGIC FUNCTIONS**

Signals are the common ingredient of all industrial control circuits. These information carriers make up both the quantity on which operations must be performed and the means by which operations can be performed. Signals are amplified, transmitted, or switched. They are also used for actuating control mechanisms and for matching between systems or their sections.

Electrical control nomenclature is based on the signal. Signals take one of two forms: "Analog" or "Digital". Electrical systems, equipment, and even design approaches are largely classified under these two headings. Although logic functions are primarily concerned with "digital" type control, a comparison of the two types serves as an effective method for defining them.

The "digital" signal is a sharp, discrete signal of definite duration. It is a pulse. The "analog" signal, in direct contrast, is continuous, and gives a continuous representation of some quantity or process. The signal from a switch is a digital type signal while that from a tachometer generator is analog.

**DIGITAL CONTROL**

Digital type control is perhaps the most common control approach in industrial control circuits. The most common digital device used in control circuits is the relay. Since 1836 the relay has been able to fill a constantly growing range of control requirements. Since the early 1920's, it has been used extensively for industrial control. Today it has reached a nearly perfect state of application. However, the relay's ability to continue to satisfy these needs is questionable. Although it is a versatile and well-suited performer, it can no longer keep pace with the demand for greater reliability.

Industry, and the high production industries, have demanded more and more life from the relay in recent years. Faced with the possibility of having to base even more complicated digital schemes on a device which seems to be approaching an upper limit in reliability, industry is asking for a fresh approach to its switching problems. Logic functions appear to be not only the approach required but also an opportunity to get closer to the fundamentals of digital control.

**FUNCTIONS AVAILABLE**

A logic function is a means of expressing a definite condition. Curiously, only four logic functions are required to express any possible condition, or specific arrangement or information. These are: AND, OR, NOT and MEMORY. The definition for each one of them can almost be deduced from their names.

**"AND" Function**

In the "AND" function, an output is obtained only when all of a given number of input signals are applied. In other words, given input a and b and c and . . . j, an AND function delivers an output. Corresponds with relays in series.

**"OR" Function**

In the "OR" function, an output is obtained when any one of a number of inputs is applied. Hence, given any input a or b or c or . . . j, the OR function delivers an output. Corresponds with relays in parallel.

**"NOT" Function**

In the case of the "NOT" function, an output can be obtained only when no input signal is applied. Therefore, given an input a, no output is obtained; but stop input a and the NOT function delivers an output. Corresponds to a normally closed relay.

**"MEMORY" Function**

The fourth type is the "MEMORY" function. Actually, there are two kinds of MEMORY functions—a limited function and an unlimited. Limited memory means that, following an input, a specified interval passes before an output is obtained. Or in other words, given an input a, an output is obtained after a specified time, T<sub>1</sub>. The unlimited memory function, as the name connotes, delivers an output following an input until such time as a second input is fed into the system; the second input stops the output. Hence, given input a, the unlimited MEMORY function delivers an output until input b is applied. Corresponds with a latched-in relay.

**INSTRUMENTS**

**Panel Instruments**

Type R-33

Type N-37

Type RC-35

Type N-35

Type R-35

**Switchboard Instruments**

Type 25

Type K-24

**Portable Instruments**

Type P-5

Type P-4

**Recording Instruments**

Type 44

Type P-14

A complete line of instrumentation is offered in panel portable, switchboard and recording types to measure a great variety of electrical quantities.

**PANEL INSTRUMENTS**, accurate to 2%, are available in 2½, 3½ and 4½ inch sizes. Included in this line are instruments to measure d-c microamperes, milliamperes, amperes, millivolts and volts; a-c milliamperes and volts at commercial power frequencies; microamperes, milliamperes and volts at audio frequencies; and milliamperes and amperes at radio frequencies.

Also included are decibel meters to measure power level in standard transmission lines and elapsed time meters ideally suited for tube life testing.

Round or rectangular case styles can be provided for both flush and projection mounting. The entire panel instrument line has co-ordinated styling enabling instruments of different sizes to be used on the same panel without sacrificing matched appearance.

Westinghouse panel instruments are fully approved under government specification MIL-M-6A and ASA specification C-39.1. See catalog section 43-300.

**PORTABLE INSTRUMENTS** can be supplied for ½, ¾ or 1% accuracy. A wide variety of multirange styles makes these instruments ideally suited to test different electronic circuits having wide ranges of current or voltage. Current ranges from as low as 10 microamperes to as high as 200 amperes full scale can be measured without the use of external accessories. Similarly obtainable are voltages measurements from two millivolts to 1500 watts.

Knife-edge pointers, minor dials and five-line scale divisions are provided on all portable instruments to assure quick, accurate readings. See catalog section 43-100.

**SWITCHBOARD INSTRUMENTS** are available either in the conventional 90° scale design or the modern design 250° scale. A tremendous variety of electrical quantities including current, voltage, power, reactive power, power factor, frequency and synchronism can be measured with these instruments.

The full view cover and dial construction on the K-24 instrument assures accurate readings at wide-angles from the instrument without parallax or shadow. See catalog section 43-200.

**RECORDING INSTRUMENTS** of the direct-acting type provide 1% accuracy. Simplicity is the keyword—minimum time required to change charts and fill the inkwell. The mechanisms—chart and measuring—are easily accessible for on-the-spot repair work if required. Fast response time, high torque and a continuous, accurate record are assured because of Westinghouse attention to design and construction details. All Westinghouse instruments have matched, co-ordinated styling, and performance is the result of years of experience in the manufacture of a high quality product. Dials that stay white, springs that do not change their characteristics and carefully honed pivots are only three of multiplicity of reasons why Westinghouse provides the highest quality instruments available.

A wide variety of ratings of all types are available from stock, ready for immediate shipment. See catalog section 43-415 and 43-440. Consult your nearest Westinghouse sales representative for details.

## INDICATING LIGHTS

FOR A-C VOLTAGES  
UP TO 550 VOLTS

A-C OR D-C SERVICE  
125 VOLTS

Panel Mounting—Indicating lights have shock resistant lens with wide angle visibility. They are available in six

standard colors; red, green, amber, blue, opalescent, and crystal. Two types of lights are available:

### FOR A-C VOLTAGES UP TO 550 VOLTS

Uses a transformer and a 6-8 volt bulb and is designed for voltages up to 550 volts, 60 cycles, a-c. The three major components of this unit are: (1) lamp

base with transformer and miniature bayonet #44 bulb; (2) shock resistant colored lens; and (3) legend plate.

### A-C OR D-C SERVICE, 125 VOLTS

Is designed for either a-c or d-c service, 125 or 250 volts, and uses a 6-S-6 vibration type candelabra base bulb—with a resistor for 250 volts and full voltage for 125 volts. The major components

are: (1) lamp base, with resistor if required, and 125 volt 6-S-6 vibration type bulb; (2) shock resistant colored lens; and (3) legend plate.

## MINIATURE LIGHTS AND SWITCHES

### RECTANGULAR MINALITE®

A medium sized low-drain indicating light designed for extreme angular visibility and to provide the utmost in sturdiness, compactness, and appearance. Its design matches modern rectangular switchboard devices, such as instruments, relays and control switches. It is intended for general indicating or signal purposes on switchboards, control desks, etc.

### ROUND MINALITE®

A compact, medium-drain indicating lamp developed especially for miniature steel switchboards, providing the maximum illumination in the smallest possible space. Since some rigidity was sacrificed to obtain the long slender construction, which permits close center spacing between adjacent lamps, it is intended only for such applications where the wire size is not larger than No. 18.

*Complete information on component parts, hardware, receptacles and resistors available is contained in descriptive bulletin 37-350, which will be sent free on request.*

## THE WESTINGHOUSE MINATROL® SWITCH

A compact control switch of smaller dimensions than the conventional Type W control switch, designed particularly for use on miniature switchboards. It is available in forms to suit the varied requirements of control switch applications, and will handle the full control voltage without interposing relays. Its flexibility of application is practically the equivalent of the Type W switch.

**Construction** — The Minatrol is a rotary-type switch with the same design features which have made other rotary-type control switches outstanding in performance.

The switch handles 125 or 250-volt control circuits directly, using toggle switches with quick-make and quick-break contacts mounted in unit-construction frame. It occupies only about one-fourth of the switchboard space required by the conventional switch and has a pleasing appearance, unmarred by the mounting screws.

**Performance** — The current-carrying capacity and interrupting ability of the Mina-

trol is ample to handle the usual control circuit without the use of auxiliary interposing relays or intermediate control voltages. The switches are rated at six amperes continuous and can interrupt a non-inductive load of three amperes at 250 volts and six amperes at 125 volts d-c. The switch will interrupt highly inductive currents up to five amperes at 125 volts d-c or up to one ampere at 250 volts d-c. On a-c, values can be at least doubled at 250 volts maximum.

**Classification** — The Minatrol control switches are of two types:

1. Type C, for stay-put and spring return with fixed handles.
2. Type S, for stay-put with removable key handles.

Two standard lengths are available, one to accommodate a maximum of four switch units, and the other a maximum of eight switch units. A special twelve-switch unit length is available on order. Request Descriptive Bulletin 37-250 for complete information.

550-600 A-C	1.2	1.2
115-125 D-C	2.2	2.2
230-250 D-C	1.1	0.55
550-600 D-C	0.4	0.2

**CONTACTORS** of the famous Westinghouse Life-Linecontactor® design are available in three general classes: Reversing Mounted Life-Linecontactors • Mounted Life-Linecontactors\* • Unmounted Contactors.

In addition, they may be modified with built-in pushbuttons, selector switches, control transformers or special combinations of modifications to suit the user. 8 Standard pole combinations are available for 5 to 2,500 amperes, 600 volts maximum, a-c or d-c. Oil-immersed contactors operate up to 5,000 volts at 200 amperes.

**RELAYS: Type Z**—Application: The type Z relay is a small, versatile, multi-pole relay used as an auxiliary magnetic device to switch light loads and small motors. It can be used for either a-c or d-c applications and is especially suitable as an interposing relay to operate larger contactors and starters. Description: This 2-pole relay with DPDT contacts meets U. L. Standard clearances for 230 volt and is designed for steel panel mounting. It has easily removable coils, both coils and cores being suitable for either a-c or d-c operation. Coil burden is approximately 5 watts a-c or 2 watts d-c. Design features: Completely encapsulated coils—Front connected with dual taps for amp junior faston terminals plus screws for wire connections—Molded base—Nylon armature insulating plate—Adjustable kick-out spring—*Extremely* long mechanical life—Contacts of extra-heavy solid silver—Contacts designed to avoid bounce when operating a size 4 contactor on a common base. Ratings: Contacts; continuous 10 amps at 300 volts. Coil; 6 to 220 volts a-c, 6 to 220 volts d-c\*. Hp rating; 1/2 hp at 115 volts a-c, 1 hp at 230 volts a-c.

\*Over 110 volts d-c includes a coil resistor for separate mounting.

**Type NH** relay is a general purpose control relay used for switching control circuits and other light electrical loads. Especially suitable for steel panels, it sequences multi-motor machines, operates solenoids and is used as a pilot control for electrical circuits

from pushbutton stations, temperature or pressure controls, limit switches and other devices. These relays are supplied in any combination of normally open and normally closed poles from two to six. The convertible contacts can be easily changed in the field from NO to NC or vice versa without additional parts. Coils can be changed readily for adapting relays to voltages through 600 volts AC. Type NH relays are available in NEMA type I enclosures.

Other standard NEMA types can be supplied on special order. For additional information request Descriptive Bulletin 16-302.

**Type SG**—For miscellaneous or remote switching; continuous operation on circuits up to 575 v, a-c and 600 v, d-c. Application: To energize multiple circuits. To furnish additional contact capacity for control circuits requiring currents higher than can safely be handled by the protective relay contacts. To provide flexibility of contact arrangement, such as opening and closing several circuits simultaneously. To give small time delays on pick-up or drop-out. For further information see Descriptive Bulletin 41-750.

**Type TD and TK**—Industrial control for intermittent duty in process timing such as electrolytic plating, heating, annealing. General auxiliary service for coordinating sequential switching functions. Protective relaying for required time delay to obtain selective relay coordination. Motor control for timed steps to cut out starting resistance. Power line carrier systems for automatic check-back schemes in checking transmission of carrier between terminals.

TD types available: synchronous motor, driven single, range timer. Ranges of operating time delay: 5-90 sec. Voltage ratings: a-c 60 cycles; 115, 230. TK types available: synchronous motor, driven triple, range timer. Ranges of operating time delay: 2-30 sec., 0.1-5 min., 1-50 min. Voltage ratings: a-c 60 cycle; 115, 230, 460, 575.

D-c; 125 and 250 volts d-c requires d-c/a-c inverter for synchronous timing motor for both types. For further information see Descriptive Bulletin 41-570.

**Type MN**—Used in d-c circuits requiring instantaneous overcurrent protection where the relay must maintain its accuracy under conditions of moderate shock or sustained vibration such as on shipboard. A typical application involves use of the relay in electronic tube circuits. In certain applications, the characteristics of the associated equipment may require a slight time delay in relay operation after the relay is energized. Winding the operating coil on a copper spool provides time delay as noted under "operating time".

"Special" type MN relays can be supplied having spdt. (circuit closing and circuit opening) contacts; also with mechanically actuated operation indicator. For further information see Descriptive Bulletin 41-750.

## MICARTA

LAMINATED SHEETS AND SHAPES

MOLDED PIECES

MICARTA 444

COPPER CLAD MICARTA

### MICARTA SHEETS AND SHAPES

Thirty grades of sheets, most of which are available in black or tan. Fillers include paper, cotton, asbestos and glass. The most commonly used by communication engineers is MICARTA tan (254) and black (464), both of which are paper base plastic. Either color supplied in 36" x 36" sheets, 1/32" to 2" thick. Also available to the electronic industry is a XXXP warm punching grade H-3020 supplied from 1/32" to 1/4" thickness. MICARTA 259-2 is made of melamine resin in a base of glass cloth. It is grey, fire-resistant and very strong. Many of the standard grades are qualified under Military Specifications. Standard MICARTA shapes include angles, channels, zees, rods and tubes. All are produced in six or more grades, in various dimensions.

### MOLDED MICARTA

For large production quantities of simple or complicated shapes. Material placed in the mold may be in one of four forms: (a) wood flour and plastic, (b) impregnated

cloth or paper in laminated form, (c) impregnated cloth or paper chopped into small pieces, or (d) a combination thereof. Grades using sheets and chopped pieces make the strongest parts; those containing wood flour are useful for intricate shapes.

### MICARTA "444"

This form of MICARTA offers a practical and economical means of obtaining molded forms or shapes with low-cost equipment and dies. Examples of the shapes are shown at left—A tan, green or black product, processed in flat sheets of various thicknesses, from cotton cloth impregnated with a phenolic resin binder. MICARTA "444" is a practical material for post forming many parts ordinarily made of drawn sheet steel.

### COPPER CLAD MICARTA

Now available in sizes 36" x 42" and 36" x 36" in thicknesses from 3/64" through 1/8". Grades include XXXP both warm and cold punch plus epoxy glass copper clad for military requirements.

## MAGNETIC METALS AND ALLOYS

Westinghouse Special Magnetic Alloys fill a variety of electrical and magnetic applications. These alloys provide a wide range of magnetic properties needed for many special requirements. For special needs these alloys will result in improved performance and are superior to the more common commercial magnetic materials.

### HIPERNIK®

A magnetic alloy approximately equal proportions of iron and nickel having exceptionally high initial and maximum permeability and extremely low losses. Used in audio and instrument transformers, relays, magnetic bridges, shields for electronic tubes, etc.

### HIPERNIK V®

A highly oriented magnetic alloy of approximately equal proportions of iron and nickel possessing a very high remanence accompanied by a low coercive force. This material is specifically designed for saturable reactors and magnetic amplifiers.

### CONPERNIK®

A magnetic alloy of approximately equal proportions of iron and nickel having constant permeability over a range of low flux densities. It is used where constant inductance cores are required over a low range of inductions.

### HIPERCO®

A magnetic alloy of approximately one-third cobalt and two-thirds iron. Hiperco has the highest magnetic saturation of any known commercial alloy. Permeability above 100 oersteds is far superior to iron and the electrical sheet steels. It is used as a core material for motors, generators, and transformers where minimum weight and size are prime requisites.

### OTHER ALLOYS

Discaloy®, Refractaloy® and K42B® are three of the special high-temperature alloys developed by Westinghouse to meet special applications.

\*\* Thermal Only.

# Not U. L. Listed.

\*Single-pole 15 and 20 amp ratings for 277/480 V A-C circuits.

**TRI-PAC\*** The TRI-PAC breaker provides triple protection; thermal, magnetic, and current limiting protection in a single compact device. It combines the design and operating features of the type F breaker with a set of high interrupting capacity limiting fuses.

The fuse elements are designed to coordinate with the thermal magnetic trip unit so that the trip unit protects against most of the overloads and short circuits. The fuses open the circuits only on high value faults. Their speed of operation and current limiting characteristics protect the TRI-PAC.

# International Rectifiers

For all DC needs from microwatts to megawatts!

## SELENIUM

Developed for use in limited space at ambient temperatures ranging from  $-50^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$ . Encapsulated to resist adverse environmental conditions. Output voltages from 20 to 160 volts; output currents of 100 microamperes to 11 MA. Bulletin SD-1B

Designed for long life and reliability in Half-Wave, Voltage Doubler, Bridge, Center-Tap Circuits, and 3-Phase Circuit Types. Phenolic Cartridge and Hermetically Sealed types available. Operating temperature range:  $-65^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$ . Specify Bulletin H-2

The widest range in the industry! Designed for Radio, Television, TV booster, UHF converter and experimental applications. Input ratings from 25 to 156 volts AC and up. DC output current 50 to 1,200 MA. Write for application information. Bulletin ER-178-A

For all DC power needs from microwatts to kilowatts. Features: long life; compact, light weight and low initial cost. Ratings: to 250 KW, 50 ma to 2,300 amperes and up. 6 volts to 30,000 volts and up. Efficiency to 87%. Power factor to 95%. Bulletin C-349

## GERMANIUM

This series of general purpose, high quality point contact diodes provide excellent rectification efficiency for very high frequency applications. Special "RED DOT" series available for ambient temperatures from  $-55^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$ . Bulletin SR-140.

Extremely low reverse leakage values make this series ideal for magnetic amplifier applications. These units utilize 10 amp junctions—26 to 66 AC input volts rms—are available in a wide range of circuit types and DC current ratings. Bulletin SR-148.

Engineered for heavy power applications, these highly efficient forced air cooled units feature moisture and corrosion resistant housings. A complete series in each of 3 current ratings: 150, 330 and 500 Amperes @ 26 to 66 volts rms. Request Bulletin GPR-2.

Liquid cooled for maximum power in minimum space. Junction rating: 670 amps at 26 to 66 volts rms. Housed in high-conductivity copper cast around special steel coils. Water, oil or other accepted coolants may be used. For complete data. Bulletin GPR-2.

## SILICON

Hundreds of types in three basic styles, for operating temperatures from  $-55^{\circ}\text{C}$  to  $+150^{\circ}\text{C}$ . Up to 800ma DC output current per junction over a voltage range of 50 to 1,000 PIV. Hermetically sealed. For complete information on all types. Bulletin SR-A.

The answer to tough miniaturization problems! Ratings for high temperature applications: from 1000 volts PIV at 100ma half-wave DC output to 16,000 volts PIV at 45ma. Hermetically sealed, metallized ceramic housing. Request Bulletin SR-139B

Specifically engineered for industrial applications—the most conservatively rated silicon rectifiers in the industry! Rugged all-welded construction and hermetic sealing mean greater reliability—longer life. Types available in 3 series. Request Bulletin SR-143B.

These units consist of hermetically sealed junction diodes mounted on copper cooling fins, stacked to include the interconnections required for specific circuits. Junction ratings: 1.25 amps. DC output; 70 to 350 AC input volts rms. Request Bulletin SR-137A.

## HIG-3 MODEL 2 INTEGRATING GYROSCOPE

This smallest integrating Gyro is dimensionally  $1\frac{1}{2} \times 1\frac{1}{2} \times 2\frac{3}{4}$ " including heater block and is being used in fire control and navigation systems. Has viscous damping, single degree of freedom and a maximum drift rate of .2 milliradians/second.

## PRESSURE SENSING DEVICES

Used for the measurement of absolute, differential and gage pressures. Accuracies within  $\pm 2\%$  or better throughout entire operating range.

## HIG-4 MODEL 2 GYRO

Greater accuracy, including low drift rate, is a feature of this HIG-4 Gyro, now being used for missile guidance and fire control systems. The design and development phases of this Gyro have long been completed and it is now a production item.

## FREE, RATE, DIRECTIONAL AND VERTICAL GYROS

For telemetering, missile guidance, inertial guidance and navigation. Whatever your gyroscope requirements, Greenleaf has the accurate, economical answer.

## ACCELEROMETERS

The Greenleaf line includes linear, angular and three-axis accelerometers. Accuracy is within  $\pm 2\%$  or better throughout the entire operating range. Military environmental conditions were considered in the design of these units in order to comply with the reliability concept.

All these, and other Greenleaf products, may readily be modified in many respects to meet your individual requirements.

Complete specifications and technical Bulletins will be sent immediately upon request. Write, wire or 'phone today.

1408B	MA-408BR	MA-418B	9000	1.0	220	4	+50μA	-53	1700-3100	MA-611

Overall Length of MA-400 and MA-407 is .086 inches shorter than standard cartridge diode assemblies designed for use with 0.2 x 0.750 X-band Miniature Waveguide.  
 153A is intended as a replacement for the JAN 1N53 in applications requiring broad bandwidth (12%) and increased burnout resistance.  
 The 1N32 and MA-408 series are interchangeable with 1N21 and 1N23 series mixer diodes but insure improved signal to noise video receiver performance.  
 In the past, mixer and video cartridge types were manufactured only in forward or reverse polarity cartridges but now for the first time are available in convenient reversible assemblies. The new reversible cartridge diodes are electrically and mechanically equivalent to and are directly interchangeable with standard types and meet all requirements of MIL-E-1 specifications.  
 Matched pairs of all Microwave Associates mixer diodes are available and are matched to the following limits: IF impedance ± 25 ohms; Rectified current ± 10%; VSWR unbalance less than 10% of applied signal.  
<sup>9</sup> Nominal Range. Not Part of Specification.  
<sup>10</sup> Theoretical tangential sensitivity for a receiver bandwidth of 10 mc/s.  
 Maximum overall noise figure measured at mixer terminals with Nif = 1.5 db. (30 mc/s IF).  
**Mixers and holders for all of the above MA types are available**

### ADDITIONAL WINDOW DATA:

A safety factor of 2 in power has been included in the data. Power is measured under operating conditions of one microsecond pulse duration at 1000 cps at atmospheric pressure on both sides of the window at sea level. Maximum window VSWR at the center frequency is less than 1.05. Maximum pressure ratings listed in the table apply to pressure in both directions. The windows will withstand maximum pressure when mounted with the glass coating on the high pressure side of the seal.

The resonant frequency of any window style can be adjusted for other requirements on request.

Microwave Associates windows provide a vacuum tight seal and protection against humidity, dust etc. They are used to seal resonant cavities, waveguide and antenna systems, gas discharge tubes, vacuum tubes and ferrite components.

Write for our free window brochure 57-W. This brochure describes pressure windows in detail and includes helpful tips on the installation of windows.

# in **AMPERITE** **RELAYS and REGULATORS**

Simplest • Most Compact • Most Economical

STANDARD

MINIATURE

## Thermostatic **DELAY RELAYS** 2 to 180 Seconds

- Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.
- Hermetically sealed. Not affected by altitude, moisture, or other climate changes.
- SPST only — normally open or normally closed.

Amperite Thermostatic Delay Relays are compensated for ambient temperature changes from  $-55^{\circ}$  to  $+70^{\circ}$  C. Heaters consume approximately 2 W. and may be operated continuously. The units are most compact, rugged, explosion-proof, long-lived, and — inexpensive!

TYPES: Standard Radio Octal, and 9-Pin Miniature

**PROBLEM?** Send for  
Bulletin No. TR-81

Also — Amperite Differential Relays: Used for automatic overload, under-voltage or under-current protection.

## **BALLAST REGULATORS**

Amperite Regulators are designed to keep the current in a circuit automatically regulated at a definite value (for example, 0.5 amp.) ... For currents of 60 ma. to 5 amps. Operate on A.C., D.C., Pulsating Current.

TO BULB

Hermetically sealed, they are not affected by changes in altitude, ambient temperature ( $-55^{\circ}$  to  $+90^{\circ}$  C.), or humidity ... Rugged, light, compact, most inexpensive.

Write for 4-page Technical Bulletin No. AB-51

Telephone: CAnal 6-1446

In Canada: Atlas Radio Corp., Ltd.

50 Wingold Ave., Toronto 10, Ontario.

Individual inspection and double-checking assures top quality of Amperite products.

# HIGH VOLTAGE

## RF TYPE POWER SUPPLIES

### MODEL 2040 40 KV DC POWER SUPPLY

A ruggedly built RF type power supply which is in constant use in laboratories and industrial plants throughout the world for condenser charging, electrostatic spraying and stress testing, etc. In wide use for spot knocking by TV tube manufacturers. Nothing finer available at five times the price. Designed for constant use and will stand severe abuse. Available with either positive or negative 40 KV output. Voltage range of approx. 15 to 40 KV. The 15 to 40 KV variance in voltage is controlled through a knob on the front panel. If required for TV use, a voltage output of approx. 4 to 6 KV is available through a tap. Voltage supplied through a 6 ft. HV Safety Cable. Specify desired polarity when ordering. 19" wide x 12 1/4" high x 13" deep.

**\$150.00 Net**  
With HV meter installed in front panel.....\$50 additional

### MODEL PN-30R REVERSIBLE POLARITY CONTINUOUSLY VARIABLE 1-30 KV UNREGULATED DC POWER SUPPLY

A light, compact unit in wide use for insulation testing, precipitators and laboratory research. Polarity reversible from front panel. Current output—approx. 2 milliamperes at 20 KV; 250 microamperes at 30 KV. Input—110V AC 60 cycles. Dimensions: 19" x 12 1/4" x 13" .....

**\$205 Net**  
With meter installed on front panel.....\$50 additional

### MODEL PN-60 REVERSIBLE POLARITY RF TYPE DC POWER SUPPLY

Polarity changes made on front panel. Continuously variable from 0 KV to 60 KV. Current output 1 milliampere at 60 KV. Overall Dimensions 22 1/2" x 21" x 15". Ideal for electrostatic paint spraying, capacitor charging and testing as well as many other uses.

**PN-60 Complete with Meter \$675.00 Net**

### MODEL 4575 4 1/2 KV POWER SUPPLY

This compact, well designed, ruggedly built DC supply utilizes two 6AQ5 tubes as a parallel oscillator feeding a 1X2 rectifier tube. For an output voltage of 4 1/2 KV DC at 1 milliampere, the low voltage input requirement is 250 V at 50 milliamperes. By varying the DC input the output voltage can be varied from approx. 1 KV to 7 1/2 KV. Dimensions: 5 3/8" high x 5" deep x 4 1/4" wide. In completely enclosed metal housing (not shown). Less low voltage DC supply.....

**\$32.50 Net**

### MODEL LAB-30PN • REVERSIBLE POLARITY—Continuously Variable 1 to 30 KV

Regulated DC Power Supply with regulations of 0.5% at 1 milliampere. Although rated at 1 ma. this unit is capable of 2 ma. operation within regulation specifications.

This 16 tube unit is of the RF type consisting of a separate oscillator and buffer feeding the power oscillator into a doubler rectifier. Regulations accomplished through feed-back into a DC amplifier plus simultaneous output control of the buffer. Polarity reversible from front panel. Standard Rack Model—19" wide x 12" high x 13" deep. Standard Bench Model—21" wide x 14" high x 15" deep.

**With Meter \$645 Net—Less Meter \$595 Net**

**MODEL LAB-30** is a positive polarity output regulated High Voltage DC Power Supply with same electrical characteristics and dimensions as the LAB-30PN. Available in either positive or negative polarity.

**With Meter \$545 Net—Less Meter \$495 Net**

### MODEL RG-30 Continuously Variable 15-30 KV Regulated DC Power Supply With Regulated Focus Voltage Tap

A high grade supply which incorporates a voltage tap in the range of 4 to 6 KV for use with 5WP15, 5TP4 and flying spot tubes. Regulations better than .5% at 1 milliampere. In wide use for color tube development work, transcription recording systems. 19" wide x 12" high x 13" deep.

**\$295 Net**

With meter installed on front panel.....\$50 additional

**MODEL RG-40**—Same specifications as above except high voltage range is approx. 15 KV to 40 KV. In wide use in projection television systems .....

**\$295 Net**  
With meter installed on front panel.....\$50 additional

### MODEL 7512—7 1/2 KV POWER SUPPLY

Voltage output of approx. 7.5 to 12 KV. 1 ma. of current may be drawn throughout the voltage range. To obtain an output voltage of 7.5 KV at 1 ma., low voltage input requirement is 300 V DC at 50 ma. By varying the DC input, the output voltage can be increased. Maximum input voltage of 425 V at 100 ma. will give an output of 12 KV at 1 ma. 5 3/4" W., 8 1/4" H., 6 3/4" D.

**\$42.50 Net**

### MODEL LAB-60 Continuously Variable 0-60 KV DC Regulated Power Supply

Current output 1 ma. at 60 KV. 2 ma. may be drawn from 50 KV to 0. Supplied with either positive polarity or negative polarity output. Regulation stability—1% at 1 ma. 21 3/4" wide x 22 3/4" high x 15 1/4" deep.

**LAB-60 Complete with meter . . . \$695.00 Net**  
**LAB-60 PN Reversible polarity model of above \$745.00 Net**

## ADDAVERTER

The Epsco ADDAVERTER is a bi-lingual translator for linking a high-speed general-purpose digital computer, such as the IBM 704, and a general-purpose large-scale analog computer. The ADDAVERTER makes possible bi-directional communications between these computers, translating the digital language of one into the analog language of the other, and vice versa. Command control of linking system is with the program of the digital computer.

By integrating an analog and a digital computer into a single system, the ADDAVERTER provides a powerful computational tool for the solution of many types of dynamic problems. In a typical case, the analog computer is programmed by the digital computer, with the input variables for each analog operation being calculated from the results of the preceding analog operations.

Each converter within the unit has an over-all resolution of 18 bits for its bipolar range and a dynamic range of  $\pm 17$  binary bits. The complete analog-to-digital conversion of 18 bits is completed in 100  $\mu$ sec. The complete digital-to-analog conversion of 18 bits is completed in 25  $\mu$ sec. The accuracy of the ADDAVERTER is  $\pm .05$  per cent of the actual value. The dynamic range is greater than  $10^6$ .

## FM Telemeter Analog-to-digital Conversion System

Numerous requirements exist for complete data processing systems capable of converting FM telemetering data on magnetic tape recordings to a digital

format suitable for further processing by a large digital computer. The Epsco FM telemetering analog-to-digital conversion system is designed to handle all of the accepted types of modulation and time multiplexing, operate on all of the standard sub-carrier frequency bands at various Modulation Indexes, and provide a practical method for obtaining accurate analog data plots for "quick look" observation and editing. The system is capable of searching out and locating any desired data on any channel at any time in accordance with the findings of the pre-edited information or from the command of the digital computer.

The system is capable of compensating for any speed variations in the magnetic tape recorder or for any drift or gain changes in the airborne sub-carrier equipment. It is also capable of transferring data to the digital computer directly via the computer high-speed input-output link as well as via the computer input tape mechanism. Changes in channel frequencies, filter values, and selection of the various modes of operation are accomplished remotely and, if necessary,

## DATRAC — Reversible Voltage-to-digital Converter, Model B-611

A high-speed, highly accurate voltage-to-digital converter capable of converting unknown input voltages to digital coded form at high speeds and at precise times. Approximately 45,000 independent data conversions per second for an 11-place binary code can be accomplished with an accuracy of better than  $\pm 0.05\%$   $\pm \frac{1}{2}$  the least significant digit.

### FEATURES

- **Proved reliability** — field service over 5000 hours continuous operation without maintenance or servicing.
- **Long-term stability** — all normal conditions of component aging, power-source variation, and operational shock and vibration will not affect encoded value by more than one least-significant digit for the life of the equipment.
- **Simplicity of operation** — except for the mode-of-operation selector and the power switch, there are no operator adjustments or controls on this equipment.
- **Versatility of data handling capabilities** — high conversion speed allows for many combinations of inputs, from a single 15 kc data-input channel (without multiplexing) to hundreds of data-input channels of lower frequency response when used with electronic and/or electro-mechanical multiplexers. The reversible feature allows it to convert either from analog to digital or digital to analog.
- **Serial and parallel outputs** — both a serial pulse train and a parallel output are provided for simultaneous transmittal over a radio or wire link and storage in a recording medium.

## Electronic Multiplexer Model EM-51

This five-channel multiplexer is designed to time-multiplex five separate voltage inputs into a single output of sampled voltages. It is designed for full-range input levels from 1.0 to 100 volts. Input levels from  $\pm 20$  millivolts can be obtained through use of the associated Models DA-30 or DA-31 d-c amplifiers. Each of the five channels can be sampled at any rate up to about 4 kc. The rate and sequence of switching may be controlled by an external programmer, such as the Epsco Model MP-50 Multiplexer Programmer. The output of the EM-51 may be fed directly into DATRAC voltage-to-digital converter. Any number of units may be employed to handle additional channels; i.e., 10, 15, 20, 25, 30 channels. Since each channel is a separate plug-in unit, numbers of channels other than multiples of five can be obtained by including only the desired number.

### FEATURES

- **High static accuracy** — due to incorporation of all switching functions within the feed-back loop of a high-gain chopper-stabilized d-c amplifier; the input-output ratio is determined by precision wire-wound resistors.
- **High dynamic accuracy** — the short effective sampling time of the amplifier, limited only by the turn-off time of the sampling switch, allows rapidly changing signals to be sampled with little loss in accuracy from signal change during sampling intervals.
- **Long-term stability** — is obtained through the combination of chopper-stabilized high-gain amplifiers and stable wire-wound resistors.

## Secondary-standard Voltage-reference Source Model VR-607

A precision, ultra-stable voltage source which will provide any output voltage from +211.112 to -211.112 volts, selectable in steps of one millivolt by means of a series of decade switches. The guaranteed initial absolute accuracy of the reference voltage is 0.01%. The accuracy of the selectable output, relative to the reference output, is 0.01% of setting  $\pm 500$  microvolts. Model VR-607B is a similar equipment employing binary rather than decade selector switches.

### FEATURES

- **Long-term accuracy** — continuous d-c reference outputs of  $\pm 100.00$  volts. Initial accuracy  $\pm 0.01\%$ ; max. drift  $\pm 0.02\%$  per year.
- **High resolution** — selectable output voltage from +111.112 volts to -111.112 volts in discrete steps of one millivolt. Vernier interpolation provides resolution of less than 10  $\mu$ v.
- **Versatility of application** — this versatile, easy-to-use instrument is valuable as: a secondary standard for precision voltage measurement; a meter-and-transducer calibrator; an absolute reference source for analog computers; a standard reference for use with Epsco's DATRAC and ADDAVERTER Voltage-to-digital Conversion Equipment; a low-impedance precision attenuator.
- **High-quality components** — quality internal standard cell reference and ultraprecision resistors.

# in DATA PROCESSING

automatically. The system operates without the necessity for any manual adjustments whatsoever to within an accuracy of 0.5 percent.

## Pulse Code Modulation Telemetry System

The Epsco sub-miniaturized airborne voltage-to-digital converter MINIDATRAC permits the encoding of data developed in airborne missiles or aircraft. By encoding the data into digital form while aloft and transmitting the data as sequential discrete pulses, the signal-to-noise advantage of PCM (Pulse Code Modulation) may be utilized, providing essentially error-free transmission of information. PCM offers the most accurate means of transmitting and recording multi-channel instrumentation data.

The Epsco PCM Telemetry System affords a means of encoding multiple inputs, while in the air, to an absolute accuracy of approximately 0.1%, recording the data on an airborne digital tape recorder or transmitting the data by means of an r.f. link to a recorder on the

ground. The data can be obtained in various formats suitable for processing by a digital computer.

In addition to the accuracy and ease of entry into digital computers afforded by this method of data acquisition, the system permits flexibility in allocating channel bandwidth and is capable of re-converting the digital data accurately into analog form at the ground station. Controlling the speed of the digital magnetic tape transport during playback through a digital-to-analog converter, permits the time scale of the original analog inputs to be compressed or expanded, as desired.

## The DATRAC C 700 System

The DATRAC C 700 System is designed to provide rapid acquisition and digital recording of quasi-static and dynamic input data from as many as 400 separate sources. The overall system has a conversion rate of 1250 independent conversions a second, and individual channels can be sampled at any rate up to 50 times a second.

Various input functional units of the system may be arranged to provide

from one to four hundred input channels, either single-ended or differentially connected, and having full-scale ranges of  $\pm 10$  millivolts to  $\pm 100$  volts. The input data are converted into numerical form, either binary coded decimal or straight binary representation.

The digital data are recorded directly on magnetic tape with appropriate block or time codes. Magnetic tape formats available in the system allow direct tape input to the IBM 650 or 700 series computers and provide for IBM card output through use of a separate tape-to-card converter.

## MINIDATRAC Sub-miniature Voltage-to-digital Converter Model SVD-610

The Epsco MINIDATRAC is a high-speed, highly accurate voltage-to-digital converter, designed and packaged for airborne use under severe environmental conditions. It provides an accuracy of better than 0.1% without adjustments or calibration, and a maximum speed of approximately 50,000 data point conversions per second.

### FEATURES

- **Simplicity of Operation** — There are no operator adjustments on this equipment except for a scale-factor adjustment.
- **Versatility** — this equipment may be used to transmit data serially over a radio or wire link (pulse code modulation) or to record data in parallel on a storage medium such as a magnetic tape recorder. The high conversion speed allows for many combinations of inputs from a single 16.3 kc data input channel to hundreds of lower response data inputs when electronic and/or electro-mechanical multiplexing is used.
- **Reliability** — extremely conservative computer design coupled with the most advanced sub-miniature packaging techniques have resulted in an equipment of highest reliability.
- **Long-term stability** — stability for all conditions of component aging, power-source variation, and operational shock and vibration will not affect the encoded value by more than one least significant digit for the life of the equipment.

## FM-to-Voltage Converter FM-108

Designed to provide an ultra-stable, dynamically accurate and inherently reliable data converter for use in telemetry receiving installations and data processing systems. Each converter can be operated on any one of the 23 IRTWG bands by a front-panel selector switch or from a remotely located band-switch.

### FEATURES

- **Accuracy** — the absolute accuracy of the converter is better than 0.05% and the dynamic accuracy, from the input to the associated band-pass filter through the low-pass output filter, is better than 0.2%.
- **Long-term stability** — converter design allows accuracy and performance characteristics to be met for the life of the equipment without any manual corrections for component aging, drift, gain variations.
- **Simplicity of operation** — there are no adjustments or controls on the equipment other than the channel selector and zero and 100% data calibrator switch.
- **Wow and flutter compensation** — automatic compensation of wow and flutter components from magnetic tape recordings is accomplished by use of an Epsco FM-106 Velocity Deviation Detector and Epsco CD-601 Velocity Deviation Compensation Distributor.
- **Dynamically accurate selectable low-pass filters** — a unique 5-pole filter design utilizing precision wire wound resistors and ultra-stable polystyrene capacitors in combination with chopper-stabilized d-c amplifiers provides: linear phase characteristics, a pass band which is flat within  $\pm 0.1$  percent (0.01 db) to  $F_c$ , and a minimum attenuation of 54 db of nearest beat frequencies between sub-carrier channels. A total of 62 different low-pass filter bandwidths are selectable from 11 cps to 3,490 cps.

## All-channel Sub-carrier Oscillator Model VCO-718

An extremely linear, stable, self-contained, voltage-controlled oscillator that can provide an output signal on any of the 23 IRTWG telemetry bands. Contains a novel, direct-coupled, free-running multivibrator that inherently yields symmetrical operation. The basic technique used is that of alternately switching precision-controlled currents into matched, stable capacitors, the value of which, together with the magnitude of the voltage-controlled switching current, determines the period of the cathode-coupled multivibrator. Channel switching is accomplished by changing the magnitude of the current.

### FEATURES

- **Linearity** — non-linear deviation from a mean straight line, over the entire frequency-deviation range for most channels, does not exceed 0.03%.
- **Stability** — precision components and military-type tubes are used throughout the equipment. The deviation control and vernier frequency control are instrumented with precision, multi-turn potentiometers.
- **Simplicity of operation** — switching to any one of the 23 IRTWG channels is fully accomplished by a rotary selector switch.

# PROVEN-on the assembly line!

**"PIG-TAILOR"\***®

For PREPARATION of axial lead components

**PREPARED  
COMPONENTS  
IN SECONDS  
WITH THE  
"PIG-TAILOR"**

## "PIG-TAILORING"

... a revolutionary new mechanical process for higher production at lower costs. Fastest PREPARATION and ASSEMBLY of Resistors, Capacitors, Diodes and all other axial lead components for TERMINAL BOARDS, PRINTED CIRCUITS and MINIATURIZED ASSEMBLIES.

The "PIG-TAILOR" plus "SPIN-PIN"—accurately MEASURES, CUTS, BENDS, EJECTS & ASSEMBLES both leads simultaneously to individual lengths and shapes—3 minute set-up—No accessories—Foot operated—1 hour training time.

### PIG-TAILORING provides:

1. Uniform component position.
2. Uniform marking exposure.
3. Miniaturization spacing control.
4. "S" leads for terminals.
5. "U" leads for printed circuits.
6. Individual cut and bend lengths.
7. Better time/rate analysis.
8. Closer cost control.
9. Invaluable labor saving.
10. Immediate cost recovery.

### PIG-TAILORING eliminates:

1. Diagonal cutters!
2. Long-nose pliers!
3. Operator judgment!
4. 90% operator training time!
5. Broken components!
6. Broken leads!
7. Short circuits from clippings!
8. 65% chassis handling!
9. Excessive lead tautness!
10. Haphazard assembly methods!

**FOR  
ASSEMBLY**

**"SPIN-PIN"\***® Close-up views of "SPIN-PIN" illustrate fast assembly of tailored-lead wire to terminal.

### SERIES C-050

SUB-MINIATURE 1/2" • SEALED CONSTRUCTION

ACTUAL SIZE

- One piece nickel plated bronze case and bearing.
- Electrical rotation—320°; Mechanical rotation—325°, or continuous 360°
- Voltage breakdown—1000 volts AC.
- Threaded bushing mounting.

### SERIES C-078

MINIATURE 3/8" • GANGED MULTIPLES • INDEPENDENT PHASING

ACTUAL SIZE

- Unit height 3/8"; weight 1/2 oz.
- Independent linearity: ± 1% is standard.
- Linear or non-linear windings on flat card; res. tol. — ± 5% std., ± 1% on order.

### SERIES C-158

INTERMEDIATE 1 1/2" • GANGED MULTIPLES • INDEPENDENT PHASING

1/2  
ACTUAL SIZE

- Independent linearity: ± 0.5% of total resistance is standard.
- Linear or non-linear windings std., ± 1% on order.
- on flat card; res. tol — ± 5%
- Rotation: electrical — 320°. Mechanical—325°.

### SERIES C-200 (sleeve bearing) BC-200 (ball bearing)

IN-FIELD GANGING • UNLIMITED MULTIPLES • ADJUSTABLE TAPS

2" DIAM.

- Resistance ± 5% standard; to ± 1% on special order.
- Linearity: ± 0.5% independent linearity is standard; ± 0.3% on special order for C-200; ± 0.2% on special order for BC-200.
- Mounting: Servo type or single hole mounting with optional non-turn device.

### SERIES C-300

SINE-COSINE

3" DIAM.

- Independent brush contacts produce accurate sine and cosine outputs.
- Function accuracies of ± 1% are standard.
- Multiple ganged units are available.

### SERIES KS-200 (sleeve bearing) K-200 (ball bearing)

LONG FUNCTION ANGLES • CLAMP PHASING • HIGH RESOLUTION

2" DIAM.

- Resistance: linear, on triple Formvar copper mandrel.
- Independent linearity: ± 0.5% is standard; ± .1% on order.
- K-200 pots are completely enclosed and may be used as single or multiple ganged units.

### SERIES HP-200, HP-300, HP-500

HIGH RESOLUTION • LONG FUNCTION ANGLES • GANGING MULTIPLES

2", 3", 5"  
DIAM.

- Linearity: ± .5% standard to ± .1% on order.
- Resistance: ± 5% standard to ± 1% on order.
- Rotation: 360° mechanical; 356° ± 1/2° electrical standard.

**PRINTED CIRCUIT CONNECTORS** A) New Series PC "Bellows Action Contacts" grip printed circuit board over 100% of board contact area. Contacts in single or double rows permit up to 56 connections. AA) Right Angle Printed Circuit Pin and Socket Connectors for dip soldering to printed circuit boards. Available in 4, 8 and 19 contacts.

**B) POLARIZING SCREWLOCKS** to prevent accidental disconnection due to vibration now available in Series 20 Miniature and Series SM-20 Subminiature Continental Connectors.

**C) SERIES 22 MICRO-MINIATURE** Connectors offer the ultimate in miniaturization without sacrifice of performance. Available with 7, 11, 14, 20, 26, 29 and 34 contacts for #22 AWG wire. Rating: 3 amps; Voltage: 1800V. RMS.

**D) SERIES SM-20.** Model shown has 11 contacts for #20 AWG wire. Available in 7, 11, 14, 20, 26 and 34 contacts. Rating: 5 amps; Voltage: 1900V. RMS.

**E) SERIES 20 MINIATURE CONNECTOR** with Hood and Polarizing Screwlocks. Available with 7, 8, 9, 11, 14, 18, 20, 21, 26, 34, 41, 50, 75 and 104 contacts for #20 AWG wire. Rating: 5 amps; Voltage 2100V. RMS.

**F) SERIES 20** with 50-ohm matched impedance coaxial contacts and 14 or 18 standard #20 contacts. Rating: 5 amps; Voltage: 2100V. RMS.

**G) SERIES CCC 20** in stainless steel shells, recommended for airborne applications. 37 contacts for #20 AWG wire. (15 and 25 contacts on request.)

**H) SERIES E-Z** Easy Release Connectors with up to 34 solder cups or solderless taper pin contacts. Aluminum hoods, polarizing screwlocks and coaxial contacts available on order. Rating: 10 amps; Voltage: 4500V. RMS.

*High precision, dependable Continental Connectors have achieved a reputation for excellence throughout the aircraft and electronics industries. The widest range of applications can be made from our standard line.*

# I-S SPRINGS of beryllium copper can help you

IMPROVE YOUR PRODUCT'S QUALITY, REDUCE YOUR COST, INCREASE YOUR PRODUCTION

Instrument Specialties Company specializes in the design and custom manufacture of age-hardened alloy springs. With our specially developed processes and machines, our engineers are able to

realize the fullest performance potential from the superior spring materials around which I-S service to designers and manufacturers has been developed.

**FOR  
HIGH  
PRODUCTION**

## STRIP SPRINGS

Fabricated from beryllium copper.

Easily handled, readily broken apart by hand or used in automatic or semi-automatic assembling devices and contact riveting machines.

Individual pieces may be broken off without trace of burr.

Eliminate sorting, untangling and handling of loose pieces.

Springs may be produced in strips to various shapes; formed angles may be held within plus or minus one degree.

Heat treated in multiple fixtures to insure uniformity, close tolerances and elimination of variations in spring-back.

## COIL SPRINGS

Made from laboratory tested beryllium copper wire. Special coiling and heat treating equipment insures 100% uniformity.

Guaranteed rigid tolerances held on diameter and load tests at specified deflection.

These factors combine to assure increased service life through higher endurance strength — make products perform more consistently by eliminating drift, set or fatigue. Furthermore, they eliminate expensive hand adjustment and reduce inspection costs of finished product.

**FOR  
LOW  
ACTIVITY**

## HIGH FREQUENCY SPECIALTIES

We are equipped to supply standard mating parts for use with 2C-39, 2C-40, 2C-43 and 3C-37 tubes, or custom made parts in related fields.

Grounding strips and contact fingers can be supplied in standard or special contours.

"Flea" contacts for co-planer type subminiature tubes and transistors.

## SHORT-RUN SERVICE

For those who need quick delivery of parts in pilot quantities or require a low-cost proving ground for spring designs. I-S methods eliminate expensive tooling. Laboratory controlled, precision produced — yet at lower cost than is possible with permanent, high-activity tools.

We are equipped to handle conventional beryllium copper stampings and screw machine products in short runs or in high production.

## A COMPLETE ENGINEERING AND SAMPLE SERVICE

When your product is in the design stage, let us show you how I-S springs of beryllium copper may be designed to fit your needs. Ample stock, flexible facilities, short set-up time speed production of sample lots and trial orders.

with

## **CAMLOC FASTENING DEVICES**

Modern product designs, production techniques and fabrication requirements demand more speed, more accessibility, more versatility in fasteners. In the electronics, aircraft, machinery and many other industries leading original equipment manufacturers call on Camloc's engineering department for fastener designs that help improve the product, decrease its cost and increase its sale.

Specify your needs for fasteners. These and other Camloc products offer modern solutions to modern design problems.

### QUARTER-TURN FASTENERS

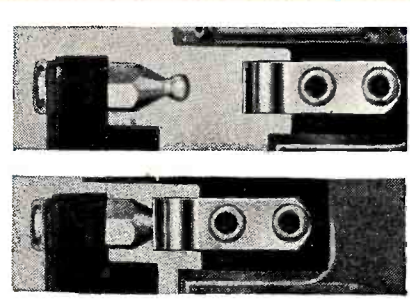

To get to the heart of the problem fast a quarter turn of this popular fastener is all it takes. Access panels, doors, other closures open fast, close fast, hold fast! And because fewer fasteners are required to do any given job, Camloc Quarter-Turn Fasteners cost less to use.

### ACCESS DOORS

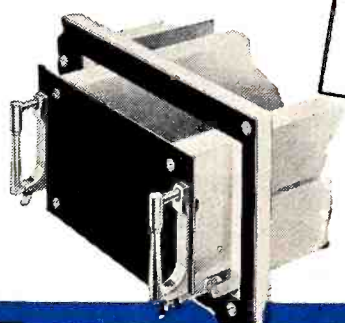

For flush-finished surfaces use these Camloc "captive" Access Doors. Opens by pushing with whatever tool is used to perform adjustments, closes automatically when tool is withdrawn. Standard size,  $\frac{3}{4}$ " dia.

### PRINTED CIRCUIT FASTENERS

This unusual fastener holds printed circuit boards in place with pull-out force of about 12 pounds. Consists of ball stud and two spring tempered steel clips. Stud also serves as attaching nut for contact plug mounting.

### ELECTRONIC CHASSIS LATCH

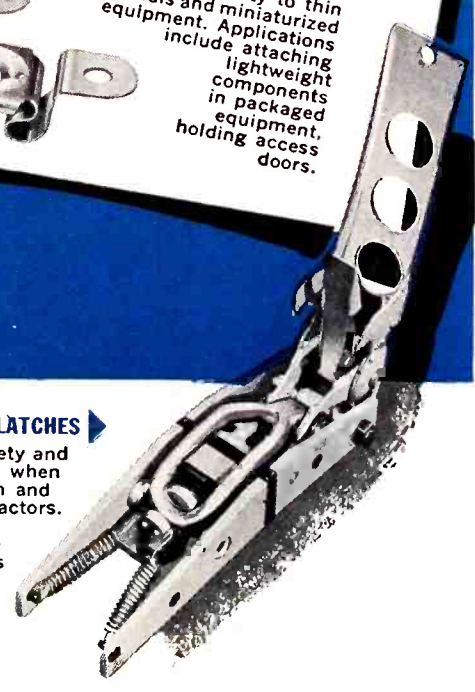

Inexpensive, vibration-proof Chassis Latch of attractive design eliminates protruding attaching bolts and hole preparation... Opens and closes easily... provides leverage to overcome frictional loads of multiple contact plugs.

### 5F SERIES QUARTER-TURN FASTENERS

Lightweight, low-cost 5F has all the features of standard Quarter-Turn Fasteners plus adaptability to thin materials and miniaturized equipment. Applications include attaching lightweight components in packaged equipment, holding access doors.

### HIGH STRENGTH LATCHES

For maximum safety and ease of operation when high shear-tension and heavy loads are factors. Long fatigue life under loads. Wide range of strengths and sizes fulfills a variety of requirements.

## ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past seventeen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

*The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.*

**For Product Data . . .**

# how large is small?

**DAVEN'S NEW MINIATURE WIRE WOUND RESISTORS PROVIDE AS MUCH AS 400K RESISTANCE IN  $\frac{1}{4}$ " X  $\frac{5}{16}$ " SPACE**

DAVEN's fully encapsulated, miniature, precision wire wound resistors offer the design and development engineer the solution to critical space limitation problems. DAVEN's advanced techniques provide the needed resistance value in a minimum of space, without sacrificing reliability. Where space conservation is a prime factor in your design, specify DAVEN miniature wire wounds.

### Types and Specifications

Type	Dia.	Length	Max. Ohms	Max. Watts
1274	3/16	3/8	100K	0.25
1273	1/4	5/16	400K	0.25
1283	1/4	5/16	400K	0.25
1284	1/4	27/64	.5 Meg.	0.25
1250	1/4	1/2	900K	0.33
1170A	7/16	1/2	1.2 Meg.	0.50
1170	1/2	1/2	1.8 Meg.	0.50

- Fully encapsulated • Meet and exceed all humidity, salt water immersion and cycling tests as specified in MIL-R-93A, Amendment 3 • Operate at 125°C continuous power without de-rating • Can be obtained in tolerances as close as  $\pm 0.02\%$  • Standard temperature coefficient is  $\pm 20\text{PPM}/^\circ\text{C}$ .

THE **DAVEN** CO.

526 West Mt. Pleasant Ave.  
Route 10, Livingston, N. J.

Special temperature coefficients can be supplied on request.

### POLYSTYRENE AND TEFLON CAPACITORS

- Highest Insulation Resistance
- Lowest Dielectric Absorption ("Soakage")
- Lowest Power Factor
- Highest Capacitance Stability
- Low Temperature Coefficient
- Stable Operation Up to 85°C. (Polystyrene) and 200°C. (Teflon)

### ADJUSTABLE CAPACITORS

- Large Capacitances at Close Tolerance
- Instantaneous Capacitance Changes without Drift Range
- Adjustment Range  $\pm 1\%$  of Nominal Value
- Noninductive Winding for Minimum Power Factor and Soakage
- Same Electrical Characteristics as Above

# fci

*the stabilized  
precision capacitor  
for critical applications*

### HIGH VOLTAGE CAPACITORS

- New "High-Breakdown" Plastic Film Dielectric
- Small Size - Light Weight - Low Price
- Operation Up to 125°C.
- Voltage Up to 60,000 V

STOCK AND  
SPECIAL-ORDER CAPACITORS  
TO MEET EXACTING  
INDUSTRIAL SPECIFICATIONS

### TYPE D CAPACITORS

- Small Size - Low Cost
- Very High Insulation Resistance
- Moderate Dielectric Absorption ("Soakage")
- Available in Styles CP04, CP53, CP70, and Ceramic Jacketed

Raytheon — World's Largest Manufacturer of Magnetrons and Klystrons

**NOW AVAILABLE—  
WITHOUT CHARGE**

**New Consolidated  
Data Booklet for  
Raytheon  
Magnetrons,  
Klystrons and  
Special Tubes**

**TECHNICAL DATA SERVICE**

The most complete data service available for magnetrons, klystrons, special tubes and semiconductor products. Available on a continuing basis at a modest charge. Use coupon to get full details.

Regional Sales Offices: 9501 W. Grand Avenue, Franklin Park, Illinois • 5236 Santa Monica Blvd., Los Angeles 29, California

Raytheon makes: Magnetrons and Klystrons, Backward Wave Oscillators, Traveling Wave Tubes, Storage Tubes, Power Tubes, Miniature and Sub-Miniature Tubes, Semiconductor Products, Ceramics and Ceramic Assemblies

Comprehensive presentation of maximum ratings, typical operating values, frequency ranges, and power levels for most of the principal unclassified types manufactured. An essential reference-guide for microwave engineers and purchasing departments.

Raytheon is the world's largest producer of CW and pulse magnetrons, available in either fixed or tunable designs.

Raytheon klystrons, which can be tuned mechanically or thermally, fit the widest range of requirements from 550 to 74,000 Mc. The special tubes include backward wave oscillators, square law tubes, storage tubes and others.

Use coupon below to reserve your copy of the new Raytheon Consolidated Data Booklet. There is no cost or obligation, of course.

## RAYTHEON PANEL COMPONENTS

### Standard Test Jack

Rugged, high quality construction • Beryllium copper spring pin contact • 9 colors available for circuit coding • Meets the requirements of MIL-STD-242A (ships)

### Printed Circuit Test Jacks

Specially designed for printed circuit use • Accepts standard 0.080" test prod • Simple mounting—just insert and dip-solder • 9 brilliant insulator colors for circuit coding

### Subminiature Test Jack

Fixed or snap-in contact types available • Fast, easy expansion mounting • Accept standard 0.080" test prod • Colored insulators for circuit coding

### Knob Lock

Prevents control movement by shock or vibration • Replaces potentiometer mounting hardware • Neat appearance—matches standard Raytheon knobs • Available in Mirror or Matte finish

### Binding Posts

Provides 5-way connection • High strength nylon and brass construction • Accept standard 0.080" test prod • Available in black or red

### Shaft Lock

For use with screwdriver-adjusted controls • Constant friction drag prevents accidental rotation • Provides seal against dirt and moisture • Replaces standard mounting hardware

### Captive Hardware

Stainless steel construction • Wide assortment of stock sizes • Meets government specifications • Neoprene gasket provides dirt and moisture seal

### Terminal Board Bracket

Provides rigid support under shock or vibration • Mounts single or double panels • Meets military specifications • Cold-rolled carbon steel, cadmium plated

\*Harmonic filtered models. Harmonic content less than 3%.

\*\*Isolated secondary units.

\*\*\*Available with isolated secondary if desired.

†Portable models, supplied with cord and plug and output receptacle.

### FEATURES

1. Deliver accurate AC voltage within  $\pm 1/2\%$
2. Stabilize output with more precision
3. Regulate better at full load
4. Hold up better under overload
5. Better no-load to full-load regulation
6. Accept wider input voltage range
7. Less voltage change as units heat up
8. Less change in output as frequencies fluctuate
9. Smaller, lighter, more compact; no moving parts
10. Cost less to operate

When ordering or seeking information please mention Electronics Buyers' Guide.

**Sub-Miniature Mylar\* Capacitors with Mylar cases**

**NOW**—for the first time, Mylar\* dielectric capacitors for the price of paper capacitors.

**NOW**—Molded capacitors and ceramic cased capacitors are obsolete.

These capacitors rival: the expensive glass-to-metal seal, metal cased capacitors for quality and size; the metalized paper capacitor for size and weight, yet they are far superior to the metalized paper capacitor and much lower priced than either.

Typical Sizes Type UM (Round, tubular)

.1 mfd.....	150 V.D.C.....	5/16" dia. x 7/8"
.05 mfd.....	200 V.D.C.....	9/32" dia. x 7/8"
.1 mfd.....	200 V.D.C.....	11/32" dia. x 7/8"
.05 mfd.....	400 V.D.C.....	5/16" dia. x 1"
.005 mfd.....	600 V.D.C.....	1/4" dia. x 3/4"

Typical Sizes Type UMF (Flat, rectangular)

.47 mfd.....	150 V.D.C.....	7/16" x 23/32" x 1-1/4"
.33 mfd.....	400 V.D.C.....	3/8" x 11/16" x 1-7/8"

Temperature— -55° C to +90° C at rated voltage and 125° C with 50% voltage derating.

Life Test—140% of rating for 250 hours.

Humidity Test—500 hours at 40° C and 95% humidity.

Dielectric Strength—All capacitors tested at 200% of rating.

Insulation Resistance—50,000 meg./mfd. before humidity cycle, 50,000 meg. after humidity cycle.

Power Factor—Less than 1% at 1,000 cycles at 25° C

\* DuPont T. M.

"Another New Product: temperature stabilized capacitors, capacitance drift with temperature is less than 50 PPM/°C, which is less than .3% capacitance change from 25° C to 85° C"

# SELECT CLOSURE HARDWARE TO IMPROVE UTILITY, APPEARANCE, AND TO LOWER COST

## QUICKLY INSTALLED SOUTHCO CAPTIVE PANEL SCREWS END MISALIGNMENT PROBLEM . . .

Simplicity of design contributes to clean, distinctive appearance and fast, low-cost installation. Stand-off is slipped into panel hole and secured by flaring. Screw is passed through stand-off and made captive by vinyl o-ring.

"Floating" screw design eliminates costly close tolerance manufacture and permits easy engagement regardless of panel distortion encountered under adverse use conditions.

### SPECIFICATIONS

**Material:** Screw is brass, chrome plated; can be supplied in stainless steel. O-ring is vinyl plastic.  
**Overall length of screw:** 1 3/16"  
**Depth of screw head:** 1/4"

**Sizes:**

SCREW HEAD DIAMETER	THREAD SIZE
3/4"	1/4-20
5/16"	1/4-20, 12-24
7/16"	10-24, 10-32

**Length of thread:** 3/8"

Screw head is supplied plain, as shown, or slotted for screw driver.

## PRE-ASSEMBLED PAWL ADJUSTS TO DESIRED THICKNESS AND PRESSURE

This neat, compact Southco panel and door fastener is supplied assembled, requires but two rivets or bolts for low cost installation. It is available in three models—large, intermediate and midget.

The unique feature of Southco Pawl Fasteners is the fact that, by merely turning the knob, the pawl is adjusted to a wide range of frame thicknesses. This assures a tight grip without precision setting regardless of variations in frame or door dimensions or changes that are produced by wear or warping of sheets.

Pressure exerted by the pawl on the frame is controlled in the same way, by merely turning the knob. Against gasketed frames, pressure can be easily applied to compress the gasket.

### SPECIFICATIONS

**Knob:** Cadmium or chromium plated steel.

**Head Styles:** Protruding ribbed or knurled knob; flush screw driver slotted for large size only.

	LARGE	INTERMEDIATE	MIDGET
Knob diameter	7/8"	5/16"	1 1/32"
Total width	2 1/2"	1 3/4"	1 1/8"
Total height	1 5/16"	7/8"	35/64"
Back of panel depth	1 23/32"	1 1/4"	7/8"
Knob length	1 1/8"	1 5/16"	3/32"

## FAST, HAMMER-DRIVEN BLIND RIVETS CUT INSTALLATION TIME

You "hit-the-pin" and the rivet's in. No special tools to limit production or require maintenance, no bucking, no finishing. For blind or open applications, Southco Drive Rivets save time, reduce costs.

Automatic "pull-up" action assures uniform, tight grip.

Southco Rivets are made of aluminum or cadmium plated steel with cadmium plated or stainless steel pins. Diameters are from 1/8" to 1/4", grip range is from 1/16" to 3/8".

Increased widespread use is due to low installed cost and elimination of down time and maintenance associated with fasteners requiring special tools.

and versatile line*

## FOR RADAR AND ELECTRONIC

### EQUIPMENT APPLICATIONS

**Ampli-FILM®** the all-purpose high voltage dielectric  
... is not affected by acids or organic solvents  
... undergoes no distortion under high temperatures and pressures  
... is readily bonded by adhesives  
... is easy to handle and fabricate

**CAPITRON® WAFER CAPACITOR**—Ampli-FILM® dielectric sheets and high conductivity copper electrodes are bonded together under high heat in hydraulic presses using a special non-polar thermo-plastic bonding resin to obtain a solid, void-free sealed capacitor for rugged requirements in high voltage circuits. Having indefinite shelf life, these capacitors are designed for use in oil filled assembly, but also they are well suited for many applications in potted or encapsulated assemblies. They can be supplied in various form factors including curved shapes.

**CAPITRON® POWER SUPPLIES**—Use of Capitron® Wafer Capacitors enables AMP to provide a wide variety of high voltage power supplies for radar indicators and radar modulators. The small size and light weight of these units dictates their use in many airborne applications. They are supplied either as oil filled metal cased units or as epoxy encapsulated units. AMP's LGH terminals solve high altitude application problems.

**CAPITRON® ARMORED WAFER CAPACITOR**—Factors of this Capacitor are as follows

- Armor type encapsulation to resist extreme thermal and mechanical shock.
- Eliminates high altitude flash-over, as metal terminals are not exposed . . . they are enclosed within the armor encasement.
- Multiple connections to capacitor leads can be made with little or no increase in over-all size of the capacitor.
- Versatility of design eliminates revamping assembly to accommodate the capacitor.

**CAPITRON® PULSE SYSTEM PACKAGE**—Charging choke, pulse forming network and pulse transformers are combined in a unit of minimum size and weight to work with a specific magnetron. All components are designed by and manufactured under the direct control of AMP's pulse specialists.

**CAPITRON® PULSE FORMING NETWORKS**—AMP pulse forming networks can be supplied to meet rigorous specifications with special emphasis on high reliability, small size and light weight for airborne radar applications.

 dealing with basic  
 facts about  
 thermostatic metals.

# Designing for Product Improvement With WILCO THERMOMETAL®

Thermometal (thermostatic metals) are laminations of two or more different metals with unequal coefficients of expansion. The difference in rate of expansion causes them to change shape with changes in temperature and, if restrained, to build up force.

This basic fact is of great industrial importance, for it makes possible the application of Thermometal in indicating and controls devices in 4 broad categories.

**Temperature Indication**, as in thermometal thermometers.

**Temperature Control**, as in electric fans, toasters, or room thermostats.

**Temperature Compensation**, as in automotive heat manifold control.

**4. Sequence Control by Functional Heating**, as in electric circuit breakers for overload protection.

Thermometal can be rolled to any desired thickness and formed into almost any shape, and still respond to temperature changes. For this reason it is a unique thermal element, which functions without linkages, seals, special mountings, and in most applications without electrical energy. Thermometal can be made to perform simple flexing motion, rapid snap action, and rotary or twisting motions. Four basic shapes are used alone or in combinations to obtain these motions:

According to the application, the selection of Thermometal is generally governed by four performance factors:

1. Maximum temperature encountered in service: (300°F, 500°F, 800°F, or 1000°F)
2. Temperature range over which maximum sensitivity is required: 50°-300°F (low); 150°-450°F (medium); 300°-600°F (high); 500°-800°F (extra high)
3. Deflection and force required
4. Electrical conductivity

The H. A. Wilson Company is the American pioneer in the development and manufacture of thermostatic metals. We produce over 40 metals for this use. Also we make a complete line of electrical contacts for use with Thermometal.

Reprints of this series are available on request. For further information about our products, ask for the Wilco Blue Book, the most complete reference manual ever written on Thermometal. And if you have an immediate application problem for Thermometal or other Wilco products, please tell us. Our engineering service is at your disposal.

**AP<sup>1</sup>/<sub>2</sub> BUSHING** **Micro-Miniature AP<sup>1</sup>/<sub>2</sub>S SERVO**  
The AP <sup>1</sup>/<sub>2</sub> is micro-miniature potentiometer that meets the requirements of today and tomorrow for high performance while retaining the rugged dependability of the approved Waters design.

N  
E  
W

**RT/RTS<sup>7</sup>/<sub>8</sub> BUSHING** **Miniature RT<sup>7</sup>/<sub>8</sub>S SERVO**  
The RT<sup>7</sup>/<sub>8</sub> has been proven reliable in thousands of Military and Commercial installations. The RTS<sup>7</sup>/<sub>8</sub> is available in a dual unit with Waters new Concentric Shaft construction.

**LT<sup>7</sup>/<sub>8</sub> "LO TORK" LLT<sup>7</sup>/<sub>8</sub>**  
Ball Bearings **Miniature Low Torque** Jewel Bearings  
Extremely low torque is now available in two miniature models. Use jewel bearings for extra low torque or because of a contaminated environment.

**AP<sup>1</sup>-1/16 BUSHING** **Miniature AP<sup>1</sup>-1/16S SERVO**  
The AP 11/16 offers Waters reliability in the AIA nominal one inch diameter. Available as a servo or bushing mounted unit, it offers excellent precision in a miniature potentiometer.

**AP<sup>1</sup>/<sub>8</sub> BUSHING** **Miniature AP<sup>1</sup>/<sub>8</sub>S SERVO**  
The AP <sup>1</sup>/<sub>8</sub> provides higher resistance values with better resolution and linearity, and yet is a miniature unit in every sense. The AP <sup>1</sup>/<sub>8</sub> is available as a dual unit with Waters new Concentric Shafts.

**WP<sup>1</sup>5/8 BUSHING** **Precision WP<sup>1</sup>5/8S SERVO**  
Applying proved miniature design and assembly techniques to a standard size unit, Waters can offer reliability and precision in the <sup>1</sup>/<sub>8</sub> inch size equivalent to many 2 inch or larger potentiometers.

<sup>2</sup> 1000 ohms per volt.

<sup>3</sup> External resistor required over 500 volts.

\*Hermetically sealed MIL-M-6A JAN-I-6

Model 450S

Model 450SP

### R-F CHOKES

Waters R-F Chokes provide high Q in small size. Standard constructions include:

- Solenoids on phenolic & powdered-iron forms.
- Pie-wound coils on ferrite cores & powdered-iron or phenolic forms.
- Pie-wound coils on ceramic forms.

Designs features are:

- Finish to MIL-V-173A or to your specification.
- Inductance ratings from 1.1  $\mu$ h up.
- Current ratings from 50 to 2800 ma.

Write for free data sheet #C-657 giving inductance, resistance, current rating, Q vs frequency, distributed capacitance, and core sizes. Ask for quotation on special units.

### PRECISION TOROIDS

A toroidal winding offers the most stable and accurate means of producing precision circular resistance elements for all angles to a full 360°. Waters engineering department can assist you in the proper design of single layer toroidal windings to achieve top lineari-

ty and resolution. Special facilities are available for precision tapping, buffing, baking and other finishing or assembly operations. Winding forms may be small or large. Winding wire can be below 1 mil. Forward your specifications for prompt analysis.

### Pot-Hook Panel Mount

Now you can easily make any single-hole-mounting pot or trimmer into a flush-mounted or recessed control. Just use the Waters "Pot-Hook".

**NOTE:**

All of the above wire can be shielded to customer specifications. Solid conductors and other strandings are available on request.

**EXTRUDED:**

Available in 14 solid colors and spiral striping. Also available with special surface treatment for moisture proof, high temperature encapsulation and ready adherence of printed identification.

**PARALLEL WRAPPED:**

Available in fourteen solid colors and spiral striping. Especially recommended for applications where a high degree of flexibility is necessary.

**SPIRAL WRAPPED:**

Available in solid colors and 819 striped combinations using nine ink colors on white background. Colors include black, brown, red, orange, yellow, green, blue, violet, and gray. Colored backgrounds available on request.

TENSOLON AIRFRAME WIRE TO MIL-W-7139A is a rugged, abrasion-resistant wire designed for high temperature applications where extreme reliability is required. This wire will function during temporary overload conditions and provide short-time emergency operation in the event of fire. It is especially recommended for all missile and aircraft applications where full approval under MIL-W-7139A is required.

\*Mil-C-17B  
NOTE: All O. D.'s are maximum

TENSOLON MINIATURE COAXIAL CABLES are ideal for high frequency operation from -90°C to +250°C. Teflon provides extremely low loss, high dielectric strength, and complete resistance to moisture and chemicals. A great variety of outer jackets permits the selection of cable exactly suited to your application requirements.

# TENSOLON WIRE AND CABLE..

A  
**Tensolite**  
PRODUCT

For an extra margin of dependability at maximum operating temperatures, specify TENSOLITE'S rugged Teflon insulated wire and cable products. Resistant to almost all chemicals and solvents, Teflon combines minimum wall thickness with highest dielectric strength.

## TEFLON INSULATED MAGNET WIRE

Teflon insulated round MAGNET WIRE is available in all sizes from #20 to #44 AWG with SINGLE, HEAVY, TRIPLE, and QUAD coatings. Other AWG sizes, rectangular MAGNET WIRE, and non-standard coatings are available upon request.

## TEFLON INSULATED CABLE—SINGLE AND MULTI-CONDUCTOR

Teflon insulated cables, are available with 1 through 50 conductors. The insulated conductors conform to the requirements of MIL-W-16878B, types E and EE. Any of the insulated wires may be individually shielded, but usually an overall silver-plated copper shield is applied with any of the various outer jackets. For high temperature applications, a Teflon outer jacket is recommended. Glass braid lacquered with silicone or Teflon can be provided. For lower temperatures, extruded vinyl or nylon jackets and lacquered nylon braids are supplied.

## RIBBON CABLE

Ribbon cables consisting of up to 20 Teflon insulated conductors, laid parallel in a flat ribbon, are available with metallic or textile braids. Nylon, fiberglass, or all-Teflon braids, with or without impregnants are ideally suited for high temperature operation. These ribbon cables are recommended for "tight space" applications particularly in printed circuits where flexibility is required.

## SURFACE TREATED TEFLON

Teflon insulation, treated to provide a surface to which potting compounds and printing foils will readily adhere. Wire so treated is ideal for high temperature encapsulation.

## TEFLON TUBING

Flexible, high temperature slip-on insulation available in ten solid colors to fit 10 through 30 AWG wire.

## CUSTOM TEFLON CABLE

Tensolite's engineering facilities are ready to assist you in the design and selection of Teflon insulated wire, cable, and thermocouple wire constructions as well as custom cable assemblies and harnesses.

**NOTE:** Detailed catalogue information on all of the above products is available on request.

Rotor. Assembled in precision fixture, rigidly soldered. Nickel-plated brass. Precision-grooved rotor to control thrust washer compression.

Stators. Assembled in precision fixtures, rigidly soldered. Nickel-plated brass. Jig located in final assembly to maintain exact plate spacing.

Panel Assembly. Low-loss silicone-treated steatite panel. Eyelets securely spun into panel. Nickel-plated brass bearing, selective reamed for shaft fit and for dissimilar bearing metals for long life.

Contact Spring. Beryllium copper heat-treated for long life. Silver-plated for positive contact.

Precision built from every angle.

# HAMMARLUND

*Means precision in detail*

The finest materials, design and workmanship are inherent in every Hammarlund variable capacitor, assuring quality you can depend upon for the most critical applications.

Hammarlund offers a complete line of standard precision-built capacitor designs to fill most requirements. In addition, Hammarlund maintains a large stock of tools and excellent short-order facilities to meet any "special" needs.

When you need standard or special variable capacitors, come to the expert first — come to Hammarlund!

## LABORATORY INSTRUMENTS OF EXCEPTIONAL PRECISION

### VOLTAGE MEASUREMENT

**TYPE 810 VACUUM TUBE VOLTMETER**—Has balanced circuits, liberal inverse feedback, and precision components to insure long-time stability and accuracy. 7 full scale DC ranges: 1-1000 volts (+ or -); 6 AC ranges; 1-300 V (rms); 7 resistance ranges 0.2 to 500 with multipliers of X1-X1 meg. DC accuracy  $\pm 2\%$ ; AC accuracy  $\pm 3\%$ . Frequency response  $\pm 1$  db, 10 cps to 700 mc. 100 meg input impedance for DC measurement. High input impedance to 700 mc maintained by 1.2 mmf input capacitance of AC probe. Also available as 810-R (rack mount).

**TYPE 815-A VACUUM TUBE VOLTMETER**—Has wide ranges. 9 full scale DC ranges: 0.1-1,000 volts (+ or -); 8 AC ranges: 0.1-300 volts (rms); 9 DC current ranges: 0.001  $\mu$ a to 100 ma; 9 resistance ranges: 0.2 to 500 with multipliers X0.1 to X10 meg. DC accuracy  $\pm 2\%$ , AC  $\pm 3\%$ , both 1 V range and higher. Frequency response 15 cps to 100 MC. DC input impedance 100 meg; AC 5 mmf and 10 meg. Also available as 815-AR (rack mount—gray panel).

### IMPEDANCE MEASUREMENT

**TYPE 310 Z-ANGLE  $\odot$  METER**—Measures in polar form the impedance, phase angle, dissipation factor, and storage coefficient of any RLC combination. One balancing control permits accurate analyses to be made more quickly and easily than with conventional AC bridges. Measures impedances from 0.5 to 100 K. Frequency range: 30 cps to 40 KC. Accuracy of impedance magnitude is  $\pm 1\%$  to 20 KC and  $\pm 2$  degrees for phase angle. Unit has internal 400 cps and 60 cps signals.

**TYPE 314 LOW-IMPEDANCE Z-ANGLE  $\odot$  METER**—Quickly and accurately measures low values of complex impedances in polar form. Provides direct readings of impedance in ohms, phase angle in degrees, and dissipation factor. Frequency range of 30-1000 cps, impedance-magnitude range of 0.005-1000 ohms accurate to  $\pm 1\%$ , and dissipation-factor range of 0 to infinity. Phase angles measured from  $-90^\circ$  to  $0^\circ$  to  $+90^\circ$ , with accuracy of  $\pm 1^\circ$  from  $30^\circ$ - $90^\circ$  and  $\pm 2^\circ$  from  $5^\circ$ - $30^\circ$ . Unique 4-terminal arrangement for current and voltage to unknown nullifies effect of lead impedance and insures accurate measurements. Also available as 314-AR (rack mount).

### PHASE MEASUREMENT GENERATION

**TYPE 320-AB PHASE METER**—Measures phase difference between 2 signals (10 cps to 100 KC) of any wave shape and indicates phase angle on large meter with separate ranges of  $360^\circ$ ,  $180^\circ$ ,  $90^\circ$ , and  $36^\circ$ . Accuracy is  $\pm 1\%$  of full scale  $+ 3$  degrees. Requires no adjustments, corrections, or balancing operations. Amplitude range is .7 to 120 volts rms. Input impedance of 10 meg and 13 mmf. Modifications allow operation to 1 cps. Also available as 320-ABR (rack mount).

**TYPE 709-A BROADBAND SECONDARY PHASE STANDARD**—Accurately calibrates phase measuring instruments but can also measure phase when used in conjunction with oscilloscope. Develops 2 sinusoidal signals continuously variable from  $0^\circ$  to  $360^\circ$  with respect to each other when fed from oscillator. Range is 20 cps to 20 KC. Accuracy of  $\pm 1^\circ$  from 20 cps to 10 KC;  $\pm 3^\circ$  from 10 KC to 20 KC. High input impedance, low output impedance. Inherent distortion less than 1%. 0.5 to 5-volt output varies less than  $\pm 2\%$  with phase shift. Also available as 709-AR (rack mount).

**TYPE 7000-B AUDIO PRIMARY PHASE STANDARD**—Designed for calibration of phase detectors and phase shifting devices but can also be used to measure phase shift. Consists of Type 703-A Oscilloscope, Type 704-A Secondary Phase Standard, and Type 707-A Lissajous Generator. Supplies 2 sinusoidal signals of same frequency whose phase relationship is continuously variable from  $0^\circ$  to  $360^\circ$  with  $\pm 0.05^\circ$  accuracy. Any single frequency available from 60 cps to 20 KC. Output of 1 to 10 volts rms from impedance of approximately 200 ohms.

**TYPE 500-A WIDE BAND DECADE AMPLIFIER**—Provides highly stable amplification over 5 cps to 2 mc operating range. Phase shift essentially 0 to 100 KC. Gain can be set to 10, 100, or 1000 and remain constant despite line-voltage variation. Input voltage ranges are 0-2 volts, 0-0.2 volt, and 0-0.02 volt. Input impedance is approximately 160 meg shunted by 7 mmf. Output voltage is 20 volts maximum across 20 K. Output impedance is 200 ohms. Ideally suited for use with Type 320-AB Phase Meter. Available as 500-AR (rack mount) or 500-2AR (dual rack unit in cabinet).

**TYPE 511-A POWER AMPLIFIER**—Low distortion, low noise and phase shift compensated amplifier for 50 cps to 50 KC range. Output load characteristics: 5 ohms 12.8 watts, 25 ohms 13 watts, 200 ohms 15 watts, 1200 ohms 12 watts, down 1 db at 50 KC. Phase compensation permits application as drive source for Type 7000-B. Also available as 511-AR (rack mount).

**TYPE 706-A ULTRA-SONIC PRIMARY PHASE STANDARD**—Calibrates high frequency phase meters, phase detectors, and phase-shifting devices. Generates 2 sine-wave signals having variable phase difference  $0^\circ$  to  $360^\circ$  at any specified single frequency 20 to 200 KC. Standard frequency supplied is 82 KC (2000 yards radar range); other frequencies special. Phase angle accuracy of  $\pm 0.1$  degree set by observation of multiple frequency Lissajous pattern on built-in scope. Also available as 706-AR.

### OSCILLOGRAPHIC RECORDING

**TYPE 550-A OSCILLOGRAPHIC RECORDER**—An 8-channel, direct writing, direct reading oscillograph with frequency response  $\pm 10\%$  to 800 cps with 503-A amplifiers. Especially applicable to sequential timing studies, hydrodynamic testing, acceleration testing, strain evaluation and vibration studies. Displays 8 traces on magnified screen while recording. Uses 35-mm perforated film with black carbon coating, easily lacquer-sprayed for permanency. Channel inputs: 75 volts at 10 ma peak. Amplitude linearity:  $\pm 2\%$  of rated peak deflection.

**TYPE 503-A DIRECT-COUPLED DRIVE AMPLIFIER**—Designed especially for use with Type 550-A Oscillographic Recorder. Supplied with plug-in equalizer preset to equalize frequency response of Type 550-A galvanometer. Frequency range is DC to 1 KC. Maximum gain is 75. Input impedance of 1 meg; load impedance of 7500 ohms. Output voltage is 75 volts. Has internal calibrating signal source and provision for balancing out DC component of signal. Also available in groups of 4 mounted in 504-R rack panel.

### POTENTIOMETER TESTING EQUIPMENT

**TYPE 394-A PONOGOMETER  $\odot$  STANDARD**—Measures equivalent noise resistance (ENR) of single or multi-turn precision potentiometers. Provides for establishing threshold level of ENR from 10-2000 ohms. ENR's above threshold level established produce both visual and audio indication. Frequency response flat to 50 KC. Accuracy is  $\pm 3\%$  of threshold value  $+ 3$  ohms. Recovery time is 1.5 seconds maximum. Also available as 394-AR (rack mount).

**TYPE 395-C PONOGOMETER  $\odot$  STANDARD**—Standard equivalent noise resistance generator for calibrating Ponogometer  $\odot$ . Consists basically of precision potentiometer in parallel with rotary switch. Logarithmically calibrated dial provides direct readings of ENR. Generates ENR values from 0 to 2000 ohms. Accuracy 1%. Also available as 395-CR (rack mount—gray panel).

**TYPE 396-B PONOGOMETER  $\odot$  ATTENUATOR**—Extends range of threshold resistance of Ponogometer  $\odot$ . Facilitates rapid change of threshold settings. Permits direct measurement of ENR's from 10 ohms to 100 K. Phase-inverting switch inverts phase of passive noise pulses so that only active pulses are measured by Ponogometer  $\odot$ . Attenuation is 0 to 80 db in 4 ranges. Frequency response is  $\pm 3$  db from 12 cps to 1.5 mc. Hum and noise level are 34 db below 10 mv. Also available as 396-BR (rack mount—gray panel).

### RESEARCH AND DEVELOPMENT

Acton Laboratories, Inc., also has complete facilities and an experienced engineering staff to provide specialized research in and development of electronic components and instruments.

### ENVIRONMENTAL TESTING

Component testing to military and commercial specifications in a fully equipped Environmental Testing Laboratory is another important service provided by Acton Laboratories, Inc.

## Engineering Beyond the Expected...

### **DESIGN** beyond the expected

The DOVAP prototype (above) is one half the size called for in specifications.

### **PACKAGING** beyond the expected

Shielding of critical areas and equalizing of heat enabled DOVAP to operate at higher temperatures than specified... without benefit of cooling by either conduction or convection.

### **PERFORMANCE** beyond the expected

Where momentary loss of signal means the end of usefulness, DOVAP functioned unfailingly... under environmental conditions of shock and vibration more severe than specified.

## ASSIGNMENT MISSILE

Withstanding torture is a specialty of Packard Bell's Doppler Velocity and Position indicator (DOVAP), designed and developed for an inter-continental missile (classified). In prototype environmental tests, this high powered Doppler Transponder was subjected to temperature, shock and vibration beyond the extremes expected in flight... beyond the extremes called for in specifications.

**RESULT:** Reliable signal and continuous transmission for an incredible life span.

*Write for new Packard Bell Electronics facility brochure... just off the press.*

# SOLA *Constant Voltage* TRANSFORMERS

## AUTOMATIC, INSTANTANEOUS VOLTAGE REGULATION

Sola Constant Voltage Transformers are static-magnetic voltage regulators. They are designed to provide a constant output voltage which is unaffected by changes in input voltage. You will find, listed in the following pages, the widest range of ratings and types available from stock offered by any manufacturer.

They have eight distinct advantages over regulators which depend solely upon saturation of core materials for their regulating action, or electronic type regulators:

1. Ultra-fast regulating action. Response time is usually 1.5 cycles or less.
2. No moving or renewable parts or manual adjustments; eliminates need for routine maintenance and spare parts stock.
3. Completely automatic, continuous regulation. No manual adjustments or instruction booklets are required.
4. Self-protecting against short circuits on output or load circuit.
5. Current-limiting characteristic protects load equipment from excessive fault currents.
6. Availability of transformer ratio for step-up, step-down, plate and/or filament supply permits substitution in place of conventional non-regulating transformers.
7. Relatively compact compared to other equipment for comparable ac voltage regulation.
8. Provide isolation between input and output circuits.

In addition, CUSTOM DESIGNED UNITS can be manufactured in capacities from 1 va to 25,000 va, to suit your individual specifications. When ordered in substantial quantities, they cost only slightly more than standard units of the same general size. Often, time and money can be saved by direct use or modification of a regulator from the several hundred special designs on file. Custom designs can include: SPECIAL VOLTAGE RATIOS, SPECIAL FREQUENCIES, COMPENSATION FOR FREQUENCY VARIATION, MULTIPLE OUTPUT VOLTAGES, THREE-PHASE SERVICE, and MILITARY SPECIFICATIONS.

## Adjustable Regulated A. C. Voltage Supply

$\pm 1\%$  Regulated Sine Wave Output with less than 3% Harmonic Distortion. Adjustable from 0-130 v.

One outlet regulated  $\pm 1\%$  and adjustable from 0 to 130 volts. One outlet for fixed value 115 volts regulated  $\pm 1\%$ . Total harmonic distortion less than 3%. Regulating response 1.5 cycles or less. Self-protecting against short circuit. Portable for use in shop or laboratory.

Input 95-125 v; Output No. 1, 115 v; Output No. 2, 0-130 v; 60 cycle, single phase.

Catalog Number	Output Capacity in VA	Dimensions in Inches			Approx. Shipping Weight in Lbs.
		A	B	C

## Regulated Power Supply Transformer

$\pm 3\%$  Regulation for Plate and Filament Supply

A single, compact source of plate and filament supply voltages regulated to within  $\pm 3\%$  or less, with line voltage variations of 100-130 volts. Each unit is furnished complete with capacitor and capacitor mounting bracket. The capacitor is not wired to the transformer, to permit maximum flexibility in mounting on the chassis.

itor mounting bracket. The capacitor is not wired to the transformer, to permit maximum flexibility in mounting on the chassis.

Input 100-130v., 60 cycle, single phase

Catalog Number	Typical Rectifier Tube	D.C. Input Volts To Filter	Filament Windings		Dimensions in Inches			Approx. Shipping Weight in Lbs.

## Sola DC power supplies:

### compact, regulated, for high-amp loads

This combination of Sola Constant Voltage Transformer, germanium power rectifier, and high-capacitance filter yields a dc power supply compact in size, low in weight, and with other important advantages.

1. Output regulation of  $\pm 1\%$  or less with  $\pm 10\%$  line voltage variations.
2. Minimum output voltage change with wide, rapid load changes.
3. Low input power, with resultant good efficiency.
4. Ability to withstand high, short-time overloads without damage to components.
5. Ripple voltage of approximately 1% (rms) or less.
6. High overall economy by eliminating overload capacity needed in other types of power supplies for certain applications.

7. Low ratio of size and weight to power output.
8. Freedom from routine adjustment and maintenance.
9. Exceedingly low output impedance.

In addition to its important function of correcting line voltage variations, the Sola CV's inherent current-limiting action permits safe, economical use of the efficient germanium rectifier with its low forward voltage drop and other advantages. This same current-limiting action also permits use of high-capacitance filter sections by controlling excessive charging currents which might damage rectifier junctions. The high-capacitance filter yields very low ripple voltage without need for heavy, bulky choke components, with their substantial and often-varying load voltage drops.

### FIXED DESIGNS

For  
intermittent, variable,  
or pulse loads.

### ELECTRICAL SPECIFICATIONS

All Inputs 100-130 volts, 60 cps

Catalog Number	Output Rating			Efficiency Approx. %	Ripple Voltage (rms)- % of Total	Approx. Shipping Weight Each Pounds
	Watts	Volts	Amps			
28156	144	24	6.0	72	Less Than 1%	45
28120	192	48	4.0	77	Less Than 1%	45

## GORN GOLD SEAL CONNECTORS In Melamine Or Plaskon Alkyd

GRA Series—Miniature Power Connectors for high voltage and current capacity; for No. 16 AWG.

GMRD Series SNAP-LOC—Available in GM series; for quick snap-action, separation and harness locking; contacts 7 to 50.

GH Series—Hex Miniature available with lock ring, spring and nut; hood and cable clamp; from 18 to 20 AWG; contacts 4, 5, 7, 9; also hermetically sealed.

GPC Series—Printed Circuit; will mate with printed circuit boards from .061 to .071 thick; with solder and solderless terminations; contacts 6, 8, 10, 12, 15, 18, 22.

GM Series—Miniature Rack and Panel from No. 18 to 20 AWG; contacts 7, 8, 9, 14, 18, 20, 21, 26, 34, 41, 50; also hermetically sealed.

GHR Series—Approved at 2000° for 5 min. per.; hood and cable clamp protects against vibration; for No. 16 AWG; contacts 1, 2, 3, 5.

GBRD Series—Rapid Disconnect; spring loaded receptacle; polarized guides prevent mis-mating; from 14 to 16 AWG; contacts 2, 18, 34.

GB Series—Heavy duty, high voltage connectors for aircraft power and communication equipment; can be supplied with any AN size 36 shell.

FREQUENCY DOUBLER TYPES ALSO

## DC-AC CHOPPERS

For 60 Cycle Use

There are twenty-two different types, both single and double pole, built to rigid commercial specifications with the emphasis on long life, low noise level, and extreme reliability. Please write for Catalog 370.

### DC-AC CHOPPERS

For 0-500 Cycle Use

All the usual military specifications are met with liberal factors of safety. Before any Chopper is shipped, it is tested twice over the range of  $-65^{\circ}\text{C}$   $+85^{\circ}\text{C}$  to give double proof of stamina. Each production lot sample life tested. Please write for Catalog 280.

### ULTRA HIGH SPEED RELAYS

Operating time 200 microseconds. Mount in any position. Will cover the range of  $-65^{\circ}\text{C}$   $+85^{\circ}\text{C}$  and are factory sealed. Please write for Catalog 337.

### RESONANT RELAYS

Permit remote control by radio or carrier current through frequency discrimination. Relays operate only when energized at rating and reject all other frequencies. Eleven types are offered in the range of 153-442 cycles. Please write for Catalog 335.

**8-INCH HYDROFORM**  
Maximum Blank — 8" Diameter  
Maximum Draw Depth — 5"

**— to reduce your development time and costs on every pre-production run!**

Kaupp hydroformed prototypes and pre-production parts are accurately formed and drawn in less time, at lower cost. Hydroforming produces short run, and in some cases production pieces, quicker and more economically than tool and die methods. New equipment installed by Kaupp assures faster service. For complete information on Kaupp metal forming facilities, call or write today!

- FEWER DRAWING OPERATIONS
- SIMPLER TOOLING
- FASTER SET-UP
- IMPROVED QUALITY

Expanded Kaupp facilities include deep drawing by conventional methods for volume production runs and a completely equipped metal spinning department.

## TUBE SUPPORTS for air-cooled tubes

No longer is it necessary for equipment manufacturers to design supports for forced-air-cooled tubes. After producing many such special designs, Lapp has engineered and built a complete series of insulating supports for air-cooled tubes. Use of these supports facilitates design of transmitter and other high-power circuits. Simple, compact, efficient and attractive in appearance, in porcelain or steatite, they make for economical production, easy interchangeability, and availability of replacement units. Write for Bulletin 301, with complete description and specification data.

## INSULATION FOR WATER-COOLED SYSTEMS

For carrying cooling water which must undergo a change in potential, use of Lapp porcelain eliminates troubles arising from water contamination and conductivity, sludging and electrolytic attack of fittings. Permanent cleanness and high resistance of cooling water is assured—for positive cooling and long tube life.

## LAPP PORCELAIN WATER COILS

Twin-hole and single-hole models in sizes to provide flow of cooling water from 2 to 90 gallons per minute. Cast aluminum mounting bases, lead pipe or flexible metal hose for attachment.

## LAPP PORCELAIN PIPE

Inside diameters  $\frac{3}{4}$ " to 3", in straight, 90° and 180° elbows, fittings. Swivel-type connections. Standoff insulators attach directly to fitting bolts.

Write for Bulletin 301 with specifications for Lapp Porcelain Water Coils and Porcelain Pipe.

## LAPP GAS-FILLED CONDENSERS

Capacitance for high-voltage, high-current duty

The record of more than 18 years' service, in thousands of installations, proves the reliability of the Lapp Gas-Filled Condenser. For duty at high voltages and high currents, this unit offers the advantages of extreme compactness . . . low loss . . . high safety factor . . . constant capacitance under temperature variation . . . grounded tuning shaft . . . and rugged sturdiness. Units available in four tank diameters, 7" to 18" . . . in fixed or variable capacitance . . . capacitances to 30,000 mmf; current ratings to 390 amps at 1 mc; voltages to 85 Kv peak. Write for Bulletin 302.

## ENTRANCE INSULATORS

To eliminate losses which occur in ordinary types of bushings at radio frequency, Lapp units use air as major insulation, porcelain path being lengthened by its "bowl" shape. In wide variety of types for most electrical and mechanical requirements.

## STAND-OFF INSULATORS

Dependable mechanical and electrical performance—and trim good looks. Hundreds of standard and special types available.

Write for Bulletin 301, listing entrance and stand-off insulators.

## ANTENNA STRAIN INSULATORS

The largest of the porcelain rod insulators shown develops 12,000 lb. strength. Available, as specified, with rain shield and/or corona rings. Smaller units, in porcelain or steatite, for all strain or spreader use. Engineering and production facilities also available for special performance units. See catalog 301.

## PLUG-AND-RECEPTACLE UNITS for sectionalizing circuits

For panel-rack or other sectionalized circuits, Lapp offers a variety of plug-and-receptacle units. Any number of contacts can be provided (in multiples of twelve). Male and female contacts are full floating, for easy alignment and positive contact. Contacts

silver plated, terminals tinned for soldering. Insulation is steatite, the low-loss ceramic... non-carbonizing even under leakage flashover resulting from contamination, moisture or humidity. Write for complete electrical and mechanical specifications and recommendations.

## ANTENNA TOWER INSULATORS

Most of the world's radio towers are supported by Lapp insulators, including the tallest guyed mast ever built. Through the Lapp "compression cone," immense loads can be carried by electrical porcelain. Write for data on Lapp footing insulators for self-supporting radiators, mast-base insulators, or guy insulators.

## SPECIAL ASSEMBLIES

Lapp business is electrical porcelain, its application, design, manufacture, and assembly. Our skill is in our knowledge of the capabilities, and limitations, of ceramic insulation... in engineering ingenuity to meet specified requirements... and in efficient production. If you have need for insulating parts and associated sub-assemblies, we may be able to show you how they can be made most economically, to perform most efficiently.

## "ThruLine" DIRECTIONAL RF WATTMETERS

MODEL 43

### Direct Reading

25-1000 megacycles . . . 10W — 100KW . . . "thru" type . . . for power measurement in complete systems under operating conditions . . . insert between transmitter and antenna or load to provide an accurate and simple means of measuring direct or reflected power . . . plug-in elements determine full scale power range and frequency range. Get Bulletins W-400 for detailed specifications.

Model	Line	Impedance	Frequency Range	Full Scale Power	Connector
43	RG-8/U etc.	50 ohms	25-60; 50-125 100-250; 250-500; 400-1000 mc	10; 25; 50; 100; 250; 500 W	N; C; HN; UHF
4712	1 1/8"	50 ohms	200-500 400-1000 mc	.5; 1.0; 1.5; 2.5; 5.0 KW	Rtma Std.
460	3 1/8"	50 ohms	200-500 mc	1; 2.5; 5; 10	Flange
480	3 1/8"	51.5 ohms	400-1000 mc	25; 50 KW	Sleeve Bullet
490	6 1/8"	51.5 ohms	200-500 mc	25; 50 and 100 KW	

## "Termaline" RF ABSORPTION WATTMETERS

MODEL 611

### Accurate

30-500 megacycles . . . 1/2 watt-5 KW . . . "load" type . . . portable . . . direct reading wattmeter . . . accuracy  $\pm 5\%$  of full scale . . . non-radiating load for power measurement. For complete specification on all available models, write for Bulletins TW-600.

Model	Freq. Range	Max. Power	Power Range Scales	Input Connector
611	30-500 mc	60W	0-15; 0-60	Female N
612	30-500 mc	80W	0-20; 0-80	
67	30-500 mc	500W	0-25; 0-100; 0-500	Coplanar with adapter to UG-21/U; (optional) RG-17 & RG-19 cable assemblies; adapters to rigid lines
67C*	30-500 mc	2500W	0-100; 0-500; 0-2500	
824*	30-220 mc	5000W	0-5000	

\*Water cooled (other available models described in specification sheets)

## "Termaline" RF LOAD RESISTORS

MODEL 888

### Reflection-Free

Designed to terminate 50 ohm coaxial line with minimum reflection . . . low VSWR . . . non-radiating . . . water cooled ratings 2500 W to 50 KW . . . air cooled ratings to 1500 W . . . ratings can be increased by forced air externally applied. For detailed specifications get Bulletins R-800.

Model	Max. Power	Freq. Range	Max.* VSWR	Connector
80	5W	0-1KMC	1.1	"N", "C", "BNC"
80A	20W	0-500MC	1.1	N Female
81	50W	0-1KMC	1.1	
81B	80W	0-1KMC	1.1	Coplanar with adapter to UG-21/U
82A	500W	0-1KMC	1.1	
883	1.2KW	0-1KMC	1.1	LC
888	1.5KW	0-1KMC	1.1	3/8" Flanged

\*Other VSWR requirements can usually be met by special selection.

## COAXIAL SWITCHES

MODEL 74  
(Cutaway View)

### Dependable

Small compact design permits the "Coaxswitch" Selector to be incorporated into many electronic units where repeated channel switching is required. Finger-tip operation — pull knob, rotate and push in to make contact. Bulletin CS-6 contains full specifications.

Model	74	71B	72R	72-L
Positions	Six	Eight	Reversing Switch	Two
Coaxial Circuits	One	One	Two	Two
Connector	Type N female connectors are standard on all models to receive UG-21/U series plug. Use adapters with other cables and connectors.			

## COAXIAL RF FILTERS

### Rugged

High pass . . . low pass . . . band pass . . . band elimination . . . designs utilize both distributed and lumped constant . . . feature low insertion loss and high stop band attenuation . . . many designs available . . . "know-how" and physical facilities for quantity production . . . Get Bulletin CF-6.

	Low Pass	Low Pass	Low Pass	Low Pass	High Pass	Band Pass
Model*	5310	5311	522	819-1200	530	5131
Cut Off	90 mc	160 mc	400 mc	1200 mc	420 mc	45 mc & 105 mc

## PRECISION CARBON FILM RESISTORS

Providing you with outstanding reliability and accuracy at economical prices, TI precision carbon film resistors are supplied in six sizes from 1/4 to two watts with resistance values from 25 ohms to 30 megohms; 1, 2 or 5% tolerances. Special values, modifications and tolerances will be supplied at your request.

**MIL-Line**—Far exceed MIL-R-10509B specifications for characteristic X. They show an average resistance value change of only 0.092%—after 18 months of shelf life—and have an exclusive coating which protects them from the effects of moisture.

**Hermetically Sealed**—solder sealed in a pure ceramic shell and fully insulated for maximum protection and reliability... meet specifications for characteristic B of MIL-R-10509B.

**Industrial Line**... economical precision resistors with the close tolerance required in instrument and industrial uses where military approval is not required.

## PRECISION PANEL METERS

You will find the **precision** meter your applications require in TI's line of bakelite, ruggedized and hermetically sealed panel meters... available in a wide range of shapes and styles... in sizes from 1 1/2 to 4 1/2 in. All TI meters exceed MIL-M-6A and MIL-M-10304A. All provide you with long service life and lasting calibration at economical prices.

SEMICONDUCTOR - COMPONENTS DIVISION  
 P. O. BOX 312 DALLAS, TEXAS

## PRECISION OPTICAL COMPONENTS

You receive the finest optics without delay from TI, producer of all types of flat, cylindrical, prismatic, spherical, and aspherical components for fire control, guided missiles, infrared, and many other applications. Modern engineering and manufacturing facilities assure you that the most advanced techniques will be applied to your project. Rely on TI—the largest precision optics producer in the west—when you need precision optical components, in large or small quantities.

OPTICS DIVISION  
 104 E. FOOTHILL BLVD. MONROVIA, CALIF.

## MILITARY ELECTRONIC AND ELECTRO-MECHANICAL COMPONENTS AND SYSTEMS

TI knowledge and skill in the semiconductor field—combined with rapid systems engineering progress—has solved some of the toughest, most intricate problems in the development of weight, space and power-saving military equipment. TI's top-quality manufacture, on an accelerated basis, is being applied to radar, sonar, magnetics, VHF, and other means for detection, navigation, communications, telemetering, fire control, and missile guidance. Unusual scope and facilities also make TI a leader in the field of infrared... from materials manufacture through components processing to development of complete systems. # OHMITE®

## the complete

## line of

# industry-preferred COMPONENTS

Long life and dependability are synonymous with the name Ohmite. When you specify Ohmite components . . . you build reliability into your product. This reliability is backed by Ohmite's continuing research programs which explore new product ideas, improve present products, and develop more efficient manufacturing processes. All this plus the fact that Ohmite is the world's leading specialist in the manufacture of power-type resistance components —high quality rheostats and wire-wound resistors in the most complete range of sizes and types available to industry. Reliability is also characteristic of Ohmite tap switches, precision wire-wound resistors, molded composition resistors and potentiometers, general-purpose relays, subminiature tantalum capacitors, and R. F. chokes. Write on company letterhead for the complete Ohmite Catalog and Engineering Manual.

OHMITE MANUFACTURING COMPANY • 3607 Howard Street, Skokie, Illinois

# NEW OHMITE®

## TAN-O-MITE®

# TANTALUM CAPACITORS

The new Tan-O-Mite® line of wire-type subminiature capacitors features six sizes which collectively offer sufficient range and flexibility to satisfy the design needs of any manufacturer of miniaturized equipment. Sizes "S" and "T" constitute the smallest units of this type available. (Note dimensions in table below.) Tan-O-Mite® foil-type and wire-type tantalum capacitors both feature greater capacitance per unit volume, lower leakage current and power factor, and small capacitance drop at extremely low temperatures as compared to other types of electrolytics. Ohmite engineers will work with you on your design requirements.

- HIGH STABILITY
- FOR  $-55^{\circ}\text{C}$  TO  $+85^{\circ}\text{C}$  OPERATION
- HIGH CAPACITANCE
- SUBMINIATURE SIZES
- LONG SHELF LIFE

### SERIES TW, SUBMINIATURE, WIRE-TYPE TANTALUM CAPACITORS

Ultrasmall for low-voltage DC transistorized electronic equipment, these new units provide substantial savings in circuit space plus high quality and long, reliable operation. Available in six subminiature sizes; 0.1 to 60 mfd. over-all capacitance range. Smallest size .075 x .156 inches; largest .125 x .500 inches. Five stock sizes in a wide range of capacitances and voltages. Capacitors can be supplied insulated with a tough Mylar plastic sleeve for application in confined locations near metal parts. Leads are normally axial on these units. *Bulletin 148.*

SIZE	UNINSULATED		INSULATED	
	D (inches)	L (inches)	D	L
T	.075 (5/64)	.156 (5/32)	.082	.203
S	.075 (5/64)	.187 (3/16)	.082	.234
M	.095 (3/32)	.172 (11/64)	.100	.218
A	.095 (3/32)	.250 (1/4)	.100	.312
B	.125 (1/8)	.312 (5/16)	.134	.375
C	.125 (1/8)	.500 (1/2)	.134	.562

SERIES TW

### SERIES TF, FOIL-TYPE TANTALUM CAPACITORS

Three sizes now available in limited quantities for engineering evaluation and use.

Capacitors are tantalum foil, electrolytic-type units designed for low voltage AC and DC applications. Available in three sizes; .25 to 140 mfd. over-all capacitance range. Working voltage up to 150 volts. Polar and nonpolar units are available. *Bulletin 152.*

TANTALUM FOIL CAPACITOR		
CASE SIZE	D*	L*

K	9/32"	7/8"
L	3/8"	1-7/16"

\*Add 1/16" to L and 1/64" to D when insulating sleeve is used.

SERIES TF

# Electronic TEST UNITS

Formica Company offers the industry the latest development in electronic laboratory furniture and equipment — test benches and units made up of prefabricated sections, factory assembled from stock to suit the special requirements for your individual application.

Designed by engineers for engineers, with serviceability in mind — the individual sections are constructed to afford the greatest number of varied selections and combinations. Made of heavy-gauge furniture steel, Formica's benches are sturdy and can take a beating, yet are modern in style and practicability, to meet today's laboratory needs.

These testing units offer unusual space-saving arrangements. Through their design, available working area has been increased at least 50% over that in other types now in use. For more information write for brochures and specifications.

# How to choose magnetic tape recorders for data

Types, performance and sources of further information

A magnetic tape recorder for your particular use is chosen from hundreds of possibilities, and yet from Ampex it can almost always be a standard production-line model. There are three reasons:

- (1) Ampex offers the broadest available selection of basic types.
- (2) Ampex modular design permits innumerable combinations of standard components to fit individual needs.
- (3) By designing for the most critical user requirements, Ampex achieves performance standards ample for almost all practical uses.

## TYPES OF TAPE TRANSPORTS

Reel-to-reel recorders are the most familiar. They record over relatively long time intervals, hence are almost always used for acquiring permanent data.

Continuous-loop recorders recycle on a definite time interval, either to provide a cyclic repetition of a length of data or to act as a time-delay device. The Ampex FL-100 is of this type.

Digital recorders, a special variation of reel-to-reel, are characterized by extremely rapid start-stop characteristics for close pulse packing. The Ampex FR-200 is typical.

"Transportable" recorders with varying degrees of portability are available from Ampex. Even Ampex's "fixed" recorders, FR-100 and FR-1100 may be mounted in a truck or trailer. But recorders like the Ampex 800 are built for true mobility, hence are light, compact and resistant to shock and vibration. Ampex also has miniaturized designs.

## TYPES OF RECORDING

Most Ampex models use interchangeable plug-in amplifiers that enable each track to be used with any of three recording techniques:

**Direct recording** has frequency response of 100 to 100,000 cycles/sec. at 60 in./sec. tape speed. This high response is its greatest advantage and is utilized either directly or for multiplexed data.

**FM-carrier recording** has high instantaneous amplitude accuracy with frequency response of 0 (DC) to 20,000 cycles at 60 in./sec. It is used for transients, low frequencies and wherever accurate reproduction of amplitude is important.

**PDM recording (pulse-duration modulation)** can time-multiplex as many as 85 channels of data onto each tape track (data from 0 (DC) to a few cycles per second). PDM provides high accuracy and easy convertibility to digital form.

## OTHER CONSIDERATIONS

Tape widths of quarter, half and one-inch width with 2, 3, 4, 7 and 14 parallel tracks are Ampex standards.

Commonly furnished tape speeds are 60, 30, 15, 7½, 3½ and 1½ in./sec. Others are available. Recorders have up to eight speeds.

Time-base accuracy within 2 parts in 100,000 can be provided with standard Ampex accessory equipment.

Compatibility (for tape interchange) between Ampex recorders of same or different models is an important Ampex advantage.

Full performance specifications are available in literature on individual series.

*A general application brochure and literature on individual models are available upon request. Ampex's Field Sales Engineers will be pleased to answer your inquiry with specific information on any requirement. Write Dept. H-57.*

# FINE WIRES

*the reading of which will enrich you*

Our eminent detective has discovered that Hudson is furnishing wire to manufacturers of radio, television and electronic equipment, to aircraft and missile manufacturers and to the one thousand and one requirements of the electrical equipment manufacturing industry. And he has also discovered that these thousands of customers are well pleased with Hudson Wire because:

- Customers' orders are filled to exact specifications.
- Newest production methods provide low costs.
- Quality control is maintained.
- Delivery schedules are fulfilled.
- Special packaging helps to reduce your production costs.
- Aid on problems is furnished in Hudson's research & development departments.

CALL HUDSON NOW ON  
ANY REQUIREMENTS FOR —

1. BARE WIRES — aluminum, copper, brass, bronze, phosphor-bronze, nickel-silvers, zinc, lead, tin, cadmium, oxygen-free copper, silver, fuse, stainless steel and brush wires.
2. SPECIALTY WIRES — silver plated & electro-tinned copper & copper alloys, single end, stranded & bunched. Flat-wire ribbons.
3. INSULATED WIRES — Thermoplastic and Teflon (Dupont).
4. MAGNET WIRE — copper, aluminum and copper-clad steel. Coverings of plain & heavy enamel, Formvar, Silicone, EZsol (liquid nylon) & New EZsol (polyurethane).
5. TEXTILE COVERED WIRES — nylon, orlon, celanese, silk, cotton, rayon & Fiberglass.
6. Litz Wire — Voice coil wire — Bifilar & Trifilar Formvar.

*makers of quality fine wire for over 50 years*

Magnet Wire Plants

# PRECISION

For the ultimate in variable-phase potentiometers...

## VARI/PHASE<sup>TM</sup>

Single-turn, independently-adjustable, ganged precision potentiometers meeting the most critical control requirements. Designed to meet the specifications as set forth by A.I.A. (Aircraft Industries Associated) for precision potentiometers.

Many and marked improvements over previous designs. Phasing accomplished by rotating the winding within the housing. Winding and terminal board combined in single assembly and fitted in housing. Usual clamping bands are eliminated. Saves space, without loss of resolution. Specifications in adjacent table. Drawings of each type, sent on request.

*Consult* **CLAROSTAT...**

Whatever your control or resistor requirements may be, make full use of Clarostat's engineering collaboration for the logical and economical solution. Also note that many other types of potentiometers are available from Clarostat.

### DIFFERENT — and BETTER!

Simplified phasing! External and independent phasing of each cup without affecting relationship with others. To phase, loosen nut, adjust, tighten nut. That's all. Adjustments can be made before or after mounting. Also to compensate for wear and component aging.

## STANDARD or SPECIAL...

Clarostat's extensive tooling and production facilities provide for the widest choice of standard types. Add Clarostat's well-known ingenuity, and you can have special types. Save development delays, tooling costs, production setup charges. Try Clarostat first!

### CLAROSTAT SERIES 42

A superlative potentiometer of flexible design for many varied applications. Used singly or ganged.

Low-loss phenolic case. Interlocked sections rigidly held together by threaded rods and metal end-plates. Taps mechanically fixed on housings, and electrically positioned, to meet requirements. Series 42 exceeds applicable JAN-R-19 specs.

Resistance Range (Linear) .....	10 to 100,000 ohms.
(Non-linear) .....	Max. 350 ohms per degree of rotation.
Resistance Tolerance .....	Standard overall $\pm 5\%$ Special, $\pm 0.5\%$ .
Linearity (standard) .....	$\pm 1\%$ ; $\pm 0.5\%$ special.
Power Rating .....	3 watts, at 40° C.
Rotation (Effective) .....	280°; Max. 358°.
Rotation (Mechanical) .....	Up to 340° with stops. Continuous if desired.
Torque .....	1 oz./in. max. per section.

### CLAROSTAT SERIES 55

Multi-turn wire-wound potentiometers in heavy-duty metal housings. Also in encapsulated versions for maximum climatic protection.

The 1/2" dia. Single-Turn Potentiometer is especially intended for high-temperature operation in limited space.

Series 55 Multi-Turn Potentiometers are available in five sizes: 5/8", 7/8", 1", 1 1/2" and 1 3/4" dia.

Many variations available, such as encapsulated, shielded, plug-in terminals, terminal board, printed-circuit terminals, hermetic-sealed terminals, terminals for plug-in adapters, as well as taps on 1" dia. size and up. Available in gang assemblies from 7/8" size and up.

Encapsulated version of multi-turn Series 55.

1/2" dia. single-turn unit.

*Send for* **ENGINEERING DATA...**

Only three of the Clarostat precision potentiometer series are presented here. Many other designs available—wire-wound, composition-element, molded composition-element, miniaturized, standard radio/TV controls, power rheostats, etc. Also widest choice of resistors. Write for Engineering Data.

### HIGH POWER MAGNETIC SERVO AMPLIFIERS FOR AUTOMATION

#### *MB-1000-60 (1000 watt)*

Provides 1000 watt continuous output to reference phase and 1000 watt phase-reversible output to control phase. Designed for  $\frac{3}{4}$  h.p., 2 phase, 60 cycle servo motor. Ultra-fast response of less than 30 ms approaches theoretical limit. Incorporates a Scott connected transformer for change of 3-phase power into 2-phase output. Eliminates slow acting, bulky type rotating equipment or hydraulics. Completely static circuitry insures maintenance-free unattended operation.

Amplifiers can also be supplied for polarity reversing D.C. output for D.C. servo motors.

MB 1000-60

#### *MB-200-60 (200 watt)*

Provides both reference-phase and control-phase power for a  $\frac{1}{6}$  or  $\frac{1}{8}$  h.p. industrial servo motor. Features and operation are similar to those given for the MB-1000-60 above.

MB 200-60

### STABLVOLT\* DC POWER SUPPLIES with Dual Magnetic Regulation

A complete line of precision power supplies for laboratory, industrial and original equipment applications. Dual Magnetic principle provides for independent regulation of line and load changes. Exclusive flux oscillator achieves superior static and dynamic line transient regulation. No tubes, no moving parts. Short circuit-proof, maintenance-free. Ideal for unattended locations.

MK-532-15

MR-15-1

### FOR YOUR SPECIAL DEVELOPMENT NEEDS .

MRC offers a complete service in creative engineering, design, development and production. Whatever your field of application — automation, computer, communication, electronic, instrumentation, aviation or guided missile — you'll find that MRC men have the highly specialized magnetronic experience and skill to do a fast, successful job. If you have a special problem involving magnetronic components, write or call MRC. Prompt response, no obligation.

\*REG. TRADE MARK

AN OUTSTANDING LINE OF ALL-MAGNETIC COMPONENTS,  
SYSTEMS AND MAGNETICALLY REGULATED  
POWER SUPPLIES

MMO-528

**NEW MICROMAG® MMO-528 LOW-LEVEL MAGNETIC DC AMPLIFIER**  
*Powered from 28 volt aircraft or missile systems—draws 20 milliamperes*  
For amplification of signals from thermocouples, strain gages, and similar low level transducers used in telemetering systems. DC voltage gain of 500 achieves 5 VDC output from a 10 millivolt DC input signal. Input electrically isolated from output. Designed for use in missile and aircraft telemetering systems, the amplifier has virtually no zero drift, and is temperature compensated to provide excellent gain stability. Operates directly from the aircraft 28 VDC supply. Draws 20 milliamps. No tubes are used, no warm-up time necessary. Potted and hermetically sealed to insure reliable operation. Designed to meet MIL-E-5272-A specs.  
*Write for complete technical data*

AIRCRAFT AND MISSILE

**TUBELESS PRECISION MISSILE AND AIRCRAFT INSTRUMENT POWER SOURCE MRP-5-1S**  
*5 VDC transient-free output*  
A dual magnetic regulating system plate line voltage transients from the output, regulates DC to 0.1% accuracy. Does not distort line voltage wave form. Trimptot having 5 millivolt resolution provides 0.5 volt output adjustment. Mounts easily in any position. Rugged, compact, short circuit-proof. Output current 0-1 amp. Hermetically sealed; all components cast in thermosetting plastic. Meets MIL-E-5272-A specs.

MRP-5-1S

**400 CYCLE A. C. LINE VOLTAGE REGULATOR MXP 3000**  
*For laboratory and ground support equipment*  
Designed for laboratory and ground support equipment requiring constant regulation of 400 CPS voltage. Input 100-130 VAC, 380-420 CPS. Output adjustable from 110-120, regulated to  $\pm \frac{1}{2}$  volt at 400 CPS, under any combined conditions of line voltage change from 100-130 VAC, and load changes from 0-25 amperes. Distortion 5% maximum. Static magnetic circuitry used throughout. Can be connected for three phase circuitry. Other ratings available for ground and airborne applications.

MXP 3000

**INSTRUMENT MAGNETIC SERVO AMPLIFIER SERIES**  
*For aircraft and missile servo systems*  
Precisely engineered Magnestat Magnetic Servo Amplifiers are available from stock, from the smallest model rated at 3 watts, and having a frequency response of 0-30 CPS, to the high-power 40-watt model, frequency response 0-10 CPS. These units have sinusoidal phase reversing output, with transistor or tube control... a.c. or d.c. output. Temperature range of  $-55^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$ . Currently being applied in many major aircraft and missile servo systems.

MA-6-400

**COMPLETE MAGNETIC SERVO SYSTEMS**  
*for military and industrial applications*  
Accurate, reliable systems for remote indication, measurement, recording and control in airborne and ground equipment. Developed to meet your specialized needs. Use of MRC magnetic components throughout makes your system really rugged. Fast response, strong output signal, compact packaging.  
*Write for further information, indicating your special needs*

# SIE SOUTHWESTERN INDUSTRIAL ELECTRONICS CO.

2831 Post Oak Rd. P. O. Box 13058 Houston 19, Texas Phone: MO 7-6611

**THE MODEL R-1 VOLTMETER** is intended for precise voltage measurements in circuit design work. It offers accuracy, reliability, and convenience. In addition to its wide range AC and DC scales, it includes a precision ohmmeter, a D-C pre-amplifier for driving oscilloscopes and recording devices, a built-in standard cell for instant calibration, and provision for expanding the DC voltage scales.

**SPECIFICATIONS:**

Range: 1 mv. to 1000 volts, full scale AC and DC

Frequency response: 0 to 100 kc

Accuracy: DC, 1½%. AC, 3%

Input impedance: 10 megohms, 20 mmf.

Price: Standard model, \$620.00

Rack-mounted, \$700.00

**THE M-2 OSCILLATOR**, the standard of the geophysical industry, is an extremely versatile instrument. It combines many desirable features—wide range, accurate calibration, low distortion, high output, low drift, excellent dynamic stability, and constant output throughout the range—in a compact, rugged instrument of reasonable price. For geophysical, audio, servo, vibration, medical, and computer work, the M-2 is unexcelled.

**SPECIFICATIONS:**

Frequency range: 1-120,000 cps.

Distortion: less than .2% in audio range

Calibration accuracy: 1½% + .1 cps.

Output: 20 volts at 20 ma.

Amplitude stability: ± .5 db.

Price: \$425.00

**THE MB-1 OSCILLATOR** is powered by self-contained batteries, providing signals completely free of power line transients and 60 cps ripple. It provides low-distortion sine wave signals and covers the geophysical, medical, and audio ranges, with good dynamic and amplitude stability characteristics. The addition of the Geophysical Microvolter (shown installed below) provides signals of accurately calibrated amplitudes at low levels.

**SPECIFICATIONS:**

Frequency range: 2-20,000 cps

Distortion: less than .5% in audio range

Calibration accuracy: 2% + .1 cps

Output: 5 volts at 5 ma.

Price: \$215.00 (Microvolter \$80.00 extra)

**THE MODEL C-6 RESISTANCE METER** features a quick-charge go, no-go capacitor leakage checker. Operating from a 110-volt 60 cps power source, it measures resistances at 1½, 50 or 500 volts, enabling it to meet MIL specs on insulation tests, measure the leakage of 200 WVDC capacitors, and check continuity. It is accurate, stable, and covers the widest range of any direct-reading ohmmeter.

**SPECIFICATIONS:**

Range: 0 to 10,000,000 megohms

Test voltages: 1½, 50, and 500 volts

Accuracy: 3% of scale below 1,000,000 megohms

5% of scale above 1,000,000 megohms

Price: \$200.00

**THE MODEL E-2 COMPARISON BRIDGE** indicates percentage differences between resistors, capacitors, and reactors at 60-cycle frequency. It is useful for rapid acceptance and production-line tests and can be used in conjunction with decade boxes. SIE Comparison Bridges with other test frequencies and voltages are also available.

**SPECIFICATIONS:**

Full scale ranges: 1, 2.5, 5, 10, & 25%

Accuracy: ± .1% on the 1% range

Test limits for

Resistors: 1 ohm to 5 megohms

Capacitors: 500 mmfd. to 2000 mfd.

Inductors: 3 mh. to 10,000 henries

Price: \$185.00

**THE MODEL B DIRECT-COUPLED POWER AMPLIFIER** is capable of producing up to 6 watts output. It may be used to amplify the output of the D-1 amplifier, low frequency oscillators, or various transducers; and will drive recorders, shaking tables, loudspeakers, electric motors, Helmholtz coils, and other transducers. It finds application also as an ultra-low-frequency transformer.

**SPECIFICATIONS:**

Voltage gain: 2.5

Power gain: 30,000

Output: 25 volts RMS, 250 ma.

Frequency response: 0-20,000 cps ± 1 db

Input impedance: 500,000 ohms

Price: \$575.00 (less cabinet)

# GEOPHYSICAL INSTRUMENTS

SIE is the world's largest manufacturer of electronic seismograph instruments, having supplied more than 420 complete systems to organizations operating throughout the world. The complete SIE line of geophysical equipment includes geophones, galvanometers, recording oscillographs, magnetic tape recorders, matched sets of amplifiers, control and checking units, blasters, power supplies, and special vehicle bodies.

Shown above is an SIE G-22A high production seismograph system. The RO-22A-10 Oscillograph records fifty channels on ten-inch paper, and all of the components in the GA-22A amplifiers are hermetically sealed for low noise and long life.

**MODEL MO MULTI-CHANNEL OSCILLOGRAPH** permits visual observation of eight channels of dynamic data, continuously displayed on a 21" single-cathode ray tube with a long-life P-7 phosphor. A raster scanning circuit provides useful frequency response to 2000 cps, while a special "sweep" circuit accelerates the sweep for detailed examination of certain signals. Auxiliary Model EP Event Pre-selector provides .1 and .01 second timing lines, and provides calibrated sweep delays.

**OPERATING CONDITIONS:**  
 Speeds: 3-300 ips.  
 Sensitivity: 2 volts/inch  
 Model MO, \$6000.00  
 Model EP, \$1500.00

**MAGNETIC RECORDERS** . . . SIE manufactures a complete line of drum-type magnetic tape recorders, with as many as fifty-six channels for portable, mobile, and laboratory applications. Among the special features available are servo-controlled individually adjustable heads, viewing screen and photo-eye attachments, and tape storage compartments for long-time recording.

**TELETYPE SPECIFICATIONS USING WIDE-BAND FM (SIE SLOPE MODULATOR):**  
 Frequency response: 0-500 cps (down 3 db.)  
 Harmonic distortion: less than 1% measured at 35 cps  
 Signal-to-noise ratio: better than 54 db.  
 Timing accuracy: .25 millisecond  
 Sensitivity: 1 volt RMS for 100% modulation

Price and delivery will be quoted on receipt of specific inquiry.

# TRANSFORMERS AND INDUCTORS

SIE Precision Engineered Transformers and Reactors are manufactured by the Hermetic Seal Transformer Division of Southwestern Industrial Electronics Company. Standard designs for low frequency applications are small, hermetically-sealed units and offer uniform response characteristics from 5 to 1000 cps. Special precautions are taken to insure identical phase characteristics . . . a feature that is very important in the manufacture of matched sets of amplifiers.

The Hermetic Seal Transformer Division also produces a wide variety of standard and custom-designed transformers and chokes. Some of these special components are: low-level, low-frequency, high-inductance coils, hum-bucking construction types; wound components with single, double, or triple Mu-metal shielding; and high-temperature insulation and toroidal windings on a wide variety of core materials.

SIE transformers include a complete line of products built to the requirements of specification MIL-T-27A. Other wound components from SIE include recording heads and magnetic amplifiers.

# toroidal coil winding ROBOTIZED by UNIVERSAL

## 7 MACHINES FOR AUTOMATIC WIRE AND TAPE WINDING

- 10 times faster than by hand
- Tighter, neater, more accurate
- Lower unit cost . . . pays for itself
- #40 to #3 wire . . . for all size coils
- Ideal for Inductors, Filters, Rheostats, Transformers, Saturable Reactors, Potentiometers, Magnetic Amplifiers, etc.

## CUSTOM WINDING

Submit your specifications for custom winding right in our plant. Economical, dependable service! Specialized in winding of heavy teflon wire. Engineering and technical service available.

*Write for Descriptive Literature*

*"Accuracy is a Universal Word"*

**UNIVERSAL MANUFACTURING COMPANY, INC.**  
410 Hillside Avenue, Hillside, N. J.

servo amplifier controls current to the windings of 400-CPS split-phase motor; draws low stand-by power.

Magnetometer produces an output current that is linearly proportional to input frequency with high accuracy.

Pulse blocking oscillator transformers are hermetically sealed, provide pulse widths from 0.1 to 10 microseconds.

Magnetic demodulator produces polarity-reversible DC output from 400-CPS phase-reversible input.

Inter-pivoted 400-CPS chopper operates during shock and vibration up to 125 degrees Centigrade.

Coaxial chopper presents an SWR below 1.4 up to 400 MC on 50-ohm line, switches at 100 CPS.

Two halves of this double-pole double-throw split-reed chopper lock each other in phase within 5 degrees.

# AIRPAX

## PRECISION ELECTRICAL COMPONENTS

Here are some of the newer products developed at Airpax. All are manufactured to the traditionally high precision that has gained Airpax its reputation for quality. On the next two pages you will find tabular data about these and other Airpax products.

**DESIGNERS**      **ENGINEERS**

**BALTIMORE, MD. • CAMBRIDGE, MD.**

**FORT LAUDERDALE, FLA.**

Ferrac instrument-type 400-CPS magnetic amplifier has exceptional stability and linearity.

Miniature circuit breaker has magnetic time delay independent of temperature, rated currents from 50 MA to 10 amp.

*These accurately made components represent products available to you that meet rigid industrial or military requirements.*

**Choppers**—A variety of Airpax choppers enables you to select the appropriate type for each application. They are manufactured on precision machines to assure you of uniformly high quality. These choppers are used in instruments and automatic control. Contacts are rated for 0 to 2 milliamperes at up to 100 volts. Drive is 6.3 RMS volts.

#### Typical Signal Choppers

Frequency (CPS)	7-Pin Base Type	Octal Base Type	Miniature Solder Lug Type
	<b>Standard Environment</b>		
60	175, 176	170, 586	178, 179, 800*
400	300, 400	520, 580	302 thru 304, 600*
<b>High Temperature</b>			
400	150, 310, 320	100	311 thru 314
<b>High Vibration</b>			
400	350		351 thru 354

\*Double-pole double-throw, split reed

**400-CPS Chopper Drivers**—Chopper drivers enable you to use 400-CPS choppers even if 400-CPS drive power is not otherwise available. There are two types: Series 202 is for use in 60-CPS powered equipment with conventional heater and plate voltages. Series 220 is for use in battery powered equipment.

**Vibrators**—Airpax pioneered high-frequency power vibrators because of reduced size and weight of associated transformers and chokes.

Type 500 vibrator is a 400-CPS interrupter unit for use with moderate continuous or heavy intermittent loads. It is hermetically sealed, operates in any position. This vibrator and variations are used in airborne transceivers, guidance equipments, and portable sets.

Type 505 is a center-pivoted vibrator rated for 28 DC volts input and output at 250 CPS. It is designed to withstand vibrations of 10 G from 10 to 1,000 CPS; time efficiency is 46%.

**Inverters**—Using 400-CPS vibrators, Airpax custom designs and manufactures compact low-power inverters. By way of example, Type 512 is hermetically sealed, weighs 14 ounces, occupies 7.5 cubic inches, withstands accelerations of more than 50 G, and has an efficiency of 75%. Its output is essentially a square wave, 15 watts at 110 RMS volts, 400 CPS. Input is 6, 12 or 24 DC volts.

**Pulse Transformers**—For preferred blocking oscillator circuits, use Airpax Pulsite transformers. These compact, hermetically sealed units are available as a kit covering many requirements of pulse circuits.

#### Characteristics of Pulsite Transformers

Pulse Width (usec)	Loc (mh)	L1 (uh)	Cd (uuf)	Type
0.1	0.08	6	7	PT-1081
0.2	0.13	14	7	PT-1082
0.3	0.30	25	8	PT-1083
0.5	0.80	30	8	PT-1084
1.0	2.4	35	9	PT-1085
2.0	7.8	125	10	PT-1086
5.0	28	400	10	PT-1087
10.0	153	1,000	12	PT-1088

**Custom Transformers**—Airpax designs and manufactures custom transformers. The largest Fosterite facility in the country is at Airpax; units 3 x 3 x 4 feet can be baked and vacuum impregnated, or large batches of small units can be processed quickly. In addition to vacuum impregnated and molded units for airborne equipment, Airpax manufactures hermetically sealed MIL-T-27A units. Airpax has supplied transformers in quantity for operation in ambients to 175 C.

**Sheet Metal Facilities**—A complete machine and sheet metal shop complements the transformer production. The shop has sufficient capacity to fabricate custom metal parts, such as chassis and cases.

**DESIGNERS**      **AIRPAX**      **PRODUCTS COMPANY**      **ENGINEERS**

**BALTIMORE 20, MD. • CAMBRIDGE, MD.**  
**FORT LAUDERDALE, FLA.**

*Thorough testing and inspection assure you that these Airpax components meet critical requirements for control and guidance.*

**Magnetic Amplifiers**—Ferrac magnetic amplifiers are highly stable and linear DC amplifiers. You can use them in analog computer portions of guidance and control equipment. Several types are available to meet usual applications. Each amplifier has two input windings; output is electrically isolated from input and power supply. At stand-by, amplifier draws about 1.5 watts; with full signal, 2.5 watts at 115 RMS volts, 400 CPS.

#### Instrument Magnetic Amplifiers

Application	Plug-In Type	Bolt-Down Type
General Purpose	M-943	M-5174
Integrator	M-1039	M-5175
Thermocouple	M-1040	M-5176
High Gain	M-1057	M-5177

**Synchronous Demodulators**—So that 400-CPS synchros can be used with DC control circuits, Airpax developed highly accurate ring rectifiers.

Type D-5170 has a highly accurate null for use in zero-seeking equipments. A null accuracy (exclusive of the synchro) of 9 minutes can be obtained with it.

Type D-5171 has a wider linear range for proportional control equipments. It presents about 20,000 ohms to the control transformer.

**Servo Amplifiers**—Airpax magnetic power amplifiers control current to both phases of 400-CPS instrument servo motors. As a result, they draw little stand-by power. This characteristic results in up to 60% saving in stand-by power, compared with some other servo amplifiers. Standard units deliver 3.5, 6, or 10 watts per phase.

#### Typical Ratings, Type M-5178

- Input**—Two identical control windings of about 125 DC ohms each
- Sensitivity**—7.5 DC milliamperes into either control winding produces 6 watts output to each phase
- Power**—115 to 150 RMS volts at 400 CPS, approximately 21 watts at maximum output, only 3 watts during stand-by
- Connections**—Octal plug-in base, hermetically sealed
- Dimensions (Max.)**—1 1/8" square base, 3" seated height
- Weight**—Approximately 14 ounces

**Frequency Detectors**—Magmeter frequency detectors convert AC signals to DC outputs. The output is linearly

proportional to input frequency. These detectors are relatively insensitive to changes in signal amplitude and wave shape. They are used in telemetering, tachometers, and for pulse-rate measurement. Standard Magmeter detectors require about 1 watt of signal input. They can be driven directly from 120-volt power lines, from vacuum tubes or transistors. Plug-in units fit octal sockets; bolt-down units have solder lugs.

#### Magmeter Frequency Detector

Frequency (CPS)	Line or Tube Drive		Transistor Drive Plug-In
	Plug-In	Bolt-Down	
0-50	F-945	F-5121	F-5156
0-100	F-979	F-5122	F-5157
0-200	(F-979)	F-5123	F-5158
375-425	F-992	F-5133	
0-500	F-5146	F-5124	F-5159
0-1000	F-980	F-5125	F-5160
0-2000	F-981	F-5126	F-5161
0-5000	F-947	F-5127	F-5162

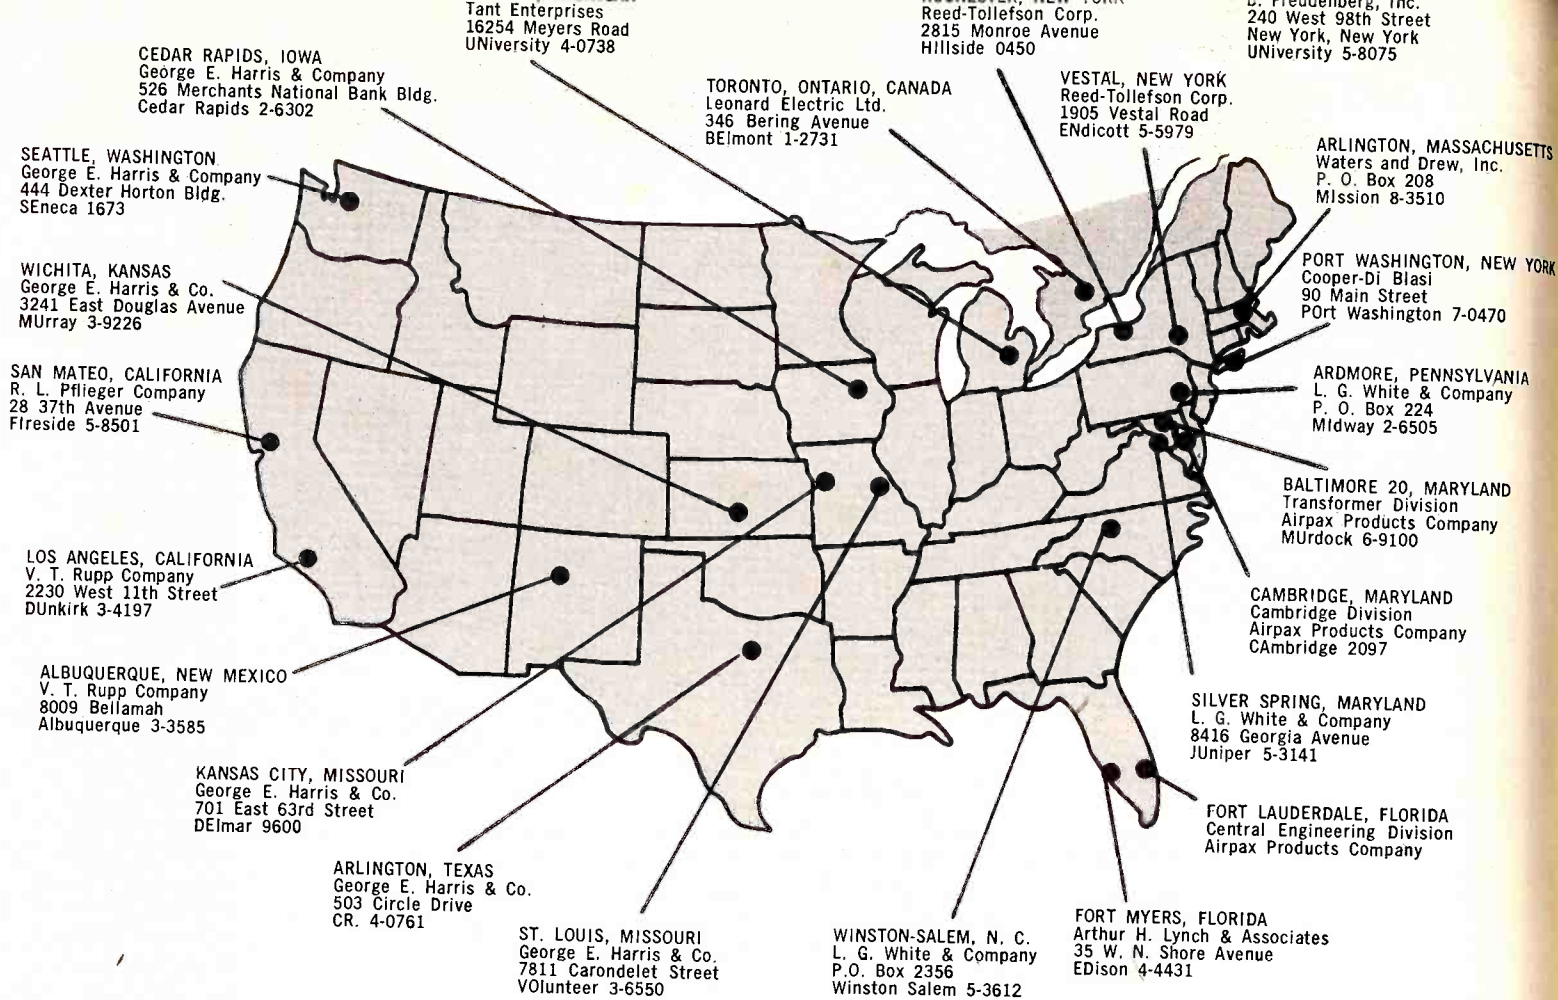

**Circuit Breakers**—Electronic circuits can be protected by Airpax miniature magnetic time delay circuit breakers. Trip level is unaffected by temperature. Units are rated up to 50 DC volts or up to 120 RMS volts; the latter either for 60 or for 400 CPS. Trip sensitivities are as low as 50 milliamperes; current ratings are available up to 10 amperes. There are two standard time delays: Rapid response A for protecting conventional electronic equipments, and slow response B for equipments that draw substantial starting surges.

#### Miniature Circuit Breakers

Rating	Series Type	Shunt Type	Relay Type
50 DC volts	401-	402-	403-
120 RMS volts at 60 CPS	410-	411-	412-
120 RMS volts at 400 CPS	420-	421-	422-

ACTUAL SIZE

Modern Design from MICAMOLD...

**Mecaps**

the only **MOLDED**  
radial lead mica  
capacitors

Now, only from MICAMOLD... Mecaps—radial lead Molded, not encased or dipped, mica capacitors, for use in automation, computers, delay lines, printed circuitry, etc.

- Precision size, symmetrical... CONSTANT BODY DIMENSIONS.
- Can be stacked... available taped for mechanical insertion.
- Meets and EXCEEDS MIL C-5A Specifications. Available in "B", "C", "D", "E", and "F" characteristics. Operating temperature from  $-55^{\circ}\text{C}$  to  $125^{\circ}\text{C}$ . Standard temperature range:  $-40^{\circ}\text{C}$  to  $85^{\circ}\text{C}$ .
- This consistently high quality molded mica capacitor at no additional cost over the obsolete dipped types.
- Radial leads available straight or crimped.

The Micamold catalog giving complete specifications,  
available upon request from Dept. C

Micamold pioneered the development, design and manufacture of capacitors —

**Micamold Metal Encased Paper Capacitors**

Hermetically sealed.  
All Military standard types.  
Complete line of oil-filled capacitors for industrial applications.  
AMBIRITE® capacitors... for operation at  $150^{\circ}\text{C}$ .

**Micamold Molded Paper Capacitors**

Hermetically sealed in rectangular cases.  
All Military standard types.  
Commercial line for industrial applications.  
TROPICAPS® molded tubular capacitors for high humidity and total immersion applications.

**Micamold Electrolytic Capacitors**

All Military standard types.  
Commercial line for radio, TV and industrial applications.  
MOTORLYTICS® for capacitor motor starting.  
THERMALYTICS® for operation up to  $100^{\circ}\text{C}$ .  
CHROMOLYTICS® that operate at voltages up to 700 VDC.

**Micamold Molded Mica Capacitors**

Military standard types CM 15 through CM 70.  
High temperature types for operation to  $150^{\circ}\text{C}$ ... AO, AW, AV.

Micamold also manufactures RF Interference Filters, Pulse Networks and Delay Lines.

# before you freeze your

**OAK "EARLY-BIRD" ENGINEERING HELPS YOU GET BETTER COMPONENTS . . . FASTER!**

By calling on Oak engineers early, you take full advantage of their 25 years of specialization in electro-mechanical devices. This intensive background enables them to save you costly re-engineer-

## ELECTRO-MECHANICAL COMPONENTS ENGINEERED AND

### low-current switches

Mounts in a 1" diameter circle

#### NEW . . . Type A Miniature Rotary Switch

Available in three models: 45°, 36°, and 30° throw. Up to 18 contacts. Silicone glass stator insulation; KEL-F® rotor insulation.

ROTARY SWITCHES

PUSHBUTTON SWITCHES

PRINTED CIRCUIT SWITCHES

ROTARY SLIDER SWITCHES

LEVER OPERATED SWITCHES

MULTIPLE SHAFT SWITCHES

The above switches represent but seven of the hundreds of basic Oak designs—already tooled for fast production. Custom variation of these designs provides a source of special switches in almost *infinite variety*. Excellence of design plus highest quality materials make Oak switches the best you can buy. Standard insulation is phenolic, steatite, and Mycalex; contacts, silver-plated spring brass or spring silver alloy.

### choppers

#### NEW!

**Oak Chopper for Missile Applications**

Designed for high shock, high acceleration, high vibration frequencies, and high temperature operation.

#### NEW Type 605 Chopper Eliminates Phase-Shift Circuit

Has 0° (or 180°) phase-lag "designed-in." Available with side or vertical flange mounts, flattened pierced pins, solder loops, or standard socket pins.

#### NC 600 Series of Oak Choppers

Available for frequencies from 15 to 600 cycles. Operates up to 125°C. High contact rating. Exceptional stability. Low voltage starting.

### VIBRATORS

**Custom-Designed and Custom-Built**

Basic Oak designs cover practically any application. The V6000 Series is a versatile, general purpose vibrator. Type 94 is designed primarily for auto radios. Type 95 is a small, medium power shunt drive interrupter. The MV Series is designed for portable radios and similar applications. All can be supplied for military needs.

# design...call on OAK engineers!

ing time. Even on seemingly simple components, Oak engineers have been able to make valuable suggestions that resulted in better performance and lower costs. Combine this thorough engineering with Oak's manufacturing skills and facilities, and you can feel assured of getting the *exact* component you need . . . and in a lot less time.

Write on company letterhead for a copy of the Oak Switch Catalog...

...or the Oak Rotary Solenoid Bulletin.

## MANUFACTURED TO YOUR EXACT REQUIREMENTS!

**remote-controlled switches**

**special sub-assemblies**

SERVO-SELECTOR BUILT FOR RADIO CORPORATION OF AMERICA

MT273E MOUNTING BASE BUILT FOR BENDIX RADIO DIVISION

### Thousands of Combinations

Oak remote-controlled switches are custom combinations of Oak rotary solenoids\* and the many types of Oak rotary switches. They are unusually reliable, giving a positive stepping action even under conditions of shock and vibration. Ideal for mobile and military equipment.

\*Mfd. under license from G. H. LELAND, INC.

### One Responsibility . . . One Source

Turn your prototype over to Oak engineers. They will analyze it, test it, redesign for optimum performance, and convert it into a manufacturable device. Oak's modern production facilities then build your subassembly, and run any life and environment tests which may be required.

**rotary solenoids\***

Supplied alone, with Switch Sections, or in Complete Subassemblies as shown above.

\*Mfd. under license from G. H. LELAND, INC.

Oak rotary solenoids are ideal actuators for remote control of complex circuits under the severe conditions of MIL-S-4040A and similar specifications. They are compact, rugged and extremely adaptable.

# PRECISION INSTRUMENTS FOR YOUR MEASUREMENT PROBLEMS

**• QUALITY • ACCURACY • RELIABILITY****VARIABLE ELECTRONIC FILTERS: SERIES 300****MODEL 302****MODEL 300**

FUNCTION		High or Low Pass Band Pass or Reject	High or Low Pass
Cut-off Freq. Range		20 cps to 200 kc	20 cps to 200 kc
Attenuation Rate	Per Section	18 db/octave	18 db/octave
	Max.	36 db/octave	18 db/octave
PASS BAND		2 cps to 4 mc	2 cps to 4 mc
DIAL ACCURACY		± 3% to 20 kc ± 5% above 20 kc	± 3% to 20 kc ± 5% above 20 kc
INSERTION LOSS		0 ± 1 db	0 ± 1 db
NOISE LEVEL		60 microvolts	60 microvolts

... For elimination of unwanted signals in your data

... For studies in vibration, dynamics, telemetering, acoustic noise and speech

... Continuously variable pass band permits clean recordings of only the data you want

... As well as selection of discrete frequencies when recording or analyzing data

The Series 300 Variable Electronic Filters were developed to meet the problems of inflexibility and expense inherent in conventional multi-frequency filters. Where the fixed filter made for a specific application becomes useless for any other need, the SKL Variable Electronic Filter serves to fulfill broad and diversified laboratory requirements.

Continuous range of cutoff frequency and ability to produce band-pass and band-rejection characteristics with *independent* control of the upper and lower cutoff frequencies are invaluable.

**WIDE-BAND CHAIN AMPLIFIERS: SERIES 200**

for every application

**NEW****MODEL 206**

The 9 in 1 amplifier providing any combination of:

Gaussian, flat or sloping response curve

Linear, pulse or high level pulse output mode

MODEL	BANDWIDTH	GAIN	OUTPUT	IMPEDANCE	
				INPUT	OUTPUT
214B	200 cps—90 mc	30 db	125 v, pulse	180	5000
211	15 mc—110 mc	33 db	4 v, rms	50	50
202D	1 kc—210 mc	20 db	4 v, rms	200	200
212C-TV	54 mc—216 mc	20 db	3 v, peak	50 or 75	50 or 75
206	600 cps to 320 mc	18 db to 24 db	(1) 6 v, rms (2) 60 v, pulse (3) 125 v, pulse	180	200

**SKL LABORATORIES, INC.**  
1320 SOLDIERS FIELD ROAD  
BOSTON 35, MASS.

**WIDE-BAND TELEVISION DISTRIBUTION SYSTEM:**  
SKL manufactures complete TV distribution systems for community, apartment house and industrial use. Details upon request.

**FAST-RISE PULSE GENERATOR****THE Standard for  
Millimicrosecond Pulses**

Model 503 is ideal for testing the transient response of wide band amplifiers and semiconductors. Higher voltage pulses are available through use of an external power supply.

Rise time:	Less than 1 millimicrosecond
Amplitude:	0 to 150 volts
Repetition Rate:	50 to 120 cps
Pulse Width:	.06 x 10 <sup>-10</sup> Sec., Minimum Determined by Length of Width Cable. Max. Width not Restricted. .05 x 10 <sup>-9</sup> Sec., Factory Supplied
Polarity:	Either Positive or Negative
Load Impedance:	50 ohms

# CRUCIBLE PERMANENT MAGNETS

**CRUCIBLE  
PERMANENT  
MAGNETS  
PROVIDE  
CONSISTENTLY  
HIGHER  
ENERGY  
PRODUCT**

Most Crucible Permanent Magnets are produced to custom specifications. They're sand cast, shell molded or investment cast in any shape, tolerance and finish needed . . . in any size from a fraction of an ounce to several hundred pounds.

However, Crucible does stock, for immediate delivery, permanent magnets in the shapes and sizes most frequently needed for both pilot and full-scale production. These standard items, with their physical and magnetic properties, are listed below.

In each case the sub-grade bearing the letter "B" is the standard for that grade. Thus Alnico VB is standard Alnico V. The other sub-grades are modifications of the standard grade to produce special magnetic characteristics. For additional technical information, call your nearest Crucible representative. Crucible Steel Company of America, Henry W. Oliver Building, Pittsburgh 22, Pa.

# DELAY LINES

**standard or specially designed**

# BY TECHNITROL

These extra-compact delay lines assure a minimum of pulse distortion with maximum stability under ambient temperatures . . . and in a minimum of space. They can be had pencil-thin in plug-in, pig tail or fuse-clip mounting. Available cased or dip-coated in epoxy resin as well as hermetically-sealed units for military application . . . with any desired characteristics of impedance or frequency response. Typical are:

- Delay: 0.01 to 6  $\mu$ s
- Characteristic Impedance: 400 to 5600 ohms
- Band Pass Characteristics: Unique windings furnish maximum band width for given delay per inch.

We are prepared to design lumped constant or distributed constant delay lines for your particular circuit applications.

with

## POWER

### motors

Sub-fractional and fractional motors in the induction and hysteresis—reluctance synchronous types with associated gear reductions. Available in 50, 60 and 400 cycles, single, dual and variable frequency; also dual voltage. For single, two and three phase operation. Horsepower from 1/3500 to 1/2. Diameter from 1" to 6 5/8".

### alternators

From 1" diameter to 6 5/8" diameter. Power up to 1000 VA. Wide frequency range, low harmonic content—delivers sine wave with 2% or less total distortion. Single, dual (sine-cosine) and three phase. For special applications, dual frequency units produce a combination of frequencies.

### blowers & fans

A complete line of light weight centrifugal blowers, ring mounted fans and vane axial fans for cooling electronic equipment and for general purpose use. Capacities up to 1000 cfm with special designs available for high static pressures. Single and double ended; 50, 60 and 400 cycle and variable frequencies (360-1600 cycles).

with

## PRECISION

### servo motors

As the basic actuating device in AC automatic control systems, EAD's high performance servo motors are designed to meet exacting requirements for good dynamic response, reliability in extreme environments, electrical efficiency and ready availability. EAD offers a range of frame sizes beginning with the utmost in miniaturization. Variations include special lead locations, voltage and power ratings aimed at transistor operation, precision gear heads and adaptation to unusual environmental conditions to 150° C.

### tachometer generators

Widely used in automatic control systems, EAD's line of precision tachometers have the stability and performance characteristics for application as integrator units in analog computers, as damping tachometers in positioning control systems and for direct speed control. Integrating units include temperature compensations for high accuracy. Special voltages and scale factors and different compensations may be provided to suit individual requirements.

PERFORMANCE, PRECISION, PRICE—GET ALL THREE AT EAD

**EASTERN AIR DEVICES, INC.,** 387 CENTRAL AVENUE, DOVER, NEW HAMPSHIRE

**DEOXO® PURIDRYER** produces extremely pure, dry hydrogen with a dew-point of better than  $-100^{\circ}\text{F}$ , with no inert gas purging necessary.

**RHODIUM PLATING** provides a hard, brilliant white, non-tarnishable surface extremely resistant to corrosive conditions.

**DEOXO® PURIFIER** provides low-cost purification of hydrogen and other gases to the extent of less than one part oxygen per million.

**PRECIOUS METAL RUPTURE DISCS** resist corrosion and provide adequate openings to protect and relieve pressurized apparatus.

## important for the electronic industry

**NITRONEAL® GAS GENERATOR** economically and safely provides fully automatic furnace brazing and bright annealing of stainless steel.

**SUPER-SENSITIVE DEOXO® INDICATOR** measures the faintest traces of oxygen or hydrogen present as impurities in other gases.

**PRECIOUS METAL CONTACTS** resist chemical attack and effects of the electrical arc to provide long life, unvarying performance.

**FINE WIRE** of ductile and non-ductile material meets the expanding requirements of industry with highest quality.

Write for complete catalog material and details.

More Watts per Dollar  
with the NEW High-Power

# type W50 Variacs®

- New Designs • Ratings up 25%
- DURATRAK Brush Track  
for First Time in High-Power Models
- Lower Losses • Smaller • Lighter
- 5 KVA to 26 KVA Ratings • Lowered Costs
- UL Approved • Optional Ball Bearings and Motor Drives

The newly designed Types W50 and W50H VARIAC Series replaces the popular Types 50A and 50B with many electrical and mechanical improvements.

Current ratings for the new 115-volt and 230-volt models are 50 and 25 amperes, against 40 and 20 for the older types. A built-in protector prevents damage from *sustained* overloads exceeding 160% of rating. This extra safety feature is available when the normal load fusing or breaker is inoperative.

The basic design of the new Type W50 Variacs is along the lines of the other new "W" models in the smaller sizes. Mounting holes and layouts are the same as the old Type 50 for ready interchangeability.

**Type W50H**  
Variac 230-Volt Input,  
7.5 KVA, 32.5 Amp. Max. Current.

Type W50 similar except for number of terminals and dial. 115-Volt Input, 5.75 KVA, 50 Amp. Max. Current.

Type 50H VARIACS are equipped with 7 combination screw-solder terminals. Can be used on either 230- or 115-volt lines. Type W50's have 5 terminals. Note engraved wiring diagram on terminal board, showing voltage between terminals.

Banked winding is of #7 or #11 AWG wire! Duratrak brush track (for the first time in these high-power VARIACS) is on face of toroidal winding.

Six brushes in multiple, pigtail-equipped brush holders, readily removed for servicing or replacement — copper radiator nose and brush holder conducts current and heat to painted radiator, for maximum heat dissipation.

Wall-mounted Type W50M. Four 1/2" conduit knockouts provided for convenience in wiring. Four bolts through corners of base and case attach W50's to wall or panel — 2 screws in top hold cover firmly in place — captive radiator permits shaft to be extended either way for panel or wall mounting without upsetting radiator and brush settings. Note accessibility of terminal board for easy wiring.

**Type W50G2**  
two-gang Type W50;

Type	Dimension A
W50G2M	14 1/2
W50G3M	21 1/2

**Motor Drives** are available for all Type W50 Variacs. ALL motor-driven units include motor capacitor, adjustable-position microswitches to limit the arc of traverse to any desired position, and ball bearings.

ADDITIONAL prices for equipping any Type W50 VARIAC with motor drive (including the necessary ball bearings) are:

- All single units — \$140.00
- All two-gang units — \$130.00
- All three-gang units — \$135.00

For motor drives, a set-up charge of \$12.00 is prorated for quantity from 1 to 4. No set-up charge is made for quantities of 5 or more.

Traverse times available, in seconds, are 16, 32, 64 or 128 for single units; 32, 64 or 128 seconds for 2- and 3-gang units.

For type number terminology when ordering see page 5 of the current VARIAC BULLETIN "O". It is not necessary to add "BB" to the type number as all motor-driven VARIACS are equipped with ball bearings.

## Iron and Iron Oxide Powders for the Electronics Industry

### IRON MAGNETIC IRON POWDERS—

Hydrogen reduced magnetic iron powders of high purity are available in 8 different grades for high-frequency cores, core material, tele-communication, and magnetic applications.

### IRON MAGNETIC IRON OXIDES—

Magnetic iron oxides, both the black and brown types, are produced in several grades for magnetic recording devices—sound recording, memory drums, film stripping, etc.

### PURE FERRIC OXIDES—

Synthetic red iron oxides of high chemical purity are available in wide range of particle sizes for the manufacture of all types of ferrites.

## STEMCO® THERMOSTATS

give you more of what you want most

**FEATURES** such as snap or positive-action . . . various terminal arrangements or mounting provisions . . . different temperature ranges—there's a *standard* type Stemco thermostat for your *special* needs. That means you cut down on lead time, research and development costs, tooling and production inventory. Specify Stemco and you get *better thermostats, faster and for less* than you can make them or buy them elsewhere.

**SIZE** and weight are particularly important in avionic and electronic applications. And here Stemco thermostats score, too. Their compactness and lightness give a better product without sacrificing performance.

**ECONOMY** of mass production of many standard Stemco types with literally hundreds of terminal arrangements and mounting provisions means your product costs less to make.

**AVAILABILITY** of most types is good. Design is flexible for your special applications, tooling is in existence for short-term delivery. If heat control is your problem, Stemco thermostats can provide the answer.

AA-4092

\*Refer to Guide 400 EO for U.L. and C.S.A. approved ratings.

**STEVENS** manufacturing company, inc.  
Lexington and Mansfield, Ohio

TYPE A\*  
Semi-enclosed

Electrically independent bimetal disc with fast response and snap-action control. Operation from  $-10^{\circ}$  to  $+300^{\circ}$ F. Various enclosures and mountings, including brackets, available. For appliance, electronic, apparatus applications. Request Bulletin 3000.

TYPE A\*  
Hermetically sealed

Electrically identical to semi-enclosed Type A. Temperatures from  $-10^{\circ}$  to  $300^{\circ}$ F. Various enclosures and mountings, including brackets, available. For appliance, electronic, apparatus applications. Request Bulletin 3000.

TYPE C  
Hermetically sealed

Electrically identical to semi-enclosed Type C but sealed in crystal can. Also supplied as double thermostat "alarm" type. Turret terminals or wire leads. Request Bulletin 5000.

TYPE C  
Semi-enclosed

Small, positive-acting. Electrically independent bimetal strip for operation from  $-10^{\circ}$  to  $300^{\circ}$ F. Rated at approximately 3 amps, depending on application. Terminals and mountings to customer specifications. See Bulletin 5000.

TYPE M\*  
Semi-enclosed

Electrically independent bimetal disc type for appliance and electronic applications from  $-10^{\circ}$  to  $350^{\circ}$ F. Rating: 8 amps at 115 volts AC, 4 amps at 230 volts AC and 28 volts DC. Virtually any type terminal. Bulletin 6000.

TYPE M\*  
Hermetically sealed

Electrically same as semi-enclosed Type M. Can be furnished with pin or solder-type terminals, wire leads and various mounting brackets. Write for Bulletin 6000.

 Davenport 3-0013 TWX Palo Alto 52

# Arnold Magnetic Materials

**ARNOLD** magnetic materials can answer all your requirements. It is the most complete line in the industry; and in addition, Arnold maintains complete control over every production step

from raw materials to finished products. Such a source can bring you advantages in long experience and undivided responsibility, and in unequalled facilities for quality production and control.

• *Let us supply your needs.*

C and E cut cores, tape wound cores, and bobbin cores.

Mo-Permalloy powder cores.

Iron powder cores.

## TYPES "C" AND "E" CUT CORES

Available in more than 500 standard sizes and almost any special size, Arnold "C" and "E" Cores are made from precision-rolled Silectron strip (highly oriented silicon steel) in 1, 2, 4 or 12-mil thicknesses and a wide variety of window sizes and core areas, for high and low-frequency applications. Sizes range from a fraction of an ounce to hundreds of pounds.

Write for Bulletin SC-107

Insulated strip of the proper width is wound on a mandrel, then heat treated, bonded and cut into halves. Careful control results in accurately dimensioned and matched core halves whose effective air gap at the butt joint is very small. Rigid standard tests are employed for both "C" and "E" types of cores, and special tests where required.

## TAPE WOUND CORES

Depending upon the specific properties required, Arnold Tape Wound Cores are available made of Deltamax, 4-79 Mo-Permalloy, Supermalloy, Mumetal, 4750 Electrical Metal, or Silectron . . . in standard tape thicknesses of 1, 2, 4 or 12-mils, and in ultra-thin gauges of 1/2 and 1/4-mil where required.

Write for Bulletin TC-101A

This gapless type of core construction results in maximum effective working permeability with minimum flux leakage. Practically any size core can be supplied, from a fraction of a gram to hundreds of pounds. Toroidal cores are made in 30 standard sizes with protective nylon or aluminum cases. Special sizes of toroidal cores, and all square or rectangular tape wound cores, are produced to individual requirements.

## BOBBIN CORES

These cores, fabricated by winding ultra-thin tape of high-permeability magnetic materials on ceramic bobbin cores, possess ideal qualities for use in electronic computer assemblies. Their desirable properties include quite rectangular hysteresis loops, relatively low coercive values and high saturation densities; plus temperature stability and the ability to shift in a few microseconds from negative remanence to positive saturation, and vice versa, under conditions of pulse excitation.

Write for Bulletin TC-108

Arnold Bobbin Cores are available in a wide range of sizes, tape thicknesses, widths and number of wraps to suit the ultimate use of the core. Magnetic materials usually employed are Deltamax, Square Permalloy and Supermalloy, in standard thicknesses of 1, 1/2, 1/4 and 1/8 mil. Special advantages derive from Arnold's position as a fully-integrated producer of wound cores, able to maintain precise control over every production operation . . . melting, rolling, winding, testing, etc.

## MO-PERMALLOY POWDER CORES

These toroids provide high Q in a small volume, characterized by low eddy current and hysteresis losses.

Write for Bulletin PC-104B

Arnold Mo-Permalloy powder cores are supplied in four standard permeabilities: 125, 60, 26 and 14 Mu. They provide constant permeability over a wide range of flux density. The 125 Mu cores are recommended for use up to 15 kc; the 60 Mu at 10 to 50 kc; the 26 Mu at 30 to 75 kc; and the 14 Mu at 50 to 200 kc. Many of these cores may be furnished stabilized to provide constant permeability ( $\pm 0.1\%$ ) over a specific temperature range.

Arnold Mo-Permalloy powder toroids are available in a wide range of sizes, to obtain nominal inductances as high as 281 mh/1000 turns. They are given various types of enamel and varnish finishes, some of which permit winding with heavy Formex insulated wire without supplementary insulation over the core.

## IRON POWDER CORES

Arnold quality control of iron powder cores includes the maintaining of rigid electrical, physical and dimensional specifications unmatched in the industry. A wide selection of cores is available, from simple cylinders to special cores of complicated design. The line includes all standard types and sizes of threaded cores, cup, sleeve, slug and cylindrical insert cores: for use in antenna and RF coils, oscillator coils, IF coils, perm tuning, FM coils, television RF coils, noise filter coils, induction heating and bombardier coils, and other low frequency applications. A standard series of iron powder toroids is also manufactured, conforming to the standard sizes proposed by the Metal Powder Association.

Write for Bulletin PC-109

# The most complete line in the industry ...made by a fully integrated producer

Sendust powder cores.

Various types and sizes of sintered Alnico magnets.

A wide variety of cast Alnico magnets.

## SENDUST POWDER CORES

Write for Bulletin SDC-110

## SPECIAL MAGNETIC MATERIALS

Write for Bulletin GC-106B

Sendust Powder Cores are available in a wide selection of sizes, ranging from .800" O.D. to 3.346" O.D., and in permeabilities of 10, 13, 25, 50, 50 and 80, although not all sizes are available in all permeabilities.

Sendust cores possess magnetic properties that are generally superior to iron powder cores, but inferior to Mo-Permalloy powder cores in the audio and carrier frequency range. The eddy current loss for Sendust cores is lower than that of Mo-Permalloy powder cores, but the hysteresis loss of Sendust cores is substantially higher, and they also have higher values of electrical resistivity. In other characteristics of powder cores, the two types are somewhat similar, but Sendust cores contain no scarce or strategic materials and can offer a core source in times of alloy shortage.

## ALNICO MAGNETS—Cast and Sintered

Arnold manufactures permanent magnets from all grades of Alnico, although Alnico V is usually the preferred type due to the high value of energy product of that alloy. Alnico magnets are quite hard and somewhat brittle and may be machined only by grinding. Most sizes and shapes are manufactured as sand castings and are made to the customer's drawings and specifications. Some types and shapes of Alnico Magnets are carried as stock items.

Some small sizes of magnets may be furnished in sintered Alnico, and a wide range of shapes are carried in stock for quick delivery. Special shapes made in this way, however, require rather expensive dies.

*Vicalloy* is a permanent magnet alloy containing about 10% vanadium, 50% cobalt and the balance iron. It may be fabricated in the form of castings, hot rolled bars and forgings or cold rolled strip, wire and tubing. After suitable heat treatment, the material is quite readily machinable. The alloy finds its greatest usefulness in the form of forged rotors, stamped parts and special recording tape. The coercive force,  $H_c$ , is about 250 oersteds, the residual induction,  $B_r$ , is about 7500 gauss and the energy product,  $(BH)_{max}$ , is about  $0.8 \times 10^6$ .

*Supermendur* is a new material composed of about 2% vanadium, 49% iron and 49% cobalt. It work hardens slowly and can be rolled from .090" to less than .001" without intermediate softening treatments. Even after severe cold reduction, it remains ductile and can be bent back upon itself without fracture. Experimental cores measured at room temperature showed a coercive force,  $H_c$ , of 0.26 oersted, a residual induction,  $B_r$ , of 21,000 gauss, and a maximum permeability,  $\mu$ , of 66,000 at 20,000 gauss. Presently, it appears to be best suited for such applications as power transformers, pulse transformers, magnetic amplifiers, telephone receiver diaphragms, and switching and memory devices.

*Cunife* is a permanent magnet alloy of copper, nickel and iron which is malleable, ductile and machinable, even after it has been age hardened. The magnetic properties of Cunife are developed by cold working and are directional, with the best magnetic properties found only in the smaller sizes of rods or wires.

An incremental synchro positioner before wiring to header and hermetic sealing. The synchro rotor is stepped in one or fifteen degree increments clockwise or counter-clockwise depending upon which of four coils is momentarily energized by a d-c pulse. The synchro can be rotated any number of degrees or revolutions. Cylindrical member next to the synchro resets it to electrical zero if a pulse is applied to "reset" circuit.

Type 9 motor-driven induction generator driving two Type 11CT synchros through gear train having ratio of 1500:1. Slip clutch permits one control transformer to operate when second control transformer has shaft restrained by stops. Cams close two switches during specified degrees of synchro rotation.

SERVO ASSEMBLY—Type 9 motor-driven induction generator driving a Type 11 synchro through a gear train having a ratio of 12,000:1. Rear shaft of synchro carries contact arm which restricts shaft rotation against adjustable stops and closes switch during the specified arc.

**control  
problems  
like  
yours**

**...with but one solution**

Typical of all Transicoil solutions are the three illustrated here. They "do the job right" because each is designed for a single application... by a company whose major function is to provide complete servo assemblies precisely engineered and manufactured to solve individual servo control problems.

Of course, if you want servo *components*, you'll find Transicoil's control motors, motor-gear train combinations, motor-gear train-generator combinations, and servo amplifiers built to the highest order of precision and accuracy. But it is in the "package" engineering of unique assemblies that Transicoil's experience and creative imagination offer the greatest value. And in most cases, these assemblies cost no more than the individual components would purchased separately. *That's why it pays to check your servo control problems out with Transicoil first.* For further information, call your nearest Transicoil representative.

**looking for miniaturization?**

If you have a problem in miniaturization of a control system, chances are Transicoil can solve it for you. For just as Transicoil's introduction of plate-to-plate wiring eliminated the transformers once necessary in servo systems, the company is now marking new milestones in system miniaturization with its new Size 8 motors, motor-

driven induction generators, and transistor amplifiers. This engineering ability can be put to work on your projects—with no obligation. You pay only for results—on a fixed fee basis for equipment delivered and performing properly. Transicoil is a manufacturer, not a research and development organization.

## GLASS-METAL HEADERS For Every Electronic Use

The prime source for variety in sizes, terminations and shapes; quality; performance—at thoroughly acceptable cost to you. Special terminals for any purpose. In VAC-TITE\* Compression Seals as well as conventional kovar designs.

\*VAC-TITE is HERMETIC's vacuum-proof, compression-construction, glass to metal seal. In addition to special shapes, many standard sizes such as .800 O.D. and .900 O.D. multi-terminal headers and a large variety of individual terminals are available in VAC-TITE Compression Seals.

**SIGNAL GENERATOR**  
SG-153 1800-4000 mc

1800-4000 MC  $\pm 1\%$ , continuous. Multipurpose lab. and production precision signal source, pulse mod., internal and external mod. provisions, line Freq. FM, complete sync IN and OUT provisions. Output +4 to -130 dbm, continuously variable.

**HV INSULATION TESTER**  
T-4

0 to 15 KVDC output, continuously variable, meter for voltage and leakage current; SAFE: NON-DESTRUCTIVE TESTS — 150 ua max. test current. No capacitive errors. Tests ignition harnesses, components, transformers etc.

**SIGNAL GENERATOR**  
SG-161 900-2100 mc

900-2100 MC  $\pm 1\%$  continuous. Multipurpose lab. and production precision signal source, pulse mod. internal and external mod. provisions. Complete sync IN and OUT facilities. Output +4 to -130 dbm, continuously variable.

**Q-PROBE**  
3-40 mc Circuit Probe

Low-cost oscilloscope attachment for RF scope displays 3 to above 30 MC, continuously variable, high sensitivity; sync output locks scope sweep. Views RF signals; checks two-tone patterns. SSB carrier nulls, filters, RF squegging, parasitics, overall Xmitter mod. characteristics.

**SWEEP GENERATOR**  
SG-132 15-400 mc

Precision Sweep and CW, 15 to 400 MC, .01% CW accuracy WIDE deviation, 40% OF ANY CENTER FREQUENCY. Integral dc scope, crystal markers. Output flatness 0.25 db; 400 cps internal AM to 50%; extreme sweep linearity, -4 to -130 dbm output, continuously variable.

**SIGNAL GENERATOR**  
SG-109 400-1000 mc

400 to 1000 MC  $\pm 1\%$  Multipurpose lab. and production precision signal source; continuous pulse and amplitude mod., internal and external mod. provisions; complete sync IN and OUT facilities. Output +4 to -130 dbm continuously variable.

**CAVITY OSCILLATOR ASSY.**  
2-4 KMC

2 to 4 KMC  $\pm 1\%$  continuous tuning Klystron coax. cavity assy; +6 to -130 dbm output, piston attenuator; complete level monitoring facilities. For inclusion in new equipment or test equipment. Modifications available to customers specifications.

**MULTISPEED AIRCRAFT ACTUATOR T-113**

Rotary actuator assembly including solenoid speedshift for high-torque applications. Typical of Transitron-developed special electromechanical devices incorporating motor and gear drives. Extensive engineering and production facilities for design and manufacture to customers specs. available.

**OSCILLATOR CAVITY ASSY.**  
1-2 KMC

1 to 2 KMC  $\pm 1\%$  continuously tuning Klystron coax. cavity assembly; +3 to -130 dbm output; piston attenuator, level monitoring meter and bolometer facilities. For additions to or inclusion in new or test equipment. May be modified to customer's specifications.

**T/R SWITCHES**  
Models 2000 & 3000

TRANSMIT-RECEIVE Switches, 1 KW max. power, 3 to 30 MC, no tuning adjustments, no RF relays; Low VSWR; insertion loss less than 1 S-unit; no TVI; Model 2000 has integral receiver muting relay. Low cost, high efficiency. Widely used in communications and amateur equipment.

**TRANSDUCER**  
TD 132

High precision reciprocating mechanism. Driver unit for precision sweep mechanisms, FM cavity oscillators, magnetron sweeping etc., 20 to 30 cycle input; up to 1/2 in. peak-peak deflection, 0.5 lb. loading approximately. COMPLETELY BALANCED dynamically — No vibration. No susceptibility to external shock and vibration.

**VHF ACCESSORIES**

Complete line of VHF terminations, detectors, attenuators, probes, impedance matching pads; operating range to 500 MC with low VSWR; BNC connectors. For use with all HF and VHF 50 and 75 ohm signal and sweep generators.

# Laminated Contact Materials

INDUSTRIAL DIVISION  
**LEACH & GARNER CO.**

All industrial mill forms of precious and non ferrous contact materials — solid or laminated — custom made to exact specifications. All standard and many special alloys of gold, silver, platinum and palladium.

Standard laminated forms include toplay, overlay, inlay, thrulay and edgelay. Solid Coin Silver Waveguide Tubing. Custom Rerolling and redrawing.

Precision fabrications and assemblies of precious metals include slip rings, micro brushes, contact rivets, buttons, spring contacts and bar contacts.

Complete engineering and tooling facilities for custom manufacturing from sample quantities to large production runs. Prompt quotations and recommendations in answer to inquiries.

When you think of

# SILVER

Think of Handy & Harman  
Because . . .

- Handy & Harman is the leading manufacturer of silver and silver alloys for industry.
- During 90 years in precious metals, Handy & Harman has helped develop many of the uses of silver by industry.
- Experience and research have established Handy & Harman as the Number 1 authority on silver.

This experience and knowledge is at your call. Whatever your silver requirements, Handy & Harman is anxious to be of service.

Here are some of the forms Handy & Harman manufactures:

- Fine Silver (wire, strip and foil)
- Silver anodes and grain for plating
- Silver contact alloys
- Silver powders
- Silver flakes and paints
- Silver brazing alloys
- Silver electronic solders
- Silver sintered metals
- Solder-flushed silver alloys
- Silver chloride and oxide
- Coin Silver (wire and strip)
- Silver Bi-metals

*For your information file*

We have four Technical Bulletins giving engineering data on the properties and forms of Handy & Harman Silver Alloys. We would like you to have any or all of those that particularly interest you. Your request, by number, will receive prompt attention.

# SILVER GRAPHALLOY BRUSHES

Silver GRAPHALLOY Brushes have been widely used because of LOW and CONSTANT CONTACT DROP, EXTREMELY LOW ELECTRICAL NOISE and LONG LIFE... especially for *rotating strain gages, thermocouple circuits, synchros, guided missiles, fire control equipment, transducers, radar and sonar equipment, servo-mechanisms, selsyns, dynamotors and other avionic applications.*

The GRAPHALLOY process was patented over 40 years ago and the name GRAPHALLOY has been our registered trademark since that time. While this company has been selling GRAPHALLOY for over 40 years, recent developments have added materially to its properties. Over 200 grades are now used in a wide variety of applications. Silver GRAPHALLOY Brushes on 1/2" diameter coin silver slip rings have been used successfully in highly critical electrical circuits at speeds up to 100,000 R.P.M. *Our Engineering Department will assist in determining the exact grade of GRAPHALLOY for your needs. Ask for our Brush Inquiry Form 109.*

## BRUSH and SPRING ASSEMBLY

Silver GRAPHALLOY Brushes are available for the standard Brush Holders described in the next column. Springs are supplied, as part of the assembly, to give the correct brush pressure for each brush application. Shunts are provided to insure extremely low electrical noise level and for carrying heavy currents.

## SLIP RINGS — SOLID COIN SILVER

Standard Coin Silver Slip Rings, both *cylindrical* and *flat* types, are illustrated below. We recommend the cylindrical type ring with three brushes per ring... spaced at 120°. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type or slip-ring assemblies can be furnished with leads attached.

flat

cylindrical

Standard "Flat" rings have 1/4" radial contact surface and 1/8" radial spacing between adjacent rings.

Part No.	OD	ID	Thickness

Request and fill in Brush Inquiry Sheet, Form 109, so that we can supply the proper grade of brush material.

\*Shunts are provided. \*\*Mounting hole diameter for brush holder dimension D.

DIAGRAM of BRUSH and SLIP-RING ASSEMBLY

## CONNECTORS

These silver-plated coil spring Connectors make for positive electrical connection to the brass body of the brush holder by snapping into the groove in the holder. The connecting lead can be pre-soldered to the Connector.

Garter Spring Connectors	Brush Size	Brush Holder No.
127-9	1/8 sq.	14326
127-9	5/32 sq.	11509
127-10	3/16 sq.	11570
127-14	1/4 sq.	11527

## GRAPHALLOY BUSHINGS

Replace oil-lubricated bushings in synchros, instruments, timers and missiles. *Advantages:* 1) Lower friction at room temperatures. 2) No oil to solidify at low temperatures. 3) No oil to carbonize at prolonged elevated temperatures.

Ask for Data Sheets 270 and 277 on *Miniature Bronze-GRAPHALLOY Bushings.*

## GRAPHALLOY CONTACTS

GRAPHALLOY, because of its inherent, non-welding and arcing characteristics, is used widely for contacts... especially where positive breaking of a circuit is required.

## Model 399 GRAPHALLOY BRUSH and SLIP-RING ASSEMBLY

PEDESTAL-  
MOUNTED

Bolt Slot Distances CL to CL.

Model	Rings	Width	Length	Overall Length**
399-4	4	4 1/2	7 3/4	13 1/4
399-6	6	4 1/2	8 1/2	14
399-10	10	4 1/2	10	15 1/2
399-14	14	4 1/2	11 1/2	17

Width 6 1/2" — Height 6 1/2"  
Shaft CL above base 3 3/4" \*\*To outer end of coupling.

Applications: from strain gage or thermo-couple up to 5 amperes, 125 volts, 250°F. Speeds to 5,000 RPM.

Three Silver-GRAPHALLOY Brushes per solid coin silver slip ring.

Extraneous noise level extremely low. Rugged in design and construction. Readily connected mechanically and electrically.

Complete coupling provided for 1 5/16" shaft. More rings and higher speeds available upon application.

## Model 319 CYLINDRICAL SLIP-RING ASSEMBLY

Solid Coin Silver Rings

Model	Rings	Length
319-4	4	2 7/16
319-6	6	3 5/16
319-10	10	4 1 3/16
319-14	14	6 7/16

Slip ring O.D. 1 5/8". Terminal O.D. 4".  
Assembly I.D.: .814"/.813"  
Range: Same as for Model 399

## Model 409 FLAT SLIP-RING ASSEMBLY

Solid Coin Silver Rings

Model	Rings	Overall O.D. — "A"
409-2	2	5 1/2
409-4	4	7
409-6	6	8 1/2
409-10	10	11 1/2

Hub O.D. 2"; I.D. 1.573"/1.571"; Length 1 1/8"  
To 5 amperes, 125 volts.  
More rings available upon application.

## Model 399C GRAPHALLOY BRUSH and SLIP-RING ASSEMBLY

FLANGE-  
MOUNTED

Bolt Circle for

Model	Rings	Mounting Flange Coupling		Overall Length*
		Flange	Driving Coupling	
399C-4	4	7 3/8	7	13
399C-6	6	7 3/8	7	13 3/4
399C-10	10	7 3/8	7	15 1/4
399C-14	14	7 3/8	7	16 3/4

Case diameter: 6 1/2"  
\*From hemispherical end of case to center of flange coupling.

Details same as for Model 399 except as follows:

Rotor is attached by flange at end of shaft to customer's half of flange coupling.

Stator is attached, by flange ring thereon, to fixed mounting plate supplied by customer; or, if flange mounting is not feasible, flange ring is omitted and stator is restrained from rotation by shock cords attached to lugs on case.

Convenient multi-contact detachable connector for incoming circuits, and another such connector for outgoing circuits.

## Special brush and slip-ring assemblies to meet special requirements

## GRAPHALLOY BRUSHES

are used on  
such equipment as ...

- SERVO SYSTEMS
- SYNCHROS
- SELSYNS
- CHOPPERS
- RADAR
- GYROS
- INVERTERS
- PULSE SYSTEMS
- GUIDED MISSILES
- DIGITAL COMPUTERS
- WAVE GUIDES
- SONAR
- TRANSDUCERS
- TORQUE INDICATORS

AROUND THE

AROUND THE

There's no questioning the quality of special-purpose electron tubes or electrical power equipment when it's made by Bendix Red Bank. The proof is in acceptance—almost universal acceptance. Twenty-four hours a day, in countries around the world, equipment like that shown above is proving that skillful design and expert engineering (plus an almost unmatched quality control system) can build an international reputation for dependable per-

formance. If you can use quality like this, call on us for recommendations. Write today for brochure detailing our engineering, production, and service facilities. RED BANK DIVISION, BENDIX AVIATION CORPORATION, EATONTOWN, NEW JERSEY.

## PRECISION GYROS FOR ALL APPLICATIONS

Eclipse-Pioneer . . . the nation's foremost supplier of panel indicator gyros . . . offers a complete line of gyros to meet all applications. This group includes all the basic vertical, rate, free, and directional gyro types used as reference components in complete navigation, radar, compass, autopilot, and guidance systems.

**Type Number 14110-1-A**

**Type Number 14104-1-B**

**Type Number 14126-1-A**

**Size:** 4 3/4" diameter, 8 1/2" in length  
**Weight:** Approx. 6 lbs. without shockmount  
**Power requirements:** Gyro Motor and Erection System — 115 volts, 400 cycles, 3 phase  
 Autosyn — 26 volts, 400 cycles, 1 phase

### VERTICAL GYRO TRANSMITTERS

**FEATURES:** includes quick erecting mechanism which makes the remote unit ready for operation within 3 minutes. • Two ball erection system • Non-tumbling stops • Inclined axis (1 degree) to minimize turn error.

Power requirement .....	115 volts, single phase, 400 cps	Autosyn excitation .....	26 volts, 400 cps
Starting .....	19 watts, 0.9 P.F.	Erection rate (normal) .....	3°/minute
Running .....	13 watts, 0.85 P.F.	Weight .....	2 3/4 lbs.
Gyro speed .....	22,000 rpm	Size .....	3 1/8" diameter x 5 13/16" long
Gyro moment .....	600 gram cm <sup>2</sup>		

**Diameter — 6 1/8" Weight — 6 1/4 lbs. Height — 6 3/4"**

Designed for use as a remote vertical reference where vertical stabilization is required. The instrument is essentially an electrically driven, vertical-seeking gyro with separate Autosyn transmitter pick-offs on the pitch and bank axes. Provisions are incorporated to reduce bank error encountered in turns.

- **Operating temperature range:** -55°C to +70°C.
- **Operational limits:** 360° in roll and pitch with controlled tumbling of the pitch axis at near 90°.
- **Accuracy:** The erection system maintains the gyro in a vertical position to within 1/4° of vertical position with respect to the earth.
- **Caging:** From any position at full rotor speed in less than 45 seconds.

This Vertical Gyro Transmitter provides roll and pitch displacement signals which will operate remote indicating devices or which can be used wherever attitude information could be applied. It consists of an electrically driven, torquer erected, vertical-seeking gyro enclosed in a hermetically sealed case with separate Autosyn transmitter pick-offs on the roll and pitch axes.

Provisions have been made so that the pitch and roll erection systems can be cut out by external switches.

An outstanding feature of this instrument is the use of the newly developed Eclipse-Pioneer Electrolytic Switch which provides precise erection and has long serviceability. Besides being rugged, of simple design, and easily serviceable, the transmitter also features a quick erection to true vertical instead of vertical in relation to the instrument case; a sensitive measuring vertical detection system with an accuracy of better than 1/4°; and an improved gimbal construction resulting in greater operational stability. This gyro is completely self-contained and requires no erection amplifier.

#### VERTICAL GYRO—Non pendulous

**Momentum:** 4,000,000 gm cm<sup>2</sup>/sec

**Freedom:** 360° in roll. Controlled tumbling near ± 82° in pitch with stops set to provide minimum loop error at 10°/sec rate of loop

## RADAR ANTENNA DEVICES

**GROUND ANTENNA  
PEDESTAL  
TYPE NUMBER 40101-1-A**

#### SPECIFICATIONS

Weight .....	700 lbs.
Data accuracy .....	0.5 Mil.
Slewing rates (in azimuth and elevation).....	12 rpm.
Operating temperature range .....	-54°C to +66°C
Elevation and Azimuth .....	Two-speed 60 cps synchro data systems are used, having ratios of 1:1 and 16:1
Servo drives .....	3/4 HP motors (DC) for use with an Amplidyne servo system
Wind loading .....	50 mph (full operating performance) 100 mph (no structural damage)

#### SPECIFICATIONS

Standard frequency range .....	9345 to 9405 mc/s. This permits beacon operation at 9310 mc/s
Optional frequency range .....	9215 to 9275 mc/s
Operation .....	Up to 60KW peak with a 0.001 duty cycle
Beam width .....	4° maximum in E and H planes
Side lobes .....	At least 18 db below main lobe peak
Polarization .....	Horizontal
Weight .....	24 lbs. (approximate)
Operating temperature range* .....	-40°C to +55°C
Storage temperature range* .....	-65°C to +55°C
Humidity .....	10% to 95%

\*These temperature ranges can be extended for specific applications.

## COMPONENT PACKAGING

**Servo Follow-Up Package External Slip Ring Autosyn**

In addition to supplying catalog component items such as — synchros, motors, gyros, etc. — Eclipse-Pioneer is in an excellent position to offer a premium in the way of customer service and accommodation on component packaging.

We may have already solved a problem similar to yours, thus enabling our system specialists to adapt from our extensive line, existing production packages to meet your systems requirements.

Should your problem turn out to be entirely new, we can — and will — design, develop, and produce a component or complete system to solve your specific problem.

No package is too small or too large for Eclipse-Pioneer, and may be as simple as an Autosyn mounting clamp or be more complex such as a complete servo follow-up sub-assembly from a production computer.

# Bendix W TYPE HEAVY-DUTY ELECTRICAL CONNECTOR

Intended for use with jacketed cable and not requiring ground return through mating surfaces, this connector incorporates sealing gaskets at all mating joints.

W-Type Bendix\* Connectors also incorporate standard Scinflex resilient inserts in established AN contact arrangements. Shell components are thick sectioned high-grade aluminum for maximum strength. All aluminum surfaces are grey anodized for protection against corrosion.

It will pay you to remember that for the really tough jobs where ordinary electrical connectors just won't do, be sure to specify the W-Type Connector.

Complete specifications and details on request.

## ELECTRA Ceramic Disc Capacitors

Temperature Compensating • A. C. Line Filters  
General Purpose • Extended T. C. • General By-Pass

AVAILABLE IN NINE PHYSICAL SIZES—from 1/4" to 15/16" diameter

. . . Electra now offers you a complete line of Ceramic Disc Capacitors. These capacitors offer you the utmost in high stability, low power factor, High Q, low drift, high insulation and low inductance. You get, too, precision, product uniformity, small physical size, plus a wide range of capacitance values and low cost. For full details write today for our new Catalog Bulletin No. 101. In addition to the types listed above, high voltage disc capacitors and other special types also are available on request.

## IT'S ROUND-UP TIME AT AMP

... products for your **ELECTRONICS**  
and **AVIONICS** applications

### TAPER PINS

The A-MP Miniature Taper Pin Receptacle eliminates tedious and costly operations of soldering leads to miniature connectors. This solderless, quick-disconnect terminal is applied to the lead by means of A-MP Automachine and A-MP Certi-Crimp Tooling . . . then capped over other type connectors, modified to receive the A-MP 37 Series Miniature Taper Pin Receptacle.

Other A-MP Taper Pins are available (Series 53 and 88) for wire sizes 24 - 12 AWG and a wide range of insulation sizes. Insulation piercing Taper Pins are available for small stranded wires and popular size tinsel cords.

### TAPER TAB RECEPTACLES

A-MP Taper Tab Receptacles are a recent development for flat tabs employing the taper key principle. They are available for wire sizes 24 - 18 AWG, in gold, silver and tin plated finishes.

The tapered section of these receptacles is standardized to fit the same size tapered tab. Insulation piercing Taper Tab Receptacles are available for small wire sizes and tinsel cords.

### CONNECTORS FOR PRINTED CIRCUITS

The AMP-Edge Connector is design-engineered with positive wiping contact and frictional grippage. This connector gives you: greater flexibility . . . its size does not limit the size of your completed unit; design versatility . . . easily applied, in any arrangement, to any section of the perimeter; costs reductions . . . in applying connector to the wire and to the printed circuit.

The AMPin Connector . . . gets leads to the printed circuit in one assembly operation . . . eliminates your investment in expensive automation equipment . . . no loose leads during the solder-dip process . . . construction promotes good capillary flow of solder during dipping process . . . can be applied to solid or stranded wires . . . is self-retaining and self-aligning.

### THE SHIELDED WIRE TEAM

The A-MP Shielded Wire Splice joins sections of shielded wire so that the inner conductor and outer shield are firmly spliced and remain effectively insulated from each other. Features include: rectangular inspection window, in center, permits easy inspection to determine proper placement of ends of inner conductor; inspection ports, at each end, to check proper depth of braid enclosed after crimping; and overhang of outer sleeve projects beyond inner elements and grips braid for anti-vibration support.

The A-MP Termashield Shielded Wire Ferrule are of one-piece construction, is slightly thicker than the wires joined, and is the ideal one-step splice for ground tap accommodation.

This A-MP Shielded Wire Team is color-coded for easy identification of leads and connectors and provides a simple one-step operation that reduces assembly time and costs.

Further information on these products is available on request.

## DIRECT-DISPLAY CATHODE RAY STORAGE TUBES BY HUGHES

### Hughes **TONOTRON**\*

*direct-display storage tube*

**FEATURES:** Half-tone presentation . . . excellent grey scale . . . controllable decay rate . . . compact design.

**APPLICATIONS:** Closed circuit TV . . . instrumentation . . . PPI . . . narrow band, slow scan TV.

**SPECIFICATIONS:** 1,000 foot-lamberts brightness at 10 kv . . . electrostatic focusing . . . magnetic deflection . . . 60 lines per inch resolution . . . writing speed of 150,000 inches per second.

### Hughes **TYPOTRON**<sup>®</sup>

*character-display storage tube*

**FEATURES:** High brightness . . . permanent display until intentionally erased . . . rapid display of printed data . . . 63-character matrix.

**APPLICATIONS:** Digital computers . . . Teletype reception . . . wherever printed data must be displayed rapidly for use by human operator.

**SPECIFICATIONS:** Writes up to 25,000 characters per second . . . permanent storage until erased . . . almost instantaneous erasure . . . electrostatic focusing and deflection.

## Hughes **MEMOTRON**<sup>®</sup>

direct-display storage tube

**FEATURES:** Bright display . . . constant and uniform intensity of presentation . . . no perceptible transient decay . . . simplifies photography.

**APPLICATIONS:** Transient analysis . . . spectrum analysis . . . direct comparison of wave forms.

**SPECIFICATIONS:** 100,000 inches per second writing speed . . . stores traces until intentionally erased . . . erasure triggered by push-button or programmed voltage . . . electrostatic focusing and deflection.

New Hughes 104 MEMO-SCOPE\* oscilloscope

**FEATURES:** Captures and retains any number of traces indefinitely . . . eliminates waste of time and film for unnecessary photography.

**APPLICATIONS:** Presentation of tube or transistor characteristics without need of repetition . . . displaying frequency response with a single scan through the desired spectrum . . . investigation of transient behavior for power supply regulation . . . transients encountered in ballistics or missile firing . . . to monitor phase relationships.

**SPECIFICATIONS:** 5-inch diameter MEMOTRON<sup>®</sup> direct-display storage tube . . . optional plug-in preamplifiers for increased flexibility . . . almost instantaneous erasure by push-button or programmed voltage.

## HUGHES SEMICONDUCTORS

DIODES • TRANSISTORS • RECTIFIERS

At Hughes, reliability is the standard upon which every device is based, from research and development through all phases of production. Its significance to you can only be determined if you specify Hughes, if you actually design our units into your equipment. Then you will *know* that Hughes reliability means trouble-free operation under even the most severe operating conditions.

*First of all, for reliability!*

### GERMANIUM POINT-CONTACT DIODES

STANDARD—A large series comprising RETMA, JAN and special types, all having Hughes' famous glass package for complete protection from contaminant penetration. For applications in computers, radar, communications equipment, control equipment.

Peak Inverse Voltage	50-190V	Min. Forward Current @ +IV	3-200mA
Max. Inverse Working Voltage	40-150V	Max. Inverse Current @ -50V	.050-.850mA

QUICK RECOVERY, HIGH CONDUCTANCE—Germanium diodes with all the features of the standard series plus quick recovery and high conductance together.

Peak Inverse Voltage	50-130V	Min. Forward Current @ +IV	20-150mA
Max. Inverse Working Voltage	40-100V	Max. Inverse Current @ -50V	.050-.500mA
Recovery (IBM "F" test)		100KΩ in 1 μsec.	

For some time now the Hughes line has covered an extensive variety of applications in the electronics industry. And it is still growing, with many new products "just around the corner." Watch for their introduction, but meanwhile, for details of those already here, please write:

SEMICONDUCTOR DIVISION • HUGHES PRODUCTS  
International Airport Station, Los Angeles 45, California

### SILICON JUNCTION DIODES

STANDARD—High-temperature units (200°C) featuring excellent forward conductance, extremely high back resistance, and extremely low saturation current throughout wide temperature ranges.

Saturation Voltage	30-200V	Back Current @ 25°C	as low as .025 $\mu$ A (-175V)
Forward Current @ IV	1-40mA	Back Current @ 150°C	as low as .005 mA (-175V)

QUICK RECOVERY—A high-speed, high-voltage, high-temperature series for high-frequency or fast-switching circuits.

WIV @ 0.1mA	30-200V	Recovery (modified IBM "Y" test)	400K $\Omega$ (min.) in 1 $\mu$ sec.
Forward Voltage @ 4mA	<1.5V	Reverse Current @ 25°C	as low as 1 $\mu$ A (-175V)
		Reverse Current @ 100°C	as low as 100 $\mu$ A (-175V)

HIGH CONDUCTANCE—Reliable devices ideal for miniaturized circuits requiring high back resistance, high voltage, high temperature.

Breakdown Voltage	200-400V	Forward Current Rating (Ave. Rect.)	up to 200mA
Reverse Current	as low as 0.1 $\mu$ A (350V)	Forward Voltage @ 200mA	<1V

### SILICON POWER RECTIFIERS

Exceptionally efficient units for use in electronic power supplies and miniaturized rectifier circuitry in general.

Max. AC Input Voltage	140-275V RMS	Max. Ave. Rect. Fwd. Current	200mA
Max. Reverse DC Working Voltage	175-375V	Power Dissipation @ 25°C	200mW

### GERMANIUM NPN TRANSISTORS

A medium-power series of alloyed-junction devices in a hermetically sealed axial package.

Frequency Cut-off ( $f_{\alpha}$ )	0.5-2.0 mc/s min.	Maximum Collector Voltage ( $V_M$ )	10-40V
Output Admittance ( $h_{22}$ )*	100-400 mhos max. X10 <sup>-8</sup>	Collector Capacitance ( $C_c$ )**	20-40 $\mu$ f max. @ 10V
Current Amplification ( $1+h_{21}$ )*	25-150 max. X10 <sup>-3</sup>	Collector Cut-Off Current ( $I_{co}$ )†	10-30 $\mu$ A max.

\* Measured with 5V Collector Voltage and 1mA Emitter Current

\*\* Measured with 10V Collector Voltage

† Measured with 5V Collector Voltage

## METAL CLADS

### For better printed circuits . . . lower costs . . . fewer rejects

**HIGH BOND STRENGTH**—C-D-F's special adhesive for metal-clad Dilecto bonds the copper foil to the plastic without affecting the laminate's superior electrical properties. Heat-resistance, dissipation factor, dielectric constant, dielectric strength, and insulation resistance of the Dilecto base remain unaffected. The closely-bonded foil can be etched cleanly and dipped in hot solder to 450°F. for ten

seconds with a guarantee of no blistering or separating. Metal-Clad Dilecto can be punched or machined either before or after etching.

**EXCELLENT WORKABILITY**—On all five Dilecto metal-clad grades, you can solder, punch, saw, and assemble components either by hand or automatically. Thanks to the inherently superior workability of the plastics laminate over that of ceramic-type materials, Dilecto can be dropped, jammed into tight chassis, and otherwise treated roughly on the assembly line and in service.

**HIGH HEAT-RESISTANCE**—Metal-Clad Dilecto Laminates are made of phenolic, epoxy, or Teflon\* resin for various conditions of service and assembly, and have either cellulosic paper or woven glass-fiber base. All are ideally suited to printed-circuit applications in which heat-dissipation is a major problem. Continuous exposure to high ambient operating temperatures in enclosed electronic equipment has no significant effects on Dilecto's electrical and physical properties.

Write for new Metal-Clad folder MC-57.

### TYPICAL PROPERTY VALUES

	Copper-Clad PHENOLIC (Grade XXXP-26)	Copper-Clad PHENOLIC (Grade XXXP-28)	Copper-Clad PHENOLIC 2350	Copper-Clad EPOXY (Grade GB-28E)	Copper-Clad TEFLON* (Grade GB-112T)

BASE MATERIAL OF LAMINATE	Cotton rag paper	Cotton rag paper	Kraft paper	Medium-weave, medium-weight glass-fiber cloth	Fine-weave, medium-weight glass-fiber cloth
COLOR OF UNCLAD LAMINATE	Natural greenish	Natural Brown	Natural core with chocolate surfaces or solid black	Natural	Natural

All these standard grades are available with 0.0014", 0.0028", 0.0042", or thicker electrolytic or rolled copper foil on one or both surfaces. Other metal foils and other resin-and-base combinations can be supplied on special order.

\*DuPont Trademark

## MICABOND

Available in a wide range of sizes with many different backings including glass-fiber cloth, silk, cellophane, cotton fabric "Mylar," and paper. Micabond Tapes are hand laid; flexible sheets are both hand and machine laid; both retain their electrical insulating properties at elevated temperatures.

New . . . Micabond with glass-fiber cloth backing! When you need

maximum reliability under high-temperature service, resistance to mechanical abuse, coupled with the maximum safety factor, specify Micabond glass-fiber sheets, tapes, wrappers. Composed of India Mica splittings, bonded with flexible resin and faced on one or both sides with impregnated glass-fiber cloth, these new C-D-F products are superior to varnished glass-fiber combinations in deeply imbedded "hot-spot" applications. Write for technical bulletin and samples.

# CONTINENTAL DIAMOND FIBRE

# MOLDED AND LAMINATED PLASTICS — FOR ELECTRICAL INSULATION . . .

## DILECTO

## LAMINATED PLASTICS

**POST-FORMING:** Certain Dilecto grades (CF-1 and XF) may be formed to special shapes by heating and placing in an inexpensive cold mold. The thermoelastic properties of these Dilecto laminates open many production and design opportunities. Already widely used by the aircraft industry, Post-Forming Dilecto merits full investigation by every alert manufacturer. Write for complete C-D-F engineering service.

**DILECTO ROLLED OR MOLDED TUBING** finds wide usage in radio and electrical equipment because of excellent electrical insulation and mechanical strength. Impregnated paper or fabric is rolled on a mandrel between heated pressure rolls, then oven baked or press cured in a heated mold to set up the resin.

Dilecto, a laminated resin-bonded material, meets the need for a non-metallic light-weight insulating material that is moisture resistant, good electrically, strong and adaptable to all fabricating operations. Some grades have exceptionally high mechanical strength—tensile, flexural, impact; others have high dielectric strength, high insulation resistance, high arc resistance, or low loss factor.

Dilecto is a laminated material made from a base of either cellulosic paper; heavy or fine weave woven cotton fabric or mat; asbestos paper, woven asbestos fabric or mat; woven glass fabric or mat; and is coated with a synthetic resin.

The selection of the proper base material, the proper resin in the correct proportion, is C-D-F's job, but the end user must realize how important it is that he fully understands what dividend results can be gained mechanically, and electrically, and from a cost standpoint, by getting the very best C-D-F material for the project. Here is a brief, yet complete listing of Dilecto sheet grades, each one with a combination of proven characteristics built into the material for the specific job.

### SHEET GRADE CLASSIFICATIONS (Rod and Tubing similar to sheet stock)

- X For mechanical applications when electrical properties are secondary.
- P For punching (paper-based grades).
- XX For electrical applications requiring mechanical strength.
- XXX For high humidity applications with minimum cold flow.
- L For mechanical applications requiring fine machining.
- C For mechanical applications requiring toughness plus impact strength.
- CE and LE For electrical uses requiring greater toughness than paper-based grades.
- GB For applications requiring heat resistance and high mechanical strength. Supplied in combination with phenolic, silicone, melamine, polyester, epoxy, or Teflon resin.

Note: Various C-D-F grades, identified by numbers affixed to the grade classification, are available. Ask for catalog D-55-B.

## TEFLON

### OUTSTANDING PROPERTIES

**HEAT RESISTANCE:** Due to the non-flammability and high heat resistance of Teflon,\* it easily meets both Class B and Class H, AIEE standards for maximum hot spot insulation temperature. Teflon coated glass fabric laminates withstand 250°C. continuously and up to 300°C. intermittently. One factor which influences the heat resistance of Teflon is that there is no apparent degradation from oxygen, which does have a definite degrading effect on silicone materials, for instance.

\* Du Pont Trade Mark

**MOISTURE RESISTANCE:** A Teflon laminate has practically zero water absorption and its electrical properties are little affected after long exposure to high humidity. Teflon is unaffected by fungus and temperature changes. Not only has it lower moisture absorption than any other laminate known, but it tends to repel water . . . retaining high surface insulation resistance properties even under extreme humidity conditions.

**DIELECTRIC STRENGTH:** The dissipation factor and dielectric constant of Teflon glass-fiber base laminates are both extremely low over a wide frequency range. From 60 to 100 megacycles, the dissipation factor range is between .005 to .0005 and the dielectric constant ranges from 2.8 to 2.5 when measured in a field perpendicular to laminations. As corona will slightly degrade Teflon, care should be taken in designing parts used at voltages over 2500. Sharp corners, and other contributing factors to corona should be avoided.

**CHEMICAL INERTNESS:** Resistant to hot corrosive salts and most concentrated acids. Pure Teflon is unaffected by all known chemical agents, excepting molten alkali metals and, under special conditions, fluorine and chlorine trifluoride. Glass-supported Teflon, when exposed at cut edges, is affected only by those chemicals which attack glass. Otherwise, its properties remain the same. Write for Teflon folders.

TEFLON TYPICAL PROPERTY VALUES COMPARED WITH OTHER GLASS-BASE LAMINATES

	TEFLON (Unsupported)	TEFLON GB-122T (Teflon resin)	DILECTO GB-12S (Silicone resin)	DILECTO GB-28M (Melamine resin)	DILECTO GB-12D (Phenolic resin)	DILECTO GB-28E (Epoxy resin)

\* Will not form complete conducting path. Arc continues indefinitely but material gradually erodes away on full time continuous arc.

## CONTINENTAL DIAMOND FIBRE

# ..... FOR EVERY APPLICATION IN ELECTRONIC MANUFACTURING

## FABRICATED AND FORMED

### VULCANIZED FIBRE

**GOOD EXAMPLES** of Diamond Fibre formed and machined by C-D-F. Left—An insulating barrier made from three pieces of fibre, punched and formed. Fibre tubing is even used for rivets. Right—A fibre tube which has been smooth-sawed to length, punched twice and countersunk. C-D-F can handle the entire job for you, do it faster and at low cost. This includes selecting and testing the proper grade of fibre, machining and inspection, assembling if needed.

If your job is to select a general-purpose insulating material that is low cost, useful for both electrical and mechanical applications, easy to machine and form, consider the advantages of a unique old-timer—C-D-F's Diamond Vulcanized Fibre.

**WHAT IS FIBRE?** Vulcanized fibre is made by combining layers of chemically jelled paper. The chemical compound used in gelling the paper is subsequently removed by leaching and the resulting product, after being dried and finished by calendaring, is a dense material of partially regenerated cellulose in which the fibrous structure is retained in varying degrees, depending upon the grade of fibre. —NEMA Standard VU 1-1.1

**GOOD ELECTRICALLY.** Although given a modest insulation rating for resistance to heat (A.I.E.E. Class A with a temperature limit of 221°F.),

Diamond Fibre is often used because of its excellent arc resistance and good dielectric strength. It also has desirable deionizing properties and low heat conductivity. Fibre can be combined or surrounded with moisture-resistant laminated plastic.

**MANY GRADES AND FORMS.** Diamond Fibre sheet and roll grades include Bone, Commercial, and Electrical Insulation (fish paper) NEMA grades. Fibre tubing is normally made only in Bone grade, with rods available in both Bone and Commercial grades. The chart shown outlines the major characteristics of these grades.

<b>C-D-F BONE FIBRE</b>	Hard, stiffest grade. High density. Resists wear, abrasion, has high compressive strength. Good dielectric strength when dry. Super machining qualities. Not recommended for bending.
<b>C-D-F COMMERCIAL FIBRE</b>	Mechanical and electrical grade. Medium density. Tough, pliable. Good mechanical properties. Fair dielectric strength, normally high when dry. Can be bent, punched, and formed.
<b>C-D-F DIAMOND INSULATION</b>	Electrical insulation "fish paper" grade. Unusually free from foreign matter. Withstands extreme bending and forming without cracking. High dielectric strength, except under high humidity.

**TOUGH, RESILIENT, STRONG.** How long has it been since you examined the unique properties and wide range of C-D-F fibre grades? Vulcanized Fibre is arc resistant, mechanically strong, non-corroding, half the weight of aluminum. Repeated moistening and drying in forming insignificantly alters the nature, structure or quality of the fibre.

**A BIG, RELIABLE SOURCE.** C-D-F does business with the largest tonnage users of sheet, rod and tube fibre in the world. This means good deliveries, good prices, reliable products for every new customer. You deal with a materials engineer, a C-D-F man who knows how to give you the most value in Diamond Vulcanized Fibre. If you want to improve design, simplify purchasing, speed production, use Diamond Fibre and the facilities of C-D-F. Write for new Diamond Fibre catalog DVF-55, free test samples, or send us your print for quotation.

NOTE—\* Tensile strength only.

### VULCOID

## RESIN-IMPREGNATED FIBRE

Only C-D-F supplies Vulcoid in sheets, tubes, rods, and fabricated parts. Made from Diamond Vulcanized Fibre that has been uniformly impregnated with a special resin, Vulcoid is a material approved and identified by the Underwriters' Laboratories as Class A Insulation. Natural greenish-tan in color, it is economical, easy to machine and punch. Property-wise, Vulcoid is an intermediate grade between Commercial Fibre and XX phenolic Dilecto.

**USES:** (requiring arc resistance and mechanical strength)—contact and connector panels, knife switch arms and guides, arc deflector spacer bushings; (requiring dielectric strength and moisture resistance)—electrical fixture insulation, wiring devices, plugs, receptacles; (requiring moisture and arc resistance)—motor and transformer lead bushings and terminal blocks. Write for folder V-55 and test samples.

- GOOD DIELECTRIC STRENGTH
- LOW DIELECTRIC LOSS PROPERTIES
- GOOD MECHANICAL STRENGTH & MOISTURE RESISTANCE

C-D-F Spiral Tubing is a high-strength plastic made from paper or vulcanized fibre that is spirally wound. It is available in two forms: 1. as plain untreated tubing. 2. as impregnated tubing containing phenolic resin or insulating varnish.

Used in many coil form and electronic applications, C-D-F Spiral Tubing can be used to replace rolled or molded laminated phenolic tubing in many cases. The degree of mechanical strength and mois-

ture resistance is established during the manufacturing process, so that the designer and production man obtains the correct properties required for the application.

Write for new catalog and samples. Call the C-D-F sales engineer listed for complete information about C-D-F's fabricating and inspection facilities. Unit costs can be reduced, products improved with new C-D-F plastic Spiral Tubing!

**NEW CONSTANT TORQUE TUBING**, for permeability tuning with iron cores, features stable torque ratings, exact internal threading with three point suspension of core to prevent binding, no external embossing. Write for samples.

**ONE OF MANY GRADES** is Grade 3, a softer tube for difficult fabricating. May be notched and formed—suitable for severe stapling and riveting.

**Bulletin 1912**

Space-saving duplex blower. Total capacity: 215 cfm @ 1.75" sp to 430 cfm, free delivery @ 3450 rpm.

**Bulletin 1412**

Two-fan V-belt-drive unit combines high volume, light weight and minimum size. Capacity: 2700 cfm @ 0.5" sp @ 1000 rpm and 4800 cfm @ 0.5" sp @ 1400 rpm.

**Bulletin 3412**

Propeller fan designed for electronic cabinet ventilation. Capacity: 1325 cfm @ 0" sp to 310 cfm @ 0.62" sp @ 1725 rpm.

 <p>Small aluminum axial flow fan designed for cooling electronic equipment in aircraft. Capacity: 110 cfm @ 0.6" sp to 165 cfm, free delivery @ 7250 rpm.</p> <p><b>Bulletin 3812</b></p>	 <p>Aluminum axial flow fan designed to meet military requirements. Capacity: 500 cfm @ 5" sp @ 5600 rpm.</p> <p><b>Bulletin 3612</b></p>	 <p>Axial flow fan; no dip in pressure curve. 226 cfm @ 0" sp to 134 cfm @ 3" sp at 7600 rpm max. sp 4.5". 285 cfm @ 0" sp to 150 cfm @ 7" sp at 11000 rpm max. sp 9.5".</p> <p><b>Bulletin 5312</b></p>	 <p>Tubeaxial fan for flushing electronic equipment cabinets and racks. Double flange allows mounting at either end. Capacity: 295 cfm, free delivery @ 1550 rpm.</p> <p><b>Bulletin 5112</b></p>
 <p>Heavy-duty V-belt-driven blower for communication transmitter cooling. Capacity: 517 cfm @ 0.25" sp at 640 rpm and 1400 cfm @ 1.5" sp @ 1642 rpm.</p> <p><b>Bulletin 2712</b></p>	 <p>Special blower for military requirements. Capacity: 100 cfm @ 1" sp to 150 cfm, free delivery @ 5600 rpm.</p> <p><b>Bulletin 412</b></p>	 <p>V-belt-driven blower for TV transmitter cooling. Capacity: 1700 cfm @ 4.5" sp @ 1540 rpm at sea level and 2700 cfm @ 5.75" sp @ 2030 rpm at 7500 ft. elevation.</p> <p><b>Bulletin 3212</b></p>	 <p>Compact tube cooler designed to meet military applications. Capacity range: 35 cfm @ 4" sp to 80 cfm @ 1.5" sp @ 8000 rpm approx.</p> <p><b>Bulletin 312</b></p>

All of the above American Blower air-moving units can be modified to meet your specific requirements. We welcome the opportunity to discuss and quote on your application. Individual Specification Bulletins are available on each unit. Simply fill out and mail coupon at right and they will be sent to you promptly. American Blower Division of American-Standard, Detroit 32, Michigan. In Canada: Canadian Sirocco products, Windsor, Ontario.

## AMERICAN BLOWER

Division of **AMERICAN-Standard**

# HYDROGEN THYRATRON TUBES

KUTHE HYDROGEN THYRATRON TUBES are built to the most rigid specifications that insure consistently uniform, top quality performance.

## 1258

Peak pulse power.....10 KW  
Peak forward anode voltage.....1.0 KV  
Peak anode current.....20 amperes  
Average anode current.....50 ma. max.  
Pb..... $0.1 \times 10^9$

## 3C45

Peak pulse power.....50 KW  
Peak forward anode voltage.....3000 volts max.  
Peak anode current.....35 amperes max.  
Average anode current.....45 ma. max.  
Pb..... $0.3 \times 10^9$

## 3C45W

Electrical characteristics same as 3C45 except a hydrogen reservoir is incorporated for long tube life. Ruggedized construction is used.

## 4C35

Peak pulse power.....350 KW  
Peak forward anode voltage.....8.0 KV max.  
Peak anode current.....90 amperes max.  
Average anode current.....100 ma. max.  
Pb..... $2.0 \times 10^9$

## SGR-1

Electrical characteristics same as 4C35 except  
tad .....0.6 us  
 $\Delta$ tad .....0.04 us  
Ii .....0.01 us  
A hydrogen reservoir is incorporated for long tube life.

## 5956/E36

(Compact and rugged, suitable for airborne radar)  
Peak pulse power.....350 KW  
Peak forward anode voltage.....8.0 KV max.  
Peak anode current.....90 amperes max.  
Average anode current.....100 ma. max.  
Pb..... $2.5 \times 10^9$   
A hydrogen reservoir is incorporated for long tube life.

## 5957/E37B

Electrical characteristics same as 5956/E36. Construction also identical, except for special ceramic, 4-pin base and size, which is 4.0" o.a.l. x 1.56" dia. max.

## 6777/KU14

Peak pulse power.....120 KW  
Peak forward anode voltage.....8.0 KV max.  
Peak anode current.....35 amperes max.  
Average anode current.....45 ma. max.  
Pb..... $1.1 \times 10^9$

## 5958/E40

(Compact and rugged, suitable for airborne radar)  
Peak pulse power.....150 KW  
Peak forward anode voltage.....8.0 KV max.  
Peak anode current.....40 amperes max.  
Average anode current.....45 ma. max.

## 5959/E41

Electrical characteristics same as 5958/E40. Construction also identical, except for special all-glass, 4-pin base and size, which is 4.0" o.a.l. x 1.56" dia. max.

## 1257

Peak pulse power.....38,000 KW  
Peak forward anode voltage.....38.0 KV max.  
Peak anode current.....2000 amperes max.  
Average anode current.....2500 ma. max.  
Pb..... $20 \times 10^9$

## 5C22/HT415

Peak pulse power.....2500 KW  
Peak forward anode voltage.....16.0 KV max.  
Peak anode current.....325 amperes max.  
Average anode current.....200 ma. max.  
Pb..... $3.2 \times 10^9$

## KU25

Electrical and mechanical characteristics same as 5C22/HT-415, except for modification permitting operation at high pulse recurrence rates.

## 6587

Peak pulse power.....2500 KW  
Peak forward anode voltage.....16.0 KV  
Peak anode current.....325 amperes  
Average anode current.....225 ma. max.  
Pb..... $3.9 \times 10^9$

## 5949/1907

Peak pulse power.....6000 KW  
Peak forward anode voltage.....25.0 KV max.  
Peak anode current.....500 amperes max.  
Average anode current.....500 ma. max.  
Pb..... $6.25 \times 10^9$

## 5948/1754

Peak pulse power.....12,000 KW  
Peak forward anode voltage.....25.0 KV max.  
Peak anode current.....1000 amperes max.  
Average anode current.....1000 ma. max.  
Pb..... $9.0 \times 10^9$

## LARGE SCREEN OSCILLOSCOPES

Available in 21" Bench Console and 17" Rack Mounted Model. Basic models of each type are available; the "35" Dual Response Medium Sensitivity Models, and the High Sensitivity "40" Model featuring Differential Input in the 1 to 10 Millivolt Sensitivity Range. These Oscilloscopes feature unequalled stability and linearity.

## MULTI-CHANNEL OSCILLOSCOPES

Large Screen Multi-channel Oscilloscopes feature forty input channels and permit continuous reading of forty separate signals.

The display consists of a vertical-bar graph 9" high by 12" wide. The vertical length of each line indicates the value of the maximum input voltage which existed during the previous tenth of a second.

## SWEPT FREQUENCY GENERATORS

Used in conjunction with an oscilloscope provides an amplitude versus frequency display of high accuracy. The frequency response plots obtained thereby permit highly accurate and rapid production testing and calibration of frequency sensitive devices. This instrument also enables the user to determine instantly the effects of changes in circuit parameters upon frequency characteristics, thus permitting an optimum design to be obtained in minimum time.

## SHORT FORM CATALOGS AVAILABLE ON FOLLOWING:

TERA-OHMMETERS • IMPEDANCE BRIDGES • FREQUENCY MEASURING SYSTEMS • WAVEFORM ANALYZERS • SIGNAL GENERATORS • ELECTRONIC VOLTMETERS AND POWER METERS • CAPACITANCE STANDARDS • ATTENUATORS • FIELD INTENSITY METERS • GALVANOMETERS.

## TERA-OHMMETERS INSULATION MEASUREMENTS up to 5000 MILLION MEGOHMS

For testing resistors, capacitors, cables, switches, tube sockets, transformers and many other components... incoming inspection and quality control.

Type FT-H

### TYPE FT-H4

Range: 20 megohms to 5000 x 10<sup>6</sup> megohms in 6 ranges • Test Voltage: Adjustable from 100 to 1000 v., dc • Accuracy: ±3% in scale center • Power Supply: 115 v., 50-60 cps. Instrument can also be operated from its own battery supply.

Note: Other types available to cover ranges from .2 megohms to 500 x 10<sup>6</sup> megohms with fixed test voltages between 3 and 1000 volts.

## Z-G DIAGRAPH Plots Impedance Instantaneously

### Features:

- Rapid Measurement of Impedance and Admittance of Antennas, Components, Coaxial Systems, Cables, Transistors, Filters and Attenuators
- Rapid Measurement of Transmission Characteristics of Coaxial Cables, Filters and Attenuators
- Measures Phase Angle between RF Voltages
- Direct Readings on Standard Charts:
  - eliminate need for calculation
  - prevent computation errors
  - save valuable engineering time

Type FT-ZDU

### SPECIFICATIONS

Freq Ranges: Type FT-ZDU . . . 30 to 300 mc; Type FT-ZDD . . . 300 to 2400 mc • Characteristic Impedance: 50 ohms • Measuring Ranges: Impedance . . . 1 to 2500 ohms; Phase . . . 0 to 360°; Attenuation . . . 0 to 30 db • Accuracy: Amplitude . . . ±3%; Phase . . . ±1.5 • Terminals: Type N • Power Supply: 115 volts (or 220 volts), 50 to 60 cycles.

# LFE PRECISION INSTRUMENTS and COMPONENTS for advanced electronics

## 411A OSCILLOSCOPE

The only oscilloscope with X-axis diversification. Plug-in adapters give delayed sweep, gated markers, dual trace, etc. Direct-reading controls. Reliable and accurate for advanced research.

Write for Bulletin 411A

## 501A TIME RATE INDICATOR

High speed digital frequency meter and timing instrument for measurement and digital display of frequency, period, ratio, rate, pulse width, intervals, elapsed time and total. Built-in video amplifier and period measurement unit.

Write for Bulletin 501A

## 814 ULTRASTABLE MICROWAVE OSCILLATOR

For any microwave research requiring a stabilized signal source.

Write for Bulletin 814

## 5004 MICROWAVE STABILITY TESTER

Measures drift and f.m. in frequency bands between 1120 and 10,800 mc. Also at 30 mc and at 30 kc to 230 kc. Direct reading, continuous display. Provision for oscilloscope display.

Write for Bulletin 5004

## PLUG-IN SCALERS

Printed wire units with easy-to-read digital display. Standard and special purpose models. Decade scalers available with 9 or zero reset.

Write for Bulletin 1700

## TRANSFORMERS

Pulse, power, magnetic amplifiers, charging and filter chokes, audio transformers, high "Q" inductors, i.f. and r.f. coils, computer storage coils, special purpose h.v. power supplies. To meet commercial and MIL-T-27A grades and any physical requirement.

Write for Bulletin TR500

## POTTED POWER SUPPLIES

Made to customer specifications

## CONDENSED SPECIFICATIONS

Bandwidth: DC to 10 mc., .035  $\mu$ sec rise time  
Sensitivity: 20 mv/cm  
Square wave calibrating voltage: from 0.1 to 100V, 5% accuracy  
Sweep range: .1  $\mu$ sec/cm to .1 sec/cm  
Triggering: External, internal, recurrent 500 to 5000 cps.

10 mc counting rate  
All neon display  
7 decade scalers in time base  
Period range: 10  $\mu$ sec to 28,000 hrs.  
Interval range: .1  $\mu$ sec to 28,000 hrs.  
Display time: .07 to 10 sec or INF  
Recorder, heterodyne, and timing pulse outputs

Frequency range: 8500 to 10,000 mc/s.  
Stability: 5 parts in  $10^8$  short term, 1 part in  $10^6$  long term  
80 mw nominal into 50 ohm load power output

S-band deviation measurements to less than 2 cps.  
X-band deviation measurements to 10 cps.  
Measurable f-m deviation to 1000 cps.  
Max. measurable rate of drift: 300 kc/sec/sec  
Instrument stability: 1 part in  $10^{11}$ .

Decade: 10 mc, 1 mc, 100 kc, 40 kc, 20 kc.  
Preset: 20 kc, 40 kc, 100 kc.  
Binary: 20 mc

IF, RF coils to 150 mc pulse as required.  
Inductance: to 1000 henries up to 50 amps DC.  
Hipot: to 40,000 V.  
Power: frequency to 100,000 cycles. Power to 500 watts at non-standard (60 and 400 cycles) frequencies.  
60 and 400 cycle testing to any power range.  
Toroids to 1/16" I.D., 5" O.D.

From 2,000 to 100,000 volts  
1 ma to 5 ma

### MINIATURE & SUB-MINIATURE Solder—Solderless Types

MINIATURE	
MI SOLDER	MI-SDL SOLDERLESS
AMP. 37 Term	

AVAILABLE IN 7, 12(8-4),  
14, 18, 20, 21, 26, 34, 41, 50,  
75 contacts.

### DOUBLE-LEAD MINIATURE SCREW-LOCK

**REMEMBER,  
TWICE THE  
SPEED WITH  
DOUBLE  
LEAD!**

MI-SL SOLDER	MI-SL-SDL SOLDERLESS
AMP. 37 Term	

AVAILABLE IN  
7, 12(8-4), 14,  
18, 20, 21, 26,  
34, 41, 50, 75  
contacts.

### SUB-MINIATURE SCREW-LOCK

SMI-SL SOLDER	SMI-SL-SDL SOLDERLESS
AMP. 37 Term	

AVAILABLE IN  
7, 11, 14, 20,  
26, 34 contacts. Also  
available, SMI  
rack and  
panel series.

### MINIATURE HEXAGONAL

MH SOLDER	MH-SDL SOLDERLESS
AMP. 37 Term	

AVAILABLE  
IN 4, 5, 7,  
9 contacts.

The above items are covered by U. S. Pat.  
2,658,182; 2,751,108. Add'l Patents Pending.

**SPECIAL FEATURES:** Side or rear cable entrance hoods  
available. Alkyd, Melamine or diallyl phthalate molding com-  
pounds.

- Other U.S.C. products are available such as pressure seals, adapters, mounting brackets.
- Over 1500 stock sizes and types for standard and special applications.

### POWER

#### HEAVY-DUTY

980 SOLDER	980-SDL SOLDERLESS
AMP. 53 Term	

AVAILABLE IN  
12, 18, 24, 34  
contacts.

#### HEAVY DUTY DOUBLE-LEAD SCREW-LOCK

980-SL SOLDER	980-SL-SDL SOLDERLESS
AMP. 53 Term	

AVAILABLE IN  
12, 18, 24, 34  
contacts.

#### HEAVY DUTY

990 SOLDER	990-SL-SDL SOLDERLESS
AMP. 53 Term	

AVAILABLE IN  
7, 10, 15, 18 long  
or short (S) con-  
tacts.

#### HEAVY DUTY DOUBLE-LEAD SCREW-LOCK

990-SL SOLDER	990-SL-SDL SOLDERLESS
AMP. 53 Term	

AVAILABLE IN  
7, 10, 15, 18  
contacts.

**REMEMBER,  
TWICE THE  
SPEED WITH  
DOUBLE  
LEAD!**

### PRINTED CIRCUIT

#### SERIES UPCR (printed card receptacle)

6, 10, 15, 18, 22  
contacts. Single  
row for 1/16 cards  
—wire solder.  
Double row for  
1/16 & 3/32 cards  
—wire solder (D),  
wire-wrap (DW),  
taper pin (DTP), or  
taper tab (DT), ter-  
minals.

# PANORAMIC

# INSTRUMENTS

## here's how can help you...in

- vibration and sound analyses
- noise analyses
- geophysical investigations
- servo analyses
- frequency response analyses
- harmonic and cross modulation investigations
- monitoring communications channels
- analyzing characteristics of AM, FM and pulsed signals
- checking telemetering or carrier current systems for distortions, hum, noise, microphonics, interference, channel spillover
- monitoring magnetic tape re-recordings
- and many special applications

Accurate . . . rapid, exceedingly flexible and discriminating, Panoramic instruments are **PROVED PERFORMERS** in plants, laboratories and military applications. Simple to operate . . . easy to interpret . . . they have helped to speed research and development projects . . . solve production testing problems.

Whatever your problem, there is a Panoramic Instrument to answer your needs. Write, wire, phone for Panoramic's **NEW Catalog Digest**, other descriptive data and a copy of our regular bulletin featuring application data. A Panoramic Applications Engineer is always available to discuss specific problems. Special instruments to order.

**PANORAMIC**  
RADIO PRODUCTS, INC.

### Panoramic Waveform & Spectrum Analyzers

These automatic heterodyne scanning receivers present a visual display of both the frequency and amplitude of the waveform content of an electrical voltage or any parameter which is converted into an electrical voltage. Their easily read panoramic display provides a rapid, reliable method of detecting defects, checking variations, making adjustments, testing production, improving product design and solving many other measurement problems. A broad range of instruments satisfies a great variety of applications, which are even further extended by combining carefully designed accessory equipments with basic analyzers to form instrumentation systems which offer unique advantages.

**Model LF-2, Subsonic (0.5 cps-2250 cps)**, features 0.1 cps to 20 cps resolution, 40 db dynamic range, six scanning widths, permanent ink-on-paper recordings, high stability.

**Model LP-1a, Sonic (40 cps-20 kc)**, features both linear and log amplitude scales, 60 db dynamic range, directly read, broad logarithmic frequency scale and a three-step scanning range selector and tuning control which permits selection and magnification of linear segments 200, 1000 or 5000 cps wide centered anywhere between 0 and 20 kc for sharp detailed analysis of components closely spaced in frequency. Optional companion recorder allows permanent ink-on-paper recordings over extended periods.

**Model SB7aZ, Ultrasonic (1 kc-300 kc)**, features both linear and log amplitude scales, exceptionally stable displays, continuously variable sweepwidth, center frequency and resolution controls which facilitate overall observation of a band 200 kc wide or highly detailed analysis of selected narrow bands.

**Panalyzers and Panadaptors (RF, VHF and UHF)** feature continuously variable sweepwidths, resolution and scan rates; long or short persistence displays, linear or log amplitude scales. Offer the advantages of wide scan display yet permit examination of closely adjacent signals. Special features vary with model and type selected. 5 models in 23 different types fulfill almost every need from low-cost general purpose instruments to those for highly special applications.

**Model SPA-1, Microwave (50 mc-4000 mc)**, features two tuning heads (RF-2 from 50 mc to 250 mc; RF-3 from 220 mc to 4000 mc in five ranges) with a single tuning control dial having an accuracy of  $\pm 1\%$ , continuously variable resolution, sweep rate and differential markers,—100 dbm sensitivity.

### Panoramic Accessory Instruments

**Models G-2 and G-3, Sweep Generators**, convert the LP-1a and SB-7aZ, respectively, into single line response curve tracers, discriminate against noise and hum, show response to fundamental frequency only, and assure accurate frequency response measurements.

**Model TW-1, Triangular Wave Generator**, operates together with both sonic and ultrasonic analyzers and sweep generators to produce a continuously variable (0.05 to 60 per sec.) linear bi-directional time base enabling the establishment of the proper scan rate to insure presentation of a true response.

**Model SW-1, Signal Alternator**, permits observation of two independent inputs either for comparison or calibration purposes. With high persistence indicators, alternate displays can be viewed simultaneously thus allowing a very high degree of readability on small differences in frequency and/or amplitude.

### Panoramic Special Instruments

**Model TFA-1, Time-Frequency Analyzer**, in combination with one of the analyzers (subsonic through microwave) or telemetering indicator, provides a complete history of the time occurrence of transient waveform components, in addition to frequency and amplitude information.

**Model PDA-1, Spectral Power Density Analyzer**, used in combination with one of the analyzers (subsonic through microwave) measures the spectral power density of random information by translating transient voltage amplitudes of a complete data sample into an integrated continuous plot of total power vs. frequency.

**Model SF-1, Synchronous Frequency Analyzer**, has many application possibilities and is excellent for dynamic balance analysis. Automatically tracks a frequency component derived from a rotating or oscillating source and provides simultaneously a visual plot of component frequency vs. component amplitude.

### Panoramic Telemetering Test Instruments

These instruments are specifically designed to provide a simple, reliable, almost instantaneous method of checking FM/FM Telemetering Systems.

**Model TMI-1a, Telemetering Indicator**, provides a visual display of the frequency and amplitude of composite signal components. Scans spectrum logarithmically from 350 cps to 85 kc, or linearly, any 100 cps to 20 kc segment centered anywhere between 400 cps and 70 kc. Permits measurement of spurious products down 40 db. Features 20 db linear and 40 db log amplitude scales; 2 mv full scale sensitivity; automatic optimum resolution.

**Model TMC-1 Telemetering Subcarrier Deviation and Three Point Calibrator**, is a dual purpose instrument, which: (1) Sequentially furnishes upper limit, center and lower limit frequencies channel by channel for all RDB channels as outputs for discriminator calibration. Limits are  $\pm 7.5\%$  for all channels and  $\pm 15\%$  for upper five, others optional, with an accuracy of 0.02%. Channel switching can be either manual or automatic. (2) Establishes maximum deviation limits and center frequency of subcarrier oscillators. An internal signal switcher permits alternate display, on the screen of the TMI-1a, of subcarrier vs. calibrating marker from the built-in channel selector of the TMC-1 which automatically establishes proper center frequency and sweepwidth of the selected channel for comparison with deviation or spread of subcarrier.

**Model TMC-307, Seven Point Telemetering Frequency Calibrator**, sequentially furnishes seven equally spaced frequencies for all RDB channels singly, as outputs for discriminator calibration. Limits and accuracy are the same as the TMC-1. Switching can be either manual or automatic. Can also be used in combination with the TMI-1a and the CHS-1 (Channel Selector), for multipoint calibration of subcarrier oscillators. 0.02% accuracy.

**Model TMC-211, Simultaneous Eleven Point Telemetering Frequency Calibrator**, differs markedly from the TMC-1 and TMC-307 in that it provides 11 equally spaced frequencies for all RDB channels simultaneously as outputs for discriminator calibration. All channels can be sampled in as little as 294 seconds with an accuracy of 0.002%, stability of .0005%. Limits are the same as the TMC-1 and TMC-307. Channel switching may be manual, semi-automatic or completely automatic. On automatic, switching is controlled synchronously and cycling time is adjustable. Can also be used in combination with the TMI-1a and the CHS-1, for simultaneous multipoint calibration of subcarrier oscillators. The instrument can be remotely controlled from a central station with subcarrier channels diverted to various locations.

**Model CHS-1, Telemetering Channel Selector**, automatically establishes the correct center frequency, sweepwidth and resolution for any RDB channel selected for display on the screen of the TMI-1a. An internal signal switcher permits alternate display of subcarriers vs. external calibrating markers, available from the TMC-307, TMC-211 or other source, for visual comparison of linearity or spread of subcarrier.

# AXIVANE FANS

for electronic cooling

Joy Manufacturing Company has developed over 240 models & 1300 designs of small, powerful fans for use in electronics. Each fan can be modified for exact conformation to any specifications. Aluminum and magnesium one-piece castings provide minimum weight, yet enable fans to withstand severe shock and vibration. Vanexial design assures compactness, space saving and provides high capacity performance with low horsepower expenditure. Motors meet minimum vibration standards for exact balance tolerance in motor driven fans. All rotors are dynamically and statically balanced. Direct drive is an important built-in (but readily accessible) feature.

## APPLICATIONS IN THE ELECTRONIC INDUSTRY:

- Heat removal where space is so restricted that natural ventilation is insufficient.
- Cooling electronic tubes under conditions of sea level to 50,000 feet with high temperatures.
- Electronic equipment.
- Radio gear.

- Magnetrons.
- Maintain correct temperature for fire control equipment.
- Counter measures.
- Providing air for many unusual electronic applications.
- Spot cooling of electronic tubes where local high temperatures arise.
- Heat removal from pressurized or hermetically sealed units.

## **B&A "ELECTRONIC GRADE" CHEMICALS**

**REDUCE IMPURITIES TO NEW LOWS!**

Here are chemicals made to entirely new standards of purity—chemicals made especially for use in manufacture of semiconductors. Metallic and other undesirable impurities are held to maximum limits as low as one part in ten million!

These exceptionally pure B&A "Electronic Grade" Chemicals have been developed to fulfill the exacting requirements of the electronic industry. It is natural that they should come from B&A. For Baker & Adamson is America's foremost producer of laboratory and scientific chemicals, and has worked in close partnership with the electronic

industry since its earliest days.

Listed here are the B&A "Electronic Grade" Chemicals now offered in small package sizes. They are readily available from convenient stock locations, together with many other B&A "Electronic Grade" Chemicals produced in bulk for use in TV tube and receiving tube manufacture. Additional special high-purity chemicals can be custom-made to meet your needs.

**Write for free booklet!** Contains information on electronic chemicals for semiconductors, tubes, printed circuits; sulfur hexafluoride for gaseous insulation;

selenium metal and selenides; metallic oxides and salts for ferrite production. Lists exact specifications for many "Electronic Grade" Chemicals. Write for your copy today!

"Electronic Grade" Chemicals for Semiconductors:

Acetone

**No matter what factors govern your choice of precision components...**

## **THE ANSWER IS HERE**

The Fairchild line of precision components includes *forty-two standard types* of precision potentiometers, pressure transducers and accelerometers. Please note that this does not include any of the countless specials or design variations on basic units that we have made for various customers . . . or could make for you.

The 42 standard types embody *seventeen basic product categories* including wire wound or metal film, single- or multi-turn, linear and non-linear in both phenolic and metal cases; and high temperature types. Pressure transducers, accelerometers, trimmer potentiometers and linear motion potentiometers are also available.

In all these, Fairchild's continuing and extensive research now provides you with the optimum designs for size and functional conformity to best meet your individual needs. *Whatever* your potentiometer or transducer problem is, let Fairchild help you. Write for our new condensed catalog. Fairchild Controls Corporation, Components Division, Dept. 140-82A.

## SILVERCEL® BATTERIES

Wherever weight, space and severe current drains are critical factors . . . Yardney SILVERCEL® Batteries will solve your power problems! Small, lightweight, these power-packed batteries have surpassed stringent requirements of Spec MIL-E-5272A.

More than 200,000 Yardney silver-zinc cells bought and used by the U. S. Navy alone!

We can assemble batteries of any size, of any capacity to your

specifications . . . from advanced-design, test-proved cell models ranging from 0.1 AH to 300 AH, or specially-built models of much larger capacity. For your medium and low rate applications, ask about the Yardney SILCAD®, our new silver-cadmium battery!

And to solve your power problems . . . or for assistance in checking your battery requirements . . . please contact our Applications Engineering Department (AED) for Free consultation service.

Table of Yardney High-Rate Models

Yardney Silvercel	Nominal Capacity	Peak Pulse Discharge	Weight (ounces)	H. (all in inches)	W. (all in inches)	D. (all in inches)	Typical Applications
HR 01	0.1 AH	3 amps	0.15	1.38	.61	0.20	Instrumentation

- **MINIMUM WEIGHT AND SIZE** — six times lighter and five times smaller than conventional batteries of equal capacity
- **LOW INTERNAL RESISTANCE** — designed to meet high current discharge requirements
- **FLAT VOLTAGE CHARACTERISTIC** — no discharge dip at any current drain to end of capacity
- **HIGH SAFETY FACTOR** — Spillage and leakage hazards eliminated; no fumes during charge and discharge cycles
- **MECHANICAL STRENGTH** — High resistance to shock, vibration, rapid acceleration and deceleration
- **WIDE TEMPERATURE RANGE** — Efficient at 160° F. and as low as -60° F.

 Fixed pin length:  $.234 \pm .030$

### Type ML-18

is a sub-miniature hermetically sealed crystal unit with glass and metal base. Available with fixed pins or wire leads.

**Range:**  
 5.0 mc — 150.0 mc

**Standard Octal Base Crystal Oven** for ML-6 or ML-13 crystal units: Oven accommodates one or two crystal units. Available in 1 3/4" or 2 1/2" tall can. Furnished in 6, 12, 27 or 115 volt. Temperature setting tolerance accurate to  $\pm 1^\circ\text{C}$ . Operative temperature calibrated at any desired temperature between  $60^\circ\text{C}$  and  $100^\circ\text{C}$ .

Pin diameter:  $.040 \pm .002$   
 Pin length:  $.250 \pm .030$

### Type ML-2G

a new all glass, 7-pin miniature.

**Range:**  
 200 kc — 150.0 mc

Pin diameter:  $.050 \pm .002$   
 Pin length:  $.238 \pm .010$   
 — .015

### Type ML-13

**Range:** 4 kc — 300 kc

This unit is hermetically sealed. The can is taller to accommodate the low frequency crystal blank.

**MORE HIGH QUALITY CRYSTALS  
 HAVE BEEN PRODUCED BY *Midland* THAN  
 BY ANY OTHER MAKER IN THE WORLD!**

When absolute accuracy in frequency control units must be rigidly maintained—entrust the job to Midland. You are assured of years of quality manufacturing experience plus constant advanced research in critical problems. Midland crystals used by the Military Services are consistently found to surpass military specifications in precise, constant and unflinching performance.

*Check with us on all your crystal needs...  
 and any special requirements.*

## HIGH POWER RESISTORS

9 Fixed Types Covering 5 to 200 Watts  
in 1 to 100,000 Ohms Ranges

8 Adjustable Types Covering 10 to 200  
Watts in 1 to 100,000 Ohms Ranges

Fixed taps or Edison type base are  
also available.

Wirt Power Resistors are  
precisely space wound  
to exacting quality  
standards for maximum  
reliability in long trouble-  
free operation. They are  
rated for hot spot  
temperature of 260° C in  
an ambient of 40° C.  
Stock sizes are available in  
all standard RETMA  
values. Vitreous enamel  
coating is moisture-proof,  
acid resistant and  
permits rapid heat  
dissipation.  $\pm 5\%$  standard,  
however, special  
tolerances are available.

## LOW POWER RESISTORS

1/3 - 1/2 - 1 Watt Sizes

Axial Lead • Phenolic Molded • RETMA Color Coded

## POTENTIOMETERS and RHEOSTATS

Steel Housed MINIATURES

These small size wire wound controls are popular for use in compact circuitry,  
and are available in 6 styles including printed circuit style. 1.5 watt rating with  
5 to 15,000 ohms linear range in  $\pm 20\%$  standard.

# POWER SUPPLIES UNLIMITED

We manufacture every type of power supply in current demand. During 1956, almost every major electronics manufacturer in the nation turned to us for power supplies.

We have the largest power supply engineering staff, the most complete and versatile power supply facility, and the most up-to-date power supply design file in the world.

NJE catalogs are the most complete and informative available.

THESE CONVENIENT NO-POSTAGE CARDS WILL BRING YOU THE ONES YOU WANT. USE ONE TODAY. YOU MAY NEED THE INFORMATION TOMORROW!

## POWER SUPPLIES UNLIMITED

**TRANSISTORIZED**  
The most advanced circuits and modern compact packaging yield completely dependable high-performance supplies that are years ahead. NJE was transistorizing early in 1955, has produced almost half a million dollars worth. Commercial and MIL, standard and custom, AC to DC, DC to DC (inverters). Small, cool, light, rugged, inexpensive. Power-zener regulators, too!

**THYRATRON**  
With or without our famous ZERO-LAG feature, these supplies still lead in popularity for low-voltage, high-current, surge-demand applications. 240 Models are available in 1-4 weeks; literally thousands of custom variations, including constant-current, are on a 6-8 week delivery cycle. Unmatched for large computer applications!

**VACUUM-TUBE**  
Catalog designs offer Standard-grade economy or Laboratory-grade precision, in single or dual models. Chopper-cell super-regulation, constant-current, programmable, interreferenced . . . endless custom variations.

**MAG-AMP**  
Fast-response magnetic-amplifier supplies, with or without transistorized preamplifiers. We offer unusual experience in Custom MIL-spec mag-amp equipment.

**BRUTE FORCE**  
The widest line of Selenium, Silicon, and Germanium-rectifier supplies, with and without line regulators and/or ZERO-LAG. Fast custom service. Over a million dollars worth of NJE semi-regulated supplies are in service!

**CUSTOM IS STANDARD AT NJE**  
Our production is geared to custom work and a short delivery cycle. Over 75% of our activity is custom-designed. Everything under one roof: sheet metal, finishing, transformer design and production, engineering, drafting, assembly, and test. Write for our "Custom Design File".

# Fenwal Precision Temperature Control and Detection Devices

## CONTROL ELEMENTS OF THERMOSWITCH® UNITS

In Standard Types and Sizes, also Midget and Miniature Units, control is based on a differential expansion principle, simple and unique. A single-metal shell always in direct contact with the medium being controlled, contracts or expands instantly with temperature changes, making or breaking electrical contacts.

In Snap-Action Units, control is provided by an expandable liquid acting on a bellows assembly.

The bellows motion, actuated by volume changes of the liquid, operates the switch contacts through a push rod. In Fenwal units, the liquid is outside the bellows, adjacent to the shell, for shorter heat transfer path and greater sensitivity.

In All Units each control setting is easily adjustable. High resistance to shock and vibration is characteristic, together with hermetic-sealing and many different temperature ranges.

### INDUSTRIAL UNITS

A standard, cartridge type THERMOSWITCH unit. Compact, self-contained in a wide variety of mounting heads for temperatures ranging from  $-100^{\circ}\text{F}$  to  $+400^{\circ}\text{F}$ , or  $+100^{\circ}\text{F}$  to  $+600^{\circ}\text{F}$ . Also furnished in higher ranges Bulletin MC-135.

### ELECTRONIC CONTROLLERS

**Thermistor Indicator Controller (Series 560).** For industrial or laboratory applications. Sensitivity 0.25% of scale range. Temperature ranges  $-100^{\circ}\text{F}$  to  $+600^{\circ}\text{F}$ . Available in single or dual range models. Bulletin MC-140.

**Unit Thermistor Controls (Series 530).** For all modern control equipment, systems and processes. Utilizes temperature-resistance property of thermistors in a new "electronic building block" concept of precision temperature control. Bulletin MC-133A.

### SNAP-ACTION UNITS

**Single and Dual Types.** Single has one snap-switch, dual has two. For high current applications, controls loads up to 20 Amps, 125 Volts D.C., or 10 Amps, 250 Volts A.C. without relays. Liquid-filled sensing element assures minimum heat transfer path, fast response, control within  $\pm 2^{\circ}\text{F}$ . Thousands of variations possible. Temperature ranges: from  $-75^{\circ}\text{F}$  to  $+300^{\circ}\text{F}$ . Single Type Bulletin MC-120. Dual Type Bulletin MC-143.

### NEW TEMPERATURE INDICATING CONTROLLERS

The New Series 541 bulb-and-capillary controllers offer single or dual switch control, choice of four snap-switch types and four temperature ranges:  $-150^{\circ}\text{F}$  to  $+200^{\circ}\text{F}$ ,  $50^{\circ}\text{F}$  to  $200^{\circ}\text{F}$ ,  $50^{\circ}\text{F}$  to  $400^{\circ}\text{F}$  and  $50^{\circ}\text{F}$  to  $700^{\circ}\text{F}$ . Special ranges available on request. Corrosion-proof capillaries and bulbs assure long life and easy operation — in over 576 design variations for temperature control problems. Bulletin MC-139.

### MIDGET AND MINIATURE UNITS FOR TIGHT SPOTS

**Midget Units.** Outside stainless steel shell diameter of  $\frac{1}{4}$ " provides high sensitivity and resistance to vibration, assuring accurate control under severest conditions. Temperature range:  $-50^{\circ}\text{F}$  to  $+500^{\circ}\text{F}$ . Bulletin MC-124.

**Miniature Units.** Sugar-lump size, but with the same stainless steel shell and efficient performance of the Midget. Temperature range:  $-20^{\circ}\text{F}$  to  $+275^{\circ}\text{F}$ . Available in adjustable or hermetically-sealed types. Bulletin MC-124.

# RF WATTMETERS | DUMMY LOAD RESISTORS | VSWR METERS

*MicroMatch* is the registered trade name which identifies a complete line of M. C. Jones Electronics Co., Inc. R. F. Power and VSWR measuring instruments.

These instruments contain a patented circuit designed to produce an output essentially independent of frequency. They cover the frequency range of 0.5 to 4000 mcs. and power levels of 10 milliwatts to 120 kilowatts.

The R. F. Power and VSWR instruments are rugged field and laboratory type complete measuring equipment, consisting of both coupler and indicating units.

The DC and RF output coupler units only are sold principally to manufacturers who incorporate these units directly into government or commercial type transmitters.

Because they are made in quantity to the highest government and commercial standards, MICROMATCH instruments combine the highest quality with extremely low cost.

Please write for our 46-page catalog describing the complete M. C. Jones line.

## RF POWER and VSWR INSTRUMENTS

Model No.	Frequency Range (mcs.)	Power Range Incident & Reflected (watts)	RF Connectors and Impedance
261**	0.5 - 225	0 - 1000	Type 83-1R 52 ohms
262	-	0 - 1000 (relative)	Indicator only
263	0.5 - 225	0 - 10; 100; 1000	Type N* 52 ohms
701N	20 - 2000	0 - 1.2	Type N* 52 ohms

711N	25 - 1000	0 - 30; 75; 300	Type N* 52 ohms
405B8	28 - 2000	0 - 4000	N plus 83-1R Adapters
445A9	28 - 2000	0 - 12,000	1 5/8" Flange 51.5 ohms
445A10	29 - 2000	0 - 40,000	3 1/8" Flange 50.0 ohms

## DC OUTPUT DIRECTIONAL COUPLERS

Model No.	Frequency Range (mcs.)	Power Range Incident & Reflected (watts)	RF Connectors and Impedance
576N1	42 - 2000	1.2	Type N* 52 ohms
576N2	28 - 2000	0 - 4	Type N* 52 ohms
576N3	20 - 2000	0 - 12	Type N* 52 ohms
576N4	46 - 2000	0 - 40	Type N* 52 ohms
576N5	42 - 2000	0 - 120	Type N* 52 ohms
576N6	28 - 2000	0 - 400	Type N* 52 ohms
402B8	28 - 2000	0 - 4,000	1 5/8" Flange 51.5 ohms
442A9	28 - 2000	0 - 12,000	3 1/8" Flange 50.0 ohms
442A10	20 - 2000	0 - 40,000	3 1/8" Flange 50.0 ohms

## RF OUTPUT DIRECTIONAL COUPLERS

Model No.	Frequency Range (mcs.)	Coupling Attenuation	RF Connectors and Impedance
313N3	300 - 2000	30 db	Type N* 52 ohms
313N4	120 - 2000	40 db	Type N* 52 ohms
313N5	60 - 2000	50 db	Type N* 52 ohms
313N6	30 - 2000	60 db	Type N* 52 ohms
313N7	25 - 2000	70 db	Type N* 52 ohms

## ABSORPTION TYPE RF WATTMETERS

Model No.	Frequency Range (mcs.)	Power Range (watts)	RF Connectors and Impedance
621N	1 to over 1000	0 - 120 milliwatts	Type N* 52 ohms
623N	1 to over 1000	0 - 1.2	Type N* 52 ohms
624N	1 to over 1000	0 - 4	Type N* 52 ohms
625C5	50 - 1000	0 - 120	Type C 50 ohms
611A7	50 - 1000	0 - 1200	3 1/8" Flange 50 ohms
612A	44 - 1000	0 - 6000	3 1/8" Flange 50 ohms

## RF LOAD RESISTORS

Model No.	Frequency Range (mcs.)	RF Power Dissipation (watts)	RF Connectors and Impedance
633N	3000	50 (air cooled)	Type N* 52 ohms
635N	3000	200 " "	Type N* 52 ohms
636N	3000	600 " "	Type N* 52 ohms
636A	2000	600 " "	3 1/8" Flange 50.0 ohms
638A	2000	6000 (water cooled)	3 1/8" Flange 50.0 ohms

## CALORIMETRIC TYPE Primary Standard of RF Power

Model No.	Frequency Range (mcs.)	Power Range (watts)	RF Connectors and Impedance
641N	0 - 3000	0 - 3; 10; 30; 100; 300	Type N 52 ohms

\*Also available with UHF, C, and HN Connectors.  
\*\*Coupler Unit Only for use with 262 Indicator.

# Constantin GLASS-TO-METAL SEALS

YOUR "INSURANCE POLICY" FOR

## RELIABLE OPERATION

Wherever glass-to-metal sealing is needed to insure long life and continuously high performance, Constantin seals give your components a big bonus "premium" in endurance and protection.

Constantin's experienced research and production engineers have designed and manufactured thousands of different glass-to-metal seals for specific applications. Its complete research, design and manufacturing facilities . . . machine shops for die construction, stamping, wire cutting and forming . . . and separate glass shops . . . provide prompt action on any work order.

For any glass-to-metal electronics application where a positive, efficient, vacuum-tight seal is a critical need, Constantin can meet your technical specifications with a custom designed unit. Improve the quality of your components . . . "insure" their high performance by making Constantin seals a major part of your production "policy." Write today for complete details.

### ALL-IN-ONE ASSEMBLIES

Constantin can design an original seal to meet the special needs of your equipment. All-In-One Assemblies come with different types of internal and external mountings, doing away with expensive sub-assemblies and costly production line operations such as hole stamping, brazing, soldering, mounting of seals, etc.

### SINGLE TERMINALS

Extensive line of Single Terminals includes high compression and kovar types. Available Standard Pin types include pierced flats, hollow tubes, turret heads, tubulations with self-lugs, straight ends and cane or goose neck hooks.

### TRANSISTOR AND DIODE MOUNTS

For any soldering or welding application, Constantin has a complete line of Transistor and Diode Mounts which provide complete protection from moisture, dust, heat conditions and shock.

### END SEALS

These quality units are designed and produced for electronic components which must stand up under extended operation . . . such as rectifiers, capacitors, resistors, delay lines, etc. Many different types and sizes are continually being developed to meet varying technical requirements.

### CRYSTAL BASES AND COVERS

Constantin's Crystal Bases and Covers are world-known and have been widely used for many years by components manufacturers. They meet all military specifications and can be manufactured in varying designs with standard and special crystal mounts.

### CONNECTORS

Constantin Connectors are made with special steel alloys which are combined with glass using high compression techniques. Any desired finish can be supplied to meet all present anti-corrosion requirements. Constantin is especially known for the construction of standard and unique flanges and pin types.

### ALL-METAL HIGH COMPRESSION HEADERS

Special fusing techniques are used in the manufacture of Constantin's All-Metal Headers. Standard types find use in countless applications . . . in relays, transformers, thermostats and many others. If your technical specifications encompass a special unit, Constantin will design a seal for your equipment.

### MULTIPLE HEADERS

Constantin's plug and standard type Multiple Headers are manufactured with precision by advanced engineering techniques. Their rugged construction enables them to withstand thermal shock and assure continuously reliable operation. Available in many standard configurations and special designs.

# TRANSFORMER

GET IN TOUCH WITH

Acme  Electric

If you buy transformers on a "quality foremost" basis, then you should be interested in the advantages of having Acme Electric produce the transformers you need.

If you need engineering help with a design, we have a staff of qualified engineers to assist you. If you need quantity production quickly, we have every modern facility and carry large stocks of basic supplies to ship your production requirements as your needs demand. And, with our modern production equipment, experienced assemblers, we quote prices that are usually competitive.

## NIXIE NUMERICAL INDICATORS

Burroughs all electronic indicators are gas-filled, cold cathode tubes, having a common anode with as many as 10 combinations of numerical or alphabet symbols. They are intended for use as a direct, in-line, readout device.

The 6844 is a ten digit numerical indicator tube with digits 0 through 9.  
Rating:  
170 v Dc  
1.0 to 2.2 MA

"MINIATURE"

BD200 is a miniature numerical indicator same as 6844 except 4 x smaller volume, 40% less diameter.  
Rating:  
170 v Dc  
0.5 to 0.9 MA

ALPHABET same as 6844 except cathodes are shaped in the form of letters instead of digits. Combinations can be made as desired.

## PIXIE POSITION INDICATOR

The HB-105 is a gas filled, cold cathode, 10 position read-out device, having a common anode. It features 10 glow positions, 36° apart, visible through 10 numerical perforations (0 to 9) in the common anode, in the manner of an internal bezel.

## TRANSFER STORAGE COUNTER

Burroughs' TS-204 with Magnetron Beam Switching Tubes counts, stores, and samples at predetermined intervals. It has the ability to sample high-speed information without stopping the count or losing the original data.

The design of this versatile unit allows visual storage display on the Burroughs' in-line numerical indicator tube, "Nixie", and direct operation of most standard print-out devices. Applications include:

- Data Handling Systems
- Telemetry Monitoring Systems
- Automatic Processing Control
- Events Per Unit Time
- Instrumentation

This Decade Counter combines the reliability of the Beam Switching Tube with the human-engineered "Nixie" to set a new standard in performance and appearance. These plug-in units have been designed for a minimum panel height with provisions for manual and electronic zero setting. Three models are available:

Type	Counting Rates
DC-101	10 kc
DC-102	100 kc
DC-103	1 mc

## DECADE COUNTER

(with nixie readout)

## ACCESSORIES

### SOCKETS

- HSK100-R1 (for 6700 & 6701)
- HSK106 (for regular 6844)
- HSK112 (for 6844)
- HSK109 (printed circuit for 6844)
- HSK105 (for M010R)
- HSK111 (for HB105)

### TEST CHASSIS

- TC100 (for 6700)
- TC101 (for 6701)
- TC10R (for M010R)

### TUBE CLAMPS

- HCL100 (for 6700-6701 M010R)
- HCL102 (for 6700-6701 M010R)

### PULSE TRANSFORMERS

- PT100 Blocking oscillator
- PT102 Directly coupled (Pulse standardizer)

### PIN STRAIGHTENERS

- LS-100 26 pin (6700, 6701, M010R)
- LS-101 20 pin (M010R)
- LS-102 13 pin (Nixie)
- LS-103 13 pin (Pixie)
- Wiring Plugs available

Write today for complete technical engineering data on any of the above items.

## TRANSISTORIZED TEST EQUIPMENT

### WAVEFORM GENERATOR

500

A truly portable signal source for rapid response tests in the audio and video region.

Pulse, squarewave, clipped sawtooth output. Continuously variable repetition rate and amplitude.

SIZE: 8½" by 5" by 4½"

WEIGHT: 5 pounds.

### PULSE GENERATOR

502

A Battery Powered Pulse Generator which operates as well in the field as in the laboratory.

Provides stable pulses completely free from hydrogen-thyratron jitter. Permits amplitude modulation of the output.

SIZE: 6¼" by 8½" by 5¼"

WEIGHT: 5¼ pounds.

### FREQUENCY METER

503

Provides accurate, direct frequency measurements from 3 to 100,000 cps in nine separate ranges.

Accuracy is independent of waveform or amplitude. No sensitivity control is required and the instrument requires no warmup.

SIZE: 11¼" by 8½" by 7"

WEIGHT: 8½ pounds.

### TRANSISTOR CURVE TRACER

504

This fully transistorized, self-powered instrument measures the transistor characteristics most useful for design activities.

Eight curves of collector voltage vs. collector current are presented by electronically stepped values of base drive. An accessory, Transistor Test Fixture provides rapid short-safe inspection.

SIZE: 6¼" by 8½" by 8"

WEIGHT: 5¼ pounds.

### 30 MC GENERATOR

505

An RF signal source designed as a companion piece to the Model 500 and Model 502. Co-use provides a wide variety of amplitude modulated RF waveforms.

Alone, it serves as a handy source of CW RF Energy.

SIZE: 3½" by 6" by 3½"

WEIGHT: 1 pound.

# CONSTANT PRODUCT DEVELOPMENT

## POWER MEASURING EQUIPMENT

**CALORIMETRIC WATTMETER**  
**LIQUID CIRCULATOR**

Measures, in nomographic form, the temperature rise of the calorimetric fluid to watts of average power dissipated in the Calorimetric Termination. These instruments exhibit matched rf characteristics over an exceptional frequency range.

Freq Range 2.6 to 26.5 KMC  
Av'g Power 0-600 watts  
Peak Power 600 kw

**MICROWAVE TERMINATION**

MC 1B

**PEAKPOWER TEST SET**  
**100 X**

Provides direct-reading power measurements from 10 microwatts to 3 milliwatts. Through the use of directional couplers, measurements up to the megawatt region are made with speed and convenience.

Operates from 8.5 to 9.6 MC at any repetitive rate from 10 cps to 20,000 cps.

## MICROWAVE INSTRUMENTATION

**KLYSTRON POWER SUPPLY**  
**701**

The ideal Klystron Power Supply for all general microwave laboratory applications. Includes metering provisions for beam voltage and current and repeller voltage. Occupies minimum bench space.

Beam voltage 200 to 500 v, 65 ma at top end.

Reflector voltage 0-900

At 1 ma, 1% regulation with less than 1% ripple.

**STANDING WAVE AMPLIFIER**  
**601**

Offers increased sensitivity and flexibility for routine VSWR and attenuation measurements. Outstanding performance is attained through a unique design which features extensive use of low-noise techniques.

0-60 db decade switch and continuous gain adjustment are combined in a single concentric control.

Sensitivity, full scale at 0.3 microvolts, VSWR 1.00 to 10 in two ranges.

**MICROWAVE TEST SET**  
**801**

Consists of the Model 601 Standing Wave Amplifier and the Model 701 Klystron Power Supply. Ideally suited for microwave test bay application and includes all the electronic instrumentation necessary for VSWR and attenuation measurements together with a Klystron Power Supply that is the favorite in industrial and military laboratories.

Cubic Corporation's product line has been conceived to follow the military trend toward transistorization. The Military finds these instruments well suited to the versatile requirements of electronics testing.

## New Products

The HOP-STRETCHER feeds offer higher gain, lower sidelobe levels and more desirable beam-widths for center-fed parabolic antennas. This feed was developed for S, X, K<sub>a</sub> and K<sub>b</sub> bands.

**Technical features of X-band antenna** • Sidelobes at least 24 db down on 4, 6, 8 and 10 ft. reflectors • High gain efficiency, 65-70%

THE HOP STRETCHER  
GABRIEL'S 7000 MC RELAY ANTENNA FEED

The new hi gain 3 kmc Cylindrical Coaxial Feed provides similar E and H-plane patterns, minimum side and backlobes, and negligible squint. Rear-mounted, with easy polarization adjustment to any angle.

7000 mc Offset Antenna. Ideal for installations where passive reflectors are utilized — VSWR less than 1.10:1 over 5900-8500 mc — Sidelobes at least 24 db down — gain is 41 db at 7000 mc. Elliptically shaped reinforced fiberglass reflector.

The new X-band parabolic antenna with standard feed. Features variable polarizing adjustment, 0 to 90°. Manually locked in position.

The new universal 3-point suspension mounting bracket for 2, 4, 6, 8 and 10 ft. parabolic reflectors.

**Features** • Independent azimuth adjustment. • Independent elevation adjustment. • Adaptable for mounting in all locations.

Broadband, HF to SHF, Directional Antenna Group — Remotely controlled.

Low-drag Airborne Flush-mount Antenna.  
Beacon — Countermeasures — Homing — Navigation

Missile Antennas — Telemetry, Destruct, Guidance  
ICBM, Land-to-Air, Air-to-Air, and Land-to-Land.

### Radar Antennas

- Shipborne Search
- Harbor Control
- Airborne Height Finding
- Land Base Search

Designed, developed, and constructed to military specifications with improved strength-to-weight ratio and component reliability.

Aleutian Line—Dew Line  
Low loss, heavy duty duplex feed horns for Tropospheric Scatter Radio Communication Systems.

Motorized Passive Reflector  
For maximum point-to-point transmission in microwave relay links. Fast, accurate, easy adjustment from remote location. Manually adjusted reflectors also available.

The Gabriel Electronics Division is one of the world leaders in microwave relay link antennas, and the more complex antennas. They are dedicated to improve and extend the state-of-the-art in antennas and antenna components.

Call or write to GABRIEL ELECTRONICS DIVISION for counsel on your antenna needs.

Digital Indicator (left) can display a possible 16 characters and is about half the size of the alpha-numerical Indicator (right) which displays 64 characters.

## UNION INDICATORS

### for Data Display Storage and Transfer

UNION Digital and Alpha-numerical Indicators are electro-mechanical, D.C.-operated readout devices for displaying characters in accordance with a predetermined code. The character display may be made to suit the users' requirements.

Indicators are designed for plug-in mounting in a row so that data or messages of any desired length can be stored, displayed or transmitted at will. The indicators can be applied to the output of digital computers, teletype receiving equipment in conjunction with a buffer storage unit, telemetering systems, or wherever data needs to be displayed.

An important feature of these indicators is their inherent storage and transmitting characteristics, which provide for data entry and

retransmission. The indicators can be used to accept data from a source, free the source for other programs, and disseminate the data from one indicator to another as required.

*Two interesting applications:* The Alpha-numerical indicator is being used in data display equipment for flight control built for CAA wherein data enters the system by keyboard or via teletype at 60 words a minute, or from magnetic drum storage at speeds up to 1000 words per minute.

The Digital Indicator is being used in pipeline remote control systems, for displaying and storing telemeteral data such as temperature, pressure, flow, etc. in a central office. Write for Bulletin No. 1011 for further information.

### DIGITAL INDICATOR

A new lightweight Digital Indicator for data display has been developed by Union Switch & Signal that has many uses in aviation and other industries. It is designed for either local or remote use, on a direct wire basis, and responds to binary code. The indicator reads out directly and has a non-dissipating storage facility. Data can be printed out if necessary. Write for Bulletin 1011.

## UNION

### MINIATURE RELAYS AC or DC

A wide variety of UNION AC or DC Miniature Relays, with all standard mountings, is stocked for immediate shipment. Contacts can be gold alloy, palladium or the new HI-LO material which permits the use of one relay for both high-level loads of two amperes and low-level, dry-circuitry loads, eliminating the need for two separate relays.

Coil resistance runs up to 13,500 ohms, vibration resistance up to 2000 cycles at 30 G's, and shock in excess of 50 G's. Write for Bulletin 1012.

HIGH TEMPERATURES CALL FOR

# HITEMP WIRES

(-90°C. to +250°C.)

**TEFLON® MAGNET WIRE — "TEMPRITE"** Sizes 14 to 50 AWG, single, heavy, triple, or quadruple thicknesses.

**SPECIAL TEFLON MAGNET WIRE — "TEMPRITE X"** Same characteristics and sizes as regular Temprite, but specially processed for severe application.

**FLEXIBLE TEFLON TUBING — "TEMPRENE NON-RIGID"** Sizes 10 to 26, solid colors and special striped combinations.

**TEFLON EXTRUDED TUBING — "TEMPREX TUBING"** Sizes 4 to 24. Fourteen solid colors.

**TEFLON HOOK-UP WIRE — "TEMPRENE"** Sizes 14 to 30 AWG. Two and three color striped combinations, plus 10 solid colors. Conforms to MIL-W-16878B (E and EE).

**TEFLON EXTRUDED HOOK-UP WIRE — "TEMPREX"** Sizes 10 to 32 AWG, in both striped and solid colors. Conforms to MIL-W-16878B (E and EE).

**TEFLON INSULATED LEAD WIRE — "TEMPCLAD"** Teflon insulated lead wire with an outer covering of Teflon impregnated glass fiber braid. Sizes 8 to 30 AWG.

**TEFLON FIBER LACING TAPE "NEBROC® TF"** All Teflon lacing tape, exhibits excellent thermal and mechanical properties. An ideal tape for Class H assemblies.

**TEFLON GLASS FIBRE SLEEVING — "TEMPTUBE"** Available in sizes up to 1¼" I.D. Colors on request.

**SILICONE MAGNET WIRE — "THERMALON"** Sizes 14 to 42 AWG Incl. Used for temperatures from -54°C. to +150°C. Made in single or heavy thicknesses.

**SHIELDED AND JACKETED MINIATURE CABLES** Consist of Temprene or Temprex conductors, shielded and jacketed for high temperature operation.

**MINIATURE COAXIAL CABLES** Consist of 50, 75 and 95 ohm cables, shielded and jacketed for applications up to +250°C.

**RIBBON CABLE ASSEMBLIES — "TEMPBRAID"** 100% Teflon, flexible, flat ribbon multi-conductor cables.

**SHIELDED RIBBON CABLES — "METALBRAID"** Flexible, shielded, flat, multi-conductor cables, i.e. tinned or silver plated copper.

**TEFLON MARKING FLUID** Teflon printing ink available in ten standard colors. Can be used for printing codes, etc., on Teflon.

**SURFACE TREATED TEFLON WIRES** Adherence of varnishes and compounds on Teflon and magnet hook-up wires now practical.

**REINFORCED STANDARD CONDUCTORS — "HIGH STRENGTH"** Mechanically improved Teflon insulated hook-up wires meet all requirements of MIL-W-16878. Sizes 24-32 AWG.

\*Du Pont's Trade Name for POLYTETRAFLUOROETHYLENE

All Teflon products are rated for continuous operation from -90°C to +250°C., have excellent dielectric strength, and are impervious to all commercial solvents. All colors conform to MIL. Std. 104.

*"Leading Specialists in High Temperature Insulations"*

# The word for mobile, air-transportable systems is **CRAIG!**

In this increasingly mobile age of electronics, nearly everything that must move swiftly and arrive safely can do it better in Craig-designed and built shelters and carriers. Complete electronic systems — with equipment installed and ready to operate — travel in rugged, roomy vans like the LM-105 you see on this page. Other systems fly direct — for a helicopter can transport an entire system

when that system is housed in a lightweight Craig Helicop-Hut LM-104. New developments like these . . . plus matchless experience in the field . . . and Craig's complete, design-through-installation service . . . are excellent reasons why you can turn to Craig with complete confidence when you have a problem in mobile, air-transportable systems.

From Craig: A COMPLETE LINE OF MOBILE, AIR-TRANSPORTABLE SHELTERS, VANS, TRAILERS LIKE THESE . . .

**TRAILER VAN LM-105** — Transportable by land, sea, or air. 7,000 lb. payload. Detachable chassis. 2" thick honeycomb insulation for walls, floor, ceiling. Inside dimensions: 140" x 90" x 79". Easily detachable from dolly for aircraft, ship, or rail loading.

**HELICOP-HUT\* LM-104** — Lightweight (950 lbs.) Payloads up to 6300 lbs. Aluminum skins with foamed-in-place plastic core. Inside dimensions 76" x 76" x 96". Insulated. Highly adaptable. Quickly attachable dolly for towing overland.

Designed for world-wide use — **RUGGED, DEPENDABLE, CRAIG-BUILT PRODUCTS LIKE THESE . . .**

**CONSOLES** — For air traffic control and other installations. Provision for remote control equipment, loud-speakers, etc.

**REUSABLE CONTAINERS** — For transporting and storing airplane parts, optical systems and electronic equipment. Aluminum construction. Built to pass all applicable government specifications.

**MISSILE CARRIERS** — Lightweight, aluminum construction. Fully tested for shock, vibration, impact and submersion. Craig's missile programs include carriers for Falcon, Petrel, Sidewinder, Terrier, and Sparrow.

**RELAY RACKS** — Rugged, high strength, aluminum construction general purpose electronic racks. Accommodate standard RETMA panels. Drawers and accessories available.

**SPARE PARTS CABINETS** — For indoor and outdoor storage. Many sizes and configurations. Removable drawers, doors and covers. Aluminum or steel.

**ANTENNA TOWERS** — Full information on towers for supporting all types of antennas on request.

**COMPLETE INSTALLATION SERVICE** — Craig service includes layout, installation, and check-out of electronic equipment in shelters of all types. Complete systems are ready to operate when they leave the factory.

**NOISE AND FIELD INTENSITY METER, Model NF-105**  
(Commercial equivalent of AN/URM-7) 150 KC to 1000 MC

Four quick-change tuning heads • Single knob tuning for easy scanning  
Built-in impulse generator serves as calibrator • Carrier and peak reading  
VTVM • Aural slideback • Coaxial step attenuators • Regulated 'A' and  
'B' supply.

**UHF ATTENUATORS, Models AT-50, AT-60**

50 ohm resistive T-networks of concentric line construction.

**FREQUENCY RANGE:**

AT-50: DC to 4000 MC.

AT-60: DC to 3000 MC.

VSWR: Better than 1.2 at all frequencies.

**ACCURACY:**  $\pm 1/2$  DB.

**RATED POWER:**

AT-50: 1W continuous

1KW peak

AT-60: 2W continuous

2KW peak

**STEP ATTENUATORS, Models AT-103, AT-104**

These units use AT-50 pads in 6 step and 12 step coaxial turret arrangements respectively.

**COAXIAL TERMINATION, Model TE-80**

1 watt, DC to 4000 MC.

**VARIABLE FREQUENCY POWER SUPPLY, Model VP-400**

POWER OUTPUT: 500 watts

VOLTAGE REGULATION:

2%, no load to full load

HARMONIC DISTORTION:

5% maximum, total, (to 400W).

**COAXIAL CRYSTAL MIXER, Model CM-107**

Broad Band, Fixed Tuned • 225 MC to 5600 MC in 8 models • Input and L.O. VSWR better than 2 to 1 • L.O. rejection at IF output better than 30 DB.

**CRYSTAL DETECTOR, Model DT-123**

**UHF IMPULSE GENERATORS, Models IG-102, IG-115, IG-118**

Model	Flat Spectrum ( $\pm 1/2$ DB)	Peak Output Level	Repetition Rate
IG-102	10 KC to 1000 MC	70,000 $\mu$ V/MC	2.5 to 2500 cycles
IG-115	10 KC to 1000 MC	100,000 $\mu$ V/MC	60 cycles
IG-118	100 MC to 10,000 MC	9,000 $\mu$ V/MC	2.5 to 2500 cycles

**POWER DIVIDERS, Model PD-90**

FREQUENCY RANGE: 800 to 10,000 MC in 5 models,

For complete engineering data, please send for our new Catalog No. 357

**POWER SERVO AMPLIFIERS**

Servos available for practically all standard 60 and 400 cps motors, from 1 watt up to 2000 watts. Completely self-contained. Can be supplied with means for stabilizing servo system performance for various parameters such as load inertias, gear ratios, etc.

**Application-tested  
MA Inc. Standard  
Products and  
Custom-engineered  
Equipment**

including magnetic servo amplifiers, variable speed drives, miniature amplifiers, analog computers for special applications, photo-electric controls, regulated power supplies and automatic control equipment. Call or write for bulletins or recommendations on your control or systems engineering problems.

**PRECISION AIRBORNE POWER SUPPLIES**

Originally developed by MA Inc. for the reference circuit of intercontinental guided missiles. Unique design employs magnetic amplifiers in combination with high reliability vacuum tubes, silicon diodes and a special constant temperature oven.

**HYDRAULIC VALVE AMPLIFIER**

Miniaturized, high performance magnetic amplifier for critical applications. High gain, fast response achieved in single stage by operating at a supply frequency of 5000 cps or 3600 cps. Designed for controlling hydraulic servo valves and other low power output devices.

**MINIATURE SERVO AMPLIFIER (TRANSI-MAG®)**

Compact design for missile and aircraft servo applications. Features high gain, fast response, drift-free characteristics. Completely self contained, requires no power supply, demodulation or pre-amplifier. Complete high performance servo loop obtained without additional amplification.

**EMA SPECIAL ANALOG COMPUTER**

For missile acquisition systems. Computes elevation and azimuth, amplifies data and positions theodolite via servo system to track missile continuously; computes rate of change of position and interpolates future position of missile to position theodolite. Includes rotating and magnetic amplifier regulated power supply.

**TRANSISTOR AND POWER-TRANSISTOR CURVE TRACER**

Displays collector and transfer curves on cathode ray oscilloscope. Handles all types of transistors and power transistors. Curve tracer permits rapid determination of parameters. For selecting, matching and detecting anomalies and rejects.

**STATIC FREQUENCY MULTIPLIERS**

For the conversion of A.C. power at the commonly available frequencies to high frequency multipliers. Frequency conversion is accomplished by magnetic circuits without the use of vacuum tubes. Single or multi-stage units for operation from single phase or polyphase supply lines can be designed to fit specific applications.

**MAGNE-SPEED VARIABLE SPEED DRIVES**

Designed to provide high efficiency operation at low cost. Combine smooth stepless speed control with 50:1 speed range. Non-electronic, they require no warm-up or costly maintenance. Excellent regulation without tachometer; quick response to load changes.

STANDARD SIZES

JUNIOR	1/8 to 1/100 Hp.

# CORNING GLASS WORKS

Products for  
Radio, TV and  
Electronics . . .

## CAPACITORS

To MIL-C-11272A specs  
Fixed-glass . . . Rugged  
high-temperature reliability  
Extreme miniaturization

Dielectrically excellent glass and alternate layers of conductor fused by heat and pressure into a rugged monolithic form. Values cannot be altered except by complete mechanical destruction. TC is plus  $140 \pm 25 \text{ ppm}/^\circ\text{C}$ . from  $-55^\circ\text{C}$ . to  $+85^\circ\text{C}$ . Excellent retrace. TC variation between capacitors: under 15ppm. Negligible capacitance

drift. Moistureproof. Sizes CY10, CY15, CY20, CY30. Custom variations to your specifications. (Distributed by Erie Resistor Corp.)

Medium-power transmitting

CY60, CY70. Small, light, strong. Ideal for mobile RF transmitters. Electrically replace mica types CM45—CM70, offer many advantages.

High-capacitance, canned\*

Characteristics and advantages of glass construction, to your specifications. Values and canning to your specifications.

Subminiature, tab-lead\*

Up to 90% volume reductions possible when compared with wire lead types.

Extreme dependability plus temperature and moisture resistance in tiny-case sizes. To specification.

Special combination\*

Advantages and characteristics of glass construction and performance in an infinite variety of shapes, sizes, leads, for unusual assignments.

## RESISTORS

Type N . . . accurate  
Stable, economical

Critical accuracy and extreme stability, even under high temperature, high moisture, vibrating conditions. Range:  $\frac{1}{2}$ , 1, 2W. Operate to  $140^\circ\text{C}$ . ambient temperature with derating. Low noise level. Voltage coefficient less than .001% per volt average. Infinite load life. Average resistance change after 10,000 hours rated dissipation is less than 1.0%. Permanent resistance change after standard 5-second overload of 6.25 times rated power is under .75%. And Corning Type N's are low-cost. To MIL-R-10509B specs.

Low-power resistors . . .  
Highest resistance range of any low-power resistor

Small, noninductive and stable. *Low-priced!* Like all Corning resistors, the fired-in conductive film is tough, abrasion-resistant, requires no special handling. Resistance spiralled automatically under electronic control for interchangeability. Impervious to moisture. Range: LP3—3W., 200—20,000 ohms; LP4—4W., 200—40,000 ohms; LP5—5W., 200—45,000 ohms; LP7—7W., 200—36,000 ohms; LP10—10W., 200—70,000 ohms. Tolerance  $\pm 10\%$ . With derating, operate at ambient temperatures over  $120^\circ\text{C}$ . (Distributed by Erie Resistor Corp.)

Type S . . . high-temperature  
to MIL-R-11804B specs

Stable performance to  $200^\circ\text{C}$ . without encapsulation or hermetic sealing. Low-voltage coefficient, negligible inductive and capacitive effects. Difficult to measure noise level. Made to customer specifications rather than RTMA values. Size:  $\frac{1}{2}$ , 1 and 2W at  $120^\circ\text{C}$ . ambient.

Type R . . . high-power  
2% resistors—to 1 M $\Omega$

Range from 10 to 1,000,000 ohms, ratings from 7 to 115W., are noninductive. Well suited to sharp pulse work. Vertical or horizontal operation. Operate up to  $200^\circ\text{C}$ .; hot-spot temperature to  $235^\circ\text{C}$ . Meet MIL-R-11804B specifications.

Type H . . . high frequency  
Save space

For dummy antennas, circuit loading, damping and terminating. Also for circuits subject to steep surges and saw-tooth patterns. Stable, rugged, noninductive. Standard line ranges from 10—1,000,000 ohms and has ratings of 5—140W. Also to your own requirements.

Type WC5 . . . water-cooled HF . . .  
high-power TV, FM

Mechanical design permits direct mounting on 3" coax line end at RF ground potential. Extremely versatile, adaptable. Negligible skin effect. Range: 35—300 ohms with  $\pm 15\%$  standard; 10 and 5% available, extra.

## TRIMMER CAPACITORS — METALLIZED GLASS COMPONENTS

Direct-traverse  
and midget-rotary

D.T.—For applications of extreme ruggedness plus thermal stability and smooth tuning characteristics. Has practically zero TC in the VHF range. Negligible capacity shift with widely variable ambient temperatures. With brass or invar core. Four standard ratings: 0.5 to 3.0 mmfd; 1.0 to 7.5 mmfd; 1.0 to 8.0 mmfd; 1.0 to 12.0 mmfd.

ROTARY—For outstanding performance and economy. Three capacity ranges at 50 mc. Four terminations; push-on mount with saddle-clip brass core; push-on mount with wire lead, brass core; push-on mount with solder spot, brass core; split-bushing mount with pan terminal and invar core. Also custom design and manufacture to your specifications. (Distributed by Erie Resistor Corp.)

Metallized glass  
enclosures . . . Keep  
moisture, molds,  
dirt out

Delicate components get rugged protection when they're inside these tubes. Hermetically-sealed resistors, rectifiers and capacitors. Give components the ability to withstand conditions they otherwise would not be able to. With metal end caps, tubes take thermal shock from  $275^\circ\text{C}$ . to ice water. Not affected by atmospheric change. Metallizing bond strength has been measured at 1500 to 2000 pounds per square inch. Transparent. Good electrical characteristics.

Metallized glass inductances  
Stable . . . High Q

Noted for their exceptionally high electrical stability and negligible drift characteristics, even under widely variable ambient temperatures. High Q is inherent. They can be furnished with uniform, variable, or double-pitch windings and for fixed-tuned, permeability-tuned inductance trimmer combinations. Mass produced on automatic machinery to close tolerances. You get consistent duplication.

\*Our engineering and design facilities are at your service on custom units.

You can get a growing number of products for electronics from Corning. Among them are:

- Fused silica . . . A basic new material with outstanding characteristics. 100% SiO<sub>2</sub>. For four general applications—ultrasonic, optical, ultraviolet transmission and chemical control.

- Ultrasonic delay lines . . . Rugged, accurate, reliable. Superior to mercury types. Not affected by vibration, shock. Not affected by cold.

- Fotoform and Fotoceram . . . Photosensitive glasses with interesting electronic possibilities. Printed circuit boards.

- Attenuator plates . . . Chrome and nichrome films now available in resistivities from 20 to 200 per square. To MIL-11052A specs.

Write, wire or phone Corning for catalog sheets, full information, prices.

## Wilbur B. Driver *Precision* ALLOYS

### TOPHET A® (80 Nickel 20 Chromium)

Non-magnetic, high tensile strength, temperature coefficient of resistance approximately 85 PPM, used for resistors and potentiometers, high temperature applications. 650 ohms/CMF.

### TOPHET C® (60 Nickel 15 Chromium Balance Iron)

Faintly magnetic, high tensile strength, temperature coefficient of resistance approximately 130 PPM, used for power resistors, high temperature applications. 675 ohms/CMF.

### EVANOHM® (75 Nickel 20 Chromium 2.5 Aluminum 2.5 Copper)

Non-magnetic, highest tensile strength, temperature coefficient of resistance 20 PPM maximum, used for precision resistors and potentiometers below 200°C. The original 800 ohm alloy.

### BALCO® (70 Nickel 30 Iron)

An alloy with a high temperature coefficient of electrical resistance 4500 PPM (20° to 100°C.) 120 ohms/CMF.

### CUPRON® (Copper Nickel)

A non-magnetic alloy with a low temperature coefficient of electrical resistance. Recommended for instruments and radio resistors. 294 ohms/CMF.

### RODAR® (Nickel Cobalt Iron)

An alloy for sealing to hard glass for electronic and hermetic sealing applications.

### NILSTAIN® (Stainless Steel — 300 Series)

Popular types of stainless steel in wire, ribbon or strip.

## Filament Alloys

### TENSITE, SYLVALOY, COBANIC, and MODIFIED HILO

For directly heated cathodes; alloys have excellent emissive and physical properties.

### CATHODE ALLOYS

For indirectly heated cathodes. HIGH NICKEL ALLOYS, custom vacuum or air melted for active, passive and normal emissivity.

## Grid Wire

### MANGRID® (Grade D Nickel)

Most widely used lateral grid wire, also supplied silver plated.

### PERMAGRID (Permanickel)

For use in higher temperature applications than regular Mangrid, higher physical properties and hot strength.

### PERMOCARB and MAGNOCARB

(Precarbonized grid wire)  
Operates cooler because of black body effect,

eliminates spray coating, more evenly coated, replaces Moly in certain applications.

### CARBONIZED NICKEL Radiocarb,

### Policarb,® Duocarb®

Ideal for anode plate use, gives long life, excellent thermal emission (black body) free from hydrocarbon and sulphur.

### CUPROCHROME (1 Chrome 99 Copper)

Extensively used for grid side rod, high conductivity with relatively high strength.

## Custom and Special Purpose Alloys

In addition to the alloys listed, the Wilbur B. Driver Company maintains complete melting, hot rolling and cold working equipment for the production of custom alloys for specialized requirements.

Insulations Available — Enamel, formvar, liquid nylon, cotton, silk, nylon and fibre glass coverings.

May we discuss your specific applications? Please write or call —

## 1 HIGH PERFORMANCE HYDROGEN THYRATRONS

Years of experience in the design and production of these special types have resulted in tubes that offer superior service in the generation of pulse voltages in the order of microseconds.

### CHATHAM TYPE 5949/1907

Hydrogen filled, zero bias thyratron with hydrogen reservoir for generation of peak pulse power up to 6.25 megawatts.

### CHATHAM TYPE VC-1258

Zero bias miniature thyratron for generation of peak pulse power to 10 KW. Available with 28 volt heater, ruggedized for extreme vibration.

### CHATHAM TYPE 5948/1754

Hydrogen filled, zero bias thyratron with hydrogen reservoir for generation of peak pulse power up to 12.5 megawatts.

### CHATHAM TYPE VC-1257

Hydrogen filled, zero bias thyratron with hydrogen reservoir for generation of pulse power up to 33 megawatts.

## 2 LIGHTWEIGHT CHATHAM "kotron" SELENIUM RECTIFIERS

Both electrically and mechanically, Chatham kotron Selenium Rectifiers offer important design advantages. Combining lighter weight with smallest efficient size, kotrons are built rugged to last longer. Improved design assures longer short circuit loads, twice the voltage surge of ordinary rectifiers.

## 3 ADVANCE DESIGNED AIRBORNE CONVERSION EQUIPMENT

Input - 195 to 210 volts, 3 phase, 400 cycles  
Output - 28 v. DC, 100 amps.  
Regulation - 25 to 31 volts  
Weight - under 17 lbs.

Type 28V100 Power Supply illustrated provides substantial weight savings, reduced size, greater reliability and improved electrical characteristics. Ruggedized throughout. Type 28V-100 exceeds MIL-P-7212 requirements.

## 4 CUSTOM-DESIGNED EQUIPMENT

High power Radar modulators built to government specifications.

CHATHAM specializes in the development, design and production of equipment built to customers' needs. Our engineers will supply estimates on receipt of your drawings and specifications.

**IF YOU HAVE A PROBLEM** — Chatham facilities are available for the solution of problems involving tubes and special equipment for industrial and military applications. Your inquiry will receive prompt attention.

## SA30WR1 2,000 to 16,000 mc/s

- ★ Frequency accuracy 0.5% or better
- ★ Direct-reading, calibrated Tuning Dial
- ★ Fully-tracked Repeller Voltage Control
- ★ Frequency corrected 50-db Input Attenuator
- ★ Display 100 kc/s to 10 mc/s per inch at 2,000 mc/s  
0.5 mc/s to 40 mc/s per inch at 16,000 mc/s
- ★ Sensitivity — 80 dbm at 2,000-4,000 kc/s  
— 75 dbm at 4,000-8,000 kc/s  
— 65 dbm at 8,000-16,000 kc/s

## SA30X5 8,500 mc/s to 9,660 mc/s

- ★ Frequency accuracy 0.05% or better
- ★ Direct Signal-Frequency-Reading Wavemeter
- ★ Fully-tracked Repeller Voltage Control
- ★ Precision 80 db RF Input Attenuator
- ★ Displays 100 kc/s to 10 mc/s per inch
- ★ Sensitivity — 80 dbm for usable signal

## SA30 with interchangeable RF heads 800 mc/s to 75 kmc/s

- NEW — Dual unit for standard rack mounting or portable 80-pound bench top package
- NEW — Simplified Control Panel with necessary operating controls conveniently available
- NEW — Frequency Difference Control for direct incremental measurements of 100 kc/s to 5 mc/s
- NEW — Direct Frequency Calibration without confusion with new Image Check feature
- NEW — Separate Brightness and Intensity Controls for displayed signal and baseline
- NEW — All aluminum construction for lighter weight and easier transport

## CONTRACT MANUFACTURING

### GROUND POSITION INDICATOR COMPUTER

Custom designed and manufactured by Vectron to solve navigational vector problems. Input information includes air m.p.h., compass heading, deviation, wind direction and velocity. Output is read directly as N-S and E-W components. Additional electro-mechanical circuits permit establishment of secondary flight pattern over target.

Vectron's precision manufacturing facilities are available to meet your needs for dependable contract, sub-contract or custom manufacture, with or without design engineering. Send us your next quotation request or ask for a copy of our contract manufacturing facilities brochure.

### PRODUCT DEVELOPMENT

Vectron's team of mechanical, electro-mechanical and electronic engineers will work from your prints or basic research, to develop and prototype your product.

### DESIGN FOR PRODUCTION

Vectron's engineering and production specialists can make necessary design improvements and modifications to assure efficient production, consistent with sound engineering and quality control.

### PRODUCTION

Vectron's complete facilities, skilled personnel, precision machine tools, careful production planning and thorough quality control with proper testing equipment assure the highest standards of fabrication and assembly.

### MINIATURIZED SPHERE RESOLVER

requires less than 5 in/oz input for 1 to 2 in/oz from the sine and cosine output shafts. It is 1½" square with a body block only 2½" long.

Write for complete data.

# ENVIRONMENTAL TEST CHAMBERS

**Designed Especially For Your Qualification and Control Laboratory, to Save Engineering Time and Accelerate Test Programs**

Components of guided missiles, supersonic aircraft, and other products can be tested under reproducible conditions which permit accurate comparative evaluation data. Precision control of temperature, humidity, vibration. Standard and special design chambers in sizes from 2 cubic feet to walk-in rooms, with temperature ranges in excess of +500° F. and -150° F. Highest standards of engineering and manufacturing in the industry.

**3 x 3 x 4 Altitude Temperature — Humidity Chamber, +300° F. to -100° F., 20-98% humidity, 100,000-ft. altitude.**

**4 x 4 x 4 High-Low Temperature Chamber, +300° F. to -100° F., completely self-contained.**

**Combination Temperature-Vibration Chamber, +500° F. to -100° F., 8, 27, and 64 cu. ft. sizes.**

**Program Controlled Temperature — Humidity Chamber, +250° F. to -100° F. temperature, 20-95% humidity.**

**Portable 4 cu. ft. Test Chamber, range +250° F. to -100° F.**

**High-Low Temperature Chamber, CB Series, +250° F. to -100° F.**

## FROM MILLIWATTS TO KILOWATTS

# HIGH VOLTAGE POWER SUPPLIES AND EQUIPMENT

We have sold quantities of these power supplies to laboratories, industrial concerns, the government and universities. Only the best available selected material goes into these units, so that you will have many years of dependable service. Only a few of our standard models are shown below. Quotations on special supplies cheerfully given.

## PRECISE MEASUREMENTS COMPANY

### HIGH VOLTAGE POWER SUPPLIES

A precision, well constructed high voltage supply for meter testing and calibration, electrostatic painting, breakdown tests, nuclear physics and wherever high potentials at low currents are needed. Output is well filtered direct current. Adjustable by means of a control on the front panel. Available with or without meter. Input voltage is 115 v., 60 cycles. Regulated models feature even easier adjustment of output voltage. Once you turn the knob to desired value, voltage then remains constant regardless of power line changes or load variations. Regulation is  $\pm 1\%$  or better over most of the control range. Closer regulation on special order.

Model	Maximum Voltage	Price	Price Regulated Model
6001 With Kilovolt Meter	1,000	\$75.00	
6000	2,500	60.00	
6000-A With Kilovolt Meter	2,500	80.00	\$120.00
6005	5,000	75.00	
6005-A With Kilovolt Meter	5,000	95.00	135.00
6010	10,000	85.00	
6010-A With Kilovolt Meter	10,000	105.00	145.00
6015	15,000	95.00	
6015-A With Kilovolt Meter	15,000	115.00	155.00
6025	25,000	115.00	
6025-A With Kilovolt Meter	25,000	155.00	205.00

MIRROR SCALE HIGHER ACCURACY METERS: Recommended where more exact settings or measurements are needed. Meter size has been increased to 6 inches for easier reading. Price \$35.00 additional on any meter equipped model.

### AC INSULATION AND BREAKDOWN TESTERS

Used in testing insulation where AC voltages are desired. Dual instruments are also available which provide choice of AC or DC output with simple toggle switch selection. Units include kilovoltmeter, current meter and automatic overload cutout circuits.

Model	Voltage	VA	AC	Price AC and DC
3000	0 to 3,000	75	\$150.00	\$ 250.00
3010	0 to 3,000	300	250.00	400.00
3050	0 to 3,000	1,500	500.00	650.00
3100	0 to 6,000	3,000	700.00	1,100.00

### INDUSTRIAL POWER SUPPLIES

Regulated Types Available

These industrial type power supplies are built for service and efficiency. All employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is greatly simplified and a number of safety features are built in for maximum protection of personnel and equipment. Polarity reversing models (as illustrated) can be had at additional cost.

Model	Voltage	Current	Price
F-500	0-500	3 AMP	\$800.00
F-6001	0-1000	2 AMP	975.00
F-6002	0-2000	1 AMP	985.00
F-6005-A1-H	0-5000	100 MA	550.00
F-6005-A1-5H	0-5000	500 MA	650.00
F-6005-A1-K	0-5000	1 AMP	1100.00
F-6010-A1	0-10,000	100 MA	800.00
F-6020-A05	0-20,000	50 MA	975.00
F-6050-T	0-50,000	1/2 MA	600.00
F-6100-T	0-100,000	1/2 MA	1100.00

### 100 KV. KILOVOLT METER

- Read High Voltages Directly with Extra-High Input Impedance.
- Single Instrument Reads Both A.C. and D.C. Voltages!
- Superb Craftsmanship—Portable Oak Case.

Model	Range Kilovolts	Price D.C. Model	Price A.C./D.C. Model
4000	0-25/50	\$67.50	\$100.00
4000-A	0-100	80.00	125.00
4000-B	0-50/100	85.00	130.00
4000-C	0-10/50/100	95.00	160.00

Other Ranges to Order .....

### HIGH VOLTAGE CONVERTERS

Solves your High Voltage problem in the simplest possible way. Simply connect input to 1 1/2 or 3 V. battery (or low voltage A.C.) and obtain your high voltage output. Output voltage adjustable from zero to 6,000 Volts AC (or DC when rectified). Typical output is 1 Ma. at 130 Volts D.C., 200 Microamperes at 500 Volts and 100 Microamperes at 1,000 Volts, with 3 Volts input. Model 7 MVT as illustrated, plugs in like a radio tube. The Model 10 MVT is not encased.

Model	Primary	Secondary	Price
7 MVT	1 to 4 Volts	0 to 6,000 Volts AC Max.	\$12.50
10 MVT	1 to 4 Volts	0 to 6,000 Volts AC Max.	\$10.00

### TRANSFORMERS, HIGH VOLTAGE

For those who build their own power supplies. These units are small and compact and rated for constant service. Primary designed for 115 Volts 60 Cycle. Only standard models are listed, other voltages and currents available on order.

Model	Voltage	Model	Voltage
1 KVT	1 KV	10 KVT	10 KV
2 KVT	2 KV	15 KVT	15 KV
3 KVT	3 KV	25 KVT	25 KV
5 KVT	5 KV		

### PACKAGED POWER SUPPLIES

These conveniently packaged power units will be found ideal for applications requiring minimum size and weight. Features isolated high voltage terminals permitting either the positive or negative side to be grounded. Rectifier tubes are operated from separate filament transformers so that DC output voltage can be varied from zero to full rated value. Selenium rectifier types have extra cells to assure operation under high line voltage or light loading. All standard units have well filtered DC output. Power packs with AC output available on order.

Model	Output Voltage	Current	Model	Output Voltage	Current
05-KV-5MA	500 Volts DC	5 Ma.	20-KV-1MA	20 KV DC	1 Ma.
1-KV-5MA	1 KV DC	5 Ma.	20-KV-5MA	20 KV DC	5 Ma.
2-KV-5MA	2 KV DC	5 Ma.	30-KV-1MA	30 KV DC	1 Ma.
5-KV-1MA	5 KV DC	1 Ma.	30-KV-5MA	30 KV DC	5 Ma.
5-KV-5MA	5 KV DC	5 Ma.	50-KV-1MA	50 KV DC	1 Ma.
10-KV-1MA	10 KV DC	1 Ma.	50-KV-5MA	50 KV DC	5 Ma.
10-KV-5MA	10 KV DC	5 Ma.	75-KV-1MA	75 KV DC	1 Ma.
15-KV-1MA	15 KV DC	1 Ma.	100-KV-1MA	100 KV DC	1 Ma.
15-KV-5MA	15 KV DC	5 Ma.

... for tape search

## DIGITAL TIMING GENERATOR

... for tape indexing

**DIGITAL TIMING GENERATOR, MODEL 201** generates numerically coded timing signals which are recorded on the magnetic tape throughout the data recording periods, providing a precise digital index in terms of elapsed time.

**MODEL 206 A IS A MILITARIZED AIRBORNE VERSION OF MODEL 201.**

**MAGNETIC TAPE SEARCH UNIT, MODEL 202**, operates during data reduction periods. This instrument automatically locates and selects for controlled playback the tape data included between a "sequence start time" and a "sequence end time" specified by panel dial settings. The time index is visually displayed as illuminated digits.

## ULTRA STABLE OSCILLATOR

... One Megacycle Signal Source ... Stability: 1 part in  $10^9$  per day

Hycon Eastern's new Ultra Stable Oscillator is useful wherever precise time measurements or frequency control are required, as in reinsertion of carrier in suppressed carrier systems, telemetry, astronomical measurements, navigation systems, geophysics or other critical applications. MULTIPLIERS and DIVIDERS are available for other frequency values with corresponding stability.

- **FREQUENCY STABILITY:** Drift Rate less than 1 part in  $10^9$  per day after one month's operation.
- **CRYSTAL OVEN:** Stabilized to better than  $0.01^\circ\text{C}$ . by temperature-sensitive resistance bridge. Oven contains no moving parts.
- **DISSIPATION IN OSCILLATOR CRYSTAL:** Stabilized at a power level less than one microwatt.

Attention: Mr. L. Avnet, President

Gentlemen:

In the past year, we here at Convair have devoted a great deal of attention to the performance of your company. We are very pleased to report that your performance has been excellent. The splendid cooperation and service extended to Convair in all your negotiations, by your Top Management Sales Personnel, is highly commendable.

Our normal production flow and scheduled delivery of airplanes is directly contingent upon our suppliers' promise to perform to his committed shipping schedules. You have not only maintained and fulfilled these promises, but have, on many occasions, accelerated your deliveries at our request. This letter is to express our sincere appreciation for your many extraordinary efforts and the fine business relationship we have enjoyed.

Very truly yours,

CONVAIR

## SIGNAL GENERATION EQUIPMENT

**MICROWAVE SIGNAL GENERATORS**  
Models MSG-1, 2, 3, 4, 4A  
950 to 11,500 mc

Model No.	Frequency Range
MSG-1	950 - 2400 mc
MSG-2	2150 - 4600 mc
MSG-3	4450 - 8000 mc
MSG-4	6950 - 10,800 mc
MSG-4A	6950 - 11,500 mc

**MICROWAVE SIGNAL GENERATOR**  
Model MSG-34  
4,200 to 11,000 mc

**MICROWAVE SIGNAL SOURCES**  
650 to 11,500 mc

MAXIMUM POWER AVAILABLE FROM POLARAD SIGNAL SOURCES IN THE RANGE OF 650 TO 10,750

FREQUENCY RANGE	MODEL SSR 650-1300MC	MODEL SSL 1050-2250MC	MODEL SSS 2140-4600MC	MODEL SSM 4450-8000MC	MODEL SSX 7850-10,750MC	MODEL SSXA 7850-11,500MC
AVAILABLE POWER RANGE (mw)	100 to 700	80 to 400	40 to 250	15 to 50	14 to 40	Available on Special Order

EHF SOURCE

EHF GENERATOR

**EHF MICROWAVE GENERATORS AND SOURCES**

	41,700 — 50,000 mc	S4150-1

Model SG-1218, Signal Generator and Model SS-1218 Signal Source are available to cover the frequency range 12,400 to 17,500 mc

**CODE MODULATED MULTIPLE-PULSE MICROWAVE SIGNAL GENERATOR**  
Model B  
950 to 10,750 mc

4 Interchangeable Tuning Units

Frequency Range:  
BL-1 — 950 to 2400 mc  
BS-1 — 2150 to 4600 mc  
BC-1 — 4450 to 8000 mc  
BX-1 — 7850 to 10,750 mc

**MICROWAVE SWEEP GENERATOR**  
Model ESG

1,000 to 15,000 mc 7 Interchangeable Tuning Units

Basic Unit: Model E-B		
MODEL	FREQUENCY RANGE	POWER OUTPUT
Model E-L1	1000 to 2,000 mc	70 to 900 mw
Model E-L2	1600 to 3,200 mc	70 to 900 mw
Model E-S1	2000 to 4,000 mc	70 to 750 mw
Model E-C1	3600 to 7,200 mc	20 to 350 mw
Model E-C2	4800 to 9,600 mc	15 to 125 mw
Model E-X1	6500 to 11,000 mc	15 to 80 mw
Model E-X2	7500 to 15,000 mc	10 to 35 mw

## SPECTRUM ANALYZERS

**DIRECT READING SPECTRUM ANALYZER**  
Model TSA  
Bandwidth 10 to 44,000 mc  
5 Interchangeable Tuning Units

Model No.	Equipment
Model DU	Spectrum Display and Power Unit
Model STU-1	RF Tuning Unit 10-1,000 mc
Model STU-2A	RF Tuning Unit 910-4,550 mc
Model STU-3A	RF Tuning Unit 4,370-22,000 mc
Model STU-4	RF Tuning Unit 21,000-33,000 mc
Model STU-5	RF Tuning Unit 33,000-44,000 mc

**MULTI-PULSE SPECTRUM SELECTOR**  
Model SD-1

Permits spectrum analysis of individual microwave pulses in a pulse group.

## MICROWAVE RECEIVERS

### EXTENDED RANGE MICROWAVE RECEIVER

Model R  
400 to 22,000 mc

7 Interchangeable Tuning Units

Basic Receiver: Model R-B  
Tuning Unit Frequency Ranges:

*Model RR-T .....	400- 1,000 mc
*Model RL-T .....	950- 2,040 mc
*Model RS-T .....	1,900- 4,340 mc
*Model RM-T .....	4,200- 7,740 mc
*Model RX-T .....	7,300-11,260 mc
*Model RKS-T .....	9,500-15,600 mc
*Model RKU-T .....	14,700-22,000 mc

\*U.S. Patent No. 2,774,243

### CALIBRATED MICROWAVE FIELD INTENSITY RECEIVER SYSTEM

Model FIM  
1,000 to 10,000 mc

Frequency Range:	1,000 to 10,000 mc
Tuning Unit	Frequency Range
*FIM-L	1,000 to 2,240 mc
*FIM-S	2,140 to 4,340 mc
*FIM-M	4,190 to 7,740 mc
*FIM-X	7,360 to 10,000 mc

\*U.S. Patent No. 2,774,243

POWER SUPPLY

MONITOR UNIT

ANTENNAS

## GENERAL LABORATORY EQUIPMENT

### MICROWAVE TUBE TESTER

Model K-200

Tests all microwave tubes  
as easily as ordinary  
vacuum tubes.

### PULSE JITTER TESTER

Model PJ-1

Measures

- (a) Pulse-to-pulse jitter
- (b) Pulse width jitter
- (c) Repetition rate jitter

Displays

- (a) Jitter magnitude
- (b) Jitter waveform

### WIDE BAND VIDEO AMPLIFIER

Model VT

10 cps to 20 mc

### 5 PULSE CODED MULTI-PULSE GENERATOR

Model MP-1A

Generates 5 separate  
pulses each with inde-  
pendently variable width  
and delay for missiles,  
beacons, and other  
systems.

## MICROWAVE ACCESSORIES

### MICROWAVE ATTENUATOR

Model SIJ

Covering

4,000 to 12,400 mc

... continuously variable,  
stub-tuned waveguide beyond  
cut off attenuator. For use  
in making microwave measure-  
ments.

### SUB-MINIATURE S-BAND CAVITIES

Plate and Grid Pulse

Models Each Covering

2,750 to 3,000 mc

... only 3" long and 1" diameter. Useful where  
miniaturization and high  
power are essential. Fre-  
quency can be varied by  
simple tool adjustment.

### MICROWAVE TEST ANTENNAS

Six models covering

1,000 to 26,000 mc

... rugged, portable. For  
field measurements, leak-  
age measurements and  
other laboratory uses.

### ALL CERAMIC KLYSTRON TUBE

Model ZV1009

VELOCITRON

1,600 to 6,500 mc

Reliable maintenance Service for life  
available throughout the country is an  
important part of every Polarad instrument.

## TELEVISION EQUIPMENT

### FILM AND SLIDE SCANNER SYSTEM

Model CC-1 and Model PT-210

For telecasting 16mm color film and  
35mm color slide transparencies

**Choice.....**

**Not Chance** has made Torwico a  
leading supplier of magnetic components  
for the military and for industry.

Our technical staff is a select group of seasoned engineers with long and successful experience in research and design of the type of magnetic components we manufacture. Equally mature and skilled are our key production supervisors and employees. These capabilities combined with the latest and best in necessary equipment and plant facilities assure our customers of the highest product quality obtainable.

While busily engaged in contributing its share to the nations latest and most advanced defense weapons, Torwico continues to serve its ever growing list of satisfied customers who use its products in the many and varied industrial electronic applications.

The all copper construction of Vacuum Fixed Capacitors give high current ratings, long life and stability of operation.

## TYPES R & RH VACUUM SWITCHES

### VACUUM SWITCH RATINGS For RF and DC Transfer Switching

Jennings Type	R5C	R1	R1K	R2	R8	RH6	RH7
Test Voltage (300 kc dry)—peak kv	20, 30	40, 50	30, 40	50, 60	70, 85, 95	85, 100	85, 100
Operating Voltage—peak kv	15	30	20	40	30 to 85	85	85
Continuous Current (rms amp)—dc <sup>①</sup>	50	50, 100	100, 200	50, 100	100, 200	50, 200	50, 400
—300 kc	30	35	100	35	100	100	100
—10 mc	25	25	50	25	50	50	50
—30 mc		15	25	15	25	25	25
RF Interrupting Power—kilowatts	50	250	500	250	1000		

① DC continuous currents may be increased as shown by using special connectors.

### For DC Switching Under Load or Capacitor Discharging

Jennings Type	R5C	R1G	R1J	R2G	R8G	R9G	RH4G	RH1G	RH7G
Test Voltage (60 cycles dry)—peak kv	20, 30	40, 50	30, 40	50, 60	50, 70	50, 70, 85	30, 40	35, 45	85, 100
Max. Operating Voltage—peak kv	15	20	20	30	50	60	10	20	70
Continuous Current—dc amp <sup>①</sup>	50	50, 100	50, 100	50, 100	100, 200	100, 200	50, 600	50, 400	50, 400
DC Interruption <sup>②</sup> —power in kw	5	25	50	25	50	100	250	200	250
—current in amp	5	25	50	25	50	100	250	200	250
Capacitor Discharge—decaying { initial amp to 30% in 1 millisecc or less } peak kv		500	1000	500	1000	1500	10,000	5000	5000
		30	25	40	50	60	20	30	70

① DC continuous currents may be increased as shown by using special connectors.  
② For DC interruption in continuous operation, neither power nor current rating should be exceeded.

### For 60 Cycle Power Switching

Jennings Type	R1J	R2G	R8G	R9G	RH1G	RH4G
Operating Voltage Class—rms kv line to line } grounded Y capacitor load to 85% lag pf {	2.5	8.25	12	15.5	2.5	2.5
Withstand Voltage—rms kv (60 cycle, 1 min. dry test)	19	26	36	50	19	19
Impulse Voltage—peak kv (1 1/2x40 μs NEMA test)	60	75	95	110	60	40
Operating Current—rms amp at 0% lead (capacitor load) to 85% lag pf { Break only } Make & Break	100	60	100	200	100	600
	50	30	50	100	50	400
Interrupting Current (rms amp)—NEMA one time	1500	800	2000	2500	1500	2500
—NEMA ten times	1000	500	1500	1500	1000	1500
Short Time Surge Currents (rms amp)—NEMA 4 second	2000	500	2000	2500	2500	4000
—NEMA 10 cycle mom.	4000	1500	4000	5000	5000	10,000
Thermal Current (for 30° C. rise—rms amperes)	100	100	200	200	400	600

#### TYPE R VACUUM SWITCHES

#### TYPE RH VACUUM SWITCHES

### RELAYS USING VACUUM SWITCHES

Type R and RH Vacuum Switches are available from Jennings mounted as relays for indoor use. They may be mounted with contacts normally open or normally closed or two switches may be mounted in a single pole double throw arrangement. Either ac or dc solenoids may be used. Insulation between the switch and its actuating solenoid is provided by a 2 to 8 inch puller rod providing 40 to 100 kv insulation. CE grade phenolic laminate is recommended for dc or 60 cycle use; Grade G7 silicone glass laminate is recommended for radio frequency applications.

**DC ACTUATING COILS**  
Standard actuating coils are rated for operation at 26.5 vdc and draw 2 to 10 watts of power. Coils rated for operation at 110 vdc are also available for most types.

## HIGH VOLTAGE VACUUM RELAYS

**MODEL JP 325 HIGH VOLTAGE PROBE**  
VOLTAGE RATINGS: 40, 50, or 60 KV peak.  
VOLTAGE DIVISION RATIO: 325 to 1 to termination of 3 ft. of RG-58 A U cable.

**INPUT IMPEDANCE:**  
Resistance: above 10<sup>12</sup> ohms.  
Capacitance: 4 mmfd.

**FREQUENCY RESPONSE:** High frequency limited by that of measuring instrument. (Internal resonances are above 200 mc.) Low frequency response is 100 cps if operating into 10 megohm shunt resistance; 1000 cps if operating into 1 megohm shunt resistance.

**TYPE JCD 5 MMFD SERIES CAPACITOR** attaches to HV end of the VDF 2.8 divider in the J-1003 meter and the JP 325 probe doubling the division ratio and the voltage rating in each case. Decreases total loading capacity of meter or probe from 4 mmfd to 2 mmfd.  
Sold without corona sphere unless ordered.  
VOLTAGE RATING: 60 KV peak.

**MODEL J-1003 HIGH VOLTAGE VACUUM TUBE VOLTMETER** for use in pulse, rf, and 60 cycle circuits at voltages up to 100 KV.

**VOLTAGE RANGES** (peak volts full scale):  
Single Ended: 2.5, 5, 10, 25, 50 KV.  
Double Ended: 2.5, 5, 10, 25, 50, 100 KV.

(By using Type JCD Series capacitor, these ranges can be more than doubled.)

**OSCILLOSCOPE CONNECTION:** 300 to 1 division ratio.

**FREQUENCY RESPONSE:** 10 cycles to 20 megacycles at full rated voltage and up to 50 megacycles for lower voltages with low harmonic content.

**INPUT IMPEDANCE:** 10<sup>12</sup> ohms and 4 mmfd.

**CALIBRATION ACCURACY:** ± 3% of full scale.

**POWER SUPPLY:** 117 volt, 50, 60 cy.

**DIMENSIONS:** 16 1/4" x 11" x 9"

# Design made easy with reliable RESISTORS, RELAYS, RHEOSTATS

**Want to know how?** These data-packed bulletins and catalogs will show you.

**RESISTORS**—you'll find the widest selection of stock power resistors ever offered by any manufacturer in Ward Leonard Catalog 15.

**RELAYS**—long, trouble-free life under the most adverse conditions is the big plus the system designer gets with the a-c and d-c relays described in Ward Leonard's relay catalog.

**RHEOSTATS**—complete application data on smooth-acting 25- to 300-watt Vitrohm ring rheostats is contained in Ward Leonard bulletins 1105-16.

Write today for this helpful literature. You'll find plenty of design tips. And, you'll find Ward Leonard offers a wider selection of stock items, quicker service on made-to-order controls, and more performance per dollar than anyone else. # HUBBELL Interlock PLUGS

TRADE MARK

## Stay Locked IN ACTION!

*Won't Disconnect Accidentally . . .*

*Yet Disconnect Quickly When Intended*

Today's engineers ask more of the connectors they use than simply that they make contact. Computers and modern, automatic machinery require *constant, positive* connections . . . aircraft wiring must be vibration proof and unaffected by temperature changes . . . printed circuits need sub-miniature connectors that will remain fixed. Hubbell *Interlock* Connectors are designed with all these features — and more! Whether they're used for connecting wire to wire, wires to panels, or wires to terminal strips, the combination of *Interlock* plugs and eyelets or plugs and jacks provides *automatic locking, quick disconnect* wiring that assures constant low contact resistance. Contact is maintained by a coil spring that adjusts for temperature and pressure changes and is part of the disconnect mechanism that permits fast rearrangement of circuitry and ease of maintenance.

## Varian Strip Chart Recorders

# POTENTIOMETER PERFORMANCE\* AT MODERATE COST

**Varian G-10** — Portable for laboratory or bench use where chart accessibility is of prime importance. Base price \$340.

**Varian G-11** — For panel, rack or portable use; designed for OEM, lab or field for long-term monitoring. Base price \$450.

The servo-balance potentiometer method has long been used in expensive recorders to achieve superior stability, sensitivity, ruggedness and high input impedance. Use of servo balancing systems assures full realization of these inherent advantages by providing ample power independent of the source being measured. Now Varian offers you recorders of moderate cost using this time-proven principle.

### VARIAN SPECIFICATIONS:

- Spans as low as 10 mv
- Limit of error 1%
- Maximum source resistance 50K ohms or higher
- Balancing times: 1 second or 2.5 seconds on G-10; 1 second on G-11

WRITE TODAY FOR COMPLETE SPECIFICATIONS

*Varian recorders are sold and serviced throughout the free world by representatives in principal cities.*

PALO ALTO 1, CALIFORNIA

# AMERAC'S PRECISION MICROWAVE PRODUCTS

## MICROWAVE CAVITIES

Amerac, Incorporated manufactures a comprehensive line of co-axial line cavities, utilizing various standard tubes, for numerous microwave applications including aircraft, guided missile and beacon work.

### FEATURES

These cavities have such features as — single control tuning, fixed feedback, rugged anti-backlash tuning mechanism, accurate Root counter (optional), adjustable type "N" or "BNC" 50-ohm inductive loop coupling, convenient tube receptacle for quick replacement, long-duration R.F. output stability, operates on inexpensive power supply.

### SPECIFICATIONS

Model	Frequency Range	Type	Cavity Mode	Tube Type
192-A	2400—4000 MC	Pulse	3/4	2C36
192-AB	750—2000 MC	Pulse	1/4	2C36

198-A	800—2050 MC	Pulse	1/4	5837
198-A	2050—4200 MC	Pulse	3/4	5836

## FOR EXTREME ENVIRONMENTAL CONDITIONS

Engineered to operate under extreme conditions of shock, vibration, temperature and humidity, these cavities have been designed to withstand 2000 cycles at 15 G. 200 MC tuning range.

### SPECIFICATIONS

Model	Frequency Range	Type	Cavity Mode	Tube Type
#500	2000—3100 MC	CW	3/4	GL-6442
#501	2000—3100 MC	Pulse	3/4	GL-6442
#502	3100—3550 MC	CW	3/4	GL-6442
#503	3100—3550 MC	Pulse	3/4	GL-6442

## CO-AXIAL LINE WAVEMETERS

**FOR LABORATORY USE,** Amerac, Incorporated manufactures a precision wavemeter that is handsomely finished with golden anodized aluminum panel and hand-rubbed walnut cabinet. The panel is sloped for easy observation.

#229 "S" BAND WAVEMETER

These models feature high accuracy of measurement ( $\pm 0.02\%$ ), high frequency stability ( $10^\circ\text{C}$  to  $40^\circ\text{C}$ ), extreme mechanical stability, ease of operation, rugged components and tri-plated surfaces.

### GENERAL SPECIFICATIONS

Type "N" constant impedance input connector. BNC or UHF co-axial fitting for external video connection. Power handling capability: absorption — .5mw to 1 watt; transmission — 1mw to 1 watt. Peak power: up to 25 watts (transmission).

### INDIVIDUAL SPECIFICATIONS

Model	Frequency Range	Loaded Q	Width	Depth	Height	Net Weight
#228*	900—2400 MC	1000	15"	9 3/4"	7 3/4"	13 1/2 lbs.
#229	2300—4500 MC	1500	8"	6 1/2"	5"	4 3/4 lbs.
#230	3500—6000 MC	1500	8"	6 1/2"	5"	4 3/4 lbs.

\*Model 228 has a direct-reading frequency control dial.

**FOR FIELD USE,** Amerac, Incorporated manufactures two co-axial line wavemeters covering the "S" band, the Model 131 (Amerac's version of the popular military model TS-117) and the inexpensive, C&D Wavemeter Model 232.

#232 "C & D" WAVEMETER

Both models feature a rugged metal case, finished in gray, baked enamel; highly sensitive indication of resonance; rugged components; precision cavity assembly and anti-backlash device, for high accuracy.

### GENERAL SPECIFICATIONS

Input connections are two type "N" jacks. R.F. detector is a type 1N21B silicon diode. They have a ruggedized 50 micro-ampere indicating instrument for abusive field work and all silver-plated parts are Rhodium flashed to minimize corrosion.

### INDIVIDUAL SPECIFICATIONS

Model	Frequency Range	Loaded Q	Length	Depth	Width	Net Weight
#131	2400—3400 MC	1000	6"	3 1/4"	5 1/2"	3 1/2 lbs.
#232	1800—3800 MC	1000	8"	2 1/4"	7 3/4"	2 1/2 lbs.

### Amer-Dial

For multi-turn devices. Direct reading to 1/1000th of a turn. Accurate to 1 part in 10,000. Readings up to 9999 with up to 100 turns. Unobstructed knurled dial. Regular and illuminated.

# An Engineer "Doodled" and Solved an Explosive Problem with

## FUSITE TERMINALS

The problem was literally explosive. It was a pump and motor to operate safely submerged in gasoline. The electrical connections had to be made through a vapor-proof seal. Two simple and inexpensive Fusite glass-to-metal terminals did the job like this "doodle" shows.

This can't be called a "typical" Fusite case history. In our long list of successful new applications, we have helped engineer, there are none we could call "typical".

So just keep Fusite Terminals in your

"noodle" the next time you "doodle" and pass your problems on to us.

We make hundreds of stock terminals of both multiple bead and solid glass types. We're prepared to design and make special terminals to your needs.

RACK MOUNTED FOR EASY ASSEMBLY • FIT STANDARD 19" RACKS

THREE STANDARD MODULAR PANEL HEIGHTS COVER WIDE RANGE OF AIR DELIVERIES

Excessive or fluctuating temperatures in electronic racks make thousands of tubes die young . . . make crystals, transistors and sensitive electronic equipment perform erratically. System failure at critical times is disastrous . . . replacement costs are high. That is why leading manufacturers install McLean Fans and Blowers in Computers, Control Systems, Data Processing Systems,

etc. These small packaged units pressurize the cabinet with cool filtered air, keeping dust out. They are complete in one unit and ready for use. Standard RETMA notching allows mounting on rack . . . no cutting or fitting is necessary. All units contain an easily replaceable filter. Smart stainless steel grilles add beauty and eliminate the necessity of matching cabinet finishes.

## Our major asset—engineering "KNOW HOW"

For more than 12 years, Bogart Manufacturing Corporation has specialized in research, design and development of microwave electronic equipment and associated components.

With ever increasing accuracy and reliability required of military and industrial electronic equipment, engineering experience becomes of paramount importance. Our engineering staff consists of specialists in three principal fields:

**R-F COMPONENTS:** ..... Waveguide, Coaxial  
**ANTENNAS:** ..... Radar, Guided Missile, Countermeasure  
**ABSORBENT MATERIALS:** .... Dummy Loads, Space Material, Antenna Shields

Bogart's experience in the development and production of microwave equipment is your guarantee of precision, economy and performance. Write for facilities brochure today. Our local representative will call on you.

**TELECHROME**  
INCORPORATED

**MAKES**

**THEM ALL**

**COMPLETE FACILITIES FOR TV STATIONS, MANUFACTURERS & LABORATORIES**

Finest color film chains, colorplexing, transmitting, analyzing, monitoring, testing equipment.

**617-BR AUTOMATIC BALANCE CONTROL FOR ALL COLORPLEXERS**

(Regardless of Manufacture)

An ingenious circuit locks the entire encoding equipment in balance within 20 seconds after being turned on. Thereafter balance is held under even the most difficult operating conditions.

**1003-A VIDEO TRANSMISSION TEST SIGNAL GENERATOR**

Portable

Completely self-contained, portable. Produces multi-frequency burst, stairstep, modulated stairstep, white window, composite synch. Regulated power supply. 12 1/4" standard rack mounting or in carrying case.

**700-A 3V COLOR FILM CHAIN**

Finest in quality, lowest in price. 3V provides greatest latitude in selection of color films. Designed specifically for broadcast application, requires little space. Multiplexes 35 or 16mm film, slides, opaques.

**1073-A SINE-SQUARED SQUARE WAVE GENERATOR**

Newest test unit produces new type of wave form for testing any part or all of a TV or pulse system for amplitude and phase characteristics. "Go-No-Go" indication simplicity.

**1601-BK CHROMASCOPE**

New secondary phase standard for accurate reading to .01°

Signal Certification Equipment. Accurately measures the performance alignment, and phase errors of color TV equipment. Presents on a cathode ray screen a continuous polar plot of the phase and amplitudes of all colors in a composite color video signal. Capable of a .005° accuracy with 1604-A2 phase magnifier.

**1604-A2 PHASE MAGNIFIER**

Expanded phase indicator of a signal for measurements of differential phase to .3° or better accuracy of chroma frequencies.

**TELEMETERING TRANSMITTERS • High Power in Small Packages**

Direct FM Transmitters Crystal controlled 215-235 megacycles. 125kc deviation.

Model 1462  
6" x 4 1/4" x 3 3/4"  
50 to 80 Watts

Model 1463  
5 1/2" x 3 1/8" x 4"  
15 to 30 Watts

Model 1472  
4" x 1.5" x 2.7"  
2 Watts

Model 1460  
5" x 4 3/4" x 3 15/16"  
RF Amplifier  
15 to 30 Watts

Model 800—4.5" x 1.3" x 1.4"

**SUB-CARRIER OSCILLATOR.** Deviation stability  $\pm 1\%$  of band width. Deviation linearity less than 1% of band width under all conditions measured from a straight line drawn between end points.

**636-B CHROMALYZER**

Portable Precision Color Bar Generator for checking color broadcast studio and transmission facilities, receivers and monitors. Can be tied into a system. Provides complete composite color signals at 100 or 75% chroma.

**1603-AR PHASE SLOPE (ENVELOPE DELAY) CURVE TRACER**

Instantaneous scope of meter reading of the envelope delay and amplitude characteristics of any network, video amplifier, or system. Precision-time saving. Has separate transmitter and receiver units which allow one way or loop measurements.

**DELIVERY 30 DAYS**

Literature on these and more than 150 additional instruments for color TV by TELECHROME are available on request.

**HG-E2**

Sub-miniature . . . hermetically sealed . . . space saving, this HG-E2 relay measures 1" square by 3/8" . . . meets MIL-R-5757C. Designed for operating temperatures up to 125°C. with long-life characteristics at rated contact loads of 2 amps at 28 Vdc or 115 Vac. Coil resistance ranges cf 50 to 10,000 ohms. Hook terminals or straight pins for plug-in and printed circuit applications are standard. Available in Form A, B, or C contact arrangement with maximum of two poles . . . for AC operation with internally mounted silicone rectifiers.

*Today . . . find out more  
about the complete line of Hi-G  
sub-miniature relays.*

## TRANSISTOR-AMPLIFIERS (Transpecs\*)

Single-stage  
transistor-amplifier

Complete high-gain, low-power audio-amplifiers for pocket-size radios and recorders, hearing aids, microphones, test equipment, computers, and other equipment.

Centralab's new, revolutionary 4-stage TA-11 transistor-amplifier is the smallest unit of its kind. It includes 4 special transistors, 5 capacitors, 12 resistors, plus wiring.

Up to 75 db. gain at 1 kc. Input impedance 1000 ohms nominal. Operates from 1.3 v mercury cell or flashlight battery. Frequency characteristics, 250 to 20,000 c.p.s.  $\pm 5$  db., adjustable to special requirements. Capacity up to 1 mf.

Also choice of TA-6 and TA-7 single-stage Transpecs\* to meet other sub-miniature design requirements. \*Trademark.

Write for Bulletin 42-235.

## VARIABLE RESISTORS

1/2-w. standard — For radio, TV. Single, twin, or dual-concentric. 15/16" diam. 250 ohms to 10 meg.

1/10-w. sub-miniature — For hearing aids, communications, computers. 5/8" diam. 500 ohms to 10 meg.

1/4-w. sub-miniature — For instruments and military. 43/64" diam. 10,000 ohms to 1 meg. — linear taper.

Write for Group A bulletins.

Miniature

Radio and TV

Wire-Wound

## ELECTRONIC SWITCHES

Rotary — 15/16" to 1-5/8" diam. Phenolic or Steatite insulation. Single or multiple sections.

Medium-duty power — For transmitter, industrial control, laboratory testing, military, commercial. 2-13/16" diam. 7-1/2 amp. rating at 110 v. 25,000 cycles minimum.

Specialized — Lever, slide, tone, tuner sections, others.

Write for Group B bulletins.

Miniature  
Rotary Switches

Rotary-Action  
Flat Switches

Rotary  
Power Switches

Lever-Action  
Switches

Ham-Type

# What's New in Caps \*

## \* PI-CAPS® HIGH VOLTAGE... LOW TOLERANCES

PAS type PI-CAPS are very desirable for high voltage use because of high capacity per volume at high voltage. Heavy wall Pyrex glass serves as insulator, saving space in a very light weight and compact high voltage capacitor. Ideal for AUDIO COUPLING, ARC SUPPRESSION, POWER SUPPLIES, AUDIO BYPASS, ENERGY STORAGE, TV CIRCUITS, COMPUTERS, GEIGER COUNTERS, etc. PAS tolerances can be as low as 1%.

CAM type in standard Type 70 cans. Small size for high voltage applications. Combines high volts per mil rating and a high dielectric constant.

Call on us for all your film capacitor requirements.  
POLYETHYLENE, ACETATE,  
POLYSTYRENE, and MYLAR®  
capacitors.

## PHASE METERS, DELAY LINES COUNTERS by **ADVANCE**

**PHASE MEASURING  
INSTRUMENTS**  
500 MC to .00001 CPS  
Accuracy 0.1°

Type 405 Series: Type 405L, from 1 cps to 20 kc; Type 405, from 8 cps to 100 kc; Type 405H, from 8 cps to 500 kc.

Type 205 & 205A: From 100 kc to 15 mc.

Type 202: From 10 cps to 500 mc.

### DELAY LINES — CONTINUOUSLY VARIABLE STEP VARIABLE AND FIXED

Continuously Variable Delay Lines: Resolution time less than 1/2 millimicrosecond. Type 500 Series—delay over 1 microsecond; Type 600 Series—delay over 100 microseconds; Type 800 Series—delay over 1000 microseconds. Step Variable Delay Lines with equal input and output impedance available; total time delay over 25 microseconds, with bandwidth over 10 mc. Fixed Delay Lines with time delay from fractional microsecond to over 1000 microseconds; impedance from 50 ohms up to several thousand ohms. Special Delay Lines to meet JAN specifications.

### COUNTERS

Decimal Counters with counting rate over one million counts per second. Time Interval Counters, Frequency Counters, Phase Angle Counters and Universal Counters; special counters for application in various industries.

Write for complete catalog.

## TI-CO WIRE STRIPPER

The TI-CO Wire Stripper completely strips single or multiple leads of fine magnet wire in sizes No. 18 to No. 48; removes all types of insulation, formvar, nyliclad, glass, etc., without damage to wire; exceptionally fast, clean stripping with minimum rejects. Speeds up production; guarded machine, safe for operator. Wire diameter kept to within .0002". Machine compact, portable and relatively quiet; rugged; stands up under steady use; precision ball bearings throughout. General-purpose brushes are of fiberglas. Machine can be adapted to strip any coil form, or to strip wire outside 18-48 range. Efficient built-in vacuum dust collector.

Fiberglas brushes to fit all equipment

# PRECISION INSTRUMENTS REQUIRE *Bird* PRECISION JEWEL BEARINGS

For high accuracy in low-torque instruments and mechanisms, the jewel bearings you use must have the lowest possible coefficient of friction. To assure you of built-in accuracy, Bird's sapphire and borosilicate glass precision bearings are manufactured to the most exacting tolerances under the most rigid quality-control methods. Proof of their world-wide acceptance is a well known fact. Bird jewels are being used in the world's most famous electrical, aircraft, and timing instruments; and in all types of recorders and fine indicating apparatus:

Bird jewel precision bearings are used in precision:

- ▶ AIRCRAFT INSTRUMENTS
- ▶ WEATHER RECORDERS
- ▶ AMMETERS
- ▶ VOLTMETERS
- ▶ WATTMETERS
- ▶ COMPASSES
- ▶ DIAL GAUGES
- ▶ TIMERS
- ▶ TEST & RECORDING INSTRUMENTS
- ▶ MARINE INSTRUMENTS

For SHOCK and VIBRATION PROTECTION of movements under the severest conditions, Bird jewel bearings are available with silicon rubber or spring mounts — the 'variable cushioning' design. Special mounting techniques developed by Bird provide assemblies, set-in screws, or bushings of any styles — ready for immediate installations. Actual tests prove that the following low-cost advantages can be incorporated into your product:

- Variable cushioning to suit different operating conditions.
- Mountings of any style.
- Controlled jewel movement.
- Elimination of rejects due to faulty adjustments.

Bird jewel bearings are available in a wide variety of standard sizes, mounted or set in bushing or screw type assemblies. Other designs to customer specifications.

Our engineering staff is at your service. A request on your letterhead for Bulletin 100-6 will receive our prompt attention.

## FERNETIC CO-NETIC TAPE CONTAINER

### Protects Broadcasting, Military & Automation Tapes

Provides simultaneous high and low intensity magnetic shielding as well as high and low frequency magnetic shielding for valuable magnetic tape recordings from all extraneous fields produced by generators, power supplies, transformers, magnetic tables on surface grinders, magnetic chucks, de-gaussers, soldering guns, motors, power lines, welding machines, solenoids, and other stray fields around radio and TV stations, factories, laboratories, etc.

Valuable tape recordings safely stored to remain clear and distinct, avoiding crackling and other distortions. Shielding strength continues undiminished indefinitely without periodic renewal or other servicing because Fernetec Co-Netic does not retain residual magnetism. Shielding qualities cannot be lessened by shock, vibration or other disturbances during handling or usage. Sturdy containers available in many convenient round or rectangular shapes.

Protect master tapes which run automatic machinery, guided missile flight recordings, radio & TV commercial and program tapes, hi fi and historical tapes, delicate instruments during transport, etc. Write today for details.

**MAGNETIC SHIELD DIVISION PERFECTION MICA CO.**

1322 No. Elston Ave., Chicago 14, Ill.

**P.S. Also available: Cathode Ray Tube Shields, Transformer and other high and low level shielding... constructed to your specification from non-shock sensitive non-retentive Fernetec Co-Netic.**

# These DRIVER-HARRIS alloys do most to improve the quality of

Your Resistors

Your Electron Tubes

Your Glass-to-metal Seals

## DRIVER-HARRIS RESISTANCE WIRE ALLOYS

**NICHROME\* V** (Nickel-Chrome) Essential for resistor elements in the higher temperature applications such as electric furnaces, electric ranges, radiant heaters, etc.

**KARMA\*** (Nickel-Chrome-Aluminum-Iron) Permits the manufacture of miniaturized wire wound precision resistors of best temperature coefficient of resistance at low cost per ohm; also resistance standards.

**NICHROME\*** (Nickel-Chrome-Iron) The internationally accepted material for heating devices operating up to 1700°; also industrial applications for rheostats and resistance units.

**CHROMAX\*** (Nickel-Chrome-Iron) A lower cost alloy for electrical heating under conditions less critical than those satisfied by Nichrome.

**ADVANCE\*** (Copper-Nickel Series including MIDOHM\*, 95 ALLOY, LOHM\*, 30 ALLOY) Possess a number of properties which make them useful for winding heavy duty industrial rheostats, precision resistors, thermocouples, and thermocouple leads. Specific resistance range of this series is from 294 to 30 ohms/cm.

**MANGANIN** (Manganese Copper) Most stable resistance wire known at ambient temperature. Indispensable

for resistors used in many types of precision direct current apparatus such as Wheatstone Bridges, National Bureau of Standards type resistance standards, etc.

**HYTEMCO\*** (Nickel-Iron) Combines high temperature coefficient of resistance with high specific resistance; ideal for winding compensating or ballast resistors.

## DRIVER-HARRIS GLASS SEALING ALLOYS

**THERLO\*** (Nickel-Cobalt-Iron). For sealing glasses such as Corning 7052 and 7040.

**142 ALLOY** (Nickel-Iron). For sealing glasses such as Corning 776, also 8160.

**152 ALLOY** Contains 50% nickel. It provides a slightly higher coefficient of expansion than 142 Alloy and seals successfully with 0120 glass.

**146 ALLOY** Contains 46% nickel. It offers special expansion properties, permits seals with ceramic coated resistors.

## DRIVER-HARRIS ELECTRON TUBE ALLOYS

The Driver-Harris Company, since the inception of radio, has been making alloys for this field, supplying the industry with alloys for support wires, plates, grids, cathodes, and lead-throughs.

All Alloys are available in:

**WIRE**  
(Sizes as fine as .0005" dia.)

**ROD  
RIBBON  
STRIP**  
(Foil as thin as .00045" dia.)

Insulations:

**ENAMEL  
COTTON  
SILK  
NYLON  
GLASS  
FORMVAR**

Singly or in combination

Every Driver-Harris alloy is made to the most precise metallurgical checks and controls known to the industry. And each of these highly specialized alloys is custom-made . . . produced exactly to the specifications of our customers.

Send us your specifications. If your needs are in any way unusual, and cannot be met by one of our current 132 alloys, our engineers will be happy to start tomorrow to devise a new one, custom-made for you. Just tell us exactly what you wish to accomplish.

\*T.M. Reg. U.S. Pat. Off.

MAKERS OF THE MOST COMPLETE LINE OF ALLOYS FOR THE ELECTRICAL, ELECTRONIC, AND HEAT-TREATING INDUSTRIES

# Ultra-Sensitive Relays, D-C Motors...A-C Motors

## polarized ultra-sensitive relays

Operating on input powers of 40 to 1000 microwatts, the Barber-Colman Micropositioner, a polarized d-c relay, is ideal for use as a differential relay in electronic plate circuits, a null detector in resistance bridge circuits, and an amplifier in photo-electric circuits. Can be operated in excess of 100 cps. This ultra-sensitive relay is widely used in many control applications — in nucleonics, communications, instrumentation, process control, railway signal transmission, and aircraft control and remote positioning. Various types: Octal plug-in; solder lug; hermetically sealed; screw terminal.

## compact, powerful d-c motors...up to 1/10 hp.

Looking for a d-c fractional hp motor of unusually high quality, high dependability? Specify Barber-Colman, the *versatile* line of small motors in both permanent magnet and split series types . . . in various mountings and speeds, and outputs up to 1/10 hp. Ideally suited to power electro-mechanical actuators, switches, blowers, and programming devices. Also excellent for use as tachometer generators. Barber-Colman small d-c motors are also available with lightweight radio noise filters to meet radio interference requirements of USAF. Whatever your problem involving d-c motors, consult Barber-Colman Company for an expert solution.

## high torque shaded pole a-c motors . . . up to 1/20 hp.

Barber-Colman shaded pole induction motors are available in unidirectional, reversible, and synchronous types up to 1/20 horsepower with or without reduction gearing. Unidirectional motors are designed for long life and dependable service driving cooling fans and blowers for electronic equipment and powering office machines and other industrial equipment. Reversible motors are ideal for follow-up and positioning mechanisms and are easily adapted for control by electronic circuits. Synchronous motors combine accurate timing and high torque with small dimensions and light weight. Geared-head motors are available with hundreds of reductions, open or enclosed, to fit a wide range of applications. Barber-Colman engineers will be glad to help select the right motor for your application.

# ILLINOIS CAPACITORS

KNOWN THE WORLD OVER FOR

## Time Tested Quality

For over 20 years ILLINOIS CONDENSER COMPANY has been foremost in the development of ever greater dependability and longer life in all types of capacitors. Listed below are only a few of the more popular — and most recently developed ILLINOIS types.

**NEW!**

### TYPE SMT SUB-MINIATURE ELECTROLYTICS

Newly developed sub-miniature electrolytics with hermetic seals. Especially designed for printed circuits, portable equipment, transistor equipment and any application where size and weight must be kept at an absolute minimum. Capacity ranges from .5 to 100 MFD and from 3 to 50 WVDC.

#### TYPE UMP

Standardized twist-prong type. Patented molded terminal construction for efficient, stable operation under extreme temperature ranges. Capacity ranges from 10 to 3,000 MFD and from 6 to 525 WVDC.

#### TYPE PE

Hermetically sealed plug-in octal base type. Especially useful in fixed or mobile communications equipment. Operating temperature range -40°C to +85°C. Available in wide ranges of capacities and voltages.

#### TYPE IHC

Popular multiple section types with flexible leads, insulating sleeves and mounting straps. Equally adaptable for original equipment or replacement purposes. Available in capacities from 10 to 250 MFD at 25 to 500 WVDC.

#### TYPE LN

Extruded aluminum can type with screw neck mounting and flexible leads. Capacity ranges from 8 to 80 MFD and from 450 to 600 WVDC.

#### TYPE UMS

Hermetically sealed inverted can type with screw neck mounting and molded-in terminals. Wide ranges of capacities and voltage ratings. Meets all government specs.

#### TYPE UMT

Inverted can type with clamp mounting. Hermetically sealed, shock resistant with new molded terminal construction. Ideal for use in highest quality equipment. Meets all government specs. Wide capacity and voltage ranges.

#### TYPE IHT

Popular tubular aluminum can, pigtail type electrolytic. Internal riveted construction. In capacity ranges of 1 to 2,000 MFD and from 6 to 600 WVDC. Also available with solder lug terminals. Supplied with insulating sleeves.

#### TYPE UMC

Low leakage-high capacity electrolytic for power filter packs, voltage stabilization, energy storage and photo flash. Capacity ranges up to 10,000 MFD to 50 V. and 1000 MFD at 450 V.

#### TYPES IMT and SMT

Newly developed "miniature" and sub-miniature electrolytics with hermetic seals. Especially designed for printed circuits, portable equipment, transistor equipment and any application where size and weight must be kept at an absolute minimum. Capacity ranges from .5 to 100 MFD and from 3 to 50 WVDC. Ceramic case and aluminum case types.

#### TYPE MS

Motor starting capacitors available in bakelite and aluminum cases. Long wire leads with terminals. Capacities to 5,000 MFD at 115, 220 and 320 VAC.

#### TYPE BT

Hermetically sealed bathtub type especially designed to withstand vibration and shock. Available in electrolytic and paper capacitor types for government and commercial use.

#### ILLINI 300 ELECTRONIC FLASH KIT

A new high intensity, low voltage electronic photoflash kit featuring latest advances in tube, capacitor and reflector design. 100 watt second output. Uses standard type batteries. Easily assembled, rugged, reliable and economical to operate. AC Power Pack also available.

FILTRON PROVIDES EXACTLY THE FILTER THEY NEED**

From the best equipped Radio Interference Laboratories in the world—staffed with the most experienced Radio Interference Engineers, tomorrow's electric and electronic components and systems are made "Radio Interference Free" today.

FILTRON's exceptional facilities are available for the Radio Interference testing AND filtering of your equipment to meet Military Radio Interference Specifications.

Combining engineering facilities, application experience, and manufacturing ability, Filtron competently handles RF interference problems from start to finish.

FILTRON's four plants, with complete production facilities—capacitor manufacturing, coil winding, metal fabricating and stamping, tool and die department, assembly division—are producing more RF interference filters than ever before.

FILTRON—the most dependable name in RF Interference Filters—is the choice of engineers, manufacturers, and military and commercial laboratories the world over.

Sarkes  
Tarzian

# SILICON and SELENIUM Rectifiers

Sarkes Tarzian area type silicon rectifiers are made by a special process that provides optimum forward to reverse ratios and long useful life. Current ratings for half wave application range from 500 milliamperes dc to 15 amperes dc and voltage ratings per unit range from 50 to 400 volts peak inverse. Small size coupled with high efficiency and allowable high ambient temperatures make silicon rectifiers the practical component for most applications that require dc power. Our staff of competent power conversion engineers is ready to consider your application for prompt recommendations. Write, wire or phone.

**Type M** silicon rectifiers are rated at 500 milliamperes dc with peak inverse voltage ratings of 100 to 400 volts. Connection is made by means of end ferrules that fit standard fuse clips. Low cost holders are available.

**Type N**—Four basic terminal arrangements are available in the N series of silicon rectifiers. (1) Axial leads, (2) Axial stud and lead, (3) Axial stud and lug, (4) Axial studs. The convection cooled current rating is 500 milliamperes and the conduction cooled rating is 1 ampere provided an adequate heat sink is used. Voltage ratings range from 50 to 400 volts peak inverse.

**Type P**—The P series of silicon rectifiers includes the same end terminal designs as the N series. The dc current ratings, however, are 1.5 amperes with convection cooling and 5 amperes when a heat sink is used. Voltage ratings range from 50 to 400 volts peak inverse.

**Type L** silicon rectifiers are rated at 1.5 amps in half wave circuits with peak inverse voltage ratings of 100 to 400 volts. Mounting is by means of ferrules that fit standard fuse clips. Low cost holders are available.

Write for complete information

**Type LF**—Use of a special heat sink arrangement and hardware allows a current rating of 5 amperes dc from the Type L rectifier. Precautions must be taken, however, to provide adequate cooling area to limit case temperature. Voltage ratings range from 100 to 400 volts peak inverse.

**Type Q**—The Q series of rectifiers is provided with axial studs only, however, it is possible to attach special end terminals. The current rating is 7.5 amperes in convection cooled applications and 15 amperes when a heat sink is used. Peak inverse voltage ratings range from 50 to 300 volts.

SILICON

## A Rectifier for Every Application

A wide selection of Selenium Rectifier designs is offered to the design engineer by the Sarkes Tarzian line. It is possible to provide ratings of a few milliamperes to thousands of amperes and from a few volts to thousands of volts by using series, parallel and series-parallel arrangements. Whatever your power conversion problem write for specific recommendations for your application.

**Standard and High Temperature**—Sarkes Tarzian standard and high temperature selenium rectifiers offer the design engineer a variety of combinations. The standard line includes fourteen basic cell sizes and the high temperature line includes nine cell sizes. Maximum permissible cell temperature on high temperature types is 150°C.

**Radio-Television Types**—Radio and Television type selenium rectifiers are mass produced under tight quality control standards. The resultant good availability, good quality and low price have made these types popular in a variety of electronic equipments.

**Embedments**—Embedments provide a small unit at relatively low cost when extreme environmental or shock conditions are anticipated. Six basic cell sizes are available to assemble various combinations.

**High Voltage**—Series stacking of cells in glass or phenolic enclosures increases voltage ratings and half wave units are available with ratings as high as 7500 volts peak inverse with current ratings as high as 25 milliamperes. Axial leads or ferrules are available for connection.

Remember—whatever your problem on power conversion,  
let Sarkes Tarzian applications engineers provide you with the practical answer.

### New REAC 400 Series

- Building-block construction
- "Problem check" verification of solutions
- High Speed Servos
- Patchbay switching
- Simplified operation and maintenance

### REAC® analog computers

This "400" is the newest model of the famous REAC (Reeves Electronic Analog Computer). The new modular construction allows assembly of exactly the computer necessary to do a particular job or expand an existing installation. Problem check, a new Reeves development, permits verification of problem solutions before problem is run. New high speed servos and improved components facilitate high speed real time operation.

20 IG Integrating Gyro  
Extremely low drift rate, high sensitivity

20 R.G. Rate Gyro  
Small size. Fully floated construction.

### precision GYROS

Single-degree-of-freedom, viscous damped. Features fully floated construction that reduces friction, yet provides extreme resistance to shock. Small size, high precision. Ideal for airborne or shipborne equipment for space stabilization, rate tracking control, or rate measurement.

R-600 Resolver  
functional accuracy better than 0.05%.

R-150 Resolver  
miniature version of R-600.

### precision RESOLVERS

The highest precision resolvers commercially available. Small size makes them ideal for use as computing element in military and precision industrial electronic systems. Special wide band units are available for irregular wave shapes having rise times as low as one micro second. Units are built directly to required accuracy without selection or culling.

Series SR 6066

### MAGNETIC CLUTCHES

High quality magnetic clutches for all control applications. Single and double-ended models, as well as combination that provides effective SPDT action. Standard and Miniature models, with or without crown tooth construction. Quick acting, high torque.

### SERVO mechanical parts

standard (1/4" shaft) and miniature (1/8" shaft) sizes  
Shaft hangers, shafts, precision gears, differentials, couplings, terminal blocks, limit stops, dial assemblies, etc. Easy mounting on convenient slotted plate. Changes easily made, parts re-usable. Tremendous time-saver in prototype work on servo and instrumentation systems.

Reeves Sub-contract Service: Our facilities are available to you for help on computing systems, gun fire control, and precision electronic systems of any kind. For complete information, contact Reeves Sub-contract Department.

Write for technical literature on above products.

having your ups and downs?

# DALOHM has the answer!

You can depend on  WIRE WOUND RESISTORS

Carefully designed, precision made to meet all space problems and for all applications where equipment must meet the most severe environmental, shock, vibration, and humidity conditions. Smallest in size; completely coated with special silicone material; welded from terminal to terminal; impervious to moisture, salt ions, vapor gases.

## TYPES RS, RLS, RSE

Five wattage ranges—2,3,5,7 and 10, six sizes; resistance range from .05 ohm to 175K ohms depending on type; tolerance range .05% to 3%. Type RS with axial leads; Type RLS with radial leads; Type RSE housed in metal tubing for tremendous shock and vibration resistance.

Write for Bulletins R-23B, R-30B, R-25B

## TYPES NS, NLS

Newly conceived NON-INDUCTIVE resistors. Five wattage ranges—2,3,5,7, and 10, six sizes; resistance range from 2 to 37K ohms; tolerance from .05% to 3%. Type NS with axial leads; Type NLS with radial leads.

Write for Bulletin R-34A

## TYPE RH

Die-cast, black anodized radiator finned housing. Lugs provided for horizontal mounting. Three wattage ranges—25,50,250; resistance range 0.1 to 100K ohms. Tolerance .05% to 3%.

Write for Bulletin R-21D

## TYPE PH

New ruggedized Powerhouse resistor for vertical panel mounting. Black anodized finned aluminum housing. Two wattages 25 and 100; resistance range from 0.1 to 60K ohms; tolerance .05% to 3%.

## SPECIAL PROBLEMS?

Just ask us; we'll help you find the solution.

## TYPES WWL, WWA, WWP, WWR

Encapsulated for hermetic sealing; non-inductive pi wound; powered at .1 watt to 2 watts; resistance range 0.1 ohm to 5 megohms; sizes from sub-miniature 1/8 by 3/8 inch to 1/2 by 2 inches; .05% to 3% tolerances.

Write for Bulletin R-26B

if your ups and downs involve  
DEPOSITED CARBON RESISTORS...

# DALOHM has the answer!

Assure accurate, dependable performance. Precision resistance values, low voltage coefficient, low capacitive and inductive characteristics in high frequency applications, extremely high stability and economy.

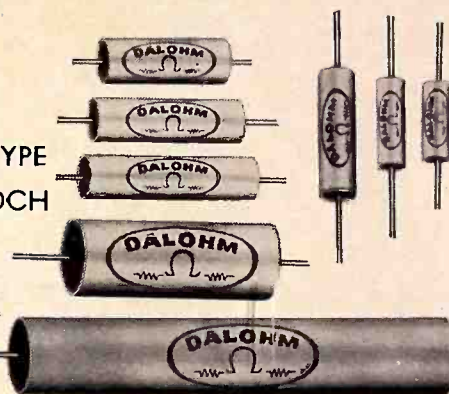

## TYPES DC, DCH

Resistance range from 10 ohms to 50 megohms; tolerance 1% or higher as specified. Type DCH hermetically sealed in non-hydroscopic ceramic envelope. Five wattages— $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{1}{2}$ , 1 and 2; eight sizes.

TYPE DC

TYPE DCH

Write for Bulletins R-24C, R-27C

## TYPE DC-5

For high voltage and/or high resistance applications; powered at 5 watts; high voltage up to 20,000 VDC; resistance range 1 megohm to 200 megohms; tolerance 1%.

Write for Bulletin R-28

## POTENTIOMETERS

### TYPE A10-W TRIMMER

High temperature—humidity proof—ruggedized—wire wound—designed to provide highest performance under ever-increasing MIL SPEC requirements. Powered at .8 watt; resistance range 10 ohms to 100K ohms; tolerance 5% standard.

Write for Bulletin R-32C

### TYPE DP-12

Hermetically sealed, moisture proof for critical electronic circuitry, Military Type RA-30 built to surpass JAN-R-19.

Write for Bulletin R-31

## Collet-Fitting EQUIPMENT KNOBS

Precision made Dalohm knobs, incorporating an exclusive collet-fitting design, permit positive locking on the shaft without any of the damaging effects found in other knob securing methods.

### TYPE K INDUSTRIAL KNOBS

For hard use at high/low temperatures; precision cast of thermo setting plastic; five sizes— $\frac{5}{8}$ ", 1-1/16", 1 3/4", 2 1/4", 3". Collets interchangeable for shafts  $\frac{1}{8}$ " to  $\frac{3}{8}$ ". Standard pointers, escutcheons and indicators available.

Write for Bulletin K-29

### TYPE MS Military Style KNOBS

in accordance with MIL-K-25049

The ultimate in airborne and other military knob applications. Made of tough, durable, fungus-proof thermoplastic; metal parts corrosion resistant. Complete selection of skirts as required by MIL Specs.

Write for Bulletin K-35A

# FREQUENCY STANDARDS

## PRECISION FORK UNIT TYPE 50

Size 1" dia. x 3 3/4" H.\* Wght., 4 oz.

Frequencies: 240 to 1000 cycles

Accuracies:—

Type 50 ( $\pm 0.02\%$  at  $-65^{\circ}$  to  $85^{\circ}\text{C}$ )

Type R50 ( $\pm 0.002\%$  at  $15^{\circ}$  to  $35^{\circ}\text{C}$ )

Double triode and 5 pigtail parts required

Input, Tube heater voltage and B voltage

Output, approx. 5V into 200,000 ohms

\*3 1/8" high  
400 - 1000 cy.

## FREQUENCY STANDARD TYPE 50L

Size 3 3/4" x 4 1/2" x 5 1/2" High

Weight, 2 lbs.

Frequencies: 50, 60, 75 or 100 cycles

Accuracies:—

Type 50L ( $\pm 0.02\%$  at  $-65^{\circ}$  to  $85^{\circ}\text{C}$ )

Type R50L ( $\pm 0.002\%$  at  $15^{\circ}$  to  $35^{\circ}\text{C}$ )

Output, 3V into 200,000 ohms

Input, 150 to 300V, B (6V at .6 amps.)

## PRECISION FORK UNIT TYPE 2003

Size 1 1/2" dia. x 4 1/2" H.\* Wght. 8 oz.

Frequencies: 200 to 4000 cycles

Accuracies:—

Type 2003 ( $\pm 0.02\%$  at  $-65^{\circ}$  to  $85^{\circ}\text{C}$ )

Type R2003 ( $\pm 0.002\%$  at  $15^{\circ}$  to  $35^{\circ}\text{C}$ )

Type W2003 ( $\pm 0.005\%$  at  $-65^{\circ}$  to  $85^{\circ}\text{C}$ )

Double triode and 5 pigtail parts required

Input and output same as Type 50, above

\*3 1/2" high  
400 to 500 cy.  
optional

## FREQUENCY STANDARD TYPE 2005

Size, 8" x 8" x 7 1/4" High

Weight, 14 lbs.

Frequencies: 50 to 400 cycles

(Specify)

Accuracy:  $\pm 0.001\%$  from  $20^{\circ}$  to  $30^{\circ}\text{C}$

Output, 10 Watts at 115 Volts

Input, 115V. (50 to 400 cycles)

## FREQUENCY STANDARD TYPE 2007T

TRANSISTORIZED

Size 1 1/2" dia. x 4 1/2" H.\* Wght. 7 ozs.

Frequencies: 240 to 1000 cycles

Accuracies:—Same as 2003, above

Type 2007S—Silicon type

Input, 28V.

Output, Multitap, 75 to 100,000 ohms

\*3 1/2" in 2007S, 400 to 800 cycles.

## FREQUENCY STANDARD TYPE 2121A

Size

8 3/4" x 19" panel

Weight, 25 lbs.

Output: 115V

60 cycles, 10 Watt

Accuracy:

$\pm 0.001\%$  from  $20^{\circ}$  to  $30^{\circ}\text{C}$

Input, 115V (50 to 400 cycles)

## FREQUENCY STANDARD TYPE 2001-2

Size 3 3/4" x 4 1/2" x 6" H., Wght. 26 oz.

Frequencies: 200 to 3000 cycles

Accuracy:  $\pm 0.001\%$  at  $20^{\circ}$  to  $30^{\circ}\text{C}$

Output: 5V. at 250,000 ohms

Input: Heater voltage, 6.3 - 12 - 28

B voltage, 100 to 300 V., at 5 to 10 ma.

## FREQUENCY STANDARD TYPE 2111C

Size, with cover  
10" x 17" x 9" H.

Panel model  
10" x 19" x 8 3/4" H.

Weight, 25 lbs.

Frequencies: 50 to 1000 cycles

Accuracy: ( $\pm 0.002\%$  at  $15^{\circ}$  to  $35^{\circ}\text{C}$ )

Output: 115V, 75W. Input: 115V, 50 to 75 cycles.

## ACCESSORY UNITS for TYPE 2001-2

L—For low frequencies  
multi-vibrator type, 40-200 cy.

D—For low frequencies  
counter type, 40-200 cy.

H—For high freqs, up to 20 KC.

M—Power Amplifier, 2W output.

P—Power supply.

*This organization makes frequency standards within a range of 30 to 30,000 cycles. They are used extensively by aviation, industry, government departments, armed forces—where maximum accuracy and durability are required.*

WHEN REQUESTING INFORMATION

*slide it on  
and crimp!*

*a fully-insulated  
one-piece tap  
connector*  
**for shielded  
and  
coaxial cable**

# UNI-RING

UNI-RING offers a tremendous saving in installation time over any previous method of tapping or terminating shielded or coaxial cable. As the inner ring slides under the shielded braid, the tap wire is held between the braid and the outer ring. Single or multiple taps, from either the front or back of the connector, can be accommodated . . . A single crimp, using the same basic HYTOOLS used for installing HYRINGS, completes the uniform, secure, and insulated assembly.

The protecting nylon insulation extends beyond both ends of the UNI-RING, eliminating metal-to-metal contact and preventing harmful wire-chafing in tight locations. The UNI-RING is color-coded to indicate conductor sizes.

UNI-RING's one-piece design insures electrical integrity, prevents heating, and eliminates noises caused by isolated metal parts.

# TRANSFORMER PROBLEMS?

1

## problem

Design a charging reactor with an inductance of 4.85 henrys ( $\pm 7\%$ ) at 150 ma, DC, and an inductance linearity of 20%. It should operate at 8000 volts ma, DC, and be tested at 14,000 RMS volts, and continuously useable in the frequency range up to 2000 cps. It should have a maximum temperature rise of only 125°C in a standard ambient. It should also have a maximum effective capacitance of 20 60 micromicrofarads when measured in the frequency range between 20 and 25 megacycles. Other prime factors are minimum weight and dimension. Construction to be in strict accordance with the applicable requirements of MIL-T-27.

## solution

Inductance: 4.85 henrys  $\pm 5\%$  @ 150 ma, DC  
Linearity:  $\pm 10\%$  • Operating Voltage: DC=8000  
Test Voltage RMS: 16,000 • Useable at F up to:  
2000 cps • Maximum Temp. Rise:  $100^\circ\text{C}$  • Ambient Temperature:  $25^\circ\text{C}$  • Max. Effective Cap.:  
51 micromicrofarads (measured at 20-25 megacycles) • Weight: 2-3/4 lbs. • Dimensions nominal: H—3-1/2" + 3/8" terminal, W—2-7/8", L—3-13/16"

2

## problem

Design a miniaturized 400 cycle filament transformer for airborne operation. Transformer to operate in an ambient temperature ranging from  $-55^\circ\text{C}$  to  $+100^\circ\text{C}$ . The maximum allowable temperature rise to be  $60^\circ$  over ambient. Dimensions cannot exceed 2-7/8" high, by 2-7/16" wide, by 2-1/2" long; nor can the weight exceed 2 pounds. The primary source to be 115V, with primary insulation for 500V RMS hipot. An electrostatic shield is required between the primary and secondary. The secondary is required to deliver 10 amperes at 5V (C.T.)  $\pm 3\%$ , have a total maximum capacitance of 60 micromicrofarads to other windings, shield, and core, and be able to stand a high potential test of 21,000V, RMS, @ 60 cycles. Construction to be in accordance with applicable parts of MIL-T-27, grade 2, Class B. The above are given as maximum dimension and minimum performance requirements, greatest possible improvement in size, weight and performance requested.

## solution

Filament transformer, Fosterite Impregnated • Primary: 115V, 380 to 1500 cps. Hipot at 1000V, RMS, 60 cps • Electrostatic shield grounded to core. • Secondary: 5V, C.T.  $\pm 1/4\%$  @ 10 amp, Hipot at 25,000V, RMS, 60 cps, for one minute. Distributed capacitance to other winding, shield and core: 50 micromicrofarads. • Temperature Rise:  $30^\circ\text{C}$  • Ambient temperature range:  $-55^\circ\text{C}$  to  $+100^\circ\text{C}$  • Weight: 12 ounces • Dimensions: H—2-1/4" + 3/8" terminal, W—2-3/16", L—2-1/2".

3

## problem

Design a miniaturized 400 cycle power transformer for airborne operation, with a three phase primary and three secondaries: three phase, two phase and single phase. Transformer to operate in an ambient temperature ranging from  $-55^\circ\text{C}$  to  $+85^\circ\text{C}$ . The maximum allowable temperature rise to be  $40^\circ\text{C}$  over ambient. Transformer to operate at altitudes up to 50,000 feet. Dimensions cannot exceed 5" high, by 2-1/4" wide, by 2-1/2" long; nor can the weight exceed 2-1/2 pounds. The primary source to be 115V, 400 cps, three phase. The three secondary loads to be (a) 30V, single phase, at 1.8A with .5 lagging power factor, (b) 30V, single phase, at 4A with .7 lagging power factor, and (c) 115V single phase, in quadrature with (b)  $\pm 5^\circ$ , at .47A with .7 lagging power factor. Secondaries (a) and (b) to be loaded continuously with (c) loaded intermittently. All secondary windings to be ended in four terminals. Construction to be in accordance with applicable parts of MIL-T-27, Grade 1, Class A. The above are given as maximum dimensions and minimum performance requirements, greatest possible improvement in size, weight and performance requested.

## solution

Power transformer, three phase, 400 cps to one phase, two phase, and three phase. Construction: Grade 1, Class A, to MIL-T-27 • Ambient temperature range:  $-55^\circ\text{C}$  to  $+85^\circ\text{C}$  • Temperature Rise:  $35^\circ\text{C}$  • Primary: Three terminal, three phase, 115V, 380-420 cps, per phase • Secondaries: Total of four terminals (a) 30V, three phase at 1.8A and .5 lagging power factor. Continuous duty. (b) 30V, single phase at 4A and .7 lagging power factor. Continuous duty. (c) 115V, single phase, at .47A, .7 lagging power factor and in quadrature with (b) within  $\pm 5^\circ$ . • Weight: Two pounds • Dimensions: H—4-1/32" + 1/2" seven terminal header; W—2-1/32"; L—2-9/32"

4

## problem

Design a miniature audio input transformer for airborne operation. Transformer to operate in an ambient temperature of  $+85^\circ\text{C}$ , and to conform to the applicable parts of MIL-E-5400 and MIL-T-27. Duty cycle to be continuous with a minimum life of 1000 hours. Transformer to couple a 300 ohm source to a tube grid. Step-up turns ratio to be 1:17 minimum, with the maximum possible desired. Frequency response to be flat within 0.75 db from 20 cps to 7,000 cps, and flat within 1.2 db from 15 cps to 10,000 cps. Maximum signal level to be 500 mv @ 20 cps in 300 ohm primary. Electrostatic shield required between primary and secondary. Electromagnetic shielding to be 40 db minimum. Size to be kept minimum but must not exceed 1-1/8" x 7/8" x 1-3/8" high.

## solution

Audio Transformer, low level input, miniaturized. • Construction: Grade 1, Class A, MIL-T-27 • Duty Cycle: Continuous • Life: Greater than 1,000 hours. • Ambient temperature:  $+85^\circ\text{C}$  max. • Primary: Three terminal, center-tapped winding, 300 ohms nominal impedance. • Secondary: Two terminal winding, 125,000 ohms nominal impedance. Turns ratio: 1:20-1/2 • Electrostatic Shield: Between primary and secondary. Electromagnetic Shield: 45db • Frequency response: 20 cps—7,500 cps, flat within 0.5 db and 10 cps—10,000 cps, flat within 1.0 db with 125,000 ohm load. • Maximum input voltage: 500 mv at 20 cps • Dimensions: 1" x 11/16" x 1" high + 1/8" terminal

5

## problem

Design a hermetically sealed, miniaturized, power supply to provide 6600V, DC, at 100 microamperes load, when connected to a source of 115V, 400 cps. Power supply to operate in an ambient temperature range between  $-55^\circ\text{C}$  and  $+85^\circ\text{C}$ . Minimum life to be 5000 hours at full load. Full load input current must not exceed 0.05A. Output voltage regulation, no load to full load, to be 400 volts DC maximum. Maximum ripple voltage at full load to be 250 volts, peak to peak. Casing to be in accordance with the applicable requirements of MIL-T-27. Power supply to have low external magnetic field. Preferred maximum dimensions to be 3-3/4" x 3-3/4" x 1-3/4" thick.

## solution

Power supply: Hermetically sealed, AC to DC. Construction: Oil filled metal casing in accordance with applicable requirements of MIL-T-27. Duty cycle: Continuous • Life: Greater than 10,000 hours (measured). • Ambient temperature:  $+85^\circ\text{C}$  maximum,  $-55^\circ\text{C}$  minimum. • Input: Two terminals, 115V, 380 cps to 420 cps. Output: One terminal and case, 6600V DC at 100 microamperes. • Regulation: 350V, no load to full load. • Ripple voltage: 200V peak to peak. • External field: Nil. • Dimensions: 1-17/32" x 3-17/32" x 3-19/32" + 1-1/16" over terminals.

6

## problem

Design an hermetically sealed 400 cps output transformer for use in a servo amplifier with a high degree of feedback (Mu-B-100). Frequency response to be linear within 3 db from 200 cps to 170,000 cps, with no dips or peaks. Primary impedance to be 6,000 ohms, center-tapped, with a maximum DC resistance of 60 ohms. Primary OCL to be 4 henrys minimum when measured at 30V, 400 cps, and with 7.5 ma of DC flowing through the total winding. Secondary impedance to be 500 ohms, center-tapped, with a maximum DC resistance of 6 ohms. Secondary rated output to be 140V @ 400 cps into a 500 ohm load. Transformer efficiency to be 95% minimum. Ambient temperature range to be from  $-55^\circ\text{C}$  to  $+105^\circ\text{C}$ . Maximum altitude to be 70,000 feet. Casing to be in accordance with the applicable requirements of MIL-T-27, with preferred dimension limits to be 2-1/2" x 2-3/4" x 2-3/16".

## solution

Output Transformer: 400 cps, high level, hermetically sealed. • Construction: Grade 1, Class B, MIL-T-27. • Maximum Altitude: 70,000 feet. Duty Cycle: Continuous. • Life: Greater than 10,000 hours. • Ambient Temperature:  $-55^\circ\text{C}$  to  $+105^\circ\text{C}$ . • Primary: Three terminal, center-tapped winding, 6000 ohms nominal impedance. Primary Resistance: 45 ohms. • Primary OCL: 5 henrys, measured at 30V, 400 cps, with a 7.5 ma, DC, through winding. • Secondary: Three terminal, center-tapped winding, 500 ohms nominal impedance. • Secondary Resistance: 5 ohms. • Rated Operating Level: 140V, 400 cps across 500 ohm secondary load. • Efficiency: 96%. • Frequency Response: 200 cps—300,000 cps, flat within 1.0 db, and 200 cps—550,000 cps, flat within 3.0 db. Smooth response, no discontinuities. • Dimensions: 2-1/2" x 2-3/4" x 2-3/16" high + 5/8" terminals.

Do these problems look like those you face? They are typical of the Peerless Transformers which have been developed to meet unique and difficult specifications. The ability of the Peerless engineering staff to solve these design problems quickest and best accounts for the preference which engineers throughout the country have for Peerless products. If you have unusual transformer requirements, consult Peerless.

ELECTRONIC ENGINEERS

NEED MORE

BUSINESS INFORMATION

Two BUSINESS EDITIONS of ELECTRONICS, published on the 10th and 20th of each month, are providing business-minded electronic engineers with the marketing, topical and commercial information needed to keep abreast of today's complex electronic industry. The engineer who used to be concerned chiefly with designing a circuit or product now wants to know where and how it can be sold.

ELECTRONICS TECHNICAL EDITION, published on the 1st of each month, contains the same type of business information in "Industry Report" — one of the best read sections of the magazine.

Advertisers in ELECTRONICS can reach more than 46,000 paid subscribers against a background of technical editorial matter in...

the TECHNICAL EDITION  
*(Published the 1st of each month)*

airborne recording system

universal tape system

automatic wave analyzer

multi-track record/reproduce heads

## Record, Reduce, and Analyze Data on Magnetic Tape

### ON-THE-SCENE RECORDING

Getting the data on tape is generally just as difficult as the available space is limited. But standard recorders available from the Davies Laboratories Division can meet even the severe restrictions of missile flight. Recorders for airborne, mobile, and other uses characterized by limited space and severe environmental conditions range from a complete six track system in a seven inch cube illustrated, to a 10½" reel recorder with 14 or more tracks. Electronic Housings contain complete power facilities, while interchangeable plug-in cards provide recording circuitry for direct, FM, PWM, or digital pulse techniques on each track. Operating on 28 volts DC and/or 115 volts, 400 cps, recorders provide tape speeds from ½ to 60 ips. All include provision for electronic wow and flutter compensation perfected by the Davies Laboratories Division. *Standard portable recording equipment is described in Bulletin 2602.*

### UNIVERSAL SYSTEMS RECORD/REPRODUCE IN THE LABORATORY

Universal Magnetic Tape Systems combine the ready to use trouble-free qualities of a "package" with the precision, accuracy, and flexibility of the far more expensive custom designs. Systems available provide up to thirty tracks of data capacity, interchangeable plug-in direct, FM, or PWM recording electronics for each track, electronic compensation for wow and flutter, plus numerous other features proved through years of service in jets, missiles, and on the ground. Features never before available in a "package" system include a choice of six tape speeds at the flip of a switch, automatically switched components to match tape speed, and precise time coincidence of data across the tape. Custom systems are readily available for those few applications for which a Universal System is not suited. *Write for Bulletin 2701.*

### AUTOMATIC WAVE ANALYZERS SPEED DATA REDUCTION... IMPROVE STATISTICAL RELIABILITY

Feed data from magnetic tape or other steady state sources into a Davies Laboratories Division Automatic

Wave Analyzer and a complete Fourier series is automatically plotted and printed in permanent record form as either *amplitude* versus *frequency* or *power* versus *frequency*. Model 9020A analyzes frequencies from 3 cps to 2 kc, and Model 9050A has a frequency range of 3 cps to 10 kc. Both have a "quick look" facility for a fast picture of major frequency components, and both are characterized by high amplitude accuracy, wide voltage range, high resolution, and adjustable bandwidths. Multichannel inputs permit simultaneous analysis of up to six data channels. *Write for Bulletin 9001.*

### MULTI-TRACK RECORD/REPRODUCE HEADS

Head styles are available from the Davies Laboratories Division to satisfy all of the major considerations of data recording, including precise data coincidence among tracks across the tape, maximum number of tracks per inch of tape width, high speed stop/start operation, special pulse system requirements, and efficiency in low speed recording. Inline head stacks for data coincidence, interleaved head stacks for high track density, and "pointed" head stacks for high speed stop/start pulse systems are constructed for maximum accuracy under the most adverse environmental conditions. *Write for Bulletin 3300.*

\* \* \*

*Space does not permit coverage of more than a few kinds of Davies Laboratories Division equipment for data recording, reduction, and analysis. Chances are, whatever your tape requirements, Davies Division is experienced in satisfying them. Tell us what they are, and we'll be happy to send you whatever literature is available, or have a representative at your door at your convenience. If you'd like a general rundown of magnetic tape data recording, and the techniques available for getting your data accurately on tape, write for Bulletin 1001, "The Role Of Magnetic Tape In Data Recording". Minneapolis-Honeywell Regulator Company, Davies Laboratories Division, 10721 Hanna Street, Beltsville, Maryland. Webster 5-2700.*

## for electronic use

These instruments and components can serve scores of measurement, control and servo applications in your research and production work. Honeywell's world-wide engineering and service organization can give you valuable help in applying these products. For details, call your nearby Honeywell sales engineer. He's as near as your phone. Or write for the Honeywell Composite Catalog.

MINNEAPOLIS-HONEYWELL REGULATOR CO.,  
Industrial Division, Wayne and Windrim Avenues, Philadelphia 44, Pa.—in Canada, Toronto 17, Ontario.

### SHIELDED LOW-LEVEL TRANSFORMERS

For input or coupling circuits, these transformers faithfully handle low-frequency a-c or chopper-modulated d-c signals of from 0.0005 to 200 millivolts. Highly effective electrostatic and magnetic shielding. Write for Specification S900-1.

### BROWN INSTRUMENTS

For measuring, recording and controlling temperature, pressure flow, liquid level and many other variables. The line of *Electro-iK* potentiometers includes special models for research work . . . such as the Function Plotter, Duplex Function Plotter, Extended Range Recorder, 1/4-second Pen Speed Recorder, Adjustable Span Recorder, High-Impedance Recorder, and Brown-Rubicon Precision Indicator. Write for Catalog 1561.

### ElectroniK NULL INDICATOR

The modern successor to the spotlight galvanometer, it's ideal for either lab or production work. Resists vibration, responds quickly, takes heavy overloads without "loss of spot." Write for Data Sheet 10.0-12.

### BROWN SERVO COMPONENTS CONVERTERS, AMPLIFIERS, MOTORS

These components, proved in thousands of *ElectroniK* instruments, are available as individual units. For remote positioners, null balance circuits, analog computers, co-ordinate translators, servo loops. Order in small quantities for prototype development, or by the thousands for production use. Write for specifications.

### Electr-O-Vane PRECISION SWITCH

Less than 2 gram-inches of torque actuates this high-precision SPDT switch. Switching action occurs with from 0.00025 to 0.0025 inches of actuating lever movement. Use it as a non-loading limit switch, cutoff switch, or no-load safety switch. Write for Specification S800-1.

# Surco

WIRE • CABLES • TUBING

**A** Coaxial Cables — "Surco" coaxial cables include a wide variety of types, such as low capacity, extra flexibility, small diameter, microphone 2 conductor, and high temperature "Teflon." Conform to Military Spec. MIL-C-17B. Many special designs. If you have a coaxial cable problem consult us.

**B** Miniature Coaxial Cables — Extruded low-loss Teflon dielectric O.D. under 1/16 inch for 50 ohm cable and under 1/8 inch for 95 ohm cable. Low capacitance, stable electrical characteristics.

**C** Miniature Wire and Cable — "Surco" miniature wire and cables are made in conductor sizes down to No. 32 AWG in stranded and No. 30 AWG in solid. Close control in manufacturing permits small finished diameters on both single and multi-conductor cable. Available in standard colors with and without nylon jackets or shielding in the various vinyl or polyethylene compounds.

**D** "Surflene" Insulated Hook-up Wire and Tubing — "Surflene" (Kel-F) for use at temperatures not exceeding  $135^{\circ}\text{C}$  is available in 15 solid colors and wall thicknesses down to 0.008".

**E** Multi-Conductor Cables — "Surprenant" Multi-conductor cables are available with conductor sizes from No. 32 AWG and larger with vinyl, "Surflene", or Teflon insulation, with or without nylon jacket or shielding and can be made to specification for special design and applications. Close tolerances permit unusually small overall diameters, and "Spiralon" color coding permits easy identification even when hundreds of conductors are involved.

**F** New Improved Aircraft Wire — Surprenant new lightweight, smaller diameter MD wire (Vinyl, glass braid, nylon) and the standard Surprenant sandwich construction (Vinyl, glass braid, nylon) give excellent overload safety, high and low temperature performance, good electrical properties and have a nylon jacket giving greater resistance to abrasion, fungus, moisture, and hydraulic and other oils (nylon braided jacket on size 10 AWG and larger for greater flexibility) and are made to conform to MIL-W-5086. "Surprenant" also offers nylon jacketed polyvinylchloride construction made to conform to MIL-W-5086, MIL-C-

7078A and MIL-W-7072A (ASG). High temperature wire made to MIL-W-8777A and MIL-W-7139A.

**G** "Spiralon" — "Surco-Spiralon" color coding is available on all vinyl, nylon, Teflon, and Kel-F insulated wires, with or without nylon jackets. One, two or three color stripes are available in the Nema colors providing almost unlimited color identifications. Solid color insulation is also available in the 10 standard Nema colors.

**H** "Surco" A-10 for ( $105^{\circ}\text{C}$ ) Hook-up Wire — A-10 is an unusually high grade vinyl insulating compound developed in our own laboratories for a better hook-up wire. It has excellent resistance to deformation, soldering, high temperature, low temperature and aging; high electrical properties; Underwriters' Lab. approved for continuous operation to  $105^{\circ}\text{C}$  without fibrous covering. A-10 insulated wire made to conform to MIL-W-16878B, Types B, C, and D, with or without nylon jackets or synthetic braids.

**I** "Surco" Tubing — "Surco" vinyl, nylon, polyethylene, silicone rubber, Kel-F and Teflon tubing available in a wide variety of sizes, temperature ranges, electrical and physical characteristics.

**J** MIL-W-5274A Radar & Electronic Hook-up Wire — Made to conform to Air Forces Spec., this wire offers excellent low temperature performance. Nylon jacketed, it has high abrasion resistance and superior surface resistivity even under adverse humidity conditions, making it very adaptable for high impedance circuits.

**K** Silicone Rubber Wire and Cable — Thin wall silicone wire for 600 and 1000 volt service up to  $400^{\circ}\text{F}$  continuously and higher with short life ratings. Remains flexible at  $-100^{\circ}\text{F}$ . Braided and jacketed constructions available for increased mechanical and abrasive characteristics.

**L** UL and CSA Appliance Wire — Approved for  $80^{\circ}\text{C}$ ,  $90^{\circ}\text{C}$  and  $105^{\circ}\text{C}$  in a range of sizes, wall thicknesses and voltage ratings as required, and solid or stranded conductors with or without nylon or braided jackets. Color coded as required.

Extruded THIN WALL Teflon  
INSULATED ( $210^{\circ}\text{C}$ )  
HOOK-UP WIRE

Continuously operable over the range from  $-90^{\circ}\text{C}$  to  $210^{\circ}\text{C}$  without appreciable deterioration, extruded "Teflon" (polytetrafluoroethylene) is now available in walls as thin as 0.010" (type WTE) and 0.015" (type RTE). Teflon combines non-flammability, chemical and solvent resistance, high volume and surface

resistivity with extremely low electrical losses. This wire is available in all flexible strandings from AWG 8 and conforms to performance requirements of MIL-W-16878B. Colors and Spiralon markings conform to MIL-STD-104. Also, available in limited range of sizes in natural or colored tubing.

## Electronic Weatherstrip

Knitted, metallic wire structure combines maximum *conductivity* for efficient performance with inherent *resiliency* that assures continuous line contact between imperfect mating surfaces. Interlocked loops, of continuous wire strands, assures maximum *cohesion*. Available in continuous lengths in more than 500 shapes and sizes to meet all installation requirements.

## Choke Flange Gaskets

The controlled resiliency and compressibility of METEX *Knitted Wire Gaskets* for standard Waveguide Choke-Flanges insure complete metallic contact, flange to flange. Assures RF-tight joint when distortion makes choke inefficient. Supplements choke to prevent RF leakage at high power levels. Eliminates leakage at other than choke frequencies.

Standard RF gaskets shown above available from stock without minimum charge. Other RF gaskets available on order.

## Heat Dissipating Tube Shields

METEX Resilient Cooling Sleeves for subminiature tubes combine high heat conducting ability with inherent vibration dampening and shock absorbing properties. Provides an efficient, practical and economical method of conducting heat away from the tube envelope, directly to a heat sink. Aluminum alloy wire assures maximum thermal conductivity with minimum weight. Thermal peaks and valleys are leveled out assuring consistency of thermal performance among tubes.

METEX Part No.	Tube Envelope	HEIGHT

MT-204E-2	T3-2; T3-5; T3-8	1 1/16"
MT-204E-3	T3-3	1 1/2"
MT-204E-5	T3-4	1 1/16"

Sizes shown available from stock. Other sizes available on special order.

**METEX Engineers will be glad to work with you on any problems involving RF Shielding or Heat Dissipation in electronics or related equipment. No obligation, naturally!**

ELECTRONICS DIVISION

**METAL TEXTILE CORP.**  
ROSELLE • NEW JERSEY

# Our principal product — RELIABILITY

Eastern Precision Resistor Corp. is the only resistor manufacturer which compounds and produces its own plastics, extrudes its own rods and machine its own bobbins. The rigid quality control exercised

over these operations as well as over resistor production, insures the reliability, stability and tolerance of all EPR products.

### N-CAPS

Designed to surpass the requirements of MIL-R-93A and MIL-R-9444 specifications, EPR "N-Caps" encapsulated lug resistors feature optimum reliability over a wide range of adverse environmental conditions. Available in all standard military sizes, plus hundreds of commercial, subminiature and special sizes and shapes.

### ENCAPSULATED SUBMINIATURE PRECISION WIRE-WOUND RESISTORS

Series NM (radial lead) and Series NS (axial lead) resistors are wound on plastic bobbins and encapsulated to meet the requirements of MIL-R-93A specifications, characteristic "A". Available in both military and industrial subminiature sizes and ratings.

### AC RESISTANCE NETWORKS

Excellent matched characteristics over wide temperature and frequency ranges, combined with very low distributed capacitance are the outstanding features of the Type SS5 Matched Precision Resistors shown above. The distributed capacitance of these wire wound units is held to values as low as 0.5mmfd to 1mmfd on a 1-megohm resistor. Individual resistors are accurate within  $\pm 0.05\%$ , and are available in resistance values from 25 ohms to 2 megohms in  $\frac{1}{4}w$  to 1w ratings. A typical 1-megohm unit is  $1" \times \frac{3}{8}"$  diam.

### COMPLETE PACKAGING

All Series of EPR resistors can be supplied in modular AC and/or DC matched networks; encapsulated, varnished or wax-impregnated to meet your requirements for termination and mounting.

### MINI-SCOPES

These compact, miniaturized oscilloscopes are ideal for general servicing applications at low RF. Automatically-focussed, flat-face 1-inch CRT provides full-scope usable trace with minimum pattern distortion. Frequency Response: DC-150 KC,  $\pm 3$  db, usable to 200 KC; Sensitivity: 0.5 volts/in. horizontal, 0.5v—1mv/in. vertical; Sweep Frequency: 0.5 cps-50KC.

### COMP-U-TRIM (MODEL 113)

The first, truly-adjustable precision wire-wound resistor. Combines all the desirable features of a bobbin-wound encapsulated resistor and a trimming potentiometer. Values from 100 ohms to 1.0 megohms are available with matched tolerances of better than  $\pm 0.005\%$ . Particularly suited to computer circuitry, voltage dividers and networks, and other applications where extreme resistance matches must be obtained.

## Decorating on Metals?

### Leyse Precision Reproduction Processes Give Your Products the "Good Looks" That Sell!

Dials, instrument plates, bezels or what have you — the finest of design reproduction on metals is available to you at Leyse.

Whether your requirements call for lithography, letterpress or silk screen printing — plus any special surface finishing as listed below, Leyse offers the economical answer for *customizing* and producing top quality units in quantity production.

Designs, lettering and markings are clean and sharp and colors laid down with hairline register accuracy — free from blurs. Background surface finishing is done to perfection and all units blanked with burr-free edges. Write for samples today and evaluate the "good looks" Leyse can contribute to your products. Better yet, send us your blueprints for quotation.

## RCA Instruments Rate Your Confidence

The RCA Seal on these quality instruments is your assurance of highest dependability. They are backed by the RCA reputation for engineering excellence. All are immediately available—ready to serve you eminently well.

### VACUUM TUBE VOLTMETER

Type LV-10 \$250\*

With excellent stability and versatility, this new RCA Vacuum Tube Voltmeter is ideal for use wherever highly precise measurements are essential. Combines in one instrument an AC voltmeter covering a range from audio to UHF frequencies, a DC voltmeter with 100 megohms input resistance, and an ohmmeter capable of measuring resistance from zero to 1000 megohms.

#### SPECIFICATIONS

##### DC VOLTS:

7 ranges: 1, 3, 10, 30, 100, 300, 1000.  
Accuracy:  $\pm 3\%$  full scale deflection.  
Input resistance: 100 megohms  $\pm 2\%$  on all ranges.

##### AC VOLTS:

6 ranges: 1, 3, 10, 30, 100, 300.  
Sine Wave Accuracy:  $\pm 3\%$  full scale deflection.  
Input impedance: Less than  $2 \mu\text{f}$  in parallel with 15 megohms.

##### Frequency Response:

$\pm 1.0$  db, 18 cps to 700 MC.  
Relative Measurements: possible to 1000 MC.

##### RESISTANCE:

0 to 1000 megohms in 7 ranges.  
Accuracy  $\pm 5\%$  between divisions 10 and 100 on scale.  
DB Range:  $-10$  to  $+52$  dbm in 6 ranges.  
Zero dbm = 1 mw in 600 ohms.

### DC NULL VOLTMETER

Type LV-14 \$345\*

Five important features characterize this Null Voltmeter, as follows: (1) Flexible input: positive, negative or neither side grounded. (2) Calibrated voltage output for external recorder amplifier, sensitive laboratory galvanometer. (3) Simplicity of operation. (4) Infinite impedance at null. (5) Long-life mercury battery. Rack Model LV-14R available at \$360.00.\*

#### SPECIFICATIONS

##### VOLTAGE RANGES:

0-10, 0-100, 100-200, 200-300, 300-400, 400-500, 500-600 volts DC.  
Positive, negative, or neither side grounded.

##### ABSOLUTE ACCURACY:

$0.1\% \pm 10$  millivolts between 0 and 10 volts.  $\pm 100$  millivolts between 10 and 600 volts.

##### RESOLUTION:

At least 5 millivolts between 0 and 10 volts. 50 millivolts between 10 and 600 volts.

##### INPUT IMPEDANCE:

Infinite at null.  
Greater than 2.5 megohms per volt at  $\frac{1}{4}$  division off null.

##### POWER REQUIRED:

100-135 volts, 50-60 cycles, 24 watts.

### MULTIMETER

Type LM-1 \$70\*

Widely used in all phases of industry for measurements of AC and DC voltages and DC current, this new Multimeter provides highest accuracy with modern overload protection. High sensitivity: 20,000 ohms per volt, AC and DC. One selector switch.

#### SPECIFICATIONS

##### SENSITIVITY:

20,000 ohms per volt for both AC and DC.

##### AC VOLTS:

Seven ranges: 3, 10, 30, 100, 300, 1000, 5000V.

##### Accuracy:

$\pm 2.5\%$  FSD, 20 to 2000 cps;  $\pm 4\%$  for the 5000V range.

##### RESISTANCE MEASUREMENT:

From 0 to 20 megohms in 3 ranges.

##### DC VOLTS:

Seven ranges: 3, 10, 30, 100, 300, 1000, 5000V.

##### Accuracy:

$\pm 1.5\%$  FSD,  $\pm 3\%$  for the 5000V range.

##### DC CURRENT RANGES:

50  $\mu\text{a}$ , 1 ma, 10 ma, 100 ma, 1 A, 10 A.  
1.5% FSD accuracy.

For complete information on the above and other instruments in the RCA line, write to RCA, Dept. U-46, Building 15-1, Camden, N.J.

# TRANSFORMERS FOR MILITARY & INDUSTRIAL APPLICATIONS

APPROVED FACILITIES FOR CERTIFYING COMPLIANCE TO MIL-T-27A

*Manufacturers of Transformers since 1930*

## SPECIALLY TREATED TRANSFORMERS

For those innumerable transformer applications in electronic equipment where size, weight and resistance to various atmospheric and temperature conditions are the determining factors, ITC can encapsulate or mold to meet practically any specified condition. This can be accomplished without any deviation in transformer perform-

ance due to special ITC techniques and materials. Special ITC test equipment can simulate temperature, humidity and atmospheric conditions thereby permitting transformer testing under identical operating conditions. ITC specially treated transformers have been "use-proven" in the field under rigid MIL-T-27A specifications.

## PULSE TRANSFORMERS

ITC's design file includes pulse transformers varying in size from the subminiature molded types used for blocking oscillator and low power matching purposes to high power pulse output transformers feeding magnetron loads. ITC engineers have produced a great variety of pulse transformers

designed for a wide range of specialized electronic equipment and as a result are considered outstanding specialists in this field. This, coupled with their many other design specialties, points out the versatility of design and manufacturing facilities available at ITC.

## HIGH TEMPERATURE TRANSFORMERS

Constant technological developments in the electronic industry, primarily in the area of military defense, are rapidly increasing the applications for reliable, high temperature transformers. ITC has accumulated much data and experience in the design, fabrication and testing of these transformers to meet rigid Military Specifications.

Transformers have been constructed using practically every high temper-

ature material that has been available in the last decade to insure transformer reliability and performance in the field. ITC's work on high temperature transformers has met with complete acceptance by both government and industry . . . you can put their "know-how" to work with confidence on high temperature transformer applications.

## COMPUTER TRANSFORMERS

ITC engineers have, for several years, devoted considerable time to developing precision transformers for computer applications. These transformers have found complete acceptance among the outstanding computer manufacturers.

Illustrated are some examples of computer precision transformers typical of the engineering skill and resourcefulness gained as a result of constantly working to rigid technical requirements demanded in computer components.

Industrial Insulation Breakdown Testers

**DIELECTRIC TEST SET NO. 50**

General: Designed to furnish the potentials required for dielectric tests conducted under MIL-C-13294A. Console type unit completely self-contained. Rating: Output is 5 kw at 1000 or 5000 V RMS.

Input: Operates from 220 V RMS, 60 cycle, single phase line.

Output: 1000 V RMS at 5.0 amps or 5000 V RMS at 1.0 amps, selection to be made by manual change-over switch mounted on the control panel.

Voltage Control: Output voltage is continuously adjustable from zero to max. by panel mounted control driving a variable auto-transformer within the console.

Overload Protection: Instantaneous trip type circuit breaker is mounted on panel to interrupt circuit in case

of breakdown. Also serves as on-off switch for unit. Two pole type, rated to trip at 25 amps.

Indicators: Control panel has 2 pilot lights to indicate "line voltage on" and "high voltage on".

Metering: Voltage and current are simultaneously metered. An iron vane type ammeter having ranges of 0-1.0 amp. and 0-5.0 amperes is included in the output circuit. An iron vane type volt meter with 0-1000 V and 0-5000 V range is mounted on control panel.

Input Cables: 50-ft. line-cord furnished having 3 conductors; 2 for line circuit, 1 to ground set. Two 50 ft. 8KV cables furnished. Insulated fittings at remote ends of cables.

**INSULATION BREAKDOWN TEST SETS**

MODEL IT-25-A: Accurate indicator of grounds, shorts or opens. High voltage output and short circuit current: 500 V 1 amp-1500 V 360 ma, 1000 V 500 ma-1750 V 310 ma, 1250 V 420 ma-2000 V 370 ma. Input: 115 V, 60 cycles. Rating: 500 Va.

MODEL IT-630: Has two operating ranges. 0-3000 V RMS and 0.6000 V RMS, continuously variable, with circuit breaker. It is a convenient, compact and accurate means of testing insulation breakdown. Input: 115 V, 60 cycles. Rating: 1 KVA.

**INCREMENTAL INDUCTANCE BRIDGE**

MODEL 226 Three bridge circuits in one instrument. Owen-Hay-Maxwell. Range—1 Millihenry—2000 henrys. Test voltage—.01-300 volts—R.M.S. D.C. saturation—0-1000 M.A. Q—.06-300. Frequency—60 cycles internal, 20-5000 cycles external. Accuracy—1%. With the HAY arrangement, any inductance between 1 Millihenry and 2000 henrys can be measured provided the Q is larger than 5. With the OWEN arrangement, the same inductance range can be covered, but the Q must be comparatively low and can have a value as low as .06 at 60 cycles. The MAXWELL arrangement is suitable for the measurement of low Q coils (below 5 at 60 cycles) without superimposed D.C. and for the measurement of leakage inductance. Both the OWEN and the HAY circuits can be used with or without superimposed D.C. Automatically disconnects the D.C. supply from the bridge when it is put into the MAXWELL position.

**COMPLETE FACILITIES**

- Coil Winding • Complete Machining • Can Fabrication • Plating • Tinning • Potting • Humidity Cycling Testing • Constant Temperature Testing • Vibration Testing.

We are completely equipped with facilities for in-plant testing to meet MIL-T-27 specifications. All raw materials are given numerous inspection tests to insure uniform high standing quality and ability to withstand the stresses of actual service. We are constantly working to improve design and production, and our engineering staff is always ready to assist you in your Transformer problems.

B.I.W. CAN PROVIDE

# Wires and Cables

TO SUIT YOUR APPLICATIONS

## AIRCRAFT & MISSILE WIRES & CABLES

### Antenna Wire & Transmission Cables:

Laminated teflon insulation having unusual high corona level and breakdown voltage complying with Air Force Specifications.

### Coaxial Cables:

A complete range of sizes, impedances and attenuation of teflon insulated —55°C to 250°C complying with Government specifications and in addition BIW designs for special applications.

### Coaxial Cables Miniature for Electronics:

Extremely small teflon insulated of unique design having low noise characteristics, and very suitable for miniaturization.

### Electronic Hook-up Wire:

Extruded high-temperature vinyl, Kel-F and teflon for miniature high-temperature applications.

### Engine Ignition Cable:

A variety of sizes of teflon ignition cable for jet engine installations approved by leading manufacturers.

### Flame Detector Cable:

Heat and fire resistant special designs approved by major manufacturers of flame detector devices.

### Flexible Telemetering Cable:

Miniature shielded cables, single, 2, and 3 conductor approved by many years of satisfactory service.

### Fuel Gauge Wires:

Specially designed teflon insulated cables approved and adopted by the major manufacturers of fuel gauges.

### Jet Engine Control Wire:

BIW standard teflon and fibreglass insulated approved and service tested as a dependable jet engine control wire.

### Missile Wiring:

Complete range of teflon and fibreglass insulated small-size, high-performance missile wiring approved by leading missile manufacturers.

### Multi-Conductor Cable:

BIW designs and manufactures multi-conductor cables to withstand the aircraft service conditions of low-temperature, vibration, light-weight and serviceability.

### Power and Lighting Cable:

Complete range of sizes and ratings: 100°C, 125°C, 150°C and 200°C.

### SOX Low Temperature

#### Multi-Conductor Cable:

A special series of low-temperature, multi-conductor cables approved from operating service life and applications such as propeller de-icers, rudder control, bomb doors, missile launching.

### Thermocouple Wire:

Made to order special types for unusual applications utilizing teflon and fibre-glass insulation.

## ELECTRICAL EQUIPMENT

### Elevator Cables for Control,

#### Annunciator and Lighting:

2 to 40 conductors, with and without steel supporting strands. Accepted standard by principal elevator manufacturers.

### Extra Flexible Power, Lighting & Instrument Cable:

#24 to #0 flexible and extra-flexible strandings with pliable heat-resisting rubber and neoprene insulation for numerous applications such as relay contactors, mercury switches, reciprocating equipment and hinged panel apparatus.

### Flexible Motor Lead Wire and

#### Appliance Wire:

Underwriter's approved #24 to #8 in temperature ratings of 75°C rubber, 80°C, 105°C vinyl insulation. Numerous colors and stripes available.

### High temperature Wires and Cables:

BIW specializes in high-temperature wires using 105°C vinyl, silicone rubber, and teflon to produce cables with higher temperature ratings required in many applications:

- Motor and transformer lead cable

- High voltage units: precipitator, static neutralizer, Etc.
- Chemical apparatus requiring resistance to corrosion
- Multi-conductor cables

### Multi-conductor cables:

BIW designs and manufactures multi-conductor cables of all types for electrical apparatus and equipment such as automatic machinery, x-ray apparatus, remote control devices and signaling equipment.

## ELECTRONICS

### Flexible coaxial transmission cable and pulse cable for airborne electronics.

- Hook-up wire: • 80°C, 105°C with or without fabric coverings.
- Shielded with protective covering
  - Available in a wide range of colors and tracers.

### Low capacity Probe cables:

Low capacitance of 8 to 10 mmf/ft., extra flexible.

### Low Noise Shielded Cables:

As a result of BIW developments a wide range of types and sizes are available designed to fit standard connectors.

### Multi-conductor Cables:

BIW designed and manufactured over 900 made-to-order multi-conductor cables complying exactly with requirements for particular equipment.

### Radiation Monitoring Cable for Nuclear Energy Locations:

Approved designs for use with the principle detection instruments.

### TV Camera Cables:

BIW design has been approved and adopted by the major manufacturers of TV cameras and recognized by leading studios as the most serviceable cables available.

### Telemetering Cables:

Miniature shielded cables single, 2 and 3 conductor as well as a variety of multi-conductor types.

up to 99% purity

**hardness of sapphire...**

**high mechanical strength...**  
compressive, tensile and flexural  
strengths, resistance to impact,  
vibration, and thermal shock.

**low electric losses...**  
at extreme temperatures and  
frequencies.

**chemical inertness...**

All are characteristic of the high  
purity of **HYPALOX**.

## L-R "Whirlwind" BLOWER WHEELS

**AVAILABLE FROM STOCK!**

Here are Blower Wheels manufactured from the finest material available, precision engineered and rigidly inspected to meet your most exacting requirements. A complete line of standard sizes available from stock for immediate delivery. Flexible manufacturing procedures insure rapid delivery of special sizes, material, finishes, and hub bores. Wheels normally stocked in cadmium plated steel, CW or CCW rotation. Write for Bulletin BW-10.

## ULTRASONIC SOLID DELAY LINES

Stable compact units for storage of any form of electrical signal:

- Proven designs available to meet any time delay requirement from 0.5 to 4500 microseconds
- Frequency range of from 10 to 200 megacycles
- Wide bandwidth characteristics permit exact reproduction of input signals at the output
- Designed to meet the most rigid military environmental tests
- Prompt delivery of prototype or production quantities
- Designed and produced by men whose research and production competence is the best in the business
- For recommendations to help you improve your application, telephone or write

# Keithley Instruments

**MICRO-MICROAMMETERS** with electrometer tube inputs are stable, fast, and economical. All five models have 216-volt source for polarizing ion chambers; relay rack mounting or as bench models; 5 milliamperes output to drive 50 mv, 1 ma or 5 ma recorders. Rise times on the order of 10 milliseconds frequently can be obtained in many standard applications.

410

412

**MODEL 220**, Line operated, transistorized, useful as preamplifier. Ranges, Eight: 0.03, 0.1, 0.3, 1, 3, 10, 30 and 100 volts full scale. Drift < 3 mv per hour with moderate ambient temperature variations. Output, Two separate single-ended outputs:  $\pm 5$  volts and  $\pm 1$  milliamperes for full scale meter deflection on any range. Frequency response is dc to 60 cps on 30 mv range, rising to 300 cps on 100 volt range. \$400.00

**MODEL 200B**, Battery operated, portable. Ranges, Eight: 8, 20, 80, 200, 800 mv and 2, 8, 20 volts full scale. Drift < 1 mv per hour. Not sensitive to temperature variation. Battery Life 400 hours or better. \$335.00

**MODEL 210**, Line operated. Ranges, Five: 0.8, 2, 8, 20, 80 volts full scale. Drift < 1% of full scale. Output 10 volts for full scale meter deflection on any range; impedance 8600 ohms. \$325.00

**MODELS 200, 200A**, Battery operated. Ranges, 2 and 20 volts, and 2 and 8 volts, full scale. \$175.00

**ACCESSORIES** permit above DC VTVM's to measure higher voltages, low currents and high resistances. Voltage Dividers have ratios of 100:1 and 1000:1—permit measurements to 20 kv. Decade Shunts permit measurements from  $10^{-3}$  to  $5 \times 10^{-14}$  ampere. Regulated Voltage Supply permits measurements from  $10^4$  to  $10^{16}$  ohms.

**AC DECADE ISOLATION AMPLIFIER** Model 102B also useful as general purpose broad-band preamplifier. Decade Gains, 0.1, 1, 10, 100, and 1000. Mid-band gain accuracy 2%. Input Impedance is  $> 400$  meg, 3 mmf. Output Impedance is  $< 50$  ohms, 20 mfd. Frequency Response (two position band width switch provided):

2 cps to 1.7 mc  $\pm 3$  db; 20 microvolts input noise level.  
2 cps to 150 kc  $\pm 3$  db; 10 microvolts input noise level.

Harmonic Distortion  $< 0.1\%$  at midband. Output, 5 volts rms max into 5000 ohm load. \$290.00. Rack panel or bench mounting. Probes, 102B-P1, 30-inch double-shielded, 5 mmf, 2 cps to 150 kc. 102B-P2, 30-inch single shielded, 20 mmf input capacitance, 2 cps to 1.7 mc.

**DC INDICATING AMPLIFIER**. Model 303 provides high sensitivity and extreme versatility. Ranges, Seven: 2, 8, 20, 80, 200, 800, and 2000 mv full scale. Input Impedance  $> 10^{12}$  ohms, 10 mmf. Accuracy, 2% of full scale. Drift  $< 2$  mv per hour, referred to input. Noise Equivalent at input is  $< 20$  microvolts rms above 10 cps. Frequency Response is dc to 100 kc on higher ranges, dropping to dc to 20 kc on the 2 mv range. Output, 25 ma, 80 volts. \$850.00

# ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past seventeen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

*The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.*

**For Product Data . . .**

## the electronics BUYERS' GUIDE

# E-LITE

## MINIATURE INDICATOR LIGHTS

### *extra reliability in extra-small size*

You can mount almost any E-lite in a hole only  $\frac{3}{8}$ " in diameter. And you can *depend* on E-lite performance. Materials used meet highest standards for insulating ability and resistance to corrosion and moisture. Aluminum construction combines high strength with minimum weight. Tough plastic lenses transmit and distribute light with high efficiency, giving you clear, positive display of information. Lenses available in several colors, with or without read-out markings. Neon or incandescent bulbs. For aircraft, computers, telemetering equipment, instruments, control systems. 100% inspected, moderately priced.

*E-lites for many applications—available from stock*

E-lite 1AG—Neon indicator for data display. Internal resistor optional.

E-lite 1DH with 1CG lamp—Data display indicator with replaceable neon lamp. Bulb plugs in from front of panel.

E-lite 1EG—Neon indicator for data read-out. Flat-faced lens. Read-out marking optional. Available with or without internal resistor.

Elite 1B—Minimum-size neon indicator. Mounts instantly and securely with push-on retainer. Very low cost.

E-lite 1DH with 1CF lamp—Indicator with replaceable plug-in incandescent lamp meeting aircraft specifications. Flat-faced lens. Read-out marking optional.

E-lite 1AD—Transistor circuit indicator light. Operates on 10-volt signal at low current. Has pre-aged neon lamp, built-in diode-resistor network.

NORTH BERGEN, NEW JERSEY

# ASCOP *Pulse Width* DATA SYSTEMS

## M SERIES PW GROUND STATION

Complements ASCOP's PW Multicoders and Telemetry Sets. A "packaged" system for operational testing of airborne or land vehicles . . . and for static testing.

Continuous automatic compensation of system zero and scale factor eliminates need for calibration and manual adjustment. Operates directly from PW signals of 30x30,

45x20 or 90x10 configurations — or indirectly at non-standard rates of 30, 45 or 90 channels by means of proper tape control. Provides for visual monitoring of all data channels and produces reduced graphic output records of selected channels in real time. Features missing data point correction for continuous synchronization. Easy access to slide-mounted chassis is also provided.

## MULTICHANNEL DATA TRANSMISSION OR RECORDING USING RF CARRIER FM SUBCARRIER OR SINGLE MAGNETIC TAPE TRACK

ASCOP pulse width coding and time division multiplexing techniques result in systems featuring large numbers of data channels, highest accuracy, reliability, flexibility and ease of operation. That is why ASCOP Telemetry Systems have been first choice for the nation's most vital projects involving automatic handling of data from aircraft, missiles, test stands, nuclear reactors, etc. With an ASCOP PW System as many as 88 data channels may be sampled, transmitted and/or recorded and reduced in real time. Up to 1232 data channels are available by means of multiple tape recording, or up to 1760 data channels by means of sub-commutation. System accuracy is better than 1%.

### TYPICAL SYSTEM PERFORMANCE (Utilizing Zero and Full Scale Reference)

NUMBER OF DATA CHANNELS	26	41	86
SAMPLES/CHANNEL/SECOND	30	20	10
FREQUENCY RESPONSE, CPS	5	3.3	1.5

LINEARITY . . . Better than  $\pm 0.5\%$  of full scale.  
STABILITY . . . Long term drift less than  $\pm 1\%$  of full scale.

M SERIES  
MONITOR  
CONSOLE  
GROUP

G SERIES  
LOW LEVEL MULTICODERS

C SERIES  
MONITOR EQUIPMENT

D SERIES  
LOW LEVEL MULTICODERS

F SERIES MISSILE  
TELEMETERING SETS

For short life applications, where the ultimate in compactness, ruggedness, and performance are required. Standard packages as shown are available for 30 x 30 and 45 x 20 operation. Special configurations, using standard functional components, may be ordered. Some components are sold separately.

Low level sensitivity opens a whole new field of mobile instrumentation. Combine super-sensitivity, high accuracy and a wide selection of data channels (up to 88). Ultra high altitude pressurization and rugged design make them ideal for recovery and repeat use. Available for 15 or 30 mv range. High speed models operate at 900 PPS . . . low speed models at 112.5 PPS. Operate from low level or standard transducers. Accept double ended balanced inputs.

A means for rapid inspection and visual monitoring of airborne or test stand data. Permits engineer to check or read data both before and during test runs on entire telemetry train from commutator through the tape recording system, saving a great deal of data reduction time. Samples data at repetition rates of 1/4 to 30 samples per second. Provides reliable performance under extremes of vibration, acceleration, deceleration, etc.

A commercial series for use in wind tunnels, chemical processes, nuclear reactors, etc., where automatic data handling is mandatory. Provide 88 channels of low level information with sampling speeds of 10 or 1/4 samples per second. Output is in pulse width form . . . can be recorded on magnetic tape, transmitted over a line or used to modulate a transmitter. Input sensitivity 15 mv. Available for rack mounting or in a bench cabinet.

A SERIES  
ACCESSORY EQUIPMENT

RF Preamp units for greatly increased receiving range, and RF Multicoupler for operation of up to 4 receivers from a single Preamp or antenna. Broad band operation 215 to 235 megacycles.

## for High Reliability Applications

Hermetically sealed transformers that meet MIL-T-27A specifications and "Sealed-in-Steel" units for commercial applications are available—in stock—at Chicago Standard. In addition to over 500 of these stock units, special transformers can be built to your specifications by Chicago Standard's engineering staff—the largest and most experienced in the transformer industry. This versatile group includes specialists in filters, magnetic amplifiers, pulse transformers, toroids, transistor transformers and other difficult-to-design units.

## FORK OSCILLATORS

for the most precise timing and frequency control — new fork unit designed for high environmental vibration uses

### FEATURES

In Audio Frequency systems, the fork has advantages over other types of oscillators including crystals

- **INTRINSIC STABILITY** — Superior at Audio Frequencies
- **TEMPERATURE COMPENSATED**
- **RUGGED MECHANICAL DESIGN**
- **STABILITY NOT DEPENDENT ON AMPLIFIER COMPONENTS** (in recommended circuits)
- **STABLE OPERATION WITHIN 5 MINUTES**
- **LOW AGING RATE**

### SPECIFICATIONS

frequency stability

a.  $\pm 3$  ppm room ambient (no oven)

b.  $\pm 1$  ppm after temperature equilibrium is attained  $\pm 5^\circ\text{C}$

c. Long term drift less than 5 ppm per annum after first 3 months

## DATA RECORDER AND TIMING UNIT

The highly accurate linear scan rate of the recording stylus makes the Model RJC Precision Depth Recorder ideally suited for the measurement of short or long pulse phenomena. The cumulative stylus position error does not exceed one scan in twelve days (at 1 scan per second) while the maximum instantaneous error is 0.015%.

## TOP HAT

### TUBE CLAMPS

#### RETAINERS FOR PLUG-IN COMPONENTS

An improved clamp for securing electron tubes, relays, capacitors and other plug-gable parts.

**POSITIVE** Component even when inverted will not loosen under the most severe shock or vibration.

**CORROSION RESISTANT** Hats and Posts are stainless steel. All materials and

finishes comply with Armed Forces Specifications.

**RESILIENT** Positive retention is achieved with minimum rigidity or strain on component.

**ACCESSIBLE** Clamp fits on top of component and can be fastened or released easily without tools.

## MS-2 SYNCHRONOUS MOTOR

CONSTANT ANGULAR ROTATION  $\pm 0.1$  DEGREES—NO LOAD TO FULL LOAD!

A phonic wheel type motor capable of operating from vacuum tube amplifiers on signal frequencies from 60 to 4000 cps. It was designed to provide the extremely accurate and invariable speed required for driving fork-synchronized facsimile equipment. Its unique characteristics will be found the answer to many problems involving the need for constant angular rotation or precise synchronization.

The Model MS-2 Motor can be operated single phase in the plate circuit of a single-ended amplifier or as a two phase motor when driven by a push-pull amplifier. The latter is recommended since the two-phase connection runs quieter and provides more power with less heating. The motor current is about 75 milliamperes per phase. The power input may be as high as 20 watts.

Complete information and prices will be mailed promptly on request

# TWO NEW CALIDYNE SHAKERS

...for Vibration Testing Systems

**MODEL 174 SHAKER**

up to 1,500 lbs. force output

CALIDYNE'S Model 174 Shaker featuring high frequency operation and low input requirements has been so designed that it can be utilized in any one of six CALIDYNE Vibration Test Systems.

The versatility of the Model 174 Shaker extends the range of vibration testing for which this shaker can be used. It further advances CALIDYNE Systems of vibration control, enabling equipment manufacturers to: create vibratory forces over a wide range, measure them, use them for testing and measuring the test results.

Complete performance data on each of these 6 CALIDYNE Series 174 Shaker Systems are contained in New Bulletin 17400.

**MODEL 177 SHAKER**

up to 5,000 lbs. force output

The Model 177 is one of a new series of "wide-band" shakers designed for higher frequency operation and lower input requirements. It is the Basic Unit for five completely integrated CALIDYNE Vibration Test Systems. Oscillatory linear forces up to 5000 lbs. are generated and precisely controlled over wide ranges for vibration research and test of products.

A separate Bulletin 17700 details the specifications, performance data, basic components and accessories of the new Model 177 CALIDYNE Shaker and its five Shaker Systems.

Typical vibration testing applications of these 2 new CALIDYNE Shakers include:

1. **Brute Force Shaking** at frequencies simulating the worst conditions of ultimate operation.
2. **Structural Response Testing** to determine mode shape, frequency and damping characteristics.
3. **Fatigue Testing** for high stress providing deflections many times greater than normal usage.
4. **Random Vibration Testing** for more exact simulation of true environment.

In addition to these systems we manufacture Shaker Systems producing Force Outputs of from 25 lbs. to 17,500 lbs.

For engineering counsel in applying the destructive force of vibration to your own research and testing problems, call us here at CALIDYNE — (Boston) Winchester 6-3810.

Waveguide bends

E-H plane tuner

Waveguide-to-coax transitions

Loads and short circuit plungers

I-T-E developed this complete line of large waveguide, waveguide components and test equipment to fill an urgent need in the field of multi-megawatt radar and scatter communication systems. It is currently being supplied in quantity for both military and commercial applications and is available in either standard or special configurations to meet your requirements.

This equipment is built under rigid design and quality standards and by means of unique fabricating techniques. Thus, it assures you the maximum of economy and system reliability.

# SYSTEMS AND COMPONENTS

## ANTENNA SYSTEMS

I-T-E is equipped with personnel and plant facilities to provide complete engineering and manufacturing for your antenna requirements. Scope of service ranges from applied research through development, design, fabrication, assembly and final test of the equipment you need. Experience covers antenna systems for radar and communications applications—Government or commercial—plus reflectors, lenses, feeds, pedestals, servo systems and the other essential types of antenna components.

Shown are a few of our recent projects. For complete information on all our products, write for new, 20-page Bulletin SP-200.

Featuring the unique PUSH-IN Terminal that springs snugly into the holes of the board to provide quick set up of circuitry. The serrated edges of the terminal forks firmly grip the leads of resistors and capacitors for testing without soldering. Terminal has through hole, two side connections and small fork for transistor leads. Kit, sockets and brackets assemble with self-tapping screws.

*Kanthal DR resistance wire*  
**SAVES YOU UP TO 20% because...**

- ... it is lighter in weight (more feet per pound), and the price per pound is low. Total savings approximately 20%.
- ... KANTHAL DR improves characteristics of resistors and precision equipment with its high electrical resistivity (812 ohms per circular mil foot), its low temperature coefficient ( $\pm 20$  ppm per degree C from  $-55^{\circ}$  to  $+150^{\circ}$ C), and its low thermal EMF to copper. Available in fine gages — all insulations. Write today for further information.

Also inquire about KANTHAL NIKROTHAL 6(60/16) nickel-chromium alloy for wire wound resistors. Savings up to 7%.

## THE KANTHAL CORPORATION

# BRUSH ELECTRONICS

## RECORDING SYSTEMS

provide full range instrumentation

Here are *complete* recording systems—designed to give you the greatest flexibility in measurement problems. For example:

- A greater range of signals can be recorded with optimum resolution than with any other direct writing Oscillograph. New Brush Oscillographs have the widest chart speed range available—from 10" per day to 10" per second.
- The units are designed for physical interchangeability. The 4 and 6-channel Oscillographs are mounted in identical chassis. Systems can be mounted in standard 19-inch racks, or bench top or floor consoles.
- Coordinated *system* design means that one system can meet many requirements. You can cover the full range of direct writing Oscillograph application with Brush equipment.
- Accessories available: event markers, timing markers and remote control units.

## WHAT IS YOUR MEASUREMENT PROBLEM?

These Brush instruments can simplify your testing and development work.

**FOR ELECTRICAL MEASUREMENTS**  
Amplifiers for systems to measure and record voltages and currents.

BL-530 Dual Channel D. C. Amplifier  
BL-550 D. C. Amplifier, High Gain  
BL-560 Servo-Analyzer  
BL-905 A. C. Amplifier, High Gain  
BL-954 A. C. Pre-Amplifier, High Gain  
BL-533 Single Channel D. C. Amplifier  
BL-536 Multichannel D. C. Amplifier  
BL-266D Fault Recorder  
BL-288 Event Recorder

**FOR PHYSICAL MEASUREMENTS**  
Amplifiers for measuring stress, strain, torque, force, pressure, etc.  
BL-520 Universal\* Amplifier  
BL-350 Input Box (Resistive)  
BL-345 Input Box (Inductive)  
Tension Analyzer\*

**FOR RESISTANCE-WELDING MEASUREMENTS**  
For measuring and recording welding variables.

BL-325 Welding Analyzer\*

**FOR SOUND MEASUREMENTS**

BL-1516 Strain Gage Apparatus  
BL-1015 Low Frequency Beat Frequency Oscillator  
BL-1602 Frequency Distortion Measuring Bridge  
BL-1609 1/3 Octave Filter Set  
BL-1014 Beat Frequency Oscillator

(\*Trade-Mark)

## OSCILLOGRAPHS

Model BL-254, Four-Channel.

Model BL-266, Six-Channel.

Model BL-274, Portable Four-Channel

**Oscillographs** for standard rack or bench top console. The 4-channel unit can be expanded to six channels to meet your changing requirements. Electrically controlled chart drive transmission—standard in all multi-channel oscillographs—permits instantaneous switching and remote control. Choice of 8 or 16 chart speeds. Choice of ink or electric.

Portable Oscillographs feature light weight and small size; they are self-contained. Equipped with electrically controlled chart drive transmission—16 chart speeds available.

## AMPLIFIERS

Model BL-530, Rack Mounting

Universal\* Amplifier BL-520;  
with Portable Case BL-380.

**Brush Amplifiers** feature low drift scale expansion, choice of single ended or balanced inputs. May be operated on a wide range of line voltages and frequencies. New Universal\* Amplifier can be used with *both* resistive or inductive transducers. When used with Brush Direct Writing Oscillograph, permits measurement and direct recording of physical phenomena such as strain, stress, torque, force, etc. Amplifier includes direct coupled section that may be used separately for voltage and current measurements.

## SERVO-ANALYZER AMPLIFIER

New amplifier, coupled to a Brush direct writing oscillograph, provides a package unit to record performance of servo systems in carrier frequency range of 50 to 10,000 cps. Offers exceptional frequency response, flexibility, high accuracy.

## VIBRATION & NOISE INSTRUMENTATION

Chart record produced by the Brush Spectrum Recorder presents a complete frequency and level analysis of noise and vibration. It is an example of the way Brush instrumentation can aid *your* analysis of noise, vibration or strain.

- All sounds from 14 cycles to 36,000 cycles per second automatically scanned and recorded by the Brush Spectrum Recorder

to eliminate laborious plotting of data.

- Measurements made in one-third octave steps, to positively identify frequencies.
- Complete recording through the complete frequency range made in 21 seconds, to save valuable engineering time.

The Spectrum Recorder is one unit in the most com-

plete line of noise and vibration instrumentation available (manufactured in Denmark by Bruel & Kjaer). (See box opposite page). Thus Brush can offer you matched systems, and offer application assistance on complete projects.

## MAGNETIC HEADS

Brush offers single channel record-reproduce and erase heads, multichannel record-reproduce heads, miniature record-reproduce heads and erase heads.

Multichannel heads available in standard designs in encased assembly or cartridge assembly up to 26 channels. New high precision models offer extremely close tolerances.

### MULTICHANNEL HEAD DESIGN FEATURES

- All gaps in precise alignment.
- Individual channels are closely held in precisely machined metal brackets or cast into one integral block of specially selected synthetic resin.
- Complete assembly is non-microphonic and impervious to moisture.
- Mu-metal shields between individual channels.
- Ground lead supplied for shields and pole pieces.
- Wide range temperature operation.
- Special design features may be supplied to meet your requirements.

### SINGLE-CHANNEL REDHEADS

Halftrack  
BK-1090 Record/Reproduce  
BK-1091 High Impedance  
BK-1110 Erase

Fulltrack  
BK-1250 Record  
BK-1251 Reproduce  
BK-1252 Erase

### CARTRIDGE TYPES

The BK-900 series heads were designed for single-channel recording on any magnetic medium.

## HEADPHONES

Brush crystal headphones have Bimorph® crystal drive element of high impedance, offer wide range response with uniform output, are lightweight, rugged, shock-proof. Brush also offers a complete line of cartridges for acoustic applications.

Model BA-200 Ext. range headphones      Model BA-200 Gen. purpose headphones  
Model BA-206 High fidelity headphones      Model BA-201 Single phone

Model BA-200. Designed for GENERAL PURPOSE applications including laboratory, studio and skilled amateur home use. High impedance; ideal for multiple installations.

Model BA-206. Designed for use where high fidelity and smooth frequency response are of paramount importance. Features exceptionally flat frequency response.

## PIEZO-ELECTRIC ELEMENTS

for electro-acoustical and electro-mechanical applications: Plates of Rochelle Salt; Ammonium Dihydrogen Phosphate (ADP); Lithium Sulphate; Barium Titanate (Brush Ceramics A & B); Dipotassium Tartrate (DKT); Cylinders, curved plates, bowls and other shapes of Barium Titanate (Brush Ceramics A & B);

For complete information write Dept. KK

Bimorphs\* of Rochelle Salt; Ammonium Dihydrogen Phosphate (ADP); Barium Titanate.

ELECTRO-OPTIC ELEMENTS — Unpolished blanks of Ammonium Dihydrogen Phosphate (ADP); Potassium Dihydrogen Phosphate (KDP) for electro-optic shutters, etc.

## Silver-Zinc BATTERIES

for critical uses

### AUTOMATICALLY ACTIVATED:

A very recent development in missile auxiliary power, this design is remarkably simple and reliable. Having inherently precise voltage regulation, less than 1-second elapses between activation signal and full output under load.

Examples:

Model P3A: Simultaneous output of 360v @ 100 ma, 6.8 v. @ 20 amp. Hermetically sealed, —65°F. to 212°F. operation, 9.8 lbs.

Model P13A: 56 v @ 245 amp. Hermetically sealed, only 23 lbs. Inherent ± 1.0 v regulation.

All automatic models are "special," but usual requirements are delivered in 60-90 days.

### SECONDARY (RECHARGEABLE)

All cells shipped dry-charged. Range of current standard single-cell types:

Ampere hours: 0.5-50  
Voltage output: 1.5 v-nominal  
Current output: Up to 1,100 amp  
Size & Weight: Equal to the best silver units obtainable.

Batteries are readily made up of individual cells as required, encased in stainless steel box.

Manually-activated primary (one-shot) batteries are also available.

## Audiolator

All-Transistorized Beat-Frequency Audio Oscillator

### FEATURES

- Constant Output, No Line Voltage Influences
- Built-In Stability By Means of Feedback
- Output Constant with Frequency: 1 db over range
- No Hum • Battery Power Supply—Long Life
- No Grounds Needed—Place Across Any Transmission System
- Excellent for Field Service, Military, Commercial and Domestic Hi-Fi, Industrial Applications

### SPECIFICATIONS

Frequency Range: 50 cycles to 15 KC  
Output Voltage: 1 volt at 600 ohms  
Output Impedance: 600 ohms  
Output Flatness: 1 db over entire range  
Attenuator: Continuously variable from 1 volt to 40 db below 1 volt  
Δf dial: 0 adjust—fine frequency control. Constant frequency shift over entire range  
Power Supply: Mercury or penlight cells—300 hrs. life  
Dimensions: 6" x 2" x 3 3/4"  
Weight: 2 lbs.  
Price: \$149.50 f.o.b. Pine Brook, N. J.

KAY

## Transvolter

Model Video  
All-Transistorized, Broad-Band  
Audio-Video Voltmeter

### FEATURES

- Inherent stability due to feedback amplifier design
- Broad-Band frequency response 10 cycles to 10 mc
- Inherent advantages with use of transistors instead of vacuum tubes—small size—light weight—long life—rugged use—lower power consumption—high conversion efficiency
- Low level measurement over frequency range
- May be used as a humless audio-video amplifier

### SPECIFICATIONS

Frequency Range: 10 cycles to 10 mc. Direct Reading in volts and db  
Amplifier Frequency Response: Flat ± .5 db over range  
Accuracy of Measurement: ±5% of full scale reading  
Voltage Range: 1 Millivolt to 1 volt full scale—7 ranges  
Sensitivity: Will measure down to 250 Microvolts  
Input Impedance: Capacity 5 micromicrofarads; Resistance Component 0.5 Megohms at 1 mc  
Audio-Video Amplifier: Maximum output .25 volt at 75 ohms, Gain up to 40 db  
Price: \$495.00, f.o.b. Pine Brook, N. J.

## Transiplay

Transistorized,  
Miniature Power  
Supply

### FEATURES

- Stable Metered Output
- Continuously Variable Output
- Low Impedance
- No Ripple
- High Current
- Positive or Negative Bias Available

### SPECIFICATIONS

Input Voltage: 105-125 V, A.C., 50-60 cps  
Output Voltage: 0.5V—7.0 V, D.C., Continuously variable  
Output Current: Maximum 300 Ma  
Impedance (Internal): 0.5 ohms  
Ripple: Less than 1 millivolt at full load  
Regulation: 50 Millivolts output variation over input voltage range  
Weight: 3 1/2 lbs.  
Dimensions: Width 5", Height 6 1/2", Depth 6 1/2"  
Price: \$125.00 f.o.b. Pine Brook, N. J.

## Minilator

Multi-Crystal  
Controlled Transistor  
Oscillator

### FEATURES

- Transistorized for Long-Life—Self-Contained Mercury Cells (For Replacement, Ordinary Penlight Cells May Be Used)
- Selection by Switch of 1 mc, 2 mc, 5 mc
- External jack for any crystal from 1 mc to 5 mc
- Stable; Adjustable to WWV Frequencies
- Clean Waveform with Stabilizing Diode
- Amplitude Feedback\*
- Portable, Light-Weight, Small Cast-Aluminum Case
- Low Priced—Many Uses

### SPECIFICATIONS

Output: 0.25 volt at 1000 ohms impedance level  
Dimensions: 2 1/4" x 1 3/4" x 4 1/2"  
Weight: 12 oz.  
Price: \$95.00 f.o.b. Pine Brook, N. J. Pat. Pend.

## Transiprobe

All-Transistorized,  
Low-Capacity  
RF Probe

### FEATURES

- First transistorized broad-band probe, 20 cycles to 15 mc
- Low power dissipation, all transistorized
- Built-in stability, amplifier feedback
- Open design for easy manipulation
- No hum

### SPECIFICATIONS

Frequency Response: 20 cycles to 15 mc, 1 db down at 50 cycles and 12 mc, 3 db down at 20 cycles and 15 mc  
Output Impedance: Nominal 50 ohms  
Input Impedance: Capacitance, 4 micromicrofarads; resistive component, 100,000 ohms  
Gain: 1:1 (Unity gain), held constant by feedback amplifier  
Maximum Input Voltage: 0.3 volt peak-to-peak  
Power Supply: Mercury cells, 800 hour life; constant supply over life of cells.  
Separate power supply and connecting cables provided with probe  
Price: \$125.00, f.o.b. Pine Brook, N. J.

## NOISE FIGURE MEASUREMENT . . . NOISE GENERATORS

Mega-Node Sr

INST.	RANGE	NOISE FIG. RANGE	PRICE
MEGA-NODE	5-220 mc	0-16db @ 50 to 300 ohms	\$325
MEGA-NODE SR	10-3000 mc	0-20db @ 50 ohms	\$790
MICROWAVE	1200-26,500 mc	Fluorescent Tube 15.8 ± .25 db	\$295-\$695
MEGA-NODES		Inert Gas Tubes 15.2 ± .1 db	(with power supply)
RADA-NODE	5-26,500 mc	0-21db ± .25 db	\$1,395 covering
		IF strips @ 30 and 60 mc	range 5mc to 400mc

## SOUND ANALYSIS

Echo-Vox Sr

INST.	DESCRIPTION	FREQ. RANGE	PRICE
VIBRALYZER	Vibration Frequency Analyzer	5-4400 cps.	Displays amplitude vs frequency vs. time provides permanent record
SONAGRAPH	Sound spectrograph for frequency analysis of audio energy	85-8000 cps.	Records frequency and intensity to time
SONALATOR	Dynamic translator for visible speech display	100-4000 cps.	Displays frequency vs. time on oscilloscope
ECHO-VOX, SR	Provides variable periods of time delay at audio frequencies	40-12,000 cps.	20 to 1600 millisecond delay range
SONA-STRETCHER	Speech stretcher for slowing speech to 1/2 normal tempo	100-4000 cps.	
AUTO-VOX	Variable audio time delay. Dual Channel Input.	40-12,000 cps	Negative to positive passing through zero. Delay range -100 to +720ms

## OTHER INSTRUMENTS

Microtter

INST.	RANGE	RANGE OF MEASUREMENT	FEATURES	PRICE
KILO-Q	20 cps-1 mc	Q, 0-12.5, 0-25, 0-50, 0-125, 0-250, 0-500	60 mmf.-1 mf Cap. Range	\$895
MICROTTER 50 VTVM	100 cps-50 mc	Full Scale: 1 millivolt-1V.7 ranges	May be used as 50mc video amp.	495
TRANSALYZER	50 kc-50 mc	Measures Alpha and Alpha Cutoff-Collector and Emitter Current, 3 Voltages-Emitter to Base, Emitter to Collector and Base to Collector	Contin. tuned sweeping oscillator	1595
MEGA-MATCH	10 mc-1000 mc		Displays reflected energy. Check matching impedance	895
UTILATOR	4.5-220 mc	Fundamental Freq. Utility Oscillator	0.7V rms into 75 ohms metered	295
GAINSET	Complete Equipment for Making Precision Measurements of Systems		AGC'D	1995
MEGA-PIX	TV Sound-Picture	Color or Black and White Transmitter	.25V output into 70 ohms. Specify Channel!	550
RADA-PULSER SR	Carrier Freq. 12-80mc	CW & RF Pulse-.2V rms into 70 ohms	Rise Decay 0.03 Microseconds	745
		Video Pulse-.5V rms into 50 ohms	Pulse Width .2-20 Microseconds contin. Rep. Rate 400-4000 PPS

CAldwell 6-4000

# Sealectro "PRESS-FIT" \* TEFLON † TERMINALS

Miniature "Press-Fit" terminals. Hundreds of different types and sizes.

Subminiature terminals. A dozen fit on a quarter!

"Press-Fit" terminals. (Below) Test-Point Breakaway connections with two-piece jacks and plugs used for patch-cord board.

• Let Sealectro solve your terminal problems with original, genuine, tried-tested-perfected Teflon "Press-Fit" terminals and proper installation. Take advantage of real engineering collaboration. Use our specialized and outstanding production facilities for variety, uniformity, and fastest deliveries.

## MINIATURES

One-piece stand-offs and feed-thrus. Simplest, fastest, cheapest installation. No threads, nuts, washers required. Eliminate breakage, shattering, vibration, fungus, corrosion and other drawbacks. Choice of lugs and metal finishes. Hundreds of standard types.

## SUBMINIATURES

Smallest insulated terminals available for miniaturization programs. Despite diminutive size, these terminals withstand severest-service conditions as found in guided missiles, radar, communications gear, electronic computers and industrial electronics. Wide choice of types and lugs.

## CONNECTORS

Two-section (male and female) terminals for breakaway connections such as for multiple plugs and receptacles, plug-in crystal diodes and similar components, flybacks, plug-in coils and forms, etc. Jack and plug members "Press-Fit" into chassis holes, casings, strips, etc.

## TEST-POINT JACKS

Rugged miniature test-point jacks featuring either (SKT-8 and SKT-9) stamped brass or (SKT-10) machined beryllium-copper contact members. Take standard instrument test probe or a companion plug. Ideal for test points on metal panels, permitting connections to circuitry or components for external testing. Used on metal panels for cost-reducing and unbreakable patch-cord boards.

## IN EIGHT COLORS!

Sealectro "Press-Fit" terminals are available in eight RETMA color-code colors—brown, blue, red, orange, yellow, green, gray and white, for color-coding as well as for added eye appeal in any assembly.

Install them  
FAST and  
TO LAST!

Fastest, simplest, cheapest installation in three steps: (1) Punch or drill hole with standard machining; (2) Countersink entrance edge according to Sealectro's time-tested specs; (3) With insertion tool in

chuck of drill-press or arbor press, center over hole and apply pressure. Press-Fit, that's it! And genuine "Press-Fit" terminals stay put—for good!

*Samples  
and Data . . .*

### LA-18 SPECTRUM ANALYZER

Bench-size Spectrum Analyzer featuring high stability and wide range in small size. Continuous coverage, 10.0 to 16,000 mc calibrated without external heads. 3.0—32,000 mc usable range. 0.5 to 25 mc spectrum width, 7.5 kc resolution. Internal spectrum calibrator. Bulletin LA-18

### LA-61 FREQUENCY METER

Highly accurate UHF Frequency Meter featuring internal calibration, rugged construction.

Frequency range 500 to 2000 mc in two bands, 0.001% accuracy, precision high-speed semi-direct calibration, 0.0001% oven-controlled crystal standard. Standard 19" panel 12 1/4" high, rack or table mounting. Bulletin LA-61

### LA-593 PULSE GENERATOR

Light, compact, double-pulse generator for general field or laboratory use. Bench or rack mounting.

20-200,000 pps internal trigger, 0-200 kc external; 1.5 to 2500 microsecond delay, 0.5 to 2500 microsecond pulse width, one or two pulses. Output impedances 2000, 200 or 75 ohms. Approx. 0.1 microsecond rise time. Bulletin LA-593-D.

### LA-5 FREQUENCY METER

Convenient field instrument designed and built to military standards for fast and accurate frequency measurement.

Frequency range 10 to 100 mc in three ranges, color-coded scales for use by production line personnel, semi-direct calibration, accuracy 0.001%, internal oven-controlled crystal standard, 0.0001%, input less than 500 microvolts. Standard 19" panel, 12 1/4" high, rack or table mounting. Bulletin LA-5-6.

### LA-6 FREQUENCY METER

VHF frequency meter matching LA-5 in appearance, identical in operation.

Frequency range 100 to 500 mc in two color-coded ranges. Internal high-speed semi-direct calibration, with accuracy of 0.001%, internal oven-controlled crystal standard 0.0001%. Input less than 500 microvolts. Standard 19" panel, 12 1/4" high, rack or table mounting. Bulletin LA-5-6.

### LA-239C OSCILLOSCOPE

General purpose, wide band oscilloscope, covering 5 to 20 mc, military standard construction, nomenclature AN/USM-50.

Frequency range 5 cycles to 15 mc flat, 0.03 v/cm sensitivity, internal voltage calibration, Z axis timing markers 0.2 to 2000 microseconds, internal trigger generator. Sweep speeds to 14 cm per microsecond. Ruggedized construction, standard rack mount. Bulletin LA-239C.

**NEW!**

### LA-259 OSCILLOSCOPE

Five-inch militarized high-performance oscilloscope incorporating all the features of the famous LA-239C PLUS:

- 5 inch flat-face screen
- DC to 15 mc response
- Verified dual-accuracy calibration
- Simplified read-out

### CRYSTAL OVENS

Standard and miniatures, to  $\pm 0.025^{\circ}\text{C}$ , in more than 20 catalog types. MIL-T-945A Specs for airborne or other severe use. Over 30,000 in use. Write for special catalog.

### ROBOTESTER

Automatic tape-controlled equipment tester checks 1 ohm to 10 megohms from any of 240 points to any other. Change over in seconds; sets up in as little as an hour. Up to 100 tests per minute.

# Potentiometers — Trimmers — Relays

*Ace delivers reliability in sub-miniaturization*

**Maximum performance** — advanced designs, special materials, and unique winding and manufacturing techniques are combined to give you "heavyweight" performance in the "featherweight" class.

**Sustained reliability** — rigid quality controls and testing assure highest standards of performance-reliability over extended

## ACEPOT\* Sub-miniature precision wire-wound potentiometers . . .

actual size

This outstanding unit provides extremely high resolution and linearity yet is only 1/2" in size.

Size	1/2" x 1/2"
Weight	0.25 ounce
Resistance Range	10 Ω to 250K ± 2% std.
Linearity	± .3%
Temperature	-55° C. to 125° C. **
Winding Angle	325° std. ≥ available
Resolution	Extremely high
Torque	.035 oz./in. @ 20° C. ***
Power	2 W for 60° C. rise
Mounting	Threaded bushing, servo, flush, flanged. Ganged up to 6 cups.

The above are standard. Modifications are available. Fully sealed against dust, moisture, humidity. Anti-fungus treated. Meets applicable JAN-MIL specs including shock and vibration.

\*\* X-500 rated for higher temperature range —55° C. to 150° C.

\*\*\* Jewel Bearing Acepot torque of .001 ounce/inch

## ACEOHM\* Sub-miniature, high temperature, humidity-proof trimmers . . .

Specially designed for dependable operation in circuits subject to extreme environmental conditions.

actual size

Size	1 1/8" x 5/16" x 3/8"
Weight	0.2 ounce
Resistance Range	10 Ω to 50K
Usable Potentiometer Range	95-100%
Power Rating	1 W @ 50° C. (flush mount design) derated to 0.5 W @ 150° C.
Temperature	-55° C. to 150° C.
Resolution	High; to 0.15%
Dielectric Strength	1 minute @ 1M V. DC per JAN-R-19
Load Life	1M hours in accordance with JAN-R-19

35 turn adjustment for precision settings. Excellent shock, vibration, acceleration characteristics. (Meets or exceeds MIL-E-5272A.)

## ACERELAY\* Sub-miniature, hermetically sealed relays . . .

Bifurcated contact design assures positive reliability both in power and dry circuit work.

Size	3/4" x 7/8" x 3/8"
Weight	0.75 ounce
Contacts	bifurcated *
Contact rating	3 amp @ 28 V DC 1 amp @ 115V AC
Coil resistance	to 10,000 Ω
Vibration	5-2000 CPS @ 20G
Shock	50G
Life	500,000 operations minimum
Header types	plug in, wire leads, solder hook
Mounting	socket, top studs, side studs, bracket
Temperature	to 125° C.

Entire relay hermetically sealed — coil assembly hermetically isolated from contact assembly.

\* Double pole double throw, break before make, make before break.

periods. Ace designs have been proved in use by leading manufacturers.

**Prompt delivery** — modern mass production techniques and extensive facilities guarantee delivery to meet your requirements. Prototype orders are expedited in a special order department.

## ACETRIM\* Sub-miniature precision wire-wound trimmers . . .

A wide range of resistances is available in this low-cost, space and weight-saving trimmer.

Size	1/2" x 1/2"
Weight	0.25 ounce
Resistance Range	10 Ω to 150K ± 5% std.
Linearity	± 3%
Temperature	-55° C. to 125° C. (to 150° C. on special order)
Winding Angle	325° std. ≥ available
Torque	.035 oz./in. @ 20° C.
Power	2 W for 60° C. rise
Mounting	Threaded bushing, printed circuit, flush, flanged, ganged

actual size

with tabs for printed circuits

The above are standard. Modifications are available.

Fully sealed against dust, moisture, humidity. Anti-fungus treated. Meets applicable JAN-MIL specs including shock and vibration.

## ACEPOT\* Nonlinear precision wire-wound potentiometers

Ace designs, plus precision mechanical construction, give highest possible linearity and close conformity. Available in all AIA sizes to meet your unique nonlinear requirements.

	Sine-cosine	Double Sided Square-law
Size	3"	3"
Resistance	20K ± 5% driving	25K ± 5% driving
Conformity	1/2% pk-pk	± 0.25%
Function angle	360°	± 180°
Power	4 watts	3 watts
Mounting	Servo	Servo

Other nonlinear configurations to meet your specific requirements available in prototype and production quantities.

## Call or write for information

**Outstanding production speed...superior trouble-free performance**

From a complete line of high speed coil winders for every possible application: Model CHS bobin winder features continuous speed adjustments up to 13,000 RPM. Customers report production of over 7000 space wound coils per day by Model MP.

**MODEL CHS**

Compact, dependable. Meets any demand for high speed coupled with precision performance.

**MODEL MP**

For the most rapid production of hand wound or space wound coils of relatively few turns. Traverse easily adjusted; non-linear windings may be produced.

**DESIGN FACTORS:** Every special need is prompted by requirements which cannot be met by standard units. As a check list for yourself and to assist our engineers in answering your inquiries, please include details of any critical requirements listed below:

#### ELECTRICAL CHARACTERISTICS:

**MOTORS** — Horsepower • Torque • Speed • Duty Cycle • Power Supply Voltage • Power Supply Frequency & Phase (AC)  
**GENERATORS** — Voltage limits or adjustable range • Frequency limits or adjustable range (AC) • Watts or KW output • Number of phases (AC) • Load Power Factor (AC) • Speed • Type of Driving Motor • Excitation

**MECHANICAL CHARACTERISTICS:** Where critical, please indicate size, weight and mounting limitations; shaft lengths, keyways or splines, etc.; material; insulation; finish; environmental conditions or other special requirements.

Write today for free catalog 56 PD . . . we may already have the particular motor or generator you need!

## ELECTRIC SPECIALTY

173 SOUTH STREET

STAMFORD, CONN.

From radar antennas to "readout" equipment...

## AMF has experience you can use

• Giant search antennas made by AMF form a vital part of the nation's air surveillance network • And converting the incoming radar signals into instantly understandable information are brain-like AMF Electronic Data Display Systems. The ultimate in "readout" equipment, these compact console units accept either analog or digital information, instantly convert, coordinate, and display the data on the face of a cathode-ray tube. Incoming signals can be interleaved with synthetic symbols for immediate reference, and any segment of the display can be offset and enlarged whenever desired. • See for yourself why, for radar control of air, ground, and harbors, or for general-purpose computer reading, AMF has the experience and equipment you can use.

## NEW UNIQUE DESIGN SURPASSES T, V, Y CHARACTERISTICS PER MIL-R-94A

### MOLDED Resistance Element

The Reon **MOLDED** resistance track is a thick homogeneous composition material molded at high temperatures and pressures to insure:

- Long operational life.
- Low noise, becoming less with usage.
- Better performance under extreme environmental conditions.

The Reon **MOLDED** composition resistor is not a film, paint, ink or carbon.

King Size Track provides three (3) times the resistance area for low current density and long term stability.

### The Reon **MOLDED** Resistance Path Insures:

- 100,000 rotational cycles under 3 watts load.
- Less than 2% change after Mil moisture test.

### Perimeter Cooling Offers:

- Higher wattage ratings over similar types.
- Lower hot spot.
- Superior heat dissipation.

Ohmic Range: 50 Ohms to 10 Megohms,  
Tolerances: 5%, 10%, 20%.  
Tapers: Linear, Audio, CCW Audio, specials.  
Bushings: Standard, round and locking.  
Shafts: Round, Flatted, Slotted, Watersealed.

## MAGNETIC AMPLIFIERS MILITARY and INDUSTRIAL

**Computing-Types**, for missile and industrial control equipments.  
Input, 100 microamperes, DC  
Output, 10 volts, DC  
Gain, to 10,000 per stage  
Temperature, to 100° C

**Precision-Types**, for specialized missile, automatic pilot, industrial controls.  
Accuracies, to 0.25%  
Gain, to 1,000,000 per stage  
Linearity, better than 1%  
Temperature, to 85° C

**Servo-Types**, to drive small aircraft and industrial AC instrument servo motors.  
Input, Single ended or Push-Pull, DC.  
Output, Phase Reversing AC, operates both motor control windings.  
AC, operates both motor control windings.

Temperature, to 125° C

**Construction**, these magnetic amplifiers are wound on nickel-steel alloy, tape-wound, toroidal cores for maximum performance. These amplifiers use silicon rectifiers, precision resistors. They are self-contained, designed to operate from 60 and 400 cps. (different models). They are supplied in epoxy-steel encapsulations for high resistance to shock and vibration.

### SERIES 5000

For Commercial Applications

### SERIES 12

For Military Applications

Available 1 to 6 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make). Switch rotates 360° with 10 positions—stops provided with 9 or less positions.

Bushings,  $\frac{1}{4}$ " long— $\frac{3}{8}$ "—32 thread Diameter of switch 1-1/32"

Rated to break—1 amp., 115 V., AC., non-inductive.

To carry—5 amps., 115 V., AC.

### SERIES 24

Positive Detent Action and better feel for precision requirements. Available 1 to 6 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make). 360° rotation with 10 positions—stops provided for less than 10 positions.

Bushings,  $\frac{1}{4}$ " long— $\frac{3}{8}$ "—32 thread Diameter of switch 1-1/32"

Rated to break—1 amp., 115 V., AC., non-inductive.

To carry—5 amps., 115 V., AC.

## Spring Return Rotary Switch

Similar to Series 24 except with spring return to center position. Provides momentary contact on either side of center position only. Available in 1 to 3 decks, either shorting or non-shorting type.

## Series 29 Binding Posts

- Metal parts—Nickel Plated
- Molded parts—Phenolic to MIL-P-14
- Washers—Non-turn "D"
- Cross-hole—Flush
- Integral solder lug
- Color—Red or Black as specified

## Grayhill Diode Holder

Provides a tight snap fit within gold-plated phosphor bronze, spring tension clips. Molded phenolic base has non-turn projection.

Clips—.635" center to center. Overall dims.—lgth.—15/16", width—3/8" height—3/8"

No. 17-1—Molded Diode Holder

## Grayhill Push Button Switches

### SERIES 2000—Snap Action

For Manual Operation

Audible click when actuated Momentary contact, single pole, single throw type.

O.D.— $\frac{7}{8}$ " dia. x 1-59/64" high Bushings, 7/16" long—15/32"—32 thread.

Rated—10 amps., 115 V., AC., non-inductive.

1 amp., 115 V., DC.

Rated Life—Approx. 50,000 operations

No. 2201—Normally open

No. 2202—Normally closed

### SERIES 4000—Momentary Contact

Momentary contact, single pole, single throw type.

O.D.—51/64" dia. x 1-17/32" high Bushings, 3/8" long—15/32"—32 thread.

Rated—1/2 amp., 115 V., AC.—non-inductive.

Rated Life—Approx. 800,000 operations.

No. 4001—Normally open

No. 4002—Normally closed

### SERIES 23

Miniature Momentary Contact

Momentary contact, single pole, single throw.

O.D.  $\frac{1}{2}$ " dia. x 1-3/64" high Bushings,  $\frac{1}{4}$ " long—5/16"—32 thread

Rated—1/4 amp., 115 V., AC., non-inductive.

Rated Life—Approx. 500,000 operations.

No. 23-1—Normally open.

### SERIES 30

Midget Silent Action

Sub-Miniature, non-snap, momentary contact, single pole, single throw type.

O.D.  $\frac{3}{8}$ " dia., 63/64" high. Mounting Bushing  $\frac{1}{4}$ " x 32 thread.

Rated .10 amp., 115 V., AC., non-inductive.

Rated Life—Approx. 300,000 operations.

No. 30-1—Normally open.

## Grayhill Printed Circuit Test Jacks

### SERIES 31

For use on printed circuits as a test point to feed AF, RF, and Pulse signals, check and feed DC voltages, monitor signals during test, alignment, etc. For use with standard .081"-.0825" phone tip plugs. Rivets to board like an eyelet.

Dims.— $\frac{1}{4}$ " high, rivet dia.—.114"

No. 31-1—For 1/16" board

No. 31-2—3/32" board

No. 31-3—For 1/8" board

## Plastic Sleeves

for Series 31 Test Jacks

Snap-on, plastic insulators lock in place over Grayhill Test Jacks.

Dimensions Dia.—.245" Height—.290"

No. 31B—Plastic Sleeves, available in 8 colors for coding.

537 Hillgrove Avenue, La Grange, Illinois  
Phone: Fleetwood 4-1040

## Grayhill Test Clips

### SERIES 16

Completely insulated.

Even hinge pin is insulated.

Low contact resistance (approx. .0015 ohm)—

.008" silver overlay on contact surfaces

Terminals—silver plated

Finger grips—molded phenolic

No. 2-0 Threaded Stud

No. 2-1 Banana Plug

No. 2-4 Threaded Stud with Insulating Washers

No. 2-6 Pin Plug

### SERIES 2

The basic spring clip is available in several styles of mounting as illustrated. Mounted on panel of test equipment, they permit fast lead connections without manual opening and closing of jaws or clamps. Also useful in bread board work and laying out of harnesses.

## Grayhill Plug-In Adapter

Designed for testing resistors, capacitors, and similar pig-tail type components on standard test equipment. Banana Plug spacing— $\frac{3}{4}$ " centers. No. 2-2 Plug-In Adapter.

## Grayhill Stand-Off Insulators

Mica-filled phenolic bodies for low loss at high frequencies, high dielectric strength, low moisture absorption and fungus resistance. Silver plated brass solder terminals. Front o panel length—15/16"

Diameter 5/16"

No. 18-1—Female, No. 4—40 Thread

No. 18-2—Male, No. 4—40 Thread

## Grayhill Coil Forms

Molded of mica-filled phenolic for low loss at high frequencies, low moisture absorption, high dielectric strength and resistance to fungus growth. Tinned Copper wire leads. Patented anchor posts.

Dimensions—Length—.500" to 1.000"

Dia.—.125" to .250"

Lead wire diameter—.025" to .040"

## Grayhill Mating Insulating Washers

To insulate jacks with  $\frac{3}{8}$ " dia. bushings from mounting panel. Back of panel washer has indexing hole fitting non-turn tab of the jack. Shoulder dimensioned for 1/16" min. panel thickness.

No. 21B78-1 Indexing Washer, Natural Mica-filled Phenolic

No. 21B78-2 Indexing Washer, Black Electrical Grade

## Grayhill Molded Insulating Washers

Available in sizes for No. 6 to  $\frac{3}{8}$ " screw in natural mica-filled phenolic or black electrical grade insulating material.

Pilots Check Out

## NAVIGATION RECEIVER ACCURACY

### ARC Type H-14A Signal Generator Checks Omni/Localizer Equipment

ARC's H-14A Signal Generator provides a simple and dependable means of checking *omnirange* and *localizer receivers* in aircraft on the field, by sending out on the hangar antenna a continuous test identifying signal that blankets the field. Tuned to this signal, individual pilots or whole squadrons can quickly test their own equipment. Voice can be transmitted simultaneously with signal. The instrument will check 24 omni courses, omni course sensitivity, operation of TO-FROM meter and flag-alarms, left-center-right on 90/150 cps localizer, receiver frequency calibration, reciprocal course accuracy, and receiver output. The H-14A is also widely used for

making quantitative measurements on the bench during receiver maintenance. Input power is 160 watts, 115 volts 60 cps.

The H-16A Standard Course Checker measures the accuracy of the indicated omni course in ARC's H-14A or other omni signal generator to better than 1/2 degree. It features a built-in method of checking its own precision.

ARC's Type H-12 Signal Generator (900-2100 mc) is equal to military TS-419 U, and provides a reliable source of CW or pulsed rf. Internal circuits provide control of width, rate and delay of internally-generated pulses. Complete specifications on request.

## Coaxial Cable RF CONNECTORS

meet all your circuit design,  
mounting and environmental requirements

### DM series

DESIGNED FOR SUB-MINIATURE APPLICATIONS

- Only half the size of standard BNCs
- Twelve polarity groups—two and three lug
- Vibration proof bayonet locking (MIL-C-5015)
- Teflon insulators permit use over wide temperature range with low electric loss
- .002" silver plating and gold flash affords excellent corrosion resistance

SHOWN ACTUAL SIZE

### BNC series

BNC connectors are designed for use with miniature RF cables. Small, lightweight and weatherproof, all have the quick-disconnect bayonet locking feature. Teflon insulators assure low electric loss at high temperatures. Manufactured to MIL-C-3608 specs. Frequency limit: 10,000 mc.

### N series

Low voltage, constant impedance connectors for use with medium sized cables. Provide excellent VSWR at frequencies up to 10,000 mc. Available in both weatherproof and non-weatherproof types. Screw type coupling ring locking. Maximum voltage: 500v. Meet MIL-C-71A specs.

### C series

A newly developed line of weatherproof connectors for use with medium sized RF cables. Features several design improvements over other connectors, including improved clamping mechanism for excellent cable grip, and a silicone rubber gasket for moisture-proof sealing.

Write for your free copy of Catalog No. 301. It contains complete engineering data on all Dage RF Coaxial Cable Connectors. Remember, too, that Dage engineers will be glad to help on any connector problem.

**ELECTRIC COMPANY, INC.**  
67 North Second St. • Beech Grove, Ind.

Do you need 50,000  
flexible plastic  
wire markers—quick?

call **MARKWIK!**

### CALL MARKWIK FOR PROMPT DELIVERY!

Since we developed the COLD *Indeli-Dent*<sup>®</sup> process of heatless marking, we can supply as many markers at short notice, as you might conceivably need for your wire marking requirements. Usually we can give 24 to 48 hour service!

### CALL MARKWIK FOR TRULY PERMANENT MARKERS!

We pioneered and developed the new COLD *Indeli-Dent*<sup>®</sup> process which produces markers on flexible vinyl tubing with permanency unmatched by any other process or service. Our *Indeli-Dent*<sup>®</sup> markers are unexcelled for clarity and legibility — they are resistant to ultra violet light, oils, gasoline, alcohol, hydraulic fluids, salt spray, and carbon tetrachloride — markings cannot be rubbed off or affected by abrasion, temperature, mildew, fungus, or elongation. Numbers on the terminal board are legible and permanent. In other words—these markers are made to last!

### CALL MARKWIK FOR GOVERNMENT APPROVED MARKERS!

Our *Indeli-Dent*<sup>®</sup> process printed markers meet and surpass the exacting requirements of the Janization program of the armed services. No longer will you have to apply special coatings and lacquers, as is required with old fashioned foil leaf, hot-stamped markers.

### CALL MARKWIK FOR SAMPLES!

Ask for samples of our *Indeli-Dent*<sup>®</sup> process markers. Subject them to any durability test — then compare results with the markers you now use! You'll discover why so many engineers specify Markwik permanent *Indeli-Dent*<sup>®</sup> code markers throughout every piece of equipment they design.

- Conventional hot process stamping also available •

### CALL MARKWIK FOR PRICE AND DELIVERY QUOTATIONS!

Phone us your marking requirements, (or wire or write). We'll be glad to give you prompt, personal attention. Send for brochure B2 and samples.

## PIPELINE TO PRECISION

*new!*

The Model WWVC STANDARD FREQUENCY COMPARATOR is a new instrument incorporating a highly sensitive crystal controlled radio receiver for utilizing the transmission of the National Bureau of Standards radio stations WWV and WWVH and is now available for precise audio and radio frequency standards work as well as accurate time interval measurements.

The model WWVC STANDARD FREQUENCY COMPARATOR is available in cabinet or for rack mounting using a 5 1/4" panel.

### NEW—Model SR-7 WWV RECEIVER

This receiver is the dual conversion type. Dimensions: 3-15/16" x 11" x 8 1/2" deep. Available in upright or vertical models, or as rack mounted model. Noise limiter, antenna trimmer and provision for an oscilloscope or head phone are incorporated.

### NEW—Model AK-8 ANTENNA KIT

This special antenna is designed to provide optimum response to signals from WWV and WWVH on 2.5, 5, 10, 15 and 20 mc. Includes modification kit for receiver with all wire, 50' of coaxial cable and suitable fittings to provide outstanding performance. Antenna is completely assembled; needs only one support for satisfactory operation.

## CHANGEABLE CHASSIS

### SPEED-CHASSIS

The Speed-Chassis is a flexible breadboard assembly with interchangeable socket arrangements which can be mounted on a relay rack if desired. Shield cover and panel are available to make successful breadboard assemblies both permanent and neat.

The NEW Half-Size SPEED-CHASSIS accommodates small breadboard where additional length of the full-size model is not needed. Stacking and place arrangements of either unit or units in combination are extremely varied. Both Chassis models are preassembled; controls may be mounted on either end.

VIBRATING REED FREQUENCY METERS

Meters illustrated are typical panel mounting or portable—for use where constant or known frequency is important to efficient operation of equipment.

- Permanently Accurate within  $\pm 0.3\%$  or better at reference temperature, depending on the model. This accuracy is not affected by poor wave form, external magnetic disturbances, or voltage fluctuations.
- Size and Type for Every Service. Made in a wide variety of portable and panel case styles, reed groupings and frequency ranges from 12 to 650 cycles and above; 100-130 volts furnished unless otherwise specified.
- Rugged Construction of simplified, patented design, with no moving parts to wear out or get out of calibration. Ideal for field and mobile applications.
- Suitable for Electronic Circuits because of relatively low power consumption and J-B-T reeds with high Q and sharp, immediate response.

3 1/2" and 2 1/2" SEALED Types

3 1/2 inch FHXX Meters: sealed, glass-to-metal construction with solder terminals, meet or exceed the sealing and electrical requirements of JAN-I-6 and MIL-M-6A including the 3000 volt breakdown, and use the front mounting dimensions specified. Max. barrel diameter, 2 1/16"; 2 7/8" overall depth behind flange. While not regularly stocked, these meters are in volume production. New 2 1/2" meters Model 21-FHXX available on special order.

1 1/2" SEALED Types

Model 15-FHAC (illustrated above). 60 and 400 cycles, 2 reeds, 8-10 volts, for cathode follower circuit. Widely used on audio oscillators to standardize output. Meets intent JAN-I-6, MIL-M-6A and amendments on sealed meters. Barrel, 1 1/2" diameter; detachable flange, 2.094" diameter; solder terminals.

Model 15-FH Series (not illustrated) — Same case, sealed, 5 reeds, 58-62 cycles, 100-130 volts, or 390-410 cycles, 100-130 volts. Variations such as 6 reeds or 25 cycles available on special order.

ASK FOR CATALOG 657

ELAPSED TIME METERS

For Maintenance, Tube Life Data, and Operating Time Records—on Motor Generators, Transmitters, Receivers, Rectifiers, Test Set-ups, etc.

Model 31-EX (illustrated) also known as running-time or total time meter, registers in 1/10 hours to 9,999.9 hours, then automatically resets. Normally stocked for 60 cycles, 110-130 volts. 3 1/2" standard meter mounting. Variations such as 50 cycles; 230 volts; 0-99,999 hours; 3" rectangular case; and readings in minutes available on special order.

SEALED ELAPSED TIME METERS

Model 31-EHXX—Fully sealed meter, reading 0-9,999.9 hours, same as Model 31-EX above. Glass-to-metal construction, solder terminals, and 3 1/2" detachable flange, all match XX metal frequency meter case. 1000 volt breakdown.

Model 33-EHXX — Operates on 400 cycles, 110-125 volts, to read 0-9,999.9 hours in 1/10 hour steps. It is presently made only in 3 1/2" flange sealed metal case, 2 3/4" diameter, 4" deep behind panel. 1000 volt breakdown.

Model 21-EHXX—New. 2 1/2" flange, sealed, full size counter.

FREQUENCY — TIME METERS

Combination Reed-Type Frequency — Elapsed Time Meters—One Meter Does the Work of Two.

Model 31-FE (illustrated) pioneered by J-B-T, saves panel space and cost, and encourages periodic maintenance; 3 1/4" flange, metal case, 4 1/32" overall depth, standard. 3 1/2" case known as 31-FEX-1 supplied on custom orders. 5 reeds, 60 cycle range, standard; 7, 9, 11 reeds or 50 cycle range on special order.

DISTRIBUTOR SERVICE

Standard J-B-T items are available through authorized electronics parts distributors.

TOGGLE SWITCHES, AN, JAN, or MIL

J-B-T now manufactures over 100 models of toggle switches, designed for exceptional reliability, as in JAN-S-23 and Ordnance Standards DDAX. Variations with bushing seal are made at additional cost for MIL-S-6745 specialized AN Air Force requirements. Other types are being planned for pending MIL-S-3950. Improved enclosed designs are supplied on all models—there are no unused holes.

ST40, 42, 52 series—Solid coin silver contacts and racker arms, unique to J-B-T, add overload protection and keep contact resistance under .005 ohms. Nominal ratings 20 amp at 125 VAC, 10 amp, 250 VAC. See Bulletin TS-4B.

ST12, 13, 16, 17, 22, 23, 26, 27 series—Nominally rated 6 amp at 125 VAC, 3 amp, 250 VAC; threaded bushings 2 1/4" or 1/4" long. Current carrying parts heavily silver plated. See Bulletin TS-5B.

ROTARY SWITCHES

Shorting and Non-Shorting ... 14 or 20 Positions

... 1 to 6 Decks (more on special order) ... All moving contacts enclosed — eliminates dirt and corrosion ... sturdy construction with 3-post deck suspension, double-grip collector arms, and rectangular drive shaft through decks for precision indexing ...

MOLDED

test results available covering certain procedures of MIL-E-5272 A ... interchangeable, electrically and mechanically with J-B-T Series SS-14 and 20 position Laminated Switches.

Carrying capacity (not make-and-break): 1 amp.; maximum momentary, normal 5 amp.; maximum voltage between contacts and ground, 1000 volts R.M.S.; between decks and ground, 2000 volts R.M.S. Average contact resistance 0.007 ohms or less. Also available in 6-pole per deck double throw construction. Non-shorting (break before make) and shorting (make before break). Bonded construction is available on special order as MS-14R and MS-20R Types. Provides permanent moisture-proof bond between decks, and strong mechanical support for contacts.

For dependable performance in quality test equipment, instruments, inspection setups and avionics — two compact types. 14 pos. (2" dia.) or 20 pos. (2 3/32" dia.) one to six decks. Model SS-14-2 shown.

LAMINATED

LEVER ACTION SWITCHES

Model MS-20-1L5A-1 (illustrated) provides 5 live positions, 2 circuits per deck in molded body. Mounting to Print SK-64. Single deck types use same top quality parts as laminated SS-14 switches. For ganged lever series, SSG types,

in 3, 4, or 5 positions, 2-10 decks. See Print SK-74.

## CRYSTALS

## OVENS

## CRYSTAL FILTERS

## PACKAGED OSCILLATORS

**CRYSTALS** Bulova crystals are available for any frequency from 4 KC through 100 mc. Featured are the ST "shock mounted" series from 16 KC through 500 KC. Crystals are available to meet all current military specifications.

**OVENS** A complete line of ovens from the multi-purpose AM-100 to the specific application BHC series. Temperature stabilization can be held as close as .1°C. Crystal ovens are available which will hold up to 20 units in the subminiature series.

**CRYSTAL FILTERS** Bulova filters can be supplied with center frequencies from 10 KC through 20 mc. Bandwidths of .01% to 8% of center frequency. Slope factors 60/6. Ratio of bandwidth at 60 db to bandwidth of 6 db as steep as 1.4/1 with single sideband filters having greater slope.

**PACKAGED OSCILLATORS** A complete range of frequencies from 8 KC through 70 mc is available as tube type or transistorized oscillators. The Bulova OS-1 (picture above) will maintain an accuracy of .0012% over -55°C. to +80°C. ambient. This tube type oscillator is available from 180 KC through 50 mc.

Bulova "custom engineering" services are available to fulfill your every frequency control requirement.

## VHS METER-RELAY

(Very High Sensitivity)

←  
Model 266  
10 Ua DC  
2800 ohms  
Gasket-  
sealed  
1 3/4" x 2 1/4"

→  
Model 126  
124V. AC  
250,000 ohms  
Solder-  
sealed  
1 1/4" x 1 1/8"

The VHS is a D'Arsonval moving coil relay, internally shock-mounted. Its operation is similar to that of indicating meter-relays.

**Connections:** 9-pin octal style.

**Weight:** 4 ounces.

**Sensitivity:** From 0.2 Ua to 10 Amp., 0.1 Mv to 500 volts. AC relays are rectifier type.

**Accuracy:** Trip point to 1% (depends on sensitivity). Differential and repeatability 1%.

**Shock and Vibration:** Operates at 10 G or more, 5 to 55 cycles. Non-operating, withstands 10 G or more, 5 to 2,000 cycles; shocks of 10 G or more.

**Contacts:** SPST or SPDT, 5-25 Ma DC. Other ratings to 1/2 Amp. AC. A locking coil gives high pressure and chatter-free contact.

**Price:** \$20 to \$80. Ask for Bulletin 104-A.

## VHS COMPACTS

Cat. 2303 AH \$148.50 complete

Rugged, small, complete controls. They use integral VHS meter-relays as the controlling "heart", or may use external meter-relays where indication is needed.

**Accuracy:** Trip point to 1% (depends on sensitivity). Differential and repeatability 1%.

**Load Switch:** 5 amperes, 125 volts. SPDT; make or break with increasing signal (hi), decreasing signal (lo), or both (double).

**Input:** From 0.2 Ua to 10 Amp., 0.1 Mv to 500 Volts. AC relays are rectifier type.

**Power Required:** 115/230 Volts, 50/400 cycles. DC models available.

**Connections:** 9 pin plug-in (octal type).

**Mounting:** Plug-in.

**Case:** 1 3/4" x 4 1/4" x 4 3/4", steel, dustproof. Hermetic sealing optional.

## INDICATING PYROMETERS

TWENTY-ONE RANGES FOR TEMPERATURES  
FROM  $-400^{\circ}\text{F.}$  TO  $+3000^{\circ}\text{F.}$   
ACCURACY 2% OF FULL SCALE.

Prices  
from  
**\$20.25 to  
\$51.65**

Model 461:  
4 1/2" black  
bakelite  
case,  
0/750° F.,  
with mirror  
scale.

6 other  
sizes and  
case styles.

Medium resistance (4 ohms per millivolt) thermocouple millivoltmeter. Compensated for cold junction and copper error.

Available with 1% accuracy. Can be thermistor compensated for ambient changes. Some styles supplied with mirror scales.

### Model B Portable Pyrometers

Price: **\$34.90 to \$55.25**

Includes thermocouple with 5' lead and oak carrying case.

## API PANEL METERS

Model 261  
0-1Ma DC **\$12.65**

Model 451  
0-20 Ua DC **\$30.25**

D'Arsonval movements, Alnico magnets, tubing or knife-edge pointers. AC meters are rectifier type. DC accuracy, 2%; AC 3%. Better accuracies available. Zero right, zero center meters or up to two-thirds of range suppressed. AC and DC meters in multiple ranges. Special dials in colors, black face, your name, etc. Mirror scales.

### STYLES: PYROMETERS & API PANEL METERS

#### Ruggedized-Sealed

2 1/2, 3 1/2, 4 1/2-inch round metal case, sealed zero adjust, shock-mounted movement.

#### Black Bakelite

2 1/2", round or square, 3 1/2" round or square, 4 1/2" rectangular. (Other colors and illumination in 4 1/2" size.)

#### Clear Plastic

2 1/2", 3 3/4" and 4 1/2" rectangular.

## CONTROLS

### SIMPLYTROL AUTOMATIC TEMPERATURE CONTROL, THERMOCOUPLE OR THERMISTOR-ACTUATED

Compact  
Reliable  
Simple  
Ranges from  
 $-400^{\circ}\text{F.}$  to  
 $+3000^{\circ}\text{F.}$

Indicating  
accuracy 2%.

Control accuracy  
often better  
than 1/2%.

Cat. 4535 0-1000° F. 1/C  
Approx. 10 x 6 x 7" **\$135**

On-off control or automatic shut-down for furnaces, ovens, kilns, etc.

Load relay is SPDT 5 amps. Optional heavy duty relays to 40 amps. Indicating meter-relay is medium high resistance and has bimetal cold junction compensation.

No leveling required—just connect thermocouple, connect load, and plug in to 115 or 230 volt AC line.

### BEARING TEMPERATURE MONITOR

Cat. No. 3590-4 **\$355.00**

Meter-relays, operating directly from thermocouples, give immediate warning or shut-down upon temperature rise in bearings (or other danger points). A number of points can be monitored independently and continuously.

### VERSATROL AUTOMATIC CONTROLS

For any variable that can be measured electrically. Adjustable control points. Automatic operation.

Cat. 3581

Versatrol High Limit  
Automatic with  
451-C Meter-Relay  
(0-20 Ua DC)

Approx. 10 x 6 x 7"  
Price **\$154.25**

Versatrol consists of a meter-relay and all components for a complete control assembly. Any range or type of meter-relay can be supplied in a Versatrol.

They can be calibrated in any function that can be converted to electrical units. Load relays have 5 ampere contacts. Control point is adjustable from the front.

Control can be high limit (on an increase in signal), low limit (on a decrease in signal), or double (control action on rise or fall of signal).

Versatrol can be used for continuous on-off control or for shut-down or alarm. Available in wall cabinet, panel mount, "U-Mount-It" etc.

### SLAVE RELAYS

Low operating current, snap action contacts rated 5 amps, 125 volts. Designed for use with meter-relays. SPDT, DPDT, 3PDT, or 4PDT. Supplied open or in plug-in cans. Prices \$6 to \$40.00.

## METER-RELAYS

Indicating meters with built-in locking contacts for control or alarm. Trip point adjustable.

Model 255-C

High limit,  
Ruggedized-Sealed  
0-100 Ua DC

**\$46.00**

Model 461-C Bakelite

High Limit  
0-5 Ua DC  
**\$107.50**

#### Styles:

RUGGEDIZED-SEALED metal cases are 2 1/2, 3 1/2, and 4 1/2" round, shock-mounted movement, gasket-sealed. BLACK BAKELITE... glass front, 4 1/2" rectangular case. Other colors on special order. CLEAR PLASTIC 2 1/2, 3 3/4, & 4 1/2" rectangular.

#### Ranges:

0-5 Microamps to 0-50 Amps. 0-5 Millivolts to 0-500 volts, AC or DC. (Minimum AC voltage range 0-250 Mv.) Thermocouple temperature ranges cover from  $-400^{\circ}$  to  $+3000^{\circ}\text{F.}$

Model 451-C

Double Contact -100  
to  $+400^{\circ}\text{F.}$ —**\$64.00**

Salt Spray: QQ-M-151A.  
Temp.:  $-30^{\circ}/+70^{\circ}\text{C.}$   
Sealing: MIL-M-6A.

#### MIL Specs:

Ruggedized - sealed meter-relays will meet these specs: Shock: 1 and 3-foot drops, 400 lb. hammer, 3 planes. Vibration: MIL-M-10304A.

#### Accuracy:

Point of contact: 1/4% to 1%.

Indicating:  $\pm 2\%$  of full scale at any point of dial. Can be 1%.

#### Contacts:

Rating: Standard is 5-25 milliamperes at 75-125 volts DC. Optional ratings to 250 Ma, 6 to 250 volts. DC.

Arrangement: High Limit (makes on increase of signal), Low Limit (makes on decrease of signal), Double (both high and low contacts)

Life: 10 to 20 million operations,

## LIAD MULTI-CONTACT METER-RELAY

The LIAD consists of a D'Arsonval meter movement with one or several contacts carried on the moving pointer, a printed circuit scale (95 angular degrees), and a device for gripping the pointer and its contacts to the scale contact bars.

The unique combination of contact closures resulting from this gripping tells the level of the signal—and can be transmitted or used for telemetering; automatic production testing or grading; maximum value reading; simple quantitative read-out, etc.

Standard LIAD with 10 segment scale band, one milliampere sensitivity, 12 volt read-out coil. Price **\$100.00**

# Need a "SPECIAL" TIMER ... need a "STANDARD"?

## Here's why WE can give you the fastest service

When you want a timer, you want one that fits your needs 100% — and you want it fast. Get in touch with Industrial and you'll get both. Because:

In our 20 years of experience, we have developed over a thousand combinations from our 17 basic types, to meet the widely varying needs of our customers. Therefore — many jobs that would seem to require a "special" timer are in fact a "standard" timer with us. Here is one tremendous saving of time for you.

When you do need a special timer, this same wealth of experience goes to work for you at once to design it. Our Engineering Department not only originates new designs, but also develops modifications for that purpose. That's why requests for special timers can be filled without delay.

Each method — designing for a standard timer or for a special timer — has its advantages. Designing for an already available timer means lower costs, faster service, simplified replacements.

Designing for a special timer has its advantages too. It means you'll fulfill your needs 100% — no need to limit your designing horizons. Either way — standard or special — you'll get the timer you want most promptly from Industrial.

Or perhaps you need quick service on timers for automatic controls. Here too Industrial Timer is your first source of supply. For in this field Industrial has a big head start. True, each automatic control job is a bit different from the rest. But the record shows that our years of timer experience has given us the special knowledge it takes to give you the right answers in near-record time.

So, for the utmost in all-round timer service, it's Industrial that offers you this outstanding combination: deliveries "Immediate on Standards . . . First on Specials." Plus the experience of one of the foremost group of timer engineers in the nation.

For Your  
**MOST** Exacting  
Insulating Problems

**MYKROY—Glass Bonded Mica** (to 1000°F.)

This material possesses the unsurpassed combination of valuable properties for insulation in high frequency equipment—high dielectric and mechanical strength, extraordinary resistance to high temperatures and arcs, with ease of machining, molding into intricate shapes and bonding to metals. It is also impervious to water, oil and gases. Available in two types:

**MYKROY 38A**—Natural Mica combined with special glass; operating temperature to 800°F.; in sheets, rods, fabricated parts and moldings.

**MYKROY 38S**—Synthetic Mica with high temperature glass—heat factor to 1000°F. with high wet electrical properties and low power factor. Available in sheets or as powdered mica (Thermica) used as a filler for resins.

**ALCEROY—Aluminum Oxide** (to 3100°F.)

Provides exceptional insulation properties and continuous high heat resistance at very high frequencies. Available in fabricated parts to your specifications in two types:

**ALCEROY #8**—Withstands temperatures to 2550°F.; 85% pure aluminum oxide.

**ALCEROY #9**—Withstands temperatures to 3100°F.; 97% pure aluminum oxide.

Special moldings and fabrications of **TEFLON** and **KEL-F** also available.

For Your Special Gasketing Needs—

**FLEXON—Compressible Gasketing Material**

This exclusive material, made of specially processed Teflon, is relatively soft providing a superior seal for irregular contours or rough surfaces where the regular Teflon surface is too hard. Available in sheets or fabricated parts.

Send us your sketch for an estimate. For descriptive literature write to Dept. J-7.

shielded  
ventilation . . .

**MIDGET LOUVERS**

Chrome, anodized, aluminum and copper Midget Louvers provide ventilation for electronic equipment cabinets.

Louvers in air ports of transmitter sets prevent radiation interference on adjacent TV sets.

Easy installation in either wood or metal cabinets, simply drill hole and fit. Louvers are screened to keep out insects.

Sizes — 1" to 6"  
Proportionate weighs per dozen

**PULSE  
TRANSFORMERS  
by TECHNITROL**

Wound on ferrite cores, the Type M series is available in a variety of windings to cover pulse widths from 2 microseconds down to .05 microsecond, wound inverting or non-inverting.

While the M series is particularly adapted to subminiature and transistor circuits, we design and build pulse transformers to fit specific circuits or to meet definite mechanical or thermal requirements, including MIL-T-27A.

Additionally, Technitrol makes a complete line of lumped and distributed parameter Delay Lines and a variety of electronic test equipment.

# CLARK CRYSTALS and OVENS

Complete line for commercial or military applications.

## SPECIAL CRYSTALS

Quartz crystals designed for filter, delay line, discriminator, or oscillator use. Optimum parameters available for any electronic application.

## JAN CRYSTALS

A complete line of quartz crystals made to standard military specifications, available at frequencies from 2.5kc to 250mc.

## CUSTOM-MADE CRYSTALS

Special crystals of natural or fused quartz, tourmaline or synthetics, for delay line, filter, optical, oscillator, resonator or ultrasonic applications.

Descriptive literature available for all types. Consult us first on any crystal or temperature stabilization problem.

# CLARK CRYSTAL COMPANY, INC.

29 Farm Road • Marlboro, Mass. • Phone, Marlboro 1411 • Cable, CRYSTAL

## COMMERCIAL CRYSTALS

Quartz crystals in standard or non-standard holders for replacements in all existing equipments.

## CRYSTAL OVENS

A complete line of ovens for housing any type of crystal unit, small component or electronic circuit

PRECISION  
TRANSFORMERS FOR  
ELECTRONICS

Complete engineering and production facilities in the heart of the Bay area electronics industry.

### SPECIALIZING IN:

- EPSEAL encapsulated units for airborne use. High temperature, minimum size, extra reliability.
- EPOXY RESIN-POTTED units.
- ELECTROSEAL sealed construction units for high power use... from 1 to 100 KVA.

**ELECTRO ENGINEERING WORKS  
INCORPORATED**

401 Preda St. San Leandro, California • LO9-3326

## TRANSISTOR ASSEMBLIES SEALED AND POTTED Subminiature

- Amplifiers, flip-flops, sawtooth generators, multivibrator, oscillators
- Units may be used as plug-in elements or wired directly into circuits
- Operating temperature:  $-25^{\circ}\text{C}$  to  $+50^{\circ}\text{C}$
- Operation underwater
- Truly subminiature — less than one-fifth of a cubic inch

## Soft- and Hard-Tube PULSE MODULATORS

20-Megawatt Soft-Tube Modulator, Model 150

Precision-engineered Modulators to operate magnetrons, klystrons, and other pulse-modulated tubes . . . also designed to test pulse transformers and pulse-forming networks. A variety of standard models cover a wide range of power levels — from kilowatts to tens of megawatts. All models readily adaptable to meet individual specifications.

Typical operating features include: continuously-adjustable voltage control; discrete or variable pulse widths; internally and externally-controllable repetition frequencies; auxiliary synchronized outputs; appropriate monitoring and metering circuits; interlocking and overload protection; simple, safe operation.

75-Kilowatt Hard-Tube Modulator, Model 210

## High-Voltage POWER SUPPLIES

From bench-top models to large mobile units, encompassing every degree of regulation and stability — to 0.01% when required. Manson engineers are thoroughly experienced in all aspects of the design and manufacture of high-power H-V power supplies for 1) operating and testing car-

cinotrons and similar types of tubes; 2) powering and surge-testing high-power microwave systems; 3) operating and controlling tube-production equipment, such as rotary ovens; 4) conventional power-source applications in engineering laboratories and industrial plants.

AC and/or DC types, single- or multiple-output units. We will be glad to analyze and quote on your problem, or to send literature on request.

Highly Regulated, Multiple-Output H-V Power Supply, Model M-224

## TUBE TESTERS and CHECKERS

Transmitting-Tube Static-Characteristics Measuring Set, Model 166

Designed to perform MIL or special-purpose tests, for virtually every type of tube: high-power vacuum diodes, triodes and tetrodes; C-R tubes; phototubes; magnetrons, thyratrons and gas tubes.

The wide variety includes static-characteristics checkers, aging and conditioning sets,

emission and life testers, test oscillators, cathode-interface resistance measuring sets, and special equipment for tube R&D work,

Cathode-Interface Resistance Test Set, Model 186

## TRIGGER and PULSE GENERATORS

Standard and custom-built trigger or pulse sources, of the time-, width-, and fre-

Trigger Generator, Model 190

quency-modulated varieties and widely differing complexities. Single- or multiple-output models to test pulse-coded systems,

to synchronize pulse-test equipments, and for all types of laboratory work. Portable units for bench or rack mounting.

## 2 For ultra-precision COMMUNICATIONS INSTRUMENTATION

### CRYSTAL FREQUENCY SYNTHESIZERS

Incremental Crystal Synthesizer, Series 182

Disciplined incremental and continuous-coverage oscillators, approaching the "black-box" equivalent of a crystal with thousands of selectable frequencies. Ideal for SSB Systems — as transmitter exciters or receiver VFO's, ultra-stable signal generators, frequency meters, FSK exciters, and many other similar

applications where exactness, operating convenience and equipment dependability are mandatory.

SERIES 182. Three Models cover from 18 mc to 410 mc, with zero-error readability and resettability, frequency stability 1 part in  $10^7$ , spurious signals down 80 db, and many operational conveniences. Complete details in special *illustrated Bulletin*.

MODEL A-200, continuously tunable from 2 to 32 mc with a frequency stability 1 part in  $10^9$ ; features similar to Series 182. Models with higher stabilities and other frequency ranges are also available.

Manson offers to Engineers and Technicians a rewarding present and attractive future in suburban Connecticut.

Write or Phone for full Technical Data and a price quotation.

# MANSON

LABORATORIES, INC.

### 1-MC HARMONIC REFERENCE OSCILLATOR

Ultra-stable frequency standard, and high-level milli-microsecond pulse source for harmonic measurements. Stability of parts in  $10^9$  per day; jitter-free pulse and sine-wave outputs; fundamental adjustable  $\pm 25$  cps with full stability; direct readout, accurate  $\pm 0.01\%$ ; built-in balanced Mixer; and many other unusual and valuable features.

### 100-KC DIVIDER/OSCILLATOR

A companion to the 1-mc Harmonic Reference Oscillator also usable as an independent 100-kc Oscillator. Has jitter-free pulse and sine-wave outputs, integral Mixer and Beat-Frequency Amplifier.

### For the WIRE and CABLE INDUSTRY

Manson builds special testing apparatus, including *High-Potential Test Sets* having voltages to 100KV and/or power capacities to 100KVA; *Velocity-of-Propagation Meters* for measuring coaxial cables to MIL-C-17B; *Flammability Testers* in two Models for cables up to 3" diameter.

# The SUBMINIATURE PRECISION RATE GYRO

With Constant Damping Over A Wide Temperature Range\*

ACTUAL SIZE

**NO HEATERS  
REQUIRED!**

Check these unusual,  
high standard  
specifications . . .

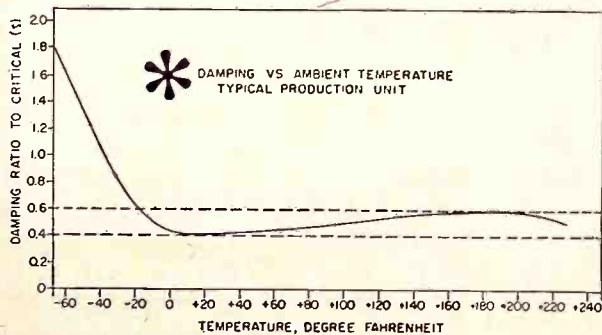

This is a product resulting from the techniques developed in meeting the exacting requirements in Control Engineering's own stabilization equipment.

This subminiature, precision rate gyro is now made available to industry on a production basis.

Control Engineering Unit of the Detroit Controls Corporation is a leader in its field of stabilization and navigation equipment.

It has production engineered this subminiature rate gyro for quantity manufacture.

The gyro's well advanced design features meet the ever increasing demands for miniaturization and greater durability.

1. Constant damping  
( $0.5 \pm 0.1$  critical from  $-20^{\circ}$  F to  $+220^{\circ}$  F)
2. Subminiature size  
(0.937" dia. x 2.0" long)
3. Outstanding reliability  
(exceeds requirements of MIL-E-5272A Specs)
4. High resolution
5. Extremely high natural frequencies  
(up to 43 cps for 1 radian/sec; lower if desired)
6. Variety of motor characteristics available  
( $3\phi$ ,  $2\phi$ , or split  $1\phi$ ;  
26V or 6.3V; 400 cps)
7. Wide variety of sensing ranges  
(from 0.5 radians/sec to 20 radians/sec, full scale)
8. Light weight; 3.7 oz.

**NEW**

**glaswitch\* relay  
... hermetically sealed  
contacts**

**LIGHTNING RESPONSE ... LOW CAPACITANCE**

Here's the famous Revere glaswitch in a relay ... individual contact pairs hermetically sealed ... immune to contact contamination and mechanical "bugs" ... operating time less than 2 milliseconds. Tamper proof ... small ... easily stacked. Used for telemetering read-out and many other applications. Suitable for explosive atmospheres.

The Revere glaswitch relay shown consists of an actuating coil and four SPST magnetically operated, hermetically-sealed glaswitches. Assembly is mounted in shock-resistant rubber and enclosed in a steel housing for magnetic shielding and protection. Relays can be stacked in any combination without interaction; number of contacts can be varied; 6, 12, 24 or 48 V.D.C. coils, mounting and plug-in provisions to suit specific applications.

**CHARACTERISTICS (24-Volt Coil):**

- Contact Rating: At 28 V.D.C.: 0.5 amp inductive (L/R = 0.026) or resistive.
- Contact Form: Normally open or normally closed.
- Contact Surface: Electro-plated rhodium.
- Sensitivity: Approximately 500 milliwatts.
- Operating Time: 4.5 milliseconds at 24 volts D.C.  
1.9 milliseconds at 50 volts D.C.
- Temperature Rise: 10°C. at 24 volts D.C.  
(Continuous) 30°C. at 50 volts D.C.
- Contact Life: 100,000 cycles guaranteed at rating specified above; increases rapidly as load decreases.
- Small Size: 0.88" x 0.88" x 3.25"

ELECTRONIC  
CHEMICALS**

New standards of precision have marked the rapid growth of the booming electronics industry. To help attain those standards, chemical purity is highly essential for phosphors, emission coatings, activating agents, etc.

Some of the Baker Chemicals popular with the electronics industry are shown on this page. As your electronics development work requires these or other chemicals to precise standards, Baker is your logical source of dependable supply.

J. T. Baker Chemical Co., Executive Offices and Plant, Phillipsburg, N. J.

## Automatic Toroidal Coil Winder, TW200

Fastest automatic toroidal winder in the industry. Winds at fixed or variable speeds to 1200 rpm, operator never touches coil during winding because of automatic coil rotation, handles all types of magnet and other wire, winds toroids .218" ID through 5" OD, wire sizes No. 20 through 42 AWG. Extra features: 360° continuous, segmental and longitudinal winding, foot switch control, predetermined turns and linear counters, interchangeable shuttle heads and shuttles.

## Semi-automatic Toroidal Coil Winder, TW201

Low cost, high production winder, motor driven, core oscillating devices manually operated. Winds at fixed speeds of 600 rpm, variable speeds to 1200 rpm, winds toroids .218" ID through 5" OD, wire sizes No. 20 through 42 AWG, interchangeable shuttle heads and shuttles.

## Subminiature Toroidal Coil Winder, SM

Winds toroids down to 1/16" ID. Maximum coil OD is 3/4", maximum height is 1/2". Winds wire to No. 50. Speed is variable to 800 rpm. Standard equipment includes most customized features: reversing mechanism, wire spacing and core rotation direction controls, wire tension device, pre-set linear counter, foot treadle control. Extras: 360°, continuous and segmental winding, predetermined turns counter.

## Bobbin Winder, BW

Winds bobbins, solenoids, resistors, relays, random wound and precision interleaved coils. Sizes from 1/32" through 5" long, to 5" OD. Wire sizes No. 17 through No. 50. Speed to 8,000 rpm. Fully automatic. Standard equipment: built-in gear box, traversing mechanism with backlash eliminator and instantaneous reverse, pre-set counter with automatic shut-off, wire guide, reversing motor, continuously variable speed control. Extras: safety devices, wire-break and run-out control, intermediate wire-lay gears, direction indicator, multiple setting counters.

## Toroidal Tape Winder, TW

For non-adhesive type tapes 1/4" wide. Winds from 7/16" ID to 2" OD. 360° continuous core rotation with variable speed arrangement. Tape overlap continuously adjustable.

## New! Permeameter Core Grader, BPA

Grades: powered iron and Mo-permalloy toroidal cores with direct reading in percentage of nominal turns. Grades cores with permeability of 14 to 125 in sizes .300 ID to 5.28 OD production grading. Nominal accuracy .25%, meter reads to .1%.

Comparison is the best test of excellence. See for yourself why Boesch manufactures the world's most superior winding machines. Write for Catalog now.

**JK SULZER  
FREQUENCY  
STANDARD**

**JK Sulzer Frequency Standard:** For your most precise laboratory measurements, the JK SULZER 1 megacycle Frequency Standard provides stability of better than 1 part in  $10^9$  per day. Frequency is variable over a range of 0.9 cycles or more, and capable of being reset to 5 parts in  $10^{10}$ .

**JK THERMYSTAL**

**JK Thermystal:** An advanced-design frequency control unit combining plug-in simplicity with extreme precision. *Frequency stability:* 30 to 900 kc,  $\pm .0001\%$ ; 1000 kc to 150 mc,  $\pm .00005\%$ .

**JK TRANSISTOR  
OSCILLATOR**

**JK Transistor Oscillator:** Complete, compact, precise plug-in signal source providing fixed temperature and humidity environment for transistor and circuitry elements. *Frequency stability:* (24-hr. period) 1 part in  $10^6$ .

**JK  
CRYSTAL FILTERS**

**JK Crystal Filters:** Compact, rugged, hermetically-sealed and stable, JK CRYSTAL FILTERS (band pass filters) have a *Frequency Range:* 1 mc to 17.5 mc., and are available for special filtering purposes to 150 mc. *Band Width* at 6 db: 0.01% to 4% of nominal on all frequencies, and up to 12% for certain frequencies.

**JK  
GLASLINE CRYSTALS**

**JK Glasline Crystals:** For ultra stable frequency control, JK GLASLINE CRYSTALS provide unprecedented stability and reliability. Compact, evacuated and hermetically-sealed against moisture, contamination, shock, and barometric pressure. Over a complete range of 800 cycles to 5 mc. and up.

**JK  
MILITARY TYPES**

**JK Military Types:** Hermetically-sealed, JK MILITARY TYPE CRYSTALS are metal-cased and in *Frequency Ranges:* 16 kc to 100 mc.

**JK  
OVENS**

**JK Ovens:** Capable of maintaining set temperatures around components or circuitry with less than  $\pm 1^\circ$  C. variation over the range of  $-55^\circ$  to  $+100^\circ$  C., JK OVENS are light, compact, inexpensive, uniform and reliable.

QUALITY INSTRUMENTS  
FOR PRECISION TESTING OF  
*Tomorrow's Circuitry*

**SG-25 STANDARD SIGNAL GENERATOR**

Equivalent to AN/URM-25D For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.

- Frequency Range: 10 KC to 50 MC in 8 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- High Output: 2.0 volts, 500 ohms impedance

**SG-26 STANDARD SIGNAL GENERATOR**

Equivalent to AN/URM-26B. For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.

- Frequency Range: 4 to 405 MC in 6 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- Output Impedance: 50 ohms nominal

**RT-500 RECEIVER-TRANSMITTER TESTER**

Equivalent to AN/TRM-1. Laboratory-quality portable instrument, designed to measure performance on transmitting and receiving equipment.

- Frequency Range: 190 KC to 400 MC
- Signal Generator Output: 2.5 to 100,000 microvolts into 50 ohms
- Transmitter Tester Power Range: 3 to 100 watts
- Volt/Milliwatt Meter: multi-range meter measures AC, DC volts and milliwatts

**PO-400 PULSE OSCILLOSCOPE**

Equivalent to AN/USM-38. Precision portable oscilloscope for analyzing amplitude and time characteristics of complex electrical waveforms.

- Transient Response: 0.06 microseconds (rise time)
- Square Wave Response: less than 5% drop at 50 cycles
- Deflection Sensitivity: 0.1V RMS per inch
- Sweep: 1 to 100,000 microseconds per inch, triggered or recurrent

**AT-120 R. F. STEP ATTENUATOR**

Designed for use in output systems of signal generators, precision microvolters, IF strips of microwave receivers, etc.

- Frequency Range: 0 to 1000 MC
- Attenuation Range: up to 120 db in ten steps
- Output Impedance: 50 ohms standard, 75 ohms optional
- VSWR: 1.1 up to 500 MC, 1.2 up to 1000 MC

**CS-200 SERIES COAXIAL SWITCHES**

For all types of coaxial switching.

- Positions: up to 12
- Nominal Impedance: 5 ohms
- VSWR: 1.2 up to 500 MC, 1.3 up to 1000 MC
- Cross-talk for 12 Position: greater than 75 db down at 1000 MC

**CM-300 CRYSTAL DETECTOR MOUNT**

For general purpose in RF monitoring 50 or 75 ohm coaxial systems. Can be used with Trad Attenuator AT-120.

- Frequency Range: 10 to 1000 MC
- Accuracy: 1/2 db
- Impedance: available in 50, 75, 100, 150 and 225 ohms
- Maximum Signal Output: 2.5 V RMS

Trad has a complete, diversified line of electronic products, some of which are listed here. All products are available for speedy delivery. Trad's national representative organization is now being expanded. Interested reps may write or call George Trad at Prospect 6-7445 for appointment.

NEW HEAVY-DUTY 2 & 3 DIMENSIONAL ENGRAVER

FOR Engraving Nameplates Fine Routing Work Profiling Small Objects Making Small Dies and Molds

**FEATURES OF NEW ENGRAVER**

1. Six Reduction Ratios—From 1.5:1 to 4:1.
2. Heavier bearings in micrometer spindle.
3. New 1/10 H.P. Ball Bearing Motor permits continuous operation for die or mold work in steel.
4. Absolute accuracy in three-dimensional reproduction.
5. Uses standard taper-shank cutters or 1/8" diameter straight shank cutters and end mills.
6. Copy and work right-side-up; always in direct view of operator.
7. Many attachments available to increase versatility of machine.

## TUBINGS AND SLEEVINGS

BRAIDED FIBERGLAS • COATED BRAIDED FIBERGLAS • EXTRUDED VINYL

### DEPENDABLE ELECTRICAL INSULATION

Check these superior Bentley, Harris products for the electrical insulation you need to protect *your* products. We invite you to send for samples to make your own tests. Feel free to call on the BH Laboratories for help in specific insulation problems — we welcome tough assignments. Write for complete BH Insulation details, or additional catalog information.

#### BH VINYL-SIL 8000 AND BH VINYL-SIL 105

Combines stabilized organic resins with those of the silicone group to form a product of unequalled heat resistance and non-corrosiveness. Short-time dielectric breakdown is 8000 volts minimum. Withstands continuous exposure to 232°C. for 4 hours; 180°C. for 115 hours; 150°C. for 320 hours and 130°C. for over 2000 hours. Meets requirements for Grades B-A-1, MIL-I-3190A, ASTM and NEMA. Available in Black and colors.

#### BH VINYL-FLEX 4000

Offers the versatile properties of vinyl-glass sleeveings at low cost. Meets all requirements of MIL-I-3190A, ASTM and NEMA standards for Grades B-B-1, B-C-1 and B-C-2. 4000 volt short-time dielectric breakdown. Excellent flow, chemical and oil resistance. Combines advantages of many grades, offers sleeving economies by standardization of inventories. Available in standard sizes and colors.

#### BH "1151"

A permanently flexible silicone rubber Fiberglas Class H (inorganic) insulation for continuous operation through a temperature range of -68°C. to 200°C. Meets specification MIL-I-18057. No dielectric loss from handling, bending or operational stresses. Won't craze or crack when used to cover bent wire. Grades H-A-1 through H-C-2. In Natural White and colors.

#### BH EXTRA FLEXIBLE FIBERGLAS SLEEVING

Comparable to single saturated (B-C-3) sleeveings but completely flexible, even after exposure to heat aging, since no hardening varnish is used. Non-fraying because of patented braid treatment.

#### BH SPECIAL TREATED FIBERGLAS SLEEVING

An unsaturated sleeving. Patented process retards raveling without the use of impregnants or binders. For temperature applications up to 1200°F.

#### BH FLEXTRUDE-105

A 100% extruded vinyl tubing. Designed especially for insulating electric motors, transformer leads and other instances where high cut-thru, heat and oil resistance is important. Underwriter's Laboratory rated for continuous operation at 105°C. Available in colors and transparent from #24 to 2½".

#### BEN-HAR BRAIDED LACING AND WINDING TAPE

A combination of duPont Teflon and glass fibers. Knots tight—will not slip. Non-shrinking, non-absorbent, inert, wax-free and fungus proof. Pliable from -100°F. to 500°F.

# Brew Delay Lines...

... *the one source for all 3 types*

Lumped constant, ultrasonic, distributed constant, whatever your requirements, Brew offers complete design, development and large scale production facilities. Brew Custom-Made Delay Lines are available covering an extremely wide range of characteristics . . . for both government and commercial applications . . . and they are your guarantee of positive accuracy, reliability, and uniformity. Newest packaging techniques, newest materials, special manufacturing and test procedures assure you of ultra compact units with best possible operational characteristics. Prompt delivery on prototype and production quantities.

### Lumped Constant Delay Lines

A wide variety of precision lines are offered. Our success and vast experience in the design of this type line is your assurance that we can meet your special requirements to complete satisfaction. Special attention is given to construction so that lines can be produced at lowest possible cost.

### Ultrasonic Delay Lines

Brew Company holds basic patents on bonding techniques of crystal transducers to quartz and special glasses for Ultrasonic Solid Delay Lines. Brew's Solid Lines are noted for their ruggedness, low loss, and accuracy. A constant research and development program is in effect to assure you of the latest and most improved designs.

### Distributed Constant Delay Lines

Available in flexible stick and canned form. Flexible lines are totally enclosed and hermetically sealed in a tough polyvinyl sheath with molded polyvinyl end caps. They are specially designed to give long life even under roughest conditions. Canned lines are available in square or round form, encased in hermetically sealed, copper plated cans. Molded Plaskon cans are available for large production runs. Intermediate taps on the line can be provided. Distributed Lines have a delay of 0.05 usecs per ft., with characteristic impedance of 1250 ohms  $\pm 10\%$ . They conform to JAN or MIL specifications. Custom designed Silver Ceramic Rods are also offered at surprisingly low cost.

Send us specifications on your requirements . . . or send for your copy of Catalog 54, 12 pages of useful delay line information.

DO YOU NEED  
a really  
**RUGGED\***  
**COMPACT**  
**SENSITIVE**  
LIGHT-BEAM  
**GALVANOMETER**

\*Will take  
25 G's!

**this is it...**

Here is a new series of light-beam galvanometers that were developed to withstand the extremely severe conditions of shock and vibration encountered in field servicing and testing of jet aircraft.

Through unique folding of the light beam, great compactness is achieved while retaining sensitivity to the highest degree . . . equal to that of laboratory instruments!

These Howell Galvanometers feature excellent readability. They are readily adaptable to existing instruments. They are competitively priced.

### SPECIFICATIONS:

Sensitivity to .105 microamperes per millimeter. Resistances: 20, 100, 500 and 1000 ohms. Short period; high speed response. SIZE: ONLY 2.6" x 3.62" x 3.615" Sealed construction.

# BEST ANSWER for Tower Jobs—ROHN

AMERICA'S FINEST  
COMMUNICATIONS  
TOWER OF ITS KIND  
... WITH EXCLUSIVE  
BUILT-IN ECONOMY

- **REDUCE COSTS** by getting the right tower for the right job. When a job calls for a medium weight tower from 200-300 ft. guyed, or self-supporting from 50-66 ft., a Rohn tower can do the job at far less cost. Check your particular tower needs against the "job-rating" a Rohn tower has and you'll save money.

- **HOT DIPPED GALVANIZED** finishes are available. The erection is quick and easy as all towers are in 10 ft. sections. Rohn towers are designed for economy in erection as no specially trained help is required.

- **PROVEN DESIGN** that has been tested with thousands of installations. Workmanship is unexcelled. Mass production machinery is used for precision fabrication yet a big reduction in labor cost.

Picture illustrates 300 ft. Rohn No. 40 Tower installation as being used for community television by Caspian Community T. V. Corp., Caspian, Michigan.

Write, wire or phone for data and prices and nearest source of supply. ROHN representatives are coast-to-coast to serve you.

# PRECISION TRANSDUCERS

## ← PRESSURE OPERATED POTENTIOMETERS

Outputs: Linear and nonlinear functions of applied pressure.

Resistances: 100 to 50,000 ohms.

Ranges: 0-5 to 0-5000 psi.

Types: Absolute and differential.

Vibration Ambient: 0 to 55 cps, 0 to 500 cps, and severe vibration 25g to 2000 cps.

Construction: Hermetically sealed.

Write for Pressure Operated Potentiometer Bulletin

## ← ULTRA-SENSITIVE PRESSURE SYSTEM

Output: 50 volts at full scale.

Range:  $\pm \frac{3}{4}$  psi, differential.

Resolution:  $1 \times 10^{-6}$  psid.

Zero stability: Better than  $1 \times 10^{-3}$  psid.

Write for Bulletin EPMS

## ← RESISTANCE BRIDGE PRESSURE PICKUPS

Sensitivity: 5 mv/v at full scale.

Ranges: 0-10 to 0-1500 psi.

Types: Absolute and differential.

Construction: Hermetically sealed.

Write for Bulletin No. 7

## ← RATE OF CLIMB

Outputs: 5 volt signal and/or dial indicator.

Range:  $\pm 25,000$  ft./min.

Time constant: 0.2 sec. at sea level to 2 sec. at 50,000 ft.

Write for Vertical Speed Transducer Bulletin

## ← RESISTANCE THERMOMETERS

Resistance: 5 to 500 ohms at 32°F.

Materials: Platinum or nickel.

Range: -350 to +2000°F.

Types: Liquid, surface, gas.

Characteristics: Corrosion proof, severe vibration ambient, fast speed of response.

Write for Resistance Thermometers Bulletin

# Filters

Diplexer for AN/ARC-27 and AN/ARC-21

MICROPHASE has in production filters using *all* of the common coaxial filter techniques: tubular, lumped-constant, transmission-line, and split block — and some unique ones, too.

**HIGH-PASS • LOW-PASS • BAND-PASS  
VHF • UHF • MICROWAVE  
DIPLEXERS • MATCHING NETWORKS**

Tubular Low-Pass Filter

Miniature 1450-mc Low-Pass Filter

Special electrical characteristics recently developed include: very sharp cutoff, unusually broad passbands, attenuation up to 100 db, and high attenuation over broad frequency ranges.

Miniaturized filters, and filters to meet the tough environmental requirements of MIL-E-5400A, MIL-T-5422C, MIL-E-8189A, are available to suit your requirements.

Complementary filter networks (diplexers) have been developed to match two equipments (such as the AN/ARC-27 and the AN/ARC-21) to one antenna, without interference or loss of power.

MICROPHASE products have contributed significantly to the improvement of ground, marine, aircraft, and missile systems for communication, navigation, detection and electronic countermeasures. Their performance reliability has been proved in a variety of field applications.

Our engineering staff has experience and resourcefulness unique in the art of filter design and construction. Write or call us about your special filter problem, or for the name of our sales engineer nearest you.

# P&B RELAYS

are used in every industry. Design engineers like their quality and P&B's ability to build to exact specifications. Here is a "sampler" of basic types

## communications

MH Series telephone type relays are small, versatile and available in contact arrangements up to 18 springs (9 per stack) DC and a variety of contact materials. Silver contacts ( $\frac{1}{8}$ " ) are rated 5 amp. 115 V. 60 cycles resistive load. High temperature models operate from  $-65^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ .

## missiles and jets

BD "Star Series" relays are used in applications demanding maximum reliability. These 26.5 V. DC relays were designed to surpass shock test II per MIL-R-5757C, 50 G and vibration Grade III per MIL-R-25018; 5-2000 cps at 15 G. This 6 pole, double throw relay is operative in ambients of  $-65^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ .

## air frame

AC Series relays are designed for air-frame controls and other applications calling for good mechanical shock resistance. Relays are enclosed in dust proof cover; phenolic base meets U/L spacing and creepage distances. Double pole double throw contact arrangement in AC and DC models.

## machine tools

PR Series relays are rugged, fast acting . . . designed for high current or high voltage switching. Floating movable contact carrier assures ample wipe and contact pressure. AC or DC models available with contact arrangements up to double pole double throw. Supplied open or with dust cover.

## instrumentation

LS Series relays—Medium coil, telephone type—have special hinge construction resulting in a mechanical life in excess of 100 million operations. Contact arrangements go to 20 springs (10 per stack). Power required: 100 mw per movable arm. DC only to 200 V. Open or hermetically sealed models.

## business machines

KM Series relays meet the demand for miniaturization and multiplicity of action within a single relay. Contact arrangements available from single pole single throw to three pole double throw. May be ordered in coil voltages up to 48 V. DC in open or sealed models. Weight, open, 7/8 oz. Sealed, 1-1/4 oz.

# RICHARDSON — plastics for electronics

... laminated—molded

## COPPER-CLAD INSUROK

Choice of various grades. Copper bonded to one or both sides. Outstanding electrical properties after humidity conditioning. High flexural and tensile strength. Holds metal inserts and lugs securely. Excellent bond strength and heat resistance.

## FABRICATION

Complete facilities for punching or machining precision parts from laminated INSUROK to your specifications in any quantity—for electrical or mechanical applications.

## MOLDED PLASTICS

Parts molded from standard or special plastics materials as required for your product, including newest plastics. Produced by compression transfer or injection processes. Metal inserts molded in position.

## LAMINATED INSUROK

Available in sheets, rods, and tubes in NEMA and special grades. Properties to meet practically any electrical or mechanical requirements. Many sizes and thicknesses.

### *technical services*

Experienced Richardson engineers will analyze your requirements and help you select the material, and best manufacturing process for your needs . . . and when your requirements are unusual, Richardson offers extensive background for developing special plastics materials for your product. Also, Richardson is equipped to provide complete facilities and techniques for molding, laminating, molded laminates, and fabricating. You are assured the correct material and process for each application. These research, design, and engineering services are yours without cost or obligation, of course. Write or phone, today.

# FIRST Really New RELAY

TO MEET TODAY'S RIGID REQUIREMENTS  
PERFECTED BY THE

## A. W. HAYDON Co.

This miniature, hermetically-sealed, general purpose relay has been designed with increased magnetic force to provide higher contact pressures and greater travel than are usually found in this type. Special care has been taken to assure reliable operation in low level circuits.

Rated Load: 2 amperes, 28 Volts DC, resistive. Ambient Temperature Range:  $-65^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ . Vibration: 15g to 2,000 cps — no contact chatter. Shock: 50g, 11 milliseconds — no contact chatter. Write for Bulletin AWH RY 1001.

**TYPE 300  
COUNTERBALANCED RELAY  
WITH SEPARATELY SEALED  
CONTACT CHAMBER**

Uniquely designed with contacts isolated from coil. Contacts can never become contaminated with vapors or gas from organic insulating materials.

TIMING AND CONTROL DEVICES BY THE A. W. HAYDON COMPANY ARE RECOGNIZED AS THE MOST DEPENDABLE PERFORMERS IN THE FIELD.

### 400 CYCLE MOTORS

Reversible — Light weight (8 ounces), 115 volts  $\pm 10\%$ ; 55 mil-amps. Torque: 0.025 oz-in at 3000 rpm. Meet Military Requirements. Write for Bulletin AWH MO 803.

### GOVERNED DC MOTORS

The A. W. Haydon Company now offers 3 series of Chronometrically Governed DC Motors. Each designed to do the same job in a different application. 5700 Series — non-military applications where extreme temperature, vibration and shock are not experienced. 5600 Series — Aircraft and military applications where extreme temperature and moderate vibration and shock are encountered. 5800 Series — Aircraft and missile applications where extreme temperature, vibration, and shock are encountered. Write for Bulletin AWH MO 800, -801, -802, -804.

### MINIATURE HERMETICALLY SEALED TIMERS

Supplied in 2 1/2" diameter housing. Optional mounting and electrical termination.

#### TIME DELAY RELAYS

Single or multiple switching. Delay periods from 2 seconds to 3 hours. Write for Bulletin AWH TD 400.

#### REPEAT CYCLE TIMERS

Single or multiple switching. Wide Range of Time Cycles. Write for Bulletin AWH RC 200.

### SPECIAL TIME DELAY RELAY

Supplied in 2.2" diameter housing. Precision unit:  $\pm 1\%$  accuracy. Meets military requirements. Adjustable over wide range. Write for Bulletin AWH TD 500.

### PROPORTIONAL DELAYED RESET TIME DELAY RELAY

Provides a controlled reset rate. Designed to meet special applications. Hermetically sealed or enclosed in dust cover. Meets military requirements. Write for Bulletin AWH TD 402.

### STOP CLOCKS

20-30 Volts DC. Precision Movement — Electrical Reset Temperature Range  $-65^{\circ}\text{F}$  to  $185^{\circ}\text{F}$ . Option on mounting and electrical termination. Write for Bulletin AWH ET 700.

Design and Manufacture of Electro-Mechanical Timing Devices

# Complete line of Microwave Components

From Magnetron Through Antenna

Designed and Produced

by **Airtron** INC.

Whether it is "Standard" plumbing or designing an entirely new waveguide system, Airtron's complete facilities can substantially reduce the time and expense between concept and reality. Here are just a few examples:

### FERRITE COMPONENTS

Duplexers, waveguide switches, high and low power load isolators, variable absorption attenuators and other devices are the result of a continuous ferrite development program. All ferrite materials used are specially compounded and fired in Airtron's Ferrite Research Development Laboratory. Complete facilities permit design and production to meet any specific need.

**ROTARY JOINTS.** Waveguide rotary joints of the coaxial or high power circular waveguide type in many frequency ranges designed for maximum VSWR performance. Produced in volume to your specifications or designed to meet your requirements.

**WAVEGUIDE SWITCHES.** For frequent, rapid switching to or from noise sources, signal generators, dummy loads, etc. Reversing switches for dual channel systems in GCA or microwave relay radars. Low VSWR, excellent crosstalk characteristics, and high peak power performance. Switching tees, ferrite switches and other special designs.

**PRECISION CAST BALANCED MIXERS.** Low noise figures over a broad bandwidth are achieved by compact balanced mixer design and use of latest type crystals. Equipped with coaxial or waveguide crystal mounts for frequencies up to 40,000 mc. Standard and special types available. Mixer-Preamp packages designed to meet your requirements.

**ANTENNAS AND ASSOCIATED COMPONENTS.** Horn antennas and feeds for fire control, countermeasure, guided missile, navigational or weather radars. Designed to your specifications and produced in the Airtron precision casting foundry. Complete with rotary joints, flexible sections and associated waveguide assemblies.

**FLEXIBLE WAVEGUIDE ASSEMBLIES.** Flexible double ridge waveguide for airborne commercial weather radar. Beryllium copper flexible in convolute or type S construction. Waveguide sizes from Ka-Band to 9.750" x 4.875" I.D. in standard lengths or preformed to your installation.

### OTHER AIRTRON PRODUCTS

Twists, Magnetron Transitions • Double Ridge Waveguide Components • RF and Pressure Contact Flanges and Gaskets • Quick Disconnects • Directional Couplers • Short-Slot Hybrids • Antenna Components • Test Horns • Dummy Loads • Flexible Coaxial Transmission Lines • Waveguide Bending and Twisting To Your Specification •

**\* the missing link...**

**Who**, in your organization, can you spare to be responsible for engineering analysis, product testing, or final preparation of service and operational manuals related to your products?

*We can fill that missing link for you!*

Howard W. Sams & Co., Inc. is an organization devoted to the impartial, confidential study and analysis of electronic devices and developments, and to the publication of accurate information relating to their theory, operation, maintenance and repair.

We have unequalled facilities and experience for: *the preparation and production of technical manuals (engineering analysis, drafting, technical writing—printing too), field and laboratory testing, product research and in-plant training and testing of your employees.*

88 leading manufacturers and government agencies (list on request) avail themselves of our services every month—*Why not you?*

Let us show you how our unique facilities can be of service to your company and eliminate that missing link.

*Write or phone for this 24-page brochure showing the services we perform for the Electronic Industry*

*call or write:*

# For Dependable Components — SANDERS ASSOCIATES, Inc.

## FLEXIBLE PRINTED CIRCUITS —

A new concept in wiring and harnessing, Sanders flexible printed circuitry eliminates wiring errors and reduces assembly costs. Flexible circuits and cables can be made in single- or multi-layer form for use in electronic systems, computer harnesses, switchboards and appliances. Multi-layer construction takes up to 65% less space than conventional wiring, and in some applications has reduced weight by 75%.

## "MINICUBE" BLOWER — A

compact, high-velocity blower and motor, in a 1" cube. Designed for use in guided missiles, aircraft, etc. Rugged construction assures reliable performance over a wide range of environmental conditions. Wt: 1 oz.; Input: 400 cps, 4 watts; Output 3 C. F. M.

"Consistently dependable". That's the national reputation established by the electronic, electro-mechanical and hydraulic components engineered and produced by Sanders Associates.

Sanders offers a complete engineering service — including departments for systems engineering, research aerodynamics, modular electronics, microwave engineering, electro-mechanics and hydraulics, commercial development, special purpose tubes, and complete type test facilities. Extensive manufacturing facilities available.

## PHASE COMPARATOR — A ver-

satile, full-wave bridge comparator for use as a modulator, demodulator, or switch. Frequency Response: 0-5000 cps; Max. Reference Voltage: 120V. rms; Max. Output Voltages = ± 50V. DC; Dynamic Range = 46 db. Hermetically sealed.

## TRI-PLATE MICROWAVE

COMPONENTS — The bulk and weight of conventional microwave systems can be substantially reduced with Sanders TRI-PLATE components, including variable attenuators, balanced mixers, hybrid rings, directional couplers, low pass filters, power dividers and receiver front ends. Low cost, low leakage and high reliability. Complete systems can be designed for specific application.

## RATE GYROSCOPE — A precision

subminiature device for converting rate into an A. C. signal. Meets requirements of sensitive control and stabilizing systems for aircraft and missiles. Features include:

- Lifelong Hermetic Sealing
- Excellent Resolution
- High Sensitivity
- Small Size: 2<sup>3</sup>/<sub>16</sub>" long x 1<sup>5</sup>/<sub>16</sub>" Diameter
- Light Weight: 3-<sup>1</sup>/<sub>2</sub> oz.

**SWEEP AND  
MARKER GENERATORS  
TO 2400 MC.**

## SWEEP GENERATORS for Testing • Alignment • Measurement

- high signal level
  - low leakage
  - flat output
  - low source VSWR
  - Accurate Marker Systems
- Many Models — many frequency ranges

### MASTER LINE

• models from 100 mc. to 1400 mc. at fundamental frequency—tunable over 2:1 range or fixed frequency sweeping 1.5:1 band. High output—wide sweep—exceptional flatness.

Deluxe Model S5-DT  
Bench Style

Model S5-MT  
Portable Style

### ULTRA RANGE SWEEPS

Covering video to UHF by heterodyne method

H-1 range 1-900 mc. sweeping 50 mc.

H-2 } sweeping 1 to 200 mc. in  
H-3 } one sweep—.5 volts output

Model H-3

Model H-1

### EXTENDED RANGES

Ranges 920-2400 mc.  
—.5V output tunable  
or fixed wide sweep  
models.

Model E2

### ELECTRONIC SWEEPS

Ultra flat, high level output swept electronically covering RF and IF frequencies from 100KC to 150 mc.

Model SV-3

### TELEVISION TWINS

"Standards of the industry" VHF and UHF sweep and marker generators used on many production lines at RCA, GE, Admiral, Oak, Standard Coil and many others.

Model S3A-FT

### ACCESSORIES

RF detectors BNC or type "N" connectors flat from 0 to over 1000 mc. VSWR below 1.2:1.

### DETECTORS

### ATTENUATORS

TA 50-75  
0-50 db.—10 db.

## ELECTRONIC ENGINEERS NEED MORE BUSINESS INFORMATION

Two BUSINESS EDITIONS of ELECTRONICS, published on the 10th and 20th of each month, are providing business-minded electronic engineers with the marketing, topical and commercial information needed to keep abreast of today's complex electronic industry. The engineer who used to be concerned chiefly with designing a circuit or product now wants to know where and how it can be sold.

ELECTRONICS TECHNICAL EDITION, published on the 1st of each month, contains the same type of business information in "Industry Report"—one of the best read sections of the magazine.

Advertisers in ELECTRONICS can reach more than 46,000 paid subscribers against a background of technical editorial matter in . . .

the TECHNICAL EDITION  
(Published the 1st of each month)

or backed up by commercial  
editorial in . . .  
the BUSINESS EDITIONS  
(Published on the  
10th and 20th of each month)

# Baird-Atomic's EQUIPMENT FOR

- ELECTRONIC COUNTING
- PRODUCTION CONTROL
- TRANSISTOR TESTING

*... proven performance... used by major companies*

## TOTALIZERS

Totalizers are designed for accurate and automatic counting of discrete items, events, and units of linear measure or volume. Counting by units, dozens and gross... count capacities up to 10 digits... counting speeds up to 20,000 c.p.s. Available in cabinets or standard RMA rack mounting.

## PRESET COUNTERS

Pre-set Counters for automatic production control are made in single and dual units... provide for pre-selection of the count at which some production operation can automatically be activated. Counting speeds up to 2000 c.p.s. ... locking or momentary output relays... batching register... pulse or contact inputs available.

## UNITIZED PLUG-IN STRIPS (CHASSIS)

Unitized strips are made for custom-designed counting and control applications. Output, input, counting, and pre-set counting strips are available in a wide selection, including cabinets with self-contained power supply and mounting strips.

## DEKATRON COUNTING (GLOW) TUBES

Cold cathode glow transfer tubes combine switching and visual indication in a single envelope for use with simplified, reliable circuits. Exceptionally long life... low heat and current operation... greater stability... 8 decade and duodecade types... counting speeds up to 20,000 c.p.s.

## TRANSISTOR TEST SET — GP4

The transistor tester that measures:  $h$  parameters and equivalent  $T$  coefficients... NPN and PNP junction and surface-barrier transistors... grounded-base or emitter circuits... alpha and beta cut-off...  $I_{CO}$ ... and  $C_C$ . Test frequency from 100 c.p.s. to 1 mc.

## MEDIUM POWER TRANSISTOR TESTER — KP-1

Measures all  $h$  parameters... has provisions for measuring transistor reverse characteristics and external measurement of  $I_{CO}$ . Wide range of test conditions —  $I_C$  and  $I_E$ , variable from 1.0 to 300 ma.;  $V_C$ , 0 to 100 volts; frequency 100 c.p.s. to 200 KC.

## TRANSISTOR BETA $h_{11}$ TESTER — KT-1

Portable transistor tester measures Beta,  $h_{11}$  and  $I_{CO}$ . It is light, portable, and completely self-contained with a 1 kc oscillator and batteries. Utilizes transistorized printed-circuit construction. Provisions for collector wave-form observation... meter overload protection.

Other BAIRD-ATOMIC equipment and instrumentation for better analysis and control:

- Spectrochemical Instrumentation
- Infrared Spectrophotometers
- Radioactivity Instrumentation
- Data Processing Equipment
- Research and Laboratory Equipment

## DIGITAL DATA PROCESSING SYSTEMS

Simultaneous and sequential measurement and recording of any physical parameter with printed results delivered as a series of digits. The outputs of associated system components such as Vibrotron Digital Transducers and Shaft Position Digitizers require no analog-to-digital conversion and greatly enhance data-handling and telemetry system flexibility.

## R-F LABORATORY TEST INSTRUMENTS

Accuracies of measurement not otherwise attainable are characteristics of BJ Electronics' radio-frequency test instrumentation. High-level signal generators and VSWR indicators are typical of the reliable laboratory devices available for a wide variety of measurement tasks.

## NUCLEAR INSTRUMENTATION

Detectolab Products are available from BJ Electronics as an expanded line of nuclear instruments. These devices are applicable within a wide range of industrial and medical fields including the control of atomic reactors.

## ENVIRONMENTAL TESTING

Measurement of electronic product performance and characteristics under accurately simulated environmental conditions is the purpose of this recently completed laboratory. It is commercially available for industry-wide testing on a contract basis. Current projects include the development of evaluation and measurement techniques involving the testing of electronic instruments.

# the DYNAMIC DIODE TESTER by TECHNITROL

This moderate-price instrument provides an invaluable means for the rapid, accurate checking of semiconductor diodes for instability and irregularities. The dynamic curve, far more revealing than static testing, is quickly apparent on a scope screen, and is readily adapted to volume testing. In addition, the easy portability of this 16-pound instrument makes

it ideal for field work as well as bench or rack installation.

Designed for use with a D.C.-coupled oscilloscope, the Technitrol Diode Tester provides for a variety of back and forward voltages, as well as independently-controlled ranges for back and forward currents.

#### CALIBRATED RANGES:

- Forward voltage .....0—5 v.
- Back voltage .....0—100 v.
- Forward current .....0—50 ma.
- Reverse current .....0—1 ma.

## The Technitrol Variable Pulser

- \* Wide pulse repetition frequency range from 20 cps. to 2.0 mcs.
- \* Pulse rise and fall times are symmetrical at 0.05  $\mu$ s.
- \* Duration of pulse variable from 0.2  $\mu$ s to 5.0  $\mu$ s in steps of 0.1  $\mu$ s.
- \* Stable pulse duration controlled by electric delay lines.
- \* Low impedance output, amplitude continuously variable from 0 to 40 volts without distortion.
- \* Trigger pulse precedes output pulse.

This reliable and versatile instrument, developed for our own use, has wide possibilities for application in many laboratories.

# JAMES

#### INSTRUMENT CHOPPERS

Detects signals as low as one microvolt; center pivot design for operation over wide range of temperature, vibration, shock; shielded for minimum residual noise. Models operate from D.C. switching to 500 cps.

#### MINIATURE CHOPPERS

SPDT and DPDT models, 7 and 9 pin miniature configuration. Center pivot for operation over wide environment range.

#### COAXIAL CHOPPERS

For low loss switching of high frequency signals up to 500 M.C. Used in airborne direction finding and test equipment.

#### POWER VIBRATORS

A complete line—commercial and military. Special designs for any power conversion problem. Consultation with JAMES engineers is free.

#### MILITARY VIBRATOR

##### Power Supplies

Widely used JAMES power supplies, with both vibrators and transistors, are custom designed and manufactured for use in communications of every type—airborne, vehicular, sonar bouys, missiles, telemetering.

#### PRECISION FREQUENCY

##### Power Supplies

A wide selection of standard types and models for conversion from mobile D.C. sources. "1600" series for secondary output of 117 volts; 60 cps.  $\approx$  1 cps.

#### TRANSFORMERS

JAMES has a complete specialty transformer manufacturing facility for power transformers, for vibrator and chopper applications.

# MICROWAVE TRANSMISSION LINES AND COMPONENTS

TECHNICRAFT can serve your needs from the face of the magnetron through to the antenna.

## DOUBLE RIDGED WAVEGUIDES

Flexible and rigid waveguides, bends, twists, power dividers and antennas. Transitions from ridged to rectangular waveguide within the frequency range 4.75 to 11.00 KMC/S are available.

In addition to the DR-19 size referred to above, Technicraft is expanding its components not only in this size but in other ridged waveguide sizes as well.

## RIGID WAVEGUIDE SYSTEMS AND COMPONENTS

Technicraft is equipped to design or manufacture to your specifications and drawings any waveguide component or system from face of magnetron through to the antenna. Most advanced test equipment and techniques, plus finest facilities for manufacture and assembly. Mixer duplexer (shown) demonstrates Technicraft know-how in designing and building components into a compact assembly.

## FLEXIBLE WAVEGUIDES

Only manufacturers of solderless flexible waveguides, which eliminate problems inherent in soldered structures. (Technicraft uses solder only to attach flanges.) Three types of flexible waveguides are available —Type L—Interlocked, Type S—Corrugated, and Type V—Vertebra. Technicraft's Type S—Seamless Corrugated flexible waveguide is the only seamless flexible waveguide made.

Type L — Interlocked

Type S — Seamless-Corrugated

Type V — Vertebra

## FERRITE DEVICES

**HIGH POWER ISOLATORS** Frequency Range KMC: 2.7-2.9 up to 23.5-24.5. Peak Power: 40 KW up to 5 meg. Average Power: 25W up to 5 KW. Isolation Band Ends: 6db up to 37db. Isolation Band Center: 8 db up to 40db. FWD. loss: 0.4db up to 1.6db. Guide Size: .25" x 5" up to 1 1/2" x 3". Special Features: Compact, Broad Band, Med. Power, High Power, Hi-isolation, Gen. Use.

**LOW POWER ISOLATORS** Frequency Range KMC: 5.4-5.9 up to 34-36. Aver. Power: 1W and 10W. Isolation Band Ends: 10db up to 22db. Isolation Band Center: 25db and 30db. FWD loss: 0.8db to 1.4db. Guide Size: .36" x .22" up to 3/4" x 1 1/2". Special Features: Compact, Hi-isolation, General Use.

**FERRITE MODULATORS** Frequency Range KMC: 4.9-5.2 up to 34-36.

Max. Cont. Diss: 200 cps to 75KC. Typical Max. Insertion loss: 25db to 35 db. Guide Size: .360" x .220" up to 1" x 2". Special Feature: High Freq. Modulation, Rugged, High Power, Gen. Use.

**CIRCULATORS** Frequency Range: 8.2-10.2 up to 34.5-35.2. Peak Power: 25W, 150W, 250W. Forward Insertion loss: 0.5, 0.6, 0.7db. Reverse Attenuation: 20db and 25db. Type: 3 and 4 Terminal.

**ISOPLEXERS** Frequency Range: 8.6-9.6 and 34.5-35.2. Peak Power: 60KW and 250KW. **MISCELLANEOUS FERRITE DEVICES** Phase Shifter: Freq. Range: 8.8-10.4. 10W Microwave Power. 1.0db Insertion loss: 180° phase shift. **Polarization Rotator:** Freq. Range: 8.2-12.4KMC. Operation: Rotates plane of polarization in cylindrical waveguide 90°. **Variable Mismatch** Freq. Range: 9.6-10.3KMC. Min. Mismatch VSWR 1.3 or less. Max. Mismatch VSWR variable to 4.0 or more.

# TIMERS, electronic

provide split-second timing  
with no-filament tube

Compact electronic timers use Type 5823 cold-cathode tube, providing long tube-life with instant timing, no warm-up needed; immediate recycling—no recharging time for condenser required. Ideal for Short intervals—0.03 to 24 seconds.

Easy time adjustments—small time intervals can be spread over 320-degree dial.

Six-time ranges—can be furnished with full-scale range of 0.2, 0.5, 1.5, 3, 6, 12, or 24 seconds.

Eight-ampere contacts.

Small size— $3\frac{3}{8}'' \times 4\frac{3}{8}'' \times 2''$ .

The new Model 3 Repeat-cycle Timer is fully enclosed; has plug-in relays for easy servicing.

## Synchronous Contactors

Positive, precise coordination of electrical circuits with mechanical systems. Rotating camshaft actuates distributor-type switches to open and close electric

circuits to control punch presses, machine tools, and computers; provides protection of looms, punch and die tools. Single- and double-circuit models available. Descriptive bulletin on request.

## RELAY, electronic

Operated by  
high-speed,  
low-energy  
impulses.

Type CK Electronic Relay picks up impulses too small to operate a mechanical relay directly and holds circuit closed long enough for heavy mechanical equipment to be actuated.

Fast response—relay operates on contact of less than 0.5 millisecond.

High sensitivity—above response speed even thru contact resistance as high as 500,000 ohms.

Adjustable actuating time—relay operates in 10 milliseconds after impulse and stays "on" for time adjustable between 0.25 and 1.5 seconds.

Long life—Cold-cathode tube energized only when pulse is received.

Easy maintenance—Enclosed plug-in relay.

Small size— $3\frac{3}{8}'' \times 4\frac{3}{8}'' \times 3''$ .

# The FASTEST WIRE CUTTING and STRIPPING MACHINE

STRANDED WIRE CAN BE BULK SOLDER DIPPED WITHOUT RE-TWISTING STRANDS

Up to

- 9000 pieces per hour from 1" to 40".
- 7500 pieces an hour; 40 to 60 inches.
- 6000 pieces an hour; 60 to 80 inches overall.

Machine is automatic and doesn't require operator in attendance. All wire discharged from machine can be stacked in trough end to end except for smaller sizes. "Sticky or Tacky" types of insulation are stripped as easily as the hard surfaced types; scrap is readily removed from between the cutting blades automatically. Four different models to serve you. Send for literature.

## VARIABLE FREQUENCY GENERATORS

50 VA TO 60 KVA - 1, 2 or 3 Phase Power

MODEL 1450

3 PHASE POWER CONTINUOUSLY VARIABLE FROM 360 to 440 CPS

Power output of 750 volt-amperes with output voltage regulation of better than 2% from no load to full load. Harmonic content is below 2% at full load. Also available as a fixed frequency unit employing a tuning fork oscillator to give a frequency accuracy and stability of 1 part in 50,000 independent of line voltage or frequency.

MODEL 1420-C

VARIABLE FREQUENCY ELECTRONIC GENERATOR - 300 VA OUTPUT 50-6000 CPS SINGLE PHASE

Available with or without output voltmeter and final amplifier plate current meter. This model is available for other frequency ranges on special order and is also available with a tuning fork oscillator for precision frequency control at any frequency between 50 and 2000 cps.

Eliminate  
bulky dynamotors and  
vibrator power supplies with

**UAC  
ALL-ELECTRONIC  
POWER  
CONVERTERS!**

CAN BE MADE  
TO MEET MIL SPECS

Regulated UAC transistorized power converter for Mobile, Vehicular, and Airborne applications  
Input: 24 to 29 VDC  
Output: 250 VDC @ 200 MA  
Regulation:  $\pm 1\%$  against load variations from 1/4 to full load, and over entire input voltage range.  
Size: 2 3/4" x 2 3/4" x 3 3/4"  
Weight: Approx. 2 lbs.

UAC high efficiency power supplies solve size, weight, vibration and shock problems in hundreds of Airborne, Military, Laboratory, and Commercial applications.  
Standard DC to DC units to 150 Watts; custom units can be made up to 500 Watts or to 100,000 volts.  
As small as 1/2 cubic inch per watt  
As light as 1/10 ounce per watt  
As high as 98% efficiency

DC to AC and AC to DC units also available, including unusual input-output combinations such as:  
28 VDC input; 115 VAC output  
115 VAC, 400 cps, 3 phase input;  
250 VDC regulated output

**BUYERS' GUIDE**

# ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the **ELECTRONICS BUYERS' GUIDE**. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past seventeen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.

For Product Data . . .

## TEST EQUIPMENT

For years Marconi's have been specialists in precision instrumentation for f.m. systems. If you've an f.m. measurement problem you'll probably find the test equipment you need in this selection from the Marconi range. If you don't find it, mail us your requirements.

### F.M. RECEIVER TESTER Type TF 913/3.

A v.h.f. signal generator combined with an a.f. power meter. Carrier frequency range: 22 to 176 Mc. Output: 1  $\mu$ V to 30 mV at 52 ohms. F.M. variable up to 25,50 or 100 kc. A.M. at fixed 30% depth. Electrical incremental tuning system. In-built crystal calibrator. Tubes: 6AK5, 6X5G.

### CARRIER DEVIATION METER Type TF 791C.

Carrier frequency range: 4 to 540 Mc. Modulation frequency range: 50 cps to 35 kc. Four direct-reading deviation ranges of 5, 25, 75 and 125 kc full scale. In-built crystal-controlled deviation standard for high measurement accuracy. Tubes: 6AK5, 6C4, 6CD6G, 5718, 6AL5, OB2, 5Z4G.

### CARRIER DEVIATION METER Type TF 934/2.

A rugged pan-climatic instrument. Carrier frequency range: 2.5 to 500 Mc. Modulation frequency range: 50 cps to 15 kc. In-built crystal-controlled deviation standard for high measurement accuracy. Tubes: 6AK5, 6C4, 6AL5, 6X5G, OB2.

### F.M./A.M. SIGNAL GENERATOR Type TF 1066/1.

Carrier frequency range: 10 to 470 Mc—all on fundamentals. Stability better than 0.0025% per 10-minute period. Output: 0.2  $\mu$ V to 200 mV at 50 ohms. Internal modulation at 1 and 5 kc. F.M. variable up to 100 kc deviation. A.M. variable to at least 40% depth. Incremental frequency controls: variable, 0 to  $\pm$ 100 kc; stepped,  $\pm$ 5, 10 and 15 kc. Tubes: 5Z4G, 6AK6, 6CD6G, 6AK5, 5861, 6C4, 6L6G, 12AX7, QB2, 85A2.

### R.F. POWER METER Type TF 1152/1.

Measures true mean power from d.c. to 500 Mc. Power ranges: 10 and 25 watts full scale. Accuracy  $\pm$ 5% of full scale up to 250 Mc;  $\pm$ 10% up to 500 Mc. Input impedance: 50 ohms. Thermal element; no tubes or crystals.

### SIGNAL GENERATOR Type TF 1064 and TRANSMITTER AND RECEIVER OUTPUT TEST SET Type TF 1065.

Self-contained portable instruments for field testing mobile transceive sets. Signal Generator TF 1064 provides r.f. outputs—f.m. or a.m.—in the ranges 68 to 174 and 450 to 470 Mc, i.f. crystal outputs at five spot frequencies, and also an a.f. output. Test Set TF 1065 comprises an r.f. power meter and deviation indicator for use up to 500 Mc, a dual-impedance a.f. power meter, and a multi-range voltammeter. Tubes: TF 1064—3A5, 6J6, 12AU7, OD3; TF 1065—crystal diodes and transistors, no tubes.

## WIRES & CABLES

### MILITARY SPECIFICATION WIRES

- JAN-C-76 — Types WL-SRIR, SRHV-SRRF
- MIL-W-76A — Types LW-FX-MW-HF-HW
- MIL-W-16878B — Types B-C-D-N
- MIL-C-915 — Types SRI-MRI

Above constructions include P.V.C. Nylon or Polyethylene insulation, with or without Nylon Jacket. Also, shielded construction with P.V.C. or Nylon Jacket. Insulated in solid colors or stripes.

### MISCELLANEOUS WIRES AND CABLES

Complete facilities for design and manufacture to customers specifications.

### HIGH TEMPERATURE WIRES

Rex-KF<sup>®</sup> — MIL-W-12349. Insulated with Polytrifluoromonochloroethylene for 1000 volt service at operating temperatures from  $-65^{\circ}\text{C}$  to  $+175^{\circ}\text{C}$ . 17 solid colors and 10 striping colors in 1, 2, or 3 stripes.

Teflon Insulated Wires — MIL-W-16878 — Types E — EE

For 600 and 1000 volt service at operating temperatures from  $-65^{\circ}\text{C}$  to  $+200^{\circ}\text{C}$ . 10 solid colors and 10 striping colors in 1, 2 or 3 stripes.

### COAXIAL CABLES

To MIL-C-17B and Commercial Specifications

### MICROWALL WIRES AND CABLES

Type JR — 300 volt service  
 Type FJR — 1000 volt service  
 Both have exceptionally small OD. and operate at temperatures from  $-50^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ . Has solid polyamide insulation — highly resistant to abrasion.

### UNDERWRITER'S APPROVED WIRE

Types TF-TFF-AWM.  $80^{\circ}$  to  $105^{\circ}\text{C}$ .

### TELEPHONE WIRES AND CABLES

All plastic types. Exchange area (aerial, duct and direct burial), One pair distribution wire ("C" Rural), Rural Distribution Wire (all R.E.A. listed), Urban Distribution Wire, Inside Wiring Cable.

## UHF INSULATION

### REXOLITE #1422

Rigid, thermosetting cast plastic offering exceptional electrical properties at ultra-high frequencies. Can be machined to extremely close tolerances. Available in rod or sheet form.

### REXOLITE #2200

Offers virtually the same high electrical properties as Rexolite #1422 plus exceptionally high impact strength. Can be hot or cold punched for low cost fabrication. Available in sheet form only.

### COPPER CLAD REXOLITE

An outstanding addition to the field of printed circuits. Combines the fine electrical properties of Rexolite #2200 with good chemical resistance and punchability. Available in sheets with copper on one or both sides.

## ELECTRICAL TUBING

### REXTRUDE #105

A polyvinyl plastic tubing with exceptional insulating characteristics at high operating temperatures. Underwriters Laboratories approved and rated for  $-30^{\circ}\text{C}$  to  $+105^{\circ}\text{C}$ .

### REXTRUDE #1000

Vinyl plastic tubing to Military Specification MIL-1-631. Offers exceptional resistance to tear and abrasion. Has excellent elasticity permitting stretch over lugs and splices.

## OTHER PRODUCTS

RIGID AND FLEXIBLE PLASTIC EXTRUSIONS OF ALL TYPES.

# Vibration Testing and Control

MB MANUFACTURING COMPANY

A Division of Textron Inc.

1070 State Street, New Haven 11, Conn.

## for vibration TESTING

Model C100 — 12,500 pound force generator

## MB VIBRATION EXCITERS

MB electrodynamic-type shakers have the versatility, force output, and dependability necessary for test applications such as: (1) Fatigue testing components to destruction . . . (2) Locating noise sources in automobile bodies and chassis, blowers, etc. . . . (3) Shake testing electrical components, relays, switches, or radio chassis to

determine their ability to operate under high vibratory loads . . . (4) Determining the damping characteristics of rubber, steel, plastics, etc. . . . (5) Identifying resonant frequencies and (6) Determining natural modes of aircraft structures such as wings, fins, and control surfaces. Vibration tests to MIL-E-5272A and 41065-B and other specifications are performed easily on these exciters.

**Complex Motion Testing** MB has developed complete exciter systems to meet the requirements. They include amplifier, all necessary control equipment and circuits, and exciters with *flat frequency response*.

**Automatic Control Systems** for MB Vibration Exciters provide automatic control over table amplitude (displacement and acceleration) and frequency; manual control of either function also possible. Performance more than adequate to meet MIL-E-5272-A vibration requirements.

## MB VIBRATION EXCITER SYSTEMS

Model	lbs. Sine Force	lbs. Peak Force (noise testing)	Total Stroke	Power Supply	Frequency Range cps
C8*	1.2 (also C7 sub-miniature tube tester)		1/2 in.	Electronic	20 to 10,000
SD	10		1/2 in.	Electronic	20 to 2,000
C31*	25		1/2 in.	Electronic	5 to 2,000
C1*	50		1/2 in.	Electronic	5 to 500
C11*	50		2 in.	Electronic	5 to 2,000
S6	150		1 in.	Electronic	0.35 to 500
C6	200		1 in.	Electronic	5 to 5,000
C5H	600		1 in.	Rotary or Electronic	2 to 2,000
C10	1,200	2,550	1 in.	Rotary or Electronic	5 to 3,000
C10VB	1,750	3,150	1/2 in.	Rotary or Electronic	5 to 5,000
C25H	3,500	7,500	1/2 in.	Rotary or Electronic	2 to 2,000
C25HB	5,000	10,500	1 1/2 in.	Rotary or Electronic	2 to 2,000
C70	7,000	15,000	1/2 in.	Rotary or Electronic	2 to 2,000
C100	12,500		1/2 in.	Rotary	2 to 2,000
C250	25,000		1/2 in.	Rotary	2 to 2,000

\* Force generator or calibrator. Other models available.

## for vibration MEASUREMENT

**VIBRATION PICKUPS** Sensitive to low-amplitude vibration, yet rugged for field test work. Electrically damped; maintain calibration over wide temperature range. Resonant frequency below 5 c.p.s. Over twelve types available for specific requirements. Type 122 for temperatures to 500° F; Type 115 probe-type for hand-held exploratory testing.

Type 122

Type 115

**METERS** MB Meters are compact, portable units, designed for use with MB vibration pickups. They give direct readings of vibration acceleration, velocity, or displacement. Model M6, designed specifically for jet-engine testing, has three high-pass filter networks (cut-off at 30, 70 and 110 c.p.s.), push-button selection of four pickup signals. A.C. operated. Suitable for general test purposes.

Model M6

## for vibration ISOLATION

**ISOMODE\* INDUSTRIAL-TYPE ISOLATORS** — provide large deflection ratings with high load capacity, small size, and exceptional stability. Spring rate equal in all directions—mount at any angle—absorb vibrations for every plane. Unit load-range 50 lbs. to 2500 lbs.

MIL-I-5432 (AN-I-16a) is met with Isomode\* Type 17 vibration isolators: Load range 1/2 to 100 pounds per unit. They feature equal spring rate in every direction.

**MANY OTHER ISOLATOR TYPES** available, including units for special applications; Isomode grommets; mounts with small dimensions. Contact us on your specific requirements.

# ARNOLD regulated SWITCHING TRANSISTOR POWER SUPPLY

(DC-DC Inverter)

## FEATURES:

- 1) When used in missiles and aircraft, provides constant voltage output as battery discharges.
- 2) 1/5 weight of comparable dynamotors
- 3) 1/2 size of comparable dynamotors.
- 4) Utmost reliability for overloads and input voltage transients.
- 5) Hermetically sealed and potted, and will meet military environment.

## SPECIFICATIONS: Model 591A

Input Voltage (Nominal)	24 to 30 volts DC (Lower voltages available)
Output Voltage	Any voltage from 25-1200 volts DC
Output Power	60 watts regulated
Regulation	(a) Line: $\pm 1/2\%$ for 4 volt variations of input voltage (b) Load: $\pm 2\%$ for variations half load to full load (c) Overall: $\pm 3\%$ for both line and load
Ripple	0.3% (RMS, 1KC-10KC, 0.5% peak to peak)
Size	3" OD x 3" high, weight 19 oz.

*Model 591A is in production and is immediately available*

Ambient temp. 25° C  
Heat sink mounting plate: 19 x 7 x 1/8 aluminum

## ARNOLD TOROIDAL COIL WINDER

*sets up quickly ... easy to operate ...  
takes wide range of wire sizes*

## SPECIFICATIONS:

- Min. finished hole size: .18 in.
- Max. finished toroid O.D.: 4.0 in.
- Winding speed: 1500 turns/min.
- Wire range: AWG 44 to AWG 26
- Dual, self-checking turns counting system
- Loading (wire length) counter
- Core range: 1/4" I.D. to 4" O.D. to 1 1/2" high

## LABORATORY USE

- Change wire and core size in 45 sec.

## PRODUCTION USE

- 1500 turns per minute
- Insert core and load in 20 sec.

## ARNOLD MINIATURE MAGNETIC AMPLIFIERS

*and toroidal transformers*

UNIT	MAGNETIC AMPLIFIER	MAGNETIC AMPLIFIER	TOROIDAL TRANSFORMER	MAGNETIC AMPLIFIER
Supply Voltage	50 volts, 400 cps	115 volts, 400 cps	20 microvolt (min.)	67 volts, 400 cps
Output Voltage* AC or DC	$\pm 45$ volts	$\pm 110$ volts	As Required	$\pm 62$ volts
Output Current	20 milliamperes	100 milliamperes	10 milliamperes (approx)	320 milliamperes
Control Current	0.8 milliamperes	6 milliamperes		10 milliamperes
Input Resistance	15 K ohms	1 K (Transistor Drive)	400 K ohms (400 cps) max.	1 K (Transistor Drive)
Size	0.95" x 1.12" x 1.87" high	1.59" OD x 1 1/8" high	1.06" OD x .47" high	1 1/4" OD x 1" high
Weight	1.8 oz.	3.1 oz.	0.51 oz.	1.9 oz.

\*For Two Units in Self-Saturating Circuit (if single unit is used, output is unidirectional)

**FEATURES** Meets environment of MIL-E-5272-A and MIL-T-27  
Employs Diallyl Phthalate Plastic Cases  
Hermetically sealed by impregnation in epoxy resin

*These production units are immediately available. If required, prototypes will be designed to meet your specifications.*

**VERSATILE  
MODELS**

**MODEL 107A**

For saturating Alnico magnets weighing up to 34 lbs. and high flux ceramic magnets of any shape or pole configuration. Operates on condenser discharge principle from regular 115-volt, 60-cycle line.

Charging outputs from 100,000 to 200,000 ampere-turns through plug-in transformers, up to 3600 watt-seconds using wire-wound fixtures. Adapters for multi-pole rotors, rod, bar, ring and various other shapes available. Designed for continuous production use with low power consumption. Price of basic unit is less than \$2100.

**MODEL 1221**

A basic condenser discharge unit for most medium size magnets, the Model 107A provides ranges of 12,000 and 24,000 ampere-turns. It is capable of saturating most instrument magnets, including the new core type mechanisms, using adapters or wire-wound fixtures. Designed for continuous duty. Operates from 115-volt, 60-cycle line. Price \$530.

A low cost, condenser discharge unit employing novel, plug-in wire-wound type charging fixtures, the Model 1221 is designed for the user of small magnets. Its 10,000 ampere-turn output will saturate about 2" of Alnico V. Charging cycle rate is approximately 3 seconds, continuous duty, operates from 115-volt line. Price \$180.

Performance of all models is rigidly guaranteed. Prices are net f.o.b. Boonton, N.J. and subject to change without notice.

## RESEARCH AND DEVELOPMENT

As a manufacturer of precious metal products for more than 144 years, THE J. M. NEY COMPANY has accumulated a vast store of information on the properties and uses of precious metals and their alloys in many fields. Ney's Research Department has facilities for subjecting experimental and standard alloys to a full range of chemical, physical, electrical, mechanical and metallographic tests as well as tests simulating actual and accelerated conditions. Ney Research Department services and facilities are freely available to Design and Production Engineers.

Potentiometer linearity and life test instrument using standard oscilloscope.

## COMPLETE MANUFACTURING FACILITIES

Ney has just built this modern new plant to give you even better products and better service. Ney manufacturing facilities include wire drawing equipment, two and four high rolling mills, punch presses up to 50 tons, automatic screw machines up to 1½" capacity, cold-heading, wire-forming, welding and soldering equipment and a complete tool room. Efficient organization of these facilities means economical handling of large or small quantity production of the simplest part or the most intricate assemblies.

## PRODUCTS TO YOUR SPECIFICATIONS

Ney has a long list of important accomplishments in the development of sliding contacts, slip rings and assemblies, commutator segments and assemblies, brush and brush holder assemblies, and precious metal resistance wire. Ney engineers are available for consultation on all problems involving the use of precious metals to improve your products.

Write for your copy of Ney Data Book, "NEY PRECIOUS METALS" (Bulletin R-12) or call our Engineering Department outlining your needs.

NEY'S small parts play a BIG part in precision instruments

## GDI HIGH SPEED MULTICHANNEL SWITCHING DEVICES

### IN OUTER SPACE

Precision Multichannel switches qualified for instrumentation of high altitude and space vehicles.

### IN THE AIR

Precision Multichannel switches qualified for leading missile programs in aircraft and other airborne vehicles.

**APPROVED**

### ON THE LAND

Precision Multichannel switches qualified for use in many commercial, military and scientific ground installations.

### IN THE EARTH

Precision Multichannel switches qualified for under ground instrumentation such as for deep oil well instrumentation and measurements.

**APPROVED**

### ON THE SEA

Precision Multichannel switches qualified for military and commercial ship borne use for operational and investigational applications.

### UNDER THE SEA

Precision Multichannel switches qualified for the instrumentation of under water vehicles such as submarines, torpedoes and unmanned communication centers.

# The Greatest Names in British Electronics use

# Mullard Tubes

British equipment manufacturers are making a vital contribution to the development of electronics in all fields of application.

Their products are being exported to every corner of the world, earning a universal reputation for advanced techniques and excellent performance.

The majority of these electronic equipment manufacturers consistently use Mullard tubes. This choice is decided upon because they prefer the greater assurance of efficiency and dependability, and because the vast manufacturing resources of the Mullard organisation guarantee ready availability of Mullard tubes wherever they are needed.

Supplies of Mullard tubes for replacement in British equipments are available from the companies mentioned below:—

#### *In the U.S.A.*

International Electronics Corporation,  
Department BG,  
81, Spring Street, N.Y. 12.  
New York, U.S.A.

#### *In Canada*

Rogers Majestic Electronics Limited,  
Department L,  
11-9 Brentcliffe Road,  
Toronto 17, Ontario, Canada

## Quartz Crystals and Ovens

RAFTSMANSHIP IN CRYSTALS SINCE 1931

**TYPE VR6**  
COMMERCIAL  
AND  
MILITARY

Hermetically sealed in compact metal case . . . frequency range 175 Kc to 100 Mc . . . JAN Type HC-6/U. Pin 0.050" dia., spaced 0.486".

**TYPE VR13**  
COMMERCIAL  
AND  
MILITARY

Hermetically sealed in compact metal case . . . frequency range 16 to 175 Kc . . . JAN Type HC-13/U. Pin is 0.050" dia., spaced 0.486".

**TYPE VM6**  
COMMERCIAL  
AND  
MILITARY

Midget unit with wire leads or .040" dia. pins hermetically sealed in compact metal case . . . frequency range 5 to 125 Mc . . . JAN Type HC-18/U.

**TYPE XL100**  
FREQUENCY  
STANDARD

100 Kc used extensively in frequency standards. Mounts in 3/4" crystal socket or standard 5-prong socket.

**TYPE  
DFS**

FREQUENCY STANDARD

Features separate 100 and 1,000 Kc crystals in same case . . . accuracy  $\pm 0.005$  percent from -10 deg. C. to +60 deg. C., when used in recommended circuits.

**TYPE CM5**  
AMATEUR  
AND MARINE

Frequency range 1,000 to 30,000 Kc. Fixed air gap, standard 0.486" x 0.093" or standard octal socket. MIL FT 243.

**TYPE CM1**  
COMMERCIAL,  
MILITARY  
AND MARINE

Fixed air gap design, frequency range of 800 to 30,000 Kc. Available in standard 3/4" and G.R. 3/4", 5/8", 7/8" or 0.850" spaced pins . . . JAN Type HC-1/U.

### OVENS

#### TYPE VCO-1

CLOSE FREQUENCY OVEN  
Temperature controlled oven . . . mounts two VR6, VR13, CM1, or CM5 crystals. Heater, 18 watts . . . for 6, 10, 28 or 115V. Fits standard octal socket . . . with pilot lamp connection to thermostat.

#### TYPE VCO-2

CLOSE FREQUENCY OVEN  
Temperature controlled oven . . . mounts two JAN HC-6/U, HC 13/U, VR13 or VR6 crystals. Heater, 4 or 6 watts . . . for 6, 12.6 or 28V. Fits standard octal socket . . . with pilot lamp connection to thermostat.

#### TYPE CBC-O

FOR BROADCAST  
EQUIPMENT

Frequency range . . . 60 to 10,000 Kc. Available for 6, 8 or 10V operation . . . temperature stability to  $\pm 0.5$  deg. C. Fits standard 5-prong socket.

### CRYSTALS FOR ULTRASONIC, DELAY LINES AND OPTICAL APPLICATIONS\*

#### GENERAL SPECIFICATIONS:

Diameter:  
 $\pm 0.001$ " of specified diameter  
Polish:  
Optical pitch polish, free from scratches or pits  
Edges:  
Free from chips and incipient fractures  
Flatness:  
Flat to 0.000020"

\*And other specialized applications

Parallelism:  
Parallel to 0.000050"  
Plating Metals:

# INSTRUMENTS FOR LABORATORY and PRODUCTION

## SENSITIVE RF VOLTMETER

- Range: .001 volt to 3 volts
- Freq. Range: 50KC—500MC
- Accuracy: 5% to 200MC, 10% to 500MC
- RMS response below 0.1 volt
- High impedance probe
- 52 ohm probe: vswr 1.1
- 0.1 to 300 V probe adapter available

MODEL 91B PRICE \$375.00

## THREE TERMINAL CAPACITANCE BRIDGE

- Cap. Range: .001 mmf to 11,000 mmf
- Approx. accuracy:  $\pm(0.25\% + .001 \text{ mmf})$
- Measures direct or grounded capacitance and conductance
- Test voltage variable from .02V to 2V.
- Ideal for temperature coefficient measurements
- Self contained oscillator and detector
- Particularly suited for semi-conductor, vacuum tube, transformer, and cable capacitance measurements

MODEL 74C  
PRICE \$850.00

## RF DISTORTION METER AND VOLTMETER

- Freq. Range: Model 85B, 1 to 100 MC  
Model 85C, 0.1 to 6 MC
- Sensitivity: 60DB below 1 volt
- Accuracy:  $\pm 2\text{DB}$
- Input Impedance: approx. 50 ohms
- Fast, easy operation
- Same Voltmeter features as 91B above

MODELS: 85B and 85C  
PRICE \$675.00

## UHF GRID DIP METER

- Widest freq. range: 300 to 1000 MC
- Small, lightweight probe
- High sensitivity for both capacitive and inductive coupling
- Frequency accuracy,  $\pm 2\%$ .
- Very stable oscillator
- High Q absorption frequency meter

MODEL 101B PRICE \$275.00

## ATLAS E-E CORPORATION

puts the accent on sub-miniaturization with this wider line of precision manufactured products . . .

### Vibration and Shock Clips

An even greater line of miniature and sub-miniature component holders and locking clips to provide positive holding under extreme conditions of shock and vibration. Send for bulletins 1 and 7.

### Subminiature Tube Holders

Afford rigid mounting under heavy shock and vibration, rapid heat dissipation, flexible conformity to tube envelope. Bulletin 8. Vertical holders for printed circuitry and other limited-space mountings. Oval tube holders for oval shaped tubes and other oval cross-section components. Bulletin 8a.

### Transistor and Diode Clips

For secure holding of transistors and diodes of all types and sizes under extreme conditions of heat, vibration and shock.

Diode Clips — Bulletin 9.  
Transistor Clips & Heat Sinks — Bulletin 10.

### Tab-mounted Clips

Designed for automatic assembly and Printed Board use. Tabs are spaced for 0.1" grids. Provide adequate holding of components against shock and vibration. Bulletin 33.

# CO-AXIAL SWITCHES, MICROWAVE TEST EQUIPMENT and PRIMARY POWER STANDARDS

**Sub-miniature Relay — DPDT Style 506**

Meets requirements of MIL-R-25018 (USAF) for a general purpose relay for aircraft and missile use. Standard coil for 26.5 VDC operation. Special design, for low-level circuit use, permits isolation of all organic materials from contact chamber.

**Series 5400**

Improved design withstands in excess of 10 G vibration through 500 cycles. Contacts rated at 3 amps. at 24 VDC or 115 VAC, non-inductive. Available with higher contact ratings.

**Series 5700**

One of a complete line of multi-leaf relays from midjet to long-frame types. (Open styles available.)

**Series 8200**

200-amp, high shock relay for aircraft and missile use. Temperature range from -65 C. to +125 C. For operation from DC only.

**Style 6351**

Designed for use in 52-ohm transmission line. Supplied with 3 JHF fittings. Available without auxiliary contacts as style 6350.

**Series 2100**

Designed for military and commercial needs. Two frame sizes providing up to 6 PDT. Contacts rated at 15 amps. at 24 VDC non-inductive. DC relays are available for voltages up to 120. C relays up to 250 V 50/60 cycle.

**Series 1000**

Small, light, efficient relays for many uses. SPDT contacts rated at 1 amp. at 50 VDC. Maximum voltage 24 VDC. Available hermetically sealed.

The complete Husky line contains relays designed to meet most needs. If you have a design problem, send us your specifications for engineering review. Write for literature and specifications.

For immediate service, call Frederick, Maryland, MOument 3-5141

ELECTRONICS BUYERS' GUIDE — June, 1957 — MID-MONTH

## PULSE POWER CALIBRATOR

MODEL PCX-1 PULSE POWER CALIBRATOR is an extremely precise instrument for calibrating pulse power measuring devices in the 925- to 1225-mc frequency range and for measuring power between -10 and +63 dbm to within 0.5 db. It is the first in a series which includes similar calibrators designed for the 3000-mc, 5000-mc and 9000-mc bands.

This equipment employs a new method which permits for greater accuracy (other than calorimetric) than heretofore achieved. It establishes a measurement reference level at the time of each use. Ease of operation is assured by the notch-and-reference-line display, by the automatic centering of pulses on the display, and by the direct reading of power measurements.

The removable bisectonal cover, frame construction, hinged and pivoted subchassis assure easy accessibility for servicing.

## MANUAL CONTROL SWITCHES

Compact, lightweight—available in Radial; parallel connector configuration.

### GENERAL CHARACTERISTICS

Frequency Range: 0 to 10,500 MC. VSWR: 1.2:1 max. at 3000 MC. Insertion Loss: 0.3 db max. Crosstalk: greater than 60 db at 3000 MC, greater than 40 db at 10,500 MC. Operation Life: 10,000 cycles, min. Construction: weatherproof. Connectors: N, BNC, C, HN, BN, LN. Positions: 2, 3, 4 and 6: single and double pole. Easily adaptable for specialized usage.

## REMOTE CONTROL SWITCHES

28 V. DC., 110 V. DC.—Compact, lightweight—available in Radial, spring return; Radial, transfer; parallel connector configuration.

115 V. AC., 60 cycle.—Compact, lightweight—available in Radial, spring return; parallel connector configuration.

GENERAL CHARACTERISTICS — See Above

## "S" BAND BEACON — Model RCX

Radar Beacon RCX is a miniature S-band transponder equipment for use in tracking missiles, drones and other types of aircraft. It has greater selectivity and sensitivity than the Model RBX (below) and can be used as a transmission medium for telemetering information from auxiliary systems. Many new and unique features make it a reliable and versatile equipment, keeping pace with the current progress in the guided missile field. The equipment includes Receiver-Transmitter RCX-1, Power Supply RCX-2, Junction Box RCX-3 and the necessary interconnecting cables and mounting brackets.

### PERFORMANCE CHARACTERISTICS

Receiver Selectivity: a 3-cavity preselector;  $\pm 3.5$  mc at -3 db;  $\pm 15$  mc at -40 db (including X-band rejection filter. Receiver Sensitivity: -45 dbm. Receiver Codes: (a) Single pulse 0.25-usec duration or greater; (b) Double pulse 0.25-usec duration, 3-usec spacing; (c) Double pulse 0.75-usec duration, 10-usec spacing. Environmental Ratings: will withstand 200 G's acceleration and 400 G's shock.

## "S" BAND BEACON — Model RBX

A highly miniaturized receiver-transmitter for missile applications to facilitate radar tracking. Supplied with power supply, cable and antenna (not shown).

## "X" BAND TEST EQUIPMENT

### TEST SET BHS (AN/UPM-10A)

A portable microwave signal generator for testing and adjusting beacon equipment and radar systems operating in the range of 8500 to 9600 MC. Measures power and frequency of external signals. Supplies pulse-modulated, square-wave-modulated or unmodulated signals of known power and frequency. Also supplies frequency-modulated signals.

### NEW! MODEL BDX FOR GREATER ACCURACY

Greater frequency accuracy ( $\pm 1$  mc from 8500 to 9600 mc). Greater power level accuracy ( $\pm 1.5$  dbm without correction curves). Repetition rates high enough to measure recovery time with assurance (up to 50,000 PPS). Operates with or without an auxiliary trigger. More rugged and dependable. The only complete signal tester for beacon work.

## GENERAL COMMUNICATION COMPANY

681 Beacon Street, Boston 15, Massachusetts

When ordering or seeking information please mention Electronics Buyers' Guide.

# VARO

**Airborne and ground control precision electronic equipment for commercial and military applications**

## TRANSISTOR INVERTERS

A static means of changing DC or coarse frequency AC to precision frequency—features tuning fork accuracy and voltage regulation.

## TEL-AIR VHF RADIO TELEPHONE

A complete VHF radio telephone for ground-air communications. Fulfills the need for a low-cost radio installation which incorporates modern methods of construction, reliable components, and dependable performance characteristics.

## FREQUENCY METERS

A compact precision laboratory 400 cps frequency standard and frequency meter with calibration accuracy of .02%.

## FREQUENCY STANDARDS

Frequency Generators — Completely transistorized, 0.1% accuracy independent of input voltage variations and external loads.  
Tuning Forks — Miniaturized, accurate frequency or timing reference from 300-4000 cycles.

### ADDITIONAL ELECTRONIC EQUIPMENT MADE FOR MILITARY AND COMMERCIAL USE

Frequency Meters      Voltage Regulators  
Voltage and Frequency Sensitive Relays  
Regulated Supplies      Frequency Changers  
Speed Controls  
Complete VHF Communications Stations  
and Systems  
Remote Control Equipment  
Regulated Output Amplifiers  
Antenna Multicouplers  
Aeronautical Instrument-Landing Test  
Equipment

The VARO manufacturing combination provides the Aircraft Industry a reliable source of assistance in development and manufacture of precision 400 cycle power conversion and control; VHF transmitters and receivers and remote control equipment.

# VICTOR DIGITAL PRINTERS • DATA PROCESSING MACHINES

## Digit-matic

### HIGH SPEED SERIAL AND PARALLEL ENTRY DIGITAL PRINTERS

Digit-matic Printers are basic adding, multiplying, or calculating machines equipped with electrically actuated keys. Figures can be entered into the machines electrically and at high speeds. Digit-matics can be used with paper tape punches and readers, punched tape typewriters, electronic counters, digital testing equipment, analog to digital devices, time interval meters, pulse height analyzers, digital scalars, production counters, and Integrated Data Processing office applications as automatic invoice calculating, purchase order extensions, account selection and totaling. Both parallel and serial Digit-matics are constructed to provide a long trouble-free life. Wearing surfaces are heat treated and cyanide hardened to insure long life. All steel parts are protected by heavy cadmium plating to prevent rusting. Digit-matics are approximately 9½" wide, 7½" high and 14¾" long. Weight is approximately 26 lbs.

**SERIAL ENTRY DIGIT-MATICS:** basic 10 keyboard adding machines having numerical keys, 0-9. Digits are entered in sequence starting with the most significant digit. Available

as: *Listers*—where printing only is required, *Accumulators*—where addition, subtraction and printing are required, *Multipliers*—for addition, subtraction, multiplication and printing, *Calculators*—for addition, subtraction, multiplication and division as well as printing.

**PARALLEL ENTRY DIGIT-MATICS:** basic full keyboard adding machines. All columns are equipped with a set of 1 through 9 keys, each of which has a solenoid for electrical actuation. Available as: *Listers*—where printing only is required, *Accumulators*—where addition, subtraction, and printing are needed.

For complete information write for Data Sheet A-71-2.

### MODEL V-300-10 TRANSLATING MATRIX

Model V-300-10, for those requiring sweepout unit, accepts each number from up to 10 Decimal Counting Units or a parallel switching matrix, and

after decoding causes them to be printed by the serial type Digit-matic. Output signals, indicating that the Digit-matic has completed its printing, are furnished. A power supply for the Digit-matic is also included. Designed for rugged, reliable trouble-free operation, only top quality components, such as mercury wetted contact type relays are used. Multivibrator time generator is employed to provide reliable uniform scanning.

#### SPECIFICATIONS:

Number of input columns: Up to 10 (larger capacities on special order) • Input signals: (a) coded digits:—0 to 10

volts from D.C.U.'s (input loading 100,000 ohms, 1-2-2-4 code.)

Outputs: (a) A relay contact normally closed to ground is opened (can be used to reset Decimal Counting Units) during the time the Digit-matic is line printing. (b) 150 volts (120 K ohms) is present during the time the Digit-matic is line printing • Cycle time: Approximately 1 second for complete 10 digit scan and line printing • Power Requirements: 110-120 V, 60 cps AC, 150 Watts • Tube complement: 3-5963; 2-5687 • Fusing: 115 volt AC line and solenoid circuit.

For complete information write for Data Sheet A-84.

### ADD-TRACTOR

New adding and subtracting Decimal Counter with electrical output offers simple solution to control problems and arithmetic calculations of all kinds. Physically similar to the familiar deci-

mal counting unit, the ADD-TRACTOR has ability to complement its stored value in 10 microseconds. It can accept digital information serially, as a unitary pulse train, or parallel in binary coded decimal form. Unitary and binary coded decimal electrical outputs permit the calculating of all kinds of arithmetic problems and provide a means of control for industrial processes. Logical outputs of "less than", "equal to" and "more than" can be easily provided. In addition to functioning as an accumulating register, it can also be operated as a left and right shift register.

**APPLICATIONS:** counting, summing and subtracting, servo control, net

weighing, digital position control, ratio control, subtractive mixing, frequency deviation measurement, random events difference counter, computer arithmetic elements, and in special machines for such purposes as inventory control, etc.

#### SPECIFICATIONS:

Count indication: Direct reading, decimal presentation • Power requirements: 6.3V A.C. @ 1.2A., 300 V D.C. @ 16 Ma. • Unitary pulse train input maximum count rate: 100,000 pulses/second • Unitary pulse and complementing inputs: Negative pulse, 90±10V. Fall time—Less than 1 microsecond. Duration—At least 2 microseconds.

For complete information write for Data Sheet No. A-2-1.

## Model D-2

### Pantograph Engraver

Unique design of the two-dimensional Model D-2 features—Single micrometer adjustment controls vertical depth of cut, and adjusts height of copy table and pantograph.

Range of ratios from 2 to 1 to infinity!

Accessibility on three sides permitting panels up to 30" diameter to be engraved, milled or profiled. Vertical range over 10" allowing operations on complete chassis, cabinets or other bulky objects. Ruggedness, stability and precise accuracy inherent in construction.

Mounted on the ruggedly constructed heavy duty steel Green Engraver Bench. All functional parts are conveniently within reach of the operator while seated. Accessibility of master type sets stored in lower cabinet trays, tools and accessories contribute to productive capacity.

A brochure with full details is yours upon request.

Literature also available on the smaller Model 106 three-dimensional engraver.

## alfax is revolutionizing graphic recording!

"ELECTRICITY IS THE INK"

ALFAX PAPER AND ALDEN ADJUSTERLESS RECORDING TECHNIQUES MAKE POSSIBLE—

### • New Accuracies and Resolution in Direct Graphic Recording!

Record full range of your electronic signal outputs—monitor processes and operations directly and instantaneously on Alfax Paper—no pens or ink—up to 17 step permanent tone shades.

#### Magazine Fact Finder—2 Channels Plus Timing

Here is a compact Magazine Recorder which will permanently record two separate operations and automatically print a recurring time signal on the Alfax Tape. Simple to install—they will operate unattended—remotely or on the spot.

#### Multi-Channel Fact Finder—30 Channels Plus Timing

Record thirty channels of on-off data by merely supplying current to writing stylus—no pens or inks—simple motion switches are easily installed to make or break writing current to Alfax Paper. Ideal for monitoring production operations and processes, this compact, rugged recorder is portable for lab, factory and field use.

#### Alden "Flying Spot" Component Recorders

Get hi-resolution tone shade recordings on Alfax Paper of detecting instruments using scanning or sweep methods to collect data. Synchronize Alden "Flying Spot" with sweep or rep rate of your equipment—use direct signal outputs to mark Alfax with tone shades proportional to signal variations. Ideal for sonar, radar, facsimile, ultrasonic and magnetic flaw detection etc.

#### Alden Curve Plotters

The Basic Helix Recorder with special electronics can provide continuous, automatic curve plotting of phenomena converted to voltage. Any number of channels can be recorded simultaneously along with standard or reference signals so that the information is instantly and permanently self-calibrated.

### • Fastest, Most Accurate Means of Communication!

New high and low speed Alden facsimile recording systems using Alfax Paper are the most accurate means of communication today—are simple to install and operate virtually unattended.

#### High Speed Selective Dispatch Facsimile System

Specially designed to permit selection of pertinent data from any copy—letters, dispatches, reports, etc.—for instant transmission to wherever needed—yet complete reproductions can also be sent. 72 square inches of copy, 1800 words of newspaper type, or 900 words of typewriter text can be transmitted and received per minute.

#### Continuous Reproduction Facsimile System

Extremely high quality reproduction of large copy; such as newspapers, weather maps, blueprints, finished advertising layout, drawings, photographs, etc., can be transmitted easily with this equipment. Copy is scanned flat and reproduction automatically on remote continuous recorder.

#### Alden Giant Bulletin System

Fastest, accurate means of disseminating information to large groups of people. Automatically provides changing "up to the minute" bulletins 4 feet wide and up to 10 feet high and as much as 12 square feet of copy per minute, enlarged 10 times from remote flat-copy scanner as sent either by wire or a microwave system.

# Design your Electronic Equipment for Reliability in Service with Alden Components for Plug-in Unit Construction

## PACKAGE YOUR CIRCUITRY FOR UNITIZATION

**ALDEN TERMINAL CARD MOUNTING SYSTEM**  
Simplifies and speeds your planning and layout. Organizes your circuitry function-by-function in compact planes for easy mounting and accessibility for servicing. Complete component service provides you with Planning Sheets, pre-punched cards, terminals, card-mounting sockets, terminals and brackets.

**ALDEN PLUG-IN PACKAGES**  
Give you compact plug-in units for packaging small functions of circuitry. Easy to assemble and provide ultimate in accessibility for checking or replacement servicing. Available in 7-pin min., 9-pin min., 11-pin and 20-pin Non-Interchangeable.

**ALDEN BASIC CHASSIS**  
Provides plug-in accessibility for housing your terminal card circuitry and mounting components. Has quick lock-in and ejecting devices and provides for one point of check of all inputs and outputs. Available in widths of 2", 4", 8" and 17". Can be rack mounted using Alden Rack Adapter

**ALDEN MOBILE UNI-RACK**  
Provides ultra-compact mobile housing for your Alden Basic Chassis. Takes up to 3 levels of Plug-in Chassis in combinations of 2", 4", 8" or 17". Ideal for instrumentation, test gear, etc. Has line cord and fused switch panel.

## MONITOR EACH CIRCUITRY FUNCTION

### ALDEN FRONT PANEL "TELL-TALES"

Monitor your on, off, continuous or cycling functions with tiny Alden Pan-i-Lites. Ultra-bright, wide visibility. Five colors, five voltages, Push-in or saddle mount.

Pan-i-Lite Switch is ultra-compact momentary contact indicator switch. When pressed, light glows when switch closes. Five bright colors, three voltages. Snap ring mount.

Spot blown fuses with compact Alden Fuselites. Fuse blows — neon glows. Fuse replaced from panel. Mount by eyelet or spot-weld. In 6, 12, 28, 110 and 220 volt.

### ALDEN MINI-TEST JACKS & CORDS

Tiny Mini-Test Jacks provide space-saving, color-coded check points for critical voltages. Available in phenolic, nylon or genotron. Seven brilliant colors. Nut or eyelet mounted. Long life beryllium copper, silver plated contact.

Unbreakable Mini-Test Prods with molded-in pin and lead are ideal for instruments, test sets, metering circuits, and patch panels. Non-kinking lead wire. Standard colors Red or Black. Standard lead length 18" or to your specs.

Be sure your engineers are working with the Alden Handbook. Presents complete line of basic components adapting your equipment to plug-in unit construction.

## MAINTAIN HIGH FIELD RELIABILITY WITH ALDEN CABLES AND CONNECTORS

### ALDEN UNIT MOLDED CONNECTORS

A whole series of new high reliability connectors. Leads and contacts are integrally molded in a single shot of insulation carefully selected for its mechanical and electrical characteristics. A patented feature allows the use of highly resilient, long life punch press contacts. Available in a variety of standard types and layouts.

### ALDEN UNIT MOLDED CABLE ASSEMBLIES

Advanced molding techniques are used to provide you with complete integral molded insulation cable assemblies. You can have a choice of several standard designs in a variety of layouts.

### ASSEMBLED CONNECTORS AND CABLES

Here's a standard series of pre-wired assembled connectors from one to 11 contacts, phenolic insulated. Leads are "top-connected" for positive strain relief to resilient long life punch press contacts. Just specify connector, lead lengths, and we assemble.

### TUBE CAP CONNECTORS

Available in phenolic or integral molded assemblies in a variety of insulations with or without integral molded circuit components such as resistors, condensers, corona shields, etc. Leads are tailored to your specs so that complete assembly is ready to put into your equipment.

## PLAN FOR YOUR ELECTRICAL CIRCUITRY

### INSULATED FUSEHOLDERS

Compact "Safety" Type fuseholder, UL listed for 110V, 15 amps. Features — controlled contact pressure — fuse ejector spring — "U" shaped contacts.

### DIAL LIGHT SOCKETS

Here's the simplest, yet most reliable of dial light sockets. One of a series of four standard bayonet types for one or two wire installations. "Center file" action allows lead to "bite" into bulb contact. Positive pressure locks bulb in — prevents rattling — will not fall out. Produced on automatic machines for low cost — fast delivery.

### DETACHABLE LINE CORDS

For quality equipment — 2 and 3-wire UL listed cord sets. Unit molded male and female ends are neat, compact. Chassis connector eyelets in for fast assembly — eliminates need for UL knots, grommets.

### AC CONVENIENCE OUTLETS

Compact MINI-SPACE OUTLETS for all types of electrical or electronic equipment whenever power take-off convenience is needed. Available with solder tabs or leads tailored to your specs.

Write today for detailed specifications and samples, giving us complete information on your application to:

## NATVAR FLEXIBLE ELECTRICAL INSULATING MATERIALS

### VARNISHED FABRICS AND PAPERS

**VARNISHED CAMBRIC**—Straight cut for application to regular smooth surfaces; bias for irregular surfaces. Supplied in all standard sizes and thicknesses, in yellow or black and in greasy, mica-dusted, or dry finishes. Yellow has higher resistance to mineral oils and is therefore used extensively in oil immersed apparatus; black has better electrical qualities and is therefore recommended for applications where dielectric strength, power factor and preservation of these qualities even under humid conditions is important. Natvar varnished cambric is manufactured to conform to the latest revisions of NEMA Standards and A.S.T.M. Specifications. Full width rolls, 25 yd and 50 yd.; sheets, 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

**VARNISHED CAMBRIC TAPE**—Straight cut or seamless bias, in all standard widths and thicknesses, yellow or black, greasy, mica-dusted or dry. Characteristics same as for varnished cambric. Accurately slit for use in taping heads. Standard lengths 36 yd. and 72 yd. rolls.

**VARNISHED CANVAS AND DUCK**—Recommended for applications where electrical insulation is subject to severe mechanical strain and abuse. Widely used as phase insulation in rotating machines. These high strength fabrics are coated with the same high grade varnishes as Natvar varnished cambric. Full width rolls, 25 yd. and 50 yd.; sheets 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

**VARNISHED SILK**—Thin, high dielectric strength insulation with great flexibility and mechanical strength. Particularly applicable to relays, magnets and other components used in airborne equipment, where space and weight are important considerations. Available in yellow only; finish, dry. Full width rolls, 25 yd. and 50 yd.; tapes, 25 yd. and 50 yd.; bias cut strips approximately 51 in.; standard; other lengths on special order.

**VARNISHED RAYON**—Developed as an alternate for varnished silk, and used in substantially the same applications. High tensile and dielectric strength with exceptional smoothness. Available in yellow only; finish, dry. Full width rolls, 25 yd. and 50 yd.; tapes, 25 yd. and 50 yd.; bias cut strips approximately 51 in. standard; other lengths on special order.

**VARNISHED FIBERGLAS**—Class B insulation (130°C) used primarily to insulate equipment which operates at temperatures above the normal safe working range of varnished cambric. Permits higher current densities with consequent reduction in size and weight. Has great mechanical strength and excellent dielectric properties. Available in standard weave or open-weave; yellow or black; in all standard commercial sizes and thicknesses; standard finish, dry; mica-dusted on specification. Full width rolls, 25 yd. and 50 yd.; sheets, 36" x 36" and 24" x 36"; tapes, 36 yd. and 72 yd.; standard; other lengths and sizes on special order.

**ISOGLAS**—For higher continuous operating temperatures (150°C). Consists of glass fabric coated with newly developed isocyanate type resin. Has outstanding resistance to heat, to crazing and cracking, and to solvents including the askarels. It is tough and has excellent abrasion resistance, wet dielectric strength, low temperature flexibility and fungistatic qualities. Full width rolls (approx. 36"), 25 yd. and 50 yd.; standard; slit tapes also available.

**SILICONE VARNISHED AND SILICONE RUBBER COATED FIBERGLAS**—Class H insulation (180°C) used wherever reduction of size and weight are vitally important. Retains its excellent mechanical and dielectric properties at higher temperatures. Full width rolls, 25 yd. and 50 yd.; tapes, 36 yd. and 72 yd., standard; other lengths on special order.

**VARNISHED PAPERS**—Chemically inert rope and kraft stocks selected for uniform thickness, tensile and dielectric strength and coated with highest grade electrical varnish. Yellow varnished condenser type tissues, single or multiple ply; yellow or black varnished heavy papers, single ply. Full width rolls, single ply, 25 yd. and 50 yd.; multiple ply, 25 yd.; sheets, 36" x 36" and 24" x 36"; tapes, 36 yd. and 72 yd., standard; other sizes and lengths on special order.

**COMBINATION INSULATIONS**—Slot cell insulation is a combination of 100% rag paper stock firmly cemented to a layer of varnished cambric, either straight or bias cut. The high dielectric strength and moisture resistance of Natvar varnished cambric with the toughness and abrasion resistance of rag paper make a slot insulator which will withstand pounding and chafing without impairment of its electrical properties. Available in black and yellow; full width rolls, 25 yd. and 50 yd.; sheets, 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

Aboglas® insulation is a new class B insulation (130°C) consisting of a layer of varnish saturated asbestos paper sandwiched and securely bonded between two layers of varnished open-weave Fiberglas. It is less expensive than mica combinations and does not flake. Excellent resistance to breakdown even under extreme heat, moisture, abrasive dust, oil and grease. Standard sheets approximately 36" x 36"; other sizes on special order.

Other duplex and triplex composite insulations such as silicone coated Fiberglas, Quinorgo, Mylar, etc. are also available.

### FLEXIBLE TUBING AND SLEEVING

**VINYL COATED OR VARNISHED**—Electrical grade rayon (Class A) or Fiberglas (Class B) braid coated with high grade electrical varnish or specially formulated vinyl base plastic compound. Standard lengths, 36"; vinyl coated also available, #24 to #15 in 500' coils; #14 to 4 in 100' coils. Pieces 3/8" or longer cut to specification.

**ISOGLAS®**—Tubular glass braid coated with newly developed isocyanate type resin (150°C). Same properties as Isoglas fabric. Standard lengths, 36".

### EXTRUDED PLASTIC TUBING AND TAPE

**NATVAR 400 VINYL TUBING AND TAPE**—Natvar 400, for applications requiring high resistance to both heat and oil, is approved by Underwriters' Laboratories for continuous operating temperatures of 105°C. It remains flexible under continuous operation immersed in hot oil. It is a well balanced plastic that is tough, elastic, flexible, resistant to abrasion and tear, inert and resistant to ozone, oils, waxes, alkalis, acids and most solvents. Available in transparent, black, opaque white, yellow, red, green, blue, brown, and gray. Tubing is stocked #24 to #15 in 500 ft. spools; #14 to 1/2" in 100 ft. coils; 3/16" to 1/4" in 50 ft. coils; 1/2" and larger in 25 ft. coils; cut pieces 3/8" or longer on specification. Tapes, standard length, 36 yd.; standard color, black.

**NATVAR 200 VINYL TUBING**—Natvar 200 is a general purpose tubing with excellent flexibility through a temperature range of -40°C to +85°C. Will not support combustion. Shows no disintegration or flaking when immersed in oil. In general has the same inherent characteristics as Natvar 400, but slightly higher tensile strength, averaging 3600 p.s.i. Stocked in same lengths and colors as Natvar 400. Cut pieces 3/8" or longer furnished on specification.

**NATVAR STYROFLEX® FILM**—Specially processed flexible polystyrene film developed for insulation of UHF coaxial cables and capacitors. Excellent mechanical and electrical properties. Available in thicknesses .0004" and thicker in precision cut tapes up to approximately 10" width.

### EXTRUDED PRINTED MARKERS

Printed with indelible vinyl ink on Natvar extruded tubing cut to specified lengths. All combinations of letters, numbers, and symbols available for identification of circuits, terminals, airplane electrical systems, etc. Wide color range for coding.

### SPECIAL PRODUCTS

In addition to Natvar standard products, there are many Natvar products developed for a special application. These materials, now in limited production, are available on special order.

Where specifications call for materials with special mechanical or electrical characteristics, check with our representative in your area, or directly with us. If the materials you are looking for are not already in production, our engineers will be glad to work with your engineers to provide a practical answer.

# microwave absorbers by

# McMillan

McMillan Industrial Corporation makes various materials for the absorption of microwave energy, for indoor or outdoor use and for ground or airborne applications. Listed below are the three most popular absorbers, their typical applications, specifications and characteristics.

**TYPE "T"**  
THIN — FLEXIBLE

Especially adaptable for airborne applications, the type "T" is an extremely versatile absorber where space and weight limitations are essential. Easily formed, it is impervious to effects of moisture, hydraulic fluids, gasoline etc., when edge sealed.

### SPECIFICATIONS

Frequencies: 2500 to 35,000 MC.  
Bandwidth: ± 3%  
Power Reflection Coefficient:  
Perpendicular Polarization 1%  
Parallel Polarization 2%  
Perpendicular & Parallel Polarization 2%  
Power Dissipation: 2 watts/sq. in.  
Temperature Range: -62°F to 172°F  
Thickness & Weight: at 9375 MC., 3/16" thick, 4.7 oz./sq. ft.  
at 5400 MC., 1/4" thick, 5.7 oz./sq. ft.  
Standard Sheet Size: 18" x 36"

**TYPE "BL" & "BH"**  
PERMANENT — LIGHTWEIGHT

Two stable absorbers whose high performance and long life is not affected by moisture, humidity and dust. Type "BL" is fine for walls, ceilings and test panels. Type "BH" is excellent for test room floors and outdoor installations, as its high absorption characteristics are unchanged when it is walked on.

### SPECIFICATIONS

Frequency range: 1000 to 35,000 MC.  
Power reflection coefficient: 0.4% at 24,000 MC.  
(perpendicular and/or parallel polarization) 1.0% at 9,400 MC.  
2.0% at 5,400 MC.  
Power dissipation: 2 watts/sq. in.  
Temperature range: (type "BL") -62°F to 155°F  
(type "BH") -62°F to 175°F  
Standard block size: 2" or 4" thick, 4' long, 1' wide  
Weight: (type "BL") .5 lbs./sq. ft.  
(type "BH") .7 lbs./sq. ft.

**TYPE "BL-48"**  
BROADBAND — PERMANENT

Recommended for use in the low frequency range where permanent attenuation characteristics are required, for both indoor and outdoor applications.

### SPECIFICATIONS

Frequency range: 40 to 35,000 MC.  
Power reflection coefficient: 2 1/2%  
Power Dissipation: 2 watts/sq. in.  
(perpendicular and/or parallel polarization)  
Size: Base — 1' x 2'  
Height — 48"  
Weight: 5 lbs./sq. ft.  
Temperature range: -62°F to 155°F

Also available — Type "H" Hair Mat Absorbers in thicknesses from 1" to 8" for frequencies from 500 to 35,000 MC

<b>Ku BAND</b>	12150	Freq. Meter	12400-15000	0.02%, waveguide mount
	15180	Freq. Meter	15000-18000	0.02%, waveguide mount

Many of the frequency meters listed above are available in both waveguide insertion and portable cased types. When supplied as a portable instrument, the meter is mounted in a handsome, waterproof, ruggedized metal carrying case. An external-internal switch allows the crystal output to be applied either to the internal microammeter, or to pin jacks for external metering or oscilloscope display.

The mechanical design of the meter is centered around the precision micrometer screw and nut famous in the Frequency Standards micrometer head. On the direct-reading meters, this screw and a precision external thread work together to provide a scale directly calibrated in frequency.

### PRESELECTORS AND FILTERS

Frequency Standards, Inc. can supply a line of fixed and gang-tuned preselectors (standard or engineered) in the range from L through X band. These low-loss, narrow bandwidth, sub-miniature devices have found application in beacons, radar, missiles, commercial instruments, and airborne devices. Inquiries are invited on your specific application.

## GET EVERY IMPORTANT VALUE

### ■ QUALITY

When you put your requirements up to Kobzy, you make sure that the quality is exactly right for each application. The highest standards are maintained throughout our production. Our facilities are complete and modern. All this insures full quality control.

### ■ DESIGN

Our engineers and designers have worked closely with both the radio and electronic industries over a long period of years. Ideas suggested by these various sources have been a factor in the development of the Kobzy line. This practice is continued as these industries grow and their requirements increase.

### ■ UNIFORMITY

When you order a few or many of any one Kobzy product, you can be sure that the entire order is uniform. This is also true on repeat orders. You take no chances. Strict inspection is maintained all along the production line.

*Looking  
for*

**TUBE EXTRACTOR**  
No. 1001

Zinc plated spring steel. Molded soft neoprene cushion over the two claws permits quick manipulation.

**SPLIT BANANA PLUGS**  
No. 883

Fits all standard banana jacks. Set screw provided at side of tenite barrel to fasten wire without soldering. Red and black.

**NEW MULTI-WAY  
BINDING POST No. 640**

Made of durable tenite with nickel plated brass parts. Permits SIX different methods of connecting above panel and three below panel.

**COMPONENTS**

**PENCIL TYPE TEST  
LEADS No. 373**

Has finger-grip molded tips. Made of tenite, with 48" rubber kinkless wire. Handles are 5" long.

**ALL-PURPOSE TEST  
LEAD KIT No. 312**

Has interchangeable tips. Sturdy tenite. Overall length 6". 48" kinkless live rubber leads.

**TELEPHONE TYPE PLUGS**  
No. 24

2 conductor phone plug, with sure-grip ribbed barrel. Hardware is brass, nickel-plated. Accepts two pairs of cord tips.

**INSULATED TIP JACKS**  
No. 889

One-piece tinned phosphor bronze spring contact loop. Insulated top. For standard phone tips.

**INSULATED BINDING  
POSTS WITH JACK**  
No. 623

For banana type plugs. Knurled grip, non-removable head. Hole in stem for wire or phone tip connection.

**PLUG TEST PRODS**  
No. 390

With solderless plug chuck. Slim tapped tenite handles. Brass parts are nickel-plated.

**OR METAL GOODS**

**COMPOSITE SPEAKER  
CABINET No. 3988**

Houses either a 4" or 5" speaker. Gray ripple finish, 20 gauge steel with embossed grille.

**"FLEXI-MOUNT"  
ALUMINUM CASES**

2 pc. case with maximum accessibility. Has wide application. .050 aluminum in gray hammertone (Series No. 29435) or natural (Series No. 29335).

**"CHANNEL-LOCK"  
ALUMINUM BOXES**

2 pc. box. Easily accessible and assembled. .050 aluminum in black wrinkle (Series No. 29300) gray hammertone (Series No. 29400) and natural (Series No. 29200).

**DELUXE SLOPING PANEL  
CABINETS No. 3990**

Deluxe all-purpose 20 gauge steel cabinets. Front panel already mounted. Upper corners are rounded and topped with chrome trim.

**DELUXE TRANSMITTER  
RACKS No. 3865-7**

16 gauge steel relay rack for wide range of mounting applications. Panel spaces are 36 $\frac{3}{4}$ " x 19", 61 $\frac{1}{4}$ " x 19", 77" x 19". Ultramarine finish.

## DO YOU WANT TO...

GENERATE PULSES

DELAY PULSES

WIDEN PULSES

REGISTER PULSES

COUNT PULSES

SUM PULSES

DO BINARY LOGIC

DRIVE TRANSISTOR CIRCUITS

The logic functions are built into miniaturized 2 1/4" x 10" slide-in units. Most units contain 10 functions or stages — others at least three. They are all designed to work together, and are easily interconnected by simple patch cords at the rear of the units. Operating rates are up to 200 K.C.

A single regulated power supply can handle up to 15 units, and fits into the small portable rack. Only two voltages (- 10V, - 20V) are required for the system operation.

Specify "H" Series Regulated DC Power Supplies. Universal's heavy duty, high current power supplies are built in voltage ranges from 25 to 400V, and in 1, 2 and 3 Amp current ranges.

Standard (0.5%) or Precision (0.1%) Regulation. Forced air cooling on 2 and 3 Amp models. For complete specifications write today for Bulletin H-57.

**UNIVERSAL ELECTRONICS COMPANY**

1720 twenty-second street, santa monica, california • EXbrook 3-7707

**HIGH SPEED DIRECT DRIVE  
Gearless BOBBIN WINDER  
Adjustable Winding Length**

Gears eliminated by new pitch selector; no gear changing between jobs required. Merely set selector lever at desired pitch and wind all types of random wound bobbin coils, solenoids, repeater and relay coils up to 2" OD using 27 to 46 gauge wire.

66-700 turns per inch winding range. Speeds up to 8000 RPM obtained by direct drive between motor and spindle. Fine wire breakage prevented by 3-second slow-start which is dialed in or out as needed. 3 1/2" max. traverse for any single continuous winding. Winding traverse infinitely adjustable between 1/8" and 3 1/2". Max. loading distance for multiple winding 8 1/2". Output end of spindle 1/2", flatted shaft.

Time-saving fingertip re-settable wire guide permits instant re-setting to identical starting point after completing each winding cycle. Time-saving single shot lubrication permits instant, clean lubrication of all high speed bearings by simply lifting plunger. Tension, pre-determining automatic counter, magnetic brake and positive locking compression-type tailstock furnished.

Save time, increase production, lower costs with Model 312-AM.

## FOR YOUR PARABOLIC REFLECTORS

get maximum accuracy at minimum unit cost with Torngren's exclusive MECATORN spinning process.

Reflectors spun by the hydraulic, semi-automatic MECATORN process are stronger and more uniform. They insure maximum gain and uniform phase front. Surface irregularities are kept to a mini-

mum. Accuracy is maintained to tolerances as low as 1/64th of a wavelength. Template inspection guarantees quality control. Diameter range: from 6 inches to 12 feet.

## C. W. TORNGREN COMPANY, INC.

236 Pearl Street  
Somerville, Massachusetts

# CORSON GLASS CASED PLASTIC DIELECTRIC CAPACITORS TYPE G6

- **DIELECTRIC AND IMPREGNANT:** The thin acetate film in Corson capacitors is one of the finest dielectrics known. It has a high breakdown voltage, great tensile strength and stable physical and electrical characteristics. All units are impregnated and filled with a silicone liquid having excellent dielectric qualities.

- **CONSTRUCTION:** Airtight construction consists of high quality glass tubing with silver bands fused on at each end. Metal ferrules are soldered to these bands.

- **TERMINALS:** Units with diameters of 19/32" or less have pigtail leads of #18 tinned copper wire approximately 2-1/8" long. All others come with 3/8" long screw terminals. Special terminal types, using solder lugs, pigtails or different screw sizes are available on order.

- **TOLERANCES:** Standard capacitance tolerance is plus or minus 10%. Closer tolerances can also be provided.

- **VOLTAGE RATINGS:** Corson capacitors are factory tested at 1.5 times rated voltages for 1 minute. In DC circuits, peak voltage should not exceed rating. In 120 cycle AC circuits, peak voltage should not exceed 10% of rating.

- **TEMPERATURE RANGE:** Corson capacitors operate satisfactorily over a temperature range of -60 to +85° C. Other dielectrics available for +125° C and 150° C full rating.

TYPE G6		VOLTS
CAPACITANCE	MFD	DC
.005	to 3.	1,000
.001	to 2.	2,000
.001	to 1.	3,000
.001	to 1.	4,000
.001	to .5	5,000
.0005	to .2	8,000
.00025	to .2	10,000
.0005	to .06	15,000
.0005	to .04	20,000
.0005	to .02	30,000
.0005	to .01	40,000
.0005	to .01	50,000
.0005	to .006	60,000

**OTHER UNITS:** Units using polyethylene, irradiated polyethylene, mylar, teflon and polystyrene dielectrics also available cased in glass, metal cans and bakelite to meet high resistance, low absorption, high stability, high temperature and low losses.

We can produce any of these pieces . . . .  
**WITHOUT COSTLY DIES!**

Parts similar to those above now available even in small quantities by special photoetching process. Print or drawing of part all that is needed. In most cases the same material you are now using can be photoetched. Identification accomplished during process. If not used flat, we can form to specifications.

Photoetching does not replace all punch press work, but in small runs, especially complex pieces, entire job will cost less than dies. Our engineers will help you with your particular problem.

**ETCHED CIRCUITS**

Produced on one side or on both of any material from paper base to ceramics. Sizes: subminiature to large (36" x 36")

Etched part of all sizes  
**AVAILABLE IN 24 HOURS**

You don't have to wait for days.

# AINSLIE ANTENNAS

.....for the 100-500 mc BAND

MODEL CF121M — 12 ft. diameter with dipole exciter. Gain 23 db at 500 mc. Minimum side lobes 20 db (or better). Cross Polarization 20 db (or better).

Low VSWR at any frequency in the band. Accomplished through adjustable balun and reflector assembly.

STOCK REFLECTORS—4 in. to 10 ft. diameter solid spun. 4 ft. to 18 ft. diameter mesh. Larger sizes or special shapes on request. Antennas up to 10,000 mc.

Weatherized & corrosion resistant. Rugged, lightweight.

**PROMPT DELIVERY**  
Any type antenna or reflector precision-built to your specifications.

Write for complete performance data sheets.

MODEL CF141M with 14' diameter reflector available

## HOW ARE YOUR COMMUNICATIONS ?

Do the booklets, pamphlets, and manuals you use really *work* for you? Are these vital publications, that tell the story of your products and your company, as effective, readable, well designed and illustrated as they can be? Today more than ever, your entire operation is judged by each annual report, employee manual, and public relations piece that you produce. Have you examined your communications lately? If you have any doubt as to the impact of your instructional and promotional literature, remember . . .

## COMMUNICATION IS OUR BUSINESS

For a good many decades McGraw-Hill has stood for complete coverage in the business literature field. Now the McGraw-Hill TECHNICAL WRITING SERVICE offers a new approach to your publication problems — an *integrated* writing, editing, illustrating, and printing service for the *custom* production of: INSTRUCTION MANUALS, PRODUCT BULLETINS, TRAINING AIDS, INDUSTRIAL RELATIONS LITERATURE, ANNUAL REPORTS, COMPANY HISTORIES, PROCEDURAL GUIDES and other collateral literature. More than 150 editorial and graphic experts are at your disposal, ready to prepare high-quality material to your own or government specifications. Save time, save money . . . and make your communications work! Let *our* staff be your staff for technical and business publications.

# ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the ELECTRONICS BUYERS' GUIDE. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past seventeen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

*The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.*

For Product Data . . .

## the electronics BUYERS' GUIDE

## WESGO ALUMINAS... Ultimate in high temperature, high strength ceramics . . . Made to any design requirements . . .

**WESGO "AL-1009"** A very high purity (99.85% minimum  $Al_2O_3$ ) recrystallized alumina body which, due to its complete freedom from any readily reduced impurities and extremely high melting point (over 2000°C.), is widely used in such critical high temperature applications as cathode heater insulators for vacuum tubes. Experience has shown that through the use of AL-1009 insulators all danger of emitter poisoning due to "gassing" of ceramic is eliminated. Being porous, it is readily "outgassed" during "bakeout" cycle.

**WESGO "AL-300"** An extremely high strength, vacuum tight, non "gassing", very low loss, 97.6% alumina content ceramic. Withstands temperatures up to 1600°C. without deformation or deterioration. Used for vacuum tube insulators, tube envelopes and various other shapes for high frequency applications requiring a very low loss and high mechanical strength ceramic. **Its extremely low loss factor at microwave frequencies plus freedom from extraneous "lossy" impurities indicates the use of AL-300 in R. F. "Window" applications.**

AL-300 and AL-1009 can be formed into most shapes to within tolerances of plus or minus 1/2% with a minimum commercial tolerance of plus or minus .002 inch.

## WESGO "VX" SUPER REFRACTORY

### Boats, Slabs, Crucibles and Special Fixtures for Brazing, Sintering, Melting and Heat Treating

Has valuable high temperature properties characteristic of ceramics, yet withstands severe thermal shock conditions that would shatter virtually all conventional ceramic materials. Typical applications are furnace and induction brazing, sintering of powder metal compacts, calcining of powders, and components of high temperature systems subjected to rapid temperature changes. While its chief distinguishing characteristic is its almost complete freedom from cracking or spalling due to rapid temperature changes, it also possesses the following valuable properties:

- Extremely low thermal expansion.
- Immune to furnace atmosphere. Free of metal-contaminating impurities.
- Porosity is variable within certain limits (avg. 21%).
- Low specific gravity (1.6-1.7).
- No loss of strength at high temperatures.
- Low thermal conductivity.
- High electrical resistivity.
- Dielectric constant is 3.6 at 60 cycles.

Maximum recommended temperature for continuous service is 1200°C., for intermittent service it can be used up to 1450°C. Boats, slabs, short tubes, crucibles, etc. available from stock. Special shape can be molded to close tolerances. Shapes can be ground with silicon carbide wheels and drilled with carbide-tipped tools.

## WESGO LOW VAPOR PRESSURE BRAZING ALLOYS

These Alloys Were Specifically Developed For High Vacuum Applications. They Are Available In Wire, Sheet, Ribbon And Brazing Washers And Prefarms.

\***NICORO** (Solidus 990°C-Liquidus 1020°C) 35% Gold, balance Copper and Nickel. Used for its better "wetting" and flow characteristics.

\***INCURO 20** (Solidus 970°C-Liquidus 1015°C) 20% Gold, balance Copper and Indium. Used as an economic substitute for the 35% Gold-65% Copper Alloy.

\***NIORO** (Solidus 950°C-Liquidus 950°C) Very high strength alloy of Gold and Nickel possessing high corrosion resistance. Due to its favorable melting point, and exceptional wetting and flow characteristics on Tungsten and Molybdenum, it is widely used for brazing those metals to Copper, Nickel and Kovar.

\***INCURO 60** (Solidus 860°C-Liquidus 900°C) 60% Gold, balance Copper and Indium. Fills the need for a low vapor pressure, non-silver-bearing alloy with a melting point lower than the binary alloys of Gold and Copper or "Nicoro". Its principal use is for "step brazing" techniques on metals such as "Kovar".

\***SILCORO 60** (Solidus 835°C-Liquidus 845°C) 60% Gold, balance Silver and Copper. For intermediate brazes on Copper and Nickel components.

**CUSIL** (Silver-Copper Eutectic) (Solidus 780°C-Liquidus 780°C) "Decarbonized" by a special process. Free of mechanically entrapped carbon present in brazing alloys of this type.

\***INCUSIL 10** (Solidus 685°C-Liquidus 715°C) Alloy of Silver, Copper and Indium. A ductile, low vapor pressure brazing alloy with melting range below Silver-Copper Eutectic alloy and is widely used for brazing structures previously brazed with that alloy.

\***INCUSIL 15** (Solidus 630°C-Liquidus 685°C) is similar to Incusil 10 but having a higher Indium content has an appreciably lower melting range.

\*Proprietary alloys of WESTERN GOLD AND PLATINUM COMPANY, Patents Pending.

Manufacturer of Relays  
for the Electronic Industry

## GENERAL PURPOSE RELAY SERIES 130 RELAY

1. **CONTACTS:** Coin silver; generous safety factor; conservatively rated at 20 amps, 115 volt 60 cycle AC or 24 volt DC.
2. **CONTACT ARMS:** Rigid arms backed by compression springs provide self-cleaning contact wipe.
3. **CONTACT SUPPORTS:** Moulded bakelite supports provide high dielectric protection for both movable and stationary contacts.
4. **TERMINALS:** Large binding-head screws accommodate #12 wire or lugs.
5. **HINGE PIN:** Stainless steel ground to close tolerance assures contact alignment and long life.
6. **COILS:** Interchangeable; replaced by removing one screw in base; continuous duty.
7. **AUXILIARY CONTACT MOUNTING:** (see illustration below.)
8. **MOUNTING BASE:** Metal strap or bakelite; removable; can be rotated 90° either direction (see dimension drawing).
9. **FINISH:** Cadmium Cronak.

### Dimensions and Mounting Area

### THE MOST USEFUL RELAY FOR INDUSTRIAL APPLICATION

These Relays are conservatively rated and are designed to provide reliable, trouble-free service over long periods of time, when used within the limits of their rated capacity. The space requirements have been reduced as much as practicable, consistent with good electrical practice, and meet the requirements of the Underwriters' Laboratories. Write for Bulletin 130.

#### A RELAY FOR EVERY USE . . . FROM MIDGET TO HEAVY DUTY MODELS

More than 30 years of specialized experience are behind a wide range of relays designed, engineered and manufactured by Wheelock Signals, Inc. to meet critical applications of all kinds. Hermetically sealed relays in miniature and sensitive categories are available for military requirements. Relays of various characteristics are available or manufactured according to your specifications. Write for literature EG-6. Wheelock Signals, Inc., Long Branch, N.J.

#### AUXILIARY CONTACTS (SERIES 131)

Auxiliary contacts (SPDT) rated 5 amps at 110 volts can be furnished with relay or easily attached later if required (see No. 7 above).

I Get Shortest  
Etching Time  
with **HUNT**  
**ETCHANTS**

**HUNT R.C.E.**  
(Rapid Circuit Etch)  
**FOR PRINTED  
CIRCUIT BOARDS**

Hunt R. C. E. is a proprietary etchant, formulated to etch printed circuits fast and to speed up production. It offers these 6 big advantages:

1. 15% increase in etching speed
2. Fast action over entire circuit
3. Uniformly smooth etching
4. Easily removed by washing
5. Substantial increase in capacity
6. Freedom from fumes

**HUNT S.C.E. (Solder Circuit Etch) FOR SOLDER-PLATED CIRCUIT BOARDS**

This ready-prepared product is designed to etch solder-plated circuit boards more easily, more effectively than it has ever been done before. You'll find that Hunt S. C. E..

1. Etches rapidly at room temperatures
2. Has a high capacity for copper
3. Never attacks the circuit
4. Has guaranteed uniformity, and is of the highest quality because of rigid laboratory control

Hunt S. C. E. is essentially an oxidizing solution with the capacity to keep the oxidized copper permanently in solution. Although many acids will etch copper, S. C. E. solution has the peculiar property of not attacking the solder . . . but giving fast, odorless etching of the copper.

Write to nearest Hunt Branch for:

**HI-HEAT 105A** High Heat Vinyl  
Sleeving for MIL-I-631C, Type F,  
Form U, Grade c, Class I and II,  
Category 1 and 2.

**SUPER HEAT 125** High Heat  
Vinyl Sleeving. Surpasses U.L.  
105° C requirements.

**VINYL GLASS** — Vinyl coated  
fibrous glass sleeving for NEMA  
VSI-1950, ASTM-D 372T,  
MIL-I-3190 (A)

Also available is a complete range  
of vinyl tapes and lacing cords, as  
application counterparts for Resinite  
Vinyl sleeving.

Resinite has consistently led the  
field in the development of specifi-  
cation grade sleeving. Unbelievably  
careful engineering, manufacturing  
and quality control has kept  
Resinite out in front and has made  
it a name instantly recognized by  
aircraft, electronic or electrical  
engineers.

Complete, comprehensive data is  
available concerning any Resinite  
sleeving. Write for information and  
samples, or see local Resinite  
Representative.

## Superior manufactures superior ELECTRONIC GUN MOUNTS!

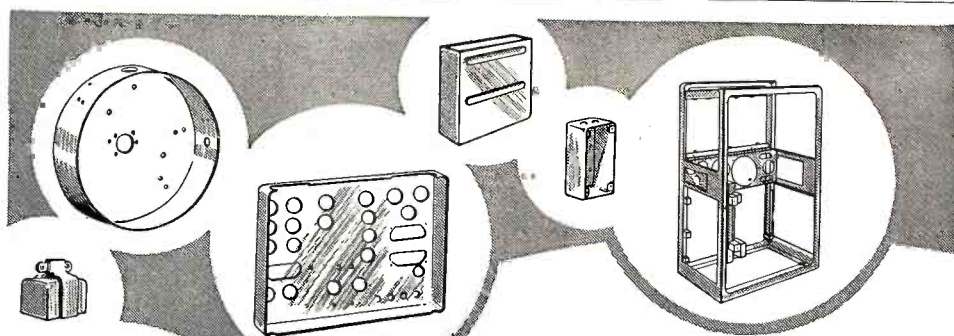

For the CRT industry, SUPERIOR offers a full range of mag-  
netic, electrostatic and color gun mounts including mounts for  
the 110° narrow neck tubes . . . all precision engineered.  
SUPERIOR makes a complete line of electrostatic focus and  
deflection guns for radar and industrial purposes including  
character and Vidicon-type mounts. You may order standard  
types or we will design and build to your specifications.

Whether your order be large or small, you will enjoy all the  
benefits of our rigid inspection, testing and control. For com-  
plete satisfaction based on dependable service, call or write to

**ULTRASONICS**

It is no longer news that ultrasonic activation of metal-cleaning fluids cuts time and costs to a fraction of old-fashioned methods, and does a better job at the same time.

**SONOGEN® Ultrasonic Generator Model APT-100-B (above)** is making news with the dramatic savings and improvements it is making in cleaning electronic parts such as: switches, relays, circuit-boards, vacuum-tube components, connectors, potentiometers and the like. It is just one of a series of Branson **SONOGEN®** cleaning units offering:

- Wide selection of equipments for small-scale or production cleaning of large and small parts . . .
- Maximum cleaning efficiency . . .
- Rugged, simple construction for long, trouble-free life . . .
- Advanced design evolved over a decade of industrial experience with ultrasonics . . .
- Modest investment, plus low operating and upkeep costs.

Literature gladly sent; We can be most helpful if you outline your problem.

# LEWIS

# WIRE PRODUCTS

## HIGH TEMPERATURE CABLE...

Suitable for operating temperatures up to 650° with nickel-clad copper conductor and laminated insulation having superior dielectric strength and moisture resistance. In AWG sizes 22 thru 4/0. In accordance with MIL-C-25038.

## ELECTRONIC HOOKUP WIRE...

Teflon insulated silver coated copper conductor with insulation in standard colors in accordance with MIL-C-16878.

## EXTRA FLEXIBLE CABLE...

High Temperature and Moisture Resistant Electrical Cable. Lewis "EXFLEX" Cable, single and multi-conductor, superior for circuits on hinged or pivoted parts. Resistant to abrasion and temperatures to 500°F.

## HEATING CABLE...

with nickel-chrome conductor and laminated insulation for operation at 500°F. extensively used by central stations to maintain proper temperatures in pipe lines exposed to wide variations in ambient temperature.

## GLASS & ASBESTOS INSULATED HEATING CABLE...

with stainless steel braided shield for special high temperature applications, used by atomic energy facilities.

## CUSTOM CONSTRUCTED CONTROL CABLES AND THERMOCOUPLE-WIRE CABLES...

with segregated circuits individually shielded, and with over-all shielding or with special shielding and jacketing.

## FIRE-RESISTANT AND HIGH TEMPERATURE RESISTANT CABLE...

for circuits required to operate in 2000°F. flame for fifteen minutes. Excellent for fire-detector circuits and for use in temperatures up to 600°F.

## THERMOCOUPLE WIRE AND EXTENSION WIRE...

in iron-constantan, copper-constantan and chromel-alumel to MIL specifications or in custom constructions. Twisted and shielded, cabled, shielded and jacketed. Multi-pair cables, shield and jacketed for missile applications.

## RESISTANCE ELEMENT AND UNITS...

Core-wound flexible heating element and units for low wattage appliances as heating-pads, sealers, curling-irons, toys, wire marking machines, etc. Insulations of asbestos or glass or in combinations of both.

By utilizing and combining the various qualities of fire, heat, abrasion and moisture resistance of asbestos, glass, silicones and Teflon\*, we have developed many special wires and cables for avionic and electronic applications. We invite inquiries for cables and wire constructed to customers' specifications for special applications.

# NEW MINIATURE

## 12-position Multipole Rotary Switch

- Small size — only 3/4 inch square.
- Light weight — one-half ounce.
- Versatile circuitry — contact arrangements from 1-pole 12-position, to 3-pole 4-position for a single deck.
- Ganged assembly — up to six decks can be combined for single-knob operation.
- Current-carrying capacity — capable of carrying 3 amperes without excessive temperature rise.
- Interrupting capacity — 0.5 amperes, non-inductive, at 125 volts 60 cps.
- Electrical life — 250,000 operations.
- Voltage rating — 125 volts a-c.

TYPE M-12  
ACTUAL SIZE

*Here is the switch  
that meets these  
specifications*

- Breakdown voltage — between live parts or to ground — over 1000 volts RMS at 60 cps.
- Insulation resistance — 1000 + megohms. All insulating parts meet specification MIL-P-3115B, MIL-P-15037B, or MIL-I-3190.

# Electrically-Variable INDUCTORS

Let our five years of design and manufacturing experience in this *exclusive* field work for you.

We maintain a line of stock units, the characteristics of which are fully described in our Catalogue #E 9/55 (available upon request) and which are usually on the shelf for same-day-as-order shipment.

From these types our customers can often determine the efficacy of the VARI-L inductor in their proposed circuits and then describe a tailor-made version to suit their exact needs.

*The custom-designed models we have recently produced include the following:*

**VHF** types — used at frequencies as high as 400 M.C. Significant new work in this region was in progress as this advertisement went to press.

**SUB-MINIATURE** types.

**FREQUENCY-MODULATOR** types — with near-zero-drift temperature compensation for center-frequency stability.

**MULTI-CONTROL** winding types — for combined A.F.C. and F.M. from the same inductor.

**OVENIZED** types — both inductors and complete low-drift oscillators.

**SYNTHESIZER** types — for adaptability to wide ranges of frequencies through the use of shunt and series coils.

**ECONOMY** types — with all "frills" removed, for commercial applications.

*Full details concerning these and other special VARI-L units will be gladly supplied. We urge you to put our knowledge of this art to work on your problem.*

## ELECTRONIC ENGINEERS NEED MORE BUSINESS INFORMATION

Two BUSINESS EDITIONS of ELECTRONICS, published on the 10th and 20th of each month, are providing business-minded electronic engineers with the marketing, topical and commercial information needed to keep abreast of today's complex electronic industry. The engineer who used to be concerned chiefly with designing a circuit or product now wants to know where and how it can be sold.

ELECTRONICS TECHNICAL EDITION, published on the 1st of each month, contains the same type of business information in "Industry Report" — one of the best read sections of the magazine.

Advertisers in ELECTRONICS can reach more than 46,000 paid subscribers against a background of technical editorial matter in . . .

the TECHNICAL EDITION  
(Published the 1st of each month)

or backed up by commercial  
editorial in . . .  
the BUSINESS EDITIONS

# 'DIAMOND H' RELAYS

## MINIATURE HERMETICALLY SEALED AIRCRAFT—MISSILE RELAYS

### Series R 4PDT (Form C)

Extremely wide range of performance characteristics at temperatures from  $-65^{\circ}\text{C}$  to  $+200^{\circ}\text{C}$ . Stable and resistant to vibration and impact. Ratings available up to 10 amperes at 120 VAC and  $26\frac{1}{2}$  VDC. Special ratings up to 400ma. at 350 VDC or down to millivolts and milliamperes are also available. Size: 1.6 cu. in., Weight: 4 oz. or less. Wide choice of mountings including ceramic plug-in sockets. Get Bulletin R 250 for further information.

### Series S 4PDT (Form C)

For use where reliability and long storage life are most essential. Reliably switches "Dry" circuits involving millivolts and microamperes. The coil itself is hermetically sealed within the hermetically sealed enclosure. The switch mechanism contains no organic matter; contact contamination is virtually eliminated. Get Bulletins S 260 and R 250 for further information.

## GENERAL PURPOSE AC or DC POWER RELAYS

### Series W 2PDT (Form Z)

These relays are designed for general purpose switching where small space and low cost are required in addition to dependability. Standard voltages are from 6 to 220 VAC or VDC. Contact ratings up to 25A resistive, 120 VAC—240 VAC, 1 H. P. 120 VAC, 2 H. P. 240 VAC, other ratings by specification. Unit measures  $1\frac{1}{2}'' \times 1\frac{1}{2}'' \times 1\frac{7}{8}''$ , weighs 10 oz. or less. Side stud, panel stud and plug-in socket mountings are standard, others are available on request. Ask for Bulletin W 75A.

Engineered specials: You can obtain variations from the above standard relays for your specific requirements. Send your specifications for recommendations and quotations. Call or write today. Ask about "Diamond H" switches and thermostats.

## eliminate the "BUGS" with Eastern aviation products

### PRESSURIZATION

Eastern pressurization units for airborne electronic equipment are available in many capacities to handle a broad range of requirements. Units consist of an air pump and motor assembly, pressure switch, check valve, tank valve, and terminal connectors. They meet government specifications and can be modified to your needs.

### COOLING UNITS

Hold temperatures to safe operating limits in liquid cooled electronic tubes or similar devices. By virtue of long experience and using standard component parts, Eastern can suit your specific needs at a minimum cost for equipment.

### REFRIGERATION-TYPE

Enable specified components to be held to fairly constant temperatures by use of various types of refrigeration units. Because of the variation in methods possible, Eastern units fill every requirement where the use of a refrigeration cycle is called for.

### AIRCRAFT PUMPS

Precision-built to rigid government specifications, a broad selection among Eastern pumps offers flexibility to your choice. Modifications can be made, or custom-made units designed to suit your project. Trim in size, light in weight, Eastern Aircraft Pumps give reliable long-term service.

# NEW!

DC to DC and DC to AC  
 solid-state power converters  
 voltage regulated, frequency  
 controlled, for missiles,  
 telemetering, gyros, servos

Interelectronics Inverter solid-state thyatron-like elements and magnetic components convert DC to any number of voltage regulated or controlled frequency AC or filtered DC outputs from 1 to 1800 watts. Light weight, compact, 90% or better conversion efficiency.

Ultra-reliable in operation, no moving parts, unharmed by shorting output or reversing input polarity. Complies with MIL specs for shock, acceleration, vibration, temperature, RF noise.

Now in use in major missiles, powering telemetering transmitters, radar beacons, electronic equipment. Single and polyphase AC output units now power airborne and marine missile-gyros, synchros, servos, magnetic amplifiers.

Interelectronics — first and most experienced in the DC input solid-state power supply field, produces its own solid-state gating elements, all magnetic components, has the most complete facilities and know-how—has designed and delivered more working KVA than any other firm!

For complete engineering data write Interelectronics today, or call LUdlow 4-6200 in N. Y.

- Reflector voltage**  
 —continuously variable from 25 to 875 volts  
 —regulation is better than 1%  
 —ripple is less than 5 milli-volts or better
- Square wave modulation**  
 —variable from 500-5000 cps  
 —amplitude variable 0-100 volts
- Modulators**—may be synchronized from external voltages  
**Power**—105/125 volts 50 to 60 cycles A.C., 150 watts
- Mechanical features**  
 — $8\frac{3}{4}$ " aluminum rack panel finished in light grey  
 —rugged steel cabinet finished in durable grey wrinkle  
 —Dimensions: Height 9", Width  $20\frac{1}{2}$ ", Depth 12"  
 —Weight 45 lbs.

## SWR Amplifier TAA-16B

- Extreme sensitivity**—5 microvolts for full scale deflection  
**Low noise**—equivalent to .025 microvolts at input  
**Bandwidth**—broadband or selective response, tunable from 500 to 5000 cycles  
**Illuminated  $4\frac{1}{2}$ " meter**—indicates VSWR, SWR, expressed in decibels, or bolometer current
- Step attenuator**  
 —permits reading of SWR up to 50 decibels  
 —VSWR 1 to 4 and 3 to 10 volts
- Inputs**  
 —dual selectable, will accommodate crystal or bolometer detectors  
 —protection against accidental burn out of crystals or bolometer
- Power requirements**—105/125 volts, 50/60 cycles, 70 watts
- Outputs**  
 —remote metering  
 —DC recorder
- Mechanical features**—standard  $8\frac{3}{4}$  x 10" rack panel  
 —supplied with rugged steel cabinet finished in durable grey wrinkle  
 —all connectors are BNC  
 —dimensions: Height 9", Width 20", Depth 12"  
 —Weight 35 lbs.

KEYSTONE precision crystals are engineered for strict adherence to the highest possible standards of accuracy, stability and ruggedness. Pressure or wire-mounted, fundamental or overtone types are available. ALL KEYSTONE crystals are made to the latest MIL specs, except where other tolerances are specified. Engineering consultation at either your plant or ours is available without obligation.

Which pin saves the money?

Made by Machining and drilling

Made by Stamping and forming

Made by Multi-Swage

## Choose right and make Big Savings on SMALL METAL PARTS

**COSTS HALVED!** Instead of turning and drilling parts like these from solid rod, or stamping and forming them, the BEAD CHAIN MULTI-SWAGE Process automatically swages them from flat stock. By doubling the production rate and eliminating scrap, this advanced process can save you as much as fifty percent of the cost of other methods.

The BEAD CHAIN MULTI-SWAGE Process produces a wide variety of hollow or solid metal parts—beaded, grooved, shouldered—from flat stock, tubing, rod, or wire—of any metal. Sizes to 1/4" dia. and 1 1/2" length.

**GET COST COMPARISON ON YOUR PARTS**—If you use small metal parts in quantities of about 100,000, don't overlook the almost certain savings of this high-speed, precision process. Send sketch, blueprint or sample part and our engineers will furnish facts about Multi-Swage economy. Or, write for Catalog. ## FILM

by **DILECTRIX**

### A UNIFORM "TEFLON" FILM FOR PRACTICAL ELECTRONIC APPLICATIONS

The unique electrical properties of "Teflon" has earned for it the title of "Ideal Dielectric." No other material exhibits equal performance in low dielectric absorption, high insulation resistance, low loss factor and low voltage de-rating factor in high temperature operation.

The Dilectrix Corporation presents these qualities in a Cast Film which in itself possesses unique physical properties. Using a highly polished metal substrate and "Teflon" in the smallest possible particle size available—unusually thin films are formed in a multiple dip casting process. Layer upon layer of sub-micron sized particles are completely fused together to build up films in thicknesses ranging from 0.00025" to 0.004".

### CAST Teflon FILMS

IN VARIATIONS TO FIT YOUR SPECIFIC APPLICATIONS

#### Type C-Clear

Available in thickness gauges of 0.00025", 0.000375", 0.0005", 0.001", 0.002", 0.003", 0.004".

#### Type C-Colored

Available in 0.002" thickness. Mil-104 colors — black, brown, blue, orange, yellow, violet, gray, green, red, white.

#### Type CSC-Clear

Available in 1.25 Mil and 2.25 Mil thicknesses. A unique combination of cured "Teflon" Film superimposed by a thin layer of semi-cured "Teflon" Film.

#### Type CSC-Colored

Available in 2.25 Mil film thickness, 10 colors ideally suited for high temperature wire insulation, readily fusible to itself.

#### Pressure Sensitive

Available in "Teflon" film thicknesses of 2.0 Mil, 3.0 Mil, and 4.0 Mil, a low temperature adhesive backed "Teflon" that sticks to almost anything in solid form.

#### Bondable

Available in thicknesses of 1.0 Mil, 2.0 Mil, and 3.0 Mil. These films are not chemically treated and yet one surface is highly receptive to adhesives of any type and may be strongly bonded to other materials.

\*Trademark du Pont "Teflon" tetrafluoroethylene resin

## ELECTRONIC DESIGNERS GO FIRST TO THE "GUIDE"

Wherever designers and specifiers have immediate need for readily accessible, necessary product information at their breadboards, there, year after year, will you find the ELECTRONICS BUYERS' GUIDE. "Who makes what product or provides what service?" "Where can I buy it?" "Where can I find complete and accurate product specs?" These are questions that are asked daily by the men who design-in electronic products; these are questions that have been answered for the past seventeen years by the "Guide," the accepted reference book of the industry.

Year after year, the designers of the industry have preferred the "Guide" for its *Simplicity of Style* (as easy to use as a telephone directory), for its *Accuracy* (the industry helps the Research Staff revise its listings every year) and its *Complete Product Specs* (advertisers have told their complete product stories in the "Guide" consistently).

*The key people of the industry—the buying influences—rely on the "Guide" for the answers to their product problems.*

★ the leader in quality

★ the leader in price

★ the leader in engineering

★ the leader in volume

★ the leader in design

Just a few short years ago, Iron Cores cost over 100% more than at the present time. This has been achieved by the creation of our line of ENGINEERED ECONOMY\* IRON CORES which enables us to reduce the amount of your minimum inventory through guaranteed immediate delivery service . . . this has been achieved by the new use of automation which enables us to cut costs and pass these savings on to you . . . this has been achieved by more efficient production methods, which reduce processing and material costs which again means savings to you.

Now, you can select from over  
19 types of ENGINEERED ECONOMY\*  
IRON CORES which do the job of over 100 types  
custom-made cores at stock prices. We invite your inquiry.  
Also, custom iron cores to your specifications.

CLASS  
**A**

**Electrical Insulating Paper**

Dielectric strength — 300 volts per mil  
Tensile strength — 13-16,000 lbs./sq. in.  
Density: 1.30-1.35  
Thicknesses from .004 to .030"  
100% rag stock paper  
No sizing or fillers used  
"Glazed roll" finish — others available  
Can be combined with other materials  
Available in rolls, sheets or coils

**Copalum**

CLASS  
**B**

**Electrical Insulating Material**

Meets all Class B requirements  
Dielectric strength — 600 volts per mil  
Tensile strength — 25,000 lbs./sq. in.  
Thicknesses from .010 to .025"  
An asbestos-glass laminate  
No delamination or fraying  
High impact strength and arc resistance  
Will take any electrical varnish

In Switchcraft products you get the benefit of creative engineering, latest designs, expert workmanship, and thorough inspection — your assurance of the most dependable and efficient components made today.

**JACKS**

**PHONE PLUGS**

FOR MILITARY AND INDUSTRIAL EQUIPMENT  
—MOST COMPLETE LINE

"LITTEL-JAX"—require minimum panel space—available in all common and many special circuits.

"SF-JAX"—short frame design—innumerable circuits.

"LF-JAX"—long frame design—all circuits.

"TINI-JAX"—sub-miniature.

THE LARGEST VARIETY OF STYLES,  
SIZES AND TYPES

"LITTEL-PLUG"—small—fits standard Jacks.

"LUG PLUG"—small—low cost.

"STANDARD"—conventional size heavy terminals—rugged design.

"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".

"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.

**TELEPHONE & MILITARY JACKS**

"T-JAX"—a conventional telephone switch-board design—all standard circuits and military specifications.

"M-JAX"—(illustrated) a heavy duty design used in heavy industrial equipment.

**"SHIELDED JAX"**

A unique modification of the "Littel-Jax". The shield is assembled into and made a part of the jack.

**"EXTENSION JAX"**

For cable extensions. Features "Switchcraft" clamp type terminal. 2 and 3 conductor circuits.

**"LEV-R-SWITCH"**

A lever action switch requires only single hole for mounting. Available in numerable circuits; various contact materials.

**"FF-SWITCH"**

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

**"TELEVER SWITCHES"**

Series 6000 Rugged telephone type; 3" depth behind panel. Welded cross bar Palladium contacts rated at 3 amps., 300 watts maximum, non-inductive A. C. load. Locking and non-locking types.

Series 16000 Same design as series 6000, features single hole mounting; Unique feature, "non-locking" type can easily be converted to "locking" by removing "stop plate".

**"LITTEL-SWITCH"**

Rugged yet small, a Push Button switch available in simple circuits; contacts to suit. Various colors of Buttons.

**"RS-SWITCH"**

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth. 2 or 3 position; locking or non-locking action.

**"MULTI-SWITCH"**

Features choice of switching functions. 1 to 37 stations possible. Single frame or ganged assemblies. Illuminated or non-illuminated buttons. Write for Bulletin 560.

**"TINI-SWITCH"**

Similar to "Littel-Switch" except sub-miniature design

**"JACK PANELS"**
