pt. 2

## FOREWORD

This edition of "Broadcasting Stations of the World" lists all known radio broadcasting and television stations except those in the continental United States of America on domestic channels. For convenient reference this publication is divided into four parts, as follows:

**PART I (Blue Cover):** Information is indexed alphabetically by COUNTRY and CITY. Within a city, stations are listed in ascending order of frequency. Other information includes call letters and/or station name, power, wavelength, frequency, status of frequency or transmitter and ownership.

**PART II (Green Cover):** Information is indexed according to FREQUENCY in ascending order.

**PART III (Maroon Cover):** This compilation is indexed first by CALL LETTERS and second by STATION NAME or SLOGAN.

**PART IV (Brown Cover):** Two sections, one for FREQUENCY MODULATION broadcasting stations and the other for TELEVISION stations, each separately indexed by country and city and by frequency, include the same elements of information as parts I and II plus additional data to distinguish audio, video, polarization, and other technical factors applying in their range of the spectrum.

The column headings covering all data listed in parts I, II, and III are defined as follows:

**COUNTRY:** The country, colony, mandate, protectorate or overseas territory in which the station is located.

**CITY:** The announced location of the station, relay stations excepted. It is usually the studio and administrative location, since transmitters are often located in outlying areas. For clarification of location in certain cases, old or alternate names, provinces, and in some cases transmitter sites, are included in a secondary position in the column.

**SYMBOLS:** See page III for explanation. Status denoted by symbols may change at any time after publication of this edition.

**CALL LETTERS:** Letters and/or numerals used for station identification purposes. Many countries do not assign call letters to broadcast services, hence the numerous omissions.

**SLOGAN:** The name applied to a station for identification purposes in lieu of or in addition to call letters. The station name has been reduced in some cases due to space limitations, but the essential elements or abbreviations thereof have been preserved.

**OWNERSHIP:** The entity, individual or corporate, in whose name the station is licensed and operated.

**POWER:** Stated in watts. The listed figures are usually authorized power of the transmitter, but in some cases of known deviation the actual operating power has been substituted. When two powers are listed, the figures represent the lower and upper limits of power where a station uses more than one transmitter on the frequency at different times (shortwave), or varies the power of the transmitter for day and night operation (mediumwave).

**WAVELENGTH:** Stated in meters.

**FREQUENCY:** Stated in kilocycles per second. Due to propagational conditions, interference by other stations, jamming, malfunction of trans-

mitter, reallocation of frequencies by a country or convention, or for some other reason, stations may use frequencies which are at variance with this publication.

**ADDITIONAL INFORMATION:** With numerous entries additional information has been included concerning future plans, programs carried, associated stations, network affiliations, etc.

**TIME CHART:** A table of summer, winter and standard time differences with respect to G.M.T. for each country is included in the back of Parts I and II.

This issue supersedes the edition dated 1 June 1957.

**FOREIGN BROADCAST INFORMATION SERVICE**

## SYMBOLS

- A alternate frequency
- C under construction
- D daytime operation
- E experimental
- F projected frequency change or addition
- I inactive
- J jumps frequency
- M mobile
- N nighttime operation
- O operates on special occasions only
- P projected (transmitter and frequency)
- R secondary relay station
- S seasonal
- T point-to-point telephone transmitter occasionally used for broadcast purposes
- U unverified information
- V variable frequency
- X no further details available
