WASHINGTON 25, D. C.

SIXTEENTH EDITION

PART IV

FREQUENCY MODULATION AND TELEVISION STATIONS

INFORMATION CORRECTED TO
1 APRIL 1960

Un 2986

1960

pt. 4

FOREWORD

This edition of "Broadcasting Stations of the World" lists all known radio broadcasting and television stations except those in the continental United States of America on domestic channels. For convenient reference this publication is divided into four parts, as follows:

PART I (Blue Cover): Information is indexed alphabetically by **COUNTRY** and **CITY**. Within a city, stations are listed in ascending order of frequency. Other information included is call letters and/or station name, power, wavelength, frequency, status of frequency or transmitter and ownership.

PART II (Green Cover): Information is indexed according to **FREQUENCY** in ascending order.

PART III (Maroon Cover): This compilation is indexed first by **CALL LETTERS** and second by **STATION NAME** or **SLOGAN**.

PART IV (Brown Cover): Two sections, one for **FREQUENCY MODULATION** broadcasting stations and the other for **TELEVISION** stations, each separately indexed by country and city and by frequency, include the same elements of information as parts I and II plus additional data to distinguish audio, video, polarization, and other technical factors applying in their range of the spectrum.

A table of summer, winter and standard time differences with respect to G.M.T. for each country is included in the back of Parts I and II.

This issue supersedes the edition dated 1 January 1959.

312760 Supp. 1960, pt. 4.

INDEX

Foreword	I
Index	III
Table of Symbols	v
Table of Television Channels	VII

FREQUENCY MODULATION STATIONS

Section A:

Introduction	
Indexed by Country and City	Pink
Indexed by Frequency	Green

TELEVISION STATIONS

Section B:

Introduction	
Indexed by Country and City	Yellow
Indexed by Frequency	Blue
Appendix (Table of Television Standards).	

SYMBOLS

A	alternate frequency
C	under construction
E	experimental
L	studio to transmitter link
P	projected (transmitter and frequency)
R	relay station
U	unverified information

SECTION A

FREQUENCY MODULATION STATIONS

The column headings covering all data listed in section A are defined as follows:

COUNTRY: The country, colony, mandate, protectorate or overseas territory in which the station is located.

CITY: The announced location of the station. It is usually the studio location, since most FM transmitters are placed upon the highest location in the area in order to obtain more widespread coverage. Wherever possible, the transmitter location follows the name of the city. In a few cases, the area where the transmitter is located is given on the third line of the entry.

SYMBOLS: Status denoted by symbols may change at any time after the publication date of this edition.

CALL LETTERS: The identification of a station in terms of letters of the alphabet and/or numerals, usually selected from block combinations allocated each country by international agreements. Numerous countries do not assign call letters to broadcast services, hence the omission of this information from a considerable number of entries. Many stations will be identified by the announcement of a station name which can be given in lieu of, but may be given in addition to, the call letters.

OWNERSHIP: The entity, individual or corporate, in whose name the station is licensed and operated.

POWER: Stated in watts. All entries which show an asterisk (*) reflect the effective radiated power (ERP) due to the station's antenna system. All other entries give the actual rated power of the transmitter.

FREQUENCY: Expressed in kilocycles per second. For various reasons, stations may, at times, utilize frequencies which are at variance with this publication.

ADDITIONAL INFORMATION: Certain entries will carry additional information on the third line concerning the programs carried.

SECTION B

TELEVISION STATIONS

The column headings covering all data listed in section B are defined as follows:

COUNTRY: The country, colony, mandate, protectorate or overseas territory in which the station is located.

CITY: The announced location of the station. It is usually the studio location, since most TV transmitters are situated upon the highest location in the area in order to obtain more widespread coverage. Wherever possible, the transmitter location follows the name of the city, or in certain cases, the second line of entry will show the area served by the transmitter.

CALL LETTERS: The identification of a station in terms of letters of the alphabet and/or numerals, usually selected from block combinations allocated each country by international agreement. Many countries which normally assign call letters to broadcast services have not required TV stations to broadcast or exhibit call letters. This accounts for the omission of this information from a considerable number of entries.

SLOGAN: The name announced by or applied to a station for identification purposes in lieu of or in addition to the call letters. The station name has been reduced in many cases due to space limitations, but the essential elements or abbreviations thereof have been preserved.

OWNERSHIP: The entity, individual or corporate, in whose name the station is licensed and operated.

SYMBOLS: Status denoted by symbols may change at any time after publication date of this edition.

MODULATION: Two systems of modulation are used to transmit the audio signal of the television stations, either frequency modulation (FM) or amplitude modulation (AM). All video transmissions are normally amplitude modulated.

POLARIZATION: Signals are horizontally polarized (HP) or are vertically polarized (VP). Polarization is usually selected according to the need for a reduction of interference with other stations, or to obtain engineering standards as required by the government of the country in which the station is located.

BAND WIDTH: Shown in kilocycles and represents the limits within which both the video and audio transmission are contained.

LINES: Expressed as the number of lines transmitted to form one complete frame or picture.

FRAMES: Stated as the number of times per second the picture area is completely scanned.

VIDEO POWER: All entries are stated in watts. The entries which show an asterisk (*) denote the effective radiated power (ERP) due to the station's antenna system. All other entries give the actual rated power of the transmitter.

AUDIO POWER: The same remarks apply as for the video power.

VIDEO FREQUENCY: Stated in kilocycles per second. The relationship between the quoted figure and the limits of the video band varies among countries and can be determined by reference to the standards of the systems used by the respective countries. See appendix for details.

AUDIO FREQUENCY: Stated in kilocycles per second. The relationship between the quoted figure and the limits of the audio band varies among countries and can be determined by reference to the standards of the systems used by the respective countries. See appendix for details.

APPENDIX

THE PRINCIPAL TELEVISION SYSTEMS OF THE WORLD

	405	525	¹ 625	² 625	819
Number of lines per picture.....	405	525	625	625	819
Video Bandwidth (in megacycles).....	3	4	5	6	10.4
Channel Width (in megacycles).....	5	6	7	8	14
Sound carrier relative to vision carrier (in megacycles).....	-3.5	+4.5	+5.5	+6.5	*11.15
Sound carrier relative to edge of channel (in megacycles).....	+0.25	-0.25	-0.25	-0.25	*0.10
Interlace.....	2/1	2/1	2/1	2/1	2/1
Line Frequency (cycles per sec.).....	10, 125	15, 750	15, 625	15, 625	20, 475
Field Frequency (cycles per sec.).....	50	60	50	50	50
Picture Frequency (cycles per sec.).....	25	30	25	25	25
Sense of vision modulation.....	(³)	(⁴)	(⁴)	(⁴)	(³)
Level of black as percentage of peak carrier.....	30	75	75	75	25
Sound modulation.....	AM	FM	FM	FM	AM

The system used by an individual country may be determined by locating the country under section B, and comparing the information listed under the Bandwidth-Lines-Frames column with data in the appendix.

¹ Characteristics as established by the International Radio Consultative Committee.

² Standards as established for use by the Soviet Union and countries following the Soviet pattern of television broadcasting.

³ Positive.

⁴ Negative.

* French standards invert the video and audio frequencies for certain channels.
