INTRODUCTION

This volume contains financial and operating data for the year 1946 compiled chiefly from annual reports filed with the Federal Communications Commission. Section A is compiled from the reports of telephone, wire-telegraph, ocean-cable, and radio-telegraph carriers, including reports submitted by the controlling companies of such carriers. Section B is based on the annual reports of standard broadcast stations and networks.

This is the eighth successive year that this publication has been issued, the initial issue being for the year 1939. Before 1939, some of the statistics were printed in the Commission's Annual Reports to Congress and some were released in mimeographed form.

For additional explanation of the coverage of the statistics the reader is referred to the statements introducing Sections A and B.

SECTION A

**Financial and Operating Data Relative to
Telephone, Wire-Telegraph, Ocean-Cable,
and Radiotelegraph Carriers and
Controlling Companies**

COMMON CARRIERS AND CONTROLLING COMPANIES

Only common carriers engaged in rendering interstate and foreign communication service are required to file annual and monthly reports with the Commission in accordance with the Communications Act of 1934. Virtually all wire-telegraph, ocean-cable, and radiotelegraph carriers are subject to the full jurisdiction of the Commission. A large number of telephone carriers, mostly rural lines engaged in intrastate service, are not fully subject to the Act, and are not required to file reports. A few of the larger intrastate telephone carriers, however, voluntarily file annual reports and a considerable number file monthly reports for statistical purposes. It is estimated that the telephone carriers reporting annually account for approximately 95% of the gross operating revenues of all telephone carriers in the United States.

Annual reports from common carriers. — The majority of the items of outstanding interest in the annual reports are shown in this publication in summary form and by individual companies. Detailed data are shown for telephone carriers having average annual operating revenues exceeding \$100,000, and for wire-telegraph, ocean-cable and radiotelegraph carriers having average annual operating revenues exceeding \$50,000. The smaller carriers submit less comprehensive reports, and only a limited amount of information is shown for them. Bell System figures are shown separately, inasmuch as the major portion of the telephone business in the United States is done by that group of companies. Certain intercompany duplications are eliminated in the tables so that the net results represent data for all large telephone companies filing annual reports with the Commission considered as one system.

Monthly reports from common carriers. -- A few tables showing operating data compiled from the monthly reports of common carriers are included in this volume. Telephone carriers having annual operating revenues exceeding \$250,000, and wire-telegraph, ocean-cable and radiotelegraph carriers having annual operating revenues exceeding \$50,000 file monthly reports with the Commission. In view of the fact that numerous intrastate telephone carriers file on a monthly but not on an annual basis, the cumulative monthly figures for telephone carriers are slightly larger than the figures shown for the carriers which file annual reports.

Companies controlling common carriers. -- Some selected financial items tabulated from the annual reports of holding companies are shown in this publication. The intercorporate relations between carriers engaged in rendering communication service and the controlling companies are also indicated. Holding companies filing annual reports with the Commission are classified into two groups, as follows: (a) Companies whose interest in common carriers constitutes a major portion of their assets, and (b) Companies whose interest in common carriers constitutes only a nominal portion of their assets.

Revisions in data presentation. -- To assist the user of the statistics various changes have been introduced in the present volume affecting the form and content of the tables. In addition, data are presented for the first time on the seasonally adjusted revenues of the wire-telegraph (page 146 table 41) and the telephone carriers (page 30 table 18).

Source: Annual reports filed with the Interstate Commerce Commission through 1933 and with the Federal Communications Commission beginning with 1934. In a few instances data from unofficial sources or estimates were used.

Note.--The difference in the number of carriers reporting to the Commission in 1946 in comparison with prior years is caused by mergers, consolidations, reclassifications, etc.

Data for 1926-1943 include information for carriers reporting as class A in 1943. These data also cover properties acquired previous to 1943 by such carriers. Carriers which reported as class A carriers in 1944, 1945 or 1946 but not in 1943 are reflected in the data for 1944-1946 only. Neither information for these companies nor for properties acquired by them previous to 1944 are included in the data for the years 1926-1943.

The effect of this change of definition is extremely slight. For example, operating revenues of class A carriers reporting in 1946 not so characterized in 1943 had operating revenues which were only 0.006 percent of total operating revenues reported.

1/ Includes carriers consolidated and merged for which annual report data are available; profits or losses on intercompany transfers of plant have not been eliminated.

2/ For amounts reflecting eliminations of intercompany duplications see table B.

3/ In comparing data in this table, consideration may be given to the minor effect of the revisions of the Uniform System of Accounts, effective January 1, 1933 and January 1, 1937, resulting in certain changes in and rearrangements of both the balance sheet and income statement.

4/ The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on only the respondent's portion of jointly owned wire was included.

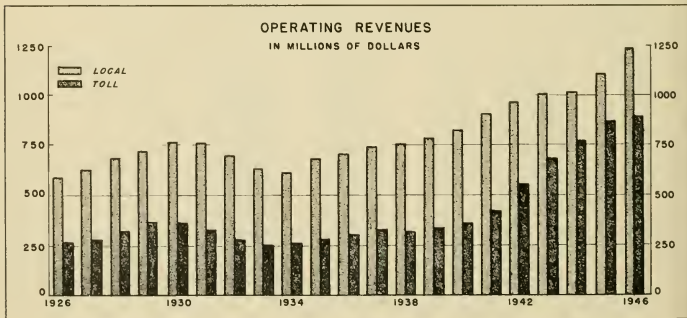

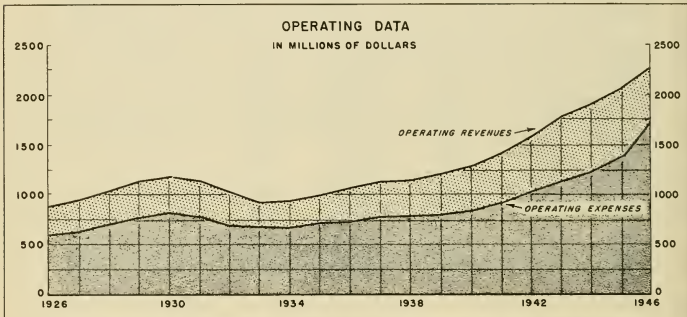

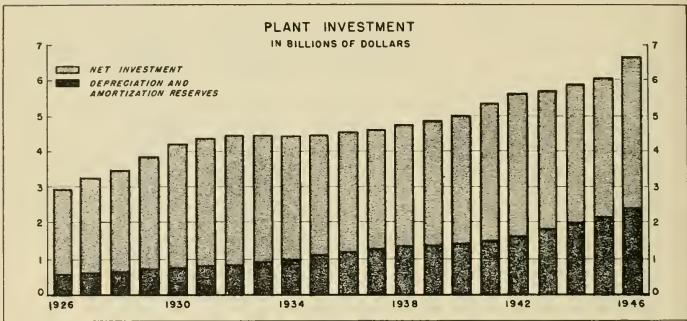

5/ Partly estimated.

6/ Data shown for years 1926-1932 include estimates.

7/ Represents total compensation for the year divided by the number of employees.

8/ Represents the number of employees et and of October.

Note.--The number of telephones shown represent business and residence telephones in the Exchange or Zone Area of 220 cities in the United States, 3 cities in Puerto Rico, and 1 in Hawaii, each of which had an estimated population of 50,000 or more within its Corporate Limits on January 1, 1947. Fourteen of the cities shown are located within the exchange or zone areas of larger cities and for that reason the number of telephones of these cities are included in the number shown for the larger cities.

Note: - Gross operating revenues and expenses are used in computing averages. They have been computed on the basis of 325 days to the year, which is the basis used by the Bureau of the Census in similar computations.
 1/ Excludes figures for American Telephone & Telegraph Company inasmuch as its operations are not confined to one geographical region, but are included in totals for the United States.
 2/ American Telephone & Telegraph Company handles long lines service only; has no exchange central offices.

Source: Based on monthly reports of carriers to Interstate Commerce Commission and Federal Communications Commission. The centered 12 - month moving average was calculated monthly from July 1929 through September 1946, and the ratio of the toll service revenues to the moving average were calculated. The ratios for a given month in all years were graduated by means of a linear relation with time. Certain specific months were omitted in determining the relations because of unusual historic events, e.g. October 1929 (market crash), September 1939 (invasion of Poland), and the like. The seasonal factors applied are the graduated values. The monthly revenues were seasonally adjusted by dividing them by these seasonal factors.

1/ The intercompany duplications with respect to securities, receivables, payables, and items of income and expense, except in minor instances, have been eliminated. In the elimination of intercompany security holdings, the difference between the aggregate book cost as reported by the carriers owning such securities and the reported aggregate par or stated value, including ascertainable discounts and premiums applicable thereto, has been applied as a net reduction of the combined surplus accounts of the carriers.

2/ "Bell System" represents the American Telephone & Telegraph Co. and all operating telephons companies having assets in excess of \$1,000,000 in which the American Company owns, directly or indirectly, securities representing more than 50% of the voting power.

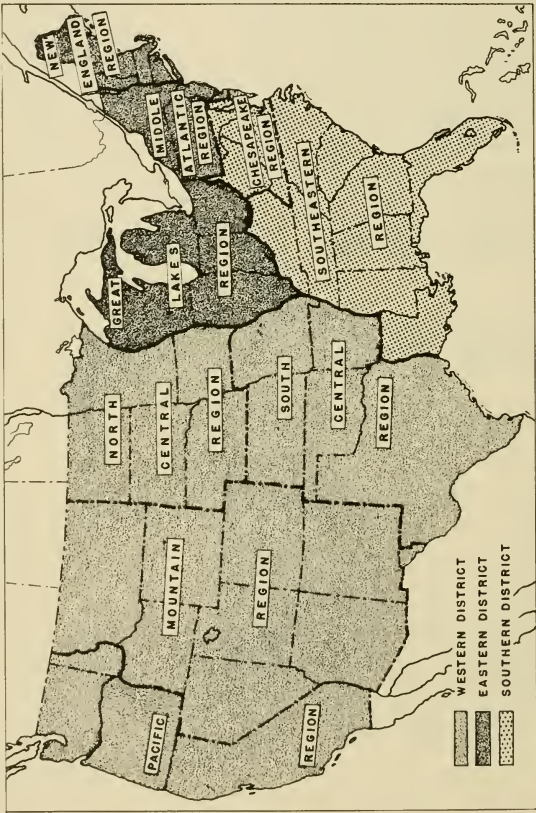

3/ Intercompany eliminations applicable to specific accounts not ascertainable from reports.

4/ To apply all rent revenues, approximately two-thirds of which are intercompany, against rent expenses, to show net rent expenses in first two columns of figures.

5/ Averages for all companies combined not computed.

6/ Partly estimated.

- () Deficit or other reverse item.
- 1/ Includes carriers consolidated or merged for which annual report data are available. Intercompany duplications have not been excluded.
- 2/ Reflects transfer of \$38,000,000 to depreciation reserve from surplus by Western Union Telegraph Co.
- 3/ In comparing data in this table with returns for prior years, consideration should be given to changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1943.
- 4/ Includes net book cost of plant of Postal Telegraph, Inc. acquired by the Western Union Telegraph Co. in the amount of \$16,754,143 on basis of gross book cost of \$69,320,179 less tentative allowances for depreciation of \$52,566,036.
- 5/ Not comparable with amounts reported for December 31, 1943 because of accounting adjustments for Postal Telegraph plant purchased by the Western Union Telegraph Co. October 7, 1943; comparable 1943 amounts are \$477,431,438 and \$221,701,458, for plant and depreciation allowance, respectively.
- 6/ Includes other long-term debt.
- 7/ Represents operating income before deduction of income taxes.
- 8/ Includes \$3,535,926 charged to capital surplus.
- 9/ Compiled from responses to Telegraph Division Order No. 12, annual reports, and correspondence. Represents principally data as estimated by reporting carriers on basis of actual count for test periods. Throughout the period stock and commercial news traffic (3,038,468 in 1946) and telephone toll messages (538,337 in 1946) are excluded. Domestic haul of mobile and foreign messages (9,656,149 in 1946) are excluded to avoid duplications.
- 10/ Data shown for years 1926 to 1933, inclusive, include estimates by reporting carriers. The average shown represent total compensation for the year divided by the number of employees.
- 11/ Represents the number of employees at end of October.

() Deficit or other reverse item.

1/ Data not available.

2/ In comparing data in this table, consideration should be given to the effect of changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1940.

3/ Includes other long-term debt beginning with the year 1940.

4/ Includes capital stock subscribed--unissued, amounting to \$282,500.

5/ Includes capital surplus beginning with the year 1940.

6/ The increase was due principally to adjustments made by Mackay Radio and Telegraphy Co. (California) and Mackay Radio and Telegraph Co. (Delaware) in connection with the reorganization of Postal Telegraph and Cable Corporation and The Associated Companies.

7/ Beginning with the year 1940, the figures shown are before deduction of income taxes.

8/ Includes \$3,600,000, \$300,000, and \$400,000 charged during the years 1933, 1934, and 1935, respectively, to surplus arising from reduction of capital stock.

9/ Includes \$150,000 and \$246,420 charged to capital surplus during the years 1940 and 1944, respectively.

10/ Includes data estimated by reporting carriers.

11/ Includes estimated data for the years 1926 to 1933, inclusive.

12/ Represents total compensation for the year divided by the number of employees.

13/ Represents the number of employees at end of October.

- 1/ Includes inular messages. International messages (primarily Canadian and Mexican) transmitted in accordance with carriers' rules governing domestic traffic are included under "Domestic" in table 31.
- 2/ The full-rate ordinary classification average per word is low compared with that for deferred rates because of the inclusion of a large volume of low rate traffic handled wholly within certain Latin American countries for which there are no comparable deferred rates.
- 3/ Includes \$113,262 revenue for which the words and messages are not available.
- 4/ Revenue amounting to \$113,262 has been deducted from the total in computing this average, as the words and messages in connection with the revenue are not available.

Source: Based on wire-telegraph transmission revenues reported monthly by Western Union and Postal Telegraph Companies to Interstate Commerce Commission and Federal Communications Commission. The daily average revenue was calculated monthly by dividing actual revenues by "number of business days" (which excludes Sundays, holidays and one-half of the Saturdays). The centered 12-month moving average of this daily average was calculated for each month from July 1929 through November 1945, and the ratios of the daily average to the moving average were calculated. The median of the ratios for a given month in all years was taken as the seasonal factor for that month, and the daily averages were seasonally adjusted by dividing them by these seasonal factors.

Note.--Principal telegraph, cable, and radiotelegraph carriers included herein are those having annual operating revenues exceeding \$50,000. Intercarrier duplications have not been excluded.

() Deficit or other reverse item.

1/ Balance sheet figures, with the exception of the plant and related reserves, are not segregated between the wire-telegraph and ocean-cable systems.

2/ No segregation of surplus between the wire-telegraph and ocean-cable systems of Western Union is reported so that the surplus in the column headed "Wire-Telegraph--Western Union Telegraph Co." represents the combined surplus. As a result the total liability side of the balance sheets for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, is \$16,952,157 less than the total asset side, the amount of the Western Union ocean-cable system net plant. Accordingly, the same amount is included in the total liability side but excluded from the total asset side of the balance sheet for the Western Union wire-telegraph system. The net income of the ocean-cable system of \$1,125,642 has been added to the net loss of the wire-telegraph system of \$10,030,010 to determine the balance sheet item of unappropriated surplus at the end of the year amounting to \$45,116,700.

The net income transferred to earned surplus for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, includes the \$1,125,642 net income of the Western Union ocean-cable system, but is not included in the unappropriated surplus at the end of the year.

3/ Includes accruals amounting to \$15,929,515 estimated retroactive wages from November 1943 to December 1946.

4/ Includes capital stock subscribed--unissued, amounting to \$282,500.

5/ Operating revenues and operating expenses are both overstated by intrasystem rents paid between the land-line and ocean-cable systems of Western Union amounting to \$399,324.

6/ Includes message revenue adjustments amounting to \$15,859.

7/ Represents nautical miles.

8/ Includes 24,209 nautical miles.

9/ Includes 413 nautical miles.

10/ Estimated on the basis of returns for the month of December 1946.

11/ Includes Territories and possessions of the United States except the Canal Zone.

12/ Represents principally data estimated by wire-telegraph and ocean-cable carriers on basis of actual count for test periods, and partially estimated by radiotelegraph carriers. Excludes domestic haul of radio messages by radiotelegraph carriers (1,468,417 messages and 67,991,494 words) to avoid duplication.

13/ International messages (primarily Canadian and Mexican) handled in accordance with carriers' rules governing domestic traffic are included under "Domestic service classification." Insular messages are included under "Foreign service classification."

14/ Includes domestic haul of cable and radio messages by Western Union (9,656,149 messages and \$6,770,758 revenue), also \$3,090,883 revenue from ticker service.

15/ Data not reported.

16/ Includes \$18,766 revenue from news service (scheduled transmission) for which the messages and words are not reported.

17/ Includes \$113,262 revenue for which the messages and words are not reported.

18/ Includes \$466,537 revenue from news service (scheduled transmission) for which the messages and words are not reported.

19/ Includes \$485,303 revenue from news service (scheduled transmission) for which the messages and words are not reported.

20/ Included in column headed "Wire-Telegraph--Western Union Telegraph Co." as relief and pension data are not segregated between land-line and ocean-cable systems of Western Union.

21/ Not segregated from the general fund of the system.

SECTION B

**Financial and Operating Data Relative to
Standard Broadcast Stations and Networks**

STANDARD BROADCAST STATIONS AND NETWORKS

Section B contains financial and employee data concerning the operations of 1025 standard (AM) broadcast stations, 4 nation-wide networks and 4 regional networks during the calendar year 1946.

Many revisions have been made in the content and presentation of the data this year in accordance with a general program to improve the usefulness of the statistics. Of particular note are tables presenting profitability ratios which are made available in the volume for the first time. Two ratios of profitability are used: The ratio of broadcast income (before Federal income tax) to depreciated cost of tangible broadcast property,^{1/} and the ratio of broadcast expenses to broadcast revenues. (See tables 28 and 30).

The following table indicates the number of existing licenses for stations and permits for new construction as of December 31, 1946:

Commercial broadcast stations included in summaries -----	1025
Noncommercial stations (not included in summaries)----- ^{2/}	35
Reports filed too late to be included in summaries-----	2
Construction permits for new stations (not included in summaries)-----	458
Total-----	1520

Geographical groupings. — The standard broadcast stations, which are included in the tabulations, have been grouped geographically into seven regions, as follows:

Northeastern region. — Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

Great Lakes region. — Illinois, Indiana, Kentucky, Michigan, Ohio, West Virginia, and Wisconsin.

Midwest region. — Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota,

Southeastern region. — Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia.

South Central region. — Oklahoma and Texas.

Mountain region. — Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.

Pacific region. — California, Oregon, and Washington.

^{1/} It should be noted that several hundred AM licensees received authorization during 1946 to construct frequency modulation (FM) stations. Since segregations between FM costs and AM costs were not made, the investment data for the year 1946 necessarily reflect such additional FM costs. Other financial data (such as revenues, expenses, etc.) reflect FM operations to a lesser degree since relatively few AM licensees started actual FM broadcasting during 1946.

^{2/} Includes 22 stations operated by educational institutions, 11 by religious groups, and 2 by other nonprofit organizations.

1/ Does not include the operations of 10 key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.
 Note: Stations identical as to class and time and serving as outlets for nation-wide networks for both years (but not necessarily the same network) are included in this comparison.

1/ Does not include the operations of 10 key stations of nation-wide networks as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

2/ Does not agree with region totals shown in State and region table as some of the metropolitan districts overlap two or more regions.

1/ Does not include the operations of the key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

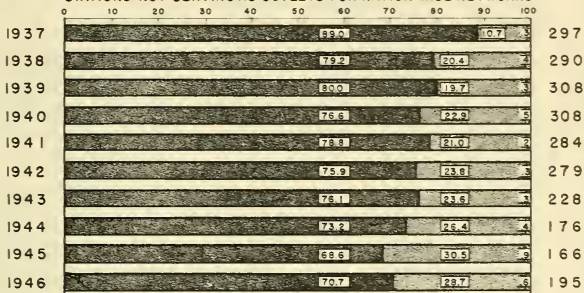

2/ Since licensees with total time sales of less than \$25,000 for the year were not required to report details, this item may include some amounts for network, and national and regional non-network business; however, the greater portion of the revenue for these stations is from time sold to local users.

2/ Does not include the property of 10 key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregations of property between station and network operations.

2/ The licensee of one station reported no owned broadcast property.

Note: Stations identical as to class and time and serving as outlets for nation-wide networks for both years (but not necessarily the same network) are included in this comparison.
