## Introduction

Welcome to BIA's *Investing in Radio® 2000 Market Report*. This is the premiere market-by-market investment information guide on the commercial radio industry. Based on an annual cycle, it is published quarterly after each of The Arbitron Company's ratings periods and profiles all 276 of its rated radio markets.

Of the 276 markets profiled in this publication and excluding Puerto Rico, 273 markets have 1999 gross market revenue estimates totalling **\$11.347** billion. The combined estimated population of all markets (excluding Puerto Rico) is **221.5** million which represents **81.0%** of the total U.S. population in 1998. Combined estimated 1998 retail sales for these markets are **\$2,283.8** billion which is **84.7%** of estimated total retail sales for the country. As of the end of December 1999, there were **4,794** commercial AM and **6,002** commercial FM stations licensed to operate in the U.S. Nearly **46%** of these stations (**1,724** AMs and **3,188** FMs) are profiled with revenue estimates in these markets (includes Puerto Rico). The average ratio of revenue to retail sales of the 273 markets with revenues for 1998 is **\$4.98** per \$1,000 retail sales. The average combined revenue per capita for 1998 is **\$51.38**.

## New in this Edition

With the Fall 1999 Arbitron ratings period, the market rankings were adjusted; one market was reinstated — Rochester, MN (229); and five new markets were added: Florence-Muscle Shoals, AL (240); Columbus-Starkville-West Point, MS (247); Mankato-New Ulm-St. Peter, MN (255); Mason City, IA (270); and Jonesboro, AR (271). In addition, the information in the above paragraph in **bold type** has been revised to reflect changes made to our data since the 1999 4th Edition.

## Market and Competitive Overviews

Each Arbitron-rated Market is presented in two main sections:

**Market Overview** — provides you with the vital statistics about an Arbitron Metro Survey Area's (MSA) overall financial and demographic health.

**Competitive Overview** — profiles the commercial radio stations in the Arbitron MSA that receive significant ratings in the market. In the case of MSAs which have too many stations to fit on a page, we are forced to go to four pages and split the AMs from the FMs and, in so doing, repeat the Market Overview for your ease of comparison.

**Why Market Rank Order?** Organizing the *Market Report* in this manner allows the sophisticated financial analyst the ease of performing comparable sales analyses and like-sized market comparisons. Otherwise, significant page flipping would be involved. At the very front of the book, behind the title page, you will find an alphabetical listing of the MSAs, followed by a rank listing.

## National Indices

Comparison of various market, owner and station factors with the entire country provides useful indicators of its potential. Below are several nationwide benchmarks:

### National Totals

|  |                     |
|--|---------------------|
| 1998 Population .....  | 273,537,800         |
| 1998 Retail Sales .....  | \$2,695,852,429,000 |
| 1999 BIA's Estimated Gross<br>Radio Advertising Revenues ..... | \$11,347,100,000    |

### National Growth Rates

|                                     | '93-'98 | '98-2003 |
|-------------------------------------|---------|----------|
| Population (POP) .....              | 1.1%    | 0.9%     |
| Households (HH) .....               | 1.2     | 1.1      |
| Retail Sales (RS) .....             | 5.3     | 4.5      |
| Effective Buying Income (EBI) ..... | 2.1     | 4.5      |

### 1998 National Income

|                         |          |
|-------------------------|----------|
| Per Capita .....        | \$16,895 |
| Median Household .....  | \$35,377 |
| Average Household ..... | \$45,504 |

### 1998 National Ethnic Breakdown

|                        |      |
|------------------------|------|
| Asian .....            | 3.9% |
| Black .....            | 12.8 |
| White .....            | 82.4 |
| Spanish-Speaking ..... | 11.5 |

### 1998 National Demographic Breakdown

|                | Men  | Women | Total |
|----------------|------|-------|-------|
| Under 12 ..... | 8.2% | 7.9%  | 16.1% |
| 12-17 .....    | 4.3  | 4.1   | 8.3   |
| 18-24 .....    | 4.7  | 4.5   | 9.1   |
| 25-34 .....    | 7.2  | 7.0   | 14.2  |
| 35-44 .....    | 8.1  | 8.2   | 16.3  |
| 45-54 .....    | 6.8  | 7.0   | 13.8  |
| Over 55 .....  | 9.7  | 12.5  | 22.2  |

### SPECIAL NOTE FOR PUERTO RICO MARKET

Beginning with the 4th edition 1998 of the *Investing in Radio Market Report*, BIA ceased using the audience estimates and demographic information supplied by Asesores, Inc. Also beginning with 1st Edition 1999, audience share data is now supplied by The Arbitron Company. Some demographic information for Puerto Rico is provided by the Puerto Rico Planning Board. BIA has estimated some projected demographic figures using historic growth rates.

**Every effort has been made to ensure the accuracy of the information in this publication. However, any errors detected or called to our attention, which in our opinion are material, will be corrected in future releases.**

# Market Overview

## 1 Geographic Information

**Metro Rank:** The ranking of the market by size of population based on the U.S. census.

**Revenue Rank:** The ranking of the market by BIA's estimate of 1999 market gross radio advertising revenues.

**Market Map:** A geographic orientation of the region with the actual market highlighted in white. These maps were created using MapInfo®. ◆ = Market City. ▼ = Cities with licensed commercial radio stations. ● = Cities with populations greater than 50,000, but no licensed radio stations (included for geographic location purposes).

**Metro Counties / Population:** A listing of the counties that comprise the subject radio market along with its 1998 population (presented in thousands or 000s), licensed from Market Statistics, Inc..

## 2 Market Radio Financials

**Estimated Historic, Present and Projected Revenues:** These are BIA's estimates of the gross advertising revenues (presented in thousands [\$000s]) for this market for the period 1993 to 2003. The revenue estimates represent total time sales including local, regional and national spot sales, plus political. They do not include trade and barter, production or promotional revenues.

Gross revenue estimates are based on several factors including retail sales growth, historical revenue trends, market development, new station entries and regional trends. BIA's direct consultation with and survey responses from station operators and group owners in most markets yield additional data.

**Historic and Projected Growth Rates:** We have also included the compound average annual rate for the periods indicated: Historically for the last five years (△ 93-98); Last year (△ 98-98); and projected for the next five years (△ 99-03).

★★★ **Confidence Rating:** These stars indicate BIA's confidence level for the estimated revenues. Three stars are awarded for a high level of confidence (several reliable outside sources); two stars for moderate confidence (limited outside sources); and one star for cautious confidence (estimated with our own resources).

**Ratios:** Radio market revenue to retail sales and revenue per capita are presented for three periods—historic, present and projected.

**Estimated Revenue Breakout:** Percentage of the market's revenues that are derived locally and from national billing.

## 3 Demographic and Economic Overview

This overview examines historical and projected growth trends for the following four indicators. The growth rate is the compound average annual rate for the periods indicated. For comparison of each market's growth rates with the entire country, see the tables on page 6. This information is licensed from Market Statistics, Inc. and is reprinted herein with their permission.

**MSA Population:** Presented in thousands (000s) of people.

**MSA Households (HH):** Presented in thousands (000s) of households.

**MSA Retail Sales (RS):** Presented in hundreds of thousands (\$000,000s) of dollars.

**MSA Effective Buying Income (EBI):** After tax disposable income available in the market. Presented in hundreds of thousands (\$000,000s) of dollars.

## 4 Demographic Breakdown

This breakdown summarizes the population dispersion by age and gender; after-tax per capita, median household and average household incomes for the market in 1998 as well as ethnic populations. For comparison of each market's growth rates with the entire country, see the tables on page 6.

**NOTE: Hispanic** is defined by The Arbitron Ratings Company as being of Hispanic origin or decent. Percentages for Hispanic should **not** be added to the other three percentages as Hispanic is included in all of the ethnic categories.

**NOTE: Median Income** in markets where the geographic definition differs from that of the Standard Metropolitan Statistical Area (SMSA) is calculated as a weighted average of each county's median income figure.

**NOTE:** The Demographic Breakdown data and the Demographic and Economic Overview data discussed above are for the **Radio Metro** as defined by The Arbitron Ratings Company for the most recent survey period. Arbitron market ranking is based on the estimated 12+ population (i.e. the number of persons age 12 and older in the metro counties). As the geographic definition of the metro changes, the data are adjusted accordingly. Further, all data from 1993 are readjusted as well so that data from 1993, 1998 and 2003 represent the identical geography.

## 5 Market Summary

This last section of the Market Overview summarizes the aggregate stations in the market by the following categories by: 1) **FCC Class** of FM Stations; 2) **Viable FMs:** those stations with significant ratings which we determine are serious competitors in the market; 3) **All AMs;** 4) **All FMs;** and 5) **Total** number of commercial radio stations in the market.

**Tot 12+:** The total Arbitron 12+ Average Quarter Hour (AQH) metro shares.

**Avg 12+:** The average Arbitron 12+ AQH metro shares is calculated by dividing the total shares in each category by the number of stations in that category.

**Tot LCS:** The total Local Commercial Share (LCS) adjusts for lost listening (LL) to non-commercial stations and stations not home to the market. The LCS is calculated by dividing the 12+ share by the sum of the commercial station shares in the market.

**Avg LCS:** The average Local Commercial Share per station = total LCS divided by number of stations in each class.

**12** Some stations also rated in Lincoln.

See introduction section for interpretation of revenue estimates

# Competitive Overview

## 6 Technical Attributes

Technical information is secured from the FCC through Actions and filings for construction permits.

“•”: A bullet to the left of the station’s listing indicates that there has been a change to this station since the last edition was printed. It could be any combination of new call sign, technical upgrade, different format, new LMA or change in ownership.

**Call Letters:** Listed in order of frequency, these are the licensed call letters of the commercial radio stations either licensed to the market or those stations belonging to other markets which receive significant ratings in the market.

**City of License:** The city from which the radio station is licensed to operate as designated by the FCC.

**FCC Class:** The technical allocation of the facility as defined by the FCC.

**Frequency:** The number of cycles the station’s signal is transmitted per second in kHz.

**Power (Day or Night):** The power in kilowatts at which the station transmits its signal. A “cp” indicated next to the station’s power signifies that a construction permit has been filed for approval with the FCC to change the station’s technical operations.

**HAAT:** Height above average terrain of the station’s center of radiation (antenna) with respect to its surrounding terrain in feet.

**C:** By matching the letters indicated in this column you will see the stations in the market that operate together as a “combo.”

## 7 Ownership

Ownership changes and information are gleaned from announcements in the trade publications, press releases, market contacts, FCC filings and other sources.

**Owner:** The most recent owner or proposed purchaser of the station. A proposed purchaser is indicated by a “p” next to the Sales Price (see Keys & Codes, Page 13).

**Year Started:** The year the station first went on the air.

**Date Acq’d:** The date (Year Month) the station was acquired by the most recent or proposed purchaser.

**Sales Price:** Presented in thousands, this is the price paid for the station. To the right of the price you may encounter a code that signifies the type of transaction. (See Keys & Codes, Page 13.) NOTE: Because the actual sales price of a station or group may vary from the reported price, caution should be exercised with respect to the use of these data. We have attempted to include the most recent ownership transfer activity from 1981 to a point approximately 2 weeks prior to publication. If a sale was proposed but not approved 2 weeks prior to publication, the owner listed is the proposed purchaser. Due to the complexity of the issue, major group purchase prices are not broken out among the stations purchased.

**LMA:** Local Marketing Agreement. The letter indicated in this column coincides with the other stations in the market that operate with this one under such an agreement.

## 8 Format

The format is the specific type of programming aired by the station. Format information is based on announcements in trade publications and direct contact with the stations through frequent telephone surveys and annual mail surveys. For a list of formats and the abbreviations used by BIA, see Formats for Radio Stations on Page 14.

## 9 Estimated Station Revenues

In an effort to improve the quality of this publication, we estimate gross revenues for the leading stations in most markets. BIA’s revenue estimates do not include trade/barter, production or promotion revenues. We utilize direct mail surveys, telemarketing, market contacts and computer modeling to generate these estimates. Despite this effort, we must reiterate that these are **just estimates**. We view these estimates, however, as an important element to the book and encourage station operators and owners to participate in our surveys.

## 10 Power Ratio

In addition to station revenue estimates, we have also calculated power ratios for those stations. This was calculated by determining the estimated revenue share for the station (station revenues divided by market revenues) and dividing this by the local commercial share. See #11 below for explanation on calculation of Local Commercial Share (LCS).

## 11 Arbitron Ratings

BIA is licensed by The Arbitron Ratings Company to provide its Total Day, Average Quarter Hour (AQH) shares for persons 12 years and older. We profile the last eight ratings periods to enable the reader to analyze trends in a station’s performance. You will notice that Arbitron rates some markets 4 times per year and others only 2 times.

**LCS:** The Local Commercial Share is the average share for the prior 12-month period (beginning the previous Fall through the subsequent Summer ratings period) adjusted for lost listening to out-of-market and non-commercial stations. This is calculated by dividing the 12+ share by the total commercial station shares in the market.

## 12 Other Market Information

**Top of the page:** Under the Metro Rank in the top right corner, we list for your reference, the **other markets** in which some of the stations of the subject market may also be rated.

**Bottom of the page:** Any new allocations through either **Docket 80-90** or other FCC rulemaking are listed at the bottom of the page. Also, in some instances, AM stations which are not part of a combo and have not received ratings for several periods will be listed by Calls only by the heading “**Other AM Stations.**”

**NOTE: SEE COPYRIGHTS FOR SPECIAL NOTE ON PUERTO RICO MARKET**

# Keys and Codes

## General

|              |   |
|--------------|---|
| <b>cp</b>    | A “cp” following the Power column indicates that the station has a construction permit to change frequency, power, or its antenna height to upgrade its technical facilities. The station is also authorized to operate at the indicated power or height for testing purposes.                        |
| <b>EBI</b>   | Effective Buying Income   |
| <b>HAAT</b>  | Height Above Average Terrain for the transmitter antenna  |
| <b>LCS</b>   | Local Commercial (Audience) Share - Adjusts for lost listening to non-commercial and out-of-market stations. Calculated by dividing the station share by the sum of shares of all commercial stations in the market over four periods (i.e., previous Fall through subsequent Summer ratings period). |
| <b>LMA</b>   | Local Marketing Agreement   |
| <b>MSA</b>   | Metro Survey Area   |
| <b>Power</b> | Comparison of revenue share to audience share. Calculated by dividing the station revenue by market revenue; then dividing the result by the  |
| <b>Ratio</b> | local commercial share (LCS).   |

## Codes under “C” in header

The letter codes under the “C” heading indicate a combo or duopoly. All AM and FM stations with the same owner will have the same letter code.

## Codes under “LMA” header

The numeric codes under the “LMA” heading indicate which stations are operating under an LMA.

## Codes for Sales Price

|           |   |
|-----------|---|
| <b>ac</b> | Combo sale in adjacent market   |
| <b>al</b> | Station sold for assumption of liabilities  |
| <b>cp</b> | Sale of construction permit for unbuilt station.  |
| <b>c#</b> | AM/FM combo sale. The combo price is listed with the FM station. The number following the “c” identifies the AM/FM combo involved. The AM and FM station will have the same number following the “c”. |
| <b>d#</b> | Duopoly sale of two or more stations in the same service, either two FM’s or two AM’s.  |
| <b>d</b>  | Distress sale   |
| <b>dn</b> | Donation  |
| <b>e</b>  | Estimated sales price   |
| <b>g</b>  | Group sale. If a combo is involved, a number following the “g” will indicate the combo in that market. The AM and FM station will have the same number following the “g”.                             |
| <b>na</b> | No price available  |
| <b>nc</b> | No cash consideration   |
| <b>p</b>  | Proposed sale   |
| <b>st</b> | Transfer of stock or partnership interest   |
| <b>sw</b> | Station swap  |
| <b>+</b>  | Plus additional considerations, (e.g., assumption of debt)  |

## Formats for Radio Stations

Because some radio stations air multiple formats, abbreviations are often used for formats in the Competitive Overview section. These abbreviations may appear by themselves or combined with other format abbreviations. The abbreviations, their expansions, and the major format categories in which BIA classifies these formats are listed in the following table:

| Abbreviation | Short Abbrev. | Full Format Name | Major Format Category            | Abbreviation | Short Abbrev. | Full Format Name       | Major Format Category            |
|--------------|---------------|------------------|----------------------------------|--------------|---------------|------------------------|----------------------------------|
| 70&80        | 7&8           | 70s & 80s        | Oldies                           | CCtmp        | CCt           | Christian Contemporary | Religion                         |
| 70Hts        | 7Ht           | 70s Hits         | Oldies                           | CHR          | CHR           | CHR                    | Contemporary Hit Radio/Top 40    |
| 70sOd        | 70s           | 70s Oldies       | Oldies                           | Chrst        | Cst           | Christian              | Religion                         |
| 80Hts        | 8Ht           | 80s Hits         | Adult Contemporary               | CIHts        | CHt           | Classic Hits           | Rock                             |
