M Street

The Journal

Each week the M Street Journal tracks over 500 changes. We keep on top of the latest developments in program formats, network affiliations, station trading, duopolies, LMAs, facility modifications, station start-ups, translators, call letters, construction permits, allocations, programs and products, industry news and the latest from Washington (FCC and regulatory related news).

The Directory

You are holding it right now. The M Street Radio Directory lists the addresses, phone numbers, formats, facilities, owners, managers, personnel, and ratings for all stations in the U.S. and Canada. The annual directory summarizes a year's worth of M Street Journal station information.

The Database

M Street's data services are simply the best in the business. We provide custom mailing labels, reports and databases that enable you to reach the multi-billion dollar radio industry. By sorting our data by station format, market size or dozens of other criteria we can create packages that meet your specific needs. Our turnaround is remarkably fast too, custom orders are in your hands within one week.

How did you keep track of the thousands of changes to phone and fax numbers, addresses, owners, formats, call letters, and personnel last year?

We used over 200 stringers and reporters...made thousands of phone calls...drove through hundreds of markets...poured over several tons of FCC filings....

Whew!

Where'd you find the time?

Today there are over **13,000 radio**
stations in the U.S. and Canada and more than
30,000 General Managers,
Program Directors and Sales Managers.

Guess what...

They **moved** yesterday,
changed jobs this morning,
flipped formats two days agos,
added a new satellite service,
applied for new calls
and...just started an LMA.
