RADIO'S JOURNAL OF RECORD

May 2, 2001

Serving Radio Since 1984

Vol. 18 Issue. 17

## Is it risky to quit streaming?

MeasureCast's latest study says overall Internet listening grew 2.4% in its latest survey – in the face of hundreds of radio stations pulling their audio streams because of the twin fears of performance royalties and AFTRA talent fees. Computer users are still tuning in – they're just spending time with substitutes. Over at Arbitron Webcast Ratings, Bill Rose says "Streaming is the thing listeners most

expect when they visit websites. All the research shows that." He claims the current standoffs are "a bump in the road" that may even speed the maturation of audio streaming. But if former streamers don't get back onto the web – are they running the risk that fickle listeners will get hooked by Internet-only stations? For now, most of the early streamers – like ABC and Clear Channel – are still silent.

## The crystal ball is cloudy.

Even the experts can't divine much "visibility" in their crystal balls, much less a recovery in national advertising. Interep's Ralph Guild tells M Street "I don't see any signs there will be a dramatic comeback" to produce a big second-half rally. The NAB's Eddie Fritts proclaims it "the most difficult advertising market since the late '80s and early '90s." Clear Channel, Hispanic Broadcasting, Regent and others are being very shy about prognosticating into the second part of 2001.

There are two pieces of good news: #1, First Union analyst James Boyle says the "comps" or comparable year-earlier figures, get much better for radio in Q3 and Q4. #2, The ad slowdown isn't universal. We've talked to market managers in the midwest who sound downright cheerful.

The problem markets tend to be the larger markets, and especially those along the East coast. Interep's Ralph Guild says one small-market group "is having a hell of a year nationally", because they're not exposed to the big-market blues.

TECHNICAL RECORD	7-14
TRANSACTION BRIEF	15

## DAB may be around the corner.

Eleven years after the Boston NAB Radio Show, where DAB looked like The Next Thing, we saw signs at the NAB Spring show in Las Vegas that Digital Audio Broadcasting is gathering real momentum, both at the regulatory level (where Harris expects the FCC to start considering a DAB standard later this year), and the technological level (iBiquity Digital

ran some strong demonstrations on the exhibit floor). Harris committed to building DAB transmitters, and Impulse Radio talks about giving broadcasters a new revenue stream from piggybacking wireless data. The NAB says attendance at this year's show was about 112,000 – not a record, but a solid showing.

**BMI® Introduces**

## NEW digital tools & services for radio stations

**Electronic Music Reporting**  
Internet-based per-program service that eliminates use of paper logs.

**Radio Select**  
Automated per program monthly music reporting via the Internet.

Call 1-800-258-5813 for more information or visit us at [bmi.com](http://bmi.com)

**BMI®**  
For the Power of Music®

**The Bush FCC is shaping up** – very slowly. New Chairman Michael Powell did earn strong reviews from his first “Chairman’s Breakfast” interview in Las Vegas with Sam Donaldson. He looks businesslike, market-friendly, but firm about abiding by the FCC’s rules. Some rules he’ll be changing as soon as he can, we predict (the newspaper-broadcast cross-ownership ban). And Powell did earn a strong endorsement from the Bush White House, in the form of a nomination for a second full 5-year term that should keep him at The Portals through June 2007.

**Seven-year FCC Commissioner Susan Ness will pack up by June 1.** Seven years is a very long tour of duty by today’s standards — partly because Senate Commerce Committee Chairman John McCain doesn’t think any Commissioner should serve more than a single 5-year term. Michael Copps will eventually take Ness’ Democratic seat on the FCC — though Bush still hasn’t sent the necessary nomination papers to McCain’s committee for Copps, or the two Republican appointees. Still no exit plans announced by the FCC’s other departing Democrat, Gloria Tristani.

**FCC Chairman Powell will finally get a 2-1 Republican majority when Ness goes.** We haven’t heard Tristani’s position on newspaper-broadcasting cross-ownership. But it may not matter in the final tally, with Republicans Powell and Harold Furchtgott-Roth voting.

**Cross-ownership ban on newspaper-broadcast will be on the FCC’s May 10th agenda.** Speaking on an NAB panel, Mass Media Bureau Chief Roy Stewart says in the 26 years since the ban was instituted “the world has changed and there are many more voices” in the media. Brokers tell M Street that they’re expecting a new cadre of potential radio buyers to surface very quickly: family-owned media companies with deep roots in local and regional

newspapers. Of course, we could also see the larger newspaper chains get interested in radio – M Street’s even heard speculation about Gannett returning to radio.

**The NAB may have taken some hits on membership** — but Las Vegas was a sellout. Every square foot of the vast exhibit floor is revenue for the NAB. Las Vegas pays for a lot of bills at the NAB, even if Viacom/Infinity, NBC and Fox have pulled their memberships, and Disney/ABC continues to respectfully disagree with the TV Board’s position on ownership caps.

There seemed to be fewer non-engineering radio managers in Las Vegas, but (as one vendor noted) “good quality.” In the mid-1990s the NAB moved the Crystal Awards for Community Service out of the Fall Radio Show to the Spring Las Vegas show, to encourage attendance by radio in Vegas. It’s hard to tell if that strategy has boosted attendance.

JOURNAL  
EVERY WEEK

[www.mstreet.net](http://www.mstreet.net)

**"Census" – It's every Hispanic GM's favorite word.** Arbitron will begin filtering in the new 2000 U.S. Census data effective with the Fall 2001 book, and that's going to change the perspective of many operators and media buyers. The Census showed an average 13% jump in the number of Hispanics in the U.S. since 1990, and some markets are going to be very surprised. Speaking of Spanish, Arbitron's going to be asking an important new question of diarykeepers beginning with the Winter 2002 survey — doing what researchers call "language enumeration" during the placement interview. M Street was checking out rumors that Arbitron's decided to go to "language weighting" — making sure the in-tab sample conforms to the population, and weighting the sample up or down to fit. That would be a big methodological change, and Arbitron says it hasn't made any decisions on weighting.

**With hundreds of new Low Power FM's being created, finding the call letters you want has gotten harder.** The first batch of 25 granted CP's is just the start, and we're sure the Good News Church of Augusta, GA will start looking for Good Call Letters. Some broadcasters have already found that the U.S. Coast Guard owns call signs they'd like to have (that happened to Cox in Houston last year). Now a desired set of calls may belong to a

Calvary Chapel Church and its new 100-watt LPFM.

**Mel Karmazin always says "they can't put cable into the car",** to explain why radio is such a great mobile medium. Well, they can't put cable in yet — but GM-owned OnStar will be able to deliver audio content from the Wall Street Journal and Dow Jones (for a fee). And we believe that's only scratching the surface of the telematics-delivered information that drivers will have to choose from in the next few years. And the Dow features offered by OnStar will be available hands-free — by voice commands.

**Adult standards is in for tough sledding:** Crawford bumped it to a lesser facility in the Denver market, Clear Channel's WGAY (1260) is gone from the D.C. market, and New York's WQEW is still merrily running Radio Disney instead of Frank Sinatra and Ella Fitzgerald, with no replacement in sight. We're not saying the format is disappearing, but like classical music, it's often being shuttled onto less-available facilities. Non-coms have stepped up to claim classical in some markets (like Denver), but adult standards may have a more difficult time finding a new home in some places. We expect the satellite services (Sirius and XM) will try to capitalize on the lack of availability of formats like

classical and adult standards. All the Sinatra you want — for \$9.95 a month.

**Klotz Digital buys audio mixer Graham-Patten,** as one of the engineering-related deals announced at NAB 2001. This one brings Klotz Digital the manufacturer of the Emmy-winning D/ESAM digital edit suite mixer.

**Harris acquires European digital transmitter-maker Hirschmann MCN.** That positions Harris to service the European-standard digital radio and TV market — which Harris estimates will top \$1 billion in sales over the next 10 years. Hirschmann MCN is a division of Hirschmann Austria.

**No Marconis for Infinity stations this year.** It's just begun hitting some Infinity managers that Viacom's pullout from the NAB means they're no longer eligible to compete in the Marconi best-of competition, where the winners will be announced at the NAB Radio Show in New Orleans. Only NAB members can vote for the annual Marconis, and only NAB member stations can receive the award. Last year's Marconi winners included several Infinity stations, and WOMC, Detroit hauled home two Marconis.

## New Station Applications

\*=non-commercial station, &=reapplication, +=competes with existing application

The following parties have applied to construct new stations with the facilities noted, licensed to serve the communities noted.

State	Frequency	City	Facilities	Applicant
PA	new-88.7*	Wrightsville	250 w 551 ft	Mary V. Harris Foundation
NV	new-550	Reno	no facils given	Pamplin Broadcasting, Inc.

## Translators/Boosters/Synchronous Transmitter: Applications

The following facilities have been proposed to rebroadcast existing stations, either by a low-power FM facility on a different channel (a "translator"), by means of a second "fill-in" transmitter constructed by the licensee on its assigned channel within its own protected contours (a "booster") or by an AM station constructing a second transmitter to extend its reach within its protected contour (a "synchronous" transmitter).

State	Frequency	City	Station	Applicant
CO	new-95.5	West Glenwood	KRVG	Western Slope Communications
UT	new-105.1	Provo	KMXU	Sanpete County Broadcasting Corp.

## Construction Permit Activity

\*=non-commercial station, &=reapplication, +=competes with existing application.

State	Station	City	Activity
AL	WQZZ-FM-104.3	Eutaw	increases to 4700 w
AR	KHBM-FM-93.7	Monticello	downgrades to class A from class C3, decreases to 5500 w, 341 ft, changes xmtr location to 33.36.18 91.47.14
AZ	KJKI(CP)-98.9	Leupp	license to cover for new station
	KWKM-FM-95.7	St. Johns	decreases to 1,193 ft
CA	KCEA-FM-89.1*	Atherton	changes to 128 ft, changes xmtr location to 37.29.32 122.16.28
	KSLG(CP)-FM-94.1	Hydesville	decreases to 4500 w, 1,785 ft
	KBHH(CP)-FM-95.3	Kerman	license to cover for new station
	KJSN-FM-102.3	Modesto	increases to 6000 w, re-describes xmtr location as 37.40.50 120.55.26
CO	KASF-FM-90.9*	Alamosa	changes to 1100 w, 89 ft
FL	WPBZ-FM-103.1	Indiantown	upgrades to class C1 from class C2, increases to 90000 w, 974 ft
GU	KOKU-FM-100.3	Agana	upgrades to class C1 from class C2, increases to 50000 w, 541 ft, changes xmtr location to 13.29.17 144.49.35E
KS	KUDL-FM-98.1	Kansas City	built new auxiliary facility
	KQRC-FM-98.9	Leavenworth	built new auxiliary facility

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. The transactions are arranged in descending order of sales price. When known, broker notices are included.

### KNOXVILLE (Norris, TN)

Station: WRMX-FM 106.7 mhz.  
 From: Newko General Partnership  
 To: South Central Communications  
 Price: \$2,500,000  
 (John D. Engelbrecht, Pres/Dir, 81%, Bettie G. Engelbrecht, Sec/Dir, 2%,  
 John P. Engelbrecht, 17%)

#### DETAILS:

Group owner South Central owns four other stations in Knoxville and operates one other, WNFZ-AM Oak Ridge, under an LMA from owner Oak Ridge FM. Together, these six stations represent about \$11 Million in annual revenue, according to Duncan's American Radio.

In Nashville, South Central owns WJXA-FM (92.9 mHz) and WMAK-FM (96.3 mHz, formerly WRMX). Together, these two stations represent about \$12 Million in annual radio revenue, according to Duncan's American Radio. South Central also owns four stations in Evansville, IN.

### NASSAU-SUFFOLK (Long Island; Huntington, NY)

Station: WGSM-AM 740 kHz.  
 From: Barnstable (IW LLC)  
 To: K Media (which currently has no other radio-station interests)  
 Price: \$2,500,000  
 Broker: Daniels & Associates

#### DETAILS:

This is one of two AM stations in the market that Barnstable is selling to separate buyers. The other is WFOG-AM. (See below.) Barnstable maintains a significant presence in the market, with about \$15 Million in revenue from its other stations there.

### PROVIDENCE (Pawtucket, RI.)

Station: WICE-AM 550 kHz.  
 From: AAA Entertainment, LLC  
 To: ABC Inc.  
 Price: \$2,050,000  
 Broker: MVP (buyer) and Star Media (seller)

ABC has spun off WHRC-AM 1450 kHz and is buying this stronger signal. According to Duncan's American Radio, WICE-AM billed about \$500,000 last year when it was formatted as a talk station.

For a full account of this deal, see the April 16, M Street Daily, page 1.

### GILLETTE, WY.

Station: KGWY-FM 100.7 mHz.  
 From: Quality Communications  
 To: Legend Communications  
 Price: \$1,900,000

Legend is owned by media broker Larry Patrick, who has six other stations in Wyoming.

For a full account of this deal, see the April 9, M Street Daily, page 2.

Tony Sanders is Senior Analyst for Duncan's American Radio. Email: [tsanders@duncanradio.com](mailto:tsanders@duncanradio.com).

**"You just have to speak  
to the right people."**

- Installed in world class facilities
- Integrated platform concept
- Fiber optic networking
- Any audio source, anywhere

"When faced with moving seven major radio stations into one consolidated facility, we suddenly realized the limitations of using a conventional analog approach," says Jan Chadwell, AM Chief Engineer, Clear Channel Denver. "KLOTZ provided the solution with their digital consoles and VADIS platform. We were able to consolidate the majority of the sources and destinations in one large master rack room."

"KLOTZ allowed us to achieve in eight months what would have taken us two years had we gone analog. Performance has been beyond anything we could have anticipated. The flexibility, ease of use, low maintenance, and great factory support have reinforced our decision. Thank you KLOTZ!"

RADIO'S JOURNAL OF RECORD

May 16, 2001

Serving Radio Since 1984

Vol. 18 Issue. 18

## Deal flow is at a trickle

Heck, the Weather Service could almost declare a drought. Broker Doug Ferber tells this joke to would-be station sellers: "If you find a buyer — tackle him." There are deals getting done in some special situations: Greater Media is acquiring the 4 stations of New Jersey Broadcasting in a surprise move between two privately-held companies. Ed Atsinger at Salem is methodically adding stations in small bites (paying \$9M for John Douglas' KBZS at 1220

KHz for a third facility in San Francisco). Regent is buying Bud Walters' cluster in Peoria for \$20M. Theoretically, Alan Greenspan's continued interest-rate cutting should help: analysts consider radio a rate-sensitive industry, and when radio companies' stock prices are trending up, they're more inclined to think about acquisitions. But stock prices are in the doldrums along with station prices. Going into 2001, everybody talked about this being "the year of the operator", not the consolidator — and how right they were.

## Get ready to explain satellite radio to your customers

It's coming and soon, even if Sirius is hamstrung by slow deliveries of receivers (and is raising its subscription price from \$9.95 a month to \$12.95). XM was there for the May 17 Grand Opening of Nashville's Country Music Hall of Fame and Museum and will produce at least 5 hours a day of programming from the Hall. And XM finally succeeded in getting its second satellite ("Roll") into orbit and functioning.

M Street notes a continuing fascination in the consumer press (newspaper, magazines) with satellite radio, as an alternative to local broadcasting choices. So our advice is: Make sure everybody on your staff is fully briefed on satellite radio, and can discuss it knowledgeably when the subject comes up in sales calls and other interactions. Satellite radio won't be a commercial threat for a long, long time — if ever. But its "buzz value" is as high as one of those satellites.

TRANSACTION BRIEF	15

## The recovery will be gradual

No "snapback" in the second half. M Street has reviewed all the Q1 statements and the guidance going forward. The roaring second-half recovery people were expecting just a couple of months ago will not materialize.

One sign is the very fragile TV "upfront" selling season that's underway now. The upfront is important to radio

because dollars that don't get committed there because of high prices often wind up in radio. Group execs continue to be very conservative with 2001 expectations and have re-done budgets again and again. Even Viacom's Mel Karmazin has been quiet lately, an unusual sign. Revenues and business will get better — but gradually.

Tune into our experience.

*Our roots are in broadcasting. Our skill in RF engineering is unparalleled. Our track record in tower construction and operation is unsurpassed. We build towers. You lease them. It's an experience you can rely on.*

## The FCC postpones dealing with the newspaper-broadcast cross-ownership rule.

Less than 24 hours before the May 10 monthly meeting, Chairman Michael Powell yanked the issue from the agenda. We believe that at the last minute, Powell couldn't get Democratic Commissioners Gloria Tristani and Susan Ness on board for some of the language he wanted in the Notice of Proposed Rulemaking. Fletcher, Heald & Hildreth attorney Harry Martin tells M Street "this is a very controversial issue, and there are many powerful forces on both sides of it." Both the NAB and the newspaper publishers strongly favor repealing the 26-year-old rule. But they face opposition. The Commission could still launch the NPRM "on circulation", before the next scheduled monthly meeting on June 20. But Powell's got time on his side: He'll soon have a Republican majority on the Commission, instead of the 2-2 stalemate.

Chairman Powell

## Moving Day on the 8<sup>th</sup> floor at the FCC.

7-year Commissioner Susan Ness is ready to hit the "down" button on the elevator and make way for new Democratic Commissioner Michael Copps. Harold Furchtgott-Roth is packing up, too. While new Republican Commissioners Kevin Martin and Kathleen Abernathy are ready to set up shop. Watch for news about their key staff appointments, and soon. It can't come soon enough for Chairman Michael Powell, who's chafing to get his Republican majority in place so he can move on issues like the newspaper-broadcast cross-ownership ban.

## The forecast is for more enforcement.

More FCC fines for peeling paint on towers, EAS violations, on-air indecency, unauthorized transfer of control – all the things the FCC has traditionally issued NALs for. But — more of them. A veteran Washington communications attorney grumbles that "now that there's a

separate Enforcement Bureau, it's going to make sure and justify its existence, like any bureaucracy." He's seeing more and more fines from the Commission – and while it's good for his legal practice, it's a real nuisance for station operators.

## Former Chairman Bill Kennard continues to cash in.

Showing that yes, even regulation-minded Democrats can make big money (and wield influence) in their life after the Commission. For Kennard, the first move was joining the board of PDA manufacturer Handspring. Then a major score – joining the D.C.-based investment supergroup named the Carlyle Group, which boasts heavyweights like former President George Bush. Now Kennard agrees to join the board of the New York Times, which owns radio and TV stations along with the Boston Globe and the flagship Times. Kennard's still way behind his predecessor, Reed Hundt, who's joining the board of chipmaking giant Intel. We'll be watching the next moves of departing Commissioner Susan Ness: She, too, could be on the way to the pot of gold at the end of the rainbow.

Bill Kennard

**The T-Man (Seattle-based Bob Tepper) joins the I-Man in morning-show syndication** – which gets us wondering: Will syndicated morning shows start to swallow up local shows at an even faster clip? Early syndication successes like Bob & Tom, John Boy & Billy, Tom Joyner and Doug Banks have been joined by Rick & Bubba, Lex & Terry, Bob & Sheri, and now Charlotte-based Ace & T.J. The latest is that Premiere has signed KUBE-based Bob Tepper, and the supply of ready-made morning shows on the shelf grows again. If you're an aspiring morning talent, you might start thinking twice about your prospects. Case in point: Ousted WWIN-FM, Baltimore morning personality Randy Dennis lost his job to ABC's Tom Joyner, then lost again in court when he tried to break his 50-mile non-compete with Radio One. Dennis tells the Baltimore Sun "Right now I'm a little gun-shy (about working in radio), especially when they talk about moving. I don't want to become a statistic to Tom Joyner again."

**Pay attention to ABC's station-by-station return to streaming: Because it's worried about both independent-label music fees and international rights.**

That's why ABC is methodically working on an ad-insertion solution that allows "gating" to would-be listeners outside the U.S., and also recognition of small-

label, unlicensed tunes. ABC Radio EVP/New Media Geoff Rich is building on a new insertion and substitution solution with Canada's Media Touch/OMT. It's a collaborative effort: RealNetworks will be the distributive network, supplying bandwidth and actually sending out the programming.

### Goodbye, Bruce.

Yes, Bruce Williams and syndicator Westwood are finally parting ways, though we expect word about a new syndication deal for the pioneering advice-giver any second now. Bruce's early-evening show has been a staple on talk stations since the 1980s – but it lacked major-market clearances, and that's what Westwood needed. Meanwhile, Westwood's Joel Hollander does re-sign Bruce's stablemate, Jim Bohannon, to a new 3-year contract. As for Bruce, we'll say what he himself might say: Good luck, tiger.

**Arbitron had a good year last year: Revenue topped \$200 million for the first time in 2000.**

Here's more from Arbitron's recent proxy to shareholders leading up to the May 30 annual meeting: 1998 revenues were \$174M. 1999 revs were \$190M. Year-2000 revs were \$207M. Arbitron mentions the contract impasse with its largest customer, Clear Channel, but reveals nothing new. Ever wondered

how many people work at Arbitron? The most recent tally is 656 full-timers in the U.S., plus another 347 part-timers. As for executive salaries, CEO Steve Morris is doing okay. As the head of the newly-independent Arbitron, Morris gets a pay hike from a base salary of \$329,992 in 2000 (plus \$288,988 in bonus), to \$435,000 in base salary plus a "target annual bonus percentage" of another 70%. Potential total: \$740,000, plus a nice parachute in case the company gets sold.

**Salem continues to consolidate in the syndication world by acquiring Dame-Gallagher.**

Mike Gallagher's talkshow adds another "family-friendly" show to Greg Anderson's stable at Salem Radio Network. Actually, it's more than just Mike Gallagher's daily gabfest. Dame-Gallagher shows include "OnLine Tonight with David Lawrence" and "CopNet: The Police Radio Network." Salem says Mike Gallagher's show clears on more than 190 stations and has a listenership of 2,250,000. Salem will keep D-G's New York office. Salem's own lineup of conservative talkshow hosts includes Michael Medved, Dennis Prager, Hugh Hewitt and Janet Parshall.

TRANSLATORS/BOOSTERS/SYNCHRONOUS TRANSMITTER: APPLICATIONS

The following facilities have been proposed to rebroadcast existing stations, either by a low-power FM facility on a different channel (a "translator"), by means of a second "fill-in" transmitter constructed by the licensee on its assigned channel within its own protected contours (a "booster") or by an AM station constructing a second transmitter to extend its reach within its protected contour (a "synchronous" transmitter).

**"Nobody and I mean NOBODY gets results with talent like Valerie Geller!"**

— Phil Hendrie, Talk Show Host-Premiere Radio Networks

**"Now I've got the help I need to develop 'hit talent'."**

— David Gleason, VP/ Programming, Hispanic Broadcasting Corporation

ORDER TODAY! 1-800-248-4242

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. The transactions are arranged in descending order of sales price. When known, broker notices are included.

## SANTA ROSA

Station(s): KGRP-FM 100.9 mHz (Calistoga, CA),  
KRSB-FM 98.7 mHz (Middletown, CA) and  
KSXY-FM 95.9 mHz (Healdsburg, CA).  
Price: \$11,100,000  
From: Independent Broadcasting (Fred and Mary Constant)  
To: Sinclair Telecable  
Price breakdown: \$2,100,000 for KSXY,  
\$5,500,000 for KRSB and  
\$3,500,000 for KGRP.

For a full account of this deal, see M Street Daily, May 2, page 1.

For another Sinclair Telecable deal, see WEXM-FM Norfolk below.

## RIVERSIDE (Temecula, CA)

Station(s): KOGO-FM 94.5 mHz.  
Price: \$4,500,000  
From: Temecula FM, LLC  
To: Clear Channel Communications  
Previous calls: KTMK  
Clear Channel owns numerous other stations in the L.A. market. The purchase of KOGO-FM will create a duopoly with KFI-AM L.A. (640 kHz) and KFXM-FM (103.3 mHz). The latter is also licensed to Temecula. The 2/27 M Street Daily reported that Clear Channel was the high bidder for KFXM, a new CP.

## MADISON & WAUSAU-STEVENS POINT

(Poynette, WI)

Station(s): WIBU-AM 1240 kHz and  
WZRK-FM (93.9 mHz, was WXEC-FM)  
Nekoosa, WI.  
Price: \$2,300,000  
From: Magnum Communications  
To: Starboard Broadcasting  
Price breakdown: \$1,300,000 for WIBU-AM and  
\$1,000,000 for currently-silent WZRK-FM.  
Magnum bought WIBU in 1998 for \$325,000, according to Duncan's American Radio.

## Owensboro

Station(s): WFMW-AM 730 kHz and  
WKTG-FM 93.9 mHz (both Madisonville)  
Price: \$2,000,000  
From: Robert Kelly  
To: James M. Thornberry  
WKTG-FM has been a top-five station in the market, scoring a 10.4 (12+) back in Fall 1998. More recently, it had a 4.8 (12+) in the Spring 2000 survey, according to Duncan's American Radio.

## Norfolk (Exmore, VA)

Station(s): WEXM-FM 106.1 mHz.  
Price: \$1,825,000  
From: Be-More Broadcasting (A. Wray Fitch III)  
To: Commonwealth Broadcasting, LLC  
(Group owner is Sinclair Telecable, as follows: Ann S. Adams, Managing Member, 25%; J. David Sinclair, Managing Member, 25%, Sinclair Telecable, Inc., Member, 27%; Robert L. Sinclair, Managing Member, 25%.) Broker: Jody McCoy.

Buyer and seller are splitting the broker fee, although it's not clear if this is a 50-50 split. The contract does mention that buyer Commonwealth will pay \$33,000 "toward Mr. McCoy's fees, and seller will pay the balance." There is a provision in the contract for this deal to be terminated if Be-More's petition to move WEXM's city of license to Chriton, VA adversely affects Commonwealth's WROX-FM in Norfolk. (WROX is licensed to Cape Charles, VA.)

## Chase City, VA

Station(s): WFXQ-FM 99.9 mHz.  
Price: \$700,000  
From: JBS Broadcasting (Patricia B. Wagstaff)  
To: Joyner Radio  
Broker: Patrick Communications  
This deal creates a three-FM superduopoly. Tom Joyner owns three other stations in the area, each of which has overlapping signal contours with WFXQ-FM. The stations: WJLC-FM (98.3 mHz) Clarksville, VA, WJWS-AM (1370 kHz) South Boston, VA and WSHV-FM (98.9 mHz), also in South Boston, VA.

## Providence (West Warwick, RI)

Station(s): WHRC-AM 1450 kHz.  
Price: \$410,000  
From: ABC  
To: Hall Communications  
For a full account of this deal, see the April 16, M Street Daily, page 1.  
Broker: Star Media Group (for seller)  
ABC is spinning off this AM, which it acquired last year in a six-station deal with Hibernia, and is buying WICE-AM (550 kHz) Pawtucket. (See below.) Hall owns WCTK-FM (98.1 mHz) in Providence; the station billed about \$3 Million last year.

## Fort Pierce

Station(s): WIRA-AM 1400 kHz.  
Price: \$350,000  
From: Genesis Communications  
To: Port St. Lucie Broadcasters  
Price includes \$35,000 non-compete, but excludes from restriction "operations of WAMT-AM" Titusville, owned by Genesis, and now operating under the calls WIXC on 1060 kHz. Port St. Lucie also owns WPSL-AM 1590 kHz in the market, where it pulled a 2.3 in the Spring (12+) programming Talk.

***"You just have to speak  
to the right people."***

Shannon Black, on-air talent at KRQQ FM, at the VADIS DC console.

"After looking at several options, we decided on the VADIS platform and DC consoles from KLOTZ," says John Decker, Chief Engineer, Capstar Communications, Tucson. "Why? First, our install would be much faster since most of the plant wiring could be reduced to a simple Ethernet line and a fiber optic cable connecting each room with our rack room.

"Secondly, all four stations were to be housed in the same facility, and we had to share audio sources all around the plant. This is a function that is part of the KLOTZ system. Our entire plant is now based on a digital audio 'back-bone' that provides an improved audio signal.

"We also purchased five DC consoles. The air talent finds the DC consoles simple to operate. They can put any source in our plant on any fader of the console with a simple LCD button in the meter bridge. Giving the operator the ability to call up any source to a fader is great since each operator prefers a different arrangement of sources on the console."

- Installed in world class facilities
- Integrated platform concept
- Fiber optic networking
- Any audio source, anywhere
