THORDARSON MEISSNER is pleased and proud to supply you with this new pocket replacement guide. More than 600,000 copies are already in circulation. As you know, these are updated frequently with new exact replacement recommendations.

THORDARSON, established in 1895, is the oldest electronic company in existence, and has continuously served the independent electronic parts distributors and dealer/technicians since the inception of the industry. Our engineers are internationally known and respected, having pioneered yoke and flyback development since 1940's, and designed and built the first flame-retardant flybacks in the 1960's. Today we design and build thousands of original equipment flybacks and yokes as well as replacement parts for O.E.M. distribution. These contacts with low cost original equipment components enable us to improve the design and quality of the exact replacement components sold through TM distributors. All THORDARSON color flybacks are flame-retardant, as an example, even though they almost always cost you less than the inferior original equipment part.

We appreciate your use of THORDARSON MEISSNER replacement parts, and your support of your independent electronic parts distributor.

When the first letter in the Admiral part number has no significance (A, B, C, D & E) it is replaced with a dash (-) or a parenthesis () to eliminate duplication. When letters such as L, M, N, K, Z appear the part is affected and they should be used.
