LOOK WHAT YOU HAVE IN THE PALM OF OUR HAND

You can't afford to settle for less than WNEM-TV's influence on Michigan's rich and vital second market and Eastern Michigan.

**FLINT
SAGINAW
BAY CITY
MIDLAND**

19th industrial market in U.S.A. comprised of 2 1/2 million people rich commercially and in agriculture. Here awaits a \$4 billion retail market.

Here lies the second largest market in Michigan comprised of four metropolitan areas — that no other one station can cover. WNEM and WNEM alone covers all this area's tv homes.

WFBG-TV is dominant in 15 Central Pennsylvania counties—the only area where it competes alone for the audience with the Johnstown station. Proof from Central Pennsylvania Trendex—the first complete rating study ever made in the area: WFBG-TV delivers 16.7% MORE audience, Monday-Friday. Only CBS station covering the area from Pittsburgh to Harrisburg, WFBG-TV also carries the best of ABC including "American Bandstand," the nation's number ONE daytime TV program. Call Blair-TV today for rates and availabilities.

WORKING PARTNERS

FRANK HEADLEY, President
 DWIGHT REED, Vice President
 FRANK PELLEGRIN, Vice President
 PAUL WEEKS, Vice President

We learned long ago, that in addition to making calls on all *regular* sources of potential business for our stations, it also pays to continually "beat the bushes" for unexpected business. Our entire staff is trained to make these *extra* calls and the Working Partners of H-R still do it. To us all business is important business. So whether it is one of the Working Partners, or a member of our carefully selected staff, every buyer of time and every station we represent, knows that whether we are making regular calls or "beating the bushes," we "always send a man to do a man's job."

Television's record

The year 1957 has been one of continued growth for television. The industry has set new peaks all along the line—in total receivers and television homes, number of stations and volume of business. Viewing, too, has reached new all-time highs.

Altogether it has been a bright year for the visual medium.

Advertiser expenditures in television, including the costs of talent and production as well as time, have been estimated by TvB to have reached \$1,337.7 million in 1957. This compares with a total of \$1,209.9 million in 1956 and \$1,025.3 million in 1955.

Actual revenue from time sales, with talent and production costs excluded, are estimated by TELEVISION AGE to have reached \$1,066.7 million in 1957. This was divided into \$480.7 million for network time, \$354.8 million for national spot and \$231.2 million for local.

These figures can be compared with the magazine's estimates for 1956 which show a total of \$870.3 million for all time sales. The 1956 estimate for network reached \$395.4 million, for national spot \$289.2 million and for local \$185.8 million.

Looking into the future editors of TV AGE predict that total revenue from

time sales alone will reach \$1,184.8 million in 1958. This figure is broken down into \$530.3 million for network, \$386.5 million for national spot and \$268.0 million for local business.

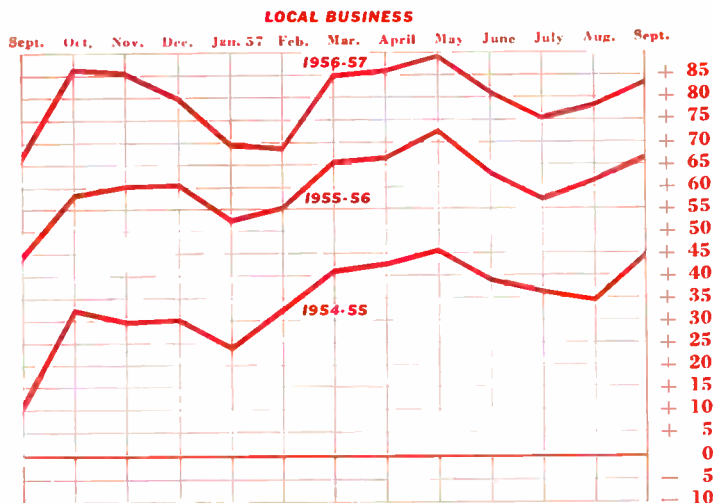

The TELEVISION AGE billings figures are made possible by the exclusive Business Barometer reports which the magazine has made monthly since 1953. The reports are made on the basis of figures sent to Dun & Bradstreet by stations in all sizes and types of markets. Dun & Bradstreet prepares

percentages on the basis of these figures and these percentages are furnished to the editors of TV AGE.

Business Barometer comparisons for the past three years can be made by referring to the charts which are included on these pages. Separate charts show the fluctuations of network, local and national spot billings.

Among the basic television records at the conclusion of this article is the month-by-month Business Barometer

table showing the percentages of change in billings totals for each of the three categories from November 1953 to the present.

The total number of television homes rose to 42,310,000 in 1957 as compared with 39,210,000 at the beginning of the year. Just ten years ago, Jan. 1, 1948, there were only 189,900 tv homes in the nation.

Color television, while not growing as fast as had been expected by its most enthusiastic supporters, showed good gains during 1957. At the beginning of the year TV AGE estimates there were 175,000 color receivers in use. At the beginning of 1958 there were an estimated 428,000.

The number of markets with television stations rose from 304 on Jan. 1, 1957 to 315 on Jan. 1, 1958. The number of operating commercial stations on Jan. 1, 1958 was 495, while a year earlier it had been 476.

THE MAGIC OF FILM

The decision as to where to end one scene and where to begin another eventually narrows down to a single frame.

The choice of which frame it shall be has the power to alter tremendously the impact of both scenes.

statement!

LIVE? NO! A guest star (or guest-planetary) can be quite a handful. And when there's a "fluff" it's nice to know you've got it on film—not on the air! Just a snip, and out goes the offending passage. You're in control at all times—show, stations, time—clear across the country!

Truly, a good release is a better release on EASTMAN FILM.

CLEAN YOUR FILMS
WITH
THE NEW IMPROVED

ECCO # 1500
ANTI-STATIC FILM CLEANER

Non-Flammable

**NO CARBON TET
or TRICHLOROETHYLENE**

Used by NBC, CBS, and many others. Better cleaning means clearer, brighter projection. Eliminates dust attraction which causes poor screenings.

**Here's Why ECCO #1500
is Better:**

- ✓ Cleaning properties better than carbon tet
- ✓ Leaves film permanently free of static
- ✓ Dries faster than carbon tet
- ✓ Keeps films pliable, eliminates waxing
- ✓ Mild, no-irritating odor
- ✓ LOW COST—less than 2¢ cleans 400 feet of film
- ✓ Equally effective for negative or prints
- ✓ Invisible anti-static coating

In ECCO 1500 you have all the cleansing qualities of carbon tetrachloride without the dangers. Add years of life to your film.

PHILCO TLR-6

Provides Maximum System Reliability

Philco TLR-6 microwave provides economical transmission of NTSC compatible color or monochrome TV signals . . . plus full audio channel. Here is a completely modern microwave system . . . especially designed to meet the needs of community TV operators for thoroughly dependable operation.

TLR-6 delivers 1 full watt output. Heavy duty power supply insures outstanding operational reliability in continuous unattended service.

Philco TLR-6 provides S-T-L relaying in the 5900 to 7400 mc bands. All components mount in standard 19" racks. Unitized circuit

construction simplifies maintenance. Built-in test and metering circuits in the new TLR-6 equipment assure uninterrupted service at all times.

Here is reliability of performance unaffected by severe weather, free from the many limitations of wire and pole lines, unhampered by problems of difficult terrain, over-water transmission or expensive rights-of-way.

Philco engineers will be happy to help you with your special Microwave requirements. Please contact us for further information. Look ahead . . . and you'll choose Philco.

MICROWAVE

for Unattended TV Relaying!

- Highly *reliable*, unattended one-watt operation
- Field proven in extended multi-hop applications
- True repeater permits top quality, long haul operation
- Highest power in the industry
- Full voice channel multiplexing
- Philco offers complete turnkey service . . . surveys . . . installation . . . maintenance

Write for Specification Sheet which describes the new Philco TLR-6 microwave system.

At Philco, opportunities are unlimited in electronic and mechanical research and engineering.

A new standard of performance for color television systems... The **RCA TM-21** Color Monitor

This new color control monitor is a reference standard for evaluating the quality of color television pictures from any source. Providing the most precise and brilliant color picture available . . . this new monitor accurately reproduces the scene *as the camera sees it*.

QUALITY CONTROL OF COLOR PROGRAMMING—The TM-21 is used in Color Camera Chains, Switching Systems, Master Control and Transmitting Control for monitoring color picture quality. It is the basic instrument for checking registration, shading and deflection linearity . . . color fidelity of the entire TV system . . . chroma to monochrome ratio . . . color phase or hue adjustments.

BEST POSSIBLE COLOR—When used to display color pictures in clients' rooms and executive offices, the TM-21 lets the station put its "best color foot forward." Clients will be impressed by the bright, high definition picture.

COLOR ACCURACY AIDS PROGRAM PRODUCTION—Production departments can use the new monitor for accurate continuity control of color programming. Producers and directors will get a true color picture of what's happening on the set. Costume and background colors can be seen in proper relationship. Lighting can be accurately evaluated, production aided.

SIMPLIFIED MONITOR ALIGNMENT—Initial adjustment is extremely simple. Built-in test switch reduces set-up time to minutes. Screen grid selector switch provides quick viewing of primary colors.

LONG-TIME STABILITY—Once set up, monitor adjustments "hold." Extra stability has been designed into brightness, contrast, decoder, convergence, and linearity circuits.

Get maximum return from your color TV investment! Ask your RCA Broadcast and Television representative for further information on the new TM-21 Color Monitor. In Canada: Write RCA VICTOR Company Limited, Montreal.

Check these additional technical features:

- Feedback techniques and precision components provide long-term stability.
- Automatic brightness tracking for color balance.
- Convergence circuits designed for rapid setup.
- DC restoration at black level, stabilized by feedback.
- Stabilized diode demodulators.
- All components and tubes easily accessible.
- Automatic wide-band operation during monochrome picture intervals.
- Stabilized black level shows effects of pedestal adjustments, aids close control of color in picture low-lights.

From the files of the American Cancer Society

Yes! I had cancer

"MANY PEOPLE think cancer is incurable. They're wrong and I can prove it! So can 800,000 other Americans like me.

"On a gray morning in November, 1942, a specialist confirmed the diagnosis of cancer made by my family doctor. What he had to say reassured me.

"He explained that, thanks to my habit of having yearly check-ups, my doctor had caught the cancer in its early stage. It was localized and it could be completely removed by surgery. So, here I am as hale and hearty as if I'd never had cancer!"

That was 15 years ago, when only 1 out of 4 persons with cancer was being cured. Today, thanks to improved methods of treatment, and earlier diagnosis, 1 person in 3 is being saved.

And with present knowledge, it can be 1 in 2, if everyone observes two simple precautions: Have a health checkup annually. Keep alert for cancer's seven danger signals.

Progress in the American Cancer Society's fight against cancer depends on the dollars donated for its broad, nation-wide program of research, education and service to the stricken.

Help to swell the ranks of people saved from cancer. Fight Cancer with a Checkup and a Check. Send a check *now* to "Cancer," care of your local post office.

COMPETITION IN THE AMERICAN WAY

BMI was founded to create competition. For competition in music is as necessary as in any other field of American endeavor. Competition is the American way!

Because BMI operates as a competitive force in the field of performing rights, the existence of BMI benefits not only the creators of music but all users of music as well.

Today, after 18 years of service, BMI is proud of the fact that so many publishers, composers and writers have found inspiration and success in the open market place, and pleased that its list of satisfied licensees grows larger each year.

Symbol of service

WGR-TV, Buffalo, like the fireman, is dedicated to never-ending service to the community.

Serving 534,668 TV homes in the 14th largest community in the United States is a big job—even bigger when you add the 559,361 Canadian TV homes in WGR-TV's coverage area.

This calls for constant alertness to the needs of rural and urban viewers . . . for the right combination of education, information and entertainment.

In delivering top ratings month after month, year after year, at a low cost per thousand viewers, WGR-TV serves the advertiser as well as the community.

WGR-TV, Symbol of Service in Buffalo, is affiliated with the ABC Television Network. Represented by Peters, Griffin, Woodward, Inc.

Symbol of service

Looking for protection of your advertising dollars? WROC-TV, Channel 5, Rochester, N. Y., serving 307,750 TV homes in 13 Western New York counties, reaches 27.4% more homes daily than the other Rochester channel (NCS #2). Thus every rating point on WROC-TV, Channel 5 is worth 27.4% more than a rating point on the other channel.

In an area like Rochester with over a million population, 1 1/2 billion dollar buying income and one of the highest per capita incomes, such superiority has great significance.

For unusual results in an unusual market that is famous as a test market, viewers and advertisers turn to Channel 5, WROC-TV, Rochester's *most powerful* station.

A symbol of service, like the devoted policeman, WROC-TV guards the interests of audiences and advertisers. Represented by Peters, Griffin, Woodward.

Symbol of service

WSVA-TV, Channel 3, Harrisonburg, Virginia, is the major source of TV programming for 200,000 families in the important Shenandoah Valley market. As such, it must serve the "old timers" plus the thousands of "newcomers" who are streaming in to work in the new plants of ASR Products, Westinghouse, General Electric, Du Pont and Reynolds Metal.

The residents of Staunton, Waynesboro, Charlottesville and Harrisonburg receive on Channel 3 a well-diversified selection of local programs, both live and film—as well as top network shows from the CBS, ABC and NBC networks.

WSVA-TV's rapidly growing list of sponsors is proof of the vital service it is providing advertisers in covering this vital portion of the Greater Virginia Area.

If you buy Richmond, Washington and Roanoke, then WSVA-TV, symbol of service in the Shenandoah Valley, is a "must" buy. Ask for details from Peters, Griffin and Woodward.
