WHITE'S RADIO LOG

Improved Reception Under Frequency Shift Noted

Advice received by the Federal Communications Commission indicates that the change of frequencies effected by standard broadcast stations on March 29th, as required under the North American Regional Broadcasting Agreement, was accomplished with a minimum of inconvenience to listeners as well as to broadcasters.

The shift was made according to schedule, without untoward incident. Broadcasters report that their listeners evinced no particular confusion, thanks to the advance explanations made by both radio and the press in a public effort which was assisted by Governors' proclamations and cooperation of civic, technical and other groups.

Early reports are to the effect that improved reception has been noted in general. Some isolated reports of interference have been traced to specific cases in which final adjustments were not completed at the exact time the reallocation became effective.

OF THE MANY CHANGES

that are taking place in Radio Station and Program information and to the ever increasing number of new broadcast stations that are receiving licenses each month,

IT BECOMES QUITE NECESSARY

to have handy for reference a radio publication that is kept "*Up-to-Date.*"

WHITE'S RADIO LOG

is now published monthly and the list of stations broadcasting on the standard broadcast band is checked each month from official government reports. All information listed in this booklet is corrected from latest available sources.

Subscription Rates:

One Year \$1.00

Two Years \$1.50
