cortina®

The most exciting innovation in solid state stereo history.

Engineering excellence. 100% capability, striking esthetics — all at budget prices. We call it the industry's only **TOTAL PERFORMANCE STEREO** at lowest cost.

■ A full capability 70-watt All Silicon Solid State Stereo Amplifier for \$89.95 kit, \$129.95 wired, including cabinet. Cortina 3070.

■ An Automatic FM Stereo Tuner for \$89.95 kit, \$129.95 wired, including cabinet. Cortina 3200.

■ A 70-Watt Solid State FM Stereo Receiver for \$159.95 kit, \$239.95 wired, including cabinet. Cortina 3570.

The most electronics value for your money has been the EICO design philosophy for 22 years. Its successful expression in stereo is the new Cortina Series. In performance, specifications, circuitry, controls, decor — in everything you expect of professional quality stereo, you'll see that

nothing has been sacrificed — except high price. Let yourself in for one of the pleasant surprises in stereo history: hear Cortina, see it, examine it at your local EICO dealer. Compare and judge critically for value. We believe you'll conclude with Popular Science "The EICO Cortina Series are low-cost audio components that look, and sound, like high-cost components."

SIMPLIFIED KIT ASSEMBLY — New EICO exclusive circuitry techniques make kit building easier, faster and more enjoyable. RF, IF and Multiplex circuitry of the tuner and receiver are all supplied completely pre-assembled and pre-aligned. Each channel of the amplifier and receiver uses 3 etched printed-circuit module boards.

NEW ULTRA-COMPACT BOOKSHELF SIZE COMPONENTS

"The compact dimensions and attractive styling appealed

to us. The Cortina 3070 represents a whole-some trend away from "overblown" amplifiers which are much larger than need be. In fact, it is one of the very few we have seen which are actually suitable for bookshelf mounting." Hirsch-Houch Labs.

CORTINA TECHNICAL HIGHLIGHTS:

AMPLIFIER — Total Music Power: 70W into 4 ohms; 50W into 8 ohms. Harmonic Distortion: less than 0.8%. IM Distortion: less than 2% at full power. Hum & Noise: 72db below rated output. Frequency Response: ± 1.5 db 5Hz to 100kHz; ± 0.5 db 8Hz to 60kHz. Channel Separation: 40db. Size (HWD) $3\frac{1}{2}$ " x 12 " x $7\frac{1}{2}$ ".

TUNER — Usable Sensitivity 1HF: 2.4 microvolts for 30db quieting. Channel Separation: 40db at 1kHz. Signal-to-Noise Ratio: 60 db. Capture Ratio: 4.5db. Image Rejection: 45db. Selectivity: 45 db. Audio Frequency Response: ± 1 db 20Hz to 15kHz. Size (HWD) $3\frac{1}{2}$ " x 12 " x $7\frac{1}{2}$ ".

RECEIVER — Same as above Cortina Tuner and Amplifier. Size (HWD) $4\frac{1}{2}$ " x 16 " x 9 ".

3570 FM Stereo Receiver

3070 70W Stereo Amplifier

3200 FM Stereo Tuner

Let I.C.S. equip you for success in radio-TV- electronics—

with professional equipment!

Brand-new "Electronic Laboratory," now being offered for the first time, can help you land in this big money-making field—FAST!

Here's an opportunity for you to turn spare time into cold cash, or begin a whole new career—in a field where the rewards have never been greater. And you *don't* need previous experience to do it!

International Correspondence Schools has just developed a new I.C.S. Electronic Laboratory you can construct in your own home. Includes series of training kits, plus the new I.C.S. VTVM—the professional quality vacuum tube voltmeter shown here. With it comes complete course instruction combining all the fundamentals with practical knowledge you can apply at once. And best of all, you build your own professional test instrument!

**I.C.S. instruction gets you going
with equipment you can really use!**

A famous manufacturer of nationally known electronic testing equipment worked closely with I.C.S. to develop the Electronic Laboratory and the VTVM itself. Everything you get is geared to increase your skill and knowledge step by step. Until finally, you've completed a precision testing

unit you can use for practically any kind of experimentation, design or servicing work.

Here's how I.C.S. instruction works. You begin with basic study lessons. Texts are clearly worded and easy to follow. At the same time, you "act out" what you learn with simple experiments. Then, in 3 easy stages, you assemble your own precision testing unit. Throughout, your instructor gives you expert, professional help. You learn at home, in spare time, as fast as ability permits.

**Coupon brings full details on your
future in this fast-growing field!**

Make up your mind right now to find out how I.C.S. training in Radio-TV-Electronics can pay off for *you*. See how it can help you cash in on the tremendous demand for men skilled in installation, maintenance and servicing of radios, TV sets, hi-fis, computers, automation systems and a host of other space-age devices. Clip and mail the coupon below. You'll receive 3 valuable *free* booklets—including sample lesson. They'll show how you can land in this big-money field *fast!*

**Coupon brings 3 valuable FREE booklets.
MAIL IT TODAY!**

INTERNATIONAL CORRESPONDENCE SCHOOLS I C S

Dept. K9190K, Scranton, Penna. 18515

(In Hawaii: P.O. Box 418, Honolulu. In Canada: I.C.S. Canadian, Ltd.
In other countries: I.C.S. World, Ltd.)

Please rush me your new 64-page booklet "Electronics" which answers the most often-asked questions about preparing for an electronics career. Also send me "How to Succeed," and a sample I.C.S. lesson. I have indicated my field of interest below.

Michigan Ave., 314-527-0330; Los Angeles, 1709 W. 8th St. 213-483-5317; Atlanta, Pirnie & Brown, 3108 Piedmont Rd., N.E., 404-233-6729; Long Island: Len Osten, 9 Garden Street, Great Neck, N.Y., 516-487-3305; Southwestern advertising representatives: Jim Wright, 4 N. Eighth St., St. Louis, 314-CH 1-1965.

oriented ham has a very difficult time learning what technical standards he is expected to meet.

For example, arguments have raged among hams for years over broad signals that caused interference to operators on adjacent frequencies, yet there are no hard and fast rules on how broad a signal may be. Nor are there any rules defining frequency tolerance or frequency drift standards. This is bound to become a sore point with the new rules that chop up the bands like mincemeat.

It seems pretty ridiculous when you consider that some hams are far enough advanced to build satellite relay stations and to bounce signals off the moon, yet the FCC rules governing hams barely recognize the existence of SSB, which hams pioneered more than 20 years ago!

Another question—how well will the complicated new rules be enforced? Already undermanned, Frank Charlie Charlie has demonstrated and admitted he can enforce the present rules only in a very spotty manner. How in the world can the new jig-saw puzzle be adequately enforced?

Not long before announcing its decision on the incentive plan, which tightens up requirements, the FCC proposed another rule change which would relax requirements for amateur station identification.

Essentially, this new proposal, if adopted, will give official approval to a whole group of sloppy operating practices now engaged in by a large number of hams.

Basically, this proposed change would require that instead of identifying his own station and the station or stations to which he is talking every 10 minutes, an operator need give only his own call. Only at the end of his communications would he have to say to whom he was talking, and even then he would need to give only the call of one station in case he was working several fellows at the same time.

Also, when working portable or mobile, he would not be required to give his location, as he is supposed to do now, but instead he would give the call sign area in which he is operating.

So, the hackneyed "W9XYZ portable five," and "WØXXX mobile seven" and "W1XAM and the group" would become the approved procedure.

The FCC says the present rules on station identification are "excessive to normal monitoring and investigative needs."

Fine for them, maybe, but how about us?

That is, how about those of us who try to operate our stations and conduct our communications with some sort of businesslike order? It's hard enough now to keep track of who's talking to whom, with so many operators not following the ID rules. If these same guys take the same light-hearted attitude toward the proposed new system, if it is adopted, just think of the unidentified babble we'll hear on the bands!

One of the purposes of the Amateur Radio Service is to serve as a training ground in radio communications. If the Feds really want to encourage us to become better qualified radio operators, which is the whole idea of the incentive rules, then their new proposal for fantastically loose identification procedures is a giant step in the reverse direction.

Maybe the FCC doesn't really take us very seriously any more. I'm sure a lot of folks in the technical industries don't take us seriously. We're to blame, though, because too many of us don't take ham radio very seriously ourselves.

So, I believe it's up to us, every one of us, to show the FCC and everyone else in the field of electronics that we are worthy of more respect.

Although the new FCC rules are needlessly complicated, they do lead the way to improvement of our "hobby," and they can be made to work *if we want them to work*.

So, what's say, gang—let's cut out the nonsense and get down to serious business. Let's become competent operators and practical technicians. Let's pick up ham radio and put it back up on the pedestal where it used to be—and then let's keep it up there! Ready? Let's go! ■

WHITE'S RADIO LOG

An up-to-date Broadcasting Directory of North American AM, FM and TV Stations. Including a Special Section on World-Wide Shortwave Stations

This is the third and last part of *White's Radio Log*, published in three parts twice each year. This format presentation enables the Editors of RADIO-TV EXPERIMENTER to offer its readers two complete volumes of *White's Radio Log* each year, while increasing the scope of the *Log* and its accuracy.

In this issue of *White's Radio Log* we have included the following listings: U. S. AM Stations by Call Letters, U. S. FM Stations by Call Letters, Canadian AM Stations by Call Letters, Canadian FM Stations by Call Letters, Major Broadcast Stations in Mexico and the Caribbean and the World-Wide Shortwave stations section.

In the February-March, 1968 issue of RADIO-TV EXPERIMENTER the *Log* will contain the following listings: U. S. AM Stations by Frequency, Canadian AM Stations

by Frequency, U. S. Television Stations by States, Canadian Television Stations by Cities and the World-Wide Shortwave Stations section. In the event you missed a part of the *Log* published during 1967, you will have a complete volume of *White's Radio Log* by collecting any three consecutive issues of RADIO-TV EXPERIMENTER published during the year. The three consecutive issues are an entire volume of *White's Radio Log* that offers complete listings with up-to-the minute station change data that are not offered in any other magazine or book.

If you are a broadcast band DX'er, FM station logger, like to photograph distant TV test patterns, or tune the shortwave bands, you will find the new *White's* format an unbeatable and up-to-date handy reference.

QUICK REFERENCE INDEX TO WHITE'S RADIO LOG

Are your home-town AM stations listed correctly in *White's Radio Log*? If you believe there is a correction *White's* listings, please check first with your local station. For each call sign obtain the correct city location, frequency, and power. (Remember, even though your local paper may list a station as a "home-town" station, it may be officially licensed by the FCC for operation in the next city.) Get all the facts on a piece of paper (be very brief), include your name and address, and mail to *White's Radio Log*, RADIO-TV EXPERIMENTER, 505 Park Ave., New York, N. Y. 10022. Your help in contributing to the accuracy and completeness of *White's Radio Log* will be sincerely appreciated.

World-Wide Short Wave Stations

Here we go again with another round of our real, official DX contest; the one with no prizes. Test your skill and equipment with the following:

1. Want to dig a not-too-often reported country? What about looking for Radio Afghanistan on 21585 kHz at 1100 to 1200 GMT.

2. How many U. S. Navy stations can you monitor on 2716 kHz in a 15 minute period? Here's a tip—listen after dark for best results.

3. How about trying your tuning ability on the rarest of the rare; Antarctica? There are no broadcasting stations there but you might hear communications station VLV

at Australia's Mawson Base. Look for VLV contacting McQuarie Island on 15845 (or sometimes 12255) kHz at 0900 GMT.

4. While we're looking for Antarctica, let's not forget that it gets pretty cold up north. Take a look at 8939 kHz and listen for an aeronautical communications net in Alaska, Canada, and on south to sunny California. How many different stations can you copy in a half hour?

5. Here's a new station—Radio Equis, in Managua, Nicaragua. Try for this one on 6025 kHz after 0100 GMT.

6. From the mysterious Himalaya Mountains we offer you the chance to log the tiny kingdom of Nepal. They have a new 100

WHITE'S RADIO LOG

kilowatt transmitter going on 4600 kHz at 1515.

7. Zambia, last nation on the country list since Zanzibar went out of business in 1964, is not too often reported. You can listen for the General Service of Radio Zambia on 7235 kHz around 0345 GMT. At around 0845 GMT they are also heard on either 7250 or 7260 kHz.

8. Hey, before you go feeling sorry for poor old out-of-business Zanzibar, they have opened up shop under the new name of Tanzania (after joining forces with Tanganyika). Their broadcasting station at Dar-es-Salaam is being reported on 4785 kHz at 1600 GMT. Also try for this station on 5985 kHz at 0300 GMT, and on 9550 kHz at 0900 GMT.

9. We wonder if any of you have ever logged the Faroe Islands; they are indeed rare on the airwaves. You might flip the receiver over to 9880 kHz around 0750 GMT to see if you can hear telephone station OKY39 which has been heard testing from Thorshavn in the Faroes.

10. Did you know that there were a number of CW (code) aeronautical beacons operating just above and below the standard broadcasting band? Some are in South America and Canada and are easily copied. Listen some night and see how many you

can hear in a half hour (15 minutes above the broadcast band and 15 minutes below).

Scoring. 10 points for numbers 1, 3, 5, 6, 7, 8, 9. You get 2 points for each of the stations in numbers 2, 4, 10. From 80 to 100 you're a champ; 50 to 79 you show promise; 30 to 49 you aren't trying hard enough; below 30 you need a better receiver and probably more patience!

Be A Sinless CBer

Continued from page 63

One thing to remember, the transmission of a false distress or emergency call is a very serious offense and anyone caught playing this game is usually put into orbit by the FCC. The word *MAYDAY* is the international radio-telephone distress signal—never use it except when the safety of life is directly involved.

A flat tire on a lonely road may be a rotten break for you, but it does not call for a *MAYDAY*. If your car is involved in an accident where an ambulance or other medical aid is immediately required (or even if you come upon someone else's *serious* accident) you can clear the channel with a *MAYDAY*, then proceed with the message of *who, where and when*.

When you've got a priority emergency or distress message, we suggest that you first fire up the CB rig on Channel 9. Call for any REACT station within range. That failing (and it seldom will fail), try to raise any station. Any CBer hearing the call will be only too anxious to offer you every possible cooperation and aid. Be brief and to the point, but give all pertinent details.

Operating Technique. No need to shout into your microphone when transmitting, all you'll accomplish is the distortion of your voice to the point where you can't be understood.

If you can't get through by talking in a normal tone of voice with the mike about

3 or 4 inches in front of your mouth, then there is probably something wrong with your CB rig, or with the receiver at the other end of the contact.

Speak slowly and distinctly, and avoid long transmissions. The old maxim is, "Good grief, be brief!"

Summary. Keep these things in mind before you pick up your mike and press to talk:

1. Know the FCC's CB rules, and live by them.
2. Use Channel 9 only for making the initial contact, then switch to another channel.
3. Monitor Channel 9 while you are not in communications.
4. Answer any call for aid.
5. Be courteous to all other stations; remember that no station has priority use of a channel (except in an emergency) and all must share and share alike.
6. Don't transmit without first listening long enough to be certain that the channel is not in use.
7. Don't use CB when a telephone is available.
8. Immediately reply to any FCC correspondence.
9. Be brief, but speak slowly and distinctly. Don't shout.
10. If you suspect that your equipment isn't functioning properly, don't use it until it has been checked (and repaired if necessary) by a licensed and qualified service technician.

Those are CB's 10 Commandments. Don't be a CB sinner. ■

BUILD YOUR OWN RADIO

CIRCUITS AT HOME
with the New Improved
PROGRESSIVE RADIO "EDU-KIT"®
A Practical Home Radio Course

only
\$26.95

Training Electronics Technicians Since 1946

Now Includes

- ★ 12 RECEIVERS
- ★ 3 TRANSMITTERS
- ★ SQ. WAVE GENERATOR
- ★ SIGNAL TRACER
- ★ AMPLIFIER
- ★ SIGNAL INJECTOR
- ★ CODE OSCILLATOR

- ★ No Knowledge of Radio Necessary
- ★ No Additional Parts or Tools Needed
- ★ EXCELLENT BACKGROUND FOR TV
- ★ SCHOOL INQUIRIES INVITED
- ★ Sold in 79 Countries

YOU DON'T HAVE TO SPEND HUNDREDS OF DOLLARS FOR A RADIO COURSE

The "Edu-Kit" offers you an outstanding PRACTICAL HOME RADIO COURSE at a rock-bottom price. Our Kit is designed to train Radio & Electronics Technicians, making use of the most modern methods of home training. You will learn radio theory, construction practice and servicing. THIS IS A COMPLETE RADIO COURSE IN EVERY DETAIL.

You will learn how to build radios, using regular schematics; how to wire and solder in a professional manner; how to service radios. You will work with the standard type of punched metal chassis as well as the latest development of Printed Circuit chassis.

You will learn the basic principles of radio. You will construct, study and work with RF and AF amplifiers and oscillators, detectors, rectifiers, test equipment. You will learn trouble-shooting, using the Progressive Signal Tracer, Progressive Signal Injector, Progressive Dynamic Radio & Electronics Tester, Square Wave Generator and the accompanying instructional material.

You will receive training for the Novice, Technician and General Classes of F.C.C. Radio Amateur Licenses. You will build Receiver, Transmitter, Square Wave Generator, Code Oscillator, Signal Tracer and Signal Injector circuits, and learn how to operate them. You will receive an excellent background for television, Hi-Fi, and Electronics.

Absolutely no previous knowledge of radio or science is required. The "Edu-Kit" is the product of many years of teaching and engineering experience. The "Edu-Kit" will provide you education in Electronics and Radio worth many times the low price you pay. The Signal Tracer alone is worth more than the price of the kit.

THE KIT FOR EVERYONE

You do not need the slightest background in radio or science. Whether you are interested in Radio & Electronics because you want an interesting hobby, a well paying business or a job with a future, you will find the "Edu-Kit" a worthwhile investment. Many thousands of individuals of all

ages and backgrounds have successfully used the "Edu-Kit" in more than 79 countries of the world. The "Edu-Kit" has been carefully designed, step by step, so that you cannot make a mistake. The "Edu-Kit" allows you to teach yourself at your own rate. No instructor is necessary.

PROGRESSIVE TEACHING METHOD

The Progressive Radio "Edu-Kit" is the foremost educational radio kit in the world, and is universally accepted as the standard in the field of electronics training. The "Edu-Kit" uses the modern educational principle of "Learn by Doing." Therefore you construct, learn schematics, study theory, practice trouble shooting—all in a closely integrated program designed to provide an easily-learned, thorough and interesting background in radio.

You begin by examining the various radio parts of the "Edu-Kit." You then learn the function, theory and wiring of these parts. Then you build a simple radio. With this first set you will enjoy listening to regular broadcast stations, learn theory, practice testing and trouble-shooting. Then you build a more advanced radio, learn more advanced theory and techniques. Gradually, in a progressive manner, and at your own rate, you will find yourself constructing more advanced multi-tube radio circuits, and doing work like a professional Radio Technician.

Included in the "Edu-Kit" course are Receiver, Transmitter, Code Oscillator, Signal Tracer, Square Wave Generator and Signal Injector Circuits. These are not unprofessional "breadboard" experiments, but genuine radio circuits, constructed by means of professional wiring and soldering on metal chassis, plus the new method of radio construction known as "Printed Circuitry." These circuits operate on your regular AC or DC house current.

THE "EDU-KIT" IS COMPLETE

You will receive all parts and instructions necessary to build twenty different radio and electronics circuits, each guaranteed to operate. Our Kits contain tubes, tube sockets, variable, electrolytic, mica, ceramic and paper dielectric condensers, resistors, tie strips, hardware, tubing, punched metal chassis, Instruction Manuals, hook-up wire, solder, selenium rectifiers, coils, volume controls and switches, etc.

In addition, you receive Printed Circuit materials, including Printed Circuit chassis, special tube sockets, hardware and instructions. You also receive a useful set of tools, a professional electric soldering iron, and a self-powered Dynamic Radio and Electronics Tester. The "Edu-Kit" also includes Code Instructions and the Progressive Code Oscillator, in addition to F.C.C. Radio Amateur License training. You will also receive lessons for servicing with the Progressive Signal Tracer and the Progressive Signal Injector, a High Fidelity Guide and a Quiz Book. You receive Membership in Radio-TV Club, Free Consultation Service, Certificate of Merit and Discount Privileges. You receive all parts, tools, instructions, etc. Everything is yours to keep.

Progressive "Edu-Kits" Inc., 1186 Broadway, Dept. 545NN, Hewlett, N. Y. 11557

PRINTED CIRCUITRY

At no increase in price, the "Edu-Kit" now includes Printed Circuitry. You build a Printed Circuit Signal Injector, a unique servicing instrument that can detect many Radio and TV troubles. This revolutionary new technique of radio construction is now becoming popular in commercial radio and TV sets.

A Printed Circuit is a special insulated chassis on which has been deposited a conducting material which takes the place of wiring. The various parts are merely plugged in and soldered to terminals.

Printed Circuitry is the basis of modern Automation Electronics. A knowledge of this subject is a necessity today for anyone interested in Electronics.

FREE EXTRAS

- SET OF TOOLS
- SOLDERING IRON
- ELECTRONICS TESTER
- Pliers/CUTTERS
- VALUABLE DISCOUNT CARD
- CERTIFICATE OF MERIT
- TESTER INSTRUCTION MANUAL
- HIGH FIDELITY GUIDE & QUIZZES
- TELEVISION BOOK & RADIO TROUBLE-SHOOTING BOOK
- MEMBERSHIP IN RADIO-TV CLUB: CONSULTATION SERVICE & FCC AMATEUR LICENSE TRAINING
- PRINTED CIRCUITRY

SERVICING LESSONS

You will learn trouble-shooting and servicing in a progressive manner. You will practice repairs on the sets that you construct. You will learn the symptoms and causes of trouble in home, portable and car radios. You will learn how to use the professional Signal Tracer, the unique Signal Injector and the dynamic Radio & Electronics Tester. While you are learning in this practical way, you will be able to do many a repair job for your friends and neighbors, and charge fees which will far exceed the price of the "Edu-Kit." Our Consultation Service will help you with any technical problems you may have.

FROM OUR MAIL BAG

J. Statistis, of 25 Poplar Pl., Waterbury, Conn., writes: "I have repaired several sets for my friends, and made money. The "Edu-Kit" paid for itself. I was ready to spend \$240 for a course, but I found your ad and sent for your Kit."

Ben Valerio, P. O. Box 21, Magna, Utah: "The Edu-Kits are wonderful. Here I am sending you the questions and also the answers for them. I have been in Radio for the last seven years, but like to work with Radio Kits, and like to build Radio Testing Equipment. I enjoyed every minute worked with the different kits; the Signal Tracer works fine. Also like to let you know that I feel proud of becoming a member of your Radio-TV Club."

Robert L. Shuff, 1534 Monroe Ave., Huntington, W. Va.: "Thought I would drop you a few lines to say that I received my Edu-Kit, and was really amazed that such a bargain can be had at such a low price. I have already started repairing radios and phonographs. My friends were really surprised to see me get into the swing of it so quickly. The Trouble-shooting Tester that comes with the Kit is really swell, and finds the trouble, if there is any to be found."

UNCONDITIONAL MONEY-BACK GUARANTEE

ORDER FROM AD—RECEIVE FREE BONUS RADIO & TV PARTS JACKPOT WORTH \$15

- Send "Edu-Kit" postpaid. I enclose full payment of \$26.95.
- Send "Edu-Kit" C.O.D. I will pay \$26.95 plus postage.

LEARNING TELEVISION-RADIO, ELECTRONICS IS FAST, EASY, INTERESTING WITH NRI

All the material you see above is included in a typical NRI home-study course. Other courses are equally complete. But NRI training is more than kits and texts. It's unique personal services which have made NRI the 50-year leader in training at home for fast growing TV-Radio, Electronics.

Choose From 12 NRI Training Plans

NRI has a training plan to fit every interest, every need in TV-Radio, Color TV and Electronics. Be your own boss in a TV-Radio servicing business or make \$4 to \$6 an hour fixing sets in spare time. Or be a part of the Electronics "revolution" in business and industry. Or get into the fascinating fields of broadcasting-communications. Or take part in missile, rocket, satellite or other government programs. An understanding of computers may be necessary in your work. Perhaps you want to "brush up" on math, electronic terms or basic principles. Whatever your interest, you'll find an NRI course tailored to your needs.

Revolutionary "3-Dimensional" Method

NRI makes training at home easy, interesting. Catalog gives you complete information. Read about the exclusive Achievement Kit NRI sends you, about custom designed training equipment NRI gives you at no extra cost, about NRI's unique "bite-size" lesson texts.

The demand for skilled technicians is great and growing. Discover how you can be a part of the Electronics Age—starting soon. Mail coupon now for free NRI Catalog. NATIONAL RADIO INSTITUTE, Electronics Division, Washington, D. C. 20016. No salesman will call. No obligation.

Over 50 years of leadership in Electronics training

AVAILABLE UNDER NEW GI BILL—
If you served since Jan. 31, 1955, or are in service, check GI line in coupon.

EARN YOUR FCC LICENSE OR YOUR MONEY BACK

Five NRI Communications courses include FCC License preparation. Mail the coupon. Find out how quickly and easily you can earn your First Class FCC License by training at home with NRI. You MUST get your license or NRI refunds your tuition in full. 87% of NRI graduates pass their FCC exams. Send for free NRI color catalog now. Mail coupon below. No obligation. No salesman will call.
