Introduction

To the casual radio listener, it might seem impossible to receive AM radio stations from foreign countries. But not only is it possible to receive them, it is also possible for the experienced broadcast band DXer to log over one hundred countries throughout the world. Even the novice finds it relatively easy to log twenty countries from the Caribbean and Latin America, and perhaps from Europe, Africa, Asia, and the South Pacific. When ionospheric conditions are right, it becomes possible for a DXer to log stations from practically every continent.

"DX Worldwide" is the foreign column of DX Monitor, the bulletin of the International Radio Club of America, a club devoted to broadcast band DXing. Each issue finds DXers throughout North America reporting their loggings of foreign stations. These reports provide valuable clues about times of reception, programming, and interference. Many dedicated DXers save their copies of DXWW for months and even years to use as reference material in tracking down elusive stations or to help them identify mystery stations. The process of checking back through past issues can, however, be a tedious one. With this in mind, Father Jack Pejza, then the editor of DX Worldwide, developed and compiled the first IRCA Foreign Log in 1972. The log has appeared every year since then.

The IRCA Foreign Log is not intended to be a complete list of all foreign broadcast band stations in the world. It is a list of foreign stations which have been heard in North America. It is not a replacement for reference works such as the World Radio-TV Handbook, but is an additional work which should aid both the novice in identifying those strange stations he hears, and the veteran in providing help in looking for additional stations to add to his collection.

The format used in this log is similar to that used in DXWW. The reports are almost as they appeared in DXWW as far as content is concerned. Reports are divided into three sections according to area of origin; Pan America, Atlantic (Europe and Africa), and Pacific (Asia and Oceania). Within each category, stations are arranged by frequency, then by country, then by date and time of reception. The name or abbreviation of each contributor's state, province, or country is given after his name, in order to help the reader determine if a particular station is being heard in his vicinity. Many abbreviations are used in this log in order to conserve space. A list of these abbreviations appears elsewhere in this book.

This log covers the period roughly from June 1976 to June 1977. The season was the best in several years for medium wave DX. Numerous loggings were made of European stations from western North America and many rare receptions were made of European and African stations from eastern North America and Asian stations from western North America. This was due primarily to the eleven year sunspot cycle reaching a minimum during this period; the next few seasons, although promising, won't be quite as good, due to increasing solar activity.

A bright spot on the horizon, however, is the moving of all stations outside North and South America to a standard 9 kHz frequency spacing. Some stations have already made the move, but most stations won't change frequency until November, 1978. Although the change will be minimal for most of the stations involved, usually no more than a 4 kHz shift, the impact for foreign DXers will be great. East coast DXers have become accustomed to listening to trans-Atlantic stations on 9 kHz spacings; they will find some stations and countries become easier or more difficult to hear as a result of the moves. However, west coast DXers will have even more fun! Stations in the far east and Oceania have been using the same 10 kHz spacing American stations have been using; however, the new frequency assignments will suddenly open up new avenues of previously undreamed-of DX targets. We can hardly wait!

Geomagnetic Indices

Various indices of geomagnetic and auroral disturbances in the earth's magnetic field have come to be recognized as excellent indicators of high latitude trans-Atlantic and trans-Pacific conditions. To quote from Gordon Nelson, the acknowledged leader in the area of MW propagation research among DXers:

"High values of A_{fr} (the Fredericksburg index) occur during a heavy influx of electrically charged particles into the upper atmosphere as a result of certain types of solar disturbances. The medium wave signal absorption produced by one of these events is strongest in high latitudes and persists for some days following the initial particle influx. Values of A_{fr} above 20 are inevitably associated with high levels of absorption along high latitude TA and TP paths. Very high levels (above 40) are usually accompanied by E-layer blanketing over North America and Europe; on such a night signals from the south will appear to dominate most channels. Long periods of geomagnetic/auroral activity are necessary but not sufficient to guarantee excellent high latitude TP and TA reception -- other ionospheric effects such as the "Midwinter Anomaly" may effectively mask what would otherwise be periods of excellent reception on high latitude paths during periods of continuing low geomagnetic/auroral activity" (DX News, May 13, 1972)

In addition, observations made during the past few DX seasons suggest that high latitude TA reception is enhanced just prior to the onset of a major geomagnetic disturbance.

Since this log is a record of foreign receptions over the course of one year, a list of the geomagnetic indices for that year follow. Hopefully they will serve as a guide for those correlating geomagnetic activity with certain types of reception conditions and those seeking to gain more insight into factors governing different types of DX conditions

Radio propagation forecasts and conditions are reported at 18 minutes past each hour over National Bureau of Standards station WWV on 2.5, 5, 10, and 15 MHz. The broadcasts contain not only the A_{fr} index but the K index and self-explanatory descriptions of solar activity and geomagnetic field conditions.

The K index is also an indication of magnetic conditions. It can be more useful than the A index, since it is updated every 6 hours, while the A index is undated only once per day. The following table shows the approximate relationship between the A and K index values:

A	K	
0-1	0	quiet
2-4	1	quiet
5-7	2	quiet
8-14	3	unsettled
15-29	4	active
30-49	5	minor geomagnetic storm
50+	6	major geomagnetic storm

The A-index values for the period from September 29, 1976 to August 31, 1977 are as follows:

ABOUT THE IRCA

The International Radio Club of America was founded in 1964 by a group of DXers in Denver who were interested in DXing the AM Broadcast Band (540 to 1600 kHz). Since that time, the club has grown to over 400 members in the U.S., Canada, and many foreign countries.

The IRCA publishes its bulletin, DX Monitor, 34 times a year; weekly during the winter and fall and monthly during the summer. A typical issue of DXM is divided into three main sections: "DX Forum" in which members discuss DX related topics, "DX Roundup" where members report their latest domestic catches, and "DX Worldwide" where members report their foreign DX. The bulletin also contains information on special DX tests, a want-ads column, information on station formats and changes in call letter and frequency assignments, plus technical and special features articles on stations, receivers, antennas, and the like.

The IRCA hosts an annual convention and members have numerous local gatherings throughout the year. The club has a democratic government with a president, secretary-treasurer, and board of directors elected every two years.

Membership is open to any person in any country with an interest in broadcast band DXing. Dues are \$12.00 per year in the U.S., Canada, and Mexico; \$13.50 to the rest of the world. Dues cover the costs of printing and postage for DX Monitor. Sample copies of the bulletin are 50¢ each. Dues and sample requests can be sent to IRCA, P.O. Box 26254, San Francisco, CA 94126. If you aren't already a member of the IRCA, we invite you to write today and become a part of the best BCB DX club around!

The First Twenty or More

by Bruce Portzer
(with a little help from Mark
Connelly, Richard Eckman, Art
Peterson, and Randy Seaver.)

A problem inherent in logs of this type, as well as columns like DX Worldwide, is that it is often difficult for the novice DXer to determine which stations or countries are the easiest to hear from his or her location. Oftentimes, the easiest stations are among the least frequently reported, since experienced DXers may tune right past them without giving them a second thought. At the same time, some stations reported by many DXers were reported because of unusual conditions or other circumstances causing them to seemingly be easier to hear than they really are.

So with these thoughts in mind, I contacted several of the top DXWW reporters from the past couple seasons in the two areas of the U.S. where foreign DX is most prevalent -- the west coast and the northeast -- and asked them to compile a list of what they thought were the twenty easiest to hear countries in their location. Most of them could not stop at twenty and wound up with a much larger list!

Although the two lists which follow were made up by DXers in the northeast and on the west coast, they should also be useful for listeners in other parts of the U.S. and Canada. DXers in the Rocky Mountain area should find the west coast list of some interest and DXers in the south and midwest regions of the U.S. should benefit from the northeast list. The main differences will be that, due to geographical considerations, Latin American stations will be more prevalent.

Programming information on the listed stations can be found in the loggings sections of this book.

THE TOP TWENTY (AND THENSOME) FROM THE WEST COAST

Mark and Richard did not have too much disagreement as to the order of listing. Unfortunately Randy, Art, and myself could not agree so easily. For example, I ranked Nicaragua as #2, Randy listed it as 16, and Art ranked it as #24. So what I wound up doing was averaging the three together and listing, in parentheses, the rankings given by myself, Art, and Randy, respectively.

1. Mexico - (1,1,local) - Take your pick: XEWA-540, XERPM-660, XETRA-690, XEROK-800, XEMO-860, XEGM-950, XED/XEG-1050, XEPRS-1090, XESM-1470, XERF-1570, XEDM-1580 are all heard well up and down the coast.
2. Japan - (6,2,4) - NHK outlets on 750, 830, & 870 are the strongest, audible 0900-1400 Sept-Nov & Feb-April. Other NHK & commercial outlets include 670, 700, 770, 840, 880, 890, 1180, 1310, & 1440.
3. Hawaii - (3,4,5) - KORL-650, KIKI-830, and KPOI-1040 are the easiest. KMVI-550, KGU-760, KAIM-870, and KHVH-990 are other good bets.
4. North Korea - (7,6,3) - 655 is the easiest. Other outlets include 625, 635, 735, 785, 850, 820, and 877.
5. Cuba - (4,5,9) - 880 is the easiest, heard nightly after KRVN s/off. 640, 590, 600, 720, 760, and 1560 are also heard depending on QRM.
6. China - (10,9,6) - 835 & 1040.
7. U.S.S.R - (8,8,10) - Best during Sept-Nov & Feb-April. 647 & 840 are the most consistent. 548, 575, 584, 665, 782, & 1376 also good bets.
8. Belize - (11,19,1) - 834.
9. Colombia - (12,12,8) - Depending on the QRM in your area, try for HJCY-810, HJCK-700, HJBI-840, HJCE-890, HJJR-1005, or HJJR-1005.
10. Netherlands Antilles - (Not listed, 7, 7) - PJB-800.
11. Costa Rica - (9,10,19) - TIOS-825 is the easiest. Also watch for TIHB-700 and TIW-775.
12. Alaska - (5,3,not listed) - KFQD-750 is easy in the Northwest & Northern California during the fall months. KPAR-660, KYAK-650, and KICY-850 are also good bets. Alaska is more difficult in S. California.
13. Gilbert Islands - (17,22,12) - VSZL-844.
14. Nicaragua - (2,24,16) - YNX-750 is by far the easiest LA stn in

Seattle, dominating 750 almost every evening of the year, but is somewhat harder to hear farther south. YNOW-540 is also possible at 1000 s/on.

15. Venezuela - (14,19,11) - YVOZ-1200 is widely hrd MM's w/WOAI off.
16. Cayman Islands - (Not listed,21,2) - R. Cayman-1555. 1205 also.
17. El Salvador - (15,17,20) - YSS-655.
18. New Zealand - (13,26,18) - Best heard Sept-Oct, March-April, and during the summer months. 2YC-660 and 1YC-880 are the easiest. Also look for 1YA-760, 1YZ-860, and 1ZD-1000.
19. South Korea - (16,28,13) - HLKA, wandering back & forth from 705 to 715, is the easiest. Also heard are HLDA-1570, HLKY-840, HLKI-890, and HLKB-890, usually with QRM from other Asians on their frequencies.
20. Australia - (18,25,17) - Best heard Sept-Oct, March-April, and the summer months after the dominant stations to the east are gone due to LSR. Outlets to look for include 2NR-700, 2BL-740, 3LO-770, 3GI-830, 4RK-840, and 5AN-890.

Honorable mention: Other countries which aren't all that difficult include Sabah (1475), Haiti (1035), Guatemala (850, 880, 1188, 1210), Dominica (545), St. Kitts (1265), Phoenix Islands (1385), Panamá (840, 860, 890), Puerto Rico (1560), Perú (854, 1010), Surinam (725), Ecuador (540, 995), Chile (1180), and Antigua (1165).

As a couple of final precautions, the rankings were made are, of course, the opinions of only a few individuals. Depending on your location, you may find some stations easier or more difficult to hear than the preceding rankings would suggest. Just the same, they should give you some idea what to try for for those first few foreign catches. Also keep in mind that most stations outside North and South America will be changing frequency by late next year and, as a result, could become easier or more difficult to hear than at present.

My thanks to Mark, Richard, Art, and Randy for their information and help in preparing this article.

Strong carrier on at 0950 and s/on came at 1000:30. 2 note, low-high, fanfare played twice, then announcement by woman, fanfare twice more, then announcement by man. Woman's voice hard to read and in FF but "Jumbo" rather clear in man's announcement. Frequency measured as 545.012 at 1019 (gate error only) which agrees perfectly w/Taylor's PFM. Reception marred by intense splash from KSFO-560. (Peterson, CA)

+SS o/u CMQ 0826 10/18 w/KFI nulled. Had tropical sounding mx typically found on Colombians w/male announcer who faded out at the proper times. Sometimes o/CMQ but mostly under. Still there after KFI s/off 1000, but much weaker until I finally gave up around 1030. (Bytheway, WA)

+In o/a jumble, w/fanfare, SS talk about how you get the best news and mx "en Maracay" on YVLH, then Latin flute or piccolo dance mx 0332 5/22. (Connelly, MA)
- 650 UNID, 1/3 1225 suspect Costa Rica or Venezuela. Thought I heard mention of Maracay, but KFI slop just too much. Highly doubt this was a Mexican. (Lobel, CA) (Sunrise/Sunset map says Venezuela had been in daylight for about two hours when you heard this. Mexico or Central America most likely-ed)
- 655 EL SALVADOR, San Salvador, YSS, 7/25 0452 National Anthem with roaring noise, poor. (Newell, BC)

- 660 MEXICO, México, D.F., XERPM, "R. Uno" w/Middle-of-the-Road mx 9/9 0505 w/talk modernistic Interval Signal and ID. (Pejza, CA)
+Good signal 10/11 0600 w/American soul records in EE but w/SS IDing as "R. Uno". (Endza, CA)
+4/25 0612, many "whoop-whoop-whoop... R. Uno" IDs w/rock mx. Good w/WNBC interference. (Thomas, FL) (There is a whole network of Mexico City stations w/whoop-whoop-whoop IDs: R. Dos-710, R. Treis-970, R. Cuatro-1220, R. Cinco-1470 and R. Seis-1500, in addition to this one-ed)
+0530 6/17 usual, though better on medium wave tuner poor. 0450 6/24 back to good levels touching S-7 w/usual whelps on whiz-bang. (Newell, BC)
- 660 NICARAGUA, Managua, YNAM, 11/13 0603, nice long ID by man, most of which I didn't understand. But heard "R. Preferida... seis sesenta kilohertz" and "Mi Preferida" mentions. Had played

curious mixture of Latin disco and syrupy SS ballads for previous half hour w/many Central Standard Time time checks. Poor-good w/no sign of XERPM. This tuned slightly above the low hets I hear on 660 so probably is the cause of at least some of the noise. (Hall-Patch, BC) (see also 660.5-ed)

- 660 ● VENEZUELA, Coro, YVNA, 8/30 0407 Venezuelan National Anthem so must be country number 21. (Newell, BC)
+ "Ondas de los Médanos" in w/a good steady signal 1030-50 1/31. Lively mx and frequent time checks. A clear slogan jingle ID 1044:40. This tried for many times unsuccessfully and rather hard-won today. Had to tune very precisely and carefully notch the KNBR-680 splash to get it. (Peterson, CA)
t +A sports event between Venezuela and Puerto Rico here in SS, likely YVNA o/nulled WNBC 0058 2/6. (Connelly, MA)
+ Good w/Latin American-type mx and ID 1020 3/21 as "Ondas de los Médanos", alone on frequency. (Olpihant, AB)
- 660 ? UNID, 1/17 0935-0945 man announcer and SS opera or hymns. Very weak signal, murky audio. WNBC off. (Thomas, FL)
+ Latin-type conditions improved here for YNAM disappeared from 660.4 in the middle of March taking with it the atrocious het it had been generating for years on all 660 stations. Meanwhile, after the XERPM s/off 0800, there are 2 or 3 Latins to be found on the frequency (WNBC nulled) but haven't been able to ID any of them yet. One of them may be Nicaragua returning to its assigned frequency and one may be R. Uno in Colombia, but all the Latins there are about the same strength and the IDs keep getting away from me. It's even difficult to locate XERPM many times for it's no stronger here than the Latins which are left after it signs off. (Martin, CO)
- 660.4 ? UNID, Strong het regular here. Nicaragua presumed. (Lankford, TX)
- 660.5 NICARAGUA, Managua, YNAM, "Preferida" All night here 11/1, strong het. (Schatz, FL) (see also 660-ed)
- 663.5 ? UNID, extremely weak Latin here Monday morning 9/20 0735-0816. Signal so faint that it delivered audio only 3-4 times in a half hour period and was difficult to locate the rest of the time. Bearing was Southeast by South, about 145°. SS flavor when audio was up. During this time I could not locate the 645 carrier from Paraguay and this station seemed weaker than the Paraguayan I have heard in the past. (Martin, CO)
+ South American, noted here on several occasions, likely coincides w/Gene Martin's unid. Doubtful if Paraguay. (Schatz, FL)
+ The Latin here offers one of the weakest signals I've ever monitored - found most nights 9/20-10/13 - as early as 0400 10/10 to as late as 1005 10/11, which seemed to be its fadeout time that date. The carrier often cannot be located and when you do find it w/the BFO it delivers audio only about 1/5 of the time. This one may escape being IDed for a long time, but inasmuch as I reported it first, think I'll add it to the list whenever anybody comes up w/the ID. About 145° from Denver and would surely like to know for triangulation purposes, what bearing Pon Schatz (in Florida) finds it on. The HQ-180 is always tantalizing in this way - capturing some signal so weak and erratic that there is almost no chance I will ever ID it. This signal is weaker than the Latin about 757 in the early evening. (Martin, CO)
+ Mystery Latin here in September and October disappeared sometime in the closing days of October and could not be found through November. Probably returned to its regular frequency and we may never know what it was. (Martin, CO)
+ My mystery Latin from last fall has been heard again on this frequency, but is surely not a regular. Listen for it when South American reception is at its best. Noted again 2/18 when it seemed to fade out about 0910. Can any South American listener help on this one? A station which is heard in fall and spring but not in deep winter suggests something in Deep-

South America. I would settle for Patagonia. (Martin, CO)
+Let me put a tentative ID on my mystery Latin here as something in Argentina, although I can't remember that any Argentine has ever been reported off frequency, as this one is. Unless my ears are fooling me, there are 2 mentions of Argentina on the tape recorded in 8 excerpts Monday morning 3/21 0659-0845. Signal extremely weak as usual and by 0925 could not raise anything more than a BFO whistle. Mx portions have a quite un-Latin flavor, no hint of Tropical or Ranchero mx and nothing w/a Cuban flavor. Some of the mx is almost Oriental in tone but I would not pretend that this is a close measurement. The station was first heard last September, was not found in mid-winter, but spotted again in mid-February. Ron Schatz spotted it in the fall on this frequency, called it a South American, but couldn't ID it at the time. Would still be willing to settle for Patagonia. (Martin, CO)

- 675 COSTA RICA, San José, TIJC, 0424 11/2 w/SS mx, ID as "Sonora" similar to that used by Titania-825 but w/male voice. (Oliphant, AB)
+12/16 0440 came out of light rock song to man saying "... Sonora... para la gente... la... musical, R. Sonora." Really messy KNBR/KBOI slop. Mostly this was just a carrier, w/that one lucky fade up on an ID. (Hall-Patch, BC)
+"R. Sonora Cadena Musical" ID between songs, numerous mentions of "Sonora" 0523 2/11. (Lankford, TX)

- 690 ? UNID, SS woman announcer w/instrumentals (many US pop tunes) 0720-0803 11/22, only ID given was by woman at 0800 as "Música de la romantica." Believe it might be Cuba but not sure. (Gerardi, IL)

+W/ID as "R. Sutatenza de Colombia" 0203 11/2 w/mx by Rick Wakeman in background, still in strong 0330 w/a couple of IDs on the half hour. (Oliphant, AB)

- 705 HONDURAS, "La Voz de Olancho" w/beautiful casual ID 0320 4/28. Local WGBS-710 nulled in figure 8 mode. (Schatz, FL)
- 705 ST. VINCENT, Kingstown. It has been quite a while ago that Radio St. Vincent was heard by American DXers, but now the station appears to be active again. The station was heard February 10 on 705 khz 2326-0052 with popular mx, news and a talk show. (SCDX, March 77)
-Per NRC DX net (75 meter ham band), this is now on. Carrier and talk by man (which sounded like BBC news) noted briefly through WOR/WRKO-710 slop 0003 2/22. (Connelly, MA)
+Fair for taping w/ID "This is R. St. Vincent", other EE talk, then soft ballad w/reggae beat 0029-0031 2/23. (Connelly, MA)

+W/KIRO off, this was heard nearly alone building from fair to strong 2/7 1210-15 w/SS ballad and man bellowing "La Grande del setenta y siete" followed by time check. This translates as

"707" doesn't it? Interference from South Korea!
(Hall-Patch, BC)

- 710 PUERTO RICO, Mayaguez, WKJB, 1/29 familiar Puerto Rican IDs sung by woman "WKJB, Mayaguez" 0730, 0731. Sane Latin mx. Signal fair u/WGBS. (Thomas, FL)
- 710 ● VENEZUELA, Caracas, YVKY, "R. Capital" through nulled WOR with ads for places in Caracas 0112 2/6. (Connelly, MA)
- 720 ● COLOMBIA, Barranquilla, HJAN, at 0058 11/16 many "Bogotá's" must be Colombia. Got good tape of ID but can't interpret. Sounds like "transmito en Caras-a-uga estación Achay-Oka-Ah-Eh (something) Antigua (something) Sud America." Antioquia is a state in Colombia. Will send tape to anyone who will volunteer to interpret. (Curtis, VT) (How about HJAN, Achay-Hota-Ah-Eneh, en Barranquilla?-ed)
+2 SS stations vying for the frequency, finally caught "Bogotá", "Colombia" and "en Barranquilla" so HJAN was one, 0021-0043 1/21. (Curtis, VT)
+Atop Cuba w/SS talk mentioning Barranquilla, then slow SS ballad 0445 2/11. (Connelly, MA)
- 720 CUBA, Colón, CMGN, totally dominant, loud w/"La Voz de Cuba" ID, pompous march 0530 7/11. (Connelly, MA)
+8/2 0828 w/"La Voz de Cuba" ID at S-8. KDWN off and no sign of WGN. (Lobel, CA)
+U/WGN 0955 8/23. (Klemp, CT)
+11/25 0512 strong signal o/WOR slop. Program //590. Only 30 kw! (Apel, NY)
+Loud w/man and woman in SS, WGN way u/w/big band jazz 0546 12/19. (Connelly, MA)
+Generally alone on channel w/man and woman in SS 0543 2/6, occasional traces of WGN in background. (Connelly, MA)
+//600 w/monotone political speech o/u WGN big band jazz 0525 3/13. (Connelly, MA)
+Way over WGN w/SS talk by woman 0620 4/17. (Connelly, MA)
+Loud w/messy signal, trashy (overmodulated) audio w/circus-type steel band/calliope mx, then "R. Habana" ID and SS talk //640 0405 5/22. (Connelly, MA)
- 720 ● VENEZUELA, Porlamar, YVOE, is now "Radio Visión Oriente", due to go to 100 kw. Any Venezuelan station up to 950 can increase power to 100 kw; up to 1300 to 10 kw; and up to 1500 to 5 kw. (MWN, December 76)
+Possibly YVOE, slogan used was "La Emisora 'pop' Musical de Venezuela"; top 40 hits were played -- briefly over Colombia/Cuban 0135 4/22. (Connelly, MA)
- 725 COSTA RICA, San José, TILX, in well w/SS talk 0404 12/23. (Connelly, MA)
+Dominant here, Surinam apparently off. TILX has SS talk, good signal for listed 2 kw 0426 1/8. (Connelly, MA)
+Good, man in SS 0455 6/11. (Connelly, MA)
- 725 ● SURINAM, Paramaribo, SRS, excellent w/reggae song in EE Followed by vocal, tragic 50's "Teen Angel" style 0325 6/18. Absolutely pounding in, tied w/PJB-800 for loudest Latin award. (Connelly, MA)
+At monstrous level, S-9+55, killing adjacent domestic and Latins audible in 16 khz bandwidth, had "Let Me Roll it to You" by George Harrison at 0133, DD talk and ID 0147 7/10. (Connelly, MA)
+In very good playing EE "oldies" such as Crosby's "Sing a Song" and "Spanish Eyes". Caught Surinam in their pseudo-Dutch language. Good listening, 0015-0033 9/17. (Curtis, VT)
+Ultraloud (better than most domestics during aurora) program of Calypso mx, then talk in unfamiliar language 2315 9/25. Again belting in w/"Saturday Night" by Bay City Rollers 0206 9/26. (Connelly, MA)
+0325 10/9 w/frequent mentions of Copanahagen rock format.

(Klemp, CT)
 +In w/powerful signal, man in pseudo-DD 2219 10/23.
 (Connelly, MA)
 +Very strong 11/16, heard all over the house while taping easy listening EE recordings, mx was continuous w/out break 0032-0128 when ID was made. (Curtis, VT)
 +Excellent w/DD-like talk 0141 11/20. (Connelly, MA)
 +Loud w/DD talk, disco-jazz, EE talk and soul record 0047 11/24. Excellent w/Latin-jazz and vocal in wierd S. Pacific sounding language 2128 11/25. W/man in DD croaking CKAC/CMGN 2140 11/27. (Connelly, MA)
 +2320 11/25 good w/mx, jingle and what sounded like sports event in their pseudo-DD. Probably the most consistent South American received here. (Curtis, VT)
 +10 db stronger than CKLG-730 w/talk in unid Asian language and wierd mx sounding like a cross between US pop mx and mx from India 0845 11/29, earlier than listed s/on. (Portzer, WA)
 +0104 12/1 pseudo-DD talk, good as usual, man and woman interview program. (Curtis, VT)
 +Good w/US country western mx 2359 12/1. (Connelly, MA)
 +Mostly a carrier but came up nicely 12/8 0325 w/orchestral mx followed by man "Stitching Radio Omroep Suriname... Paramaribo" and more talk, presumably DD. Faded quickly in band mx which followed. Some TVI hum and CKLG-730 splash. (Hall-Patch, BC)
 +Potent w/Caribbean-style reggae-rock 2300 12/10. (Connelly, MA)
 +0045 1/21 in but not nearly as strong as usual. (Curtis, VT)
 +Strong w/man in non-European language 2257 1/21. (Connelly, MA)
 +1/25 2222 fair w/man and woman and what sounded like commercials. (Curtis, VT)
 +Signals heard here on occasion 0835-0950 1/25,26,27 and 30, but usually too much WGN and CKLG (which both seem to play brass mx at the most inopportune times) interference. Best signals 0900 1/27 when heard 15 seconds of instrumental mx followed by long talk in unknown language (which even though I didn't know the language sounded like a religious program). Just can't seem to get an ID out of them. (Oliphant, AB)
 +Fair w/mx 2353 1/30. (Connelly, MA)
 +Potent w/Hindustani talk, then "Could it Be I'm Falling in Love" by the Spinners (an incongrous mess) 0019 2/11. (Connelly, MA)
 +Loud w/SS female soul record 0040 2/23. (Connelly, MA)
 +At monster level w/reggae mx jamming adjacent channels 0013 3/14. Religious sounding song in unfamiliar language 2337 3/19. Good w/rock 0055 3/20. (Connelly, MA)
 +4/3 0007 usual good signal, some CKAC-730 splatter w/"DD" patois news? (Dunn, NS)
 +Pegging S-meter w/Latin style mx, then talk by man 0128, disco mx 0139 4/10. Signal ridiculously loud, better than most domestic skywave stations during extremely auroral conditions. (Connelly, MA)
 +Loud w/Stevie Wonder record 2344 4/16. Good w/"Take Five" by Dave Brubeck 0143 4/20. (Connelly, MA)
 +4/27 0256-0309 in good w/Dutch talk by man. 0300 Johnny Mathis "We Can Work it Out" and an ID. Now on short wave 4780. (Orr, CO)
 +Excellent w/calyпсо/limbo-style mx 0016 4/23. Fair w/female vocal 0011 4/29. (Connelly, MA)
 +Potent w/oriental-sounding talk (possibly Indonesian) 0118 6/6. Fair w/reggae mx/disco 0048 and good w/vocal mx 0121 6/12. (Connelly, MA)

726 t ECUADOR, Guayaquil, HCFA2, likely R. Guayaquil, briefly with cumbia 1/17 0710 but too much slop from Cuba-720. (Schatz, FL)

730 [BRAZIL, Petrolina, ZYK40, is now ZYB59. (MWN, September 76)

730 COLOMBIA, Bogotá, HJCU, good w/u CKAC w/presumed Cuban, good "R. Melodia" ID by man in SS, then uptempo Latin dance mx 0440 7/10. (Connelly, MA)
 +Very good w/SS introduction to players of a game 0343 9/19. (Klemp, CT)
 +Loud w/fast SS vocal mx, "R. Melodia" screamed over song 0555

- 11/28. (Connelly, MA)
 +O/u CKAC w/ID, female SS vocal 0554 12/19. (Connelly, MA)
 +1/3, clear "R. Melodía" ID 0902, then mx. Signal good till XEX
 fade up at 0905. (Thomas, FL)
 +Good overriding CKAC w/"Melodía" IDs 0545 2/6. (Connelly, MA)
- 730 GUATEMALA, Guatemala, TGN, 0310 10/30 w/trumpet solo heard u/XEX
 and //3300. (Welch, FL)
 +In very good running "Through the Bible" in EE. ID by man in EE
 0429 giving several short wave parallels. Program change to SS
 0430 12/2. Listeners invited to write for verifications.
 (Maloney, OK)
- 730 MEXICO, México, D.F., XEX, total null of CKLG 0405 9/22 yielded
 this strong and steady signal w/a sports event of some kind and
 a spot for a brand of "cerveza" (beer-ed). (Hall-Patch, BC)
- 730 TRINIDAD, Port-of-Spain, R. Trinidad strong and well atop
 channel 0002-0130+ 4/10 w/local news 0002 w/mention of upcoming
 government elections. Still strong when checked 0130 w/British
 accented man speaking. (Eckman, PA)
- 730 URUGUAY, Montevideo, CX10, R. Ariel has changed its name to
 Radió Continente. (SCDX)
- 735 ECUADOR, Quito, HCBG1, fair-good w/romantic SS vocal 0150 7/11.
 (Connelly, MA)
 t +Probable w/reverberated SS talk, fair, 1/8 0426. (Connelly, MA)
 + "R. Melodía" 0226 12/2 w/SS by woman about "Calidad", then into
 several straight Latin tunes, fair on peaks. (McNeil, DC)
 t +Good in SS 0358 2/6. (Connelly, MA)
 +Tentatively the one hovering just high enough to get a little mx
 through the noise 0517 2/11. (Lankford, TX)
 + "R. Melodía" 0027 ID and into SS male romantic vocal.
 (Lankford, TX)
- 735 PARAGUAY, Asunción, ZP7, R. Guaraní passed by for an all night
 Ecuador Monday morning 10/30 but didn't realize it till next
 morning. Too weak for Quito and 835 and 1306 were both in.
 Will log it next time, but still blew an unprecedented 3 new
 Paraguayans in one night! (Schatz, FL)
- 735 UNID, 0500 2/2 a bit of carrier o/u noise. Ecuador presumed.
 (Lankford, TX)
 +0030 2/15, two carriers here, the weak one about 100 hz higher,
 the stronger presumed to be Ecuador. (Lankford, TX)
- 740 COLOMBIA, Valledupar, HJNS, "R. Guatapurí" heard 0720 w/taped
 voice ID and into SS popular mx and also seemed to play some EE
 popular mx but could not be sure as terrible noise level at
 times almost sounded like a jammer. Heard while looking for
 KYME test. (Belanger, MB)
- 740 CUBA, Camagüey, CMJL, 1000 9/13. Briefly fair through the hour
 w/"R. Liberación desde la Habana Cuba" etc. ID w/sort of chime
 mx. KTRH and others soon took over. WRTH 75 lists CMAQ, Pinar
 del Rio, here also as R. Liberación, so perhaps this was both.
 CMJL is the more powerfull. (Hall-Patch, BC)
 +Dominant o/a jumble w/news of Cuba and USSR 0455 2/12.
 (Connelly, MA)
 +W/nonstop SS talk apparently about socialism, alternating with
 a station w/SS mx, Venezuela suspected. CBL/CBNM totally
 blanked by aurora 0138 4/10. (Connelly, MA)
- 740 MONTSERRAT, Plymouth, R. Antilles presumed the 10-12 second
 tuning signal here 11/22 0915-0930, seemed to be a harp or
 carillon, 10-15 notes, repeated every 20-30 seconds. FF talk
 0930-40 u/KCBS open carrier and unid country western mx (KCMC?)
 w/KTRH there too at times. No positive IDs. (Seaver, CA)
 +Assumed to be the one w/pop songs in FF, including an FF version
 of "Heartbreak Hotel", w/announcements by male announcer after

- each song 0949-0955 12/6 looping towards Caribbean. KCBS/KBRT open carriers both off, a rare occurrence on Monday mornings. CKLG slop finally got the better of them 0955. (Portzer, WA)
- +Still escapes me w/an ID, 12/13 0920-30 tuning signal 10 seconds long, 16-18 second apart continuous. FF talk 0930 and on. KCBS open carrier throughout and test tone 0932 killed it. (Seaver, CA)
- +Apparently the one w/chimes as described by Randy Seaver recently, 0920+ 1/3. Bad slop by CKLG-730 0928-0931 wiped them out, then male FF talk noted 0931. (Portzer, WA)
- +1/3 good from 0925 tune in w/Interval Signal, jazzy tune, FF s/on 0930 and into vocal mx interspersed w/FF talk. (Forth, IL)
- +Quick ID 1005 1/3 right before short instrumental mx w/another ID 1006 in FF. This station in and out since 0948 w/CKLG-730 interference. Country number 28. (Oliphant, AB)
- +Noted w/Interval Signal 0915 1/17 lasting 10 seconds (seemed to be a one finger piano tune) followed by about 7 seconds of silence. S/on 0930 in FF. (Oliphant, AB)
- +Continues to be a regular u/KCBS/KBRT open carriers most Monday mornings. Finally got a good "R. On-Tee" ID 2/7 0930:30 in FF. (Seaver, CA)
- +2/21 0949 in fair w/man in FF. KCBS/KTRH/KRMG all off. (Korinek, CA)
- 740 ● VENEZUELA, Maracaibo, YVNC, w/SS ID, then slow romantic mx 0208 9/26. (Connelly, MA)
- +Good o/CBL after CBNM s/off w/jingle ID "R. Maracaibo", then slow SS vocal mx 0507 2/11. (Connelly, MA)
- +U/CBL w/"R. Maracaibo" jingle and SS mx 0528 3/13. (Connelly, MA)
- +Loud and alone on channel w/numerous "R. Maracaibo" IDs and fanfare 0617 4/17. (Connelly, MA)
- +Atop CBL w/"R. Maracaibo" IDs 0438 5/22. (Connelly, MA)
- +Good w/CBL nulled, slow SS female vocal, "R. Maracaibo" jingle, SS talk at 0507 6/12. (Connelly, MA)
- 740 ? UNID, SS here 0942 11/8 w/EE rock and male announcer in what sounded like SS or PP, then another EE rock song, announcement 0945, then SS rock song. Faded in and out for another 7-8 minutes. (Bytheway, WA)
- +FF talk briefly 11/15 0950 u/KCBS open carrier. Montserrat? (Seaver, CA)
- +2/14 0959:50 weak SS talk. Sure sounded like a "R. Sutatenza" ID. I couldn't find anything that resembled it either. (Korinek, CA) (R. Guatapurí-Colombia and R. Maracaibo-Venezuela have been heard here and have about the same number of syllables as Sutatenza-ed)
- 750 ● COLOMBIA, Medellín, HJDK, 8/9 0559 w/religious mx, clear Caracol ID 0616. (Pejza, CA)
- +Probably the weak SS station w/clear mentions of Colombia 0732 2/13. (Tomer, CA)
- +Suspected as the nonstop SS w/Bogotá news heard behind WSB with stronger Venezuelan nulled 0348 3/11. (Connelly, MA)
- 750 JAMAICA, Port Maria, JBC, caught end of ID, Jamaica in EE 0500 w/Rock mx in EE and SS mx to 0600, man and woman announcers. Lots of interference and fading. (Williams, CA)
- 750 NICARAGUA, Managua, YNX, 1053 6/17 boosts to S-9+25 with Nicaragua mentions and time checks, good. (Newell, BC)
- +8/30 0600-0625 strong possibility here. SS w/Latin flavor mx. No audible Interval Signal, mucho KCBS-740 and KFMB-760 slop. Test tones 0625 wiped out chances of possible ID. (Lobel, CA) (Not sure but I think YNX w/off is 0600. If so, this would have probably been Venezuela-ed)
- +0500 9/16 w/Latin mx and solid mention of Managua, Nicaragua u/KFQD. (O'Hare, WA)
- +Poor-fair w/SS pop mx, ID 0530 as "La X". Slop from local KSSS-740 0522-0538 10/23. (Orr, CO)
- +11/25 0529 u/WSB w/weak but readable signal, Bee Gees mx, ID at

0530. (Apel, NY)
- +1/31 1100 w/many mentions of Managua. Many "La X" and "Y Cinco" IDs. WSB nulled and slop from KBRT testing. KCBS and KFMB were off. (Lobel, CA)
- +1/31 1115. Woman intoning "X-X-X" o/upbeat song, did that refer to the lyrics of the song? Mainly o/WSB w/fair-good signal. Still looking for Venezuela. (Hall-Patch, BC)
- +2/25 full ID 0430, soft Latin mx. Fair-good in WSB null. (Thomas, FL)
- +2/28 1115 3 "Y Cinco" IDs. Song "Yellow Days" sing in SS. (Lobel, CA)
- +3/25 0445 w/US top 40 and mx of Nicaragua, signal was strong w/little interference from WSB. (George, TX)
- 750 ● VENEZUELA, Caracas, YVKS, potent (well atop a low het) w/SS talk scratchy "R. Caracas" jingle, then US Middle-of-the-Road mx 0010 9/26. (Connelly, MA)
- +0005 11/16 very good w/Latin mx and "R. Caracas" IDs. (Curtis, VT)
- +2350 11/25 Latin mx poor vying w/WSB. IDs as "R. Caracas". (Curtis, VT)
- +Dominant w/ID "R. Caracas, La Voz Automovilista" 0552 11/27. (Connelly, MA)
- +O/low WSB growl w/"Something" by the Beatles, then SS song 0532 3/13. (Connelly, MA)
- +US top 40 mx w/SS top 40 announcer. WSB sometimes hardly noticeable 0720 4/3. (George, TX)
- +YVKS must have changed format: nonstop classical mx totally burying WSB baseball game 0030-0100, SS talk 0100, more classical mx 0100-0230, finally a very low-key "R. Caracas" ID 0300 4/5 mixing w/other Latin. (Connelly, MA)
- +On pop mx format w/KC and the Sunshine Band record, then "Radio Caracas" SS ID, then more disco-rock, atop other SS which was nonstop talk, possibly a baseball game - this likely Colombia 0210 4/20. (Connelly, MA)
- 735 ? UNID, carrier not looping Indonesia 1220 2/14. Appears to be a Latin but nothing listed. (Peterson, CA)
- 758.5 ? UNID, 0131 2/12, weak audio, female vocal, language unid because too weak. (Lankford, TX)
- 760 ● COLOMBIA. Barranquilla, HJAJ, good w/soul-style SS vocal with brassy instrumentation, then "La Voz de Barranquilla" ID by man in SS 0435 7/10. (Connelly, MA)
- +10/11 0826 w/SS mx and talk, "La Voz de Barranquilla" ID. (Orren, WA)
- +In fair-good generally o/interference, including WJR and another unid SS. Had news and ID as "La Voz de Barranquilla" 0012 11/1. (Morby, NY)
- +Ultraloud w/"La Voz de Barranquilla" and "R-C-N" IDs 0626 11/26. (Connelly, MA)
- +In quite well w/lots of lively mx (tropical?) and lots of drums. Heard 0920-40 12/13 w/WJR looped. Had 4-5 records in a row--my kind of station! (Peterson, CA)
- +Noted w/good signal 0939 12/13. (Portzer, WA)
- +Atop WJR w/"La Voz de Barranquilla" ID, SS talk 0430 12/19. (Connelly, MA)
- +Good o/under WJR w/"R-C-N" IDs and news about Barranquilla 0055 12/31. (Connelly, MA)
- +1/24 "La Voz de Barranquilla" ID 0747 by man, Latin mx. Fair signal o/Cuban, u/WJR. (Thomas, FL)
- +1/31 clear on frequency 0102-0113 2/SS talk, 2 IDs, ads, poor. (Orr, CO)
- +Totally dominant w/numerous "La Voz de Barranquilla" IDs, then "Castalia" beer(?) ad 0508 2/6. (Connelly, MA)
- +0133 2/12 fast announcer talk, maybe sports, ID as "La Voz de Barranquilla, R. Cadena Nacional" 0138, strong for over 45 minutes. (McNeil, DC)
- +Noted w/good "La Voz de Barranquilla" ID 1000 2/14. (Tomer, CA)
- +Atop WJR and other Latins w/brassy song w/drum accompaniment,

- "La Voz de Barranquilla" ID, names of listeners 0535 3/13.
(Connelly, MA)
- + "La Voz de Barranquilla" IDs good in null of KFMB after slow Latin mx 0615 4/8. WJR blanked out by aurora. (Hall-Patch, BC)
- + Bombing in w/fast, repetitive dance mx 0130 4/10. (Connelly, MA)
- + Strong w/WJR nulled, "R-C-N"/"La Voz de Barranquilla" IDs, SS dance mx 0510 6/12. (Connelly, MA)
- 760 CUBA, La Habana, CMCI, 1/3 1200 w/many time checks and male announcer giving news. Mixing w/WJR. (Lobel, CA)
- 760 MEXICO, México, D.F., XEABC, w/talk 8/2, ID at 1054. (Pejza, CA)
- + 8/30 0945 w/good ID in WJR null. KFMB off. (Lobel, CA)
- + Good 1133 12/27 w/"R. Internacional" ID, then cuckoos and big ben chimes which were apparently the beginning of a cutesy song w/"clockwork" sounding mx. (Portzer, WA)
- + 0800 1/23 u/KFMB, male announcer but not intelligible. (Aden, OR)
- 760 VENEZUELA, Puerto la Cruz, YVQQ, good, dominant w/SS mentions of Puerto la Cruz 0057 6/11. (Connelly, MA)
- 765 t EL SALVADOR, San Miguel, YSKLB, weak signal, poor audio, SS mx, just not able to ID 1/8 0530-0540. (Tull, MO)
- + 0559 2/13 definite "YSKL" ID followed by "Lone Ranger" like anthem and into open carrier. (That's the El Salvador National Anthem you heard-ed). Again "YSKL" ID then anthem into open carrier w/het from 764 which was likely Senegal, but 765 open carrier remained, 0558 2/14. (Lankford, TX)
- 765 ? UNID, EE rock up out of the noise 0505 6/2, followed by SS male announcer. El Salvador presumed. Also 0525 7/2 w/ad for "Mundo Electronico". (Lankford, TX)
- 770 COLOMBIA, Bogotá, HJKH, 0803 10/25 heard noted like NBC chimes only higher, might have been an organ. Then "Somos (?) somos R. Tequendama, somos Todelar, ..." then three more notes on organ, different from the first. Poor-good w/up tempo mx prior to ID but audio occasionally twisted which made parts of the ID none too clear though there was little interference. KOB off naturally! (Hall-Patch, BC)
- + O/under WABC w/disco-rock, "R. Tequendama" ID 0622 11/26. (Connelly, MA)
- + W/Colombian tropical mx in SS w/frequent IDs 3/3 0626, fair to super strong w/some WABC interference. (George, TX)
- + 4/13, ID as "R. Tequendama" and location mentioned 0633, Latin mx, fair-good o/weak WABC. (Thomas, FL)
- 770 JAMAICA, Spur Tree, RJR, noted surfacing briefly for a few seconds through nulled WABC w/several accented "RJR" mentions in EE, occasional rock mx noted, 0600 1/16. (Connelly, MA)
- 770 PANAMA, Chitré, HOL47, good 0630-0645 10/25 w/KOB absent. Lively Latin mx and "R. Liberación" ID. (Bytheway, WA)
- 770 URUGUAY, Montevideo, CX12, R. Oriental, weak signal on 8/12 at 0015, SS, sport. (Herbst, West Germany)
- 770 ? UNID, 1/31 non-stop easy listening mx (some w/Latin flavor) 0635-0738+. No ID, only single test tone 0708. Still in 0815, gone 0915. Fair-good in WABC null. Not even sure this is Latin but failure to ID suggests non-domestic. (Thomas, FL) (Quite possibly a domestic anyway as many stations seldom, if ever, ID during late night equipment tests-ed)
- 770.5 ? UNID, I've been watching this one for weeks. Often strong around 0030-45, looping northern South American or Caribbean, seldom any audio, sounded SS once. (Lankford, TX)
- 775 COSTA RICA, San José, TIW, "R. Uno", 0352 Emerson, Lake and Palmer's "Lucky Man", several soul/disco tunes, man w/SS talk,

- good in peaks, which reminds me, did you ever notice how Latins always fade up during the mx, but by the time the announcer is talking, it has always plunged into the mud? It drives me crazy sometimes. (McNeil, DC)
- +Soft EE rock, "Riders in the Storm", "R. Uno" ID 0533 7/2. (Lankford, TX)
- +Fair w/"SWAT" theme 0152 7/11. (Connelly, MA)
- +7/25 0505 rock w/ID w/fair signals. (Newell, BC)

- 1005 ? UNID, The Colombian disappeared here by 10/1, although still continuing in the short waves. However, some other Latin seems to be operating all night on this frequency, so far always too weak to deliver any audio. Heard Sunday morning and Monday morning 10/10 and 10/11 in 0700-0800 period. Or could it be the Colombian maybe operating w/50 watts? (Martin, CO)
- 1010 ● COLOMBIA, Barranquilla, HJOP, o/under WINS w/"R. Sutatenza" ID, fast SS talk and mx 0523 11/26. (Connelly, MA)

- 1010 t MEXICO, Torreón, Coah., XEVK, extremely unlikely if WRTH 76 night power of 100 watts and s/off time of 0400 is right. But heard mentions of "en Torreón" and "Gomez Palacio" (a nearby town) during an apparent commercial 0545 12/11. Romantic SS vocals didn't sound like XEHL and no "de-de-dah-dah" electronic Interval Signal noted. CBR was in and out as well as another SS, probably XEHL, and terrible local noise didn't improve matters. Any information on this greatly appreciated. (Hall-Patch, BC)
- 1010 ● PERU, Lima, OAX4U, R. América surfaced briefly w/"O-A-X-4-U" ID 7/25 0941 w/interference from CFRB/XEHL/WINS and the Colombian-1005 slop. (Portzer, WA)

Only Mexican stations heard this morning, no other Latins. Does anyone recognize this? (Davis, GA) (Sounds like XEEB, which has "La Rancherita" jingles w/that melody-ed)
 +6/23 1000 pips (_ _ -). Seems as if it is associated w/SS programming. No loop to tell where it originated. Help! (Korinek, CA) (I've heard the same sort of pips here, too. I am not 100% sure, but I believe they're from XEHL-ed)

1025 ? COSTA RICA, San José, TIAC, SS, classical mx w/talk by man and woman interviewing old men. Faded out during 0330 ID 2/20. Sounded like "R. Tropicana". Interval Signal sounded like Big Ben or large church bells. 0358 prayer, 0401 carrier off. (Davis, GA)

- +In w/great signal 1/31 0822-0845, clobbering Mexican most of the time, no sign of the Colombian often heard here, WBZ and KTWO off. Nonstop talking, couple of male voices and no mx heard. Several mentions of Buenos Aires and the ID heard was "R. del Plata". This is the third time I have run into fabulous reception of LS10 on a date right at the end of January. Other times were 1/31/73 and 1/29/74 and both fully covered in the Foreign Logs for those dates. This surely a provocative of thought calendar connection. LS10 format apparently unchanged in recent years between 0800 and 0900, always an all-talk station. (Martin, CO)
- 1030 ● COLOMBIA, Cali, HJER, heard w/SS mx and "R-C-N" ID 0732 2/14, then "R. Pacifico" ID 0735 preceded by what sounded like someone tripping over a Hawaiian guitar. (Bytheway, WA)

+1/12 2300 jazz-type Latin mx w/many IDs, S-4 to 9+ signal most of the time! This is not really 250 watts is it? It was wiping out WHO. Haven't heard this before. (Davis, GA)
+Very strong 0200 2/12 w/two IDs, into news on Castro, several Latins under, definitely not 250 watts! (McNeil, DC)
- 1040 ● VENEZUELA, Valencia, YVLB, fair-good, slightly dominating over several other Latins (bad growl present). "La Voz de Carabobo" jingle and SS talk noted 0158 9/26. (Connelly, MA)
- 1045 ? COLOMBIA, HJ??, a Colombian w/frequent mentions of RCN was located here for a week or so in mid-January, often w/pretty fair volume, yet a strange sounding station. In 0500-0800 period. The audio was often poor and when you turned on the BFO, the resulting whistle did not sound right, so I wonder if it might have been a spurious signal from some other frequency. Think it disappeared by the end of the month and the faint carrier heard there 1/31 is probably the Panamanian. (Martin, CO)

 +Strong and totally dominant w/many mentions in SS of Carúpano 2349 4/20. (Connelly, MA)
- 1115 NICARAGUA, León, YNP, 1/30 0730 playing the entire "Tommy" album by the Who. "R. Circuito" IDs every 15 minutes or so. "Tommy" is seldom heard, even on progressive US rock stations. Three cheers for Latins. (Davis, GA)
- 1115 [?] UNID, 0345 2/14 male SS announcer, into EE vocal, heard what sounded like "R. América" ID earlier, anthem (?) 0400 and into open carrier (?). Tentatively Ecuador. (Lankford, TX)

+Uses "R. Sensación Popular" IDs. (Lobel, CA)
- 1150 ? UNID, probably XEJP here coming in very weakly u/CKOC 10/18, heard while waiting for WSKW's equipment test at 0715-0730 w/ranchero mx and man IDing recordings. Seems to be Latin-type conditions here lately. (Gerardi, IL)
- 1155 EL SALVADOR, San Miguel, YSCF, Ondas Orientales, no doubt what I heard (since the Nicaraguan's s/on is later) 1117 1/17. Signal quite weak. Frequency checked very close to 1155. New for me. (Peterson, CA)
+Fair 0206 2/12, several ads, time check by announcer, more talk, into song. Faded 0209. (McNeil, DC)
- 1155 NICARAGUA, Managua, YNH, "R. Consigüina" mostly o/El Salvador on 1155.2, IDed 0107 5/6. IDed as "Chinadega", but a Managua relay. (Schatz, FL)
- 1160 ● COLOMBIA, Barranquilla, HJBL, R. Aeropuerto noted w/musical program from Cadena Libertad 0255 4/7. Previously, this network had functioned only for newscasts. Program still going at 0400. (Stanbury, ON)
+Is still using the "R. Aeropuerto" ID, 0310 5/9 and many times since, thus "La Voz de Sudamerica" must be somebody else, though both are Cadena Libertad affiliates. (Stanbury, ON)
- 1160 ● ? COLOMBIA, 1/24 0835+, frequent IDs as "Colombia... La Voz de Sudamerica." Miscellaneous Latin mx. Fair-good signal o/weak KSL. (Thomas, FL)

+11/22 1001 w/S-9 signal, man talk in EE, to 1030 w/religious program, man talking unreadable, best 1048 w/religious talk. At 1106 w/news S-8. All EE but no positive ID yet. (Seaver, CA)
+Good w/man in EE 2147 11/26. (Connelly, MA)
+Fair audio but lots of slop and test tone from KLOK-1170 preventing decent tape 1025-40 12/13. This is the best signal on this yet. Might be able to report soon if KLOK-1170 would cooperate. (Peterson, CA)
+Noted 2140 12/23, not nearly audible but w/fair signals, and the entire path in daylight! (Stanbury, ON)
+Best ever here on my receiver, using loop. 1/14 2200 w/news. (Davis, GA)
+Heard religious program 1044 1/24 but KSL-1160 messing them up

so could not get ID. Back again next night (who says you can only DX Monday mornings) w/end of religious program 1033, followed by ID as "Caribbean R. Lighthouse" (which caught me w/my recorder off since I thought religious program had just started), into mx request (written) program featuring religious mx. Good signal for awhile but KSL-1160 did not stay down for long. Country number 32. (Oliphant, AB)

+Fair in WCOP-1170 slop w/religious program, time pips, BBC news, 2359 1/24 to 0001 1/25. (Connelly, MA)

+2/28 1001 anthem, s/on announcement, several "Caribbean Radio Lighthouse" IDs, then into religious program. First positive ID. (Seaver, CA)

+Carrier and some audio 1040 2/28 competing w/KSL-1160 and KLOK-1170 slop. (Peterson, CA)

+W/end of classical mx program 0159 3/4, ID on hour w/mention of s/off, into small religious talk before going off. Fair-poor signals w/KSL-1160 and 1170 interference. (Oliphant, AB)

+3/5 0112 hymns, poor w/fading. (Curtis, VT)

+4/3 despite heavy splatter heard w/religious syndicated show 0021. (Dunn, NS)

+Very good w/choral religious mx 0025 4/3. (Connelly, MA)

+Good w/religious program on 4/21 0203. (Curtis, VT)

+4/27 0117 just a het in KSL-1160/KVOO-1170 slop. (Orr, CO)

+Very good, announcer was asking for more letters from listeners, to be sent to Box 382, St. Johns. 0035 6/12. (Connelly, MA)

- 1170 ● COLOMBIA, Cartagena, HJNW, fair-good w/SS "porteña" mx, "La Voz de Heródica" ID, 0431 7/11. Dominant o/growl of hets. (Connelly, MA)
- +10/10 0428 heard w/potent signal and "La Voz de Heródica" ID, Eastern Standard Time time checks, many mentions of Cartagena. This one often heard evenings o/WWVA and KVOO. (Forth, IL)
- 1170 MEXICO, Reynosa, Tams., XERT, coastal daytimer. Call IDs. Popular mx format (Julio Iglesias, Angeles Negros, etc.). (Schatz, TX)
- 1175 COSTA RICA, Puerto Limón, TIQ, fair w/EE talk, then old-time Latin influenced mx 0511 4/17. (Connelly, MA)
- 1176 ? UNID, SS, commercial format, Middle-of-the-Road SS mx 1/8 0250. Good to lousy signal w/bad 4 khz het. Very fast SS w/"Coke" commercial 0304. Who is this? (Davis, GA) (probably TIQ-ed)
- 1180 BRAZIL, Rio de Janeiro, PRE3, "R. Globo" strong signal on 8/15 at 0135, PP, sport. (Herbst, West Germany)
- +Note: this station has since moved to 1220-ed.
- 1180 CHILE, Santiago, CB118, excellent signal from 1110 onward 5/31, UTC minus 4 time checks, ID as "Portales", and ended a 10 minute program feature. Precision Frequency Measurement taken at 1118 6/14 read 1180.025. Without question, the best bet for Chile. S/on at 1030 but usually weak until after 1100, perhaps due to power boost. (Peterson, CA)
- +Solid signal 1030-1130 6/14 w/"Portales" IDs and lots of SS talk. Had distinctive NBC-type gongs at 1032 and played "76 Trombones" at 1100. (Bytheway/Orr, WA)
- +Coming in strong 7/2 1059-1115 mixing w/Mexican. Heard one "R. Portales" ID, but later found tape recorder was not hooked up. Mx and talk. (Pejza, CA)
- 1180 CUBA, Isla de Pinos, CMBM, w/"Reloj Nacional" format 0836 9/4, some problems w/WHAM but those ticks can cut through just about anything. (Oliphant, AB)
- +Here Sunday mornings w/news, time ticks, etc. (Forth, IL)
- +0718 1/9 weak on TRF w/"Minuteman" format ("Reloj Nacional"), WHAM was off. (Falconer, ON)
- +The Cuban was noted w/news in SS w/many mentions of Habana atop a Latin (slightly lower in frequency, perhaps 1179.6) w/SS vocal 0704 2/6. Hoping for Chile, I tried every trick

- possible to pull an ID out of the lower frequency Latin, then WHAM slapped a bodacious open carrier on 0707, ruining any chance of extracting an ID. WWVA-1170 splash was quite bothersome also as both Latins were weak. (Connelly, MA)
- +0249 4/27 mixing w/VOA w/"Reloj Nacional" news and IDs, poor. (Orr, CO)
- +6/12 0225 SS news, "R. Reloj Nacional" ID, poor w/1170 and 1190 slop! (Beauregard, PQ)
- 1180 ● VENEZUELA, Ciudad Ojeda, YVNJ, finally caught the "Radio Petrolera" ID for this one 0926 3/20, typical Latin mx w/poor-fair signals. (Oliphant, AB)
- 1180 ? UNID, SS 1/23 1140 w/news by man regarding Coffee prices, Ford-Palmer golf match, etc. 1145 went into Middle-of-the-Road or popular classical version of "Swing on a Star", 1155 "Everything is Beautiful" by Johnny Mathis in EE. Partially wiped out by WHAM s/on 1158, mixing w/WHAM 1202 w/what sounded like news. (Jaisun, WA) (Maybe VOA, Marathon Key, FL-ed)
- 1187 ? UNID, 8/15 0510 producing a nasty 3 khz het to the 1190 mess. Strong, much too strong for R. Caroline. Noted strong auroral effects, so that further rules them out. Maybe a deep South American. (Dale, MO) (TGT-1186 most likely-ed)
- 1188 GUATEMALA, Guatemala, TGT, "R. Sonora" fair w/operatic SS male vocal, CHTN-1190 slop 0158 6/14. (Connelly, MA)
- +Fair w/SS mx, male vocal, R. Caroline-1187 reduced to a weak het by auroral conditions, 0004 1/25. (Connelly, MA)
- +Booming in w/25 over S-9 ID "R. Sonora de Guatemala" 0320 2/11 w/vocal mx, few announcements, fewer IDs and many deep fades. (Lankford, TX)
- 1190 ● COLOMBIA, Barranquilla, HJCT, 1/24 0635-0645+, miscellaneous Latin mx and IDs as "La Voz de la Costa". Fair signal w/fuzzy audio. No WOWO. (Thomas, FL)
- 1190 MEXICO, Guadalajara, Jal., XEWK, w/ID 11/15 0233 as "La Voz de América Latina" and "X-E-W". Good w/no KEX heard. (Oliphant, AB)
- +Ranchera mx came through CKDA-1220 slop 1150 12/19. Then nice "X-E-W" ID at 1153, "Muy buenos días señoras y señores", more "X-E-W" IDs and mention of various transmitter sites and frequencies. Poor-good o/under CKDA-1220 slop. Seems to be slightly earlier s/on than noted in WRTH. (Hall-Patch, BC)
- 1190 ? UNID, 1247 1/23, 2 SS here. The first had ranchera mx and really hyper "Once Noventa" ID and prerecorded ID 1243 as "R." very-very fast w/slogan repeated several times (not Mexicana or Cordillera). The second station has medium key man talking, occasional hyper promotions or spots, quick rocket takeoff whistle heard twice. KEX s/on 1255 wiped them out, although one station still audible w/KEX. (Jaisun, WA)
- 1196 t HONDURAS, San Pedro Sula, HRVW, something new to me noted about 0350 8/30 very weak and may have left the air by 0400. Believe I heard marimba mx, was much weaker than the Guatemalan on 1187, but a Latin for sure. (Martin, CO)
- t +Latin present, looping South during unfavorable high-band TA conditions. An emotional SS male vocal briefly rose above the TV birdies 0020 1/31. (Connelly, MA)
- t +Possibly the weak station here w/operatic male SS vocal 0702 2/6. (Connelly, MA)
- 1196.67 ? UNID, SS 2/20 0055, mild SS mx and man talking between songs. Fairly weak signal w/lots of snap, crackle and pop from storm. (Davis, GA)
- 1200 ● COLOMBIA, Riohacha, HJZW, "R. Almirante" has been noted 0255 6/10 topping the frequency on many occasions since. May

indicate a power boost. (Stanbury, ON)

+Good o/a growl of low hets w/fast SS talk, mentions of Venezuela 0030 1/31. (Connelly, MA)
+2/14 0740 w/"Radiotiempo" ID, mx. Weak w/noise, WOAI off. Better by 0755 when I got back from raiding the refrigerator. (Lobel, CA)
+0607-0625 2/21, Latin mx and a few "Radiotiempo" IDs spaced out, signal was weak and not up to past experience w/this one. (Gerardi, IL)
+Atop WOAI w/"Radiotiempo" ID, then instrumental of "It's Impossible" 0622 3/13. (Connelly, MA)
+3/21 0758 w/fair signal, mx until 0800, then "Radiotiempo" ID. Suspect WOAI was testing w/low-high-low test tones and no ID, which was off by 0758 when YVOZ surfaced. (Lobel, CA)
+3/28 0810 S-9 w/good "Radiotiempo" IDs. Venezuelan style mx, some very slight noise, WOAI was off. (Lobel, CA)

1205

CAYMAN ISLANDS, Georgetown, "R. Cayman" here Sunday morning 11/21 just after s/on w/"Yellow Bird", then program //1555. Not heard 11/22 to 1210 despite repeated checks. Note Sunday morning s/on is an hour later than weekday s/on. (Seaver, CA)
+Now has second medium wave frequency on. Noted 0145 11/27 //1555. (Stanbury, ON)
t +Must be the source of the fair carrier here looping exactly the same direction as 1555 1105-10 and 1120-30 12/13. Fantastic Latin morning! (Peterson, CA)
+W/folklore program regarding religion. Woman announcer 1/7 0320, man 0323 w/Bible readings and hymns. (Davis, GA)
t +Carrier only, measured as 1204.997+1 at 1112 1/10. Stable since last measurement. (Peterson, CA)
+Surely the one here w/carrier and occasional bits of what sounded like mx and accented EE talk 0319-0335 1/14. Seemed to go bye-bye sometime around 0335. (Portzer, WA)
+1/17 1056 //1555 and w/better signal, w/usual s/on particulars. WOAI-1200 off, slight WCAU-1210 slop. (Korinek, CA)
+Fair w/mx //1555. France not noted, high end moribund for TAs although low end of the band was open, Cayman Islands noted 0208 1/23. (Connelly, MA)
+W/religious program "The Voice of Prophecy" 1107 1/24 //1555, into another program "The Crossroads Hour" (which they said would last 15 minutes!) 1115, beginning to fade 1129. Assumed to be the one w/religious mx 1108 1/25 but did not stick around for more details. (Oliphant, AB)

- +Dominant w/Tammy Wynette Country Western song //1555 2353 1/26.

- +Via verification from R.G. Dunlop, R. Cayman is now 10 kw.
(Korinek, CA)
- +0220 1/31 fair w/some kind of speech by woman //1555.
(Falconer, ON)
- +Fair-poor 0328 2/1 w/bits of audio which faded up in the form
of a hymn (male chorus), then weak ID 0324. New country here,
1555 is a poor bet for me due to local KZAM-1540.
(Portzer, WA)
- +Good in het 0107 w/SS BBC-type comedy program //1555, both
about equal in strength 2/12. (McNeil, DC)
- +Fair in EE 0043 2/18. (Connelly, MA)
- 1205 [?] UNID, 11/26 0336 man in unknown language, very possibly EE.
Off at approximately 0338. Signal was S-6, WOAI-1200 and KGYN-
1210 proved almost too much. (Hanavan, CA) (I suspect you had
R. Cayman. One reporter heard the 1555 outlet w/0335 s/off-ed)
- +Playing uninterrupted easy listening mx 11/28. Played Ray
Price "For the Good Times" 0234-3 bells then time ticks 0300.
Male British announcer into BBC World Service news to 0315, no
song titles or announcer activity. Gave ID just before and
after 0300 but too much slop from WOAI-1200. Strongly suspect
Cayman Islands as per WRTH. Program similar to that heard
11/26 on 1555. Checked for possible parallel but no het heard
11/28 on 1555. (Maloney, OK)
- 1208.5 ^a CUBA, Morón, CMJX, good w/vocal mx, SS talk in WCAU-1210 null

ideas? (Hogan, IL) (Cuban?-ed)
- 1212 ● COLOMBIA, Cúcuta, HJBE, R. Internacional, suspected as the RCN

peaks 0001 2/11. (Connelly, MA)

 +1/4 0630 fair-good fighting WGAR. Distinctive "whoop-whoop" ID signal, followed by man shouting "R. Cuatro". This station is parallel on program style to XEMP-710, R. Dos, XESM-1470, R. Cinco, XERPM-660, R. Uno, XEDF-970, R. Trés, and XERH-1500, R. Seis. The last three listed have been heard here quite often.  +EE religious show 0920 7/25 w/man talking. Mx at 0930, then seemed to go into another program. No ID heard due to KYA-1260/KYAC-1250 slop. (Bytheway, WA)
 +Noted 8/2 0440 w/religious mx and requests in EE w/excellent signal. WRTH lists this one signing off at 0300. First heard 0225 and listened right through until 0440 when I had to go to work. (Baker, South Africa)

 +Must be the source of the strong carrier noted 1040-1110 2/14. KYA-1260 was fairly easy on me for a change, except for a little slop. (Peterson, CA)
 +Just a carrier 1030 2/28 fighting bad KYA-1260 slop. (Peterson, CA)
 +0215-0302 3/2 w/fundamental-style EE preaching, hymns, etc., interspersed w/fading, EE scripture, a benediction mentioning "R. Paradise", choir mx, and carrier cut. Don't they ever give full IDs? (Lankford, TX)

- 1290 ? UNID, SS in and out among various domestic testers 0708-0739 6/21. Featured lots of brassy uptempo vocals, but no IDs noted. Did have a Carta Blanca commercial at 0717 and possible mention of México, so possibly Mexico City. (Portzer/Bytheway, WA)
- 1300 MEXICO, Nogales, Son., XEXW, 1/22 2335 w/many mentions of Nogales and "XEXW, R. Trece" IDs. KWKW uses this ID too, but I'm sure of XEXW calls. KWKW was nulled to get this one and with a different announcer. (Lobel, CA)
- 1300 ? MEXICO, "R. Sensación" weak-good w/interference and a Sub-Audible het. Lots of "R. Sensación" IDs like the Mexican on 1490, but nobody listed in WRTH. KWKW off and testing intermittently 0700-0722 8/9. (Clements, CA)
- 1305.8 t PARAGUAY, Asunción, ZP10, not IDed 0850 10/30 but IDed by playing the same sort of mx that the Paraguayan on 645 does. The direction finder was right. Paraguay-835 was logged a few minutes previously and found it conveniently listed in the WRTH u/"1306"! (Schatz, FL)

- t +Heard 0730-0800 8/23. Station gave complete ID on each hour and half-hour in which the call sounded like XEEM and location like Nogales but I wouldn't bet on it. I'm positive of the slogan, XE prefix and power which was 5 kw. 75 WRTH lists Nogales as XEHF-R. Familiar, so I'm simply logging this as XE__-R. Variedades" until I find out whether this is a new station or a call and slogan change for Nogales. In either case, this station not previously logged here. (Korn, CA)

- 1550 COLOMBIA, Barranquilla, HJAX, R. Quince has a nightly harmonic on 3100 khz. They were also heard w/strong but very distorted spur on 1710a from 0330 11/7 and again shortly after 0000 11/8. They no longer seem to use their call letters in their ID announcement even though they were doing so as recently as 9/26 when heard on 1550 at 0600. (Stanbury, ON)
+Logged 0345 2/15 through considerable interference but easily IDed by parallel w/harmonic on 3100 which was in the clear. (Stanbury, ON)

- 1550 MEXICO, Tijuana, B.C., XEBG, noted w/SS mx and ID 0721 6/14. Can't recall them staying on after midnight before so possibly a schedule change. Severe KZAM-1540 slop. (Portzer, WA)

- 1555 CAYMAN ISLANDS, Georgetown, According to a newspaper report, Radio Cayman went into full operation on July 22, 1976. The station, South of Cuba, is using this frequency. The report said that the station would be audible in all three islands of the colony as well as in neighboring countries. (SCDX)
 +Heard 11/1 0020-0035. Strong signal, some WQXR-1560 splash but an easy logging. (Stanbury, ON)
 +Per tip from Gordon Nelson, R. Cayman was noted w/good signal w/anthem at s/off 0140 11/1. (Connelly, MA)
 +Testing w/variety of mx before 0200 11/2. No ID heard. Strong but audio somewhat distorted at peaks. (Schatz, FL)
 +Fair w/classical mx program, then ID "You are listening to R. Cayman Islands, Grand Cayman Island, the time in our studio is 7 o'clock", then old instrumental "Out of Limits". Monitored 2358 11/5 to 0002 11/6. (Connelly, MA)
 +Excellent many evenings w/het against France-1554 until they s/off 2300. Have noted BBC World Service news on the hour. Has a chime or bell Interval Signal on the hour w/ID "This is R. Cayman, the Voice of the Cayman Islands". Noted on past 0300 11/6 but off by 0500 so maybe 0400 s/off as WRTH notes. (Eckman, PA)
 +Has been heard w/good signal. S/off around 0500. Programs in EE. (Coleman, NC)
 +Heard 11/7 and 11/8. On Sunday morning 11/7 S-8 open carrier noted 1134. At 1154 calypso mx, man w/"Radio Cayman, the Voice of the Cayman Islands... 1555 khz...", then "Yellow Bird" (presumed it is the Interval Signal). On Monday morning 11/8 noted open carrier at 1045, tuned at 1057 to catch "Yellow Bird" organ Interval Signal. Listed as 1100 s/on. (Seaver, CA)
 +Here 11/7 0328 at end of religious program. At 0330 a single long pip, then an announcement by a woman in what I think was EE. A man said a few more words, then there was instrumental mx. Abruptly, in the middle of mx the station left the air completely. Thanks to Greg Atkins for tip on this one. Must be the new outlet in Cayman Islands. A very loud noise buzz kept me from getting a better reception but looped to Caribbean. (Nall, KY)
 t +Noted weak carrier here 11/9 0345 looping Southeast. No audio discernable and gone by 0350. (Hall-Patch, BC)
 t +Very likely the weak signal I monitored 1030-1130 11/15. Had carrier only to 1055:45 when mx began. Mostly soft mx and singing w/no voice announcements that I could hear, even at s/on. Signal was steady until near 1130 when considerable flutter was noted, corresponding closely to sunrise time at Cayman. KRGO-1550 provided the most interference. Loop was Northwest-Southeast. Frequency was measured as 1554.993 at 1038 (+0.0008 khz plus gate error). This would be a new

country for me. (Peterson, CA)

+11/15 1055 s/on s/S-9.5 signal. Gave full details and followed by song "Yellow Bird" played on organ. Some KRGO-1550 slop. Had open carrier for 5 minutes before s/on. (Lobel, CA)

+S/on 11/15 1055:45 w/perfectly clear and readable ID. (Seaver, CA)

+Fair signal w/comedy or play 2344, soft mx, ID by woman and Eastern Standard Time time check 0000 and into popular mx program w/Sly, 3 Dog Night, etc. Slight interference from WDXR-1560 this on 11/18. (Forth, IL)

+S/on and ID, excellent signal and modulation, in loud 1100 11/19 w/light mx and announcement in EE. (Manning, CA)

+S/on Sunday morning 11/21 1156 //1205. On Monday morning 11/22 this did not s/on at regular 1055 nor at 1155. Last checked at 1205. (Seaver, CA)

+11/24 s/on at 1056:30 following "Yellow Bird" organ Interval Signal at 1056, in good as usual. Noted religious mx beginning 1101. Chime Interval Signal followed by "This is R. Cayman Islands, the Voice of the Cayman Islands. The time is now 7 o'clock" at 1200. (Korinek, CA)

+11/24 was tuned to this frequency and at 1054 heard open carrier become calypso mx and shortly thereafter "Yellow Bird" heard. However, KRGO-1550 slop was horrid. No announcements heard at all. What would pass for religious programming noted after 1100, but signal extremely poor. Tried again 11/29 1054-1100 and 1154-1200 but nothing at all heard either time. (Kaskey, CA)

+Fair w/reggae mx, slop from WPTR-1540 0022 11/27. (Connelly, MA)

+S/off is 0335. As of 11/28 they were still not announcing 1205 even though on. (Stanbury, ON)

+In w/good carrier but audio awfully mushy 1054-1115 11/29. Only about 1% readable, no report yet. (Peterson, CA)

+12/1 was tuned at 1055 but nothing heard. Back again 1116 and noted 2 stations now here. Dominant w/hymns in EE, other man talking. Faded down, back up 1125 w/"Rock of Ages". Again 2 distinct signals 1128, man still talking in Oriental language and hymn player w/no announcements between songs. Up again 1135 and held past 1143. Had faded out by 1155 and some Mexican bombed on 1560 at 1200 to kill further DX there. No IDs but certainly expect R. Cayman and Philippines. (Kaskey, CA)

+First show of audio came 1055-1130 12/6. ID garbled but "Yellow Bird" clear. Then the big one on 12/13! S/on 1055:55 w/mx (not Yellow Bird), clear ID 1057, then "Yellow Bird" on organ ending at 1100:00, then 6 o'clock time check, then Christmas carols. At 1115 3 chimes (medium, high, then low) and time check. Recheck at 1205 still some audio, at 1230 -- an hour after Cayman sunrise -- still had an intermittent carrier! Precision Frequency Measurement: 1111, 12/6 1554.990+2; 1107 12/13 1554.990+1. Seems very stable. Joyfully reported! (Peterson, CA)

+12/13 0355 strong open carrier here was most likely this one. Did not wait for any audio. (Lobel, CA)

+Fair w/Muzak instrumentals ("Raindrops Falling on My Head", "Memories are Made of This", etc.) 0222-0233, ID by woman 0233 12/31. Signal excellent 0230 when ID should have been given, by 0233 it was being annihilated by pestiferous WPTR/WQXR/CKLM garbage. (Connelly, MA)

+In fair w/mx in FF, measured as 1554.999+1 at 1115 1/10. (Peterson, CA)

+W/slight fades occasionally over S-9+20! Precision Frequency Measured at 1554.9. Program //1205. Much better signal here than 1205, however, 1205 is very readable. (Davis, GA)

+Fair w/soul record "Funny How Time Slips Away" 0005 1/22. Good w/"Fooled Around and Fell in Love" by Elvin Bishop 0208 1/23. (Connelly, MA)

+W/ID 1100 1/24 as "You're tuned to R. Cayman", into religious programs as described on 1205, fair signals w/some KKA-1560 s/on interference. (Oliphant, AB)

- +Fair-good w/"Disco Duck" record 2341 1/26. (Connelly, MA)
 t +1058 2/1 definite carrier noted here and thought I heard a few faint bars of "Yellow Bird" in the 1550 slop. Tape wasn't running however, so this one still eludes me. (Hall-Patch, BC)
 +0308 2/7 in the clear w/devotional. S/off 0316 w/mention of ownership by the Government of the Cayman Islands, list of operating frequencies of this and other transmitters, returning to the air at "5:55 tomorrow morning", closed program w/"God Save the Queen" instrumental, open carrier still there 0350. (Lankford, TX)
 +2/9 0015 EE female announcer, familiar rock/folk tunes such as "Leaving on a Jet Plane", "100 Miles", sounded like a request show. At 0030 British drama. Poor w/interference from CBE-1550 and WQXR-1560. (McClenaghan, ON)
 +Fair w/mush mx (Johnny Mathis) 0028 2/18. (Connelly, MA)

 +Good w/man in EE during heavy aurora 0116 5/3. (Connelly, MA)
- 1555 ? UNID, sat on this frequency 1100 11/1. Looped Northwest/Southeast, so I was hoping for Cayman Islands, but not even a peak of audio. Not Philippeans since the loop was wrong way for that. Ah, tantalizing carriers, where would we be without them. (Peterson, CA)
- 1560 CUBA, Cárdenas, CMGB, 10/18 0930 alone and fair signal w/ID. (Nall, KY)
 +12/6 0905 very strong suspect w/news and frequent time checks. Slop from 1550 too much for much to be intelligible. (Lobel, CA)
 +1/3, ID 0900 as "R. Reloj", then continuous news fair-good w/out interference. CMGK-930 also better than usual this Monday morning. (Thomas, FL)
- 1560 MEXICO, Ciudad Juárez, Chih., XEJPV, 12/13 s/on and many "X-E-J-P-V, R. Chamizal" IDs by men and women announcers. Heard and reported to before but never verified. (Lobel, CA)
- 1560 MEXICO, México, D.F., XEVIP, 3/19 "R. V-I-P" IDs, CBS news, popular, Country Western mx in EE. Taped time checks. Fair-good 0400-0415+. (Thomas, FL)
- 1570 t GUATEMALA, Guatemala, TGVE, 3/19, hell-fire religious sermon and gang singing in SS 0435-0518+ "La Voz... de América" ID and mention of Guatemala. Fair-good w/XERF interference. (Thomas, FL) (Believe that should be "La Voz Evangelica de América"-ed)
- 1570 t MEXICO, Ciudad Acuña, Coah., XERF, heard here 6/25 0329 with religious program in EE. I must regard this as a tentative logging as reception was poor and signal very weak. No ID was heard. (Baker, South Africa)
 +Comes in very good, especially lately, w/EE gospel mx and programs w/ads trying to sell gospel hit records. (Endza, CA)
 +0300-0330 10/22 w/excellent signal w/religious programming. (Orr, CO)

- 1580 h DOMINICAN REPUBLIC, Samaná, HIWJ, R. Samaná's harmonic often heard on 3160. S/off noted as 0155 3/29. (Stanbury, ON)
- 1580 MEXICO, Hermosillo, Son., XEDM, 0300 6/5 w/ranchero mx o/under KDAY w/poor IDs. Why this wasn't in the log earlier beats me! (Newell, BC)
 +9/6 0535 at times overpowering KDAY w/S-10 signal. Male announcer. (Lobel, CA)

- 1580 ? UNID, someone testing here w/open carrier and tone 2350 12/13 past 0030, also the following night 2330+. Again 12/25 well atop CBJ 2315 and tone clearly audible w/CBJ 2357. It seems unlikely, though not impossible, that this is a US station. (Stanbury, ON)
 +The mysterious tester first noted in December is still here, heard 0040 4/7 w/tone well atop the frequency. (Stanbury, ON)
- 1596.9 ?a UNID, 2/4 0330 mild SS mx. Mucho interference plus very few announcements equals bad copy. This could be a spur w/my 1650 Intermediate Frequency and all. (Davis, GA)
- 1597 ? UNID, 0423 2/14 not enough audio for a guess, perhaps Dominican Republic. (Lankford, TX)
- 1602.6 DOMINICAN REPUBLIC, Santo Domingo, HIEG, "R. Fémina" now up here from nominal 1600. (Schatz, FL)
- 1606 ? UNID, fair signals w/man and woman in EE in and out, been trying for quite a while on this. Ideas? 0650 11/20. (Manning, CA) (Probably either a pirate or some stations relay transmitter for remote operations-ed)

NETHERLANDS ANTILLES. According to Association Press in the 23 May Los Angeles Times "Oranjestad... Independence is just down the road for the six islands of the Netherlands Antilles. However, some politicians on this tiny island want Aruba to strike out on its own. 'We want independence, but we want it for Aruba alone' says Gilberto (Bético) Croes, 38-year old leader of the island's largest party, the separatist-minded Movimiento Electoral del Pueblo. The Netherlands, on the other hand, is dead set against piecemeal independence. Its commitment is the establishment of an Antillean Federation made up of all six of its island possessions in the Caribbean." (SWNS, June 76)

+like a local 0400 8/18; chimes & ID in FF. (Nelson, MA)
+This has been the outstanding LF TA here this season, tnx to the well-deserved demise of WGU-20 last May (tho they do still test occasionally w/OC!). Doesn't peak at the same time or on same nites as 164, but they do have very similar sounding programming. Closest QRM is RTTY around 183. (Foxworth, NY)
- 185 EAST GERMANY, Oranienburg, fine in GG w/ID 0200 8/20; frequency measured as 185.0002. (Nelson, MA)

- 245 t TURKEY, Erzurum, fair-poor sig noted at tune-in 0337 8/19; man in unid lang at times could have been Turkish; sig faded rapidly & did not return that night. Freq measured 245.0033, is OK for Erzurum but rules out Denmark which has perfect freq control (& is not sked on at this time). The only other possibility is the new USSR stn tentatively IDed as Taldy Kurgan recently, but probably too late for him. No possibility for // check w/1016 that night as MF faded about 0305 as expected. (Nelson, MA)

- 558 IRAN, Qazvin, weak carrier on measured 558.0001 at tune-in 2345 9/14. Continued to improve as the evening wore on w/ Ramadan audio on peaks every few minutes; signal peaked at 0045 just prior to s/off w/carrier cut 0048. Mean DF bearing (25 cuts) 43.1°; calculated great circle bearing to Qazvin is 43.8°; uncertainty on measured bearing +1.2°. Logged for country #134. I've been after Iran since 1963 & believe this is the first NA logging. This logging made during the best TA cx since 1965. (Nelson, MA)
- 566 IRELAND, Athlone, Rugby match, Ireland vs ??, fair sig, accented EE, obviously 150 kw Athlone, signal didn't reflect the power, though, 10/13 2202. (Dunn, NS)
 Fair-good w/Irish mx 2059 10/23. (McGonagle, Iceland)

- 575 BULGARIA, Vidin, 2nd pgm, 2134 5/14 pop songs & eastern mx, Bulgarian anmts, little fading. (Padula, Australia)
- 575 t SUDAN, Omdurman, unid TA noted on measured 574.4701 2320 9/14; quite weak w/no readable audio due to poor signal quality and QRM from 575. Not Bechar, which was strong at the time & mixing w/Germany on this channel. The unid TA gave DF of 65+5°; Sudan is a calculated 68°. My reasons for suspecting Sudan are: 1) according to the latest EBU list all stns monitored by them recently have xlnr freq stability; Sudan was not monitored by them, however. 2) DF rules out everything listed except for Bechar, which was audible on 575 at the time. 3) The Egyptians were on this night w/Ramadan & were very well rx'ed at the time. There is enough circumstantial evidence to warrant careful listening on this channel; Sudan has never been logged in NA to the best of my knowledge. (Nelson, MA)
- 575 WEST GERMANY, Muhlacker, SFR, riding just o/noise 1434 10/9. (McGonagle, Scotland)

- 648 GAMBIA, Banjul, new R. Gambia xr first noted 8/18 2353 on measured 648.0001 w/US pop rr mx. Sig was so strong & clear that I assumed it was just a local carrier current stn starting up for the season & passed it by w/o getting an ID. The

next day I helpfully misinformed Bill Bailey who'd noted it also that it was a carrier current pest. After not hearing it during the day one weekend my curiosity was piqued & I went after them seriously as sunset & immediately spotted it as a W African from the DF. The sig is quite good most nights; presumably this is the new 20 kw outlet listed in 76 WRTH, although they sound stronger. Lots of African mx which sounds like progressive rock; man ancr in EE w/a deep voice & decided accent. Not a new country - we got R. Syd-908 in 1973 - but still a thrill anyhow. Should be widely hrd for a new country for everyone else; noted on as late as 0100 some nights but leaves carrier on NSP. (Nelson, MA)

656 t ● USSR, Murmansk, carrier from about 20° w/fragments of audio on rare occasions every AM 11/19-11/23, but not on 11/24. Times of reception ranged from 0625 11/19 to as late as 0916 11/21. The carrier was still in at 11:16 a.m. in Murmansk! On MM 11/22, N. Korea showed up on 655 at 0810 & when I turned my loop to due N. & tuned to 655.5 I found a quite audible het between the 2. These 4 nights a time of incredible sigs from N. Europe & I caught the best sigs ever from BBC on 647 & 881. On the tape are a few voice & mx portions too far down to be classified & also noted the sound of 2 stn QRM now & then. On 2 occasions taped a single pip on the hour but can't be sure the pip was not slopping from some adjacent freq. (Martin, CO)

656 ● UNID, something from the NE hetting YSS 0234 10/8. Has been a great season for TA carriers minus audio most cases, including some freqs never noted before. Can't list everything but new TA carriers include 728, same date 0233, 863 0318 10/8, 1475 0422 10/8. (Martin, CO)

Reception just before 9 am in Murmansk, but above the Arctic Circle in early Nov it's still very dark at 9. Signal both times was definitely better around 0645, then went downhill & could not be located by 0715. Seemed to come up about every 5-6 mins but the few audio bits on tape are too poor to be classified. Arctic cx were very good, for Thule-1425 noted 11/8 0942. Thule & Murmansk are on about the same bearing from Denver. (Martin, CO)

- 737 UNID, on a tip from Glenn Jacobs in PA tuned here 0345 7/7 to find a weak carrier from Barcelona on 737.0001. Second carrier came on 0350:50 on 737.0323, unambiguous DF for Central/South Africa. Some audio around 0402-0405 but not enough for positive lang ID, but did not sound like RNE. Noted again next night 7/8 signing on 0354:10 but RNE much stronger than previous night; RNE format around 0403 unlike that noted the night before. Almost certain this is Mozambique, sked s/on 0400. The best sig noted from this one since 1965 if it is indeed them. (Nelson, MA) (Matches the s/on time noted by Denzil Baker 3/4. See previous page. ed)

 +Possibly the stn here good w/light mx 2218 11/5. Ancr in unid lang 2220. Apparently still in past 2300 which is supposedly their s/off time. (Eckman, PA)
 +Only a carrier here 0711 1/19. Know it was Lopik for sure, for I found it w/Upper Volta nulled. And the African could not be detected when looping in its direction. (Martin, CO)
- 746 ^t KENYA, Nairobi, carrier came on measured 746.0312 at 0240 9/13. DF for E. Africa (as usual). This is the same stn we've been trying to ID for 3 years; presumably Kenya which is sked to s/on 0255. (Nelson, MA)

+First TA of the season here found 0604 8/17. Carrier still there 0645. Audio only occasionally, but unmistakable muezzin caterwauling atop static before 0615. Spotted again same time 8/18 w/better sig putting a distinct het on YSKL-765 carrier but Dakar sig was stronger than YSKL. Found nothing on other TA freqs which often coincide w/Dakar, such as 836, 665, 746, 656, 1205. Dakar is, of course, always the first TA of the season here by the Rockies. For the western DXer it ought to be said that TA reception is something which is best in late summer & early fall rather than winter. (Martin, CO)

+Strong w/native chants 2334 9/10. Also noted 2317 9/17.

(Eckman, PA)

+Killing WABC at LSS on car rx near WWEL xr site, programming was old blues songs in EE 2300 9/11. Also noted on late for Ramadan 0101 9/15. (Connelly, MA)

773 LIBYA, according to a SW anmt, the radio ship Mebo II is test-

ing here //6205 until 0100. The vessel has been purchased by the Libyan government and will reportedly operate as "People's Revolution Radio" but only ID on tests as of 5/10 was the old R. Nordsee Int'l theme mx. As this freq is also used by Cairo's megawatter, 773 seems an odd choice. (Stanbury, ON)

- 782 ● UNID, w/WBBM nulled found a carrier strong enough to register a BFO whistle exactly 2 kHz above 780 0734 1/19. No audio, of course, & I assume that Miramar could do u/the circumstances. A somewhat new DXing technique for me because for years I assumed there was no chance of getting through stns like WBBM. U/the cx described, the 782 whistle is rxed at lower pitch than the stronger WBBM whistle. Don't recall anyone ever pointing out this lower pitch from the weaker stn when you are using the BFO hard by a strong domestic. (Martin, CO)

Carriers noted 647, briefly 827 & 836 also. 0440 fair w/polka sounding brass mx but faded down on voice. Apparent TA carriers noted all o/the band 0300-0345 9/15. 818 yielded much more AA sounding mx this time, so Morocco? No IDs of course. Complete disappearance of signals by 0400. (Hall-Patch, BC)
- +R. Sud tentative 0434 9/14 w/FF mx. WRTH 76 says it isn't on yet? Maroc 0320 9/15 another tentative w/AA chants. (Newell, BC)
- +Something was here as early as 0240 9/9 w/WBAP tightly nulled but couldn't extract any audio. Taped one stn which seemed to be taking to the air 0300 w/inst mx something like a NA but very weak & lost in static. Naturally, I wonder about Egypt at this spot at that time. (Martin, CO)
- +They or it giving me a definite carrier audible when WBAP nulled & the exact freq was sought by subtracting 2 kHz from 820 on the vernier control 0610 9/17. When these 2 are good they produce a het on WBAP easily hrd before the Texan is nulled. (Martin, CO)

- 827 UNID, OC, SAH, & weak 2nd stn audio 0218 8/4. (Connelly, MA)
- +This channel is quite a mess most evenings. On 8/21 the situation was as follows. The dominant stn after sunset was Sebha, Libya, in AA on a measured freq of 827.0550; s/off 0059 after Koran readings. This left 3 more carriers on the channel; EAJ1 on measured 827.0036 which produced some audio at times, Sofia

on 827.0003, & an unid on 826.9803. The latter faded by 0130 w/o ever producing any audio, alas. There are several possibilities: Morocco, who's a bad drifter & should have been on Portugal, another bad drifter; and the new 60 kw Syrian reported to be on the channel. Will keep working on it. (Nelson, MA)

- +Libya or Morocco here w/strong sig, AA talk by man o/fast SAH (almost a low audible growl) 0300 9/14. (Connelly, MA)

- +Several stns here as usual w/one on top playing cl mx 2342 2/26 w/potent sig. Perhaps the Spainard. (Eckman, PA)
- +Possibly Spain although not //737/773/872: cut from Pink Floyd "Animals" LP played 0010 & long live version of "Ridgetop" by Jesse Colin Young 0050 3/2. (Connelly, MA)
- +Fair carrier 0548 3/6. Might have been running TT as I don't think it was a het I was hearing. (Hall-Patch, BC)

New 150 kw xr logged 0105-0130 on measured 963.0019 9/14. Typical Ramadan chanting noted poor-fair on signal peaks but generally pretty poor signal rarely more than about 10 db above the noise. Mean DF bearing 70.5+2°; Mogadishu calculated bearing is 70.0°. Logged for country #133; most welcome! This logging made on best TA night since 1965. (Nelson, MA)

 +0440 11/10 w/nil-fair carrier looping TA. Occ audio yielded melismatic (try a music dictionary for that one!) vocal mx something like Greek popular mx; no listing for pgm for Greek or Turkish workers on the German at this time so could be Turkey. (Hall-Patch, BC)
 +Turkish mx 0414 12/4. Male voice in lang 0417. (Young, CA)
 +Xlnt w/OC/TT 0233 3/20. IS began 02555& was repeated to 0300 when an anthem was played. Several time pips on the hour & man speaking. Xlnt w/mideast type mx (sounds AA to me) various times 0307-0330. (Eckman, PA)

- 1016 **UNID**, was amazed to find a carrier here, no audio, as early as 0211 9/9 giving me the choices of Germany & Turkey. Strong enough to het YSC when loop was aimed E-W giving me both sigs. Het disappeared when YSC was nulled. Carrier faded out about 0240. Found same carrier next night same time, again no audio. Taped Istanbul here 9/26/75 0300, but have never detected any trace of the German. (Martin, CO)
 +Unid carrier potent enough to het YSC 0205-0223 10/8 must have been Istanbul. Still there 0337. 0359-0416 10/8 still getting fairly strong carrier but that would have been too late for Istanbul, wouldn't it? Anyway, Istanbul's carrier seems to be here almost every halfway decent DX night after 0200 mid-Sept to mid-Oct indicating it seems to me that 1.2 MW is able to get out almost consistently during less than favorable figures on the K & A indices. (Martin, CO)
 +Here w/carrier but no audio 2245 12/23, too much 1010 slop. Also hrd hetting YSC 0255 but YSC too strong to get anything but the carrier. (McNeil, DC)
 +Probably Germany, strong TT dominant, oscillator was repeatedly run up & down the audio range 2310-2315 1/4. (Connelly, MA)
 +Carrier noted poor 0525 3/6. (Hall-Patch, BC)

- 1034 ● PORTUGAL, Porto Alto, had to be this one 9/12 0605-0620. Very few mins of inst mx w/best sig hrd in years for this one. Had about given up TA prospects for the night when I noted WBZ arriving very well in the KTWO null, indicating good reception from the NE. Went looking for Portugal here & easily found it. (Martin, CO)
+10/25 0644 w/good sig despite XEQR-1030 slop. Pgm included a man talking in PP & mx w/singing in PP. (Nall, KY)
+Good w/man in PP, then slow lush orchestral Muzak hetted by weaker 4VEC-1035 & sloped by nulled local superpest WBZ 2316 10/25. (Connelly, MA)
+Fair 2300 10/29 to 0053 10/30 w/QSB & het from 4VEC. Following 4 time tones & a pip 0000, their ID sounded like "Ah-main-oh de transmitto de Port-u-guss." In again 10/31. (Curtis, VT)
●+0645 11/8 easy catch w/domestics out of it, though Boston was testing occasionally I believe. Taped w/ID, about 3 hrd o/ whole period. Poor-fair. This evening was the best TA-wise, though I missed a lot. (Newell, BC)

+1/27 2145 just before LSS, poor w/QSB, mx to 2200, then YL in PP, probably nx, 2203 mx intro w/drums, then male vocal faded 2210. Again hrd 1/29 0020 OM YL & OM in PP poor w/het. (Curtis, VT)

- 1035 UNID, tunein 1535 5/12, weird chanting by group, similar to mx hrd on Somali stns. AA anmts, no definite ID to past 1600. WRTH-76 shows Oman-1035 & Babylon-1038; WRTH-77 shows both on 1035. Recent rpts in NZ say is Oman in 1900-2000 period w/no indication as Babylon hrd. Programming seemed to be different from that normally noted on Iraq outlets & no SW // was discovered. Babylon listed w/2000 kw, Oman w/100 kw. Both locations feasible but we'd somehow have to eliminate the 2000 kw station first! (Padula, Australia)

Noted again around 0015 3/20 but not later in evening. Batra is only reasonable AA speaking possibility on this freq but it's a relatively long path & cx had not been good prior to this evening which makes me wonder what I rxd here. Anyone else hear it? - +Potent w/Muzak 0629 12/19. At good level w/"Isn't She Lovely" by Stevie Wonder, then EE DJ 0557 12/20. (Connelly, MA)
- +Good w/male seemingly in GG 0447 12/27. Very little domestic slop at the time. (Eckman, PA)
- +Fair-good w/"New Kid in Town" by Eagles, then EE talk 12/23. Fair w/man in GG 0452 12/30. (Connelly, MA)
- +1/23 0613-0630 OM & YL talk in hoch GG & short GG hymns. 0630-0700 OM preaching(?) in unkn GG dialect. Sig fair w/some QSB & occasional WHHY & WOOK slop. (Thomas, FL)
- +Fair-good at times 0238 3/5 w/rr mx, EE DJ easily splittable from 1440 domestics. (Eckman, PA)
- +3/31 2153 w/Elton John pop mx (EE). Heavy CFGO-1440 splatter. (Dunn, NS)
- +Noted w/strong carrier, EE sounding talk 0015 4/3. (Connelly, MA)
- 1439 UNID, 1/30 0615 faint het but impossible for me to separate w/loop. Luxembourg? (Davis, GA)
- 1457 ^t ALBANIA, Durrës, mx, possibly military or cl, bad slop (CKRB) 0305 6/18. (Connelly, MA)
- +Potent w/R. Peking relay 0400 9/1 & 2. "East is Red" IS noted 0401. This outlet has terribly weak audio for some reason in contrast w/the very good audio noted last year. (Eckman, PA)
- +R. Peking relay 10/10 0420 w/few notes of "Internationale". Country #22. (Newell, BC)
- +Slight QRM, FF rambling hrd often w/xlnt strength. Have taped s/on at 2200 10/11. (Dunn, NS)
- +Disgusting sig at times, xlnt w/FS in RR w/woman ancr 10/21 2245. (Dunn, NS)
- +Fair w/talk, possibly GG, 0410 10/24. (Connelly, MA)
- +In w/big sig, first just heavy OC, then trumpet IS 2227 10/29. Something else (possibly England) way under. (Connelly, MA)
- +Strong w/"East is Red" IS 0430 12/27. YL in unid language. (Eckman, PA)
- +Good but deeply fading w/man & woman in Slavic-sounding lang 0453 12/30. To good peaks w/talk by YL 0406 1/8. (Connelly, MA)
- +4/6 2200 in GG. (Wood, St. Lucia)
- 1457 ENGLAND, various, noted TT 0551 12/27. Short tones about 3 secs apart followed (very similar to Daventry-647 before s/on). Almost certain I hrd a "Radio 4" ID 0559. In any case British accented EE was audible 0601. WRTH lists only low powered outlets for R. 4 on this freq; perhaps a pwr increase? (Eckman, PA)
- 1457 UNID, fair carrier noted 0454 9/2. Durres probably ruled out due to LSR. Carrier also fair-good on 1546 at the same time, leading me to believe they were British. (Eckman, PA)
- +2138-2205 1/10 unid foreign lang, not FF/GG/PP/SS, all talk, 2200 sounds like nx. I suppose it's Albania. (Curtis, VT)
- 1466 MONACO, Monte Carlo, present w/fragmentary audio on car rx 2327 8/16. (Connelly, MA)
- +Like a local w/rigs mx 0450 8/18; only a trace by 0510 but 218 still strong at the time. (Nelson, MA)
- +This one has definitely changed its sked sometime since 5/76. S/on is now 0430 (15 mins earlier); noted 9/1, 9/2 at this time. Late night (i.e. SSS for us) sked also appears to have been changed as it was conspicuously absent at SSS 9/1-2 when other highbanders were xlnt. Perhaps an earlier s/off than previous 2400. Does anyone know its current sked? (Eckman, PA)
- +Noted w/IS being repeated & carrier cut 2330 9/11. Apparently they now s/off ½ hr earlier than in the past. Also noted w/strong sig w/rigs pgm 2310 9/17; off by 2330. (Eckman, PA)
- +Has been frequently strong at LSS recently. Easily audible on TRF (pushing 1460 & 1470 semi-GY messes out of the way) at 2305 9/13. (Connelly, MA)
- +Apparently doing strange things w/their sked. Noted signing

off 2400 10/1 after usual SS & AA pgms in the 2330-2400 period. Also noted s/on 0445 (their old time) w/GG rlgs pgm. Either power decrease or pattern change 0515 dropped them from good level to totally inaudible after end of GG pgm. (Eckman, PA)

+Like a local w/hymns in GG 0450 10/9. (Connelly, MA)

+2317 10/10 w/EE ID. (Klemp, CN)

+Hrd as early as 4:30 p.m. local time (approx 2 hrs before LSS); fantastic sig, S9+10 db! EE pgm, rlgs syndicated show 2237 10/11. (Dunn, NS)

+10/20 2039 GG programming. Peaks approx 1½ hrs later to a disgusting S9+20db. It's a tossup at this QTH as to whether 1466 or 1586 has the strongest TA signal. (Dunn, NS)

+Fair-good w/EE rlgs pgm 2004 10/23. (McGonagle, Iceland)

+Very loud w/EE rlgs female vocal "He Holds You in His Arms", followed by preacher in EE talking about the moral fail of modern civilization 2242 10/25. (Connelly, MA)

+Good w/apparent s/on: IS, GG ID & GG rlgs pgm 0445 11/5. (Connelly, MA)

+Very good 2051 11/5 w/typical rlgs pgm. Noted fadein 11/6 at 2040 but no audio till past 2100. Remained xlnt until 2400 s/off. (Eckman, PA)

+2302 11/6 rlgs pgm in EE poor. 2350 11/9 good in unid lang, talk or sermon. (Curtis, VT)

+Fair w/man in GG 2247 11/13. (Connelly, MA)

+2147 11/27 fair w/rlgs talk in EE. (Curtis, VT)

+Fair w/march-style rlgs choral mx 2145 11/26. Very fadey w/ Muzak 0622 11/27. Booming in on TRF w/AA pgm 2351 12/1. (Connelly, MA)

+0057 11/28 fair & in unid lang, short series of mx tones before hour & time tone. (Curtis, VT)

+12/21 2015 disgusting sig S9+20 on "Scotch" HQ-180C. Heavy QRMS to WLAM-1470 w/GG rlgs pgm. Overwhelming signal. (Dunn, NS)

+Strong w/hymns in GG 0444 12/19; this was followed by man & woman in GG. (Connelly, MA)

+Xlnt w/IS 0442 12/27. GG rlgs pgm 0445-0515. (Eckman, PA)

+Good w/SS talk by man 2229 12/23. Good w/OC, then mx box IS 0440 12/23. Opening was low latitude enhanced; 1466 much better than 1586. Ultraloud, surpassed in the TA sweepstakes only by Dakar-764; AA pgm 2203 12/31. (Connelly, MA)

+Xlnt as usual, fading present but much less than noted on 1394; Muzak of a rlgs influence, then SS ID, trumpet fanfare, SS talk equalling adjacent domestics 2217 1/4. Fair in GG 0450 1/8. Good w/EE preacher, then another ancr gave addr in Hailsham, Sussex, England; then TWR ID followed by EE pgm, "Contact" 2304 -2306 1/10. At normal (good) level w/hymns, GG talk 0506 1/16. (Connelly, MA)

+2135 1/10 fair w/mx & rlgs talk in EE. (Curtis, VT)

+Fair w/talk by OM & YL 2247 1/21. Good w/choral mx, then GG talk, 0506 1/23. Loud, bulldozing WBNP w/talk by woman on car rx in Rockport 2100 1/23. The best European TA during disturbed cx, fair-good w/hymn 2217 1/24. (Connelly, MA)

+ "Bodacious" w/SS talk & orch mx, the best high-band TA 2345 1/26. Noted mostly as a het on car rx at Marblehead Harbour 2040 1/30. (Connelly, MA)

+1/28 0430 in II; George Harrison mx, then talk by OM & YL in II, more rr mx (this was probably R. Monte Carlo contrary to sked in WRTH), 0440 right into TWR IS, abrupt ID in GG 0445, then hymn. (McClenaghan, ON)

+1/28 0408 xlnt audio produced good 1 hr tape for me. II lang w/US rock & commentary. 0441 played IS, then into GG. (Davis, GA)

+Poor w/mx in bad slop 0638 2/6. At loud level during auroral cx; banging in w/hymns, GG talk, IS, single pip followed by carrier dropout 0512-0515 2/11. (Connelly, MA)

+Weak-fair w/EE talk at a time when few other high-end TAs were noted 2315 2/18. (Connelly, MA)

+Local-like sig w/rlgs pgm in AA 2355 3/4 w/man giving stn address. IS 2359 repeated several times & carrier off. (Eckman, PA)

+Booming in w/local mx on car rx at Rte 2/Nashoba Brook, Acton, MA 2355 2/27. Good w/"Trans World R. 205 meters" ID in EE 2300 3/3. (Connelly, MA)

+Fair w/rlds mx 2359 3/21. (Connelly, MA)
 +Xlnt w/rlds pgm in EE 2301 3/19. Also very good 0440 3/20 w/TWR IS & still potent 0515 s/off after end of GG pgm. Re McClenaghan's reception 1/28, it's likely that the II BC hrd was part of an ET. Monaco usually throws their carrier on around 0430, sometimes as early as 0400 & runs brief periods of TT until 0440 when the TWR IS begins. It's possible that a tape of R. Monte Carlo's II service was used as part of the ET (tho I've never hrd them do it); perhaps this was just an accident. In any event I don't believe they've changed their sked s/on as noted w/xlnt sig 0430-0515 3/17 w/TT, IS, & into GG pgm 0445. (Eckman, PA)
 +Fair w/operatic female vocal 2250 4/2. (Connelly, MA)
 +3/22 2050 truly oppressive sig severely QRMing WLAM-1470 - 20 db over S9 on HQ-180 in GG. (Dunn, NS)
 +Fair w/man in GG 0509 4/10. IS played once 0515 & carrier off. Interesting in that it was only European TA definitely hrd this AM in generally auroral cx. QRM from SS on 1463 perhaps Costa Rica. Getting pretty late in the season for Monte Carlo to be hrd so late. (Eckman, PA)
 +4/6 2200 EE sermon. (Wood, St. Lucia)
 +Peaking well w/rlds mx, but fading was fast & deep 2334 4/16. (Connelly, MA)
 +Very good w/AA talk 2352 4/22. (Connelly, MA)
 + "Back to the Bible" in EE 2130, eventual fadeout 2200 5/9. (Padula, Australia)
 +Very good w/pops EE/FF/SS 1410. (Ormandy, New Zealand)

1466 ● UNID, carrier noted poor 0512 3/6. (Hall-Patch, BC)

1475 AUSTRIA, Wien, quite good w/OC 0345 8/30, 9/1 & 2. Begins IS 0355 & s/on 0400 in GG. (Eckman, PA)
 +Quite good 0527 10/4 w/Austrian-German accordian mx. GG talk by OM followed. No problems from domestics. (Eckman, PA)
 +Unusually strong w/light mx 2330 10/10. Possibly another station underneath. (Eckman, PA)
 +Strong w/soft Muzak o/SAH 2226 10/29. (Connelly, MA)
 +Occasionally breaking o/1470 & 1480 slop w/mx, very fadey, 0443 12/19. (Connelly, MA)
 +12/21 2030 lots of splatter & QRM. Not strong but IDed on 1/2 hour w/3 note IS & GG language. (Dunn, NS)
 +Fair w/semi-cl mx o/low pitched growl of hets 2228 12/23. Good w/bouncy Alpine accordian mx, deep fades, 0458 12/30. (Connelly, MA)
 +Xlnt (better than 1466) 2235 12/26 w/male in GG. Noted better than 1586 0424 12/27 w/GG type mx. (Eckman, PA)
 +Strong w/US pop mx 2339 3/4 w/deep fades at times. (Eckman, PA)
 +Good at times 2307-2359 3/19 w/light mx, some pop. SAH bothering sig throughout period, perhaps Spain. (Eckman, PA)
 +4/1 2123 clear & solid Bisaberg sigs w/Kraftwerk instrumental mx. (Dunn, NS)
 +Fair atop channel w/IS 0356 4/9 w/several stns underneath producing a low growl. Unusual to hear this in generally poor TA cx. (Eckman, PA)
 +GG pgm 1827, some mornings till as late as 2201, as on 5/14. (Padula, Australia)

1475 BENIN, Conotou, L'office de Radiodiffusion et Television du Benin, or ORTB, has received a 20 kw MW xr from Germany. Current sked is 0515-0830, 1615-2300 weekdays; and 0600-2300 Saturdays & Sundays. (SCDX, 8/76)
 +10/20 2035 strong steady sig, was much weaker several weeks ago. Seems to be peaking. Def ID as hrd //4870 outlet. Male vernacular rambling. (Dunn, NS)
 +Believed to be the stn w/OC 0502 6/25. Ran TT till approx 0511 when a drumlike IS began. Drum & guitarlike instrument hrd 0514 but no speech discernable. Had a perfect W. African bearing. (Eckman, PA)

- 1475 SPAIN, unid stn here w/pop mx & YL ancr 0638 3/12; hrd several songs, fairly good sig & clear w/a low het in background. Went to 1502 for a quick check & when returned she was just cutting out of a record & into local market rpt or some such & said "R. Popular ----" but I did not catch it & tape was off too. Santander sked on then but just do not know who it was, really hurt to lose ID. (Foxworth, NY)
- 1475 UNID, stn here 0430-0530 various times 12/27 u/Wien. Slow SAH on Wien when this one faded up. Perhaps the Ukranian here as the Iberians weren't all that strong at this time. (Eckman, PA)
- 1484 ICELAND, Keflavik, AFRS xlnt (local) in EE w/FB game 2002 10/23. Noted in passing w/nx in EE 0405 10/24. (McGonagle, Iceland)
- 1484 SCOTLAND, synchronized outlets mixing at fair levels yielding SAH; pgm was FB match 1518 10/9. (McGonagle, Scotland)
- 1484 UNID, noted around 0356 9/1 & 9/2 w/fair carrier but no audio discernable. Many possibilities but Belgium appears most likely due to power & sked. (Eckman, PA)
+This one noted again w/good carrier around 0422 10/4. Still noted in around 0540. Likely possibilities include Liege, Belgium. (Eckman, PA)
- 1484 ^t UNITED KINGDOM, various, noted apparent TT 0551 12/27 at same time as 1457 was Tting. Several other stns underneath. (Eckman, PA)
- 1493 ^t FRANCE, Ajaccio, Corsica, 1493 usually QRMBound w/nothing dominant. Hrd FF commentary 2042 10/10. Tentative choice on channel Corsica. Will watch freq further. (Dunn, NS)
- 1493 ^t USSR, Leningrad, on a tip from Bill Bailey who's been hearing someone here during the early evening hours I checked 0014 8/21 & found a fair carrier on measured 1494.0004. Not enough sig for audio but an ambiguous DF for northern Europe which rules out Ivory Coast. Both the freq signature & DF suggest Leningrad but I understand the Soviet has been off the air lately w/technical problems. Will keep after it. (Nelson, MA)
- 1502 POLAND, Warsaw, hrd most evenings, best at approx 1 hr after ISS. 2015 hrd in Finnish(?), heavy QRM from WMEX-1510, bad overmod & excessive splatter, 10/10. (Dunn, NS)
+FS in GG s/on, hrd IS 10/21 2100. Usually not strong & battling WMEX-1510 audio spikes - do they run audio compression? (Dunn, NS)
+Slavic talk o/u SS mx, other stns audible in background 0619 11/27. (Connelly, MA)
- 1502 ^t +0708 12/23 w/talk by man, not Slavic sounding lang, more like a Romance lang; fairly readable at peaks, but just too much QRM de 1500 to get anything positive. Nothing else likely, even tho some light on this path. Great European night for MW & SW. (McNeil, DC)
+Xlnt w/familiar piano IS 0530 23/27, then pgm in GG. Noted IS again 0600 but being chewed up by other stns (likely SS) at this time. (Eckman, PA)
+3/22 2200 hrd IS mx rptd on endless loop tape. S/off w/pgm in II or SS, hard to tell. WTOP-1500 splatter. (Dunn, NS)
+FS 4/1 2130 s/off & IS hrd, NA, etc... Due to QRM & WMEX splatter signal was marginal. (Dunn, NS)
- 1502 SPAIN, one of the SS stns here believed to be the one w/strong OC 0413 8/30. Don't believe there was any audio on at this time. (Eckman, PA)
- 1502 UNID, EE rock show, sounded like BBC, poor-fair 0045 7/11. (Connelly, MA)

- 1511 EAST GERMANY, Berlin, lots of QRM on 1511 not to mention WMEX "w/much more mx". Difficult to copy but choral group or church(?) mx w/GG male ancr 10/23 2150. (Dunn, NS)
- 1511 UNID, Belgium or East Germany present as a carrier at noise level 1520 10/9. (McGonagle, Scotland)
- 1525 CHINA, Urumqi, quite good 0000 11/6 w/"East is Red" IS & RR ID "Govorit Pekin". Noted to past 0030 w/RR pgm & some CC mx 0025. First def logging for me this season & first time hrd in quiet rather than disturbed geomagnetic cx for me. (Eckman, PA)
- +12/2 2315-2345. Too much adjacent slop to read audio but PFMed as 152014.9 Hz+0.2Hz. Also noted SAH of about 7 Hz but unable to PFM carrier. May be same pair as noted from Philippines in 1973. (Taylor, IN)
 - +Hrd again poor-fair w/"East is Red" chime IS 0000-00001 11/20. Audible on peaks for the next ½ hr when it apparently faded out. Severe WKBW/WCKY splash. (Eckman, PA)
 - +I check every night at LSS. 12/10 most promising to date 2105, S5½ quick flutter, very weak. WKBW-1520 QRM, male voice; taped for 20 mins, played repeatedly w/various audio filtering but nothing definite. (Dunn, NS)
 - +Logged w/very good sig 2230-2254 1/11 & around 2300 1/12 w/poor-fair sig. 1/11 had female ancr talking continuously til 2254 when "Internationale" was played. Apparently back on at 2300 but no audio discernable as there was a strong het on the sig(not Costa Rica which was easily separable from them a few hundred Hz below 1525). "East is Red" IS piercing thru horrendous WKBW splash 2300 1/12.(Eckman,PA)
 - +Finally w/fair sig w/lots of fluttering & deep fading at times 2300-2325+ 1/28. "East is Red" IS 2300-2302, into talk by man & woman in unid lang. (Falconer, ON)
 - 4/1 2230, my first "East is Red" chimes on tape. North and/or polar path quite good lately, i.e. Sweden-1178 w/xlnt sigs, best all season. This occurrence is contrary to my propagation plan! (Dunn, NS)
 - +Noted weak 2235 w/fast polar flutter. Fair 2300 w/"East is Red" IS discernable through WKBW/WCKY slop. Gone soon afterwards & not noted at 0000 check of freq. (Eckman, PA)
- 1525 UNID, 10/22 about 50 mins before LSS, carrier noted w/quick flutter, weak, no audio. 10/23 about the same cx, brief fluttering carrier several times in a 10 min period. Same 10/24. 10/25 again at approx 2000 (LSS approx 2050); stronger periods of fluttering carrier w/faint audio noted. (Dunn, NS)
- 1529 VATICAN CITY, Vatican R., poor w/cl mx, 2 low hets present as well as het from 1530 0055 7/11. (Connelly, MA)
- +Finally bagged w/celeste IS confirmed per WRTH 0027 10/5. Must be using higher power this season. (Schatz, FL)
 - +Fair w/prayers in Latin 2000 10/23. (McGonagle, Iceland)
 - +Hrd almost every sunset, usually not strong but clear until WCKY LSS. Then WCKY starts to QRM. 2239 10/11 Italian w/semi-cl mx. (Dunn, NS)
 - +Strong w/cl mx & semi-cl orchestral mx killing WCKY 2322 10/26. (Connelly, MA)
 - +Potent w/light mx 2213 11/5 easily separable from 1530 slop. (Eckman, PA)
 - +Best high-band TA: woman in EE good 0107 11/16. (Connelly, MA)
 - +Fair w/talk 2139 11/25. (Connelly, MA)
 - +Way atop weak WCKY het, continuous tolling of bells 0617 12/19. (Connelly, MA)
 - +12/21 2000 II talk, weak but audible w/little 1540 QRM. (Dunn, NS)
 - +12/27 0645 hrd fair sig of what was definitely a Catholic mass in Latin. Fadeout 0700 w/some QRM. (Thomas, FL)
 - +Good w/Muzak despite WPTR buckshot 2227 12/23.(Connelly,MA)
 - +3/22 2202 usual strong dominant sig w/II or SS & semi-cl.

3/31 FS strong w/ID & IS. One of the season's most consistent signals. (Dunn, NS)
-ID 1830, then into Hungarian rlgx nx 5/12. (Padula, Australia)
+Good in Albanian 1345. (Ormandy, New Zealand)

- 1538 WEST GERMANY, Mainflingen, DLF, fair w/GG talk 0307 6/18.
(Connelly, MA)
+Poor w/carrier 0259 6/26. (Eckman, PA)
+Fair w/OM & YL in GG, WPTR nulled 0100 7/11. (Connelly, MA)

- 1546 ENGLAND, one of the British stns noted Tting 0448 10/4 w/potent sig, tho w/deep fades. Apparent s/on 0500. Noted w/definite British EE 0515 interspersed w/light mx 0500-0530. "Rhinestone Cowboy" noted clearly 0520 but anmt after song had muddy audio. No positive ID. (Eckman, PA)
+Several IBA locals here w/mix of audios & rock mx 1524 10/9.
(McGonagle, Scotland)
+Someone good w/light mx; ancr in EE 2248 11/6. Still no positive ID however. (Eckman, PA)
- 1546 ENGLAND, London, Capital R., hrd 3/21 w/Hancock Half Hour comedy excerpt show, pop mx & phone-in good-fair. (Baker, S.Africa)
- 1546 t UKRAINE, Vinnitsa, hrd several times but weak & no pgm details resulting. RR lang (presumably Ukranian) on freq 2150 10/3 - poor sig soon faded. Will watch for further results. (Dunn, NS)
+Good w/OM possibly in EE 2244 10/10. At 2300 noted an IS (not Moscow FS) which sounded definitely RR followed by YL in unid lang. Another stn also mixing in at times. (Eckman, PA)
+3/22 2148 woman in RR followed by mx - very MoR! Weak, hrd before w/better signal. (Dunn, NS)
+R. Moscow IS, definite ID at s/on 2230 10/21. Have on tape. Weak but usually audible FS pgm content. (Dunn, NS)
+4/1 2130 weak but clear, R. Moscow chimes (FS), EE s/on w/woman & man alternating. (Dunn, NS)
- 1546 UNID, possibly England, carrier, fragmentary audio 2222 10/29.

+2 stns here 2232 12/26. One w/light mx, other w/female in EE. Likely possibilities include England & Vinnitsa. (Eckman, PA)
+0650-0703 1/5 bits of MoR sounding mx, time pips 0700 (5 short, 1 long), into nx in unid language. (Falconer, ON)
+Maybe Ukraine, opera noted weak 2248 1/21. (Connelly, MA)
- 1554 FRANCE, Nice, fair 0306 6/25 w/OM in FF & again at good level 0325 6/26 w/mx. Faded out approx 0400 both days. (Eckman, PA)
+Fair w/FF nx, high sided het present 0302 6/18. (Connelly, MA)
+Xlnt w/vocals & fast FF talk, jazz & disco-oriented show 0315. Maxine Nightengale record 0318 6/28. Best TA at the time.
(Connelly, MA)
+Poor-fair & very fadey 0220 8/4. (Connelly, MA)
+Nice xlnt w/light mx 0359-0450 9/1. Unusually strong audio -- perfectly readable. Also in at same time 9/2 though not as good. (Eckman, PA)
+Good w/man & woman in FF 0305 9/14. (Connelly, MA)

The Christian "V. of Lebanon" is said to be operating on 350 meters (i.e. near 857 kHz - ed), but is not audible in Israel. A Moslem-controlled stn operates irregularly on or close to 575 kHz, & a Christian-controlled station operates on 920. (SCDX, 7/76)

V. of Lebanon was first rpted in SCDX 1346 as a clandestine. After one year of operations, the stn changed its format on 10/1/76 w/the inclusion of commercial spots. Ads for various shops in Beirut & Jounieh, the day's offerings at the Jounieh supermarket, as well as ads for brand-name goods, have been observed. The stn operates on 850 kHz 0600-0900, 1100-1300, & 1500-2000 or later. (SCDX, 11/76)

SOUTH AFRICA. The SABC is undecided whether to discontinue their MW service, R. Five. R. Five is proving very popular & to air it on SW only will not do the SABC image much good. The FM channels have reached their maximum w/5 stns, so there is no space for R. 5 there. (SADX,3/77)

UNITED ARAB EMIRATES. The Sharjah Broadcasting Stn is planning to operate w/120kw on 1535 later this year, per a letter from them. (SCDX,3/77)

UNITED KINGDOM. The Daily Telegraph (1/23/76) rptd that the IBA might apply for what is now a BBC freq. This is from IBA Director of Broadcasting, John Thompson, who argues that since all radio wavelengths are in the process of being reallocated by the ITU, then Britain's share is back in the melting pot. Thus, there is no intrinsic reason why the BBC should get all its present wavelengths back. In view of the BBC's present financial state, it would be "perfectly imaginable" for one of the present BBC networks -- possible R. 1 or R. 2 -- to be restructured on a commercial basis. No favour to the suggestion can be expected from the BBC and the home office is not expected to see things this way. (MWN)
Downtown Radio, Belfast is a new commercial stn operating on 1025. Addr is Kiltanga Radio Center, P.O. Box 293, Newtownards, Co. Down, Northern Ireland. Another new commercial stn is Radio 210, Thames Valley BCing with operation on 1430 kHz. (SCDX, 5/76)

(Observations made while on vacation, December, 1976)

Monitoring the European BCB from London was a surprising experience for me in many ways. There are significant differences between reception there and in the U.S., it seems to me, and I began noting these within a few minutes after I first turned on the remarkable little TRF. As all DXers know, the BCB across the Atlantic has a channel separation of 9 kHz rather than the 10 kHz we find in North America. Also, the European-African stations utilize a lower level of modulation when a broadcast is put on the carrier. We have all known these things but what I had not realized until I heard it close up was how that different system of modulation affects the performance of your radio.

For one thing, this ridiculously small TRF with its tiny speaker delivers much better sound over there than it does on our U.S. stations. It almost seemed that the European AM stations transmit sound with an FM quality to it. I was amazed at how well a pipe organ concert was reproduced on the BBC. You would have thought the TRF had suddenly been equipped with a 9 inch speaker.

The next thing I discovered was the relatively clean separation and absence of splash between those European channels. I want to be careful not to overstate the difference but that 9 kHz separation produces significantly less splash between stations than our 10 kHz standard in the U.S. The lower modulation level surely enters into it and you might be justified in saying that our North American stations produce more splash because they customarily transmit sound at the top of their lungs.

Along with better reproduction of sound and less splash between adjoining frequencies, I noted one other reception feature which may be connected with the different system of modulation. When two or more stations in Europe are picked up on the same frequency they seem not to set up the severe beating we invariably hear in the U.S. I often noted a weaker station underneath the dominant one on a frequency with no beating at all between the two carriers. If the stronger station was transmitting talk and the weaker one music, you might have thought the music was being carried on the dominant station as background to the talk. This is not to suggest that I didn't ever note beating between two stations, but this kind of interference seems to be significantly less than what the U.S. DXer is accustomed to. (Beating is caused by slight differences in carrier frequency between the two stations. European stations apparently keep their transmitters closer to their assigned frequency than U.S. stations do. ed)

The most unusual station heard on the TRF was R. Veronica-1020 in Venezuela. I was quite astonished but I was able to hear the Veronica ID twice in a ten minute period just before and after 0100 12/17. Veronica was the only LA station definitely IDed during the 16 nights I was able to examine the BCB from London, but a LA heard under WGY around 0300 12/19 may well have been Sutatenza.

The nights of 12/10-13 were spent in Paris and while I had the TRF along, there isn't much to be heard from your room on the twentieth floor of the Hotel Concorde Lafayette.

As to the 16 nights in London, it was noteworthy that North American stations were found every night. Apparently TA conditions remained very good over the period 12/2-22. You can classify WINS, CFRB, WCAU, WNEW, WABC, WGY, WOR, & CJOX, as regulars from London. I tried repeatedly for such stations as WHDH, WBZ, WLW, WCBS, WWL, WSM, WBAP, WHN, KMOX, XEW, & PJB, but the TRF could never pull any of them out of the hash.

Frankly, this American DXer was quite lost in the European BCB in the multiplicity of languages and the difficulty of knowing exactly what frequency you were tuned to. The TRF is a great little performer but don't try to rely on it for close frequency readings. Also, it seems that most European stations have the habit of going for considerable times without IDing. Or if they do ID, your American ears don't catch the ID.

It was noteworthy also that the TA frequencies which are conspicuous, as heard from the U.S., are hard to locate once you are in London. and what you hear on them is probably quite different from what you hear in the U.S. Instead of Portugal there is Germany on 665 and 764 gives you Switzerland instead of Africa. Even the well-known BBC frequencies

contain surprises for the American DXer, unless he has studied them very closely. We are well-acquainted with Radio 4 at 881, but as heard in London, 881 is much less than one of your local frequencies. Instead, your local Radio 4 outlet is 908, rarely heard in the U.S. The BBC stations on 881 are in Wales.

The Radio 4 stations on 692 are in England, yet are weak enough at night to be severely interfered with by East Germany.

On 809, the BBC stations are in Scotland and also suffer interference from the continent. After midnight in London, the BBC stations sign off and the BCB seems to be dominated by German stations, both East and West. The Germans are your main hindrance in searching for anything from across the Atlantic. But many other languages are heard all night and only a few frequencies are open across the Atlantic.

On 566, Athlone refers to itself as "Irish Radio" and the voices there remind you of Vaudeville-type Irishers in comedy sketches. You cannot doubt that it's Irish for you hear a lot of commercials for Limerick sponsors, the sports presented by O'Riley and the station weather man is named Murphy.

One final note, Vatican Radio at 1529 offers a menu of sacred, classical, ponderous stuff nightly to 2300, then changes personality abruptly when midnight comes in Rome. After 2300, it has at least one hour of pop music, even including rock. One night I heard it playing the familiar American platter "Winchester Cathedral", popular ten years ago. I realized fully then that, at last, I had heard everything.

RADIO PIRATES OF RUSSIA

(Reprinted from the Manchester (England) Guardian, September 12, 1976)

A broadcast over the Archangel city radio network, in the far north of Russia, said earlier this year that 30 radio pirates operating illegally had recently been caught in the area. It said that the pirates transmitted their broadcasts when the official radio stations were silent, especially at night. And it asked law-abiding listeners to report all such broadcasts to the authorities, "at any time of the day or night" and to do so anonymously if they preferred.

Thirty radio pirates for a city of 370,000 may seem a lot, but it is still less than the average of 125 illegal transmitters that were being uncovered every month in Donetsk (pop. 934,000) two years ago, according to a Soviet youth newspaper. Another Soviet press report said at the time that "hundreds of radio hooligans" had been captured in Moscow.

In the city of Kazan 115 pirate broadcasts were heard by authorities in the course of a five-hour check in 1970, and dozens of "radio hooligans" were caught during a police round-up and put on trial. But nothing seems to deter them, as the recent news from Archangel shows.

The persistence of illegal broadcasting in what is usually described as a police state has often puzzled foreign observers. As long ago as 1966 the Soviet supreme court, alarmed by the growing number of pirate radios, announced that their operators could be prosecuted as political offenders.

Before that, the illegal use of radio transmitters was treated as "malicious hooliganism" by the courts. But the supreme court ruled that radio pirates could also be tried for "Anti-Soviet agitation and propaganda" under the dreaded article 70 of the penal code.

During the ten years that have elapsed since then the Soviet press has provided a great deal of detail about the operations of the radio pirates, but very little information about any political activities they may indulge in.

"Wherever we find radio hooligans", a police official said in an article in the chief newspaper of Kirghizia, in Soviet Central Asia, "we discover anti-Soviet propaganda". The broadcasts contained "religious twaddle and anti-Soviet anecdotes."

Little is known of the content of these broadcasts, because the range of the pirate radio stations is very limited and they cannot be heard abroad. So far as the evidence in the Soviet press goes, the transmitters, which are usually home-made, are mostly operated by youngsters who broadcast the kind of foreign music which is not available from official radio stations.

But every now and then news reaches the West of 'something more serious. A radio pirate in Vilnius, the capital of Lithuania, was sentenced to three years for taping Western newscasts and re-transmitting them for local listeners. A pirate station in the Ukraine has broadcast anti-Russian songs. A newspaper in Kazakhstan, in Soviet Central Asia, has reported a two year sentence for a radio pirate accused of broadcasting "obscene" songs.

But for every transmitter which is put out of action, several others pop up.

Most of those caught by police are fined and have their equipment confiscated. The prison and labour camp sentences are evidently reserved only for the explicitly political offenders -- and it seems that few of these are caught.

Most of the radio pirates castigated in the Soviet press get into the game out of youthful high spirits. The forbidden fruit tastes so much better than any other. But as they get older, some of them become interested in opposition politics.

An official broadcast beamed by Moscow Radio to the United States earlier this year said that it would be wrong to ascribe the appearance of pirate radio stations to "acts of defiance" by the young. But *Komsomolskaya Pravda* was closer to the truth when it explained that young people who operated illegal transmitters regarded them as a badge of courage, "a sign of contempt for the risks involved." And, it added, it made the boys shine in the eyes of the girls.

MULTILINGUAL RADIO FOR EUROPE --- by Alexander MacLeod

(reprinted from The Christian Science Monitor)

British broadcasters will throw their full weight behind plans to be discussed in Brussels this week for setting up a multilingual radio system serving the nine countries of the European Community.

The scheme has the enthusiastic backing of leading members of the British Broadcasting Corporation. The BBC has already begun making pilot programs for the project.

It is expected that the Brussels meeting will produce agreement on the aims and shape of the system. Already, however, the broad lines are beginning to emerge.

Present plans call for broadcasting in English, French, and German. The basic output will consist of news and information programs.

BBC envisions a central newsroom, possibly in London, staffed by multilingual broadcasters from the nine EC countries.

Already medium-wave frequencies have been reserved and if these do not prove efficient enough to cover the bulk of the West European audience, VHF frequencies may also be used.

One of the strongest advocates of the system is Gerard Mansell, managing director of the BBC's external services. He would like to see the proposed Euroradio service administered on lines similar to the BBC's own system, which protects the corporation's independence. The need, he believes, is to keep programs beyond the control of national governments and the international bureaucracy at the EC's Brussels headquarters.

His views appear to be fairly widely shared among other EC broadcasters, although there is expected to be intense rivalry between the British and the French over the influence they exert on program content and style.

Supporters of the scheme hope a Euradio service can be operational in time for direct elections to the European Parliament due to be held next year.

At 0728, KCBS OC went off just at the end of the mx & the FF talk was identifiable. 10 secs later, KBRT Avalon put their OC on (nulled about 15° W of KCBS). The last 10 mins of pgmning seems to be repeated each day as 6135 was logged 7/6 w/nearly

identical pgm. The 0730 s/off tip came from SPEEDX. KCBS is off every MM after 2400 PLT. Tahiti is only 4000 miles from San Diego on a bearing of 217°, almost 90° to SF. New country & a most welcome catch. (Seaver, CA) (Also note that this str is possible only during DST, s/off is 2330 PST/0030 PDT. ed) +Possibly the one noted w/FF talk by man 10/11. - +Hrd w/loud clear audio o/KTAC/KOA splash w/"beautiful mx" type insts 0715 2/15. By the time a YL started native talk about 0728, twas way in the mud. Some Polynesian mx followed, then OM talk. Nil-poor in cursed KTAC/KOA slop. (Hall-Patch, BC)
- +2/21 0934 in good w/YL talking in vernacular. (Korinek, CA)
- +Good sig & clear audio 0920 3/27 w/OM & native mx. (Tomer, CA)

- +Talk by man in vernaculars 0735 5/9. (Padula, Australia)

- 844 UNID, 1/22 0822 good carrier w/het but too much KOA slop to make out any audio. Probably Tarawa. (Korinek, CA)
- 845 USSR, another Majak outlet here, piano mx 1829 3/5. (Padula, Australia)
- 845 UNID, 10/9 noted het 1246 but nothing there at 1330 & 1404 checks. (Kaskey, CA)
- 850 ALASKA, Nome, KICY, punching SSB thru KOA 9/12 0949. Also good o/u KTAC at various times 9/13. KICY is the only AK which makes it consistently to CA on non-MMs. (Rittenhouse, CA)
 +Made a rare appearance 3/7 1006-10 w/wx for N. Canada & Alaska. Nome was -31^{OF}. (Seaver, CA)

- 850 AUSTRALIA, Canberra, 2CY, 1310 4/26 w/wx & nx for NSW, ment of ABC R. 1, then began rlg's pgm. Good sig, KTAC nulled, new. (Tomer, CA)

 +O/u KTAC 10/19 w/YL & OM in KK 1338-1400 tuneout, very spirited talk. Fadeout 1400, back in 1401, did not catch any ID. 10 kw listed, too strong for that. (Williams, OR)
 +10/18 0915 strong possibility w/oriental lang, XEFZ wiped out ID. (Lobel, CA)
 +Definitely //655 noted atop KOA 11/27 1334 w/march mx, then male talking. 11/29 in good //655 1120 atop freq w/KOA off. (Kaskey, CA)

- 853 NORTH KOREA, apparently the 850 KK drifted up a bit. Strong het noted 12/22 1351, then audio. Also noted 12/23 & 24 1345-1530. Audio compared w/655 & exactly //. Hoped for something much more exotic. (Kaskey, CA)
- 855 ^t INDONESIA, Mataram, RRI, probably the source of strong carrier looping SE Asia 1125-50 2/14. (Peterson, CA)
 +As early as 1030 (8:30 pm local time), Moslem chanting thru to 1050 2/27. This appears to be the easiest batch of the new Indonesians & seems certain to be a marker for possible "good" Indonesian nights in coming months. (Padula, Australia)
 +Fadein 0915 5/14. This is probably the easiest & strongest of the Indonesians to hear at the moment, even from here in Melbourne. (Padula, Australia)
- 855 UNID, carrier here 10/11 1201. (Seaver, CA)
 +Het noted 0917 beating against KOA. Quite strong at times. Not hrd since. Hrd 10/19. (Kaskey, CA)

+Carrier very weak, no audio, 1230 1/31. (Peterson, CA)
+Probably Indonesia, carrier hrd fairly often in 1200-1300 period. 3/11 1217 fair carrier, no audio. 3/14 weak audio 1253, soon faded. 3/6 OM talk, some mx 1240-1300, faded on hour. If this is 10 kw Cirebon, it gets good mileage (Cirebon is on N coast of Java, named Tjirebon on older maps). At times I've hrd audio, this was not //4719 Ujung Pandang. Will someone more knowledgeable of Indonesian stns comment on programming, when is local, when RRI pgm, etc. (Seaver, CA)

- 880 AUSTRALIA, Brisbane, 4BH, I'm 90% sure is the GU frequently
hrd the week of 9/12-20 1300-1400. Style is "easy listening"

call ID was hrd approximating 4BH. Completely clear freq w/
Asians looped so this one should be widely hrd WC. (Godwin, OR)
+9/14 coming in at fantastic levels 1315-1415 w/usual PZL. ID
1327 as "it's 11:27 at 4BH beautiful mx", then spot for "Barry

ing "fine". Entertaining promo about the history of 4BH
unfortunately faded out. (Tomer, CA)
+Tentatively the one w/nx, then wx 1302-04 9/26. Seems to have
anmt at 1318 or so, then nx again 1400, then more "Living
Strings" type mx beginning 1405. I still haven't gotten a soli-
d clear ID on this one, although I try every AM. (Godwin, OR)
+Fair during fadeups 1445-1500 s/off 2/13. Usual "Beautiful

- 880 JAPAN, Shizouka, JOPK, fair-good 9/14 1300-1400 w/JJ talk, NHK

+JOPK & unid hrd 10/3 1302. Dominant stn not //JOHK-890 w/talk.
Both w/good sig 1400 when tuned in & hrd dominant stn give 5
low & 1 high pips, immediately followed by 2 mid-scale, 1 low-
er pip (possibly partial time sig drowned out by the louder
one). Secondary stn then noted running //JOHK-890 so assume
was JOPK. Dominant stn just talk/talk. (Kaskey, CA)
+Xlnt-good w/light mx, NHK pips, then male talk 1400 10/8.

Also 10/9, KRVN strong o/weak UFO 1241, 2 UFOs 1325, one w/CC opera mx. HLKI w/KBS ID & pips 1400. Fair audio o/878 het & CC, still audible & atop at 1427. (Kaskey, CA)
+U/CC 11/28 1516 w/male talking. However, easily identifiable as //HLKA-706. Sig lasted much longer this AM than they have since early November. (Kaskey, CA)
+Atop 12/2 1500 w/pips, 3 low & 1 high. Strangely enough KRVN was still audible on E/W beam of SM-2. (Kaskey, CA)
+Weak but audible, mixing w/KRVN 1408 2/24. (O'Hare, WA)
+Fair 1200 3/27 w/"HLKH" ID by OM & 4 pips. (Tomer, CA)
- 880 UNID, was taping this freq 11/8 1400 & had at least 3 stns there, none all that clearly. However, pips came through L&C & although replayed many times, this is what I have:(.). Have hrd 2&1, 3&1, 4&1, & 5&1 but this is the first time I've hrd 1 quick low note followed by a long high note.(Kaskey,CA)
+Have hrd same set of pips atop each other on 3 occasions lately. Dominant is 4 low & 1 high; secondary is 2 low & 1 long high. Hrd & taped 11/11 1500; 11/14 1500 & 11/20 1500. Neither likely to be JOPK as no mx box s/off noted thereafter. Prob HLKI & Fujien. (Kaskey, CA)
- 885 ^t MALAYSIA, Kuala Lumpur, 1327-1342 10/14 w/jazz pgm. Very weak, OM in unid lang 1330 seemed //4985 SW. Could not get sufficient audio to ID language. (Williams, OR)
+11/19 1230 w/6 short pips (.), YL talk in non-EE, faded soon. Note that Malaysia is on GMT+7½, so pips & ID are on our half-hour. (Seaver, CA)
+Probably the strong carrier 1210-35 2/7 & 1225-35 2/14. Sure would like to get some audio here. (Peterson, CA)
+Blockbuster carrier but no audio 1210-30 2/7. (Peterson, CA)
+EE nx 1354 5/8. (Padula, Australia)
- 885 UNID, SAH & then carrier noted 10/11 1133, 1150, & 1203. XEMO on at 1205 wipes out 840-885. (Seaver, CA)
+Carrier in ojce more, late morning only which indicates SE Asia & also looping S of most TPs 1310 11/1. (Peterson, CA)
+Weak carrier detected w/BFO 1434 11/4 & seemed to have bits of audio on it, but quickly faded back into the QRN. (Portzer,WA)
+Carrier very weak, no audio 1235 1/31. (Peterson, CA)
- 887 UNID, carrier looping TP/LA 1035 2/14. A N. Korean listed so perhaps them. Freq def 887, not 885. (Peterson, CA)
- 890 ALASKA, Adak, AFRS, could be the stn noted w/weak pop mx u/WLS 9/13 at various checks 0610-0715. Too early for much TP QRM & little else likely on a good AK night. (Rittenhouse, CA)
- 890 AUSTRALIA, Adelaide, 5AN, noted 1559 7/25. This time is much later than normal due no doubt to the Olympics. Was hrd w/a good signal. (Baker, S. Africa)
+Possibly the weak stn w/6 pips 1300 9/20, essentially in the clear w/the Asians looped. (Godwin, OR)
+1300 11/19 pips -----, almost no audio, then s/off 1332, TT to 1340½. This is just leftovers from numerous tentatives on 890 in Oct, only one of which was a possible ID at 1300. Seems odd pips would be on the hour; Adelaide is GMT+12½. (Korinek, CA)
(I've noticed the same thing; might be a national network feed)
+1214 12/13 was perhaps the faint easy listening mx. (Orren,WA)
+2/18 1325 in nightly now w/fair sig, nat'l nx & wx, into s/off following GSQ 1331. Usual TT till after 1332. KBYE usually gone by this time but JOHK comes & goes. (Korinek, CA)

- 890 JAPAN, Sendai, JOHK, NHK pips 1300 9/7; mixing w/another, I
 think, giving what sounded like sports BC; maybe S. Korea.
 (Pejza, CA)
 +10/3 NHK ID L&C 1257 after mucho talk. Time pips 1300 but
 tuned into the middle of them. Had generally good sig until
 after 1415. Another stn far below but JOHK atop the entire
 time. (Kaskey, CA)
 +11/8 1315 in JJ. Mention of Sendai & NHK. (Lobel, CA)
 +11/8 mixing w/HLKB & who knows all AM but mostly w/poor sig.

- 890 SOUTH KOREA, Pusan, HLKB, very weak but distinctive w/"KBS"

 good separation here between HLKB & SAN just by turning the

- 1010 PHILIPPINES, Zamboanga City, DXXX, 100 kw, is the Philippines' reply to Tuaran-1475. Has been hrd so far in Australia, S. Africa, & Sweden. This supercedes DXJW, 1 kw, which was operated by the defunct ABC-CBN Broadcast Corp. Stn was originally set up by A.J. Willis, an American. (Taylor, IN)
- 1010 UNID, 1155 2/21, JJ, not CC, apparently Japanese commercial stn. Top of hour pips runied by QRM. CFRB up at 1200, lost pips. (Heald, CA) (Probably JONR. ed)
+Hrd 1458 4/8 w/pop mx & anc'r w/what sounded like Aussie accent, poor sig, fading. (Baker, S. Africa)

In accordance w/the 1972 Reversion Agreement signed by the U.S. & Japan, all non-military radio xrs/stns were to cease operation by May 77 (this includes the VOA outlets on 1178 & SW as well). In the final s/off anmt, FEBC pres Dr. Robert Bowman stated the BoD had decided on the earlier final s/off date in order to allow the majority of the JOFF staff to be transferred to a new FEBC stn on the island of Saipan. The new stn is to operate on "around 940 kHz" & should be operational "in about 3 mos. from now." The new stn will xmit in EE during the early evening hours 0800-1200?? - 1020 CHINA, 1300 9/16 poor in null of KGBS. Presume this is the one as hrd "East is Red" in 2-part chimes, followed by muffled OM talk (ID?) & chimes again. (Hall-Patch, BC)

 +CC talk o/u KDKA 1012 11/8. (Orren, WA)
 +12/7 noted 2 TPs 0925 in KDKA null. Strongest was playing cl mx, the other w/talk. Sig quite good at times. At 1000 stn atop at the time was CC w/5 low, 1 high 11 sec pip sequence, the other seemed to have a 2 or 3 note IS or pip but covered by CC. 1000-1045 only CC hrd, //835. 1045-1100 sigs were much poorer w/little discernable. Pips surfaced 1100 were 2 low & 1 long high. This not the same stn that was hrd 1000-1045, but may have been the secondary stn 0930-1000. At 1112 only KDKA audible on freq. At 1137 TP there weakly but not //835. My theory: 0925-1000 dominant stn w/5&1 pips 1000 //835 was Chang-chun carrying CC 1st pgm. Fujien Front BC not likely because neither 835 or 880 CC was more than extremely weak & 1020 was in well. 835 & 880 did not send much strength here until around 1115 when 1020 was almost completely out. Also 1040 w/u WHO 0930-1100, yet 877, 647 & other northern stns were in well at the time. Also, could it be that MBC net in S. Korea is using 2 low & 1 high pip nowadays? Had thought HLKY used 2&1 earlier this year & now here on 1020 at 1100. If so HLAW likely. Will keep trying. (Kaskey, CA)
 +12/8 0900 w/5&1 11 sec pips solid atop. (Kaskey, CA)

 +Good sig 10/8 1355 w/YL talking in CC. 10/9 noted w/distorted audio & YL jabbering 1354. Have not stayed on freq at top of hour for possible ID as yet. (Kaskey, CA)
 +Sounds very much like 835 CC but usually too weak & fadey to ID. 11/27 1351 in KTWO fade & 11/29 1115 w/KTWO off. Some day I'll stay on this across the hour. (Kaskey, CA)

 fr/pop looping NW. Started taping on hunch & was rewarded w/
 KANC ID 0738. Taped until 0800 & got many IDs & spots. Was

+Assumed to be the source of weak carrier 1105 9/6.(Peterson,CA)
+Strong 9/17 1333 w/CC. 10/3 good 1341 thru KLOK slop. Was programming in JJ. Gone after 1400. (Kaskey, CA)
+Again presumed the one w/faint EE 9/23 1133 w/slop from XEFR-1180. Poor-fair. (Pejza, CA)

Mike Hardester sent in the following odds and ends of information obtained from off-the-air monitoring of various stations.

China, People's Republic of. At times (days) the following frequencies appear // to each other (1300-1500 UTC) - 560, 590, 640, 660, 760, 810, 835, 920, 940, 980, 100, 1035, 1420, 1590.

North Korea. The following frequencies have been heard in parallel. Numbers in parentheses are times in UTC.

- 625: 785(1200), 813(1200), 725(1000), 820(1000), 875(1000), 2850, 3015, and 4270.

- 695: no // noted.
- 776: no // noted; severely hetting 780.
- 816: only a carrier noted with no ID.
- 850: //3320.

South Korea. South Korea's KBS has four channels/main frequencies. Channel 1 is 710; Channel 2 is 600; Channel 3 is 970; and Channel 4 is 750. In approximately 12 hours of random checking, on the following were found as parallel frequencies.

- Channel 1 - 710 in //620 at 1100, but not at 1230.
- Channel 2 - 600 in //575 & 590 at 1245.
- Channel 3 - 970 was without noted parallels.
- Channel 4 - 750 was also without noted parallels.

Mike also advises that, per a letter from their headquarters, the Far East Broadcasting Company is planning a new station on Saipan. They didn't mention a frequency, but did indicate that the station will have 10 kw and was expected to be on the air around August or September, 1977. This BCB station is the first step in a much larger project, which will eventually include SWBC service to Russia, China, and Japan, and BCB stations for local service on Yap, Truk, Ponape, Majuro, and Palau, each with 10 kw.

ALASKA. A new stn is being planned for Valdez. A partnership calling itself the Prince William Sound BCers has filed an application w/the FCC for a CP for a stn w/1 kw days & 250 w nights. Currently Valdez has only one stn, KEEI, which broadcasts pgms of KBYR Anchorage (apparently a low powered relay. ed). (Alaska Industry magazine, 11/76)

AUSTRALIA. The implementation of 9 kHz channels on 11/23/78 will result in 3 low powered channels: 1485, 1584, & 1602 w/pwr limited to 1 kw. Most Aussie stns will not move more than 4 kHz from present freqs, tho tentative plans include 3NE moving from 1600 to 1566 & sharing w/4GM, 7SH, & 2WA; 2WN-1580 to 1593; 3WL-1570 to 1602; 4MS from 600 to 639; & 4QB/4QO synchro to 855 from 910. TIME PIPS AS AN AID TO ID'ING TP'S, PART 2

by Nick Hall-Patch
with the able assistance of
Daisuke Kawaguchi and Mike Hardester

For those who missed the original time pips article in DX Monitor last year, a short introduction is in order. TP stations are often difficult to identify, even for an experienced DXer. Noise, hets, and long fades often characterize reception of stations from the other side of the Pacific. Verbal IDs can be buried in the interference and there is the problem that oriental languages are unfamiliar to most North Americans. However, many TPs use time "pips" at the top of the hour which can be used as an aid to identifying these stations. Pips are one or more short ($\frac{1}{2}$ to 3 second) tones, which often cut through the crud when not much else in the way of audio is coming in. Following is a list of these different pips:

legend

- . Very sharp, shorter than $\frac{1}{2}$ second
- $\frac{1}{2}$ second
- Multiples of $\frac{1}{2}$ second with - equalling $\frac{1}{2}$ second. This equals 1 sec.

Dots and dashes on the same line are the same musical pitch. A dash raised above the rest of the line is higher in pitch. If it's known how much higher, I will note it's musical intonation. These are Art Peterson's classifications.

A. Constant pitch and duration

1. Japanese and Taiwanese commercial stations

Daisuke Kawaguchi reports that almost all Japanese and Taiwanese commercial stations use a single pip on the hour. He says that few Japanese commercial stations use call-letter IDs on the hour; most have slogans or no ID at all. These pips are generally 2 to 3 seconds long and different stations seem to use different pitches. Of the three stations I've heard on tape, all let the pip fade away rather than finish the pip sharply as FEN below does.

2. Far Eastern Network (AFRTS Japan)

— (key of Bb)

3. Radio New Zealand, ABC Australia, USSR Home Service (?)

— — — — —
(R. New Zealand's pips are in the key of B, ABC Australia noted in the key of B on 4JK-570 and 4RK-840, but 3LO-770 uses the key of G. USSR is supposed to use the key of B, but I've never heard it.)

4. Radio Malaysia

..... (key of B)

5. Radio Malaysia-Sarawak and R. Singapura

..... (key of C)

(Note that R. Malaysia and R. Singapura would use their time pips on our half hour as their time zone is stepped off by $\frac{1}{2}$ hour.)

B. Variable pitch, constant duration

1. North Korea (KCBS and Radio Pyongyang)

- - - (F to E)

2. Vietnam (this is from 1968. May now be obsolete.)

- - - - - (D to F)

3. People's Republic of China

— — — — — (G to G an octave above)

(This series takes 11 seconds to complete)

C. Variable pitch and Duration

1. KBS-South Korea, NHK 1&2, BCC-Taiwan

- - - (A to A an octave above)

(Unfortunately, three separate government services in East Asia use this same series of pips and it is possible that one could hear the pips and not be certain which country on that frequency broadcast them. Both NHK 1&2 and KBS give

call letters in EE just before the pips'. This might help if your reception is reasonably good.

2. MBC - South Korea

- - - (B to B an octave above)

(These pips have also been heard on the S. Korean private outlet on 840 kHz which is not MBC.)

These pips could be extremely useful in IDing a TP that would otherwise remain a complete mystery. If you have a musical ear and a reasonable tape recorder, you can tape the pips, then compare their pitch with notes on a well-tuned guitar or piano. The pitch you hear may not be exactly as indicated above, due to tape speed variations, oddities in the received signal, or plain inaccuracy on my part. For example, I believe R. New Zealand uses 500 or 1000 cycle tone in their pips, which is not exactly a B on a piano. However, the spacing and relative pitch of the pips might well be enough for an ID.

Some questions remain and I'd appreciate any help which can be offered. The pitch differences in pips between 3LO-770 and 4RK-840 may be due to their being in different divisions of the ABC network. 4RK is ABC3 while 3LO is ABC1. Can any DU members assist here? Also has anyone heard Vietnam and does it use the pips indicated here or any pips at all? Finally, has anyone heard the USSR Home Service use pips recently? I haven't, nor have I seen any mention in DXWW of them.

Last season was very good for TPs with loggings of Thailand and Malaysia and tentatives of Indonesia. If you're a newcomer to TP DXing, perhaps this article will help you log some really distant DX (even nearby TPs are a long way away). If you're an oldtimer, please let the rest of us know some IDing tricks you use for TPs, or point out errors or omissions in this article. Above all, report what you hear to DXWW, especially your mysteries. Anybody logged Rangoon yet??

A VISIT TO THE VOICE OF AMERICA OKINAWA by Mike Hardester

Prior to receiving orders to Okinawa from my travel agent - the U.S. Navy - I had tried in vain to log the VOA medium wave outlet on 1178 kHz and even the shortwave outlets seemed difficult at best. However, my faithful travel agent soon put me in the driver's seat, and so on a warm spring day, my wife and I found ourselves on the road to the VOA transmitter site at Okuma, Okinawa.

Okuma is a small village located near the northern tip of the island. One one side of the road, lush green vegetation stretches seemingly for kilometers, and on the other side of the road, the emerald green waters of the East China Sea peacefully wash onto the pearl white beaches. I was so taken by the beauty of the area that I might have missed the turn-off had my wife not pointed out a six-tower array in the near distance, which we were later to learn was the array for the medium-wave transmissions. So, with our course plotted and without benefit of any roadsigns (in English that is), we headed towards the antennas.

On arriving at the transmitter site (the receiver site at Onna is located further south), we were greeted by Mr. Jensen, the Deputy Manager, and Mr. Schlegel, the Transmitter Supervisor, who joined to give us a very thorough tour of the facilities. Construction began in 1952 and operations commenced in mid-1953 with continual expansion to the present 134 acres upon which the VOA site is situated.

The transmitter building houses the 1178 kHz transmitter, which is actually two Continental transmitters of 500 kw phased together to produce a megawatt of power. This transmitter is joined by two 35 kw, one 15 kw, and one 100 kw shortwave transmitters, plus a 5 kw auxiliary transmitter which provides for RTTY service to the IPS (International Press Service) located at USIA headquarters throughout Asia.

Program material is received at the Onna receiving site from direct off-air monitoring of transmissions from Delano and Dixon relay sites. This is fed via VHF circuits to the transmitter site for rebroadcast. Two of the receivers immediately noted were of the Collins 51J series & Hammarlund SP-600 line; Hewlett-Packard frequency synthesizers were also noted.

The medium wave transmitter is in operation from 1100 to 1600 GMT and provides English, Chinese, and Korean programming to mainland China, Laos, and Korea, on beams of 17° and 315°. Reception reports from mainland China indicate no jamming of the English transmissions; however, the Chinese Service is jammed a great deal.

The shortwave transmissions also transmit the same languages to the same target areas or nearby areas, and these also appear to be having an effect as evidenced by the reception reports.

And what tour would be complete without checking out the local telephone exchange? Yes, the VOA also has a completely automated telephone exchange system which handles the VOA transmitter site, VOA family housing, and a nearby military recreation center.

After a tour, over tea, several topics were discussed. At present (early 1977 - ed), there is a great deal of speculation over the planned replacement site of the VOA-Okinawa relay site. The next location is undecided, as of this writing. While several places offer a possible site, Saipan, Micronesia, South Korea, Hawaii (remember the old VOA site there?), no specific location has yet been decided upon. Mr. Jensen went on to further point out that from inception to operation takes approximately five years; thus a new site, even after being chosen, wouldn't be on the air too soon. This brought about the point that with host countries becoming fewer and fewer, international broadcasters may be forced to stay at home and beam their message across the miles with power easily exceeding a megawatt!! Can you imagine being a DXer situated a couple of kilometers away from a megawatt transmitter?! Among other topics discussed, it was mentioned that the VOA site at Poro, Philippines, was built from almost identical plans as the VOA-Okinawa. Lastly, on March 14, 1977 at 1500 GMT (12 midnight Japan time), the VOA Okinawa will sign off for the final time, and while the visit was quite pleasant, much like old friends getting together, it will soon be time to hear the final farewell: "This is the Voice of America concluding its transmission from Okinawa."

(Editor's note - Although the VOA station at Okinawa has now left the air, the above article is included for general interest's sake.)

OKINAWA CONDITIONS OF FREQUENCIES LOG - Mike Hardester

The list of frequencies which follows is a rough (very rough) example of a "condition of frequencies" of the medium-wave band as monitored on Okinawa. Simply because only one station is listed on a frequency, it should not be assumed that it is the only audible station on the particular frequency; each frequency ending on 0 or 5 averages 3 & 2, respectively, stations on the frequency. No dates are listed as stations were monitored on various days, thus one station may have been monitored on several occasions at different times to verify the station's identity. In such instances with the crowded band conditions even precision frequency measurement (PFM) is only of slight use. Frequencies are in kHz; dates & times are GMT (1977).

Domestic International Loggings

- 621.5 ? UNID, carrier noted here 0445, 0610 4/21 seeming to loop Southwest-Northeast. A domestic spur? Somebody off frequency? Not heard since. (Hall-Patch, BC)
- 657.5 WA, Seattle, bootlegger noted here w/good signal 0740-0805 1/31. Mostly w/Eagles and Carole King LPs nonstop w/no IDs or announcements. (Portzer, WA)
- 850 CO, Denver, KOA, 9/20 0259 w/announcements by man in SS followed by news in EE. Couldn't understand the SS. (Lobel, CA)
- 875.8 AB, Drumheller, CJDV, has been putting out loud distorted audio here and on 944.2 for the past month or so. First noted by Bytheway at 1035 7/10, and has subsequently been heard by other Seattle DXers and Derek Ford in BC. Programming is automated country western mx w/announcements after every third song, interspersed w/occasional IDs and PSAs. Very strong for a spur--equal to or better than WLS-890 at times here in Seattle. Hope no one gets confused and thinks they've heard North Korea. (Bytheway/Portzer, et al, WA)
- 980 TX, Rosenberg, KRPD, has SS daily to 1530 local time. Announcer sounds American. Suburb of Houston. (Schatz, TX)

- 1180 FL, Marathon Key, VOA, interval theme, ID, then SS program 0100 10/1. Strong - unusual - thought antenna pattern would rule me out! (Dunn, NS)
+11/22 1128 w/KCBQ-1170 off. Heard S-10 signal w/"Yankee Doodle", and good ID and SS announcement giving frequency and other details. (Lobel, CA)
+0000 1/14 heard "Yankee Doodle" in background. About 10 different versions of it! No voice heard due to WHAM wiping out the channel. (Davis, GA)
+Good w/news in SS w/frequent mentions of President Carter. Atop second SS (probably YVNU), WHAM nulled 0003 1/25. (Connelly, MA)
+4/27 0233-0252 in poor-fair w/SS talks and commentary by man, 0239 ID "Desde Washington, La Voz de América", correspondents reports. (Orr, CO)

- 1340 DC, Washington, WFAN, noted from 12/31 w/usual Mexican bar mx, "R. Rio Grande" IDs, all SS except for IDs on the hour in EE. Ex-100.3 FM, changed w/WOOK. (McNeil, DC)

- 1420 CA Stockton, KSTN, started SS program at 1103 9/20 so don't get excited about SS on 1420! (Peterson, CA)
- 1421.25 WA, Walla Walla, KUJ, noted here 0652-0806 s/off 1/10 w/rock mx, putting fierce het against KSTN et al. Hope nobody thinks it's a TA. (Portzer, WA)
- 1450 CA, Escondido, KOWN, 1/24 0442 in SS man announcer w/ranchera mx and many IDs, 0457 spot in SS for "Quality Cheverolet" in Escondido, 0500 ID in SS and EE. (Lobel, CA)
