**FREQUENCY-WAVE LENGTH CONVERSION TABLE
KILOCYCLES TO METERS**

The trend of the best modern practice is to use frequency in kilocycles instead of wave length in meters. The following conversion table will be of use to this end. It is reversible. That is, 940 kilocycles is 319 meters and likewise 319 kilocycles is 940 meters. The Federal Radio Commission assigns the frequency on which a broadcasting station is to operate. Reference to the List by Frequencies shows that the frequencies are ten kilocycles apart. It will be noted when tuning in the various stations that the dial readings will bear a certain relationship to the frequency of the station. By studying this relationship it is possible to predict the dial readings of stations when the frequencies are known. For a more complete Conversion Table, see the Lefax Radio Handbook, Seventh Loose-Leaf Edition.

FAMILY BUDGETS MADE EASY

LEFAX FAMILY BUDGETS MADE EASY

By Charles F. Breitzke, C.E.

This loose-leaf book makes it exceedingly simple to figure out just how your income should be apportioned in order to yield maximum enjoyment to you, and then enables you with minimum effort to see that your budget is lived up to. Contains typical budgets for various incomes and shows how to adjust them to fit your particular needs. Simple forms are provided for entering daily expenses, properly classified, and monthly and yearly summaries. This book has been painstakingly compiled from trustworthy sources and is a safe and wise guide to efficient saving and spending.

Price, complete (including No. 655 binder, stamped in gold, with 6 section linen tab index and year's supply of expense and summary forms).....\$2.75
Additional expense and summary forms (one year's supply)..... .50
