NRC DOMESTIC LOG...6th Edition...1982-84

Copyright © 1982 by Ronald J. Musco for the National Radio Club. All rights reserved. No part of this book may be used or reproduced in any manner whatsoever without written permission except in the case of brief quotations embodied in critical articles or reviews.

For information, write:

NATIONAL RADIO CLUB, P.O. BOX 118, POQUONOCK CT. 06064

The sixth edition of the NRC DOMESTIC LOG is respectfully dedicated to John A. Callarman. John edited the previous five editions of this log and through his untiring efforts, the medium-wave DX'er was provided with the most complete and up to date information concerning AM radio stations. We, the members of the National Radio Club, thank him for a job well done!

CREDITS:

Detailed information on stations was gathered by many DX'ers in all parts of the U.S. and Canada. DX'ers and editors---both in the NRC and the IRCA---supplied log information, either directly to the log editor or through the pages of their bulletins, and include:

ALABAMA - Neal Perdue
CALIFORNIA - Don Kaskey,
Pete Taylor
COLORADO - Wayne Heinen
CONNECTICUT - Ron Musco
DELAWARE - Dave Schmidt
FLORIDA - Gerry Thomas,
Ed Mitkus
GEORGIA - Chuck Hutton,
Karl Jeter
ILLINOIS - Karl Forth,
Robert Kramer, Ken Onyshuk
KANSAS - Gary Houdek,

SPECIAL CREDIT:

The editor would like to issue special thanks to David Lewis of Kansas City, MO, whose continued efforts to keep up with the local channels, or graveyard frequencies, has been a good example of club cooperation. Brian Vernon in Elsa, YT, provided much of the detailed information on Canadian and Alaskan Stations. Bill Hardy in Aberdeen, WA, was particularly helpful on listings in the northwest part of the country. John Oldfield of Surrey, British Columbia, whose "Kanadian Korner" column keeps us abreast of Canadian station changes.

HISTORY OF THE LOG:

The first edition of the NRC Domestic Log was published by mimeograph and hand-typed stencil in Boston in 1968, with John Callarman providing the typing and the original Boston Publishing Committee the hand-labor. The second and third editions were published in Boston as the Boston Publishing Committee changed the method of print for National Radio Club publications to commercial offset. There was a "mid-term" edition published by the New Jersey Publishing Committee in 1975, and a new edition of the NRC Log done in the fall of 1976. The NRC plans to publish the log every two years.

The roots of the NRC Log, though, date back to the 1930's when RADEX magazine published a log, and the 40's and 50's when then Newark News Radio Club BCB editor Carroll Weyrich produced an annual medium wave log.

The accuracy of an endeavor of the nature of the NRC Log cannot be guaranteed, primarily because changes occur daily in the vast amounts of information contained in a publication of this nature. Such items as call letters, frequencies, locations, power, and antenna pattern are relatively stable. FCC information keeps this material up to date.

Network, schedule, and address information is considerably more volatile and since there are no central sources to which all this information must be reported, it requires close monitoring by many people to keep this information up to date. Members of the National Radio Club and the International Radio Club of America around the country have been asked to help keep tabs of these changes. Their efforts are responsible for the accuracy of this log.

"DX News" --the publication of the National Radio Club, keeps the log as "up-to-date" as possible through the periodic "Log Updater Column." Non-members can contact the club at its Poquonock, Connecticut address to determine how to subscribe to these updaters.

Any assistance from users of the log to make corrections to information contained in the publication would be of great help to other users. Information can be provided by contacting the editor of the Log, who also serves as editor of the Updater column. The editor is Ronald J. Musco, National Radio Club, P.O. Box 118, Poquonock, Conn. 06064.

HOW TO USE THE NRC LOG:

The first column gives the call letters of the station, or an indication that it is an American Forces Radio Service (AFRS), American Forces Caribbean Network (AFCN), or a Voice of America (VOA) station. Three symbols pertaining to construction permits are contained in this column: (*) for a new station not yet on the air; (+) for a change in facilities (power, antenna, or city of license); and (#) for a change in frequency. The frequency from which the station is scheduled to move is designated by the abbreviation "PO" -- for Presently Operation (on) _____ khz.

The second column gives the city of license (or in certain cases, cities of authorized station identification) and the Zip or Postal Code. The Zip Code is included in this column even if the address (see Column Six) is in a different city. Where there are two cities of license (or authorized identification), the zip code applies to the city in which the mailing address exists, and that city is underlined.

The third column provides information concerning the licensed hours of operation and directional antenna patterns, if used. The symbols are as follows:

- D1 -- Daytime (sunrise to sunset) operation only, nondirectional antenna
- D3 -- Daytime operation only, directional antenna, same pattern at all times
- D4 -- Daytime operation only, directional during Critical Hours (CH) (sunrise to two hours after sunrise and two hours before sunset to sunset) only
- D5 -- Daytime operation only, directional during non-critical hours, non-directional during critical hours.
- D6 -- Daytime operation only, different patterns during critical hours and noncritical hours.
- L1 -- Limited time operation (usually based upon sunrise or sunset at the dominant station's location on a clear channel), non-directional
- L3 -- Limited time operation, directional antenna
- N2 -- Night time (sunset to sunrise) operation only, directional
- SH -- Specified hours, as directed by the station license. Numbers showing pattern correspond to numbers under "U" category. Specified hour stations are those who would normally be unlimited but because of financial or other considerations, have petitioned for a waiver of the minimum schedule -- 0600-2200 local time.
- ST -- Shared time operation; broadcasting time shared with a second station on the same channel (or in one case, three stations share time). Numbers same as under the "U" category.
- U1 -- Unlimited time operation, with non-directional antenna
- U2 -- Unlimited time operation, directional at night (sunset to sunrise) only
- U3 -- Unlimited time operation, directional all hours, same pattern day and night
- U4 -- Unlimited time operation, directional, different patterns day and night
- U5 -- Unlimited time operation, directional day, non-directional night
- U6 -- Unlimited time operation, directional night and critical hours, same pattern
- U7 -- Unlimited time operation, directional all hours, but three different patterns (day, night, and critical hours)
- U8 -- Unlimited time operation, directional critical hours and night (different patterns), non-directional day
- U9 -- Unlimited time operation, directional day and night (different patterns) but non-directional during critical hours.

More information on directional antenna patterns may be obtained from the NRC's Night Pattern Book and from several articles available through the NRC reprint service.

The fourth column shows power in watts -- first power shown is daytime (sunrise to sunset) power -- second power shown is night time (sunset to sunrise) power. When there is no second power shown, the station is a daytime only operation. When there is no first power shown, it is a night time only operation.

The fifth column shows power used in certain special hour categories-- Pre-sunrise authority (p); Critical Hours (ch); and Canadian Restricted (cr). PSA powers are used from 0600 local time to the sunrise time specified in the license when that sunrise time is later than 0600, with daytime antenna facilities. (On certain clear channels, the PSA time begins at sunrise of a dominant station located east of the PSA station.) Some PSA powers are authorized but not used. Critical Hours are sunrise to two hours after sunrise and two hours before sunset to sunset. Canadian Restricted Powers are used during critical hours.

The sixth column shows the station's mailing address. Where a post office box and a studio address are both known, the NRC Log chooses the P.O. Box address for space purposes.

The seventh column shows the schedule, in Eastern Local Time, though the symbol at the start of the column denotes the time zone in which the station is located. Those time zones are:

A:Alaska ELT minus 5 or Atlantic ELT plus 1	H:Hawaiian ELT minus 5
B:Bering ELT minus 6	M:Mountain ELT minus 2
C:Central ELT minus 1	N:Newfoundland ELT plus 1½
E:Eastern	P:Pacific ELT minus 3
	Y:Yukon ELT minus 4

Some time zones or specific locations inside them do not switch to daylight time. For those areas, the designation (+1) is used. This means convert the schedule to ELT during daylight time months by adding one hour. Time zones for the Canadian Low-Power Relay Transmitters (LPRT) show the time of the station being relayed. Times in parentheses, when the day is not specified, apply to the Sunday schedule, even though the actual sign-off time may be a Monday morning, ELT.

Other schedule related abbreviations used in the seventh column are these:

SP= Silent Period	NSP= No Silent Period	V= Varies
A= Approximately	OC= Open Carrier	TT= Tone Test
SS= Sunset	LSS= Local Sunset	
SR= Sunrise	LSR= Local Sunrise	

The eighth column shows networks or audio news services, including state, provincial, and regional networks. These are they:

U.S. National

Ac=American Contemporary (ABC)
Ad=American Direction (ABC)
Ae=American Entertainment (ABC)
Af=American FM (ABC)
Ai=American Information (ABC)
C=Columbia Bcstg. System (CBS)
K=Larry King All Night Talk Program
M=Mutual Bcstg. System (MBS)
N=National Bcstg. Co. (NBC)
Nb=National Black Network
Ns=The Source (NBC)
R=RKO Network
S=Sheridan Bcstg. Service

Canada National

Ce=CBC English Network
Cf=CBC French Network
JG=John Gilbert All Night Talk Program

Audio News Services

Ap=Associated Press Radio
U=UPI Audio

Regional Networks, U.S.

Bf=Brownfield Network (Farm)
I=Intermountain Network
Wp=Woodruff Pacific Network

Canada Regional

CI=Central Interior Network
LRT=Le Reseau Telemedia (French)

NL="N.L." Network
RC=Radio Cariboo Network
Rml=Radiomutuel (French)

Canada Audio News Services

BNV=Broadcast News audio, including ABC
NR=Newsradio, including CBS audio cuts
SBN=Standard Bcst. News, including NBC
Sel=Selkirk News Network
WIN=Western Interior Network

State Networks

Aa=Agriculture News Service (ARK)	Mf=Michigan Farm Radio Network
Ab=Agribiznet Farm Radio Network (NEB)	Mo=Missouri Network
Ak=Alaska Radio Network	Ms=Mississippi Agricultural & News Network
Al=Alabama Information Network (ALANET)	Nc=North Carolina News Network
Ao=Agri-Broadcasting Network (OHIO)	Oa=Oklahoma Agrinet
Ar=Arkansas Radio Network	Oh=Ohio News Network

Ky=Kentucky Network	Vf=Virginia Farm Network
La=Louisiana Agri-News Network	Vn=Virginia Network
Li=Linder Farm Network (MINN)	Wf=Wisconsin Farm Bcstg. Network
Ln=Louisiana Network	Wi=Wisconsin Independent News Network
Ma=Harry Martin Farm Network (INDIANA)	

NOTE: Many network stations will do their own newscasts, using only voice cuts from the audio services or the networks. Some will pick up the network commercials and integrate them into their broadcasts without using network newscasts.

NOTE #2: ABC's lists of affiliates do not include every station that carries the various networks. WILY-1210 has been Ai for at least 8 years; WCIL-1020 has been Ac for same period, but has never shown up in an affiliates list from ABC. Stations monitors have heard carrying ABC net news but not listed are underlined; those in parentheses MAY be in the same category.

RELAY STATIONS

rCBK-540 indicates the station in question relays CBK which operates on 540 khz.

ABOUT THE NRC

The NATIONAL RADIO CLUB was founded in 1933 and is the oldest and largest organization devoted exclusively to Medium Wave DX'ing. Membership in the NRC affords many benefits to the BCB enthusiast. You'll automatically receive DX NEWS, the NRC's invaluable magazine, which is published 30 times a year; weekly during the fall/winter DX season. DX NEWS has been published regularly since 1933 - almost the "dawn of DX'ing." In the past year we have provided our membership with nearly 1,000 pages crammed with information specifically for the MW DX'er. The NRC has long been the leader among DX clubs: first to introduce the technical advances which have revolutionized the hobby, first to produce complete logs listing all BCB stations in North America, and first to publish a handy-sized, commercially printed DX magazine. The NRC's preeminence is recognized by the World Radio TV Handbook which has chosen the NRC to prepare its North American station listing.

NRC's magazine, DX NEWS contains both regular and special features. In the MUSINGS section, DX'ers write in to tell about their DX'ing experiences, latest catches, descriptions of equipment, or to ask questions and to discuss anything of interest to fellow MW DX'ers... In the INTERNATIONAL DX DIGEST section you'll find concise and very up-to-date listings of the foreign MW stations being logged by our alert, worldwide membership, as well as MW propagation information and the most detailed, accurate foreign station data available anywhere... In the DOMESTIC DX DIGEST section you'll get the latest on domestic and Canadian stations: new stations on the air, call and schedule changes, new network affiliations, tabulated information designed to keep the NRC DOMESTIC LOG up-to-date. These three sections appear regularly in DX NEWS and often feature hot information little more than a week old! Many unique and invaluable feature articles appear in the pages of DX NEWS, including articles for beginners, hints on improving MW reception, plans for special MW equipment and antennas, and reports on original scientific research on MW signal propagation to name a few. Our annual listings of all-night station schedules and listings of regular FREQUENCY CHECKS have enabled our members to log and QSL many rare stations by alerting them as to where and when to listen.

Since the NRC's membership roll includes many of the top experts on all aspects of Medium Wave DX'ing, members with problems or questions can benefit from the immense body of the NRC membership's experience by simply asking for help in the MUSINGS section. As a special service to new members, the NRC makes available reprints of over 100 important past articles from DX NEWS dealing with all phases of the hobby. Because of the concentration of top MW DX'ers in the NRC, many of the articles appearing in DX NEWS are truly unique and unavailable elsewhere at any price!

The COURTESY PROGRAMS COMMITTEE (CPC) is one of the Club's most important and interesting activities. Members of this hardy group regularly arrange special programs dedicated to the NRC from hard-to-hear stations at times favorable for long distance reception. Literally hundreds of otherwise impossible-to-hear stations have been logged and verified as a direct result of NRC Specials: you've probably heard some of these programs at various times in the past.

NRC members are among the friendliest people around and informal DX get-togethers take place in many parts of the country at various times. Our Annual NRC Convention attracts members from a wide area for a long Labor Day weekend of general partying, DX discussions, verification displays, equipment demonstrations, and technical talks.

The NRC is strictly a nonprofit organization operated entirely by unpaid, volunteer workers for the betterment of the MW DX hobby. Special publications, such as the NRC NIGHT PATTERN BOOK, as well as other DX'ing Aids, mechanical filters for improved receiver selectivity and loop antenna components are made available to NRC members at discount prices. Dues in the NRC pay the cost of printing DX News and mailing it to the membership. Membership rates vary according to the postage class desired. In addition to the annual membership dues, a one-time fee of \$1.00 is charged the first year to cover the

expense of the New Member Booklet and entering your name into the NRC Mailing System. Whether you're a grizzled veteran of the Broadcast Band or just getting started, DX NEWS and the NRC will add a new dimension to your enjoyment of the Medium Wave DX hobby. We invite you to join us today!

NRC MEMBERSHIP, P.O. BOX 118, POQUONOCK, CT. 06064

APPLICATION FOR MEMBERSHIP

Name: _____ Age: _____

Full Address (include ZIP): _____

Occupation: _____ How long a DX'er: _____

Receiver (s) Used: _____

Antenna (s) Used: _____

Main Interest: () Domestic DX () International DX () Technical
Special DX Skills, Languages, etc.: _____

Amateur Call Sign (if any): _____ Bands/Times Worked: _____

I heard of NRC through: _____

REMITTANCE ENCLOSED FOR: (U.S. FUNDS)

- () \$18.00 First year membership, First Class delivery of DX NEWS in the U.S. and Canada. This includes a one-time new member fee of \$1.00.
- () \$26.00 Airmail delivery of DX NEWS to Mexico & the Caribbean. Includes the one-time \$1.00 new member fee.
- () \$31.00 Airmail delivery of DX News to all other areas. Includes the one-time \$1.00 new member fee.

Renewal of membership (second and later years) is \$1.00 less than rates listed above.

Canadian L.P.R.T. Stations

Canada's population is spread thinly over a very large area and this makes the task of supplying adequate radio service difficult; the presence overhead of the auroral absorption zone means that even 50,000 clear channel outlets are blacked out at times. The CBC has therefore established a far-flung network of low-powered local MW relay transmitters to serve isolated communities. These LPRT's are located in Canadian Pacific Railroad stations and receive their programming from special audio phone lines; they operate with a modest power of 40 watts and are completely unattended operations. In spite of their low power, these stations are often heard by DX'ers - although the fact that several LPRT's relaying the same station may operate on the same channel can make positive identification impossible. The initial three letters of the LPRT call will often (but not always!) indicate the station being relayed; thus CBNC relays CBN, etc. Reception reports should be addressed to the station being relayed; don't expect a specific LPRT QSL, though, unless there's but a single relay on the channel...

Carrier-current Stations

These are small, low-powered operations designed to provide AM radio coverage to colleges and universities. Although many of these stations use legal sounding call letters and otherwise seem to be professional broadcasting stations, they are actually unlicensed operations manned by students. The 500-odd carrier current stations exist by virtue of an FCC Rules provision which permits unlicensed operation on the AM band as long as the effective radiation from the station is below prespecified (and very low) levels. Properly operated, such an unlicensed station will be heard no further than a mile under the very best of conditions, and frequently only for a few blocks. Some carrier current stations become careless about radiation levels, though, and may be heard over much greater distances; in such a case the station is in violation of FCC regulations, of course. Most of these stations operate in the lower part of the band, with 550, 640, and 650 kHz being favorite channels. Technical quality tends to be very good and the call letters used often reflect the name of the school, e.g., WNEU at Northeastern University, etc. These stations tend to be reluctant verifiers - especially if operating with power in excess of the legal limit; it helps to stress that you're a DX'er using very special receiving equipment and not just a casual listener when reporting to these stations. No complete list of these stations exists although at this time the FCC is proposing to bring them under its control; consult the short list in the Broadcasting Yearbook for a short tabulation.

Illegal Stations

Unlike the carrier-current stations which if properly operated are completely legal though unlicensed, at any particular time there are usually quite a number of completely illegal "bootleg" or "pirate" stations on the air and these are frequently logged by the alert DX'er. These illegal operations are usually (but not always) characterized by poor audio quality, drifting frequency, and erratic schedules. Most are very low-powered operations intended for a small local audience but an occasional high-power pirate takes to the air and is heard over large distances. Most operate near or above the top of the band at 1600 kHz and several dozen are traced and closed down by the FCC every year.

HOW TO SEND A RECEPTION REPORT

Given sufficient skill and patience on the part of the DX'er, very few U.S. and Canadian stations will fail to verify reception reports. Many stations are reluctant to QSL, however, in part due to the large numbers of inadequate or incorrect reports received. Even worse for DX'er/station relations are the reports which demand, rather than request verification. What goes into a good reception report on the AM band? A number of items should go into every report without fail. Give the date of reception and the frequency, and be certain to specify which time zone you are using in the report.

The most important part of the report - and the weak spot in most inadequate reports - is the listing of specific and verifiable program details. The object of a reception report is to supply the station with incontrovertible evidence that the particular reception did in fact occur; the station must be able to compare the details of programming supplied by the DX'er with the station log or their knowledge of the programming before a meaningful verification can be issued. No hard-and-fast rule can be given for how much program detail should be included, but generally speaking, the more the better. A word-for-word transcription of a one minute local advertisement would constitute excellent QSL material, whereas a list of 20 pop song titles might be worthless, since stations rarely log song titles. U.S. stations are required to enter the times of identifications, commercial spots, and public service announcements in the station log; such items make good verification material. Particular emphasis should be given to program details that are unique to the station in question: exact wording of station promos and local advertising, names of announcers, exact sign-on or sign-off formats, etc. Programming which appear on several stations simultaneously, such as Network newscasts, are often useless as proof of reception, unless some local news material is also included.

Describe the quality of reception in some detail with emphasis on interfering stations. Try to give an indication whether or not their station is frequently received in your location, or if the reception was a rare "freak". Mention other stations in the same locality that you have heard, and compare the relative reception quality. Avoid using Shortwave reporting systems, such as SINFO codes, as they are unfamiliar at most AM stations. Give details of your receiving equipment with emphasis on special items such as loop antennas, etc.

One very objectionable and unethical practice in which a small segment of an otherwise honest DX community seems to indulge itself, is the practice of sending fraudulent reports to DX stations in an effort to obtain a verification of reception, or QSL card. One can not overemphasize the fact that many BCB stations in the USA have on their staffs, at least one person, be it the verification signer, station engineer, or a technician, who is quite often a member of one of the major MW DX clubs. Frequently, when the unscrupulous "DX'er" sends a fraudulent or dud report, embarrassment is the end result. Remember, it's up to you, the responsible DX'er, to prove to the station that you actually heard the DX you claim!

Having prepared a factual report, politely request the station to check your report against their log, and if it agrees, to send you a QSL card or letter of verification. Never demand - always ask politely! AND ALWAYS INCLUDE RETURN POSTAGE FOR A REPLY!

Good Luck!

NRC PUBLICATIONS

The National Radio Club is proud to announce its list of booklet publications. All of these items are available from the National Radio Club Publications Center, P. O. Box 164, Mannsville, N.Y. 13661.

DOMESTIC LOG

This spiral-bound volume contains listings of all U.S. and Canadian A.M. stations including locations, addresses, powers, antenna operations, networks, schedules and other useful information. Cost is \$ 8.50 to members and \$ 9.50 to non-members.

NIGHT ANTENNA PATTERN BOOK

This spiral-bound volume features the nighttime directional antenna patterns of Canadian and U.S. stations on map pages of 8½ x 14 inches. These patterns are drawn to scale from official government sources. Commercial publications of this sort cost more than ten times as much for this most valuable DX reference. Cost to members is \$7.50 post-paid and \$8.50 to non-members.

ANTENNA REFERENCE MANUAL

This manual is a compilation of numerous articles on the subject of antennas for MW DXers which have appeared in the pages of DX News over the past several years in one handy volume. Includes data on air- and ferrite-core loops, antenna tuners for longwires, and beverage antennas, along with coupling devices. 5½ x 8½ booklet format. \$2.50 in the U.S. and Canada.

GETTING STARTED IN MEDIUM WAVE DX'ING

This booklet is designed to assist the novice DXer in pursuit of the hobby. It includes introductory articles on foreign and domestic DXing as well as related topics. Included are articles on reception reports and safety and preventive maintenance of your DX gear. All members who pay the New Member Fee automatically receive a copy of this booklet. For non-members the cost is \$1.25 in the U.S. and Canada.

RECEIVER REFERENCE MANUAL

This manual is similar to the manual on antennas, except that the subject is DX receivers. It includes useful articles on receiver modifications and accessories, and reviews of many of the commonly used MW DX receivers currently available. A must for the serious DXer/Experimenter. 5½ x 8½ booklet format. \$2.50 in the U.S. and Canada.

LOG & PATTERN BOOK UPDATERS

Periodic updaters for the NRC Domestic Station Log and the NRC Night-time Antenna Pattern Book are published in the pages of DX NEWS. Non-members may obtain reprints of these updaters in composite by ordering them through the NRC Reprint Service. Cost is \$1.00 for members and \$2.00 for non-members, covering all updaters from time of the most recent edition of the Log or Pattern Book to the date of the order.

***Note: Prices subject to change without notice. Orders from outside North America, please contact Publications Center for applicable rates and methods of shipment. For domestic orders, allow 4 weeks for delivery.
