WHAT EMRC ACCREDITATION MEANS

The Arbitron Radio Service has been accredited by the Electronic Media Rating Council (EMRC) since 1968. To merit continued EMRC accreditation, Arbitron (1) adheres to the Council's Minimum Standards for Broadcast Rating Research; (2) supplies full information to the EMRC regarding details of its operation; (3) conducts its measurement service substantially in accordance with representations to its subscribers and the Council and (4) submits to, and pays the cost of, thorough annual audits of accredited Arbitron services by CPA firms engaged by the EMRC. In addition to sizable audit charges, Arbitron provides office and file space for EMRC auditors as well as considerable staff and computer time involved in various aspects of these inspections.

Further information about the EMRC's accreditation and auditing procedures can be obtained from the Executive Director, Electronic Media Rating Council, 200 W. 57th St., Suite 204, New York, New York 10019.

PREFACE

This report is a compilation of radio audience estimates designed to represent radio listening during an average week for this market for the Winter 1995 survey period. The surveys to which the Metro Audience Trends estimates apply are identified in the Metro Audience Trends section of this report. The estimates are based on listening information recorded in seven-day diaries by persons 12 years of age and older. All audience estimates are approximations subject to statistical variations and other limitations. The reliability of audience estimates cannot be determined to any precise mathematical value or definition.

This report is intended to furnish radio station, advertiser and agency clients of Arbitron with an aid in evaluating radio audience size and composition. Arbitron attempts to provide herein a summary description of methodology that may be understood by all who use the report. A more detailed description of Arbitron methodology can be found in a separate publication, available to all syndicated radio report subscribers, titled *Description of Methodology for Radio*.

WARNING

All Arbitron audience estimates and Arbitron maps are copyrighted and confidential. The unauthorized use of any Arbitron audience estimate or map constitutes copyright infringement which could subject the infringer to civil damages of up to \$100,000 and criminal penalties of up to one year imprisonment and a \$25,000 fine pursuant to Chapter 5, Sections 504 and 506 of Title 17 of the U.S. Code. All users of this report are referred to Restrictions on Use of Report (Page iii, Paragraph 21).

DMA® is a registered service mark of A.C. Nielsen Company, and is used pursuant to a license from A.C. Nielsen Company.

PLEASE NOTE/Users of this report should become familiar with the sections of this report titled *Description of Methodology* (Pages i-iv) and *Limitations* (Page iii, Paragraph 16). Further, instructions for estimating reliability and effective sample bases for this report may be found on Page v. See Page 2A for the Table of Contents and survey schedule for this market.

The data above are the most current data provided to Arbitron as of this survey period. Stations are listed only if they have met Arbitron's Minimum

Reporting Standards for this survey (see paragraphs 7-10 of this report). The county or split county listing reflects the geographic location of the station's City

of License. Stations for which no Sales Representative is on file with Arbitron are listed above by "N/A."

Metro Market Profile

LOS ANGELES

The Arbitron Metro Market Profile provides information on demographics, socioeconomic characteristics, retail sales, consumer spending, print media and passenger car registrations. A Metro Ratings and Time-Spent-Listening (TSL) summary for all the 1995 radio markets is also included in this section.

The data in this section are reported for the Metro Survey Area as defined by Arbitron for this Market Report. However, for Metros

comprised of a portion of one or more counties, these data may not be representative of the actual Metro Survey Area.

This Market Profile section is provided to assist radio stations and advertisers in evaluating media opportunities. A brief description of each set of data is provided. However, for your convenience in obtaining additional information regarding the data contained in these pages, please refer to the contact supplied for each data source.

Metro Area Lifestyle Profile by PRIZM® Groups

Group	Description	National % Persons 12+	Metro % Persons 12+	Index of Concentration
S1	Elite Suburbs - superrich, executive, upscale white-collar couples, empty-nesters	8.35	18.24	218
U1	Urban Uptown - elite, upscale, bohemian singles & couples; established immigrant fam.	4.28	19.61	459
C1	2nd City Society - upscale executive & young upscale white-collar; affluent retirees	4.61	4.35	94
T1	Landed Gentry - elite exurban, small-town executive & young mid-class-town families	6.54	0.86	13
S2	The Affluentials - upwardly mobile young singles & couples; white-collar suburban fam.	9.69	11.69	121
S3	Inner Suburbs - empty-nesters, mobile city singles, blue-collar fam. & aging couples	6.68	1.56	23
U2	Urban Midscale - white-collar urb. couples; mid-income immigr.; Afr.-Am. & Hisp. fam.	8.36	33.58	402
C2	2nd City Centers - mid-level couples; mid-income families & college town singles	9.25	0.30	3
T2	Exurban Blues - yng. mid-class, blue-collar families in mid-size towns; GI families	6.59	0.15	2
R1	Country Families - midscale couples, rural, white-/blue-collar, kids, farm families	5.57	0.09	2
U3	Urban Cores - ethnically mixed singles; Hisp. sncls. & fam.; inner-city solo-parent fam.	4.75	9.58	202
C3	2nd City Blues - low-inc. older sncls., cpls. & fam.; low-inc. Hisp. fam.; Afr.-Am. svc. wrkr.	5.51	0.00	0
T3	Working Towns - older families, mill towns, low-inc. blue-collar, town seniors	7.74	0.00	0
R2	Heartlanders - rural farm town & ranch families, farm dwellers & tenants	3.45	0.00	0
R3	Rustic Living - moderate blue-collar farm fam.; low-inc. older cpls., remote older families	8.63	0.00	0

PRIZM®

PRIZM® is a market segmentation system developed by Claritas/NPDC, Inc. to help marketers target consumers and profile markets and audiences by lifestyle. Claritas analyzes key demographic characteristics from the U.S. Census and hundreds of millions of actual consumer purchase records to classify each neighborhood in the U.S. into one of 62 distinct PRIZM clusters. Among the characteristics analyzed are income value and type of housing, marital status, presence and ages of children in a household, ethnicity, urban-suburban-town-rural location, age, sex, occupation, level of education, as well as new car registrations, magazine subscriptions, real estate transactions, and financial data. Claritas updates PRIZM annually.

The PRIZM system provides marketers with a way to identify and target key consumer segments. There are 62 unique clusters organized into 15 groups. Each group is identified by a group code which denotes a basic neighborhood type. (U1-U3 groups are Metro Urban; C1-C3 groups are Second Cities; S1-S3 groups are Fringe Suburban; T1-T3 groups are New Exurban Suburbs; and R1-R3 groups are Towns and Farms in Rural Areas.) When linked to market and radio measurement data, this geodemographic model produces descriptive audience information.

The 15 PRIZM groups are described above. Each PRIZM group's composition in this Metro for persons 12+ is compared to the group's national composition. The index compares the Metro market's composition for each group with the national composition. An index of 100 indicates that the market has the same percent concentration as the nation; an index of 200 means that the market's composition is twice that of the nation.

For more information about PRIZM, please call (703) 812-2700. PRIZM is a registered trademark of Claritas/NPDC, Inc.

Sales Data

Total Income, Total Retail Sales, Retail Expenditures and eleven categories of store sales have been compiled by Market Statistics and furnished to Arbitron. These data, based on Sales and Marketing Management's 1994 publication of "Survey of Buying Power" (12/31/93 estimates), are arranged according to Arbitron's Winter 1995 Metro definitions.

NOTE: Although the total population of a given geographic area will include those residing in group quarters, household totals will not. Therefore, calculations of per-household income and retail sales do not adequately reflect an area's true residential makeup.

Metro Income*

Total Income (\$000)	\$258,282,830
Median Household Income	\$49,650
Income per Household	\$66,426

*Income represents pre-tax personal income as defined by the Department of Commerce, Bureau of Economic Analysis.

Metro Retail Sales Data (\$000)

Total Retail Sales	\$88,773,426
Retail Expenditures per Household (\$)	\$22,831
Food Stores	\$15,824,678
Supermarkets	\$14,557,697
Eating & Drinking Places	\$9,109,445
General Merchandise Stores	\$10,980,868
Department Stores	\$8,233,435
Apparel and Accessories Stores	\$5,131,334
Automotive Dealers	\$19,566,505
Building Materials & Hardware Stores	\$4,123,767
Drug Stores	\$3,091,798
Furniture and Appliance Stores	\$2,105,131
Radio, TV & Music Stores	\$2,768,128

Top Ten Employer Industries

The Top Ten Employer Industry Classifications are defined below by a Federal Government Census called STANDARD INDUSTRIAL CLASSIFICATION (SIC). SIC's are sorted by the primary activity of individual business establishments based on the 1991 County Business Pattern Reports of the U.S. Census.

Employer	# of Employees	% of Total
1) HEALTH SERVICES	378,112	8.1
2) BUSINESS SERVICES	330,726	7.1
3) EATING AND DRINKING PLACES	301,101	6.4
4) WHOLESALE TRADE-DURABLE GOODS	231,078	4.9
5) ENGINEERING & MANAGEMENT SERVI	188,208	4.0
6) TRANSPORTATION EQUIPMENT	174,137	3.7
7) MOTION PICTURES	142,156	3.0
8) WHOLESALE TRADE-NONDURABLE GOO	141,814	3.0
9) SPECIAL TRADE CONTRACTORS	135,843	2.9
10) DEPOSITORY INSTITUTIONS	132,697	2.8
TOTAL METRO EMPLOYEES	4,684,017	
TOP 10 TOTAL EMPLOYEES	2,155,872	46.0%

Metro Market Profile *(continued)*

LOS ANGELES

Metro Census Data

Market Statistics has furnished Ethnic Populations, Household Data, Retail Sales and Employer Industries to Arbitron on a county level, using Winter 1995 Metro definitions. All data are based on the 1990 Census; updates are noted in the text below. For further information, contact your Arbitron representative.

Metro Ethnic Populations are reported for all Standard and Condensed Markets. Ethnic sampling procedures need not be in place. The percent for each demo is based on persons 12+. Ethnic population information is based on the 1990 Census, updated to 1/1/95. For more information on ethnic populations, please see page 5B.

Metro Ethnic Population

	Blacks	%	Hispanics	%

50-54	26,300	3.2	74,400	2.2
55-64	38,100	4.7	107,000	3.1
65+	51,300	6.3	114,000	3.3

For each of the following Census categories, the **Metro %** is based upon the Metro **Total Households** estimate. For split county Metros, the **Metro %** represents the whole county(ies) Census category distributions.

- Total Households** are based on 1990 Census data, updated to 1/1/95.
- Households by Income** are grouped into eight discrete income categories. The income reported is pre-tax personal income as defined by the Department of Commerce, Bureau of Economic Analysis. Personal income includes wages, salaries, proprietor's income, rental income, dividends paid by corporations,

interest income from all sources and transfer payments (such as pensions and welfare assistance). Also included are the value of employer benefits, such as contributions to pension funds, and imputed rental income of owner-occupants of housing units (income data are 1990 Census-based, updated to 1/1/94). Total 1/1/95 households are used in the percent calculations. Median Income is shown for all Metro households.

3. Value of Owner-Occupied Housing Units are estimates of the number of owner-occupied housing units falling into six value groups. For the 1990 Census data, this figure includes single-family condominiums. However, this Census figure excludes mobile homes, housing units located on 10 or more acres, housing units located on commercial property and two housing units sharing the same address. The median value for all owner-occupied units in the Metro is shown (1990 Census).

4. Monthly Contract of Renter-Occupied Housing Units are the number of rented housing units grouped into six monthly contract groups. This Census excludes no-cash rental units. Median rent is shown for all rented units in this Metro (1990 Census).

5. Household Size categories are based on 1990 Census data, updated to 1/1/95.

6. Seasonal Housing Units are defined as housing units used or intended for use only during certain seasons of the year; they are not included in the total household base (1990 Census).

7. Education represents the education levels of all persons 25+ (1990 Census).

8. Colleges and Universities are taken from the most current available survey of colleges and universities conducted by the National Center for Education Statistics. Only students enrolled in an accredited degree program are included in the enrollment figures. Percentages for the full-time enrollment are based on total enrollment.

9. Occupation data represent the number of persons 16+ that are employed in each of six occupation categories. A total of the six categories is shown. Percentages are based on total persons 16+ (1990 Census).

10. Farm Population /Estimate represents all persons living on a farm located in the Metro (1990 Census).

11. Transportation to Work information is based on estimated employed persons 16+. Percents are calculated on the sum of employed persons 16+ (1990 Census).

12. Time of Departure to Work information is based upon estimated employed persons 16+ who work away from home. Percents are calculated with the sum of all employed persons 16+ who work away from home.

Average Travel Time to Work is based on travel time to work for all estimated employed persons 16+ who work away from home (1990 Census).

13. Car Ownership by Household /Total households are distributed into one of four Car Ownership categories. Percentages are based on total 1/1/95 household estimates.

	Metro Total	Metro %		Metro Total	Metro %

Newspaper and Magazine Circulation

Newspaper and magazine circulation data, as of November 30, 1994, were obtained from the Audit Bureau of Circulations' Data Bank Service, 900 North Meacham Road, Schaumburg, Illinois 60173, (708) 605-0909, and are Copyright 1995, Audit Bureau of Circulations (ABC); unauthorized copying or reprinting of this information is prohibited.

Newspaper circulation figures represent average estimated paid circulation reported to and covered by the latest available Audit Report. Publications reported have a Metro circulation of at least 1%. Arbitron may have adjusted the ABC Newspaper Circulation data for Metros comprised of a portion of one or more counties, to reflect as closely as possible the newspapers' circulation in the Arbitron defined Metro area. (NOTE: The adjusted figures may not represent the newspapers' total circulation.) Combined circulation for AM newspapers that publish updated editions throughout the day are reported under the AM column, and are noted with an asterisk (*) in the PM column. Magazine circulation figures are the latest paid circulation for a single issue.

Passenger Car Registrations

The Metro Share of New Private Passenger Car Registrations is supplied by the Motor Statistical Division of R. L. Polk and Co. Polk prepares monthly reports (actual counts) of new cars registered in each state. Percentages are listed for American car manufacturers and the five leading imports. The top imports are determined through nationwide ranking. Fleet, other commercial or government registrations are not included. Figures shown are for January through June of the 1994 model year. Further automotive statistical information may be obtained from the Motor Statistical Division, R. L. Polk and Co., 1155 Brewery Park Blvd., Detroit, Michigan 48207, (313) 393-0880.

Policies and Procedures for Rating Distortion and Special Station Activities

In accordance with EMRC and industry guidelines, Arbitron provides the following information relating to Rating Distortion and Special Station Activities to advise Arbitron clients about applicable policies and procedures and to assist Report users in making evaluations of the audience estimates contained herein.

Arbitron's original policy statement dated May 20, 1977, has been updated by Arbitron releases of February 1978, December 1981, January 1987, February 1988, June 1992 and handbooks of May 1985, March 1987 and June 1990, distributed to all radio stations.

As a practical matter, Arbitron's published guidelines cannot describe all possible station activities. Therefore, in order to avoid possible citation, stations are advised to submit planned activities to Arbitron for a confidential prereview.

RATING DISTORTION is defined as: Any station activity which Arbitron believes may affect the way in which diarykeepers record their listening without causing corresponding changes in actual listening; or, which has the potential to result in a station having access to current survey diaries and/or the identity or whereabouts of current or future diarykeepers; or, which may result in a diary being used by any person, in any manner, for any purpose, other than those originally intended by Arbitron. ARBITRON MAY DELIST FROM ITS REPORTS, COMPUTER TAPES AND OTHER SERVICES THE CALL LETTERS AND AUDIENCE ESTIMATES FOR STATIONS THAT ARBITRON DETERMINES HAVE ENGAGED IN RATING DISTORTION ACTIVITIES.

Rating Distortion may take the form of Diarykeeper Solicitation, Improper Promotional Activities or other means. The following categories and examples are illustrative only and are not all-inclusive:

Diarykeeper Solicitation is any attempt by, or on behalf of, a station to directly encourage the recording of listening other than actual listening. It may take the form of a public or private appeal for diarykeepers to surrender their diaries or to misreport – in any way (e.g., overstate, understate, misstate) – their actual listening to any station. Diarykeeper Solicitation includes attempted breaches of diary security, whereby a station has the potential to learn the identity of diarykeepers or to gain access to, or influence over, current or upcoming survey diaries.

Improper Promotional Activities are those which may not directly appeal to diarykeepers but which may nevertheless cause diarykeepers to misreport their actual listening – possibly as a result of diarykeeper confusion or manipulation. Improper Promotional Activities include, but are not limited to, contests which may cause diarykeepers to misreport their actual listening by offering prizes based on amounts of listening recorded or claimed; attempts to cause diarykeepers to lose their anonymity; promotions which might cause a diarykeeper to surrender a diary in trade for a prize or for cash.

Rating Distortion is sometimes confused with Hypoing. Rating Distortion involves station activities that may cause diarykeepers to report more or different listening than actually occurred. Hypoing refers to station activities designed to cause more actual listening. Rating Distortion is a violation of Arbitron's policies; Hypoing is not.

RATING DISTORTION VIOLATIONS may result in: the station's call letters and audience estimates being delisted from the applicable report(s) and other services; or the station's call letters and estimates being placed at the bottom

of each page below a distinguishing line ("below-the-line"); and/or the activity being noted on Page 5B of the Report and possibly also on the cover of the Report. Appropriate notice may also be made for other applicable services.

SPECIAL STATION ACTIVITIES generally fall into one of two categories: Rating Bias and Extemporaneous Comment(s):

Rating Bias is defined as: Any announcement, statement or activity which could alert, sensitize or remind diarykeepers or potential diarykeepers about past, current or future surveys in any way which might affect participation in a current or future survey. Such activities may interfere with the objectivity or conduct of the survey and may take the form of announcements or statements on air, in print or in any other medium.

Rating Bias activities include survey announcements which may be preplanned, repeated or stylized messages which may alert listeners to the survey, regardless of whether the words "Arbitron" or "diary" are used, and/or may urge listeners to "be accurate" in reporting their listening. Rating Bias also includes activities which contain language or graphics suggestive of the survey. Rating Bias may also take other forms, such as a contest or research activity if, in Arbitron's opinion, the activity may sensitize the diarykeeper to Arbitron surveys.

Sourcing of previous survey information in the form of advertising which promotes a station's success in prior surveys, as permitted by contractual agreement with Arbitron, does not constitute Rating Bias. Note, however, that references to a station's performance in prior surveys in the context of appeals for support are not protected under this guideline, and may, in fact, be violations of Arbitron's guidelines on Rating Bias.

Extemporaneous Comment(s) is defined as:

A type of reference on the air or in any other medium which mentions or alludes to a past, current or future Arbitron survey, diary(ies) or radio ratings in any way which might sensitize diarykeepers to a current or future survey or which may affect the way in which diarykeepers report their listening in a current or future survey. As the name implies, these are generally one-time-only, spontaneous remarks which may have been intended as humorous.

SPECIAL STATION ACTIVITIES VIOLATIONS

may result in: the station's call letters and estimates being placed at the bottom of each page below a distinguishing line ("below-the-line"); and/or the activity being noted on Page 5B of the Report and possibly also on the cover of the Report. Appropriate notice may also be made for other applicable services.

GENERAL INFORMATION with respect to Rating Distortion and Special Station Activities:

a. Complaints should be in writing, accompanied by evidence such as an aircheck tape, direct-mail advertisement or newspaper clipping. Complaints will be accepted up to the day after the last day of the survey, and should be addressed to: Radio Special Station Activities Committee, Radio Station Relations, The Arbitron Company, 9705 Patuxent Woods Drive, Columbia, MD 21046-1572.

b. The initiation of an inquiry is solely within the discretion of Arbitron.

c. Arbitron will review activities conducted at any time (not just during, or four weeks prior to, a survey) for compliance with these guidelines if, in Arbitron's judgment, the activity has the potential to undermine the credibility of the survey. The same activity could be subject to citation for two

or more consecutive surveys, depending on the timing and severity of the activity.

d. Activities by stations not meeting Arbitron's Minimum Reporting Standards for a syndicated Market Report may still be subject to citation in any applicable custom report or other Arbitron service.

e. Activities cited for one simulcast station may also be cited for the other simulcast station.

f. Activities found to be in violation of these guidelines may or may not have actually affected reported listening. Such an effect would be virtually impossible to prove or disprove and Arbitron makes no attempt to do so. Activities violating these guidelines are inherently detrimental to the broadcast, advertising and audience measurement industries because the fact that such activities occurred undermines confidence in audience estimates.

Arbitron reserves the right to use any available means to draw attention to any station activity which, in Arbitron's opinion, has the potential to undermine the credibility of the survey even though such activity does not meet any of the specific criteria stated above. Arbitron further reserves the right to take other appropriate action depending upon the content, context, frequency or repetition of the activity.

INDUSTRY STATEMENTS

"The American Association of Advertising Agencies (AAAA) Media Research Committee opposes any attempt in any medium to distort results of any audience measurement survey... By encouraging daily recording or reporting of radio listening activity, [stations] may be sensitizing the public and thereby contributing to rating distortion or inflation. The AAAA Media Research Committee takes violations of rules against distorting practices, as described by rating services, seriously."

"The Arbitron Radio Advisory Council (ARAC) is very concerned about the continued practice of station activities that are intended to distort ratings data...we strongly recommend that Arbitron take serious action against anyone who violates the accredited standards. Likewise, special treatment should be taken when judging stations that repeatedly break this policy after prior warning."

"The National Association of Broadcasters (NAB) is joined by the Electronic Media Rating Council (EMRC) in condemning the activities engaged in by some broadcast stations that intentionally distort [or bias] legitimate audience surveys...practices specifically targeting survey respondents severely detract from the reliability and the validity of audience research. Stations that engage in these practices negatively affect the research results, which in turn influences the credibility and value of audience research in an increasingly competitive media marketplace."

"The Radio Advertising Bureau (RAB) Goals Committee condemns any practices by radio stations designed to intentionally bias or cause distortion of the listening estimates reported by the ratings companies...they harm the credibility and value of the audience research, thereby impairing the ability of advertisers to buy efficiently and intelligently to the detriment of all radio stations... [and] the rating companies have adopted stern policies against these activities."

Special Notices and Station Activities

THE MARKET

METRO DEFINITION/ The radio metro definition of this market is Arbitron defined. It does not conform to the Metropolitan Statistical Area implemented by the U.S. Office of Management and Budget in January 1993.

Audience trend analyses may be affected by any change in the Metro definition. However, there are no changes in the Metro definition for the reporting periods covered by the Metro Audience Trends section of this report.

POPULATION ESTIMATES/ Effective with the Fall 1994 survey, populations for this report are Market Statistics' 1/1/95 whole county population estimates [1990 Census-based].

For split county populations, the 1/1/95 [1990 Census-based] whole county populations are allocated to the respective split counties based on Market Statistics' 1994 zip code population estimates [1990 Census-based].

METRO ETHNIC CONTROLS/ Black and Hispanic Differential Survey Treatments used in the Metro Survey Area. All Metro counties, including HDBA and/or HDHA splits, receive the same ethnic sampling procedures.

Hispanic persons/households may be of any race (White; Black; American Indian; Eskimo or Aleut; Asian or Pacific Islander). For purposes of Arbitron reports and publications, Hispanic person/households that are Black are not included in Black universe estimates; Hispanic persons/households of all races are included in estimates of Hispanic listening and universes.

METRO TARGET INCREASE/ Effective with the Winter 1994 survey, all Continuous Measurement markets received a 15% in-tab target increase. Prior to the Winter 1995 survey, as part of the proposed 70% Metro target increase, 67 markets, which supported the increase, received an additional 15% increase, for a total increase of 30%.

Effective with the Winter 1995 survey, these 67 Continuous Measurement markets have received an additional 20% increase (for a total of 50%). The 70% proposed increase for Continuous Measurement markets will be phased in over a three-year period, with 1994 being the first year.

The Los Angeles market received an additional 20% Metro target increase effective Winter 1995 (for a total increase of 50% over their Fall 1993 Metro target). However, the entire amount of the increase was allocated to Los Angeles County.

PARTIAL METRO ETHNIC CONTROLS/ The table below contains the ethnic population and in-tab for that portion of the Metro for which ethnic controls apply, as well as the ethnic population and in-tab for the total Metro. Note: Estimates in the Ethnic Composition section of the report are based on the total Metro ethnic in-tab.

	Black Persons 12+
Controlled Metro:	
Population:	
Total	7,509,000
Ethnic	775,500
Percent	10.3
In-tab:	
Total	5,236
Ethnic	603
Percent	11.5
Excluded Counties:	Orange, CA
Total Metro (Controlled and Non-Controlled):	
Ethnic Population:	812,400
Ethnic In-tab:	626

THE STATIONS

NEW STATIONS, CALL LETTER CHANGES AND TREND DATA/

Current Call Letters	Former Call Letters	Prior Trend Data	On-Air Date Date of Change
KACD-FM	KAJZ-FM	Winter 1994	June 1, 1994
KBCD-FM	KBJZ-FM	Winter 1994	June 1, 1994
KBUE-FM	KNAC-FM	Fall 1994 Summer 1994 Spring 1994 Winter 1994	March 6, 1995
KSCA-FM	KLIT-FM	Spring 1994 Winter 1994	September 1, 1994
KVAR-FM	KHTX-FM		February 13, 1995

Stations are identified in this report under their current call letters, and the audience estimates reflect listening recorded for the new and, if applicable, the old call letters. The Trends section displays trend data pertaining to both the old and the new call letters. Survey Dates will be listed in the "Prior Trend Data" column whenever trend information exists for a station that has changed call letters. The date of the call letter change will also be included in order to identify which call letters were in use during a particular survey.

No adjustments have been made to the reported estimates for a station that was not broadcasting for the entire survey period. Since the time a station was off-air is counted as zero-listening in the 12-week average, the reported estimates for a station that was on the air less than the entire survey could understate the audience for the time that it was on the air.

TECHNICAL DIFFICULTY/ The following station(s) reported to Arbitron that they experienced reduced power (REDUCED), intermittent power (INTERMIT), signal interference (SIG INTRF), or were off the air (OFF) for five or more continuous minutes in a quarter-hour during the survey period. No adjustments are made to either diary entries or reported audience estimates for periods of technical difficulty.

Description of Methodology

THE MARKET

1. THE MARKET/An Arbitron Radio Market can be composed of up to three geographic areas: the Metro Survey Area (Metro), the Total Survey Area (TSA) and the Designated Market Area (DMA®). These areas are composed of sampling units. A sampling unit generally consists of a single county, but may also consist of a split county (defined as one or more zip codes within a county), an independent city, or the combination of one or more independent city(ies) and an adjacent county.

a. Metro Survey Area (Metro). Arbitron Radio Metros generally correspond to the federal government's Office of Management and Budget's (OMB's) Metropolitan Areas. A radio Metro may deviate from its respective OMB definition due to topographical, sampling, or other considerations.

For areas that do not have an OMB-defined Metropolitan Area, Arbitron usually defines the Metro Survey Area to include the county(ies) of the majority of the local area stations' city(ies) of license.

The OMB updates its Metropolitan Areas every ten years, based on the new decennial census data. At that time, Arbitron reviews all Radio Metro definitions for possible adoption of the applicable OMB definitions. In the review process, Arbitron considers such factors as: the historical market definition(s), local trade and commuting patterns, local radio listening patterns, and the views of its subscribers.

Between decennial censuses, Arbitron will consider changes to existing radio Metro definitions on a case-by-case basis if a written proposal, outlining the rationale and benefits of the proposed Metro, is submitted to Arbitron within established deadlines.

b. Total Survey Area (TSA). The Total Survey Area of an Arbitron Radio Market is designed to provide a comprehensive measure of listening to Metro-licensed radio stations. The TSA is composed of the Metro and any additional counties (or geographically split counties) which meet certain criteria for inclusion.

TSA definitions are based on historical radio listening patterns and are updated biennially based on the diary data used for the most recent County Coverage study. The specific criteria for adding, retaining or deleting Non-Metro TSA counties are outlined in a separate publication titled *Description of Methodology for Radio*.

c. Designated Market Area (DMA). The DMA is composed of sampling units (counties or geographically split counties) and is defined and updated annually by the A.C. Nielsen Co., based on historical television viewing patterns. A county or split county is assigned exclusively to one DMA.

Arbitron reports radio listening estimates for the Top 50 DMAs (ranked on TV households) in the Radio Market Reports of all Standard radio markets whose Metros are located within the DMA and whose names are contained in the DMA name.

SAMPLING AND MEASUREMENT TECHNIQUES

2. SAMPLING METHODOLOGY/Surveys for Arbitron Radio Market Reports are conducted by using geographic units called sampling units. A sampling unit consists of a county or a split county. The latter are defined by zip code information based on 1990 Census data, as updated annually by Market Statistics.

Sample targets are established for the Metro and, if applicable, the non-Metro TSA and/or the DMA. Sample targets are then established for each sampling unit proportional to its Persons 12+ population in the respective survey area subject to minimum sample requirements for Radio County Coverage. The amount of sample ordered is determined by dividing the sampling unit target by the expected rate of response based on previous survey(s) sample performance and other factors.

For each 12-week survey period, a complete new sample of telephone numbers is computer-selected for each sampling unit through the use of a systematic interval random selection technique. These telephone numbers are drawn from a sample frame provided by Metromail Corporation containing listed residential telephone numbers and possible unlisted telephone numbers from 100-blocks with at least 10 listed residential telephone numbers. The sample frame is updated by Metromail using current available telephone directories. Known business and group quarters telephone numbers are excluded from the sample frame. The total sample is randomly divided into approximately equal weekly groups for placement.

If a need for additional sample arises after the original sample has been selected by the computer, then such additional sample is generally selected in the same manner and from the same sample frame as the original sample.

3. ARBITRON RADIO LISTENING DIARY/Arbitron uses 7-day individual diaries to gather listening information from persons 12 years of age and older (Persons 12+). Bilingual (Spanish-English) diaries are provided to all survey participants in the Metro of a Hispanic-controlled market who have identified themselves as Hispanic in response to an ethnicity question or from whom ethnic information was not obtained, and to any others indicating a preference for a bilingual diary. Premiums of varying monetary amounts are provided to encourage respondent cooperation. Arbitron sends a diary for each Person 12+ reported in the sample household up to a maximum of nine.

4. DIARY PLACEMENT AND RETRIEVAL/Initial contact with listed sample households is by postcard, informing them of their selection by the computer and that an interviewer will be calling to request their cooperation in the survey. Initial contact with unlisted sample households is by telephone, when an interviewer calls to request participation in the survey.

Arbitron interviewers call all selected telephone numbers to ascertain the possibility of a media affiliation, to gain consent for participation in the survey, to determine the number of Persons 12+ living in the household at the time of the placement call and, where applicable, to determine the race/ethnicity and demographics of the household. Households with more than nine persons 12 years of age and older and media-affiliated households are ineligible for survey participation.

Interviewers are instructed to make a number of attempts to reach every telephone number in the sample. These attempts are made at different hours of the day and evening. Diaries are then mailed directly to the consenting sample households from Arbitron.

After the initial contact, the interviewer is directed to make additional contact(s) with the sample households: to make sure the diaries have been received; to assist members of the household in understanding the diaries' purpose; to answer any questions; to remind the diary-

keepers to return their diaries after the survey week; and to thank them for their participation in the survey.

Explicit instructions are provided to each interviewer, and validation checks are regularly conducted to help ensure that instructions are being properly followed.

PROCESSING TECHNIQUES

5. PROCESSING OF DIARIES/Arbitron makes reasonable efforts to utilize all returned diaries. However, some returned diaries are determined by Arbitron to be unusable. Among those which are unusable are diaries which Arbitron determines: are incomplete; are postmarked and/or arrive before or after established dates; or which otherwise lack essential information. The total number of in-tab diaries may differ from the sample target.

Usable diaries are prepared for computer processing in accordance with procedures listed in the Arbitron *Radio Edit Procedures Manual*. The listening information in the diaries is then computer-entered so that certain computer verifications and edits can be made. These include ascription procedures, the allocation of credit for aberrated call letters and other analyses and pretabulation preparations.

CALCULATING TECHNIQUES

6. CALCULATION OF ESTIMATES/

a. Sample Balancing. The weighting system used by Arbitron, sample balancing, is an iterative marginal weighting technique designed to compensate for disproportionate in-tab from specified marginal classes. Marginal weighting means that in-tab diaries are weighted to represent the population for each specified marginal class. The number of geographic marginal classes (i.e., counties, split counties or county clusters) will vary. The number of age/sex marginal classes is generally 16. In addition, markets that are race and/or ethnically controlled are sample balanced so that in-tab diaries from the race/ethnic group are weighted to represent the population of that race/ethnic group. As a result of this cumulative weighting, a Persons-Per-Diary Value (PPDV) is computed for each in-tab diary. The PPDV is the number of persons that diary is estimated to represent.

b. Computing Cume Persons Estimates. Station Cume Persons estimates are computed by summing the PPDVs for each diary in which a station received listening credit for the time the station is on the air within a daypart. PPDVs are summed for all diaries within each discrete demographic group with listening to the station, then rounded to hundreds. Station Cume Persons estimates for broader demographic groups are computed by adding the rounded Cume Persons estimates for the component discrete demographic groups within the same daypart.

c. Computing Average Quarter-Hour (AQH) Persons Estimates. Station AQH Persons estimates are computed by multiplying the number of quarter-hours of listening to a station within a daypart for the time the station is on the air in each diary by the diary's respective PPDV. The result of this multiplication is summed for all diaries within each discrete demographic group, then divided by the number of quarter-hours the station is on the air during the applicable daypart and rounded to hundreds. Station AQH Persons estimates for broader demographic groups are computed by adding the rounded AQH Persons estimates for the component discrete demographic groups within the same daypart.

Description of Methodology (continued)

d. Rounding of Calculations. Rounding occurs at various stages in the calculation of audience estimates at demographic and daypart summation levels.

e. Broadcast Hours. (i) Local time differences within a market that overlaps time zones are accounted for by adjusting to the time observed by the majority of counties in the Metro of the market being measured. (ii) Only one set of sign-on/sign-off times for a station is used in calculating audience estimates for the market report. Arbitron uses the sign-on/sign-off times reported for the month closest to December and the shortest broadcast day within that month as provided by the affected radio station. (iii) Audience estimates are adjusted for the station's broadcast schedule as reported to Arbitron. However, when a station changes sign-on/sign-off times during an Arbitron survey period, the times used in calculating audience estimates are based on those days of operation comprising the majority of consecutive days of the survey period. (iv) Stations broadcasting for less than an entire reported daypart are indicated in the Report by a footnote symbol next to the station's call letters or audience estimates for the applicable daypart(s). (v) Stations broadcasting for less than an entire daypart must be on the air for a minimum of four quarter-hours on each day of the applicable daypart in order to be reported in that daypart. (vi) Stations should notify Arbitron in writing of any changes in the station's sign-on/sign-off time as soon as they occur but no later than the day after the last day of the survey; changes in a station's daytime or 24-hour status will be noted on Page 5B of this report.

f. Technical Difficulties. No adjustments are made to either diary entries or published audience estimates for periods of technical difficulty. The notation of technical difficulties on Page 5B is to assist the users in making their own evaluation of the audience estimates. Arbitron will accept information on technical difficulties up to the day after the last day of the survey.

CRITERIA FOR REPORTING STATIONS

7. CRITERIA FOR REPORTING STATIONS/

To be listed in an Arbitron report, a commercial radio station must engage in systematic regular commercial broadcasting pursuant to the authority of the Federal Communications Commission (FCC) or other appropriate governmental authority. Call letter designations exceeding four characters are shortened to four characters. Generally, reported call letters are the FCC-authorized call letters in effect on the last day of the survey as reported to Arbitron. In the event a station has changed call letters during the survey period, the first call letters listed in the report are those in effect on the last day of the survey, with the station's previous call letters noted immediately below them.

Arbitron maintains a call letter history based on information provided by radio stations and the FCC. In the event of exchanges of frequencies between stations in a market, the call letters under which audience estimates are published in this report are based on Arbitron's verification and interpretation of information from various relevant sources, which include the FCC and the affected stations. Specifics regarding the above are listed on Page 5B of this report.

Audience estimates for a station which does not meet Minimum Reporting Standards (MRS) cannot be obtained in any way from the audience estimates published in this report, including the Metro Audience Trends estimates from prior

survey periods. TSA estimates are limited to stations which have qualified for reporting in the Metro. All radio stations, commercial and non-commercial alike, are measured using the same methodology and are included in Metro and/or DMA Totals. All commercial stations are evaluated using the MRS as described in Paragraphs 8 and 9. Noncommercial stations are not eligible to be listed in this report and are not considered in MRS evaluations. For report qualification purposes, stations are considered commercial or noncommercial based on their status as of the last day of the survey as reported to Arbitron.

8. MINIMUM REPORTING STANDARDS (MRS) FOR NONSIMULCAST STATIONS/A commercial station which does not simulcast with another station is included in this report if it has met **all** of the following Minimum Reporting Standards for the Metro or, if applicable, the DMA among Persons 12+ during the Monday-Sunday 6AM-Midnight daypart for the current survey of the market:

a. The station must have received five or more minutes of listening in a quarter-hour in at least ten in-tab Metro diaries (ten in-tab DMA diaries for DMA qualification), **and,**

b. The station must have a Metro Cume rating of 0.495 or greater (DMA Cume rating of 0.495 or greater for DMA qualification), **and,**

c. The station must have a Metro Average Quarter-Hour rating of 0.05 or greater (DMA Average Quarter-Hour rating of 0.05 or greater for DMA qualification) for the time the station is on the air during the Monday-Sunday 6AM-Midnight daypart for the current survey of the market.

9. MINIMUM REPORTING STANDARDS (MRS) FOR SIMULCAST STATIONS/MRS for simulcast stations are generally based on the percent of quarter-hours in the Monday-Sunday, 6AM-Midnight daypart (when both stations are on the air simultaneously) that the two stations simulcast for every week of the current survey:

a. 9.49 percent or less – Each station must independently meet the criteria used for nonsimulcast stations. (See Par. 8.)

b. 9.50 percent to 90.49 percent – If one of the two stations meets **all** MRS criteria described in Par. 8 above, the second station is included in the report if it (i) meets the criteria of Par. 8(a) and (b) **and** (ii) achieves the Average Quarter-Hour rating described in Par. 8(c) for any one of the four basic Monday-Friday dayparts, i.e., 6AM-10AM, 10AM-3PM, 3PM-7PM, 7PM-Midnight.

c. 90.50 percent or greater – The two stations are treated as a single station in **all** phases of the MRS criteria described in Par. 8. If the **combined** audience of the two stations is sufficient to meet **all** criteria of Par. 8, then both stations will be listed in the report even though one (or both) stations might not meet the MRS criteria if considered individually, so long as each station received a mention in at least one in-tab diary in the market anytime during the 24-hour/7-day survey week.

10. HOME AND OUTSIDE STATIONS/Any Metro-qualifying station either licensed to a city located within the Metro of a market or which is recognized under Arbitron's policies and procedures as having acceptable Multi-City of Identification is listed in the market report as a home station. However, if two stations are partially or totally simulcast and one of the two stations is a home station, both may be treated as home stations. A station can be home to only one Metro. (The only exception is a station licensed to a

Metro which is embedded in another Arbitron Metro.) All other stations are classified as outside stations. For reports containing a DMA section, outside stations are further classified into: (a) outside the Metro but home to the DMA, or (b) outside the Metro and the DMA. Within each reporting classification, U.S. stations are listed alphabetically followed by non-U.S. stations listed alphabetically.

SIMULCAST TOTALS

11. CRITERIA/A simulcast Total Line is reported in a particular daypart for stations which simulcast 9.50 percent or more of the Monday-Sunday 6AM-Midnight daypart and which simulcast (as defined in Paragraph 49) for that entire daypart for the entire survey period.

Total Lines may still be shown if one or both simulcasting stations are not on the air during the entire reported daypart provided that the two stations simulcast for the entire time both stations are on the air in the daypart.

Total Lines appear following the applicable individual station estimates and are reported in the Target Audience, Specific Audience and Audience Composition sections of this Report.

12. SIMULCAST TOTAL AVERAGE QUARTER-HOUR PERSONS/The simulcast Total Line is the summation of the estimated average number of persons who listened to one station plus the estimated average number of persons who listened to the second station during a reported daypart. If one or both of the simulcast stations are not on the air for the entire reported daypart, the individual station estimates will be adjusted for their broadcast schedule(s) as reported to Arbitron. The Total Line for the two stations uses the longer on-air time of the two.

13. SIMULCAST TOTAL CUME PERSONS/The simulcast Total Line represents the estimated number of *different* persons who listened to either station during the reported daypart; thus, the Total Line provides an estimate of the unduplicated audience to the simulcast pair during the reported daypart.

STATISTICAL RELIABILITY

14. SAMPLING ERROR/Arbitron estimates are subject to the statistical variances associated with all surveys which use a sample of the universe and, additionally, to all of the factors described in Special Notices and Paragraph 16. Approximations of the sampling error can be developed by use of Tables A and B included herein. These tables were derived from an empirical study which employed "Jack-Knife Replication." This study, published by Arbitron, is titled *Arbitron Replication II: A Study of The Reliability of Radio Ratings*. Tables A and B produce estimates of sampling error at the one standard error (*one sigma*) level. However, users of this report should keep in mind that, due to the factors discussed in Paragraph 16, the accuracy of Arbitron estimates, data and reports and their statistical evaluators cannot be determined to any precise mathematical value or definition.

15. EFFECTIVE SAMPLE BASE (ESB)/ Estimates of the Effective Sample Base indicate the size of a simple random sample (in which all diaries have equal value) that would be required to provide the same degree of reliability as the in-tab sample actually used to produce the audience estimates in this report. The statistical reliability of such estimates depends on the ESB and only indirectly on the number of diaries tabulated. Statistical reliability is also affected by factors described in Paragraph 16.

Description of Methodology (continued)

Approximations of ESBs may be determined by squaring the values in Table B of this Report. The Arbitron formula for estimating ESBs is based upon the empirical study referenced in Paragraph 14. This formula takes into account overlapping Metro sample designs (Embedded Metros) and differences in return rates among sampling units, the individual sex-age categories and race/ethnic groups, where applicable. As a general rule, ESBs for all Cume estimates will be less than the number of in-tab diaries, and ESBs for all Average Quarter-Hour estimates will be larger than the ESBs for Cume estimates and may be greater than the number of in-tab diaries for the applicable demo. This is due to the intraclass correlation of the listening between quarter-hours for the various dayparts.

LIMITATIONS

16. LIMITATIONS/In addition to the sources of possible error which are described elsewhere in this report, the user should be aware of the limitations described below:

- a. The sample is drawn from telephone households only. Persons in nontelephone households are thereby excluded from the sample frame. Commercial establishments listed in directories are specifically excluded from the sample. Steps are taken to exclude residents of group quarters from Arbitron's sample frame (except in instances where a private phone is installed in the individual living quarters). Further, all possible telephone directories and all possible unlisted telephone numbers may not be available in the lists prepared by Metromail Corporation and used as Arbitron's sample frame.
- b. Effort is made to exclude households with a media affiliation. The inclusion or exclusion of such households from the sample is dependent upon information revealed by the sample household in response to Arbitron's media affiliation question at the time of the diary placement call.
- c. There may be instances where Arbitron instructions are not followed by the interviewer. The interviewer may not always be under the direct control of Arbitron. In certain instances, independent telephone survey organizations are utilized by Arbitron.
- d. Nonresponding persons may have listening habits which differ from those of respondents. Persons residing in nontelephone households may have listening habits which differ from those of persons residing in households with telephones.
- e. Nonresponding persons and other limitations in the original designated sample prevent the in-tab sample from being a perfect probability sample.
- f. The sample design and/or response patterns may preclude proportional representation of certain groups within the population such as ethnic groups, racial groups, persons in certain income or education groups, or persons whose primary language is other than English. Such persons may have listening habits which differ from other persons.
- g. The population estimates from Market Statistics used in designing the sample are based upon the decennial U.S. Census and are subject to all the limitations inherent therein. In addition, population estimates are subject to limitations such as sampling errors, errors in locating undocumented populations, and processing and recording errors. Furthermore, the sources used by Market Statistics to update populations between decennial Census dates may not include adjustments for known or unknown over- or undercounts of

various segments of the population, including undocumented population groups. In addition, annual population updates may be based on the results of sample surveys and are subject to their respective limitations. These limitations in data from Market Statistics are inherent in the Arbitron estimates based thereon.

- h. Zip code information used in this report is subject to defects and limitations.
- i. Diaries, or portions thereof, may be completed improperly if the diary instructions are not followed by diarykeepers. Some diary entries may have been made on the basis of hearsay, recall, diarykeeper approximations or could have been influenced by comments made by the interviewer or others to diarykeepers.
- j. Human and computer processing errors may occur before or after the diaries are received by Arbitron. Consequently, the degree of variance in the data may be greater than that expected from sampling variance alone.
- k. The data upon which Arbitron has based its in-tab sample weighting, including racial or ethnic identification, may not be precise.
- l. Defects and limitations found in data supplied by others are inherent in Arbitron estimates based thereon.
- m. Data analysis, preprocessing preparation, ascription of the data, or postsurvey week telephone validation calls may affect some of the diary listening entries before the data are projected. Diaries, or portions thereof, may thereby be modified or excluded from the survey. These procedures may affect the audience estimates or a station's ability to meet MRS.
- n. Arbitron conducts research involving new methods of improving cooperation of diarykeepers and/or securing additional information from such persons. Occasionally, a portion of this research may be integrated with actual surveys and, if and when so done, may cause the degree of variance in the data to be greater than that expected from sampling variance alone.
- o. Certain data, such as when a station was on and off the air, facilities, call letters in effect, station name claimed, format, programming, Sales Representative, network affiliation(s) and time periods when two stations were simulcast or separately programmed, are based on data supplied by stations, the FCC, industry publications or notices and/or other sources. These data may not be accurate or timely and may affect the way certain audience estimates are reported.
- p. Situations in which stations used the same call letters or frequency or have changed call letters or frequency may result in diarykeeper confusion in correctly identifying the station to which the listening occurred.
- q. Due to rounding, mathematical manipulation by the user of estimates for narrow dayparts in this report may produce a result which may be incongruent with estimates for broader dayparts also contained in this report.
- r. Reported trends estimates may not be comparable over time due to: methodological or operational changes; changes in survey area definitions or populations; or conditions not under Arbitron's control, such as changes in station operations/facilities/special activities; or other factors.

RETENTION OF SURVEY MATERIALS

17. RETENTION SCHEDULE/In-tab Arbitron listening diaries used for the compilation of the most current audience estimates published in this report, along with all unusable diaries and other survey materials, will be stored for one year from the date on which this report was first mailed to subscribers by Arbitron; after such time, all diaries and other survey materials are destroyed. Subscribers to this report are advised that if special cross-tabulations of the reported estimates are desired, they should be ordered before the retention period has expired. Upon proper appointment, subscribers to this report may examine, but not copy, the in-tab Arbitron listening diaries used in this report at Arbitron's Columbia, MD, office.

SPECIAL NOTICES PAGE

18. SPECIAL NOTICES/To the extent that any provisions contained in this description of methodology are inconsistent or conflict with any provision contained in the *Special Notices* on Page 5B of this report, such Special Notices are deemed to supersede and/or amend this description of methodology.

RESERVATION OF RIGHTS

19. RESERVATION OF RIGHTS/Arbitron reserves the right to exercise its professional research judgment in modifying, waiving or suspending any policy, procedure or element of methodology that would appear to Arbitron to be unreasonable, illogical or impractical in light of known conditions.

DISCLAIMER OF WARRANTIES

20. DISCLAIMER OF WARRANTIES/Arbitron makes no warranties, express or implied, concerning: data gathered or obtained by Arbitron from any source; the present or future methodology employed by Arbitron in producing Arbitron ratings; or the Arbitron data, estimates or ratings contained herein. All Arbitron data and estimates represent only the opinion of Arbitron and reliance thereon and use thereof shall be at subscriber's own risk.

RESTRICTIONS ON USE OF REPORT

21. RESTRICTIONS ON USE OF REPORT/All Arbitron radio audience estimates, together with the map contained herein, are proprietary to and copyrighted by Arbitron. They are provided to Arbitron clients pursuant to the terms of both written license agreements between Arbitron and such clients and the restrictions and limitations on use printed herein. All Arbitron audience data and estimates are for the exclusive use of Arbitron clients and their authorized representatives and may be disclosed only to advertisers, prospective advertisers and their agencies for the purpose of obtaining and retaining advertising accounts and through advertising or promotional literature. Any commercial use of Arbitron audience estimates or data for the purpose of selling advertising time or space by or on behalf of broadcast, cable, or print media must be under the terms of a written license agreement between that medium and Arbitron specifying permitted uses. For an Arbitron client to divulge any data or estimates to

Description of Methodology (continued)

a nonsubscribing station, or to lend and/or give a copy and/or a reproduction of any part of any report to any nonsubscriber, including print media, advertisers and/or their agencies, constitutes a breach of the license agreement between Arbitron and client. Quotations by clients of the estimates as allowed by this section for purposes of advertising or promotion must identify Arbitron as the source and that Arbitron's data and estimates are copyrighted. It also should be

mentioned that the audience estimates are subject to all qualifications and limitations stated in the Arbitron report. Arbitron recommends that the appropriate market, survey period and kind of audience estimate (e.g., Boston, Winter 1995, Metro Survey Area, Monday-Friday 3PM-7PM, Average Quarter-Hour Estimates, Men 18-24) be stated.

A subscriber to any particular report may not use the demographic data or audience estimates

printed in the Metro Audience Trends section which reference a market report to which they did not subscribe.

Neither this report, the map contained herein nor any audience estimate may be used in any manner by nonclients of Arbitron without written permission from Arbitron.

Users of audience estimates are referred to the current policies of the Federal Trade Commission relating to the use of audience estimates.

Glossary of Selected Arbitron Terms Used in this Report

22. AVERAGE QUARTER-HOUR PERSONS/

The estimated number of persons who listened to a station for a minimum of five minutes within a quarter-hour. The estimate is the average of the reported listening in the total number of quarter-hours the station was on the air during a reported daypart. This estimate, expressed in hundreds (00), is reported for the Metro, TSA and, where applicable, the DMA.

23. AVERAGE QUARTER-HOUR RATING/The Average Quarter-Hour Persons estimate expressed as a percentage of the appropriate estimated population. This estimate is reported for the Metro and, where applicable, the DMA.

24. AVERAGE QUARTER-HOUR SHARE/The Average Quarter-Hour Persons estimate for a given station expressed as a percentage of the total Average Quarter-Hour Persons estimate to all radio within a reported daypart. This estimate is reported for the Metro only.

25. CUME DUPLICATION/The percentage of one station's estimated Cume audience that listened to a second station. This estimate is reported for the Metro only.

26. CUME PERSONS/The estimated number of *different* persons who listened to a station for a minimum of five minutes in a quarter-hour within a reported daypart. (Cume estimates may also be referred to as *cumulative* or *unduplicated* estimates.) This estimate, expressed in hundreds (00), is reported for the Metro, TSA and, where applicable, the DMA.

27. CUME RATING/The estimated number of Cume Persons expressed as a percentage of the appropriate estimated population. This estimate is reported for the Metro only.

28. DAYPART/A time period for which audience estimates are reported (e.g., Monday-Friday, 6AM-10AM; Saturday, 10AM-3PM).

29. DESIGNATED MARKET AREA (DMA)/A.C. Nielsen's geographic market design which defines each television market exclusive of others based on measurable viewing patterns. Every county or sampling unit in the United States is assigned exclusively to one DMA.

30. DESIGNATED SAMPLE/Telephone numbers selected from the sample frame for this survey determined by Arbitron to be usable.

31. DIARY MENTIONS/The number of in-tab diaries in which listening to a station has been recorded for at least five minutes in a quarter-hour within a given daypart.

32. DIARYKEEPER/Any individual Arbitron determines to be eligible to receive and who is sent survey materials.

33. EFFECTIVE SAMPLE BASE (ESB/The theoretical sample size to be used for estimating the sampling error of audience estimates. (See *Par. 15.*)

34. ETHNIC COMPOSITION/Audience estimates for Total, Black and/or Hispanic persons expressed in hundreds (00), ratings and composition percents. Ethnic composition estimates are based on total Metro in-tab diaries and are reported for the Metro of ethnically controlled markets only if at least 30 Black and/or 30 Hispanic diaries, as appropriate, are in-tab from the Metro.

35. EXCLUSIVE CUME AUDIENCE/The estimated number of Cume Persons who listened to only one station within a reported daypart. This estimate is shown for the Metro only.

36. GROUP QUARTERS/Group quarters are residences such as college dormitories, homes for the aged, military barracks, rooming houses, institutions and residences of nine or more unrelated individuals.

37. HIGH DENSITY AREA (HDA)/A High Density Area is a zip code-defined sampling unit which may be established in a county within the Metro of an ethnically controlled market. The specific criteria for establishing, retaining, or eliminating an HDA are outlined in a separate publication titled *Description of Methodology for Radio.*

38. IN-TAB SAMPLE/The number of usable diaries tabulated in producing the report.

39. LISTENING LOCATIONS/Locations such as At Home, In-Car or Other for which audience estimates are reported. (Other includes At Work listening.)

40. METRO SURVEY AREA (Metro)/Metro Survey Area definitions generally correspond to the federal government's Office of Management and Budget's (OMB's) Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas or Consolidated Metropolitan Statistical Areas, subject to exceptions dictated by historical industry usage or other marketing considerations as determined by Arbitron.

41. METRO TOTALS AND/OR DMA TOTALS (Total listening in the Metro and/or Total listening in the DMA) / The Metro and/or DMA Total estimates include estimates of listening to reported stations, as well as to commercial stations that did not meet the Minimum Reporting Standards, plus estimates of listening to noncommercial and unidentified stations.

42. MINIMUM REPORTING STANDARDS

(MRS)/Criteria used to determine which stations qualify to be listed in this report. (See *Pars. 8-9.*)

43. PERSONS-PER-DIARY VALUE (PPDV/The numerical value assigned to each in-tab diary for the process of projecting audience estimates to the entire 12+ population in a market. The PPDV reflects the number of persons in the geographic/age/sex/ethnic (if applicable) group represented by each in-tab diary after sample balancing has been performed.

44. RATING/(See *Average Quarter-Hour Rating and Cume Rating.*)

45. SAMPLE FRAME/The universe from which eligible diarykeepers are randomly selected. The sample frame for Arbitron radio surveys is designed to sample households with telephones.

46. SAMPLE TARGET/The number of diaries that is the objective for in-tab sample size.

47. SAMPLING UNIT/A geographic area consisting of a county or split county. (See *Par. 1.*)

48. SHARE/(See *Average Quarter-Hour Share.*)

49. SIMULCAST/The simultaneous broadcast of one station's total and uninterrupted broadcast flow by a second station without any variation except if the two simulcast stations choose to separately identify their call letters, frequency, station name and/or city of license, if appropriate, at the same time.

50. SIMULCAST TOTAL LINES/Combined audience estimates for two stations in dayparts during which they simulcast. (See *Pars. 11-13 and 49.*)

51. SPLIT COUNTY/A portion of a county composed of one or more zip codes which has been separately identified for purposes of ordering and controlling sample.

52. TECHNICAL DIFFICULTY (TD)/Time period(s) of five or more consecutive minutes during the survey period for which a station listed in this report notified Arbitron in writing of: reduced power; intermittent power; signal interference; or times the station was off the air within the station's authorized broadcast day.

53. TIME SPENT LISTENING (TSL)/An estimate of the amount of time the average person spent listening to radio or to a station during a specific daypart expressed in hours and minutes. This estimate is reported for total radio listening for the Metro only.

54. TOTAL SURVEY AREA (TSA)/A geographic area that includes the Metro Survey Area and may include additional counties.

ARBITRON RADIO RELIABILITY — TABLE A

RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE	RATING	VALUE
0.1	3.16	5.1	22.00	10.1	30.13	15.1	35.80	20.1	40.07	25.1	43.36	30.1	45.87	35.1	47.73	40.1	49.01

Note: When rating is greater than 50.0, use the value given for a rating equal to 100.0 minus the original rating. For example, if the rating were 87.3, use the value shown for a rating of 12.7 (100.0-87.3).

INSTRUCTIONS FOR ESTIMATING THE RELIABILITY OF AUDIENCE RATING ESTIMATES

The reliability of a survey estimate is generally defined in terms of the estimated margin of sampling error around the estimate, or *confidence interval*. The confidence interval describes the extent to which a survey estimate, based on a random sample of a population, may vary from the result that would be obtained through a complete census of that population. (See Par. 14 for further discussion.)

Confidence intervals can be obtained for any rating published in this report in two steps: (1) determine an estimated standard error and (2) use this estimated standard error to construct a confidence interval around the rating.

1. Calculate an estimate of standard error as follows:

a. For AQH and Cume ratings, select the rating for which you want to obtain the standard error and locate the corresponding Table A value. For example, the corresponding Table A value for a 3.7 rating is 18.88. Table A values represent the square root of (the rating x [100 - the rating]); therefore, Table A values are constant across all markets and surveys.

b. For AQH ratings, select the demographic group (down the side) and the daypart (across the top) and locate the corresponding Table B value. For Cume ratings, select the demographic group (down the side) and locate the corresponding Table B value in the first column. Table B

values are the square roots of the ESBs (Effective Sample Bases) for each market and survey; therefore, Table B values vary from report to report. For example, a hypothetical Table B value for a Metro AQH rating for Men 18+, Mon-Fri 6AM-7PM might be 55.00.

c. Divide the Table A value by the Table B value to obtain an estimated standard error. Using the example above, 18.88 ÷ 55.00 = 0.34.

2. Use the estimated standard error to construct a confidence interval around the rating:

a. The rating +/- one standard error yields a 68% confidence interval. In the above example, 3.7 +/- 0.34 yields a confidence interval of 3.36-4.04. Interpretation: The user can be 68% confident that a survey of all Men 18+ would yield a Mon-Fri 6AM-7PM AQH rating between 3.4 and 4.0.

b. The rating +/- (1.64 x the standard error) yields a 90% confidence interval. In the above example, 3.7 +/- (1.64 x 0.34) yields a confidence interval of 3.14-4.26. Interpretation: The user can be 90% confident that a survey of all Men 18+ would yield a Mon-Fri 6AM-7PM AQH rating between 3.1 and 4.3.

c. The rating +/- (1.96 x the standard error) yields a 95% confidence interval (compute as in (b) above), and the rating +/- (2.58 x the standard error) yields a 99% confidence interval (compute as in (b) above).

TO ESTIMATE RELIABILITY FOR PROJECTED NUMBERS OF PERSONS

To estimate standard error (and construct confidence intervals) for Persons estimates rather

than ratings: (1) Convert the Persons estimate into a rating. ([Persons ÷ the population] x 100). (2) Determine standard error using the instructions above. (3) Convert standard error for the rating into standard error for the Persons estimate. ([Standard error x the population] ÷ 100). (4) Use the Persons estimate +/- one standard error for a 68% confidence interval; use the Persons estimate +/- the standard error multiplied by 1.64, 1.96 or 2.58 to get 90%, 95% or 99% confidence intervals, respectively.

TO ESTIMATE EFFECTIVE SAMPLE BASE (ESB) SIZES

Approximate ESB for age/sex groups and dayparts can be obtained by squaring Table B values. For example, the estimated ESB for M18+, M-F 6A-7P, with a hypothetical Table B value of 55.00, would be 55.00 squared, or 3025. (See Par. 15 for further discussion of ESB values.)

TO OBTAIN ADDITIONAL METHODOLOGY DETAILS

Please reference *Description of Methodology for Radio and Arbitron Replication II: A Study of the Reliability of Radio Ratings* for further discussion of the above and a discussion of more complex applications.

LIMITATIONS

Although Arbitron believes the above-described procedures provide report users with useful estimates of standard errors, the reader should note the limitations described in Paragraphs 14-16 and 18-21 on Pages ii-iii in the Report.
