NO WIRES†, NO FUSS, NO WORRY
 –with the latest, technically advanced,

WIRELESS HOME INTRUDER ALARM

IT'S SO EASY TO INSTALL!

– simply fix the units onto the wall, follow a few basic instructions and that's it – your home is alarmed!

†The Fox Wireless Home Alarm System has been specially designed to help protect your home and your family, without spoiling your decor with yards of unsightly wiring. As there is no wiring between the intrusion detectors and the control panel, the system can be easily fitted by anyone with average DIY skills.

This ergonomically designed system is so easy to use – just one remote button controls arming, disarming and panic functions! It is also fully expandable by adding more sensors and accessories from the extensive Fox Security range featured in the Security Section of this catalogue

CONTENTS: Control Panel (with keys)
 *†Wireless PIR Detector *†Wireless Contact Transmitter, 2-button Key-fob Transmitter, Instruction Manual and wall fixings.
Order Code XS57M £99.99

†Requires PP3 battery.
Order Code JY49D £2.99

The Alarm system can use up to four remote control key-fob transmitters which are also compatible with all Vixen car alarms.

Additional Remote Control Key-fob
Order Code CR43W £9.99

Available from Maplin Stores nationwide

- 4 detection zones, part or full arming capability
- DTI approved
- Can use up to four key-fob transmitters for maximum convenience
- Built-in extra loud 120dB siren
- Automatic low battery warning
- Output for external siren, for extra attention
- Optional battery back-up for protection during mains failures
- Intrusion history display shows where the alarm was triggered
- Tamper-proof
- Unique code-learning feature eliminates manual programming

REMEMBER: This Alarm system is fully expandable by adding more sensors and accessories from the extensive FOX Security range.

HELP PROTECT YOUR HOME at this breakthrough price

only £99.99*

Order Code XS57M Add Carriage £3.90 E6

Watch, Listen and Discover more about the Alarm System with the FOX WIRELESS HOME ALARM SYSTEM **VIDEO GUIDE** – An entertaining, informative way of showing how easy the Alarm is to fit, use and expand. PLUS The video will include a special £5 VOUCHER that you can redeem when you buy a Fox Wireless Alarm or, should you decide against purchasing an alarm, we will refund the full PURCHASE PRICE OF THE VIDEO if returned to us within 28 days.

Dear Customer,

Welcome to your copy of the new 1995 Maplin Catalogue. As you look through the 800 full-colour pages, you will DISCOVER THE WHOLE WORLD OF ELECTRONICS AT YOUR FINGERTIPS: everything from everyday items like plugs, batteries and torches, right up to the latest high-tech computers and test equipment.

Whether you're looking for alarms for your home or car, components for your hobby or servicing, accessories for your car or cycle, DIY or specialist tools, electrical fittings for your home, test equipment, or simply a blank video tape, YOU'LL FIND THEM ALL IN THE PAGES OF THIS CATALOGUE.

Just look at some of this year's new products:

There's a new WIRELESS BURGLAR ALARM that is easy to fit yourself and COSTS LESS THAN £100!; a Garage Alarm to help protect the possessions in your garage, shed, summer-house, etc.; more new additions to our range of in-car booster amplifiers; more sophisticated computer accessories; new automatic battery chargers; and much, much more – all tested and approved by our own Design and Evaluation engineers, so that you can buy with confidence, knowing you are dealing with a company which is a BRITISH STANDARDS INSTITUTE BS5750 REGISTERED STOCKIST.

I'm also delighted to be able to tell you about our entirely new range from GP Batteries. Maplin is now able to offer you high-quality batteries at extremely competitive prices by dealing directly with a major battery manufacturer, BUT WITHOUT PAYING FOR A BIG-BRAND NAME. You've probably bought GP batteries before, without realising it – they'll have had the name of a well-known large company or supermarket on them! Many have superior specifications and all are available at superb prices.

Once again, I'm delighted to present you with more of our very popular MONEY-SAVING VOUCHERS WORTH £50, that you can use, either in our shops, or when you order by mail, saving you the price of your catalogue over and over again.

If you need more information on any of the products in the catalogue, or simply like to browse around, POP INTO YOUR LOCAL MAPLIN STORE – our friendly, technical staff are always on hand to guide you through the technical specifications or just to give you that extra, vital piece of information. See the maps at the back of the catalogue for details of your nearest store.

THERE ARE NOW 33 MAPLIN STORES across the country and there are plans for 5 more by the end of 1995, allowing us to continue to grow and improve our service. We never forget that our success depends on providing you, the customer, with high-quality, state-of-the-art electronic products at the keenest prices. That's the commitment that makes Maplin 'out of the ordinary'.

Maplin Electronics continues to go from strength to strength despite Britain's gloomy economic outlook – in fact we were recently listed by leading chartered accountants, Price Waterhouse, as ONE OF THE ONE-HUNDRED FASTEST GROWING COMPANIES IN THE COUNTRY! Join the winning team today and enter the world of Maplin Electronics!

Yours sincerely,

A handwritten signature in black ink that reads "Doug Simmons". The signature is written in a cursive style with a long, sweeping underline.

Doug Simmons,
Marketing Director.

Call us NOW – for direct action!

You can place an order with us 24 hours a day, 365 days a year. What's more you can telephone, fax, telex, write or use your computer to talk to our Cashtel service (see Cashtel section at rear of catalogue) – and you're in complete control. All orders placed outside normal office hours (9.00am – 5.15pm) are dealt with immediately the next working day.

PLACING YOUR ORDER

When using the 24-hour ordering service, please have the following information to hand:

Your customer number

Your name, address and postcode.

Your Credit Card type, number and expiry date.

For each item you require give:

A Stock code.

B Description.

C Quantity.

D Price (each).

E Name of publication and page number where item appears.

Further details on 'How to Order' can be found on page 7 and at the back of this catalogue.

Telesales (24-hour service): 01702 554161 Fax: 01702 553935 Telex: 995695 (MAPLIN G)
Cashtel: 01702 552941 Maplin Key Call: 01702 556751

We'll get you up and running!

HOW? When you buy a Maplin Kit and if you run into difficulties constructing it, we are here to help you.

Sometimes you may have the disappointment of putting time, effort and money into a project, only to find that on completion it doesn't work. When you buy a Maplin Kit you will have the reassurance that, in the unlikely event your completed project doesn't work, you know that we will 'Get-You-Working'.

Help is at hand! For Technical Queries*: Write to: 'Customer Technical Services', Maplin Electronics, P.O. Box 3, Rayleigh, Essex SS6 8LR.

We will do our utmost to speedily answer your technical enquiry; or Fax: (01702) 553935; or Phone: (01702) 556001, 2 pm to 4 pm, Monday to Friday, except public holidays. And if you get completely stuck with your project, get our back-up and we'll get you back up and running! The 'Get-You-Working' Service:

We will undertake to get working any of the Maplin Kits** published in *Electronics – The Maplin Magazine*. Please return the completed kit to us at the following address: 'Returns Department', Maplin Electronics, P.O. Box 3, Rayleigh, Essex SS6 8LR. Enclose a cheque or Postal Order based on the retail price of the kit as shown in the table on the right (subject to a minimum of £17). If the fault is due to faulty components, incorrect instructions or any error on our part which could have led to the fault, we will repair the project free of charge and return it to you carriage paid with a refund of your postage to us.

If the fault is due to an error or errors, that you have made, we will charge you according to the table:

Kit Retail Price	Standard Servicing Cost
Up to £24.99	£17
£25–£39.99	£24
£40–£59.99	£30
£60–£79.99	£40
£80–£99.99	£50
£100–£149.99	£60
Over £150	£60 min.

If no fault can be found with the project, a charge of £17 will be raised to cover the cost of setting up any equipment needed and the subsequent testing.

We will 'Get-You-Working' as fast as possible, but please allow up to four weeks. We will acknowledge receipt of your returned kit by return of post.

**What magazine offers you this kind of service?
Electronics – The Maplin Magazine of course!**

* We can only answer technical queries related to Maplin projects and products.

** The 'Get-You-Working' Service is available for all Maplin Kits and Maplin Projects with the exception of: 'Data Files'; projects not built on our ready etched PCBs; projects built with the majority of components not supplied by Maplin; Circuit Maker ideas; Mini Circuits or other similar 'building block' and 'application' type circuits.

The heart of our operations. THE CENTRE OF EXCELLENCE

Maplin has always strived for quality and excellence in all aspects of company policy. In 1990 our massive distribution centre opened in Barnsley. 9,000 products lines, over 500 suppliers, 10,000 orders per week and 500,000 customers worldwide are dealt with from the heart of our operations. As soon as orders are entered in our Rayleigh, Essex base, they are instantly transferred via computer line to our distribution centre and all goods are despatched from there. (All orders received by 5pm are despatched the same day.)

Remember, we can offer a fast, reliable service together with low, low prices making us your first choice for components and quality, value for money goods every time.

Assessed Capability and what it means to you

To compete in today's markets, companies must produce quality products and services as efficiently and economically as possible.

Increased quality awareness has led to a growing demand for quality assured products throughout industry, and many major purchasers are now demanding independent certification when they buy manufactured goods. To market efficiently it is essential that the distribution and stocking of materials and components gets in a reliable and efficient manner. The supply of quality assured products is therefore a vital link in the industrial chain – and one which has benefits for every aspect of the process and ultimately the customer.

The BSI system for the registration of STOCKISTS OF ASSESSED CAPABILITY is designed to be a nationally accepted system for the distribution of quality assured products. In fact, since its introduction, the MoD have withdrawn their own 05-31 procedures in favour of the BSI system.

By supplying our customers with products, materials and components from a quality assured source, increased customer confidence and quality promotion throughout the company will be assured.

The registered stockists symbol is a sure indicator of goods that have been processed to the highest standards.

Customer Confidence

Confidence that ALL GOODS purchased from Maplin are checked by our quality control department.

Confidence that products are acquired from quality assured sources (or meet the requirements of in-house quality control), and that the quality is maintained during storage, packaging and re-consignment.

Confidence in a system that places emphasis on both quality of products and satisfactory levels of service.

The system is intended to comply with the system requirements for BSI REGISTERED STOCKISTS SCHEME (BS5750 Part 2 1987) Level B.

REMEMBER, ALL THIS IS BACKED BY THE MAPLIN 5-STAR GUARANTEE.

- ★ BEST POSSIBLE VALUE!
- ★ QUALITY TESTED!
- ★ GUARANTEED THAT ALL GOODS ARE BRAND NEW AND MEET MANUFACTURERS' PUBLISHED SPECIFICATIONS!
- ★ FULL BACK-UP SERVICE!
- ★ SAME DAY DESPATCH ON ALL STOCK ITEMS!

KEYPAD ENTRY DOOR SECURITY ALARM

A versatile and easy-to-fit alarm which is installed on the inside of a door. It comprises an attractive and robust main unit, fitted on the door itself, and a magnet assembly which is mounted on the frame. When the door is closed, the magnet is detected by the proximity sensor within the alarm. When the door is opened and the magnet moved away from the unit, the sensor detects the change and activates a loud piercing alarm. The alarm can only be turned off by entering a 3-digit code on the keypad found on the main unit. There are four main modes of operation, selected by a slide switch on the main unit:

1. Visitor chime. When set to this position, the alarm will give a pleasant tone to announce the entry of visitors. This function makes this system useful for shops and offices.
2. Instant alarm. When the occupier is in the building, and the alarm is switched to this function, then opening the door will trigger the alarm. The alarm can only be disabled by entering your personal code, although it will shut off automatically after the auto-stop time interval has elapsed.
3. Delay alarm. The occupier leaves the switch in this position when leaving the building. Upon opening the door and re-entering, your personal code must be keyed in within 8 seconds or the alarm will be activated.
4. Off. When the unit is not required, the batteries are being replaced or the code is being changed, the switch is set to this position. However, the alarm

cannot be turned off simply by selecting this position. In addition to the above features, there is a red 'panic' button on the main unit which immediately sets off the alarm. In addition, the system is designed to expand, as up to 10 additional daisy-chained magnetic sensors (for other doors and windows) and an external siren can be connected. The siren output could be used to drive an external horn speaker. The alarm and its magnet assembly can be mounted using double-sided adhesive strips supplied with the unit, or with screws for a more permanent installation.

Dimensions: 222mm x 70mm x 33mm (main unit with fixing bracket); 15mm x 15mm x 55mm (magnet). The alarm unit is supplied with magnet assembly, double-sided self-adhesive strips and full instructions. It is powered by two 9V PP3 batteries (not included).

ZC38R	Keypad Door Alarm	£16.99	

DIY 'NEIGHBOURHOOD WATCH' SECURITY ALARM

A complete single zone home burglar alarm kit. Simple to install – simple to use, and exceptional value for money.

The control panel is an ON/OFF key operated unit. The unit, which is microprocessor based, provides: A fault indicator light which will tell you if any of the detectors fitted are activated. Entry/exit time delay. 20 seconds to exit and 15 seconds to enter before going into alarm. The monitoring, 24 hours per day, of the tamper circuit and personal attack circuit.

An automatic bell cut off after 20 minutes and system reset.

The kit contains:

- ★ 1 microchip control unit.
- ★ Bell box and siren.
- ★ 4 pairs of magnetic contacts.
- ★ 1 personal attack button.
- ★ 1 large pressure mat.
- ★ 1 stair pressure mat.
- ★ Anti-tamper microswitch.
- ★ 50 metres of four core security cable.
- ★ Cable clips and fixings.
- ★ Easy to follow instruction booklet.
- ★ Siren housing label.

All the detection devices available in this catalogue can be fitted to extend the system, and up to 2 passive infra-red detectors can be fitted if a 12 volt transformer is used.

The power for the system is by 12 volt battery (not supplied), which is housed in the bell box. We recommend two HP992 batteries (YJ23A) connected in series. The battery will provide years of service unless the siren is sounded for long periods.

IT'S A FACT!

BURGLAR ALARMS

Do not be put off from installing an alarm because of the thought of installing hundreds of cables all over your house, and spoiling your decor. The cable used is a neat, white, plastic covered type and is only about 4mm thick – much the same as the wire used for telephones. Much can be hidden with a little thought during the installation.

WIRELESS ALARM

Fox Security

NEW

A technically advanced, sophisticated Wireless Alarm that is so easy to install - all you need to do is screw the units onto the wall, follow a few simple instructions and that's it - your house is alarmed.

- ★ 4 detection zones, part or full arming capability
- ★ Remote control panic alarm
- ★ Easy to fit, simple installation
- ★ No ugly wiring between detectors and the control panel
- ★ DTI approved transmitters
- ★ Full remote control operation, via key-fob transmitter
- ★ Can use up to four key-fob transmitters for maximum convenience
- ★ Built-in extra loud 120dB siren
- ★ Fully expandable - just add more detectors
- ★ Automatic low battery warning
- ★ Output for external siren, for extra attention
- ★ Optional battery-back up for protection during mains failures
- ★ Intrusion history display shows where the alarm was triggered
- ★ Unique code-learning feature eliminates tedious manual programming of the control panel and key-fob transmitters

The system is ergonomically designed and is so easy to use - just one remote button controls arming, disarming and panic functions. It is also fully expandable by adding further sensors and accessories from the wide range of accessories available. Eight switches are used to form your chosen system code. All Wireless PIR Detectors and Contact Transmitters, for use with your alarm, are then set to the same code.

The Wireless Home Alarm System includes a Control Panel, Wireless PIR Intruder Detector, Wireless Contact Transmitter, 2-button Key-fob Transmitter, Instruction Manual and wall fixing. The key-fob transmitters supplied with the Fox Wireless Home Alarm will also operate all Vixen car alarms.

A video which will answer your questions about the Wireless Alarm is available. This video guide is an entertaining and informative way of showing how easy it is to fit, use and expand the alarm. Included is a £5 voucher that you can redeem when you buy the Wireless Alarm.

DE76H	Wireless Alarm Video	£5.00

WIRELESS ALARM ACCESSORIES

Contact Transmitter

Fox Security

NEW

By using additional Wireless Contact Transmitters then windows, patio windows and exterior doors may all be protected. Each Contact Transmitter is capable of being connected to several contact switch sensors, i.e. you don't need to have a separate Contact Transmitter for each contact switch. Thus a large window can have a Magnetic Reed Switch attached to each opening frame, all connected to a single Contact Transmitter mounted beside the window. If two or more contact switches are to be used, they must be wired in series. Supplied with mounting hardware and instructions. Requires an alkaline PP3 battery (JY49D).

Order Code	Type	Price each
XS59P	FWT101 Contact TX	£14.99

Doorbell Transmitter

Fox Security

NEW

By adding a Wireless Doorbell Transmitter to the Wireless Alarm System, then you can save the inconvenience and mess of wiring up a doorbell. The Wireless Doorbell Transmitter is simply fixed near the entry door and when pressed, sends a doorbell signal to the Control Panel, which produces a pleasant ding-dong sound from the internal siren.

Alternatively, the transmitter may be positioned indoors, for example: in the room of a sick or elderly relative, allowing them to summon another person in the house. Requires an alkaline PP3 battery (JY49D).

Order Code	Type	Price each
XS60Q	Doorbell Transmitter	£14.99

PIR Detector

Fox Security

NEW

Additional PIR Detectors can be installed in every major room in the house providing additional security and peace of mind. The Wireless PIR Detector has a coverage angle of 90° and a range of 40ft and is therefore ideal for mounting in a corner to protect a whole room. The ideal mounting height is approximately 7ft from the floor. The Wireless PIR Detector is supplied with an adjustable mounting bracket, and mounting hardware. Requires an alkaline PP3 battery (JY49D).

A pack containing three different types of lens is also available (DK21X). Each lens provides a different range and detection area to allow for individual circumstances. The 'pet' lens detection area takes into account household pets, and will not trigger the PIR when pets are present. The 'curtain' lens has a coverage that allows the PIR to be installed, hidden in a slight gap between two curtains. The 'corridor' lens offers protection down long corridors and halls.

Order Code	Type	Price each
XS58N	FWP100 Wireless PIR	£29.99
DK21X	FPL100 3 PIR Lenses	£2.99

Outdoor Siren With Strobe Light

Fox Security

NEW

Designed to enhance the capabilities of the Wireless Alarm by providing an additional siren with the added advantage of a bright red strobe. The siren is housed in an attractively styled weather-proof box that is very easy to install, and is directly connected to the main Wireless Control panel. The powerful 120dB siren and eye catching dual strobe light can be operated separately if necessary. The Siren and Strobe Light can be used with other suitably equipped alarm

A1 CORDLESS ALARM SYSTEM RF8000 NEW

- ★ Cordless system, very easy to install, requires minimum wiring
- ★ Sophisticated anti-jamming protection
- ★ 5 detection zones with a maximum of 15 cordless detectors/sensors
- ★ Complies with requirements of BS6707 - intruder alarm systems for consumer installations
- ★ Conforms to wireless standard BS6799 Pt 4A and to MPT 1340 wireless exemption standard
- ★ Up to 6 remote control units can be used, each providing a personal attack alarm facility
- ★ 115dB external siren and flashing strobe unit

The RF8000 is a sophisticated cordless alarm system that will provide years of protection for your home and your family. A unique feature of this system is the anti-jamming protection. The system can be programmed to recognise that the control panel is being jammed, and if the jamming is continuous for 30 seconds, the alarm will activate. For even greater security in high-risk areas, it is possible to select an anti-jamming protection level which records any jamming within a preset time. If the total amount of jamming reaches 30

seconds the alarm is activated. To enhance the system further, the movement detectors send out several signals if they detect an intruder. This combined with the anti-jamming protection make the system virtually impossible to beat. The system is very easy to install, requiring minimal wiring - simply connect the control panel to the external alarm and to a suitable mains supply. The kit includes the control panel, two PIR movement detectors, a door/window sensor, remote control unit, external siren with flashing strobe, clips, fixings and instructions. The remote control unit, movement detector and door/window sensor are already programmed and ready to use. It is only necessary to fit the batteries and site the units in suitable positions. The movement detector, door/window sensor and the remote control unit signal to the control panel using radio signals so no complicated wiring is required.

The advanced control panel incorporates five detection zones. Each zone can accept three types of cordless detector such as a PIR movement detector, smoke detector, or door or window sensor. Each detector programmed to a zone is represented by its own colour coded LED. This makes it easy to identify a detector that needs a battery replacing, or has activated the alarm. 16 push-buttons on the control panel allow the system to be armed, disarmed or part armed. However, before any instruction is accepted, the personally selected 4-digit passcode must be entered. Zones can be programmed as entry/exit and allow the user a preselected time delay to enter or exit the premises. This delay is adjustable. The remote control unit offers ease of use and portable protection. Up to six remote control units can be programmed into the system and can be used either inside or outside the premises to arm, disarm or part arm the system. Pressing the panic button will cause an alarm condition 24 hours a day even if the system is disarmed - especially useful for the elderly and infirm. The attractive rustproof siren unit houses a powerful 115dB siren and flashing strobe light. Both the housing and the cable connecting the unit to the control panel are protected from tampering. The PIR movement detector, door/window sensor and remote control are available separately to enhance the system and provide comprehensive protection. A smoke detector is also available separately that will provide 24-hour protection from smoke and fire even if the alarm is disarmed. The smoke alarm should not be positioned where it may give false alarms due to smoke or fumes from a kitchen or solid fuel heating. The control panel has provision for a sealed lead-acid battery (YJ69A, not supplied) to provide battery back-up in the event of a mains power failure. Reed switches (YW46A, YW47B), window foil and termination (YW50E, YW51F), and contact switch (JU65V) can be used in conjunction with the door/window sensor to form a continuous loop to provide protection for additional windows, etc. within a room.

Versatile Multipurpose Intruder Alarm

Fox Security

NEW

Features

- ★ Easy key-switch operation.
- ★ No complex setting up or programming.
- ★ Built in 2-tone 120dB siren sounds alert to any intrusion.
- ★ Easily-fitted magnetic switch.
- ★ Easily expanded by adding further magnetic switches etc. from the extensive Fox Security range
- ★ Input for optional mains adaptor (not supplied)
- ★ Entry/Exit time of 20 seconds

Now, at last, you really can protect the unguarded property in your outbuildings at an affordable price. This new, electronic alarm can protect the car in your garage; the bicycles, tools, garden furniture, lawnmower and sports equipment in your shed; the fridge, cooker and TV in your caravan, utility room or conservatory. Don't suffer the distress and inconvenience an intruder could cause. Don't allow thieves to ruin, or make off with, your hard-earned property - when at such a low cost you can give yourself real peace of mind.

Typical intruder alarm units do not extend their use further than the family home. The Fox Multi-Purpose Intruder Alarm has been specially created to fill this important gap in security using the same principle as alarms costing hundreds of pounds.

Easy to fit just screw the control panel to a suitable surface, attach one cable from the panel to the switch supplied and the alarm is ready for use. The alarm is battery operated for flexibility of use so the alarm can be installed in many otherwise inaccessible outbuildings, etc.

The Fox Alarm System comes complete with Control Panel with built-in siren and keyswitch, 2 keys, 5m of alarm cable, a magnetic door or window switch, cable clips, fixings and an easy to understand instruction manual. Requires an alkaline PP3 battery (JY49D, not included), but can be used with a suitable AC adaptor. If an AC adaptor is used, then the alarm MUST be fitted with a rechargeable battery. An external output rated at 7V to 14V at 200mA (depending on whether the alarm is powered by a battery or AC adaptor) is provided which can be connected to an external siren.

INTRUDER ALARM MSS2500

The MSS2500 is ideal for small to medium sized domestic installations. The Control Panel is mains operated with rechargeable battery back-up. The rechargeable battery (not supplied) either 1.2 amp/hour (YJ69A), 1.9 amp/hour (XG74R), or 2.6 amp/hour (XG75S) 12V is automatically recharged whilst mains is present, and will provide standby supply to the unit if the mains supply is interrupted.

The MSS2500 has 4 zones:-

- ★ 1 x delay zone for entry/exit.
- 1 x 24 hour zone for personal attack and tamper monitoring.
- ★ 2 x detection zones.

The MSS2500 is as simple to use as it is to install. It is operated by a 4 position keyswitch:-

1. Off position.
2. Test position, which inhibits the external sounder whilst testing sensors.
3. Circuit 1 isolates Zone 2 to give partguard for night setting.
4. Circuit 1 + 2 for full guard.

Facilities

First up latch on LED will indicate the first zone to have been activated.

Regulated 1 amp power supply.

Latching strobe output. The external strobe will continue to flash after sounders have ended.

Internal buzzer output.

Interface for any common negative self-actuating bell module.

The attractive, clean-cut look of the polycarbonate case provides the option to site the control in a visible location. The front of the Control is protected by a tamper switch and will activate the sounder/strobes if unauthorised removal occurs.

Any of the detection devices available in this catalogue, i.e. passive infra-red detectors (up to 5), pressure mats, magnetic contacts, personal attack buttons (key operated), vibration devices, and window foil, can be fitted to the system. The MSS2500 complies with BS 4737. Additional blank keys are also available separately.

INTRUDER ALARM MSS3000

The MSS3000 is a 6 zone microprocessor control panel. It was designed primarily for domestic and small commercial applications and has a host of modern features.

The microprocessor present in the MSS3000 acts like a miniature computer, which enables you to select, change or inhibit with ease the many facilities available in the unit.

In common with most microprocessor controlled equipment, this unit does require a clean mains supply free from spikes or other switching interference. We recommend that a mains line filter is fitted to the spur supplying the alarm panel.

The MSS3000 is housed in a sturdy polycarbonate case. It has been specifically designed to allow the unit to be located for easy access by the user, without disfiguring the decor.

The operation of the control panel can be either by the on-board digital keypad, or by use of a remote keyswitch located outside the protected zones (available separately in this Catalogue). Programming the control panel is by use of the keypad only.

The MSS3000 provides:

- ★ 1 x delay zone for entry/exit which can be selected from the 4 detection zones.
- ★ 1 x 24 hour personal attack monitoring zone.
- ★ 1 x 24 hour tamper monitoring zone.
- ★ 3 x detection zones.

The unit can be programmed in minutes. The display of 8 LEDs will indicate the status whilst programming the unit or whilst in use.

Facilities

Personally selectable 4-digit user/engineer code.

No keys to mislay, and easily changed if required.

Keypad with audible indication.

LED display provides visual indicator of all zones.

Variable entry/exit time with audible tone giving last 10 second speed up warning of activation.

Quick set feature enables user to override the programmed exit time and sounder.

Last four event replay. (A valuable fault finding aid that allows the user or engineer to investigate the "history of intrusion" or failure of sensors for the last 4 alarm indications.

Tamper switch protection for unauthorised front cover removal.

Isolated zones indicated by flashing LED.

Omit zone. Any of the 4 detection zones except the one selected as entry/exit can be omitted before arming the system. The omitted zone information is stored until changed. Useful for regular night setting. Unit will accept up to 2.8Ah 12V rechargeable battery (not supplied), which is automatically recharged while mains is present.

Prevent omit. The unit can be programmed to prevent users from omitting zones.

Intermediate zone. Any zone can be designated as intermediate.

Chime facility. Any or all zones can be programmed to give a quiet audible indication of activation while control unit is in OFF position. Useful for shops, reception areas, etc.

Variable internal and external sounder durations.

Variable entry/exit durations.

HOT TIP

If you have a doorbell plate with a window for your name, only put your initials and/or your surname in it, or leave it empty. If you put Miss, Ms or a woman's first name, you will be advertising that a woman lives there, maybe alone. This applies for an entry in a telephone directory as well.

HOME ALARM FSS8500

Fox Security

NEW!

This state-of-the-art alarm panel features six zones that can be programmed as 'final entry/exit', 'walk-through' and 'entry/exit in night-set'. In addition, there are a further three zones for personal attack, a 24h tamper loop and a 24h fire/flood/gas alarm. The panel is provided with several 4-digit user codes, which are defined as 'Master 1', 'Master 2', 'Duress', 'Night-Set', 'Engineer' and 'Holiday'. Master 1 and 2 codes allows for the setting and un-

setting of the alarm, and can include zone omit if required.

The Duress code allows setting and unsetting of the alarm and triggers a relay that can activate an optional telephone dialler etc.

The Night-Set code is an optional programmable code that allows the user to set and un-set pre-programmed areas of the premises, but if the Night-Set code is programmed, then the zone omit function cannot be used.

Holiday code is issued by the holder of Master 1 code and will only set and un-set the alarm. When the Master 1 user returns from a holiday or short break, and enters his code, the Holiday code is cancelled. Engineer code provides a range of programmable functions.

The 24h tamper alarm can be silenced by any user, but can only be reset by Master 1 user, but only if Engineer only reset is turned-off.

Other useful facilities include a 'strobe' output which provides 12V when the alarm has been triggered and remains until the alarm is reset. There is a separate fire-bell output which switches 12V when the 24h Fire/Flood/Gas zone is triggered. A reed relay output provides a connection to an external dialler, if required. A 'quick-set' function reduces the exit time so that the alarm can be quickly armed if the premises is still occupied. A 20-event memory logs all violations since the alarm was last set.

The panel is mains powered and there is provision for a sealed lead-acid battery backup that will be charged while mains is applied to the panel.

Order Code	Type	Price each
RZ55K B3	Home Alarm FSS8500	£39.99

INTRUDER AND FIRE ALARM MSS3500

The MSS3500 is a 9 zone microprocessor control panel, ideally suited for use in large domestic and small, or medium, commercial installations.

The MSS3500 is housed in an attractive polycarbonate case, which enables it to be installed in a visible location. However, up to 2 remote keypads can be fitted to the system, and the control panel sited in a hidden location.

The MSS3500 provides:

- ★ 1 x delay zone for entry/exit.
- ★ 1 x 24 hour zone for personal attack monitoring.
- ★ 1 x 24 hour tamper monitoring (with the added benefit of a tamper indication being shown by an LED on each separate zone).
- ★ 5 x detection zones.
- ★ 1 x fire zone.

The MSS3500 is simple to programme and operate. The microprocessor present means the control panel is likely to have the facility suited to your individual installation requirements. The keypad acts like a computer keyboard, enabling you to select, change, or inhibit the many features available.

Facilities

Up to 4 different personally selectable user codes. Engineer code.

Keypad operation with audible indication.

The Communicator

A very advanced and useful addition to any security system, the 'Communicator' connects to any alarm panel and will relay a message to up to 4 different personally programmed telephone numbers when the alarm system has been triggered. These can be any standard BT or Mercury numbers, such as for your home, office, or a mobile phone number so that you may be contacted if on the move. The system plugs into a standard BT 'phone socket and is fully BABT approved. A simple programming sequence means that the contact numbers can be changed as often as required.

The system is extremely reliable as it uses no tape mechanism, the voice recording being stored in battery-backed RAM. The personalised message is recorded by the user and can easily be changed. Fully compatible with a 12V trigger input level, the system can be easily interfaced to all existing alarm systems. The unit is powered from the 240V AC mains, and can be backed up by an optional 2 x PP3 nicad batteries (see 'Batteries and Power Supplies' section of this catalogue). This is highly desirable since the device will otherwise be disabled in the event of the mains supply being tampered with, or during a power cut. The case is made from an attractive and robust, cream-coloured polycarbonate. The control and programming buttons are combined in a dirt and moisture proof membrane keypad. Full instructions for the use and installation of the unit are supplied. Overall dimensions: 214mm x 298mm x 80mm.

Order

Code	Type	Price each
GL03D	D5 Communicator	£99.99

Large External Alarm Box

A large well-made external alarm box in polypropylene. The box has a strong rear panel with various fixing holes and a shelf for a battery etc. The front part of the box is coloured and has three vents moulded in each side. The two parts clip together after fixing the back plate to an outside wall and then one screw locks the box together. A plate is provided for fixing a microswitch e.g. FP45Y or FP42V etc. which would be held operated by the long thread on the screw. Anyone attempting to unscrew the screw to get into the box will operate the microswitch long before the screw is removed. Overall size 405 x 273 x 140mm deep. Box is available in red, white, blue or yellow. Also available in horizontal mounting version. Colours are red or white.

Order

XM98G	B3 Red Hrzntl Bell Box	£7.25
XM99H	B3 White Hrzntl Bell Bx	£7.25

Assembled External Bell Box

This bell box is designed for use with our range of MSS2500/3000/3500 alarm systems. The unit contains everything required for a professional external installation. The bell box is manufactured in polycarbonate, a material similar to that used in the construction of motorcycle crash helmets. The added strength of polycarbonate means the unit conforms to both BS 4737 and NACOSS standards. The unit is assembled to include: Polycarbonate bell box front and back. Fitted to the backplate is a tamper switch, which monitors removal of the box from the wall, or any attempted removal of the front cover. A powerful 112dB siren. A low profile strobe light. Rechargeable, self-contained bell module. The module monitors the power supply between the control panel and the siren. If that supply is interrupted, the alarm is activated and the power cell will supply power to the siren for up to 1 hour.

BURGLAR ALARM ACCESSORIES

Low Profile Xenon Flasher Unit

Weatherproofed xenon tube-based flasher designed primarily as an alarm beacon. Gives off two bright, attention-grabbing pulses of light every second. The translucent acrylic cover lens of the unit is marked with Fresnel rings and the sides are striated to maximise light dispersal. The unit also features reverse polarity protection. Flashers with lenses in four different colours are available; red, clear, amber and blue. The body itself is manufactured from durable black ABS plastic. This unit is not suitable for continuous flashing use. Tube life approx. 1 million flashes.

Working voltage: 12V DC
 Supply current: 150mA
 Power output: 1W
 Flash rate: 2Hz (approx)
 Overall size: 70mm dia. x 44mm high
 Fixing: Two 6mm dia. holes for bolts and one 18mm dia. hole for lead

Supplied with approx 0.5m red and black cable and mounting gasket.

Order Code	Type	Price each
ZC14Q	Xenon Flasher Amber	£8.49
ZC15R	Xenon Flasher Blue	£8.49
ZC16S	Xenon Flasher Clear	£8.49
ZC17T	Xenon Flasher Red	£8.49

Standard Alarm Beacon

A standard alarm beacon designed for use with burglar alarms etc. The xenon tube gives an intense flash about once every one third of a second. The cover has a flat top marked with Fresnel rings and the sides are striated for maximum light dispersion. The unit is weatherproof once fixed.

Working voltage: 12V DC
 Supply current: 200mA
 Flash rate: 3 flashes per second (approx.)
 Overall size: 100mm diameter x 80mm high
 Fixing: Two 4mm holes on 103mm centres

Supplied with approx 0.5m red and black cable.

Order Code	Type	Price each
YM96E	Strobe Flasher	£14.49

Alarm Beacon

A very high efficiency, low power consumption beacon, designed for use with intruder alarms. The xenon tube gives an intense flash of light once every second. The cover has a flat top marked with Fresnel rings and striated lines for maximum light dispersion. The whole unit is completely sealed and fully weatherproof.

Working voltage: 12V DC
 Supply current: 40mA
 Flash rate: 1 flash per second
 Overall size: 74mm diameter x 48mm high
 Fixing: Two 5mm holes on 45mm centres.
 Maximum panel thickness: 10mm

Supplied with 70mm diameter foam mounting washer and approx. 0.5m red and black cable.

Order Code	Type	Price each
YK39N	Alarm Beacon	£12.99

Reed Switch Recessed

A reed switch and magnet encapsulated in identical white plastic mouldings designed to be recessed into door or window frames. Reed moulding has four wires, two form a security loop, the other two are connected to the reed. Reed contact makes when subjected to a magnetic field.

Operate distance: 9.5mm
 Release distance: 11mm
 Flange dimensions: 19mm dia x 1mm thick
 Main body dimensions: 27.5 x 8mm dia.

Order Code	Type	Price each
YW46A	Door Contact Reed	£1.75

Five Terminal Flush Contact Reed Switch

Fox Security

A magnet and reed switching sensor for burglar alarms, normally to be recessed into doors or windows and their frames. One part contains the magnet, while the other part contains the reed switch which is normally closed in the presence of the magnet.

Opening the door/window will cause the reed to open. The reed switch terminates in a pair of screw terminals, and there are a further three terminals for the security loop. Operating distance, reed to magnet: Reed closes at 13mm, and opens at 15mm. Dimensions, magnet or reed: Length 35mm, width 22mm. Requires a recess at rear in door or frame 19mm diameter (3/4 in), by 15mm deep. Fixing centres 27mm. Screws supplied.

Order Code	Type	Price each
FK77J	Flush Contact Reed	£1.45

Panel Pin Fixing Five Terminal Contact Switch

Magnet and reed contact switch identical to the above, except parts are retained in the door or window frame by a pair of 15mm long panel pins. Ideal where dimensions of the wooden frame are limited. Each surrounding lip is 26mm diameter.

Order Code	Type	Price each
JU65V	Pinned Flush Reed	£1.45

24-HOUR SLIMLINE DIGITAL TIMER NEW

This timer is a slimline digital controller that can be plugged straight into your existing 13A socket outlet and can be programmed to switch loads of up to 13A resistive or 2A inductive. The timer can switch up to 4 ON/OFF programmes per day, with a minimum of 1 minute between switch settings, each of which can be manually overridden. The override function is cancelled at the next automatic ON or OFF switching time. The unit has a back up battery in order that timing is kept accurately, even during a power cut.

GREAT VALUE!
£18.99
RZ84F

Reed Switch Surface

A surface mounting reed switch and magnet in similar white plastic mouldings. Reed unit has five screws, three for making security loops and two are connected to the reed. Reed contact makes when subjected to a magnetic field. Screws supplied.

Operate distance: 14mm
Release distance: 15.5mm
Dimensions:
(both parts) 67 x 14 x 12mm
Fixing centres: 52mm

Order Code	Type	Price each
YW47B	Surface BA Reed	£1.70

Door Loop

Two junction boxes connected together with 300mm of four-core cable. Each box contains five screw terminals and two others, connected to a contact which breaks when the lid is removed. Junction boxes and cable are white. Suitable fixings (not supplied), four 1/2 in. countersunk No. 6 woodscrews. Dimensions of each box: 80 x 24 x 18mm. Fixing centres: 56.5mm.

Order Code	Type	Price each
YW48C	Door Loop	£2.75

Window Foil

A self-adhesive aluminium foil with a strong adhesive on one side and a shiny finish on the other. Stick about 1in. from the frame all round the glass. If the glass cracks the foil will break. Supplied on reel 33m x 9mm.

Order Code	Type	Price each
YW50E	Window Foil	£1.99

Window Foil Terminations

Two self-adhesive terminating blocks which clamp onto the ends of the window foil and provide a screw terminal connection to the foil. Moulded in clear acrylic plastic.

Order Code	Type	Price each
YW51F	Foil Terms	52p

Pressure Mat

Designed for use with intruder alarms etc., the mat is placed under a carpet, rug etc. and gives an abrupt change from open to short circuit when stepped on. Size: 555 x 395 x 3mm.

Order Code	Type	Price each
YB91Y	Std Pressure Mat	£3.99

Stair Pressure Mat

A four contact pressure mat as YB91Y, but having dimensions 555mm x 215mm x 3mm in order to lay along the top of a step or stair.

Order Code	Type	Price each
FK79L	Stair Press Mat	£2.99

Junction Box 5-Way

A white PVC junction box with five screw terminals and two others connected to a contact which makes when the lid is on and breaks when the lid is removed. Suitable fixings (not supplied), two 1/2 in. countersunk No.6 woodscrews. Dimensions: 80 x 24 x 18mm. Fixing centres: 56.5mm.

Junction Box 8-Way

A junction box for interconnecting cables of a security system. The box has a pair of contacts at centre which are normally closed with the lid in position, but which are released if any attempt is made to remove the lid. There are eight additional screw terminals, and a number of holes are provided in the back for cable entry and screw fixing. Dimensions: 72 x 56 x 19mm.

Order Code	Type	Price each
FK76H	Junc Box JB8S	90p

Junction Box 12-Way

A junction box for interconnecting cables of a security system. It has a pair of break contacts which will normally be closed while the lid is securely in position, but which will be released if any attempt is made to remove the lid. The box has twelve screw terminals organised as two 6-way, nylon terminal blocks, one on each side of the back panel. Four break-outs are provided in the back for cable entry, and four countersunk screw holes for fixing. Dimensions: 80mm square x 20mm deep. Colour is white.

Order Code	Type	Price each
RC59P	12-Way Junction Box	£1.75

Help Button

Fox Security

A rectangular button in an off-white plastic moulding with the word "help!!" printed in red on a push-to-make with screw terminals. Dimensions 76 x 23 x 15mm deep. Fixing centres 66.5mm.

Order Code	Type	Price each
FP12N	Help Button	£1.30

Panic Button

A red button in a round, off-white mounting for fixing to a wall, underside of a table or counter or any flat surface, which may be used to trigger an alarm system manually. Contacts are single pole push to make, with screw terminals. The red button is surrounded by a shallow, concave recess to prevent it being depressed accidentally.

Dimensions:— 44mm diameter x 18mm deep. Fixing centres 28mm, two screws supplied.

Order Code	Type	Price each
FK46A	Panic Button	£2.99

Top Operated Panic Button

A large red rectangular plastic button housed in a quality white plastic box. The button is normally flush with the top of the box and requires minimum effort to activate, this makes it virtually impossible to accidentally push the button. Once pushed and the loop is broken (by reed switch), a supplied key is used to reset the button. A red 'flag' in a recessed window indicates the button has been pushed, and a green 'flag' when the button has been reset. The lid has a single screw fixing and a tamper contact is provided, that is made when the lid is screwed into place.

Dimensions: 83 x 65 x 29mm.

Order Code	Type	Price each
KR00A	T/O Panic Button	£2.99

Metal Panic Button

A red button housed in a metal case. The button requires a positive push to activate alarm. It is push to break and should be used in normally closed loop circuits. Once depressed, the alarm can only be disarmed by resetting with the key provided and resetting the control panel.

Specification
Dimensions: Height 65, Width 50, Depth 25 (mm)

Order Code	Type	Price each
YZ67X	Metal Panic Button	£5.99

Heat Detector

A heat sensor comprising an encapsulated bi-metal strip acting as a normally open single pole make switch. The round metal sensor is mounted on a white,

bevelled pattress. The bi-metal strip operates at 60°C ±5°C. Contacts are rated at 0.3A at 24VDC. Dimensions: 100mm diameter x 35mm deep. Sensor unit is 47mm diameter. Has two pairs of screw terminals. Fixing slots are 4 x 9mm on 71mm centres.

Order Code	Type	Price each
FK47B	Heat Detector	£4.99

Glass Break Detector

A sensitive glass-break detector which uses a strong adhesive pad to fix to the glass. The sensor may be positioned to give a make or break action. The sensor must be mounted at least 75mm from a corner or edge of the pane. The sensor is first fixed to the glass,

then adjustments can be made which allows the sensor to be rotated to the desired position in accordance with the enclosed instructions for use. The two-core cable which is approx. 250mm long can then be terminated on a junction box mounted on the window-frame for example. Dimensions 34mm diameter x 21mm high.

Order Code	Type	Price each
FP11M	Glass Break Sensor	£2.65

Twin Beam Break Detector

A synchro twin beam infra-red detector with a range of 30 metres, suitable for indoor protection. It detects intruders when both the upper and lower beams are simultaneously broken. The detectors each require a 12V to 20V DC supply and the transmitter has a green LED in transmitting mode and the receiver has a red LED in alarm mode. A reed relay output is provided with normally closed contacts.

Specification
Recommended range: 30 metres (indoor use)
Beam characteristics: 950nm modulated 700Hz (wavelength)
Beam response time: 50 to 100 msec.
Alarm period: 1sec.
Relay output: Reed relay NC 20W 0.5A 250V DC
Power requirement: 12 to 20V DC
Current consumption at 12.5V DC: 20mA Tx 15mA Rx
Rx alignment adjustment: 180° (±90°) horiz.
Environment: -25°C to +50°C
Case material: Infra-red transmissive polycarbonate
Weight: 260g

Order Code	Type	Price each
BZ64U A1	Beam Break Detector	£26.99

YOUR GUARANTEE OF QUALITY & SERVICE

Vibration Sensor

Fox Security

A simple mechanical vibration sensor comprising a weighted moving contact which can be adjusted by a set-screw for varying degrees of sensitivity. Usually the screw setting is chosen for the contacts to be normally closed; physical displacement of the unit causing the contacts to open since the weighted movable portion remains inert relative to the body of the unit. The detector reacts best to a displacement in the same direction as the moving contact's natural direction of movement (it will operate with a displacement applied at right-angles, but to a lesser degree). Greatest sensitivity can be achieved by mounting the unit vertically with the bob-weight of the movable contact uppermost (cable entry hole at top). To ensure equal sensitivity in both directions two such units may be used mounted vertically with one turned 90° to the other. The two units are then wired together in series. In addition, a second contact is provided in series with the movable contact which is normally held closed by the cover so that the cover cannot be removed without triggering the alarm. Readily applicable to automotive security systems, for example.

Dimensions: 60mm long x 15mm wide x 22mm deep.

Order Code	Type	Price each
FK78K	Vibration Detector	£3.49

Electric Door Catch Release

A strong and secure electrically operated door catch release mechanism, which operates from 12V AC or DC, current 1.5A. Ideal for use in security, doorphone and restricted access systems. The mechanism can be used with mortice locks (but not deadlocks). Please note the lock mechanism itself is not supplied and this should be purchased from a good hardware store or locksmith. Connection to solenoid coil is via two screw terminals. Mechanism requires a cavity of 102 x 21 x 29mm for mortice locks.

Order Code	Type	Price each
YU89W B1	Electric Door Lock	£16.99

YOUR GUARANTEE OF QUALITY & SERVICE

DOMESTIC SMOKE ALARM

A battery powered domestic smoke alarm that gives early warning of fire in the home. The alarm is easily installed as there is no wiring involved. The alarm has a sound output of 85dB (minimum) at 10 feet, and a battery life of at least one year. There is a low battery warning that beeps every minute for 30 days. A test button is provided that simulates the effect of smoke and checks the sensor, electronics and horn. 9V battery included. Dimensions: 140 x 125 x 46mm; weight 175g.

GREAT VALUE!
£4.99
KC38R

Door Viewer

Viewtech

A door viewer of high quality and excellent optics, having a machined alloy body chemically finished in black, and a chrome bezel of 31mm diameter surrounding the lens. Adjustable to suit most doors up to 50mm thick. Requires a 15mm diameter fixing hole.

Order Code	Type	Price each
RC45Y	Door Viewer	£12.99

Safety Eye

NEW!

A large door viewer that displays an image on a 45mm screen of the area outside your door. It is possible to stand up to 2m from the door and still see a clear image of the outside, so making it easy to see visitors and reduce eyestrain. Finished in a rugged black plastic and suitable for doors up to 30mm thick. Requires a fixing hole 46mm in diameter. Overall length 78mm.

Order Code	Type	Price each
RZ48C	Safety Eye Viewer	£12.99

Car Alarm Sticker

A highly visible triangular self-adhesive car alarm sticker, ideal to ward-off thieves whether an alarm is fitted or not. The sticker measures 75 x 75mm (approx.), has a bright red border and black lettering on a white background.

Order Code	Type	Price each
JR91Y	Alarm Sticker	60p

SMOKE ALARMS

IT'S A FACT!

SMOKE ALARMS

A must for the home, office, shop etc. to give an early warning of smoke and, in case of fire, allowing valuable extra time to escape. Recent changes to Building Regulations make the fitting of mains smoke alarms compulsory. Locating smoke alarms is important, since sufficient smoke must enter the alarm before it will respond. The alarm needs to be within 10 paces (23 feet) of the fire to respond quickly, at least 15cm away from walls and corners, and at least 30cm away from any light fitting or decorative object which might obstruct smoke entering the alarm. When a ceiling position is not practical, the alarm should be fixed with the top edge between 15 to 30cm below the ceiling. In areas with sloping or peaked ceilings, the alarm should be installed 90cm from the highest point measured horizontally. For maximum protection and peace of mind, it is recommended that a smoke alarm is fitted in every room of the house, except bathrooms, shower rooms, garages or other rooms where the smoke alarm may be triggered by steam, condensation, normal smoke or fumes.

COMPARE OUR PRICE & QUALITY – SAVE MONEY TODAY!

Smoke Alarm with Relay

A smoke alarm that is designed to operate with the 12V supply from the control panel of a security system, and provides an alarm signal via a set of relay contacts. The contacts are normally closed in the 'no smoke' condition. The alarm has a sound output of 85dB (minimum) at 10 feet, and an LED flashes every two seconds when smoke is detected. The LED normally flashes every 40 seconds, to provide indication that the unit is on. The test facility, which can be operated locally or remotely, checks the sensor, electronics and the alarm.

Specification

Supply voltage:	10-2V to 13-2V DC
Standby current:	150µA maximum
Alarm current:	30 to 60mA
Cable:	5 core (4 core if remote test not needed)
	Maximum resistance 20Ω
Relay contacts:	24V/1A resistive
Dimensions:	140 x 125 x 46mm
Weight:	170g

Order Code	Type	Price each
KC39N	Smoke Alarm + Relay	£19.99

Combined PIR and Smoke Detector

A space saving combined PIR and smoke detector in a compact white ABS case that is suitable for any intruder alarm system with 12V detector system. The PIR has an operational angle of 90° and a range of approximately 15 metres, with 10 long range zones, 10 intermediate zones and 5 short range zones. The recommended mounting height is 2.5m to 4m. The dual element sensor has a selectable one or three pulse count and is housed in a tamper protected case. The ionisation type smoke detector conforms to BS5446 Part 1. There are separate connections for use with control panels with fire and intruder outputs. To utilise all the functions, either one 8-way cable or two 4-way cables will be needed to connect to the control panel; two for the power connections, two each for the smoke detector and PIR and two for the anti-tamper function. Size 110 x 66 x 41mm.

Order Code	Type	Price each
CP98G	PIR Smoke Detector	£29.99

Indoor Pulse-Count Type 180°

A very high quality passive infra-red detector using the very latest technology to provide extremely high immunity to false alarms. The alarm will only be triggered if two consecutive signals are detected within about half a minute. Thus very slowly moving changes like heat from a radiator, the sun

rising or setting etc. are not detected, whereas a person would have to move into one segment then wait over half a minute before moving into the next, but since no-one can know where the segments are, this is in practice an impossibility and therefore a person entering the protected area will always set the alarm off. This very small and unobtrusive unit can mount on a flat wall, in the corner between two walls or between the ceiling and a wall. An anti-tamper switch is incorporated which can be connected to the alarm system's 24-hour circuit along with smoke detectors, heat sensors etc. to set off the alarm even while the system is not set. The unit has a dual sensing element and will cover an area 12m x 12m over 110° in a fan shape pattern and an area of 3m over 180° to the left and right, depending on position and surroundings. It should be positioned so that it has a clear and unobstructed view of the area to be protected. Avoid pointing the unit at fast changing heat sources, such as cookers, kettles etc. For best detection, site the unit so that intruders pass through the beam rather than directly towards or away from the unit. A walk-test LED is provided which lights dimly if one pulse is counted and brightly after two counts to assist in setting up and positioning the unit. The LED can be switched off in normal use if desired. The pulse count facility can be disabled if required so that the unit triggers at the first pulse. The detection range and height can be adjusted without repositioning the unit, for added convenience during installation.

Specification

Detection method:	Dual pyroelectric passive infra-red
Detection angle:	110° (fan shape)
Coverage:	12m x 12m
Detection angle:	180° (left - right)
Coverage:	3m
Detection beams:	38
Detection rows:	2
Mounting height:	1.8 to 2m
Adjustable angle:	30° Vertical
Operating voltage:	12V DC
Operating current:	20mA
Relay output:	30V at 0.5A N.C. max. (AC/DC)
Pulse count:	Switchable 1 or 2. In 2 count mode second pulse must occur within 40 secs for alarm to trigger
Alarm display:	Red LED monitor
Alarm period:	2 (±1) seconds
Sensitivity:	Adjustable
Tamper switch:	Internal microswitch
Weight:	60g (Net)
Dimensions:	65mm dia x 43mm deep

Order Code	Type	Price each
AJ96E	Pulse Count PIR	£21.99

Mains Powered Smoke Alarm

A 220/240V AC mains powered smoke alarm that can be interconnected (up to 12 alarms) so that when one alarm senses smoke all the alarms sound. The alarm must be continuously powered 24 hours a day so it is important that it is not in a circuit that can be turned off by a switch. The alarm should be wired permanently to a separately fused circuit at the distribution board, and a junction box has to be installed where the alarm is to be placed. The smoke alarm has a 'hush' button to help control nuisance false alarms. When pushed, the alarm switches to a reduced sensitivity mode. This condition allows unwanted alarms to be silenced for a period of approximately 10 minutes. The unit will give a short beep every 40 seconds during this time as a reminder. After this 10 minute period, the alarm reverts to normal mode. Pressing the 'test' button will also revert to normal mode. Fitted with mains indicator, the alarm sound output is 85dB (minimum) at 10 feet. Size 140 x 115 x 50mm. Weight 181g.

Order Code	Type	Price each
KC40T	Mains Smoke Alarm	£15.99

PASSIVE INFRA-RED DETECTORS

Portable PIR Alarm/Chime Unit

A compact passive infra-red detector and alarm unit that is completely self contained. The unit, finished in smart white plastic, measures 35.5 x 108.5 x 68mm. The unit may be used free-standing on a desk, shelf, etc. or using the integral swivel bracket, mounted on a wall either horizontally or vertically. A slide switch on the side of the unit selects chime/off/alarm modes. In the chime mode, when the detector is triggered, a 'ding-dong' chime sounds, ideal for use as an automatic door or shop bell. In the alarm mode, triggering the detector will sound an ear piercing 90dB ft siren, the alarm will reset and re-arm after 30 seconds. Exit delay after arming is 10 seconds. Power requirements 9V PP3 alkaline battery (FK67X) not supplied, standby current is 90µA, expected battery life 6 months. Detector coverage angle 60°. Operating temperature range -10 to +40°C.

Order Code	Type	Price each
YU17T	Portable PIR Alarm	£20.99

Fax your orders to:
01702 553935

HIGH IMMUNITY INDOOR PULSE-COUNT DETECTOR

A compact indoor PIR sensor for use with intruder alarm systems. This detector has superior immunity from white light, EMI and RFI, and exceeds the industry standards by 200%. For ease of installation, the detector features a unique patented tamper-proof bracket. The neat design has curves on two planes and can easily be installed in the most challenging locations. Once installed, the unit gives highly effective intruder detection to BS4737. The detector is supplied with a volumetric lens, which has an adjustable range up to 12m (40ft) over a 104° arc of coverage, producing a maximum width of 18.9m (62ft). Selectable pulse count is included to avoid false triggering. The unit requires 12V DC and has normally closed relay contacts for the alarm output and normally closed switch contacts for the tamper output. To aid setting up of the positioning and range of the sensor, a walk-test LED is fitted to the unit which indicates when the trip threshold has been passed. For optimum results, the unit should be sited in such a way that intruders would pass through the beam, rather than directly towards or away from it. Three alternative lenses are available offering different ranges and coverage for specific applications.

The pet lens (AG82D) has a 12m (40ft) range with an arc of 104° and a maximum coverage of 18.9m (62ft). Viewed from the side, the beam is very narrow, so if positioned above the height or reach of any pets or animals the alarm will not be set off.

The curtain lens (AG83E) offers a very narrow 12m (40ft) range with an arc of 6° and a maximum width of 1.3m (4ft). Viewed from the side the coverage is over an arc of 104°, that is, from floor to ceiling. The detector can be hidden in a small gap between two curtains.

The long-range lens (AG84F) has a 40m (130ft) range with an arc of 8° and a maximum width of 1.6m (5ft) and is ideal for long corridors and passageways.

GREAT VALUE!
£21.99 AG81C

Specification

Pyro-electric detector:	dual-element, low-noise
Voltage:	9 to 16V DC
Current:	17mA typically at 12V DC
Alarm output:	normally closed relay contacts rated at 24V DC 50mA
Tamper output:	normally closed switch contacts rated at 24V DC 50mA
Alarm period:	2s to 3s
False Alarm Protection	
Electrostatic discharge:	no false alarm up to 8kV, complies with IEC 801-2 and BS6667 Pt 2
RF immunity:	no false alarm from 150kHz to 1GHz at 30V/m modulated, complies with IEC 801-3 and BS 6667 Pt 3
Transient immunity:	no false alarm up to 4kV, complies with IEC 801-4 and BS 6667 Pt 4
Operating temperature:	-10°C to 55°C
Temperature tolerance:	no false alarms up to 1.7°C/m
Maximum humidity:	95% non-condensing
Mounting:	up to 4.1m (13.6ft) with adjustment range ±30°
Casing:	flame retardant ABS
Dimensions:	90 x 63 x 40mm

Additional Lenses

AG82D Pet Lens 80p, AG83E Curtain Lens 80p, AG84F Long Range Lens 80p

Outdoor PIR Light Control Device

A light control device with a 180° motion sensor and the ability to switch up to 1100 watts, attractively styled for indoor use but is also suitable for outdoor use. The unit uses a built-in passive infra-red (PIR) detector that reacts instantly to body heat and switches on a lamp(s). After an adjustable period of time, the lamp is automatically switched off. A built-in, variable light level, photocell deactivates the motion sensor during the day. If the supply to the unit is switched off and then on within two seconds, the unit changes to manual mode and the lamp will be on all the time. To revert to auto mode, the mains supply is switched off for over five seconds and switched back on again. Ideal for porch lights, gate lights etc., this PIR light control device makes the perfect addition to your security system.

Specification

Detection method:	Passive infra-red
Power requirements:	220/240V AC 50Hz
Standby current:	30mA (max.)
Operating current:	35mA (max.)
Lighting load:	1100W (max.) incandescent 500W (max.) fluorescent
Detection range:	12m min. at 20°C
Detection angle:	180°
Adjustable angle:	Vertical 180°
Lux level:	0 to 1000 lux
Housing design:	Water resistant
Lamp-on time:	5 secs ±3 to 12 mins ±3

Order

Code	Type	Price each
BZ18U	Indoor/Outdoor PIR	£21.99

PIR Light Control Device

A PIR light control device for switching up to 10 amps. The head can swivel through 180° and has a range of 14 metres at 20°C. The device has adjustment for light level and time delay and can be used outside if it is protected from the weather by mounting it under the eaves of roofs. The light level control is initially set to 'TEST' and will allow the light to come on during daylight. The control is turned fully clockwise and at the desired ambient light level, the control is adjusted until the light comes on, the light control will now only be active from dusk to dawn. Once activated, the light control will stay on for up to 12 minutes approx., but can be adjusted to be as short as 5 seconds. The device is suitable for switching on up to four 500W halogen lamps or porch lights, gate lights or a combination of lights up to the rated 10A.

Specification
 Detection range: 14m @ 20°C
 Detection angle: 180°
 Mounting height: 1.8 to 2m wall mount
 Rated load: 10A, incandescent lamp
 Switch off delay: Adjustable from 5 seconds to 12 minutes approx.
 Weight: 300g

Order Code	Type	Price each
CR06G	Outdoor 10A PIR	£29.99

Miniature Infra-red Detector

A compact, 90° indoor passive infra-red detector for use with our existing range of intruder alarm systems. The unit can be fitted for normal range (up to 12m) or tilted down by 8° for a reduced range. This is accomplished by either using the top pair of fixing holes, for normal range, or the bottom pair of holes (the mounting is angled) for short range. The pulse count can be set for either 1, 2 or 3 counts, and it is suggested that at the recommended height, a count of 2 is selected. This will require an intruder to move a few paces before triggering the alarm. False triggering due to insects etc., will be greatly reduced. In addition to the normal alarm contacts, the device has tamper contacts as well. Requires 12V DC.

General Specification

Detection system:	Passive infra-red dual element sensor.
Range:	12m approx. over 90°.
Recommended mounting height:	2.2m.
Alarm signal:	Normally closed contacts 30V DC 75mA maximum.
Tamper output:	Normally closed 24V 50mA.
Supply voltage:	9 to 14V DC 50mA.
Ambient temperature:	-10°C to +50°C
Weight:	50g.
Case dimensions:	68 x 58 x 43mm, white ABS.

Order Code	Type	Price each
DM12N	Miniature PIR	£21.99

PIR LAMPS

Floodlight Security System with PIR

Fox Security

A high-powered floodlight, controlled by a built-in passive infra-red intruder sensor. This practical outdoor security system offers outstanding value for money and at the flick of a switch it can also double as illumination for outdoor events, such as parties and barbecues. When installed, the infra-red sensor provides detection over a wide 110° degrees of arc with a range of 15m. The range of the detector is such that this system is suitable for both commercial and domestic applications, the actual degree of sensitivity being adjustable. When any form of infra-red radiation (e.g. body heat) is detected moving within this region, the halogen tube (supplied separately) of the floodlight is switched on for up to 12 minutes (period adjustable). Not only does the brilliant light provide a deterrent to any would-be criminal, but it also provides a handy automatic light for use when parking the car, bringing in the shopping, avoiding obstacles or finding front door keys. A built-in circuit ensures that the unit does not operate wastefully during the day.

Specification

Power requirements:	240V AC 50Hz at 2.1A
Maximum lamp rating:	500W
Detection range:	50ft (15m) at 20°C
Horizontal detection angle:	110°
Mounting Height:	7ft to 9ft (2.13m to 2.74m)
Floodlight angle:	Adjustable through 180° vertically
PIR sensor unit angle:	Adjustable through 60° horizontally and vertically
Operational modes:	Automatic and manual
Lighting time period:	Adjustable from 5 seconds to (when sensor tripped) 12 minutes (approx.)
Daylight override:	Adjustable threshold
Floodlight housing:	Cast zinc alloy
PIR sensor unit housing:	Fire, water and UV resistant
Environmental protection:	IP44
Recommended cable:	3-core; 6 amp or greater capacity Max dia.: 8mm (see Cables section for suitable types) Entry to unit by cable gland.

Supplied with full fitting instructions. Please note that the halogen tube is not supplied, and must be ordered separately, see next page.

Order Code	Type	Price each
GK05F	F5 I/R Halogen Lamp	£16.99

Wide Detection Angle PIR Detector

Designed to be mounted on the corner of a house or out building, this ingenious device has a 270° detection angle, and is ideal for switching on a halogen lamp and a load rating of 1100W. The detector features adjustable 'time-on' and 'light level' settings. A distance adjustment and manual override are also incorporated.

Specification
 Detection method: Passive infra-red
 Power requirements: 220/240V AC 50Hz
 Power consumption: 1.1W max. (PIR sensor)
 Lighting load: 1100W (max.) incandescent
 Detection range: 12m min. by 200° wide at 20°C
 5m min. by 270° wide at 20°C
 Detection angle: 180°
 Adjustable angle: 22° vertical
 Mounting height: 1.8m to 2m above ground
 Lamp-on time: 5 ±3sec to 12 ±3min
 Housing design: Water-resistant

Halogen Floodlight

A product very similar to GK05F above, but without the passive infra-red detector fitted. Please note that the halogen tube is not supplied and must be ordered separately, see below.

Order Code	Type	Price each
ZC33L ³¹⁴⁵	D3 Halogen Lamp	£9.99

240V 300W and 500W Halogen Lamps

High-powered halogen tubes with a brilliant white light (colour temp. 2900°K) which can provide 9000 lumens of illumination for 500W tube and 5000 lumens for 300W tube. To fit standard R7S base, these tubes are suitable for any application where a very bright light is required (for example, video work). Also suitable as replacement bulbs for our Security Light (GK05F). Important note: please avoid touching the glass itself with bare fingers as the grease will reduce the life of the tube. Average life 2000 hours. Overall dimensions: 119.6mm long x 10mm dia.

Order Code	Type	Price each
KP50E ⁴⁸³⁹	300W Halogen Tube	£3.99
JX53H	500W Halogen Tube	£3.99

GLOBE LIGHT

An attractive globe light that automatically comes on, at night, when someone enters the detection range. The built-in PIR detector reacts instantly to body heat and switches on the lamp, after an adjustable period of time, the lamp is switched off automatically. An adjustable, built-in, photocell deactivates the PIR during the day. The light is easy to install and requires an incandescent lamp (maximum 100W), and should be mounted 2m, approximately, above the ground. The detector has an 180° detection angle, a range up to 10m, and can be adjusted vertically through 22°. When motion is detected, the lamp is switched on providing a welcoming light for your family and friends as they approach your home. Intruders do not like unexpected light and will, hopefully, be put-off.

Mini Floodlight with PIR

Fox Security

A compact high-powered floodlight, controlled by a built-in passive infra-red intruder sensor, similar to our popular standard security floodlighting system (GK05F). Like its bigger brother, this outdoor security system offers outstanding value for money, and at the flick of a switch can also double as a source of general illumination for outdoor events. When the floodlight is installed, the infra-red sensor provides detection over 110° of arc up a distance of 12m. This detection range means the unit is sensitive enough for use in commercial as well as domestic applications; the level of sensitivity being adjustable. In use, when any form of infra-red radiation (e.g. body heat) passes through this detection region, the 150W halogen tube (supplied separately) is switched on, for up to 12 minutes, catching any intruders unexpectedly in a brilliant flood of light. The 'on' time is adjustable from 3 seconds to 12 minutes. The lamp is not only a useful deterrent against intruders at night, it is also a handy automatic welcoming light for you, your family and friends. The lamp is prevented from operating wastefully during daylight hours.

Tube not supplied, requires tube: DM51F

Specification

Operating voltage:	240V AC 50Hz
Maximum lamp rating:	150W
Detection range:	12m (39ft) at 20°C
Horizontal detection angle:	110°
Mounting height:	1.8m to 2m (6ft to 6ft 7in)
Floodlight angle:	Adjustable through 100° vertically
PIR sensor angle:	Adjustable through 60° vertically and 330° horizontally
Operating modes:	Automatic and manual
Automatic lighting period:	Adjustable from 3 seconds to 12 minutes
Daylight override:	Adjustable threshold

PHOTO-ELECTRIC CONTROL

A photo-electric control especially designed for use in both industrial and domestic installations. The photocontrol is manufactured from high quality materials to give a long and reliable performance. The housing is moulded from polycarbonate, for excellent mechanical strength and high impact resistance. The opaque housing eliminates false operation due to light feedback from within the fixture. A clear ultra-violet stabilised window prevents cracking or clouding due to sunlight. A bimetallic switch provides time delay to prevent turn off due to temporary ambient light conditions i.e. car headlights. The 'eye' is weatherproofed, but the body must be mounted in a suitable weatherproof enclosure. The control should be located such that the 'eye' faces away from artificial light sources, and is not illuminated from the light it controls. Requires a panel cut-out 18mm dia., two nuts and gasket included. Overall size 52 x 26 x 41mm (includes 'eye', excludes cables).

Specification

Photocell: 0.75in² cadmium sulphide (surface passivated)
 Switch: Single pole, single throw normally closed
 Lead wires: 1.0mm² to BS6231
 Line = brown
 Load = red
 Neutral (common) = blue
 Lead length: 500mm
 Voltage range: 200V to 300V AC mains
 Standard turn-on: 55 to 70 lux
 Rated load: 1200W incandescent load
 1000VA mercury vapour, high pressure sodium or other H.I.D. load
 Rated life: 5000 operations minimum at rated load
 Temperature range: -40°C to +60°C

Order Code	Type	Price each
KR47B	PhotoElectric Contrl	£10.99

SS4 Photo Electric Switch

This photo electric control unit is designed to switch on at dusk and off at dawn and incorporates a standard photo electric switch and a translucent plastic dome. The switch-on function operates when the light level falls to 70 Lux and the switch-off function operates when the light level rises to 210 Lux. A time delay is incorporated so that car headlights do not cause false operation. The unit will switch all types of domestic and industrial lighting up to 5A max. An entry hole in the connector base is large enough to accommodate a 20mm bush for connection to conduit or MiCC wired system. A continuous live and neutral supply of 240V AC at 50Hz is required. The photocell being factory calibrated, is not variable and is contained in a sealed unit that plugs into a NEMA socket mounted in the wall bracket. The photo cell plug is polarised to prevent incorrect insertion into the socket. Screws and wall plugs for mounting the unit are supplied.

Specification

Light switching levels: 70Lux On, 210Lux Off
 Voltage range: 240V AC, 50Hz
 Max Current switchable: 5A
 Max Power Rating: 1200W
 Standby Current: 30mA

Order Code	Type	Price each
GX12N	SS4 Thermal Ph/Cell	£14.99

SS4E Photo Electric Switch

This photo electric control unit is designed to switch on at dusk and off at dawn and incorporates an electronic control circuit for greater sensitivity, and a clear plastic dome. The switch-on function operates when the light level falls to 70 Lux and the switch-off function operates when the light level rises to 105 Lux. A time delay is incorporated so that car headlights do not cause false operation. The unit incorporates electronic switching which will switch all types of domestic and industrial lighting up to 5A max. An entry hole in the connector base is large enough to accommodate a 20mm bush for connection to a conduit or MiCC wired system. A continuous live and neutral supply of 240V AC at 50Hz is required. Screws and wall plugs for mounting the unit are supplied.

Specification

Light switching levels: 70 Lux On, 105 Lux Off
 Voltage range: 240V AC, 50Hz
 Max Power Rating: 5A
 Power Consumption: 1200W
 Standby Current: 30mA

SECURITY LIGHT SWITCHES

Automatic Light Switch

An easy to install PIR (Passive Infra-Red) sensor using the latest techniques, and which reacts instantly to body heat within its detection zone. It can be conveniently used anywhere in the home, will automatically switch lights on whenever someone

enters a room, and turn them off again when the presence of a person is no longer detected. It can also switch on at dusk and is adjustable for darkness level. Saves money on your electricity bills by always ensuring lights are turned off, can also be used as a normal light switch and is suitable for 2-way switching circuits for hallways and stairs.

An adjustable photo-electric cell allows you to set the darkness level at which you want the automatic mode to come into operation. While in automatic mode, the lights will come on as soon as someone enters the room, and remain on while the person is present. When no further presence is detected, the lights are switched off again after a short wait. During daylight hours the unit is inactive, but there is a manual override for normal switching. A 150° wide-angle, multi-zone lens is used for the PIR sensor providing a detection range of 9 metres (30ft), and the unit is protected by a replaceable fuse and will switch up to four 60 watt tungsten lamps, but is not suitable for fluorescent lighting.

The unit is simple to install as it replaces existing light switches, and will fit a standard 16mm deep metal wall box. Comprehensive step-by-step instructions are included.

Warning: not suitable for use outdoors.

Specification

Detecting range: 9 metres with angle of 150°
 Sensor type: Dual element PIR
 Input power: 240V AC @ 50Hz
 Load rating: 250W max., 40W min. incandescent lamps only

Ambient light to darkness sensor type: Photo-electric

Radio frequency interference limits are to BS800, and electrical safety to BS415.

Automatic Security and Dimmer Switch

An easy to install PIR (Passive Infra-Red) sensor using the latest techniques for ease of use and to give you added security around your home, and which reacts instantly to body heat within its detection zone. It includes a 'touch dimmer' control which lets you set your own light level, and has a manual override for normal on/off control. During automatic mode, the sensor will switch lights on automatically whenever someone enters the room. Continued movement in the room will keep the lights on, and when no further movement is detected the lights will be slowly dimmed until off.

The security mode has two functions, one of which will sense if an intruder enters the room, day or night, and will immediately flash the lights on and off to frighten them, and also attract attention from outside. The other function is a deterrent which switches the lights on and off at random intervals giving the impression that the home is occupied during the hours of darkness, for a duration of up to 8 hours. The flashing alarm function is still active in this mode.

A single touch-button dimmer is used to set the light level required, when released the unit 'remembers' the current level, but there is also a manual override for normal light switch operation. An extensive detection range of 150° is due to the use of a multi-zone lens which detects movement up to 9 metres (30ft) away. The unit is protected by a replaceable fuse and will activate up to four 60 watt tungsten lamps. It is not suitable for switching fluorescent lighting. The 2-way switching facility allows it to be used in lighting circuits for hallways and stairs.

An automatic self check facility flashes the LED indicators and dims the lights when the unit is initially powered-up. The unit is simple to install and connect in place of existing light switches, and fits a standard 16mm deep metal wall box. Comprehensive step-by-step instructions are included.

Warning: not suitable for use outdoors.

Specification

Detecting range: 9 metres with angle of 150°
 Sensor type: Dual element PIR
 Input power: 240V AC @ 50Hz
 Load rating: 250W max., 40W min.
 incandescent lamps only

Ambient light to darkness sensor type: Photo-electric

Radio frequency interference limits are to BS800, and electrical safety to BS415.

Order Code	Type	Price each
ZB33L	Auto Dimmer PIR	£34.99

Programmable Security Wall Switch

A single wall switch incorporating a light sensitive controller designed to operate during darkness or whenever required. The controller turns on the light automatically as darkness falls, and will then switch off after any period of time of up to eight hours, as determined by the preset control concealed beneath the sliding front cover. The unit fits standard conduit and surface boxes (screws are supplied), and doubles as a normal light switch. A front panel lamp indicates when the unit is active, and the sensitivity of the light sensor is adjustable to vary the moment of switch on time. Once triggered, the unit waits two minutes before switching on the lights. The unit can also be wired into two-way lighting circuits. Supplied with installation and operating instructions. Front panel is 85mm square. Depth (from rear of main body) 11mm.

Order Code	Type	Price each
MK44X	Security Wall Switch	£19.99

Signal/Burglar Alarm Cable

General purpose 4-core, 6-core and 8-core signal cables ideal for use with security alarms and other applications where low voltages and low currents are being used. The cable contains flexible wires each having seven strands of 0.2mm tinned annealed copper insulated wire.

Specification

Max. working voltage: 60V RMS
 Max. current per core: 1A
 Max. conductor resistance: 92.4Ω/km @ 20°C
 Max. operating temperature: 70°C
 Conductors: 7/0.2mm strands of annealed copper wire conforming to BS6360
 Insulation: PVC to radial thickness of 0.2mm nominal conforming to BS6746
 Sheath: PVC nominal wall thickness 0.5mm

Nominal overall diameter

4-core: 3.5mm
 6-core: 4.1mm
 8-core: 4.5mm

Wire insulation colours

PERSONAL SECURITY ALARMS

Personal Protector

A very compact personal alarm, in a tough black plastic case. Due to its slim size, it can be easily slipped into a pocket or handbag, carried by hand, or attached to a belt loop or key ring by using the supplied clip. The loud, piercing, 110dB alarm is activated by pulling the rip cord, which removes a plastic plug from its socket. The alarm will sound continuously for up to 1 hour, or until the plug is replaced in its socket. The unit is powered by two 1.5V 'N' size batteries (supplied). Overall dimensions: 80 x 60 x 18mm. Weight: 66g including batteries.

IT'S A FACT!

PERSONAL SECURITY ALARMS

A personal attack alarm is the only deterrent allowed by law. Street crime is on the increase, and those at risk include people who work early or late shifts, walkers, joggers, women, children, the elderly and anybody who travels alone by foot during unsociable hours. The police and consumer organisations recommend the carrying of pocket alarms by these 'at risk' groups as they draw immediate attention to both the victim and the attacker, providing a deterrent to the criminal whilst summoning help. It must be stressed that batteries, where used, should be checked periodically to ensure that the alarm will operate when needed. Since these units can produce extremely loud and piercing alarm signals they should only be used in an emergency and for the shortest time possible. This is because permanent ear damage could result from prolonged exposure. For the same reason it must be ensured that the hearing of children and pets is not endangered.

PERSONAL ATTACK ALARM

A personal attack alarm is the only deterrent allowed by law, and police officers advise all women to carry a sonic alarm for their own protection. This alarm is recommended for use to anyone alone outdoors, the old and infirm, teenagers, shift workers, tax-drivers, for attracting attention after an accident or as a deterrent against vicious dogs. This alarm uses a gas cartridge to produce an ear-piercing 115dB shriek, just a firm push of the top will set off the alarm, which can be either a short burst or continuous. The continuous deafening sound will last for about two minutes – enough to frighten off the most determined attacker. Once locked on the noise will continue even if dropped. The Alarm is small enough to fit easily into a pocket or handbag, or clipped into a blouse or jacket pocket. The replaceable gas cartridges are available in packs of two and contain no CFC gases and are therefore ozone friendly.

KR18U

KR19V Cartridge x 2 £5.25

Multi-Purpose Pocket Alarm with Light

Fox Security

A handy but reliable device for personal protection. It combines a flashlight with a high-powered alarm. With a durable plastic case finished in two-tone grey, this personal alarm offers two methods of being triggered. The first is simply to move the slide switch towards the wrist strap (Moving it the other way turns on the flashlight). This method is used if the unit is hand-held. The other is to pull out the wrist strap itself, which enables it to be operated quickly if the unit is concealed. There are several uses for this method. For instance the unit could be zipped into a handbag, except for the strap which is wrapped around the owner's wrist. Should theft be attempted, the strap will be separated from its socket activating the alarm and immediately drawing attention to the handbag. The alarm is muted simply by replacing the strap. Other applications include a door or window alarm. The unit is powered by a single PP3 9V alkaline battery (not included) and is supplied with a plastic holder which is used for storage or mounting of the unit when it is used as a door or window alarm. Overall dimensions: 120mm x 47mm x 25mm. Weight with battery: 120g.

Mugger Buster

A handy but reliable device for personal protection, combining a flashlight with a high-powered alarm built into a rugged case. The alarm is provided with a belt clip and a slide switch on one edge. It is finished in mat black with an orange lamp-cover. Sliding the switch toward the lamp provides a steady beam of light. Sliding the switch away from the lamp will sound the alarm and provide a flashing beam of light to attract attention. To de-activate the alarm simply insert the de-activate pin, attached to the wrist-strap, into the de-activate gap. The alarm is powered by three 'AA' size batteries, supplied.

Order Code	Type	Price each
GW54J	Mugger Buster	£9.99

BICYCLE ALARM

This practical and dependable bicycle alarm is designed to secure your bicycle and, hopefully, is an aid against theft. It provides an ear-piercing 110dB alarm when the lock is tampered with or if the steel cable is cut. Four 'Allen key' type screws (a special screwdriver is included) hold the battery cover in place, and the battery compartment is fitted with a tamper switch that is activated when the battery is in position and the lid is replaced. If the alarm switch is 'on' and someone tries to remove the battery compartment cover, the alarm will sound to warn you that the lock is being tampered with, and to help deter a thief. A vibration sensor switch is also located in the battery compartment, and when switched on activates the vibration sensor. When the alarm is switched on and the lock is moved in any way, the alarm will delay for 5 seconds, and then the alarm will automatically sound for 15 seconds. This cycle of 5 seconds 'off' and 15 seconds 'on' will continue only if the lock is continually tampered with. To use the alarm, the cable is firmly locked into the cable locking socket and the 'alarm' button is pushed. A short 'beep' will sound which tells you that the battery has power and the lock is in the armed mode. If a 'beep' is not heard then the battery must be replaced. Once set to 'alarm', there is a 15 second delay time before the alarm will activate, if tampered with. The alarm can be deactivated by turning the cable lock switch and key in a clockwise direction. A mounting bracket is included which is designed to be fixed to a bicycle frame to hold the lock in place. Housed in a black ultrasonically welded case, this lock requires a PP3 9V battery (not included). The steel cable is 6 feet long, allowing the bicycle to be secured to railings, lamp posts, etc. This alarm lock can also be used to protect a wide range of valuable items such as trailers, large lawnmowers, motorbikes, etc.

UV Bank Note Checker

A mains powered ultra violet bank note checker in a rugged black plastic housing, that is designed for desk or counter use. The note is placed under the UV light and, if it is genuine, it will not reflect the 'blue' light. Fitted with a top mounted on/off switch and approximately 1m of mains lead. Dimensions: 180 x 120 x 75mm.

Order Code	Type	Price each
RZ46A	U.V Money Checker	£9.99

CAR ALARMS
Keyless Delay Alarm

A novel car alarm which should take just a few minutes to install. It requires just the connection of three wires under the bonnet and fixing the alarm horn. One wire bolts to the chassis and the other two are connected in the fusebox. With the ignition off, simply touch the green wire to any fuse. If the LED on the back of the horn lights then the red wire must be connected to that point, if it does not light connect the green wire to that point (though first find a fuse where the LED does light so that you know where to connect the red wire). After about 10 seconds, the alarm will go off. To reset it, switch the ignition on. When the ignition is turned off you have about 1 minute to leave the car and close the door before the alarm is armed. If an interior light then comes on, e.g. through opening a door, boot, bonnet, glove compartment etc. then after about 10 seconds if the ignition key is not turned on, the alarm will go off. The alarm will sound for about 45 seconds then re-arm itself. The horn gives a very loud 110dB tone to warn off intruders. It is very simple to install and you cannot forget to arm it as it works automatically from the ignition key. Note that this product may not function correctly with very low wattage courtesy lights or if a high efficiency maintenance-free battery is in use.

Horn dimensions: 132mm diameter throat, 147mm long. Horn swivels up and down on base.

Vixen Vehicle Alarm Systems

A range of low-cost, high quality, vehicle alarm systems, that includes a compact, easy to install, basic model; a compact expandable model, and a top-of-the-range, battery backed-up, fully expandable system. All the alarms include a small remote control that has an in-built dedicated code. This code can be one of 59,000, programmed into the alarm system during installation. This makes it virtually impossible for another remote control to arm/disarm your alarm. An additional feature of the alarm is a 'self learning' ability, where, on set-up, the alarm memorises the code from the remote transmitter. The alarm can be armed/disarmed from a maximum of two different codes, from two transmitters. Should one of the transmitters be lost or stolen, the alarm can be reprogrammed to accept a replacement transmitter's code, and in the process rendering the lost unit incapable of operating the alarm. Additionally, the remote control also provides a 'panic' facility, this allows the alarm to be activated if you are personally attacked within 100ft of your vehicle. All the alarms feature a very loud 115dB siren, which should deter the most determined thief, and a fully adjustable shock sensor - any attempt to break into the vehicle by breaking a window, will trigger the alarm. Additionally, opening any door, the boot or bonnet resulting in a courtesy light coming on, will also trigger the alarm. Also, all the alarms feature a 'warn away' facility, where a slight disturbance to the vehicle will result in a subdued response, making any potential thief aware an alarm is fitted. This feature also greatly helps reduce false alarms. Should the tampering or disturbance continue after the warn away has sounded, then the full alarm response will be triggered. The alarms can be set to operate with vehicles that have an electric cooling fan that can operate when the ignition is switched off. By cutting one wire, this facility will not cause the alarm to trigger. A range of accessories is also available and includes a remote receiver that can be used to operate house lights or possibly an automatic garage door, if this facility is fitted.

Remote Vehicle Alarm

This low cost alarm is an easy to install one piece design, connected to your vehicle by two wires. When programmed with the remote control code, the alarm is installed and is ready for use. A third wire should be connected to the ignition switch, so that the alarm cannot be armed when the engine is running. When armed, any forced entry into the vehicle which will turn on an interior light, or any sudden 'shock' to the vehicle, will cause the alarm to be triggered. Additionally, the alarm features a 'warn-away' function which is set by pressing the remote control button twice. When the shock sensor is triggered, a warning tone will tell the thief to back-off. If the shock sensor is triggered more than twice within 15 seconds, the alarm will be triggered. This effective alarm comes with comprehensive fitting instructions, fixing kit, remote transmitter and warning stickers. A spare remote transmitter (ZF48C) is also available.

Order Code	Type	Price each
ZF47B A1	Remote Vehicle Alarm	£29.99
ZF48C	Vehicle Alarm Xmitter	£9.99

Expandable Remote Vehicle Alarm with Battery Back-up

A top-of-the-range vehicle alarm system that incorporates all the features of CR36P including LED status indicator, built-in parking light flasher, plus an in-built engine ignition disable facility. The lead from the ignition switch to the ignition coil is cut and the two leads are connected to two wires on the alarm. When the alarm is armed, the ignition coil is disabled, the engine will turn, but will not start. An alkaline 9V PP3 back-up battery (not included) provides additional security. When armed, if the main power, or earth, connection to the alarm, is broken then the alarm will be triggered. A key operated switch is provided on the back of the alarm that will bypass all the alarm functions when operated, this is convenient when the vehicle is being serviced or valeted. The alarm requires only five leads to be connected to be operational. To provide comprehensive protection to your vehicle, an output is also provided for connection to the remote switch module AM26D. The range of optional extras that can be used with this alarm provides a very comprehensive and sophisticated vehicle alarm system. Complete with comprehensive fitting instructions, fixing kit, remote transmitter and warning stickers. A spare transmitter (CR43W) is also available.

Order Code	Type	Price each
CR37S C2	Car Alarm With Batt	£64.99
AM26D	Relay Module	£5.99

Vixen 152 Portable Car Alarm with Remote Control

A simple but effective car alarm which does not require permanent installation. Suitable for any car, van, truck, etc. and can be swapped between two or more vehicles. The main unit takes its power mainly from a standard cigarette lighter socket via a coiled lead, but also contains its own back-up battery which will power the built-in alarm siren if it is disconnected. A green LED indicates the state of the back-up battery, while a red LED shows that the main supply is present, and doubles as an armed state indicator. It is armed and disarmed by a remote keyring transmitter, using a UHF radio link instead of the infra-red method. The transmitted code is unique, and a processor in the main unit interprets the code upon arming, and then expects to receive the same code for disarming. In this way another keyring transmitter, even of the same type, cannot disarm the alarm. It is mounted internally somewhere near the dashboard either on velcro or clipped onto a dedicated mounting bracket (supplied). The alarm is triggered by physical shock to the vehicle, or by detecting a voltage drop in the vehicle's electrical supply. The latter can be configured to delay current sensing for 3 minutes after arming, necessary if the vehicle has an electric cooling fan which does not switch off immediately when the ignition is switched off and the key removed.

The keyring transmitter has two buttons, the first of which is the arm/disarm button, and two alarm modes are possible. If the button is pressed once, the alarm will be armed in 'normal' mode, that is, after a 3 second 'settling' period the alarm will sound for 30 seconds and reset if disturbed by a physical shock or voltage change. If the button is pressed twice (within 3 seconds) during arming, the alarm adopts 'warning' mode where, if triggered, a warbling sound is generated as a pre-warning to intruders. If disturbance continues or is repeated more than 3 times over the next 20 seconds then the proper siren will be activated. In addition a 'panic' function is included where the siren is sounded regardless simply by holding down button #1 on the keyring for more than 3 seconds. The siren will beep once when armed. When disarmed the alarm will indicate whether it was triggered in your absence by beeping 4 times, if not, it only beeps twice. The unit also has a 5W white light built into the body which will be illuminated when disarmed. This can be useful as a secondary courtesy light prior to opening the car door. Button #2 on the keyring transmitter is used to control this light independently and can therefore provide a light for use at any time for map reading, etc. The sensitivity of the shock sensor is adjustable using the supplied trimmer tool. Also supplied are wire and snap-lock automotive cable connectors for re-wiring the cigarette lighter socket to a permanent 12V source if it is not already so connected. The lighter plug of the main alarm unit also incorporates a fuse. Two keys are also provided for the on/off keyswitch on the main unit,

EXPANDABLE REMOTE VEHICLE ALARM

An expandable version of the basic model that features two pin switches to provide protection for the boot and bonnet. An LED status indicator is included that, when mounted on the dash provides a very visible indication that the alarm is active. Additionally, the alarm has a high-current pulsed output that is used to 'flash' sidelights, indicator lights or dipped beam headlamps, in fact any lighting load up to 10A. The alarm has a grounded trigger input that can be used with an ultrasonic detector or the very sensitive motion detector. Additionally, an output is provided to operate the remote door lock interface. When used in conjunction with central door locking this facility allows all the doors to be locked and unlocked when the alarm is armed and disarmed. Power door lock motors are available to incorporate this feature into vehicles without central locking. Finally, to provide comprehensive protection to your vehicle, an output is provided for connection to the Maplin remote power switch module (AM26D). This unit is used to disable the starter when the system is armed, thus making it virtually impossible to start the vehicle. The contacts are rated at 10A, and connection to the remote power switch is via on-board screw terminals.

GREAT VALUE!
£54.99 CR36P
[B1]

The alarm remote control features two buttons – the upper button is used to arm/disarm the system, activate the 'warn away' facility and for personal attack. The second button is used to deactivate the built-in shock sensor circuit. This high quality vehicle alarm system comes with a comprehensive instruction manual, fixing kit, remote transmitter and warning labels.

CR43W Spare Transmitter £9.99, AM26D Relay Module £5.99

and a 12V battery in the keyring transmitter. Main unit requires alkaline PP3 battery (not supplied) and is available separately (Order Code JY49D). Please note: The car alarm will only work with cars that have functional cigarette lighters when the ignition is switched off. To check if the alarm is suitable, push the cigarette lighter in with the ignition switched off, if it does not get hot then the alarm is not suitable for your car.

Order Code	Type	Price each
CJ77J B	Portable Car Alarm	£39.99

Vixen Vehicle Alarm Accessories

This range of accessories (except the remote receiver) are designed to operate with the expandable vehicle alarms and cannot be used with ZF47B.

Compact Ultrasonic Detector

A compact one-piece unit that will detect the breaking or removal of glass, and will sense intrusion or movement within the vehicle. The unit incorporates adjustable sensitivity and an LED that is used for

testing the unit. The small size makes it ideal for siting the unit on a parcel shelf or dash providing a very visible deterrent. The detector is easy to install requiring just three leads to be connected, one to a positive (+) 12V DC, one to earth and one to the alarm system. Supplied with 1m of 3-core cable. Size 85 x 60 x 30mm.

Order Code	Type	Price each
CR38R	Comb U/sonic Detect	£21.99

Very Sensitive Motion Detector

A very sensitive, adjustable, motion detector that will detect anyone trying to force a door, a bonnet or boot, or attempt to raise the vehicle, in order to illegally remove the wheels or tow the vehicle away. Complete with 1ft of three core lead. Size 154 x 26 x 25mm.

Order Code	Type	Price each
CR4CT	Motion Detector	£4.99

Technical assistance and advice concerning products in the 'Security' section can be obtained by calling one of our helpline staff on (01702) 552911

Ultrasonic Detector with Separate Sensors

An ultrasonic detector with detached sensors attached to the control box by leads 2.5m long. The small control box can be fixed in any convenient position such as under the dash or in the boot. The two sensors can be mounted at suitable positions inside the vehicle. The control box is fitted with a test LED and adjustable sensitivity, and requires three leads (5m long) to be connected; two to the battery supply and one to the alarm system.

Order Code	Type	Price each
CR39N	U/Sonic Det and Sens	£26.99

Remote Door Lock Interface

This device is intended to interface the alarm system with a vehicle's central door locking system. When the alarm is armed the doors will automatically be locked and unlocked when the alarm is disarmed. The door lock pulse time can be increased from 0.6 to 3.6 seconds, for cars that require a longer pulse time. It is important to ascertain the type of door locking mechanism fitted to your vehicle e.g., plungers, vacuum, relay etc., so that the module can be installed correctly. Some vehicles may require extra external relays to suit the vehicle's requirements.

Order Code	Type	Price each
CR41U	Remote Door Lock Int	£15.99

Door Lock Motor Kit

A kit to convert a car that does not have central locking, into power locking, so that the doors can be locked automatically when the alarm is armed. A kit will be required for each door, and each kit includes a motor, mounting bracket, screws, connector rod, 2.5m of connecting cable and a rubber tube to protect the cable as it passes from the door into the body of the car. Requires the remote door lock interface CR41U. Supplied with full fitting instructions.

Order Code	Type	Price each
CR42V	Door Lock Motor	£11.99

Push Switch with Cover

A push-to-open switch with weatherproof cover for use in motor vehicles. Suitable for use with alarm systems as a door, boot, bonnet sensing switch, or simply as a courtesy light switch operated by a door or the boot lid. The switch is provided with a standard 1/4 in. blade terminal for accepting push-on receptacles, such as HF10L, and notches in the push rod as a guide for cutting to fit any installation. Maximum throw is 6mm

Order Code	Type	Price each
AY07H	Pin Sw With Cover	£1.20

Passive Starter Interrupt System

A simple to install passive starter interrupt that provides additional protection for your car. When the unit is activated, the LED status indicator flashes when the ignition is turned off. To start the car the driver must briefly activate a designated switch to disarm the unit - the driver will have 15 seconds to start the car. The process can be repeated if the car does not start within 15 seconds. A valet switch is included to override the unit for servicing.

Order Code	Type	Price each
AG89W	Interrupt Starter	£14.99

Remote Receiver

This receiver can be used to control an electric garage door opening system, exterior house lights etc., by pressing the button on your remote transmitter, as

supplied with the CR36P and CR37S alarm systems only. Alternatively, a second transmitter can be purchased if preferred (CR43W). The receiver can switch up to 10A, and can be programmed to provide a momentary pulsed output, a latching output, a 60 second timed output or a 3 minute timed output. The receiver has a range up to 150ft and requires a 12V DC power supply. Fitted with 1.5m of connecting cable. Size 100 x 72 x 33mm. Please note that the remote receiver is NOT supplied with a transmitter. Maximum switching voltage is 50V. A suitable rated slave relay will have to be used if mains operated

Order Code	Type	Price each
CR44X	Remote Receiver	£22.99
CR43W	Spare Transmitter	£9.99

MODULAR CAR ALARM SYSTEM

A very comprehensive range of sophisticated car alarm systems and accessories which offer a great deal of protection to any vehicle. The need to fit a good alarm system is becoming ever-increasingly apparent as every hour, day and night, 300 cars are affected in some way by the attention of criminals, and the problem is worsening. There are four alarms in the range, which may be connected to a range of sensors. N.B. when the vehicle is sent in for servicing or repair, the agent must be informed of the existence and correct operation of the alarm system.

IMPORTANT NOTE: THESE ALARM SYSTEMS CAN BE FITTED TO NEGATIVE EARTHED VEHICLES ONLY. If in doubt, please consult your vehicle handbook or local dealer.

There are four models of alarm in this range. All feature the following:

1. Uniquely coded remote control for instant arming/disarming of the system from the vicinity of the protected vehicle. This remote control is of very compact size (overall dimensions: 50mm x 34mm x 14mm) and doubles as a keyfob. It is powered by a 12V VR22Y type battery. When installed, headlamps or indicator lamps (depending on alarm model) will flash and the alarm will sound momentarily to confirm arming/disarming.
2. The alarms have minimal current consumption and can be left fully armed for extended periods.
3. Current sensing. If, for example, a door is opened and the courtesy lamps (which need to be rated at 10W minimum) come on, then the resultant voltage drop is detected and this triggers the alarm. The system has provision to ensure that the engine cooling fan (where fitted) does not trigger the alarm.
4. Powerful 120dB siren (not MS605) to attract attention to the vehicle and the criminal. The alarm system can also be connected up to the headlights or indicators (not MS605) to provide visual indication that the alarm has been triggered, and to indicate which car in the street has been violated.
5. Each alarm is controlled by a powerful dedicated microprocessor, to ensure consistent and reliable operation.
6. Automatic switch-off after operating for a pre-determined period (the length of this period is dependent on the alarm model) in order to conserve battery power and avoid causing excessive disturbance to the community. They also re-arm themselves ready to detect further interference.
7. In an emergency, the alarm can be triggered from outside your car to attract attention or help.
8. Supplied with cable harness (approx. 2.5m in length), all fuses and a rubber cover which clips over the rear of the alarm to provide weather resistance to the connections.
9. Stickers supplied with the unit, which can be fixed in prominent positions to indicate the fact that a sophisticated alarm has been fitted to the vehicle.

HOT TIP

Do not forget to have your car windows security etched, and if you have not got one already, fit a locking petrol cap as well.

MS605 'Quick-Fit' 2-Wire Remote Control Car Alarm

Moss

A 'quick-fit' vehicle alarm system that only needs two holes drilled and two wires connected to install in your car. The alarm is fitted with a distinctive multiple sound pattern siren, to allow you to easily identify your own alarm, if activated. Added protection is provided by adjustable shock sensing that detects shock or vibrations to the vehicle and triggers the alarm. An ultrasonic sensor may be added to the system to provide extra protection if a door is opened or a window is broken. Supplied with comprehensive instruction/installation manual.

Order Code	Type	Price each
BA65V B1	Car Alarm MS605	£59.99

MS706 Remote Control Car Alarm with Ultrasonic Interior Detection

Moss

A comprehensive alarm system which, in addition to features 1 to 9 above, includes an ultrasonic interior sensor module which detects the presence of anybody in the car and also whether windows have been

broken. This ultrasonic detector unit also features a bright red LED to tell the outside world that the alarm is armed. There is also an orange LED on this unit which glows when an intrusion is sensed. There are also inputs for switch sensors, they enable the boot, bonnet and doors to be linked into the alarm system. These switches are available in packs of 2 (Order Code KU17T). In addition an interface is available (MS718) which connects this unit to the vehicle's central locking system (where fitted) so that it may be locked or unlocked when the system is armed or disarmed by remote control. The alarm takes the form of a 120dB piezoelectric siren accompanied by the indicator lights flashing. Supplied with instruction and installation manuals, wiring harness and sleeve, ultrasonic sensor unit, all mounting hardware, two window warning stickers and two remote controls.

Order Code	Type	Price each
GL04E B2	Car Alarm MS706	£99.99

MS725 Remote Control Car Alarm with Engine Immobilisation

Moss

A versatile microprocessor-controlled vehicle alarm that has in addition to 1 to 9 above, many other features including engine immobilisation (when the alarm has been triggered) and accessory protection. If any attempt is made to remove mobile phones, radio/audio equipment and fog/spot lights then the alarm will be triggered. There are inputs for ultrasonic interior sensors (MS702, 3 and 4) and switch sensors, two provided (additional pairs are available, MS711). If you should forget to arm the alarm, then automatic last door arming arms the alarm after everyone has left the car. There is provision for a MS718 central locking interface to be connected, which will enable cars with central locking to be remotely locked and unlocked when the system is armed or disarmed. MS717

interface allows control of electric windows if fitted. To help with installation, a free video is included as well as self-diagnostic checking. During installation, the alarm will automatically locate and identify any faulty sensors. Supplied with comprehensive instruction and installation manuals.

MS707 Programmable Remote Control Alarm

Moss

A very sophisticated top-of-the-range user-programmable car alarm system controlled by a built-in microprocessor with a battery-backed memory. It incorporates all the features listed as 1 to 9 on previous page, but includes many refinements and conveniences. An ultrasonic intruder alarm is supplied for fitting into the passenger compartment, and this item features a bright red flashing LED to indicate to passers by that an armed alarm is fitted. A green LED is also fitted, which glows when the system is detecting an intrusion. Additional sensors can be fitted including pin switches (MS711 type), of which two are supplied (There is no limit to the number of these that can be fitted). Actuators which can be connected are vehicle central locking systems via the MS718 interface, and electric window motors which are connected up using the MS717 window lift interface. Thus the vehicle can be unlocked or locked, and the windows closed, by remote control whenever the system is armed or disarmed. A useful feature is the personal security alarm which may be triggered from the remote control in an emergency. The built-in microprocessor provides several important features and user-programmable attributes. These include:

1. Self-diagnostic system, operated whenever the system is powered up. This will check each sensor in turn to see if any are damaged or triggered, and will indicate the offending item by means of a red LED mounted on the ultrasonic sensor.
2. Manual sensor bypass. This allows the user to turn on or off any sensor as required.
3. Automatic sensor bypass. This allows faulty or triggered sensors to be bypassed. Before this can be done, the user is alerted to the problem by the automatic diagnostic system. Another feature is that the user can program the alarm to ignore a particular sensor after a set number of triggers, this number being user-definable between 1 and 15.
4. Triggered sensor indication. When the alarm has sounded, the red and green LEDs on the ultrasonic sensor flash in unison to inform the user as to which sensor(s) triggered the alarm.

Other features provided by this alarm system include a circuit to protect any accessories installed in the vehicle (radio and stereo equipment, mobile phone and additional lights where fitted), and an engine immobilisation facility which disengages the starter solenoid when the alarm has been triggered. There is also a 'last-door arming' innovation which automatically arms the alarm as soon as the ignition has been turned off and the driver's door has been opened/closed. This sophisticated alarm system is provided with a VHS videocassette (which shows step-by-step installation, programming and use of the alarm), instruction and installation manuals, wiring harness and rubber sleeve, ultrasonic sensor unit, programming button, full mounting hardware, two switch sensors and two remote control units.

Order Code	Type	Price each
GL05F B3	Car Alarm MS707	£149.99

MS711 Switch Sensors

Moss

These are spring-loaded 'pin' switches normally fitted so that when the boot, bonnet or doors are opened, there is no weight acting against the spring which forces the switch contacts together, triggering the alarm. In such applications, they have a 'normally open' action. They require a 12mm and a 2.5mm hole to be drilled in the chassis metalwork, and please note, with these alarm systems the metalwork (ground) is connected to one pole of any pin switch fitted. Therefore, if the switch is mounted on plastic or fibre-glass a wire will be required from this pole to ground (the 'negative' side of the battery). Supplied with full mounting instructions, hardware and two spade connectors. Available only in packs of two.

Order Code	Type	Price each
KU17T	Switch MS711	£4.25

Ultrasonic Sensors

Moss

A range of ultrasonic sensor units for the MS605 and MS725 alarms. Each unit features two ultrasonic transducers. One transmits a constant stream of harmless ultrasonic sound waves that are reflected off every interior surface of the vehicle in which it is installed, forming a unique 'pattern'. The other transducer receives the reflected ultrasound and if the pattern is disturbed by, for example, windows being broken or doors being opened, then the alarm will be triggered. Each unit has a sensitivity control to compensate for various car sizes and fitting locations. There are three ultrasonic sensors in the range: MS702. This model has both transmitting and receiving transducers in the same compact unit, which are set at angles to each other. As a result, there is only one component to fit and this simplifies installation, which would normally be on the dashboard or parcel shelf. A scanning red LED array is fitted which indicates that the alarm is set, and thus provides a highly visible deterrent to thieves. This can be turned off when not required in order to conserve power. Full fitting/set-up instructions, all leads and mounting hardware are supplied.

MS703. An ultrasonic sensor unit very similar to MS702 above, except that the alarm status is indicated by a single red LED only. Supplied with mounting

hardware, all connecting leads and full instructions. MS704. A very compact ultrasonic sensor system which can be installed almost anywhere in the vehicle. It consists of separate 'micro' transmitter and receiver units which are designed to be as unobtrusive as possible. Each unit can be mounted in the dashboard, or anywhere with sufficient depth. Alternatively, the outer casing and flange can be removed from each unit which allows them to be fitted into almost any small space. These are connected by screened cable to a control module which contains all the electronics and interfaces to the main alarm system, and this unit can be hidden out of the way. A small LED is fitted to the ultrasound transmitter to indicate when the system is armed. The system is supplied with a comprehensive manual, mounting hardware and all connecting leads.

Actuator Interfaces for MS Series Car Alarms

It must be stressed that the following units allow electric window and central locking systems where fitted to be integrated into the alarm system. They will not provide such features to cars not already equipped with them!

MS718 Central Door Locking Interface

Moss

This unit will enable a MS706, MS707 or MS725 alarm system to lock or unlock the doors of the vehicle when the system is armed or disarmed by remote control. It connects directly to the existing central door locking motor or compressor. A manual and video are supplied which gives full instructions for installation and use. All connecting leads are included.

Order Code	Type	Price each
ZC30H	Door Lock Interface	£21.99

MS717 Electric Window Lift Interface

Moss

This unit has been designed for use with the MS707 and MS725 alarm systems. When fitted to a vehicle with electric windows, the alarm system can close them when the system is armed by remote control. It connects directly to the window motor, the operation time is adjustable. The unit is supplied with a comprehensive owner's manual, and all the required cables. Each unit will operate two windows, and is very straightforward to install.

RADIOS

Miniature FM Radio

This miniature, auto-tuning, FM radio receiver is a product of state of the art miniaturisation and produces a quality of reception that is normally only expected from radios many times its size. This little radio is provided with an 'on/off' switch, a 'seek' button and a 'reset' button and a pair of earphones, attached to 800mm of cord, that also doubles as the aerial. The 'seek' and 'reset' buttons are used for tuning. To

operate, the 'reset' button is pressed once. This sets the frequency at the low-end of the tuning range (i.e. 88MHz). Then the 'seek' button is pressed once for each station that is automatically tuned in to, until the desired station is found. If you have a favourite station, then tuning in is not required every time the radio is switched on, as the last station selected is always remembered when the power is switched off.

Frequency range: 88MHz to 108MHz (FM)
Power source: 1 x 3V lithium button cell
Type CR2032 or equivalent (supplied)

Dimensions: 36 x 26 x 10mm
Weight: 23g

Order Code	Type	Price each
CJ05F	Mini FM Radio	£14.99

Multiband Stereo Radio with Frequency Synthesis Tuning

A stylish, compact, feature-laden and very sensitive radio receiver that offers superb value for money. In addition to long, medium and VHF bands, this unit offers coverage of 12 short wave bands which cover 2.3MHz to 26.1MHz as well as continuous operation from 150kHz to 29.999MHz. The frequency in use is displayed on a large, clear LCD display which also functions as a 24 hour clock. This display has a back-light facility so that the display can be read clearly under poor lighting conditions. There is a built-in beat frequency oscillator (BFO) which enables AM single-sideband (SSB) and continuous-wave (CW) transmissions to be recovered, and an AM bandwidth selector which achieves a compromise between audio bandwidth and selectivity when this type of demodulation is being used. There is also a 5-LED signal strength meter, an RF gain control and although a telescopic aerial is fitted there is a socket for an external aerial.

Specification	
Receiver type:	Dual conversion superheterodyne
Frequency	VHF/FM: 87.5MHz to 108MHz
Coverage:	LW/AM: 150kHz to 281kHz
	MW/AM: 520kHz to 1620kHz, Continuous coverage(AM): 150kHz to 29999kHz
SW/AM:	Subdivided into 12 bands.
120m Band:	2300kHz to 2500kHz
90m Band:	3200kHz to 3400kHz
75m Band:	3900kHz to 4000kHz
60m Band:	4750kHz to 5060kHz
49m Band:	5800kHz to 6200kHz
41m Band:	7100kHz to 7500kHz
31m Band:	9500kHz to 9900kHz

25m Band:	11650kHz to 12050kHz
19m Band:	15100kHz to 15600kHz
16m Band:	17550kHz to 17900kHz
13m Band:	21450kHz to 21850kHz
11m Band:	5600kHz to 26100kHz

Power supply: Six 1.5V 'D' cells (alkaline recommended) for radio (or 9V at 400mA min. connected to DC IN jack via 2.5mm power plug, the positive pole being connected to the barrel of the plug).

Two 1.5V 'AA' cells (alkaline recommended) for clock.
IF frequencies: 1st AM IF: 55845kHz
2nd AM IF: 450kHz FM: 10.7MHz
AM: 50dB FM: 60dB

IF suppression:
AM suppression (on FM): 30dB

Stereo channel separation: 25dB
Tone control: Bass: ±8dB at 100Hz
Treble: ±8dB at 10kHz

Output power: 1.2W (DIN) at 10% distortion
Antenna: Ferrite rod for LW/MW (150kHz to 1620kHz) Telescopic rod for SW (1620kHz to 29999kHz) and VHF (87.5MHz to 108MHz).

Connectors for: 9V DC 2.5mm barrel plug (centre at 0V)
Stereo earphones(3.5mm jack)
5-pin DIN (for amplifier/tape recorder) Output 1mV at 1kΩ
Antenna socket (Phono connector) for SW/VHF

Overall Dimensions: 160mm (H) x 315mm (W) x 70mm (D)

Supplied with instruction book, directory of broadcast stations, shoulder strap and 75Ω coax. to phono plug adaptor. Batteries are not supplied.

HEADPHONES

Replacement Foam Earpads

A selection of various shaped foam earpads. Can be used as replacements for the original pads on lightweight personal stereo headphones, which invariably perish with old age. All sold in pairs.

Miniature Range

Five different sizes of foam pads, all in black.

In the table below, 'round' and 'square' refer to the shape of the outer edge, either half-round or flat sided. All are circular

except 'oval' type, which is genuinely oval in shape with half-round edge. Dimensions stated are internal diameter x internal depth x width of overlapping edge at rear, approximately.

Type	Inner dimensions dia. x depth x edge	
Large round:	50 x 5 x 7	JZ34M
Medium round:	43 x 6 x 10	JZ35Q
Medium oval:	46/40 x 5 x 15	ZB97F
Small round:	30 x 7 x 9	ZB98G
Small square:	30 x 7 x 9	JZ36P

Order Code	Type	Price each
JZ34M	Lrg R Earpad	80p
JZ35Q	Med R Earpad	75p
ZB97F	Med O Earpad	75p
ZB98G	Sml R Earpad	65p
JZ36P	Sml S Earpad	65p

Inner-ear Range

Very small foam earpads for inner-ear type headphones. Size is 15 x 4mm (internal) with 5mm wide rear overlap. Three different colours available: black, red and yellow. Sold in pairs.

Order Code	Type	Price each
JZ30H	Earpad Black	49p
JZ32K	Earpad Red	49p
JZ33L	Earpad Yellow	49p

Stereo Headphone with Boom Microphone

A stereo dynamic headphone with adjustable headband and a dynamic microphone on an adjustable boom. The membrane type driver diaphragms are mounted in back vented plastic shells with foam padded ear pieces. The phones have 2.5 metres of cable terminated in a standard 1/4 in. stereo jack plug with strain relief sleeve. The microphone can be detached if required, and is fitted with 2.5 metres of cable terminated in a mono 1/4 in. jack plug with strain relief.

Headphones
Impedance: 32Ω
Sensitivity: 95dB/mW
Frequency response: 20Hz to 20kHz
Nominal input: 1mW
Max input: 100mW

Microphone
Impedance: 500Ω
Sensitivity: -82dB (56mV)
Frequency response: 200Hz to 5kHz

Order Code	Type	Price each
YJ85G A	Stereo Mic Hdphone	£28.99

Stereo Headphone with Microphone

A stereo headphone with an adjustable leather effect headband, and a 19mm diameter dynamic microphone on a bendable PVC sleeved boom. The boom is mounted on a swivel base on the left-hand ear pad shell. The 40mm diameter mylar speakers are mounted in black plastic shells with leather effect foam filled ear pads. The phones have 2.2m of flat cable terminated in a 3.5mm stereo jack plug for the ear phones, and a 3.5mm mono plug for the microphone. The microphone is a low impedance dynamic type as opposed to an electret type, so no energising battery is required. However, a suitable low impedance microphone preamplifier will be required.

Headphones
Impedance: 32Ω ±15%
Rated power input: 30mW
Maximum power input: 100mW
Frequency response: 40Hz to 12kHz
Right/left balance: <3dB
Total harmonic distortion: <3%

Sound pressure level: 92dB ±4dB (@ 1mW CNS)

Microphone
Impedance: 200Ω
General
Weight: 100g (without cable)

CJ10L A	Stereo Headset + Mic	£18.49

Stereo Earphones

NEW!

A low cost stereo earphone that is suitable for all portable personal stereos, and attractively finished in black. There is no headband and the small transducers sit comfortably in the ear. The compact design offers very good sound quality, particularly in the bass region, and the earphone is supplied in a tough plastic case, making them ideal for travelling. The 1.1m lead is terminated in a gold-plated 3.5mm jack plug.

Specification
Impedance: 22Ω to 32Ω
Frequency range: 20Hz to 20kHz
Maximum power input: 60mW
Sensitivity: 96dB spl at 1kHz

Order Code	Type	Price each
DK95D	Stereo Headphones	£4.99

Earphones

A light-weight pair of personal stereo earphones that sit comfortably in the ear and have an adjustable headband. The 1.2m long lead is terminated in a 3.5mm right-angle stereo jack plug. Suitable for use with all types of personal radios, cassette players, etc.

Specification
Type: Dynamic
Impedance: 32Ω ±5%
Sensitivity: 98dB S.P.L. at 1kHz
Frequency response: 20Hz to 20kHz

Lightweight Stereo Earphones

NEW

An extremely lightweight stereo dynamic earphones with adjustable headband and suitable for use with digital audio sources. The earphones are very comfortable and offer good quality at a reasonable price. The 1.2m lead is terminated in a 3.5mm jack plug. Supplied with black earpads.

Specification

Impedance: 32Ω
 Frequency range: 20Hz to 20kHz
 Sensitivity: 98dB spl at 1kHz

Order Code	Type	Price each
RJ97F	L/Weight Earphones	£5.99

CD Compatible Bass Earphones

A set of high-quality stereo inner earphones with bass emphasis ideally suited for listening to CD players. These lightweight sensitive units come with 1m of lead terminated in a right-angle 3.5mm jack plug.

Specification

Type: Dynamic
 Driver units: 15mm dia. dome
 Impedance: 32Ω
 Sensitivity: 100dB at 1kHz
 Power handling capacity: 10mW
 Maximum input power: 40mW
 Frequency response: 20Hz to 20kHz

Order Code	Type	Price each
CJ12N	Bass Earphones	£4.99

Universal Mini Headphones

A light-weight pair of personal stereo type miniature headphones with washable round black foam earpieces and adjustable headband. The 1 metre long lead is terminated in a 3.5mm stereo jack plug. Suitable for use with all types of personal cassette players and radios etc.

Impedance: 32Ω ±15%
 Drive units: 27mm mylar diaphragm
 Input power: 50mW max

Order Code	Type	Price each
ZB91Y	Mini Phones	£4.49

EARPHONES WITH COBALT SPEAKERS

A high quality stereo earphone with samarium cobalt speakers for superb sound quality and suitable for all portable personal stereos, CD players and digital sound. The compact design offers a wide frequency response and high sensitivity. Finished in black and supplied in a tough plastic case for protection when not in use. The 1.3m lead is terminated in a gold-plated 3.5mm jack plug.

Specification

Impedance: 22Ω to 32Ω
 Frequency range: 15Hz to 20kHz
 Maximum power input: 60mW
 Sensitivity: 103dB spl at 1kHz

GREAT VALUE!
£6.99
 RZ93B

NEW

Educational Headphones

A low cost durable mono headphone suitable for general purpose use, especially suited to an educational environment. The padded ear pieces are adjustable and the headband is in black plastic. Supplied with 1m approx. of coiled cable terminated in a 1/4 in. mono jack plug.

Impedance: 600Ω
 Frequency range: 30Hz to 18kHz
 Sensitivity: 105dB/mW

Order Code	Type	Price each
CP51F	Educate Phones	£4.99

Low Cost Stereo Headphones

A stereo dynamic headphone with adjustable headband suitable for general purpose use. The headphones can be switched to mono, and the long coiled lead is terminated with a 3.5mm stereo jack plug. An adaptor to connect to a 1/4 in socket is included. These low cost headphones are very sensitive and have a wide frequency response.

Specification

Sensitivity: 105dB S.P.L. @ 1kHz
 Frequency response: 20Hz to 18kHz
 Impedance: 32Ω ±5%

Lightweight Stereo Headphones

NEW!

A lightweight stereo headphone with adjustable headband and suitable for use with digital audio sources. The headphones are very comfortable and offer good quality at a reasonable price. The 1.2m lead is terminated in a 3.5mm jack plug and a converter plug is included for 1/4 in jack sockets.

Specification

Impedance: 22Ω to 32Ω
 Frequency range: 20Hz to 18kHz
 Maximum input power: 100mW
 Sensitivity: 101dB spl at 1kHz

Order Code	Type	Price each
RJ96E	L/Weight Headphones	£4.99

CD Compatible Headphones

A pair of high quality headphones intended for listening to compact disc and digital music material. The drivers feature high energy magnets and diaphragms designed to bring out the best in the dynamic range and superior signal to noise ratio of compact disc. Maintains sensitivity and stability at low volume levels. It has adjustable padded steel headband and leather earpads, and a 2.7m long extra flexible lead terminated in a 3.5mm stereo jack plug. 1/4 in. jack adaptor included. Colour black.

Specification

Driver type: Dynamic
 Impedance: 32Ω ±1.6Ω
 Max. input power: 200mW
 Frequency response: 16Hz to 22kHz
 Weight: 190g

Order Code	Type	Price each
ZB92A	B1 CD Phones	£13.99

Leather-Effect CD Compatible Headphones

A high quality pair of headphones featuring gimbal mounted leather-effect, detachable, earpads. The drivers are equipped with rare-earth magnets for high sensitivity and wide frequency range, making them ideally suited for use with CDs and other digital equipment. The 3m of connecting lead is terminated in a 3.5mm jack plug.

Specification

Magnet: Neodymium (NdFeB)
 Impedance: 32Ω
 Frequency range: 20Hz to 20kHz
 Maximum power input: 100mW
 Sensitivity: 108dB/mW

Order Code	Type	Price each
CJ04E	B Headphones	£21.99

Digital Headphones

Designed for listening to digital source material, these quality stereo headphones feature super thin diaphragm drive units for the very best in sound quality. Lightweight and comfortable to wear, the gimbal mounted earpads fit snugly against the ear and provide excellent external sound isolation. The adjustable black padded headband ensures that the headphones are still comfortable after long continuous use. The 3m lead is terminated in a 3.5mm gold-plated plug and a 1/4 in. to 3.5mm adaptor is included.

Specification

Sensitivity: 102dB/mW @ 1kHz
 Frequency response: 20Hz to 20kHz
 Impedance: 32Ω
 Cord length: 3m approx.

Order Code	Type	Price each
BZ25C	B1 Digital Headphones	£15.99

Slimline Headphones

A modern looking slimline headphone with an adjustable headband. Construction is of the semi-enclosed type and has high quality samarium cobalt magnets. The 2.1m long cable is terminated in a 3.5mm gold plated stereo jack plug. A 1/4 inch to 3.5mm adaptor is supplied.

Matching impedance: 4 to 40Ω
 Drive unit: 40mm
 Input power: 100mW
 Frequency response: 15Hz to 25kHz

KR73Q B1	Headphone MAC5	£42.99

MAC 7 Headphones

Koss

A high quality studio grade headphone featuring 'closed cushion' earpads, designed for maximum isolation and deep bass response. The adjustable headband has a padded matching light grey vinyl covering for extra comfort – a very attractive and distinctive quality headphone. Complete with a gold-plated 3.5mm jack and a matching standard jack adaptor.

Order Code	Type	Price each
KR75S C1	Headphone MAC7	£59.99

Professional Monitor Headphones

A high quality professional stereo headphone with an adjustable black padded headband. The fully enclosed double earpad construction provides good isolation from external sound sources and the gimbal support ensures that the headphones sit comfortably but firmly upon the listener's head. The double drive system uses a 30mm tweeter and 50mm woofer in each earpiece, with titanium plated diaphragms and samarium cobalt magnet for powerful low bass and superb high frequency response. The flat oxygen-free copper (OFC) cable enters separately on left and right sides and is terminated in a 3.5mm gold plated stereo jack plug. A 1/4 inch to 3.5mm adaptor is supplied. Cable length approximately 3m. A stand is provided for storing your headphones.

Impedance: 20Ω (1kHz)
Drive units: 30mm and 50mm
Input power: 300mW
Frequency response: 3Hz to 30kHz
Efficiency: 101dB/mW
Weight: (excl. cable): 270g

Order Code	Type	Price each
YU42V C1	Double Drvr headphones	£39.99

IN-CAR CROSSOVERS

In-Car 7-Band Parametric Equaliser Unit

A compact, audiophile grade, stereo line-level sound processor and 7-band graphic equaliser for in-car entertainment systems, for use between a conventional car stereo and/or CD player and following power amplifiers, or further signal processing units. All connections are made by phono sockets, separate stereo inputs for 'Line' (car stereo, etc.) and 'CD'. The input is selected by a push-push button to the right of the front panel.

Outputs are also at line level and must be amplified by following power amplifiers before driving loudspeakers. Although two sets of outputs are provided, one for 'Front' and the other for 'Rear'. It is not essential that you must use both, for 'ordinary' stereo the equaliser can still be used to full effect by using either one output pair. In this event the left-hand fader control on the front panel must be turned fully in the direction of the output chosen, either 'R' or 'F'.

Each input has its own level adjustment preset, are accessible on top of the unit's case and are not readily available in normal use. There are also seven slide switches in the top panel which can be used to select the centre frequency of each of the seven equaliser bands. Seven rotary front panel controls provide up to ±18dB of boost or cut to each of the seven bands. All rotary controls have a centre-click-stop action in the 'flat' position.

The unit is designed to be dashboard mounted as part of a conventionally fitting car stereo system, and as such the case follows a half-height variation of the standard DIN size, being 7in. wide and 1in. high. A metal 'U' bracket is also provided for under-dashboard mounting. Fixing is by two threaded holes in each side of the case; hardware is included. 'Open-ended' power, earth, and 'remote' on/off control wires are provided with the unit and the power lead has an integral in-line fuse.

Specification

Frequency band selection range,
F1: 35, 50, 65 or 80Hz
F2: 90, 125, 160 or 200Hz
F3: 230, 320, 400 or 500Hz
F4: 600, 800Hz, 1.0 or 1.2kHz
F5: 1.5, 2.0, 2.5 or 3.0kHz
F6: 3.7, 5.0, 6.2 or 7.5kHz
F7: 9.0, 12.0, 15.0 or 18.0kHz
Bandpass gain control range: ±18dB
Input impedance: 10kΩ, 'Line' or 'CD'
Frequency response: 20Hz to 20kHz
Signal to noise ratio: 70dB
Total harmonic distortion: 0.1%
Maximum output level: 5V r.m.s.
Dimensions of case: 177 x 130 x 25mm
Dimensions of front panel: 185 x 31mm

Order Code	Type	Price each
CJ11M	Parametric Equaliser	£62.99

FOR TOP QUALITY & VALUE!

Car Stereo High and Subwoofer Crossover Units

A pair of crossover units which will both accept either high or low level stereo inputs from a car stereo, where the high level originates from loudspeaker outputs, and low level originates from a line level signal for feeding power amplifiers, equalisers, etc. The low level inputs are via phono sockets, whereas the high level inputs are via a 300mm long, 4-way wiring loom terminated with a special plug which is keyed to prevent accidental reversal. Similarly, the power supply, earth and the 'remote' on/off switching control line are connected via a 300mm long, 3-way loom with connector. The main supply wire includes an in-line fuse. All loom wires are colour-coded and identified with labels.

The high-pass electronic crossover unit is intended to drive midrange and treble speakers via dedicated power amplifiers. Screwdriver operated input level adjustment presets are provided and a crossover point which can be switched to 60, 120 or 180Hz to feed drivers from the midrange upwards. In addition a 'frequency multiplier' function can be used to increase the selected basic crossover frequency by a factor of 30 or 50 times. Crossover slope can be chosen at 8 or 12dB/octave.

The subwoofer electronic crossover is very similar, also having left and right input level presets, a phase switch, and a crossover frequency point selectable at 50, 90 or 180Hz. In addition ± 12 dB of bass boost or cut can be added, operating at 45, 80 or 120Hz, with left and right presets.

In both cases stereo output to a following stereo power amplifier is via phono sockets. Each unit is contained in a steel case with 8mm wide mounting flanges at the sides for fixing to a panel or bulkhead or under the dashboard.

Specification

High pass unit

Crossover frequency,	
x1 multiplier:	60, 120 or 180Hz switchable
x30 multiplier:	1.8, 3.0 or 5.4kHz
x50 multiplier:	3.0, 6.0, 9kHz

MULTICHANNEL ELECTRONIC CROSSOVER

A superb car stereo active crossover that offers a wide range of functions. The compact unit offers two outputs for feeding two sets of subwoofers (normal and boost), a rear 3-way crossover, and a front 3-way crossover, with each section having an output level control (7 in total). All the connectors are gold plated, and are marked inputs for subwoofer, rear and front; outputs for front - low, mid, high; rear - low, mid, high; subwoofer - normal and boost. The subwoofer section has a normal low-pass, frequency selectable output with a 12dB or 18dB/octave slope, and the added facility of a switchable 0 or 180° phase change. With the boost output, all the controls are common to normal output with the addition of 45Hz or 80Hz boost switch and boost level control. A rear input on/off switch is provided.

The front and rear sections feature a comprehensive selection of crossover points to tailor the sound output for individual tastes and vehicles. The high frequency crossover features a 0 or 180° phase change switch. Additionally, the rear section has an input on/off switch. Screw terminals are provided for connection to the vehicle's 12V supply and include a remote on/off facility. There are no fuses in the unit, therefore it is essential that the unit is powered from a fused supply.

The unit is finished in a pleasing graphite grey colour with light grey legend.

Specification

Crossover range	
Subwoofer normal output:	60Hz, 80Hz, 120Hz, 180Hz
boost output:	as normal with 45Hz or 80Hz boost
Front and rear outputs low bandpass:	50Hz, 80Hz, 120Hz, flat - high pass 1.5kHz, 2.4kHz, 3.5kHz, flat - low pass
mid bandpass:	50Hz, 80Hz, 120Hz, flat - high pass 5kHz, 6.8kHz, 8kHz, flat - low pass
high:	2.4kHz, 3.5kHz, 5kHz, 7kHz with 0 or 180° phase change
Crossover slope rate subwoofer:	12dB or 18dB/octave (± 3 dB), selectable
rear/front:	12dB/octave (± 3 dB)
Input impedance:	10k Ω
Output impedance:	1k Ω
Output gain:	0dB
S/N ratio:	>98dB
THD:	0.01%
Power requirements:	12V DC, 0.5A max. negative ground
Size:	264 x 50 x 180mm
Weight:	1.23kg

Crossover slope:	8 or 12dB/octave switchable
Gain:	0dB
Signal to noise ratio:	100dB
Channel separation:	70dB
Overall dimensions:	98 x 130 x 23mm high including sockets

Subwoofer unit

Crossover frequency:	50, 90 or 180Hz switchable
Crossover slope:	12dB/octave
Maximum signal level:	2.5V r.m.s.
Total harmonic distortion:	0.05% maximum
Gain:	0dB
Bass boost:	± 12 dB adjustable
Bass boost operating point:	45, 80 or 120Hz switchable
Signal to noise ratio:	100dB
Channel separation:	70dB
Power supply range:	9 to 16V DC
Overall dimensions:	98 x 130 x 23mm high including sockets

Car Stereo 3-Way Active Electronic Crossovers

Two examples of a high quality active crossover which are as near as possible universal, and so can be set up to suit many differing, multi-way speaker systems. Both units are common in having essentially three bands forming a 3-way crossover deriving separate bass, midrange and treble channels. In addition the advanced version has preset controls for adding bass boost or cut by up to ± 12 dB to improve the response of the driver used, depending on where its resonant frequency lies. Level controls for conventional bass, midrange and treble outputs are also included on the advanced unit. Each complete unit is housed in a matt black steel case having 15mm wide fixing flanges at both ends, and hardware is supplied for screwing to a panel or bulkhead or under the dashboard. The basic unit measures 150 x 120 x 40mm, while the advanced unit is 170 x 130 x 40mm.

Please take note that both these units are not able to drive any speakers directly, but will need following power amplifier stages. To complete the full 3-way stereo system, three stereo pairs of power or booster amplifiers will be needed, or one quad or 4-way amplifier and one stereo amplifier. Two stereo pairs of phono sockets are provided for inputs ('front' and 'sub-woofer'), and three pairs of output phono sockets for the three bands. All sockets have gold-plated contacts for reliability.

Specification

	Basic unit (CJ06G)	Advanced unit (GK10L)
Power supply:	+12V DC @ 250mA max.	+12V DC @ 90 to 150mA
Gain, all channels:	0dB	0dB ± 2 dB
Maximum bass boost/cut:	N/A	12dB ± 2 dB @ 40Hz
Crossover roll-off, all:	12dB/octave	12dB/octave
Signal to noise ratio:	70dB	100dB
Total harmonic distortion:	0.03%	0.01%
Maximum input level:	>6V r.m.s.	6V r.m.s.
Crossover points:		
Bass:	50	80
Lower midrange:	80	120
Upper midrange:	2.4	3.5

IN-CAR HIGH-POWER BOOSTER AMPLIFIERS

200W Car Booster Amp and 10-Band Graphic Equaliser

Pro-Sound

A combined 10-band graphic equaliser and 4-way booster amplifier for car stereo systems in one compact unit measuring only $7 \frac{1}{2} \times 6 \frac{1}{2} \times 1 \frac{1}{2}$ inches. The equaliser has ten boost/cut sliders, each operating for both left and right channels simultaneously covering nine octaves in steps of 30Hz, 60Hz, 120Hz, 250Hz, 500Hz, 1k, 2k, 4k, 8k and 16kHz, over a range of emphasis or attenuation of + and -12dB. Each slider has click-stop centre and ± 4 dB positions. The equaliser includes interference suppression circuitry, and can be switched in or out of service as required. In addition there is a simple signal level bargraph display with a total of five divisions, to indicate signal magnitude leaving the volume control, and which has two green, one yellow and two red divisions. A 'scan' function is available which shows the signal level on the bargraph display. There is also a stereo enhancer facility which can be switched in or out. The complete unit is finished in satin black, controls and buttons are back illuminated with a green light, and the sliders have integral green LEDs. The equaliser will accept line level inputs and signals from the loudspeaker outputs of radios, radio cassettes, CD players etc.

Specification

Power requirements:	11 to 16V DC
Polarity:	Negative earth only
Max. current:	10A peak
Recommended replacement fuse:	5A quickblow
Frequency response:	30Hz to 30kHz
Total output power:	200W music power (70W r.m.s.)
Speaker impedance:	2 to 16 Ω
Equaliser tone control range:	± 12 dB
Centre frequencies:	30, 60, 125, 250, 500Hz, 1, 2, 4, 8, 16kHz
Signal to noise ratio:	>68dB
Amplifier supply voltage rejection ratio:	-57dB approx.
Dimensions:	178 x 160 x 42mm
Weight:	850g

Supplied with fitting hardware for location under a dashboard etc., and fitting and operating instructions.

Order Code	Type	Price each
GK83E	200W Amp + Eql	£89.99

IT'S A FACT!

AUDIO SPECTRUM FACTS

Octave	Frequency - Typical sounds and effects if range emphasised
1st	16Hz to 32Hz Large pipe organ and lower bass frequencies. But be careful, for if emphasised can result in excessive loud speaker cone movement.
2nd	32Hz to 64Hz Bass fundamentals, that is main bass frequencies of organ, double bass, tuba etc. If excessive will result in boominess and will highlight mains hum problems.
3rd	64Hz to 128Hz Gives 'warmth and body' to sound, although can produce 'muddiness'. This is also the 1st harmonic.
4th	128Hz to 256Hz Fundamentals of male voices, cello, viola, clarinet, horn and trumpet. Adds richness to sound but can produce a 'boxiness' cardboard quality.
5th	256Hz to 512Hz Fundamentals of female voices, oboe and flute. Emphasis can improve intelligibility but can produce 'roof of mouth' quality.
6th	512Hz to 1kHz The 'telephone region' giving most intelligibility to music and speech these are the most easiest frequencies to hear and produce. Emphasis of the 6th can produce a 'hollow, megaphone' quality.
7th	1kHz to 2kHz The easiest frequencies to hear and reproduce, but if excessive, can produce a 'tinny' quality. Excessive 6th and 7th causes listener fatigue.
8th	2kHz to 4kHz Adds 'brilliance and articulation' and 'presence' to instruments (3-6kHz) and voices (2.8kHz) and a moderate boost (+3dB) at 2.8kHz to 3.2kHz adds 'clarity' to choirs. Also, this is the main area of 'needle scratch' and emphasis here adds 'peaks' and gives a 'nasal' quality to the sound quality.
9th	4kHz to 8kHz Important overtones that give quality to musical instruments. Accurate 'sibilance' (harsh tones) if response here is correct. 'Peaks' here give rise to 'stridencies'.
10th	8kHz to 16kHz Overtones of reeds, brass, cymbals etc. that adds a lively, sparkling character and transients to sound. Peaks here will give a 'comb and paper' effect to some strings, but over emphasis gives a 'chromium plated' effect.
11th	16kHz to 32kHz Adds further overtones, but much of this area is out of the conventional human audio spectrum. Certain animals, such as dogs, can hear these frequencies and can be affected by them.

50W Car Booster Amplifier

Pro-Sound

NEW

A compact booster amplifier for in-car audio systems offering 25W maximum output per channel (50W total). This high definition amplifier will accept line level inputs, via gold plated phono sockets, or from the loudspeaker outputs from radio cassettes. A gain control is provided to match the amplifier to the source equipment. The amplifier features fully complimentary audio stages, an excellent signal-to-noise ratio thermal shut down and short circuit protection. Generally, the amplifier is mounted in the boot, but it can be mounted in other locations such as under a seat. It is advisable to keep all wiring to a minimum, where possible. Supplied with a detailed instruction book and fixing screws.

Specification

Maximum power output:	10W rms per channel into 4Ω
THD with 4Ω load:	0.06% at 10W
S/N ratio:	95%
Damping factor:	100
Channel separation:	60dB
Input sensitivity:	200mV to 1.2V
Input impedance:	20kΩ
Supply Voltage:	11.5V to 14.4V DC negative earth
Dimensions:	140 x 49 x 120mm

Please note: Colour of case may vary.

Order Code	Type	Price each
RZ99H A1	50W Car Booster Amp	£29.99

100W In-Car Booster Amplifier

Pro-Sound

NEW

A 4-channel high definition amplifier rated at 10W rms per channel. The unit is intended for use as the output power amplifier for in-car stereo systems, offering four stereo sound sources. Two pairs of stereo phono line level inputs are provided for connection to a main radio/cassette unit having compatible low-level outputs, and input sensitivity controls and a power on LED are included. The input sensitivity can be adjusted to accommodate input levels from 200mV to 1.2V. This unit must be mounted securely to the vehicle before it is used.

Specification, each channel

Mean power output:	10W rms into 4Ω
Total harmonic distortion:	0.05% nominal
Power bandwidth:	±0.7dB 20Hz to 20kHz (-3dB @ 60kHz)
Signal to noise ratio:	80dB nominal
Channel separation:	65dB nominal

Input sensitivity:	200mV to 1.2V, adjustable
Input impedance:	17kΩ
Quiescent current drain:	740mA
Full power current drain:	8.2A rms into 4Ω load, 11.5A peak

Please note: colour of case may vary

Order Code	Type	Price each
AQ24B A2	100W Car Booster Amp	£39.99

120W In-Car Booster Amplifier

Pro-Sound

NEW

A 4-channel stereo high-power amplifier with outputs of up to 15W rms per channel. The unit is intended for use as the output power amplifier for in-car stereo systems, offering four stereo sound sources. Two pairs of stereo phono line level inputs are provided for connection to a main radio/cassette unit having compatible low-level outputs, and input sensitivity controls are included. Screw terminals are mounted at both ends for supply and speaker wire connections, including a remote power on/off control line which can be connected to the automatic antenna drive output of the main stereo unit. Protection includes thermal shutdown and integral 20A fuse and a mode switch can select 2-channel stereo operation if required. Fixing screws supplied.

Specification, each channel

Mean power output:	15W rms into 4Ω, 25W rms into 4Ω
Total harmonic distortion:	0.05% nominal
Power bandwidth:	±0.7dB 20Hz to 20kHz (-3dB @ 60kHz)
Signal to noise ratio:	80dB nominal
Channel separation:	65dB nominal
Input sensitivity:	200mV to 2V, adjustable
Input impedance:	17kΩ
Quiescent current drain:	740mA
Full power current drain:	8.2A rms into 4Ω load, 11.5A peak

Please note: colour of case may vary.

Order Code	Type	Price each
AQ25C B3	120W Car Booster Amp	£49.99

IN-CAR MOSFET OUTPUT HIGH POWER BOOSTER AMPLIFIERS

Pro-Sound

A range of high efficiency booster power amplifier modules, any of which can be added to an existing car stereo sound system to drive high power loudspeakers. Each complete unit is housed in a very solid alloy case which doubles as the heatsink. Output powers are in the range of 45 to 140W, depending on the chosen module, and the higher supply voltage levels required for such outputs are derived from the conventional 12V system by an integral switched mode supply converter in each module. The converter includes shut-down protection against output short circuits or overheating, which switches the amplifiers off until the fault is removed.

Each amplifier module is intended to be remote from the main stereo system, and has a remote power on/off control line connection in addition to permanent +12V and earth supply connections. It is only necessary to connect the remote line to the automatic antenna drive output of the main radio/cassette player unit to ensure that the power amplifier is switched on and off.

For all modules, input/output connections consist of left/right phono socket inputs, and 4-way screw terminal connections for two pairs of speaker wires. Each amplifier also includes a 'boost sub woofer' switch, adding approximately 10dB to the output level at 40Hz; a power on indicator LED and a 'shutdown' state indicator LED. Input sensitivity is adjustable from 100mV to 1V for full output by a rotary control.

180W Bridgeable Booster Amplifier

NEW

A 45W rms per channel booster module which includes an integral fuse in series with the +12V supply line. The module can be used as a single channel bridged amplifier if both inputs are provided with a common signal and the speaker is connected between the '+L' and '+R' outputs.

Specification

Supply voltage range:	11.5V to 14.4V
Fuse rating:	20A
Maximum power output:	45W rms into 4Ω
Output power, bridged:	90W into 8Ω
Peak current output:	10A
Speaker/amplifier protection schemes:	Internal failure (DC), short circuit, overheating
Total harmonic distortion:	0.05% into 4Ω
Frequency response:	20Hz to 30kHz ±0dB
Signal to noise ratio:	100dB
Channel separation:	60dB
Sub woofer boost:	10dB @ 40Hz
Damping factor:	200
Input sensitivity:	100mV to 1V, variable
Input impedance:	20kΩ
Dimensions, inches:	8.2W x 2.1H x 8.5D

Please note: Colour of case may vary.

Stereo 300W per Channel Booster Amplifier

A 90W rms per channel booster module which includes an integral fuse in series with the +12V supply line. The module can be used as a single channel bridged amplifier if both inputs are provided with a common signal and the speaker is connected between the '+L' and '+R' outputs.

Specification

Supply voltage range: 11.5V to 14.4V
 Fuse rating: 40A
 Maximum power output: 90W rms per channel max., into 4Ω
 Output power, bridged: 180W rms into 8Ω
 Peak current output: 20A
 Speaker/amplifier protection schemes: Internal failure (DC), short circuit, overheating
 Total harmonic distortion: 0.05% into 4Ω
 Frequency response: 20Hz to 30kHz ±0dB
 Signal to noise ratio: 100dB
 Channel separation: 60dB
 Sub woofer boost: 10dB @ 40Hz
 Damping factor: 400
 Input sensitivity: 100mV to 1V, variable
 Input impedance: 20kΩ
 Dimensions, inches: 8.2W x 2.1H x 12D
 Please note: Colour of case may vary.

AF25C F8	300W Car Booster Amp	£129.99

560W Car Power Booster Amplifier

A 140W rms per channel booster module providing a total power output of 800W. This module cannot be operated in bridged mode.

Specification

Supply voltage range: 11.5V to 14.4V
 Maximum power output: 140W rms per channel max., into 4Ω
 Peak current output: 40A
 Speaker/amplifier protection schemes: Internal failure (DC), short circuit, overheating
 Total harmonic distortion: 0.02% into 4Ω
 Frequency response: 20Hz to 30kHz ±0dB
 Signal to noise ratio: 100dB
 Channel separation: 60dB
 Sub woofer boost: 10dB @ 40Hz
 Damping factor: 400
 Input sensitivity: 100mV to 1V, variable
 Input impedance: 20kΩ
 Dimensions, inches: 8.2W x 2.1H x 24.3D

Order Code	Type	Price each
AF26D H13	560W Car Booster Amp	£249.99

Quad 100W per Channel Booster Amplifier

Pro-Sound

A high-power amplifier with 100W maximum output per channel (400W total), designed to be the output power amplifier for car stereo systems with line-level outputs. A contoured extruded alloy casing, which doubles as a heatsink, houses the amplifier. The unit has two stereo amplifiers, and can be operated in one of four modes: As a two channel input, two channel bridged output amplifier; As a two channel input, four channel output amplifier; As a three channel input, two channel output amplifier with bridged mono 'sub-woofer' output. Short-circuit protection is provided. On one end panel four phono inputs are provided for front and rear stereo systems, along with input sensitivity controls, a channel selector switch and power LED. The inputs are fed from the low-level outputs of a radio/cassette unit, or similar, having four corresponding front/rear stereo 'preamp' or 'low-level' outputs. The other end panel features all the outputs arranged on an eight-way terminal block, a 25A fuse, and a three-way terminal block carrying power and remote 'on' connections. The remote 'on' is used to turn the amplifier on when the signal source, e.g., radio, is turned on.

The amplifier is supplied with an instruction manual giving connection and installation details. Suitable power cables such as BZ91Y/ BZ92A and CK17T/EZ93B can be found in the cables section along with suitable speaker cables such as XS37S/XS36P.

Specification

Maximum output power: 100W peak per channel
 70Wrms per channel, 4 channels driven (bridged)
 35Wrms per channel, 4 channels driven into 4Ω
 THD at nominal output: 0.1%
 Frequency response: 20Hz to 20kHz ±1dB
 Signal to noise ratio: 80dB
 Input impedance: 12kΩ
 Maximum sensitivity: 500mV nominal for full output
 Power requirements: 11V to 16V at 25A maximum (negative earth)
 Dimensions: 300 x 220 x 56mm

IN-CAR ACCESSORIES

Noise Suppressor Isolation Transformer

NEW

This noise suppressor has been designed to eliminate the noise in a car audio signal line without affecting the audio quality of the system. The suppressor is housed in a metal tubular case with gold-plated phono connections fitted on flying leads. Dimensions of case: 70 x 35mm dia. Total length is 550mm approximately (with flying leads). Weight 147g.

Order Code	Type	Price each
RZ95D	Noise Suppressor	£8.99

IT'S A FACT!

TABLE OF EVERY DAY SOUND LEVELS

Decibels	Pressure	Typical Noise
120	20Pa	Low level jet aircraft (threshold of pain)
110		Rock band
100	2Pa	Inside tube train

High Quality Isolation/Noise Suppressor

NEW

A very high quality in-line car stereo line level isolation/noise suppression transformer. All the inputs to inputs, inputs to outputs, outputs to outputs and ground to any ground are fully isolated. The connections are via flying leads with the inputs connected to gold-plated phono plugs and the outputs to gold-plated phono sockets. The phono connections have a total length of approximately 650mm. The enclosure is rectangular, with a mounting base 125 x 55mm, and a height of 40mm. Weight 300g. Colour

FOR TOP QUALITY & VALUE!

High/Low Impedance Matching Transformer

NEW

A high/low impedance matching transformer designed to convert high level car stereo speaker outputs to line level inputs of a power amplifier.

Housed in a plastic tubular enclosure with flying leads and an overall length (including leads) of 350mm approx. The enclosure is 65mm long with a diameter of 25mm. The device has an extremely flat frequency response from 20Hz to over 100kHz. The input connections are by a male bullet connector (positive) and a female bullet connector (negative). The output is via two female phono sockets.

Order Code	Type	Price each
RZ94C	Hi/Lo Match T/mer	£5.99

20A DC Noise Suppressor

NEW

A 20A in-line suppressor specifically designed for DC supplies to in-car audio equipment. The unit is very easy to install having just three flying cable connections, and is housed in a rugged rectangular enclosure with a mounting base 125 x 125mm and an overall height of 40mm. The overall length including cables is 400mm approx. Weight 440g approx.

Order Code	Type	Price each
RZ97F	20A Noise Suppressor	£9.99

Gold-Plated Car Battery Clamp and Terminal Lugs

A gold-plated battery clamp for use in cars with high quality in-car entertainment systems, in particular compact disc players. Two gold-plated terminal lugs are available for connecting to 4AWG or 8AWG power cables. Suitable cables may be found in the 'Cables'

Order Code	Type	Price each
BZ99H	Gold Terminal	£5.99
CK33L	8AWG Lug	£1.48
CK34M	4AWG Lug	£1.48

**Fax your orders to:
01702 553935**

Multway Car Battery Clamp

NEW

A multiway gold-plated battery clamp that will accept the starter lead, high power amplifier and two other auxiliary feeds. The clamp will form an important part of a high quality, high power, in-car entertainment system. Requires 4mm, 3mm and 2.5mm Allen keys.

Order Code	Type	Price each
AG92A	M/Way Battery Clamp	£14.99

4 into 1 Cable Connector for Car Audio Systems

A gold-plated 4 into 1 cable connector, encapsulated in protective, insulating clear plastic. Allows one 4AWG cable to be connected to four 8AWG cables (see Cables Section). Supplied with five plastic caps to cover the screws after the cables have been clamped. The clear plastic base has a 5mm diameter hole at each corner for fixing to a suitable surface. Size 63 x 51 x 25mm.

Order Code	Type	Price each
CK00A	4/1 Car Audio Connct	£7.99

Heavy Duty Distribution Block

NEW

A gold-plated 3-way heavy duty distribution block encapsulated in clear acrylic. The ends will accept 4AWG cable which allows the block to be inserted in a main power cable and provide continuity. Three 4AWG cables can be connected to the block to provide power to very high power audio amplifiers etc. The base has four 5mm diameter holes for securing to a suitable surface. Requires 5mm and 4mm Allen keys. Size 90 x 53 x 30mm.

Order Code	Type	Price each
AG93B	H/Duty Dis Block	£11.99

Distribution Block for Car Audio Systems

NEW

A gold-plated 8-way distribution block encapsulated in clear acrylic. The ends will accept 4AWG cable which allows the block to be inserted in a main power cable and provide continuity. Eight 8AWG cables can be connected to the block to provide power to audio equipment, such as power amplifiers, audio cassette and CD players etc. The base has four 5mm diameter holes for securing to a suitable surface. Requires 4mm and 3mm Allen keys. Size 90 x 53 x 30mm.

70A Circuit Breaker

A fast acting 70A circuit breaker with gold-plated terminals, that are marked 'BATT' and 'AUX' for correct insertion in a power feed for high powered in-car entertainment systems. Two diagonally opposite 6mm holes may be used for fixing the breaker to a suitable surface. Size 74 x 48 x 37mm.

Order Code	Type	Price each
BZ96E	70A Circuit Breaker	£13.99

Car Audio Gold-Plated Fuseholders

Two types of gold-plated fuseholders for use with high quality in-car entertainment systems. The heavy duty version will accept one 4AWG cable (high power battery cable) and provide two fused output connectors that will accept 8AWG cable – to supply in-car entertainment equipment. The standard version is two separate fuseholders, suitable for 8AWG cable. Both types have a black plastic base and a clear plastic clip-on protective cover, and require a 3mm Allen key to secure the cables, the heavy duty version also requires a 4mm Allen key. The base has two 5mm diameter holes 20mm apart for fixing the fuseholder to a suitable surface in the car. Fuse size 37 x 10mm. Overall size 101 x 52 x 32mm.

Order Code	Type	Price each

Plug-In Style Car Audio Fuseholders

Two gold-plated fuseholders in the same style as the audio-grade fuseholders using cartridge fuses, but designed for use with the modern blade-terminated pattern plug-in fuses. The fuseholders are used for wiring high quality, car entertainment systems into a vehicle. The 2-way version has two electrically separate fuseholders which will accept 8AWG high power battery cable (see Cables Section) to supply individual items of in-car entertainment equipment. The 4-way distribution block has a common connection at one end with terminal holes to take 4AWG battery cable either end-on or at right-angles. From this four fused outlets are provided at the other end for 8AWG cables. Cables are secured with either 3 or 4mm Allen grub screws. Both types have transparent plastic bases and a transparent clip-on cover, which has rectangular cutouts to accept the plug-in fuses, so there is no need to remove cover to access fuse. Each base has 4mm countersunk fixing holes spaced 95 x 31mm for the 2-way version, and 95 x 64mm for the 4-way distribution block. Overall size, 108 x 44 x 28mm for 2-way version, 108 x 76 x 28mm for 4-way version.

Order Code	Type	Price each
GW75S	FBox 2-Way Plug-In	£14.99
GW76H	FBox 4-Way Plug-In	£21.99

Car Ioniser

NEW!

This compact ioniser is designed to improve the quality of the air in your car. The ioniser generates a copious stream of negative ions into the air that combine with the positively charged pollution particles. Airborne particles and odours are removed from the atmosphere by a process of electrostatic precipitation

which results in a 'after a rainstorm freshness'. The device may help to relieve colds and similar respiratory problems, as well as benefiting headache and hayfever sufferers. Easy to install, just connects to a cigarette lighter socket. Supplied with plug and 1m of connecting lead.

Order Code	Type	Price each
RZ54J	Car Ionizer	£9.99

12V Mini Car Fan

NEW!

A mini car fan that will help to keep you cool during the summer. Plugs in to a standard cigarette lighter socket and is fitted with a convenient on/off switch and large suction pad. Supplied with 1.5m of lead.

Order Code	Type	Price each
AQ26D	12V Mini Car Fan	£4.99

SWITCH BOXES Audio Switch Box

An extremely compact audio selector unit that allows switching between one of four stereo audio inputs. All connections to inputs and outputs are via standard phono sockets mounted on the rear of the unit, except input 1 where connection is via a front-mounted 3.5mm stereo jack socket, thus allowing 'personal stereo' type units to be connected to normal Hi-Fi equipment. Selection is by means of four top-mounted switches. Recesses above the switches allow identification labels to be neatly positioned. The unit is supplied with one stereo phono to phono cable, one stereo 3.5mm to 3.5mm jack cable, a self-adhesive double-sided fixing pad and five identification labels. Dimensions: 138 x 28 x 37mm. Colour: Silver.

Order Code	Type	Price each
YZ24B	A1 Audio Switch Box	£15.99

FAX YOUR ORDER NOW!
01702 553935

2-Way Speaker Control

A neat, black metal, loudspeaker switch box that allows two pairs of loudspeakers to be used with one pair of amplifier loudspeaker terminals. The switch can select either pair of loudspeakers, or all four together. The internal wiring of this unit is such that the load presented to the amplifier will not fall below that of the lowest impedance speakers. Thus if 4Ω speakers are used, the minimum load will be 4Ω. The unit is for four speakers maximum and is NOT recommended for valve amplifiers.

Order Code	Type	Price each
KR94C	2W Speaker Switch	£9.99

EXTENSION SPEAKERS

Micro Speakers

NEW!

A pair of passive 3 1/2 in loudspeakers enclosed in an attractive black plastic case with a matching metal grill. The loudspeakers are suitable for use with personal computers (with suitable output) portable hi-fi equipment, such as radios, personal cassette and CD players. The speakers offer excellent sound quality and frequency response for such a small enclosure. The speakers are connected to a miniature stereo jack plug by approximately 1.8m of cable.

Specification
Nominal impedance: 8Ω
Frequency response: 100Hz to 15kHz
Power rating: 5W (PMPO)
Dimensions: 137 x 98 x 92mm

Order Code	Type	Price each
ZC97F	Micro Speakers	£8.99

Active Micro Speakers

A compact high-quality speaker system with a 7W music power capacity that can be operated in active or passive modes and is ideally suited for use with portable stereo radios, cassette players and CD players. In the active mode each speaker has its own amplifier operated by the insertion of the connecting lead. Output level is set by the 'volume min-max' control and tone can be modified with the 'treble boost on/ off' switch located at the rear. Bass boost circuitry is also provided, controlled by an 'on/off' switch. The speaker system is powered by four size C batteries, not supplied. A 6V DC 2.1mm power socket is provided for external supplies. Supplied with instruction leaflet.

Order Code	Type	Price each
MK51F	Active Micro Speakers	£14.99

Bass-Reflex Mini-Speaker System

A compact high-quality speaker system with a 30W peak handling capacity. Two different versions of the speaker system are available:

1. Standard 'passive' type. This requires an external amplifier to drive it. This particular model will make an ideal extension speaker for a (stereo) TV set. It features a ported cabinet for enhanced bass response, a 4" bass driver and 2" tweeter. The good sound quality and power handling in a compact size also make this system a good choice for "in-car" use. The sound quality is superior to most car speaker systems, and they can easily be removed to prevent theft. They can also be used as rear speakers in a surround sound system. Connection to each speaker is by means of colour-coded spring clip terminals (red +, black -).

2. Active type. This is a speaker of the above type but one of the pair has a mains-powered stereo 20W per channel amplifier built in to its casing. The rear of this speaker features bass, treble, volume and on-off controls. There are also phono sockets for the left and right audio inputs. One channel of the amplifier powers the speaker in which it is mounted, and a colour-coded lead (approx. 2m long) connects the other channel to the other, passive speaker which is fitted with a red and black spring lever terminal. This type of speaker system is ideal for use with personal stereo equipment (a twin phono to stereo 3.5mm lead is supplied for this purpose) and for use in an A.V. system. In particular, the unit could be connected to a video recorder or TV

set via the Peritel (SCART) socket or phono socket normally fitted to such equipment. Appropriate leads can be found in the 'Connectors' section. This will greatly improve TV and video sound quality whilst retaining independence from the hi-fi system.

Specification

Cabinet type:	Bass reflex
Drive units:	4" cone type for bass 2" cone type for treble
Maximum output:	Passive type: 30W (from external amplifier) Active type: 20W (from built-in amplifier)
Frequency response:	32Hz to 20kHz
Speaker System impedance:	4Ω
Dimensions:	137mm (W) x 210mm (H) x 126mm (D)
Maximum weight:	2.1kg approx.

ACTIVE SYSTEM ONLY:

Input sensitivity:	200mV to 1V
Input impedance:	2kΩ
Power requirements:	240V AC 50Hz

The active system is supplied with a double-phono to 3.5mm stereo jack lead so that portable equipment can be connected to it. Suitable mounting brackets can be found below as item GL18U.

Mounting Bracket Kit for Small Speakers

A pair of innovative mounting brackets suitable for relatively small speakers with a weight of up to 6kg. They are suitable for use with types GL19V and GL20W. When used with these speakers, special attachments fit into recesses present in the speaker cabinet and when tightened will firmly clamp the speakers. Other brackets supplied allow different

speakers to be used, but fixing holes would need to be drilled into the cabinets. These brackets feature a lockable universal joint so that positioning of the speakers is simplified and a great range of adjustment is possible. Normally, these brackets would be used for wall or ceiling mounting, but they can also be mounted on photographic tripods or clamped to a table using additional attachments.

Order Code	Type	Price each
GL18U A2	Mini Spkr Mount Kit	£19.99

LOW VOLTAGE LAMPS

Electronic Light & Keychain

The Maplin Powerbeam has a moulded, ergonomically designed case, housing a high intensity light emitting diode (LED) that produces a powerful, intense beam of red light. The batteries are replaceable and are a standard, easily obtainable type (JG88V). The Powerbeam is extremely useful, and is always to hand when you need it for locating things in the dark such as house and car keyholes, or an item dropped - the intense red beam is much stronger than a conventional torch.

Order Code	Type	Price each
GW51F	Light/Keychain	£1.99

Cycle Safety Lamp

A compact, lightweight lamp that is ideal for mounting on a cycle or as a red warning lamp when walking, running, or roller skating, clipped onto a belt. The high-brightness, triple-LED lamp can be switched to steady or flashing mode. Requires two AA size batteries (JY48C). Dimensions: 66 x 47 x 26mm.

Metal mounting bracket and armstrap included.

Order Code	Type	Price each
GW52G	Cycle Safety Lamp	£7.49

Cycle Lamp Set

NEW

A matching pair of cycle lamps in tough white and black plastic that are supplied with detachable universal brackets and batteries. Each lamp has a heavy duty on/off slide switch, conveniently positioned on the back of the housing. The multipurpose bracket allows the lights to be mounted on most parts of the cycle, in the correct manner, at 90° to the road. Bulb and battery replacement is very easy, a coin is used to lever apart the two halves of the lamp. The front lamp uses a high brightness Krypton bulb, and the back lamp uses a standard pre-focus bulb. Each lamp requires two 'D' type cells (four supplied). The front light conforms to BS6102/3 and the back light conforms to BS3648.

Order Code	Type	Price each
ZC31J A2	Cycle Lamp Set	£12.99

**FOR TOP
QUALITY & VALUE!**

Auto Light

A smart, twin tube fluorescent lamp in a white plastic rectangular escutcheon with a ribbed perspex diffuser. The base can be fixed to the wall of a boat, caravan, motor caravan etc. with two screws at 245mm fixing centres; screws should be 20mm long wood screws or self tap type no larger than 3mm diameter (not supplied). The fluorescent tubes will have to be temporarily removed for this operation. Each tube is 12 inches long and rated at 8W and combine to give a bright yet soft white light output for all purposes including reading and writing, but with a low power consumption, certainly much lower than a filament lamp with the same light output. Designed to run from a 12V DC vehicle battery, the lamp uses an integral DC/DC inverter/tube driver, which may present some interference to a portable AM radio but has no effect on VHF FM or UHF TV receivers. Includes on/off switch in the form of a 250mm long pull-on/pull-off cord and toggle at one end. Power connection is via a pair of 100mm long red and black wires (+12V and common) at rear for connection to a 12V system, and there is a 98 x 40 x 10mm deep recess provided for enclosing connection terminals.

Order Code	Type	Price each
YZ35Q	Auto Light	£8.95

Fluorescent Tube

A 12V 8W fluorescent tube for use as replacement in caravan and boat lamps.

Order Code	Type	Price each
LQ11M	12V Tube	£3.49

Cupboard Light

A white plastic, battery operated wall light ideal for cupboards, under stairs, lofts, cellars, garages or boats. The lamp is operated by a pull-switch and is powered by two 'D' size (UM-1) batteries, which are not included. Three screws are provided for mounting to a suitable surface. Dimensions: 123mm dia. x 68mm. Suitable batteries include: zinc chloride JY62S, alkaline FK66W.

Order Code	Type	Price each
KR34M	Cupboard Light	£3.49

Solar Flashlight

NEW!

This handy flashlight contains two rechargeable NiCd 'AA' size cells which can be recharged from the solar cells which are incorporated in the handle of the case. Simply place the flashlight with the solar cells facing the sun and it will recharge. The batteries can also be charged from a suitable 3V mains adaptor for which there is a power socket in the end of the case. Alternatively, the batteries can be removed and charged in an external AA Ni/Cad charger. It is essential that only NiCd rechargeable batteries are used in this flashlight. Finished in black plastic.

Order Code	Type	Price each
UK89W	Solar Flashlight	£14.99

Mini Fluorescent Lantern

A handy miniature lantern with a bright 6in. 4W fluorescent tube. It is powered by 4 AA cells (alkaline recommended) which are not included. Two self-adhesive sets of Velcro-type pads are supplied, which allow the lantern to be securely fixed to a surface and yet be easily removed. The high brightness offered in such a small size makes this lantern ideal as a pocket torch, or for camping.

Order Code	Type	Price each
ZC11M	Mini Fluor Lantern	£3.99

Mini Lantern Optum

A very useful, compact torch and fluorescent tube combined. A switch on the side of the uni-switches from off to torch or tube. The torch uses a 6V MES tubular pre-focused bulb and the fluorescent light uses a 6in. 4W tube. It is ideal for use in power cuts, garages, sheds, in the car or for camping, fishing etc. The lamp has a remarkably bright light for such a compact unit and a carry strap so that it can be hung up. The lamp requires four AA cells (alkaline recommended) not supplied. Overall size 152 x 53 x 21mm.

Order Code	Type	Price each
YT10L	Mini Lantern	£4.49
JX46A	Bulb For YT10	40p
JX45Y	Tube For YT10	£1.69

Multi-Purpose Lantern

A slim multi-purpose lantern with three different light sources. A very bright spotlight that uses a krypton bulb, is mounted on a 180° swivel head, while on one side, a fluorescent lamp is fitted, and on the opposite side an amber flashing light is fitted. The lantern can be used as a table lamp by using the swivel head as a stand, or stood on end, to allow use of the spotlight. A belt clip is also provided. The lantern requires four 'AA' (UM3) type batteries, which are not included. Rechargeable batteries can be used, and a socket is provided for charging the batteries from an AC/DC adaptor (6V DC) (not supplied). A red LED indicates that the batteries are charging. Dimensions: 225 x 68 x 32mm.

Order Code	Type	Price each
BZ63T	Multi Purpose Lantern	£4.99

Rubber Torch

A very high quality durable rubber-bodied torch which represents very good value for money. The lens is made of toughened clear plastic instead of glass for longevity and safety. The water resistant body features two flush-mounted 'snap' action switches for 'on' and 'off' which are unlikely to be operated inadvertently. The base of the torch is unscrewable for simplicity of battery replacement, and features a recessed ring so that the torch may be easily hung up. To renew the bulb, peel back the rubber around the lens, remove the lens, unscrew the reflector, remove the old bulb from its socket in the torch, fit the replacement and reassemble. Batteries supplied (replacement 2 x 'D' type cells). Overall dimensions: 205mm length, 75mm dia.

Order Code	Type	Price each
ZC09K	Rubber Torch	£3.99

Small Rubber Krypton Torch

A black rubber-bodied hand-held torch that is fitted with a high brightness krypton bulb. The lens is made from transparent plastic and the torch is powered by two 'AA' cells. Three interchangeable lens in red, green and yellow are also supplied with the torch. The lens unscrews giving access to the two 'AA' type batteries and the bulb holder. The rubberised body features two flush-mounted 'snap' action switches for 'on' and 'off' which are unlikely to be operated inadvertently. The torch has a wrist strap attached to its body. Supplied with two 'AA' type batteries. Overall dimensions: 165 x 38mm diameter.

Order Code	Type	Price each
UK90X	Small Rubber Torch	£3.99

Large Rubber Krypton Torch

A large black rubber-bodied hand-held torch that is fitted with a high brightness krypton bulb. The lens is made from transparent plastic and the torch is powered by three 'D' cells. The lens unscrews giving access to the three 'D' type batteries and the bulb holder. The rubberised body features two flush-mounted 'snap' action switches for 'on' and 'off' which are unlikely to be operated inadvertently. The torch has a wrist strap attached to its body. Supplied with three 'D' type batteries. Overall dimensions: 260 x 65mm diameter.

Order Code	Type	Price each
UK91Y	A1 Large Rubber Torch	£4.99

Auto Hand Lamp

An extremely useful hand lamp with a 12V, 6W bulb and 4.55m cord terminated in a standard car cigarette lighter plug. The main body is constructed from sturdy black plastic and features an on/off switch. The top grille is orange in colour and features a hook from which the lamp can be suspended. It incorporates a safe plastic lens to protect the bulb and is detachable from the main body to facilitate bulb replacement. Replacement bulbs are available from most auto part suppliers. Overall dimensions: 166mm x 50mm dia.

Order Code	Type	Price each
ZC18U	6W Auto Hand Lamp	£2.75

Multi-purpose Rechargeable Lantern

A very practical combination lamp which combines a bright torch, a flashing yellow hazard warning light, and an effrescent lamp. These icient twin tube fluofeatures make the lamp ideal for camping, around the home or emergencies. The tubes are 8in. 6W and either one or both can be switched on. The

fluorescent lamp can be operated alone or in combination with either the torch or the hazard warning light. The torch end is twisted off for bulb replacement. The lantern is powered by an integral, rechargeable, 6V DC 3Ah sealed lead-acid battery which is recharged from the battery charger supplied, via a standard 2.1mm power socket. A red LED indicates when charging is taking place. Overall dimensions: 282 x 105 x 94mm.

Order Code	Type	Price each
CJ33L	A3 Rechargeable Lantern	£24.99

Water Resistant Torch

A bright, hand-held torch especially designed for outdoor use. It uses a 'krypton' bulb for high efficiency and a light output superior to conventional filament bulbs, with a generous 98mm round reflector. A resilient, plain plastic lens is used instead of glass for safety, and the whole lampholder is removable to gain access to the bulb itself and the battery compartment. This is held in place by a screw-on ring which retains the reflector. The reflector and lens are sealed to the ring with a thick rubber circular bead, and the joint

between the screw-on ring and the body is protected by a red synthetic gasket or 'O' ring of square-section. As they stand these render the torch adequately splash-proof, but improvement may be possible by the sensible application of a non-hardening compound to improve the sealing of these joints – such as the Multi-Purpose Grease (FM80B), to be found in the tools section of this catalogue – in the right places. The torch uses four 'D' type cells which preferably should be alkaline (not included). The body is a one piece black plastic moulding, with handle and wrist-strap, a security ring for a lanyard and a free-standing base. The on/off switch is a push button on top with a rubber cover. Overall dimensions are 170 x 140 x 120mm.

JX50E	Krypton Bulb For JU21	50p

High Power Halogen Spotlight

A robust, powerful, hand-held halogen spotlight that plugs into the 12V DC cigarette lighter socket fitted to most motor vehicles. The 250,000 candlepower illumination produced makes this a very useful spotlight for mobile and emergency lighting. A metal hanger is provided in the top of the spotlight which also houses an on/off switch. The spotlight is provided with three meters of coiled cord and a protective cover. Please note that, in use, the lamp will get very hot and will draw a very high current from the vehicle's battery. Care should be taken to avoid discharging the battery. Overall dimensions: 160 x 117 x 90mm. Replacement bulb available: KP62S

12V HAND-HELD HALOGEN SPOTLIGHT

A 12V high-powered halogen spotlight that is designed to plug directly into a cigarette lighter socket found on most modern cars. This 300,000 candle power lamp is ideal for camping, nighttime emergency roadside repairs, power cuts etc. The contoured handle features a retractable metal hook and an on/off switch. A tough, detachable plastic hook is included that can be screw to a wall, or suitable flat surface. The back of the spotlight has a recess for clipping over the hook. The lamp is fitted with approximately 3.5m of coiled lead terminated with a suitable plug to fit a cigarette lighter socket. Housed in a rugged black impact resistant plastic casing. A replacement bulb is available. Diameter 170mm, overall length 275mm, depth 95mm.

Replacement bulb KP62S £1.99

Map Light

A combination map clip and map light for use in the car at night. To use, simply fold your map leaving the panel(s) to view on top. Clip the map light onto one edge, and insert the provided cigar lighter plug into the car's socket. The device comprises a 204 x 120mm perspex screen which is edge lit by four tiny filament bulbs. The light diffuses through the screen, which has a shallow wedge section, ensuring light is reflected from the top surface down onto the map across its width. A circular magnifying section is included at the bottom righthand corner. The clip has a maximum opening of 6mm. The coiled lead is 450mm long retracted, 160cm long extended. Provided with a plastic storage wallet to protect the screen while not in use.

JX47B	Bulb For YZ36	40p

Fluorescent Reader's Light

A compact, black, portable battery powered lamp fitted with a 14mm fluorescent tube mounted on a flexible neck. It features a sturdy clip which enables it to be secured to a shelf, panel edge, headboard etc. It can be used as a 'hands free' source of illumination for situations where you need a torch but require the use of both hands. The lamp itself requires 4 'AA' type cells (not included) which should preferably be of the alkaline type, particularly if the unit is to be left on continuously for prolonged periods. The integral clamp will open to a maximum of 40mm and is capable of gripping shelves, table edges etc. up to 30mm thick. The lamp body features an on/off slider switch and a reflector mounted behind the tube.

Order Code	Type	Price each
ZC12N	Fluor Reading Lamp	£7.49

Reader's Light

A small, portable battery powered lamp that may be either free standing or alternatively clipped to a shelf or the edge of a panel etc. Can be used to help illuminate the interior of an instrument case or similar confined space to provide close-up, on the spot lighting for fiddly soldering jobs, or in any situation where you need a small torch, but at the same time need both hands free. The lamp uses four AA size batteries (not supplied) contained in the base and providing stability

in the free-standing mode. The integral clamp will open to 40mm maximum and is capable of gripping shelves, edges of tables etc. up to 30mm thick. A flush on-off slide switch is provided plus a 2.5mm jack socket for an external 6V supply. The lamp proper is mounted at the end of a jointed arm which has a rotatable hood, and uses an easily replaceable MES bulb. Overall dimensions, folded - 120 x 45 x 60mm. Maximum reach of arm - 208mm

MAINS INSPECTION LAMP

Optum

A handy inspection lamp which is ideal for use in the garage, home or anywhere mains power is available. Supplied with a 4.5 metre long power cable which allows good access to the work area. An on/off switch is fitted to the plastic handle, and the bulb (60 watt max., not supplied) is protected from breakage by a bright orange plastic cage surround which also features a reflective strip. A hook at the top of the lamp allows it to be hung, leaving both hands free. The lamp is not water- or weather-proof. The mains lead is terminated with tinned wires, which should be connected to a standard 13A mains plug fitted with a 2 or 3 amp fuse.

COMPACT LIGHTWEIGHT CYCLE COMPUTER

A super compact, lightweight bicycle computer with LCD readout that features three user levels. Basic offers three sport functions: current speed, trip time and trip distance. Advance level offers, in addition to the basic sport functions: 24h clock, alarm clock, countdown timer, distance alarm, odometer, maximum speed, average speed and average speed alarm. Professional level features five functions in one display; the three basic functions plus distance alarm and training speed alert. The bicycle computer can be programmed to operate in either the metric or British system and can be used with cycles having wheel diameters from 20 to 28in. Other unique features include a countdown timer, an automatic start state (counting starts as soon as the wheel turns), and the ability to be used for team time trial or individual road race. The cycle computer is easy to install, and set up, and includes a standard CR2032 lithium battery.

Specification	
Controller:	4-bit, 1-chip microcomputer
Sensor:	No contact magnetic sensor
Speed measurements (all settings):	0 to 199.9km/h
Trip distance:	0 to 999.9km
Odometer:	0 to 9999.9km
Set trip distance:	0 to 999.99km
Trip time:	0 to 9h 59m 59s
Dimensions:	47 x 45 x 16mm
Weight:	25g

Specification	
Recording system:	DC bias
Erasing system:	Magnetic
Tape speed:	4.75m/sec
FF/Rewind time:	120 sec (C-60 tape)
Wow and flutter:	0.4% WRMS
Frequency response:	250Hz to 6.3kHz
S/N ratio:	30dB
Audio output power:	300mW
Power source:	3V DC from 2 x AA cells or adaptor
Loudspeaker:	40mm dia. 8Ω
Sockets	
Input:	External microphone (3.3kΩ) External DC power adaptor Remote Control
Output:	Earphone (8Ω)
Dimensions:	87 x 114 x 32mm
Weight:	215g
Accessories:	Carrying case, C-60 cassette

THE BEST OF SERVICE

Micro Cassette Dictating Recorders Olympus S926

Designed specifically to keep up with the high-paced businessman, career woman and college student of today. Its shapely design, engineered specifically to the shape of your hand, puts effortless fingertip control at your command. Now you can simplify all your recording and transcribing jobs. Full functions such as VCVA (variable control voice actuator), fast play and microphone sensitivity give you ease of operation when you need it most. Thanks to VCVA and adjustable microphone sensitivity, the Olympus S926 begins recording only when the microphone senses a preset audible level. A red LED indicates when a recording is being made. The Olympus S926 is packed with other sleek features to match its slim figure. Fast play lets you play back recorded material at faster than normal speed for quick reference. With the pause button, stop/start operations are easily performed in both the recording and playback modes. These are just a few of the time saving features you get from this unit. With the S926 you'll spend less time searching for information and more time listening to it. All the features in the S926 combine to give you top-rate micro-cassette performance. VCVA, automatic power shut-off and fast play make your micro-cassette recording operations more efficient. And, of course, you'll find the standard features of high and low sensitivity, pause switch, cue/review/quick review, two tape speeds (2.4cm/sec and 1.2cm/sec).

ULTRAVIOLET MINI LANTERN

A very useful miniature torch combined with an ultraviolet (UV) fluorescent tube, offering exceptional value for money. A switch on the side of the lantern selects torch beam on, UV tube on, or power off. The torch uses a readily available 6V MES, tubular pre-focused bulb, and a 6in. 4W UV tube. The UV light facility is especially useful to stamp collectors for reading the phosphor dots on postage stamps. It can also be used to detect UV security ink and to check the authenticity of bank notes. The lamp body features a carry strap so that it may be hung up, and the lamp itself requires four AA cells (alkaline recommended) not supplied. Overall size 152 x 53 x 21mm. Spare UV tube available: CR48C

Order Code	Type	Price each
ZC10L	UV Mini Lantern	£8.49

CASSETTE DICTATING RECORDERS

Standard Cassette Dictating Recorder

A dictating machine that uses standard audio cassettes, designed for use in the office, conference room or other business environment. The unit features convenient push buttons for hand held or free-standing use. The Voice Operated Recording System automatically eliminates pauses in speech, thus increasing the recording time available on the cassette and cutting out unwanted gaps. A 3-digit tape counter is provided for easy location of specific sections of tape. Automatic level control 'conference facility' adjusts the unit's sensitivity to compensate for varying levels of speech, ensuring clear recordings.

Specification

Tape: Micro-cassette
 Tracks: 2 tracks, 1 channel monophonic
 Drive system: Capstan drive
 Tape speed: 2.4cm/sec and 1.2cm/sec switchable
 Recording system: Continuous adjustment using volume control in VCVA recording mode
 Earphone jack: 2.5mm, impedance 8Ω
 Audio power output: 150mW (EIAJ) at 2.4cm/sec
 Power source: 3V DC from 2 x AA cells or adaptor
 Dimensions: 122 x 24 x 58mm
 Weight: 160g (including batteries)

The recorder comes with one XB15 and one XB60 microcassette, carrying case and batteries.

Order Code	Type	Price each
YZ51F A1	Recorder S926	£59.99

Did You Know?

James Watt (1736 to 1819) was a British engineer who made fundamental improvements to the Newcomen steam engine, resulting in the modern high pressure steam engine. However, today his name is used to indicate units of power. For instance, a loudspeaker could be said to have 50W (watts) of handling power; or a light bulb, 100W of brightness etc. A 'Watt' is an SI unit of power equal to one joule per second. Also, volts x amperes equals watts ($V \times I = W$).

Olympus S928

The portable recorder S928 is similar to the S926 with additional features, including a Mic input and a tape counter with reset button. The mic input allows an external microphone to be connected for a better recording. A tape counter allows the tape to be cued at vital parts of the tape for reference. A green LED indicates when the recorder is in playback mode. The recorder is fitted with 'Audible Indexing'. An audible tone can be recorded at the start of each recording to help find a particular section during playback. The whole package comes with a carrying case, one XB15 and one XB60 microcassette and batteries.

ZF24B A1	Recorder S928	£79.99

MULTIFUNCTION LCD WATCHES

World Time Watch and Thermometer Casio

A versatile, high quality world time watch with the added facility of a built in Thermometer. The attractive square LCD displays all the usual timekeeping functions as well as a world map. In 'world time' mode the time in one of 23 different time zones can be displayed at the press of a button. The temperature range is from -10°C to 60°C (14°F to 140°F) with a changeover between °C and °F. There is a local temperature memory that stores 24 temperature records at hourly intervals. The dual time facility allows an alternative time to be preset and recalled. This world time facility will appeal to those who travel a great deal or make frequent international phone calls, as it makes it easy to keep global time in the proper perspective. Five multi-function alarms can be preset independently, as a daily alarm, monthly alarm (only date set), 1 month alarm (only month set) or date alarm (month and date set). A count down alarm is included from a maximum of 24 hours and 'beeps' for 10secs. when zero is reached. The stopwatch facility can time events, up to 24 hours, within 1/100 second with 'signals' to confirm the start/stop operation. The regular timekeeping functions include hours, minutes, seconds with year, date and day. The time display can be set to show either the 12 or the 24-hour format, and the watch automatically determines and sets the number of odd or even days in the month. This superb watch is housed in a black resin case with matching strap and is powered by one CR1620 battery with a battery life of approximately three years. Water resistant to a depth of 100m (static water pressure).

Order Code	Type	Price each
DM94C	World Time Watch	£34.99

Data Bank Casio

An extremely well-specified digital watch which couples renowned Casio quality with many useful features. The normal timekeeping display shows the day of the week, date, year and the time in hours, minutes and seconds. This 'chronometer' function automatically compensates for leap-years and months of differing lengths. The display can be switched between 12 and 24-hour operation, and will show the time in any of 24 different time zones. A 24-hour stopwatch is also available which works to a resolution of 1/100 second. The alarm functions are very comprehensive. In addition to a switchable daily alarm and an hourly bleeper, there is a countdown alarm. This works to a resolution of a second and the countdown period can be user-defined between 1

minute and 24 hours. An extremely useful 8-digit 4-function calculator with memory is included, the keypad being incorporated on the watch face. The same keypad is used to enter data into the 50-page telephone and scheduling memories. Each telephone memo 'page' can comprise 8 letters and 12 numbers, while the scheduling facility will allow 5 letters per page. The 50-page memory is shared between these two functions. The top part of the LCD panel has a 'grid' which shows at a glance the memorised scheduled events over two weeks. To prevent unauthorised people from gaining access to any information stored in the watch, a 'private password' function has been provided. An essential 'power fade' indicator is present on the display panel which will warn the owner when the batteries need replacing. Thus, information stored in the watch may be copied from the display and written down, being re-entered into the memory once fresh batteries have been installed. A 'micro-light' permits reading of the display under poor lighting conditions, although it must be stressed that prolonged usage will reduce the life of the battery considerably. Normally, the lithium CR1616 battery will power the watch for approximately 2 years. Supplied in an attractive presentation case with owner's manual. A battery is included.

Order Code	Type	Price each
ZF15R	Data Bank Watch	£39.99

Exercise Pulse Monitor Casio

A superb watch designed for those who are serious about fitness, housed in a black resin case with matching strap. By simply programming the watch with the relevant data i.e. age, the watch measures your pulse, and displays your optimal aerobic range. An 'intensity' gauge even indicates the intensity of the activity you are performing. Additionally, there are three sets of 7 measurement data memories. The watch has the usual timekeeping functions i.e. hours, minutes, seconds, month, date and day, and automatically determines and sets the number of odd or even days in the month. A daily alarm can be set to provide a gentle reminder at the same time every day, and time signals can be set to 'beep' on the hour. The time display can be set to show the time in either the 12 or 24-hour format. Power is supplied by a CR2016 type battery with an approximate battery life of two years. Water resistant to a depth of 50m (static water pressure).

Weather Station

Casio

An unusual watch incorporating barometer, altimeter and depth-meter functions in addition to regular timekeeping, several alarm modes and a stop-watch. It will appeal particularly to divers, hikers, rock/ mountain climbers and to those who participate in weather-dependent activities (such as golf and other sports). Other uses include measuring the height of buildings and the altitude of specific areas above sea level. The watch is rugged in appearance, and there is a characteristic protrusion on the left side of the case which contains the sensor used for the special functions. The case is guaranteed to be water-resistant at depths of up to 100m. A large LCD is used as the main display, showing mode and time/stop-watch information. This display will also show height, depth (both measured in metres) and atmospheric pressure (measured in millibars) when the watch has been set to the relevant mode. In addition, there is a 'weather tendency' display which shows the trend in atmospheric pressure (over three hour intervals) during the preceding 18 hours. Such information is helpful when predicting weather changes. The same display also shows which pressure-related function has been selected, any data stored in the memory or the date/day of the week. Above this display, a semi-circular bargraph shows graphically the present value of atmospheric pressure (when selected) or alternatively the difference (in isobars) between a current pressure measurement and one previously stored in memory. Other memories store maximum altitude and depth values which, when reached, will trigger a warning alarm. For accurate measurement, the reference altitude will need to be entered (such information can be obtained from an Ordnance Survey map of your area or a precision altimeter (the best option). The watch could also be calibrated by setting the reference to 0m at sea level). The reference atmospheric pressure has been set at the factory, but can be recalibrated if required with the aid of a precision barometer. In addition to pressure measurement functions, this watch offers a range of timekeeping facilities. The time can be shown in either 12- or 24-hour format and a calendar facility (day of the week, date and month) is offered. In the normal timekeeping mode, either the date/day or the weather tendency display can be shown. 3 independent alarms are present, in addition to a switchable hourly beeper and a user-definable countdown alarm. A stop-watch fitted with split/reset functions and a resolution of $\frac{1}{100}$ second has also been included. The two SR927 silver batteries supplied will provide power for up to 2 years of operation, a presentation box and comprehensive owner's manual are also included.

Accuracy

Parameter	Accuracy at constant temp.	Effect caused by change in temp.
Timekeeping:	±15s/month	-
Barometer:	±(Difference in atmospheric pressure x 4.5% + 3mb) max.	±16mb max. per 10°C
Altimeter:	±(Difference in altitude x 4.5% + 30m) max.	±120m max. per 10°C
Depthmeter:	±(Displayed value x 12.5% + 0.4m) max.	±0.2m max. per 10°C

The sensor is very sensitive to shock and has been designed to work at temperatures between 10°C and 40°C.

CLOCKS

Analogue Clock with MSF Decoder

NEW!

An ingenious, very accurate, analogue alarm clock that incorporates a radio receiver tuned to the MSF time-code transmitter at Rugby. An internal quartz oscillator keeps the clock running should the MSF reception be lost, or goes out of range. The clock has an alarm with 'snooze', and a backlight which is operated by a switch on the side. Setting the clock is very simple. A thumb-wheel on the rear of the clock is used to set the hour and minute hand to the top of the current hour (e.g. if the current time is 7:45, then the hour hand is set to 7 and the minute hand to 12). Two AA batteries (not supplied) are inserted and the 'SNOOZE' button is pressed until the seconds hand reaches the top of the minute. After approximately 2m the clock hands will automatically adjust to the correct time. House in an attractive black case measuring 88 x 98 x 56mm, the clock requires two AA batteries (JY88C) to operate.

Order Code	Type	Price each
RJ88V	Analogue Clock+MSF Dec	£24.99

Traveller's Alarm Clock

A compact, high quality, analogue quartz alarm clock with luminous hands. Setting the clock and alarm times is straightforward, the knobs for these functions being located on the back of the clock. The alarm time is indicated by a red pointer, the function itself being activated by means of a large press switch on the front of the clock. To turn on, this switch is pushed up to reveal a red bar verifying its status. When the alarm, which has a pleasant bell sound, has gone off the press switch only needs to be pushed down to stop it. The alarm will run for 40min. unless turned off, although this will constitute a large and unnecessary drain on the battery. This accurate and handy little clock is powered by a single alkaline AA cell, one of which is supplied with the unit, along with

operating instructions. Under normal usage, the battery will last for approximately a year. Overall size: 62 (H) x 93 (W) x 30.5mm (D). Weight: 134g. Accuracy: ±20 seconds per month (at normal temperature).

Order Code	Type	Price each
ZF16S	Travel Alarm Clock	£13.99

Electronic Timer

A superb, low-cost, count-down timer for those many process timing applications in the kitchen, around the home, and in workshops and laboratories. This digital timer is programmable to count-down from a maximum of 19 hours and 59 minutes. At the end of the count period a loud, piercing, bleeping, alarm sound is emitted until switched off. The timer contains an LCD, and three push buttons: 'hour/clear', 'min/alarm stop' and 'start/stop'. The count period is set up with 'hour' and 'min' and started with 'start'. The count can be stopped at any time, before it is complete, with 'stop' and restarted with 'start'. When the count-down is complete the alarm will sound. This is switched off with 'alarm stop'. The counter can be reset at any time using 'clear'. Colour white. Overall dimensions: 75 x 58 x 25mm. Uses a 1.5V type 'AA' battery, supplied. Includes instructions.

Count-Down Timer

NEW!

A simple count-down liquid crystal display (LCD) timer that counts in minutes and seconds. Three buttons below the LCD provide control of the 'Minutes', 'Seconds', 'Clear', 'Start/Stop' and 'Memory'. During count-down, the two legends 'M' and 'S' flash 'on' and 'off'. Completion of the count-down is indicated by an alarm that starts when the count-down has finished and the display reads zero. The alarm, which can last as long as 30 seconds, is stopped by pressing the 'Start/Stop' button. This will also cause the display to show the original time setting. The count-down can be repeated again using the original setting or either be

cleared or a new time set in.

Simultaneously pressing the 'Min' and 'Sec' buttons clears the display and the memory. A short bleep is emitted when any button is pressed and when the digits are scrolled up in fast mode. A spring loaded belt clip, which incorporates a magnet, is fixed to the back of the timer. The instructions for standing the product upright appear on the back of the packaging.

Specification

Digits - minutes: 19mm
 seconds: 14mm
 Unit dimensions: 62 x 62 x 26mm
 Operational current: 4µA while counting (no alarm sounding)
 Set time (max): 99 mins 59 secs
 Power supply: One AAA battery

Order Code	Type	Price each
RJ82D	Count Down Time	£6.99

Calendar/Clock

An attractive 100-year calendar clock that is ideal for home, office or travel. A large LCD shows the time, day and date. Features include 12/24 hour clock format, weekday and weekend alarm settings plus a six minute snooze function. Other features include a US/Europe calendar format. The cover below the display slides down to reveal the set up controls. A five position slide switch selects the function and four buttons are used to set a particular function. The other controls are a snooze/alarm switch and an alarm stop switch. The display dimensions are 58 x 34mm. Overall dimensions of the white case are 79 x 77 x 53mm. Powered by a type 'AAA' battery, supplied. Instructions included.

Order Code	Type	Price each
GW56L	Calendar/Clock	£10.99

Snooze Alarm Clock

An attractively finished battery operated alarm clock incorporating a snooze facility. The snooze alarm will repeatedly sound every eight minutes, until the alarm is switched off.

The clock can be set to display either a 12- or 24-hour format and in the 12-hour mode the unit will display am or pm accordingly. The clock is fitted with a 'light' button, which when pressed illuminates the LCD. The 'light' button also stops the alarm from sounding when pressed. The unit has an in-built folding stand and is supplied with a wall mounting bracket.

Order Code	Type	Price each
RJ77J	Snooze Alarm	£8.99

Dual Timer Clock

A compact Dual Timer featuring two liquid crystal display (LCD) screens which show the time for the clock and stopwatch and two timers T1 and T2. The clock can be set to either 12-hour or 24-hour system. The three timers are arranged so as to act as one count-up (stopwatch) and two count-down timers. The two count-down timers can be operated individually or consecutively.

Specification

Digits - hours/minutes: 14mm(H)
 seconds: 8mm(H)
 Unit dimensions: 89 x 68 x 19mm
 Operational current: 9µA. This increases when the alarm sounds
 Set time count (max): 23 hours 59 minutes 59 seconds
 Power supply: One AAA battery

Order Code	Type	Price each
RJ81C	Dual Timer Clock	£9.99

Large LCD Display Count Down Timer

An eye-catching, precision, digital timer that is programmable to count down from 99 minutes 59 seconds, with an alarm that sounds for 30 seconds when zero is reached. This large LCD timer has two buttons to set the minutes and seconds, and a large round button to start/stop the countdown, although any button can be pressed to stop the alarm once it sounds. The timer can be clipped to a thin board or shirt pocket, using the plastic clip at the rear of the timer. Alternatively, it can be attached to iron or steel surfaces using the magnet at the rear, or stood on any flat surface using the flip out metal stand bar. Housed in a white/light grey plastic case and powered by one G-13 1.5V button cell (included). Size: 72 x 66 x 22mm. Weight: 58g with battery.

Order Code	Type	Price each
BU79L	Count Down Timer	£9.99

Large LCD Display Up/Down Timer and Clock

An attractive large LCD timer and clock with two independent count down timer channels, programmable to count down from 99 hours 59 minutes, 59 seconds to zero. When the timer reaches zero the timer starts to count up and the alarm sounds for 60 seconds. Pressing any button will stop the alarm. The two timer channels can be run concurrently so that the start of a timed period and the end of the period can be set. Above the LCD are three buttons to select either 'timer 1', 'timer 2' or 'clock' mode. The lower buttons are used to set the timers and time of day, and to start/stop the timers. The timer can be clipped to a thin board or shirt pocket, or can be freestanding using the integral stand. The clip incorporates a magnet for attachment to iron or steel surfaces. Housed in a white/light grey plastic case and powered by one G-13 1.5V button cell (included). Size 72 x 66 x 22mm. Weight 58g with battery.

Quartz-Light LCD Alarm Clock

A black LCD analogue clock with alarm and hourly chime. Three buttons situated below the display set the clock and alarm and illuminate the display.

The 'Mode' button displays the set alarm time when it is pressed. Pressing it a second time returns the display to the clock time. It is also used when setting the clock and the alarm time. The 'Set' button permits selection of the minute and hour hands and together with the 'Mode' button moves the hands to the desired time. The 'Light' button illuminates the display when pressed. Four individual symbols appear on the display in

Precision Digital Stop-Watch

A digital stop-watch with LCD display accurate to 1/100th of a second. The shock and moisture resistant case is of polycarbonate and Kraton and the display lens is acrylic, and a neck cord is attached. This multipurpose stop-watch is easy to use and accurate for all sports activities, and can display 'LAP' time and reset and restart counting from zero for the next lap while holding last lap display, or continue with current time and hold display only, as well as be able to pause counting during a 'time out' period and resume counting from current held time. The timing range is from zero to 9 hours, 49 minutes and 59.99 seconds. Recommended operating temperature is -10°C to +59°C. Dimensions: 80 x 57 x 17mm.

Order Code	Type	Price each
YU03D	Stopwatch	£12.99

Small Clock Module FM-882

A compact digital clock module that uses a quartz crystal to provide an accuracy of ±15 seconds per month. Four digits show hours and minutes for a 12 hour period with AM and PM indicators. Operates from one GE-13 silver oxide button cell and draws a maximum of 5.5µA, which results in a battery life of approximately one year. The clock has an integral flanged bezel and can be snapped into a panel cut-out of 50 x 25mm. Makes an ideal small, low-cost and accurate digital clock suitable for a wide range of applications.

Specification
 Digit height: 10mm
 Oscillator frequency: 32.768kHz
 Accuracy: 15s/month
 Operating voltage range: 1.2V to 1.8V
 Battery life: 1 year approx.
 Dimensions
 panel cut-out (body): 45 x 25mm
 depth: 15mm

ANALOGUE QUARTZ CLOCK MOVEMENTS

Make your own clock using these analogue movements which are simple to use, offer quartz crystal accuracy and require just one AA size battery to operate. The CMOS circuit drives a self starting, two pole stepper motor from a crystal oscillator, and reduction drive from the second hand to the minute and hours hands is through nylon gears.

Quartz Clock Movement

A standard basic quartz clock movement as described above. The movement is supplied without hands but uses the separate hands shown on the next page. Time is set with a knob on the back. Movement is attached to face with a threaded brass boss having a shouldered brass collar nut.

Specification

Crystal freq: 32.768kHz
 Accuracy @ 22°C: ±0.45 ±0.55s/day
 Operating voltage: 1.3 - 1.65V DC
 Operating temperature: -10°C to +60°C
 Average current: <150µA @ 1.5V
 Battery life: ~1 year
 Dimensions: 55 x 55 x 17mm not including mounting boss and hand pivots.
 Mounting boss: 8mm dia. clear
 Hole dia. for collar: 10mm dia. clear

Table Alarm Clock Movement

As standard quartz movement above but including an alarm function, and a special set of four hands, one of which is a set alarm time indicator. The alarm sounds where the hour hand aligns with the alarm set hand. Separate set time and set alarm knobs are provided on the back with an alarm on/off switch. The separate hands below will not fit this movement as the mounting pivots are of different diameter. Also unlike standard movement, alarm version has no central mounting boss and instead is provided with two mounting holes through the case; fixing centres 49mm x 8BA/M2 clear.

Specification

As those for standard movement except –	
Operating voltage:	1.3 to 1.7V DC
Operating current:	<85µA @ 1.5V
Alarm current:	<8mA @ 1.5V
Alarm volume:	>80dB @ 10cm
Alarm duration:	35 min. ±20 min.
Alarm time accuracy:	±5 min.
Operating temperature:	-10°C to +50°C
Dimensions:	52 x 55 x 23mm not including hand pivots.

Lengths and colours of hands, measured from centre pivot:

Hour (black with a luminous stripe):	19mm
Minute (black with a luminous stripe):	26mm

RJ89W	W/Less Clock Module	£19.99

DIGITAL THERMOMETERS

Ice Warner

Essentially a minimum/maximum digital temperature module, it includes an alarm bleeper which sounds if either programmed temperature threshold is exceeded. Especially useful in the car since the external probe can be positioned somewhere on the underside of the vehicle, but preferably not adjacent to or to the rear of the engine (heating effect) nor in direct air flow (wind chill effect) to gauge the nominal temperature at or near the ground and thus give warning if it is cold enough for conditions to be icy. For this purpose the self contained module comes complete with a mounting bracket for fitting it to the dashboard or similar, and a supply umbilical which plugs into the cigar lighter socket. The bracket can be attached with a single screw and can tilt and rotate through two planes to ensure a good viewing angle. 'U' clips and self adhesive pads are provided to secure the external probe cable and the probe itself if installed for this purpose. The module can also read the internal temperature and either can be selected with the 'in/out' switch. The module includes a 12 hour clock with AM and PM indicators, and time is shown while the 'clock' button is held down. A miniature lamp illuminates the LCD display in the dark. Beneath a lower flip-down cover there is a display centigrade/fahrenheit option switch, and four buttons for setting both the upper and lower temperature threshold points and the clock time. The module also uses a 1.5V AAA size battery either as a backup or main supply. Also provided with self adhesive pad on back for fixing to a flat smooth surface. Cable for external probe is over 3 metres long, and the power supply lead 1.4 metres long.

YT98G	Ice Warner	£14.99

Large Display Thermometer

This superb, attractive, large format display, digital thermometer will impress anyone who needs to observe and monitor inside and outside temperatures. Useful in the home, office, workshop, car, or in the greenhouse, or where there are extreme climatic conditions, etc., to guard against. The meter has an internal, built in sensor and an external sensor in the form of a flat plastic probe attached to the end of a 3m wire. This external sensor is attached to the inside of a non-moving window. The temperature range is -50° to +70°C. The display is approximately 47mm wide by 19.5mm high. A flip-out stand is fitted on the back of the unit for mounting. Powered by a type 'LR44' 1.5V battery, supplied. Colour black.

Digital Thermometer and Clock

An attractive, compact thermometer and clock, with an outdoor temperature probe, that can display either °C or °F. The LCD display alternates between time and temperature readings at three second intervals. A small slide switch on the front selects either the indoor or outdoor temperature probe, which is attached to the module by 2m of black twin flex. Time settings and the °C/°F slide switch are mounted on the back of the module. The module has a flip-out stand on the back for desk or table top use, or it can be wall-mounted using the matching wall bracket (supplied). Finished in dark grey and silver.

Specification

Temperature range: indoor: -5°C to +50°C (-23°F to +122°F)
 outdoor: -50°C to +70°C (-58°F to +158°F)
 Resolution: 0.1°C (0.1°F)
 Battery type: Single G-13 type 1.5V (LR44)
 Probe length: 22mm
 Probe diameter: 5mm at base, 4mm at tip
 Size: 68 x 52 x 16mm (incl. bracket)

Aquarium Thermometer

This LCD thermometer is primarily intended for use with an aquarium, but it also doubles up as a room thermometer. A sliding switch, at the bottom right-hand side, selects either the water temperature or the room temperature. The water temperature sensor is housed in a sealed metal cylinder connected to the thermometer by approximately 1m of lead. A suction cap attached to the sensor holds it in position within the tank. The room temperature sensor is housed inside the actual thermometer body on the left-hand side of the thermometer. The thermometer has an operational range of between -20°C to +70°C.

Specification

Dimension: 60 x 40 x 14mm
 Temperature range: -20°C to 70°C
 Power supply: One LR44 (SR44) battery

Order Code	Type	Price each
RJ79L	Aquarium Thermometer	£6.99

Thermometer/Clock

A very compact, low-cost inside/outside LCD thermometer and clock that is ideally suited for use in the car, the office or home. Also suitable for greenhouse or workshop. This thermometer has a wide temperature range, measuring from -50°C to $+70^{\circ}\text{C}$. The unit has a built-in internal sensor and an external sensor that takes the form of a flat plastic probe attached to a 3m length of wire. This external sensor is attached to the inside of a non-moving window or, in a car, somewhere unaffected by engine heat, e.g. behind the front bumper, not directly in the wind stream. Controls to set up the clock and select $^{\circ}\text{C}$ or $^{\circ}\text{F}$ are on the rear, with a temperature selector slide switch at one end. On the face is a clock button and a light button. The unit is provided with 'velcro' mounting pads for attaching to any smooth surface. Colour black. Dimensions: 114 x 24 x 17mm. Supplied with type 'AAA' battery and instructions.

Order Code	Type	Price each
GW57M	Thermo/Clock	£7.99

Pocket Meter with Alarm

A well-made, attractive pocket temperature meter and clock. The meter has an internal sensor and an external one in the form of a plastic encapsulated probe at the end of a thin wire which coils up inside the meter. When not in use the external probe stows in two clips on the side of the meter. A switch beneath the display selects the internal or external sensor.

A second non-latching switch beneath the display, when pressed, permits the 12-hour clock to be displayed. The lower half of the front cover slides down to reveal the other controls. A set/lock switch prevents accidental resetting when in the lock position. The clock can be set with the separate hours and minutes push-buttons and high and low temperatures may be set, such that when either temperature is reached, an alarm sounds for 6 seconds approx. A further switch switches the alarm off or on. Annunciators on the LCD display show whether high and/or low temperatures have been set. The back of the meter houses a sprung plastic pocket or belt clip and on the lower half a stand can be hinged out to make the meter free-standing. A further cover on the back can be opened to reveal the battery and the compartment where the external sensor's wire may be coiled up.

Specification	
Display:	3 1/2 digit 10mm high LCD display
Clock:	12-hour clock
Temperature range:	-5°C to $+50^{\circ}\text{C}$ (internal sensor) -20°C to $+70^{\circ}\text{C}$ (external sensor)

High and low temperature set range:	-19°C to $+69^{\circ}\text{C}$
Overall size:	105mm high x 66mm wide including probe x 20mm thick
Probe length:	82mm
Probe diameter:	7mm at base, 3.6mm at tip
Probe wire length:	900mm approx. x 2mm dia.

FREEZE ALERT

NEW

A handy and convenient device that gives a visual and audible warning if the temperature inside your freezer rises above $-10^{\circ}\text{C}/14^{\circ}\text{F}$. The module is attached to the outside of the freezer door (sticky pad supplied) and the probe is passed through, when the door is opened, and positioned at the rear of the freezer cabinet. An LED will flash and an alarm sounds when the temperature rises above -10°C . There is a small on/off slide switch on the front of the module. Ideal for domestic and commercial freezers, as well as industrial and laboratory freezers. Requires 1 'AA' size battery (supplied). Length of cable 2.7m. Dimensions: 77 x 46 x 19mm

GREAT VALUE!
£4.99
RZ43W

The meter can be used to display indoor and outdoor temperature if the external probe is placed outside a window, or it could be used in the greenhouse or in aquaria (the external probe is waterproof and can be immersed in water) or in photographic applications or in the car etc. The meter operates from a single 1.5V AAA cell and is supplied with full instructions

Digital Alarm Thermometer with Warning Alarm

A slimline, portable digital LCD thermometer and clock with a stainless steel probe that is suitable for industrial or domestic use. The unit features a programmable maximum and minimum alarm, making it ideal for measuring and monitoring refrigeration, food processing, heating and ventilation, particularly in the food industry. The 100mm long stainless steel probe is attached to the unit by 1m of sensing wire, and for convenience, the probe can be clipped to the side of the unit. The sensing wire is stored inside the battery compartment. The unit has two exposed slide switches which are the alarm on/off and temperature sensing speed, either 1sec or 10secs. The slow sensing speed saves battery energy, prolonging battery life. The front cover slides down to reveal the buttons to adjust and set the time, high and low temperature alarms, and slide switches to select either $^{\circ}\text{C}$ or $^{\circ}\text{F}$ display or clock function. The light cream case has a flip out stand and a spring loaded clip, for fixing to a belt etc.

Digital Alarm Thermometer with Steel Probe

A slimline, portable LCD thermometer with a stainless steel probe that is suitable for industrial or domestic use. The unit features a wide temperature range, and a programmable maximum and minimum alarm, making it ideal for measuring and monitoring temperatures in the electronics, heating and ventilation, refrigeration, laboratory, and food processing industries. The 100mm long stainless steel probe is attached to the unit by one meter of sensing wire, and for convenience, the probe can be clipped to the side of the unit. The sensing wire is stored in the battery compartment. Beneath the display the unit has two exposed slide switches that are the alarm on/off and temperature sensing speed of either 1sec. or 10secs., the slow sensing speed reduces battery use, to prolong battery life. The front cover slides down to reveal buttons for adjusting high and low temperature alarms and slide switches for setting and locking the alarm and selecting either °C or °F display functions. The light cream case has a flip-out stand for placing on a table and a spring-loaded clip for fixing to a belt, etc. Supplied with battery and instructions.

Specification
 Temperature range: -55°C to +148.8°C (-67°F to +299.8°F)
 Accuracy at 0°C to 60°C: ±1°C
 Accuracy over full range: ±1.5°C

RT20W	WideRng Probe Thermo	£26.99

Dual Display Indoor/Outdoor Thermometer

A compact, attractive, dual LCD digital thermometer that displays indoor and outdoor temperatures in °C at the same time. The meter has an internal and an external probe that is attached to a thin 3 metre cable. Each display has a memory that stores the maximum and minimum temperature reached since last reset, and the reading can be recalled by pressing the relevant buttons. The thermometer is housed in a distinctive white and grey plastic case with a built-in plastic stand for table standing. The thermometer can be wall-mounted if preferred, and a wire holder is supplied for fixing the sensing probe to a wall. Powered by one 'AA' battery.

Specification
 Temperature range indoor: -5°C to +50°C
 outdoor: -40°C to +50°C
 Resolution: 0.1°C
 Probe length: 20mm
 Probe diameter: 7mm at base, 4mm at tip
 Probe wire length: 3m approx.
 Size: 110 x 70 x 20mm
 Weight: 85g (excl. battery)

Order Code	Type	Price each
BU81C	Dual Display Thermo	£15.49

Thermo-Hygrometer with Memory

This meter has a large clear LCD panel which shows relative humidity (RH – as a percentage), and temperature (which is user-selectable to read in either celsius or fahrenheit). A memory is incorporated which will store the lowest and highest RH and temperature readings. These figures can be shown, or the memory reset, at any time. Indicators on the display show if it is 'wet' (RH over 65%), 'dry' (RH below 45%) or 'comfortable' (RH between 45% and 65%). The unit is attractively finished in white and two-tone grey, and can be table or wall mounted.

Size: 99 x 70.5 x 20.5mm
Weight: 70g (less batteries)
Temp. range: 0°C to 50°C (+32°F to 122°F)
Temp. resolution: 1°C/1°F
RH range: 25% to 95% (at 23°C/77°F)
RH resolution: 1%
 Supplied with instructions and wall mounting bracket. Batteries (2 x AAA size – alkaline recommended) not included

Order Code	Type	Price each
ZA41U	Pocket Thermo/Hygro	£23.99

Hygrometer with Memory

A hygrometer that displays the relative humidity (RH) as a percentage on an LCD panel. In addition, the module will store the highest and lowest readings taken, and these can be shown on the display. These readings can be reset at any time. Indicators on the display show if it is 'wet' (RH over 65%) or 'dry' (RH below 45%). The unit is finished in white and two-tone grey, and can be wall or table mounted. Measuring range: 25% to 95% (at 25°C); resolution 1%. Dimensions: 99 x 70.5 x 20.5mm; Weight 70g (less batteries). Supplied with instructions and a wall bracket. Batteries (2 x AAA size, alkaline recommended) are not included.

Outdoor Temperature/ Humidity Meter with Memory

A thermo-hygrometer similar to ZA40T but with several refinements. An external temperature probe allows the unit to monitor the temperature at a distance of 3m or less from the unit, for example that outdoors or in a refrigerator. A memory is incorporated which will store the lowest and highest external temperature readings. These figures can be shown, or the memory reset, at any time. An additional independent display shows the temperature as measured by a sensor integral to the unit. Indoor RH expressed as a percentage is also shown. Size/range/resolution/Specifications: As for ZA40T except that the RH measuring range is between 32% and 90%. Supplied with instructions. Batteries (2 'AA' size alkaline recommended) not included

ZA43W	Dial Thermo/Hygro	£27.99

Electronic Rain Gauge

An ideal way of measuring amount of rain fall from the comfort of your own home. An external rain collector measures how much rain has been collected over a period of time and displays the total on an indoor display unit, which can be wall mounted or free standing. The liquid crystal display shows the amount of rain fall in millimetres, this reading can be reset at any time. The display unit is powered by a single AAA cell and is supplied with 10m of cable, to which the external collector unit is attached. Rain collector unit size, 100 x 50 x 100mm. Display unit size, 93 x 62mm x 22mm

Order Code	Type	Price each
YZ48C	A1 Rain Gauge	£42.99

Hygrometer

An attractive, circular mechanical hygrometer with a brass finish that measures from 0% to 100% REL humidity. The hygrometer is inserted in a 60mm diameter hole that ideally should be 18mm in depth. A rubber sleeving ensures the hygrometer is held firmly. Overall dimensions: 70 x 40mm.

Order Code	Type	Price each
ZF22Y	Hygrometer	£9.99

Barometer

A circular mechanical barometer which is designed to be inserted into a hole that has a diameter of 60mm and a depth of 18mm. A rubber sleeving ensures the clock is held firmly. The Barometer will measure from 960hpa to 1065hpa and is also marked 720mm to 800mm. A secondary pointer needle set in the clear plastic cover, is used for comparing the previous days pressure against the present days pressure. Overall dimensions: 70 x 40mm.

AQ79L	Quad Plinth	£9.99

PRESSURE GAUGES
Blood Pressure Monitor

A portable, easy to use, digital blood pressure tester for measuring systolic and diastolic pressures, and pulse rate. The measurements are shown on an LCD along with an 'inflation mark', a 'heart mark' and a 'deflation mark' that appear at various stages of operation. Briefly, when the unit is switched on and ready, a buzzer sounds and the inflation mark flashes to indicate the start of proceedings. The cuff is wrapped around the upper arm. The rubber bulb is used to rapidly inflate the cuff to 30 to

40mmHg above systolic pressure or until the unit beeps. Once pumping is finished, the cuff pressure decreases slowly at a rate of 2 to 3mmHg per second. As the pressure decreases the heart mark will appear along with a beeping sound to indicate that measurement is taking place. When a one second beep indicates that measurement is complete, systolic and diastolic pressures will be displayed for three seconds then the pulse rate will be displayed for two seconds. The deflation mark will also be shown. These displays will alternate until the cuff has been deflated. Once the cuff is exhausted, the systolic and diastolic pressures will reappear, along with the inflation mark, and remain until the monitor is switched off or reused. If it is not reused within three minutes, the monitor switches itself off to conserve battery power. The monitor is supplied with cuff, rubber bulb, vinyl case, full instructions for use and battery.

Specification

Measurement range –
 Cuff pressure 0 to 300mmHg
 Pulse: 40 to 150 beats/min

Accuracy –
 Cuff pressure ±3mmHg
 Pulse: ±5% of reading
 Operating temperature: +50°F to +104°F
 Operating humidity: 85% Rh or below
 Storage temperature: 29°F to +149°F
 Power required: 1 x PP3 battery

Dimensions –
 Cuff: Standard adult size to fit 9 to 12 1/2 in. circumference

Monitor:
 Weight: 152 x 80 x 28.6mm
 160g with battery

Order Code	Type	Price each
XG60Q	A1 Blood Press Tester	£42.99

Auto-Inflating Digital Blood Pressure Monitor

A portable, easy to use, digital, blood pressure tester designed to remove the complexities of measuring blood pressure and pulse rate, particularly for those who are not familiar with the technique. The monitor takes readings from the left index finger and shows the systolic and diastolic pressures, and pulse rate on an LCD. Also, a 'ready to measure' symbol and a 'heart' symbol appear at various stages of operation. To use, set the 'finger size' button to the left, insert the left index finger into the finger cuff and press the 'on/off' button, whereupon various symbols will appear on the display. When the monitor is ready to start it beeps and the 'ready to measure' symbol flashes. The 'finger size' button is moved to the right until the 'too tight' LED is illuminated. Sliding the button one notch to the left will turn off the LED. Now press the start button. The monitor has its own pump so no manual pumping is required. It will automatically inflate to a pressure of around 200mmHg, then start decreasing the pressure slowly. Pressure readings will continue to be shown and when measurements begin, the 'heart' symbol will be shown, flashing. If

initially it cannot obtain a reading, the monitor will make several attempts, raising the pressure further, until it can take a reading or display an error message. Once measurement is complete, the monitor beeps, deflates automatically, and then displays the blood pressure and pulse rate. These alternate every few seconds until the monitor is reused or switched off. Also shown is the 'ready to measure' symbol. If it is not reused immediately the monitor will switch itself off after 1 1/2 minutes to conserve battery power. The monitor is supplied with full instructions and batteries.

Specification

Measurement range –
 Finger cuff pressure: 0 to 300mmHg
 Pulse: 40 to 150 beats/min

Accuracy –
 Finger cuff pressure: ±3mmHg or ±2% of reading which ever is greater

Pulse: ±5% of reading
 Operating temperature: +50°F to +104°F
 Operating humidity: 30% to 85% Rh
 Storage temperature: -4°F to 122°F

Super Nintendo™ Control Pad

This ergonomically designed six-button control pad with auto-fire and slow motion feature is designed for use with the Super Nintendo™ Entertainment System (SNES). The contoured shape allows the control pad to sit in the palm of the hand for comfort and ease of use. Auto-fire is engaged by a three-position slide switch (off and two speeds), and there is an individual switch for each of the six fire buttons. The two speeds are five and nine shots per second. The slow motion button is operated by a two-position slide switch which slows the game down by repeatedly turning the pause button on and off. Also, there is a direction button, a start/pause button and a select button. This attractive unit, which is finished in light grey, comes with approximately 1.8m of cable with an SNES connector attached.

Arcade Joystick for SNES™ and Mega Drive™ **NEW**

An arcade cabinet-style joystick for use with the Super Nintendo™ Entertainment System (SNES) and Mega Drive™. Housed in a large durable metal case with non-slip feet, the unit is designed to sit on a computer desk or table. The joystick can be used for either type of machine by plugging the appropriate console's cable into the back of the joystick (the joystick connector is a 15-way D-type). Both types of cable are supplied with the joystick.

The joystick has six fire buttons, all of which work on the SNES but, when used with the Mega Drive™, the joystick only works as a three fire button type and not as a six button joystick. The unit has a three-speed auto-fire facility which works by repeatedly pressing the button you want on auto-fire and pressing the desired auto-fire speed. A green LED will flash to indicate that the chosen button is on auto-fire; the LED flashes faster for higher speeds. The button can be locked on by depressing it and pressing the 'LOCK' button - a red LED housed on the lock button lights when 'LOCK' is activated. You can auto-fire and/or lock as many fire buttons as needed. 'LOCK' is disengaged by simply pressing it again.

A handy feature is the three-speed slow motion option. This uses the same speed buttons as the auto-fire mode and is activated by pressing and holding the 'SLOW START' button (in effect pausing the game) and pressing the desired 'SPEED' button. The 'SLOW START' button is also used as the pause button. Additional controls on the unit are a control stick and a 'SELECT' button. Finished in charcoal this high quality unit will enhance the pleasure of your Super Nintendo™ and Mega Drive™.

INTERCOMMS

2-Channel Wired Intercom

An inexpensive wired intercom that is ideal for situations where the stations are to be used in permanent positions. The two stations are connected by 20 metres of twin cable via 3.5 mm mono jacks. The master station houses the 9V PP3 battery (not supplied) and has a socket for an external 9V supply. The stations can be wall mounted or free standing on a convenient surface. The master station is normally left switched off. To make a call, the 'call' key is pressed at either station, a call signal will follow and the master station is switched on. To speak from the master station, the 'call/talk' key is held down and the LED lights, the key is released to listen to the substation. The LED on the substation will now light, and the substation can now speak to the master station, without pressing a key. When the conversation is over, the master station is switched off. A volume control is provided on the master station.

Dimensions (each) 130 x 90 x 46mm. Supplied in pairs only. Cable clips included.

Order Code	Type	Price each
BZ61R	2-Chnl Intercom Pr	£9.99

2-Channel FM Wireless Intercom

A very high quality intercom which is mains operated and transmits and receives via the mains wiring. No interwiring is required, simply plug each unit into a 240V AC mains outlet socket. The operating system is FM with phase locked loop receivers which gives high quality sound without interference from the mains. The units can transmit or receive on either of two channels which are selected by a switch. Any number of units can be connected, but if there are more than two (or three) then a call on a particular channel will sound the buzzer in more than one unit. (In a master and 2 slaves installation, the master can call each unit, but slaves calling the master may have to call another slave simultaneously depending on which channel the master was left at.)

All units are normally left switched on with volume control at half-setting. To make a call, select the appropriate channel and press the call button. At the unit normally switched to that channel, the buzzer will sound. When the buzzer stops, the called station should press and hold the talk button and speak. When the talk button is released, the calling station can now speak by pressing his talk button. The volume control can now be adjusted for best received signal level. At the end of the conversation, the calling station will automatically be in standby awaiting the next call.

By pressing the lock button, a unit can be locked in transmit mode. Thus the unit could be placed in a baby's room and will transmit continuously to any unit on the same channel which can be moved around with the parents or babysitter and plugged into the mains to receive anywhere in the house.

It may also be possible to communicate with neighbours up to about half-a-mile, although this will depend on whether both houses are on the same mains phase and on the same outlet on the local substation transformer.

Channel carrier frequencies are 120kHz and 140kHz. Overall size: 165mm wide, 115mm deep and 45mm high. Supplied with instructions and approx. 1.4m of mains lead. The attractive modem-styled light-beige units can be desk-top or wall-mounted.

Available only in pairs.

Order Code	Type	Price each
YT16S	A2 FM Intercom 2 Chn Pr	£30.49

Telephone Style Wireless Intercom

A pair of two-way telephone style intercoms which are mains operated and which transmit and receive to and from each other via the common socket ring main. Low frequency RF (230 and 350kHz) is FM modulated and superimposed on the mains supply.

The communication system includes phase locked loop receivers which provide a high quality sound with no interference from the mains. The two units are identical and have a call button for 'ringing' the other station. Operation is as with a telephone, communication is fully duplex (transmit and receive active simultaneously), and a telephone style receiver hook defeats both channels.

Each unit has four non-slip feet for table-tops or alternatively a wall bracket with screws supplied can be used for wall mounting. Dimensions 225 x 102 x 70mm including handset. RF output power 20mW, audio output 100mW. Supplied with instructions and fitted with 1.5m approx. of twin core mains lead. Supplied in pairs only.

Order Code	Type	Price each

FOR TOP QUALITY & VALUE!

3-Channel FM Wireless Intercom

A 3-channel wireless intercom which transmits and receives via the mains wiring on the same phase; no additional interwiring is required. Each unit simply plugs into a 240V AC mains outlet socket. The communication system is an FM low frequency RF carrier with phase locked loop receivers which give a high quality sound without interference directly from the mains. Each unit can transmit or receive on either of three channels which are selected by a selector

switch as 'A', 'B' and 'C' to any other unit. All units have a combined on/off and low/high volume control switch. A call is made by selecting the appropriate channel and pressing the call button, which sounds a buzzer at the selected unit. Users hold down the talk button to talk, and release to listen. A unit can be locked in talk mode with a lock button and thus used as a baby alarm if necessary. Carrier frequencies are 100kHz 'A', 120kHz 'B' and 140kHz 'C'. RF output power 100mW. Audio output 500mW. Dimensions (each) 170 x 127 x 41mm. Supplied in pairs only.

Order Code	Type	Price each
ZA34M A2	FM Intercom 3 Chn Pr	£37.99

4-Channel FM Wireless Intercom

A 4-channel mains operated intercom which transmits and receives via the mains wiring, no additional interwiring is needed. Simply plug each unit into a 240V AC mains outlet socket. The communication system is FM modulated low frequency RF with phase locked loop receivers which gives a high quality sound without interference from the mains. Each unit can transmit or receive on either of four channels which are selected by a switch. Up to four stations can be connected via the same ring main, and any one unit can talk or listen to any one other unit. A call is made by selecting the appropriate channel (1 to 4) and pressing the call button, sounding a buzzer at the selected unit. Hold down the talk button to talk, and release to listen. A unit can be locked in talk mode with a lock button if required. Carrier frequencies are 80kHz '1', 100kHz '2', 120kHz '3' and 140kHz '4'. RF output power 100mW. Audio output 500mW. Dimensions (each unit) 182 x 140 x 43mm. Note that these are supplied individually only, and for a complete 4-way system four units are required.

IT'S A FACT!

DUAL TONE MULTI FREQUENCY TONES

Dual Tone Multi Frequency (DTMF) tones are used on all modern telephones and ancillary equipment to both dial a telephone number, and to access various types of remote equipment, such as answering machines and computers. The chart shows the two frequencies used to generate the required tones. Interestingly, the tones are made to sound discordant on purpose, so that any 'musical' type sound that is accidentally picked up by the telephone mouthpiece, will not instigate false triggering of the telephone system.

Telephone Keypad Notation	Frequencies Hz

Order Code	Type	Price each
BT39N	E1 Clock/Radio Phone	£29.99

Pocket Tone Dialler Pad

A universal key tone pad which emits audible Dual-Tone Multi-Frequency (D.T.M.F.) encoded signals, for controlling a growing number of products and services which are steadily coming on-stream in the UK, and which require the use of tone signalling over the telephone line. These items include answering machines, home banking facilities, home shopping and computer based services etc. The pocket sized key tone pad allows you to quickly and conveniently enter the D.T.M.F. tone codes required by many such services. Having accessed the service by dialling a line in the conventional manner, the speaker of the tone pad is placed over the microphone of the telephone handset and then the D.T.M.F. encoded numbers are transmitted to the receiving device, wherever you may be. Many new answering machines due to be released in the UK do not come supplied with such a tone pad. Suitable for use with answering machines shown elsewhere in this section. Powered by two AG13 type button cells, supplied. Size: 89 x 55 x 16mm.

Order Code	Type	Price each

PAYPHONES

Payphone PP2110

Southwestern Bell

The PP2110 is a payphone that represents an evolutionary development in domestic telephone technology. This telephone was specifically developed for the domestic market so that all the family can use the phone and pay-as-you-go towards the next phone bill. The payphone, which can be secured to the tabletop or mounted on the wall, is line powered, tone/pulse switchable, operates on tariff control five, and uses the new 10p coin. For those concerned with the type of call being made (e.g. parents) a feature of this payphone is a number barring facility, plus all international calls are barred and all those costly 0898 and premium calls are barred. Other features include a pay on answer, microphone mute, and a local exception codes facility.

Order Code	Type	Price each
RZ00A E1	PP2110 Payphone	£109.99

Payphone PP1/Q

Southwestern Bell

This payphone represents an evolutionary development in payphone technology. It incorporates a unique intelligent coin operating mechanism which is programmable to accept any coin or token. The payphone, which can be secured to a table-top or wall mounted, uses the keypad via tariff control 9 for easy programming and autodial 9 for use with PABX systems. Up to 25 exception/barring codes can be entered along with three 'taxi' codes. The intelligent coin operating mechanism has a unique 'coin/token learning mode allowing the use of 10p, 20p, 50p, and £1 coins or the user's own choice. Other features include a large LCD display, tone/pulse dialling, pay on answer, next call facility, redial facility, receive volume control, payphone ID tone, owner mode. The line power is supported by battery back-up.

Dimensions: (H)210 x (W)180 x (D)180mm.
Weight: 1.65kg
Battery back-up: Lithium Manganese Dioxide

RZ05F H3	Fax Phone DF200	£399.99

TELEPHONE SYSTEMS

D-I-Y Telephone System

A simple to use telephone system that allows users with only one telephone line to make, receive, hold and transfer calls in complete privacy from any of up to four different locations of the users choice. Standard (pulse or tone) and cordless telephones can be used to access all features of the system. Special phones, answering machines, modems and other equipment with a REN of 1 can be connected to the system, making it ideal for home-based businesses. Additional features include: intercom between extensions, call-hold during internal enquiry, baby monitoring facility, day and night time ringing selection, 'ring-me-back' when line becomes free, courtesy tone when caller is 'on hold', and 'do not disturb this extension' facility. The system comes with adhesive quick reference labels, for use with MF tone dial telephones, and four extension sockets.

KC60Q 42	DIY Phone System	£139.99

Renown Phone Organiser

BT

The Renown phone organiser is a simple, compact and cost-effective communications system for the home or small business, planning to use more than one phone on one line. The Renown Control Unit allows up to four extensions to be used on one incoming line, at any one time one internal and one external call will be allowed to be in progress. These calls cannot be overheard by other extension users. The Renown is designed for PABX or direct exchange line connection. It is compatible with any approved push-button telephone fitted with recall, however, the Renown Systemphone has been especially developed for use with the Renown Control Unit. An installation kit

is available for DIY installation. Features of the control unit include making or taking external calls from any extension, transferring calls from one extension to another, bringing someone in for a 3-way conversation, placing a caller on hold whilst dealing with their enquiry, making internal calls to other extensions, preventing outgoing calls from certain extensions, plus the ability to link answering and fax machines into the system. Dimensions: 236 x 186 x 35mm. Weight: 600g. Features of the Systemphone include a line status indicator to warn of external calls in progress, abbreviated dialling, last number redial, a mute button, and tone volume control. Dimensions: 255 x 155 x 85mm. Weight: 720g. The installation kit comprises four master sockets, 60 metres of cable, 195 cable clips and two installation tools.

RZ79L	BT/US Socket Adaptor	£2.49

UK to US Telephone Plug Extension Cord ★★★

This telephone extension line cord has a length of approximately 3.7m and has a UK type telephone plug at one end and a US type telephone plug at the other.

Used as an extension for fax and modem machines etc.

Order Code	Type	Price each
RZ75S	UK/US Ext Line Cord	£2.29

IMPORTANT NOTE

Private individuals may now connect secondary extensions within their own home or office provided that BT (or Mercury or Hull) have installed a master socket of the type, or similar, to those shown on this page. The master sockets must only be used for PBX extensions. All secondary sockets are supplied with wiring details and other information to help you install these products correctly. Connections to the master socket must only be made using the 4-way or 6-way Line Plugs (FJ33L/FT52G) and these plugs can only be connected to the Flat IPC Telephone Cord (XR86T/XS03D). The Dual Adaptor FJ30H facilitates connecting your extension wiring (4-way only) and leaving your main telephone connected to the master socket as well if required. This is our interpretation of the law as it stands at present. If you are unsure or require further information to that supplied with the secondary sockets, please contact your local Office of Telecommunications. Their telephone numbers are in your local telephone directory.

PHONE BEFORE 5PM FOR SAME DAY DESPATCH

3m Line Cord and Line Plug

Standard PTC Line Cord with a moulded on Line Plug at one end and four spade terminals at the other. A square grommet is moulded onto the outer sheath at the spade end for entry into a telephone. The four wires are coloured either Red, Black, Green and Yellow, or Red, Blue, Green and White.

Order Code	Type	Price each
FG29G	PTC Line Cord	£2.49

▶ IT'S A FACT! ◀

ADDING EXTRA TELEPHONES

The new style BT 'Linebox' is increasingly being installed in place of the old style of master socket. This new design makes the connecting of extra telephones a simple and inexpensive job. The design allows the connection of cables inside the box instead of through the usual adaptor arrangement. The result is a very neat and tidy installation.

Follow the wiring list as shown, and insert the correct wire into the terminals that are located on the back of the front cover. Use the IPC insertion tool (FT51F), and press the wire into the connector. Trim off any excess wire.

Cable Colour	Connector Number
Green with white ring	1
Blue with white ring	2
Orange with white ring	3
White with orange ring	4
White with blue ring	5
White with green ring	6

PROHIBITED from direct or indirect connection to public telecommunication systems. Action may be taken against anyone so connecting this apparatus.

★★★

APPROVED for connection to telecommunications systems specified in the instructions for use subject to the conditions set out in them.

Everything on pages 67 and 68 is approved. Except where marked ★★★

5m Telephone Line Jack Extension Cord with Dual Outlet

A 5-metre line extension cord having a standard 4-way IPC plug at one end and twin outlet at the other. Very useful for telephones used with modems, answering machines etc.

Order Code	Type	Price each
FS21X	Double Skt Lead 5m	£4.99

3m Extension Lead/4-Way Adaptor

A 3-metre long extension lead terminated with a 4-pin Line Plug at one end and a 4-way adaptor socket at the other, allowing up to four extensions to share one master socket.

Dimensions of adaptor: 75 x 61 x 29mm.

Order Code	Type	Price each
ZB18U	3m 4w Tel Ext Lead	£7.99

Standard 4-Way and 6-Way Line Plugs 431A and 631A

Standard BT type 4-way and 6-way Line Plugs using Insulation Piercing Contacts (IPC), with strain relief. To fit the flat line cord (shown in the Cables Section) to an IPC plug, simply provide a clean cut across the end, and strip off 11 to 12mm of the outer sheath. Allow the wires to separate from one another by approximately 1mm, then push and tease them gently into the plug, which has locating guides built in for each conductor.

Once fully home (the coloured wires can be seen through the slot behind the contacts) use heavy duty pliers or a small vice to press all the gold coloured contacts flush with the plug body; push down the small strain relief members immediately behind the contacts, then force down the cable clamp at rear.

Order Code	Type	Price each
FJ33L	Line Plug 4way 431A	49p
FT52G	BT Plug 6-Way 631A	60p

IPC Insertion Tool

An insertion tool for attaching the BT IPC cable to master or secondary jack units having the BT type numbers with suffix /3A, which have IPC terminations as opposed to /6A types with screw terminal blocks. The tool is used to force the four wires of the line cord into the Insulation Piercing Connectors of the jack unit.

Order Code	Type	Price each
FT51F	BT IPC Insrtn Tool	49p

Plug-In Ringer

A self contained unit which can be plugged into a Line Jack unit, having its own plug extension at rear. The ringer will give an audible alarm of an incoming call being received.

Order Code	Type	Price each
FV96E	Telephone Ringer	£6.99

Phoneguard Rathdown

Provides complete control over whoever uses your telephone, and what kind of calls they can make. This small, unobtrusive unit plugs directly into your existing telephone socket and is locked in position with a special key. The telephone then simply plugs into the front of Phoneguard in the usual way. Phoneguard stops unauthorised use of this telephone and any other extension telephones on the same line. It allows all incoming calls as normal, and always allows outgoing emergency (999) calls. Free 0800 and fault reporting 151 calls are also always allowed, but any type of call is only allowed to holders of a secret code number. In addition operator calls, international calls and premium rated calls (0898, 0836, 0860) always need the secret number. The special key is also needed to change the secret code number. The keyholder can choose to allow or disallow uncoded calls made during cheap rate periods, or local calls, for national calls, calls longer than a predetermined duration, calls made during office hours, and calls made during evenings and weekends. Four dialling codes beginning with zero may be programmed as local, and Phoneguard protects the LD telephone connected to it and any other LD extension telephones on the same line. It is entirely battery powered and requires no external power supply. Requires four AA size alkaline cells (not supplied). Not suitable for use with D.T.M.F. telephones.

Order Code	Type	Price each
ZB20W	Phoneguard	£29.99

▶ IT'S A FACT! ◀

Alexander Graham Bell (1847 to 1922) was the inventor of the telephone. It was on the afternoon of June 2nd 1875 in Boston USA, when Professor Alexander Bell and his associate, Thomas A. Watson, made the first working telephone connection. Over nine months later on March 3rd 1876, his birthday, Professor Bell received from the United States a patent No. 174465.

The Bel is a unit for comparing two levels of power, volage, current or sound intensity equal to the logaritn to the base 10 of the ratio of the two levels. A Decibel (dB) is one tenth of one bel.

Yupiteru MVT-7100 with SSB
100kHz - 1650MHz
"The World's Best Scanner"

- ★ Direct entry
- ★ Variable steps
- ★ 1000 Memories
- ★ Backlight display

This is our best seller. Covers every service you can imagine including the short wave service. Includes ni-cad battery pack, mains unit capable of charging and powering the receiver, and whip aerial. It searches out signals at a blistering speed of 30 channels per second!

Size: 64 x 159 x 40mm
Steps: 50Hz - 100kHz
Power: 4 x AA cells
Ext 12V DC
Ant: 50 Ohms BNC

Order Code	Type	Price each
RU00A H1	MVT-7100	£389.95
RU01B	Case OP-50	£19.95

Yupiteru MVT-7000
100kHz - 1300MHz AM/FM

- ★ Direct entry
- ★ Variable steps
- ★ 200 Memories
- ★ Backlight display
- ★ Signal Meter

A lovely scanner that has no vices and gives superb reception on VHF and UHF. If you don't require short wave coverage this is the best! You'll hear all the emergency services, aircraft, marine, in fact everything.

Size: 64 x 159 x 40mm
Steps: 5kHz - 100kHz
Power: 4 x AA cells
ext 12V DC
Ant: 50 Ohms BNC

CM00A H1	MVT-7000	£329.95
RU01B	Case OP-50	£19.95

All Scanners on this page are now stocked by all Maplin shops.

PRO-46 68MHz - 956MHz*

- ★ AM/FM
- ★ 5/12.5kHz steps
- ★ 100 Memories
- ★ Direct entry

Ideal for those who want a high performance scanner on a budget. Covers all the major services including emergency, civil airband, marine, ham radio etc. Well made and compact enough to fit into the pocket, its an ideal scanner to take with you when you are out and about.

* Excludes: 88 - 108MHz, 174 - 406MHz, 512 - 806MHz.
Size: 151 x 66 x 37mm
Power: 4 x AA cells
Weight: 220g

Order Code	Type	Price each
AG97F C1	Pro-46	£199.95

PRO-44 68 - 512MHz*

- ★ AM/FM
- ★ 5/12.5kHz steps
- ★ 50 Memories
- ★ Direct entry

Designed for those who don't need the top range above 512MHz. This scanner is just as sensitive as its more expensive partners. Only the frequency range and memory capacity has been reduced. We don't know of a cheaper scanner that maintains such a high specification.

* Excludes 174 - 380MHz
Size: 151 x 66 x 37mm
Power: 6 x AA cells
Weight: 220g

Order Code	Type	Price each
AG98G C1	Pro-44	£149.95

ADI SENDER 145 (SENDER 450) 2m (70 cms) 2-5W Transceiver

- ★ 3 Power Levels
- ★ 5 Watts Max. (12V)
- ★ Receive 130 - 170MHz (420 - 462MHz)
- ★ 20 Memory Channels
- ★ Scan Features
- ★ 4 & 6 x Battery Boxes
- ★ Battery Save
- ★ Auto Power Off
- ★ Programmable Steps
- ★ 1750Hz Tone
- ★ Repeater Shift

The Sender-145 is the latest handheld from ADI. Built to show that a fully featured transceiver does not have to be expensive, this unit provides a complete amateur station in a very small package. Solidly built, its clear LCD display provides accurate frequency information and the key pad enables direct entry of frequencies as well as programming functions. The unit is supplied complete with a 54 page handbook, aerial and belt clip plus a full 12 month's warranty. Another great value for money product from your favourite ham radio supplier.

Aerial: 50 Ohms BNC
Transmit: 144 - 146MHz (430 - 440MHz)

Microset Amplifiers

Here's a range of 144MHz and 432MHz linear SSB/FM rf power amplifiers, some designed for use with handheld radios, others for use with mobile or base stations. Each amplifier is fully protected against high VSWR and incorporates a receive GaAsFET pre-amplifier. All units feature rf sensing or direct switching. Maximum output is achieved with maximum allowable input. Input/output figures shown right.

ALINCO DJ580E 2m/70cm Handheld

- ★ CTCSS Option
- ★ Full Duplex
- ★ 5 Watts Max.
- ★ Auto Remote Repeater
- ★ Receives Airband 108 - 143MHz
- ★ Receives 800 - 945MHz 130 - 174MHz 400 - 470MHz

The DJ-580E is the most successful handheld transceiver to come from ALINCO. It provides an incredible number of features including full duplex operation and the ability to function as a self-contained repeater! Other features include wide band receiver capability plus AM airband. Its rugged construction and 5 watt capability make it ideal for mobile operation as well. No less than 8 scanning modes are included and a memory bank of 40 channels is provided. The radio is supplied with ni-cads and AC charger plus helical whip.

Display: LCD
Transmit: 144 - 146MHz, 430 - 440MHz
Steps: 5 - 25kHz
Toneburst: 1750Hz
Supply: Ni-cads or 13.8V

DIAMOND 2m/70cms Base Co-Linear Aerials 'The Best In The World'

- ★ Fibreglass Encapsulated
- ★ Stainless Steel Fittings
- ★ All Mounting Hardware
- ★ Fully Weatherproof
- ★ Pre-tuned
- ★ Excellent VSWR

DIAMOND are the world's leaders in base station antennas for the VHF/UHF ham bands. Each antenna covers 2m and 70cms and is ready to go; no tuning or adjusting is necessary and we guarantee a low VSWR. Fibreglass encapsulation means long, trouble free life. Each aerial is adjusted for maximum gain possible. And remember, every 3dB of gain is equivalent to doubling the transmit power!! That means that even the baby X50 will make a 2 metre 50 watt transmitter have an effective radiated power of 100 watts. Base connection is 50 ohm SO239 on all models except X510 which is 'N' connection.

TONNA VHF/UHF Beams

The range of Amateur Band Tonna antennas are the most widely used in Europe. These well respected designs are the product of F9FT, the famous French radio amateur. Used extensively by contest groups, clubs, moonbounce experimenters, satellite work etc., the facts speak for themselves. The design features light solid elements for durability, 'N' connectors for low loss, and optimum spaced elements for maximum forward gain. Supplied complete with 2" mast clamps. There's a model to suit every application, so if you want the best possible performance, look no further.

RAMSEY Radio Kits from USA – They're so easy!

Amateur Radio Receivers

These single band radios use direct conversion with varicap tuning and have amazing sensitivity. They offer reception of SSB, CW and AM, and are ideal as part of a QRP station.

Models: 20m; 40m; 80m
Output: 8 ohm headphones
Supply: 9V

Order Code	Type	Price each
CP13P	HR-20m	£31.95
CP14Q	HR-40m	£31.95
CP15R	HR-80m	£31.95

FR-1 FM Broadcast Receiver

Ideal for the novice, this builds into an FM receiver covering 88 – 108MHz FM and has enough power to easily drive a speaker. Everything is provided apart from the optional case.

Order Code	Type	Price each
CP19V	FR-1	£22.95
CP18U	Case CAA	£14.95

AR-1 AM Airband VHF Receiver

Ideal for the air enthusiast, this kit features a superhet design and incorporates both squelch and volume controls. There's also enough volume to easily drive a speaker.

Order Code	Type	Price each
CP17T	AR-1	£29.95
CP20W	Case CRR	£14.95

FR-146 2 metre Receiver

This radio covers the 2 metre amateur band but can easily be extended to cover the marine band. Features double conversion with ceramic IF filter, squelch and AFC for stability. Features latest Motorola chip.

Order Code	Type	Price each
CP21X	FR-146	£31.95
CP22Y	Case CRF	£14.95

RF Sniffer Probe Ready Wired 100kHz – 1-2GHz

Lets you read weak RF signals on your DC test meter. Ideal for servicing and alignment. Comes ready built with test prod clip and "banana plugs" for meter.

Order Code	Type	Price each
RU31J	RF-1	£21.95

QRP HF CW Transmitters

Low power operation on the ham bands is great fun and these kits offer a complete variable xtal controlled transmitter delivering 1 Watt output. VXO provides 7kHz shift and there's even a diode T-R switch included! Xtals are centred on 14.060kHz, 7.040kHz, and 3.579kHz.

Models: 20m; 40m; 80m
Power: 12V at 400mA approx.
Mode: CW

Order Code	Type	Price each
CP09K	QRP-20	£31.95
CP10L	QRP-40	£31.95
CP11M	QRP-80	£31.95
CP12N	CQRP	£14.95

Ramsey CW-7 Electronic Keyer

This is an ideal project for ham radio enthusiasts. A complete electronic keyer that interfaces between any paddle key and all modem hf rigs. Front panel controls adjust speed and sidetone monitor volume. Simply connect a speaker for code practice sessions. An internal pot adjusts tone frequency.

Speed: 5 – 50 WPM
Dimensions: 120x102mm
Power: Internal PP3 type (not supplied)

Order Code	Type	Price each
RU90X	CW-7	£24.95
RU91Y	Case CWC	£14.95

Ramsey Dr. Ni-Cad

Charges and conditions ni-cads from 2 - 10 cells. Runs from 12 - 15 Volts DC and permits fast or standard charging. Includes timer, discharger and safety sensor. Can be configured to match all types of ni-cad packs.

Order Code	Type	Price each
AM34M	DN-1	£49.95

LC-1 Capacitance-Inductance Meter Kit

This unit will save you hours of time in testing those old components, checking values and creating designs. Use with any multimeter and we even supply calibration components. Just plug inductor or capacitor into test socket supplied and read value.

Range: 01µH – 10mH
2pF – 2.0µF
Supply: 9V

Order Code	Type	Price each
RU38R	LC-1	£39.95
RU39N	CLC Case	£14.95

HOWES KITS-UK

QRP CW HF Transmitters

Great fun for holidays etc., there's models for 80m, 40m and 20m. Each one is complete with crystal for the UK QRP frequency. There's also an optional matching vfo model CVF. (50pF tuning capacitor needed).

Output (max.): 20m:10W
40m:3W
80m: 5W
Supply: 13.8V

Order Code	Type	Price each
RU40T	CTX-40	£16.95
RU41U	CTX-80	£16.95
RU42V	MTX-20	£29.95
RU43W	CVF-20	£12.95
RU44X	CVF-40	£12.95
RU45Y	CVF-80	£12.95

ASL-5 SSB/CW Audio Filter

Dramatically improves SSB and CW signals. Plugs into receiver headphone or speaker socket. Gives you sharp band-pass filtering for SSB and 300Hz selectivity for CW. Requires 12V DC and provides 1W output. Ideal for improving scanner reception. Case 180 x 204 x 32mm

Order Code	Type	Price each
AB99H	ASL-5	£16.95
AM33L	ASL-5 Case	£14.95

DcRx Ham Band Receivers SSB & CW

The basic receiver kit that builds into a highly sensitive single band receiver and is an ideal companion for QRP transmitters. Full band

coverage is provided together with 1 Watt of audio. The only additional components you need are two 50pF variable capacitors.

Frequency: 20m; 40m; 80m
Supply: 12 – 14V

Order Code	Type	Price each
RU46A	DcRx-20	£17.95
RU47B	DcRx-40	£17.95
RU48C	DcRx-80	£17.95

Active HF Antenna 150kHz – 30MHz

A high performance active aerial for the shortwave listener. All you need to provide "long wire" performance in a small space. Just add 6 to 8ft of wire to pull the stations in.

Supply: 12 – 14V @ 25mA

Order Code	Type	Price each
RU49D	AA-2	£9.95

Active Antenna 25MHz – 1300MHz

For scanner owners, here's your chance to build an active aerial at a real down to earth price. For outside use it can be simply housed in a standard 1.5in plastic pipe. Receiver interface included for permitting 12V supply to be fed up coax cable.

Order Code	Type	Price each
RU50E	AA-4	£20.95

LOWE SRX50 Short Wave Receiver

- ★ Short Wave + Broadcast
- ★ Stereo FM (Inc. Headphone)
- ★ Digital Display/Alarm Clock
- ★ 20 Memory Capacity

Special Purchase

This compact receiver covers the domestic and major shortwave broadcast bands. Digital display gives precise frequency readout and also doubles as a travel clock and alarm. Now you can wake up in the morning and hear the world news as it happens. Very sensitive and superb value. Ideal for overseas travellers.

Range 153-281/531-1602kHz
5.9 - 15.5MHz
87.5 - 108MHz

Power 3 x AA

Size 180 x 120 x 35mm

Order Code	Type	Price each
CP24B E2	SRX-50	£39.95

LOWE HF-150 Communications Receiver

- ★ Professional Performance
- ★ Coverage 30kHz- 30MHz
- ★ Synchronous Detection on AM
- ★ Narrow & wide Filters
- ★ 60 Memories
- ★ Dual Conversion
- ★ USB/LSB/CW/AM

Now selling across the world, this British design has won glowing reports about its performance. Compact dimensions and solid construction enclose an electronic design that performs better than some receivers costing much more. It is also finding wide applications in the commercial field. Thoroughly recommended for the serious DX listener who demands good sensitivity and the ability to cope with strong adjacent channel signals.

Aerial 600 ohm/50 ohm/whip
Power 12V DC (AC adaptor inc.)
Internal ASA cells

Speaker 8 ohm built-in

Size 185 x 80 x 160mm

Order Code	Type	Price each
CM23A H4	Lowe HF-150	£389.95

SONY ICF-SW55 - SSB/AM/FM Short Wave Receiver Package

The best short wave portable in its class. It will pull in the weakest of stations and has 125 memories with programmable station data base.

Ideal for home or travel, it can be powered from batteries or its own mains supply adaptor. You also get telescopic whip, wire aerial, soft case and frequency guide. Covers 150kHz - 30MHz AM and SSB, plus FM 76 - 108MHz. This gives you full broadcast coverage plus short wave radio, aeronautical, marine and many other long distance stations. Now you can wake up to Radio Australia!

Power: 4 x 'AA' batteries or external 6V mains adaptor supplied

Size: 194 x 127 x 39mm

Weight: 0.9kg

Order Code	Type	Price each
CP23A H6	ICF-SW55	£279.95

Roberts RC-818 Short Wave Receiver and Cassette Recorder

- ★ Auto Scan
- ★ AM/FM/SSB
- ★ Timer/Record
- ★ 45 Memories
- ★ Dual Clocks
- ★ Keypad Entry

A high performance communications receiver with built-in cassette player that lets you time and record your favourite programmes, or that rare DX station. Continuous coverage from 150kHz to 30MHz plus FM broadcast 87.5 to 108MHz. Features built-in telescopic aerial, external aerial socket, RF gain, large LCD read-out and choice of dry cell or mains operation.

Supply: 4 x D plus 3xAA Cells
230V AC Mains

Dimensions: 296 x 192 x 68mm

Weight: 2kg

Order Code	Type	Price each
RU92A H4	RC-818	£219.95

ANT-60 Portable SW Aerial

Ideal for RC-818 receiver or similar. Unrolls to 30ft in seconds. Supplied with 3.5mm plug.

Order Code	Type	Price each
RU93B	ANT-60	£14.95

Short Wave Wire Aerial

- ★ 1.5MHz - 30MHz
- ★ 50m long
- ★ Ready to go

The ideal wire system for short wave reception. Its length may be reduced with only a small reduction in low frequency performance. Ready assembled, 50m stranded copper wire, with insulators and 20m of feeder plus nylon support cord.

Order Code	Type	Price each
RU52G	SWL-DX1	£25.95

A REAL CRYSTAL SET KIT! Ideal School Project

A chance to step back in time and experience the thrill and lure of 'cats whisker' detection. This kit includes a genuine Galena crystal, one of earth's natural minerals. For comparison you can switch over to a modern day diode - but there's not much difference! This is both a nostalgic radio and an educational kit that demonstrates the natural semiconductor properties of Galena. Kit includes all you need to get it working including a high impedance ear piece and a multi-tapped coil.

Coverage: 530 - 1750kHz
Size: 155 x 90 x 40mm

Order Code	Type	Price each
AB83E	CS-1	£19.95

Steepletone MBR-7 Wideband Receiver

- ★ 150 - 315kHz
- ★ 525 - 1650kHz
- ★ 2.3 - 22MHz
- ★ 87 - 109MHz
- ★ 107 - 176MHz

This new item is designed for those who want to explore the world of radio and get maximum frequency coverage in one package. In addition to your normal LW/MW and FM stations you'll be able to hear long distance broadcasts from across the world, VHF airband and marine traffic, emergency services, taxis and much more. Features include direction finder aerial, telescopic whip, S-meter, external antenna socket, PA facility, frequency book and carrying strap.

Power: 4 x HP2 or 240V AC
Size: 369 x 273 x 132mm

Order Code	Type	Price each
RU53H D2	MBR-7	£69.95

AT-2000 SWL Antenna Tuner

The most widely used short wave receiver tuner in use today. Used by enthusiasts throughout the world.

Freq: 100kHz to 30MHz
Antennas: Long wire/coax/twin feed
Connector: SO239
Size: 150 x 67 x 146mm

ES-200 Handheld 40 channels 4 watts

Ideal for portable operation such as camping and walking etc. It fully conforms to UK channel specification. LED readout gives channel numbers (can be switched off to save battery) and there's a squelch control for silent "standby". Can also be used mobile or base on an external antenna such as those described on this page.

Frequency: 27MHz 40 x UK channels
Power: 4 watts or 1 watt
Supply: 8 x AA dry or 10 x ni-cads
External 12V DC
Antenna: Flexible with BNC
Size: 189 x 70 x 49mm

Order Code	Type	Price each
CM30H E1	ES-200	£79.95

CB Spring Loaded Aerials

- ★ 27 MHz Band
- ★ Magnetic Base
- ★ Chrome Spring
- ★ Adjustable Tuning
- ★ 16ft Co-Ax

These smart antennas can be instantly mounted on your vehicle. W-1400 features short length with centre loading and slimline spring. Model B-202 has longer fibre glass whip with base loading and larger spring.

Order Code	Type	Price each
RU95D	B-202	£12.95
RU96E	W-1400	£18.95

SWR / Power Meter SWR-12

Ideal for adjusting antennas and checking power output of rig. Designed especially for 27MHz.

Frequency: 1.8 to 30MHz
Power: 10 Watts
Size: 85 x 55 x 60mm

Order Code	Type	Price each
CP27E	SWR-12	£11.95

SO-239 to 3/8" Adaptor

Lets you mount any 3/8" antenna onto the standard ham radio SO-239 socket.

Order Code	Type	Price each
RU55K	PL-5/8	£3.95

Midland 104 CB Mobile

Superb compact 40 channel mobile rig (or base with 12V DC supply). Ideal for keeping in touch with other drivers in unfamiliar parts or during traffic delays. Supplied complete with mobile mount and microphone.

Frequency: 27MHz UK spec. Antenna: SO 239 socket
Output: 4 Watts Size: 4" x 1" x 6"
Supply: 12 to 14V DC Weight: 1kg

Order Code	Type	Price each
CM29G E2	104 CB	£79.95

Midland 77-095 Mobile **NEW**

Super low price on this compact and simple to use mobile. Keep in touch with your CB friends with this delightful little rig. Features 40 channels, LED display, separate squelch and volume controls, electronic up/down tuning etc. Supplied complete with mic, mobile bracket and DC lead. MPT approved.

Channels: 40(UK System)
Dimensions: 165x120x35mm
Weight: 750g

Order Code	Type	Price each
RU97F D3	77-095	£59.95

Team 3004-UK Base Station

This smart desk top unit has been chosen by us for its performance and features. It includes variable power, optional "Roger Bleep", RF gain, signal meter, etc.

Frequency: 27MHz 40 UK channels
Power: 4 Watts
Antenna SO-239
Size: 85 x 55 x 60mm

RU58N	MTS-060	£10.95

CB Mobile Aerial Kit Mobile-27

A complete 27MHz CB mobile whip aerial system with magnetic base, whip and 12ft. cable terminated in a PL259 plug.

Ready tuned
Size 4ft. 7in.
Weight 0.75kg

Order Code	Type	Price each
CP28F H1	Mobile-27	£19.95

CB Base Aerial GP 26-28

- ★ 3.9dB Gain
- ★ High Performance

This base station aerial is a half wave omni-directional aerial that gives a gain equivalent to doubling your transmitter power. Completely self supporting and pre-tuned, absolutely no adjustment is necessary. Cannot be used legally in the UK for transmitting.

Height: 16ft
Power: 1000 watts
Fixing: 2in. mast
Base: 50 ohms SO239

Order Code	Type	Price each
CP25C H5	GP 26-28	£29.95

CB GP-127 Base Short Length Aerial

Conforms to the official UK limit put on CB aerials and is also ideal for loft use. Upper element length is 1.3m which comprises a helical winding for efficiency. The three radials are of similar construction and length.

Frequency: 27MHz
Max. Power: 100W
Total length: Approx. 2.2m

Order Code	Type	Price each
RU59P F3	GP-127	£24.95

Panther Mobile Whip 3/8" Mount

This highly efficient base loaded mobile aerial will fit the standard 3/8" mounts shown adjacently. Very cost effective yet a higher performer, this has been selected for its performance and value for money.

Length: 61"
Max. Power: 500W

Order Code	Type	Price each
RU60Q	Panther	£9.95

4

Radio Frequency Balun

1:1 50 Ohm current balun covering the range 3.5 - 30MHz and rated to 2kW. Ideal for dipoles and beams. Fitted SO-239 socket.
Length: 24cm
Weight: 450g

NEW

Order Code	Type	Price each
AB84F	RF Balun B1-2K	£25.95

Radio Frequency Line Isolator

Prevents common mode transmitter currents flowing down coaxial cable. Chokes off RF and prevents RF from flowing down coax cable and into chassis. Ideal for reducing interference problems. covers 3 - 30MHz and rated up to 2kW. Fitted SO-239 both ends.
Length: 24cm
Weight: 450g

NEW

Order Code	Type	Price each
AB85G	RF Line Iso 4K-L1	£25.95

DIAMOND VSWR & POWER METERS

SX-200 VSWR/Power Meter

Freq: 1.8-200MHz
Power Range: 5W/20W/200W
Readings: RMS or PEP
Accuracy: ±5%
Sensitivity: 1W
Insertion Loss: 0.15dB
Impedance: 50 Ohms
Connectors: SO239
Dimensions: 155W x 63H x 103D mm
Weight: 540g

Order Code	Type	Price each
XP70M B	SX-200 VSWR Meter	£89.95

SX-400 VSWR/Power Meter

Exactly the same as SX-200 but with a range of 140-525MHz.

Order Code	Type	Price each
XP71N B	SX-400 VSWR Meter	£104.95

SX-600 VSWR/Power Meter

Same basic specification as SX-200 with the following exceptions:

Specifications

Sensor 1: 1.8 - 160MHz; Sensor 2: 140 - 525MHz
Sensitivity: Sensor 1: 1W; Sensor 2: 4W

Order Code	Type	Price each
XP77J B	SX-600 VSWR Meter	£164.95

SX-1000 VSWR/Power Meter

Same basic specification as SX-200 with the following additions.

Sensor 1: 1.8 - 160MHz
Sensor 2: 430 - 13000MHz
Power: 5W/20W/200W
Accuracy: ±10%
Sensitivity: 1W (sensor 1)
2W (sensor 2)

Order Code	Type	Price each
XP72P B1	SX-1000 VSWR Meter	£229.95

Just Arrived! The MFJ Short Wave Regenerative Receiver Kit or Ready Built

- ★ Major ham & broadcast bands
- ★ High performance
- ★ AM SSB CW RTTY
- ★ Vernier reduction tuning drive
- ★ Smooth Regeneration
- ★ RF gain control

We had tremendous fun building this, and you will too. Designed as a beginners kit project or ready to go, it uses modern technology to reproduce one of the most successful receiver designs of years gone by. On just ten feet of wire indoors you will hear plenty of signals from all corners of the world. And the smooth regeneration helps you adjust both sensitivity and selectivity. Price includes case and cover (not shown). Ideal for youngsters from 12 to 100! Coverage is 3.5 - 4.32, 5.96 - 7.4, 9.56 - 12.05, 13.21 - 16.5, 17.6 - 22MHz.

Order Code	Type	Price each
RU61R C	8100-Kit	£71.95
RU62S D	8100-Wired	£99.95

RF 50 OHM DUMMY LOADS L-20 (PL-259) L-20N "N"

Power: 15W Continuous, 100W 30 secs.
Freq: DC - 500MHz
VSWR: 1.15 (worst)

Order Code	Type	Price each
ZA10L A1	L20 Dummy Load	£20.95
ZA05F A1	L20N Dummy Load	£29.95

MFJ-250 2kW Dummy Load

Ideal for handling high power. It will withstand 1kW of CW for ten minutes of 2kW of SSB. 2 litres of transformer oil (or vegetable oil) is needed.

Frequency: 1.8-400MHz
Size: 170 x 190mm

Order Code	Type	Price each
CP31J B2	MFJ-250	£49.95

MFJ-704 Low Pass Filter

- ★ 1.8 to 30MHz
- ★ 1.5kW
- ★ Low Loss

Dramatically reduces the chance of TV interference from ham radio and CB. Low pass filters are recommended by the DTI.

Order Code	Type	Price each
CP29G A1	MJF-704	£46.95

HP4A TVI Filter

The HP4A is a combined braid breaker and high pass filter. Fully encapsulated and fitted with Belling Lee connectors, it can be plugged directly into the TV receiver. The high measure of rejection ensures that transmitter RF is prevented from reaching the TV receiver via the coaxial aerial cable.

UHF TV use
HF rejection 70dB
VHF rejection (144MHz) 30dB
Insertion loss 2dB

Order Code	Type	Price each
ZA11M	HP4A	£10.95

MFJ-1278BX Data Controller Now with PACTOR!

- ★ Packet ★ SSTV ★ CW ★ Contest Keyer
- ★ Pactor ★ FAX ★ AMTOR
- ★ ASCII ★ RTTU ★ Navtex

Ham radios best selling data modem. Simply connects to audio lines of receiver or transceiver to give you all these modes. Designed for use with IBM compatible machines. Can be used with many shareware programs or for comprehensive performance order the matching 1289 software package.

Order Code	Type	Price each
CP32K H3	MFJ-1278 BX	£339.95

Radio Station Clock MFJ108B

This dual 24-hour and 12-hour clock lets you see at a glance your local time and any international time. The large LCD readout against a satin finish will beautifully complement your station.

Order Code	Type	Price each
CP40T	MFJ-108B	£24.95

VHF & UHF Wavemeters

WA1 120 - 450MHz

WA2 50 - 210MHz

WA3 1.8 - 92MHz

Designed to meet the UK Amateur Radio Licence requirements, these units will measure the presence and frequency bands of RF. DC amplifier is included plus a whip aerial.

Size: 120 x 60 x 45mm
Power: PP3 Battery

Order Code	Type	Price each
XP84F	WA-1	£29.95
CP41U C1	WA-2	£29.95
CP42V	WA-3	£54.95

Microset Power Supplies

Microset are well known for their high quality and reliability. This range of power supplies has been selected by us because of their rugged construction and excellent performance, either for hobby or industrial purposes.

Each unit is over current and over voltage protected. Variable supplies are also metered. All are designed for 240V AC input.

PT-107	7 Amp 13.5V fixed	100 x 180 x 165mm
PT-1012	12 Amp 13.5V fixed	110 x 200 x 240mm
PC-110	10 Amp 5 - 13.5V	110 x 200 x 240mm
PT-120	20 Amp 13.5V fixed	130 x 200 x 275mm
PC-120	20 Amp 8 - 13.5V	130 x 200 x 240mm
PT-135	35 Amp 13.5V fixed	170 x 200 x 240mm
PC-30	30Amp 8 - 15V	170 x 200 x 240mm

4

Active Receiving Antennas

Attention flat dwellers or those with small gardens. These low profile antennas are for you.

- ★ Only 8ft. long
- ★ 200kHz to 100MHz
- ★ Built-in preamplifier
- ★ No antenna tuning required
- ★ Power and RF through same cable
- ★ 11V DC @ 220mA power supply included
- ★ AD270 indoor, AD370 outdoor version

Order Code	Type	Price each
CM72P	A1 AD270	£59.95
CM73Q	B2 AD370	£79.95

Audio Filters

Whether you are a shortwave listener or an amateur radio enthusiast, these audio filters allow you to hear clearly signals that you never knew existed before.

- ★ 10 to 16V DC operation
- ★ Very easy to connect to your receiver
- ★ FL2 and FL3 have a low pass filter, high pass filter and a manual notch filter
- ★ FL3 has an extra automatic notch filter to remove whistles from signals automatically
- ★ FL2/A circuit module upgrades FL2 to FL3
- ★ ANF is a stand alone automatic notch filter

Order Code	Type	Price each
CM61R	A1 FL3	£149.95
CM65V	A1 FL2	£99.95
CM66W	A1 FL2/A	£54.95
CM68Y	ANF	£79.95

Converters

Does your shortwave receiver not cover the frequencies you want to hear? These converters allow you to use your existing receiver to listen to new frequencies.

- ★ 10 to 18V DC @ 50mA operation
- ★ Connects to the antenna socket
- ★ Model VHF lets a 28 to 30MHz receiver tune to 2m signals at 144 to 146MHz
- ★ Model VLF lets a 28 to 29MHz receiver tune to 0 to 1000kHz

Order Code	Type	Price each
CM64U	B2 VHF	£49.95
CM67X	B2 VLF	£39.95

The Datong D70 Morse Tutor

Learn Morse the easy way.

- ★ Thousands in use
- ★ Use anywhere – anytime
- ★ Generates random morse letters and numbers
- ★ Internal speaker, battery & earpiece included
- ★ Variable speed and delay
- ★ Built-in practice oscillator for use with morse key

Order Code	Type	Price each
CM63T	A1 D70	£64.95

DT-1 Dual Time Quartz Clock

Ideal for business use and radio amateurs where there is a need to have both local and overseas time displayed at a glance.

Dual clock movements let you set and view two different time zones. The front panel is attractively finished in brushed aluminium, and the unit is set in a wood frame for wall mounting.

Batteries:	2 x AA Cells	NEW!
Size:	225 x 310 x 25mm	
Weight:	225g	

Order Code	Type	Price each
AQ29G	DT-1	£24.95

BP-1 Packet Radio Modem Including Software

A completely self contained Packet Radio modem for use on VHF radio. Operates at 1200 Bauds and plugs directly into the RS-232 port of a standard PC; no external power being necessary. Simply connect supplied lead to audio and mic

sockets of your VHF transceiver for instant Packet communications. Software is included on 5.25" disk.

Connector:	RS232	NEW!
Software:	Baycom and Baypack	
Dimensions:	60 x 55 x 18mm	

Order Code	Type	Price each
CB03D	BP-1	£49.95

W9GR Digital Processing Filter

- ★ Reduces electrical interference
- ★ Eradicates static
- ★ Cleans up random noise etc.

Digital signal processing techniques bring the opportunity to dramatically reduce most kinds of interference suffered when using short wave radio receivers or transceivers. Effective on voice signals where the filter uses an LMS algorithm which can differentiate between random noise and the wanted signals. A similar technique is used to optimise the bandwidth for various data and CW signals. In addition there is a multiple notch filter included to remove heterodynes. Simply insert between audio output and headphones or speaker for dramatic noise reduction and fatigue free monitoring.

Output:	2W
Supply:	12V
Dimensions:	165 x 140 x 38mm
Weight:	600g

Order Code	Type	Price each
CB04E	C2 W9GR	£299.95

MFJ-259 Aerial Analyser and Frequency Counter 1.8 - 170MHz

'Turns Hours into Minutes and Ideas into Aerials'

NEW!

- ★ VSWR
- ★ Impedance
- ★ Resonance
- ★ Frequency
- ★ Self powered

Ideal for aerial designers and installers. Just connect it to any coaxial fed system and measure the critical parameters necessary for matching and efficiency. Does in minutes what previously took hours. Battery powered, the unit enables you to adjust your aerials on site without needing to apply power to them. Simple to use, this unit will soon pay for itself in saved time and frustration. Also doubles as a frequency counter. Use with beams, dipoles, vertical whips, helicals etc.

Frequency:	1.8-170MHz
Impedance:	10-500Ω
Gate Times:	4 (0.01-10secs.)
Inputs:	SO-239(Aerial) BNC(Counter)
Power:	8xAA or 12V ext.

Order Code	Type	Price each
CB05F	C1 MFJ-259	£249.95

MFJ-411 Morse Trainer

- ★ 5-50 WPM
- ★ 12 Modes
- ★ Random characters
- ★ Random words
- ★ Self contained
- ★ Built-in speaker
- ★ Simulated Ham Radio contacts

Just the thing for learning Morse code quickly. Take it with you, use it for student tuition or club use, this trainer is the most comprehensive we have seen. You can vary speed, tone, modes, character combinations and even select beginner or advanced options. The LED display and menu system allows instant adjustment of modes as you progress with your learning.

Order Code	Type	Price each
CB06G	MFJ-411	£89.95

49MHz No Licence Needed! Equipment conforms to MPT 1336

This compact handheld radio has 5 channels, squelch control, call button, telescopic antenna and nicad charge socket. With a typical range of 500yds its the ideal low cost way of keeping in touch without the need for a licence. These units are rugged and reliable. Optional charger and ni-cads available.

Power: 4 x AA cells
Current: 20mA standby
50mA transmit
Size: 158 x 66 x 36mm

Order Code	Type	Price each
RU71N	49-HD	£49.95
AB87U	Charger	£9.95
AB86T	AA Pack	£3.95

Maxon 49SX Headset Transceiver

Ideal for hands free communications for engineers, and restaurant staff etc. Includes headset boom mic and belt-clip control box. Switching can be automatic or voice operated. Typical range is 400yds. No licence required.

Power: 2 x AA cells
Frequency: 49MHz band

Order Code	Type	Price each
JM34M	MAXON 49-SX	£34.00

AR-300XL Aerial Rotator Suitable for VHF Beams

Ideal for VHF ham radio or TV aerials with boom lengths up to 4m. Comprises 240V control box with compass bearings and low voltage rotator. Requires 3-core control cable and motor accepts mast size 28 - 44mm diameter.

Maximum vertical load 220kg.

Order Code	Type	Price each
RU72P	H8 AR-300XL	£59.95

SP-140 Mobile Speaker

This high quality speaker matches all modem ham radio and CB transceivers.

Standard 8 ohm unit terminated in 3.5mm plug. Size 75 x 60mm, rated at 5 watts max. and includes mobile mounting bracket.

Order Code	Type	Price each
RU73Q	SP-140	£9.95

TALKING DIGITAL MULTIMETER

This ingenious 'talking' digital multimeter provides additional safety and convenience when working on mains or high voltage equipment, or in conditions where positioning of the test probes makes reading a meter difficult or impossible. Housed in a slim and easy to hold case, the probes are not detachable, but when not in use, are wrapped round the outside of the case and held in a recess. The probe tips are held in two receptacles on the side of the case for safety. Because of its slim size, the meter can conveniently be slipped into a pocket or toolbox. A 3-position 'voice' switch selects either off, single or auto. In single mode, an announcement is made only when a 'talk' button on the positive probe is pressed, or when there is a change of range in manual mode or change of function. In auto mode, an announcement is made whenever a new reading is captured. Another handy feature is the 'memory' switch, which is used to record the measured data and recall the last memory entry. The 'mem' button is pressed once to record the data, and voice confirmation of the recorded data will follow. To recall the last record, the 'mem' button is pressed and held for two seconds. The meter will hold the current displayed data and speak out the last memory entry. The meter is very easy to use having bright 'easy to read' buttons and switches. The function switch selects off, voltage, ohms and diode check, and a push button selection switch changes from DC to AC, in the voltage measuring mode, or changes to continuity check in the resistance measurement mode. When the meter is switched on, autoranging is automatically selected, to switch to the manual ranging mode press the 'range hold' button - 'R' is displayed and if voice is on, the meter will speak "RANGE". Pressing the button a second time switches the instrument to the lowest range, and with subsequent button pressing operations the ranges are cycled through. Holding the 'range hold' button down for

more than one second reverts to autoranging mode. Additional features include a visual low battery indicator and automatic polarity function, which displays '-'

on the display for negative polarity and no indication for positive polarity. The case has a built-in fold-away stand and retractable hook for 'hands-off' operation. Instruction manual supplied.

AMAZING VALUE!
£39.95
BU88V
A1

Measuring method:	Dual integration mode	Diode check:	0 to 2V
Display:	3.5 digit LCD, max reading of 1999 with auto polarity	Accuracy, DC:	±1.6% rdg ±2 dgts.
Sampling:	2 times/second	AC:	±2.3% rdg ±5 dgts.

Continuity check:	200Ω (max)	Power consumption:	20mW typical (no voice)
		Size:	148.5 x 73 x 25.4mm
		Weight:	240g approx. (without batteries)

IT'S A FACT!

MORSE CODE

In 1838 Samuel Morse devised a simple code of dots and dashes to enable messages to be transmitted over a single wire system.

Interestingly, the easily memorised letters, 'S-O-S', the international distress signal, were only given the catch-phrase, 'Save Our Souls' some time later.

Timing of the code is very important if any sense is to be made of the dots and dashes received by the listener. All timings are a function of the dot length, i.e. 1 dot = 1 unit

Dot (·) = 1 unit,	Dash (-) = 3 units
Pause between elements of one character	= 1 unit
Pause between the characters of a word	= 3 units
Pause between each word	= 7 units

THE CODE

A ..	J	S ...	2

CARTRIDGES

Mono Crystal BSR X5M

A crystal mono cartridge which is suitable for playing stereo records. Supplied with carrier for centre hole fixing or standard 1/2 in. fixing. Overall size: 28 x 15 x 11mm (excl tabs and lugs). Fitted with a diamond stylus.

Output at 1cm/sec: 400mV
Tracking Weight: 3 to 6gm
Frequency Response: 40Hz to 10kHz
Recommended Load: 2MΩ and 100pF
Stylus Fitted: ST12 or ST15 LP/LP
Changeover
Replacement stylus: ST12 or ST15

Order Code	Type	Price each
HR01B	Ctrdg BSR X5M	£5.79

Stereo Ceramic BSR SC12M and SC12H

A ceramic stereo cartridge supplied with carrier for centre hole fixing or standard 1/2 in fixing. Overall size: 28 x 9 x 8mm (excl tabs and lugs). Fitted with a diamond stylus.

Output at 1cm/sec: 100mV (12M), 170mV (12H)
Tracking weight: 2 to 6g (12M), 4 to 6g (12H)
Stylus fitted: ST20 LP or ST17
Replacement stylus: ST20

MAGNETIC CARTRIDGES

Sonotone V100

A stereo magnetic cartridge. Standard 1/2 in fixing only. Overall size: 28 x 11.5 x 13mm (excl tabs and lugs). Fitted with a diamond stylus.

Output at 5cm/sec: 7mV rms
Tracking weight: 2 to 2 1/2 gm
Frequency response: 20Hz to 20kHz
Stereo separation: >20dB at 1kHz
Recommended load: 47kΩ
Channel balance: <2dB at 1kHz
Stylus: 0.0006in diamond
Replacement stylus: V100

Order Code	Type	Price each
HR17T	Ctrdg Sono V100	£11.99

Goldring G800

A stereo magnetic cartridge. Standard 1/2 in fixing only. Overall size: 28 x 13.5 x 15mm (excl tabs and lugs). Fitted with a diamond stylus.

Output at 5cm/sec: 5mV rms
Tracking weight: 1 1/2 to 2 1/2 gm
Frequency range: 20Hz to 20kHz
Stereo separation: 20dB at 1kHz
Recommended load: 47kΩ to 100kΩ
Channel balance: 2dB
Compliance (static): 20 x 10⁻⁶ cm/dyne
Tip mass: 1 mgm
Cartridge weight: 7.5gm
Stylus: 0.0005in diamond
Replacement stylus: D110SR

Order Code	Type	Price each
HR16S	Ctrdg Goldring G800	£23.99

**COMPARE OUR PRICE &
QUALITY – SAVE MONEY TODAY!**

Goldring G800H

A stereo magnetic cartridge. Standard 1/2in fixing only. The heavier tracking version of the G800, ideal for playing 45's owing to its slightly larger stylus tip. Overall size: 28 x 13.5 x 15mm (excl tabs and lugs). Fitted with a diamond stylus.

Output at 5cm/sec: 8mV
 Tracking weight: 2 1/2 to 3 1/2 gm
 Frequency range: 20Hz to 20kHz
 Stereo separation: 20dB at 1kHz
 Recommended load: 47kΩ to 100kΩ
 Channel balance: 2dB
 Compliance (static): 18 x 10⁻⁶ cm/dyne
 Tip mass: 1.2mgm
 Cartridge weight: 8gm
 Stylus: 0.0007in diamond.

Order Code	Type	Price each
FQ38R	Ctrdg Goldring G800H	£19.99

Shure Encore ME70-B

A stereo magnetic cartridge. 1/2in fixing only.

Output, 1kHz at 5cm/sec: 6mV
 Tracking force: 1 1/2 to 3gm
 Frequency response: 20Hz to 20kHz
 Stereo separation: 20dB
 Channel balance: <2dB
 Stylus: 0.0006in spherical diamond N70B

IT'S A FACT!

JAMES CLERK MAXWELL (1831-79) was a British physicist, whose profound contributions to the mathematical analysis of electromagnetic radiation has placed him among the great scientists of the 19th and 20th centuries. Continuing the work of the British scientist Michael Faraday on the electromagnetic field, Maxwell concluded that light is an electromagnetic phenomenon. His work paved the way for the investigations of the German physicist Heinrich Rudolf Hertz, who experimentally confirmed Maxwell's theories. The unit of magnetic flux, the Maxwell, was named in his honour.

CD Carrying Box

A compact disc storage/carry box in the same style as the cassette boxes. Will take 15 single discs or 3 double disc packs with 8 singles. Dimensions 295 x 150 x 150mm.

Order Code	Type	Price each
ZA84F	CD Carry Box	£3.99

Stack-A-Tier Storage System

A very versatile storage system for CDs, computer game cartridges, video cassettes and audio cassettes. By assembling the rack with the shelf supports in various positions, the system can hold up to 56 CDs, or 34 audio cassettes, or 9 video cassettes in film cases (10 in slip cases) or various combinations of each. The rack is stackable, up to a recommended maximum of three high, and can be expanded horizontally, simply by placing units side by side. Supplied flat packed for easy carriage, the unit can be assembled to your requirements by means of straightforward push-fit joints. Overall assembled dimensions: 325(H) x 340(W) x 138(D)mm. Colour: black.

Order Code	Type	Price each
MJ13P	Stack-A-Tier	£6.99

CASSETTE ROTA-RACK DOUBLE

An attractive transparent smoke grey plastic cassette rack that revolves on a circular base. Has two tiers holding a total of 40 cassettes or 64 cassettes without their library boxes. When fully loaded, the rack requires a space of 250mm diameter to revolve in and the height is 265mm. Supplied in a neat flatpack and easily assembled.

AUDIO TERMS

Wow and Flutter - These are speed fluctuations, that are normally associated with turntables and tape recorders, and produce a 'wavering' or 'quivering' effect on the sound - a very noticeable effect on piano. Fortunately, CD players are virtually free of wow and flutter, but tape transport systems can obviously be affected by wow and flutter in both record and playback. Fluctuations in sound, below about 6Hz are called wow, and fluctuations from about 6Hz to 20Hz are called flutter.

Harmonic Distortion - Regardless of how well an amplifier circuit has been designed, there will always be odd or even harmonics produced that were not present in the input signal. These harmonics combine with the original input signal and produce distortion - normally a result of the system being non-linear. The distortion is normally quoted as a percentage and is the ratio of the root mean square (r.m.s) voltage of the total harmonics in the output signal to the total r.m.s voltage of the input signal.

Intermodulation Distortion - This is the result of a low frequency signal modulating a high frequency signal in an amplifier.

CASSETTE CARE PRODUCTS

NOTE: All cassette care products can be successfully used with computer cassette players and car cassette players.

Safeclene

A tape drive cleaning fluid with an internationally approved solvent for cleaning delicate equipment. It is used with Safewipes and Safebuds for cleaning tape drives. It will dissolve light oil and grease, and leaves no residue and will not affect sensitive plastics. Supplied in 300gm aerosol can.

Order Code	Type	Price each
DM80B	Safeclene Plus	£8.99

Head Cleaner Cassette TDK

This head cleaner is a non-abrasive, simple to use head cleaner that effectively removes harmful oxide accumulations from cassette deck heads. It will help to maintain optimum sound quality and peak operating performance from virtually any cassette deck.

Order Code	Type	Price each
KR07H	Head Cleaner	£1.99

Cassette Head Cleaner and Demagnetiser

Incas

This cassette contains a special cleaning tape and also incorporates a revolving magnet which quickly demagnetises the tape heads as well as cleaning them. The cassette is supplied with a bottle of head cleaning fluid

Order Code	Type	Price each
YW89W	Cassette Cln & Demag	£1.99

Library Cases

Empty plastic library cases for single or double cassettes.

Order Code	Type	Price each
RB03D	Cassette Case Single	38p
JK64U	Cassette Case Double	60p

Cassette Fast Winder

Bib

The cassette tape winder enables you to wind tape quickly by hand whilst listening to another tape. Suitable for a battery player/recorder, because battery consumption is high when rewinding. The rewind time for a C90 tape is 60 seconds – faster than most recorders! The winder comprises a stowable handle attached to a large gear wheel that drives a hexagonal shaft through a pinion. The gears are housed in a tough plastic housing.

Order Code	Type	Price each
RT57M	Fast Tape Winder	£3.99

Cassette Carrying Boxes

Stylish cassette carrying boxes made from black plastic. The small box will hold 12 cassettes and the large box 24 cassettes.

Dimensions, small box 295 x 75 x 130mm, large box 295 x 75 x 250mm.

Order Code	Type	Price each
XM95D	Small Cas Box	£1.99
XM96E	Large Cas Box	£3.49

TOP QUALITY PRODUCTS AT SUPER LOW PRICES!

SPARE PARTS FOR CASSETTE RECORDERS

Walkman-Type Drive Belts

Two good quality drive belts for use with Walkman-type cassette recorders. The following sizes are both available with a square cross-section.

Diameter	Cross-section
26mm	1mm ²
30½mm	1mm ²

Order Code	Type	Price each
FD44X	Drive Belt 26mm	48p
FD45Y	Drive Belt 30.5mm	48p

Cassette Player Drive Belts

A range of good quality drive belts for use with cassette recorders. All belts have a square cross-section of 1.2mm². The following sizes are available: 19mm, 30mm, 35mm, 46mm, 57mm, 66mm, 70mm, 75.5mm, 83mm, 90mm, 100mm and 110mm.

Cassette Tape Heads Stereo Sendust

A long life very high quality sendust cassette tape head with standard fixing bracket. Designed for use on stereo cassette recorders as the record and/or playback head. Has tape guide fitted.

Specification	
DC Resistance:	280Ω
Impedance:	1KΩ at 1kHz
Record current:	41μA (at 333Hz)
Bias current:	450μA at 80kHz
Playback sensitivity:	330μV at 333Hz (-68dB ±2dB)
Dimensions of head:	Width: 10.5mm Depth: 15.5mm Height: 8.5mm
Bracket fixing centres:	17-19mm x M2 clear

Order Code	Type	Price each
FQ63T	Stereo Cassette Head	£25.49

Standard Mono

A standard quality replacement cassette tape head with standard fixing bracket. Designed for use on mono cassette recorders as the record and/or playback head. Has tape guide fitted.

Specification	
DC Resistance:	250Ω
Impedance:	550Ω at 1kHz
Record current:	56μA
Bias current:	720μA at 50kHz
Playback sensitivity:	550μV at 330Hz
Dimensions of head:	Width: 11mm Depth: 12.6mm Height: 8.5mm
Bracket fixing centres:	17mm x M2 clear

Order Code	Type	Price each
FQ64U	Mono Cassette Head	£5.99

01702 554161

Erase

A standard quality replacement cassette tape head with standard fixing bracket. Designed for use on mono or stereo cassette recorders as the erase head. Has tape guide fitted.

Specification

DC Resistance: 5.2
 Impedance: 130Ω at 100kHz
 Erase current: 50mA
 Dimensions of head: Width: 10.5mm
 Depth: 12.4mm
 Height: 9.2mm
 Bracket fixing centres: 15.5mm x M2 clear

Order Code	Type	Price each
FQ66W	Cassette Erase Head	£3.99

Standard Stereo

A standard quality replacement cassette tape head with standard fixing bracket. Designed for use on stereo cassette recorders as the record and/or playback head. Has tape guide fitted.

Specification

DC Resistance: 220Ω
 Impedance: 850Ω at 1kHz
 Record current: 35μA
 Bias current: 350μA at 50kHz
 Playback sensitivity: 250μV at 333Hz
 Dimensions of head: Width: 11mm
 Depth: 12.6mm
 Height: 8.5mm
 Bracket fixing centres: 17mm x M2 clear

Order Code	Type	Price each
FQ65V	Stereo Cassette Head	£7.49

CASSETTE TAPES

Micro Cassettes

TDK

A micro cassette for dictation machines and compact Micro Cassette players. The D-MC60 is a TDK ferric-oxide tape ideal for speech and general purpose use including music, total playing time 60 minutes.

Order Code	Type	Price each
CT40T	D Micro MC-60	£2.49

TDK Cassette Tapes

Presenting an extensive range of top quality audio cassette tapes selected from one of the world's leading manufacturers of magnetic tape. The different grades of ferrous/normal, chrome-dioxide and metal formulated cassette tapes we have available are as follows.

Oxide	TDK Type	Stock Code
Normal	D-60	CT02C
	D-90	CT03D
	AD-90	CT09K
	AR-90	KR02C
CrO ₂	SA-60	CT23A
	SA-90	CT24B
	SA-X60	CT26D
	SA-X90	CT27E

Normal

Cassette tapes utilising a fine-grained ferric-oxide coating for high sensitivity and minimum background noise. The D type is an ideal low cost choice for general purpose usage with consistently good performance. The AD type offers improved high frequency response with lower background noise, and the AR has non-porous NP ferric particles which combine excellent MOL with low noise. All types available with total playing times of 90 minutes and some with 60 minutes.

CrO₂

Chrome-dioxide tapes provide a frequency response, dynamic range and signal-to-noise ratio much superior to ferric-oxide tapes. Cassette shells are precision injection moulded for best phase characteristics. Types SA will accept high recording levels over the full audio band providing high output with very low inherent tape noise. The SA-X types offer an even better signal-to-noise ratio and crystal clear clarity. Both types available in 60 and 90 minute sizes.

Order Code	Type	Price each
CT02C	TDK D-60	98p
CT03D	TDK D-90	£1.28
CT09K	TDK AD-90	£1.55
KR02C	TDK AR-90	£1.75
CT23A	TDK SA-60	£1.75
CT24B	TDK SA-90	£2.15
CT26D	TDK SA-X60	£2.10
CT27E	TDK SA-X90	£2.45

VIDEO CASSETTES

TDK Range of Video Cassettes for VHS, VHS-C and 8mm

A range of very high quality VHS tapes using TDK's 'Super Avilyn' technology. The HS-E180 is recommended for regular daily use and time-shift recording. Its high energy formulation ensures better pictures and sound. Increased efficiency 'Super Avilyn' magnetic particles, individually encapsulated in

the new TDC (Three Dimensional Binder) ensures higher image quality and durability. The E-HG E180 extra high grade is recommended for long play

(6 hours), camcorder and library building. High packing density, ultra fine 'Super Avilyn' particles, achieved through the latest in particle surface control and orientation

technology, has created a high grade tape approaching professional quality. The Hi-Fi E180 extra high grade tape, with its tough TDC binder, super smooth base film and extra low drop-out performance, is recommended for music and stereo broadcasts. When only the best will do, camcorders, editing, mastering and all professional applications, the HD-X PRO E180 is the answer – the ultimate in VHS performance.

For VHS-C applications the E-HG EC45 tape is available and the 'Super Finavix' metal particle HS-100 is for use in 8mm equipment.

Tape	Total Playing Time (normal play)
HS-E180	3 hrs
E-HG E180	3 hrs (6 hrs LP)
Hi-Fi E180	3 hrs
HD-X Pro E180	3 hrs
E-HG EC45	3/4 hr
HS-100	1 hr 40 mins (3 hrs 20 mins LP)

Order Code	Type	Price each
KR03D	TDK HS-E180	£3.49
KR04E	TDK E-HG E180	£4.49
KR05F	TDK Hi-Fi E180	£4.99
KR06G	TDK HDX Pro E180	£9.99
BU68Y	TDK E-HG EC45	£4.99
BU69A	TDK HS-100	£6.99

VIDEO ACCESSORIES

Tape Head Cleaner Aerosol

Removes contaminants from all magnetic tape heads, including critical video recording heads. Ensures peak response and best quality reproduction. It is electrically inert and safe in contact with all paints, rubbers and plastics. Leaves no residue.

Supplied in 100ml aerosol can.

Order Code	Type	Price each
DM81C	Tape Head Cleaner	£5.75

Video Tape Head Cleaning Tools

Optum

A pack of five specially shaped tools for reaching the head in video cassette recorders. The probe tip is covered with a special material which will quickly clean the delicate precision head.

Order Code	Type	Price each
YN99H	Video Head Cleaner	£1.16

Wet/Dry Video Head Cleaning Tape

If there is one form of tape recording machine that is exceptionally fussy about tape head cleanliness, it must be the home video recorder. Because the video head has to be able to record or playback signals on video tape at frequencies bordering on the limits of tape recording as a medium (typically 6MHz), even moderate deposits of dirt and grime can be sufficient to cause enough drop-out so as to lose the picture entirely.

These video head cleaner cassettes contain a blue fibre tape into which cleaning fluid slowly permeates. The cleaning fluid is dripped into a hole in the top of the cassette. The cassette is then played in the machine for 10 to 20 seconds during which time the fluid will act on the video head drum and all other heads and tape guides. After a few seconds the cleaning fluid is used up and the remaining tape then dries the components. The tape may then be rewound and reused. Do not use more often than necessary; about once every 20 to 30 hours is sufficient. Available for VHS systems only.

Order Code	Type	Price each
FV39N	VHS Video Head Clean	£4.99

Tape Head Cleaning Fluid

An 18cc bottle of specially formulated cleaning fluid for use with the cleaning tools and as a replacement for the fluid supplied with the Head Cleaner Tapes.

Order Code	Type	Price each
FS88V	Head Cleaner Fluid	75p

Automatic Video Cassette Tape Splicer

A very easy-to-use video cassette tape splicer which automatically dispenses a piece of pre-cut splicing tape onto the precise position of the tape join. Extremely detailed instructions are supplied showing how to repair the sort of typical damage that can be inflicted on VHS and Beta cassettes. The splicer is supplied with a screwdriver for dismantling cassettes; tape spool holders; a pair of gloves; and two spare blades. Replacement splicing tape cartridges are available.

Order Code	Type	Price each
YP60Q	Auto Video Splicer	£18.99
FS63T	Vid Splicer Cartridge	£2.49

Video Recorder Drive Belts

A range of kits each containing a complete set of replacement drive belts for the most popular video recorders.

MJ44X	Service Kit VC9300	£16.99

Cassette Adaptor

This cassette adaptor will prove to be a handy tool for advance viewing of those camcorder takes. This adaptor will accept any VHS-C format compact video cassette tapes for recording or playback and fits into a standard VCR. The adaptor is constructed of durable plastic and metal, and in use, the top cover is slid back to accept a VHS-C tape and then closed. To play, the adaptor is placed into the VCR and used in the normal way as for a standard cassette.

Order Code	Type	Price each
RT59P	VHS-C Adaptor	£14.99

VIDEO ENHANCERS

Note that all video enhancers operate in the 0 to 6MHz video frequency range, *not* at UHF frequencies. They cannot be used in aerial leads or connected to the aerial input of a TV set. However, they can be used on TV monitor inputs if your TV set has one of these. Normally they would be connected between two video recorders. Enhancers are designed to minimise generation loss when dubbing or to improve sharpness and detail for viewing, but they will *not* provide better copies than originals!

Video Colour Processor

This quality video colour processor allows the user to correct colour saturation and contrast from a camcorder or VCR. The unit features a gain control for improving the image when shooting under low-light

conditions, a colour control to provide colour compensation for improved colour saturation, plus editing facilities in the form of video and audio fade controls. A fade bypass/on slide switch is also provided. Phono sockets are provided to allow input from a camcorder and an output to a VCR. When in use the video recording is monitored by connecting a TV to the VCR. Requires a 12V DC 200mA mains adaptor (XX09K).

Specification		
Video		
Input level:	0.8V to 1.5V (p-p)	
	1.0V p-p nominal	
Input impedance:	75Ω	
Output contrast level:	Unity ±1dB

CC02C 31	Video Colour Proc	£42.99

Video Enhancer with Sharpness Control

A video/audio controller designed to improve the TV picture quality when dubbing or playing back home video, and is instrumental in improving poor recordings. A recording can be made on two VTR's at the same time, while audio can be recorded in stereo, or left and right channels may be combined for recording in a mono system VTR. On playback the VTR can transmit to a remote TV monitor via 75Ω coaxial cable up to 100 metres in length, without degrading picture quality. Controls are provided for the adjustment of contrast and sharpness for optimum results. A filter will eliminate noise in the ALC circuit caused by repeated dubbing operations. Requires 1 PP3 battery (supplied), or an external 9V supply via a DC input jack socket. See note above.

Order Code	Type	Price each
XG59P E1	Video Enhancer VH607	£52.99

Video Enhancer/Editor

This high quality home video enhancer/editor, with stereo sound, ideal for editing, processing and enhancing home videos, quickly and easily whilst adding an extra sound track and narration. The unit is provided with three sound channels to allow mixing of the original sound track with music and narration, plus a master control to set overall audio output, which can be monitored on two VU meters. The unit has sockets for connecting inputs from a camcorder, VCR or laser video player, CD player, tape deck, radio cassette or microphone, and connecting outputs to a VCR and headphones. The video can be monitored via the VCR. Other features include video enhancer controls for sharpness, contrast and brightness, switched enhancer bypass and a stereo/mono selector. The unit is supplied with a microphone, interconnection leads, mains adaptor and instructions.

Specification		
Audio		
Audio input sensitivity		
Microphone:	-60dB 600Ω	
Music:	-10dB 50kΩ	
VCR Audio:	-10dB 47kΩ	
Audio output level(Master VR):	0dB ±2dB 5kΩ	
Audio frequency response:	40Hz to 14kHz ±1dB	
Signal to noise ratio:	>40dB	
Channel separation:	>25dB	
Video input:	1.0V (pk-to-pk) 75Ω	
Video output - bypass:	1.0V (pk-to-pk) 75Ω	
- enhancer:	0.6V to 1.2V ±0.2V (pk-to-pk)

VIDEO PROCESSOR WITH SPECIAL EFFECTS

NEW

Now you can create exciting home videos with this superb video editing processor. The processor has a wide range of diverse video effects including fade in/out and over 30 wipe patterns which allows you to cut and mix images from two different sources (i.e. a video recorder and camcorder) to enhance your videos. The fade in/out can be from a black and white or colour background. The borders of the wipe pattern can have a 'halo' effect which can be varied from sharp to a very soft focus. Similarly, the pattern angle can be varied from horizontal to vertical. In addition, there is a built-in stereo audio mixer which features three stereo inputs. This allows the audio output from the camcorder to be mixed with background music and a voice over. The audio master volume adjusts the volume of the over-all mix – an LED stereo bargraph is provided to assist in setting the master volume control. The video master control adjusts the fade under 'fade' mode, or the wipe pattern position on screen under 'wipe' mode. A microphone jack socket is provided for an external microphone for commentaries and voice overs.

A headphone output allows the audio mix to be monitored via headphones. A black and burst output provides synchronising pulses to cameras, VCRs and time base correctors (TBC) that can accept such information. A 'genlock' switch is provided to select operation with a genlock source. For normal use this will be operated in the normal position. Dimensions 380 x 250 x 65mm. Requires an external 12V DC supply.

2.2 Inch Pocket LCD Colour TV

This pocket sized colour TV uses the latest state-of-the-art LCD and SMT technology to give you a crystal clear colour picture on its V56mm flat LCD display, with electro-luminescent backlight. Measuring just 138 x 81 x 38mm and weighing 350g, it has electronic auto search tuning with an on screen tuning indicator and a telescopic aerial. Other controls are ON/OFF, volume, brightness and colour, and a channel recall button. The internal loudspeaker gives good quality sound reproduction and for private listening a headphone jack socket is provided. There are also inputs for an external aerial and 6V DC from a special mains adaptor or car adaptor. Power requirements, 4 off AA sized alkaline cells (FK64U), battery life is approximately 3 hours. Supplied with 4 test batteries (1 hour life) and a soft case. TV is compatible with UK standard PAL transmissions.

Casio TV-7100 Pocket Television

NEW!

Simulated picture

A compact 3.3in. miniature colour television, that fits neatly into your pocket, allowing you to watch your favourite programmes wherever you go. The unique tuning controls offer selection of channels 21 through to 68, with just two buttons. Press one button to tune up the band, and the other to tune down. Connections to the television include an external antenna socket, earphone jack, external power socket (9V DC) and an audio/video socket. A telescopic aerial is supplied with the unit, and gives good quality reception in almost every situation. Six AA batteries are required to power the unit or alternatively, an external power supply (not supplied). Approximately three hours viewing is possible from alkaline-manganese batteries.

Specification

Supply voltage: 9V DC
 Supply current: 1,400mA
 Power consumption: 6.5W
 Dimensions: 93 x 110 x 55mm (W x H x D)
 Weight: 440g (including batteries)

SCART CONNECTORS

Scart Extension Leads

Three 1m long extension leads with 1 to 2-way, 1 to 3-way or 1 to 5-way adaptors, connecting a Scart plug at one end to two, three or five Scart sockets in a box 98 x 70 x 30mm, or 125 x 70 x 30mm, or 188 x

70 x 30mm respectively. The cable is a sleeved loom 10mm in diameter containing individually screened conductors where required. The lead is merely an extension and does not include any in/out line reversals; all pins on the plug connect directly to all equivalent pins in all sockets simultaneously. Use to connect two TVs to one VCR, etc. with the aid of twin plug connection leads (as above). Note that contention from more than one audio/video etc. outputs sharing one conductor must be avoided, but one output to two or more inputs is allowable. Colour black.

Order Code	Type	Price each

AQ18U	Scart Ext/Adaptor 5W	£9.99

21-way Peritel (SCART) Switchable 'T' Adaptor

This clever switched adaptor removes the need to keep unplugging and reconnecting your video recorder, satellite receiver, computer, video game and TV, depending on which you are using or watching, or want to record. The unit consists of a box which has two interconnected 21-way Peritel (SCART) sockets mounted on it, and a 45cm long output cable terminated in a 21-way plug, which can be switched to either of the two sockets, by means of a latching push-button switch, also mounted on the box. The adaptor is suitable for Composite Video and Stereo Audio, and internal diodes prevent function control conflicts. Uses include connecting a satellite receiver and a video recorder to a single TV, or viewing a video recorder/satellite receiver on two TVs simultaneously. Please note if one of the video sources has 12V on the switching line and the other source does not, then certain unwanted effects can result.

A suitable plug to plug cable for use with this adaptor is Peritel Connecting Cable, JW36P. Extension leads ZB29G and JZ26D are also suitable.

UNIVERSAL REMOTE CONTROL UNIT

The 'One for all 4' infra-red remote control unit is compatible with almost all TVs, Video Recorders, Satellite Receivers and Cable TV installations that use infra-red remote control units. It can be used as a replacement for lost or broken units, or to control up to four separate appliances, in any combination, removing the need for four separate infra-red remote control units.

Programming is straightforward and requires only four keystrokes plus your appliance's 3-digit code, which is listed in the comprehensive Instruction Guide and Code Book.

All the necessary codes are pre-programmed into this unit so, unlike similar universal remote units, there is no need to use the original remote units for programming.

The unit requires four AAA size alkaline batteries, such as FK63T or JY50E (not included). Overall dimensions: 190 x 62 x 15mm

Peritel (SCART) Switching Unit

A switch box providing an easy method of coupling a TV up to three separate items of ancillary video equipment using Peritel (SCART) video and audio

connectors. With the TV plugged into the 'TELEVISION' outlet socket and set to the A/V or SCART input mode, any one of three inputs can be selected for viewing using the latch-button selector bank on the right-hand side of the front panel ('1', '2', '3'). These can be VCRs, satellite receivers, camcorders or computers having SCART standard composite video and sound output. The first two input sockets on the switch box are labelled 'VCR-1' and 'VCR-2', while the third is labelled 'VCR-3/SATELLITE/COMPUTER'.

In addition signals from either input socket 2 or 3 can be recorded by a VCR on socket 1 using the left-hand switch bank if required. Left and right audio output for Hi-Fi or stereo from the selected channel is also available via two output phono sockets.

The unit is housed in a black steel case with a non-slip foam base. Overall dimensions: 145(W) x 130(D) x 45(H)mm.

Did You Know?

Alan Dower Blumlein (1903 to 1942) was well known in the world of audio for his work on stereophonic sound. His scientific work is recorded in no less than 129 patents of which only a few are in the field of stereophonics. Part of his work described a means of recording two signals in the same record groove, which is the 45°-45° system that is used today. His other contributions cover wireless, telephony, television and radar. During World War II, he was at the forefront of airborne radar development, which proved to be a decisive factor in the Battle of Britain. Ironically, he died in a Halifax plane that crashed - the one that was used in the radar research.

TRANSDUCERS Ultrasonic Transducers

Sting

A high sensitivity ultrasonic transmitter and receiver, sold only in pairs, for sending and receiving ultrasonic sound through the air, either as a continuous wave or pulses. Applications include burglar alarm systems, proximity switches, liquid level meters, anti-collision devices, counters for moving objects, TV remote control systems etc.

Characteristics

	T40-16 Transmitter	R40-16 Receiver
Sensitivity (dB)	17±6*	-56±6†
Resonant freq. (kHz)	40±1	40±1
Max. input (Vrms)	7	—
Impedance (Ω) approx	200	70k
Capacitance (pF) ±20%	1400	1400
Pulse rise time (msec)	2	0.5
Max input voltage, pulse operation:	60V p-p	—

* 0dB = 1µBar/V/m

† 0dB = 1V/µBar with 47kΩ shunt.

Overall size 15mm dia x 12mm deep (connecting pins protrude a further 9mm) Pins are 10mm apart.

Order Code	Type	Price each
HY12N	Ultrasonic Transducer	£4.99

Piezo Transducers

These ceramic piezo transducer elements generate a range of audible tones and frequencies when energised by 3V peak square wave. They can be driven direct from CMOS IC's with low power consumption. They are supplied unmounted and with wires attached. Provided they are mounted rigidly in the prescribed manner, outputs of up to 90dB can be achieved. In addition to a wide range of applications where audible warnings or indications are preferred to visual, other uses include toys, clocks and watches,

calculators and electronic games, using the transducer in place of a speaker. Because there are no moving parts to wear out, these elements are reliable for use in professional, commercial and industrial applications. They withstand severe environmental conditions and prove durable in domestic appliances without causing r.f. interference. A range of different sizes is available.

Specifications

Piezo Transducer 27mm/1.8kHz

Resonant frequency:	1.8kHz ±0.5kHz
Impedance at resonance:	800Ω
Capacitance:	25nF ±30%
Maximum input voltage:	30V p-p
Operating temperature:	-20°C to +70°C

Piezo Transducer 27mm/4.2kHz

Resonant frequency:	4.2kHz ±0.5kHz
Impedance at resonance:	500Ω
Capacitance:	14nF ±30%
Maximum input voltage:	30V p-p
Operating temperature:	-20°C to +70°C

Piezo Transducer 35mm/2.8kHz

Resonant frequency:	2.8kHz ±0.5kHz
Impedance at resonance:	450Ω
Capacitance:	20nF ±30%
Maximum input voltage:	30V p-p
Operating temperature:	-20°C to +70°C

Piezo Transducer 35mm/2.8kHz with feedback electrode

Resonant frequency:	2.8kHz ±0.5kHz
Impedance at resonance:	450Ω
Capacitance:	19nF ±30%
Maximum input voltage:	30V p-p
Operating temperature:	-20°C to +70°C

Piezo Transducer 41mm/2.0kHz for speech

Resonant frequency:	2.0kHz ±0.5kHz
Frequency range:	750Hz to 20kHz
Impedance at resonance:	600Ω
Capacitance:	40nF ±30%
Maximum input voltage:	15V p-p
Operating temperature:	-20°C to +70°C

Piezo Transducer 50mm/2.8kHz

Resonant frequency:	2.8kHz ±0.5kHz
Impedance at resonance:	500Ω
Capacitance:	20nF ±30%
Maximum input voltage:	30V p-p
Operating temperature:	-20°C to +70°C
Nodal ring diameter:	34mm

Note: These transducers are supplied unmounted and with wires attached. If it is required to remove/reattach wires this must be carried out extremely carefully. Soldering to the silvered electrode must be done with the minimum of heat for a fraction of a second, or destruction of the silvering begins to occur.

The brass rim of the transducer acts as a heatsink and will require more heat, but the minimum of solder should be used. The transducers may be mounted to a surface using any suitable adhesive.

PIEZO SOUNDERS PCB Mounting

A piezo electric sounder for direct mounting on pcb's. Two 1mm dia. holes are required 10mm apart.

Resonant frequency:	4kHz ±500Hz
Resonant resistance:	300Ω max.
Electrostatic capacitance:	17nF ±30%
Max. input voltage:	30V p-p
Nominal drive voltage:	10V p-p
Output at 10V p-p:	95dB @ 30cm
Size:	24mm dia. 5.5mm thick

Order

Code	Type	Price each
JH24B	PCB Piezo Sounder	75p

Very Low Profile Piezo Sounder

A piezoelectric sounder which can supply levels of over 100dB at a distance of 30cm, yet is only 4mm high. It can therefore be used wherever space is at an absolute premium. It requires an external driver which should operate on, or as near as possible to, the buzzer's resonant frequency of 5500 Hz. This source should present a maximum drive voltage of 30V peak-to-peak to the buzzer. 100mm lead-out wires with tinned ends are provided. Mounting lugs with 2.5mm holes are moulded into the buzzer's cream-coloured case.

Resonant frequency: 5500Hz ±500Hz
 Resonant resistance: 300Ω max.
 Electrostatic capacitance: 12000 pF (±30%)
 Sound output at 30cm: 103dB max.
 Height: 4mm
 Diameter: 23mm
 Length (lug tip to tip): 35mm
 Fixing centres: 29mm x 8BA/M2

Order Code	Type	Price each
KU57M	Low Profile Sounder	69p

Wire-Ended Piezo Sounder

A piezo electric sounder ideal for use in applications where space is at a premium owing to its small size.

Resonant frequency: 4.6kHz
 Electrostatic capacitance: 20nF
 Nominal drive voltage: 3 to 30V p-p
 Output at 10V p-p: 80dB @ 30cm
 Size: 31mm dia. x 8mm thick.
 Fixing centres: 35mm x 8BA/M2

Order Code	Type	Price each
FM59P	Min Piezo Sounder	72p

BUZZERS Miniature Buzzer

Sting

A miniature solid state buzzer featuring long life, high reliability, low current drain, no moving contacts, no arcing, no r.f. noise. It is small but with a clear penetrating sound.

Dimensions: 23 x 16.5 x 15.5mm deep.
 Fixing centres: 27.5mm x 8BA
 Overall length: 33.5mm.

Finished in cream plastic.
 Two types are available:

Specification	Type	Voltage range	Impedance	Frequency	Output at 30cm
6V	4 to 9V	240Ω	400Hz	75dB	
12V	9 to 20V	480Ω	400Hz	75dB	

Buzzers are for DC operation only and approx 100mm of lead attached is colour coded: Red – positive; Black – negative.

Order Code	Type	Price each
FL39N	Buzzer 6V	99p
FL40T	Buzzer 12V	99p

Round Buzzers

Sting

Small, round electronic buzzers similar in principle to the miniature solid state buzzers above, but louder. 6V and 12V types are available. Each buzzer measures 41mm across mounting lugs, 26.4mm diameter and 17.6mm high. Fixing centres 32mm.

Specification	Type	Voltage range	Current	Frequency	Output at 30cm
6V	4 to 9V	35mA	450Hz	80dB	
12V	9 to 20V	35mA	450Hz	80dB	

Order Code	Type	Price each
FK81C	6V Buzzer	£1.30
FK82D	12V Buzzer	£1.30

Low-profile PCB-mounting Buzzer

Sting

A miniature solid state, PCB mounting buzzer having a loud but pleasant 75dB tone and operating from a 12V DC supply. It is only 7mm high when mounted on the PCB. It will work with supply voltages ranging from 3 to 24V DC. Supply polarity is marked on the bottom of the case as an aid to installation. Two 2mm dia. holes are required 18mm apart. The case is finished in a cream colour.

Resonant frequency: 3.5kHz
 Operating voltage: 3 to 24V DC
 Current consumption at 12V: 5mA
 Sound output at 12V DC: 75dB at 30cm
 Temperature range: -20 to 70°C
 Diameter: 23mm
 Height (without leads): 7mm
 Lead length: 8mm

Order Code	Type	Price each
KU58N	PCB Buzzer	£1.15

DC-Operated Piezo Buzzer

Sting

An extremely loud PCB-mounting, piezoelectric buzzer designed to operate over a wide range of supply voltages. It has a built-in driver circuit and requires only a DC voltage to drive it. Working with a 24V DC supply voltage, this tiny unit can supply sound levels of over 95dB at a 30cm distance. The unit will operate well with 5V TTL voltages drawing only around 2mA. It will therefore make an excellent 'bell' or warning alarm for digital systems. Two 1.5mm dia. holes are required 16mm apart. The case is finished in a cream colour, and features a dot to indicate the side with the positive terminal.

Resonant frequency: 2700Hz ±500Hz
 Operating voltage: 3 to 24V DC
 Current at 12V DC: 10mA max.
 Sound output at 30cm: 90dB typical (12V DC)
 Operating temperature: -10 to 60°C
 Size, excluding pins: 16mm high x 24mm dia.
 Length of pins: 5mm

Order Code	Type	Price each
KU56L	DC Piezo Buzzer	£1.55

Wire-Ended Piezo Buzzer

Sting

A buzzer with a loud, clear, penetrating tone for use where direct pcb mounting is not convenient. The buzzer has two 3.5mm clear mounting holes 38mm apart, and two wires are provided for making the connection.

Resonant frequency: 2kHz ±500Hz
 Operating voltage: 3 to 15V DC
 Current at 12V DC: 10mA
 Sound output at 30cm: 90dB typical (12V DC)
 Size: 30mm dia., 22mm high
 46mm across mounting ears

Order Code	Type	Price each
CR34M	DC Piezo Buzzer Wire	£1.15

3-Tone Piezo Buzzer

A loud and compact buzzer which will operate with DC voltages in the range 6 to 12V. In addition to the red positive and black negative supply leads, there are three other leads which, if connected in certain combinations, will determine the sound that the buzzer will produce. If the green and yellow wires are connected together a two-tone siren sound is produced; if the green and orange wires are connected together the unit emits a pulsed tone, and if all wires are left unconnected, the output is a continuous tone. Two lugs with 3mm holes are provided for mounting purposes.

Supply voltage range: 6 to 15V DC
 Recommended operating voltage: 12V DC
 Current consumption at 12V DC: 95mA
 Sound pressure level (at 1m): 107dB (with 12V supply)
 Overall frequency: 2.8kHz
 Operating temperature: -20°C to +70°C
 Overall dimensions: 39mm dia. x 22mm height
 Mounting lugs: 55mm tip to tip; 3mm holes
 Lead length: power (red, black): 150mm (approx); tone select (org, gm, yell): 60mm (approx)

Order Code	Type	Price each
KU60Q	3-Tone Piezo Siren	£2.99

High Power Buzzer

An extremely loud piezo electric buzzer with integral drive circuit and a very wide operating voltage range.

Resonant frequency:	3kHz
Impedance:	1kΩ approx.
Voltage range:	3V to 24V DC
Output at 12V:	103dB at 1m
Size:	39mm dia. 26mm high
Fixing centres:	50mm x slots 5 x 3mm
Overall width:	60mm

For DC operation only. Approx 100mm leads are attached, red is positive, black negative.

Order Code	Type	Price each
FK84F	HP Buzzer	£1.99

Two-Tone Mini-Siren

Sting

An extremely loud two-tone piezo-electric siren mounted in a sturdy cream plastic case. The electronics which drive the piezo element, and give the siren its characteristic sound, are contained within the unit on a PCB, and the overall frequency range can be varied by means of a preset on this board. Two links, A and B, are also present which, if bridged with solder, determine the mode of operation (see table). The board is accessible by removing the bottom mounting plate (secured by four screws) from the main body.

Operating Modes

Both links open:	Single tone operation
Link A bridged:	Pulsed high tone
Link B bridged:	Two-tone (as supplied)
Both links bridged:	Pulsed low tone

The unit will work with supply voltages between 6 and 15V DC and is connected to the supply with the two colour-coded 150mm long leads (red: +V; black: 0V) provided. At 12V DC, the unit will supply 110dB of sound level (at 30cm) while drawing only 90mA. Two mounting lugs are moulded onto the bottom mounting plate, which will accommodate M3 screws, and are spaced 58mm apart. Overall case dimensions, 52 x 42 x 27.5mm. The mounting lugs are 68mm from tip to tip.

Order Code	Type	Price each
KU65V	Two-Tone Mini Siren	£2.99

Twin-unit Piezo Siren

Sting

A very piercing two-tone siren housed in a very tough cream plastic housing. It is essentially the same as KU65V, except that two piezo elements have been incorporated into the larger case. As a result this unit offers an extremely high sound pressure level (105dB at 1m). Connection to the unit is by two colour-coded leads (red: +V; black: 0V). Two mounting lugs spaced 97mm apart are moulded into the case which allow the unit to be secured to a surface using M3 size screws.

Specification

Supply voltage range:	6 to 15V DC
Recommended operating voltage:	12V DC
Current consumption at 12V DC:	85mA max.
Sound pressure level (at 1m):	105dB

Frequency: 2.5 to 2.8kHz (Preset provided for adjustment)

Operating temperature range: -20°C to 70°C

Overall dimensions: 84 x 55 x 32mm

Mounting lugs: 106mm tip to tip;

3mm holes

Leads: Approx. 150mm long

Operating Modes

Both links open:	Single tone operation
Link A bridged:	Pulsed high tone
Link B bridged:	Two-tone (as supplied)
Both links bridged:	Pulsed low tone

Order Code	Type	Price each
KU61R	Twin Piezo Siren	£3.99

Multi-Tone Piezo Buzzer

Sting

An extremely loud piezo electric buzzer in a cream housing. Removing the back carefully with a screwdriver reveals screw terminal connections for the positive and negative DC power supply. A further three screw terminals if left open circuit make the buzzer emit a continuous tone. If screws 1 and 2 are connected together the buzzer emits a pulse tone and if screws 1 and 3 are connected together the buzzer emits a siren-like sound.

Resonant frequency:	2.8kHz
Impedance:	40Ω approx.
Voltage range:	6V to 15V
Output at 12V:	115dB at 1m
Size:	92 x 92 x 34mm high
Fixing centres:	72 x 72 x 4mm clear

Order Code	Type	Price each
JH25C	Multi-Tone Buzzer	£5.99

Musical Buzzer

Sting

A musical buzzer which plays seven traditional American tunes. Two 100mm wires red for positive and black for negative are provided for connection to the power supply. Two additional red wires are provided which when shorted, trigger the next tune in the sequence. If the wires are permanently connected, the tunes play continuously. If the battery is removed, on reconnection the first tune to play is always the first in the sequence.

The tunes are:

Yellow Rose of Texas
Dixieland
Red River Valley
American Patrol
Oh My Darling Clementine
When The Saints Go Marching In
She Wore A Yellow Ribbon

Voltage range:	6V to 12V
Current at 9V:	6mA
Output at 9V:	85dB at 1m
Size:	32.2mm dia. 13.9mm high
Fixing centres:	38mm x slots 3.5 x 4.5mm
Overall width:	44.6mm

Order Code	Type	Price each
FK80B	Musical Buzzer	£2.79

Panel Mounting Buzzers

Sting

A range of three panel mounting buzzers in a black plastic housing, differing only in the tone produced by the 'door bell', pulse, or continuous tone. The positive and negative connections are standard 'Lucar' style 1/4 in. receptacles (HF10L). A M28 plastic screw ring is used to secure the buzzer to a suitable panel with a 29mm diameter hole. The buzzers can operate over a wide voltage range and have a low power consumption. The 'door bell' version, in particular, produces a very distinctive and noticeable output.

Specification

Supply voltage range:	8 to 12V DC
Frequency:	2600Hz
Current consumption (@ 12V):	20mA
Sound output (@ 12V):	90dB (@ 30cm.)
Size:	45 x 36mm dia.

Order Code	Type	Price each
BZ54J	Doorbell Buzzer	£2.99
BZ55K	Pulsetone Buzzer	£2.99
BZ56L	Continuous Buzzer	£2.99

FOR CASHTEL
Phone 01702 552941

12V AC Buzzer

A miniature 12V mechanical buzzer that works from an AC supply. Single hole fixing.

Specification

Voltage range (AC): 8V to 28V
Current @ 12V: 60mA
@ 24V: 130mA
Sound output: 80dB @ 30cm
AC resistance: 120Ω ± 20Ω

Order Code	Type	Price each
BZ57M	12V AC Buzzer	99p

SIRENS

Micro Siren

A miniature, but very loud siren housed in a black ABS case fixed to a swivel mounting bracket. The siren has a rapid rising and falling tone.

Specification

Operating voltage: 12V DC
Voltage range: 6V to 12V
Current: 150mA
Sound output: 110dB at 1m
Frequency: 2kHz to 2.8kHz
Size: 43 x 39 x 59mm long

Order Code	Type	Price each
JK42V	Micro Piezo Siren	£5.49

Miniature Piezo Siren

A very small, but extremely loud siren housed in a black ABS case fixed to a swivel mounting bracket. The siren has a rapid rising and falling tone.

Operating voltage: 12V DC
Voltage range: 6V to 12V
Current: 300mA
Sound output: 115dB at 1m
Frequency: 2kHz to 2.8kHz
Size: 61 x 56 x 86mm long

Order Code	Type	Price each
JK43W	Min Piezo Siren	£8.49

Low-Cost Electronic Siren

A compact electronic alarm siren, self-contained in a plastic housing with swivel mounting. Offers a low current drain.

Specification

Voltage: 12V DC
Current: 300mA
Impedance: 8 ohms
Sound output: 98dB at 1m
Case: Plastic with metal bracket
Size: 98mm dia x 60mm
Weight: 175g

Order Code	Type	Price each
YK60Q	Low-Cost Electrnc Srm	£6.49

HOT TIP

Distorted sound, especially at low volume, can be caused by an off centre voice coil rubbing on its magnet. This can be checked by gently pressing around the cone with your fingers, to feel where any rubbing is taking place.

Mini Siren

Sting

A compact yet powerful siren capable of generating a piercing sound pressure level of 113dB (at 1m) while drawing a maximum of 700mA. The siren's robust black plastic case is sealed and therefore suitable for vehicle or exterior use. It is mounted on a metal swivel bracket. The supply voltage is connected to the unit by means of a colour-coded trailing lead (red: +V; black/red: 0V)

Specification

Supply voltage: 6 to 12V DC
Current drain: 700mA max.
Sound output: 113dB (at 1m)
Dimensions: 97 x 110 x 88mm
Net weight: 367g
Lead length: 400mm (approx.)

Order Code	Type	Price each
ZC45Y	Mini Siren	£7.49

Staccato Electronic Sounder

A weatherproof electronic siren which is completely self contained. The unit has a genuinely high output of up to 116dB combined with a low current consumption, making it ideal for use with intruder and automotive alarm systems and external bell housings. The finish is in black plastic with a metal fixing bracket. The reliability of the unit is improved with the design of the connection between the speaker head and the electronics.

Specification

Voltage: 6 to 16V DC (12V nominal)
Current: 300mA
Sound output: 116 dBA
Frequency range: 0.6 to 1.2kHz
Size: 90mm dia. x 110mm long

Order Code	Type	Price each
YZ03D	Electronic Sounder	£9.49

Power Siren

A very powerful alarm siren built round a rectangular horn speaker, capable of sound pressure levels of 118dB (at 1m). The unit has some limited weather resistance but is not sealed. The siren is not suitable for exterior use unless installed under cover. The case is made from high impact black plastic and is supplied with an adjustable, swivel mounting bracket. Power is connected by a 250mm colour-coded cable (red: +V).

NB. It is advisable to cover and protect ears when powering up this siren as very high sound levels are produced.

Specification

Supply voltage: 12V
Current drain: 1.6A to 1.8A
Sound output: 118dB ±3dB at 1m
Output frequency: 1800 to 2000Hz
Overall size: 125 x 115 x 80mm
Weight: 707g

Order Code	Type	Price each
ZC46A A2	Power Siren	£17.49

HORN SPEAKERS

10W

A weatherproofed 10W horn speaker with standard 3-point mounting bracket for fixing to car roof or to a bracket across a car roof, etc. For maximum sound effect, four of these units mounted at right angles to each other will be found to be more efficient than one large speaker, since they are fairly directional. The mounting bracket is adjustable with 10mm (AF) clamping bolt and nut, and the whole unit is moulded in black ABS.

Nominal power Handling: 10W (15W max.)
 Impedance: 8Ω
 Usable frequency Response: 1.4kHz to 4kHz
 Horn diameter: 136mm
 Overall depth of horn: 120mm

Order Code	Type	Price each
XQ73Q A1	Plastic Horn 5	£7.49

15W

A weather-proofed horn speaker with bracket for bolting to car roof or to a bracket across car roof etc. For maximum dispersion two or more of these units mounted in opposing directions will be found far more efficient than one large speaker since they are fairly directional. The mounting bracket is adjustable and the horn is finished in grey.

Nominal power: 15W
 Impedance: 8Ω
 Horn diameter: 152mm

Order Code	Type	Price each
XQ74R A2	Car PA 15W	£16.99

20W

A weather-proof black plastic rectangular horn speaker with an adjustable bracket for bolting to a car roof or to a bracket across the car roof etc.

Maximum power: 20W
 Impedance: 4Ω
 Frequency response: 600Hz to 8kHz
 Overall size: 125 x 115 x 80mm
 Weight: 680g

Supplied with approx 290mm of connecting lead.

Order Code	Type	Price each
BZ66W A2	20W Horn	£12.99

30W

A weather-proof white plastic, rectangular horn speaker with heavy rectangular plastic mounting base on which the horn tilts up and down.

Nominal power: 30W
 Impedance: 8Ω
 Frequency response: 200Hz to 8kHz
 Horn size: 200 x 106mm
 Horn length: 234mm
 Bracket base: 100 x 60mm with six 5mm clear fixing holes.

Supplied with approx. 250mm of connecting lead.

Order Code	Type	Price each
XG97F A2	5 x 8 Horn Speaker	£15.99

DOOR BELLS AND ACCESSORIES

Ding-Dong Door Bell

Sting

A low-cost, attractive, battery operated two-tone doorbell. It will greet your guests with a pleasant but loud 'ding-dong' chime. A bell push is supplied along with approx. 2m of bell wire. This is connected between the push and bell, screw terminals being provided on both units to accept the wires. If longer distances than 2m are anticipated, then additional wire will be required. A suitable type is XR39N, which can be found in the 'Cables' section of this catalogue. The bell unit is an attractive cream colour and is decorated with a floral motif. The system is powered by two AA cells and is supplied with full fitting instructions. Overall dimensions: 140 x 84 x 38mm (bell unit); 46 x 28 x 18mm (bell push).

Order Code	Type	Price each
ZC44X	Ding Dong Doorbell	£5.99

Melody Door Chime

This attractive, battery operated, 16 melody door chime, will greet your guests with up to 64 notes from the following popular tunes:

Twinkle Twinkle Little Star	London Bridge is
Cuckoo Waltz (1)	Falling Down
Eency Weency Spider	Little Brown Jug
Lullaby	Butterfly
Santa Lucia	Long Long Ago
Oh My Darling Clementine	Cuckoo Waltz (2)
Mary Had a Little Lamb	Are You Sleeping
The Train is Running Fast	Rockabye Baby
Dream of Home and Mother.	

The chime is ivory white with gold stripes and a flower motif. Supplied with push-button. Requires 2 x HP7 batteries (not supplied). Size: 140mm high x 85mm wide x 35mm deep. Weight: 160g.

Order Code	Type	Price each
YP31J	Melody Door Chime	£4.99

Bell

3 to 8V AC or DC bell with white case and polished chrome 70mm dia. gong. Overall size 144 x 70 x 39mm.

Order Code	Type	Price each
FL38R	AC Bell	£4.99

Bell Transformer

Sting

A transformer housed in a white plastic case. Primary 240V AC, secondary 4, 8 and 12V AC at 1A. Internally fused primary winding with Fuse 20 63mA. Overall size excluding case fixing nut 74 x 54 x 38mm.

Order Code	Type	Price each
FL37S	Bell Xformer	£7.99

Bell Push Switch

Sting

A rectangular push-to-make doorbell switch. The switch has a black plastic base plate housing the electrical contacts and terminals. The base plate is fixed into position with the screws provided and after the necessary connections have been made the outer cover with the push button is snapped into position. The push button is of white plastic with a matt black or creamy white housing.

Overall size: 41 x 20 x 18mm deep. Button size: 20 x 15mm

Order Code	Type	Price each
FS17T	Bell Push	65p

HOT TIP

When covering the front of a speaker cabinet with black speaker cloth, remember to paint any screws on the baffle with matt black paint. This will prevent the screws from being seen through the cloth afterwards. The baffle board can also be painted matt black and this should be done before the loudspeaker units are mounted. It is advisable to cosmetically finish the cabinets before mounting the loudspeaker units.

FAST NiCd CHARGER WITH DISCHARGER

CALVYN INDUSTRIAL

A fast, compact NiCd charger that will charge 2 or 4 'AAA' or 'AA' type batteries in 2h. A slide switch selects either the charge or discharge function. After the batteries have been discharged, they are fast charged for 2h and then automatically switched to a trickle charge mode. This sequence will prevent the 'memory' effect that is often found in NiCd batteries.

The unit will automatically adjust for 'AA' or 'AAA' type batteries - 380mA for 'AA', and 100mA for 'AAA' with a trickle charge of 20mA. LEDs indicate when the unit is in the fast, trickle or discharge mode. Dimensions 125 x 85 x 50mm.

EARPIECES

Magnetic

A standard magnetic earpiece having an 8Ω impedance and 950mm of lead terminated in either a 2.5mm or 3.5mm jack plug. The 3.5mm type is also available with a 4m lead.

Order Code	Type	Price each
LB23A	Mag Earpiece 2.5mm	48p
LB24B	Mag Earpiece 3.5mm	75p
FE73Q	Earphone 4 Metre	86p

PIEZO ELECTRIC TWEETERS

These tweeters which can be added to any existing speaker system having not more than 200W power capability offer many advantages over ordinary (dynamic) tweeters. The elimination of the voice coil results in a very low dynamic mass in the driver which greatly improves the transient response of the speaker. The result is a beautifully clean sound with low distortion and a minimum of ringing. The piezo electric tweeter has a very high impedance (over 1000Ω at 1kHz and still over 20Ω at 40kHz) and thus presents no added load to the amplifier. It rejects low frequencies without needing a crossover network.

Connection details

Connection Diagram A

Connection Diagram B

Impedance of existing speaker system	Amplifier rms power output (W)	Use Circuit Diagram
4Ω	up to 100W	A
4Ω	up to 200W	B
8Ω	up to 200W	B
16Ω	up to 200W	B

Fax your orders to:
01702 553935

Crystal

A standard crystal earpiece with a very high impedance and 1m of lead terminated in a 3.5mm jack plug.

Order Code	Type	Price each
LB25C	Crystal Earpiece	£1.69

Continued on next page

Continued from previous page

The speaker is simply connected as shown in the drawings above and the adjustment potentiometer is provided so that the tweeter output sound level can be made equal to the existing speakers. However, if adjustment after initial setting-up is not required then the pot could be removed and replaced by two 1W resistors having the nearest values to those measured on each side of the pot. If exceptionally loud treble output is required, one (in the case of system A) or two in series (in the case of system B) can be wired in parallel with the existing tweeter/s.

2 inch Direct Radiant Tweeter

This tweeter is ideal as the high frequency unit in three-speaker systems.

Average harmonic distortion: <0.75%
 Output sound level at 457mm from front of speaker with 4V rms pink noise input: 101.5dB
 Frequency response: 4.8kHz to 20kHz ±3dB
 Max continuous rms input voltage: 16V
 Max peak music power: 35V
 Overall diameter: 51mm
 Overall depth: 18mm
 Total width: 70mm
 Fixing centres: 62mm
 Panel cut-out: 48mm dia
 Weight: 8g

Order Code	Type	Price each
YW52G	2in Piezo Tweeter	£3.25

3 3/4 inch Direct Radiant Tweeter

This tweeter is ideal for use in bookshelf speaker systems and smaller high fidelity speakers where it will greatly enhance the high frequency response.

Harmonic distortion: <0.75%
 Output sound level at 457mm from front of speaker with 4V rms pink noise input: 100dB
 Frequency response: 2.2kHz to 32kHz ±3dB
 Max continuous rms input voltage: 16V
 Max pk music power: 35V
 Overall diameter: 95mm
 Overall depth: 21mm
 Fixing centres: 60 x 60mm
 Panel cut-out: 60mm dia.
 Weight: 36g

Order Code	Type	Price each
WF54J	Direct Radiant Piezo	£4.99

Small Square and Rectangular Horns

Piezo electric horn tweeters ideal for medium sized 2-way and even 3-way speaker systems. The high impedance of the piezo electric material means that the unit can simply be connected directly across the terminals of the main driver to add extra treble sparkle. Two different designs are available, a square-faced circular horn and an equivalent rectangular horn offering wider horizontal dispersion.

Basic specification

Frequency response: 4kHz to 28kHz
 Maximum continuous rms input voltage: 20V (= 100W into 4Ω)
 Maximum pk input voltage: 28V

Square type

Overall size: 85 x 85mm
 Overall depth: 67.7mm
 Fixing centres: 71 x 71mm
 Panel cut-out: 80mm dia.

Rectangular type

Overall size: 145 x 67.3mm
 Overall depth: 50.9mm
 Fixing centres: 132.2 x 54mm
 Panel cut-out: 125.5 x 47mm

Order Code	Type	Price each
RT60Q	Square Piezo Tweeter	£3.99
CJ83E	Rect Piezo Tweeter	£5.99

Large Rectangular Horn

A wide dispersion horn tweeter designed to give a wide pattern and therefore ideal for stereo use and does not insist that the listener be exactly on axis with the driver unit itself.

Basic specification

Frequency response: 2kHz to 28kHz
 Max. continuous rms input voltage: 20V (= 100W into 4Ω)
 Max. pk input voltage: 28V
 Overall size: 187.3 x 79mm
 Overall depth: 108.64mm
 Fixing centres: 86 x 86 x 63.2mm
 Panel cut-out: 158 x 54mm

Order Code	Type	Price each
RT61R	Large Rect Horn	£6.99

Standard Horn

This tweeter is designed for general purpose use in high fidelity, disco & PA speakers of all sizes.

Average harmonic distortion: 1%
 Output sound level at 457mm from front of speaker with 4V rms pink noise input: 103dB
 Frequency response: 3.9kHz to 28kHz ±3dB
 Max continuous rms input voltage: 16V
 Max peak music power: 35V
 Overall size: 85 x 85 x 70mm deep
 Fixing centres: 71 x 71mm
 Panel cut-out: 76mm dia
 Weight: 63g

Available in two types. With mounting flange flush with front of horn. With mounting flange recessed 12mm so that front of horn may be more nearly flush with front of baffle when mounted.

Order Code	Type	Price each
WF09K	Piezo Horn Flush	£5.99
WF55K	Piezo Horn Recessed	£5.99

Wide Dispersion Horn

This tweeter is designed to give a wide dispersion pattern and is therefore ideal in stereo hi-fi systems and in high quality discos etc.

Average harmonic distortion: 0.5%
 Output sound level at 457mm from front of speaker with 4V rms pink noise input: 104dB
 Frequency response: 2kHz to 32kHz ±3dB
 Max continuous rms input voltage: 20V
 Max peak music power: 35V
 Overall size: 185 x 83 x 108mm
 Fixing centres: 86 x 86 x 63.5mm
 Panel cut-out: 155 x 51mm
 Weight: 130g

Order Code	Type	Price each
WF56L	Wide Angle Piezo	£9.99

PHONE BEFORE 5PM FOR SAME DAY DESPATCH

01702 554161

TWEETERS

Dome Tweeter

A slim dome tweeter with a heavy duty ceramic magnet.

Frequency response: 2kHz to 20kHz
 Power handling (max): 50W
 Impedance: 8Ω (suitable for 4 to 8Ω systems)
 Dimensions: Baffle cut-out: 78mm dia
 Fixing centres: 68 x 69mm x 4BA (M4)
 Mounting plate: 96 x 96mm
 Overall depth: 31mm
 Crossover point: 4.5kHz approx.

Order Code	Type	Price each
WF43W	Dome Tweeter	£8.49

20W Bullet Tweeter

A high quality high frequency transducer with a substantially level frequency response from 5kHz to 25kHz, in a cast alloy body with a brushed finish front mounting flange and centre 'bullet'. A high quality tweeter for domestic hi-fi and all other music systems.

Flux density: 11,500 Gauss
 Freq range: 5kHz to 40kHz
 System power rating: 100W using HPX2 crossover
 Unit power rating: 20W rms
 Impedance: 8Ω
 Acoustic output: 96dB (sensitivity 1W @ 1 metre)
 Crossover freq: 5kHz min @ 18dB octave
 Overall diameter: 98mm
 Overall depth: 45.5mm
 Fixing centres: 4 x 8.4 x 5mm clear
 Overall weight: 490g (17ozs)

Order Code	Type	Price each
YJ01B A1	Tweeter 20W 8R	£22.99

40W Compression Driver

A 40W compression driver for use as part of a treble horn unit having a 1in. throat size. It offers exceptional natural reproduction and freedom from distortion over a frequency range of 1kHz to 20kHz. It has a 45mm diameter titanium diaphragm which combines outstanding frequency response with an absence of colouration, and has total resistance to fracturing through fatigue. The diaphragm is allied to a lightweight polyimide former with a double layer, high temperature voice coil, and driven by a massive magnet system. The driver may be used with any high quality professional horn that will fit a 1in. throat.

Specification
 Nominal impedance: 8Ω
 Resonant frequency: 580Hz
 Usable frequency response: 1.5 to 20kHz
 Nominal power handling: 40W rms
 Sensitivity: 116dB
 Voice coil diameter: 50.8mm
 Magnet weight: 34oz
 Dimensions: 135.4mm dia. x 54mm deep
 Fixing centres: 0.25in. UNC threaded holes

Order Code	Type	Price each
RC97F B4	40W Compression Driver	£54.99

Horn for Compression Drivers

Eminence

A superb quality standard fitting fibreglass horn with a 1in. throat designed for use with compression drivers. This horn offers a radial dispersion pattern, and when combined with such a driver it will be suitable for high-power high-reliability applications such as PA and disco.

Rolloff: 1.2kHz
 Lowest recommended crossover point: 1.2kHz
 Dispersion: 90 x 40°
 Fitting holes: 3 M6 Holes on a 57mm PCD
 2 M6 Holes on a 76mm PCD
 Flanged throat: 1in. (25mm)
 Overall dimensions: 290 x 160 x 160mm
 Weight: 535g

Order Code	Type	Price each
ZC43W A1	Compression Horn	£36.49

70W Horn Tweeter

A rectangular horn tweeter having a solid cast body 184 x 76mm, with a six hole fixing. It is a rectangular horn tweeter which disperses its sound output on a lateral plane, and has a horn cut-off frequency fixed at 820Hz, although the lowest input frequency should be double this to maintain efficiency.

Flux density: 9000 Gauss
 Frequency range: 1.7kHz to 17kHz
 System power rating: 70W using HPX2 crossover
 Unit power rating: 50W
 Impedance: 8Ω
 Acoustic output: 97dB (sensitivity 1W @ 1m)
 Crossover frequency: 1.7kHz min
 Overall width x height: 184 x 76mm
 Overall depth: 160mm
 Fixing centres: 6 x 86mm + 86mm x 64mm, x 5mm clear
 Overall weight: 647g

Order Code	Type	Price each
YJ02C A1	Tweeter 70W 8R	£24.99

600W Wide Angle Horn Tweeter

Eminence

A constantly directive horn with a square section, designed to provide a smooth response up to 20kHz fully over the angles 90° horizontal and 90° vertical. A crossover must be used with this driver and the crossover point must be 3.5kHz or greater. Suitable crossovers can be YJ03D, WF03D, YT44X or YT45Y, depending on the system power handling required.

Specification

Impedance: 8Ω
 Frequency response: 2kHz to 18kHz ±3dB
 Sensitivity: 100dB
 Recommended crossover point: >3.5kHz
 Power handling, using 6kHz, 18dB/octave crossover: 600W rms
 Dispersion: 90° horizontal x 90° vertical
 Dimensions: 160mm wide x 140mm high x 107.2mm deep
 Weight: 800g

Order Code	Type	Price each
RC98G B3	600W Wide Angle Horn	£37.99

THE BEST OF SERVICE

600W High Power Horn Tweeter

Eminence

A high power, square faced horn tweeter with circular section horn, suitable as a treble unit in 2-way and 3-way PA, disco, organ and similar sound amplification systems. It offers low distortion and an exceptionally flat frequency response over the range 2kHz to >20kHz, and radiated evenly over 60° horizontal and vertical angles. A crossover must be used with this driver and the crossover point must be 3.5kHz or greater. Suitable crossovers can be YJ03D, WF03D, YT44X or YT45Y, depending on the system power handling required.

Specification

Impedance:	8Ω
Frequency response:	2kHz to 20kHz ±2dB
Sensitivity:	101dB
Recommended crossover point:	>3.5kHz
Power handling, using 6kHz, 18dB/octave crossover:	600W rms
Dispersion:	60° x 60°
Dimensions:	87 x 87mm x 73.5mm deep
Weight:	700g

01702 554161

Two-way 6dB/Octave

A crossover network enclosed in a small plastic box. The crossover allows a woofer and tweeter to work together. Overall size (excluding solder tags) 85 x 51 x 30mm high. Impedance 8Ω. Power handling 40W. Crossover frequency approx. 2.5kHz at 6dB/octave.

Order Code	Type	Price each
YT47B	X-over 2-Way 6dB	£2.99

Two-way 12dB/Octave

A cross-over network for operating a woofer and a tweeter together. Components are mounted on a plastic panel (100 x 60mm) for fixing inside a cabinet. Power handling: 40W rms. Cross-over is at approx. 3kHz (12dB/octave).

Order Code	Type	Price each
WF02C	Crossover 2-Way	£5.99

Three-way 6dB/Octave

A crossover network for operating a woofer, tweeter and mid-range speaker together. Components are mounted on a paxolin pcb 100 x 60mm, for fixing inside a cabinet. Power handling 60W. Impedance 8Ω. Crossover frequencies approx. 1kHz and 5kHz at 6dB/octave. Overall height 30mm.

Order Code	Type	Price each
YT46A	X-over 3-Way 6dB	£4.29

Three-way 12dB/Octave

A cross-over network for operating a woofer, tweeter and mid-range speaker together. Components are mounted on a plastic panel (100 x 60mm) for fixing inside a cabinet. Power handling: 60W rms. Crossovers are at approx. 700Hz (6dB/octave) and 3kHz (12dB/octave).

Order Code	Type	Price each
WF03D	Crossover 3-Way	£6.99

Three-way 100W

A crossover network for operating a woofer, tweeter and mid-range speaker together. Components are mounted on a paxolin pcb 115 x 95mm, for fixing inside a cabinet. Power handling 100W. Impedance 8Ω. Crossover frequencies approx. 1kHz and 4kHz at 12dB/octave. Overall height 30mm.

Order Code	Type	Price each
YT44X	X-over 3-Way 100W	£7.49

Three-way 150W

A crossover network for operating a woofer, tweeter and mid-range speaker together. Components are mounted on a paxolin pcb 151 x 90mm, for fixing inside a cabinet. Power handling 150W. Impedance 8Ω. Crossover frequencies approx. 1.2kHz and 5kHz at 12dB/octave. Overall height 30mm.

Order Code	Type	Price each
YT45Y	X-over 3-Way 150W	£7.99

HPX7 Crossover

The HPX7 is primarily designed for use with the 50W Compression Driver and suitable bass drivers but is suitable for any use requiring a 2.2kHz crossover. The HPX7 crossover is of the LC type with a crossover operating at 2.2kHz. The bass section rolls off from 2.2kHz at 12dB/octave and the high-pass section operates at the same frequency but at 18dB/octave. The maximum power handling capacity is 400W with no attenuation and when using the attenuators the power rating is 250W. It should be noted that the power distribution at 2kHz for normal music programme is 80% to the bass and 20% to the HF units. Also incorporated in the design is the opportunity for the user to select or vary the amount of HF brilliance/loudness by attenuating or reducing the HF output in 1dB steps to -6dB to achieve a perfect sound balance between the bass and the treble units. This is done by a constant impedance technique which keeps the HF section matched to its stated impedance of 8Ω.

Order Code	Type	Price each
XJ56L	X-over 2.2kHz 400W	£34.99

HPX8 Crossover

The HPX8 is an 18dB/octave high pass filter operating at 5kHz in systems with power handling up to 250W. This crossover is designed specifically for use with the 50W Compression Driver (XJ55K). An attenuator resistor is supplied with the network and may be connected if required to decrease the sensitivity or increase power handling.

Order Code	Type	Price each
XJ57M	X-over 5kHz 250W	£16.99

HPX9 Crossover

The HPX9 designed for use with the Big Cat loudspeaker range. The HPX9 crossover is of an LC type 3-way four section crossover operating at 500Hz and 6.5kHz. The bass and mid sections roll off at 12dB/octave and the mid and tweeter sections roll off at 12dB/octave. The maximum power handling capacity is 400W with no attenuation and when using the attenuators the power rating is 250W. It should be noted that the power distribution at 500Hz for normal music programme is 60% to bass and 40% to mid range. Also incorporated in the design is the opportunity for the user to select or vary the amount of HF and midrange unit loudness by attenuating these sections by -2dB or -4dB to achieve the best sound balance between the selected loudspeakers. This is done by a constant impedance technique which keeps each section matched to its stated impedance of 8Ω.

Order Code	Type	Price each
XJ58N	X-over 500Hz/6.5kHz	£54.99

Mylar

A range of mylar cone speakers with ferrite magnets designed primarily for use in sirens and buzzers. The mylar cone and silvered plastic centre dome combined with a card gasket around the cone make the units fully weather and splashproof from the front. They are therefore ideal for use as sounders in portable equipment and in external burglar alarm boxes. Four types are available without mounting (round type) and three in a square metal chassis.

Specifications

	Round 2 inch	Round 2 1/2 inch
Power input (max.)	0.5W	0.05W
Power output (1W at 1m)	90dB	93dB

Low-Cost Elliptical Speakers

Low-cost loudspeakers primarily intended as replacements for unit audio equipment and television sets, mounting on the inside surface of the baffle. Two models are available: A (5in. x 3in.) and B (6in. x 4in.).

Type	Size (mm)	Baffle cut-out (mm)	Fixing centres (mm)	Depth (mm)
A	125 x 77	117 x 68	90 x 65 x M5	36
B	153 x 101	138 x 91	110 x 73 x M5	44

Type	Power (W)	Z (Ω)	f ₀ (Hz)	Frequency range (Hz; -10dB max.)	Sensitivity (dB/W)
A	3	8	145±29	f ₀ to 22k	96±3dB
B	6	8	120±24	f ₀ to 13	97±3dB

Order Code	Type	Price each
GL16S	3W Elliptical Spkr	£2.29
GL17T	6W Elliptical Spkr	£2.99

Low-Cost Round Speakers

A range of low-cost round speakers of good quality that vary in size from a 3.5in. 1.5W type to a 10in. 50W speaker. They have a variety of applications, such as replacing or up-rating those used in radios and 'ghetto blasters', extension speakers, car systems and music centres/rack systems. The higher powered units, when used with a suitable tweeter and crossover, will form the basis of an excellent low-cost high fidelity speaker system. Type E is fitted with a centrally mounted chromed plastic cone to enhance the treble response.

Type	Overall size (mm)	Baffle cut-out (mm)	Fixing centres (mm)	Depth (mm)
A	100 x 100	95 dia.	85 x 85 x M5	36
B	120 x 120	110 dia.	85 x 85 x M5	42
C	120 x 120	110 dia.	85 x 85 x M5	42
D	165 dia.	144 dia.	110 x 110 x M5	55
E	206 dia.	185 dia.	140 x 140 x M5	69
F	256 dia.	234 dia.	175 x 175 x M5	100

Type	Power (W)	Z (Ω)	f ₀ (Hz)	Frequency range (Hz; -10dB max.)	Sensitivity (dB/W)
A	1.5	8	180±30	f ₀ to 10k	90±2
B	3	8	140±25	f ₀ to 8k	91±2
C	6	8	120±24	f ₀ to 9.2k	99±3
D	10	8	80±16	f ₀ to 9k	99±3

GL14Q	A1 15W Low Cost Speaker	£5.99
GL15R	A1 50W Low Cost Speaker	£10.49

AUDAX LOUDSPEAKERS

A superb range of loudspeakers for building into complete high fidelity loudspeaker systems, that includes treble, mid-range, bass/midrange and bass drivers. By careful design of cabinet size and crossover frequencies, loudspeakers offering excellent sound quality can be constructed at a fraction of the cost of comparable commercially available systems. The book 'Designing, Building and Testing Your Own Loudspeaker Systems' by D. B. Weems (WG82D) is highly recommended. For a more in-depth analysis of loudspeaker design then the highly regarded 'The Loudspeaker Design Cookbook' by Vance Dickason (AA75S) is recommended. Another book that is worth reading is 'An Introduction to Loudspeakers and Enclosure Design' by V. Capel (WS31J).

40W Miniature Dome Tweeters

Audax

A miniature dome tweeter available with a round or rectangular escutcheon. This state-of-the-art advanced technology high performance tweeter, has excellent spatial dispersion and a transient response matching that of digital audio discs. It has a 10mm ultra-light polymer dome, active horn loaded and a formerless ferrofluid cooled voice coil. It can be used with a first order crossover of between 2.2μF and 4.7μF.

Specification

Flux density:	10,600 Gauss
Frequency response:	2500Hz to >25kHz
Power handling:	40W at 5kHz (DIN 45573)
Impedance:	8Ω
Coil diameter:	10.5mm
Free air resonance:	2900Hz ±400Hz
Acoustic output:	91.3dB (1W at 1m)

FD95D	Mini Dome Twtr Rect	£5.49

25W Shielded Dome Tweeter

A very compact, 10mm polymer dome tweeter with ultra-light moving parts and a formerless, ferrofluid cooled voice coil. The piston area is equally composed of dome and active suspension (balanced drive concept) offering a combination of musical qualities: spatial dispersion, exceptional transient response and a rich reproduction of harmonics. The tweeter is easily coupled using a 1st order crossover. The magnet is fully shielded (with a compensation magnet and shield) for audio/video applications where the speaker is in close proximity to a TV screen. The sensitivity is increased by 1.5dB due to concentrated flux in the gap.

Specification
 Nominal impedance: 8Ω
 Resonant frequency: 2,900Hz
 Frequency response: 2.5 to 20kHz
 Nominal power handling: 25W
 Sensitivity: 91dB
 Voice coil diameter: 10mm
 Minimum impedance: 6.4Ω
 DC resistance: 5.5Ω
 Voice coil inductance: 27μH
 Voice coil length: 2mm
 Number of coil layers: 2
 Magnet dimensions: 29 x 5mm
 Drive magnet weight: 17.1g
 Compensation magnet weight: 17.1g
 Flux density: 1.27T
 Magnetic gap height: 1.5mm
 Linear excursion: 0.25mm
 Dimensions: 60 x 60mm
 Fixing centres: 4 x 4.2mm dia. holes on 60mm dia. circle

Note that the voice coil overhangs the magnetic gap to ensure linear excursion of the dome.

Order Code	Type	Price each
RC75S	25W Shld 10mm Dome	£5.99

50W Dome Tweeter

A dome tweeter with a 25mm impregnated fabric soft dome. Its perfect linearity coupled with absence of colouration accounts for its high reputation for reproducing natural sound. An attractive metal domgrille is also available for use with this speaker.

Specification
 Nominal impedance: 8Ω
 Resonant frequency: 900Hz
 Frequency response: 800Hz to 20kHz
 Nominal power handling: 50W
 Sensitivity: 91dB
 Voice coil diameter: 25mm
 Minimum impedance: 6.5Ω
 DC resistance: 5.8Ω
 Voice coil inductance: 11μH
 Voice coil length: 1.6mm
 Former: Aluminium
 Number of coil layers: 2
 Magnet dimensions: 72 x 15mm
 Flux density: 1.5T
 Magnetic gap height: 3mm
 Linear excursion: 0.3mm
 Dimensions: 100mm diameter
 Fixing centres: 4 x 5mm dia. holes

Order Code	Type	Price each
YN43W A1	Hi-Fi Dome Tweeter	£14.99
FD93B	Grille for Dome Twtr	£1.55

70W 25mm Soft Dome Tweeter

A 1in. (25mm) impregnated textile dome tweeter suitable for the most demanding applications such as studio monitoring and Hi-Fi. It combines very high efficiency, high power handling and a wide frequency response that makes a lower than normal crossover frequency point possible. The critically damped textile dome ensures an exceptionally smooth roll-off, an absence of colouration and is generally responsible for this speaker's ability for highly accurate detail and natural sound. The faceplate is solid aluminium.

Specification
 Nominal impedance: 8Ω
 Resonant frequency: 1200Hz
 Frequency response: 1k to 20kHz
 Nominal power handling: 70W
 Sensitivity: 91dB
 Voice coil diameter: 25mm
 Minimum impedance: 7Ω
 DC resistance: 5.8Ω
 Voice coil inductance: 13μH
 Voice coil length: 1.6mm
 Former: Aluminium
 Number of coil layers: 2
 Magnet dimensions: 75 x 15
 Flux density: 1.6T
 Magnetic gap height: 3mm
 Linear excursion: 0.3mm
 Dimensions: 100mm diameter
 Fixing centres: 4 x 5mm dia. holes on 120mm dia. circle

Order Code	Type	Price each
RC81C	70W 25mm Soft Tweetr	£15.99

70W Titanium Composite Tweeter

A dome tweeter where the diaphragm is made from pure titanium which is ion deposited onto an advanced, glass fibre reinforced, soft polymer 1in. diaphragm. The composite that results offers increased stiffness with high internal damping, combining the advantages of pure metal domes while retaining the low distortion of soft domes. The result is a detailed sound reproduction for the best musical quality.

Specification
 Nominal impedance: 8Ω
 Resonant frequency: 1,500Hz
 Frequency response: 2 to 20kHz
 Nominal power handling: 70W
 Sensitivity: 93dB
 Voice coil diameter: 25mm
 Minimum impedance: 7Ω
 DC resistance: 5.8Ω
 Voice coil inductance: 13μH
 Voice coil length: 1.6mm
 Former: Aluminium
 Number of coil layers: 2
 Magnet dimensions: 72 x 15mm
 Magnet weight: 240.1g
 Flux density: 1.6T
 Magnetic gap height: 3mm
 Linear excursion: 0.3mm
 Dimensions: 100mm dia.

Order Code	Type	Price each
RC79L	70W Titanium Tweeter	£13.99

4in. 30W Mid-Range

A mid-range loudspeaker with a closed back sealed tuned cavity that is integrated into the chassis. The speaker has a formerless ferrofluid cooled voice coil attached to a paper cone with a coated corrugated paper suspension.

Specification
 Nominal impedance: 8Ω
 Resonant frequency: 1150Hz
 Useable frequency response: 900Hz to 12kHz
 Nominal power handling: 30W
 Sensitivity: 91dB
 Voice coil diameter: 10mm
 Minimum impedance: 7.1Ω
 DC resistance: 6.0Ω
 Voice coil inductance: 0.22μH
 Voice coil length: 5mm
 Number of coil layers: 2
 Magnet dimensions: 29 x 5mm
 Flux density: 1.0T
 Magnetic gap height: 2mm
 Linear excursion: 1.5mm
 Moving mass M_{ms} : 1.0 x 10⁻³kg
 Effective piston area S_d : 3.2 x 10⁻³m²
 Dimensions: 102 x 102 x 35.7mm deep
 Fixing centres: 4 x 4.5mm dia. holes on 98.2mm dia. circle
 Baffle cutout: 80mm dia.

3in. 20W Shielded Bass Driver

The compact size, low resonance and long throw capabilities of this driver make it ideal for use in miniature and bookshelf enclosures. The paper cone with half-roll foam suspension combine to produce a well extended frequency response. The high temperature, $\frac{3}{4}$ in. voice coil ensures good power handling. The magnet structure is fully shielded, including a compensation magnet, to allow close proximity of the speakers to magnetically sensitive items such as recording tapes and TV picture tubes without harm. Chassis is pressed steel.

Specification

Nominal impedance:	8Ω
Resonant frequency:	90Hz
Useable frequency response:	100Hz to 5kHz
Nominal power handling:	20W
Sensitivity:	83dB
Former:	Aluminium
Voice coil diameter:	20mm
Voice coil length:	7mm
Number of coil layers:	2
Magnet dimensions:	45 x 9mm, same for compensation magnet
Flux density:	0.8T
Magnetic gap height:	4mm
Linear excursion:	1.5mm
Dimensions:	78 x 78 x 58mm deep
Fixing centres:	4 x 4mm dia. holes on 84mm dia. circle
Baffle cutout:	78mm dia.
Total mass of unit:	0.31kg

Thiele-Small Parameters

Resonant frequency	F_s :	90Hz
Minimum impedance	Z_{min} :	6.6Ω
DC resistance	R_e :	5.8Ω
Voice coil inductance:	L_e :	0.2μH
BL product	BL:	2.6T-M
Suspension compliance	C_{ms} :	$1.3 \times 10^{-3}m/N$
Mechanical Q factor	Q_{ms} :	2.78
Electrical Q factor	Q_{es} :	0.92
Total Q factor	Q_{ts} :	0.69
Mechanical resistance	R_{ms} :	0.47kg/s
Moving mass	M_{ms} :	$2.3 \times 10^{-3}kg$
Effective piston area	S:	$2.9 \times 10^{-3}m^2$
Volume equivalent air at C_{as}	V_{as} :	$1.6 \times 10^{-3}m^3$

Note that the voice coil overhangs the magnetic gap to ensure linear excursion of the cone.

Order Code	Type	Price each
RC82D	20W 3in. Bass Spkr	£12.99

4in. 30W Shielded Bass Driver

The low free air resonance and compact paper cone of this 4in. bass and midrange driver make it ideally suited to miniature and bookshelf enclosures. The high temperature voice coil ensures good power handling up to 30W. The magnet structure is fully shielded and includes a compensation magnet for close operation to sensitive equipment in audio-video applications. Chassis is pressed steel.

Specification

Nominal impedance:	8Ω
Resonant frequency:	80Hz
Useable frequency response:	60Hz to 10kHz
Nominal power handling:	30W
Sensitivity:	83dB

Voice coil diameter:	25mm
Voice coil length:	10mm
Former:	Aluminium
Number of coil layers:	2
Magnet dimensions:	(60 x 10mm) + (55 x 12mm)
Flux density:	0.87T
Magnetic gap height:	4mm
Linear excursion:	3mm
Dimensions:	104 x 104 x 66mm deep
Fixing centres:	4 x 5.2mm dia. holes on 106mm dia. circle
Baffle cutout:	91mm dia.
Total mass of unit:	0.56kg

Thiele-Small Parameters

Resonant frequency	F_s :	90Hz
Minimum impedance	Z_{min} :	6.6Ω
DC resistance	R_e :	5.7Ω
Voice coil inductance	L_e :	0.3μH
BL product	BL:	3.9T-M
Suspension compliance	C_{ms} :	$0.9 \times 10^{-3}m/N$
Mechanical Q factor	Q_{ms} :	2.20
Electrical Q factor	Q_{es} :	0.82
Total Q factor	Q_{ts} :	0.60
Mechanical resistance	R_{ms} :	0.91kg/s
Moving mass	M_{ms} :	$4.0 \times 10^{-3}kg$
Effective piston area	S:	$5.8 \times 10^{-3}m^2$
Volume equivalent air at C_{as}	V_{as} :	$4.5 \times 10^{-3}m^3$

Note that the voice coil overhangs the magnetic gap to ensure linear excursion of the cone.

5in. 40W Bass Driver

A low resonance driver with compact paper cone with half roll foam surround suspension. This 5 $\frac{1}{4}$ in. bass to midrange driver is ideally suited for use in miniature speaker enclosures and 2-way bookshelf systems. The high temperature, 1in. voice coil ensures good power handling up to 40W r.m.s. Chassis is pressed steel.

Specification

Nominal impedance:	8Ω
Resonant frequency:	52Hz
Useable frequency response:	40Hz to 10kHz
Nominal power handling:	40W
Sensitivity:	88dB
Voice coil diameter:	25mm
Voice coil length:	11mm
Former:	Aluminium
Number of coil layers:	2
Magnet dimensions:	84 x 15mm
Flux density:	1.1T
Magnetic gap height:	5mm
Linear excursion:	3mm
Dimensions:	142mm dia. x 65mm deep
Fixing centres:	4 x 5.2mm holes on 128mm dia. circle
Baffle cutout:	113mm dia.
Total mass of unit:	0.91kg

Thiele-Small Parameters

Resonant frequency	F_s :	52Hz
Minimum impedance	Z_{min} :	7.5Ω
DC resistance	R_e :	6.3Ω
Voice coil inductance	L_e :	0.3μH

6in. 50W Bass/Midrange

A bass and midrange loudspeaker that offers an extended frequency response, low resonance and high sensitivity at a very attractive price. Ideally suited for use in small volume 2-way systems, this unit features a paper cone with foam surround and a high temperature aluminium voice coil that offers excellent power handling and linearity.

Specification

Nominal impedance:	8Ω
Resonant frequency:	51Hz
Useable frequency response:	50Hz to 10kHz
Nominal power handling:	50W
Sensitivity:	90dB
Voice coil diameter:	25mm
Voice coil length:	11mm
Former:	Aluminium
Number of coil layers:	2
Magnet dimensions:	84 x 15mm
Flux density:	1.1T
Magnetic gap height:	5mm
Linear excursion:	3mm
Dimensions:	173mm dia. x 74mm deep
Fixing centres:	4 x 5.2mm dia. holes on 157mm dia. circle
Baffle cutout:	142mm dia.
Total mass of unit:	0.95kg

Thiele-Small Parameters

Resonant frequency	F_s :	51Hz

6in. 50W Fibreglass Cone Bass Driver

A very high quality bass and mid-range loudspeaker with a varnished, woven, fibreglass cone that is coupled to a half-roll, high loss rubber surround. The loudspeaker features a large magnet and low resonance, and produces a very detailed, clear sound with a smooth frequency response. Chassis is pressed steel.

Specification

Nominal impedance:	8Ω
Resonant frequency:	44Hz
Useable frequency response:	45Hz to 7kHz
Nominal power handling:	50W
Sensitivity:	90dB
Voice coil diameter:	25mm
Voice coil length:	11mm
Former:	Aluminium
Number of coil layers:	2
Magnet dimensions:	100 x 18mm
Flux density:	1.3T
Magnetic gap height:	6mm
Linear excursion:	2.5mm
Dimensions:	173mm dia. x 78mm deep

Fixing centres:	4 x 5.2mm holes on 157mm dia. circle
Baffle cutout:	142mm dia.
Total mass of unit:	1.5kg

Thiele-Small Parameter

Resonant frequency	F_s :	44Hz
Minimum impedance	Z_{min} :	7.5Ω
DC resistance	R_e :	6.5Ω
Voice coil inductance:	L_e :	0.12μH
BL product	BL:	6.6T·m
Suspension compliance	C_{ms} :	$1.25 \times 10^{-3}m/N$

6in. 50W Kevlar Cone Bass Driver

Ideally suited for top-end systems, this 6½ in. bass to midrange driver features a black woven kevlar cone coupled to a half-roll, butyl rubber surround suspension. The large magnet, high temperature voice coil and low free air resonance contribute to the clarity, transient response and excellent musical tonal quality produced by this driver. Chassis is pressed steel.

Specification

Nominal impedance:	8Ω
Resonant frequency:	43Hz
Useable frequency response:	50Hz to 7kHz
Nominal power handling:	50W
Sensitivity:	89dB
Voice coil diameter:	25mm
Voice coil length:	11mm
Former:	Aluminium
Number of coil layers:	2
Magnet dimensions:	100 x 18mm

Flux density:	1.3T
Magnetic gap height:	6mm
Linear excursion:	2.5mm
Dimensions:	173mm dia. x 77.8mm deep
Fixing centres:	4 x 5.2mm dia. holes on 157mm dia. circle
Baffle cutout:	142mm dia.
Total mass of unit:	1.5kg

Thiele-Small Parameters

Resonant frequency	F_s :	43Hz

RC89W A3	45W 8in. Paper Bass	£16.99

8in. 50W Low Resonance Bass Driver

The paper cone with half-roll foam surround of this 8in. diameter bass to midrange driver offers a combination of extended frequency response, low resonance (37Hz) and high sensitivity. The driver is ideally suited for 2-way and 3-way systems in modest sized ported or unported cabinets. The high temperature 1in. diameter voice coil ensures excellent power handling capability up to 50W r.m.s. Chassis is pressed steel.

Specification

Nominal impedance:	8Ω
Resonant frequency:	37Hz
Useable frequency response:	40Hz to 7kHz
Nominal power handling:	50W
Sensitivity:	92dB
Voice coil diameter:	25mm
Voice coil length:	11mm
Former:	Aluminium
Number of coil layers:	2
Magnet dimensions:	84 x 15mm
Flux density:	1.1T

IN-CAR LOUDSPEAKERS

Eminence

A range of high power loudspeaker drivers specifically designed for use in cars and in particular for mounting into a rear parcel shelf. All the drivers are designated 'free air' types, that is, they have been specially developed to operate in a closed box volume (infinite baffle type enclosure), and they *must not* be installed in any type of ported enclosure. The half-roll cone surround not only makes for good bass response but also helps isolate the cone from vehicle vibrations, ensuring a clearer reproduction with less colouration. In addition the cone is coated to resist damp and add extra rigidity to stabilise the cone material against the wide range of temperature variations that are commonly experienced in the car.

Powerful magnet assemblies are designed to provide extended travel for the speaker cone through using an 'overhanging' voice coil where the magnetic gap height is typically only half of the total voice coil length. This

allows the cone to operate more linearly when driven hard. These are not modified Hi-Fi or PA speakers, nor are they merely scaled-up 'ordinary' car speakers, but have been specially developed for parcel shelf operation. It is also possible to operate these drivers in an infinite baffle enclosure with the equivalent closed volume.

'Killer Car Stereo on a Budget' by Daniel L. Ferguson (AA77J) provides a wealth of information about in-car speaker systems.

▶ IT'S A FACT! ◀

LOUDSPEAKER SENSITIVITY

Loudspeaker sensitivity is the sound pressure level (SPL) a loudspeaker produces at 1m, when it is driven with 1W of pink noise. Pink noise is defined as random noise with equal energy per octave. A sensitivity of 93dB SPL is generally high and is typical of studio monitors and PA systems. A sensitivity of 85dB SPL is generally considered low and is typical of small compact domestic loudspeakers. The following formula calculates the maximum output capability of a loudspeaker - that is, the sound pressure level at 1m:

$$\text{dB SPL} = 10 \log(P) + S$$

P is the continuous sine wave power rating of the loudspeaker, and S is the sensitivity rating in dB SPL/1W/1m.

Thus for a loudspeaker rated at 100W rms, and its sensitivity is 92dB SPL/W/m, then its maximum output is:

$$10 \log(100) + 92 = 112\text{dB}$$

6in. 100W Bass to Midrange Driver

Offers high power in a compact size, with a smooth frequency response in any range from bass to midrange in 2-way systems, and selected midrange or bass ranges in multi-way systems.

Specification

Nominal impedance:	4Ω
Resonant frequency:	66Hz
Usable frequency response:	60Hz to 3kHz
Nominal power handling:	100W
Sensitivity:	90dB
Voice coil diameter:	38mm
Magnet weight:	16oz
Dimensions:	166mm dia. x 83.5mm deep
Fixing holes:	4 x 7mm
Baffle cutout:	146mm dia.
Enclosure size:	27.7L/0.98cu.ft for 80Hz min.

Thiele-Small Parameters

15in. 300W Bass Driver

If you want even more power then this driver provides an increase both in power handling and cone area. Primarily a bass speaker and, in view of its size, best utilised as a common bass driver in a 3-way system having stereo midrange and treble channels. It still maintains a broad frequency response to be useful in the midrange too.

Specification	
Nominal impedance:	4Ω
Resonant frequency:	38Hz
Usable frequency response:	25Hz to 2kHz
Nominal power handling:	300W
Sensitivity:	99dB
Voice coil diameter:	64mm
Magnet weight:	56oz
Dimensions:	383.5mm dia. x 166mm deep
Fixing holes:	8 x 7mm
Baffle cutout:	359mm dia.

Thiele-Small Parameters	
Resonant frequency	f_s : 38.3Hz
Impedance	R_e : 3.90Ω
Coil inductance	L_e : 0.97mH
Electromagnetic Q	Q_{es} : 0.93
Mechanical Q	Q_{ms} : 13.07
Total Q	Q_{ts} : 0.87
Compliance equivalent volume	V_{as} : 211.03L/7.45cu.ft
Peak diaphragm displacement volume	V_d : 312.67cc
Suspension mechanical compliance	C_{ms} : 0.2049mm/N
BL product	BL: 9.21T-M
Diaphragm mass including airload	M_{ms} : 84.28g
Equivalent mechanical resistance loss	R_{ms} : 1.5521N*sec/m
Efficiency bandwidth product	EBP: 41.1
Voice coil overhang	X_{max} : 3.7mm
Cone area	S_d : 856.34cm ²

FOR TOP QUALITY & VALUE!

18in. 400W Bass Driver

The ultimate loudspeaker in this range, it is for those who firmly believe that there is no substitute for size. This driver has been optimised for bass and sub-woofer applications, and although it has a usable if limited frequency response it should not be expected to operate well in the midrange in 2-way systems. Rather it should form the common bass driver in 3-way and multi-way systems.

Specification

Nominal impedance:	4Ω
Resonant frequency:	22Hz
Usable frequency response:	20Hz to 1kHz
Nominal power handling:	400W
Sensitivity:	99dB
Voice coil diameter:	76mm
Magnet weight:	95oz
Dimensions:	457mm dia. x 181mm deep
Fixing centres:	8 x 7mm
Baffle cutout:	422mm dia.

Thiele-Small Parameters

Resonant frequency	f_s :	21.92Hz
Impedance	R_e :	4.00Ω
Coil inductance	L_e :	1.10mH
Electromagnetic Q	Q_{es} :	0.37
Mechanical Q	Q_{ms} :	11.41
Total Q	Q_{ts} :	0.36
Compliance equivalent volume	V_{as} :	858.59L/30.32cu.ft
Peak diaphragm displacement volume	V_d :	624.41cc
Suspension mechanical compliance	C_{ms} :	0.4703mm/N
BL product	BL:	12.96T-M
Diaphragm mass including airload	M_{ms} :	112.09g
Equivalent mechanical resistance loss	R_{ms} :	1.3527 N*sec/m
Efficiency bandwidth product	EBP:	59.6
Voice coil overhang	X_{max} :	5.5mm

MK50E	H20 200W 18in Bass Dvr	£179.99

HIGH POWER, HIGH QUALITY LOUDSPEAKERS

BIG CAT

by Eminence

A versatile range of loudspeakers for guitars, bass guitars, keyboards and PA applications. To emphasise the unique qualities of the complex guitar sound, a specially tuned cone has been developed, which when used with different edge surround materials also meets the demands of other applications. The cone surround material for the majority of the speakers is plasticised linen, but other materials are used for selected units. A linen edge gives a smooth surround and excellent bass response, and is particularly suitable for bass guitars, keyboards and for bass drivers in multi-way enclosures and PA systems. For dedicated lead and rhythm guitar Eminence recognised that only a paper edge can deliver the characteristic presence peak which these instruments demand. Most of the units featured have a strong steel chassis and offer a unrivalled blend of value for money and sound quality. For those applications where only the best will do, such as professional PA and monitoring systems then those with a cast aluminium chassis should be chosen. A rigid chassis is essential to maintain tight engineering tolerances that is necessary to withstand the punishment that speakers 'on-the-road' experience.

This superb range of speakers includes loudspeakers that are suitable for the most demanding applications for musical instruments and PA installations. The term PA covers a diversity of applications from speech and music to live and pre-recorded sources, concerts, cabaret, churches, conferences, and night-clubs, both by 'mobiles' and in permanent installations.

6in. 50W Power Speaker

A compact loudspeaker designed for general purpose applications and as part of a high quality in-car entertainment system. The loudspeaker features a paper cone and a resilient foam surround.

Specification

Nominal impedance:	8Ω
Resonant frequency:	50Hz
Usable frequency response:	55Hz to 8kHz
Nominal power handling:	50W rms
Sensitivity:	89dB
Voice coil diameter:	38mm
Magnet weight:	20oz
Dimensions:	165mm dia. x mm deep
Fixing centres:	4 x 6.35mm dia. holes on 153mm dia. circle
Baffle cutout:	145mm dia.

Thiele-Small Parameters

Resonant frequency	f_s :	58.2Hz
Impedance	R_e :	7Ω

Order using code WM82D £9.95NV

8in. 100W Midrange Driver

A paper cone driver with corrugated surround optimised for midrange use over a bandwidth of 600Hz to 4kHz in 3-way systems. Because of the specialised nature of this driver it is not suitable for use on its own or as a bass unit. In a 3-way system it can be used with any of the other bass and treble drivers in the same range.

Specification

Nominal impedance:	8Ω
Resonant frequency:	550Hz
Usable frequency response:	600Hz to 4kHz
Nominal power handling:	100W rms
Sensitivity:	99.7dB
Voice coil diameter:	50.8mm
Magnet weight:	38oz
Dimensions:	203mm dia. x 89mm deep
Fixing centres:	8 x 7mm dia. holes on 197mm dia. circle
Baffle cutout:	187.3mm dia.

Thiele-Small Parameters

Resonant frequency	f_s :	547.40Hz
Impedance	R_e :	7.08Ω

HOT TIP

If you have to test a loudspeaker drive unit out of its cabinet, remember to keep the volume low! Without an airtight cabinet, many speakers can be damaged if their cones are allowed to travel too far whilst reproducing sound.

15in. 200W Bass Power Speaker

A higher power version of the 15in. 100W (XG52G) featuring an extended low frequency response. This loudspeaker is specifically intended as a bass driver in multiway systems and for bass guitar. The loudspeaker has a paper cone with plasticised linen surround and pressed steel chassis.

Specification	
Nominal impedance:	8Ω
Resonant frequency:	46Hz
Usable frequency response:	45Hz to 5kHz
Nominal power handling:	200W rms
Sensitivity:	99dB
Voice coil diameter:	63.5mm
Magnet weight:	80oz
Dimensions:	381.7mm dia. x 153.6mm deep

15in. 300W Bass PA Driver

NEW

A high performance loudspeaker featuring a die-cast aluminium chassis, paper cone and plasticised cloth surround that has been designed for the most demanding applications. The speaker features a kapton coil former with a polyamide-imide coated copper voice coil. Primarily intended for all bass applications, but suitable for stage PA guitar combos, general purpose bass and electronic keyboards.

Specification

Nominal impedance:	8Ω
Resonant frequency:	48Hz
Usable frequency response:	45Hz to 5kHz
Nominal power handling:	300W rms
Sensitivity:	99dB
Voice coil diameter:	76.2mm
Magnet weight:	95oz
Dimensions:	384.2mm dia. x 161mm deep
Fixing centres:	8 x 7mm dia. holes on 369.9 dia. circle
Baffle cutout:	360.3mm dia.

Thiele-Small Parameters

Resonant frequency	f_s :	47.9Hz
Impedance	R_e :	6.51Ω
Electromagnetic Q	Q_{es} :	0.41
Mechanical Q	Q_{ms} :	5.01
Total Q	Q_{ts} :	0.38
Compliance equivalent volume	V_{as} :	203.57L/7.16cu.ft
Peak diaphragm displacement volume	V_d :	93.8cc
Suspension mechanical compliance	C_{ms} :	0.1977mm/N
BL product	BL:	16.29T-M
Diaphragm mass including airload	M_{ms} :	55.85g
Equivalent mechanical resistance loss	R_{ms} :	3.3548N*sec/m
Efficiency bandwidth product	EBP:	116.2
Voice coil overhang	X_{max} :	1.2mm
Cone area	S_d :	856.34cm ²
Resonant impedance	Z_{max} :	85.6Ω

15in. 500W PA Driver

A precision engineered loudspeaker for the discerning professional user and musician, that has been designed, engineered and manufactured to astonishing tolerances to produce a loudspeaker offering outstanding sound quality and reliability. The paper cone is supported by a corrugated plasticised cloth surround, and the huge 4in. diameter voice coil is made from polyamide-imide coated copper wound on a kapton former. Magnet composition is APS ferrite. Chassis is diecast aluminium.

Specification

Nominal impedance:	8Ω
Resonant frequency:	38Hz
Usable frequency response:	40Hz to 4kHz
Nominal power handling:	500W rms
Sensitivity:	98dB
Voice coil diameter:	101.6mm
Magnet weight:	109oz
Dimensions:	384.2mm dia. x mm deep
Fixing centres:	8 x 7mm
Baffle cutout:	360.3mm dia.

Thiele-Small Parameters

Resonant frequency	f_s :	38.81Hz

LOUDSPEAKER CABINETS

Professional Type

A range of very robust, high quality speaker cabinets designed for disco or PA use. Each is finished in hard wearing black vynide, and has carrying handles inset into both sides. All models have a removable grille covered in a smart black cloth. Speaker drivers are loaded from the front of the front baffle to ensure a perfect seal once they have been fitted. The cabinets are not lined internally, and the sound quality can be

greatly improved by lining the cabinets with our Acoustic Wadding (RY06G) shown elsewhere in this section. Cut outs for speakers are provided on the baffle (see table below). Each cabinet is supplied with four clamps to hold the large bass speakers in place, and 8mm holes have been drilled at 90° intervals around the bass cut out of each cabinet, and threads have been fitted which accept the clamp bolts. The tweeters are held in place by screws (not included). There are three models in the range: Type 1 (GL23A) will accommodate a single 12in. bass unit and two bullet-type tweeters; Type 2 (XB28F) will accommodate two 12in. bass units and two bullet-type tweeters; and Type 3 (GL24B) will accommodate a single 15in. bass unit, two bullet-type tweeters and a horn tweeter. All cabinets are provided with two 35mm holes on the rear for installing flush-mounting sockets. A part-drilled hole, which has been sunk into the inside of the bottom panel, is included, which can be opened fully with a keyhole saw or similar, so that a tripod mount (such as our KU54J) can be fitted, by using the minimum of necessary woodworking.

Model	Overall dimensions (mm)	Approx. internal volume (cm ³)	Cutouts provided
Type 1	H: 526mm W: 450mm D: 287mm	51,000	284mm (bass) 2 x 70mm (treble)
Type 2	H: 786mm W: 450mm D: 280mm	71,000	2 x 284mm (bass) 2 x 70mm (treble)
Type 3	H: 725mm W: 512mm D: 357mm	111,000	354mm (bass) 2 x 70mm (treble) 53mm x 154mm* (horn treble)

* Please note that the vertical dimension of the horn tweeter cut out on the Type 3 cabinet increases to 70mm towards one end. This is to enable the magnet assembly to be inserted through the cut out.

Order Code	Type	Price each
GL23A	H26 12in Bass Cabinet	£59.99
XB28F	H30 2x12in Bass Cabinet	£59.99
GL24B	H42 15in Bass Cabinet	£69.99

COVERING CLOTHS

Vynide Covering Cloth

A high-quality embossed black vynide for covering cabinets. Very hard-wearing. Available in two widths: 1.3m (51in.) and 0.6m (23½in.) and sold per ¼m length (9.8in.).

Note: Price shown is for ¼m length. We will cut to length required in multiples of ¼m only. Max length in one piece 24m.

Please order in multiples of ¼m, i.e. to order 1m of XR95D, order 4 XR95D; to order ¾m of XR95D order 15 XR95D. Shops only stock pre-cut lengths.

Order Code	Type	Price each
XR95D	Vynide 51in.	£2.49
XS05F	Vynide 23.5in.	£1.49

Buffalo Covering Cloth

A high-quality heavily-embossed shiny black plastic material with a "buffalo-skin" design. Very hard wearing. Available in two widths: 1.27m (50in.) and 0.6m (23.5in.) and sold per ¼m length (9.8in.).

Note: Price shown is for ¼m length. We will cut to length required in multiples of ¼m only. Max length in one piece 25m.

Please order in multiples of ¼m, i.e. to order 1m of XR96E, order 4 XR96E; to order ¾m of XR96E, order 15 XR96E. Shops only stock pre-cut lengths.

Order Code	Type	Price each
XR96E	Buffalo 50in.	£2.49
XS06G	Buffalo 23.5in.	£1.49

LOUDSPEAKER CABINET WADDING

A high quality wadding, acoustically designed for use in loudspeaker cabinets. The material is approx 19mm (approx. ¾ in) thick, but may be layered to make up greater thicknesses. Available in 0.61m (24in) widths only, and is sold per ½m (19½in.).

Note: Price shown is for ½m length. We will cut to length required in multiples of ½m only. Max. length in one piece: 20m.

Please order in multiples of ½m, i.e. to order 1m of RY06G, order 2 RY06G; to order ¾m order 7 RY06G.

Order Code	Type	Price each
RY06G	Acoustic Wadding	99p

COMPARE OUR PRICE & QUALITY – SAVE MONEY TODAY!

GRILLE CLOTHS

Diamond Pattern Loudspeaker Grille Cloth

A high quality black plastic fibre cloth woven into a small diamond pattern, for use as grille cloths on loudspeaker cabinets. The material is acoustically highly transparent. It is available in two widths: 1.32m (52in.) and 0.61m (24in.) and is sold per 1/4m (9.8in.) length.

Note: Price shown is for 1/4m length. We will cut to length required in multiples of 1/4m only. Max length in one piece 24m.

Please order in multiples of 1/4m, i.e. to order 1m of XS14Q, order 4 XS14Q; to order 3/4m of XS14Q, order 15 XS14Q. Shops only stock pre-cut lengths.

Order Code	Type	Price each
XS14Q	Diamond Cloth 1.32m	£3.99
XS15R	Diamond Cloth 0.61m	£2.49

Stripe Pattern Loudspeaker Grille Cloth

A black plastic fibre cloth woven into an attractive stripe pattern and suitable for use as grille cloths on loudspeaker cabinets etc. The material is available in two widths 1.49m (58.7in.) and 0.72m (28.3in.) and is sold per 1/4m (9.8in.) length.

Note: Price shown is for 1/4m length. We will cut to length required in multiples of 1/4m only. Max length in one piece 40m.

Please order in multiples of 1/4m, i.e. to order 1m of XS07H, order 4 XS07H; to order 3/4m of XS07H, order 15 XS07H. Shops only stock pre-cut lengths.

Order Code	Type	Price each
XS07H	Stripe Cloth 1.49m	£3.99
XS09K	Stripe Cloth 0.72m	£2.49

Loudspeaker Grille

A solid black nylon grille material for loudspeaker cabinets. Available only 0.61m (24in.) wide and sold per 1/4m (9.8in.) length.

Note: Price shown is for 1/4m length. We will cut to length required in multiples of 1/4m only. Max length in one piece 15m.

Please order in multiples of 1/4m, i.e. to order 1m of XR94C, order 4 XR94C; to order 3/4m of XR94C, order 15 XR94C. Shops only stock pre-cut lengths.

Order Code	Type	Price each
XR94C	Black Nylon Grille	£1.99

Open Weave Loudspeaker Grille Cloth

An acoustically transparent loudspeaker grille cloth in black with either a fine open weave pattern or a large 'diamond' pattern.

Note: The cloth is sold in multiples of 1/2m in a width of approximately 40in. We will cut to length required in multiples of 1/2m only. To order 1m of AB60Q quote 2 AB60Q. To order 2 1/2m of AB70M quote 5 AB70M. Shops only stock pre-cut lengths.

Order Code	Type	Price each
AB60Q	Fine Weave Cloth	£1.99
AB70M	Large Weave Cloth	£1.99

ACCESSORIES

Round Loudspeaker Grilles

A range of protective, circular metal grilles to complement the Big Cat range of speakers. The grilles are finished in matt black and have a PVC covering strip around the edge. Fitting is by loudspeaker fixing clamps, (e.g. FJ40T). Available in the following sizes: 5, 8, 10, 12, 15 and 18 inches diameter.

Order Code	Type	Price each
FJ38R	5in Speaker Grille	£1.49
FJ39N	8in Speaker Grille	£1.80
YK71N	10in Speaker Grille	£2.29
YK72P	12in Speaker Grille	£2.99
YJ04E A1	15in Speaker Grille	£3.49
YJ05F A1	18in Speaker Grille	£6.99

Loudspeaker Fixing Clamp

A fixing clamp suitable for speakers of 10, 12 and 15 inch dimensions. Made from tough moulded plastic, fixing is by nut and bolt. When clamping down, the fixing clamp bends slightly to give the fixture a high degree of resilience.

Order Code	Type	Price each
BK3DH	Spkr Fixing Clamp	30p

Loudspeaker Stand

A very sturdy, heavy duty, tubular loudspeaker stand that extends to a height of 1.98m. The stand is supported by three legs which are 36mm diameter. The main stem is also 36mm diameter, the telescopic section is 33mm diameter. Strong handled bolts are used to clamp the movable parts in position. A wide removable loudspeaker plate is provided to fix the stand to the loudspeaker. Finished in hard wearing black paint. Supplied with fixing screws. Max. weight on stand 32kg.

Order Code	Type	Price each
XM28F H6	HD Speaker Stand	£42.99

'Top Hat' Speaker Stand

A heavy-duty pole mounting speaker stand which has been designed to be recessed in a speaker cabinet. This system is intended for use with PA and mobile disco speakers which need to be transported often and set up quickly. In particular, it is suitable for our GL23A, GL24B and XB28F cabinets which already have a hole part-drilled for this purpose. To fit, a 44mm diameter hole is drilled in the bottom of the cabinet, the top hat is inserted and its flange is secured in place by 4 screws (9mm holes being provided for this purpose). A 105mm long 'hollow' with a diameter of 35mm is then available which will safely accommodate poles or tripods of between 25mm and 33mm in diameter. The maximum weight that the overall support system can carry is limited by the stand used and the cabinet. However, it must not exceed 150kg. The top hat is made from aluminium, weighs 380g and is black in colour. The flange, which is 3mm tall and 110mm in diameter, could be flush-mounted on the cabinet bottom if a suitable recess is provided. Overall height: 115mm. Mounting: 4 equally spaced 9mm holes on an 80mm PCD.

Order Code	Type	Price each
KU54J	Top Hat Speakr Stand	£4.99

FOR TOP QUALITY & VALUE!

Metal Speaker Clamping Kit

A sturdy loudspeaker clamping kit comprising 4 1/4 in Whitworth bolts 38mm long, 4 T-nuts, 4 star washers and 4 clamps in 3mm thick black finish steel. The kit may be used without the clamps to fix 10 or 12 inch speakers to the front or the rear of a baffle using the holes in the speaker chassis. If rear mounting, the bolts may have to be cut short with a hacksaw if they protrude too much through to the front. Put a nut on first before sawing, then removing the nut will clean up the end of the thread as it is unscrewed. The T-nuts require holes in the baffle of 3/8 in clearance into which they can be tapped home lightly with a hammer. Alternatively the speaker chassis can be gripped on four points around the edge by the right-angled clamps, using the bolts and T nuts in a 'stand off' position from the chassis. The clamps are 42mm long x 25mm wide, and have a 10.5mm deep fulcrum.

Order Code	Type	Price each
FJ40T	Speaker Clamp Kit	£1.99

FLOOR-STANDS FOR HI-FI SPEAKERS

Spiked Type

A pair of very well made loudspeaker stands, each supplied with four spikes. These are useful when the speaker is used on a carpet as they will pierce it, making contact with the floor underneath and providing a much more rigid support. Because the surface area at the tip of each spike is small, there is no noticeable damage done to the carpet and furthermore very few sound vibrations are in danger of being transmitted back to the turntable via the floor. The spikes are

screwed into the base of the stand and can be left off if not required. The stand can safely support a weight of 25kg by virtue of its design and the high quality materials used. The speaker mounting plate is 190mm square and so should accept most speakers. Self-adhesive foam strips are supplied to stick onto the mounting plate so that the bases of the speaker cabinets are not scratched in any way. The stands are made of very strong tubular steel with stoppered ends and are finished attractively in black. Overall dimensions (excluding spikes): 410mm high x 280mm wide x 260mm long.

Order Code	Type	Price each
GL11M	H13 Spiked Speaker Stand	£34.99

Wall Brackets

A standard pair of speaker wall brackets with adjustable swivel and tilt. Speakers of 152mm to 305mm in length weighing up to 15kg can be safely carried, and foam pads are supplied which protect each speaker whilst it is being firmly gripped by the clamp. No drilling to the speakers is required. To mount a speaker, four holes must be drilled in the wall; 5mm dia. fixing holes being provided on each bracket to accommodate the four screws. These brackets are supplied with full installation instructions, and should only be used if the wall is capable of supporting the weight. Wall plugs must be used if mounting on masonry is intended. Please note that screws and wall plugs are not supplied.

Order Code	Type	Price each
GL45Y	C4 Wall Brackets	£14.99

Low-Profile Speaker Stands with Castors

A high quality pair of speaker stands which are adjustable to cater for speakers of up to 305mm in width and 25kg or less in weight. The attractive frames are made from high quality tubular steel finished in black. Four heavy duty castors are supplied per stand, along with panels that blank off the ends of the tubular steel frame. The speakers are placed on self-adhesive foam pads which are mounted on the top frame. These prevent the cabinet bottoms from being scratched in any way. Full assembly instructions are included. Overall dimensions (including pads and castors, facing forwards): 248mm high x 360mm wide x 310mm long.

Order Code	Type	Price each
GL44X	G7 Low Profile Stands	£24.99

ANTI-ACOUSTIC MOUNTINGS

A range of sharp pointed, conical mountings for CD players, turntables, tape decks and loudspeaker cabinets. The use of these devices follows the principle that the smaller the contact area between the base of the equipment and the supporting surface, then the less your music will be affected by feedback and wave resonances. Pointed spikes are a simple yet effective method of improving performance by reducing subfrequency vibration and are a must for every Hi-Fi enthusiast. In each case the conical support is accompanied by a metal disc with a central indentation for the point of the cone to rest on, protecting furniture, carpet or floor. Three different types are available:

CJ80B is a gold-plated, brass cone on a sandalwood base having a low sympathetic vibration characteristic, and is intended for use with items not exceeding 10kg in weight, which includes CD players and turntables. One complete set contains six cones and discs, three of which would be used with a CD or record player, while the other three are used with the amplifier. In use the cones are inverted with their bases carrying the bottom panel of the unit, while the points rest on the metal discs, protecting the supporting surface.

CJ81C is a composite gold-plated brass and sandalwood cone and suitable for small to medium sized loudspeaker cabinets not exceeding 20kg in weight. Three cones are used with each cabinet of a stereo pair (six supplied as a set).

CJ82D is identical to CJ81C but includes a fixing screw so that it can be physically attached to the bottom of the speaker cabinet (which must be drilled before fitting the cones). The contact points of the mounts rest on the metal discs. Three cones should be used with each cabinet (six supplied as a set).

Order Code	Type	Price each
CJ80B	Small AA Mounts	£39.99
CJ81C	Large AA Mounts	£49.99
CJ82D	Fixed AA Mounts	£59.99

GUITAR AMPLIFIERS

10W Guitar Amp

A very compact and sturdily built 10W guitar amplifier. This amplifier is primarily intended for use as a practice amp, but if 'miked-up' could be used in other applications. Front panel controls are on/off, master volume, treble, mid and bass. An 'on' LED and 1/4 inch input socket are also fitted on the front panel.

Specification

Power output: 10W RMS 8Ω
 Input impedance: 220kΩ
 Maximum input signal level: 10V p-p

Equalisation

Bass: 8dB boost (100Hz)
 Mid: 12dB boost (500Hz)
 Treble: 20dB boost (10kHz)
 Power requirements: 240V AC 50Hz mains
 Fuse rating: 1A fast blow
 Dimensions: 245 x 265 x 165mm (excluding feet & handle)

Order

Code	Type	Price each
XM34M H9	10W Guitar Amp	£44.99

15W Guitar Amplifier

A powerful 15W rms guitar amplifier and loudspeaker in an extremely tough wooden cabinet with corner protectors and carrying handle. Two inputs are provided, one for low output and one for higher output guitars. When switched to Channel 2, the output volume is controlled by the Channel 2 level control and the Overdrive is bypassed. The three channel Equaliser controls Treble, Mid and Bass. The Treble control adds crispness to the sound, the Mid control can thin-out or fatten-up the tone when turned down or

up respectively, and the Bass control adds warmth to the sound.

The Overdrive circuit is brought into operation by switching to Channel 1. The circuit uses multiple feedback loops to create an effect similar to that heard when a valve amplifier is overdriven. Turning the Pre-gain control clockwise increases the level with the distortion occurring in the last quarter-turn. The Post-gain control cuts or boosts the level of the signal from the Overdrive circuit. It will enable the correct balance to be reached between the unchanged and overdriven signal, and works together with the Pre-gain control to set the total harmonic content, gain and operating level. When switched to Channel 1, the Channel 2 level control will still have some effect on the output volume, and the Treble control now adds bite or edge to the overall sound. Three standard 1/4 in. jack sockets are provided on the back of the amplifier. The Phones output allows a stereo headphone to be plugged in and doing this cuts off the internal speaker for private listening (the output is mono). The Line output allows an external power amp, PA system, or tape recorder to be driven from the amplifier. Finally, the Footswitch socket allows a footswitch to be connected and duplicates the Channel 1/Channel 2 switch so that the Overdrive circuit can be switched in and out during a performance.

Specification

Power output: 15W rms at 1kHz (thd = 10%)
 Loudspeaker: 8in. dia. 4Ω
 Bass boost: >8dB at 100Hz
 Mid boost: >10dB at 500Hz
 Treble boost: >20dB at 10kHz
 Frequency response: 120Hz to 20kHz (all tone controls at 1C)
 Input sensitivity: 28mV at 220kΩ (high)

Signal to noise ratio: 56mV at 20kΩ (low)
 Power source: Better than 50dB
 Power source: 240V AC 50Hz
 Fuse type: 1A 250V AC fast acting
 Size: 335 x 345 x 182mm
 Net weight: 6kg

Order Code	Type	Price each
XM11M H13	15W Guitar Amplifier	£64.99

FOR CASHTEL
 Phone 01702 552941

75W Guitar Amp

A powerful 75W amplifier that has two 1/4 inch input jack sockets (high and low). Controls are provided for 'overdrive'; pre-gain, post-gain and waveform (adjusts the harmonic content). The overdrive may be switched in or out, either from the front panel or via a foot switch (not supplied). Controls are also provided for reverb, bass, low mid, high mid, treble and master volume. An additional switch; 'bright' gives the signal more presence. The rear panel has a mains on/off switch and three jack sockets; external speaker (8Ω), pre-amp out and power amp in.

Specification

Power output: 75W RMS 8Ω
 Bass: ±15dB (50Hz)
 Low middle: ±15dB (300Hz)
 High middle: ±15dB (2kHz)
 Treble: ±15dB (10kHz)
 Bright: +8dB (3kHz) Overdrive
 gain: 80dB (1kHz)
 S/N ratio: >60dB

Input impedance

Low: 36kΩ
High: 1MΩ

Maximum input signal level

Low: 20V p-p
High: 10V p-p
Pre-amp out: 1V RMS (10kΩ)
Power amp in: 1V RMS (28kΩ)
Power requirements: 240V AC 50Hz mains
Fuse rating: 3A fast blow
Dimensions: 440 x 460 x 260mm
(excluding feet & handle)

Order Code	Type	Price each
XM35Q H33	75W Guitar Amp	£164.99

40W Bass Amp

A powerful 40W bass guitar amplifier with built-in limiter, sturdily built and ideal for on stage use. This amplifier provides two 1/4 inch input jack sockets (high and low), controls are provided for volume, bass, mid and treble. A limiter circuit is included which prevents the amplifier from being overdriven. The limiter may be switched in or out from a front panel switch, operation is indicated by an LED. Sockets are provided for line out and headphones. The on/off switch is on the rear panel and an LED on the front panel indicates power on.

Specification

Power output: 40W RMS 8Ω
Bass: ±12dB (50Hz)
Middle: ±12dB (500Hz)
Treble: ±12dB (5kHz)
Limiter range: 23dB
S/N ratio: >50dB

Input impedance

Low: 36kΩ
High: 220kΩ

Maximum input signal level

Low: 20V p-p
High: 10V p-p
Headphones output: 250mV 8Ω
Line output: 2V p-p (10kΩ)
Power requirements: 240V AC 50Hz mains
Fuse rating: 2A fast blow
Dimensions: 440 x 490 x 290mm
(excluding feet & handle)

XM36P H37	40W Bass Amp	£134.99

60W KEYBOARD AMPLIFIER

NEW

Specification

Woofer diameter: 12in.
Horn tweeter size: 135 x 80mm
Power output
4Ω load: 80W rms
8Ω load: 60W rms
Treble control (10kHz): ±15dB
Bass control (100Hz): ±15dB
S/N ratio: >60dB
Input Impedance
high: 470kΩ
low: 47kΩ
Dimensions: 510 x 307 x 515mm

GREAT VALUE!
£199.99
AG87U
[H40]

A robust, high quality, 3-channel keyboard amplifier, designed for professional keyboard use, and capable of delivering 60W rms. The amplifier drives a 12in. woofer, and a 5 1/4 x 3 1/4 in. horn tweeter.

The front panel has both high and low inputs for instrument connection, thereby allowing the user to select the correct input according to the instruments output level. Each channel is provided with separate gain controls, bass and treble controls, and a reverb control. The front panel also includes the main volume and reverb controls, and a foot switch jack to allow the user to turn the reverb on and off by using a foot pedal.

The back panel has send/return jacks to connect to external effects units. Plugging in to these jacks will break the main signal path. A slave jack is provided which can be used to connect a line level signal to an external power amplifier, PA system, or similar device. There is also an external speaker jack which allows an additional 8Ω (minimum) loudspeaker load to be added. The substantial cabinet is covered in a hard wearing material to cope with the rigours of professional use.

75W Bass Amplifier

NEW

A robust, high quality, bass amplifier, designed for the professional bass player, and capable of delivering 75W rms. The amplifier is equipped with high and low level impedance inputs to match the instrument used. Each input has a gain control. A limiter circuit with LED indication is incorporated that will attenuate high level peaks to avoid distortion. This feature is very useful for those bass players who 'slap', 'snap' or 'hammer' the strings. The green LED indicates when the limiter is switched on. The active equaliser circuit includes four individual boost and cut controls (treble, hi-mid, lo-mid and bass) to match room or hall acoustics. Larger rooms and halls will tend to reinforce bass output, while people will attenuate the treble. Treble and bass boost will be more noticeable when the 'mid' controls are reduced.

The front panel includes a standard 1/4in. headphone jack. Plugging in headphones will remove the amplifiers output to the speaker. The back panel has an input jack to allow the main amplifier to be used with an external preamp. A line-level output allows the internal preamp to feed an external amplifier, PA system or tape recorder. 'Effect Loop Send' and 'Return' jacks are included in the line level signal path to include external effects units. The substantial cabinet is covered in a hard wearing material to cope with the rigours of professional use.

Specification

Speaker diameter:	15in.
Power output (8Ω load)	75W rms
Treble control (8kHz)	±10dB
Hi/mid range control (2kHz):	±10dB
Lo/mid range control (500Hz):	±10dB
Bass control (125Hz):	±10dB
Limiter range:	23dB
S/N ratio:	>50dB
Input impedance	
high:	470k
low:	47k
Dimensions:	448 x 326 x 436mm

AG88V H	75W Bass Amplifier	£189.99

LOUDSPEAKERS

Compact Stage Monitor

NEW

A high quality compact stage monitor which has been specially designed to allow musicians to hear themselves clearly in situations where bass and amplified instruments are being used. The unit contains a high quality 12in. woofer, and a 1 3/8in. titanium high frequency driver, which are driven through a specially designed crossover/equaliser network to give the best possible sound quality. The substantial cabinet is covered in a hard wearing material to cope with the rigours of professional use.

Specification

Frequency Response:	65Hz to 20kHz
Crossover Frequency:	2kHz
Nominal Impedance:	8Ω
Sensitivity:	97dB
Power handling	
long-term continuous:	100W
short-term peak:	200W
Dimensions:	410 x 560 x 410mm

Order Code	Type	Price each
AG85G H	Stage Monitor	£189.99

Stage Speaker System

NEW

A high quality stage speaker system, specially designed for sound reinforcement situations. It has a professional quality 12in. high power woofer and a constant directivity horn hf unit, which have been arranged in a vertical array to give the best possible sound quality. The substantial cabinet is covered in a hard wearing material to cope with the rigours of professional use.

Specification

Frequency Response:	50Hz to 18kHz
Crossover Frequency:	2kHz
Nominal Impedance:	8Ω

Sensitivity:	98dB
Power handling	
long-term continuous:	250W
short-term peak:	500W
Dimensions:	950 x 410 x 305mm

Order Code	Type	Price each
AG86T H48	Stage Speaker System	£199.99

HOT TIP

Speakers wired out of phase can cause poor bass response and inferior stereo imagery. This can easily be checked by placing the speaker cabinets face-to-face, a few inches apart. If bass response is good, they are in phase, if poor, they are out of phase. Switch off the amplifier, reverse the connections to one of the speakers only, and repeat the test.

GUITAR ACCESSORIES

Guitar Pickup

A good quality magnetic guitar pick-up for six-string acoustic guitars. The pick-up clips into the circular hole in the sound board. Tone and volume controls are provided and a 3.5mm mono jack socket. A lead is provided to connect to this socket and has a 1/4in. mono jack plug at the other end. Lead length 2m.

Order Code	Type	Price each
YT39N	Mag Guitar Pick-up	£10.99

Guitar Stand Pro-Sound

An adjustable, fold away, chromed tubular guitar stand. Suitable for use with most electric and acoustic guitars. Height: 80cm Neck Width (max): 75mm Foot Print: 42 x 42 x 56cm

Order Code	Type	Price each
XM23A C3	Guitar Stand	£15.99

Ashley Acoustic Guitar Transducers

A range of small easily fixed transducers, for use with acoustic guitars. The units offer wide frequency responses comparable with the best microphones. The onset of acoustic feedback compared to a microphone is considerably delayed, and they have a very high output. They are very convenient to use; simply attach to the bridge close to one end of the saddle using the self-adhesive material supplied. The material allows lifting and repositioning of the

Fax your orders to:
01702 553935

transducer without damage to the guitar. The unit may be fixed to its bevelled face to give an alternative bass response. Size: 28 x 10 x 8mm. Two types are available. Model AJ21 is the top of the range, and has an exceedingly smooth frequency response. Model AJ51 has a slightly emphasised treble response and is recommended for acoustic guitars in loud electric groups. Supplied with short lead terminated in a standard mono jack line socket.

Order Code	Type	Price each
YL08J	Pickup Transl.AJ21	£29.99
YL09K	Pickup Transl.AJ51	£19.99

THE BEST OF SERVICE

Music Stand

A robust tripod-based music stand which can extend to a height of 112cm, each section being lockable to give rigidity. The stand can be quickly folded away to an easily transportable size. It is supplied with a 440 x 240mm manuscript holder which also folds away. This item screws onto the stand via an adaptor which is supplied. The same adaptor will allow a microphone holder with a standard 5/8 in. diameter threaded base to be fitted to the stand.

Order Code	Type	Price each
GK96E	F6 Tripod Stand	£17.99

Guitar Lead

A straight extension lead of the highest quality with a brass bodied, 1/4 in. jack plug at each end. The jack plug bodies have knurled finger grips and moulded strain relief sleeves. This lead is manufactured with untinned OFC (oxygen free copper) conductors to preserve sound purity. Length 6m. Colour black.

Order Code	Type	Price each
CC39N	Guitar Lead	£7.99

Instrument Lead

A high quality, straight, instrument extension lead terminated with a standard 1/4 in. mono jack plug at each end protected with a strain relieving sheath. The 5m long lead is manufactured from quality flexible instrument type coaxial cable.

Order Code	Type	Price each
MK75S	Instrument Lead	£8.99

Neon Extension Leads

A range of very flexible quality extension leads in a bright fluorescent neon coloured cable. The ends are terminated in standard 1/4 in. jack plugs that are protected and strain relieved by black heat-shrink sleeving. Choice of three colours: green, pink, orange. Length 6m.

Order Code	Type	Price each
CC36P	Neon Lead Green	£8.99
CC37S	Neon Lead Pink	£8.99
CC38R	Neon Lead Orange	£8.99

PRE-AMPLIFIER MODULES

EQ2S Mono

A tiny ready-built pcb suitable for use as a preamplifier for magnetic cartridges (RIAA), tape heads (NAB response) and low level microphones. Two will be required for stereo. Uses two silicon transistors.

Specification

Gain (at 1kHz):Phono: 34dB (5mV input to 240mV output)
 Response curve RIAA
 Tape: 33dB (5mV input to 220mV output)
 Response curve NAB (Microphones etc.) 38dB (3mV input to 230mV output)
 Flat:
 Max output: 2.5V (with 30mV input)
 Input impedance: ±50kΩ (approx)
 Output impedance: ±5kΩ (approx)
 Power supply: 10V ±2V at 1mA (e.g. 9V battery PP3)
 Supply range: 8 to 12V DC
 Size: 60 x 35 x 20mm
 Fixing centres: 50 x 25mm x 6BA clear.

Supplied with connecting instructions.

Order Code	Type	Price each
LB97F	Pre-Amp EQ2S	£8.99

Tone Control Module Mono TC-2S

A monophonic tone control board comprising a two transistor Baxandal type tone control circuit with input buffer. It additionally requires two linear 50kΩ potentiometers to operate.

Specification

Bass boost: +18dB @ 100Hz
 Bass cut: -12dB @ 100Hz
 Treble boost: +17dB @ 10kHz
 Treble cut: -13dB @ 10kHz
 Gain, 'flat': 1.5dB @ 1kHz
 Input impedance: ±50kΩ
 Output impedance: 5kΩ (approx)
 Power supply: +10VDC ±2V at 2.5mA
 Supply range: 8 to 12V DC
 Dimensions: 65 x 45 x 23mm

Supplied with connecting instructions.

Order Code	Type	Price each
FM10L	TC Module TC-2S	£11.99

MUSICAL EFFECTS UNITS

Noise Gate

A noise gate for electric guitars and similar instruments which can be used to stop annoying noise and hum being amplified between playing

Continued on next page

Continued from previous page

sessions. The unit has two control knobs for 'sensitivity' and 'decay'. 'Sensitivity' determines at what signal level the gate should open and the signal be allowed through, and then close again when input ceases. 'Decay' provides some time delay after input ceases to prevent the gate shutting off too soon and interfering with normal silent moments in the music, and allows normal decay of stringed instruments to be properly heard.

Specification

Input impedance: 500k Ω
 Output impedance: 200 Ω
 Gain: 0dB
 Signal to noise ratio: 90dB
 Dimensions: 125 x 75 x 55mm
 Weight: 310g

Order Code	Type	Price each
CJ21X	Noise Gate Pedal	£39.99

Stereo Flanger

This unit has stereo outputs and is a versatile flanger with rate, depth, manual and feedback rotary controls to allow adjustment of the overall effect produced. The control knobs are colour-coded pastel green.

Specification

Input impedance: >300k Ω
 Output impedance: 200 Ω
 Gain: 0dB
 Signal-to-noise ratio: 70dB
 Frequency response: 70Hz to 5kHz

Order Code	Type	Price each
YN21X	Flanger	£49.99

Tube Driver

This device is for those who wish to reproduce the 'classic' sound of valve amplifiers, as used by groups in the 60s and 70s. This tube driver features 'level', 'distortion' and 'hi' and 'low' equalisation controls to alter the effect. The rotary control knobs are colour-coded white.

Specification

Input impedance: 470k
 Output impedance: 220 Ω
 Gain: 60dB
 Equalisation range: \pm 15dB
 Signal-to-noise ratio: 75dB
 Frequency response: 70Hz to 7kHz

Order Code	Type	Price each
BZ31J	Tube Driver	£34.99

Compressor

A useful device when increased sustain is desired without adding unwanted distortion. 'Attack' and separate 'sustain' controls provide a variable adjustment of the actual compression range to be developed. A 'level' control is also provided which regulates the effect's level. Suitable for all amplified instruments especially electric guitar and bass. The rotary control knobs are colour-coded lemon yellow.

Specification

Input impedance: >300k Ω
 Output impedance: 200 Ω
 Compression range: 40dB min.
 Attack time: 1ms max.
 Signal-to-noise ratio: 80dB min.
 Frequency response: 70Hz to 5kHz

Order Code	Type	Price each
YB88V	Compressor	£39.99

Ultra Metal

One of the very best examples of this kind of effect available today, it is ideal for the 'heavy metallist' who needs more overdrive. The ultra-metal features a finely tuned voicing and extended range and has four controls 'hi', 'lo', 'distortion' and 'level'. The unit can provide sounds ranging "from a fairly gentle blues sustain to a blistering heavy-metal overdrive" - International Musician. The rotary control knobs are colour-coded light-grey.

Specification

Input impedance: >300k Ω
 Output impedance: 200 Ω
 Gain: 60dB max.
 Signal-to-noise ratio: 70dB min.
 Frequency response: 70Hz to 5kHz
 Eq range: \pm 18dB

Order Code	Type	Price each
YN22Y	Ultra Metal	£42.99

Stereo Chorus

This chorus unit has stereo outputs and has separate 'depth', 'rate' and 'intensity' controls. The 'rate' control varies the speed of the effect, whilst the 'depth' and 'intensity' controls regulate the short-time delay and chorus effects. The rotary control knobs are colour-coded electric-blue.

Specification

Input impedance: >300k Ω
 Output impedance: 200 Ω
 Gain: 0dB
 Rate: 0.2Hz to 10Hz
 Delay time: 2.5ms to 12.8ms
 Signal-to-noise ratio: 75dB min.
 Frequency response: 70Hz to 5kHz

Order Code	Type	Price each
YN20W	Chorus	£49.99

Phaser

One of the most useful effects in contemporary music. The 'depth' and 'feedback' controls give variations in the sound from a clean phase effect to a deep "rolling" effect. Effect width is adjusted automatically in accordance with the speed selected on the 'rate' control. The rotary control knobs are colour-coded salmon-pink.

Specification

Input impedance: >300k Ω
 Output impedance: 200 Ω
 Max input level: 0dBm
 Gain: 0dB
 Signal-to-noise ratio: 70dB min.
 Frequency response: 70Hz to 5kHz
 Sweep rate: 0.1Hz to 10Hz
 Phase shift: 720°

Order Code	Type	Price each
YN23A	Phaser	£39.99

FOR CASHTEL
 Phone 01702 552941

Analogue Delay

This analogue stereo delay unit produces echo and reverberation effects using the latest BBD (bucket brigade delay line) technology, and noise reduction circuitry ensures the unit produces high quality sound. The 'delay' control adjusts the delay time of the repeats, and effects such as echo, reverb, slap back controlled feedback and many more can be easily produced. The 'repeat' control adjusts the number of repeats between one and infinity, while the 'depth' control adjusts the level of the effects sound.

Two output jacks are provided to feed two separate amplifiers, and the second output can be switched to 'direct' to produce an enhanced effect. The rotary control knobs are black and the battery cover is orange, for easy identification.

Specification

Input impedance:	240kΩ
Output impedance:	10kΩ
Maximum level (0dB = 1V):	
input:	-1dB
output:	0dB
Noise level (input short 0dB=1V):	-68.5dB
Delay time:	50 to 300ms
Size:	127 x 73 x 55mm
Weight:	325g (including batteries)

ECHO CHAMBER

A good quality solid state echo unit housed in a matt black case. The front panel, accommodates all the controls and input/output jacks. The unit provides two standard 1/4 in input sockets, a low impedance (50dB 10kΩ) socket for the microphone and a (-20dB 330kΩ) socket for instruments and line outputs of hi-fi, organ, synthesisers, etc. There is a footswitch jack on the front panel for a remote control switch. The delay time control is variable between 30 and 200ms and there are three selectable output levels of (0, -20dB and -40 dB) to allow connection to any amplifier. There is also a peak level indicator to show when the input level is too high and likely to cause distortion.

★ All prices include VAT. A, B etc. indicates there is an additional carriage charge for this item: see end of catalogue for details. ★

125

The balance control adjusts the equilibrium of direct/echo sound and may be set to minimum to allow direct (no echo), or through to maximum (total echo). The repeat control sets the echo sound repetition rate and the dial is rotated clockwise to increase the speed.

Dimensions

Case:	245 x 150 x 61mm
Front panel:	270 x 67mm
Fixing hole centres:	258 x 48mm.

Order

Code	Type	Price each
YP67X	C4 Echo Chamber	£64.99

TUNING DEVICES

Guitar Tuner

An easy to use, fully automatic or manual note selection, tuner that can be used with electronic or acoustic instruments. Standard 1/4 in. input and output jacks allow the guitar tuner to be used in line during a performance with no detrimental effect on the sound quality. A built-in microphone allows the tuner to be used with acoustic instruments, if required. A function switch and a 'note select' switch are provided. With the function switch set to 'manual', the 'note select' switch sets the unit to the string to be tuned, indicated by one of six LEDs on the note indicator. With the function switch set to 'auto', when an instrument is played an LED closest to the note will be illuminated on the note indicator. The meter scale is calibrated -50 cent to +50 cent and 430Hz to 450Hz with a centre reading of zero. A ±3 cent deviation from standard pitch is acceptable. (100 cents is equivalent to one fret or a half-step). The unit requires a PP3 battery (JY60Q).

Specification

Measurement method:	Automatic measurement by quartz contr of microcomputer
Notes and pitch:	1st string - 1E (329.63Hz) 2nd string - 2B (246.94Hz) 3rd string - 3G (196.00Hz) 4th string - 4D (146.83Hz) 5th string - 5A (110.00Hz) 6th string - 6E (82.41Hz)
Tuning range:	±1 octave for each key to be tuned
Accuracy:	±1/4 cent
Size:	128 x 70 x 33mm
Weight:	150g (excluding battery)

Order Code	Type	Price each
AY24B	Auto Guitar Tuner	£24.99

Chromatic Guitar Tuner

A wide ranging guitar tuner covering a full octave from C1 to B7, which can be used to measure the tuning of both electric and acoustic guitars. It can even cater for other instruments and be used for voice training. Input can be by a 1/4 in. jack socket or by a built-in microphone for acoustic instruments. The reference pitch can be altered to match other instruments if necessary, prior to tuning the instrument. In use, one of a range of LEDs, in a display which mimics one octave of a piano keyboard, will light if the note struck corresponds to that note. A secondary tuning indicator will show how well the note matches, and 'flat' and 'sharp' LEDs will show in which direction the note is in error.

The tuner uses one PP3 size 9V battery (not supplied). Dimensions: 120 x 67 x 22mm.

Specification

IC accuracy:	±1 cent
Pitch selection:	435 to 446Hz
Tuning range:	7 octaves
Weight:	120g

35W PA Amplifier

NEW!

A general purpose mono 35W PA amplifier that features three mic inputs (1/4 in. mono jack sockets), and can be powered from the mains or a suitable 12V DC supply. One of the mic inputs is switchable between mic, aux or phono (magnetic cartridge). Two slider controls are provided for master volume and tone control, which provides treble cut, and a three position switch is used for bass cut. Other useful features include a seven LED bargraph (five green and two red) and a monitor LED, which illuminates when the output clips. The pilot LED illuminates when power is applied, whether 12V or mains. The output can be 100V line or 16, 8 or 4Ω, and a 3-pin DIN socket is provided for record/playback. This robust amplifier is ideal for school fêtes, sports days, car boot sales and general public address.

Specification

Power supply: 220 to 240V AC or 12 to 14V DC
 Power output: 50W maximum
 40W with 10% THD
 35W with 3% THD

Input channels

mic: 0.5mV/2kΩ
 phono: 3mV/47kΩ
 aux: 200mV/250kΩ
 Preamp output: 200mV (20Hz to 20kHz ±1dB)
 Frequency response: 70Hz to 15kHz ±3dB
 Tone control treble: -10dB
 Music/speech switch: 0dB, -5dB, -10dB (at 100Hz)
 S/N ratio: >60dB

MIXERS

Camcorder Audio Mixer

A 4 channel stereo mixer intended for editing and dubbing audio soundtracks on video recordings, i.e. at the camcorder to domestic VCR transcription stage. Inputs are provided for L/R microphones, tape/tuner/CD, turntable and camcorder audio soundtrack. Each channel can be faded in and out using the slide fader level controls. The turntable input is switchable between magnetic and ceramic pick-ups. A master fader controls the output level. With the exception of the 1/4 inch jack socket microphone inputs, all signal inputs and outputs are via phono connectors. Requires a 9V PP3 battery to operate, alternatively an external 9V DC supply may be used.

Specification

Power requirements: 9V PP3 battery or 9V DC supply
 Mic input: 1mV/600Ω
 Phono (mag): 3mV/50kΩ (RIAA equalised)
 Tape/CD/tuner input: 150mV/50kΩ
 Camcorder input: 150mV/50kΩ
 Output level: 500mV
 Distortion: <0.5%
 S/N ratio: >55dB
 Frequency response: 20Hz to 20kHz ±2dB
 Dimensions: 267 x 68 x 192mm

Battery Operated Stereo Mixer

A high quality low-cost battery powered stereo mixer incorporating sophisticated solid-state circuitry to ensure low-noise performance. The unit is enclosed in

an attractive black case designed to eliminate hum while allowing the switch-control panel to be operated with ease. This mixer's range of facilities includes an input for a microphone (600Ω), a headphone socket, two phono inputs (RIAA compensated for magnetic pick-ups), and one auxiliary input for tuner/tape etc. Slide type gain controls on the front panel enable fingertip control for complete mixing and fading. All the input/output phono sockets are at the rear of the unit with the exception of the 1/4 in. mono jack socket for the microphone and the 1/4 in. jack socket for the headphones, which are positioned on the front panel. A PP3 9 volt battery provides the power to run this unit or alternatively a 9 volt DC battery eliminator, such as our XX09K may be used. The battery is fitted inside the mixer case and access is via a removable cover in the base. The battery eliminator connection is a 2.1mm power socket on the rear panel.

Specification

Frequency response: 20Hz to 20kHz ±1dB
 Distortion: <0.5%
 Signal to noise ratio: >55dB
 Output: 220mV (max 2V) at 50kΩ
 Mic input: 0.3mV at 600Ω
 Phono inputs: 3mV at 50kΩ
 Aux input: 120mV at 50kΩ
 Current consumption: 12mA
 Overall dimensions: 228 x 178 x 80mm
 Weight: 1176g

XJ14Q	B3 Sound Mixer	£27.49

Professional 8-Channel Mixer

A superb 8-channel mixer that offers a wide range of inputs and facilities, and provides three independently controlled stereo outputs; master, monitor and sub. Separate stereo record and a mono 'effect send' outputs are also provided. Mono channels 1 to 6 inputs are switchable between line or unbalanced microphone (if balanced microphones are used, a matching transformer must be used). Channels 7 and 8 each feature a built-in stereo RIAA-equalised phono preamplifier, for turntables with magnetic cartridges. This circuit can be switched out and replaced by a mono microphone input. Each of the eight channels has controls for input signal gain, treble, mid, bass and effect. High quality faders control the signal level that is fed to the main outputs. Additionally, channels 1 to 6 have a pan pot which adjusts the relative amplitude in the left and right channels of the output and allows the channel to emanate from the left or right, or somewhere in between. Channels 7 and 8, being stereo, have balance controls in place of pan pots. The effect control alters the level of the mix-down being fed to the effect send output. This effects output can feed an echo unit, or similar, the return feed can then be added to the stereo bus, via a level control pot. A stereo auxiliary input facility is available that can be added to the stereo bus via bass and treble controls only. Each channel can be added to the (PFL) bus, which can then be monitored through headphones or the monitor loudspeakers, if used. When depressed, an LED lights and indicates that the channel has been selected to the bus, then by adjusting the gain control

FOR TOP QUALITY & VALUE!

PA Horn Speaker

A round, public address horn speaker with adjustable mounting bracket, and finished in dark grey. The speaker is lightweight, weatherproof and produces a crisp, clean sound with minimum distortion and uniform output. There is an in-built 100V line matching transformer with 15W/10W/5W/2.5W rating taps that is accessible via a removable transparent 'window' at the rear of the horn. The voice coil is wound on an aluminium former which helps to produce an efficient loudspeaker.

the desired level can be set on the VU meters. Alternatively, the master or sub outputs can be monitored. All microphone input sockets and the headphone monitoring socket are 1/4in. mono jacks, all other sockets are phono. The free-standing mixer is of sturdy metal construction with black finished wooden end cheeks and is mains powered. Dimensions 400 x 325 x 115mm approx.

Specification

input sensitivity	
Mic:	1mV into 1kΩ

BZ65V	H13 8-Channel Mixer	£299.99

9-CHANNEL STEREO DISCO MIXER

GREAT VALUE!
£199.99
XM39N
[H13]

A very smart high quality audio mixer primarily intended for disco/audio visual applications. The control panel is finished in semi-matt silver/grey with white and red legend. The nine input channels have individual gain controls and side faders. Channels one to three are for use with microphones and have additional high/low equalisation controls on each channel. Channels 4 and 5 are turntable inputs and are RIAA equalised accordingly. Channels 6 and 7 are tape/CD inputs. Channels 8 and 9 are auxiliary/video (soundtrack) inputs. Channels 4 to 7 are equipped with auto start outputs for controlling low voltage motors on turntable or cassette decks. An overall master fader controls the output signal level, a balance control is also provided. Output levels are displayed on twin 11 LED VU bargraph displays. To compensate for room acoustics a stereo 10 band equaliser allows fine adjustment of the output signal.

If required the equaliser can be bypassed by operating the EQ/bypass switch. A stereo/mono switch is also provided. The monitoring section allows monitoring of any of the individual input channels or the master output. A 1/4 inch stereo headphone socket is provided on the front panel for the monitor output, the level of which can be adjusted by an adjacent control. With the exception of the microphone input and start outputs, all connections are via phono connectors.

Specification

Input Sensitivity		Phono:	70dB
Mic:	3mV/20kΩ	Video:	80dB
Phono:	3mV/50kΩ (RIAA equalised)	Tape:	80dB

IT'S A FACT!

Karl Friedrich Gauss (1777 to 1855) was a German mathematician and scientist whose interests were varied. His mathematical calculations of magnetic force are used in the design of modern electric generators. The unit of force in a magnetic field, the Gauss, is named after him.

MICROPHONE INSERTS

Crystal Microphone Inserts

Two small crystal microphone inserts, one in a plastic box and one with a metal body. Size 25mm diameter x 10mm (11mm with plastic). Both require amplifier input impedance $\geq 1M\Omega$.

Order Code	Type	Price each
LB93B	Crystal Mic In Plas	£1.25
HY33L	Crystal Mic In Metal	£1.49

Dynamic Microphone Inserts

Two dynamic coil microphone inserts, DU-3 is omnidirectional and is fitted in a round plastic case 23mm diameter x 11mm thick. Two solder pads provide means for connection to a screened cable. The screen should be soldered to the pad that is one end of the large circular band underneath.

Type UF-27 is unidirectional and contained in a black plastic body 30mm long x 27mm diameter overall. The rear of the body is stepped to facilitate insertion into some sort of rubber grommet or suspension. Connects via two solder pads.

Specification		DU3	UF27
Frequency response:		100Hz to 10kHz	50Hz to 14kHz
Impedance:		500 Ω	600 $\Omega \pm 30\%$ @ 1kHz
Sensitivity:		-80dB ± 2 dB @ 1kHz	-82dB ± 3 dB @ 1kHz
Weight:		13g	22g

Order Code	Type	Price each
FK43W	Omni Insert Dyn DU3	£2.25
FK44X	Uni Insert Dyn UF27	£5.49

Electret Microphone Inserts

Omnidirectional Ultra Miniature

Type EM-10B is an ultra-miniature omnidirectional electret condenser microphone only 6mm diameter and 5.2mm thick.

Specification	
Response:	Omnidirectional
Frequency response:	50Hz to 13kHz
Sensitivity:	-60dB ± 3 dB (0dB = 1V/ μ bar at 1kHz, V_{cc} = 4.5V, R_L = 1k Ω)

Impedance: 1k Ω maximum
 S/N ratio: >40dB
 Sound pressure level: 120dB maximum
 Power supply: 1.5V to 10V DC
 Recommended voltage: 4.5V (optimum performance)
 Current drain: <0.5mA

Order Code	Type	Price each
QY62S	Ultramin Omni Insert	£1.75

Omnidirectional Sub-Miniature

Type EM-60B is a sub-miniature omnidirectional electret condenser microphone only 9.8mm diameter and 7mm thick.

Specification	
Response:	Omnidirectional
Frequency response:	50Hz to 13kHz
Sensitivity:	-60dB ± 3 dB (0dB = 1V/ μ bar at 1kHz, V_{cc} = 4.5V, R_L = 1k Ω)
Impedance:	1k Ω maximum
S/N ratio:	>40dB
Sound pressure level:	120dB maximum
Power supply:	1.5V to 10V DC
Recommended voltage:	4.5V (optimum performance)
Current drain:	<0.4mA

Order Code	Type	Price each
FS43W	Submin Omni Insert	99p

Lapel Microphone

A low-cost crystal lapel microphone with lapel clasp and 900mm long lead terminated with a 3.5mm jack plug.

Order Code	Type	Price each
LB68Y	Lapel Mic	£2.99

CASSETTE MICROPHONES

Low-Cost Dynamic Microphone

A budget priced omnidirectional dynamic microphone that makes an ideal replacement for the type supplied with portable cassette recorders. It has a black plastic body and it features a remote switch, the contacts of which are terminated in a 2.5mm jack plug. Connection to the microphone itself is by means of a 1 1/2m lead with 3.5mm plug. A stand bracket is incorporated for desktop use.

Specification	
Frequency response:	200Hz to 10kHz
Impedance:	250 $\Omega \pm 30\%$ at 1kHz
Sensitivity:	-78dB ± 3 dB at 1kHz
Size:	115 x 30mm dia.
Weight:	50g

Order Code	Type	Price each
ZA31J	Low Cost Dynamic	£3.49

Dynamic Stereo Pair

A pair of carefully matched omnidirectional dynamic microphones for stereo recording. Attractively styled with chrome plated plastic surround to the meshed top. Two desk stands are supplied and each microphone has 1m of lead terminated in a 3.5mm jack plug. An integral on/off switch is built into the stem. Supplied only in pairs.

Specification	
Frequency response:	90Hz to 11kHz
Impedance:	200 to 600 Ω
Sensitivity:	-76dB (150 μ V) at 1kHz
Size:	160 x 43mm dia.
Weight:	50gm

Order Code	Type	Price each
LH87U	Dynamic Stereo Mics	£23.99

Maplin

FOR TOP QUALITY & VALUE!

COMMUNICATIONS MICROPHONES

Standard Type

A hand-held communications type microphone with integral push-to-talk switch. Supplied with 1.5m of coiled black cable and a screw-on bracket so that the microphone can be hung up when not in use. Lead is supplied with prepared ends for connection of plug to suit your equipment. Yellow lead is the microphone signal wire and its screen is the earth. The push-to-talk switch is a change-over type where the red wire is connected to the green while in the 'normal' position; or the red is connected to the blue in the 'closed' position. Impedance 600Ω, dynamic.

Order Code	Type	Price each
WF05F	Communications Mic	£12.49

FOR CASHTEL
Phone 01702 552941

Hand-Held Power Microphone with Compressor

The output signal is carried on the yellow wire, with the screen as earth. The push-to-talk switch connects the red or common wire to the green wire in the 'normal' position, or the blue wire in the 'transmit' position. The internal 9V supply is only switched on when transmitting.

Specification
Output Level: -40dB (10mV)
Impedance: 1kΩ
Cable: 1.8m (6ft) 4 core screened lead
Dimensions: 95 x 65 x 45mm
Weight: 155gms with battery
Supplied with connecting diagram.

Order Code	Type	Price each
RK04E	Power Mic	£18.99

TIE-CLIP MICROPHONES

Standard Tie-Clip Microphone

A smart high quality electret tie-clip microphone supplied complete with 3m of lead terminated in a standard 1/4 in. mono jack plug, tie clip holder and 1.35V button battery. A knurled screw-on-cap seals the battery compartment, and the battery must be removed if the microphone is to be left un-used for long periods in order to preserve battery life.

Specification
Impedance: 600Ω @ 1kHz
Frequency response: 50 to 16kHz
Sensitivity: -60dB ±3dB @ 1kHz (700μV)
Polar pattern: Omnidirectional
Battery: H-B mercury 1.35V
Dimensions: 33 x 18.5mm dia.
Weight: 26gms

Order Code	Type	Price each
LB69A	Tie-Clip Mic	£15.99

Miniature Tie-Clip Microphone

A very high quality sub-miniature electret tie-clip microphone with remote amplifier and battery in body of jack plug. Replacement batteries are available. Suitable types are RM400R/HB/PX400/MR08. Complete with 6m of lead terminated in a standard mono jack plug. Also supplied with one chromed tie-clip holder. Polar pattern is omnidirectional.

Specification
Frequency response: 50Hz to 16kHz
Impedance: 600Ω
Sensitivity: -64dB (480μV) at 1kHz
Battery life: 6000 hours
Size: 22 x 8mm dia.
Weight: 4gm

Order Code	Type	Price each
YW71N	UM Tie-Clip Mic	£22.49

DYNAMIC BALL MICROPHONES

Vocal Dynamic Microphone

A stylish low impedance unidirectional dynamic microphone with built-in on/off switch and a spherical mesh wind shield. The microphone has a rugged black plastic body and is supplied with approximately 3m of cable, terminated in a mono 1/4 in. jack plug. The cable is not detachable.

Specification
Frequency response: 80Hz to 12kHz
Impedance: 600Ω
Sensitivity: -76dB ±3dB at 1kHz
Size: 220 x 56mm
Weight: 116g

Order Code	Type	Price each
CJ15R	Voc Dynamic Mic Blac	£5.49

Unidirectional Dynamic Microphone

Pro-Sound

A low impedance unidirectional dynamic microphone with cardioid response pattern. The microphone has a built in on/off switch and a spherical mesh windshield, the body is made from black plastic. The microphone is supplied with 3m of cable terminated in a 1/4 inch mono jack plug. The lead is not detachable.

Specification
Frequency response: 80Hz to 12kHz
Impedance: 600Ω
Sensitivity: -76dB (±3dB)
Size: 220 x 50mm dia.
Weight: 125g

Order Code	Type	Price each
YU34M	Dnmc Cardioid Lo-Z	£6.99

FOR TOP QUALITY & VALUE!

HOT TIP

To lessen the possibility of floor or table noise travelling up a microphone stand and into a microphone, place a thin sheet of foam under the stand. Make sure the foam is not too thick or mechanical instability may result, which can cause the stand to topple.

Vocal and Hi-fi Microphone

A stylish low-impedance dynamic unidirectional microphone with built-in on/off switch and a spherical mesh windshield. The microphone has a tough plastic body available in matt black. The microphone is supplied with approx. 3m of cable terminated in a mono 1/4 in. jack plug. The lead is not detachable.

Specification
 Frequency response: 60Hz to 12kHz
 Impedance: 600Ω
 Sensitivity: -76dB ±3dB
 Size: 180 x 55mm dia.
 Weight: 142g (excl. cable)

Order Code	Type	Price each
YT34M	Dynamic Mic Black	£7.99

supplied with 3m of cable terminated in a 1/4 inch mono jack plug. The lead is not detachable. Available in black.

Specification
 Frequency response: 80Hz to 12kHz
 Impedance: 50kΩ & 600Ω
 Sensitivity (50kΩ): -57dB (±3dB)
 Sensitivity (600Ω): -76dB (±3dB)
 Size: 225 x 50mm dia.

Gooseneck Microphone

Pro-Sound

A quality unidirectional dynamic gooseneck microphone that provides excellent reproduction of music and speech. This microphone is ideal for use in schools, churches, night clubs, theatres as well as public address and tape recording. The microphone gooseneck plugs directly into a female 3-pin XLR connector, allowing easy removal of the gooseneck for storage and protection. The microphone is 385mm long, when straight, and is fitted with an on/off switch in the connector.

Specification
 Frequency response: 60Hz to 12kHz
 Impedance: 600Ω
 Sensitivity: -76dB ±3dB @ 1kHz

Order Code	Type	Price each
BZ80B B1	Gooseneck Mic	£22.49

3 Microphone Pack

A pack of microphones supplied in 3 popular colours, red, yellow and blue. These stylish low-impedance, unidirectional, dynamic microphones, have a built-in on/off switch and are all supplied with approximately 3m of cable terminated in a mono 1/4 in. jack plug.

Specification
 Frequency response: 100Hz to 12kHz
 Impedance: 500Ω
 Sensitivity: -80dB ±3dB
 Size: 180 x 55mm dia.
 Weight: 142g (excl. cable)

 CY79L
 [A1]

THE BEST OF SERVICE

Professional Cardioid Microphone

A very high quality dynamic moving coil microphone with a wide uniform response curve. The microphone has a built-in spherical windshield and a self-contained filter that controls explosive breath sounds ('pop') and wind noise in outdoor locations. The cartridge pick up pattern minimises background noise and clearly picks up desirable sounds, and the pick up cartridge is shock-proofed for protection against mechanical noise such as handling noise and floor noise. The microphone comes with instructions on how to use it with a balanced line. Complete with 6 metres (20 ft) of cable with 3 pin XLR type connector for microphone and 1/4 in. mono jack plug.

Specification

Frequency response: 50Hz to 15kHz
 Impedance: 500Ω
 Sensitivity: -71dB (200μV) at 1kHz
 Size: 160 x 52mm dia
 Weight: 310g

Order Code	Type	Price each
CY83E	Cable + Connectors	£8.49

HOT TIP

When wiring together more than one loudspeaker in a sound system, such as a PA, it is important to get the phase of each loudspeaker correct, so that when a signal is applied, all the loudspeaker cones move in the same direction. Some manufacturers mark one terminal with a small spot of paint or a '+' to indicate the phase. If you have an unmarked loudspeaker, it is easy to check the phase by connecting a 1.5V battery across the loudspeaker terminals. Observe the cone and watch which way round results in the cone pushing out. Mark the terminal that is connected to the positive of the battery with a spot of red paint, or nail varnish, to identify the positive terminal. When wiring up the loudspeakers, be sure to wire the speakers with all the '+' terminals connected together, and similarly all the '-' terminals connected together.

ELECTRET CONDENSER MICROPHONES

Electret Condenser Super Cardioid Unidirectional Microphone with Zoom

Pro-Sound

This microphone is specifically intended for use with video camera recorders. The microphone uses an electret condenser capsule and has selectable super cardioid (tele) or cardioid (normal) response pattern. Thus when you zoom in for a close-up, you can switch the microphone to 'tele' and the sound too will zoom in like the picture. The body is made from black anodised turned aluminium and has an integral tele/normal/off switch. The lower part of the microphone unscrews to facilitate fitting of a AA cell. Two connecting cables are supplied: One is short and coiled, intended for use when the microphone is attached to the camcorder (microphone holder supplied). The other cable is 7.6m long and is for hand held use of the microphone. Both cables have locking connectors at the 'microphone' end, which prevents the cable from becoming detached accidentally. Cables are terminated in 3.5mm mono jack plugs. Also supplied, a microphone windshield and rigid carrying box. AA size battery not included.

Specification

Frequency response:	80Hz-12kHz
Impedance (normal):	1kΩ
Impedance (tele):	2k3Ω
Sensitivity (normal):	-70dB (±3dB)
Sensitivity (tele):	-56dB (±3dB)
Size:	285 x 21mm dia.
Weight:	105g (excluding battery)
Power supply:	1.5V AA cell

Order Code	Type	Price each
YU36P	Spr Cardioid Cam Mic	£32.49

MICROPHONE ACCESSORIES

Microphone Windshields

Functionally styled, controlled-density foam windshields. The small type fits most slimline dynamic or electret microphones, the larger type fits most ball type microphones. Essential for suppressing explosive breath sounds, squeals and booming effects. Available only in black.

Order Code	Type	Price each
LB35Q	Mic Windshield Small	75p
JP44X	Mic Windshield Large	£1.80

Universal Microphone Holder

This microphone holder features spring-loaded jaws to hold any size microphone. 5/8 in. threaded base.

Order Code	Type	Price each
RK92A	Universal Mic Holder	£2.25

Microphone Holder 622

A microphone holder suitable for use with all our dynamic ball microphones including YU33L, YU34M, YU37S, YK69A and YJ75S. 5/8 in. threaded base.

Order Code	Type	Price each
RK93B	Mic Holder 622	£1.75

Microphone Holder 614

A microphone holder suitable for microphone YT34M. 5/8 in. threaded base.

Order Code	Type	Price each
FV08J	Mic Holder 614	£1.99

Microphone Holder 600

Microphone holder suitable for use with unidirectional Electret Condenser microphone YU36P. 5/8 in. threaded base.

Order Code	Type	Price each
FV09K	Mic Holder 600	£1.99

Microphone Adaptors

Solid metal adaptors which enable microphone holders threaded to 5/8 in. to be used with accessories having 5/16 in. or 3/8 in. threads. FV11 has 5/16 in. outer thread and 1/4 in. inner thread. FV12 has 3/8 in. outer thread and 5/16 in. inner thread.

Order Code	Type	Price each
FV11M	5/16 inch Adaptor	89p
FV12N	3/8 inch Adaptor	89p

Microphone Stand

Black plastic rectangular microphone stand with non-slip feet which can be used with any microphone holder having a 5/8 in. threaded base, but must have, in addition, one of the adaptors described above used as a fixing screw. Size: 106 x 66mm.

Order Code	Type	Price each
FV10L	Microphone Base	£1.75

Gooseneck Microphone Stands

Brightly chromed gooseneck microphone stands, threaded to accept standard microphone carriers. Base is internally threaded. Available in three lengths,

Order Code	Type	Price each
YW72P	Gsneck Mic Stand 6in	£2.49
LH88V	Gsneck Mic Stnd 13in	£2.99
WF36P	Gsneck Mic Stnd 20in	£3.79

Cast Base Microphone Stand with Gooseneck

Pro-Sound

A table-top microphone stand with a chrome-plated gooseneck screwed into a heavy diecast, black textured finish base. Standard thread at top suits stand adaptors supplied with our microphones and most others. Height 353mm when straight. Base diameter 150mm.

Order Code	Type	Price each
YT40T	A2 Cast Gsnk Mic Stand	£6.99

Metal Hidden-Mounting Gooseneck Base

An all-metal base to fit our goosenecks. Threaded stud is welded to a flat base (60 x 60mm) with fixing centres on 48mm centres (4BA (M4) clearance). Cadmium-plated. Panel cut-out: 16mm dia.

Order Code	Type	Price each
WF37S	Bkt For Gsnk Stand	£1.99

MAPLIN KEY CALL
Phone 01702 556751

Gooseneck Base

A surface mounting all-metal base to fit our goosenecks. The base is chrome-plated and 44mm diameter. There are three equidistant fixing holes with centres on a 30mm diameter epicycle. Overall height 21mm. Standard 5/8 in. thread.

Order Code	Type	Price each
JH58N	Surface Gsnk Flange	£1.65

Cast Base Microphone Stand

Pro-Sound

A table-top microphone stand with a chrome plated rod screwed into a heavy diecast, textured finish base. Standard thread at top suits stand adaptors supplied with our microphones and most others. Height 124mm. Base diameter 150mm.

Order Code	Type	Price each
YW75S A2	Cast Base Mic Stand	£4.99

Microphone Stand with Boom

Phoenix

A free-standing, chrome plated, tripod microphone stand with legs that end 360mm from the centre-line of the stand, to provide a rigid base for a microphone. The main stem is adjustable from 0.89m to 1.6m in height and the sliding part of the stem is clamped with a twist friction grip. The stand is supplied with a 690mm long adjustable boom, which can be rotated through 360° and set to any desired angle, or removed and the stand used on its own. The stand is supplied with a threaded adapter, to accept standard microphone holders, that is fitted to the end of either the stand or boom, as required.

Order Code	Type	Price each
MK55K E5	Mic Stand with Boom	£29.99

5-Foot Microphone Stand

Pro-Sound

Boom not supplied

A floor-standing microphone holder with five hinged feet which end 250mm from centre of stand providing a very rigid base. Feet fold under for stowing. The stand is heavily chromed and stands 875mm high with second section fully collapsed. Second section extends up to 1575mm, but may be locked to any height with friction grip. Lower section diameter 22mm. Upper section diameter 16mm. Top is threaded to accept standard microphone holders.

Boom arm described below is shown fitted to the 5-foot Mic. Stand, but is not supplied with the stand and must be ordered separately if required.

Order Code	Type	Price each
XB45Y D3	5-Foot Mic Stand	£15.99

Boom Arm

Boom is chromed and has a heavy counterweight. It can be rotated through 360° and can be set to any angle. Total length of arm 845mm. Boom length is adjustable up to 665mm from centre of stand. End of boom arm is threaded to accept standard microphone holders.

Order Code	Type	Price each
XB46A A2	Boom Arm	£7.99

Microphone Stand with Boom

Pro-Sound

A free-standing microphone stand with three hinged legs which end 320mm from the centre of the stand providing a very rigid base. Legs fold under for storage and transport. The main stem is adjustable between 0.9m and 1.65m in height. The sliding part of the main stem is clamped with a twist friction grip. The stand is supplied with an 83cm adjustable boom, which can be rotated through 360° and set to the required angle. The boom can be removed and the stand used on its own. Both the stand and boom are threaded to accept standard microphone holders. The microphone stand is available in three colours; red, black and chrome.

Order Code	Type	Price each
XM24B	Red Microphone Stand	£22.99
XM49D	Blk Microphone Stand	£22.49
XM48C	Chm Microphone Stand	£22.49

Tripod Microphone Stand

Pro-Sound

A table-top microphone stand. Chrome plated tripod legs hinge outward to give firm base. Standard thread at top suits stand adaptors supplied with our microphones and most others.

Order Code	Type	Price each
LB96E	Table-Top Mic Stand	£2.49

Balanced Microphone Lead

A 10 metre long lead having a male XLR latching connector at one end and a female XLR latching connector at the other. This lead is manufactured from high quality microphone cable, with a heavy duty black outer covering, to withstand the rigors of studio and stage use.

Order Code	Type	Price each
MK58N	Bal Mic Lead	£16.99

HOBBYISTS STARTER TOOL KIT

An easily affordable tool kit for the new electronics hobbyist, packaged to suit the typical needs of the beginner and offering considerable savings over buying the items separately. Presented in a cloth toolroll, the pack contains: side cutters; pair of long-nosed pliers with wire cutter; light-duty flat blade screwdriver 75mm long; No. 1 crosspoint screwdriver 75mm long; desoldering tool; and an Antex soldering kit with a CS iron, stand and 5m pack of 18swg multicore solder. Start as you mean to go on, with the right tools.

AMAZING VALUE!

CHOOSING AN AERIAL

If you want to get the best out of your FM receiver or TV set invest in a good aerial. So many people spend hundreds of pounds on a TV set or FM receiver and then never allow it to work as well as it could, because they won't spend a few more pounds on a good aerial. If at all possible always fit an aerial outside and as high as possible and for best results it should have a clear view to the horizon. Aerials in the loft can be satisfactory but they will need to be carefully positioned as they are affected by water tanks and pipes and cables.

Remember the signal level inside a roof can be as little as one tenth of the level outside, so you will need a bigger aerial to achieve the same result that an outside aerial would give. Set-top aerials are rarely completely satisfactory as they are affected by people moving in the room, cars passing by, trees moving outside and other effects of this kind. In flats, indoor aerials only work if your outside wall is on the side of the block nearest the transmitter.

The farther you live from the transmitter the bigger the aerial you will need. For colour on UHF TV or stereo on VHF radio you will need a bigger aerial than for mono, and for a teletext receiver you will need an even better aerial. For TV it is very important to ensure that you choose the right group aerial for your local transmitter. There are five groups generally in use in the UK and they are:

- Group A: Chls 21-34 Red
- Group B: Chls 39-53 Yellow
- Group C/D: Chls 48-68 Green
- Group E: Chls 39-68 Brown
- Group W: Chls 21-68 Black

Our table of transmitting stations shows which group aerial will be needed to receive the station you require. If you choose a wideband aerial in order to receive from several different transmitters it will need to be larger than its equivalent single group aerial to give the same gain over the whole band.

The aerial should point directly towards the transmitter with the cross-pieces (elements) at right angles to the transmitter. If the polarisation is horizontal (H), or mixed (M) mount the aerial so that the elements are horizontal whilst if the polarisation is vertical (V), the elements of the aerial should be vertical.

Most older VHF radio stations are gradually being converted to mixed polarisation (i.e. the transmitter power is divided equally between a horizontal component and a vertical component) in order to improve reception in cars and on portable sets. If there is a major obstruction, hill, large building,

gasometer etc. directly in line with the transmitter it can sometimes improve reception if the aerial is pointed slightly to one side of the direction of the transmitter. Raising the height of the aerial can also improve reception. Often raising an aerial by as little as one metre can be equivalent to doubling the size of the aerial. With VHF radio aerials the smallest element should be closest to the transmitter and mounted at least 600mm (2ft) from the nearest TV aerial. If you get a hiss on stereo, but not on mono you need a bigger aerial. If you get a whispering hiss or 'birdie' on mono and stereo (especially on Radio 3) the signal level is too high and it will be necessary to fit an attenuator in the lead. If you get this kind of hiss in stereo only use a bigger aerial to make it more directional. (In general the bigger the aerial the more selective it will be in picking up signals only from the front and not from the sides or rear). If high pitched sounds are distorted turn the aerial for least distortion rather than maximum signal strength and use a more directional aerial. (In this respect use of a cranked mast can help as this gives some lateral as well as rotational adjustment which can be a help). If crackles from passing vehicles are a problem mount the aerial such that the roof shields it from the road. To reduce the effects of passing aircraft causing volume changes use two aerials stacked one above the other.

In addition to the above, for TV reception graininess in a colour picture or snow in a mono picture points the need for a larger aerial. Adjust the aerial position to eliminate 'ghosts' on the picture or use a bigger more directional aerial. It may be impossible to completely eliminate ghosting and this will be a problem if you are hoping to receive teletext.

As a last resort aerial amplifiers can help, but they will only do so if the problem is a weak signal only. If there is, or also is, ghosting or other interference the results with the amplifier will be worse or at best the same as without the amplifier.

It is good practice to earth the screen of the down-lead where it enters the building, but this will have no effect on the signal received and is only there as a protection against electrical faults and to give some protection to the set in the unlikely event that the aerial is struck by lightning. In any event never touch the aerial lead during a thunderstorm.

Use a good map to assess the proper direction for the aerial to point and remember that the TV and radio aerials may well have to point in different directions. If in doubt the BBC and ITC can provide Service Area Maps for any transmitter if you send them a large stamped, addressed envelope. In particular, the BBC has

available UHF TV transmitter details which caravanners may find particularly useful, and they can offer technical advice to the public or trade on BBC reception problems either from the BBC address below or by telephoning 0345 010 313 during office hours (all calls charged at local rates).

The address to write to is:

For BBC stations:
BBC Engineering Information,
White City, 201 Wood Lane, London W12 7TS.
Telephone 0345 010313.
Also see Ceefax page 698 on BBC2.

For ITV and ILR stations:
Independent Television Commission,
Engineering Information, Kings Worthy Court,
Kings Worthy, Winchester, Hants SO23 7QA.
Telephone 0962 848647.

For Radio Licensing queries:
The Radio Authority,
74 Newman Street, London W1P 3LA.
Telephone 071 636 5858.

For Reception Difficulties:
The Radiocommunications Agency,
Waterloo Bridge House, Waterloo Road,
London SE1 8UA.
Telephone 071 215 2352.

National Transcommunications Ltd.,
Kings Worthy Court, Kings Worthy,
Winchester, Hants SO23 7QA.

For National Independent Radio:
Classic FM, Academic House,
24-28 Oval Road, Camden, London NW1 7DQ.
Telephone 071 284 3000.

For Radio Telefís Éireann:
Reception Investigations, RTE,
Baile Átha Cliath 4, Éire.
Telephone 01 642175.

For independent radio in the Republic of Ireland:
IRTC, Marine House, Calwilliam Court, Dublin 2.
Telephone 01 676 0966.

N Indicates those ITV and Ch4 stations broadcasting some programmes in NICAM Digital Stereo Sound. On some of these stations BBC1 and BBC2 are also broadcasting in NICAM.

NICAM is being introduced on a phased basis to all RTE transmissions in the Republic of Ireland. NICAM is available on the Three Rock, Kippure and Maghera transmitters for RTE1 only.

UK BROADCASTING BANDS

Long Wave	148.5 to 283.5kHz (2020-1058m)	AM radio
Medium Wave	526.5 to 1606.5kHz (570-187m)	AM radio
Band II (VHF)	87.5 to 108MHz	FM radio
Band IV (UHF)	470 to 582MHz (Channels 21 to 34)	625-line TV
Band V (UHF)	614 to 854MHz (Channels 39 to 68)	625-line TV
Band VI (SHF)	11.7 to 12.5GHz (Channels 1 to 40)	Satellite TV

Band II (VHF)

Band II is gradually being extended to cover 87.5 to 108MHz. Regrettably the frequency band 105 to 108MHz will not be available until 1996.

The general plan for locating stations in England and the Channel Islands is as follows:

87.5MHz	Not allocated
87.6 to 88MHz	Short term 'Restricted services'
88 to 90.2MHz	Radio 2
90.2 to 92.4MHz	Radio 3
92.4 to 94.6MHz	Radio 4
94.6 to 96.1MHz	BBC Local Radio (and Radio 4 in places)
96.1 to 97.6MHz	Independent Local Radio
97.6 to 99.8MHz	Radio 1
99.8 to 102MHz	Independent National Radio Classic FM and Local Radio
102 to 103.5MHz	Independent Local Radio
103.5 to 105MHz	BBC Local Radio
105 to 108MHz	Not allocated

The BBC does not have local radio stations in Scotland, Wales or Northern Ireland, but the sub-bands 92.4 to 96.1 MHz and 103.5MHz to 105MHz usually carry the national regional services. Details as follows:

92.4 to 96.1MHz: Radio 4/Radio Scotland/ Radio Cymru/Radio Ulster. 103.5 to 105MHz: Radio Scotland/Radio Cymru.

Radio Data System

All BBC local and national radio, and Independent Radio transmitters are transmitting RDS signals with almost all stations. RDS is a radio tuning aid which enables suitably designed radios to identify VHF FM stations by detecting the inaudible digital signals inserted continuously into every broadcast. A suitably equipped radio could then display the station name e.g. "BBC R4", or automatically search for a particular station. In a car, the radio could automatically retune as the car travels from the service area of one transmitter to that of another.

The other main purpose of RDS is to detect traffic announcements automatically, so that even if you are listening to another station or to the cassette player, the receiver can be programmed so that traffic news on any nearby station will override it. The service is operating throughout England and Northern Ireland.

TV Stereo Sound

The transmitters marked 'N' in the tables on the previous pages should be broadcasting a digital stereo sound signal on selected programmes with the TV picture on BBC1, BBC2, ITV and Channel 4. The system being used is NICAM 728 which provides a stereo soundtrack of near Compact Disc quality from receivers marked "NICAM Digital Stereo".

For further information see Maplin Magazine issue 34 for a preview by the IBA.

Satellites

In Great Britain it is possible to receive transmissions from several satellites, which provide a variety of channels, including the BBC World Service as well as many continental services. Naturally, reception is very much dependent on location, dish size and orientation and type of LNB fitted. Additionally, a decoder may be required to view the channel. In general, for the south and east of England, then a 60cm dish is recommended for ASTRA reception. For all other parts of the UK a 80cm dish is recommended. The cable connecting the LNB to the receiver should be to BS5425. The signal has a very wide bandwidth from 950 to 2050MHz, so the cable should not have an attenuation greater than 25dB at this upper frequency.

SATELLITE FINDER KIT

Union Brothers

A compact, battery powered meter to help align your satellite dish for best reception. The output from the satellite LNB is fed directly into the unit, via 6ft of RF cable provided, and by adjusting the gain and sensitivity of the unit, the best position for the dish can be found. The kit includes a compass to help in the initial positioning of the dish. The PVC case has a covered compartment for the battery holder, which takes 10 x 'AA' type batteries (not included).

Specification

Frequency range: 950 to 1550MHz
 Gain: 10dB + 4dB
 Sensitivity control: 12dB + 4dB (LNB gain = 55dB, C/N = 15dB)
 Power supply: +2V to +8V
 DC Supply current: 60mA
 Operating range (input): 62 to 80dB (LNB gain = 55 to 60dB)
 Impedance: 75Ω
 Connections: 'F' type female (input/output)
 Case size: 245 x 125 x 55mm

Order Code	Type	Price each
BZ68Y	Sat Finder Kit	£32.99

Type	Length (l)	Diameter (d)	d1	Apparent permeability
810	100mm ±1.5mm	8mm ±0.8mm	7mm ±0.3mm	9.2 to 9.5
101	140mm ±2mm	10mm ±0.4mm	9mm ±0.4mm	9.9 to 10.2

Order Code	Type	Price each
YG20W	Ferrite Rod 810	59p
YG22Y	Ferrite Rod 101	79p

TELESCOPIC AERIALS

Low Cost

Union Brothers

Two low cost telescopic aerials, one six-section and one seven-section. The six-section type is 482mm (19 ins) long (105mm retracted). 6mm in diameter at the base and has a threaded hole tapped to M2.5 in the bottom. The seven-section type is 670mm (26.25 ins) long (123mm retracted), 7mm in diameter at the base and has a threaded hole tapped to M3 up the centre.

Order Code	Type	Price each
JM10L	6-Section Aerial	£1.15
RK49D	7-Section Antenna	£1.20

Swivel Base

Union Brothers

Low-cost 6-section telescopic aerial with base which swivels and rotates. The aerial extends from 275mm to 980mm. Requires a 9.53mm dia. cut-out for mounting. Base section is 6mm dia.

Order Code	Type	Price each
YT20W	6 Sect Swivel Aerial	£2.30

High Quality 10 Section

Union Brothers

A high quality, heavily chromed, ten-section telescopic aerial (retracted length 166mm) extending to 1.31m (51.5 ins). Base section is 9.5mm diameter and a threaded hole is tapped to M4 up the centre.

Order Code	Type	Price each
LB10L	HQ 10-Section Aerial	£3.40

RADIO AERIALS

Ferrite Rod Aerial

Union Brothers

A 5in long x .375in diameter ferrite rod onto which a medium wave and long wave coil are wound. Coils may be moved on rod for best performance (then fixed with a suitable adhesive). Inductance of medium wave coil: 370μH; long wave coil: 4.1mH.

Typical coverage:
 Medium wave – 550 to 1550kHz (193m to 545m).
 Long wave – 150 to 280kHz (1070 to 2000m).

Order Code	Type	Price each
LB12N	MW/LW Aerial	£2.99

Ferrite Rods

Union Brothers

Round ferrite rods with a slightly flattened cross-section for medium/long wave radicos. Available in the following sizes which may be cut into shorter lengths with a hacksaw if required.

Fully Retractable Swivel Base

Union Brothers

A low cost eight-section telescopic aerial with a base that swivels and rotates. This aerial has the advantage that the mast-sections may be pushed down through the swivel base into the equipment in which the aerial is housed. Thus the aerial is fully retractable, leaving only 11mm of aerial tip exposed. The aerial is 1.016m long from the base and 1.04m long including the base. The base requires an 11.35mm diameter cut-out for mounting and 210mm of clearance inside the enclosure for when the aerial is fully retracted.

Order Code	Type	Price each
JM11M	Rtrctble Swivel Aerial	£2.75

144/430MHz Telescopic Aerial & BNC Plug

Union Brothers

A good quality, reasonably priced telescopic aerial, designed especially for use with hand-held transceivers operating at 144/430MHz. This 5-section aerial is 535mm long when extended and 187mm long when retracted. The aerial represents 1/4 wavelength at 144MHz when extended and 1/4 wavelength at 430MHz when retracted. The aerial has a pivoted base and is terminated in a BNC connector suitable for direct connection to most hand-held transceivers.

Order Code	Type	Price each
JM12N	144/430 BNC Aerial	£4.99

FLEXIBLE ANTENNAE 27MHz

Union Brothers

A flexible rubber antenna for the 27MHz band. Excellent SWR when fitted to handheld equipment and offering small size, unbreakable durability and gain approaching quarter wave. Overall length: 355mm. Terminated in a detachable PL259 UHF plug.

Order Code	Type	Price each
YG41U	27MHz Rubber Duck	£10.45

2m Band

Union Brothers

A flexible rubber antenna for the 2m band. Excellent SWR to hand-held equipment and offering small size, unbreakable, and gain approaching quarter wave. Overall length: 175mm. Terminated in a BNC plug.

Order Code	Type	Price each
YG15R	2m Rubber Duck	£7.49

VHF FM AERIALS

FM Aerials

Three types are available, one has spade terminals, one is terminated in a co-ax plug and one is terminated in an FM-type 2-pin plug with central peg. Impedance 300Ω balanced.

Order Code	Type	Price each
LB11M	FM Tape Aerial Spade	£1.19
FS24B	FM Tape Aerial Coax	£1.19
YT15R	FM Tape Aerial Plug	£1.19

Radio Rod

Antiference

Dramatic developments are taking place in FM stereo broadcasting and pretty soon there will be some exciting new changes for the future 1990's. Apart from BBC's Radio One gaining its own independent FM wavelength, there are an estimated 200 or more independent local radio stations planned catering for all kinds of special interests, and a new independent National Radio station for general entertainment. To this end 'Radio Rod' is designed to be omni-directional and receive national and local transmissions from any direction in the range 88 – 108MHz. Ideal for use with midi systems, it is light and easy to install on the outside of the house or in the loft. Comes complete with 10m of coaxial cable, fittings and instructions. A coax plug or coupler will be needed to terminate this lead to the receiver or an extension lead (see also connectors section).

Order Code	Type	Price each
XP09K	A1 Radio Rod	£13.99

VHF FM Omnidirectional Aerial

Antiference

An ingenious solution to the problem of receiving VHF FM broadcasts from a number of different transmitters. The omnidirectional aerial, by virtue of its design, offers the listener the choice to tune to radio stations broadcasting in the VHF FM band from nearby transmitters located in the surrounding area.

Omnidirectional aerials are intended for use in good reception areas. This depends upon distance from the transmitter and the power of the transmission. In practice this generally means its performance makes it better suited for use in urban areas where radio stations are more plentiful as opposed to more remote rural areas.

Supplied with mast mounting clamp.
Overall Size 95mm x 515mm (dia.)

Order Code	Type	Price each
XM64U	A1 Allrounder FM1080	£13.99

Stereo FM Aerial Type FM3

A low-cost but high quality 3-element, stereo FM aerial, directional for long-distance reception. Can be installed either in a loft or mounted externally. Supplied with a generous 10m of coaxial cable and VHF plug and complete fitting kit. Comes with easy to fit assembly instructions.

Order Code	Type	Price each
GK26D	C2 FM Aerial FM3	£19.99

Mushkillers

Antiference

New type of 108 Mushkillers, a range of high quality VHF/FM aerials introduced to cover the enlarged Band II frequency range of 88 to 108Mz. The aerials offer VSWR's as low as 1.50:1, have an even response to within 1dB over the band, display high directivity for stereo reception free from multipath distortion, and give up to 1 1/2 dB extra gain with patented 'Trumatch' dipole.

3-Element

Suitable for good reception areas. It features the 'Trumatch' dipole, one director and one reflector. Supplied complete with Universal Clamp Type 1.

Forward Gain	4.5dB
Front/Back Ratio	15dB
Acceptance Angle	±32°
Overall Size	864mm long x 1.73m wide

Order Code	Type	Price each
XQ23A	C3 Mushkiller FM1083	£19.99

5-Element

Suitable for outer reception areas. Supplied with Universal Clamp Type 1.

Forward Gain 6.5dB
 Front/Back Ratio 16dB
 Acceptance Angle $\pm 28^\circ$
 Overall Size 2.05m long x 1.73m wide

Order Code	Type	Price each
XQ25C D5	Mushkiller FM1085	£29.99

1-Piece Car Aerial

A single section, non-retractable AM/FM car aerial, that is finished in black glass-fibre. The mounting bracket is angled at 90° from the horizontal, but the aerial can be bent up to 30° in any direction after mounting. The bracket is only 15mm wide and 15mm deep so will fit in to very tight locations. The aerial is easy to fit, requiring a single 14mm mounting hole (if access can be made to the underside of the mounting surface), or an 18mm mounting hole (if access can only be made to the topside of the mounting surface). Length of element is 775mm and the cable is 1.63m long.

Order Code	Type	Price each
RZ56L	1-Piece Car Aerial	£12.99

Side Mounting Car Aerial

A single section, non-retractable car AM/FM aerial, finished in black glass-fibre. The mounting bracket is angled at about 42° from the horizontal, making this ideal for roof mounting to give a low profile. Easy to fit, only requires a 20 x 15mm (approx.) mounting hole.

Element length: 775mm
 Cable length: 1.6m

Order Code	Type	Price each
ZF00A	1 Piece S/Mt Aerial	£13.99

High Quality Wing Mounting Aerial

A fully retractable four-section telescopic aerial for wing mounting. Aerial retracts into plastic cylinder and can be pulled with a key (two supplied) which fits into hole in top of aerial. Fully extended length: 119cm. Underhang: 26cm. Aerial is supplied fitted with 112cm of lead with car radio plug fitted. A bar is also supplied which clamps the bottom of the metal cylinder so that the aerial is firmly secured.

Order Code	Type	Price each
YT13P	Car Aerial 5-Section	£3.55

Profile Plus Indoor FM Aerial

Maxview

A unique innovative design of indoor aerial that would pass any critical eye test for modern styling. This bi-directional aerial is suitable for all FM applications. It includes an integral low noise signal amplifier/booster, for weak signal areas. The aerial is coloured slate grey and is supplied with a flylead 2m long.

Frequency range: 88 to 108MHz
 Dimensions: 320mm x 220mm x 50mm
 Power supply: 2 x AA batteries (not supplied)

Order Code	Type	Price each
RT66W	Profile Plus Aerial	£21.99

CAR RADIO AERIALS

Windscreen Mounting Aerial

Union Brothers

A crystal clear self-adhesive polypropylene film tape that will not crack, yellow or dry out even in extreme heat or cold. The tape is connected to 1m of coax cable terminated in a car aerial plug. This type of aerial has many advantages over externally fitted aerials.

1. It is much longer, giving an improvement on AM reception and it has vertical and horizontal components giving an improvement on FM reception.
2. As it is internal it cannot be stolen or snapped off (in car washes for example).
3. Easy to install — no holes to drill in car body.
4. Fits any car.

A chrome blanking grommet is supplied to fill hole where wing-mounted aerial was previously fitted.

Order Code	Type	Price each
LH99H	Windscreen Aerial	£3.99

FULLY AUTOMATIC CAR AERIAL

NEW

A good quality fully automatic car aerial that is designed to fit negative earth cars and is electrically operated and powered by the car battery. The aerial will only extend when the radio cassette is switched on and is retracted when the radio/cassette is off, so greatly reducing the risk of the aerial being damaged by vandals. Power and control connections to the aerial are made by three wires, green and red, which have bullet type connectors, and a black wire which has an eyelet connector. The red must be connected to the positive battery supply via a suitable fuse rated at 5A. Green must be connected to the power antenna lead output of the radio-cassette, or directly to the on/off switch of the radio-cassette. Black is connected to the car chassis or negative battery terminal. The antenna when fully extended is 0.81m in length, and is supplied with 1.3m of screened cable which is terminated in a standard car aerial plug. The assembly is 335mm in length with the aerial completely retracted.

SUPERB QUALITY!
£29.99
RJ98G

CAR PHONE AND COMMUNICATION AERIALS

Basic Type

Allgon

Quarter wave antenna made of stainless steel with threaded support for fitting to either of the bases. Frequency range is 825 to 960MHz. Length 50mm, colour black.

Order Code	Type	Price each
ZA47B	SS Phone Antenna	£3.99

Double Ring Type

Allgon

A broadband, quarter wave double ring antenna made of stainless steel with threaded support. Frequency range 800 to 1000MHz. Height 40mm, colour black.

Order Code	Type	Price each
ZA48C	Dbl Ring Phone Ant	£5.49

Cellular Phone Aerial

Allgon

A complete cellular phone aerial kit for mounting the aerial onto a non-moving window, comprising aerial, exterior base plate for accepting the clip-on aerial, and an interior base plate incorporating 50Ω coaxial cable with a 5mm miniature crimped connector on the free end.

MJ00A	Cellular Phone Ae	£19.99

FOR CASHTEL
Phone 01702 552941

Phone Aerial

Allgon

A flexible moulded polyurethane 1/4-wave aerial for Motorola phones. Frequency range 825 to 960MHz. Overall length 93mm.

Order Code	Type	Price each
MJ01B	Phone Aerial	£12.99

Coiled Type

Allgon

A collinear antenna made of stainless steel with threaded support. Gain is +4dB relative to a quarter wave radiator. Frequency range 872 to 960MHz. Length 275mm.

Colour black.

Order Code	Type	Price each
ZA49D	Coiled Phone Antenna	£7.49

Enclosed Type

Allgon

An encapsulated collinear antenna with threaded and sprung support and a gain of +4dB relative to a quarter wave radiator. Frequency range 872 to 960MHz. Length 240mm, colour black.

Order Code	Type	Price each
ZA50E	Encap Phone Antenna	£7.49

VHF/UHF Type Allgon

A black steel antenna especially for VHF and UHF frequencies. Supplied with cutting length chart to obtain correct frequency. Frequency band 68 to 225MHz

Order Code	Type	Price each
ZA46A A	VHF/UHF Antenna	£7.99

Bases Allgon

Suitable for 68 to 900MHz antennas, these bases have small dimensions and are absolutely waterproof. They are intended to be mounted from either the inside of the vehicle (14mm dia. hole) or from the outside (18mm dia. hole). Approx. 5 metres of 50Ω coax cable is fitted but does not include a connector on the free end. Each has a 40mm high external conical part topped by a 10mm long M6 threaded stud. The cable entry moulding below is 13mm deep. Available in two styles; oval type has a 35 x 25mm exterior skirt, the round type is 32mm in diameter overall. Only available in black.

Order Code	Type	Price each
ZA51F	Oval Base Black	£11.99
ZA52G	Round Base Black	£11.99

Glass Mounting Base Allgon

This ingenious antenna base can be mounted onto the glass of a rear window – without requiring any holes in the glass! The circular outer part is glued to the outside surface, and on the inside of the glass the base proper

IT'S A FACT!

TV AERIALS

TV broadcasters use a series of main transmitters spread around the country to radiate their programmes, the largest of which has a radiated output approaching 1,000,000 watts (1MW).

These main transmitters are located on the highest point available in a region and provide television pictures to over 99% of the UK population. They broadcast signals direct to rooftop aerials and to smaller relay transmitting stations, which in turn re-broadcast to areas unable to receive the main transmitter. Each transmitter broadcasts on a frequency selected to avoid interference with neighbouring transmitters.

External aerials should be correctly aligned to the transmitter, and mounted as high as

possible, either on the chimney breast or above the roof line. This usually improves the quality of reception as localised obstructions, such as trees or buildings are reduced to a minimum. This is particularly important for reception and decoding of teletext signals where ghosting, which may not be visible on a normal picture, can cause errors or missing characters on teletext screens. In general, an 18-element aerial is for weak signal areas, a 14-element is for normal signal areas, and a 10-element is for strong signal areas. Loft aerials are adequate in strong and normal signal areas, and set top aerials are usually used where external walls and lofts are inaccessible. Set top aerials normally receive all channels and can send down to the television from any receivable local transmitter that gives a satisfactory picture.

is similarly bonded, and is inductively coupled to the outside part. The interior portion includes 4 metres of coax cable attached via a mini-UHF connector, and a TNC crimp plug is provided for the other end (Tx/Rx connection). The outer base accepts our car antenna ZA50E. A re-fit kit is also available separately in the event that the outer base and aerial is lost, which includes extra glue and glass cleaner, etc.

Order Code	Type	Price each
ZA45Y	Glass Antenna Base	£25.99
ZA44X	Re-fit Kit	£9.99

UHF TV AERIALS

These aerials are often colour-coded as follows:
Group A = Red; B = Yellow; C/D = Green; W = Black; E = Brown.

DIY TV Aerial Maxview

A low-cost but high quality 10 element TV aerial for installation in the loft or outdoors. Includes complete fitting kit comprising universal bracket with adjustable support, and a generous 10 metres (33 feet) of coaxial cable terminated with a UHF plug. Suitable for all TV channels, and equally suitable for main or additional secondary TV sets. Supplied with easy to fit assembly instructions.

Gain:	6.0dB
Front/back ratio:	20dB
Acceptance angle:	29°

12 Element TV Aerial Kit

A complete kit of all parts necessary to install a high quality TV aerial ready for immediate use. The design is of the quad-X type, having 10 director bays — offering signal gain equivalent to that from at least twice the number of 'standard' dipole directors — preceding a 40cm wide quad-X dipole antenna backed by a grid plane reflector. All hardware is supplied in a flat pack and requires assembly.

The kit comprises:

1. Antenna parts: 2 section extruded aluminium main spar and jointing hardware; 2 halves of reflector grid plane; integral main antenna dipole with cable connection box; and 10 director bay elements. The elements are elegantly formed from pressed aluminium, and come ready mounted in insulating plastic supports, which require attaching to the main spar with the novel self-locking plastic press-studs provided. The complete assembly is 1.15 metres long but very lightweight, and fetchingly finished in gold with contrasting black plastic components.

2. Mounting hardware, comprising one 1 inch dia., right-angled aluminium mounting mast 780mm high with a 200mm long, lower stand-off section; mast fixing bracket including screws and wall plugs for mounting to a vertical wall, loft joist or similar surface; and a universal fitting antenna fixing clamp.

3. Cabling, including 10 metres of white coax. cable; one white coax. UHF plug; and cable fixing clips. The cable has an air filled insulator and solid centre conductor and is easily connected into the dipole connector box. To ensure a reliable connection, strip 20mm of outer sleeve and 10mm of inner insulator. Release brass clamp and remove centre screw. Wrap braid screen around remaining insulator and insert under clamp. Wrap centre conductor around screw and replace, tighten clamp (see diagram). At the plug end, it is suggested that the tip of the solid core be soldered at the end of the plug pin after assembly to ensure a good connection. Pictorial assembly instructions are provided on underside of packaging.

Specification

Extragain

Antiference

A range of high quality, high gain aerials for use with Band IV and V UHF monochrome and colour TV sets. Especially suitable for use with teletext receivers. They are ideal for problem areas, ghosting and long-range reception.

Features are the high forward gain Quad-X dipole and director chain; the high front to back ratio and improved directivity resulting from a massive six element full-wave reflector and the extra accurate matching given by a specially designed integral balun and resonator.

5-Bay Director Aerial

Suitable for local areas, this aerial has five powerful Quad-X director bays giving equivalent gain to that provided by a standard 10-element aerial. Available only as a wideband (W) giving coverage of all UHF channels. A very compact and economical aerial supplied complete with clamp.

Forward Gain 6.5dB
 Front/Back Ratio 26-27dB
 Acceptance Angle ±17-28°
 Overall Size 0.76m long approx.

Order Code	Type	Price each
XQ38R B3	Extragain XG5	£29.99

Aerial for Difficult Reception Areas

Suitable for fringe areas, this aerial has eight, nine or ten powerful Quad-X director bays giving near equivalent gain to that provided by 2 standard 18-element aerials of the same group. Supplied with a three-way clamp for tail mounting, the aerial is available in three channel groups and a wideband version is also available.

High Performance Indoor Set-Top Aerial

A UHF set-top aerial available only in wideband version. This high quality aerial allows for easy adjustment to give horizontal or vertical polarisation, and is electrically isolated for safety. Assembly instructions on box.

Order Code	Type	Price each
XQ51F A1	Super-Set Top	£12.99

Indoor Set-Top Aerial

The "Toptenna" is a new set-top aerial that out-performs all the competition at this price. Styled to match modern portable TV sets, it is a precisely tuned yagi wideband antenna covering all the UHF channels (21-68) with minimum ghosting and maximum gain.

Order Code	Type	Price each
XY30H A1	Toptenna	£5.49

Multi-Element Hi-Tech TV Aerial

Antiference

A smart, lightweight UHF TV aerial for indoor use. The aerial features two parallel, staggered 7-element arrays of matt finished aluminium, connected to either side of a 75Ω coaxial feeder and mounted on a square section plastic support. The unusual 'log periodic' design offers up to 6dB of gain at 770MHz, and a minimum 4.5dB at 500MHz. Covers all UHF broadcast TV channels from 21 to 68. The aerial comes in three parts, a triangular base for a plug-in support, and the aerial itself which is normally mounted horizontally but can be inserted vertically for vertically polarised transmitters. Safety isolated to BS5373. Fitted with 1 metre of coaxial cable terminated with a UHF plug.

Order Code	Type	Price each
YM56L A1	Hi-Tech TV Aerial	£14.99

Omni-directional UHF/VHF Indoor Aerial with Signal Booster

An unusual indoor antenna which represents a breakthrough in high performance examples of this type. The self standing antenna consists of a horizontally polarised loop aerial contained in a 300mm diameter plastic disc shaped body, supported by a cantilever arm on a 180mm diameter base. The antenna receives both UHF TV and VHF FM signals through a full 360°. The base contains 5 metres of white coax. terminated with a coax. plug on an integral bobbin, which can be unwound to any length to reach the intermediate signal booster amplifier stage. Contained in a small unit measuring 93 x 77 x 60mm, this provides 26dB of gain and is powered from the mains supply with negligible consumption. It includes a power-on red LED indicator, and also powers the main antenna front-end which includes another red LED indicator and a multi-turn gain control to provide optimum picture and sound reception. For further fine tuning if necessary, an 80cm long, chromed telescopic aerial can be added to the top centre of the antenna disc and adjusted for angle and

FOR TOP QUALITY & VALUE!

CONTOUR INDOOR TV AERIAL

Maxview

A unique innovative design of indoor aerial that would pass any critical eye test for modern styling. This bi-directional aerial is suitable for all TV applications. This aerial comes in two forms - the basic Contour aerial for strong signal areas and an alternative version, the Contour Plus, which includes an integral low noise signal amplifier/booster, for weak signal areas. Both versions are coloured mid-grey and supplied with a flylead 2m long.

Specification

Frequency range: 470 to 860MHz
 Channels: 21 to 68
 Dimensions: 320mm x 220mm x 50mm

Gain:

Contour: 2dB (RT64U)
 Contour Plus: 12dB (RT65V)
 Power supply: 2 x AA batteries (not supplied)

SUPERB VALUE!
£21.99 RT65V
 Add Carriage (A1)

RT64U A1 Contour Aerial £10.99

Traveller Aerial

Space-saving wideband log-periodic aerial that will fix to any vertical, horizontal or sloping flat surface by means of three giant suction pads. These hold the aerial securely, but when removed do not leave the slightest trace of a mark. Ideal for use on caravans, boats and cars. The aerial features two parallel, staggered 7-element arrays of matt finished aluminium, connected to 4m of coaxial cable terminated in a co-ax plug. The unusual 'log periodic' design offers up to 7dB of gain at 760MHz and a minimum of 6dB at 470MHz. Covers all UHF broadcast TV channels from 21 to 68. The unique locking action of the mounting arm and bracket allows the mast to remain upright regardless of the orientation of the fixing surface. The aerial can be set to receive horizontally or vertically polarised stations. The unit is weatherproofed and isolated to BS5373 for safety.

Order Code	Type	Price each
XJ75S A1	Caravan Boat Aerial	£22.99

Continued from previous page.

length to provide the best possible FM/UHF reception. The booster unit can be free standing or mounted on a wall or other surface. A 1 metre long white flylead is provided to link the booster unit to an FM receiver, TV input socket or VCR. The booster can even drive both a TV/VCR and an FM receiver if an inline combiner/splitter (e.g. JM13P) and a second UHF flylead is used.

The complete kit of parts comprises:

1. The 'Omnivision' antenna front-end with 5m of fitted white coax. cable and plug. Colour dark grey.
2. Integral inline booster amp and power supply, with input and output sockets, and 1.3m of fitted twin-core mains lead. A 3A fuse is included to replace standard 13A fuse in mains plug during fitting. A mains plug is not included and is additionally required. Wall mounting is provided for by the inclusion of screws and wall plugs.
3. Additional telescopic aerial.
4. 1 metre long white coax. flylead terminated in a UHF plug at each end.

BW46A	Masthead UP1501	£12.99

Low Noise Masthead Amplifiers

Antiference

The UP2301 is a two stage, wideband UHF masthead amplifier, proven to be one of the most successful high gain UHF preamplifiers for fringe area reception. It covers all channels from 21 through to 68. It has a single input and output. The UP2501 is similar to the UP2301 but having a lower noise figure and a bandwidth limited to channels 21 to 34, useful where strong adjacent transmitters operating on other channels are a problem. It has a single input and output.

Continued from previous page.

The UP3501 is a three stage, ultra-wideband amplifier for both VHF and UHF antennas, and sets a new standard for FM/TV preamplifiers. It features both high gain and output, an even response, excellent matching and very low noise characteristics. It has separate VHF and UHF aerial inputs and one common output. The UP3302 combines an extra high gain amplifier and a VHF diplexer in one. It is especially useful in a situation where there are strong local VHF signals which don't need to be amplified, but where weak UHF ones do. The VHF component is effectively bypassed unchanged to the common output download.

All these units are housed in a tough, weatherproof plastic moulding featuring a reversible mounting bracket, which can be either surface mounted using a single screw, or tied to a mast using a black nylon tie-wrap (supplied). Cables are very easily connected to internal screw terminals and screen clamps. Each amplifier requires a 12V DC supply provided via the output download centre conductor.

Specifications

Model	VHF	UHF
UP2301		
Bandwidth:	—	470 to 860MHz
Gain:	—	23dB ±2dB max.
Noise:	—	3.5dB
Maximum output:	—	36dBmV
Current consumption:	—	20mA
UP2501		
Bandwidth:	—	470 to 585MHz
Gain:	—	24dB
Noise:	—	2.7dB
Maximum output:	—	35dBmV
Current consumption:	—	18mA
UP3501		
Bandwidth:	88 to 108MHz	470 to 860MHz
Gain:	11.5dB	24dB
Noise:	<4.8dB	<3dB
Maximum output:	37dBmV	36dBmV
Current consumption:	32mA	
UP3302		
Bandwidth:	40 to 230MHz	470 to 860MHz
Gain:	0dB	27dB±2dB
Noise:	—	2.5dB
Maximum output:	—	3mV
Current consumption:	18mA ±10%	

Order Code	Type	Price each

Masthead Amp Power Unit

Antiference

A plug in power unit for use with our masthead amps UP1501. Supplied with instructions and screws for fixing. It has co-ax sockets for both sides of the aerial head for easy connection.

Specification

Mains input:	200-250VAC 50Hz
Line-power output:	+12VDC ±10% @ 40mA max
Insertion loss:	<1dB (40-1000MHz)
Cable connections:	Co-ax sockets

Order Code	Type	Price each
BW50E	Power Unit PUP1	£14.99

Masthead Amplifier and Power Unit Kit

Antiference

A mast or loft mounting amplifier from which up to 3 TV's may be run from one aerial. By connecting in different ways, your video recorder can be used with just one TV or connected so that the program from the recorder can be watched by all the TV's in the house. The kit includes a mains operated power unit and power is fed to the mast-head amplifier over one of the downloads. This download should not be connected through a splitter.

Specification of Amplifier

Frequency range:	470 to 860MHz
Gain to each output:	12dB±1dB
Isolation between outputs:	24dB
Noise figure:	<4dB
Max output:	84dBµV
VSWR:	Input 1.5:1 Output 1.2:1

Line-power requirement:	+12VDC ±10% @ 18mA via terminal 4
-------------------------	-----------------------------------

Specification of Power Unit

Mains input:	200-250VAC 50Hz
Line-power output:	+12VDC ±10% @ 40mA max
Insertion loss:	<1dB (40-1000MHz)
Cable connections:	Co-ax sockets

Order Code	Type	Price each
YN41U	3 Outlet Amp Kit	£36.99

VHF/UHF Masthead Distribution Amplifier

Antiference

A tough, fully weatherproof, masthead mounting distribution amplifier with separate FM and TV inputs and four outputs of equally good signal strength which, if these are not enough, give ample scope for further splitting to provide up to 9 points using suitable splitters. The amplifier is powered via one output coax download from the power supply provided in the kit. The wall mounted power supply runs directly from the 240V AC mains and is connected in series with output download No. 4 to power the masthead amplifier and pass on its returning signals. TV and FM antennæ are connected to the separate inputs, and both are available from any of the four outputs! Now you can have TV and FM in any room in the house from just one cable via one hole in a window frame or ceiling.

Specification Amplifier

	VHF	UHF
Bandwidth:	88-108MHz	470-860MHz
VWSR input:	2:1	1.7:1
VWSR output:	1.2:1	1.2:1
Gain to each o/p:	6dB±0.5dB	12dB±1dB
Isolation between o/p's:	>30dB	27dB
Noise:	4.8dB	4.5dB
Max. output:	84dBµV	84dBµV
Connections:	Internal screw terminals	
Power supply input:	240V AC @ 50Hz	
Output:	12V DC @ 34mA (amplifier consumption)	

Signal transfer loss on download No. 4:	1dB
Connections:	75Ω coax. sockets, twin core mains lead

Order Code	Type	Price each
YZ88V	A1 Amp OX4	£39.99

THE BEST OF SERVICE

Indoor Amplifier Antiference

An indoor amplifier suitable for UHF TV and FM. It is suitable for either colour or black and white TV. The amplifier will improve weak signals, but if the poor signal quality is due to interference the amplifier will probably make things worse. Very simple to install, the amplifier comes with complete instructions. It has very low power consumption, and is safe to leave on indefinitely.

Bandwidth:	87 – 860MHz
Nominal Gain:	16dB±1dB
Noise:	<2.5dB
Input/Output impedance:	75Ω

Supplied with approximately 1 metre of mains cable.

Order Code	Type	Price each
YX73Q	Indoor Amp XB1	£24.99

Amplifier for Second TV or Radio

An amplifier specially designed to overcome the losses in a splitter unit and extra cable when one aerial is used to drive two TV sets. Unit is in an easily fitted smart white box 120 x 90 x 51mm deep which simply plugs into mains. It has three co-axial sockets; one for the aerial, one for TV set 1 and one for TV set 2. For use with all UHF TV and FM radio channels.

	VHF	UHF
Bandwidth:	40 to 860MHz	
Typical Gain:	8.5dB	7.5dB
Max output:	32dBmV	
Channel Isolation:	17dB	23dB
Input/Output impedance:	75Ω	
Noise:	4dB	5dB

Supplied with instructions and 1m of mains cable.

Order Code	Type	Price each
YQ22Y	Xtra Set Amp	£24.99

High Gain Amplifier for Second TV or Radio

An aerial amplifier for use with TV or FM radio sets which may be used to give a high boost to one set or to boost the signal and overcome the losses when two TV sets or two radios or a TV and radio are operated from one aerial or one download. The amplifier is in a small white box 151 x 79 x 52mm high which may be screwed to a wall or left free-standing. The unit has an on/off switch and red 'on' indicator light, but may be left switched on continuously. The unit has three co-ax sockets. The aerial plugs into one and the TV or radio sets into the other two.

Bandwidth:	40 to 860MHz
Typical gain:	15dB
Max output:	95dBμV
Input/output impedance:	75Ω
Input voltage:	240V AC 3VA

Supplied with 1.8m of mains cable. Ensure that unit is connected to a plug fitted with a 3A fuse.

Order Code	Type	Price each
YP42V	2 Outlet TV/FM Amp	£17.99

Amplifier for Second or Third Radio or TV

Antiference

An amplifier with the ability to drive three sets from one aerial. For use with all UHF TV and FM radio channels. Fitted with approximately 1 metre of cable.

	VHF	UHF
Bandwidth:	40 – 860MHz	
Nominal Gain:	8dB	4.5dB
Max. output:	28dBmV	
Channel Isolation:	19dB	
Input/Output impedance:	75Ω	
Noise:	5.0dB	

Supplied with instructions.

Order Code	Type	Price each
BK75S	Xtra Set 3 Amp	£29.99

Amplifier for up to Four Radios and TV's

Antiference

An ultra-wideband FM/UHF distribution amplifier for small domestic systems. It has a single aerial input and four outputs i.e. five co-ax sockets on the front plate. The unit can operate up to 4 TV's and 4 FM receivers from one download though splitters will be required if more than 4 outputs overall are wanted. And a video recorder can be linked into the system so that its output is available to all the outlets as well.

	VHF	UHF
Bandwidth:	40 to 860MHz	
Gain:	11-11.5dB	8-10dB
Max output:	30dBmV	
Noise figure:	5.5dB	6.5dB
Channel isolation:	>19dB	
Input/Output impedance:	75Ω	

Supplied with instructions and 1m of mains cable.

Order Code	Type	Price each
YN42V	Xtra Set 4 Amp	£39.99

Plug-in Signal Boosters

Maxview

A range of fixed gain, plug-in, signal amplifiers for use with TV and FM radios, when fed from a suitable aerial. The amplifiers can also be used to link a satellite decoder to a TV and/or a video recorder. These units are housed in an attractively styled box fitted with square pins at the rear for plugging directly into a 13A socket. The unit is supplied with one input socket and between one and four output sockets, depending on the model. If the amplifiers are to feed TVs and FM radios simultaneously, then the downloads from the two aerials will have to be connected to the input socket via a diplexer (e.g., FE27E). The outputs can then be fed directly to the equipment or, if in strong signal areas, split again using diplexers. In fact, by using suitable diplexers various combinations are possible, to suit individual requirements.

Specification (all units)

Maximum output: 30mV
 Noise: 3dB (typical)
 Bandwidth: 40MHz to 860MHz,
 Channels E2 to 69
 Power requirements: 220/240V AC < 5W

Specification (each unit)

Order Code	Model	No. of Outputs	Gain to each outlet
RT67W	PSB1C	1	15dB
RT68X	PSB2C	2	12dB
RT69Y	PSB3C	3	8dB
RT70A	PSB4C	4	8dB

Order Code	Type	Price each
RT67W	Sig Amp 1 O/P	£14.99
RT68X	Sig Amp 2 O/P	£16.99
RT69Y	Sig Amp 3 O/P	£18.99
RT70A	Sig Amp 4 O/P	£19.99

TV/FM Variable Signal Amplifiers

Maxview

A range of variable gain signal amplifiers for use with TV or FM radio sets fed from a suitable aerial. The amplifiers can also be used to link a satellite receiver to a TV and/or video recorder. These mains powered units are designed for continuous use and a red LED illuminates when the unit is switched on. The amplifiers can be wall mounted or free standing, a 1m flying lead is included to connect to an FM radio, TV or video recorder. Housed in a very attractive white plastic box, the gain is easily adjusted by a flush mounted control. The amplifiers have one input socket and either 1, 2, 3 or 4 output sockets. All the sockets are flush mounted in the box. If the amplifiers are to feed a TV and an FM radio simultaneously, then the two downloads will have to be connected to the input via a combiner (e.g. FE27E). Alternatively, a masthead combiner (e.g. BW51F) can be used to feed one download. By using a combiner on the input, then a TV aerial can be used with a satellite receiver or computer and the outputs can then feed a video recorder and TV's. In fact, by using a combiner and/or splitters various combinations are possible, to suit individual requirements.

Specifications

KC09K
 No. of outputs: 1
 Gain: 22dB typically
 Dimension: 92 x 77 x 63mm excl. lead

KC10L

Battery Powered TV/FM Variable Signal Amplifier

Maxview

A 12/24V DC powered version of the single output amplifier described above (KC09K). Ideal for use in caravans, caravanettes, boats or long distance lorries, the amplifier has only one output, but a splitter (e.g. FE27E) can be used if necessary. The amplifier has an on/off switch, and is supplied with approx. 1.5m of twin power lead, and a 1m flying lead fitted with coaxial plugs. Dimensions 92 x 85 x 63mm.

Order Code	Type	Price each
KC13P	12/24V DC Signal Amp	£19.99

UHF/VHF Distribution Amplifiers

Antiference

These multiple output amplifiers are designed to provide simply engineered, reliable UHF and VHF distribution systems from a range of plug-in units. Now you can operate more than one receiver from a single antenna using a multi-way splitter with no losses – in fact, these 'splitters' also amplify! The amplifiers will accept two aerial feeds and combine the signals for distribution, and provision is made for powering a masthead amplifier via the UHF aerial download. The XS06 is an ultra-wide band FM/UHF distribution amplifier for small domestic systems. It features high gain, exceptional output capability, separate FM/UHF aerial input sockets and six 'split' outputs. Provision is included for powering a mast-head amplifier via the UHF download.

XS06	FM	UHF
Bandwidth (MHz):	88-108	470-860
Gain to each output (dB):	11.5	11.0
Max. output (dBmV):	28	
Noise (dB):	5.0	
Isolation between outputs (dB):	27	
Isolation between input (dB):	>38	>43
Input/output impedance (Ω):	75	
Connections:	75Ω coax. sockets	
Power supply reqd:	240V AC mains 50Hz	
Power output for aerial pre-amps available:	+12V DC @ 6mA max. via centre conductor of UHF aerial input socket, screen is earth	

The XS6/32 is an ultra-wide band VHF/UHF version for larger scale domestic systems, flats, hotels, shops, showrooms and service departments. It is provided with separate UHF and VHF aerial inlets, and these two signals are combined within to share any one of the common outputs. In addition to the features of the XS06, the XS6/32 also has a high level output socket as well as the six 'split' outlets. This can be connected to an extra distribution panel, the XP6, providing a further six outlets. In this way a number of XP6 units can be cascaded in series providing a total of 32 outlets, or up to 63 outlets using two XS6/32 amplifiers – full details are provided with each XP6 unit.

XS6/32	VHF	UHF
Bandwidth:	40-230MHz	470-860MHz
Gain, 'normal' output:	5.5dB	5.5dB
High level output:	23.5dB	22dB
Max. output, 'normal':	22dBmV	22dBmV
Max. o/p, high level:	38.5dBmV	37.5dBmV
Noise:	<4.5dB	<5dB
Isolation between inputs:	>20dB	>25dB
Isolation between 'normal' outputs:	>30dB	
Between 'normal' & high level o/p:	35 - 45dB	
Input/output impedance:	75Ω	
Connections:	75Ω coax. sockets	
Power supply reqd:	240V AC mains	
Power output for aerial pre-amps available:	+12V DC @ 40mA max. via centre conductor of aerial input socket, screen is earth	

The XS9 is a wideband FM/UHF distribution amplifier as XS06, but with eight 'split' outlets and an additional high level output – and by using two XS9 amplifiers up to 67 outlets are possible. An LED indicates when line power is present on the UHF input.

XS9	FM	UHF
Bandwidth:	88-108MHz	470-860MHz
Gain to each 'Split' output:	4.5dB	4dB
High output:	22.5dB	22.5dB
Max. output:	21.5dBmV	21.5dBmV
'Split':	39dBmV	39dBmV
High level:	<5dB	<5dB
Noise figure:	<5dB	<5dB
Isolation between inputs:	>37dB	>41dB
Isolation between 'Split' output:	31dB	29dB
'Split' high:	33dB	35dB

Input/output imp:	75Ω
Connections:	75Ω coax. sockets
Power supply req:	240V AC Mains
Power output for aerial pre-amps:	+12V DC @ 40mA max. via centre conductor of aerial input socket, screen is earth

The distribution amplifiers are enclosed in attractive metal cases providing effective screening, minimising RF radiation and protecting the system from interference, and there is also no need to terminate unused outputs.

The XP6 is a passive, ultra-wide band plug-in 'tee' unit with six padded outputs and a low-loss through line. It has excellent performance characteristics at VHF and UHF, with a high level of isolation between its outputs so that there is no need to terminate unused ones.

XP6	
Circuit type:	Resistive
Bandwidth:	40-860MHz
Tap loss:	20dB
Through loss:	VHF 4.5dB UHF 5.5dB

Isolation between outputs:	>33dB
Nominal impedance:	75Ω
Connections:	75Ω coax. sockets

*NOTE: because of the distribution losses indicated above, the XP6 should not be used as an aerial splitter

Order Code	Type	Price each
YZ86T	Amp XS06	£49.99
YZ87U	Amp XS6/32	£64.99
KR20W	Amp XS9	£64.99
JU85G	Tee XP6	£14.99

Battery Powered Aerial Amplifier

Antiference

This amplifier is specially designed for use with portable UHF/TV receivers where an AC mains supply is not available. It is ideal for use in caravans, boats, etc., where, if desired, it can be operated from either an internal 9V (PP3) battery, or an external 12V DC supply. It should treble any incoming signal.

Bandwidth:	40 to 860MHz
Nominal Gain:	15dB
Max. output:	30.5dBmV
Supply Voltage:	9 to 12V DC
Current consumption:	5mA @ 9V
Input/output impedance:	75Ω

Order Code	Type	Price each
BK76H	TV Amp XB15	£18.99

FOR TOP QUALITY & VALUE!

DIPLEXERS AND SPLITTERS

FM/UHF Diplexer

Antiference

A masthead or surface mounting diplexer for combining or separating FM and UHF signals from antenna downloads. To separate at receiver, use BW57M, YN54J or FE27E.

	FM	UHF
Bandwidth:	87-108MHz	470-860MHz
Insertion loss:	0.5dB	
Channel Isolation:	22dB	38dB

Order Code	Type	Price each
BW51F	Diplexer UF22	£9.99

Combiner/Splitter

A 'professional' non-resistive, low-loss unit for combining antenna downloads or dividing equally the signals on one download. Supplied in a weatherproof housing, a masthead amplifier can be powered through this unit. Suitable for mast or surface mounting. Looks identical to BW51F above.

Frequency range:	40 to 860MHz
Insertion loss:	4.0dB

Order Code	Type	Price each
BW52G	Splitter CS1000	£9.99

3-Way Low-Loss Splitter

Antiference

An inductive splitter for mast-head or loft mounting. Line-power bypass is provided on output 1 so that a mast-head amplifier can be powered via this unit. The unit can be used to combine or separate UHF TV and FM radio signals. An unused output should be terminated with a Min Res 75Ω. Looks identical to BW51F above.

	FM	UHF
Insertion loss	40-230MHz	470-860MHz
Output 1	3.5dB	3.5-4dB
Outputs 2 & 3	6.7dB	6.75-8dB
Isolation		
output 1 to 2 or 3	25dB	27dB
output 2 to 3	20dB	30dB
VSWR input	1.5:1	1.32:1
VSWR output	1.2:1	1.67:1

Order Code	Type	Price each
FE28F	Splitter CS3000	£9.99

UHF Aerial Combiners

Antiference

Ideal for use in areas where ITV stations overlap, the combiners allow two aerials in different groups to share one download. Two types are available and should be selected as below. Looks identical to BW51F above.

Aerial receiving stations in group	combined with	Aerial receiving stations in group	Use combiner
A		B	A/E
A		C/D	A/E
A		E	A/E
B		C/D	AB/CD

The unit is very easy to install on the aerial mast or a vertical surface and masthead amplifiers can be powered through the unit on either or both inputs. Supplied with full instructions.

Order Code	Type	Price each
YP57M	Aerial Combiner A/E	£13.99
YP58N	Aerial Combiner AB/CD	£13.99

Surface Mounting Inductive Splitter Unit

A non-resistive splitter that offers less loss than other models. It may also be used in reverse to combine two signals via the co-ax sockets onto one lead. White moulded housing and fixing screws supplied. No soldering required. Overall size: 59 x 51 x 27mm high.

Order Code	Type	Price each
YQ23A	Inductive Splitter	£2.99

THE BEST OF SERVICE

2 Way UHF TV Splitter

Union Brothers

Two good quality, metal shrouded screened UHF TV signal splitters. The splitters are electrically identical but offer different arrangements of plugs/sockets.

Type 1 has one input plug and two output sockets. Type 2 has one input socket and two output plugs. Both types have an insertion loss of 3.5dB and are suitable for use with frequencies up to 1GHz. Isolation between the outputs is 22dB.

Order Code	Type	Price each
JM13P	Type 1 TV Splitter	£1.99
JM14Q	Type 2 TV Splitter	£1.99

TV AND FM OUTLETS

Single Co-axial Outlet

Union Brothers

A surface mounting co-ax outlet in a moulded white housing. Co-ax cable enters from rear and is screw terminated. For use with FM or UHF signals. Overall size: 50 x 32 x 24mm.

Order Code	Type	Price each
HX87U	Surface Coax Outlet	99p

Single Flush Mounting Co-axial Outlet

A flush mounting co-ax outlet with a white thermoset front plate. Fits standard conduit and surface boxes (see electrical accessories) to BS1363. Screws supplied. No soldering required. For use with FM or UHF signals. Front 85mm square. Depth (from rear of plastic moulding) 15mm.

Order Code	Type	Price each
BW55K	Flush Co-Ax Outlet	£1.56

Double Co-axial Outlet Flush

Union Brothers

As BW55K, but with two completely separate co-ax sockets and screw terminals at rear for two separate cables. Sockets are marked 'TV' and 'Radio' moulded into the white front plate. Overall size 86mm square. Depth from rear of plastic face 15mm.

Order Code	Type	Price each
BW56L	Flsh Dbl Co-Ax Outtt	£2.15

COMPARE OUR PRICE & QUALITY – SAVE MONEY TODAY!

**Fax your orders to:
01702 553935**

TV/FM Diplexer Surface

A surface mounting integral diplexer which separates the UHF TV signals from the FM radio signals which have been combined on one download. Screw fixing for co-ax cable at rear, two co-ax sockets at the front, one marked TV and one marked FM. In a white moulded housing with fixing screws supplied. Overall size: 63 x 44 x 29mm.

Order Code	Type	Price each
BW57M	Surface TV/FM Outlet	£6.99

TV/FM Diplexer Plug-in

A plug-in diplexer which may be used to combine or separate UHF TV and FM radio signals. Unit has at one end two co-ax sockets, one marked TV and the other FM and a co-ax plug at the other end which connects to the combined signal. Insertion loss <math><1\text{dB}</math>. Overall size of plastic body: 37 x 40 x 16mm.

Order Code	Type	Price each
FE27E	Plug-in TV/FM Diplxr	£4.99

Flush Mounting TV/FM Diplexer Antiference

A flush mounting diplexer to separate UHF TV signals from FM radio signals which have been combined on one download. Screw fixing for co-ax cable at rear, two co-ax sockets on the front, one marked TV and one marked FM. Fits standard conduit and surface boxes (see Electrical Accessories) to BS1363. Screws supplied. Front 85mm square. Depth (from rear of plastic moulding): 10mm.

Order Code	Type	Price each
YN54J	Flush TV/FM Outlet	£6.99

ACCESSORIES

(Also see Co-ax Connectors in Connectors Section)

Aerial Switch Antiference

An in-line aerial switch in a white moulded housing. For switching a TV or FM receiver from one aerial to another. Or it can be used to switch one download from one receiver to another. Two co-ax sockets at rear for two separate co-axial downloads and one standard co-ax plug at the front.

Overall size: 58 x 40 x 15mm.

Order Code	Type	Price each
BW58N	Aerial Switch	£4.99

Balun 300/75Ω

A receiver transformer to enable 300Ω balanced feeder (XR31J) to be used when TV or FM receiver has 75Ω unbalanced aerial input. The balanced feeder terminates on screw terminals on the balun which may then be plugged into a standard co-ax socket. By using an in-line co-ax socket and a short piece of 300Ω feeder it is possible to use the balun in reverse. Size of body 38 x 22 x 20mm.

Order Code	Type	Price each
FD78K	300/75 Balun	£1.86

TV/Satellite Outlet Socket Antiference

A flush mounting dual outlet socket containing one conventional VHF coaxial socket, and one threaded F connector socket for a satellite feeder to connect to a receiver. Screw fixings for both coax cables are provided at the rear, and the TV socket is capacitively isolated. The sockets are marked on the front panel as 'SAT' and 'TV'. Fits standard conduit and surface boxes (see Electrical Accessories) to BS1363. Screws supplied. Front panel is 85mm square. Depth (from rear of front panel) 15mm.

Order Code	Type	Price each
MJ02C	SAT/TV Outlet	£10.99

Attenuators Antiference

For in-line connection. Standard coax socket at one end, standard coax plug at other end in bright aluminium alloy bodies and suitable for VHF and UHF. They have low VSWR and are clearly marked. Three types available. 3dB, 6dB, 12dB.

Length 45mm (approx)

Order Code	Type	Price each
RK47B	Attenuator 3dB	£3.29
BW59P	Attenuator 6dB	£3.29
BW60Q	Attenuator 12dB	£3.29

TVI Filter Antiference

A high quality filter designed to be inserted in the aerial leads of TV sets suffering from interference from CB transmissions. The filter is peaked to reject signals from transmitters operating on 27 to 28MHz while giving a very low insertion loss to UHF TV signals. The unit plugs directly onto the end of the existing TV aerial lead.

Order Code	Type	Price each
YL43W	TVI Filter	£5.49

TV Aerial Flylead

Co-axial cable with co-ax plugs connected at both ends. Available in 2m, 5m and 10m lengths.

Order Code	Type	Price each
RW36P	Flylead 2m	£1.39
JW39N	Flylead 5m	£2.25
JW40T	Flylead 10m	£2.99

Aerial Extension Cable

Coaxial extension lead manufactured from 75Ω coaxial cable and terminated at one end in a coaxial plug and at the other end in a coaxial socket. The terminations are protected with a plastic strain relieving sheath. Length 2m.

Order Code	Type	Price each
GW61R	Aerial Extn Cable	£1.35

CONSTRUCTORS GUIDE

A leaflet containing much practical information and advice on the more mechanical aspects of project building. The leaflet is normally included with every kit, and is an essential aid for the beginner. It covers component recognition, how to solder and then how to check for correct solder joints, handling semiconductors etc. The information provided could also be valuable to the more experienced project builder.

Order Code	Type	Price each
XH79L	Constructor Guide	30p NV

WATCH AS YOU BUILD VIDEO WITH RADIO RECEIVER KIT

A beginner's starter project which includes a step-by-step construction guide on a VHS video tape. The whole kit is supplied neatly packed into a standard VHS video cassette, together with an accompanying leaflet. By following the instructions on video you will be introduced to the basic techniques of project building, and by the end of the video a simple AM radio receiver circuit will have been constructed, ready to use. Some troubleshooting advice is given at the end. It is recommended that the absolute beginner also purchase a starter tool kit (see tools section) to ensure that they have the correct tools at the outset. Additional kits of parts are also available without the video tape, so that several students can work from one video tape. However, these extra kits cannot be used unless you have at least one video tape.

Order Code	Type	Price each
SK00A	Start Radio & Video	£17.99
SK04E	Start Radio No Video	£10.99

FUNTRONICS

A set of projects ideal for the absolute beginner, requiring no soldering and the minimum of tools to construct. A small screwdriver, pliers and wire cutters are normally all that is needed. The components and connecting wire are held in place by self-tapping screws which fit into holes in the plastic 'peg-board' supplied. A component guide-sheet is supplied with each kit and this is cut-out and stuck to the plastic board. The kits include all the parts necessary except the battery and tools.

Optional Items

The following items, not included in the kits, may also be required.

PP3 Battery	As Req.	(JY60Q)
PP3 Alkaline	As Req.	(FK67X)
Snip Cutter	1	(JH20W)
Pliers	1	(FV55K)
Screwdriver	1	(JG98G)

PROJECT CONSTRUCTION RATINGS

All the projects in this section have been rated for ease or difficulty of construction to help you to decide before you buy a kit, whether its construction will be within your capabilities. The projects are rated from 1 to 5, which may be interpreted as follows:

- 1** Projects rated 1 are simple to build and understand and are suitable for absolute beginners. They require only the minimum of tools such as soldering iron, cutters, pliers, wire-strippers and possibly a screwdriver. They do not require any test gear or setting-up.
- 2** Projects rated 2 are easy to build, but not suitable for absolute beginners. They require some test gear, usually a multimeter and may require setting-up or testing.
- 3** Projects rated 3 are average. They require some skill in their construction or more extensive setting-up.
- 4** Projects rated 4 are advanced. They require a fairly high level of skill in construction. They may require some specialised test gear or their setting-up may be quite complex.
- 5** Projects rated 5 are complex. They require a high level of skill or they may require specialised test gear or are complex in construction or require complex wiring. These projects are recommended for skilled constructors only.

PLEASE NOTE: Construction details are included in the kits.

There are 10 projects in the range:

1. Bulb & Fuse Tester

This is a very simple project indeed, it is intended to allow testing of bulbs, fuses, switches etc. If the device under test is good, then an LED lights up. See Maplin Magazine Issue 48.

2. Transistor Tester

As well as showing you how a transistor works, this handy kit allows you to test diodes or any small or medium NPN or PNP power transistors you may use in your own projects. See Maplin Magazine Issue 49.

3. Water Indicator

This little project is ideal for detecting water in the soil of house plants and will give a visible indication, an LED will light, when the soil is dry. See Maplin Magazine Issue 50.

4. Light-Dark Indicator

This project simply switches on an LED if it detects the absence of light. With a simple change to the circuit, this project will do the opposite, i.e. it will operate the LED indicator if the light level is above a certain amount. A useful purpose for a project of this type is a photographic darkroom indicator. See Maplin Magazine Issue 51.

5. The Flasher

This is an astable circuit that switches on and off two LEDs alternately. The LEDs flash every two or three seconds. Such a project will be of great use to model makers, for example. In its present form, the Flasher is ideal for flashing warning lights on a model level crossing. See Maplin Magazine Issue 52.

6. Electronic Siren

This little unit is ideal for use with model cars and similar applications. It provides a sound that varies in pitch; you can control this pitch, enabling a useful range of siren sounds to be produced. See Maplin Magazine Issue 53.

7. Pet Communicator

This project uses an astable multivibrator loaded by a small loudspeaker. At low-light levels the frequency is very low, but in daylight the frequency is very high and will probably not be heard by most humans – but will be heard by your pets. A simple modification will allow this project to operate as an alarm. See Maplin Magazine Issue 54.

8. Decision Maker

Simple multivibrator circuit that is started by holding two prods together. Two LEDs will flash very fast so that they appear to be on all the time. When the prods are disconnected, a simple 'memory' action holds on one of the LEDs which can be labelled 'yes/no', 'in/out', 'heads/tails' or whatever. See Maplin Magazine Issue 55.

9. Morse Code Communicator

An astable multivibrator circuit that operates at several hundred pulses per second and produces an audio tone and lights an LED when the 'key' is pressed. This project will help you to learn Morse Code and communicate with others using this special 'language', the circuit is not any form of radio transmitter. See Maplin Magazine Issue 56.

10. Music Maker

A simple electronic organ that plays 10 notes, enough to play a range of simple tunes. The unit is 'monophonic'; this means it can only play one note at a time. It uses a stylus type 'keyboard'; in other words, you hold a stylus (prod) and play notes by touching it on to the 'keys', which are actually just screw terminals. The circuit is an astable multivibrator that can oscillate at several different frequencies, so as to provide a reasonable range of notes. See Maplin Magazine issue 57.

Order Code	Type	Price each
LP82D	Continuity Tester	£2.99
LP86T	Transistor Tester	£2.99
LP90X	Water Level Indicatr	£2.99
LP93B	L/D Indicator	£3.99
LP96E	Flasher	£2.99
LP97F	Electronic Siren	£3.99
LT01B	Pet Communicator	£4.99
LT04E	Decision Maker	£2.99
LT07H	Morse Communicator	£4.99
LT09K	Music Maker	£3.99

HOT TIP

Fitting handles to the front of your project, not only enhances its appearance by giving it a professional look, but helps protect any components mounted on the front panel, should it be accidentally dropped onto its face.

AUDIO PROJECTS

LM386 AMPLIFIER 1

The LM386 is a general purpose power amplifier designed for use in low voltage applications and requires minimal external components to operate. It is ideal for use in applications where a low power amplifier is required, i.e. radio receivers, intercoms, etc. Output power into 8Ω is 325mW. For more details see 'Data File' in Maplin Magazine Issue 29.

Specification (typical)

Supply Voltage (V_s): 4V to 12V DC
 Quiescent Current: 4mA
 Output Power (P_{out}): 325mW
 Voltage Gain: 46dB
 Bandwidth: 300kHz
 THD: 0.2%
 Input Bias Current: 250nA

Note: As this board is intended as a 'building-block' project it is not eligible for our 'Get-you-working' service.

Kit and Special Parts

A complete kit of parts to build the basic LM386 amplifier is available (note: kit does not include R1, which has to be selected on test). The high quality fibre-glass PCB is also available separately. PCB dimensions: 29.2 x 29.2mm.

Order Code	Type	Price each
LM76H	LM386 Kit	£4.75
GD86T	LM386 PCB	£1.75

TDA2822 STEREO AUDIO AMPLIFIER 2

- ★ Easy to build
- ★ Low quiescent current
- ★ Low crossover distortion
- ★ Supply voltage down to 3V
- ★ Stereo headphone jack socket

The TDA2822 is a monolithic integrated circuit and with the rest of the components on the printed circuit board, it offers a small yet powerful stereo amplifier module. Because of its wide supply voltage range (3V to 15V) it is well suited to portable battery operated applications.

Specifications

Test conditions:
 PSU = 9V, Output load = 8Ω
 Input sensitivity: 26mV rms
 Input impedance: 47kΩ at 1kHz
 Quiescent current: 8mA
 Maximum current: 260mA
 Output power: 650mW rms per channel
 Power bandwidth: 40Hz to 150kHz (-3dB)

Distortion: 0.9% thd
 Output noise: 40μV

Kit and Special Parts

A complete kit of parts is available and pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 34. PCB dimensions: 72.4 x 44.5mm.

Order Code	Type	Price each
LP03D	TDA2822 Stro Pwr Amp	£7.99
GE21X	TDA2822 PCB	£2.49

TDA7052 1W POWER AMPLIFIER MODULE 1

- ★ Low Component Count
- ★ Low Power Consumption
- ★ Short Circuit Protected
- ★ No External Heatsink Required

An application circuit using the TDA7052 1W mono power amplifier IC, and ideal for use in low power applications such as portable battery powered equipment, because it requires very little in the way of external components to function. This is entirely a general purpose module and will find uses where simple but effective audio power amplification is needed. Typical uses for the module could include low power audio amplification for portable radios, cassette recorders/players, toys, games, intercoms, and related devices; the high gain capability of the circuit makes it ideal for use in intercoms and baby alarms, where the module may be used to amplify signals from a microphone direct with very little pre-amplification to a suitable level to drive a loudspeaker directly. Provision for a volume control can be made directly on the board.

Specification

Power supply range: 3 to 15V DC
 Supply current: 4mA quiescent @ 6V
 340mA max. @ 6V for 1W into 8Ω
 Distortion: 0.7% THD @ 1kHz & 0.1W
 Output power: 1W rms max. @ 6V
 Voltage gain: 39dB
 Size: 32 x 32mm

Kit and Special Parts

A complete kit of parts is available. The pcb is also available separately. Full construction details may be found in the Maplin Magazine Issue 37. PCB dimensions: 31.75 x 31.75mm.

Order Code	Type	Price each
LP16S	TDA7052 Kit	£4.99
GE41U	TDA7052 PCB	£1.99

8W POWER AMPLIFIER 1

A hi-fi 8W amplifier using the LM383. One of our most popular kits, this amp is offered at a very low price and is an ideal building-block module for use in many audio projects. For more details see the specification of the LM383 in the Semiconductor Section of this catalogue. Note 1: These common ground returns should be connected by two separate wires to the ground return on the power supply e.g. the negative wire (-V) shown in the PSU diagram.

Parts List for 8W Amplifier

R1	Min Res 1Ω	(M1R)
R2	Min Res 220Ω	(M220R)
R3	Econ Res 5.6Ω	(B5R6)
RV1	Hor S-Min Preset 100k	(UH06G)

15W POWER AMPLIFIER MODULE

Features

- ★ 15W RMS output power (into 4Ω load)
- ★ Short-circuit protected
- ★ Low distortion
- ★ Amplifier and power supply kits available
- ★ Low-cost

Applications

- ★ Superior replacement amplifier module for most music centres
- ★ Monitor amplifier
- ★ Bench amplifier

The original Hi-Fi 15W amplifier, using the TDA 2030 IC, has been around for 12 years and has been a consistently good seller. By a careful redesign of the original PCB layout, and a few judicious component changes, the performance has been considerably improved over the original. The total harmonic distortion has been reduced to less than 0.1%, with a very useful increase in output power. All this adds up to an extremely versatile, compact amplifier. The output is short-circuit proof, and the built-in thermal protection means that the IC is capable of surviving most fault conditions. The IC should be bolted directly to the heatsink bracket after smearing a small amount of heat transfer compound (not supplied in kit) onto the mating surfaces. The tab of the IC is connected internally to pin 3, and is at 0V potential; this pin must always be connected to the most negative part of the amplifier circuit. It may be desirable to isolate the tab from the heatsink by using an insulating bush and greaseless washer and leave pin 7 of the IC unconnected.

A suitable 30V DC unregulated power supply kit is also available (excluding transformer). One kit is required for each amplifier, but only one transformer is required, a toroidal type (YK86T), for either mono or stereo operation. For mono applications, the two secondaries are wired in parallel (red and blue wires to pin 1 of PSU, yellow and grey wires to pin 2 of PSU). For stereo each secondary winding feeds a separate PSU module (red to pin 1 of PSU 1, yellow to pin 2 of PSU 1; blue to pin 1 of PSU 2, grey to pin 2 of PSU 2).

Specification

(Using LT24B PSU module(s) and YK86T transformer)
 Maximum supply voltage: 40V DC
 Output short circuit protection: Continuous

Input sensitivity for maximum output	
4Ω speaker load:	244mV RMS (-10.03dB)
8Ω speaker load:	288mV RMS (-8.59dBu)
Total harmonic distortion	
mono into 4Ω:	0.05% (15W RMS)
mono into 8Ω:	0.05% (11W RMS)
stereo into 4Ω:	0.1% (15W RMS)
stereo into 8Ω:	0.1% (11W RMS)
Bandwidth	
4Ω:	20Hz to 100kHz
8Ω:	10Hz to 100kHz

Optional items

The following items, not included in the kits, may also be required.

15W Amplifier

Heatsink 4Y	1	(FL41U)
TO66(P)	1	(WR23A)
Heat Transfer Compound	1 Tube	(HQ00A)
Heavy Duty Speaker Cable	As req.	(XR60Q)

PSU

Neon Switch Red	1	(YR70M)
Fuse 1½in. 1A	1	(WR11M)
Toroidal Transformer		
120VA 24V	1	(YK86T)
Fuseholder	1	(FA39N)
Fuseholder Boot	1	(FT35Q)
Tie Wrap 102	1	(BF91Y)
Miniature Mains Cable	As req.	(XR01B)
Strain Relief Grommet 5R2	1	(LR48C)
Push-on Receptacles	1 Pkt	(HF10L)
Push-on Receptacle Covers	1 Pkt	(FE65V)
Tag 2BA Solder	1 Pkt	(BF27E)
Chassis Mounting Phono Skt	2	(YW06G)
Chassis Mount 2pin DIN Skt.	2	(HH31J)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items) for the 15W amplifier and a separate kit is available for the 30V unregulated PSU. The PCBs and bracket are also available separately. Full construction details may be found in Maplin Magazine Issue 64.

Order

Code	Type	Price each
LT23A	15Watt Amplifier Kit	£8.49
GH32K	15Watt Amplifier PCB	£2.45
LT24B	30V Unreg PSU Kit	£7.49
GH33L	30V Unreg PSU PCB	£2.49
YQ36P	15W Amp Bracket	£1.25

20W POWER AMPLIFIER

This low distortion, high quality audio amplifier, based on the LM1875, is capable of delivering 25W into 4Ω to 8Ω loads and can be operated from split or single rail supplies. It also features short circuit and thermal protection. This amplifier is an ideal building-block module for use in many audio projects. For more details see 'Data File' in Maplin Magazine Issue 30.

Specification

Supply Voltage:	60V(±30V) Max
Supply Current:	70mA (typical), P _{out} 0W
Output Power (P _{out}):	25W, THD = 1%

Load Impedance:	4Ω to 8Ω
THD:	(f = 1kHz) 0.022%
P _{out} = 20W, 4Ω load	(f = 20kHz) 0.07%
Full Power Bandwidth:	DC to 250kHz (-3dB)
Open Loop Gain (DC):	90dB
Slew Rate:	8V/μs

Printed Circuit Board

A high quality fibre-glass PCB with printed legend is available for the basic LM1875 audio amplifier application. The board has provision for both single and split rail supply versions of the amplifier.

Note: As this board is intended as a 'building-block' project it is not eligible for our 'Get-you-working' service.

PCB dimensions: 73.7 x 68.6mm.

THE BEST OF SERVICE

MILLENNIUM 4-20 20W AUDIO VALVE POWER AMPLIFIER

Features

- ★ Class AB1 push-pull output
- ★ Non-hybrid traditional 4-valve design
- ★ Simplified construction using PCBs
- ★ Expandable modular concept
- ★ Mono or stereo options
- ★ No setting up required
- ★ Minimal test equipment needed
- ★ Matching preamp will be available

Applications

- ★ Domestic hi-fi/stereo music systems
- ★ Small-scale public address
- ★ Musical instrument amplification

An affordable, 20W valve amplifier guaranteed to turn any capable, domestic stereo system into something a bit special, emitting a wonderfully gutsy bass even at low volume, together with 'an extra something' in the mid and treble ranges.

Closely resembling Mullard's '520' design of the early sixties, the amplifier benefits hugely from the superior quality of modern components. Modern materials have produced transformer cores that are half the size of those of 20 years ago, yet with better specification. High-speed capacitors achieve a competent, even sparkly, HF performance, and high stability resistors help push the S/N ratio to nearly 90dB, making a nonsense of the myth that valve circuits are inherently noisy.

The construction concept is modular and there are only two basic kits: the PSU module, and the amplifier module. Each kit contains everything required to build the basic module, including a standardised aluminium chassis (8 x 6 x 2½in.), and a PCB to simplify construction. The chassis are joined to form either a traditional 'monobloc' (single amplifier and PSU), or a full stereo assembly (having 1 x PSU, 2 x amplifier

modules). The PSU is designed to power a stereo pair. Project rating is 4, but no special setting up is required and initial testing only needs an ordinary multimeter.

Specification of Power Supply Unit

Transformer (primary)			
Input voltage:	240V AC 50Hz		
Valve heater (secondary)			
Circuit type:	Earthed centre-tap balanced AC		
Heater output voltage:	6.3V AC 50Hz (3.15V - 0 - 3.15V)		
Heater output current:	7A maximum		
HT secondary o/p voltage:	350V AC maximum		
HT secondary o/p current:	250mA maximum		
HT DC output voltages, no load:	480V to 500V DC		
single amplifier powered:	430V to 440V DC (half load)		
two amplifiers powered:	370V to 400V DC (full load)		
HT ripple:	<6% of total DC at full load		
Power consumption,	HT	Heater	Total Mains current
single amplifier:	55W	22W	77W >320mA
two amplifiers:	96W	44W	140W <700mA
Cold switch-on mains in-rush current at full load:	>800mA		
Primary side protection:	1A 'quick-blow' fuse		
Main line DC HT protection:	250mA anti-surge fuse		
Unloaded or open-circuit HT reservoir discharge method:	Constant leakage resistor		
Unloaded HT reservoir discharge time:	1 minute approx., 500V to 0V		

Specification of Amplifier

Amplifier type:	Class AB1 'Ultra-Linear'
Line supply voltage (HT):	400V to 450V DC
HT current consumption:	125mA nominal (HT = 440V)
Heater current consumption:	3.5A
Max. output power:	20W r.m.s. (27W absolute maximum., HT = 440V)
Gain:	30dB
Input sensitivity	220mV for 20W Output
Input impedance:	1MΩ (500kΩ if volume control added)
Frequency response:	25Hz to 30kHz ±0.5dB at 20W -3dB at 75kHz at 20W <10Hz to <40kHz ±0.5dB at 1W
Signal-to-noise ratio:	89dB
Output noise (input grounded), hum:	<3mV peak
white Noise:	<2mV peak
Harmonic distortion:	0.05% (0.1% at 27W)
Output impedance:	<0.2Ω

Output Transformer Details

Primary anode-to-anode impedance (Ra/a):	6.6kΩ
Screen gnd taps:	4:3% from CT
Winding distribution:	Five sections of interleaved primary and secondary windings
Speaker load matching:	8:2 only
Low frequency cut-off:	25Hz at 20W throughput
Primary resonant frequency:	80kHz approx.
Valves:	1 x EF86, 1 x ECC83, 2 x EL34
Dimensions:	monobloc, 12 x 8 x 6 1/2 in. stereo, 18 x 8 x 6 1/2 in.

Optional Items

The following items are not included in the kit, but may also be required.

8.2Ω 25W wire-wound Resistor (dummy-load)	1	(P8R2)
470k single pot log	1	(FW27E)
470k dual pot log (alternative)	1	(FX14Q)
10M (alternative)	1	(M10M)
Gold chassis phono skt red	1	(JZ06G)
Gold chassis phono skt blk	1	(JZ05F)
Stick-on feet square	1 Pkt	(FD75S)
M3 x 10mm steel screw	1 Pkt	(JY22Y)
M3 steel nut	1 Pkt	(JD61R)
M3 shakeproof washer	1 Pkt	(BF44X)

Kits and Special Parts

A complete kit for each module, including the PCB and transformer, is available (but excluding optional items) to build one PSU and one mono amplifier. In addition, complete 'monobloc' and stereo assembly kits are also available as LT71N and LT72P. Full construction details may be found in Maplin Magazine Issues 73 and 74.

DIGITAL SINGLE 30V 3A DC POWER SUPPLY

Instek

A high quality DC power supply providing 0 to 30V DC at up to 3A maximum. The instrument includes an auto-ranging digital voltmeter (DVM) with front panel LCD readout, and which can also function as a digital ammeter, for monitoring voltage or current output as required according to the setting of the front panel VOLTS/AMPS selector switch. Voltage output is continuously variable over the whole range with one 'coarse' rotary control, accompanied by an additional 'fine' control which can vary output over >5% of the set value. Current limiting is provided by further 'coarse' and 'fine' rotary controls, and with these the power supply can be forced to leave 'constant voltage' mode and enter 'constant current' mode. Power consumption and dissipation is reduced by a multiple level power saving device which selects lower ratios of the main supply transformer secondary automatically if the output falls below the relevant threshold.

Specification

	CV Mode	CC Mode
Input:	240V AC ±10% 50/60Hz	
Output:	0 to 30V DC	0 to 3A DC
Load regulation:	0.01% +3mV	0.02% +3mA
Line regulation:	0.01% +3mV	0.02% +3mA
Ripple & noise:	0.5mV rms	3mA rms
Dimensions:	128 x 145 x 285mm	
Weight:	4kg	

A matching self-powered valve preamplifier, the 'Newton', will be available in the early part of 1995, designed to go with the 'Millennium'. Full constructional details will be found in Issues 85 and 86 of 'Electronics'.

TDA1514A 50 WATT IC POWER AMPLIFIER

- ★ Star earthing
- ★ Small size (PCB, 57mm x 76mm)
- ★ Preselectable input sensitivity
- ★ Wide supply voltage range
- ★ Safe operating area (SOAR) protected
- ★ Short circuit protection
- ★ Thermal protection

The TDA1514A power amplifier is a high quality IC based power amplifier combining small size with high power output. The IC features protection against AC and DC short circuits when used with symmetrical supplies. The IC also includes an output mute circuit preventing 'clicks' and 'thumps' during switch on and switch off, thus eliminating the possibility of damage to

Continued from previous page.

delicate speakers. The amplifier is protected against thermal runaway and includes SOAR protection making the device almost indestructible. The IC has a wide supply range, the minimum requirements being $\pm 9V$ to a maximum of $\pm 30V$. To deliver an output power of 50 watts the module requires a $\pm 27.5V$ supply for an 8Ω load and a $\pm 23V$ for a 4Ω load. For full details see 'Data File' in Maplin Magazine Issue 40.

Specification

Supply voltage range:	$\pm 9V$ to $\pm 30V$ DC
Input sensitivity:	300mV to 2V (adjustable)
Output impedance:	0-1 Ω
Power output:	($V_s = \pm 27.5V$)
8 Ω	40W RMS
4 Ω	60W RMS
HD at -3dB of full output:	0.1%
Full power bandwidth (-3dB):	20Hz to 25kHz
Signal to noise ratio:	82dB
Peak output current:	6.4A
Quiescent current:	60mA
Supply ripple rejection:	(100Hz) 72dB
Slew rate:	10V/ μ S

Optional Items

The following optional items are not included in the kit but may also be required.

Heatsink 2E	1	(HQ70M)
Insulator TO218	1	(UL74R)

Kit and Special Parts

A complete kit of parts is available and the pcb is also available separately.

A ready assembled version is also available.

PCB dimensions: 57.2 x 76.2mm.

Order Code	Type	Price each
LP43W	TDA1514 Power Amp	£19.99
GE64U	TDA1514 Amp PCB	£5.39

50W Hi-Fi POWER AMPLIFIER

Features

- ★ Very Low Distortion (<0.05% at 1kHz)
- ★ Unconditionally Stable
- ★ Damping Factor 80
- ★ Maximum Output 72W RMS at 1kHz (4 Ω load)
- ★ Noise < -100dB
- ★ Easy to Build

Applications

- ★ Hi-Fi Systems
- ★ Active Loudspeaker Systems
- ★ Sub-Woofer Amplifier
- ★ In-Car Amplifier

The Maplin 50W amplifier has been around for some time, and still sells extremely well – a tribute, no doubt, to the excellent design. The amplifier can readily form the basis of a high quality Hi-Fi system. Because of the low-cost of the kit, the amplifier can be used in an active loudspeaker system, or used to drive a sub-woofer. Such applications will require the amplifier(s) to be fed from suitable filter circuits. Another possible application is in-car amplification. Although if the amplifier(s) is to be used in a car, it would still have to be fed from a $\pm 30V$ power supply. A suitable switch-mode power supply, that 'converts' the 12 to 14V output from a car battery to a suitable $\pm 30V$ power supply, was discussed in 'Electronics' Issue 46, which is also available as a kit (LP39N).

Specification

(With power supplies shown and extra heatsink)
Power Output at 1kHz

	4 Ω Load	8 Ω Load
One Channel:	72W RMS	50W RMS
Two Channel:	49W RMS	36W RMS
Input Sensitivity		
For Rated Output:	380mV	450mV
Frequency Response:	Flat from 20Hz to 28kHz	
Full Power Bandwidth	(pulse tested at hf): 3dB down at 95kHz	
Noise:	<-100dBu	
THD:	<0.05% at 1kHz	
Damping Factor:	80	
Input Impedance:	15k Ω	
Slew Rate:	14V/ μ s (at 10kHz)	

Power Supplies – Recommended Circuits

A dual DC power supply is required for this project, capable of supplying 30-0-30V @ 2A. The mono supply is capable of powering a single 50W amplifier for mono use, while the stereo supply is designed to power 2x50W amplifiers. All parts are available from Maplin, but no kit is available for either PSU, and a PCB is not necessary. In general, the best way to construct either supply is by building directly into a metal case of suitable dimensions, keeping all lead lengths down to a minimum, and ensuring adequate ventilation.

Although the stereo power supply is adequate for most users, a reduction in the ripple, and therefore an improvement in the noise figure, can be achieved by replacing C1 and C2 with 22000 μ F 56V high-grade can-type capacitors (FA20W).

Please note: The PSUs are NOT available as a kit.

150W POWER AMPLIFIER

A very high quality power amp capable of delivering 225W continuous RMS sine wave into a 4Ω load when used with the power supply shown. With two amps running on the power supply shown the output is reduced to 160W per channel. (Into 8Ω the amp delivers 146W (one only) or 112W with a stereo pair.) The transient peaks can easily exceed 300W so you should have a bank of speakers capable of handling at least 400W with one amp and 4Ω impedance, 300W each with two amps and 4Ω impedance, 300W with one amp and 8Ω impedance and 200W each with two amps and 8Ω impedance.

Specification

Output power with 4Ω load both channels simultaneously: 160W rms continuous sine wave per channel

Frequency response: 30Hz to 20kHz (-1dB)
15Hz to 37kHz (-3dB)

Total harmonic distortion at 160W: <0.1% at 1kHz

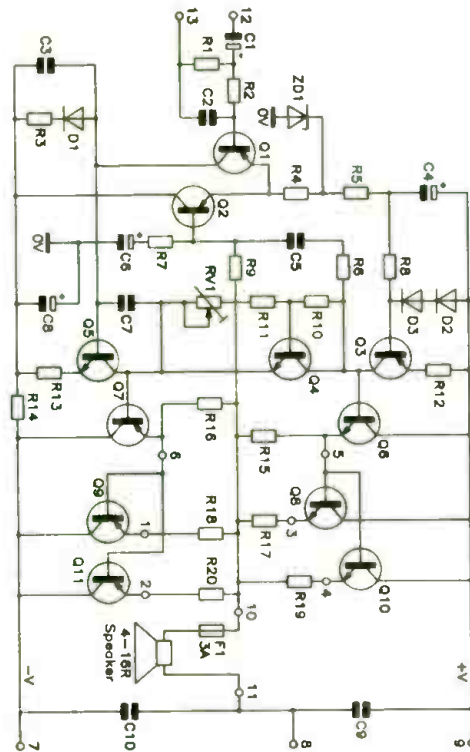

Damping Factor: 80

Sensitivity for 160W into 4Ω: 1V rms

Construction

Fit the components to the pcb as shown. Note that the clip-on heatsinks are required for Q3, 4 and 5 and the Heatsink DR2 for Q6 and 7. Drilling instructions for the Heatsink 6W-1 are shown. Q6 to 11 must be mounted using mica washers and silicone grease. Ensure that all transistor mounting holes are deburred and rubbed down with a fine emery cloth as even the smallest metal filing may punch through the thin mica washer when the transistor is bolted down tightly, and this will damage several of the transistors. The pcb is fixed to the heatsink using three 19mm stand-offs. These slot neatly into the vanes of the heatsink. Connections to the collectors of Q8, 9, 10 and 11 are made by means of solder tags mounted under the nuts. Link the tags in pairs and take the two wires through the 8mm (5/16 in.) hole in the centre of the transistors. Keep the connections between the output transistors and the pcb as short as possible and use 32/02 wire. The output is protected against a short circuit by a 3A fuse fitted to the pcb. Bolt down the power supply components – the bridge rectifier is best bolted to the side of the transformer chassis. Keep all the parts close together and keep all wires as short as possible. If you have two power amps, run separate wires from the power supply to each amp individually. The 0V return from the loudspeaker(s) should be brought to the 0V link on the capacitors C6 and C7 and not taken to the pcb. The 0V to the pcb(s) should be taken from this point also. Before connecting the plus and minus supplies to the amp switch on the power supply and measure the voltage between FS2, 3 and 0V. It should be between +50V and +55V approx. And the voltage between FS4, 5 and 0V should be between -50V and -55V approx. (Measure on a DC voltage range.) If all is well switch off and connect the power supplies to the amp(s). Remove FS2 (FS3 for second amp) and connect a millimeter in its place. Turn VR1 to its

centre position. Switch on and if the current exceeds 250mA switch off again immediately. Check for short circuits, but if none can be found, the most likely cause is an earth loop. Before switching on again check that all the fuses are intact. Never switch on if any one or more of the fuses has blown. If all is well however, adjust VR1 until the current reads about 70mA. Allow the amp to warm up for about 15 minutes until the current stops increasing and then readjust for 75mA. Switch off, reconnect the fuse, switch the multimeter to a low DC volts range, switch on again and measure the voltage between the loudspeaker output and 0V. The voltage should not exceed plus or minus 0.2V Use a heavy wire for connection to the loudspeakers bearing in mind that the transient peaks to the speakers can exceed 8 Amps.

150W Power Amplifier Circuit

Please note that the Heatsink 6W-1 is sufficient for amplifier powers up to 150W only when used vertically in free air. If the unit is to be used in a confined space or inside a cabinet, additional heatsinking or a fan is required.

100W PRO-AMP

Features

- ★ **Balanced line input**
- ★ **100W RMS power output**
- ★ **Standard 19in. 2U rack mounted case**
- ★ **Thermal protection**
- ★ **Loudspeaker protection**
- ★ **Switch-on mute**

Applications

- ★ **Instrument amplification**
- ★ **Stage foldback**
- ★ **Small venue P.A.**
- ★ **Studio monitor amplifier**

Based on Maplin audio projects, this high quality amplifier is not intended as a domestic amplifier, but for use on-stage, in a recording studio or other similar 'professional' applications. As such, the Pro-Amp is comparable, in terms of price, performance and features, to many commercial amplifiers. The Pro-Amp includes many features to make it as versatile and easy to use as possible, these include: A strong and attractive 19in. 2U rack mounted case for longevity and ease of integration with other professional equipment.

A low-noise, balanced line input is provided on both 1/4in. jack and 3-pin XLR sockets; the input stage is AC coupled and has an impedance of 100kΩ. Adjustment of input sensitivity is provided by a front panel level control.

To guard against switch-on and switch-off transients, power amplifier faults etc. that can damage expensive loudspeakers, an amplifier monitor is included. If a fault has occurred and has been cleared, the monitor circuit can be reset by means of a front panel switch.

Thermal protection is also provided to protect the amplifier from excessive temperature rise. LEDs are provided to indicate the status of the amplifier.

The loudspeaker output is available on both a 1/4in. jack and socket and a 3-pin XLR plug. The amplifier output is DC coupled and can drive loads down to 4Ω. To minimise susceptibility to mains bome interference, the 240V AC 50Hz mains supply is connected via a 3-pin filtered mains inlet. Rear panel fuseholders are provided for the mains input and amplifier supply fuses.

The kit of parts contains the five kits that comprise the amplifier, plus the additional parts required. The five kits are: 150W MOSFET amplifier, High Quality PSU, SSM2016 Preamplifier, Amplifier Monitor and Temperature Monitor. There are certain component changes and modifications to some of the modules, and these are fully explained in the instruction leaflet contained in the kit.

Specification

Input impedance:	100kΩ
Rated load impedance:	4 to 8Ω
Maximum power output,	
4Ω	105W RMS
8Ω	90W RMS
THD @ 75W (1kHz):	0.02%
Signal to noise ratio:	85dB
Input sensitivity	
for rated output, 4Ω	-13.6dBm/160mV RMS
8Ω	-11dBm/215mV RMS
Maximum input level:	+8dBm/1.9V RMS
Frequency response:	10Hz to 40kHz -1dB
Supply voltage:	240V AC 50Hz

Power consumption	
quiescent:	17W
at rated output:	194W (4Ω) 130W (8Ω)
Dimensions:	483 x 370 x 88mm

Optional Items

The following items not included in the kit may also be required.

Chassis Punch Set	If Req.	(YK27E)
Crimp Tool	If Req.	(FY31J)
XLR Line Plug 3-pin	As Req.	(BW89W)
XLR Line Socket 3-pin	As Req.	(BY91Y)

150W MOSFET AMPLIFIER

- ★ **True 100W/150W rms power output**
- ★ **Drives 4 Ω or 8 Ω loud speakers**
- ★ **High reliability and performance**

The MOSFET amp has been revised from its debut in 1981 for guitar use in the Combo Amplifier!!! This best selling project is always in the Top Ten Kits list.

An incredible hi-fi amp that offers high reliability and performance like the best valve amps. It is suitable for use in audio applications where high power levels and excellent frequency response characteristics are required.

A power supply is not included with the kit.

Specification

Power supply	
Voltage:	±55V DC max (8Ω)
Current:	2.5A (8Ω), 5A (4Ω)
Output power rating	
at 1kHz continuous	100W rms into 8Ω load
sinewave:	150W rms into 4Ω load (max)
Frequency response:	20Hz to 40kHz
Slew rate:	20V/μs
Damping factor:	Fd = 200 (8Ω load)
Input impedance:	47kΩ
Input sensitivity:	860mV rms (2.43V pk-pk) for rated output

Optional Items

The following items, are not included in the kit, but may also be required.

Audio Toroidal 160V-	1	(YZ23A)
J04	1	(BH46A)
W01	1	(QL38R)
4k7 1W Carbon Film	2	(C4K7)
10,000μF 63V Can	2	(FF32K)
2,200μF 63V Can	2	(FF22Y)
100nF HV	2	(FA21X)
100nF 35V Tantalum	2	(WW54J)
μA78M12UC	1	(QL29G)
μA79M12UC	1	(WQ89W)
Fuse A/S 3-15A	3	(RA11M)

Fuse A/S 630mA	2	(RA08J)
Heatsink 6W-1	1	(FL77J)

Kit, Ready-Built Module and Special Parts

This project is available as a complete kit or as a ready-built module size 100 x 75 x 25mm. In addition the heatsink mounting bracket and the pcb (size 90 x 85mm) are available separately. Full construction details can be found in Maplin Magazine Issue 41.

BRIDGING MODULE MAKES 400W MOSFET AMP

- ★ **Increases output to 400W**
- ★ **Anti-thump at switch-on**
- ★ **Loudspeaker protection**
- ★ **Accommodates wide range of input voltages**

When used with two Maplin MOSFET Amps, this easy-to-add module will allow them to produce up to 400W RMS audio output!! By connecting the amplifiers to the input and to the speakers via this module many advantages are obtained in addition to the huge power gain. The module completely protects the loudspeakers and amplifiers through the on-board relay from short circuits, overloads, and high voltage offsets. In addition the module stops the audible thump at switch-on by connecting the speakers to the amps after a short delay. The massive power gain is achieved by making the input to one of the power amps out of phase with the input to the other amp and then bridging the speakers between the two amps. The very high output powers achieved will require that speaker connections are carefully chosen to ensure that the high currents can be handled. To achieve 400W a high power PSU will be needed i.e. 8 to 10 amps at 55-0-55V and it must be well regulated. The MOSFET amps, however, thanks to the special characteristics of MOSFET transistors will give long and reliable service without strain even at this extremely high output.

Kit and Special Parts

This project is available as a complete kit or as a ready-made module. The pcb is also available separately. Full construction details may be found in the Best of Maplin Projects Book 2.

Order Code	Type	Price each

1kW HIGH POWER MOSFET AMPLIFIER

4

The High Power Mosfet Amplifier is intended for use in halls, auditoriums or wherever the situation demands large scale audio amplification. Loudspeaker loads down to a minimum of 3.5/4Ω can be driven by the amplifier at full power, before protection circuitry on the Monitor Module, comes into effect. Mosfet devices have the capacity to limit conduction with increasing junction temperatures. This means that running the amplifier at full power into loads of 1 to 2Ω, will cause the Mosfets to shut down all output signals, although heavy loads like this can be driven at reduced power levels. One function of the Monitor Module is preventing the amplifier from delivering power continuously into a short circuit. This situation can occur when loudspeaker connecting cables are shorted together, rendering them liable to overheat very quickly with disastrous results! The complete system is made up from four modules. A Driver module and Output module form the power amplifier and are mounted on the Mosfet heatsink assembly. A Monitor module and a Power Supply module are mounted separately and provide protection and power respectively.

Prototype Specifications:

Single Channel (mono) power output stage

Power supply: ±90VDC (180V) @ 7A

Rated Power Output into 4Ω load.

(1) Peak Power: 1.3 kW (1300 Watts) PEAK

(2) RMS Power: 775 Watts RMS

(3) Average Power: 650 Watts RMS

Full Power Bandwidth: 10Hz to 50kHz

Total Harmonic

Distortion: 0.2% @1kHz (90% full power)

Slewing rate: 24V/μs

Damping factor: 110 (4Ω load)

Input sensitivity: 775mV (0dB) into 30kΩ for rated output.

Kit and Special Parts

Kits are available for the Output Stage, the Driver Module, the Monitor Module, the Power Supply, and the Hardware. A pre-drilled case is available, and all the pcb's are available separately. Full construction details may be found in the Maplin Magazine Issues 26 and 29.

O/P PCB: 226.1 x 49.5mm.

Driver PCB: 177.8 x 49.5mm.

Monitor PCB: 94 x 76.2mm

PSU PCB: 142.2 x 92.7mm.

Order Code	Type	Price each
LM51F C4	HP Mosfet O/P Kit	£99.99

GD79L	HP Mosfet PSU PCB	£4.75

AMPLIFIER MONITOR

- ★ Prevents switch-on/switch-off transients
- ★ Protects loudspeakers against amplifier and power supply faults
- ★ Self resetting or manual reset modes of operation
- ★ Suitable for mono or stereo amplifiers

2

This amplifier monitor provides loudspeaker protection against such 'nasties' as DC offsets. This can occur when amplifiers and their associated power supplies go faulty. Additionally, the monitor is intended to protect DC coupled loudspeakers – such as bass and mid-range units. At switch-on, the amplifier monitor provides a time delay during which the loudspeakers are 'disconnected' from the amplifier by means of relays. This allows the power supply to stabilise and the amplifier output capacitors, if fitted, to charge. At switch-off, the relays immediately 'drop-out'. Thus the amplifier monitor prevents those nasty 'bangs, pops and thuds' at switch-on and switch-off, which otherwise might damage your delicate and expensive loudspeakers. The amplifier monitor is suitable for use with amplifiers having symmetrical or asymmetrical power supplies up to ±50V or +100V. A facility for adding an external trigger circuit e.g., a temperature monitor (LP71N), is also included, giving complete protection for both amplifier and loudspeakers. If the amplifier monitor is to be for PA use, then it may be found that the monitor may drop out when a 'miked-up' drum kit is struck. To overcome this problem, two 10μF capacitors (C1 and C101) are replaced by 33μF capacitors of the same type.

Specification

Mains power supply: 240V AC 50Hz

Supply current: 34mA max

Monitor input voltage: ±50V max

Monitor trip voltage: ±3V min

Signal requirements to trip input frequency,

C1 and C101 = 10μF: <8Hz

C1 and C101 = 33μF: <2.5Hz

Pulse width at 4Vpk,

C1 and C101 = 10μF: >70ms

C1 and C101 = 33μF: >200ms

Output current

from -12V: 75mA max.

Optional Items

The following items, not included in the kit, may also be required.

M3 x 10mm Insulated Spacer 1Pkt (FS36P)

3-Way Minicom Plug 1 (BX96E)

3-Way Minicom Housing 1 (BX97F)

Min Mains Black As Req (XR01B)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 47.

PCB dimension: 130.8 x 75.6mm.

Order Code	Type	Price each
LP32K	Amplifier Monitor	£21.99
GE59P	Amp Monitor PCB	£4.29

12V PUBLIC ADDRESS SYSTEM

- ★ Two 8W RMS Amplifiers
- ★ Maximum of 10 x 8Ω Speakers can be Driven
- ★ Supplied from 12V Car Battery

A Public Address amplifier that operates from a 12 volt car battery, and producing up to 10 Watts per channel specifically to drive arrays of public address loudspeakers. Input for a single microphone is provided by a mono 1/4in. jack socket. Bandpass limiting of 300Hz to 3kHz neatly excludes very low and high frequency harmonics in speech areas which are unnecessary for PA use, leaving the bandpass area free of excessive distortion. Megaphone type speaker arrays that would be used have their own similar bandpass characteristics. Without recourse to power bridging designs or power inverter techniques the amplifier can produce 10 to 20W r.m.s. of power output, using the robust TDA2005 power amp IC, from a single 12V supply. The IC contains 2 such amplifiers each capable of driving loads down to 1.6Ω, or five 8Ω speakers. A combined total of 16 watts can be achieved from ten such speakers.

Specification

Supply voltage: 6V to 17V DC

Min. supply current: 100mA

Max. supply current: 2.25A

Rated power output: 8W rms. per ch. (16W pk)

Both channels running: 16W rms. total at 1kHz

Input sensitivity: 2mV continuously variable for rated output

Load impedance: 1.6Ω max. to 8Ω min.

Power response: 680Hz to 2kHz

Input: Single 1/4in. mono jack

Output: Twin 1/4in. jacks

Includes input sensitivity preset and volume control.

Optional Items

The following items, not included in the kit, may also be required.

Jack Plug 2 off (HF87U)

PA Front Panel (FP59P)

Battery Clip 2 off (HF26D)

Wire 3202 Red (XR36P)

Wire 3202 Black (XR32K)

Kit and Special Parts

A complete kit of all parts for the 12V PA Amplifier excluding the front panel. The pcb (size 144 x 82mm), pre-drilled case, and printed adhesive front panel are also available separately. Full construction details may be found in the Maplin Magazine Issue 21.

PCB dimensions: 144.8 x 82.6mm.

Order Code	Type	Price each
LM17T C1	PA Kit	£29.99
GD31J	PA Board	£3.75
YP12N	Car PA Case Drilled	£11.99
FP59P	PA Front Panel	£3.65

FOR TOP QUALITY & VALUE!

WATT WATCHER

When running a speaker system it is useful to have an idea of the approximate level of power being used. In particular it is important that the loud speaker manufacturer's specification is not exceeded as this could result in severe damage to the speaker. The Watt Watcher is a simple circuit that may be fitted into a speaker cabinet to provide an indication of the relative power level. It uses three LED's: a green LED lights when the power is at a relatively low level indicating that the system is running; a second (orange) LED indicates an intermediate level of power and a third (red) indicates an overload condition. The level at which the orange and red LED's light is set by fitting resistors of selected value, depending on the required power range. The Watt Watcher derives its power from the speaker line and hence requires no external power supply.

Kit and Special Parts

A complete kit of parts including the pcb is available. The pcb is also available separately. Full construction details may be found in the Maplin Magazine Issue 27.

Order Code	Type	Price each

SL6270 AGC MICROPHONE PREAMP

Features

- ★ Constant output signal
- ★ Fast attack
- ★ Lower power consumption
- ★ Single-ended or differential input

Applications

- ★ Audio AGC system
- ★ Transmitter overmodulation protection
- ★ Tape recorders

The SL6270 is a small 8-pin IC combining the functions of an audio amplifier and Voice Operated Gain Adjusting Device (VOGAD). It is designed to accept small signals from a microphone and to provide an essentially constant output signal from an input covering a range of 50dB. The dynamic range, attack and decay times are controlled by external components. The circuit can be used with either a dynamic or electret microphone. The device will operate over a wide range of power supply voltages between 4.9V to 10V and consumes only 9mA from a 9V battery. Typical applications might include: audio AGC systems, transmitter overmodulation protection, tape recorders and audio surveillance. Because the SL2670 may be used in many varied applications, some of the component values supplied in the basic kit will not be suitable, so alternative values must be

calculated to determine the new working parameters. Note: this is intended as a 'building block' project, and not eligible for our 'Get-You-Working' Service.

Kit and Special Parts

A complete kit of parts is available, including the PCB and instruction leaflet, but excluding PP3 battery and microphone. The PCB is available separately. Full construction details may be found in Maplin Magazine Issue 51.

PCB dimensions: 33 x 25.4mm

SSM2015 MICROPHONE PREAMPLIFIER

- ★ Low Noise
- ★ Low Distortion
- ★ Balanced Line Operation
- ★ High Slew Rate

The SSM2015 is a low noise preamplifier IC featuring low distortion and a wide bandwidth. Voltage gains between approximately 10 and 2000 can be set using different resistor values and the device is ideal as a microphone preamplifier. True differential inputs make the device particularly useful for interfacing balanced line transducers to equipment with single ended inputs. For full constructional details, see 'Data File' in Maplin Magazine Issue 39.

Specification

Supply Voltage:	±12 to ±17V DC
Supply Current:	20mA @ ±15V
Total Harmonic Distortion:	Less than 0.02% (1kHz)
Gain	
RV1 set to minimum:	21.0dB
RV1 set to maximum:	33.5dB
Maximum Input Voltage (for 9V RMS output, ±15V supply)	
RV1 set to minimum:	800mV RMS
RV1 set to maximum:	190mV RMS
PCB Dimensions:	43 x 99mm

Kit and Special Parts

A complete kit of parts is available. The pcb is also available separately.

Order Code	Type	Price each
LP42V	SSM2015 Kit	£14.99
GE63T	SSM2015 Preamp PCB	£2.25

SL561C LOW NOISE PREAMPLIFIER

Features

- ★ Gain up to 60dB
- ★ Low noise
- ★ Good bandwidth

NEW!

Applications

- ★ Video preamplifiers
- ★ Video buffers
- ★ Video distribution systems

The SL561C is a monolithic IC which can be used in a number of different low noise preamplifier roles. It contains nine very high performance transistors with associated biasing components, and the high gain, low noise design makes it suitable for use in audio and video systems at frequencies up to 6MHz. Noise performance is optimised for source impedances between 20Ω and 1kΩ, so the device can be used with a variety of transducers, including photo-conductive infrared detectors, magnetic tape heads and dynamic microphones.

In this application the device is configured as a video preamplifier, with a small amount of HF boost to sharpen the picture, and an output impedance of approximately 50Ω. As it stands the project is useful as a video preamplifier, video buffer or line driver, and as part of a video distribution system. This could be a single video signal such as from a satellite decoder, and split to several SL561C boards with outputs to individual monitors. Video amplification is the most critical role for this module, and with a little modification to some circuit details, by changing some components, the module will easily cater for AF applications.

Specification

Power supply voltage:	5V DC
Supply current:	40mA
Bandwidth:	24MHz (-3dB)
Input level:	1V (pk to pk)
Input impedance:	4k7 (no termination) 75Ω (terminated)
Output level:	2V (pk to pk)
Output load impedance:	75Ω

Optional items

The following items are not included in the kit, but may also be required.

Phono Chassis Socket	As Req.	(YW06G)
Phono Screen Plug	As Req.	(HH01B)
UHF SO259 Chassis Socket	As Req.	(BW84F)
UHF PL259 Plug	As Req.	(BW81C)
UHF PL259 Reducer Small	As Req.	(BW82D)

THE BEST OF SERVICE

SSM2016 DIFFERENTIAL PREAMPLIFIER

3

Features

- ★ Wide supply voltage range
- ★ Low noise
- ★ High slew rate (10V/μs)
- ★ True differential inputs
- ★ Low distortion

Application

- ★ Balanced input stages

Based on the SSM2016 chip, the differential preamplifier project has many applications including microphone preamplifiers and balanced input stages. The IC operates as a true differential amplifier with feed-back. Operating voltages are between ±9V to ±36V, capable of typical sink currents up to 70mA. A very good noise figure is achieved at source impedances below 1kΩ. The device is capable of a relatively high drive level and is designed to be used with a number of outputs. The bandwidth of the device varies with the gain and is typically in excess of 1MHz at gains below 100. Slew rate is relatively independent of gain and is typically 10V/μs. The circuit may be used in many different applications requiring a balanced input preamplifier.

Note: this is intended as a 'building block' project only, and is not eligible for our 'Get-you-working' service.

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details can be found in Maplin Magazine Issue 41.

PCB dimensions: 59.7 x 50.8mm.

Order Code	Type	Price each
LP44X	SSM2016 Kit	£14.99
GE74R	SSM2016 PCB	£4.49

Applications

- ★ Mixers
- ★ Tape recorders
- ★ Upgrading existing equipment

The SSM2017 IC, at the heart of this project, is a latest-generation audio preamplifier which is particularly suitable for use as a balanced microphone amplifier. It features an ultra-low noise level (around 2nV/√Hz), wide bandwidth and high slew rate. It requires a dual rail supply of between ±6V and ±22V, and is available in an 8-pin DIL package. Whilst aimed at balanced applications, it can also be used with unbalanced microphones, as well as phantom powered microphones e.g. electret microphones without an internal power supply.

Specification

THD:	<0.01dB (gain = 40dB)
Noise:	2nV/√Hz (typ.)
Bandwidth:	1MHz (gain = 40dB)
Slew Rate:	17V/μS (typ.)
Power Supply:	±6V to ±22V DC @ 14mA (max) per rail; 48V DC for phantom supply

Common-Mode Rejection

Ratio (CMRR):	92dB (typ.)
Gain Adjustment :	14dB (x5.5) to 60dB (x1000)

Optional Items

The following items, not included in the kit, may also be required.

Twin-core Screened Cable (e.g., XS23A or XR08J)	As Req.
Single-core Screened Cable (e.g., XR18U or XS14B)	As Req.
Wire 7/0.2 10m Black	1 (BL00A)
Wire 7/0.2 10m Red	1 (BL07H)
Wire 7/0.2 10m Green	1 (BL03D)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 69.

Order Code	Type	Price each
LT31J	SSM 2017 Pre-Amp	£12.99
GH52G	SSM 2017 PCB	£2.25

STEREO PRE-AMPLIFIER

— a Sound Master Kit

- ★ Low Level of Distortion
- ★ RIAA Frequency Response
- ★ Easy to Build

4

When using a magnetic pickup it is common practice to include a preamplifier between the pickup and the main amplifier to compensate for the recording characteristic and to provide the necessary sensitivity. The most common frequency response is that which slopes off below 1kHz and is boosted above 1kHz. This response is called the RIAA recording characteristic and is an adopted world-wide standard to provide compensation for the recording characteristic when playing a record. This small preamplifier provides the RIAA equalisation with high sensitivity. The pre-amplifier could also be used as a microphone pre-amplifier and when used as such exhibits a fairly flat response.

Specification

Input Impedance:	47kΩ approx.
Input Sensitivity:	200mV output for 5mV RMS input @ 1kHz
RIAA Pre-amp:	400mV output for 5mV RMS input @ 1kHz
Mic. Pre-amp:	230mV input for 9V RMS output @ 1kHz
Max. Input voltage:	115mV input for 9V RMS output @ 1kHz
RIAA Pre-amp:	0.005%
Mic Pre-amp:	Not less than 5kΩ
Total Harmonic Distortion:	30V at 3mA rising to 30mA max
Output Load Impedance:	
Power Supply:	

Kit

A complete kit of parts for this project is available. Full construction details may be found in the Maplin Magazine Issue 33.

SSM2120 DYNAMIC RANGE PROCESSOR

Features

- ★ Low distortion
- ★ Large VCA dynamic range
- ★ Wide supply voltage range
- ★ Low external parts count

Applications

- ★ Noise reduction systems
- ★ AGC circuits
- ★ Voltage-controlled filters
- ★ Compressors, expanders, limiters

The SSM2120 is a versatile IC designed for the purpose of expanding, compressing or limiting signals in various analogue systems including audio. Detailed instructions are included with the kit showing how the SSM2120 can be used as a companding noise

Continued on next page.

IT'S A FACT!

ROOT MEAN SQUARE

This refers to the value of a varying waveform, such as a sine wave, that dissipates the same power as it would under DC conditions. It is the square root of the mean values of the instantaneous values of the waveform. For a sine wave the root mean square (rms) is equal to the peak value divided by √2. However, for a square wave the maximum and rms values are equal.

Continued from previous page.

reduction system, a dynamic noise filter with downward expander, or a dynamic noise filter. Other possible applications include AGC circuits, voltage-controlled filters and stereo noise gates. Note that, because the module may be used in many different applications, some of the component values supplied in the kit have been assigned an arbitrary value. For this reason minor modifications may be necessary to adapt the circuit to individual purposes. The SSM2120 requires a split-rail supply and will operate over a wide range of voltages between $\pm 3V$ and $\pm 18V$. However, the device can operate from a single rail supply of between 6V and 36V. For optimum performance a regulated power supply should be used. All application circuits with the kit are optimised for use with a $\pm 15V$ power supply, or a single +30V rail.

Note: The Maplin 'Get-You-Working' Service is not available for this project.

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 47. PCB dimensions: 104.1 x 53.3mm.

MN3004 BUCKET-BRIGADE DELAY-LINE

Features

- ★ Variable delay of audio signal
- ★ Single +15V supply

Applications

- ★ Tremolo, vibrato and chorus effects
- ★ Variable or fixed delay of analogue signals
- ★ Telephone time compression
- ★ Delay line for voice communication systems

The MN3004 is a 512 stage, low noise, bucket-brigade delay-line. Very simply, sampled values of the analogue signal to be delayed are stored in the form of charges on a series of capacitors. Between each capacitor is a switch that transfers the charge from one capacitor to the next, upon command of a clock pulse. Analogue signals, in the audio band, can be delayed by 2.56ms to 25.6ms by adjusting the clock frequency.

The device is ideally suited for processing audio signals to produce an artificial delay in public address systems. The delayed signal has a limited bandwidth of 3.1kHz. In practice, this restricted bandwidth is hardly a problem since higher frequencies are also attenuated with natural echoes and reverberation. By varying the signal delay and the mixture of direct and delayed signals, a variety of interesting effects can be obtained.

The module requires a single well regulated +15V supply that is capable of delivering at least 40mA. Note: this is intended as a 'building block' project only, and is not eligible for our 'Get-You-Working' Service.

Specification

Supply voltage:	+15V DC
Supply current:	36mA
Input signal:	1Vrms typ.
Input impedance:	47k Ω
Delay time:	2ms to 24ms
Dry signal path frequency response:	4Hz to 15kHz
Delay signal path frequency response:	4Hz to 3.1kHz
Output signal level:	1Vrms
Output Impedance:	600 Ω

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 48. PCB dimensions: 104.1 x 55.9mm.

MN3011 BUCKET-BRIGADE DELAY-LINE

Features

- ★ 3328-stage audio signal delay with 6 output taps
- ★ Single +15V supply

Applications

- ★ Reverberation effect
- ★ Tremolo, vibrato and chorus effects

The MN3011 is a 3328 stage bucket-brigade delay-line with 6 tap outputs. Analogue signals, in the audio band, can be delayed by 1.98ms to 166.4ms by adjusting the clock frequency and making connection to the relevant output. Natural reverberation effects can also be produced by summing two or more of the six outputs. The six different and non-related delays are individually adjustable to give an optimum room simulation. Recirculation of the echoes is produced by feeding back part of the longest echo to the input. The module may be used in many different applications requiring a natural reverb effect, or even a single or multiple delay of up to 166ms e.g. reverberation effect in audio equipment; tremolo, vibrato and chorus effects; variable or fixed delay of analogue signals. Note: this is intended as a 'building block' project only, and is not eligible for our 'Get-You-Working' Service.

Specification

Supply voltage:	15V DC
Supply current:	40mA
Input signal level RV1 & RV2 fully clockwise:	1Vrms typ. 2.5Vrms max.
RV1 fully clockwise, RV2 fully anticlockwise:	1Vrms typ. 8Vrms max.
Input impedance:	47k Ω
Delay time:	1.7ms to 160ms
Dry signal path frequency response:	7Hz to 23kHz
Delay signal path frequency response:	8Hz to 3.3kHz
Output signal level:	1Vrms
Output impedance:	600 Ω

DIGITAL SPEECH RECORD AND PLAYBACK MODULE

This novel and versatile project can be used to store speech digitally, which can then be played back at the push of a button. The project is based around the UM5100 digital voice recorder and playback IC. Digital recording has the advantage over tape recording, in that there is no mechanical wear and tear. Applications include voice message pads, security systems and telecommunications. The on-board 32K SRAM memory will store between 5 and 20 seconds of speech (depending on sample rate). The module can be further expanded with an EPROM programmer module, which will allow non-volatile storage of speech in EPROM. An additional playback only module is available, which does not incorporate the record circuitry, and is intended for use with speech stored in EPROM.

Kit and Special Parts

A complete kit is available and the pcb (size 108 x 86mm) is also available separately. Full construction details may be found in Maplin Magazine Issue 30. A ready assembled version is also available.

Push switch 1 (FH59P)

Kit and Special Parts

A complete kit is available and the pcb (size 71 x 89mm) is also available separately. Full construction details may be found in Maplin Magazine Issue 31. A ready assembled version is also available.

Order Code	Type	Price each
LM85G	Dig Playback Kit	£16.99
GD87U	Digi Playback PCB	£9.35
AM19V	Playback Assm	£25.99

Optional Items

The following items, not included in the kit, may also be required.

2764 EPROM	1	(QQ09K)
27C64 EPROM	1	(UH43W)
27128 EPROM	1	(YH88V)
27C128 EPROM	1	(UH95D)
27256 EPROM	1	(QY75S)
27C256 EPROM	1	(UH44X)

Kit and Special Parts

A complete kit is available (note: the 2 x 15 way edge connector is included) and the pcb (size 81 x 64mm) is also available separately. Full construction details may be found in Maplin Magazine Issue 31.

A ready assembled version is also available.

Order Code	Type	Price each
LM86T	Dig EPROM Kit	£17.99
GD89W	EPROM Extn board	£7.75
AM20W	Speech Board Assm	£26.99

DIGITAL SPEECH PLAYBACK EXPANSION

- ★ Just plugs into DIL socket of Playback Module
- ★ Wide range of applications
- ★ Up to eight EPROMs capacity
- ★ Binary or octal EPROM selection
- ★ Internal or external selection address latching
- ★ Status lines and READ indicator
- ★ Can be used with 8K, 16K or 32K EPROMs

This module has been developed to extend the versatility of the digital speech record and playback system still further. In many applications it may be required to playback more than one phrase, for instance in a domestic or commercial security and alarm system, with amateur radio for repeated calls signs and messages, or for any kind of annunciator device. The speech is held in EPROMs, previously recorded using the Speech Programmer Module. The Expansion Module itself merely plugs into the DIL EPROM IC socket of the Playback Module, with no further modifications required for the latter. The Expansion board incorporates its own on-board +5V regulator and so does not need to share the Playback Module's supply regulator, with the risk of overloading same. Up to eight EPROMs can be accommodated on the Expansion Module, but they are all required to be of the same type, i.e. all 8K, 16K or 32K capacities and not mixed. As it stands the supply regulator provided will cope with supplying power to all eight EPROMs if these are the low power CMOS 'C' versions, otherwise it is recommended that a larger external heatsink be used for the regulator.

The Playback Module treats the unit as the single device normally plugged into its EPROM socket, but accessed via a transition header. The 'address' is latched while the selected EPROM is being read by the Playback Module to prevent the message being interrupted and/or replaced by another and resulting in 'garbled' speech. Alternatively latching may be under external control and a complimentary pair of READ status lines are provided for use by external logic. A signal LED provides visible indication of a READ activity on the part of the Playback Module, this can be disabled if not required.

Optional Items

The following items, not included in the kit, may also be required.

27C64 EPROM	1-8 off	(UH43W)
27C128 EPROM	1-8 off	(UH95D)
27C256 EPROM	1-8 off	(UH44X)

Kit and Special Parts

A complete kit including cable form is available. The pcb and cable form are also available separately. Full construction details may be found in the Maplin Magazine Issue 35.

PCB dimensions: 203 x 76mm.

MSM6322 SPEECH PITCH CONTROLLER

Features

- ★ Built-in microphone preamplifier
- ★ Built-in low-pass filters
- ★ Speech pitch alterable through 17 steps

Applications

- ★ Voice disguising
- ★ Children's toys
- ★ Stage shows

The SSM6322 is a real time audio pitch controller designed for speech. The IC (only available in surface mount) contains a fourth order low-pass input filter, an 8-bit A to D, and 9-bit D to A converters with a third order low-pass filter output, as well as a microphone preamplifier. Make your voice sound like 'Mickey Mouse' or 'Darth Vader'. The device uses a 4MHz clock, and there is decoupling for both analogue and digital supplies. Gain of the microphone preamp is set to 42dB, whilst the line preamp varies from 0 to 40dB. A supply of 5V, capable of delivering 10mA is needed. Sounds can be created by using the up/down modes and distorting the input signal, producing stunning audio effect.

Note: this is intended as a 'building block' project, and not eligible for our 'Get-you-working' service.

Kit and Special Parts

A complete kit is available and the pcb (size 51 x 51mm) is also available separately. Full construction details may be found in Maplin Magazine Issue 44. A ready assembled version is also available.

Order Code	Type	Price each
LP58N	MSM6322 Kit	£13.99
GE78K	MSM6322 PCB	£1.75
AM21X	MSM6322 Assm	£19.99

FOR TOP QUALITY & VALUE!

DIGITAL SPEECH EPROM PROGRAMMER

3

This project is an extension to the Digital Speech Record and Playback Module which can digitise speech and store it in RAM. The speech can then be replayed. The 32K static RAM supplied with the kit provided a record/play time of 20 seconds, but had the disadvantage of 'total amnesia' once the supply was removed. In applications such as annunciators or alarm systems, it is required that speech be stored permanently. It is the purpose of this project to store speech indefinitely in EPROM. The speech may then be replayed using the Digital Speech Playback-Only Module (see above). The EPROM programmer plugs into the Record and Playback module from which it obtains the necessary speech data.

LM1037 DUAL FOUR CHANNEL ANALOGUE SWITCH

1

An application circuit for the LM1037 dual four channel analogue switch IC, incorporating an internal muting facility. The device is suitable for a wide range of switching applications including multiplexing and stereo source selection. Each channel is selected by one of four control inputs to which a DC voltage is applied. Each control pin selects a different input channel. It is possible to switch an increased number of channels by using two PCB's and connecting the mute inhibit pins together. Note: As this kit and board are intended to be a 'building block' project, they are not eligible for our 'Get-you-working' service.

Kit and Special Parts

A complete kit of parts is available. The high quality PCB is also available separately. Full construction details may be found in the 'Data File' in Maplin Magazine Issue 34. PCB dimensions: 58.4 x 48.3mm.

Order Code	Type	Price each
LP06G	LM1037 Kit	£8.99
GE19V	LM1037 PCB	£2.49

LM1035 DUAL DC OPERATED TONE/VOLUME/BALANCE CONTROL

1

An application circuit for the LM1035 stereo voltage controlled tone, volume and balance control IC, incorporating provision for loudness compensation. Control is achieved by applying a voltage to four separate control inputs. The control voltage may be either externally derived or taken from an internal stabilised reference voltage using a potential divider network.

Printed Circuit Board

A PCB only is available for the LM1035 application circuit. Full construction details may be found in the 'Data File' in Maplin Magazine Issue 33. Note: As this board is intended to be a 'building block' project it is not eligible for our 'Get-you-working' service.

Order Code	Type	Price each
GE18U	LM1035 PCB	£2.65

GENERAL PURPOSE PRE-AMPLIFIER AND MIXER KITS AND MODULES

A range of very high fidelity pre-amp circuits for high quality audio applications. We recommend the use of our 'Low Noise Screened' cable (XR18U) for all interconnections. Most of the following circuits are fully documented in the Mixer Book XL47B.

General Purpose Input Module

2

This input amp is suitable for use with any previously amplified signal or electronic musical instruments, electric guitar etc. and acts as a buffer and level matcher. It is not suitable for very low output microphones, where the Pick-Up/Mic input module should be used. Input signal levels above 275mV can be handled by adding a 220kΩ potentiometer (not supplied with kit or module) to the input which provides continuously variable attenuation down to nearly 0V. Available as mono or stereo in kit form or as ready built modules.

Specification

Input impedance	100kΩ (>60kΩ with pot)
Max input signal	275mV r.m.s. (777mV peak)
Max output signal (pre-clipping)	2.2V r.m.s. (6.2V peak)
I/P Signal for 450mV O/P	55mV r.m.s. (155mV peak)
Frequency response	20Hz - 200kHz (-3dB)
Distortion	0.025%
Noise	75µV (-80dB)
PSU	+30V DC @ 25mA, both versions
Dimensions of pcb:	Mono 100 x 40mm. Stereo 100 x 70mm.

Order Code	Type	Price each
LK81C	Gen Prp I/P mono Kit	£4.75
LK82D	Gen Purp I/P Str Kit	£8.49
YM15R	Gen Prp I/P mono Ass	£8.99
YM16S	Gen Purp I/P Str Ass	£13.99
LR15R	HQ Mixer PCB No.4	£2.65
LR34M	HQ Mixer PCB No.24	£4.75

Cartridge or High Impedance Microphone Module

2

This module is available in either mono (single channel) or stereo (dual channel) versions; the circuit diagram shown in Issue 18 is for the left hand channel only of the stereo version, but the circuit is common to mono and stereo. This input amp is suitable for use with magnetic and high impedance ceramic cartridges, and high impedance microphones. Both versions available as a kit or as a ready built module. Negative feedback networks are provided on the board for either high impedance or electret microphone, magnetic pick-up or ceramic cartridge, any of which may be hard-wired with links or switch selected.

Specifications

	Mic	Magnetic PU	Ceramic PU
Input impedance	56kΩ	56kΩ	200kΩ
Input signal level	25mV	5.5mV	100mV
Max output before clipping	7.75V rms (22V Pk)		
Total harmonic distortion	Better than 0.2%		
Frequency response	Flat (-3dB @ 40kHz) to RIAA ±1dB		
Signal to noise ratio	Better than 90dB		
PSU Max, 30V DC @ 12mA (stereo) @ 6mA (mono)			
Dimensions of pcb:	Mono 100 x 40mm. Stereo 100 x 70mm.		

Order Code	Type	Price each
LK91Y	Hi-Z Mic Stereo Kit	£10.99
LK92A	Hi-Z Mic (Mono) Kit	£5.75
YM25C	Mic I/P Stereo Assem	£17.99
YM26D	Hi-Z Mic Mono Assem	£10.99
GD11M	Hi-Z Mic (Mono) PCB	£1.99
LR13P	HQ Mixer PCB No.2	£3.49

Low Impedance Microphone Module

2

This input amp is suitable for use with balanced and unbalanced low impedance microphones in the range 200Ω to 600Ω, where extremely high quality and low noise are the criteria. Signal gain is pre-settable to system requirements. The module is available in mono form only, and includes its own special screening case. Available as a kit or a ready built module.

TOP QUALITY PRODUCTS AT SUPER LOW PRICES!

Fax your orders to:
01702 553935

Specifications

Input Impedance	600Ω balanced (300 - 0 - 300Ω)
Typical Signal Levels	1.25V out for 1mV in
Maximum Output Level	2V r.m.s. (5.6V Pk)
Gain	30 to 50dB Variable
Signal to Noise ratio	80dB
Distortion	0.02% @ 1kHz
Frequency response	50Hz to 30kHz (-1dB)
Power supply, 9V @ 3mA	
Dimensions, 90 x 35 x 31mm.	

Order Code	Type	Price each
LK80B	Low Z Mic Preamp Kit	£17.99
YM14Q	Low Z Mic Preamp Assm	£22.99
GD34M	Lo-z Mic Preamp PCB	£2.99
FD20W	Lo-z Mic Preamp Case	£3.49

Mixer Amp Module

Any number of input circuits may be connected each via its own 22k resistor to the input of this circuit, which uses the 'virtual earth' mixing technique. Unit gain is approximately x3. Supply regulation is included on the board. The output can be fed to a power amplifier, tape recorder etc., or, if a master volume control is required, connect the output across a 10k log pot and connect the slider to the input of a line amp or filter module. The circuit diagram shown in Issue 18 is for one channel, but the mixer amp is available as a stereo pair only, either in kit form or as a ready built module. No 22kΩ input resistors are provided with kit or module.

Specification

Frequency response	15Hz to 60kHz -3dB
Maximum input signal	5V peak to peak into 22kΩ
Maximum output signal	15V peak to peak (pre-clipping)
Distortion	0.02% @ 1kHz
Noise level	100µV
PSU 30V DC @ 14mA	

Order Code	Type	Price each
LK86T	Mixer Amp Kit	£7.49
YM20W	Mixer Amp Assembled	£12.99
LR22Y	HQ Mixer PCB No.7	£3.49

Line Amp Module

A high level buffer stage and output driver with a maximum gain of 20dB (=x10); a preset is included for any gain below this down to $-unity$. The output of a mixer amp or fader unit may be connected to this module, which then outputs to a power amplifier or tape recorder etc. The module has a specifically low output impedance ideal for driving into long signal

leads or multiple inputs. The circuit diagram shown in The Mixer Book is for one channel, but the module comprises two identical circuits for stereo. This circuit is not suitable for low level inputs from pick-up or microphone etc. Available in kit form or as a ready built module.

Specification

Frequency response	10Hz to 100kHz flat
Maximum output level	26V peak to peak (pre-clipping)
Minimum input signal level for full output	2.6V peak to peak
Maximum input level	Continuously variable
Gain	20dB or x10
Distortion	0.02% THD
PSU 30V DC @ 14mA.	
Dimensions of pcb: 85 x 60mm.	

Order Code	Type	Price each
LK87U	Line Amp Kit	£6.49
YM21X	Line Amp Assembled	£10.99
LR23A	HQ Mixer PCB No.8	£2.99

Peak Overload Detector Module

The peak detector is a simple comparator circuit with a variable triggering threshold, which can be set to light the LED indicator on input signals between 0.28 to 1.27 V peak. It has two mixer inputs for mono or stereo use, and serves as a signal overload indicator, giving warning of a signal level approaching the onset of clipping and distortion. Available as a kit or a ready built module, neither of which include the LED.

Specification

Input frequency range	1Hz to 10kHz (@ 450mV)
Min input level	6mV r.m.s.
Adjustable to	450mV r.m.s. @ 1kHz
PSU 30V DC @ 12mA; including LED.	
Dimensions of pcb: 50 x 50mm.	

Order Code	Type	Price each
LK85G	Peak Overload Kit	£3.75
YM19V	Peak Overload Assbld	£6.99
LR21X	HQ Mixer PCB No.6	£2.25

Tone Control Module

This circuit may be connected directly to the output of any of the input circuits shown here, and the volume control should then be connected across the output of this circuit. A maximum input signal of 450mV is recommended to extract the maximum signal to noise ratio, and this allows full boost to be applied without distorting the waveform, approaching 11.5V peak-to-peak before clipping occurs. Note that the output is AC coupled but has no earth leakage resistor, so if balance volume controls are not fitted here then a 'pull-down' resistor (4-7kΩ to 10kΩ) should be connected between output and 0V. Available in mono or stereo in kit form or as ready built modules. 470kΩ bass and 100kΩ linear tone control pots are not supplied with the kit or module.

Specification

Bass control	±18dB @ 20Hz
Treble control	±16dB @ 10kHz
Frequency response (Flat)	10Hz to 40kHz
Input signal level	450mV r.m.s.
Output signal level, controls set 'flat'	500mV r.m.s.
Max pre-clipping output	4V r.m.s.
Distortion (@ 1kHz)	0.05% THD
Noise level	150µV (-74dB)
PSU 30V DC @ 2.0mA stereo, 1mA mono.	
Dimensions of pcb: Mono 70 x 70mm. Stereo 105 x 70mm.	

Order Code	Type	Price each
LK83E	Tone Cntrl mono Kit	£4.75
LK84F	Tone Cntrl Stero Kit	£8.49
YM17T	Tone Cntrl mono Ass	£8.99
YM18U	Tone Cntrl Stero Ass	£13.99
LR16S	HQ Mixer PCB No.5	£2.25
LR35Q	HQ Mixer PCB No.25	£3.25

VU Meter and Headphone Monitor

A common pcb is used for one of two modules for either driving twin VU meter movements, or a pair of stereo headphones but not both simultaneously. If both VU and monitor are required, then one of each kit/module will be needed, both connected at the same signal source. Each channel input can be adjusted for

Continued from previous page.

the required output level using 'on board' presets. Such a module would normally be used for monitoring pre-amp output signal lines in a mixer, hi-fi or disco etc. system, each line being selected by suitable switching. Alternatively it could be used as a low power, low cost stereo headphone driver for most audio applications. Note that component changes may be necessary if intending to use the monitor to drive headphones with an impedance much greater than 16Ω. The input sensitivity is continuously variable down to ∞unity. Note that the VU meters are not supplied with the VU meter kit/module, but can be selected to suit constructor's front panel style. The specifications quoted below are for the VU module when used with the dual VU meter YQ47B. Additional test gear may be required if it is desired that the output be a true representation of the decibel scale during setting up. Available in stereo only.

Specification

Basic frequency response	50Hz to 20kHz flat
Min input sensitivity, monitor	75mV
Min input sensitivity, VU driver	18mV for 0dB on scale
Max output level, monitor	10V peak to peak unloaded, 150mV into 8-16Ω

PSU Max +30V DC @ 40mA

Dimensions of pcb: 100 x 70mm.

Order Code	Type	Price each
LK88V	VU Meter Kit	£14.99
LK89W	Headphone Monitr Kit	£11.49
YM22Y	VU Circuit Assembled	£19.99

MICROSONIC AUDIO BOOSTER

- ★ Audio AGC system
- ★ Fast attack
- ★ Battery state indicator
- ★ Minimal wiring

There are several commercially made hearing boosters currently available, but the majority are only simple headphone amplifiers. Because of this the volume control has to be constantly adjusted to suit the audio environment. The Microsonic Audio Booster has a distinct advantage in that it incorporates a Voice Operated Gain Adjustment Device (VOGAD). It is designed to accept small signals from a microphone and provide an essentially constant output signal from an input covering a range of 50dB. In real terms this means that once set to a comfortable listening level, the volume control seldom requires re-adjusting. The Microsonic requires a PP3 battery to operate. The voltage condition of the battery is continuously monitored and displayed by a red LED indicator.

Specification

Power supply voltage:	+4.5V to +9V DC
Power supply current:	100mA (+9V Supply, Max Volume)
Low battery indicator:	+6V Threshold
Microphone:	Electret
Preamp gain:	52dB
Output impedance:	16Ω (Minimum)
Output power:	200mW
Frequency bandwidth:	300Hz to 3kHz (-3dB)

Optional Items

The following items, not included in the kit, may also be required.

Alkaline Battery	1	(FK67X)
Mini Phones	1	(ZB91Y)

Kit and Special Parts

A complete kit of parts (including the PCB, front panel and instruction leaflet) is available (excluding optional items). The PCB and front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 55.

Order Code	Type	Price each
LP52G	Microsonic Pre-Amp	£17.99
GH12N	Microsonic PCB	£2.49
CP47B	Microsonic F/Panel	£1.20

PLAY ALONG MIXER

One way of improving one's skill on an electronic instrument is to play along to a record or tape. This is becoming an increasingly popular practice method and can be done with no special equipment. A hi-fi or record player provides the programme and a practice amp or combo is used to output the instrument. More realistic and better results can be achieved however if the two signals are mixed such that the total sound originates from the same audio system. The Play Along Mixer combines the output from the instrument with the record or tape programme, and outputs this to the stereo. Separate level controls for each source are provided, together with a panning control so that the instrument can be blended into the stereo image in a very realistic manner. Connection into the system is simple using standard 1/4 in. jack plugs for the stereo and a mono 3.5mm input for the instrument. Uses one 9V battery (PP6).

Kit and Special Parts

A complete kit of all parts, but not including battery. The pcb is also available separately. Full construction details may be found in the Best of Maplin Projects Book 5.

PCB dimensions: 113 x 51mm.

LK93B	Play Along Mixer Kit	£19.99
GD10L	Play Along Mixer PCB	£2.65

STEREO DYNAMIC NOISE REDUCTION MODULE SM666

A Soundmaster Kit

The SM666 Dynamic Noise Reduction System is designed to reduce noise from cassette tape, long play records and weak FM radio reception. The heart of the system is the LM1894 Dynamic Noise Reduction (DNR) IC, which employs voltage controlled active filters offering attenuation of unwanted noise over a range of 10dB. The system does not encode recordings or require source material to be encoded (as with Dolby like systems), and is a 'playback only' processor operating with any music source including Dolby B encoded tapes.

The module operates from a single 9 to 12V DC

FOR TOP QUALITY & VALUE!

Power Supply Module

A dual output, continuously voltage variable power supply regulator module capable of supplying up to 300mA each output simultaneously, or 500mA one single output only. Presets are provided on the board for setting any output voltage from 1.5V to 30V DC. Short-circuit protection is built into the regulator IC's. The module uses a toroidal transformer to maintain a low level hum field. With an 80dB-ripple rejection the module is suitable for use with all of the above pre-amplifier/mixer modules. It can also find applications as a general purpose PSU for other uses, and the presets may be replaced with potentiometers to form a basic, voltage variable bench power supply. Dimensions of pcb: 169 x 91mm.

Order Code	Type	Price each
LK90X	B1 Mixer PSU Kit	£22.49
YM24B	A1 Mixer PSU Assembled	£27.99
GD25C	Mixer PSU PCB	£3.65

supply at 25mA average. It is provided with two pairs of line input phono sockets which can be selected via a push-button switch as 'Line 1' or 'Line 2'. Output is via a stereo pair of phono sockets, and the DNR function can be bypassed or switched out of operation by a second push-button switch. In this mode the selected input is connected directly to the output.

Specification

Supply voltage range:	9 to 12V DC
Average supply current:	20mA max.
Max. allowable input signal:	3.5V r.m.s. @ 1kHz
Min. input signal for flat frequency response:	300mV
Input impedance:	20kΩ
Noise reduction:	-10dB @ 20kHz -5dB @ 5kHz -4dB @ 1kHz

Total harmonic distortion, 300mV input for full bandwidth of 20kHz: <0.04%

The module can be used as part of a music or hi-fi system and can reduce surface noise from records and noisy tape recordings not made with a Dolby like noise reduction process. As it stands the module offers noise reduction with a performance comparable to Dolby B.

A review of this kit can be found in the Maplin Magazine issue 40. It also describes simple modifications that can be performed on the basic kit to improve the performance of the system.

Kit

The DNR module is only available as a complete kit. No individual parts such as the PCB and the IC are available separately.

A ready assembled version is also available.

Order Code	Type	Price each
LP21X	DNR Filter	£12.99
AM06G	DNR Filter Assm	£18.99

HI-FI LOUDSPEAKER PROJECTS

3

By choosing any one of these three designs you will benefit from the superb reproduction quality of driver units chosen from our range of loud speakers from a well known French manufacturer. In purchasing any of these kits you will need to supply and assemble the majority of the chip-board cabinet as only the front baffle and tuning duct is supplied with the kit. Full details on how to do this are supplied with the kit. Three versions are available.

Specification

23-litre Enclosure

23-litre tuned bass reflex with ferro-fluid, horn loaded dome-tweeter.	
Cross-over:	2.7kHz (modified)
Power rating:	50W peak, 25W r.m.s.
Maximum signal:	40V peak, 14.2V r.m.s.
Frequency response:	(+4dB @ 60Hz)
Impedance:	8Ω
Approx. dimensions of cabinet:	42cm high x 32.8cm wide x 22.8cm deep

20-litre Enclosure

20-litre bass, high frequency ferro-fluid wide dispersion dome tweeter and passive river.	
Cross-over:	2.5kHz (modified)
Power rating:	60W peak, 25W r.m.s.
Frequency response:	40Hz to 15kHz
Impedance:	8Ω
Approx. dimensions of cabinet:	53cm high x 26cm wide x 21cm deep

16-litre Enclosure

16-litre bass, horn loaded ferro-fluid dome tweeter.	
Cross-over:	not used
Power rating:	40W peak, 30W r.m.s.
Frequency response:	40Hz to 18kHz
Impedance:	8Ω
Approx. dimensions of cabinet:	44cm high x 21cm wide x 25cm deep

All the cabinets are made from panels of high density chipboard, either 19mm or 15mm thick. Prepared lengths of 15mm or 25mm square softwood will also be required. Only the baffle panels are included in the kits. Full details of the cutting list will be found in the construction details.

Optional Items

The following items are not included in any of the kits but may be required for assembling the projects.	
Impact Adhesive	(FL43W)
Rubber Sealer	(YJ91Y)
Lever Terminal 2-way	(BW72P)
Hi-Fi Loudspeaker Cable	(XR72P)

Special Parts

A kit for each enclosure is available, comprising baffle panel, tuning duct, crossover module where required, duct as required, and all driver units. Additional woodwork to complete the enclosures is not included. Full construction details may be found in the Maplin Projects Book 22 (23 litre version), Maplin Magazine Issue 27 (20 litre version) and 28 (16 litre version).

Order Code	Type	Price each
LM21X	F9 23 Litre Cabinet Kit	£41.99
LM54J	E8 3way 20litre Cab Kit	£57.99
LM59P	C6 2W16L Kit	£34.99

HIGH POWER LOUDSPEAKER CABINET

A very high quality, superb sounding, high power loudspeaker system (2 way 70 litre). The most common size of loudspeaker that is practical for use in disco's, stage and PA applications is the 12 inch model. On its own, the high frequency response is

limited to approximately 5 to 6kHz on single cone versions and although this may be suitable for bass and lead guitar work the response is too low for most music applications. To extend the high frequency performance to 20kHz or more it becomes necessary to add an HF driver unit to the system and mount the speakers together in a cabinet. At the low frequency end, performance is very much determined by both the design of the 12 inch speaker and the cabinet into which it is mounted. This design for a 2 way 70 litre cabinet offers the choice of using a number of different 12 inch loudspeakers. To tailor the overall response to suit the application and speakers used, the dimensions of the tuned port are altered.

Optional Items

The following items are not included in the kit but may also be required.

Large Rubber Foot	4 off	(FP02C)
Castors (pair)	2 off	(FX96E)
Recess Handle (side)	2 off	(LH08J)
Spkr 12in 50W GP 8R	1 off	(XG47B)
Spkr 12in 50W GP 16R	1 off	(XG48C)

4 WAY SPEAKER SWITCH

- ★ Din Sockets
- ★ Stereo Interlocked Switches
- ★ Fuse Protection on both Channels
- ★ High Quality Metal Case & Fibre Glass PCB

This four way speaker switch can be used with domestic hi-fi's with output power not exceeding 45W. The unit can be used to compare between differing sets of speakers, or to direct the output of your hi-fi to another room in the house.

Optional Items

The following items are not included in the kit, but may also be required.

Fuse 20mm 2A	As req	(WR05F)
DIN L/S Plug	As req	(HH24B)
Slidrs 2-pin DIN Plug	As req	(FM42V)
Slim DIN L/S Plug	As req	(FP13P)
Dinpak M	As req	(RW25C)
Dinpak P	As req	(RW27E)
Dinpak 262	As req	(RW44X)
Dinpak 273	As req	(RW45Y)
Dinpak 275	As req	(RW47B)
Zip Wire	As req	(XR39N)

Continued on next page.

Continued from previous page.

HD Loudspeaker cable As req (XR60Q)
Hi-Fi Loudspeaker cable As req (XR72P)

Kit and Special Parts

A complete kit of parts, excluding optional items is available. The following items are also available separately, a pre-drilled and printed case, and a high quality fibre-glass PCB. Full construction details may be found in Maplin Magazine Issue 30. PCB dimensions: 203.2 x 50.8mm.

Order Code	Type	Price each
LM77J	C1 4W Spkr Switch Kit	£33.99
YT63T	A1 4W Spkr Switch Box	£22.99
GD92A	4W Speaker PCB	£4.25

VELLEMAN AUDIO PROJECTS

K4020 300W STEREO/600W MONO MOSFET AMPLIFIER

Features

- ★ High power
- ★ Low distortion
- ★ Highly efficient
- ★ Comprehensive protection circuitry

Applications

- ★ Hi-fi systems
- ★ Disco applications
- ★ Laboratories
- ★ Studio monitoring

Two 300W mono MOSFET amplifier modules (Velleman Kit K4010) can be combined into a superb 300W stereo version, or a bridged 600W mono amplifier. A very special circuit design ensures the output stage always produces a Class A configuration, without loss of unnecessary power. The amplifier requires no adjustment and features speaker switch-on delay and protection, as well as thermal and short-circuit protection. The kit includes transformer, housing and all necessary heatsinks. An optional LED power meter K4021 is available separately.

Specification

Power output per channel	
Music power:	300W into 4Ω, 200W into 8Ω (600W bridged operation)
rms power:	150W into 4Ω, 100W into 8Ω (300W bridged operation)
Power output bridged	
Music power:	600W
rms power:	300W into 8Ω
Harmonic distortion:	0.008% @ 1W 1kHz, 0.04% @ 90W 1kHz
Damping factor:	>300
Input impedance:	47kΩ
Input sensitivity:	1V rms
Frequency response:	3Hz to 120kHz (-3dB)
Power bandwidth:	5Hz to 50kHz (-1dB)
Signal-to-noise ratio:	112dB (A-weighted at full power)
Protection:	Thermal, DC and short circuit
Speaker switch-on delay:	2 seconds
Speaker DC protection	
trip voltage:	±1V
Thermal protection	
trip temperature:	90°C
Efficiency:	>70%
Power consumption:	440W maximum
Dimensions:	427 x 95 x 382mm (including connectors and feet)

Additional Component Parts List for Kit

Zip Wire	30cm	(XR39N)
Solder Tag M3	1	(LR64U)
Spade Terminal	4	(HF10L)
Spade Terminal Cover	4	(FE65V)
Fuse 20mm 5A	1	(RA12N)
Heatshrink Sleeving CP32	5cm	(BF88V)
Wire 32/0.2 Green/Yellow	5cm	(XR38R)
Double Bubble Epoxy Glue	1	(FL45Y)

Optional Items

The following items, not included in the kit, may also be required.

Nylon Mains Plug 13A	1	(RW67X)
Fuse 5A	1	(HQ33L)
IEC Mains Lead	1	(BW99H)
Insulating Boot for Fuseholder	1	(FT35Q)
Insulating Cover for Mains Connector	1	(JK66W)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 71.

VF17T	H29 Velleman Kit K4020	£299.99

K4021 POWER METER FOR 300W/600W MOSFET AMPLIFIERS

Features

- ★ 12-LED display
- ★ LED scale illumination
- ★ Wide range of power indication

Applications

- ★ 300W/600W MOSFET amplifier
- ★ Power monitoring for your own amplifier
- ★ In-car audio
- ★ Disco equipment

These power meters are designed to give a visual representation of the output power from amplifiers built around the 300W MOSFET amplifier modules (Velleman Kit K4010). A visual indication of the instantaneous power output of your amplifier is useful in that you can 'see' if you are about to exceed the loudspeakers, maximum input power level, or by running the amplifier into clipping, which can easily damage the tweeters.

Two boards, one board for each channel, are mounted vertically to provide a professional visual display of power output for each channel. If the amplifiers are bridged, the meters are mounted horizontally and connected in series. Each board uses 12 LEDs to indicate the power out, and 16 LEDs for scale illumination. The scales can be 0.001W to 100W/8Ω or 0.002W to 200W/4Ω (mounted vertically) or 0.001W to 400W/8Ω (mounted horizontally, divided over 24 LEDs) for bridged mono. The boards require ±40V DC that is supplied by the amplifier.

Specification

Number of LEDs (power indication):	12
Number of LEDs (scale illumination):	16
Power supply (from amplifier module):	±40V DC at 60mA (maximum)
PCB size:	72 x 78mm

Scale (8Ω load, 300W):	0.001W, 0.005W, 0.01W, 0.05W, 0.1W, 0.5W, 1W, 5W, 10W, 50W, 75W, 100W
Scale (4Ω load, 300W):	0.002W, 0.01W, 0.02W, 0.1W, 0.2W, 1W, 2W, 10W, 20W, 100W, 150W, 200W
Scale (8Ω load, 600W bridge mode):	0.001W, 0.002W, 0.005W, 0.01W, 0.02W, 0.05W, 0.1W, 0.2W, 0.5W, 1W, 2W, 5W, 10W, 15W, 20W, 40W, 60W, 80W, 100W, 150W, 200W, 250W, 300W, 400W

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 72.

K4005 400W MONO/STEREO AMPLIFIER

Universal, solid and compact stereo amplifier for use as a built-in module or free-standing in an enclosure. This powerful amplifier, having a total music power of 400W, can be arranged as a stereo amplifier with 2 x 100W rms (4Ω) or 2 x 75W rms (8Ω) outputs, or as a mono amplifier with an output of 200W rms. The amplifier is protected against overload, short circuit, incorrect polarity and thermal overload. Includes heatsink.

Specification

Output power:	400W music power 2 x 100W rms into 4Ω or 2 x 75W rms into 8Ω
Mono-bridged power:	200W rms into 8Ω
Harmonic distortion:	0.003% at 1kHz
Signal to noise ratio:	96dB
Input impedance:	22kΩ
Input sensitivity:	150mV, 500mV, or 950mV switchable
Damping factor:	>2000 at 100Hz
Power supply:	±28V DC
Power supply	
- 2 x 4Ω:	±30V to 35V DC 5A max
- mono bridge:	±30V to 35V DC 5A max
- 2 x 8Ω:	±40V to 45V DC 2.5A max
Dimensions:	350 x 85 x 62mm

Order Code	Type	Price each
VF40T	H10 Velleman Kit K4005	£59.99

K4000 STEREO VALVE AMPLIFIER

- 95W in class A/B1
- 2 x 200W music power
- 10 valves on view
- Chrome covers for power supply and amplifiers
- 4Ω and 8Ω loudspeaker terminations

SUPERB QUALITY!
£599.95
 VE99H
 [H42]

Most of us cannot afford a ready-built high power valve amplifier, but this kit changes all that, so that anyone can enjoy the superb valve sound. To many people, the sound of valves can not be surpassed either by bipolar transistors or FETs. In developing this amplifier, special attention was paid to the housing. Indeed, it was decided to not hide the expensive valves, so that your eyes can have something to enjoy. Four EL34s are used in each channel to generate the high power output. Very high quality toroidal core ultra-linear output transformers are employed to provide outstanding sound quality.

Kit and Special Parts

A complete kit of parts (including the PCB) is available. Full construction details may be found in Maplin Magazine Issues 51/52.

Specification

Output power:	2 x 200W music power 2 x 95W rms in class AB 2 x 15W in class A	S/N ratio:	102dB (A-weighted) at 95W
Output impedance:	4Ω or 8Ω	Channel separation:	67dB at 95W
Power bandwidth:	10Hz to 60kHz (-3dB at max. output)	Input impedance:	100kΩ
Frequency band:	4Hz to 100kHz (-3dB ref. 1W)	Input sensitivity:	0dB (0.775mV rms) for 95W
Harmonic distortion:	0.08% (1kHz/1W) 0.63% (1kHz/max. output power)	Damping factor:	25
		Overall feedback:	18dB
		Weight:	20kg
		Dimensions:	425 x 130 x 350mm

K4010 300W MONO MOSFET AMPLIFIER

Features

- ★ High power
- ★ Low distortion
- ★ Highly efficient
- ★ Comprehensive protection circuitry

Applications

- ★ Hi-Fi systems
- ★ Disco applications
- ★ Laboratories
- ★ Studio monitoring

Some audio applications demand high power levels, such as disco equipment, public address systems, laboratory experiments, and very large living rooms! This amplifier, an 'efficient' Class A design, will provide 300W music power into 4Ω. The amplifier gets around the inefficiency problem by a clever design which incorporates the use of a 'dynamic' (sometimes known as sliding) biasing technique. As a result, it has an efficiency of more than 70%, which is more in keeping with its Class B and AB cousins, but without the problem of crossover distortion.

This amplifier is the mono version of K4020 but without the casing.

Ideally suited for use in disco sound installations, PAs and active speaker systems. Two of these amplifiers, can be combined, both physically and electrically, into a 300W per channel stereo amplifier, or a 600W mono bridge amplifier (Velleman Kit K4020 VF17T).

Specification

Music power:	300W into 4Ω, 200W into 8Ω
rms power:	150W into 4Ω, 100W into 8Ω
Harmonic distortion:	0.008% at 1W 1kHz, 0.04% at 90W 1kHz
Damping factor:	>300
Input impedance:	47kΩ
Input sensitivity:	1V rms
Frequency response:	3Hz to 120kHz (-3dB)
Power bandwidth:	5Hz to 50kHz (-1dB)
Signal-to-noise ratio:	112dB (A-weighted at full power)
Protection:	Thermal, DC and short circuit
Speaker switch-on delay:	2 seconds
Speaker DC protection trip voltage:	>±1V
Thermal protection trip temperature:	90°C
Efficiency:	>70%
Power consumption:	220W maximum
Dimensions:	350 x 140 x 90mm (without transformer)

Optional Items

The following items, not included in the kit, may also be required.

Nylon Mains Plug 13A	1	(RW67X)
Fuse 5A	1	(HQ33L)
Insulating Boot for Fuseholder	1	(FT35Q)
Heatshrink Sleeving	As Req	
Heat Transfer Compound	1 Syringe	(FL79L)
Double Pole Mains Switch	As Req	
Panel Mounting Fuseholder	As Req	
AA Battery Box	1	(YR59P)
AA Zinc Carbon	1	(FK55K)
3-Core 6A Mains Cable	As Req	(XR03D)

K4004 200W MONO/STEREO AMPLIFIER

Universal, solid and compact stereo amplifier for use as a built-in module or free-standing in an enclosure. This powerful amplifier, having a total music power of 200W, can be arranged as a stereo amplifier with 2 x 50W rms (4Ω) or 2 x 40W rms (8Ω) outputs, or as a mono amplifier with an output of 100W rms. The amplifier is protected against overload, short circuit, incorrect polarity and thermal overload. Includes heatsink.

Specification	
Output power:	200W music power 2 x 50W rms into 4Ω or 2 x 40W rms into 8Ω
Mono-bridged power:	100W rms into 8Ω
Harmonic distortion:	0.01% at 1kHz
Signal to noise ratio:	102dB (A-weighted)
Stereo channel separation:	85dB
Input impedance:	22kΩ
Input sensitivity:	300mV, 550mV, or 1V switchable
Damping factor:	>1000 at 100Hz
Power supply:	±28V DC
Power consumption	
- 2 x 4Ω:	4A max.
- mono bridge:	4A max.
- 2 x 8Ω:	2.5A max.
Dimensions:	210 x 84 x 64mm

GOLD-LINE AMPLIFIERS AND POWER SUPPLIES

AMP200 400W MONO/STEREO

NEW!

A compact, high quality universal amplifier, that can be configured as a 100W/channel stereo amplifier or a 200W mono amplifier. The amplifier has three possible input sensitivities, overload and short-circuit protection, thermal protection, protection against wrong

connection to the power supply, and speaker 'pop' protection. The heatsink is an integral part of the casing and results in a compact well engineered amplifier, that can be used in a high quality in-car system or a domestic hi-fi system. The amplifier has extremely low distortion and a very high damping factor. Power supply module SPS200 is designed for use with the amplifiers for in-car systems.

Specification

Output power	
stereo:	100W/channel into 4Ω 75W/channel into 8Ω
mono:	200W into 8Ω
Total music power:	400W
THD	0.003% at 1kHz
S/N ratio:	96dB A-weighted
Stereo channel separation:	76dB
Damping factor:	>2000 at 100Hz
Input sensitivity:	150mV, 500mV or 950mV
Supply voltage	
for 8Ω:	±(40 to 45)V DC at 2.5A
for 4Ω or mono:	±(30 to 35)V DC at 5A
Dimensions:	350 x 62 x 85mm

Order Code	Type	Price each
VF45Y	C4 Velleman Kit AMP200	£109.99

AMP100 200W MONO/STEREO

A compact, high quality universal amplifier, that can be configured as a 50W/channel stereo amplifier or a 100W mono amplifier. The amplifier has three possible input sensitivities, overload and short-circuit protection, thermal protection, protection against wrong connection to the power supply, and speaker 'pop' protection. The heatsink is an integral part of the casing and results in a compact well engineered amplifier, that can be used in a high quality in-car system or a domestic hi-fi system. The amplifier has extremely low distortion and a very high damping factor.

Specification

Output power	
stereo:	50W/channel into 4Ω 40W/channel into 8Ω
mono:	100W into 8Ω
Total music power:	200W
THD	0.01% at 1kHz
S/N ratio:	102dB A-weighted
Stereo channel separation:	85dB
Damping factor:	>1000 at 100Hz
Input sensitivity:	300mV, 550mV or 1V
Supply voltage	
for 8Ω:	±28V DC at 2.5A
for 4Ω or mono:	±28V DC at 5A
Dimensions:	210 x 64 x 85mm

Order Code	Type	Price each
VF46A	B3 Velleman Kit AMP100	£79.99

SPS200 CAR POWER SUPPLY MODULE

Designed for use with the AMP200 amplifier module (VF45Y) for in-car systems. One main advantage of a separate supply module is that thick connecting cables to the battery can be kept very short, reducing power loss to a minimum. The amplifier module can be mounted as close as possible to the loudspeaker, so maintaining the excellent damping, for superb bass reproduction. To avoid interference the 0V rail is separate from the car chassis. See 'Cables' section for suitable connecting cables and 'Entertainment and Leisure' for connectors.

Specification

Input voltage:	10V to 15V DC at 30A max.
Output voltage:	±35V
Maximum output power:	300W
Efficiency:	90% max
Dimensions:	210 x 84 x 50mm

K4003 30W STEREO AMPLIFIER

A small stereo amplifier based round the TDA1521 IC providing 15W rms/channel into 4Ω. The IC is thermally and short-circuit protected and includes suppression during switch on/off. Requires a suitable AC power rail.

Specification

Output power rms into 4Ω:	15W/channel
into 8Ω:	10W/channel
Peak music power:	30W/channel into 4Ω
THD at 1W (1kHz):	0.07%
Channel separation:	70dB
S/N:	98dB A-weighted
Input sensitivity:	300mV/150kΩ
Supply voltage:	2 x 12V AC at 2A (stock code YK15R)

Order Code	Type	Price each
VF53H	Velleman Kit K4003	£19.99

K4900 TELEPHONE AMPLIFIER

This telephone amplifier can be used either as an independent amplifier with loudspeaker, for instance to follow a telephone conversation, or one can connect its output to a tape recorder or a mixing panel. This module can be built into the Velleman modular mixing panel.

PROHIBITED from direct or indirect connection to public telecommunication systems. Action may be taken against anyone so connecting this apparatus.

★ ★ ★

Input:	Isolation transformer coupling.
Output:	Loudspeaker 0.5W/8Ω.
Line:	0dB (0.775V rms).
Power supply:	12V DC max. 150mA.

For building it into the mixing panel, it is possible to connect the module to 15V as well.

Order Code	Type	Price each
VE26D	Velleman Kit K4900	£9.99

K2573 STEREO RIAA CORRECTION AMPLIFIER

RIAA stereo low noise preamplifier for moving magnet pick-ups. Power supply: 10 to 30V DC, regulated. Amplification (1kHz): 35dB. Input signal: 5 to 10mV.

Order Code	Type	Price each
VE23A	Velleman Kit K2573	£7.99

K1803 UNIVERSAL MONO PREAMPLIFIER

Ideally suited as: microphone amplifier – signal matching of tuner or tape outputs, etc. Gain: typ. 40dB. Adjustable output level. Frequency range: 20Hz to 20kHz (±3dB). Max. input signal: 40mV. Power supply: 10 to 30V DC, regulated.

Order Code	Type	Price each
VE21X	Velleman Kit K1803	£5.49

K2572 UNIVERSAL STEREO PREAMPLIFIER

VE22Y	Velleman Kit K2572	£7.99

K2637 SUPER MINI MONO 2.5W AUDIO AMPLIFIER

Small board complete with both pre- and power amplifier. No adjustment required. Short circuit protected. Power supply: 4.5 to 15V DC. Input sensitivity: power amplifier 150mV (12V). Pre-amplifier: 20mV (12V). Max. output power: 2.5W (4Ω, 12V). Dimensions: 42 x 32 x 27mm.

Order Code	Type	Price each
VE12N	Velleman Kit K2637	£7.99

K4100 DIGITAL CONTROLLED PREAMPLIFIER

- ★ Inputs for phono, CD, tuner, and two cassette decks
- ★ Graphic equaliser loop
- ★ LED display of all settings
- ★ Full digital control of all functions
- ★ Switched mains output
- ★ Operational IR remote control

A superb digital preamplifier designed to complement the K4000 Valve Amplifier and the K4020, K4005, K4010 and K4004 high powered MOSFET amplifiers, but equally suited to any high quality amplifier. Digital control eliminates the need for conventional potentiometers, all functions being selected and operated by front panel mounted push-buttons. The K4101 I/R transmitter, which is available separately, is used to remotely control the functions. The preamplifier offers a phono input which is suitable for moving magnet or high output moving coil cartridges. Other inputs include CD and tuner, plus two tape monitor loops and a graphic equaliser loop. A switched mains output allows the rest of the installation to be switched on and off, and the power-up default setting can be programmed to individual requirements.

Specification

Input sensitivity/impedance	
Phono:	5.5mV/50kΩ
CD:	500mV/32kΩ
Tuner:	360mV/22kΩ
Tape 1 & 2:	360mV/22kΩ
Rated output voltage	
Line:	1V
Tape:	360mV
Equaliser:	180mV
S/N ratio	
Phono:	75dB (A-weighted, rated output)
Tape/CD/Tuner:	100dB (A-weighted, rated output)
THD:	0.01%
Frequency response(-3dB):	8Hz to 150kHz
Channel separation:	90dB
Crosstalk:	-98dB
RIAA deviation:	±0.5dB (20Hz to 20kHz)
Headphone output:	280mW into 32Ω
Power consumption:	6W maximum
Mains output:	5A switched
Dimensions:	420 x 50 x 350mm
Weight:	5kg

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The optional infra-red remote control is also available separately. Full construction details may be found in Maplin Magazine Issue 52.

Order Code	Type	Price each
VE46A	H15 Velleman Kit K4100	£199.99

VELLEMAN EQUALISER SYSTEM

3

A high quality equaliser system comprising the following kits:

K4300: Spectrum analyser display.
K4301: Pink noise generator.
K4302: 10 band graphic equaliser (two required for stereo).

K4303: Power supply and switching module (the switching module mounts onto the front panel).

Equaliser

Number of bands:	10
Centre frequencies:	32,64,125,250,500, 1k,2k,4k,8k,16kHz
Bandwidth:	5Hz to 100kHz (-3dB)
Amplification (controls in flat position):	0dB
Control range:	±10dB
Total harmonic distortion:	<0.02% (1kHz/0dB)
Signal-to-noise ratio (controls in flat position):	>110dB (A-weighted to 0.775mV)

Stereo separation:	>95dB (1kHz/0dB)
Max. output voltage:	2.5V rms
Input impedance:	4.7kΩ
Output impedance:	1kΩ

Pink Noise

Pseudo random digital noise	
Clock frequency:	Adjustable from 30 to 100kHz
Pink noise filter:	-3dB/octave (20Hz to 20kHz)
Output voltage:	150mV rms
Output impedance:	1kΩ

Spectrum Analyser

Number of bands:	10
Centre frequencies:	32,64,125,500, 1k,2k,4k,8k,16kHz
Power bandwidth:	20Hz to 20kHz (±2dB)
Range:	20dB
Resolution:	2dB/LED
Sensitivity: line input:	adjustable from 1V to 2V rms
microphone input:	adjustable from 1mV to 20mV rms
Input impedance: line input:	100kΩ
microphone input:	10kΩ

FRONT PANEL FOR GRAPHIC EQUALISER SYSTEM

A pre-formed front panel and accompanying panel foil for the modular graphic equaliser system.

Optional Items

The following item, not included in the system kits, may also be required, to complete the system.

19in. Rack Mounting Case	1	(XJ24B)
--------------------------	---	---------

Kits and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details and a list of additional parts for interconnection of modules will be found in the Maplin Magazine Issue 74.

K4101 PREAMPLIFIER INFRA-RED CONTROL TRANSMITTER

- ★ 15 channels
- ★ Remote control of preamplifier and tuner
- ★ 21 keys
- ★ 'Click-touch' keypad
- ★ Robust aluminium case

2

This 15-channel infra-red transmitter is designed to remotely control the digitally controlled preamplifier K4100 (VE46A) and the tuner K4500 (VF20W). In the case of the tuner, a special safety key has been provided which allows you to preserve the memory content for stations to avoid unwanted overwriting. The keypad features a superb 'click-touch' design which has a characteristic responsive feel, unlike other membrane designs which offer no tactile feedback whatsoever. Additionally, 'click-touch' offers a high degree of protection against moisture ingress. A red LED, visible from the keypad, shows that the unit is functioning when a key is pressed and gives some idea as to the condition of the battery. The transmitter is housed in an attractive and robust aluminium case.

Specification

Range:	30m maximum
Tx carrier frequency:	38kHz
Identification codes:	6
Independent channels:	15
Power supply voltage:	9V (PP3 battery)
Current consumption	
standby:	0.1µA
transmit:	10mA average
Dimensions:	175 x 50 x 23mm

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 59.

THE BEST OF SERVICE

K4300 AUDIO SPECTRUM ANALYSER 3

Features

- ★ 10 frequency bands monitored on 10 linear bargraphs; centre frequencies 32Hz, 64Hz, 125Hz, 250Hz, 500Hz, 1kHz, 2kHz, 4kHz, 8kHz and 16kHz
- ★ 10 LED bargraph for each band; 2dB for each LED, giving 20dB range
- ★ Microphone input
- ★ Single +12V DC power requirement
- ★ High input impedance (100kΩ) - will not load audio system
- ★ Can be used in its own right, or as part of a system

Applications

- ★ Setting up speaker systems
- ★ Checking adjustment of graphic equaliser
- ★ Assuring a flat frequency response

A spectrum analyser is an invaluable tool for monitoring the composition of audio signals particularly in a sound system that utilises a graphic equaliser. In such a system, control across the spectrum is produced by 'boost' and 'cut' over multiple frequency ranges instead of the standard 'bass' and 'treble' controls. The spectrum analyser then visually displays the results of the graphic equaliser's settings on a group of LEDs arranged in a bank of 10 bands.

The spectrum analyser monitors pink noise from the output of an audio system enabling any corrective adjustment of the graphic equaliser controls to be displayed as a 'flat' response.

This kit can be used on its own or in conjunction with a pink noise generator (kit K4301, order as VE43W), a 10 band graphic equaliser (kit K4302, order as VE44X).

Specification

Supply current:	0.75A (DC)
Power supply:	2 x 9V AC, or 12 to 15V DC
Range:	20dB (10 LEDs, 2dB per LED)
10 Bands:	32Hz, 64Hz, 125Hz, 250Hz, 500Hz, 1kHz, 2kHz, 4kHz, 8kHz, 16kHz
Line input level:	Adjustable, 100mV to 2V rms
Line input impedance:	100kΩ
Microphone preamplifier gain:	40dB
Microphone input impedance:	10kΩ

Optional Parts

The following items, not included in the kit, may also be required.

Insulated Spacer M3 x 20mm	2 Pkts	(FS38R)
Insulated Spacer M3 x 10mm	1 Pkt	(FS36P)
Screw M3 x 12mm	1 Pkt	(BF52G)
Steel Nut M3	1 Pkt	(JD61R)
Rotary Switch SW4B	1	(FF75S)
Phono Socket	4	(YW06G)
Open Chassis Socket 6.3mm	1	(HF91Y)
Wire 7/0.2 10m Black	1	(BL00A)
Wire 7/0.2 10m Red	1	(BL07H)
Single Core Lapped Screen	1	(XR12N)
Ribbon Cable 20-Way	As Req	(XR07H)
Case as per user requirements		

Kit and Special Parts

A complete kit of parts (including the PCBs) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 70.

VE42V	A1 Velleman Kit K4300	£72.99

K4302 MONO GRAPHIC EQUALISER MODULE 2

Features

- ★ Compact size
- ★ Low distortion
- ★ Low cost
- ★ 10dB of cut or boost across 10 frequency ranges
- ★ 5V to 12V DC single-rail power requirement

Applications

- ★ Modular equaliser systems
- ★ Disco and PA equipment
- ★ Updating hi-fi equipment
- ★ In-car applications
- ★ Home recording and electronic music

A graphic equaliser allows you to bring out the best sound from your audio system - room acoustics or speaker coloration problems are brought under control by allowing the audio response to be tailored to personal preference.

The Graphic Equaliser kit allows ten narrow, but overlapping frequency bands across the audio range to be cut or boosted. These bands are arranged around centre frequencies of 32Hz, 64Hz, 125Hz, 250Hz, 500Hz, 1kHz, 2kHz, 4kHz, 8kHz and 16kHz, which are adjustable by moving the sliding potentiometers from the centre flat position, to cut or boost at a specific frequency, or group of frequencies. Note that two kits will be required for stereo.

Specification

Frequency bands:	32Hz, 64Hz, 125Hz, 250Hz, 500Hz, 1kHz, 2kHz, 4kHz, 8kHz and 16kHz
Cut/boost:	±10dB per band
Frequency response:	5Hz to 100kHz (-3dB)
Signal to noise ratio:	110dB (IHF A-weighted, 0dB output, flat)
Distortion:	0.02% (1kHz, all controls in 'flat' position)
Power supply:	5 to 12V DC at 10mA (regulated)
Overall dimensions:	145 x 77 x 35mm (excluding slider shafts)

Optional Items

The following items, not included in the kit, may also be required.

Slider Knobs	10 or 20	(VX18U)
Screened Cable	As Req	(XR15R)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 71.

Order Code	Type	Price each
VE44X	Velleman Kit K4302	£34.99

PINK NOISE GENERATOR 2

Features

- ★ AC or DC supply
- ★ Low cost
- ★ Easily adaptable to produce white noise
- ★ Flexibly designed and small PCB
- ★ Pseudo-random noise generation utilising digital techniques

Applications

- ★ Calibration of graphic equaliser in conjunction with a spectrum analyser
- ★ Noise generators
- ★ Electronic music

A pink noise generator is a device that produces noise of constant amplitude across the whole audio band. Many pink noise generators utilise a zener diode or reverse-biased transistor, working at a deliberately low current, as a noise source which leads to unpredictable results. By utilising a pseudo-random bit pattern generator, a much more reliable result is obtained.

The Pink Noise Generator Module is intended for use with a graphic equaliser, in conjunction with the Spectrum Analyser (Kit K4300 VE42V). This system, typically used in a domestic environment, allows compensation for speaker frequency response, the effect of room size on frequency response, soft furnishings, hard walls, and other sources of absorption and reflection.

Specification

Clock frequency adjustment:	30kHz to 100kHz
Output level:	150mV rms (clock running at 40kHz)
Output impedance:	1kΩ
Pink noise filter:	-3dB/octave (20Hz to 20kHz)
Power supply requirement:	9 to 12V AC, or 12 to 15V DC at 5mA
PCB dimensions:	43 x 72mm

Optional Items

The following items, not included in the kit, may also be required.

Screw-Gap Phono Plug White	2	(HQ59P)
Screened Cable	As Req	(XR15R)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 72.

K4303 POWER SUPPLY AND SWITCHING UNIT

3

- ★ *Input from line or noise generator*
- ★ *Tape output from lines or equaliser*
- ★ *Spectrum analyser input from line or microphone*
- ★ *Line output from line input or equaliser*

This Power Supply and Switching Unit module has been designed for use with the Modular Graphic Equaliser System, which is made up from the following modules.

Audio Spectrum Analyser	K4300 (VE42V)
10-Band Graphic Equaliser	K4302 (VE44X)
Pink Noise Generator	K4301 (VE43W)
Front Panel	F4302 (VE41U)

This kit performs three functions. These are:

1. To provide a regulated power supply for the above modules.
2. To provide all the necessary switching functions.
3. Includes a front panel mounted line input sensitivity control.

Kit and Special Parts

A complete kit of parts (including the PCB) is available. Full construction details may be found in Maplin Magazine Issue 73.

Order Code	Type	Price each
VE45Y	Velleman Kit K4303	£30.99

K2620 GIANT VU METER

This kit drives 12 mains lamps mounted in a row to provide a giant VU light column. Interfaces to most audio equipment (isolated, adjustable input).

Input sensitivity:	100mV to 3V
12 triac outputs:	24 to 240V AC, max. 2A each (uncooled)
Power supply:	9V AC/0.5A

Order Code	Type	Price each
VE57M	Velleman Kit K2620	£29.99

K1798 STEREO LED VU METER

Stereo 2 x 16 LED VU meter (spot indication) with adjustable input. Power supply 12V DC. Two front panels included for vertical or horizontal mounting. Input sensitivity 100mV to 10V.

Order Code	Type	Price each
VE28F	Velleman Kit K1798	£26.99

K2606 7-LED AUDIO POWER METER

Features

- ★ *7-LED scale*
- ★ *Measures peak audio power levels up to 200W*
- ★ *Directly driven from the loudspeaker output - no other power required*
- ★ *Metal front plate and four plastic scales included for easy panel mounting*
- ★ *Can be built into either amplifier or speaker enclosure*
- ★ *Suitable for use with 4Ω and 8Ω speakers*

Applications

- ★ *In-car audio*
- ★ *Disco systems*
- ★ *Speaker and amplifier designs*

If you've ever wondered how much power your amplifier is kicking out, then the 7-LED Audio Power Meter will help you find out. This project has seven LEDs that illuminate, in bargraph fashion, indicating the peak power output levels. Two power ranges can

K610 LED VU METER

VU meter with 12 LED scale and adjustable input. Power supply: 12V DC. Light bar display. 2 front panels included for horizontal and vertical mounting. Input sensitivity 100mV to 10V.

Order Code	Type	Price each
VE29G	Velleman Kit K610	£13.99

be selected via a link on the PCB, since the power level will depend on the impedance of the speaker used. Two front-panel scales are provided for each sensitivity; one for use with 4Ω speakers (100W and 250W, 'low' and 'high' sensitivity settings respectively), and another for use with 8Ω speakers (50W and 125W respectively). The device is directly connected to the loudspeakers or amplifier output, and does not require its own power supply, since it derives its power from the amplifier's audio output.

Optional Items

The following items, not included in the kit, may also be required.

Double Bubble Sachet	1	(FL45Y)
Toggle Switch 10A SPST	1	(JK25C)
Flexible Rubber Sealant	1 Syringe	(YJ91Y)
Wire 7/0.2 10m Red	1 Pkt	(BL07H)
Case as per user requirements

K4700 LOUDSPEAKER PROTECTION

This dual-channel protection unit prevents power-on thumps from damaging your stereo speaker system and offers protection from DC components present on the output of any connected amplifier.

Switch-on delay:	±6 sec.
DC protection:	+1V/-1V
Max. input voltage:	200V pk to pk (71V rms)
Max. switching current:	10A

LEDs for 'switch-on-delay' and 'Error'.

Order Code	Type	Price each
VE24B	Velleman Kit K4700	£15.99

K4701 LOUDSPEAKER DC PROTECTION UNIT

Specification

Maximum input voltage:	90V DC
Maximum contact current:	10A
Minimum safety voltage:	10V DC
PCB	40mm x 67mm

This project has been designed to protect Hi-Fi loudspeakers from damage due to faults occurring within the output stage of a power amplifier. A fault of this nature nearly always causes a large DC current to

flow, and it is *this* current which 'burns' the loudspeaker. This module will 'disconnect' the speakers as soon as a DC voltage is detected.

The module can be mounted in the loudspeaker cabinet, and is also suitable for protecting car stereo systems (one module per channel). *Note that this project must not be used in conjunction with traditional valve amplifiers; they do not require this type of protection, and the use of this module could cause extensive damage to the amplifier. This module is also unsuitable for amplifiers with less than 10V_{pk} present at the output.*

Kit and Special Parts

A complete kit of parts (including the PCB) is available. Full construction details may be found in Maplin Magazine Issue 82.

THE MODULAR MIXING SYSTEM

Features

- ★ High quality
- ★ Modular design for easy servicing
- ★ Wide variety of input options
- ★ Up to 6 or 12 stereo channels available (depending on version)
- ★ DC-controlled electronic stereo faders for reliability
- ★ LED VU input level meters for each input
- ★ Low noise and distortion
- ★ Comprehensive equalisation and monitoring facilities
- ★ Effects loop (12-Channel version only)

Applications

- ★ Radio stations
- ★ Discos
- ★ Domestic recording studios

These two pre-cut front panels are used in the construction of the 6-channel and 12-channel mixers which use many of the Velleman audio kits. In addition, each panel is supplied with an appropriate plastic, self-adhesive, front-panel foil with the legends in white on a black background. The panels are 3mm thick aluminium plate, with all necessary holes and slots. The legend foil comes with windows for the VU meters and peak indicators, and with all the necessary cut-outs for switches and potentiometers.

15 METRE MAINS CABLE EXTENSION REEL

JoJo

Manufactured with safety in mind, this extension reel is suitable for use with power tools, lighting, various household appliances and gardening equipment such as strimmers, lawn mowers etc. The maximum load is 1200 watts. The reel is fitted with a convenient carry handle and an additional handle is provided for easy winding of the cable. Fitted with two childproof sockets, the extension reel conforms to BS6500, BS61363/A and BS5733. Colour black and red. Not for use in wet conditions.

GREAT VALUE!

K2661 DUAL INPUT AMPLIFIER MODULE

2

Features

- ★ Highly flexible
- ★ Low or high impedance mic/line inputs
- ★ Balanced/unbalanced mic/line inputs
- ★ Mono or stereo configurations
- ★ Can be configured as RIAA-equalised phono preamp

Applications

- ★ Modular mixers
- ★ Updating existing systems
- ★ Hi-Fi equipment

The Dual Input Amplifier Module is a versatile building block - each half of the module can be configured in one of four different ways; stereo line (unbalanced), stereo phono (unbalanced), mono microphone (balanced or unbalanced). The unbalanced microphone and line inputs can be set for high or low impedance. The module can be used in a wide variety of applications ranging from a phono preamplifier, to general input modules for a mixer, or a balanced-line microphone input for a PA amplifier.

Specification

Number of independent channels:	Up to 4
Gain adjustment range:	25dB
Signal to noise ratio:	80dB
THD:	<0.05%
Frequency response:	20Hz to 20kHz (±0.5dB)
Deviation from RIAA equalisation curve:	Less than 1dB
Power supply:	±5V to ±15V DC, 100mA per rail

Optional Items

The following items, not included in the kit, may also be required.

Single Core Screened Cable	As req	(XR15R)
Twin Core overlapped Screen	As req	(XR08J)

Kits and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 63.

Order Code	Type	Price each
VE30H	Velleman Kit K2661	£17.99

K2662 DUAL FADER MODULE

2

Features

- ★ Two independent stereo channels, or 2 mono pairs
- ★ Electronic attenuators - no more potentiometer crackles!
- ★ Pre-fade listening (PFL) for each stereo pair

- ★ Fader-controlled start/stop facility for turntables, tape machines or CD players
- ★ On-board voltage regulators
- ★ LED peak detector
- ★ Long fader life

Applications

- ★ Mixing systems (particularly those of radio stations and disco consoles)
- ★ Upgrading existing equipment
- ★ DC control of volume

This module uses electronic control for fading of two stereo channels. Crackles produced by the sliding potentiometers have been eliminated completely through the use of high quality electronic volume control circuitry (DC control). The adjustment range exceeds 100dB, and noise produced by the fader is kept below -95dB. Both channels are equipped with a PFL (pre-fade listen) switch, a peak detector (+3dB), and an automatic starting control circuit for record players (pulse or continuous output).

Specification

Number of channels:	2 stereo (4 in all)
Distortion:	0.05% (max.)
Signal-to-noise ratio:	>90dB
Fader start/stop rating:	24V at 50mA
Attenuation (slider at min.):	90dB
Peak LED indication:	3dB
PCB dimensions:	138 x 98mm
Power Supply:	±15V regulated

Optional Items

The following items, not included in the kit, may also be required.

Screened Cable	As req	(XR15R)
Heat Transfer Compound	1 syringe	(HQ00A)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 61.

Order Code	Type	Price each
VE31J	Velleman Kit K2662	£29.99

K2663 DUAL STEREO TONE CONTROL MODULE

Features

- ★ Two stereo channels or four mono channels
- ★ Three-band tone control
- ★ Balance (stereo)/panorama (mono) control
- ★ Monitor output with level control (mono)
- ★ Effects output with level control (mono)

Applications

- ★ Tone control for amplifiers
- ★ Pre-recorded equalisation for tape machines
- ★ Suitable for use in modular mixing system

This kit contains two identical stereo tone control circuits on the same PCB with provision for independent control of balance or panning, bass middle and treble, monitor and effects levels. This board can be used with the Monitor and Effects Module (K2665) to provide 'effects send', 'effects return', a 'notch filter' and a mono monitor output for stage and live concerts.

Specification

Number of channels:	2 stereo (4 in all)
Number of tone controls:	3 per channel
Tone control turnover frequencies:	50Hz, 1kHz, 15kHz
Boost and cut range:	±12dB
Mono outputs:	Effects Send and Monitor
Distortion:	0.02% (max)
S/N ratio:	>92dB
Current consumption (quiescent):	10.5mA (±5V) 13.7mA (±15V)
Current consumption (full output into 10k load):	11mA (±5V) 16.7mA (±15V)

Optional Items

The following items, not included in the kit, may also be required.

Screened Cable	As req	(XR15R)
TL074C Quad Low-noise Op-Amp	1	(RQ69A)
1k 0.6W Metal Film Resistor	8	(M1K)
Strip board 1039	1	(JP46A)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 60.

VE32K	Velleman Kit K2663	£35.99

K2664 MASTER AND HEADPHONE OUTPUT MODULE

2

Features

- ★ Headphone amplifier with selector and volume control
- ★ Three fixed output levels 0.775V, 1.55V, and 2.5V rms
- ★ Tape recorder output
- ★ 2 x 5 LED VU meter
- ★ Bass and treble controls

Applications

- ★ Mixers
- ★ Preamplifiers

The Master and Headphone module is designed to be at the heart of a mixing system. It features a stereo input summing amplifier that provides three stereo outputs, a 4-way selectable input for monitoring via a pair of headphones, and an input for two, five bar LED VU meters.

There are three sets of stereo outputs:

1. Tape recorder
2. Headphones
3. Main master output

The master output features a dual ganged volume control, dual ganged treble and bass tone controls, as well as a balance adjustment. The tape recorder output is exactly the same as the master output, except that the volume control, mono/stereo switch, tone and balance controls have no effect on it. The stereo headphone output can be used to monitor the pre-fade listen (PFL), effects send or monitor buses (if used), or the outputs. A 4-way rotary switch provides the selection. Also included are 2 x 5-bar LED VU meters for visual monitoring.

Specification

Distortion:	0.05%
S/N ratio:	>90dB
Bass control:	15dB boost and cut, centred at 40Hz
Treble control:	15dB boost and cut, centred at 8.5kHz
Output levels	
Master:	775mV rms; 1.5V rms; 2.5V rms
Monitor:	775mV rms; 1.5V rms; 2.5V rms
Effect:	775mV rms
Tape recorder:	775mV rms
Headphone output:	45mW (400Ω load); 545mW (32Ω load); 1.3W (8Ω load)
VU meters:	green (-12dB, -6dB, -3dB); orange (0dB); red (+3dB)
Current consumption standby:	70mA
Current consumption loaded:	500mA
Power supply:	±17.5V to 30V

Optional Items

The following items, not included in the kit, may also be required.

Screened cable	As req	(XR15R)
Heat transfer compound	1 syringe	(HQ00A)

Kits and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 64.

Order Code	Type	Price each
VE33L	Velleman Kit K2664	£42.99

K2665 MONITOR AND EFFECTS MODULE

Features

- ★ Effects send and return loop circuits
- ★ Monitor channel with an adjustable notch filter frequency

Applications

- ★ Monitoring audio signals within a mixing deck
- ★ Interface between external effects equipment and the audio signal
- ★ Reduction of annoying sounds using a notch filter
- ★ Used with guitar amplifiers
- ★ Used in public address systems

A mono monitor mixing amplifier that incorporates a variable notch filter and separate 'Effects Send and Return' amplifiers. The Monitor amplifier, apart from a simple volume control, provides control over two parameters. The first is the Q-factor of the active filter, which is adjustable between 0.4 and 2.5. This corresponds to a -3dB bandwidth, variable between 840Hz and 1.7kHz. Secondly, the centre frequency is variable across a significant part of the audio band from 100Hz to 10kHz.

The 'Effects Send' has its own attenuation control for the level of signal sent to the effects equipment. Similarly, the returning 'treated' signal level is controlled by the 'Effects Return' amplifier attenuator.

Specification

Number of channels:	1 (2 required for stereo)
Notch filter centre frequency:	100Hz to 10kHz
Notch filter bandwidth adjustment:	840Hz to 1.7kHz
Notch filter depth:	0 to 30dB
Current consumption (quiescent):	9.1mA (±5V); 11.9mA (±15V)
Max. current consumption (both monitor and effects outputs into 1k load):	*0.4mA (±5V); 13mA (±15V)

Optional Items

The following items, not included in the kit, may also be required.

3k9 5% Metal Film	2	(M3K9)
4.7μF Minelect 63V	2	(RA53H)
Screened Cable	As req	(XR15R)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 62.

VE34M	Velleman Kit K2665	£20.99

K2666 PRECISION STEREO VU METER

Features

- ★ -26dB to +6dB scale
- ★ 30 LEDs per scale
- ★ Three colour scale
- ★ LEDs illuminated in dot mode
- ★ 150mV or 775mV input sensitivity

Applications

- ★ Amplifiers
- ★ Record level metering
- ★ Mixers
- ★ Tape recording

This VU-meter combines a high precision meter and large scale readout into a compact size, and is intended to be used as a building block in the Velleman Professional Modular Mixer and in other stereo audio applications. The 2 x 30-LED display is 105mm in length, providing a very large viewing area which is made easier by the use of three LED colours. Green LEDs are used for the range from -26dB up to -1.5dB, yellow for -0.75dB to +0.75dB (around 0dB level) and red for +1.5dB and over. The scale is dB linear over the range -6dB to +6dB, each LED corresponding to 0.75dB (16 are used over this range).

To keep power consumption to a minimum, the LED chains are lit one at a time in 'dot mode', rather than as a solid (true) illuminated bar.

Supplied with two calibrated plastic scales, horizontal and vertical, with white lettering on a matt black background.

Specification

Scale graduation:	-26dB to +6dB in 30 steps dB linear from -6dB to +6dB
Input impedance:	56k
Input sensitivity:	150mV or 775mV for 0dB, selectable
Maximum error:	0.5dB at 1kHz
Power requirement:	12V to 15V DC at 50mA, regulated

Kits and Special Parts

A complete kit of parts (including the PCB) is available. Full construction details may be found in Maplin Magazine Issue 59.

K2668 DUAL STEREO VU METER MODULE

Features

- ★ Five LED displays
- ★ Stereo module
- ★ Four, 5-LED bargraph driver circuits

Applications

- ★ 6 and 12-channel mixers
- ★ Monitor microphone circuit levels
- ★ Monitor amplifier outputs

This simple module, which is used in both the 6-channel and 12-channel mixers, monitors the input level of each channel. It consists of four identical 5-LED bargraph driver circuits, each based around half a U2066B IC. The components associated with the two ICs determine the attack and decay times, and the bandwidth. Each of the four bargraph displays is made from three green, one orange and one red LED; the LEDs operate at approximately the following levels: red +3dB, orange 0dB, and green at -3dB, -8dB and -13dB.

Specification

Indication:	-13dB, -8dB, -3dB, 0dB, +3dB
Sensitivity:	0dB = 0.775V rms
Supply voltage:	14V to 18V DC
Current consumption:	62mA

Kits and Special Parts

A complete kit of parts (including the PCB) is available. Full construction details may be found in Maplin Magazine Issue 66.

VE38R	Velleman Kit K2668	£16.49

K2667 UNREGULATED POWER SUPPLY MODULE

Features

- ★ Works with both 6 and 12-channel mixing systems
- ★ Dual power supply rails for op-amp circuits
- ★ Fuse protected outputs
- ★ Versatile - up to 2A per rail
- ★ Transformers available

This unregulated general purpose split-rail PSU module, is not supplied with a transformer. When used with a suitable transformer, available separately, it is able to power either the 6 or 12 Channel Modular Mixing System. The selected transformer must have a secondary winding rated at 2A and a maximum voltage output of 18V. The 6-channel mixer will require a 30VA 2 x 18V (YK12N) transformer should be used, and for use with the 12-channel mixer, the more powerful 80VA 2 x 18V (YK17T) transformer.

Continued on next page.

Continued from previous page.

Optional Items

The following items, not included in the kit, may also be required.

Toroidal transformer 30VA 18V	1	(YK12N)
or		
Toroidal transformer 80VA 18V	1	(YK17T)
Fuse 20mm 2A A/S (WR20W)	2	
Heat-shrink tubing	As req	
Mains cable	As req	
Double-pole mains switch	1	
Mains fuse holder	1	
Mains fuse	1	
Fuseholder insulating boot	1	
Strain-relief cable grommet	1	

Kits and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 65.

VE36P	Velleman Kit K2667	£10.99

K4400 ELECTRONIC RECORD/PLAYBACK MODULE

A redesign of one of our best selling kits, this module offers the electronics and audio enthusiast the possibility of recording a few lines of speech and repeating it over and over again - without the need for any mechanical parts. Short messages can be repeated, as required, to acknowledge welcoming visitors or greeting customers. Also can be used in conjunction with intruder alarms, in toys or at parties. The module drives a standard 8Ω speaker, and retains the message when the power is removed. It is possible to connect multiple modules together in cascade to increase the recording time.

Specification

Recording time:	12 to 20s max.	
Power requirements:	9V to 12V AC	6V DC
Current drain		
standby:	7mA	15µA max
record:	40mA	26mA
playback:	75mA max	50mA max
Dimensions:	125 x 70 x 25mm	

Order Code	Type	Price each

CAR PROJECTS

AUTO REAR WINDOW WIPER CONTROLLER 3

Features

- ★ Single shot and intermittent modes
- ★ Extends wiper blade life
- ★ Reduces the risk of scratches
- ★ Lessens wiper motor and gearbox wear
- ★ Enhanced operation
- ★ Multi-mode operation
- ★ Auto wipes when reversing

Most cars that have a rear wiper usually have the operating switch for it located in some awkward, almost unreachable position, whereas the conventional front screen wiper controls are close at hand. Consequently it is not easy to operate the rear wiper while you have to concentrate on your driving, so that should the window dry out, for example, and it is not a convenient moment to switch the wiper off, there is a risk of scratching the glass.

The Auto Rear Wiper Controller adds flexibility to the existing simple 'on or off' rear window wiper on the car, making its operation semi-automatic and relieving the driver of the task. When travelling in rain, for example, the rear window is mainly dry most of the time and only requires occasional wiping to clear spray, which can be done in intermittent mode.

There are three essential modes of operation. In Single Shot Mode, the rear wiper will give a single sweep and then stop. In Intermittent Mode, the rear wiper will sweep and then wait for a preset time period; this cycle will repeat indefinitely until switched off. The time delay period can be preset according to the value chosen for the timing resistor. In the kit, two alternative values are supplied for 7 and 15 seconds, but other values can be substituted for delay times from 1 second to 1 minute.

In Auto Wipe on Reverse Mode, the rear wiper is forced into Intermittent Mode whenever reverse gear is selected, regardless of the unit's toggle switch position. In all cases, the rear wiper will only function while the front windscreen wipers are also switched on, so that all wipers can easily be switched off with just one control. The original rear wiper switch can still be used as normal, and any mode is overridden by the Auto Wipe on Reverse Mode while the windscreen wipers are active.

Optional Items

The following items are not included in the kit, but may also be required.

ABS Box MB2	1	(LH21X)
Pozi Screw M3 16mm	1 Pkt	(JC70M)
Steel Nut M3	1 Pkt	(JD61R)
Isoshake M3	1 Pkt	(BF44X)
Spacer M3 1/4 in.	1 Pkt	(FG33L)
Seal Grommet 16mm	1 Pkt	(JX77J)
Wire 6A Black	As Req	(XR32K)
Wire 6A Blue	As Req	(XR33L)
Wire 6A Red	As Req	(XR36P)
Wire 3A Black 10m	1 Pkt	(FA26D)
Wire 3A Blue 10m	1 Pkt	(FA27E)
Wire 3A Green 10m	1 Pkt	(FA29G)
Wire 3A Orange 10m	1 Pkt	(FA31J)
Wire 3A Red 10m	1 Pkt	(FA33L)
Wire 3A White 10m	1 Pkt	(FA35Q)

Kit and Special Parts

A complete kit of parts, including the PCB, is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 74.

CAR BATTERY CHARGE/DISCHARGE/IDLE MONITOR 2

Features

- ★ Simple to build
- ★ Tri-colour visual indication
- ★ Optional centre zero meter
- ★ Easy to install

Applications

- ★ Avoiding a flat car battery
- ★ Detecting alternator faults
- ★ Balanced line driver

Be forewarned of a drained car battery, and so avoid failure to start the engine on a cold and frosty morning, with this easy to build and install project that will indicate the charge/discharge state of the battery. The dashboard of the average family car typically has no more than an ignition warning light, which only illuminates when the alternator is not producing any output. The alternator primarily replaces the energy lost from the battery during starting, and supplies the ancillaries; ignition, lights, radio, etc. Its current output is chosen by the manufacturer to meet these needs, but can be exceeded by the addition of new accessories, or be depleted with wear or as the result of a fault such as a slipping fan belt.

This project gives a visual indication of whether the car battery is being drained or charged on a single tri-colour LED. Discharging is shown as red, while charging is green. A quiescent state, when the battery is neither charged or discharged is shown as yellow. An optional centre-zero meter movement can even be fitted if required. Installing the module is very simple, since there are only three wires to connect.

Specification

Operating voltage:	+12V to +25V DC
Current consumption:	15mA (max)
Visual indicators:	Tri-colour LED
	Optional centre zero meter

Optional Items

The following items, not included in the kit, may also be required.

Min Res 15k	1	(M15K)
Horizontal Enclosed Preset 22k	2	(UH04E)
Diode 1N4148	2	(QL80B)
Strip Board Type 1039	1	(JP46A)
Insulated Spacer M3 x 10mm	1 Pkt	(FS36P)
Pozi Screw M3 6mm	1 Pkt	(BF36P)
Self-Tapping Screw No.6 x 3/8 in.	1 Pkt	(LR67X)
Single-Ended PCB Pin 1mm	1 Pkt	(FL24B)
Panel Meter 100-0-100µA 2in.	1	(RW98G)
Box with Base Type 2	1	(YN36P)
Min Single Core Lapped Screen	As Req	(XR15R)
Burglar Cable 4-wire	As Req	(XR89W)
In-Line Car Type Fuse Holder	1	(RX51F)

Fuse 100mA 1 1/2in.	1	(WR08J)
LED Clip Convex 5mm	1	(UK14Q)
PVC Sealing Grommet 16mm	1	(JX77J)
Heat Shrink Sleeving 1.6mm	1	(BF86T)

Kit and Special Parts

A complete kit of parts, including the PCB, is available (but excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 78.

CAR LAMP MONITOR 2

NEW!

Features

- ★ Easy to build
- ★ Easy to install
- ★ Single or multiple indicators
- ★ Can be interfaced to logic
- ★ Self powered

It is surprising how few people take the trouble to check, on a regular basis, that their car's lights are fully functional. This can be a hazard to the driver of the vehicle itself and other road users. In today's tougher-than-ever driving conditions it is important that a car's lights are operating as they should. Faulty lights can and do contribute to accidents. What is needed is a method of indicating to the driver that a lamp has failed or has become intermittent at the time of the fault developing.

The Car Lamp Monitor, will provide an indication of lamp failure and is based around a custom designed IC. The Car Lamp Monitor has been designed to be as flexible as possible, so as to cater for the inevitable differences in electrical wiring between makes and models of cars. However, two basic assumptions have been made: firstly, the car's electrical supply is negative earth; secondly, the car's lights are switched in the positive supply line to the lamp (i.e. one side of the lamp is connected to chassis). The vast majority of cars will satisfy both of these requirements.

A single Car Lamp Monitor module can be used to monitor up to four groups of lamps; a group can comprise a single lamp or a number of lamps connected in parallel. The monitor works by detecting the current drawn by working lamps, if a lamp fails the current drawn will drop (to zero for one lamp). Fault indication can be in the form of a buzzer, an LED, a filament lamp or by interfacing the Car Lamp Monitor to more complex electronics, such refinements as digitised spoken warnings could be provided. To cover all of a car's lamps will require several modules to be built. The module may also be used to confirm operation of lights on a caravan or trailer.

Kits and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 80.

Order Code	Type	Price each

GH85G	Car Lamp Mon PCB	£2.99

CAR BATTERY MONITOR 2

Any number of things from a faulty alternator to left-on headlights can result in a flat car battery - and the first thing you are likely to know about it is when you turn the key one morning and the car won't start! This useful little unit is designed to warn you in advance by displaying the battery's state of charge with a row of ten LED's. The Monitor costs very little to build, and since it consumes a miserly 20mA, can be left permanently connected to the battery. The Car Battery Monitor will even reveal a slipping fan-belt problem, which prevents the battery charging properly, yet leaves the dashboard battery warning light off, as well as indicate how the battery is handling the strenuous work of starting the car (it takes 20 minutes of running to put back what a five-second start takes out).

Kit and Special Parts

A complete kit is available, and the pcb is also available separately. Full construction details may be found in the Maplin Magazine Issue 37. PCB dimensions: 55 x 35mm.

INTELLIGENT SPLIT CHARGE UNIT NEW!

Features

- ★ Charges auxiliary battery
- ★ Powers refrigerator
- ★ Alternator or Ignition switch controlled
- ★ Status Indicators
- ★ Easy-to-build
- ★ Easy-to-install
- ★ Can replace existing unit

Applications

- ★ Cars
- ★ Vans
- ★ Motor-homes
- ★ Trainers
- ★ Caravans

A split-charge unit is employed in a car or other similar vehicle to charge an auxiliary (second) battery. An auxiliary battery is often used to power 12V electrical accessories in a caravan or trailer. The use of such a battery ensures that the towing vehicle's main battery is not discharged. The auxiliary battery can be located in the towing vehicles' boot or in the caravan itself.

Modern caravans are often equipped with a multi-supply refrigerator which can be operated from 230V AC mains, 12V DC or liquified petroleum gas (LPG). The dual split charge unit is able to simultaneously charge an auxiliary battery and supply power to a 12V DC operated refrigerator.

Specification

Supply voltage range:	+10V to +16V DC
Maximum auxiliary battery output current:	10A
Maximum refrigerator output current:	10A
Supply current control input:	100mA maximum
monitor circuit supply:	50mA maximum

Optional Items

The following items, not included in the kit, may also be required.

SWITCHING PSU FOR IN-CAR AUDIO SYSTEM 5

- ★ For powering high quality power amplifiers
- ★ Polarity protected
- ★ Thermal protection
- ★ Remote switch on control

The increasing demand for a better quality in-car hi-fi system has led to several major advances in the field, to the point where superior equipment has been made on the test bench. The attention has turned towards

Continued on next page.

Continued from previous page.

high quality power supplies, producing low ripple and improved efficiency. This car audio switching power supply unit is able to fulfil the requirements of today's hi-fi buff. No longer are you limited to power amplifiers operating from the only available 12V source. Primarily designed to power the 50W power amplifier kit LW35Q (see elsewhere in this section), this project can also be used to increase the supply for high power 'booster' type amplifiers as well as other amplifiers requiring a supply voltage of $\pm 30V$. The power supply is able to operate under varied temperature conditions, with high temperature shut-down provided if the unit gets too hot. When the temperature drops to 20°C the unit automatically switches itself back on. Additional protection is supplied by fuses to the $\pm 30V$ output and a fused input. This project requires a degree of expertise and patience to build, and is not recommended for absolute beginners. Construction details must be carefully followed.

Specification

Supply voltage:	11V to 15V DC (13.8V Nominal)
Current:	10.7A ($V_s = 11.3V$)
Output power:	120W continuous
Outputs	
Main:	$\pm 30V$
Auxiliary:	$\pm 12V$
Continuous output current at	
$\pm 30V$:	2 + 2A
$\pm 12V$:	50mA + 50mA
Efficiency:	>90%
Shut-down temp:	80°C
Shut-down hysteresis:	20°C
Standby input:	Active low
Remote switch-on input:	Active high
Thermal shut-down output:	Active low
Input noise ($P_o = 120W$):	140mV
Output Noise ($P_o = 120W$)	
Main:	60mV
Auxiliary:	40mV
Switching frequency:	25kHz
Converter mode:	Push-pull

Optional Items

The following items, not included in the kit, may also be required.

Car Fuse Holder	1	(RX51F)
15A 1 1/4 in AS Fuse	1	(UK13P)
HC Wire Black	As Req	(XR57M)
HC Wire Red	As Req	(XR59P)
32/0.2 Wire Red	As Req	(XR36P)
32/0.2 Wire Black	As Req	(XR32K)
32/0.2 Wire Blue	As Req	(XR33L)
Zip Wire	As Req	(XR39N)
50W Power Amp	2	(LW35Q)
2E Heat Sink	2	(HQ70M)

Kit and Special Parts

A complete kit is available, and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 46. PCB dimensions: 150 x 150mm.

VEHICLE INTRUDER ALARM

- ★ **Entry/exit delay**
- ★ **Entry/exit sounder**
- ★ **Two trigger inputs**
- ★ **Compact design**
- ★ **Pulsed car horn with time out**

There are many alarms available on the market, but none can offer complete protection against theft. Though no alarm will foil the professional thief, it will act as a deterrent to the small time thief or joyrider. This circuit, like most alarms, is triggered off by the door contacts for the courtesy light and will only work when fitted to a 12V negative earth car. The switch to the alarm is fitted on the inside of the car as opposed to the outside, thus ensuring that the switch is not tampered with. The idea is, when leaving the car the alarm switch is turned to the on position and the arm button is pressed. It is now safe to open the doors and get out of the car. After arming the system a timer circuit allows approximately 30 seconds to leave the car and shut the doors. The timing and sequence of events can be modified using the information in the leaflet supplied. If a door is then opened, the horn will sound after 15 seconds. The 15 second delay is sufficient time for the occupant to turn off the alarm, but not enough time for the thief to tamper with the system. The horn will pulse for 30 seconds at a rate of 1 pulse per second, before re-arming itself. If the door is left open the alarm will pulse for 30 seconds, stop for 15 seconds and will continue this cycle until reset.

The alarm is capable of driving car horns of up to 10A (120W).

Optional Items

The following items, not part of the kit, may also be required.

Min Key Switch	1	(FE44X)
Wire 3202 Black	1	(XR32K)
Wire 3202 Red	1	(XR36P)
16/0.2 Wire 10M Green	1	(FA29G)
16/0.2 Wire 10M Orange	1	(FA31J)
16/0.2 Wire 10M White	1	(FA35Q)
16/0.2 Wire 10M Yellow	1	(FA36P)
LED Clip Convex 5mm	1	(UK14Q)
Piezo Electronic Siren	1	(YP11M)
Stereo 3.5mm Ch Jk Skt	1	(FK03D)
Alarm Sticker	1	(JR91Y)

ULTRASONIC CAR ALARM

This burglar alarm design is basically the same as the ultrasonic movement detector type that is often used to protect homes and other buildings. By detecting movement inside the car using the Doppler shift principle, any method of entry will trigger the alarm. The operating range is approximately 1m extending $\pm 45^\circ$ from the sensors, which is suitable for the driver and front passenger seat area of most cars.

The circuit incorporates an Exit Delay Timer which prevents the unit from being activated until several seconds after it has been switched on, giving the user an opportunity to leave the car without triggering the alarm. This is an important feature as it enables the on/off switch to be positioned inside the car, rather than having to rely on a concealed switch somewhere on the outside of the car. A short duration Entry Delay is also included so that the user can enter the car and deactivate the alarm before it sounds. Once activated the alarm operates the car horn which is pulsed at approximately 1Hz creating an 'urgent' sound. This will last for approximately 10 minutes and then the unit will reset automatically.

Kit and Special Parts

A complete kit of parts for this project and the pcb is also available separately. Full construction details may be found in the Best of Maplin Projects Book 4. A ready assembled version is also available.

COMPUGUARD

- ★ **Fully programmable**
- ★ **Low power consumption**
- ★ **Optional battery backup**
- ★ **Suitable for all negative earth vehicles**
- ★ **Microprocessor controlled**
- ★ **Controls central locking & electric windows and sunroof**

In Britain a car is stolen every 30 seconds! Compuguard is a microprocessor controlled programmable semi-intelligent vehicle alarm that aims to make a thief's time as difficult as possible by constantly monitoring and modifying its outlook on the security of the vehicle! Constructional details may be found in the Maplin Magazine Issues 40 and 41. Compuguard comes in three kits:

**MAPLIN
KEY CALL**
Phone 01702 556751

Compuguard Main Unit

This houses a microcontroller, optional battery backup, shock and voltage drop sensors, control relays and service keyswitch. The unit is impregnable to water and is to be mounted in the engine compartment.

Optional Items

The following optional items are not included in the kit but may also be required.

Re-Chargeable Type AA Battery	6	YG00A
9V Battery Holder	1	HQ01B
PP3 Battery Clip	1	HF28F
Motor-Start Press	1	FH91Y
Additional Quick Snap Connectors	As Req.	JR88V
12V Siren	See Article	
Power Connection Wire Black	As Req.	XR32K
Power Connection Wire Red	As Req.	XR36P
Self Tapper No8 x 1/2 in.	1 pkt.	BF69A
Spirawrap 1/8 in.	As Req.	BL57M

Kit and Special Parts

A complete kit of parts is available. The high quality fibre-glass PCB, an aluminium mounting bracket for attaching the Compuguard main unit to the car body, and a TMS77C82 microcontroller pre-programmed with the Compuguard car alarm software are also available separately. The leaflet supplied with the kit contains the complete installation details (which are not shown in the magazines). This leaflet is also available separately.

PCB dimensions: 104 x 127mm.

Compuguard Infra-Red Receiver and Control Unit

This houses the infra-red receiver/decoder and control switches to select the activated sensors. The unit is to be mounted inside the passenger compartment.

Optional Items

The following optional items are not included in the kit but may also be required.

Multi-Core 15-way	As Req.	XR28F
Multi-Core 4-way Screened	As Req.	XR25C
Potting Box Miniature	1	LH56L
Potting Compound 50g	1	FT17T
Quickstick Pads	1	HB22Y

Kit and Special Parts

A complete kit of parts is available and the pcb and self-adhesive panel are also available separately.

PCB dimensions: 88.9 x 69.2mm.

Order Code	Type	Price each
LP23A	Compuguard IR Rec Sw	£23.99
GE56L	Compuguard I/R Rx 3d	£5.99
JR73Q	Compuguard IR Panel	£3.99

Compuguard Infra-Red Transmitter

This is a small hand-held transmitter that can easily be attached to a key-ring. A recessed tactile switch is provided which selects active, inactive, or 'panic' conditions.

Optional Items

The following optional items are not included in the kit but may also be required.

12V Lighter Battery 23A	1	JG91Y
-------------------------	---	-------

Kit and Special Parts

A complete kit of parts is available. The high quality fibre-glass PCB, self-adhesive panel and a key-ring box for housing the infra-red transmitter unit are also available separately.

PCB dimensions: 55.5 x 31mm.

Order Code	Type	Price each
LP24B	Compuguard IR Tx	£9.99
GE57M	Compuguard I/R Tx Bd	£2.25
JR92A	Remote Case Panel	36p
JR90X	Keyring Remote Case	£1.35
XK35Q	Cmpgud Rx/Tx Leaflet	60p NV

CAR COURTESY LIGHT EXTENDER

- ★ Requires no external power supply
- ★ Optional ignition override
- ★ No setting up required
- ★ Low component count

This project keeps the interior light on after the car door is closed, allowing time to find keys, ignition switch or even your way out of the garage! The board has three fly leads, two are fitted across the existing door switch whilst the other is connected to the ignition switch which turns off the unit when activated. The small PCB allows the unit to be concealed within the car. The mounting box supplied allows connection to the dashboard.

Optional Items

The following items, not included in the kit, may also be required.

Hook-up wire 16/0.2 Black	1(FA26D)
Hook-up wire 16/0.2 Red	1(FA33L)

Kit and Special Parts

A complete kit of parts is available, and the pcb is also available separately. Full construction details can be found in Maplin Magazine Issue 44.

CAR INTERIOR LIGHT CONTROLLER

Features

- ★ Easy to build
- ★ Simple to fit
- ★ Low power consumption

NEW!

This project is a very useful addition to many older, and base model cars, many of which do not have the courtesy light feature of the higher models. The project will allow the courtesy light to remain illuminated for approximately 30 seconds after the vehicle door has been closed. It also adds an extra feature that in the event of a door being left open, the courtesy light will be automatically extinguished after approximately 10 minutes. Please note that some vehicles with electronic engine management systems will require reprogramming by a main dealer after disconnecting the battery.

Specification

Minimum supply voltage:	9V
Maximum supply voltage:	15.5V
Quiescent current:	2.5mA @ 12V
Operating current:	30mA @ 12V

Optional Items

The following items, not included in kit, may also be required.

16.0mm Seal Grommet	1Pkt	(JX77J)
10mm M3 Insulated Spacer	1Pkt	(FS36P)
Box 2BA	1	(BZ28F)
Plug-in Fuse Holder	1	(RX51F)
1.25in. 100mA Fuse	1	(WR08J)
Black Connection Wire (32/0-2)	As Req.	(XR32K)
White Connection Wire (32/0-2)	As Req.	(XR37S)
Red Connection Wire (32/0-2)	As Req.	(XR36P)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 82.

Order Code	Type	Price each
LT65V	Car Int Light Cntrlr	£9.99
GH89W	Light Controller PCB	£2.99

CAR LIGHTS-ON WARNING INDICATOR

- ★ Low cost and small size
- ★ Easily fitted to most negative earth cars
- ★ Buzzer sounds when lights left on

If your car is not fitted with some kind of 'lights-on warning', the chances are that you will leave your lights switched on. Murphy's law dictates that when you do so, your absence from the car will be of

Continued on next page.

Continued from previous page.

sufficient duration to ensure that the battery will be well and truly flat! This small and simple Lights-On Warning Indicator will emit a clearly audible buzzing sound when the car lights are left on, the ignition switch is turned-off and the driver's door opened. In his manner the buzzer will only sound when the driver is genuinely about to leave the car. The circuit of the Indicator is very simple, just one transistor, some resistors, diodes and a buzzer.

Optional Items

The following items, not included in the kit, may also be required.

16/0-2 Wire	As Req. (FA26D-FA36P)
Snap lock Cable Connector	As Req. (JR88V)
Terminal Block 5A	As Req. (HF01B)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 50.

Order Code	Type	Price each

GE88V	Lights On PCB	£1.39

L9801 HIGH-SIDE DRIVER

- ★ 25A peak current capability
- ★ Low on-resistance
- ★ TTL & CMOS compatible input
- ★ Thermal & overcurrent protection
- ★ Diagnostic output

The L9801 high-side driver IC is capable of switching both resistive and inductive loads of up to 6A, with a peak current capability of 25A. In use, one side of the load is connected directly to 0V and the other to the positive supply via the L9801; hence the name 'high-side' driver. Typically, automotive applications demand high-side switching – most loads use the vehicle chassis as the 0V connection, this saves on wiring and helps to prevent electrochemical corrosion. The L9801 is particularly suited to driving filament lamps as it limits inrush current; since the initial high current surge at switch-on is a major factor in filament failure, the device effectively increases lamp life. Other possible applications include: computer interfacing, remote switching and relay replacement. A useful feature of the device is a diagnostic output, which indicates an open circuit load, short-circuit output, thermal shutdown and input over-voltage. This may be used to inform the control system of a fault. Detected by software diagnostics routine or implemented by hardware, warning indicator LED, etc. For continuous currents up to 2A heatsinking is generally unnecessary, above this level a heatsink should be used. The tab of the device is at 0V potential and it is likely that in most instances an insulating mounting kit will be unnecessary, however, heat transfer compound should be used.

Note: this is intended as a 'building block' project only and some component values supplied may have to be changed for a particular application. This project is not covered by our 'Get-You-Working' Service.

Optional Items

The following items, not included in the kit, may also be required.

Slotted Heatsink	(FL58D), or
Powerfin Plastic	(FG55K), or
Powerfin TO3	(FG51F)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 54.

PCB dimensions: 24.1 x 38.1mm.

GH11M	L9801 HS Driver PCB	£1.75

CAR DIGITAL TACHO

In these days of ever-higher motoring costs the unit described here will help the driver to change gear at the most advantageous point to save fuel and extend engine life. Anyone using a car to tow a trailer or caravan will also benefit by being able to make the best use of the torque available from the engine. Conventional tachometers give a display of engine speed on a millimeter, usually with a scale of about 270° arc. Pulses produced by the action of the contact breakers are integrated and fed to the meter to give an analogue display of engine revolutions. The disadvantages are that an average reading is displayed, which can easily lag behind rapid speed changes, and the meters tend to be somewhat fragile. This tachometer overcomes both of these disadvantages by counting pulses and displaying engine revolutions over a very short time, the digital display being continuously updated. Two digits display the number of revolutions x 100. The unit is designed for negative earth cars. The unit can only be used on cars with contact breakers. Construction is very straight-forward, using two printed circuit boards which fit directly in the case without the need for mounting bolts, so the project can be tackled by any but the most inexperienced constructor.

Kit and Special Parts

A kit is available but does not include the case. The pcbs are also available separately. Full construction details may be found in Maplin Magazine Issue 37. Main PCB: 52 x 83mm. Display PCB: 52 x 23mm.

Order Code	Type	Price each

GA26D	Dig Tacho Main PCB	£2.20
GA27E	Dig Tacho Dsply PCB	£1.20

REMOTE POWER SWITCH

A useful project intended for use in cars, but finding many other applications where remote switching of up to 10A is required. The project is both easy to build and easy to use. Connection to the Remote Power Switch is via on-board screw

terminals. An LED is provided to indicate operation. A protection diode suppresses relay coil back emf voltage thus preventing possible damage to driver circuits. Applications include switching of fog/driving lights, alarms, horns, sirens and high power car amplifiers. The high quality, long life relay requires 45mA of drive current to operate.

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 34. PCB dimensions: 36.8 x 45.7mm.

VELLEMAN CAR PROJECTS K2543 IGNITION AMPLIFIER

Features

- ★ Easy to fit, only four wires
- ★ Transistor assisted ignition method
- ★ Significantly reduces contact breaker wear
- ★ Original connections can be easily restored at any time
- ★ Improved coil performance returns easier starting and cleaner combustion

Applications

- ★ For any petrol burning motor vehicle
- ★ Suitable for engines of 2 to 8 cylinders

There are two main types of electronic ignition currently available, the first being that which completely replaces the 'electromechanical' ignition (contact breaker points, condenser, etc.) and the type that can be fitted as an 'up-grade', producing what is commonly called 'transistor assisted ignition'. The latter type still makes use of the 'conventional' mechanical timing switch (the contact breaker points). However, it does provide a faster switching speed and more energy to the spark, so places less wear on the points because the arcing factor is removed, and so keeps the engine in tune for longer periods. Fixing this electronic ignition system will lead to improved starting and smoother running, particularly at very high and very low rpm. Other benefits include lower fuel consumption, less pollution and lower servicing costs.

Specification

Switching speed:	1µs
Firing interval:	2m-s minimum
Coil switching current:	4A nominal
Supply voltage:	12V to 14V DC
Polarity:	Negative earth only
Supply current drain:	320mA approx.

Optional Items

The following items, not included in the kit, may also be required.

Box DCM5002	1	(LH70M)
Flexible Rubber Sealant	1	(YJ91Y)
Wire 3202 Red	2m	(XR36P)
Wire 3202 Black	2m	(XR32K)
Wire 3202 Blue	2m	(XR33L)
Wire 3202 Green	2m	(XR35Q)

K2625 DIGITAL TACHOMETER

For cars or motor-cycles running on petrol or gas. Can act as a general purpose rev. counter. Range: 100 to 9900 RPM on a 2 digit display. Easy to calibrate. Requires 10 to 15V DC at 200mA. Front panel 70 x 90mm.

Order Code	Type	Price each
VE01B	Velleman Kit K2625	£25.99

K3504 CAR ALARM

This alarm detects instantaneous voltage drops of the battery caused, for example, by the courtesy light or boot light being switched on. To show you that the alarm is working properly, the kit has the following two control indicators: Flashing LED to indicate that the adjustable exit delay time has expired and that the alarm is armed; Pre-alarm (built-in buzzer) to remind you that the alarm is armed, so that you don't forget to

switch it off. The alarm can be switched on and off very easily, either automatically through the ignition lock or remotely controlled by our infra-red code lock K6704 and K6705 for example.

Order Code	Type	Price each
VE02C	Velleman Kit K3504	£15.99

K2599 INTERMITTENT WIPER CONTROLLER

2

Features

- ★ **Timer intervals 5, 10 & 15 seconds**
- ★ **Relay output: 2 x 5A single pole change over contacts**
- ★ **LED indicator**

This project is ideal for updating the windscreen wiper control installed in older cars. An intermittent setting, featuring three different time intervals of 5, 10 and 15 seconds is provided for matching to weather conditions. The advantages of intermittent wiping are that it extends the working life of the wiper blades and reduces the mechanical wear of the wiper motor and gearbox.

Specification

Power supply:	12V to 15V DC
Supply current	
output off:	25mA
output on:	100mA
Interval lengths:	5, 10, and 15 seconds
PCB dimensions:	82 x 52 x 40mm

Optional Items

The following items, not included in the kit, may also be required.

Ribbon Cable 10 way	As Req	(XR06G)

VF31J	Velleman Mod AM973	£1.29

AM956 SHOCK DETECTOR

A ready-made electronic shock detector that can be installed anywhere in the car. The unit provides protection if an attempt is made to force entry, to tow or jack the car etc. The detector has adjustable sensitivity, LED indication, is easy to install, and makes a valuable addition to suitable existing car alarms.

Order Code	Type	Price each
VF28F	Velleman Mod AM956	£9.99

K2644 FROST INDICATOR

Features

- ★ **Adjustable indication threshold**
- ★ **Ideal beginners' project**
- ★ **Low cost**
- ★ **9V battery or 12V vehicle electrical system**

Applications

- ★ **Provides warning of dangerous driving conditions**
- ★ **Helps you to prevent water pipes from freezing and bursting**
- ★ **Temperature warning for cold stores**
- ★ **Greenhouse frost alert**
- ★ **General remote temperature sensing**

Continued on next page.

TOP QUALITY PRODUCTS AT SUPER LOW PRICES!

Fax your orders to: 01702 553935

Continued from previous page.

Preset temperature threshold indication is important where fluctuating or wrong temperatures can cause problems. This can occur in the freezer, cold stores, greenhouses or on icy roads etc. The project comprises a sensor and a main PCB which will give visual indication when the temperature is between +3°C and -3°C. A flashing LED indicates when the temperature is nearing freezing point and below this point the LED is on continuously. A rugged temperature sensor with mounting stud is included.

Specifications

Supply voltage:	9V to 15V DC
Supply current:	25mA
Sensor:	NTC thermistor
Completed PCB dimensions (without LED):	56 x 20 x 40mm

Optional Items

The following items, not included in the kit, may also be required.

2k2 Min Res	1	(M2K2)
PCB Pin 214	1 Pkt	(FL21X)
M3 Isoshake Washer	1 Pkt	(BF44X)

Order Code	Type	Price each
VE04E	Velleman Kit K2644	£7.99

K3505 HEAD LIGHT INDICATOR

This clever module will be invaluable to car owners whose vehicles' lighting switch allows the headlights to remain 'lit' even if the ignition switch is off. This will result in the battery being reduced to a discharged state, so that it will be impossible to start the car. The module is designed to give a repeated audible alarm tone to remind you that the main lights are on when the ignition is switched off, so helping to prevent a flat battery. It can also be configured to give a continuous alarm tone to remind you to switch your lights on (this is a requirement in certain countries outside of the UK). PCB size: 57 x 48mm.

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 65.

Order Code	Type	Price each
VF24B	Velleman Kit K3505	£8.99

K3503 100W STEREO CAR AMPLIFIER

Features

- ★ Switchable line/CD and speaker level inputs
- ★ Wide frequency response (10Hz to 100kHz)
- ★ Twin switching power supply
- ★ 12V or 24V operation
- ★ Remote power off/on control
- ★ Push-pull BTL outputs

This affordable high power amplifier for cars employs a modern switching PWM power supply to boost the nominal 12V (or 24V for trucks) supply voltage to approximately 33V, enabling the amplifier to deliver higher power levels. Such switched mode power supplies (SMPS) using DC to DC converters help to deliver rock solid bass with a performance that is immune to supply line noise and battery fluctuation. Using FET switching transistors, the K3503 maintains tightly controlled regulation which results in stable, ripple-free supply voltages. Bipolar transistors are used in the audio output stages as they offer increased output efficiency. The speakers are directly coupled to the outputs to give a clean, powerful bass response. The amplifier will accept low level i.e. speaker outputs from a radio cassette, and line level inputs. Kit K3506 can be used to prevent audible thumps at switch-on.

Specification

Output power:	2 x 100W peak (2 x 50W rms) into 4Ω 2 x 70W peak (2 x 35W rms) into 8Ω
Frequency response:	15Hz to 20kHz (-3dB) LOW input 10Hz to 100kHz (-3dB) LINE/CD input
THD at 1kHz:	0.15%
S/N ratio:	>100dB (A-weighted)
Channel separation:	55dB
Input sensitivity	
LINE/CD:	0.5V rms minimum
LOW:	1V rms minimum
Input impedance	
LINE/CD:	47kΩ
LOW:	135Ω
Power supply:	10V to 16V (14.3V nominal) at 20A 20V to 30V (28V nominal) at 10A
Quiescent current:	650mA
Dimensions:	250 x 190 x 50mm

Kits and Special Parts

A complete kit of parts (including the PCB) is available. Full construction details may be found in Maplin Magazine Issue 55. Kit K3506, which can be used to prevent audible thumps at switch-on, is also available.

K3502 PARKING RADAR

Features

- ★ Audible warning of obstacles
- ★ Easy to install
- ★ Adjustable range

This Sonic Car Parking Radar System is designed to assist you or your partners parking skills by using ultrasonics to measure a distance. A sensor is mounted at the back of the car and gives an indication of the distance between your car, and the car parked behind you, or other obstacles (only at the same height as the sensor). When the preset minimum distance is crossed, an audible signal is generated.

Specification

Measuring range:	5cm to 1.5m
Transmission frequency:	40kHz
Power supply:	10V to 15V DC 16mA max.

Optional Items

The following items, not included in the kit, may also be required.

Plastic Box D-003	1	(ZB01B)
Plastic Box MB8	If Req	(KC90X)
M3 Insulated Spacers	1 Pkt	(FS38R)
6-Core Cable	As Req	(XS54J)
Zip Wire	If Req	(XR39N)
Wire Gauze	As Req	
Silicon Rubber Sealant	As Req	
In-line Fuse Holder	1	(RX51F)
100mA 1 1/4 in. Fuse	1	(WR08J)

K3500 MULTI-FUNCTION CAR INTERIOR ILLUMINATOR

After getting in your car and closing the door, this circuit makes the interior light stay on for an adjustable time.

Switch off delay adjustable between 0 and 60 seconds. Simple connection to most cars. Current consumption: 13mA min.

Order Code	Type	Price each
VE06G	Velleman Kit K3500	£10.99

K3508 IN-CAR POWER SUPPLY

This power supply unit allows the use of a conventional amplifier or amplifying module in a car, and is exclusively suited for music loads. Ideally suited for this purpose is the VF40T amplifier. The advantage of a separate power supply is twofold: Firstly it can be placed adjacent to the battery to keep the thick connecting wires very short, and reduce power loss to a minimum. Secondly, the amplifier can be placed

THE BEST OF SERVICE

close to the loudspeakers, (e.g., in the car boot) thus maintaining optimal damping for an excellent reproduction of bass frequencies. Remote control switching of the power supply is provided. To avoid interference the 0V output is separated from the car's mass (chassis). Supplied with a casing.

Specification

Input voltage:	10V to 15V DC
Current consumption:	30A max.
Output voltage:	±35V symmetrically (unstabilised)
Output power:	300W max.
Efficiency:	90% max.
Dimensions:	210 x 84 x 50mm

COMPUTER PROJECTS

RS232/TTL CONVERTER

- ★ Operates from single +5V power supply
- ★ Meets all RS232C specifications
- ★ Normal or inverse logic
- ★ Two drivers and two receivers
- ★ Onboard voltage quadrupler
- ★ ±30V input level protection
- ★ ±9V output swing with +5V supply
- ★ Low power consumption

Not all home microcomputers or peripheral devices have serial data signals at RS232C logic levels. A method of converting +5V TTL signals to RS232C levels (and vice versa) is needed and the converter module does just this. The heart of the unit is the MAX232 IC which is a dual RS232 receiver/transmitter that meets all EIA RS232C specifications while only using a +5V power supply. This significantly simplifies the system design by removing the need for power supply voltages of other than +5V. The MAX232 has two onboard charge pump voltage converters which generate +10V and -10V power supplies from the single +5V power input. Output voltage swing is typically ±9V with the nominal 5kΩ input resistance of an RS232 receiver. Maximum data rate is 19,200 baud. An onboard DIP switch allows use of normal or inverse logic for transmitted/received data.

Optional Items

The following items, not included in the kit, may also be required.

Threaded spacer M3	1 Pkt	(FG38R)
Isobolt M3 x 6mm	1 Pkt	(BF51F)
Isoshake M3	1 Pkt	(BF44X)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 31.

A ready assembled version is also available.

ULTRA-VIOLET INSECT KILLER

Use this ultra-violet insect trap to help you control the number of flying insects around your home, office or workplace. Simply plug the fly trap into an existing 13A socket outlet, suspend it approximately 1.8m above floor level, making sure that it is out of the reach of children and turn on the power. It's that easy. For optimum performance suspend the trap above entrances or windows where insects may be intercepted. The ultra-violet light, which is effective for approximately 2 metres around the trap, attracts light sensitive insects towards the high voltage grid of the trap and electrocutes them.

Supplied with small dusting brush and mains cord approximately 1.5m long.

TLC548 8-BIT ANALOGUE-TO-DIGITAL CONVERTER

Features

- ★ Cost effective with high performance
- ★ Low power consumption
- ★ Conversion time 17µs (max)
- ★ Differential reference input voltages

Applications

- ★ Interface sensors to the PC Weather Station
- ★ 8-bit resolution Analogue-to-Digital converter
- ★ Serial interface with tri-state data output

The TLC548I is a very powerful IC, suitable for a multitude of tasks, and is based on an 8-bit, successive approximation sample-and-hold, Analogue-to-Digital (A-to-D) converter, which makes 8-bit A-D conversion easy, cost effective and usable. The device is capable of up to 45,500 conversions per second, and needs only one external control signal. The specially designed PCB can be tailored for any task within the IC's specification, but the module was developed mainly for use with the PC Weather Station project.

The IC is a complete data acquisition system on a single chip, designed for serial interfacing with a microprocessor or computer via a tri-state, TTL compatible data output port and an analogue input port. It includes versatile control logic and on-chip sample-and-hold that can operate automatically or under microprocessor control. Voltage requirements for the IC are between +3V and +6V DC with, typically, a low power consumption of 6mW.

The differential high impedance reference inputs provide circuit isolation from logic and supply noise. The analogue input can be any voltage within the range of 0 to 5V DC; the corresponding digital output is a value between 0 and 255, proportional to the input voltage. The kit instructions include details of applications for a light sensor, temperature sensors and potentiometer position sensor. Details for an external clock oscillator circuit, which is required if the module is not used with the PC Weather Station project, is also given. In addition, modules can be cascaded using a 'master/slave' system (the 'master' board has the clock and power supply connected). Up to eight modules can be used in this way, but you will need suitable multi-way inputs, such as the 24-Line I/O Expansion kit (Order Code LP12N). An ABS box type MB1 (Order Code LH20W) can be used to house up to three TLC548I boards.

Optional Items

300mA Unregulated AC Adaptor	1	(XX09K)
ABS Box MB1	1	(LH20W)

Kit and Special Parts

A complete kit of parts, including the PCB, is available (but excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 75.

The Maplin 'Get-You-Working' Service is not available for this project.

8-BIT I/O MODULE WITH RS232 INTERFACE

A ready-built module which provides any RS232-equipped computer with an 8-bit parallel I/O port. This will allow your computer to drive external apparatus and will open up exciting possibilities in computerised control and automation. (For relatively high current devices such as relays and motors an external driver transistor is required because the outputs can normally only source a maximum of 10mA.) Each bit can be configurable as an output, or a digital (CMOS or TTL compatible) input (this could be, for example, a servo pulse from an optocoupler). All I/O lines are provided with internal pull-up resistors so that a minimum of external components are required. Apart from the 8 I/O ports, there is a strobe output (CLK) which can be used as an interrupt or to trigger flip-flops, etc. A red LED is fitted which flashes whenever serial information is received from the computer. Controlling the module from the host computer is achieved using commands made up of standard ASCII characters which may be embedded in a program. Example programs written in BASIC are provided. Connection to the computer is by three wires: transmit (TX), receive (RX) and ground (there is no handshaking). A +5V regulated supply line is also required and this could also be taken from the computer. The RS232 interface on the module may operate at either 600 or 1200 baud, and the format may be 7-bit or 8-bit (odd or even parity).

Specification

Interface requirements: RS232 or compatible
 I/O port configuration: As 8 inputs, 8 outputs or any combination of the two
 Supply requirements: +5V at 100mA (max)
 Other features: Byte or bit read/write commands
 Auto baud rate selection
 Auto format/parity selection
 TTL or CMOS compatibility
 LED indication of valid command reception

Full instructions for connection/use and sample BASIC programs can be found in Maplin Magazine Issue 49.

Order Code	Type	Price each
LP85G	8 Bit I/O + RS232	£19.99

PARALLEL INTERFACE RELAY CARD

- ★ Robotics
- ★ Slide/tape recorder control
- ★ High power relay control
- ★ Programmable low voltage switching

This simple unit will allow up to eight independent relays to be controlled from any computer having a

'Centronics' parallel printer port. The device behaves as a printer, thus avoiding the necessity for special interfacing electronics or low-level software drivers. The relays are controlled simply by 'printing' an ASCII character, chosen to represent the required relay to be switched. The unit has on-board regulators but requires an external power supply. A 12V 800mA unregulated PSU (YM85G) is an ideal power source.

Specification

Power supply: 15V DC regulated or 12V DC 800mA unregulated
 Maximum current: 500mA (all relays 'on')
 Relay contact ratings: 3A DC/AC resistive, 1.5A inductive, 24V DC
 Computer interface: Parallel printer port ('Centronics')

Optional Items

The following items, not included in the kit, may also be required.

AC Adaptor Unreq. 800mA	1	(YM85G)
IBM PC Printer Cable	If Req.	(JC11M)
Male-to-Male Printer Cable	If Req.	(JC14Q)
Male-to-Female Printer Cable	If Req.	(JC15R)

Kit and Special Parts

A complete kit of parts (including the PCB, Front Panel and instruction leaflet) is available (excluding optional items). The PCB and Front Panel are also available separately. Full construction details may be found in Maplin Magazine Issue 57. PCB dimensions: 160 x 109.2mm.

Order Code	Type	Price each
LT08J	A1 Centronics Rly Card	£34.99
GH16S	Centronics Relay PCB	£4.75
KP46A	F/P Cent Relay Card	£2.99

FIBRE OPTIC DATA LINK MODULES

Single Channel

A pair of ready-built transmitter and receiver modules supplied with 3m of optical fibre. They have been designed for serial data transmission with rates of up to 20K baud, and will work with both CMOS and TTL logic levels. The transmitter is also RS232 compatible. Power supply requirements depend on the logic family being used (5V for TTL; 12V for CMOS). The transmitter and receiver employ purpose-made opto-couplers operating in the visible red part of the spectrum which mate with each end of the optical fibre. These modules allow experimentation with optical data transmission which is particularly useful in electrically noisy areas. Full construction details may be found in Maplin Magazine Issue 47.

Order Code	Type	Price each
LP81C	1Ch Data Link	£22.99

10 Channel

A pair of ready-built transmitter and receiver modules comprising a 10 channel transmitter, matching receiver and 3m of optical fibre cable to connect them. The system offers the same benefits as the single channel link, but features 10 independent channels for parallel operation. It offers multiple channel operation by multiplexing the input channels and transmitting the information in serial format along the optical fibre. At the receiver they are demultiplexed and latched to the outputs. Because of this, the data transmission rate is slightly lower than with the single channel system. Power supply requirements are 5V DC regulated and 0V ground. The inputs of the transmitter feature pull-up resistors and are compatible with CMOS and TTL logic pulses. They can also be used with switches and keyboards. The 10 data outputs are open-collector to enable interfacing to different logic technologies. There is also an active-low clock output derived from the multiplexing process with a pulse width of approx. 1mS. This can be used as an interrupt request or latch for use with microprocessor systems. Full construction details may be found in Maplin Magazine Issue 48.

Order Code	Type	Price each
LP84F	10Ch Data Link	£36.99

VIDEO DIGITISER

- ★ 312 x 255 'bit' Resolution
- ★ 8-bit Luminance Resolution
- ★ Controller Board enables Home Micro to run in BASIC

Save television pictures on disk or tape in digital form with this video digitiser project. If using a monochrome TV camera, your computer could have the power of sight, which opens up all sorts of possibilities in such areas as image recognition, movement detection etc., even extending to sophisticated security monitoring. The basic digitiser requires the host computer to run in machine code, since the latter will have to operate conditionally on the TV line and frame sync pulses. Alternatively a Controller Board is also available containing all logic to perform this function, making it possible for the host computer to run a BASIC program.

The Digitiser Board converts a video picture from a video camera or a V.C.R. (still frame image) into digital words which are used to represent the luminance, or brightness, of the X and Y co-ordinates within the picture. A complete scan of these co-ordinates are then sent to the host computer for display on a graphics screen, or organised into a file for storage onto disk or tape. The final resolution will depend on the graphics capability of the computer up to the limits of the Digitiser, which has a maximum vertical resolution of 312 lines (although twice this number should be available if the interlace frame is

also stored), by 255 sample points on one line. The picture therefore comprises a screen of rectangular blocks, each of which can have a luminance resolution of 255 levels. I/O connections required are one 8-bit output and one 8-bit input port minimum, allowing for up to 5-bits of luminance information. The Digitiser Controller Board is an optional addition to the Video Digitiser which greatly simplifies programming if you cannot easily write machine code, because the controller relieves the micro from having to detect line and frame sync pulses by software. Instead this is performed by the Controller logic, requiring only a 'start' signal from the host micro to begin loading one complete picture into its own memory, which is transferred piece-meal to the host. This enables BASIC programs to be used by the host, since the controller takes care of the detection of the TV sync pulses.

Kit and Special Parts

Complete kits are available and the pcbs are also available separately. Full construction details may be found in the Best of Maplin Projects Book 5.

Z80A DEVELOPMENT SYSTEM

Z80A CPU Module

- ★ Accepts up to 8K of on-board memory
- ★ Has facilities for keyboard and displays
- ★ 4 decoded I/O select lines
- ★ Battery back-up available for CMOS RAMs

The Z80 microprocessor has been with us for many years and is still proving successful, with many new computer developments giving evidence of this fact. Practical applications of the CPU require a module with memory, input/output, clocks and facilities for further expansion.

The Maplin CPU Module can accept up to 8K of memory which is decoded in 2K (2048 bytes) blocks. The first block contains the operating system in ROM or EPROM and the second, third and fourth blocks can be either RAM or ROM. Static or CMOS 2K RAMs may be fitted (totalling 6K) and battery back-up is available, via switches, for CMOS data retention, if required. Both Z80 or Z80A processors can be fitted, and the system clock has facilities for different size crystals to suit, e.g.. 1MHz crystal for Z80 or 2.4576MHz crystal for Z80A.

A keyboard/display decoding IC can be fitted allowing for small key or large (64-key) type keyboards (or sensors) for data input. This IC can also drive seven segment LED displays. This interface can scan up to 64 keys – expandable to 128 with suitable decoding – and sensors or strobed keys may be used. Two key lockout and 'N' key rollover can be programmed, and keyboard entries generate an interrupt (NMI) to the

Z80. Either four or eight (programmable) 7 segment displays can be added with blanking facilities, and all connections are made via a 26-pin IDC socket. Four decoded I/O select lines are available and all data and address lines are buffered before being brought out to an expansion edge connector. All of the Z80 control lines are available, most of which are buffered, including a system CLOCK output, RESET output, SYSTEM RESET input and a switched NMI input. The NMI can be taken from either the KBd/ display interface or directly from the expansion connector.

Optional Items

The following items, not included in the kit, may also be required.

26-Way IDC Header Plug	1	(FJ15R)
2 x 28-way PC Edge Conn	1	(FG23A0)
2-4576MHz Crystal	1	(FY81C)
8279 Kbd/Display I/Face	1	(YH51F)
2716 2K EPROM	1	(QQ07H)
6116 2K CMOS EPROM	3	(UF33L)
or 2716 2K CMOS EPROM	3	(QQ07H)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine issue 58. PCB dimensions: 152 x 119mm.

Order Code	Type	Price each
LK67X	Z80 CPU Module Kit	£37.99
GB86T	Z80 CPU Module PCB	£16.99

Z80A Keypad

Features

- ★ Type in your own hex code easily
- ★ Splashproof membrane keypad
- ★ Large double-digit displays
- ★ Key-press bleep
- ★ Simple construction
- ★ Monitor EPROM available for Z80A CPU Module

Applications

- ★ Software development
- ★ Control applications
- ★ Education

When used with the Z80A CPU module (LK67X), this keypad with its splashproof membrane keys and key-press bleep forms a complete Development System. The Development System can be housed in an ABS console case for convenience. The keypad consists of a 16-key HEX matrix and, to obtain additional functions, a further key (CTRL) is provided. This, used together with any other key, allows up to 16 control functions, with some of these being used in the system monitor. The keypad includes an 8 digit 7-segment display with the first four, from left to right, forming 'address field', the next two 'status field' and the last 'data field'.

Membrane keys tend to have no 'feel', so a piezo sounder and an oscillator circuit produce an audible bleep whenever a key is pressed. To differentiate between normal and control key functions a warbling tone is produced if the control key is pressed in

conjunction with another key. A power up bleep is also produced when first switched on, and if the reset button is pressed a bleep will also be produced. The optional monitor EPROM is plugged into the Z80A module PCB and provides the ability to access any memory location to examine and/or modify data; step backwards or forwards through memory to examine, edit or enter program data; run a program from a given start location. A HALT instruction at the end of a program will result in a pause, and if a RESET from the keypad is entered, the module will return to the monitor allowing examination of memory addresses.

Optional Items

The following items, not included in the kit, may also be required.

EPROM 2716/M12 (Monitor)	1	(UH87U)
ABS Console M6007	1	(LH67X)
Filter Red	1	(FR34M)
Keypad Cableform	1	(FP63T)
Double Bubble Sachet	1	(FL45Y)
Steel Screw M3 x 25mm	1Pkt	(JY26D)
Threaded Spacer M3	1Pkt	(FG38R)
Isoshake M3	1Pkt	(BF44X)
Steel Nut M3	1Pkt	(JD61R)
Spacer M3 x 1/4 in.	1Pkt	(FG33L)
Steel Washer	1Pkt	(JD76H)
Steel Screw M3 x 20mm	1Pkt	(JY25C)

Kits and Special Parts

A complete kit of parts (including the PCB, hex keypad and instruction leaflet) is available (excluding optional items). The PCB, EPROM, cableform and hex keypad are also available separately. Full construction details may be found in Maplin Magazine Issue 58.

Order Code	Type	Price each

RUGBY CLOCK RECEIVER

3

- ★ Normal and inverted outputs
- ★ 12V operation
- ★ Selectable filter response
- ★ Visual and audible indication of signal

The Rugby Clock Receiver is a simple fixed frequency (60kHz) receiver intended for the reception of the MSF standard time service, transmitted from Rugby in central England. The Rugby MSF transmission includes time and date information, transmitted using both 'fast' and 'slow' codes, based on the Binary Coded Decimal (BCD) system. The receiver provides a normal and inverted digital output, corresponding to the transmitted information, together with an audible and a visual indication.

To make use of the digital outputs, it is necessary to use some form of decoder; this may be either a dedicated decoder or a computer running the appropriate software. A program written for the IBM-PC and compatibles in GW-BASIC is listed in the Maplin Magazine Issue 47, along with full construction and alignment details.

The receiver is built on two PCBs. PCB 1 is used for the PLL and digital part of the circuit, and RF amplifier circuitry is on PCB 2. For screening purposes, PCB 1 is housed in a small metal box, which is located in a position remote from PCB 2.

The receiver requires a +12V to +16V power supply that is capable of supplying at least 50mA. A suitable supply is XX09K. It is recommended that a power supply with a relatively smooth output is used, as this will improve reliability of operation.

Optional Items

The following items, not included in the kit, may also be required.

24-line PIO Card	1	(LP12N)
37-way D-type Socket	1	(FV72P)

Kit and Special Parts

A complete kit of parts (including the PCBs and instruction leaflet) is available (excluding optional items). The PCBs are also available separately. Full construction details may be found in Maplin Magazine Issue 47.

Order Code	Type	Price each

PROGRAMMABLE PC I/O CARD

- ★ For use with IBM PC, PC-XT, PC-AT and compatible clones
- ★ 24 input lines
- ★ Fully programmable from BASIC
- ★ Base address selectable
- ★ Uses industry standard 8255 PPI IC

A 24-line digital I/O (Input/Output) card for use on many IBM PCs and clones. The card is based around the industry standard 8255 PPI (Programmable Peripheral Interface) IC. A 37-pin D-type connector is integral to the card and protrudes from the expansion board. The 8255 PPI IC provides the necessary control, latching, buffering and handshaking of data to and from the card. A number of TTL chips provide access to the 8255 from the host computer. Both

CMOS and TTL logic can be read, but only TTL +5V can be written. Extensions to the card can enable the device to write to CMOS levels. This card is not able to handle large current devices directly, however, circuits supporting the card are shown in the magazine. A GW BASIC program is supplied in the article for testing the card, producing a square wave at all the ports. Full operating procedures using GW BASIC commands are also shown in the leaflet.

1

Optional Items

The following items, not included in the kit, may also be required.

D-Connector Jack Post	1 Pr	(FP31J)
8255 Data Book	1	(XK97F)

Kit and Special Parts

A complete kit is available and the pcb is also available separately, as well as the 8255 Data Book. Full construction details may be found in Maplin Magazine Issue 43.

A ready assembled version is also available. PCB dimensions: 286 x 40mm.

Applications Information

Further applications information on using the Programmable PC I/O Card may be found in the following issues of Electronics – The Maplin Magazine:

Using Temperature Modules – Issue 71 (XA71N): Gives details of how to measure temperature. Requires Temperature Module Expansion Converter Kit (LM36P) and Temperature Module (FE33L) – article includes BASIC program listing.
IBM PC Centronics Input Port – Issue 77 (XA77J): Gives details of how to receive data from another computer's centronics parallel printer port – useful when transferring data from an old computer system where disc or file formats, etc., are incompatible – article includes BASIC program listing.
Rugby Clock Receiver – Issue 47 (XA47A): Gives details of how to receive and decode Rugby MSF Clock data. Requires Rugby Clock Receiver Kit (LP70M) – article includes BASIC program listing.
Practical Robotics – Issues 42 (XA42V), 43 (XA43W), 44 1991 (XA44X), 59 (XA59P): Gives details of how to build and control robots from a computer – Issue 59 gives specific information relating to the Programmable PC I/O Card which can be directly applied to the articles in Issues 42 to 44 – articles include BASIC program listings.

PC SOUND GENERATOR

2

Features

- ★ Plugs into PC expansion slot
- ★ Alterable base address
- ★ Six frequency generators
- ★ Two noise generators
- ★ Two six channel mixers
- ★ Envelope shapers and amplitude control
- ★ Simple construction

Applications

- ★ Sound effects
- ★ Computer music

If IBM PCs (or their clones) lack anything, it must be decent sound, invariably supplied with a squeaky little speaker with only one voice! This stereo sound PC card is based around the Philips SAA1099 stereo sound IC. Each stereo channel possesses 3 tone generators each with a range of 31Hz to 7.81kHz and a noise generator, and each tone generator can be programmed over 8 octaves (each of which consists of 256 tones). The amplitude of each tone generator is programmable to 16 levels. In addition there are two (one for each channel) envelope generators; these can modulate the tone with sawtooth and triangular waveforms, in single or continuous mode, providing various effects like attack, decay, delay, sirens, alarms, and bomb drops – not to mention music. A TDA 2822 audio amp IC provides about 0.6W per channel into 8Ω speakers with a 5V supply. A 3.5mm stereo audio output socket is provided, which can be used with 'Walkman' – style headphones or extension speakers. Two individual volume controls are provided to correct the sound balance to compensate for the location of your speakers relative to your ears. A PC computer uses 32 addresses in the 0300H to 031FH range for additional cards, and the PC Sound Generator card can be used anywhere in this range. Knowing where your existing card(s) is located, you can place your PC Sound Generator at a different address. The kit includes instructions for setting up the address logic and programming the card. Once installed in a PC, it may be possible that the audio IC will pick up noise from other computer components and busses. To overcome a noise problem, an optional metal screen is available which can be fitted over the amplifier stage area on the top side of the PCB to exclude interference from surrounding circuitry.

Optional Items

The following items, not included in the kit, may also be required.

Lo-Z Mic Preamp Case	1	(FD20W)
----------------------	---	---------

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 58.

PC OPTO-ISOLATOR CARD FOR THE IBM PC AND COMPATIBLES

2

Features

- ★ For use with IBM PC, PC-XT, PC-AT and compatible clones
- ★ 100% galvanic isolation
- ★ Eight 'double buffered', opto-isolated inputs with strobe
- ★ Eight opto-isolated transistor switch outputs
- ★ High isolation voltage
- ★ Fused 5V output to power external circuits
- ★ Selectable base address

Applications

- ★ Isolated data links
- ★ Connection of switches, tachos, pulse devices and detectors
- ★ Robotics
- ★ Process control
- ★ Timer control
- ★ Home automation
- ★ Control of lamps, motors, solenoids

This project is a versatile interface card for use with the IBM PC, PC-XT, PC-AT and compatible clones, featuring electrical isolation of both inputs and outputs using the opto-coupling technique. There are separate, 8-bit parallel input and output connections on the card, with an additional strobe input being provided for the 8-bit parallel input. This strobe can be disabled if required, improving the flexibility of the card.

The card slots into any one of the vacant expansion slots provided on the host PC, and the power, control, address and data signals are obtained from the computer's expansion bus. The opto-isolated inputs and outputs are brought out to a rear panel mounted, 37-way, female D-range connector, together with a fuse-protected +5V supply, allowing easy connection with the outside world.

The card uses discrete logic, as opposed to a fully programmable input/output IC, and therefore has the advantage that it does not need to be configured or initialised before use. Data can simply be written and read to, and from, the appropriate address. A further advantage is that a simple self-diagnostic function could be included in the software to check the presence of the card at the correct input/output map location, and whether the card is functioning correctly.

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available. The PCB and 37 Way D-Type bracket are available separately. Full construction details may be found in Maplin Magazine Issue 66.

Order Code	Type	Price each
LT17T	PC Opto-Iso I/O Card	£29.99
GH23A	Opto-Isolate I/O PCB	£7.99
CR45Y	PC Bracket 37 Way D	£2.25

PC PROTOTYPING CARD

Features

- ★ For use with IBM PC, PC-XT, PC-AT and compatible clones
- ★ Matrix of DIL IC spaced solder pads and power rails
- ★ Buffered address and data lines
- ★ On-board address decoder
- ★ Selectable base address

Applications

- ★ Prototype development of PC I/O cards
- ★ Constructing custom 'one-off' adaptor cards

This versatile project is an interface card for use with the IBM PC, PC-XT, PC-AT and compatible clones, specifically designed to allow the home constructor and experimenter to develop a custom-built expansion card for his or her PC, to perform a specific hardware interfacing task which is not catered for by any normally available cards. It will be particularly useful in the field of electronics where some special interface is needed, and equivalent industrial I/O cards are expensive. The card plugs into any one of the vacant expansion slots provided on the host PC's motherboard, and the power, control, address and data signals are made available from the computer's expansion bus. External connections can be brought out to a rear panel mounted, 37-way, female D-range connector. This connector is optional however, and other, more specific connectors can be used instead if the application demands.

Flexibility is also increased from the software point of view, by the provision of the MEMR and MEMW lines, allowing configuration of the card as memory (therefore addressed in the memory map), or alternatively the IOR and IOW lines are available, allowing the card to be configured as an I/O device of some sort, as are all the IRQ lines.

The remainder of open space over the rest of the component side of the card has matrices of plated through holes organised to a 0.1in. grid. Those above the buffering circuitry have pads interconnected in favour of transistor circuits and resistor networks, while those occupying the front half are essentially configured for DIL ICs. Five bus bars are provided down the centre of the card carrying 0V, +5V, -5V, +12V and -12V supply rails.

If the 37-way, rear panel connector is used, then all the connections (which are open-ended, i.e. not connected to anything) are brought to separate pads, contained in the rectangular legend marked 'SK1', with pin identification.

Optional Items

The following items, not included in the kit, may also be required.

RA Socket 37-Way D-Range	1	(JB38R)
PC Bracket 37-Way D-Type	1	(CR45Y)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 67.

Order Code	Type	Price each
LT14Q	PC Proto Card	£31.99
GH39N	PC Prototyping Card	£23.99

PC RELAY CARD FOR THE IBM PC AND COMPATIBLES

2

Features

- ★ For use with IBM PC, PC-XT, PC-AT and compatible clones
- ★ Eight relay changeover contacts
- ★ Switches up to 24V DC/50V AC @ 2A resistive/1A inductive
- ★ Fused 5V output to power external circuits
- ★ Base address selectable
- ★ Multiple cards can be used
- ★ Fully programmable from BASIC

Applications

- ★ Robotics
- ★ Process control
- ★ Time control
- ★ Home automation
- ★ Controlling lamps, motors, solenoids

This project is a versatile relay card for use with the IBM PC, PC-XT, PC-AT and compatible clones. Each relay, of which there are eight on the card, has one set of change-over contacts. The relay contacts are able to switch 'moderate' loads, such as low voltage lamps, motors and solenoids.

The card slots into any one of the vacant expansion slots provided on the host computer. Power, control, address and data signals are obtained from the computer's expansion bus. The relays' contacts are brought out, together with a fuse-protected +5V supply, on a 37-way female D-type connector. The D-type connector protrudes through the expansion card slot facilitating easy connection with the outside world.

The card is based around discrete logic, as opposed to a fully programmable input/output IC, this has the advantage that the card does not need to be configured or initialised before use. Data can simply be written to the appropriate address to set or reset the relevant relays. To simplify programming, it is possible to 'read back' from the card which relay outputs are set or reset, this avoids having to set or reset software flags to keep track of the current relay states. A further advantage is that a self-diagnostic routine could be written into the software to check the presence of the card at the correct input/output map location and whether the card is functioning correctly. Details are given in the kit on how to access the PC Relay Card using GW-BASIC.

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 65.

"Thank You for solving my present buying problem!"

VELLEMAN COMPUTER PROJECTS

K8000 COMPUTER INTERFACE BOARD

An interface card for control applications and functions that connects directly to the printer port. If necessary, a printer can be connected directly to this card. All connections to the computer are optically isolated and the card is controlled using Turbo Pascal programming language. Test and example programs are provided on a disk.

The card has 16 optically isolated connections, which can be configured as either inputs or outputs. In addition, there are nine analogue outputs, one of which is high precision, and four outputs. Up to four cards can be connected together to increase capacity (one master, four slaves), the card can be used with a wide range of associated cards such as K2633, K2634 etc. The module is mains powered.

Specification

Digital outputs I01 to I016	
Optocoupler O/C output:	50mA 30V DC max
Minimum conversion time:	80µs to set 16 outputs
Digital inputs I01 to I016	
Optocoupler input:	5V/5mA min, 20V/40mA max.
Minimum conversion time:	80µs to read 16 inputs
Analogue outputs 8 outputs DAC1 to DAC8	
Resolution:	64 steps
Minimum conversion time:	600µs (1 output), 2ms (8 outputs)
Output current:	6mA max
Output voltage @ 2mA:	0.1V min, 11.5V max (adjustable)
Resolution per step:	165mV
Precision output DA1	
Resolution:	256 steps
Conversion time to set output:	600µs
Maximum output current:	2mA
Output voltage:	0V min, 4.5V max (adjustable at 0.5mA)
Resolution per step:	17.5mV (0 to 4.5V)
Deviation:	26mV max
Analogue inputs - 4 inputs AD1 to AD4	
Resolution:	256 steps
Conversion time:	1ms (1 input) to 1.6ms (4 inputs)
Input voltage:	0V min, 5V max
Input impedance:	50MΩ
Resolution:	19.5mV
Deviation:	30mV max
Communication protocol:	I ² C bus
PCB dimensions:	237 x 133mm

Note: Conversion speed is dependent on the host computer.

K5201 LIGHT COMPUTER

With 16 different programs and seven outputs, this light computer provides a unique visual experience, and is ideal for party lights, discotheques, advertising displays, signalling etc. Each output has its own LED, allowing easy visual checking of the programmes. Controls and the LED displays can be easily mounted on a front panel display. It is possible to make more spectacular displays by using an unlimited number of circuits, and a programme is included that allows two light computers to be cascaded.

Specification

Outputs:	7 via triacs rated at 1.5A max (300W at 220V)
Board power requirements:	7.5V to 9V AC at 250mA
Supply voltage for lamps:	24V to 240V AC
Programs:	16 stored in ROM
Speed:	adjustable between 1Hz and 15Hz
PCB dimensions:	134 x 79mm

Order Code	Type	Price each

K2612 INTELLIGENT MOTHERBOARD AND K2631 EXTENSION KIT SERIAL PORT INPUT/OUTPUT SYSTEM

Features

- ★ Non-volatile memory
- ★ 4-slot expansion board
- ★ Interfaces with any computer via RS232 or 20mA current loop port
- ★ Report on alarm
- ★ Real-time clock/calender

Applications

- ★ Process control
- ★ Multiple interfacing
- ★ Data logging

This serial port input/output extension system is based on an intelligent motherboard which connects to a host computer's serial (RS232) port, or a 20mA current loop, which are normally found on industrial computers. The motherboard has a basic microcontroller and one expansion slot to which can be added an extension card providing four expansion slots. However, up to four expansion cards can be cascaded together so providing a total of 16 expansion slots.

The processor has a clock and a calendar, so that it is possible to execute tasks at particular moments without disturbing the host computer. Additionally, on all inputs an alarmed condition can be used, in which the motherboard automatically sends a message to the computer when an alarm situation arises. All the outputs can be pre-programmed to avoid dangerous situations that might arise after a power failure such as a motor suddenly starting-up.

For each extension board a 9V AC mains transformer will be required, as the extension board has on-board rectification and regulation for the interface PCBs.

Optional Items

The following items, not included in the kit, may also be required.

6264 100nS	1	(UF34M)
62256/43256	1	(UF40T)
R/A D-Range 25W Plug	1	(FG68Y)
Min Tr 9V	1	(WB11M)

Kits and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 59.

K2609 OPEN-COLLECTOR OUTPUT CARD

Features

- ★ 8 open-collector outputs
- ★ 25V 50mA switching capability
- ★ Several cards can be used
- ★ Programmable from BASIC
- ★ Add-on relay card available

Applications

- ★ Automatic test equipment (ATE)
- ★ Machine control and robotics
- ★ General-purpose control

Used in conjunction with the Intelligent Motherboard (K2612), this kit provides up to eight computer controlled switched outputs. These outputs, coupled with relays or triacs, allow the switching of different devices such as lamps, motors, alarm devices etc.

Specification

Outputs:	8 Open-Collector outputs
Sink current:	50mA
Sink voltage:	25V

Optional Items

The following items, not included in the kit, may also be required.

PCB Terminal 2-Way	5	(JY92A)
SPST Octal DIL Switch	1	(XX27E)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 60.

K2633 FOUR CHANNEL RELAY CARD

Features

- ★ Fully isolated change-over contacts
- ★ LED 'ON' indicators
- ★ Remote Installation

Applications

- ★ Model train control
- ★ Flashing signs
- ★ Motor and solenoid control
- ★ Security applications, door locks, etc.

This module is intended for use with the Open-Collector Card (VE92A) and serves to increase the versatility of the RS232 Serial Port Extension System. The module enables the RS232 Extension System to switch heavier loads with isolated supplies than would otherwise be possible with the transistor switches on the plug-in Open-Collector card.

Specification

Single-pole change-over relays:	6V operational
Number of relays per card:	4
Relay current consumption 'on-time':	1mA
Relay card power supply:	9 to 15V DC
Relay contacts ratings:	5A at 28V DC, 2A at 60V DC

CAUTION. Do not exceed the DC rating.

Optional Items

The following items, not included in the kit, may also be required.

Min Res 560Ω	4	(M560R)
Min Res 910Ω	4	(M910R)
Min Res 1k	4	(M1K)
1N4001	As Req	(QL73Q)
For Single Card:		
AC Adaptor 9V 300mA	1	(XX09K)
Or For Two Cards:		
AC Adaptor 9V 800mA	1	(YM85G)
Ribbon Cable 10-Way	As Req	(XR06G)
PC Terminal Blocks 3-Way	4	(JY94C)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 62.

Order Code	Type	Price each
VF00A	Velleman Kit K2633	£13.99

K2634 FOUR CHANNEL TRIAC CARD

To switch AC-voltages by means of an electronic control, one mostly uses relays because of their simplicity. When the switching happens too frequently or too fast, the life time of the contact points will be considerably shortened. This can be completely solved by replacing the relays with triacs. Using opto-couplers, the entire interface network remains isolated from the voltage that has to be switched.

Order Code	Type	Price each
VE97F	Velleman Kit K2634	£12.99

FOR TOP QUALITY & VALUE!

K2611 EIGHT CHANNEL OPTO-COUPLER INPUT CARD

Features

- ★ Up to 8 electrically isolated inputs
- ★ Several cards can be combined
- ★ Programmable from BASIC
- ★ Signals have high immunity to interference
- ★ No additional power supply required

Applications

- ★ Detection of switch states and voltage levels
- ★ External parallel bit data input
- ★ Machine control and general control purposes

The Opto-Coupler Input Card is intended for use with the Intelligent Motherboard for the RS232 Serial Port Extension System, as described in Issue 59 of 'Electronics'. The card is initially designed to allow the intelligent motherboard to receive information on the state of switches (ON or OFF). This would be useful for such applications as alarm systems, registration of machines (position and end-of-travel sensors) etc. The inputs are electrically isolated from the board and the rest of the extension system circuit by the use of opto-coupler devices.

However, mains voltage SHOULD NOT be applied to the board. The correct maximum voltage input should be 35V.

Optional Items

The following item, not included in the kit, may also be required.

Optoisolator	4	(WL35Q)
--------------	---	---------

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 63.

K2618 DIGITAL-TO-ANALOGUE CONVERTER CARD

Features

- ★ Full 8-bit resolution
- ★ Output range 0V to 1V DC in 255, 4mV steps
- ★ Non-linearity of ±0.5V LSB
- ★ Programmable from BASIC

Applications

- ★ Analogue control of motor speed, attenuators, frequency generators, etc.
- ★ Automated varying voltage generation
- ★ General-purpose analogue signal generation

The Digital-to-Analogue Converter Card is intended for use with the Intelligent Motherboard for the RS232 Serial Port Extension System, as described in Issue 59 of 'Electronics - The Maplin Magazine', and is an addition to the other plug-in cards in this range. The D-to-A (Digital-to-Analogue) Converter transforms a binary number, presented to it via the system data bus from the Intelligent Motherboard, into an analogue voltage output. The 8-bit binary input offers up to 255 possible steps, each step producing an analogue DC output of 4mV. With a binary input of 0000 0000 (decimal 0 or hex 00), the minimum output from the D-to-A converter is 0V, but with an input of 1111 1111 (decimal 255, hex FF) an output of 1.02V is obtained.

This output from the D-to-A Converter Card could then be used to control analogue equipment, such as the volume of an automated mixing desk or the control of lighting, and even motors and actuators, etc.

Optional Items

The following items, not included in the kit, may also be required.

Axial Electrolytic 2μ2F 100V	1	(FB15R)
Min Res 10k	2	(M10K)
Min Res 1k	1	(M1K)
Monores 100nF	3	(RA49D)

K2610 ANALOGUE TO DIGITAL CONVERTER CARD

Features

- ★ Input voltage range 0V to 5.1V
- ★ 0.02V resolution

Applications

- ★ Variable voltage input
- ★ Analogue information gathering
- ★ Digital conversion
- ★ Computer-based measurement/monitoring

This kit enables the Intelligent Motherboard to receive information from devices that can output a DC voltage of up to 5.1V with a resolution of 20mV. Information from various sensors, such as light dependent resistors (light sensors), potentiometers (position sensors), thermistors (temperature sensors), and pressure sensors, can be sampled.

Specification

Input sensitivity:	5.1V (full-scale)
Conversion type:	8-bit successive approximation
Number of steps:	256
Step resolution:	20mV
Linearity error:	±1 LSB
Power supply:	5V (from Intelligent Motherboard)
Dimensions:	106 x 106 x 15mm

Optional Items

The following item, not included in the kit, may also be required.

ZN448E ADC	1	(UF43W)
------------	---	---------

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 61.

VE93B	Velleman Kit K2610	£31.99

K2635 8 TO 1 CHANNEL ANALOGUE MULTIPLEXER CARD

Features

- ★ Selects 1 of 8 inputs with one single instruction
- ★ Attenuation of each separate input if required
- ★ Amplification of each input
- ★ On board 8-bit address decoding

Applications

- ★ Instrumentation
- ★ Automated signal switching

This Multiplexer has been designed to overcome the limitations of the A-to-D Converter Card, that is if more inputs are required, then extra A-to-D cards would be needed. To get around this problem, several inputs can be multiplexed, that is, the one A-to-D card is 'shared' amongst several peripheral devices. The 8 to 1 Channel Analogue Multiplexer can accept eight inputs, each of which can be individually attenuated, and provide an output that can be amplified by a maximum of x5.

Optional Items

The following item, not included in the kit, may also be required.

SPST Octal DIL Switch	1	(XX27E)
-----------------------	---	---------

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 65.

DEVELOPMENT PROJECTS

MAX293/297 ELLIPTIC FILTER

Applications

- ★ Voice and data signal filtering

Features

- ★ 8th-order elliptic filters
- ★ Internal or external clock
- ★ Operates with a single +5V supply or dual ±5V supplies
- ★ External op amp for clock noise filtering

Specification

Supply voltage:	+5V DC
Quiescent current:	11mA
Operating current:	10.3mA
Onboard oscillator range	
minimum frequency:	8kHz
maximum frequency:	1.2MHz

The MAX293 or 297 Integrated Circuits (ICs) have been developed for a number of audio or data applications that require easy to use low-pass filters. Both ICs contain 8th-order (eight-pole) (24dB), lowpass, elliptic, switched-capacitor filters, with an uncommitted op amp and internal oscillator. This circuitry is contained in an 8-pin DIL package. The MAX293 is easily set up from 0.1 to 25kHz and the MAX297 from 0.1 to 50kHz.

The ICs have a 1.5 transition ratio providing sharp rolloff and -80dB of stopband rejection. The filters have fixed responses, so that selecting the clock frequency controls the filters corner frequency. The clock frequency being generated from either internal or external oscillators. A choice is given whether the MAX293 or MAX297 ICs are used in the Data File, and are therefore included in the Optional Parts List. The main differences are in the frequency range of each IC, plus clock frequencies.

The MAX293 operates with a 100:1 clock to corner frequency ratio and a 25kHz maximum corner frequency, and the MAX297 with a 50:1 clock to corner frequency and a 50kHz maximum corner frequency. The corner frequency is defined as the point where the filter output attenuation falls just below the passband ripple and is shown in Figure 6. The passband ripple for the MAX293 is typically 0.15dB, and for the MAX297 the passband ripple is typically 0.23dB.

Optional Items

The following items, not included in the kit, may also be required.

MAX293	1	(AY41U)
MAX297	1	(AY42V)
8-way DIL Slimline Switch	1	(QY70M)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 80.

FIBRE-OPTIC AUDIO LINK

- ★ Separate Transmitter and Receiver Modules

- ★ Ideal for Speech or Music Signal Sources
- ★ Bandwidth to 20kHz
- ★ Sends Along Fibre Optic Light Guide up to 20m in Length

This Fibre Optic Audio Link is an interesting alternative to the usual pair of wires to carry signals in the AF band from one place to another. It employs special purpose sender and receiver opto-couplers. These devices mate properly to the fibre, and enable it to do some useful work. The Fibre Optic Audio Link uses it to convey a 110kHz PLL carrier signal which can handle audio signals up to 20kHz with clarity and precision, for a distance of up to 20 metres! An ideal experimental and educational project, you can simulate telecommunications practice by building a long fibre optic system using intermediate Fibre Optic Link projects as repeaters.

From the practical point of view, your imagination is the limit. Useful examples range from maintaining a high quality audio signal path in close proximity to electrically noisy machinery, signal wiring in damp environments, and electrical isolation between sender and receiver.

Specifications

Frequency Response:	50Hz to 20kHz (-6dB) Flat from 150Hz to 3kHz
Max I/P and O/P levels:	0dB (775mV r.m.s.) @ 1kHz
Minimum Input level:	-28dB (30mV r.m.s.) for rated o/p
Noise level:	10mV
Signal to Noise Ratio:	35dB
Total Harmonic Distortion:	1% @ 1kHz
Phase Locked Loop carrier Frequency:	95 to 120kHz (110kHz nominal)

Continued on next page.

Continued from previous page.

Power Supply

Transmitter: 4.8V to 6V DC
@ 30mA to 50mA
Recommended: +5V DC @ 38mA
Receiver: 4.8V to 12V DC
@ 5mA to 12mA
Recommended: +9V DC @ 8mA

All specifications apply to the prototypes and may vary between different modules. Use the recommended power supply voltages shown for optimum performance.

Optional Items

The following items, not included in the kits, may also be required.

6 Volt Battery Box		(HF29G)
Fibre Optic Light Guide		(XR56L)
AA Batteries	4 off	(FK59P)
PP3 Battery		(FK62S)
PP3 Battery Clip	2 off	(HF28F)

Kits and Special Parts

Complete kits are available, the pcbs are also available separately. Full construction details may be found in the Best of Maplin Projects Book 5.

MULTI-PURPOSE 555 TIMER CARD

Features

- ★ Up to 11 configurations
- ★ Monostable or astable operation
- ★ Single PCB construction
- ★ Uses the popular 555 IC (NE555 supplied)

Applications

- ★ Timer circuits
- ★ Pulse width modulation
- ★ Square-wave generation
- ★ Reset pulse generation and watchdog circuits for microprocessors
- ★ Experimentation and circuit development
- ★ Education

2

The 555 timer IC has been around since the early 1970s, and can be found in many circuits. Configurable as a monostable or an astable multivibrator, it can be used in many applications - for example, precision timing, pulse generation, sequential timing, time delay generation, pulse width modulation, pulse position modulation, missing pulse detection and oscillators. 'Real world' uses for the 555 therefore include logic pulsers, DC-DC converters, alarm systems, servo controllers and remote control systems. This general-purpose 'building block' project allows such circuits to be built up around this versatile 8-pin IC. The PCB is designed to incorporate all of these possible variations, by simply fitting components or wire links where required for a particular configuration.

Kit and Special Parts

A complete kit of parts (including the PCB) is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 69.

TUNGSTEN LAMP SURGE CONTROLLER

4

It is an often overlooked fact that the resistance of the filament of a tungsten lamp, or any other incandescent lamp for that matter, is very much lower when cold, compared to that at its normal operating temperature. This causes a high current to flow upon the instant the lamp is switched on. The thermal shock experienced by the filament during this time can be severe enough to break it prematurely.

Consequently any lamp will have a long life if only switched on for long periods of use, and the quickest way to 'blow' it is by repeated switching. This can become a problem with stage lighting, etc., where lamps may need to be switched often. The Tungsten Lamp Surge Controller provides anti-surge switch-on for high powered lamps up to 700W (or any other resistive load), using voltage phase control.

Construction Details

Note that no kit or pcb exists for this project. The Lamp Controller is not recommended for inexperienced constructors. Full details of construction and operating theory can be found in the Maplin Magazine Issue 21. See end of this section.

12V FLUORESCENT TUBE DRIVER MODULE

2

For 12 volt fluorescent lamps used in caravans, boats, for camping etc, this driver module is of a higher quality than the usual 'starter' circuit normally supplied with such lamps. Although intended to drive one 12 volt 8W fluorescent tube, it will operate two such tubes with negligible reduction in light output. Final light output strength can be chosen during construction, and is adjustable to a degree. Nominally consumes about 12 watts of power, and can be run for up to fifteen hours continuous use from the average car battery. Details of a suitable fluorescent tube can be found in the Opto Electrical section of this Catalogue.

Kit and Special Parts

A complete kit is available. Full construction details may be found in the Best of Maplin Projects Book 6. PCB dimensions: 56 x 33mm.

Order

LM331 VOLTAGE-TO- FREQUENCY/ FREQUENCY-TO- VOLTAGE CONVERTER

2

Features

- ★ Lower power consumption
- ★ Good linearity
- ★ Excellent temperature stability

Applications

- ★ Remote control
- ★ Remote sensing

The LM331 is a simple voltage-to-frequency converter suitable for use in analogue-to-digital conversion, precision voltage-to-frequency conversion and many other applications. When the IC is used as a voltage-to-frequency converter, it produces a pulse train which is linearly proportional to the applied input voltage. Although the precision timer circuit has low bias currents, the response time is sufficiently fast for 100kHz voltage-to-frequency conversion. The open collector output of the device is capable of driving loads of between 5V (i.e. TTL level) and 40V, depending on the supply voltage, and is fully protected against short circuits to V_{cc} . In the frequency-to-voltage

converter mode, a frequency of between 1Hz to 10kHz is applied to the input, and the output voltage is directly related to the current flowing through a load resistor, nominally 100kΩ. This value can be altered, if necessary to provide different output level swings. Because of the high impedance nature of the output, it will normally be necessary to provide additional buffering – unless the circuit is driving a very high impedance load. The kit includes all the components to make either versions, and it is important to ensure the correct components/pins are inserted for the chosen version.

Note: this is intended as a 'building block' project and not eligible for our 'Get-You-Working' service.

Specification

Voltage-to-frequency

Power supply voltage: 5V to 40V
 Power supply current: 8mA (at 12V)
 Output frequency range: 50Hz to 10kHz (at 12V)
 Input voltage range: 0-0.5V to 10V

Frequency-to-voltage

Power supply voltage: 5V to 40V
 Power supply current: 6mA (at 12V)
 Output voltage range: 0-0.5V to 5V (at 12V)
 Input frequency range: 50Hz to 10kHz (at 12V)
 Input level: As supply voltage

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available to make either version. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 57.

LARGE 7-SEGMENT NUMERIC DISPLAY MODULES

Features

- ★ 12 red LEDs per segment
- ★ Single 22 to 26V DC supply
- ★ On board drivers and current conversion
- ★ 400mA maximum current
- ★ Brightness independent of supply
- ★ Very high input sensitivity

Applications

- ★ Can be connected in parallel with original 7-segment display
- ★ For both static and multiplexed operations
- ★ Available in common cathode or anode versions

These modules can connect to existing 7-segment display drivers, and provide a very large display output (7 1/2 in. high). Applications include clocks in large work areas, factory production run-counters, athletics timer and lap counters, school classroom calculators, etc.

The modules need to be connected to a suitable power supply and driver circuitry. There are two different versions available; common anode and common cathode types.

Kit and Special Parts

A complete kit of parts for a common anode version (K2567) and common cathode version (K2568), which includes the PCB, are available. Full construction details and setting up procedures may be found in Maplin Magazine Issue 74.

MULTI-PURPOSE 741 OP-AMP CARD

Features

- ★ Up to 16 op amp configurations
- ★ All the basic op amp functions plus sine and square wave generators
- ★ Single PCB construction
- ★ Uses the popular 741 IC

Applications

- ★ Any AC or DC analogue processing
- ★ Control signal processing
- ★ Audio applications
- ★ Signal generation
- ★ Adding, summing, integration, etc.

This general-purpose building block project allows for a number of different op-amp configurations, and uses the industry standard 741 device. The accompanying PCB is designed to incorporate all these possible variations, by simply fitting components or wire links where required for a particular configuration. The various configurations which can be achieved with this module are: Buffer, Half Supply Generator, Non-Inverting DC Coupled Amplifier, Non-Inverting AC Coupled Amplifier, Inverting DC Coupled Amplifier, Inverting AC Coupled Amplifier, Inverting Summing

CALCULATOR/CLOCK

A pocket, folding travel alarm clock and calculator that displays the time of day in twelve cities around the world, on a large format LCD. The clock has four modes: 12/24 hour time, date, alarm time, and calculator. In the time mode the clock shows hours, minutes and seconds. In the date mode the calendar shows month, date and day of week. In the alarm mode hours and minutes are shown by an on/off indicator. The alarm duration is 20 seconds. The calculator is a useful basic 8-digit device. Setting up the various functions is quite straightforward. Supplied with 1.5V battery and instructions.

SUPERB QUALITY!
£13.99
 RT22Y

The circuit could be used to drive more powerful light bulbs for greater effect; handy for christmas tree lights or the large nativity scenes that adorn your local church at christmas time. For greater realism arrays of lights should really be driven from several 'flickering candle' PCBs. Up to 250W of lighting can be driven when used in conjunction with the Mains Opto Switching kit (LP55K).

Supply Voltage: 9V DC
 Peak Operating Current: 166mA
 Logic Supply Current: 1.6mA
 Size of PCB: 49 x 43mm

Optional Items

The following items, not included in the kit, may also be required.

Power Socket 2.5mm	1	(JK10L)
Unregulated AC/DC Adaptor 300mA	1	(XX09K)
Battery Box 3 x AA	2	(YR61R)
PP3 Clip	1	(HF28F)
Duracell PP3 Battery	1	(JY49D)
Duracell AA Cell	6	(JY48C)
Epoxy Resin Sachet	1	(FL45Y)

Kit and Special Parts

A complete kit of parts, excluding optional items, is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 72.

Order Code	Type	Price each
LT40T	Twnking Xmas Candle	£7.49
GH47B	Xmas Candle PCB	£1.99

K2574 UNIVERSAL 4-DIGIT UP/DOWN COUNTER WITH COMPARATOR

Compared to the classic TTL counters, this CMOS version has a lot of advantages: lower supply current consumption and many selectable options that makes it universally applicable. By means of BCD switches, it is possible to set a number which is continuously compared with the contents of the counter. If both are equal, the 'compare' output is activated. The counter can increment or decrement (count up or down). Another facility is to freeze the displayed value at any time, while the internal counting continues.

Power supply: 5V DC, stabilised (150mA)

'Carry' output for cascading of several units
 Output signals: 5V, max. 50mA
 Max. count frequency: 2MHz

Order Code	Type	Price each
VE81C	Velleman Kit K2574	£44.99

EDUCATIONAL & NOVELTY PROJECTS

CHRISTMAS LANTERN AND FLICKERING CANDLE

Features

- ★ Realistic flicker effect
- ★ Easy to build
- ★ Low cost

Applications

- ★ Amateur theatrics
- ★ Home video productions
- ★ Nativity scenes
- ★ Carol singing
- ★ Christmas tree light(s) with a difference!

A christmas project with a difference! Using modern technology, this lantern has several advantages over the traditional wax candle. Not only doesn't it melt away, but you won't bum yourself or set anything alight because a tiny LES bulb replaces the flame. Neither, of course, will it be extinguished by the slightest breeze! Details are provided with the kit for building a lantern housing for the 'candle', using stiff, painted card. Such materials can safely be used as there is no risk of fire from this particular candle!

PRIORITY QUIZ BUZZER

Features

- ★ Easy to build
- ★ Low cost
- ★ Caters for eight contestants
- ★ Versatile and expandable
- ★ Can drive relays, buzzers, lamps or opto-isolated triacs

Applications

- ★ Family fun nights
- ★ Pub quiz nights
- ★ Charity trivia competitions
- ★ Team games
- ★ Reaction testing

Fed up with the incessant arguments over who was the first to answer a question during a quiz? Then this project is for you. Up to eight players can use the Priority Quiz Buzzer, expandable to 16 or 24 contestants if chained to a second or third PCB. Each contestant is equipped with a push-button and accompanying lamp. This is switched on at the moment that the button is pressed, while a buzzer attracts the attention of the quizmaster. The circuit uses high-speed latches to record the closure of any one of the eight switches, at which point a self resetting monostable will lock-out all other buttons. The speed of the system makes it virtually impossible for two buttons to be simultaneously pressed and recorded. The identifying lamp is lit for the duration of the time-out period. Up to eight lamps are driven by

SUBSCRIBE NOW TO

open-collector buffers, each able to switch up to 500mA. For higher currents relays can be used (protection diodes are provided).

An on-board 5V regulator is included for the circuit logic; the optimum supply for the module is 12V DC to suit most 12V lamps, relays and buzzers.

Optional Items

The following items, not included in the kit, may also be required.

MES Batten Holder	8	(RX86T)
MES Lampholder	8	(JX87U)
LES Lampholder	8	(UJ72P)
Domed LES Lampholder Blue	8	(RX76H)
Domed LES Lampholder Yellow	8	(RX80B)
Fluted LES Lampholder Red	8	(RX69A)

LT41U	Priority Quiz Buzzer	£11.99
GH49D	Quiz Buzzer PCB	£3.75

LIVE WIRE GAME

Features

- ★ 'Lives' indicator
- ★ Low voltage operation
- ★ Easy to build

Applications

- ★ Fund-raising events
- ★ Family fun
- ★ Reducing stress
- ★ Improving hand/eye co-ordination

The traditional 'live-wire' game often suffers from a few shortcomings. Firstly, there is often no clear indication when the loop has just made momentary contact. Secondly, because the contact between loop and wire usually carries the bell current directly, if there is any appreciable contact resistance the bell may not sound

properly. Thirdly, differing abilities can mean that it is difficult to provide an interesting game for a wide range of contestants.

This project will stop the controversy over whether the 'live' wire was actually touched or not. The design includes a monostable that will positively sound the buzzer for a short period, and a 'lives' counter that permits the contestant a set number of attempts to reach the end before they are all consumed. Once all 'lives' have been lost, an indicator illuminates and a buzzer sounds continuously. The design allows the number of lives to be set (with links during construction) between one and five, and the output can drive LEDs or filament lamps.

The finished unit can be powered from any supply between 9 and 16V DC, and a car battery for outdoor events is ideal. Maximum current consumption at 12V is only 50mA. Alternatively internal batteries may be added.

Optional Items

The following items, which are not included in the kit, may also be required.

Battery Box 8 x AA	1	(RK44X)
PP3 Clip	1	(HF28F)
Alkaline AA Cell	8	(FK64U)
Power Plug 2.5mm	1	(HH62S)
Unregulated AC Adapter 300mA	1	(XX09K)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB and labels are also available separately. Full construction details may be found in Maplin Magazine Issue 78.

KP66W	Live Wire R/Panel	£1.29

MODEL TRAIN CHUFFER

Features

- ★ Realistic chuff and hiss of steam
- ★ Chuffer automatically changes with speed
- ★ Hiss of escaping steam when train stationary
- ★ Adjustable chuff rate
- ★ Adjustable tonal quality

One effect that is normally missing from a model steam train set so making it less realistic, is the sound of a chuffing engine. The Chuffer project produces a realistic 'chuff' whilst the train is in motion, and also produces a hissing sound which emulates escaping steam whilst the train is at a standstill.

An external amplifier and a power supply of up to +36V DC (absolute maximum) are required for use with the Chuffer. Adjustment of the 'chuff' rate can be made to match the train speed. Once in operation the changes in track voltage will be picked up and the Chuffer rate will alter automatically and lend realism to the model steam train set up.

Specification

Supply Voltage DC:	+15.5 to 36V DC
Supply Current	
quiescent:	15.3mA
operating:	17.1mA
Output Signal Level (nominal):	1V rms
Track Control Voltage Range:	16V maximum

Optional Items

The following items, not included in the kit, may also be required.

Multi-purpose ABS Box Type MB3	1	(LH22Y)
Chassis Phono Socket	1	(YW06G)
2.5mm Power Socket	1	(JK10L)
Red Terminal Posts Small	2	(FD72P)
M3 x 10mm Insulated Plastic Spacer	2	(FS36P)
2A Hookup Wire Black	10m	(BL00A)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 79.

Order Code	Type	Price each

GH80B	Train Chuffer PCB	£2.99

PARTYLITE

The idea of a three channel sound-to-light modulator is obviously not a new one, there being a multitude of units of this type already available, ranging from professional products to the types available at supermarkets for domestic use. Nevertheless, the Partylite is a worthy addition to the range because of its simplicity. It is fully automatic -- no knobs to re-adjust every time the level or tonal content of your music alters. The Partylite also has its own built in microphone eliminating the need for an audio connecting lead, making a completely free-standing unit and also avoiding the possibility of damage to your hi-fi or power amp. The Partylite employs zero voltage triggering of the thyristors. Consequently no interference is generated to produce those annoying clicks through the speakers, so common with cheaper sound-to-light units. It will work effectively on all three levels or in a disco environment. This is achieved by having independent automatic level control circuits for treble, middle and bass frequencies. Please note that a case, lamp fittings and lamps are not supplied. Also caution should be exercised as 240V Mains is present on the pcb.

Kit and Special Parts

A complete kit, excluding case, lamp fittings and lamps, is available. the pcb is also available separately. Full construction details are supplied with the kit.

PCB dimensions: 120 x 75mm

DISCO PARTYLITE

- ★ **No Direct Connection to your Sound System Required**
- ★ **Automatic Level Adjustment**
- ★ **3-channel Operation**
- ★ **Zero Voltage Triggering**
- ★ **Electret Condenser Microphone Insert**

The Disco Partylite expands on the original Partylite design, which proved to be one of the best selling Maplin kits, by offering the following enhancements; improved electrical safety, cooler running circuitry, high quality microphone insert, improved ALC circuitry, better tone filters and triac mains switching. The Disco Partylite has a built-in microphone eliminating the need for direct audio connection, removing the possibility of damage to your hi-fi or power amp and making the unit completely free standing. Automatic Level Control (ALC) circuitry follows the volume of the music over a wide range, obviating the need for a manual level control while zero voltage triggering of the triacs minimises any interference generated by the unit.

Specification

Supply Voltage:	240V AC 50Hz
Supply Current:	5A Maximum
Power Handling:	300W per channel maximum
Number of Channels:	3 – Bass, Middle, Treble
Frequency Response:	10Hz to 20kHz
Case Dimensions:	Width 150mm, Length 220mm, Height 64mm

Optional Items

The following items, not included in the kit, may also be required.

Switch Dual Rocker Neon Red	1	(YR70M)
Safuseholder 20mm	1	(RX96E)
Fuse 5A 20mm Anti-Surge	1	(RA12N)
3-core 6A Mains Cable	3m	(XR03D)

FEST-O-METER

Features

- ★ **Fun for all the family**
- ★ **Can be used as a simple lie detector**
- ★ **Ideal beginner's project**
- ★ **Low-cost**

Like the Christmas Tree project, the Fest-o-Meter is a simple project and should pose no constructional problems even to the absolute beginner. Hours of fun can be had by family and friends trying to get all 6 of the LEDs to light by holding a finger over the unit's two contacts – the Fest-o-Meter depends on moisture in the skin to act as a high-value resistor and complete a circuit. If you are successful, you will be rewarded with a Christmas tune.

This little project could be used beyond Christmas!

It could, for example, function as a simple form of Lie Detector, as some of these employ the same principle. When telling lies people are supposed to sweat more, according to psychologists. These increased levels of moisture noticeably alter the resistivity of the skin – to such an extent that the Fest-o-Meter can detect it

Optional Items

The following items, not included in the kit, may also be required.

Zinc Chloride HD PP3	1	(FK62S)

XMAS STAR

- ★ **4 different LED colours**
- ★ **Easy to build**
- ★ **9V cell or DC supply option**

A novelty project brings life to the top of your Xmas tree. This unit is built around the CMOS 4060 IC, a 14 stage ripple counter and oscillator. Synchronised flashing is provided by a bank of LEDs, which can be mounted on to a glittered star. The project can be run from a 9V PP6 cell or a 9V voltage regulator. Current consumption of 70mA occurs when all LEDs are on, making the life of a PP6 cell approx. 20 hours. A DC mains adaptor able to deliver 300mA, is recommended for prolonged use. The star itself is not supplied, but this project can be used for other applications.

Optional Item

The following item, not included in the kit, may also be required.

PP6 Battery	1	(FM03D)
-------------	---	---------

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 41.

PCB dimensions: 67 x 43mm.

Order Code	Type	Price each
LP54J	LED Xmas Star	£7.99
GE72P	LED Controller PCB	£1.75

XMAS TREE

- ★ **21 LEDs in 3 different LED colours**

- ★ **Easy to build**

- ★ **9V battery or DC supply option**

An easy to build festive project, decorated with 21 low-current LEDs in three different colours, which light in random patterns. The LEDs can be made to light at different rates/patterns which change slowly, quickly or twinkle. The Tree can be powered from a battery or a mains adaptor in the range of +9V to +15V. If an unregulated mains adaptor is used e.g. XX09K, it should be set to 7.5V or 9V. The nominal current consumption at 9V is only 12mA with all LEDs illuminated, while at 15V it is 36mA.

Supplied with the kit is a full size template of the tree which can be cut out and stuck on a piece of thick card, plywood, hardboard, aluminium laminate or perspex. The holes for the LEDs can then be drilled, cut or punched out, and the tree finally cut out.

Optional Items

The following items, not included in the kit, may also be required.

Battery PP3 Alkaline	1	(FK67X)
Power Pack PP6 9V	1	(FM03D)
AC Adaptor Unrg: 300mA	1	(XX09K)
Aluminium Laminate Small	1	(XY19V)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Projects Book 48.

Order Code	Type	Price each
LP83E	LED Xmas Tree	£11.99
GE95D	LED Xmas Tree PCB	£2.49

THREE GUN SOUND GENERATOR

Features

- ★ Wide range of applications
- ★ Three sounds available
- ★ Wide supply voltage range
- ★ Drives piezo sounder or loudspeaker directly
- ★ Reverse polarity protection
- ★ Easy to build
- ★ No alignment required
- ★ Sound effects for toys and games

This three gun sound generator kit is a simple sound effects synthesiser based on the UM3562 CMOS IC. Any one of three different gun sounds, rifle, ray-gun and machine-gun, can be produced by the module, which is capable of driving a piezo-electric sounder (included in the kit) or a 64Ω loudspeaker directly, or the output can drive a following amplifier. The module will operate over a wide supply voltage range of 2.5 to 12V, and features a current drain of only 2mA or so while in standby mode (or not producing any sounds). If the supply is not to exceed 3V (e.g. from two AA cells), then there is the option of reducing this standby current still further by omitting a supply limiting zener from the board. It is also possible to adjust the pitch of the sound effect within a limited range by altering the on-chip clock rate. Any of the three different sounds can be selected at will with a three-pole switch, or a chosen sound can be hard-wired. A separate trigger switch initiates the sound, which is continuous until released for the machine-gun effect, and 'single-shot' for the other two effects. This small module (<40mm square) will find many applications in games, toys and models.

Optional Items

The following items, not included in the kit, may also be required.

PP3 battery clip	1	(HF28F)
Miniature 64Ω loudspeaker		
L/S Hi-Z 3864	1	(YT27E)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 36. PCB dimensions: 38 x 38mm.

Order Code	Type	Price each
LP11M	3 Gun Sound Gen Kit	£4.99
GE32K	3 Gun Sound Gen PCB	£1.80

ELECTRONIC DIGIDICE

Most games incorporate a degree of chance in the rules; this random element can take a variety of forms but in many cases it is obtained using dice. With ordinary dice, as long as they are manufactured properly there are unlikely to be any problems with obtaining a random result, however with an electronic version of the die, producing a truly random result can be a problem. The DigiDice uses a high frequency temperature controlled oscillator, a binary counter and a D-type latch to produce a pseudo-random result that should be for all practical purposes comparable with that obtained from a real die. The result is displayed by seven large (8mm) LED's which are arranged in the traditional dice pattern.

Optional Items

The following items, not included in the kit, may also be required.

ABS box	1 off	(LH21X)
Insulated spacer M3 x 25mm	1 Pkt	(FS39N)
Stick-on feet large	1 Pkt	(FW38R)

Kit and Special Parts

A complete kit is available. The adhesive front panel is not included in the kit and must be ordered separately. The pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 34. PCB dimensions 67 x 77mm.

Order Code	Type	Price each
LM99H	Elec Die Kit	£11.49
GE12N	Elec Die PCB	£2.99
JP39N	Elec Die Stick-on FP	£3.99

SUPER ELECTRONIC ROULETTE

- a Sound Master Kit

This Super Electronic Roulette is an electronic version of the well known game played in such places as Las Vegas! The traditional roulette wheel is essentially a random number generator where a ball is thrown over the spinning wheel, which eventually comes to rest at a number. The chances of landing on any one number is approx. 9.842×10^{-9} to 1! In this version, the wheel is produced by a ring of LED's which flash in succession producing a spinning effect: this rate eventually slows down and stops. Although the real

game is played for very high stakes, this project is intended to be used purely for the fun of playing the game. The kit comes complete in every detail including a plastic front panel and printed circuit board.

Kit and Special Parts

A complete kit of all parts is available. Full construction details may be found in the Maplin Magazine Issue 29.

Order Code	Type	Price each
LM67X	Roulette Kit	£15.99

VELLEMAN EDUCATIONAL & NOVELTY PROJECTS

K4401 SOUNDS GENERATOR

Features

- ★ 10 different sounds
- ★ Drives 8Ω loudspeakers
- ★ Adjustable pitch/speed
- ★ Reverse polarity protection

Applications

- ★ Sound effects
- ★ Disco jingles
- ★ Games and toys
- ★ Alarms

This pre-programmed sound generator is ideal for use in sound effects production, disco jingles, games and toys. The sounds that the completed unit generates are:

1. Tune: 'Wild Charge Tune'.
2. Mortar shot and explosion.
3. Explosion.
4. Car tyre screech.
5. Tune: 'Snake Charmer's Tune'.
6. Car engine (up/down rpm).
7. Phasor gun.
8. European siren.
9. Machine-gun and bullet impact.
10. USA siren.

The tempo of each effect is adjustable, so increasing the unit's versatility. The sounds are created using a peripheral interface controller (PIC), microprocessor-based IC, and the finished unit has provision for direct connection to an 8Ω loudspeaker. Additionally, a line level output is provided for connection to a mixer or amplifier.

Specification

Power requirements:	8V to 10V DC
Standby current:	11mA
Maximum current:	100mA
Output	
Loudspeaker:	1W into 8Ω
Line:	1V rms

K2604 KOJAK SIREN

Enter the world of amazing electronic sounds and noises. Create or imitate sirens of all kinds by adjusting three presets. Power sound with extra 2W on-board amplifier. Requires 8 to 14V DC, 1A.

Order Code	Type	Price each
VE87U	Velleman Kit K2604	£7.99

K2601 STROBOSCOPE

Flashing light effect for disco. Make your own snapshots and 'lightning' light effects. Flash frequency adjustable from 2 to 20Hz. Requires 220/240V AC.

Order Code	Type	Price each
VE52G	Velleman Kit K2601	£14.99

K2569 3-TONE CHIME

This inexpensive kit gives a 3 tone sound every time you activate it. The only extras required are a small loudspeaker and a battery. Full construction details may be found in Maplin Magazine Issue 58.

Power supply: 7 to 12V DC
Output: 8Ω

Order Code	Type	Price each
VE88V	Velleman Kit K2569	£10.99

K2588 3-CHANNEL LIGHT ORGAN

Add amusing colours to your music. Three outputs for high, middle and low tones are separately adjustable. Compatible with your amplifier, tape/cassette recorder etc. Not suitable for use with halogen lamps. Input sensitivity: 100mV to 10V max
Channel separation: 20dB
Triac outputs: 500W max. each (uncooled)
Supply: 200 to 240V AC

Order Code	Type	Price each
VE53H	Velleman Kit K2588	£33.99

K2602 MUSIC MODULATED RUNNING LIGHT

Get your running lights to keep pace with your favourite disco hits. Compatible with all sound equipment. Isolated input is adjustable (100mV to 5V sensitivity). Speed adjustable from 0.25 to 3Hz. Operates on 220/240V AC. Four 2A triac outputs.

Order Code	Type	Price each
VE54J	Velleman Kit K2602	£29.99

K5200 4-CHANNEL MULTI-FUNCTION RUNNING LIGHT

This circuit does more than an ordinary running light. Apart from running in both directions, it also flashes with two groups of lamps alternately (flip-flop), or with all the lamps at the same time. The four light effects follow each other automatically.

Multi-function: running to the right, running to the left, flip-flop, or with all the lamps flashing at the same time.
Four triac outputs: max. 2A each (400W at 240V)
Running speed: adjustable in asynchronous mode; constant speed in synchronous mode.

Radio noise is suppressed in synchronous mode. Can be synchronised by mains or can work synchronously. Power supply and transformer supplied with the kit.

Order Code	Type	Price each
VE55K	Velleman Kit K5200	£17.99

K3400 DUAL ELECTRONIC DICE

Features

- ★ Two independent dice; may be used in 'single die' mode if required
- ★ Displays are switched off after approx. 30 seconds to conserve battery power
- ★ Bright LED display
- ★ Powered by a PP3 Battery

Application

- ★ Ideal for playing dice-based games in limited spaces, or on the move!

Board games can be fun, but real dice can be a problem, they fall off the table, allow cheating, and sometimes a player may not see the result. There can be no doubt at all about the result on the display of this electronic dice, and cheating is out of the question! With this modern equivalent, a button is simply pressed and then released, the result being indicated by a pattern of 5mm red LEDs mimicking the standard die's number patterns. Using two fully independent dice, you can choose to play with one or both. Displays are switched off automatically after 30 seconds to conserve battery life. Requires 8V to 12V DC.

INTELLIGENT Ni-Cd BATTERY CHARGER

Features

- ★ 1h or 12h charge time with subsequent trickle charge
- ★ Battery temperature and contact monitoring
- ★ Charging interrupt for overvoltage or excessive temperature
- ★ Automatic predischarge cycle
- ★ Constant current charge and discharge
- ★ Charge pulse with modulation for battery capacity matching
- ★ LED status output for mode indication
- ★ Timer clock via internal oscillator

Applications

- ★ Charging/Discharging Ni-Cd cells
- ★ Reviving damaged or misused cells

The use of this charger can improve the performance of a cell or cells with 'reduced capacity' by providing constant current discharge to a flat condition first before the constant current charging cycle commences. Once the charge cycle is completed (giving a 95% charge), the battery is then (by pulse width modulation (PWM) 'trickle charged' for 100ms every 16-8s, which equates to a 'form factor' of 0.6%.

This 'intelligent' Ni-Cd battery charger is based around the U2400B IC which has been specifically designed to handle the needs of Ni-Cd batteries. The IC itself contains much of the electronics required, which include a processor unit, battery voltage and temperature monitoring comparators, PWM comparator, open collector charge and discharge outputs, LED status output, an oscillator, voltage reference and mains synchronisation. However, not all the features obtainable from the IC are used in this application.

To enable different voltage and lower capacity batteries than 1.5Ah to match the charger, two rotary switches are provided. The voltage select switch, divides the potential terminal voltage to provide the correct level for the voltage comparators; and the battery capacity selector switch which alters the PWM of the charge circuit, thus preventing over charging.

Specification

Power supply:	240V AC 50Hz
Power consumption:	33W maximum
Battery voltages:	1.2V, 6V, 7.2V, 8.4V, 12V
Battery capacity:	110mAh, 180mAh, 500mAh, 1.2Ah, 1.5Ah
Charge time:	1hr or 12hr
Overtemperature threshold:	45°C
Charge current:	1.5A, pulse width modulated
Discharge current:	500mA
Minimum/maximum cell voltage:	0.8V/2V
Input connector:	IEC plug
Output connectors:	4mm terminal posts
Overall dimensions:	205 x 106 x 197mm (WHD)

Optional Items

The following items, not included in the kit, may also be required.

Blue Case Type 237	1	(XY47B)
Euro Lead	1	(MK41U)

Kit and Special Parts

A complete kit of parts (including the PCB and front panel) is available (excluding optional items). The PCB and front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 79.

Order Code	Type	Price each
LT55K	Intllgnt Batt Chgr	£39.99
GH71N	NiCd Charger PCB	£4.49
KP69A	Nicad Charger Panel	£1.99

PWM DC MOTOR SPEED CONTROLLER

Features

- ★ High-current power rating
- ★ Short-term overload proof
- ★ Optional foot pedal control

Applications

- ★ Hobby drills
- ★ Model train sets
- ★ Remote-controlled model cars/boats

Many of us who own mini drills for making PCBs and drilling project-boxes, only have a general-purpose low-current variable-voltage bench PSU to power it up. More often than not, the PSU voltage collapses when asked for more than an amp or two. The drill PSU project presented here, is short-term overload proof (3 seconds maximum) and provides 100W of power for even the most current-hungry drills. The PWM (pulse width modulated) PSU even has an on-board 'current limit' LED indicator.

The drill speed is variable from zero to the maximum RPM of the drill. The project even has the option of a foot speed controller, allowing for fine control of the speed and for hands-free operation.

The PWM drill speed controller can be used (when suitably modified) for controlling the speed of model trains or even remote-controlled model cars or boats.

Specification

Power supply voltage:	12 to 18V AC or DC, 15V (nominal)
Supply current max:	15A 8-5A (nominal)
Maximum rated power:	125W

ENVIRONMENTAL PROJECTS

AUTORING

Features

- ★ American, UK or European ringing sounds
- ★ Adjustable timing
- ★ Ringing pattern can be customised
- ★ Can be used with most BT-compatible plug-in telephones

Applications

- ★ Theatre or radio plays
- ★ Amateur film production
- ★ General sound effects
- ★ Telephone testing
- ★ Fooling friends!

One of the most difficult sounds to simulate in plays and films is a telephone which must ring on cue, and stop ringing when picked up. Finding a 'mock' telephone that rings with the exact timing cycle of a conventional BT-style telephone is even more difficult. The project is designed to simplify matters and, when operated, will cause a connected BT telephone to ring correctly. AutoRing will not work with bell-type telephones as the ringing current required by such telephones exceeds that produced by the unit. An optional internal bleeper can be added for 'off stage' effects, and the design includes an LED to indicate the correct ringing effect. The current required by AutoRing is very low and the total consumption of the circuit when connected to a typical phone is less than 100mA. AutoRing must on NO CIRCUMSTANCES be plugged into a BT socket.

AutoRing can easily be configured to generate the ringing sound of your choice, and the unit requires a regulated 12V DC supply with a standard 2.5mm power connector. A suitable power supply is YB23A.

Continued from previous page.

Optional Items

The following items not included in the kit, may also be required.

1/2in. Stereo PCB Socket	1	(FJ05F)
Metal Box Type AB15	1	(XB71N)
120VA 15V Toroidal	1	(DH63T)
K01 Bridge Rectifier	1	(BH47B)
5mm Convex LED Clip	1	(UK14Q)
10A 250V AC Dual Rocker Neon Switch Red	1	(YR70M)
Fused Mains Euro Chassis Plug	1	(FT37S)
Insulation Cover For Fused Mains Plug	1	(JK67X)
Red Terminal Post Small	1	(FD72P)
Black Terminal Post Small	1	(FD69A)
Push-on Receptacle Covers	1Pkt	(FE65V)
Knob Type K7B	1	(YX02C)
1A Antisurge Fuse	1	(WR19V)
13A Plug & Cable Black	1	(CY32K)
3A Two-core Mains Cable Black	1m	(XR47B)
Power Connection Wire Green/Yellow	1m	(XR38R)
High Current Wire Black	1m	(XR57M)
High Current Wire Red	1m	(XR59P)
Extra-Flexible Wire Black	1m	(XR40T)
Extra-Flexible Wire Red	1m	(XR44X)
M3 x 20mm Insulated Spacer	1Pkt	(FS38R)
M3 Solder Tag	1Pkt	(LR64U)
M3 Steel Nut	1Pkt	(JD61R)
M3 Shakeproof Washer	1Pkt	(BF44X)
M3 x 6mm Steel Bolt Countersunk Pozi	1Pkt	(BF36P)
M4 Steel Nut	1Pkt	(JD60Q)
M4 Shakeproof Washer	1Pkt	(BF43W)
M4 x 16mm Steel Bolt Pozi	1Pkt	(JY16S)
Stick-on Feet Square	1Pkt	(FD75S)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 81.

ENVIROSYNTH

2

- ★ Simulates a gentle breeze, or surf on the shore
- ★ Can provide pink and white noise outputs
- ★ Sounds can be tailored to users requirements

Applications

- ★ Sound effects for theatres, radio shows and video/film productions
- ★ May aid relaxation, insomnia and coping with stress

Do you suffer from insomnia caused by tinnitus, worry, or overtiredness?, or perhaps you need help coping with stress, then the EnviroSynth may be just what you need. The sound of breaking rollers on a pebble beach, or the gentle summer breeze rustling through the trees, are very therapeutic and can help overcome the problems mentioned. These sounds can also be very useful in doctors' or dentists' waiting rooms. Even white noise has its uses. Sounding as it does like escaping steam, it is completely unvarying and featureless. The EnviroSynth can be used to generate sound effects. By varying certain component values the effects can be altered and a range of very interesting sounds produced i.e. a gale!

Optional Items

The following items, not included in the kit, may also be required.

6W Elliptical Speaker	1	(GL17T)
250mA Transformer 6V	1	(YN14Q)
1 1/4in. Clickcatch F/H	1	(FA39N)
Fuse 1 1/4in. A/S 100mA	1	(UK58N)
Dual Rocker Neon Red	1	(YR70M)
Min Mains Black Cbl.	2m	(XR01B)
SR Grommet 5R2	1	(LR48C)
Case and knobs		

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 54.

PCB dimensions: 162.6 x 63.5mm

Order Code	Type	Price each
LP67X	Enviro Synth	£18.99
GH10L	Enviro Synth PCB	£4.19

INFRA-RED REMOTE CONTROL TESTER

1

This handy little project is an infra-red (IR) detector. The unit checks to see if a remote control unit (or any other pulsed infra-red source) is transmitting an infra-red carrier or data stream. The unit ignores ambient infra-red energy, so it can be used in full sunlight. An indication LED shows when a signal is detected and is used for checking the internal battery. The strength of the transmissions from a control unit can be measured by the distance from which the remote control is able to operate. TV and Video repair engineers will find this infra-red tester an invaluable addition to their toolbox. It is also cheaper and more versatile than IR sensitive cards that attempt to serve the same purpose.

Specification

Supply voltage range:	6 to 12V
Battery type:	12V lighter battery 23A
Operating current:	11.4mA
Operating frequency:	10Hz to 100kHz
Minimum pulse width:	1µs
Detector peak spectral response:	940nm

Optional Item

The following item, not included in the kit, may also be required.

12V Lighter Battery 23A	1	(JG91Y)
-------------------------	---	---------

Kit and Special Parts

A complete kit is available. A pcb, keyring remote case and panel are also available separately. Full construction details may be found in Maplin Magazine Issue 44.

Order Code	Type	Price each
LP53H	I/R Remote Tester	£7.99
GE71N	I/R Tester PCB	£1.99
JX52G	Panel for Rem Tester	£1.75
JR90X	Keyring Remote Case	£1.35

WEATHER MONITORING SYSTEM

Be your own Bill Giles with this superb meteorological monitoring system. This project is in two halves, an outside unit which gathers data on wind speed and wind direction and an indoor unit which displays the data gathered. An analogue meter shows the wind speed in mph and knots, and a 16 point LED compass display shows the wind direction. Wind speed meter can be set to 25 mph (22 knots) or 100 mph (87 knots) full scale reading.

Wind direction may be electronically damped (4 settings) to counter effects of turbulence. Additionally an optional digital temperature module gives a readout of inside and outside temperatures. Note: hardware (i.e. mechanics) and electronics are ordered separately.

Display Unit Kit

3

Optional Items

The following items are not included in the display unit kit, but may also be required.

Contact adhesive	1 off	(FL44X)
Temp/clock Module	1 off	(FE33L)
Ext Probe for temp/clock module	1 off	(FE34M)
Min/Max temp module	1 off	(FP64U)
Ext low temp min/max probe	1 off	(FP65V)
Ext high temp min/max probe	1 off	(FP66W)
Bezel for temp module	1 off	(FE35Q)
Case ABS Console 2803	1 off	(YN31J)

Kit and Special Parts

A complete kit is available. Also available separately are a pcb, metal top panel, acrylic front panel and a speed scale. Full construction details may be found in Maplin Magazine Issue 33. PCB dimensions: 130 x 80mm.

Order Code	Type	Price each
LM96E	Mapmet Kit	£39.99

Wind Direction Indicator Kit

Optional Items

The following items are not included in the LM88V kit, but may also be required.

Red LED	4 off	(WL27E)
Min Res 680R	4 off	(M680R)
Multicore 6-way cable		(XR26D)

Kit

A complete kit of parts (electronics), excluding optional, for the exterior wind direction indicator.

Order Code	Type	Price each
LM88V	Wind Direction Kit	£22.99

Wind Speed and Direction Indicators Hardware Kit

Kit and Special Parts

A complete kit is available and the pcb and coded disc are also available separately. Full construction details may be found in Maplin Magazine Issue 31. PCB dimensions: 112 x 58mm.

Order Code	Type	Price each
LM90X	D4 Wind Hardware Kit	£39.99
GD96E	Mapmet Wind PCB	£3.49
GD97F	Mapmet Code Disk	£2.99

Many of the special parts used in the hardware kit (LM90X) are available separated.

Order Code	Type	Price each
GK14Q	A1 W/S Plastic Parts	£9.99
JL77L	W/Shaft	£1.59
JL78K	W/S Ball Race	£3.49
YT69A	W/S Pointer Shaft	£1.39
JL83E	W/S Pointer	£3.25
JL84F	W/S Tail Fin	£1.59
YT70M	A1 W/S Mounting Bar	£3.79
JL87U	W/S Mast Clamp	£2.25
JL88V	W/S End Cap	20p

PC WEATHER STATION

Features

- ★ Intended for use with the Wind Speed and Direction Sensor outdoor units ('Electronics' Issue 31)
- ★ Easy to build and set up
- ★ Can be used on any PC or compatible – minimum requirements: 8086, 512k RAM, mono text, single floppy drive.
- ★ Upgrading the existing Weather Station project (Electronics Issue 33) – both systems can be run from the outdoor units.
- ★ Expandable – up to 8 extra sensors may be added (add-on boards to follow, using an inexpensive analogue-to-digital converter (ADC) chip)
- ★ Accessible via easy-to-write BASIC routines (listings supplied)
- ★ All signal inputs/outputs via optoisolators for minimum risk of ESD damage to the host computer

Using the existing Wind Speed (LM87U) and Direction Sensor (LM88V) kits ('Electronics' issue 31), the PC Weather Station Card has been designed to either complement the Weather Station indoor unit (LM96E),

which was covered in 'Electronics' Issue 33, or to present a computer-based alternative capable of monitoring, displaying and recording the wind speed and direction. The addition of the vast level of computing power that modern PCs provide allows data logging to be easily achieved with suitable software, enabling the information to be processed (e.g., trends in wind speed to be followed over a 24-hour period). The power of the PC will also be useful when other devices are connected and options on the PCB allow for this expansion. In addition, control systems can be implemented which could be used to operate, for example, a gale alarm.

Optional Items

The following items, not included in the kit, may also be required.

R2,R9	1k	8	(M1K)
R11,R12	560Ω	2	(M560R)
RN2	10k	1	(RA30H)

MAPSTAT 2 WEATHER SATELLITE RECEIVER

A superb VHF weather satellite receiver, covering the 137 to 138MHz band. This fully synthesised receiver has many features including 24 memories, scanning, LCD display showing frequency, signal strength, AFC lock, and 'mode'. With a suitable antenna (LM00A), the unit will receive transmissions directly from the polar orbiting weather satellites, such as the Russian Meteor series or the American NOAA series. In addition, it will receive transmissions from the geostationary weather satellites (Meteosat for the UK & Europe) via a suitable down-converter and antenna. A new design for a down converter and antenna will be appearing in a future issue of *Electronics - The Maplin Magazine*.

This ready built mains powered unit has connections on the rear for two antenna, and each antenna socket also has +12V DC to power pre-amplifiers such as LT73Q (as featured in *Electronics - The Maplin Magazine* issue 81) and/or a down converter. An output is provided for a monitor loudspeaker, and an audio output, via phono connector, for a suitable interface to a PC (AQ50E).

Order Code	Type	Price each
AQ49D	D7 Mapsat 2	£399.99

WEATHER SATELLITE RECEIVER PC INTERFACE

This PC interface and software for the Weather Satellite Receiver (AQ49D) will decode and produce images on a suitable PC that can be saved and printed. Easy-to-use, the menu driven software requires an IBM AT or compatible (286 12MHz processor minimum), with at least a VGA monitor and a minimum of 1Mb of free space on a hard drive. In addition, space will be required for stored images which can be up to 1Mb each in the highest resolution mode. The interface is designed to convert weather satellite transmissions from APT format into a high resolution PC display (a SVGA display will be required for the full 256 colour display). The interface accepts the Audio WEFAX (APT format) standard and provides RS232 data via a standard 25-way D-type connector. A suitable lead for connecting to a computer is supplied. The software will allow 'auto-capture' (scheduled by time) or 'free capture' (all images that are transmitted). The received black and white pictures can be saved and 'coloured', and then converted to a standard format (TIF, GIF), displayed and even printed.

Order Code	Type	Price each
AQ50E	B2 Mapsat 2 PC Interface	£99.99

Satellite Aerial

A four element aerial specifically designed for use with the MAPSAT receiver. In addition to the kit of parts you will require a wooden pole of 1in. diameter for use as the aerial mast. This mast must be non-conductive.

Kit and Special Parts

A complete kit, excluding the wooden mast, is available, the rod elements are also available separately.

Order Code	Type	Price each
LM00A	B2 Sat Aerial Kit	£16.99
YM58N	Aerial Rod	£1.49

TEMPERATURE CONTROLLER

- ★ Moisture proof enclosure
- ★ Outputs for heating and cooling
- ★ Switches resistive and inductive loads
- ★ Optional temperature logging output

This temperature controller was designed for use in a greenhouse, so the unit is protected against damp conditions. A waterproof box with a transparent lid houses the controller, allowing a liquid crystal display to be seen through the lid. The temperature controller can be used for numerous applications where a temperature regulated environment is needed.

There are two PCBs for the sensors and 240V mains supply control. The sensor board contains the control, LCD display, sensors and battery back-up. The mains board contains the output supplies for heating and cooling devices (240V AC).

Warning: this project uses Live Mains, care needs to be taken when following the construction details.

Specification	
Supply voltage:	250V AC 50Hz
Back-up supply:	1.5V AA alkaline cell
Display:	12.7mm high LCD
Temperature sensor:	3m external probe

Output modes

Low temperature:	Manual, off, automatic
High temperature:	Manual, off, automatic
Display mode:	Set high and low, temperature

Set-point adjust:

Set and select

Switching capacity

Resistive:	240W
Inductive:	240W
Switching arrangement:	Live side zero crossing triac, optically triggered

Temperature Logging

Data format:	13-bit serial
Clock:	Data limited

Temperature Module

Temperature range:	-5°C to +50°C
--------------------	---------------

Display range

Celsius:	-19.9° to 69.8°
Fahrenheit:	0° to 159.8°
Resolution:	0.1°

Basic Accuracy

-10°C to +40°C:	±1 C @ 1.5V
-20°C to -10°C:	±2 C @ 1.5V
+40°C to +70°C:	±2 C @ 1.5V
Probe accuracy:	±0.83 C/m
Temperature set-points:	1° steps
Supply voltage:	1.25V to 1.65V (1.5V typical)

Supply current:

15µA approx.

Optional Items

The following items, not included in the kit, may also be required:

Minicon Plug 3 Way	1	(BX96E)
Minicon Hsng 3 Way	1	(BX97F)
Minicon Terminals	1 Pkt	(YW25C)
C6A Mains Cable Orange	1m	(XR05F)
PCB Lacquer	1	(YB75S)
PCB Cleaner	1	(YJ45Y)
Alkaline KAA Battery	1	(FK64U)
AA Battery Box	1	(YR59P)
Cable Gland 5-8	1	(JR76H)

Kit and Special Parts

A complete kit is available. The front panel is also available separately. Full construction details may be found in *Maplin Magazine* Issue 43.

Order Code	Type	Price each
LP38R	B2 G/House Temp Ctrl	£72.99
JX43W	Greenhouse Panel	£2.25

TEMPERATURE MONITOR

2

Features

- ★ +39°C to +98°C temperature range
- ★ Active high and low outputs
- ★ Trip temperature easily adjustable
- ★ In-built hysteresis
- ★ LED indicator

Applications

- ★ Amplifier protection
- ★ Power supply protection

This versatile Temperature Monitor is an optional 'add on' to the Amplifier Monitor LP32K, thus providing a complete monitoring system for amplifiers. The Temperature Monitor can be used with other protection circuits, providing that they have an external trigger input. Alternatively, the Temperature Monitor may be used in conjunction with the Zero Crossing Optoswitch LP55K, to turn a fan on at a preset temperature. The Temperature Monitor is based around a voltage comparator and a thermistor and the temperature range can easily be adjusted to be higher or lower by changing the value of the variable resistor and two fixed resistors.

Specification

Supply voltage	12V nominal, 15V max. DC
Quiescent current	
@ 12V:	3.6mA max.
@ 15V:	3.9mA max.
Operating current	
@ 12V	45.7mA max.
@ 15V	56.4mA max.
Temperature range:	+39°C to +98°C
Low temperature:	Trip +39°C, reset +31°C
High temperature:	Trip +98°C, reset +86°C

Optional Items

The following optional items, not included in the kit, may also be required.

PCB Latch Plug 3-way	1	(BX96E)
M3 Insulated Spacer	1 Pkt	(FS36P)
Double Bubble Sachet	1	(FL45Y)
Minicon Litch Hsng 3-way	1	(BX97F)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 48.

Order Code	Type	Price each
LP71N	Temp Monitor	£6.49
GE90X	Temp Mon PCB	£1.99

FRIDGE/CABINET ALARM CHECK

Features

- ★ Battery powered
- ★ Adjustable temperature range

Applications

- ★ For household refrigerators only
- ★ Keeps food safe
- ★ Electrical failure warning
- ★ Door not closed warning

NEW!

Food stored in a household refrigerator must be kept at a low enough temperature to keep harmful bacteria at bay. Above this temperature germs can multiply at a surprising rate, possibly resulting in food poisoning. The general consensus of opinion is that the temperature should be maintained at 5°C (41°F) or below.

'Fridge Check' is a small, battery powered unit which monitors the fridge temperature, and any increase above the preset temperature threshold will result in a high-pitched tone. This will normally be 6°C to 7°C (43°F to 45°F), but may be adjusted anywhere from 0° to 15°C approximately (32° to 59°F).

The whole device, including battery, is built in a very small plastic box so that it takes up hardly any space on the fridge shelf. Therefore, as well as being useful for full-size refrigerators, it can be used in the smaller gas-operated variety found in boats and caravans. The standby current of the unit has been kept extremely low (less than 30µA) so a whole year's operation may be obtained from one alkaline PP3 battery although the power consumption increases when the alarm sounds and the battery life will be reduced depending on the number of times it sounds).

Kit and Special Parts

A complete kit of parts, including the PCB, is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 76.

Order Code	Type	Price each
LT53H	Fridge/Cabinet Alarm	£8.99
GH70M	Fridge Alarm PCB	£1.99

SMALL TEMPERATURE MODULE FM-880LP

Features

- ★ 11mm High Digital Temperature Display
- ★ 0.1°C Temperature Resolution
- ★ Low Current Consumption
- ★ Buzzer Output
- ★ Internal Temperature Sensor

A compact and highly accurate temperature module ideal for use in applications where ambient air temperature sensing is required. The module covers temperatures in the range -5°C to +50°C in 0.1°C steps, sampling period is 15 seconds. Provision is made for either internal (silver oxide watch type battery) or external power supply (nominally 1.5V), current consumption is 10µA. Connections are provided for displaying/setting/enabling maximum and minimum temperature points, which are used to trigger a buzzer output. Connections may be made to the module using a 7-way minicon housing (female) and terminals (not supplied).

Specification

Temperature measuring range:	-5 to +50°C
Resolution:	0.1°C
Supply current:	10µA (Average)
Sample period:	15 seconds
Operating voltage:	Min. 1.25V
	Nom. 1.5V
	Max. 1.65V
Accuracy:	-5 to +25°C, ±1%
	>+25 to +50°C, ±2%
Battery type:	SG13
Battery life:	1 year
Storage temperature:	-20 to +60°C
Dimensions:	49 x 29 x 15.2mm

Pin Functions

- Pin 1 - +V (1.5V)
- Pin 2 - 0V
- Pin 3 - Buzzer output
- Pin 4 - Display lower temperature limit
- Pin 5 - Lower/higher limit set/reset
- Pin 6 - Advance lower/higher limit
- Pin 7 - Display higher temperature limit

Order

Code	Type	Price each
YU06G	Small Temp Mod Int	£8.99

SMALL TEMPERATURE MODULE FM-880LPEX

Features

- ★ 11mm High Digital Temperature Display
- ★ 0.1°C Temperature Resolution
- ★ Low Current Consumption
- ★ Buzzer Output
- ★ External Temperature Sensor Probe

A compact and highly accurate temperature module ideal for use in applications where external/remote temperature sensing is required. The module covers temperatures in the range -40°C to +50°C in 0.1°C steps, sampling period is 15 seconds. The external probe is supplied pre-connected to the module, cable length is 3 metres. Provision is made for either internal (silver oxide watch type battery) or external power supply (nominally 1.5V), current consumption is 10µA. Connections are provided for displaying/setting/enabling maximum and minimum temperature points, which are used to trigger a buzzer output. Connections may be made to the module using a 7-way minicon housing (female) and terminals (not supplied).

Specification

Temperature measuring range:	-40 to +50°C
Resolution:	0.1°C
Supply current:	10µA (average)
Sample period:	15 seconds

TEMPERATURE MODULE

A very versatile digital thermometer module with the LCD display and circuitry on a small pcb with a 16-way solder edge connection. The pcb is fixed to a small plastic bracket that houses the battery. The module has an on-board temperature sensor or an external probe or probes may be fitted. By making the appropriate connections to the module the following functions are available:

- ★ **Temperature display in °C or °F.**
- ★ **12-hour clock display.**
- ★ **Set minutes and hours of clock.**
- ★ **Temperature sampling rate once per second or once per 10 seconds.**
- ★ **Set high and/or low temperature detector.**
- ★ **Output goes high when high temperature set point exceeded.**
- ★ **Separate output goes high when below low temperature set point.**
- ★ **Pulse output when either set point reached.**
- ★ **4kHz alarm output for 6 seconds after either set point reached.**

The module also has a serial data output and a thirteen-bit code is sent at every sample-time containing the current temperature in BCD format. A further output transmits the data clock. A comprehensive operations manual is supplied with the module. It shows how to connect relays to the temperature set point outputs, how to connect a buzzer to the alarm output, and how to connect external probes to the module. Full details are also given on the serial data output and how to read it.

Specification

Range:	-19.9°C to 69.8°C
	0°F to 159.8°F
Resolution:	0.1°C, 0.1°F
Accuracy:	-10°C to +40°C
	±1°C at 1.5V
	-20°C to -10°C
	±2°C at 1.5V
	+40°C to +70°C
	±2°C at 1.5V
Temperature set points:	1° steps
Display:	3½ digit 12.7mm high LCD display

Clock:	12-hour clock
Clock accuracy:	±0.5s/day
Working voltage:	1.5V (1.25V to 1.65V)
Average current:	15µA approx.
Battery life:	>1 year
Overall size:	68 x 35 x 23mm deep

A plastic bezel is also available for use with the module, size 68 x 35mm and increases overall depth of module to 27mm.

External probes are also available:

Probe length:	40mm
Probe diameter:	7mm at base, 4mm at tip.

The probe is supplied connected to 3m approx. of miniature 2 core cable 2mm diameter with open end. Note that the accuracy of the meter decreases by ±2.5°C per 3m of cable and may be unstable with long wires or cable different from that supplied with probe.

The meter itself will only operate in the temperature range -5°C to +50°C mainly because of the LCD display so for temperatures outside this range, the external probe will be required. Shortening the cable will improve the accuracy. The module requires a 1.5V AA cell (not supplied).

Applications Information

Further applications information on using this module may be found in issue 71 of *Electronics – The Maplin Magazine* (XA71N). The article *Using Temperature Modules* gives details of how to interface this module to a PC to measure temperature. Requires Temperature Module Expansion Converter Kit (LM36P) and Programmable PC I/O Card (LP12N) – article includes BASIC program listing. Also, details of how to control relays and a buzzer are included. Requires Temperature Module Relay Card Kit (LM37S).

Order Code	Type	Price each

TEMPERATURE MODULE EXPANSION

- ★ **Serial to Parallel Conversion of Temperature Data**
- ★ **Hi-Lo Set Point, Switched Relay Outputs and Alarm Sounder**
- ★ **1.3V DC Output Eliminates Battery**
- ★ **Requires 9 to 12V DC Supply**

Two versatile temperature modules are currently available from Maplin, known as 'Temperature Module' (FE33L) and 'Min-Max Temperature Module' (FP64U). Both of these modules although similar in appearance have very different specifications. For example, the Min-Max Temperature version has a recall function which stores the highest and lowest temperatures recorded. The Temperature Module is different by having a real time clock and serial data output of the temperature scale. The expansion system comprises two projects, a relay switching card, which may be used with both modules and a serial to parallel converter which can only be used with the Temperature Module. Relay contacts on the switching module are rated at 3A 24V DC and could be used for controlling alarms, bells and buzzers or perhaps be interfaced to a computer. The converter has been designed with tri-state outputs for use with computers with a 1 or 2 byte I/O availability. Either integer or full decimal values of temperature are available along with a few extra items of data. All is explained in the construction notes.

Optional Items

The following items not included in the kits may also be required.

AA Battery	1	(YG00A)
Temperature Module	1	(FE33L)
25-Way D Range Socket	1	(YQ49D)
25-Way D Range Socket IDC	1	(FV82D)
Bezel	1	(FE35Q)
External Probe	1	(FE34M)
Min-Max Temperature Module	1	(FP64U)
Low Temp. Probe	1	(FP65V)
High Temp. Probe	1	(FP66W)

Kits and Special Parts

Complete kits of parts for both modules excluding the Optional items are available. The pcb's are also available separately. Full construction details may be found in the Maplin Projects Book 25.

Applications Information

Further applications information on using these modules may be found in issue 71 of *Electronics – The Maplin Magazine* (XA71N). The article *Using Temperature Modules* gives details of how to interface the Converter Kit to a PC to measure temperature. Requires Temperature Module (FE33L) and Programmable PC I/O Card (LP12N). Article includes BASIC program listing. Also, details on using Relay Card Kit are included. Depending on application, requires Temperature Module (FE33L), Min/Max Temperature Module (FP64U). Wide Range Temperature Module (YT99H) or Min/Max Dual Display Temperature Module (YU00A).

Order Code	Type	Price each
LM36P	Converter Kit	£16.99

MIN/MAX TEMPERATURE MODULE

A maximum/minimum digital thermometer module with the LCD display and circuitry on a small pcb with a 16-way solder edge connection. The pcb is fixed to a small plastic bracket that houses the battery. The module has an onboard temperature sensor or an external probe or probes may be fitted. By making the appropriate connections to the module the following functions are available.

- ★ Temperature display in °C or °F.
- ★ Set high or low temperature detector.
- ★ Output goes high when set points are exceeded
- ★ Display high or low temperature settings.
- ★ Set sample rate to once every second or once per 15 seconds.
- ★ Pulse output when either set point is reached.
- ★ 2kHz alarm output for approximately 1 minute when high or low temperature point is reached.
- ★ Recall the lowest or highest temperature reached since last reset.

A comprehensive manual is supplied with the module, it shows how to connect relays to the temperature set point outputs, how to connect a buzzer to the alarm output, and how to connect external probes to the module.

Specification	
Internal Probe:	-5°C to +50°C 23 F to 122°F
Resolution:	0.1°C (0.1°F)
Accuracy:	-5°C to 30°C ±1°C at 1.5V +31°C to +50°C ±2°C at 1.5V
External Probe, White (low range):	-40°C to +50°C -40°F to 122°F
Accuracy 3 metre cable:	-40°C to -21°C ±2°C at 1.5V -20°C to +25°C ±1°C at 1.5V +26°C to +50°C ±2°C at 1.5V
External Probe, Grey (high range):	+20°C to +110°C 68°F to 230°F
Accuracy 3 metre cable:	+20°C to +34°C ±2°C at 1.5V +35°C to +75°C ±1°C at 1.5V +76°C to +110°C ±2°C at 1.5V
Sampling Rate:	1 second or 15 seconds
Working Voltage:	1.5V (1.25V to 1.65V)
Average Current:	10µA approx. (at 15 second sample rate)
Battery Life	>1 year
Overall Size	68 x 35 x 23mm deep

A plastic bezel (FE35Q) is available for use with the module, size 68 x 35mm and increases the overall depth of the module to 27mm.

External probes are also available:
Probe Length: 40mm.

Probe Diameter: 7mm at base, 4mm at tip.

The probes are supplied connected to approximately 3 metres of miniature 2 core cable 2mm diameter with open end. Note that the accuracy of the meter decreases by ±2.5°C per 3m of cable and may be unstable with long wires or cable different from that supplied with the probes.

The meter itself will only operate in the range -5°C to 50°C mainly because of the LCD display so for temperatures outside this range, the external probes will be required. Shortening the cable will improve the accuracy. The module requires a 1.5V AA cell (not supplied).

Applications Information

Further applications information on using this module may be found in issue 71 of *Electronics – The Maplin Magazine* (XA71N). The article *Using Temperature Modules* gives details of how to control relays and a buzzer. Requires Temperature Module Relay Card Kit (LM37S).

Order Code	Type	Price each
FP64U	Min/Max Temp Module	£9.99
FP65V	Low Temp Probe	£2.75
FP66W	High Temp Probe	£2.75

WIDE RANGE MIN/MAX TEMPERATURE MODULE

A very versatile minimum/maximum temperature module with the LCD display and circuitry on one small pcb mounted on a battery holder, with a 17 way edge connection. The module uses an external probe to display temperatures in the range -10°C to +110°C with a resolution of one tenth of a degree, in centigrade or fahrenheit. The module records both the highest and lowest temperatures (maximum and minimum) measured by the probe, which are stored and updated in memory, and the max./min. values in memory can be displayed showing the highest lowest temperature reached since the memory was last cleared. The maximum/minimum threshold values are fully programmable. Also included is a 12 hour digital clock, a 4kHz max./min. alarm output, separate outputs for relay drivers or similar which go high for 1 minute if the relevant programmed temperature threshold is reached, and a further output which pulses at 4kHz for 1 minute if either threshold is reached and then remains high until reset. There is a separate connection for a complete system reset. The external probe is included.

Specification

Range:	-10°C to +110°C
Resolution:	0.2°C, 0.2°F
Accuracy:	-10°C – 0°C ±1.5°C @ 1.5V 0°C – 60°C ±1°C @ 1.5V 60°C – 110°C ±1.5°C @ 1.5V
Sampling rate:	1 or 10 seconds switchable
Alarm output:	4kHz for 1 minute
Temperature set points:	1° steps
Display measuring range:	°C or °F
Clock accuracy:	±0.5s/day

Working voltage:	1.5V DC (1.25V to 1.8V)
Average current:	10µA approx. @ 10s sample rate
Battery life:	>1 year
Overall size:	68 x 35 x 23mm

A comprehensive manual is supplied with the module showing how to connect a buzzer circuit to the alarm output and relay drivers to the high/low threshold outputs, and connections for the various functions and programming modes. The plastic bezel (FE35Q) can be fitted and increases the overall depth of the module to 27mm. Note that the meter itself and mainly the LCD display will only operate in the range of -5°C to +50°C.

The module requires a 1.5V AA cell (not supplied).

Applications Information

Further applications information on using this module may be found in issue 71 of *Electronics – The Maplin Magazine* (XA71N). The article *Using Temperature Modules* gives details of how to control a buzzer and an LED. Requires Temperature Module Relay Card Kit (LM37S).

Order Code	Type	Price each
YT99H	Temp Mod Wide Range	£12.99

MIN/MAX DUAL DISPLAY TEMPERATURE MODULE

A minimum/maximum digital thermometer module with the LCD display and circuitry complete on a small pcb with an 11 way solder edge connection and integral battery holder. In operation the module records both the highest and lowest of external temperatures as measured by the module's own external probe. Maximum and minimum temperatures are stored and updated internally until reset. A max./min. temperature alarm function can be set to output a 2kHz tone upon either threshold being reached for external measurements. Especially useful is the module's ability to display both internal and external temperatures at once, ideal for example for providing at a glance a comparison between indoors and outdoors temperature differences. Temperatures displayed in degrees centigrade. The external probe is included.

Specification

Internal sensor range:	-5°C to +50°C
External probe range:	-40°C to +50°C
Resolution:	0.1°C
Accuracy:	-20°C – +30°C ±1°C @ 1.5V -40°C – -20°C ±2°C @ 1.5V +30°C – +50°C ±2°C @ 1.5V
Sampling rate:	15 seconds
Alarm output:	2kHz for 1 minute
Temp. set points:	1° steps
Working voltage:	1.5V (1.25V to 1.65V)
Average current:	20µA approx.
Battery life:	>1 year
Overall size:	68 x 35 x 23mm deep

A comprehensive manual is supplied with the module showing how to connect a buzzer circuit to the alarm output and switches for the various functions and programming modes. The plastic bezel (FE35Q) can be fitted and increases the overall depth of the module to 27mm.

Note that the meter itself and mainly the LCD display will only operate in the range of -5°C to +50°C and it is this which limits the range of the internal sensor. The module requires a 1.5V AA cell (not supplied).

Continued on next page.

Continued from previous page.

Applications Information

Further applications information on using this module may be found in issue 71 of *Electronics – The Maplin Magazine* (XA71N). The article *Using Temperature Modules* gives details of how to control a buzzer. Requires Temperature Module Relay Card Kit (LM37S) to control a buzzer.

Order Code	Type	Price each
YU00A	Dual Disp T Module	£10.99

MIN/MAX HUMIDITY MODULE

A small module in the same style as our temperature modules and specifically designed to measure the relative humidity of air and record the minimum and maximum levels reached at any time since last reset. The module covers the range of 25%RH to 95%RH in 1% steps with a sampling rate of 1 second, and can be placed in a fixed location to monitor humidity, but must only be used indoors. The sensor is internal and no external probe is required. The display normally shows the current humidity value continuously, but will show the minimum and maximum values stored through the use of two momentary action push buttons (not supplied), which are identified by the word 'MIN' or 'MAX' in the display. Both memories can be cleared by holding both buttons down. The display also shows the words 'COMFORT', 'DRY' or 'WET' depending on the humidity. 'DRY' is approximately <53% and 'WET', >67%.

There are a total of 11 connections to the module, four of which enable the module to output the currently measured value of either of the two stored values in the form of 4-bit parallel, packed BCD (Binary Coded Decimal). Each line of the 4-bit data packet begins with a pair of sync pulses, followed by its part of a bit pattern that informs the destination device whether the data is the current real-time, min. or max. reading, followed by two bits of binary data making up the two digits (most significant first), interleaved with sync pulses. The remaining data trains are specialised manufacturers codes and can be ignored. Similarly the specialised 'K' terminals can be ignored for most normal applications.

Specification

Measuring range:	25%RH to 95%RH
Operating range of module:	32%RH to 90%RH, 0°C to 50°C
Resolution:	1%RH
Supply current:	20µA (average)
Sample rate:	1 second
Operating voltage: Min.	1.25V
Nom.	1.5V
Max.	1.65V
Accuracy:	±5%RH between 40 to 80%RH @ 25°C ±7%RH below 40% or above 80%RH @ 25°C
Battery type:	Single AA cell (not supplied)
Battery life:	>1 year
Dimensions:	67 x 34 x 26mm

Pin Functions

- Pin 1 – display upper humidity limit
- Pin 2 – display lower humidity limit
- Pin 3 – +V (1.5V)
- Pin 4 – BCD output bit 0
- Pin 5 – BCD output bit 1
- Pin 6 – BCD output bit 2
- Pin 7 – BCD output bit 3
- Pin 8 – K1 Not used
- Pin 9 – K2 Not used
- Pin 10 – K3 Not used
- Pin 11 – 0V

Order Code	Type	Price each
ZA38R	Humidity Module	£14.99

COUNTER MODULE

An electronic Counter Module with 5-digit LCD display. The display increases by 1 every time a positive-going edge is applied to pin 3. A reset is available, and a tone output which can drive a piezo sounder directly and bleeps on every count and on reset. Square wave outputs at 512Hz and 32768Hz are also provided.

Specification

Working voltage:	1.5V DC
Current:	2µA standby 8µA average when counting
Count range:	00000 to 99999 (resets to 00000 after count 99999)
Max. input frequency:	7Hz
Input voltage range:	1V to 1.5V
Min. duration pulse:	<100µs
Overall size:	68 x 35 x 24mm

A plastic bezel (FE35Q) is available for use with this module, size 68 x 35mm and increases the overall depth of the module to 27mm. The module requires a 1.5V AA cell (not supplied).

Order Code	Type	Price each
FS13P	Counter Module	£8.99

1.2kW POWER CONTROLLER

- ★ Lighting
- ★ Power Tools
- ★ Soldering Iron Temperature

This versatile power controller is suitable for use as a lamp dimmer, power tool speed controller (not for use with 'electronic control' power tools) or for varying the temperature of a mains powered soldering iron. It can handle loads of up to 1.2kW which is more than sufficient for most normal domestic applications. The controller is easy and convenient to use, simply plug the appliance into the controller, plug the controller into a mains socket, switch on and set the required power level. Full constructional details may be found in Maplin Magazine Issue 40.

Specification

Input Voltage:	240V AC
Maximum Output Current:	5A
Maximum Output Power:	1.2kW

Optional Items

The following optional items, not included in the kit, may also be required.

Rubber 13A Plug	1	(HL58N)
Plug Fuse 5A	1	(HQ33L)

Kit and Special Parts

A complete kit of parts is available. The pcb and front panel are also available separately. Full construction details may be found in Maplin Magazine 40. PCB dimensions: 74 x 57mm.

Order Code	Type	Price each
LP41U A1	1.2KW Power Cntrlr	£27.99
GE62S	1.2KW Pwr Cntrlr PCB	£2.49
JU35Q	1.2kW Cntrl Panel	£1.35

PROGRAMMABLE TIMER CLOCK MODULE

A ready-built module which needs only a few additional components and a case to make a versatile, 24 hour clock/timer. The timer allows two programmable settings to be made, its output being an open-collector transistor. This could drive a relay if required. The clock is locked to the mains frequency although there is no reason why you could not use a 50Hz oscillator as a timebase – for example, 3.2768MHz divides by two exactly 16 times to get 50Hz. In this case battery back-up, in the event of a temporary mains failure, would be a possibility. The module requires a regulated 5V supply, and a connection to a secondary of the supply's mains transformer.

Specification

Display type:	4-digit 13.5mm LED
Clock type:	24 hour
Timer:	2 programmable switch-on times 2 programmable switch-off times Minimum switching interval of 1 min.
Supply voltage:	5VDC ±10% at 100mA typ.
Reference:	Mains frequency (integral prescaler)
Timer output:	Open collector, max. output current 50mA (at 40V)

A detailed review may be found in Maplin Magazine issue 50.

Order Code	Type	Price each
LP87U	Prog Clock/Timer	£26.99

1/300 TIMER MODULE

Features

- ★ Adjustable operating period
- ★ Wide supply voltage range
- ★ Low current consumption
- ★ Switches up to 500mA
- ★ LED output state indicator
- ★ Triggerable on negative or positive pulses

Based on the TLC555 timer IC, this 1/300 timer provides a switched output for an adjustable period of between approximately 1 second to 5 minutes. Applications include short duration 'time out' or auto switch off for devices such as lights and sounders after a set period. It can switch currents up to a maximum of 500mA making it ideal for driving relays, sirens, etc. A light emitting diode provides an indication of the output state.

Please note that the 1/300 timer is not a precision device and the operating times stated may vary due to component tolerances.

If in some applications it is necessary to switch higher voltages or currents than are possible directly, the module can be used to switch a relay which is suitable for higher power switching, and the open collector output makes the circuit ideal for operating relays. The 1/300 Timer is ideal for use with the Audio Controlled Switch (LP29G) as it is triggered by both positive and negative going pulses.

Specification

Power Supply Voltage		3V to 15V
Power Supply Current	With no external load	12mA Max at 12V
Maximum Load current		500mA
Switch-on Period	Adjustable	1s to 310s Approx.
Input Trigger	Positive & Negative Edge	± Supply Voltage
PCB Dimensions		57mm x 54mm

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 38.

PCB dimensions: 56 x 53.3mm.

Order Code	Type	Price each

EXERCISE PULSE MONITOR

Casio

A superb watch designed for those who are serious about fitness, housed in a black resin case with matching strap. By simply programming the watch with the relevant data i.e. age, the watch measures your pulse, and displays your optimal aerobic range. An 'intensity' gauge even indicates the intensity of the activity you are performing. Additionally, there are three sets of 7 measurement data memories. The watch has the usual timekeeping functions i.e. hours, minutes, seconds, month, date and day, and automatically determines and sets the number of odd or even days in the month. A daily alarm can be set to provide a gentle reminder at the same time every day, and time signals can be set to 'beep' on the hour. The time display can be set to show the time in either the 12 or 24-hour format. Power is supplied by a CR2016 type battery with an approximate battery life of two years. Water resistant to a depth of 50m (static water pressure).

SUPERB QUALITY!
£46.99 DM95D

HI-LOW SWITCH

An ingenious electronic switch that can be used in numerous applications. The Hi-Low Switch is a resistance operated transistor switching circuit with an output capable of driving a small buzzer or relay or other loads which draw up to a maximum of 50mA. The current drain of the circuit when in the standby mode is very low (30µA) and therefore the circuit will operate from a 9V PP3 type battery for long periods. The switching threshold may be adjusted between approximately 500kΩ and 10MΩ.

Optional Items

The following items, not included in the kit, may also be required.

PT Buzzer	1 off	(FK83E)
3A min relay	1 off	(YX96E)

Kit and Special Parts

A complete kit of parts, excluding optional items is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 32.

Order Code	Type	Price each
LM89W	Hi-Lo Switch Kit	£3.75
GE08J	Hi-Lo Switch PCB	£1.59

LIGHT LEVEL SWITCH

- ★ Adjustable trigger threshold
- ★ Wide supply voltage
- ★ Selectable output state
- ★ Switches currents up to 500mA

The light level switch is a simple light operated switching circuit which operates a relay when the ambient light level rises above or falls below a preset threshold. The module uses an on-board reed relay which is capable of switching currents up to 500mA. For current levels exceeding this the reed can be used to switch an external relay suitable for higher power applications. The reed itself must not be used to switch voltages exceeding 50V or power levels exceeding 10VA. A sensitivity control allows different switching thresholds to be set to allow for a diverse range of lighting conditions. The module can run from a supply of 9 to 12V DC, with a maximum current drain of 19mA max. at 12V. The circuit uses a Schmitt trigger to change state, and the reed relay switching stage can be hard wired or switched to be either normally off, or, with the help of an inverter stage, normally on. In this way the response to light level can also be either way around where either dark or light is a 'normal' condition.

Kit and Special Parts

A complete kit of parts is available. The PCB measures 44 x 63mm and is also available separately. Full construction details may be found in Maplin Magazine Issue 37. PCB dimensions: 63.5 x 44.5mm.

Order Code	Type	Price each
LP14Q	Light Level Sw Kit	£6.99
GE34M	Light Level PCB	£2.25

ZERO CROSSING OPTO SWITCH

3

- ★ Switches 240W resistive load
- ★ Limits switching surges

Primarily designed for the Christmas Star project, this module can also be used in other applications which require a noise free, zero crossing opto-isolator switch, able to handle a 250W load (resistive). The unit avoids inherent interference problems associated with switching the 240V mains supply across a load, while part way through a mains voltage cycle. A snubber network suppresses any unwanted noise generated by the unit. This project is not recommended for absolute beginners as it involves working with mains circuitry directly. The output switch is isolated from the input by an opto-coupler.

Specification

Max control voltage:	12V DC
Max mains voltage:	240V DC
Max power rating:	250W Resistive

Optional Items

The following items are not included in the kit but may also be required.

ABS Box MB2	1	(LH21X)
Europlug	1	(FT64U)
Eurosocket	1	(FT63T)
Terminal Block 2A	1	(FE78K)
Safuseholder 20	1	(RX96E)
Fuse A/S 1A	1	(WR19V)
SR Grommet SR2	1	(LR48C)
Min. Mains Black	3 Mtr	(XR01B)
Isobolt M3 20mm	1 Pkt	(JD17T)
Isonut M3	1 Pkt	(BF58N)
Isoshake M3	1 Pkt	(BF44X)
M3 Insulated Spacer 10	1 Pkt	(FS36P)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 48.

8 CHANNEL FLUID DETECTOR

1

Using the LM1830 fluid detector IC, this module will provide an indication of water level to eight demarcations over whatever range chosen, or water level in eight separate locations, or any combination of the two. Eight LED indicators form a visual display of fluid level, which can be made compatible with the location and meaning of the eight probes. Applications include monitoring level in water tanks, for the automatic switching of electric valves and pumps, car windscreen washer bottle 'low' warning, the watering of greenhouse plants; your imagination is the limit. Requires a 12 volt DC supply.

Kit and Special Parts

Complete kit of all parts; pcb also available separately. Full construction details may be found in the Best of Maplin Projects Book 6. PCB dimensions: 79 x 63mm.

Order Code	Type	Price each
LK48C	8 Ch Fluid Dctr Kit	£15.99
GB66W	8 Ch Fluid Dctr PCB	£4.25

MAINS CONTROLLER

3

Exclusively for use with the 8-channel Fluid Detector. The instructions for this project include suggestions for modifying the 8-channel detector to operate relays as well as LED indicators. The mains controller has logic controlled relays for the purpose of operating mains equipment, e.g. pumps, valves, etc. This project allows complex control over the water level in a tank where a pump is used to partially empty the tank when the level has reached a certain threshold as determined by the fluid detector. If the tank was being filled from a continuous supply of water, the controller can cut this off via an electric inlet valve until the pump has done its work, to prevent the tank overflowing. All this is primarily controlled by the 8-channel fluid detector. PCB mounted terminal blocks are provided for simple connection between module and appliances.

Kit and Special Parts

Complete kit of all parts; pcb also available separately. Full construction details may be found in the Best of Maplin Projects Book 6. PCB dimensions: 87 x 58mm.

SIREN SOUND GENERATOR

- ★ Low Cost
- ★ Easy to Build
- ★ Minimum of Tools and Test Gear Required
- ★ No Setting-up Required
- ★ Low Power Consumption
- ★ Wide Range of Applications
- ★ Audio Output to External Amplifier

Specification of Prototype

Integrated circuit:	UM3561 low-power CMOS LSI
Memory:	masked Read Only Memory (ROM) 256 words by 8 bits
Tone generator:	logic controlled divider
Four sound patterns:	1. Police siren 2. Fire engine siren 3. Ambulance siren 4. Machine gun
Operating voltage:	2.4V to 15V
Supply current:	9mA at 9V (Piezo sounder fitted)
Reverse polarity protection	
Output:	Piezo sounder or 8Ω/64Ω loudspeaker
External amplifier	
Output:	1V square wave at 10kΩ
Operating ambient temperature:	-10°C to 60°C
Storage temperature:	-55°C to 125°C

2

A simple to construct siren generator kit built around the UM3561 LSI chip. The UM3561 is designed for use in toy and model applications. However, the sounds produced could be used as an audio warning signal in security, or environmental monitoring systems. To accommodate this, the unit is designed to operate over a wide range of voltage and temperatures. Three siren and one other sound effect is generated and provision has been made for connection to an external amplifier should louder volumes be required.

Optional Items

The following items, not included in the kit, may also be required.

Hi-Z Loudspeaker 64R	1	(WF57M)
5in. Hom Speaker	1	(XQ73Q)

Kit and Special Parts

A complete kit is available, the pcb is also available separately. Full construction details can be found in the Maplin Magazine Issue 26.

Order Code	Type	Price each
LM42V	Siren Sound Gen Kit	£4.49
GD76H	Siren Sound PCB	£1.75

SEALED LEAD-ACID BATTERY CHARGERS

- ★ 2 kits available for 6V or 12V
- ★ Charge current up to 500mA
- ★ Current foldback
- ★ Charge indicator
- ★ Power on indicator

These mains-powered chargers are ideally suited for charging batteries from the wide range of sealed lead acid batteries, that are rated at between 1Ah and 8Ah. The kits are based on either the 6V charger module (JY65V) or the 12V module (JY64U), and are very easy to build. The chargers feature a regulated output and current foldback, and may be used for cyclic or trickle charging. The Chargers have mains and output fuses, 'power on' and 'charge' indicators, and the kits include a suitable mains step-down transformer.

life and not least because these batteries are not equipped to deal with abruptly changing internal gas pressures normally associated with vigorous charging.

The charger quickly and safely charges lead acid batteries, even employing temperature compensation with a remote temperature sensor used in the vicinity of the battery. The two-step charging feature provides a high initial charging voltage to rapidly bring a discharged battery to near full charge. The actual charging current is then monitored until the battery reaches its full capacity. As the battery approaches the fully charged condition and the charging current falls below 180mA the charger enters the float condition, which prevents the battery from being overcharged. LED indicators are used to display these two modes. The charger can be used with conventional lead acid batteries as the charging voltages required are very similar.

Important Note

The more usual type of car battery charger must not be used with Sealed Lead Acid batteries.

Kit and Special Parts

A complete kit including case, hardware, cable, battery clips, front panel etc. is available. The pcb and front panel are also available separately. Full construction details may be found in the Best of Maplin Projects Book 5. A ready-built, aligned and tested Battery Charger is also available. PCB dimensions: 66 x 70mm.

Order Code	Type	Price each
LM01B	L'Acid Bat Chrgr Kit	£54.99

GD13P	Lead Acid Bat Chrgr	£1.49
FSC0A	L'Acid Bat Chrgr Pnl	£4.49

MOVING MESSAGE DISPLAY SYSTEM

Features

- ★ Designed for use with any computer equipped with three 8-bit I/O ports - e.g., an IBM PC or compatible equipped with the Maplin 24-line P/I/O card
- ★ Easily programmable from BASIC
- ★ Expandable to 32 boards by 'daisy-chaining' modules together
- ★ Large viewing area makes display highly readable in all lighting conditions
- ★ Programmable scrolling in all directions
- ★ Facilities for fade up/down
- ★ Programmable 'fizzle' effects
- ★ Direct pixel addressing for Speed (Animations, etc.)
- ★ Easy to build

Applications

- ★ Shop displays
- ★ Announcements in public areas
- ★ Special effects

In recent years, moving message displays have become widely available commercially. The basis of these systems is often a fixed-length LED display

controlled by a microcomputer system, the messages being entered on a miniature keyboard and stored in non-volatile memory.

This moving message display system uses a direct access architecture, and is fully controlled by a host computer. As a result, a wide variety of display techniques can be employed, all programmed in BASIC by the user. The system can, with appropriate programming, perform any of the functions seen on commercial displays. The computer must have two 8-bit plus one 2-bit, parallel latching output ports. For example, the Intel 8155 and 8255 PPI (Programmable Peripheral Interface) are suitable. The 8255 PPI is used in the Maplin 24-line P/I/O Card. Note that an IBM PC's printer port is not suitable.

The project requires a BASIC interpreter (or compiler). For the expandable display, the BASIC interpreter must be capable of directly calling machine code routines, which will involve some advanced programming. This project uses the GW-BASIC Interpreter running on an IBM PC compatible computer, but other types of BASIC can be used. A unique feature of this moving message display system is that it has been designed to be expandable. The unit module is the moving message display module. The system is expandable from one module up to a maximum of 32 display modules, giving a 2.6m long high-resolution display, which is comparable with the largest commercial displays. All the necessary electronics to drive the LED display are also contained on the same board. As a result, the modules are easy to build.

For interconnection of the display to the computer, knowledge of how to correctly connect to the parallel ports will be required.

When more than one display module is used a controller board is required with every two display modules requiring one controller board.

There are three practical variations of the controller board which allow for daisy-chaining, as well as component minimisation. These three variations are as follows:

- Controller Board 1 – Master Controller
- Even subsequent controller boards – Slave Controller (for even numbered display modules)
- Odd subsequent controller boards – Slave Controller (for odd numbered display modules)

In addition, there are three levels of construction to the moving message display system.

Moving Message Display Module (MMDM)	Minimum System Configuration
Two MMDMs and Master Controller	Base System
4 or more MMDMs, 2 or more Controllers	Expandable system

Display module specification

Power supply requirement:	9V unregulated, 1.5A maximum, 2A peak
Computer interface required:	2 x 8-bit and 1 x 2-bit parallel latching output ports
Data feed:	Parallel load

Continued on next page.

Specification

	6V Charger	12V Charger
Supply voltage:	Mains (240V AC RMS)	
Output current max:	700mA	525mA
DC max. continuous load Current:	525mA	375mA
Charge LED cut-off current:	245mA	175mA
Suitable battery range:	1Ah to 8Ah	
Dimensions:	71(Max 78) x 45 x 25mm	

Optional Items

The following items, not included in the kit, may also be required.

16/0-2 Wire 10m Red	1 Pk	(FA33L)
16/0-2 Wire 10m Black	1 Pk	(FA26D)
4mm Croc Clip Black	1	(HF23A)
4mm Croc Clip Red	1	(HF24B)
Charger Clip	2	(HF26D)
Large Battery Clip Red	1	(FS86T)
Large Battery Clip Black	1	(FS87U)
13A Nylon Plug	1	(RW67X)
2A Fuse Plug	1	(HQ31J)

Kit and Special Parts

A complete kit to build either a 6V or 12V charger is available, including the mains transformer and box, but excluding optional items. Full construction details may be found in Maplin Magazine Issue 53.

Order Code	Type	Price each
LP91Y	6V Lead Acid Chrgr	£44.99
LP73Q	12V Lead Acid Chrgr	£44.99

SEALED LEAD ACID BATTERY CHARGER

- ★ Selectable 4V, 6V or 12V
- ★ Automatic Two Stage Charging
- ★ Simple Construction

This project is intended for use with our range of sealed lead acid batteries, and for this reason the output is deliberately intended to maintain a ripple free supply with a close voltage tolerance, using electronic regulation with temperature compensation. Proper charging of these sealed batteries is very important (see notes on charging, Sealed Lead Acid Batteries, Batteries section), to ensure a long, trouble free service

Continued from previous page.

Hardware control: Direct addressing, hardware blanking.
 Display type: 64.5mm Red LEDs in an 8 x 8 matrix with 10mm spacing
 PCB dimensions: 5.8in. x 3.1in.
 Viewing area: 3.2in. x 3.2in.
 Message effects: Scroll left, scroll right, scroll up, scroll down, fade up, fade down, flash, animations.

Display controller specification

Power supply: 3.5 to 4.1V DC, 120mA max (Master Controller)
 100mA max (Maximum Slave Controller)
 80mA max (Minimum Slave Controller)
 Power supply source: Derived from odd numbered Moving Message Display Modules in system.
 Outputs: One of 16 decoded outputs generated from D0 to D3.
 Module pair select, bits 1 to 16
 Inputs: Parallel port B, bits 0 to 7, Parallel port C, bit 1 (Master Controller)
 Module Pair select 1 to 16, D0 to D3 (Slave Controllers)

Optional items for display controller

The following items, not included in the kit, may also be required.

100nF 16V Minidisc	4	(YR75S)
74LS154	1	(YF58N)
74LS08	1	(YF06G)
74LS244	2	(QQ56L)
IBM PC P/I/O Card	1	(LP12N)
Maplin Magazine 43	1	(XA43W)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available for the display module and for the display controller (excluding optional items). The PCBs are also available separately. Full construction details may be found in Maplin Magazine Issues 62, 63, 64 and 65.

A 5 1/4 in disk (PC 360k format) containing software for use with the Moving Message Display System is also available.

LASER TUBE AND PSU

— a KTE Kit

- ★ Helium-neon Laser Tube with 2mW Output Power
- ★ 1.8kV Power Supply with High Ignition Voltage
- ★ Protective Aluminium Case for Tube and PSU
- ★ 240VAC Operation

Lasers are capable of producing holograms where a recorded pattern of interference fringes produces a three dimensional image. Laser light is also used in disco's and displays as well as finding educational and scientific applications in schools and laboratories. The helium-neon laser emits a randomly polarised, 632.8nm wavelength red light, at a low 2mW power output level which makes it completely safe provided the light beam is not directed into the eye. Staring directly into the beam may well result in damage to the retina and must be avoided at all costs. However, the laser is incapable of cutting or drilling and will not burn when directed at the skin. The glass envelope is protected by an aluminium tube and all electrodes are

terminated with high voltage insulated cables and plugs. The power supply uses high voltage rated components, transformer and pcb to generate both the ignition strike voltage of 8kV and the continuous running voltage of 1.8kV at 5mA. It is recommended that the PSU be powered up only when fitted with the laser tube and assembled into the metal case provided, otherwise voltages in excess of 10kV may be generated and these are liable to arc over.

Kit and Special Parts

A complete kit and the ready-built version are available. Full construction details may be found in Maplin Magazine Issue 29.

Order Code	Type	Price each
LM72P	H4 Laser & PSU Kit	£119.99
XM14Q	H4 Laser & PSU Assmbl	£169.99

LASER CONTROLLER

— a KTE Kit

- ★ Motorised Mirrors for X and Y Light Beam Deflection
- ★ Three Operating Modes for Manual, Auto and Audio Input
- ★ Lissajous and Spiral Graphics Effects
- ★ 12VDC Operation

The Laser Controller is a two channel motor drive system designed to rotate two specially angled mirrors. Each mirror deflects a laser beam through 90° and the beam is reflected onto a wall in a series of Lissajous figures. Although primarily intended for use with our laser and PSU project, the controller can be used with similar lasers having an output port aperture 0.5 to 0.75mm in diameter. Patterns can be generated according to one of the three available modes, either 'Manually' where the two motor speeds can be individually preset for a fixed pattern; 'Auto' where the motor speeds are ramped up and down at a variable rate for a continuously changing graphic display and 'Audio' where the speed is controlled by the frequency and amplitude of an external audio input. In the latter mode, the laser can be used in a sound to light system with a music signal as the source.

Please Note: The Laser Controller Kit includes the motor/mirror assembly and the controller box. It does not include the Laser and PSU. This must be ordered separately as LM72P. The Controller Kit requires a 12V DC power supply such as XX09K.

Kit and Special Parts

A complete kit and the ready-built version are available. Full construction details may be found in Maplin Magazine Issue 29.

VELLEMAN ENVIRONMENTAL PROJECTS K2579 UNIVERSAL TIMER

Miniature universal timer with periods ranging from a few seconds to 15 minutes with a switch-on delay of up to 60 minutes. Relay can switch 240V at up to 2A. Requires 12V DC.

Order Code	Type	Price each
VF06G	Velleman Kit K2579	£8.99

K6000 7 DAY MICROPROCESSOR TIMER/CONTROLLER

This 7-day timer allows you to programme 4 outputs independently of each other. Together with 4 x K6001 you can build a thermostat yourself with 4 independent temperature zones so that, for example, the temperature in the living-room, in the kitchen, in the bathroom and in the bedrooms can be controlled separately and at different points in time. With the built-in illuminated LCD matrix display you can easily read out all the program steps. Memory back-up with Ni-Cd battery, protects memory and clock during power loss. The front plate is supplied with the kit. Black plastic housing to match (B6000) separately obtainable.

Order Code	Type	Price each
VE67X	A2 Velleman Kit K6000	£99.99
VF07H	B6000 Plastic Case	£11.99

K2603C 1 YEAR MICROPROCESSOR CONTROL TIMER

This powerful timing device allows programming of 4 independent outputs from 1 second to 1 year. The memory can store 336 functions (on-off, sleep, enable-disable). The two independent sleep times are programmable from 1 second to 100 minutes. Extra protection of the memory is provided to avoid accidental erasing or overwriting by unauthorised persons. The kit includes housing, keyboard, 4 relays, full memory, and Ni-Cd back-up battery.

Time range: 1 second min. to 1 year max.
 Memory capacity: 336 steps switchable to 560 if no dates required.
 Memory back-up: Ni-Cd battery (incl.)
 Memory protection: clearing requires pressing of two keys simultaneously.
 Writing can be disabled internally.
 Membrane keyboard with key beep and LED indication.
 Outputs: 4 relays 240V/3A.
 Power supply: 8V AC/1A or 12V DC/1A unswitched.
 Dimensions: 242 x 116 x 59mm.

Order Code	Type	Price each
VE79L A2	Velleman Kit K2603C	£134.99

K6003 DIGITAL THERMOMETER SENSOR WITH LED DISPLAY

Although this kit was especially designed to operate in conjunction with our controllers K6000, K6010 or K6002, it is also very well suited for use as a conventional thermometer. The digital display gives the following consecutive information:

1. The current temperature
 2. The minimum temperature
 3. The maximum temperature
- When a 'rest' key is pressed the highest and lowest temperatures measured are stored and, if necessary, adjusted.
 An aluminium case is supplied with the kit, to allow the thermometer/sensor to be mounted on a wall.

Microprocessor technology
 Minimum and maximum temperature
 Temperature range of the sensor: -50°C to +150°C
 Linearity from -10° to +50°: better than 0.5%
 Full scale accuracy: better than 2%

Adjustable to degrees Fahrenheit
 Display: 3 1/2 digits (0.1° display accuracy)
 Supply voltage: 12 to 15VDC/150mA
 Dimensions (W x H x D): 144 x 50 x 22mm

Order Code	Type	Price each
VF09K	Velleman Kit K6003	£51.99

K6001 TEMPERATURE SENSOR

This kit has been developed to be combined with K6000 or K6002 for building a temperature regulating and control system. Together with kit K6000 you can build a complete programmable thermostat. The advantage of a separate sensor is that the distance between the controller and the sensor is of no importance (tested up to 50m).

Temperature range of the transmitter: -40°C to 150°C
 Linearity from -10°C to 50°C: better than 0.5%
 Supply voltage: 12V DC (±2V) unswitched
 Current consumption: 20mA max.

K6002 MICROPROCESSOR TEMPERATURE CONTROLLER

Unlike a normal thermostat this kit has two inputs, one for a 'high' alarm e.g. to switch on the air conditioning, and one for a 'low' alarm e.g. to switch on the central heating. Both 'alarms' are adjustable separately, each with its own hysteresis. Several temperature sensors (K6001) can be connected (1 x K6001 supplied with the kit). Separate opto-coupler sensor input (for K6001) is also provided.

Relay outputs: 5A/220V AC changeover contact
 Accuracy: ±0.1°C
 Read out: from -40°C to +150°C (together with K6001)
 24 hour clock (50Hz mains frequency accuracy)
 Alarm setting: from -50°C to +154°C

Order Code	Type	Price each
VE69A	Velleman Kit K6002	£59.99

▶ IT'S A FACT! ◀

The following circuit and formulae are suitable for a general purpose npn transistor amplifier.

$$V_B = V_E + 0.6$$

$$V_B = \frac{V_{CC} - V_E}{2}$$

$$V_E = \frac{V_{CC}}{10}$$

$$C_1 = \frac{10}{2\pi R_1 f_L} \mu F$$

$$C_1 = \frac{10}{2\pi R_m f_L}$$

where f_L = Lowest frequency to be handled by amplifier

$$R_1 = \frac{V_C}{I_C} \text{ and } R_2 = \frac{V_E}{I_E}$$

$$C_2 = \frac{10}{2\pi R_L f_L} \mu F$$

$$I_E = I_C + I_B$$

$$F_{bias} = \frac{10I_C}{H_{fe}}$$

$$R_m = R_1 // R_2 = \frac{1}{\frac{1}{R_1} + \frac{1}{R_2}}$$

$$R_1 = \frac{V_{CC} - V_B}{I_{bias}}$$

$$R_1 + R_2 = \frac{V_{CC}}{I_{bias}}$$

$$R_2 = \frac{V_B}{I_{bias}}$$

K6714 UNIVERSAL RELAY CARD

If you want an electronic controller to be able to switch higher currents and at the same time provide isolation between the controller and the controlled items, then this relay module is for you. It is very well suited to be connected to our kits K6711 (15 channel IR receiver) and one or two times K6701 (8 channel 2 wire receiver). For those two kits power can be taken direct from the relay module. The module can also be used together with the open collector interface module K2609. In its standard version the module contains 8 relays, but it can be extended up to a maximum of 16 relays.

Relay switch-over contact: max. 5A at 220V.
Output voltage: 12V/250mA for feeding K6701/K6715
Power supply: 220 or 125VAC/12VA
Dimensions: 150 x 212mm

Order Code	Type	Price each
VF10L	Velleman Kit K6714	£39.99

K2607 THERMOMETER ADAPTOR

This very useful compact unit provides an output voltage that varies proportionally with temperature. Ideal for computerised, or non-computerised, control systems, temperature monitoring or simply to construct a digital (or analogue) thermometer. The zero point is adjustable over a wide range and does not necessarily have to be zero volts out for 0°C. The output is buffered and can directly control an analogue or digital millivoltmeter, such as kit K2032, or an ordinary multimeter. The sensitivity is selectable for 10, 20 or 40mV per °C and the adaptor covers the range -25°C to +85°C. For convenience, the sensor may be remotely located. The adaptor requires a non-regulated ±12V to ±15V DC supply.

Order Code	Type	Price each
VE65F	Velleman Kit K2607	£9.99

K2636 DRILL SPEED CONTROLLER

Designed to control universal AC motors (with carbon brushes). High torque even at low rpm. Also applicable for low voltage loads (24V), i.e. for halogen lighting. Supply and load circuits are electrically isolated. Supply: 110 to 125V or 220-240V AC
Load: 24 to 240V AC, max. 5A Minimum rpm adjustable.
Low interference level. Control range: 5-95%

Order Code	Type	Price each
VE90X	Velleman Kit K2636	£21.99

K2639 LIQUID LEVEL CONTROLLER

Did you forget to turn off the tap? Is the washing machine leaking? Will the aquarium level go too low? Has the rain water butt overflowed? Do you have water in the cellar? Just a minor mishap, or a disaster? You can avoid all this by installing the liquid level controller

Power supply: 12 to 14V AC or 16 to 18V DC
Supply current: 100mA max.
Relay output: 240V/3A max.
Dimensions: PCB: 104 x 60 x 29mm
sensors: 104 x 25 x 1.5mm

Order Code	Type	Price each
VF11M	Velleman Kit K2639	£12.99

K2649 THERMOSTAT WITH LCD DISPLAY

Wide range: -50° to +150°C (-60° to +300°F)
Adjustable hysteresis: 0.2 to 10°C (0.5 to 20°F)
Can be calibrated in degrees Celsius or Fahrenheit.
Resolution: 0.1°C or 1°F
Economy switch input: lowers temperature when external switch (or relay contact of a timer) is closed, e.g. at night.
Relay output: max. 250V/3A
Power supply and transformer included.
Dimensions: 124 x 62 x 65mm

Order Code	Type	Price each
VE66W	Velleman Kit K2649	£39.99

FOR TOP QUALITY & VALUE!

K2657 SLOW ON/SLOW OFF DIMMER

One could name this dimmer a 'soft switch'. The lamp does not go on or off instantly, but slowly. Dimming times are adjustable within a wide range while the number of possible applications is increased by the following two working modes.

- 1) Dimming slowly. Dimming on and off times adjustable independently (2 seconds up to one hour).
- 2) Timer/dimmer. On-time adjustable independently (1 sec. up to 30 min.).

Mains voltage: 100/125 or 220/240V, 50 or 60Hz.
Max. load: 2A (400W at 220V or 200W at 110V).

Order Code	Type	Price each
VE51F	Velleman Kit K2657	£15.99

K6004 DAY/NIGHT THERMOSTAT

Ease of operation and low-cost combined with many possibilities are the key features of this thermostat. Both day and night temperature may be set simply by means of rotary knobs. The switch-over time from day to night is repeated automatically every day, once it has been programmed. Manual override, to switch-over from day to night temperature, is also possible by means of a push-button. Also, a one hour sleep function is provided that can be used in a bathroom or other rooms that are only used occasionally. Alternatively, the thermostat may be switched from day to night by means of a remote switch. The thermostat is also provided with an alarm output to provide warning of when the temperature falls below 5°C (41°F). Supplied with aluminium housing.

Specification

Number of switch-over steps: 19
 Minimum time between steps: 4 seconds
 Adjustment range: 5°C to 30°C (41°F to 86°F)
 Relay output: 3A/50V
 Alarm output (open collector): 50mA/70V at 5°C
 Clock accuracy: 50Hz to 60Hz (mains frequency)
 Hysteresis adjustable from: ±0.2°C to ±0.4°C
 Supply requirements: 9V to 12V AC 100mA
 Dimensions: 170 x 50 x 23mm

Order Code	Type	Price each
VF36P	Day/Night Thermostat	£49.99

K5002 HALOGEN LAMP DIMMER

This small circuit may be used to vary the brightness of lights, or as a dimmer for induction current, such as transformer voltage for halogen lighting, motor power, etc. The dimmer can easily replace an existing switch, without additional wiring. The dimmer switch may be controlled by means of an ordinary push-button. It is also acceptable to connect an unlimited number of push-buttons in parallel to control the dimmer switch from different places. Three different dimming functions are provided:

- A: Same direction dimmer function.**
- short repeated pressure: start/stop
 - long pressure: dims light
 - repeated long pressure: dimming in same direction
- B: Memory function.**
- short repeated pressure: continues in previous dimmer state
 - long pressure: dims light
 - repeated long pressure: backward dimming
- C: Identical to A but dims backwards with repeated long pressure.**

Specification

Mains voltage: 110 or 220/240V AC 50Hz to 60Hz
 Maximum power: 750W at 250V or 380W at 110V
 Dimming duration: 3.5 seconds
 Dimensions: 48 x 45mm

Order Code	Type	Price each
VF37S	Halogen Lamp Dimmer	£16.99

K5001 SUPPRESSED 3.5A DIMMER

Owing to its small size this compact dimmer can replace an existing switch, (but check depth of pattern) allowing you to vary the brightness of a light or group of lights. The dimmer may also be used to adjust the speed of a motor, vacuum cleaner, portable electric drill, or any other motor with carbon brushes. A mains suppressor is provided, eliminating undesirable radio interference. The dimmer is not suitable for halogen lighting. Isolated triac. Dimensions of PCB: 45 x 47mm.

Order Code	Type	Price each
VF41U	3.5A Dimmer Suprsd	£10.99

K2645 GEIGER-MÜLLER COUNTER

This Geiger-Müller counter provides an 'acoustic' measurement of radiation levels – the higher the radiation level, the 'faster' the audible output. The counter is most sensitive to high energy gamma and beta radiation. The counter is self-contained, compact, and may be mounted in a small box, together with the 9V battery (not supplied). The battery should provide about two months of continuous use with normal radiation levels.

MUSICAL PROJECTS

SIMPLE MELODY GENERATOR

- ★ Simple Construction
- ★ Small Size
- ★ 4 Different Versions

A simple to construct melody generator based on the UM66 series CMOS LSI chips designed for use in door bell, telephone and toy applications. The 64 note Read Only Memory (ROM) integral to the UM66 is programmed with one of four different melodies and is available as follows:

Kit 1: A medley of Jingle Bells, Santa Claus is Coming to Town, and We Wish You A Merry Christmas.

Kit 2: Happy Birthday to You

Kit 3: Wedding March

Kit 4: Love Me Tender, Love Me True

Specification of prototype

64 Note ROM Memory	
Tone Generator	
Range:	C4 to C6
Operating Voltage:	1.3V to 15V
Stand-By Supply Current:	1µA at 1.3V
Reverse Polarity Protection	
Output:	Piezo Sounder or 8Ω Loudspeaker
External Amplifier Output:	1V Square Wave at 10kΩ

Optional Items

The following items, not included in the kit, may also be required.

Miniature Loudspeaker	1	(WF57M)
Push Switch	1	(FH59P)
5in. Horn Speaker	1	(XQ73Q)

Kits and Special Parts

Complete kits are available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 26.

Order Code	Type	Price each
LM43W	Simple Melody Gen 1	£2.99
LM44X	Simple Melody Gen 2	£2.99
LM45Y	Simple Melody Gen 3	£2.99
LM46A	Simple Melody Gen 4	£2.99
GD75S	Simple Melody PCB	75p

MULTI-TUNE GENERATOR

- ★ Easy to Build
- ★ Minimum of Tools and Test Gear Required
- ★ No Setting-up Required
- ★ No Musical Knowledge Required
- ★ On-board Power Amplifier
- ★ Audio Output to external Amplifier
- ★ Automatic Switch off at end of Tune for Power Saving
- ★ Variable Envelope for Piano to Organ Type Sounds
- ★ Variable Volume and Pitch/Speed
- ★ Two Control Switch Inputs
- ★ Transistor Switched Voltage Output

Specification of Prototype

Integrated circuit:	UM3481 1A low-power CMOS LSI
Operating voltage:	1.5V to 4.5V
Supply current:	150mA at 4.5V
Stand-by supply current:	2.5µA at 4.5V
Transistor switched supply output:	1.5V to 12V
Output current:	200mA at 12V maximum
Memory:	Masked Read Only Memory (ROM) 512 words by 7 bits
Master Oscillator tuning range:	50kHz to 175kHz
Tone generator:	Logic controlled divider

Number of tunes – 16:

1: Twinkle, Twinkle, Little Star	9: London Bridge Is Falling Down
2: Cuckoo Waltz (1)	10: Little Brown Jug
3: Eency Weency Spider	11: Butterfly
4: Lullaby	12: Long Long Ago
5: Santa Lucia	13: Cuckoo Waltz (2)
6: Oh My Darling Clementine	14: Mary Had A Little Lamb
7: Are You Sleeping	15: The Train Is Running Fast
8: Rock-A-Bye Baby	16: Dream Of Home And Mother

The UM34811A is a low-cost, low-power CMOS LSI chip designed for use in door bell and music box applications. Inside the chip is a pre-programmed memory containing 512 notes and is capable of generating 16 different tunes. To trigger the unit, two pulse generator circuits have been incorporated. A bell push, mercury tilt, pressure mat or microswitch can be used to start the tune playing. The comprehensive control facilities enable the playing of all tunes repeatedly or stopping at the end of each tune. Three preset resistors on the PCB control the volume, pitch and envelope. An on-board amplifier capable of driving a small loudspeaker is included in the design. However, provision has been made for an external amplifier if louder volumes are required. The construction details describe the operation of the UM34811A chip.

Optional Items

The following items, not included in the kit, may also be required:

Zip Wire	As Req	(XR39N)
Horn Speaker	1	(XQ73Q)
Bell Push	As Req	(FS17T)

Min Microswitch	As Req	(FP41U)
Miniature Mercury Tilt Switch	As Req	(FE11M)
Pressure Mat	As Req	(YB91Y)
Bulb MES 6V 0.6W	1	(WL78K)
MES Batten Holder	1	(RX86T)
Miniature Motor	1	(YG12N)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 26.

Order Code	Type	Price each
LM47B	Multi-tune Gen Kit	£11.49
GD83E	Tunes Generator PCB	£2.99

MELODY MAKER

- ★ 47 note memory
- ★ 15 pre-programmed songs
- ★ Minimal wiring
- ★ Hand-held case with integral keypad and battery compartment

It looks just like an ordinary TV remote control, but is in fact a fun musical instrument intended for young children to gain experience in playing simple tunes. In its compose mode, the keys G3 to G5 are used to enter your own songs into a 47 note memory, the recording process starts when the first key is pressed. There is a default duration of four seconds (maximum) rest duration, and your song can be replayed as many times as you like by pressing the 'replay' key. Additional notes can be added as soon as the song finishes, and if you exceed the capacity of the memory you can still play notes, but they will not be stored, and only the previous 47 notes will be retained. The memory is wiped by pressing the 'reset' key, or by switching the power off, or switching from compose to play. In its 'play' mode, any of the 15 built-in songs can be accessed by pressing the keys G3 to G5, and if the 'replay' key is pressed then all 15 will be played in sequence. The 15 in-built songs include a selection of children's carols and nursery rhymes including: "Twinkle, Twinkle, Little Star", "Mary Had A Little Lamb", and "Christmas Carol". The Melody Maker requires two AA size batteries (not included in the kit).

Specification

DC power supply:	3V (2 x AA)
Standby current:	2mA
Average play current:	4mA
Note scale:	15 notes (G3 to G5)
Replay note capacity:	47 notes (compose RAM)
Programmed songs:	15 songs (play ROM)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available. The PCB and front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 56. PCB dimensions: 54 x 121.5mm.

Order Code	Type	Price each
LP94C	Melody Maker Kit	£13.99

COMPUTADRUM

A six channel drum synthesiser enabling a home computer to generate drum sounds whilst functioning as a programmable sequencer. The six various sounds are adjustable for pitch and resonance. Output is to an external amplifier. The Computadrum can be used directly with the BBC model B, the VIC-20, Commodore 64, Atari 400/600XL, 800/800XL, 130XE and the Memotech MTX500/512 home computers. It can also be used with the ZX81 and ZX Spectrum provided these are fitted with an external input/output port providing at least six digital outputs. The Maplin ZX81 I/O Port would be ideal for the ZX81, for example. Since the Computadrum only requires brief trigger pulses to initiate operation, it may be possible to devise a form of digital controller instead of a computer.

Kit and Special Parts

A complete kit is available and the pcbs are also available separately. Full construction details may be found in the Best of Maplin Projects Book 3.

Order Code	Type	Price each
LK52G	Computadrum Kit	£15.99

This novel and easy to use metronome is operated by a simple switch to input the beat period, and by tapping the unit on two successive beats of the music, the resulting interval is measured and stored in memory. From this memory a sounding beat or flashing display is derived which repeats at the measured interval. The 'metronome marking' can also be displayed on an easy-to-read, digital display. All this is contained in a small calculator style box. The input switch can be used both for re-synchronising the beat/flashing display to reset and subsequently repeat at the interval still stored in memory and re-setting to a new speed. The nature of setting up the Metrobeat means that it has a useful self-training value where a metronome marking has been specified in the music. Having seen the marking, the user can select a beat speed for the music and then have the facility to check whether or not that speed was correct. Additionally, the Metrobeat lends itself to making a quick measurement of the tempo used, by, for example, different artists on their interpretation of the music. The Metrobeat has an easy-to-read digital display of the metronome tempo and is set either by tapping the box itself or by use of an external foot switch (not included). The beat frequency output is indicated by the flashing of the digital display. A simple arrangement for adding an audible output is by using a piezo buzzer with built-in driver (KU56L). The Metrobeat is split into two modules. Module A contains all the basic measuring, recording and output generating circuits, and can exist independently, making a very useful unit minus a display. Module B contains the digital display with its calculating logic and display drivers, and is designed as an 'add-on' unit. It is entirely dependent on Module A and the two modules plug together sandwich fashion for mounting in the calculator style box.

Optional Items

The following items, not included in the kit, may also be required.

AAA Batteries	4	(FK63T)
Plug Plastic 3.5mm	1	(HF80B)
DC Piezo Buzzer	1	(KU56L)

Kit and Special Parts

A complete kit of parts (including the two PCBs and instruction leaflet) is available (excluding optional items). The PCBs are also available separately. Full construction details may be found in Maplin Magazine Issue 58.

Order Code	Type	Price each
LP95D	Metro Beat	£39.99
GH13P	Metro Beat PCB A	£3.49
GH14Q	Metro Beat PCB B	£6.49

ADA ECHO

- ★ Based on the 6264-3 CMOS Static RAM
- ★ Echo Variable from 75 to 450 Milliseconds
- ★ Can be Driven Directly from a Synthesiser

A simple, low cost echo machine, suitable for use with most electronic instruments, which does not use spring-lines, tape loops or analogue bucket-brigade delay IC's. Instead the signal is processed using analogue to digital conversion techniques so that it can be shifted through a 16K RAM, controlled by a variable timebase clock. Until quite recently digital delay lines of this type were extremely expensive pieces of equipment which relatively few people could afford. The massive drop in the cost of memory chips in recent years enables the digital echo unit design to take advantage of this situation and the unit is based on the 6264-3 CMOS static RAM. It enables reasonable delay/bandwidth combinations to be provided, which in analogue delay line terms is equal to a 16384 stage device. The echo time is continuously variable from approximately 75ms to 450ms, giving a range of effects which vary from a short reverberation type sound to a medium-long echo. A feedback control enables the echo level and the echo decay time to be adjusted over a broad range. The unit requires an input level of several hundred millivolts r.m.s. Therefore with low level sources, such as microphones and low output guitar pick-ups, a suitable preamplifier must be added at the input to the unit. Bandwidth is approximately 8kHz, although it is only the bandwidth of the delayed signal that is restricted; the straight-through signal is not subjected to any filtering, and distortion is approximately 5% with a signal to noise ratio of 40dB.

Continued on next page.

METROBEAT

- ★ Range 30 to 200+ beats per minute
- ★ Quartz crystal accuracy
- ★ Easy setting by built-in transducer
- ★ Clear easy-to-read, digital display
- ★ Input for foot switch setting while playing
- ★ Beat indication by flashing display
- ★ Change speeds easily
- ★ Output available for extra LED or sounder or for hi-fi amplifier

GD21X	ADA Dig Echo PSU PCB	£2.49

AUTO-WAA EFFECTS UNIT

A Waa-Waa Unit for guitars where the filter frequency is automatically controlled by the input signal amplitude, as opposed to a foot operated pedal, for example. Very easy to use whilst giving a good range of various effects. The filter frequency is adjustable, and a sweep depth control is also included. Positive feedback is used to give a peak in the response just above the cut-off frequency to obtain the best "waa" effect, or alternatively operate as a 12dB/octave lowpass filter for more subtle effects.

Kit and Special Parts

A kit is available (excluding case, battery, feet and fixings) and the pcb (included in the kit) is also available separately. Full construction details may be found in the Best of Maplin Projects Book 3.

Order Code	Type	Price each
LK36P	Auto-Waa Kit	£17.99
GB54J	Auto-Waa PCB	£2.75

NOISE GATE

This useful project has the following features: Provides automatic shutdown of unwanted noise during 'pause' conditions. Compressor technique eliminates 'signal snapping'. User adjustable characteristics for high or low level network insertion. Allows the use of otherwise

'too noisy to use' effects units. Can effectively cancel crosstalk in multi-microphone set-ups. Can be used in multi-instrument layouts for instant unit shutdown on changeovers. Will eliminate 'beehiving' in older type 'spaghetti' wired organs. No circuit trimming required or tight specification devices used. Can be used in its own right as an effect to create soft attack bowing characteristic. Uses only two low-cost and readily available IC's. Self contained, jack-in jack-out unit allows instant in-line connection.

Kit and Special Parts

Complete kit of all parts excluding the case and front panel. Full construction details may be found in Maplin Magazine Issue 40. PCB dimensions: 59 x 70mm.

Order Code	Type	Price each
LK43W	Noise Gate Kit	£12.49
GA43W	Noise Gate PCB	£1.99
JR87U	Noise Gate Panel	£2.65

SSM2044 4-POLE VOLTAGE CONTROLLED FILTER

Features

- ★ Low external parts count
- ★ Wide supply voltage range

Applications

- ★ Electronic music systems
- ★ Voltage controlled oscillators
- ★ Sweep oscillators

The SSM2044 is a low cost 4-pole voltage control filter IC, ideal for use as an electronic low-pass filter. It is possible to use the device as a voltage controlled sine wave oscillator. The IC uses a unique filtering technique to provide low noise operation and a high rejection of control signals with an extended control range. A variable Q is achieved to determine resonant frequencies using feed-back techniques.

A cut-off frequency (10Hz to 50kHz) is reached when the current is maximised. Used as an oscillator the IC is capable of producing a pure sine wave. The module requires a supply of between 12V to 30V and up to 50mA. The device may be used in many different ways requiring a voltage controlled filter or oscillator. Different operating frequencies can be achieved by changing capacitor values. Applying the output of a low frequency ramp or triangular wave to the control voltage input, the module could be used to form part of a sweep generator circuit.

Note: this is intended as a 'building block' project only, and is not eligible for our 'Get-you-working' service.

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 42.

PCB dimensions: 91.4 x 71.2mm.

Order Code	Type	Price each
LP45Y	SSM2044 4 Pole VCF	£13.99
GE75S	SSM2044 PCB	£2.49

AUDIO BALANCED LINE TRANSMITTER

- ★ Wide frequency range
- ★ Operates from mains adaptor or internal batteries

Balanced line systems were originally developed to overcome the hum and noise pickup problems that inevitably crop up with unbalanced (single-ended) cables over long runs. The situation does not exist when using a balanced line because any external introduced noise component will be equally induced on both the in-phase and out-of-phase signal lines keeping the signal difference voltage the same, which effectively cancels any common-mode noise. In addition, this project may be used to 'bridge' two mono amplifiers together. Further details on the construction and use of the balanced line TX can be found in Maplin Magazine Issue 49.

Specification

Supply voltage:	9V min. 35V max.
Quiescent current	
@ 9V:	8.2mA
@ 35V:	9.5mA
Maximum input signal	
@ 9V:	1.4V rms
@ 35V:	10V rms
Frequency response	
@ -3dB:	1.5Hz to 100kHz

Optional Items

The following, not included in the kit, may also be required.

22µF 16V Tantalum	4	(WW72P)
Box CEN80	1	(YN50E)
Gasket CEN80	1	(FE41U)
Pozi Screw M2.5 x 10mm	1 Pkt	(JC68Y)
Steel Nut M2.5	1 Pkt	(JD62S)

SSM2045 MUSIC VOICING SYSTEM

3

Features

- ★ 2-pole and 4-pole low-pass filter
- ★ On chip mixer/VCA
- ★ Low noise Applications
- ★ Electronic music
- ★ Sweep oscillators

The SSM2045 offers a wide range of filtering and mixing options such as a voltage controlled low-pass filter, with both 2-pole and 4-pole features, and a mixer/VCA combination. The filter section has input levels up to 150mV peak to peak with a signal impedance about 90Ω; signal-to-noise at approx 84dB. An internal voltage controlled feed-back amplifier provides the electronic Q for the filter. It is possible to sweep the operating frequency over a range of 5000:1, however sweep rates are restricted to 1000:1. For performance the mixer/VCA section is separate from the filter. Two inputs allow signals to be mixed, a third input is used for balancing the output level. The unit requires a split rail PSU being able to deliver ±10V to ±15V at 50mA. This project can be used for electronic music circuits, sweep oscillators and mixers.

Note: this is intended as a 'building block' project only, and not eligible for our 'Get-you-working' service.

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details are shown in Maplin Magazine Issue 43. PCB dimensions: 83.8 x 61mm.

Order Code	Type	Price each
LP46A	SSM2045 Mixer Filter	£12.99
GE77J	SSM2045 Voicing PCB	£2.65

- ★ Minimal adjustment
- ★ IC design, no laborious coils to wind
- ★ Adjustable resonance and range
- ★ Economically priced with unbelievable performance

Applications

- ★ Ideal for both Guitars, Bass and other instruments

Specification:	
Power supply:	+9V DC
Current consumption:	14.7mA
Maximum boost @ 1kHz:	20dB
Minimum frequency:	90Hz
Maximum frequency:	20kHz

This sophisticated Wah Wah pedal uses the LM13700 transconductance op amp. Unlike other designs, the Psychedelic Wah Wah has a number of advantages which include adjustable resonance, which determines the subtlety of the effect and adjustable range, used for both guitar and bass guitar, in fact, on any electric music instruments such as keyboards and electric violins. The circuit also features a compander that reduces noise in the circuit and improves the harmonic content of the output which makes for a very warm rich sound. The Wah Wah acts as a kind of tone boost control, and moving the pedal adjusts the frequency point at which the boost occurs. Rhythm or lead guitar usually play through the device. When playing rhythm, the pedal is moved in time with the 'strum', and when playing lead, extra expressive abilities become available enabling almost 'infinite sustain' without screaming feedback.

Kit and Special Parts

A complete kit of parts (including the PCB) is available. The PCB and front panel is also available separately. Full construction details may be found in Maplin Magazine Issue 82.

Order Code	Type	Price each
LT43W	Wah-Wah Pedal Kit	£34.99
GH88V	Wah Wah Pedal PCB	£3.29
KP70M	Wah Wah Pedal F/Pnl	£2.49

MIDI MERGE UNIT

Features

- ★ Active design
- ★ Maintains isolation between units
- ★ Operates for up to 6 months from a PP3 battery
- ★ Compact design
- ★ Easy to build

Applications

- ★ Control a sound module from two sources
- ★ Sequencer setting up

A sophisticated MIDI Merge Unit can function with simultaneous input signals. In most instances, however, all that it required is a unit that simply mixes two inputs direct into one output, and such a unit remains small and cheap. However, simultaneous inputs must be avoided, or else the output signal will be scrambled and meaningless. Hence, the Simple MIDI Merge is more useful, but no less effective, as an automatic MIDI switch, allowing a sound module to be played from a MIDI keyboard or from a sequencer (but not at the same time!), without the need for much plugging and unplugging of signal leads.

The unit is powered from a single 9V PP3 battery, the life of which is directly related to the quantity of data passed through the unit, but average current consumption is only 7mA with continuous data throughput.

Optional Items

The following items, not included in the kit, may also be required.

5-pin DIN Type A Plug 180°	As Req	(HH27E)
Twin Overall Braided Screen Microphone Cable	As Req	(XR98G)

Kit and Special Parts

A complete kit of parts, including the PCB, is available (excluding optional items). The PCB and the front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 77.

Order Code	Type	Price each
LT52G	MIDI Merge Kit	£15.49
GH69A	Midi Merge PCB	£2.49
KP64U	Midi Merge F/Panel	£1.49

2 WAY MIDI SWITCH BOX

- ★ Low component count
- ★ Easy to build
- ★ Easy to use

The two way MIDI switch box is ideal for the electromusic musician with multiple samplers, keyboards, etc. The project allows signals to be routed along one of two channels by the flick of a switch. The circuit consists of several sockets, switch and PCB. The advantage of this system is that it needs no power supply and will work either way around, i.e two inputs to one output or two outputs to one input.

Optional Items

The following items, not included in the kit, may also be required.

DIN Plug	As Req	(HH27E)
Fleximic Black	As Req	(XR98G)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 46.

Order Code	Type	Price each
LP75S	Midi Switch Box	£7.49
GE86T	Midi Switch Box PCB	£1.99

PSYCHEDELIC WAH WAH PEDAL

NEW

Features

- ★ Powered from 9V PP3 battery or regulated power supply
- ★ Regulated reference to prevent low battery voltage drift
- ★ Built in compander to minimise noise
- ★ Traditional Wah Wah sound (without the crackle)
- ★ Rich warm harmonic content

E510 MIDI KEYBOARD SCANNING MODULE

2

Features

- ★ Scans up to 128 keys
- ★ Velocity (touch) sensitive
- ★ Transmit channel selectable
- ★ On-board regulator
- ★ AC or DC supply
- ★ Compact
- ★ Versatile

Applications

- ★ MIDI keyboard
- ★ MIDI pedal-board
- ★ Basis of a MIDI master keyboard
- ★ MIDI retrofit for non-MIDI keyboards

The Musical Instrument Digital Interface (MIDI) has been adopted as a worldwide serial interface standard by manufacturers of electronic musical instruments and ancillary equipment; providing unparalleled possibilities for control and communication. MIDI allows a diverse range of devices to be interconnected; almost regardless of manufacturer or type. MIDI devices include; synthesizers, MIDI guitars, MIDI 'wind' instruments, drum machines, effects processors, mixers, computers and lighting equipment. Commonly, MIDI is used by keyboard players to interconnect synthesizers, allowing a range of 'instruments' to be played and controlled from one master keyboard.

Conventionally, generation of serial MIDI data requires a microprocessor-based scanning system, comprising CPU, ROM, RAM, and both serial and parallel I/O. The use of such a system is costly and is a 'sledgehammer to crack a nut' solution.

This module is a compact and versatile building block, around which a MIDI keyboard, pedal-board or master keyboard can be constructed. The module utilises a dedicated IC to perform scanning. For maximum versatility, an on-board supply regulator is provided, along with various inputs and outputs routed to strategically grouped connectors. The module only requires the addition of an AC or DC supply, some address decoding and a keyboard with changeover contacts to operate.

It must be realised that the module does not produce any sound of its own, just MIDI data. A MIDI sound module or synthesizer is required to interpret the MIDI codes and generate the required sounds.

Ideas and Expansion

The module has been designed with flexibility in mind, to this end, all signals have been brought out to connectors. The module is ideally suited to a wide variety of keyboard and pedal-board applications, such as: Portable guitar-style 'performance' keyboards; Bass pedal-board for guitar and keyboard soloists. With the addition of a processor board, a wide variety of master keyboard functions can be added; keyboard split, pitch bend and modulation wheels, patch change, data entry sliders, foot pedals, transposition, arpeggiator, etc.

Specification:

Module dimensions: 101 x 35 x 69mm (WHD)
 Power requirements
 AC: 6-0-6V to 15-0-15V AC
 or DC: +7 to +25V DC

Current: 20mA quiescent
 Logic connections: TTL/HC compatible
 Serial data output: MIDI standard 5mA current loop
 Auxiliary output: MIDI format TTL compatible
 Scanning range: 128 notes
 Velocity resolution: 128 steps/256µs

Kit and Special Parts

A complete kit of parts (including the PCB) is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 69.

Order Code	Type	Price each
LT35Q	Midi Kbd Scanner	£35.99
GH35Q	Midi Scanning PCB	£3.49

PROGRAMMABLE METRONOME

- ★ Audio & Visual Beat and Accent Indication
- ★ Variable Tempo from Slow (adagio) to Fast (presto)
- ★ programmable Time Signature on 7 Segment Displays
- ★ Powered from 5V to 12VDC

Metronomes are commonly used in music, to help musicians keep time. The traditional metronome is based on an oscillating arm that swings from side to side and ticks as it goes. Various electronic metronomes use LED's and sounders to indicate the tempo, as indeed does this design. They have the advantage of being robustly transportable, compact, and in this version the facility to set time signatures with an appropriate note duration indication. The module is housed in a small plastic box, with enough room for a small 9V battery, and a self adhesive front panel to finish.

Optional Item

The following item, not part of the kit, may also be required.
 Switch SPST Ultra-Min Toggle 2 (FH97F)

Kit and Special Parts

A complete kit is available, the pcb and front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 26.

Order Code	Type	Price each
LM49D	Metronome Kit	£34.99
GD61R	Metronome PCB	£10.99
JG23A	Metronome Front Panl	£2.99

16-WAY AUDIO PATCHBAY

1

Features

- ★ Balanced, unbalanced or 'insert point' versions
- ★ Normalised or non-normalised operation
- ★ One PCB for all options
- ★ Low loss signal path Applications
- ★ Recording studios
- ★ Theatres
- ★ Home recording
- ★ P.A. systems

Used extensively in radio, TV and recording studios, the most commonly used inputs and outputs are taken to a patchbay where they can be simply connected together using short cables. This patchbay is configured as two rows of sockets, one above the other. It is conventional to designate the lower sockets as signal inputs to a device, while the sockets above will often be the output from the same device. Often a patchbay is 'normalised', which means the top socket is normally wired to the bottom socket and the path is broken when a jack is inserted. In this case the top socket will be the output from one piece of equipment that is normally fed to the input of another e.g. the output from a tape deck fed to the input of a mixer. The ability to easily break this feed allows the use of an additional piece of equipment to be inserted in the path i.e. noise reduction equipment. A PCB is available allowing a single channel patchbay module to be constructed. By fitting a combination of stereo and mono 1/4 in. jack sockets, balanced, unbalanced or insert point versions can be constructed on the same PCB.

There is NO kit of parts for this project, but the Maplin 'Get-You-Working' Service is available. Full constructional details can be found in Maplin Magazine Issue 52.

Parts List

Unbalanced Module:		
Mono PCB 1/4 in. J/Skt	4	(FJ00A)
Patchbay PCB	1	(GH09K)
Balanced Module:		
Stereo PCB 1/4 in. J/Skt	4	(FJ05F)
Patchbay PCB	1	(GH09K)
Insert Module:		
Mono PCB 1/4 in. J/Skt	2	(FJ00A)
Stereo PCB 1/4 in. J/Skt	1	(FJ05A)
Links	2	Fitted
Patchbay PCB	1	(GH09K)

Optional

Patch Lead Set	As Req.	(YZ32K)
Rack Jackfield	1	(KW61R)
PCB dimensions: 61 x 78.7mm		

Order Code	Type	Price each
GH09K	Patch Bay PCB	£2.69

RADIO PROJECTS

CRYSTAL SET RADIO

A novel mini project that is easy to build and ideal for construction of all ages. A Crystal Set was an early design for a radio receiver, our design incorporates modern components in place of difficult or impossible to obtain old style components. For example, what once would have been a 'cat's whisker' detector has been replaced by a germanium point contact diode. Original designs would have driven a pair of high impedance headphones, but its modern counterpart uses an inexpensive crystal earpiece, etc. Please note that this project is not eligible for repair under our 'Service' rules

Full construction details are available on leaflet XU01B.

Order Code	Type	Price each
XU01B	Crystal Set Leaflet	40p NV

TRF REFLEX RECEIVER

A PCB only for a TRF (tuned radio frequency) receiver as featured in Part 7 of the series 'Exploring Radio' in *Electronics, the Maplin Magazine*. Much simpler than a super-heterodyne design, this AM band TRF 'reflex' receiver is complete from ferrite rod antenna to loudspeaker with just four transistors. A single RF stage also produces the audio signal by itself acting as a second stage AM detector. While there is no actual kit of parts, all components required are Maplin stock items, although most need not be critical. Ideal beginners radio project as part of reading the 'Exploring Radio' series.

Printed Circuit Board

A high quality fibre-glass PCB is available. Note: as this board is intended as a 'building block' project it is not eligible for our 'get-you-working' service. Full construction details may be found in *Maplin Magazine Issue 31*.

Order Code	Type	Price each
GE15R	TRF Reflex Rx PCB	£3.75

BEGINNERS AM RADIO

- ★ On board attenuator
- ★ Compact design
- ★ Integral aerial
- ★ Headphone operated on/off

This project is ideal for the total beginner to radio electronics. Based around a ZN415 IC the unit has a limited amount of components, including a 'wind-it-yourself' aerial. The small compact project uses basic electronics techniques to receive local stations. The device is tuned by a knob on the box, varying the frequency between 540 and 1600kHz depending on the aerial winding. An attenuator is provided to reduce the AM signal. The receiver is designed to be used with personal stereo headphones of 32Ω impedance. A power supply of 1.5V is delivered by an N type cell fitted into the box LL12N. The box, knob, battery and screws are not supplied in the kit.

OPTIONAL ITEMS

The following items, not included in the kit, may also be required.

Verobox 301	1	(LL12N)
Alkaline KN Battery	1	(FM13P)
Knob K7A	1	(YX01B)
Spacer 4BA x 1/4 inch	1 Pkt	(FW31J)
Poziscrew M2.5 x 12mm	1 Pkt	(BF40T)
Isoshake M2.5	1 Pkt	(BF45Y)
Isonut M2.5	1 Pkt	(BF59P)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in *Maplin Magazine Issue 42*.

Order Code	Type	Price each
LP28F	Beginners AM Radio	£8.99
GE43W	AM Radio PCB	£2.20

TDA7000 RADIO MK II

- ★ No Alignment Equipment Needed
- ★ Easy To Build
- ★ Ready Wound RF Coils
- ★ Onboard Power Amplifier
- ★ Headphone/earpiece Jack Socket

This design is based on the TDA 7000 IC which contains essentially a complete FM receiver on a chip. With only the core of one coil to be adjusted, building and aligning this radio is no more difficult than the simple ZN414 AM radio! The frequency coverage is 88 to 108MHz and uses a telescopic six section aerial. The receiver also incorporates a power amplifier IC, the TDA820M delivering 250mW RMS to an internal 8Ω speaker. Four small batteries provide the power with a maximum current drain of just 80mA, making this radio truly portable.

Optional Items

The follow items, not included in the kit, may also be required.

Battery R6S Silver Seal	4	(FK59P)
Mag Earpiece 3.5mm	1	(LB24B)

Kit and Special Parts

A complete kit is available separately, as well as a pcb and front panel. Full construction details may be found in *Maplin Magazine Issue 27*

Order Code	Type	Price each
LM55K	TDA7000 MkII Kit	£25.99
GD77J	TDA7000 MkII PCB	£2.85
JG28F	TDA7000 MkII F/Panel	£5.25

160m RECEIVER

- ★ Receives AM/CW/SSB transmissions
- ★ Superheterodyne design
- ★ Variable frequency BFO
- ★ 1.8 to 2.2 MHz range
- ★ Switched AGC time constant

The 160m receiver covers frequencies from 1.8MHz to 2.2MHz and is capable of receiving both Amplitude Modulation (AM) and Carrier Wave (CW)/Single Side Band (SSB) modes. Primarily designed for the amateur radio band this project also covers 'ship to shore', coast stations and marine navigation beacons. The receiver uses the superheterodyne principle, based on the LM3820 IC. An internal amplifier TDA7052 drives an internal loud speaker and headphones jack. A tape deck may also be connected. An external aerial must be connected for the best signal reception, and an optional external ground point is provided.

Gains of both the Audio Frequencies (AF) and Radio Frequencies (RF), can be varied along with the pitch. The signal strength can be represented using an S meter on the front of the box.

Specification

Power supply	
Voltage:	12V to 16V
Current (quiescent):	33mA
Frequency range:	1.795MHz to 2.24MHz
Sensitivity AM:	Less than 2µV
CW/SSB:	Less than 0.5µV
Headphone output:	4Ω to 32Ω
Intermediate frequency:	455kHz
Local oscillator frequency:	1.34MHz to 1.785MHz

Optional Items

The following items, not included in the kit, may also be required.

SO239 Skt (Square)	1	(BW85G)
Grounding Post with 4mm Skt	1	(JL99H)
Isobolt M3 x 6mm	1 Pkt	(BF51F)
Steel Nut M3	1 Pkt	(JD61R)
Isoshake M3	1 Pkt	(BF44X)
Isotag M3	1 Pkt	(LR64U)
Case 3502	1	(YN33L)
Poziscrew M2.5 12mm	1 Pkt	(BF40T)
M3 1/4 in Spacer	1 Pkt	(FG33L)
M2.5 Nuts	1 Pkt	(JD62S)
Self Tapper No. 4	1 Pkt	(FE68Y)
Front Panel	1	(JX41U)
Back Panel	1	(JX42V)
Knob K7A	3	(YX01B)
Knob K7B	1	(YX02C)

Kit and Special Parts

A complete kit is available. A pcb and front and rear panels are also available separately. Full construction details may be found in Maplin Magazine Issue 43. PCB dimensions: 162 x 129mm.

Order Code	Type	Price each
LP31J	160m Receiver	£47.99
GE49D	160m Receiver PCB	£14.49
JX41U	160m Rx Front Panel	£3.25
JX42V	160m Rx Back Panel	£3.49

SL560C LOW NOISE RF AMPLIFIER

Features

- ★ Over 30dB of gain
- ★ Noise less than 2dB
- ★ Bandwidth up to 300MHz
- ★ Supply voltage +2V to +15V DC
- ★ Low power consumption

Applications

- ★ Aerial preamplifiers for HF and VHF radios
- ★ 50Ω line drivers
- ★ Low power wideband amplifiers
- ★ Instrumentation preamplifiers

The SL560C is a very flexible, monolithic Integrated Circuit (IC) ideally suited for a number of different Radio Frequency (RF) amplification roles, depending on how it is configured. However, RF ICs are often quite difficult to use successfully, and because the component layout becomes more critical as frequency increases, a universal amplifier PCB has been developed which supports four configurations for HF and VHF aerial preamplifiers, 50Ω line drivers, low power, wideband amplifiers and instrumentation preamplifiers.

The Low Noise Preamplifier configuration exhibits a typical noise figure of typically 2dB with a gain of 35dB and a bandwidth of 75MHz. The Low Power Consumption version has lower gain of 13dB, but will run from a supply voltage as low as 2V, where current consumption is only 3mA. Bandwidth can be up to 125MHz, and noise typically 2.5dB.

The Wide Bandwidth version uses negative feedback to extend bandwidth up to 300MHz, while the 50Ω Line Driver has a gain of 14dB and a bandwidth of 220MHz, with an input SWR of typically 1.3:1.

Optional Items

The following items are not included in the kit, but may also be required.

BNC round socket 50Ω	2	(HH18U)
Coax Cable	As Req	(XR19V)

Kit and Special Parts

A complete kit of parts, including the PCB, is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 74.

The Maplin 'Get-You-Working' Service is not available for this project.

Order Code	Type	Price each
LT42V	SL560 VHF PreAmp Kit	£6.45
GH64U	SL560C Preamp PCB	£1.99

VHF/UHF PREAMPLIFIER

Features

- ★ Multi-range VHF/UHF preamplifier
- ★ Low power consumption
- ★ Power supply through co-ax cables
- ★ High gain
- ★ No tuning required
- ★ Surface mount components

Applications

- ★ VHF satellite bands
- ★ UHF TV
- ★ FM radio broadcasts
- ★ Amateur radio bands
- ★ Aircraft transmissions

This preamplifier was originally intended for use with the MAPSAT VHF Weather Satellite Receiving System; it was designed to be a replacement for the previous Maplin VHF preamplifier kit. However, the new design is based around a MAR-6 MMIC (Monolithic Microwave Integrated Circuit), which is unconditionally stable across its entire range (DC-2GHz). The gain is at least 16dB over this range, and may rise up to a maximum of 19dB for certain applications. Note that the MAR-6 is actually useable up to 4GHz, with a typical gain of around 9dB at this frequency. This means that the preamplifier is highly versatile, and can be used for any number of different applications.

The power supply for this preamplifier can be fed via the co-ax cable that carries the signal to a receiver. If your receiver does not supply 12V DC through the co-ax cable, then a power supply can be either purchased ready made (PU1 stock code BW50E suitable for 40-1000MHz), or built very easily from a few stock components.

Surface mount components are used in this project but do not be put off, as the component count is very low and there is a way to solder these tiny components using only 'ordinary' equipment.

Specification

Power supply:	+12V DC
Power source:	External PSU or via co-ax cables
Power consumption:	16mA
Gain:	up to 19dB
Frequency range:	DC-2GHz

DIRECT CONVERSION SHORT WAVE RECEIVER

- ★ Receives Speech (SSB, DSB, AM) and Morse (CW)
- ★ Choice of Amateur Band, 160 to 10 metre
- ★ Reduction Drive 'Vernier' Tuning
- ★ Signal Strength Meter
- ★ Buffered RF Oscillator Output
- ★ On-board Voltage Regulator and Audio Power Amplifier

The cost of sophisticated ready-made commercial short wave receivers, often costing hundreds of pounds is generally the main reason why newcomers to the hobby are discouraged. However, good results may be obtained using relatively simple home constructed receivers of the direct conversion design. This type of receiver has the advantage of simplicity of construction and ease of alignment, with the minimum of test gear. In fact the only test gear required is a good general purpose multimeter and a non-metallic trimming tool for the RF transformers. The frequency range of the short wave bands start as low as 1.7MHz and extends up to 30MHz. To include all these bands on one receiver would present switching and tracking difficulties that would result in a compromise in performance. For this reason the receiver only covers one band, and this needs to be decided upon before embarking on construction. There are nine Amateur Bands as shown in the Table together with the corresponding tuning pack required. Which one you choose depends on your likely listening requirements. The 80 metre band is good for European stations after dark and British stations during the day, although if conditions are good much further stations could be received. The 20 metre band is good for Europeans and, if conditions are very good stations far away such as America, Africa and Australia could all be received. The choice is up to you but **DO NOT FORGET TO ORDER THE TUNING PACK WHEN ORDERING YOUR RECEIVER KIT.**

Tuning Kits

Four tuning kits are available as follows. Select the one you require from the table.

Amateur Band	Receiver Tuning Range	Tuning Pack
160m 1.810-2.000MHz	1.800-2.010MHz	1
80m 3.500-3.800MHz	3.490-3.810MHz	1
40m 7.000-7.100MHz	6.690-7.150MHz	2
10.100-10.150MHz	10.000-10.500MHz	2
20m 14.000-14.350MHz	13.990-14.400MHz	3
18.068-18.168MHz	18.000-18.500MHz	3

15m 21.000-21.450MHz	20.990-21.500MHz	3
24.890-24.990MHz	24.540-25.000MHz	4
10m 28.000-29.700MHz	A, 27.975-28.525MHz	4
	B, 28.475-29.025MHz	4
	C 28.975-29.525MHz	4
	D 29.475-30.025MHz	4

Optional Items

The following items, not included in the kit, may also be required.

Case	1	(XJ33L)
Chassis	1	(XJ41U)
Power Supply Unregulated	1	(YM85G)
Power Plug 2.5mm	2	(HH63T)
Fuse Holder In-line	1	(RX51F)
Fuse 1.25in. 1A	1	(WR11M)

AERIAL ACTIVATOR

NEW!

Features

- ★ Gain of over 15dB
- ★ Six wavebands
- ★ Useable with a wide range of radio receivers
- ★ Low power consumption
- ★ On-board voltage regulator
- ★ Signal input protection
- ★ Power input polarity protection
- ★ Internal battery or external power supply

Applications

- ★ Improve radio reception
- ★ Indoor active aerial
- ★ Active aerial tuner

The Aerial Activator is designed as an add-on device for your LW/MW/SW receiver. It is designed to increase the strength of the radio signals received over a wide range of frequencies. For LW/MW broadcasts and shortwave listeners using a general coverage receiver, the unit offers an improvement in reception even when used in conjunction with a small aerial system. The RF amplifier used in this design is based upon the SL560C data file first seen in the February 1994 issue of *Electronics*. The SL560C is a monolithic Integrated Circuit (IC) which contains three very high performance transistors and associated biasing components held in an eight-pin package. In this application it is configured as a 50Ω line driver circuit, with a gain of approximately 15dB.

Specification

Frequency range:	150kHz to 30MHz (six wavebands)
	1. 150kHz - 300kHz
	2. 300kHz - 600kHz
	3. 600kHz - 1.5MHz
	4. 1.5MHz - 4MHz
	5. 4MHz - 10MHz
	6. 8MHz - 30MHz
RF gain:	15dB
Noise figure:	2dB
Input impedance:	Variable
Output impedance:	50Ω
Internal power:	Four AA cells (+6V DC)
External DC power:	-10 to +16V DC
Supply current	20mA (internal batteries) 28mA (external +12V DC)

Optional Items

The following items, not included in the kit, may also be required.

Metal Panel Box M4005	1	(WY02C)
M3 x 16mm Steel Screw	1Pkt	(JY24B)
M3 Steel Washer	1Pkt	(JD76H)
M3 Shakeproof Washer	1Pkt	(BF44X)
M3 Steel Nut	1Pkt	(JD61R)
M3 1/4 in. Spacer	1Pkt	(FG33L)
4prs 1in. Velcro	1Pkt	(FE45Y)
BNC Round Socket 50Ω	1	(HH18U)
Small Terminal Post White	1	(FD71N)
Small Terminal Post Green	1	(FD71N)
UHF Socket Round	1	(BW84F)
Panel Mount 2.5mm Power Socket	1	(JK10L)
Alkaline AA Cells	4	(FK64U)
AC Adaptor Unregulated 300mA	1	(XX09K)
Standard 2.5mm Power Plug	1	(HH62S)
BNC Plug 50Ω	1	(HH17T)
PL259 Plug	1	(BW81C)

YM61R	Pre-drilled Tube	£5.99
FD11M	Aerial Tuner F/panel	£4.99

ACTIVE AERIAL

An active aerial pre-amplifier having five selectable tuned RF ranges which cover a total frequency range of 150kHz to 30MHz. The tuning of the amplifier is very similar to that of a radio using the band selector switch and a tuning control. To obtain the best results the active aerial is tuned to the same wavelength as the receiver for a peak in signal strength. The Active Aerial offers very good selectivity. The unit includes a gain control operating on the MOSFET amplifier, a fine tuning card, and a low battery LED warning indicator. The unit is powered by one standard PP3 size 9V battery. An external power socket is provided for an external 9V DC battery eliminator, 12V car battery or any supply of ±7V to 15V output. Connections to aerial and receiver are made using UHF series connectors, with a direct, straight through or 'by-pass' mode operative when the unit is switched off. A telescopic aerial is included for use where a proper outdoor aerial is not practical or possible. If the Aerial Tuning Unit (described elsewhere in this section) is to be used in conjunction with the Active Aerial then this should be connected between the aerial and the input of the Active Aerial.

Specification

Frequency Range	150kHz to 30MHz
Gain	Variable 0 to +20dB
Input Impedance (telescopic aerial)	50kΩ
Input Impedance (external aerial)	50Ω
Output Impedance	50Ω
Power Supply (internal)	PP3 battery
Power Supply (external)	+7V to +15V DC
Low Batt Indicator Threshold	<+7V DC

Optional Items

The following parts, not supplied in the kit, can be used if you wish to put the Active Aerial Kit into its own box.

Blue Case 222	1	(XY45Y)
Front Panel	1	(FA99H)
PP3S Silver Seal Battery or AC Adaptor Regulated	1	(FK62S)
Re-usable Cable Tie	2	(RK59P)
1/2 in 6BA Bolts (4 required)	1 pkt	(BF06G)
6BA Nut (4 required)	1 pkt	(BF18U)

SW/MW AERIAL TUNING UNIT

One of the most common types of receiving aerials, especially for Short-Wave, is the end-fed, long wire. An average length for such an aerial could be between 20 and 30 metres, the main disadvantage of this being that its impedance as presented to the aerial input of the receiver will vary depending on frequency, the range of impedance values swinging from a few ohms to several thousand ohms. The relationship between the impedance and the wavelength of the aerial will vary, appearing at a full or half wavelength as a relatively high impedance source to the receiver, while at quarter-wave, or at an odd multiple of quarter-waves it is much lower. Given that the aerial impedance of most communications receivers is 50Ω, unless the impedance of the aerial matches this exactly all of the RF energy will not be efficiently transferred from the aerial to the receiver. The greater the mismatch, then the weaker the signal will appear, and under adverse conditions it could vanish completely into background noise. This Aerial Tuning Unit comprises two variable tuning capacitors and a tapped inductor in a passive 'T' configuration. This arrangement covers approximately 600kHz to 30MHz, and matches the aerial load impedance to the input impedance of the receiver. Operating bands are switch selectable, and the ATU can be quickly switched in or out of the system by the bypass button, so signal leads remain undisturbed.

The ATU can also be used for transmitter aerial matching in the same frequency range, including the 27MHz citizens band, up to a power rating of 10 Watts.

Specifications

Frequency Range	600kHz to 30MHz
Input Impedance	Aerial = variable
Output Impedance	Receiver = 50Ω
RF Power-handling Capability	10 watts max.

Optional Items

The following items, not included in the kit, may also be required.

Case Blue 222	1	(XY45Y)
Front Panel	1	(FD11M)
Stick-on Feet	1 Pkt	(FW38R)

AF NOTCH FILTER

An add-on for a communications receiver to go with the ATU and Active Aerial projects to form a complete high performance system. The Notch Filter uses solid state capacitive dividers in order to 'clean up' the audio output from a receiver. Frequently, when listening to stations on the short wave bands the audio can be accompanied by a loud, interfering whistle. The origin of this interference is varied, it may be local electronic equipment, an adjacent station very close in frequency or even military or commercial jamming attempts. Most good quality communications receivers have tight IF filtering and maybe a switched bank of filters to select the appropriate bandpass for the transmission mode being received. But if the interfering signal is within this passband it will still be heard. The AF Notch Filter has two functions, to first notch out an interfering tone within a tuneable range of 200Hz to 4.5kHz, and secondly, over the same range, it can peak or boost the wanted tone received, very useful when trying to extract morse or data transmission. A difference of unwanted to wanted signal ratio of up to 61dB can be achieved in this way.

Specification

Test Conditions:

Power supply voltage:	+12V
Frequency input:	1kHz
Loudspeaker:	8Ω
Input level:	0dB

Results:

Tuning range of filter:	200Hz to 4.5kHz
Notch mode:	-55dB
Peak mode:	+6dB and -12dB off peak (difference of 18dB)
THD:	0.04% at tape output
Power output:	1 Watt peak
Quiescent current:	47mA
Current at full output (8Ω):	200mA
Current at full output (4Ω):	400mA
DC input voltage range:	Minimum: +9V Maximum: +14V

Optional Items

The following items, not included in the kit, may also be required.

Blue Case 212	(XY43W)
Front Panel	(FP05F)
Standard Power Plug	2.5mm (HH62S)

Kit and Special Parts

A complete kit is available and the pcb, metal screening cans and front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 21. PCB dimensions: 95 x 145mm.

Order Code	Type	Price each
LM16S	Notch Filter Kit	£36.99
GD30H	Notch Filter PCB	£10.99
FP57M	Screening Can High	£1.20
FP58N	Screening Can Low	89p
FP05F	Notch Filter F-Panel	£5.99

RTTY FSK DEMODULATOR

The reception and transmission of Radioteletype (RTTY) is an increasingly popular pastime amongst radio amateurs. This unit complements the TU1000 self-contained terminal unit, in that it does not contain tone generation circuitry and therefore is ideal for use when demodulation only is required (i.e. no transmission capability). This RTTY Demodulator project forms part of a building block set of units that can be used to construct a custom RTTY system, tailored exactly to the needs of the user/operator. The RTTY Demodulator will convert two-tone encoded signals to a serial data stream and the unit also incorporates a carrier detect circuit to prevent reception of spurious data when a transmission ceases. The tone shift system used is set by the values of certain components. The serial data output from the unit will need to be decoded and normally this will be achieved by using a microcomputer with a serial I/O port.

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 32.

Order Code	Type	Price each
LM95D	RTTY D Mod Kit	£16.75
GD94C	RTTY PCB	£3.49

AFSK GENERATOR

- ★ Easy construction
- ★ Crystal controlled oscillator
- ★ On-board voltage regulator
- ★ No alignment required
- ★ Simple testing

The transmission of Radio Teletype (RTTY) using Audio Frequency Shift Keying (AFSK) requires the accurate generation of two tones. In this project this is achieved by using digital circuitry locked to a crystal controlled clock with the frequency of the tones set by two 8-way dual-in-line switches. These tones represent

the logic conditions high or low, commonly referred to as mark or space tones. The frequency difference (shift) can vary considerably, but in practice three are used: 170Hz, 425Hz and 850Hz. The AFSK generator has the ability to be set to any of these shifts. In addition to internal dual-in-line switches, the shifts may be set externally by means of two 8-bit digital inputs.

Kit and Special Parts

A complete kit including the pcb is also available. Full constructional details may be found in Maplin Magazine Issue 39. PCB dimensions: 81 x 104mm.

Order Code	Type	Price each
LP13P	AFSK Generator Kit	£26.99

RTTY UNIT TU1000

'RTTY' is an abbreviation of 'Radio Teletype', a means of transmitting and receiving information by radio in the form of the written word. RTTY can be used in place of telephone modems with the advantage of avoiding telephone bills. Although in order to transmit the user must hold an amateur radio transmitting licence, this isn't the case if 'listening' only is intended. The TU1000 converts RTTY signals (from the short-wave band) into RS232 logic compatible with home computers having this facility. The TU1000 requires the addition of a short-wave communications receiver, that need not be necessarily expensive. The TU1000 will also encode RS232 into RTTY should you have the required transmitting licence and communications transceiver. The short-wave bands abound with commercial stations sending news, weather reports and other services, 24 hours a day. You will need a receiver with SSB demodulation to receive them. Almost any station can be received by the TU1000 as it is very versatile, having fixed and variable tone shifts, VCO controlled filters etc.

Optional Items

The following items, not included in the kit, may also be required.

Blue Case 222		(XY45Y)
DIN Plug L/S	2 off	(HH24B)
DIN Plug 5-pin		(HH27E)
13 Amp Plug		(RW67X)
3 Amp Fuse		(HQ32K)

Kit and Special Parts

A complete kit excluding optional items is available and the pcbs, front panel and rear panel are also available separately. Full construction details may be found in Best of Maplin Projects Book 3.

RTTY PCB: 195 x 121mm.
Meter PCB: 71 x 30mm.

Order Code	Type	Price each
LK53H	TU1000 RTTY Kit	£73.99
FJ53H	TU 1000 Front Panel	£5.25
FJ54J	TU 1000 Rear Panel	£4.25
GB67X	RTTY Terminal	£14.95
GB73Q	Meter PCB	£1.99

▶ IT'S A FACT! ◀

Nikola Tesla (1856-1943) was an American electrical engineer and inventor. In 1888 Tesla designed the first practical system of generating and transmitting alternating current for electric power. The American rights were bought by George Westinghouse, and in 1895 Tesla's alternating-current motors were installed at the Niagara Falls power project. Tesla's many inventions include high-frequency generators (1890) and the Tesla coil (1891), a transformer with important applications in the field of radio communications.

418MHz TRANSMITTER AND RECEIVER MODULES

Radiometrix

3

Features

- ★ Ready made and tested modules
- ★ DTI approved to MPT 1340
- ★ High stability
- ★ Small size (SMD-Based)
- ★ Ease of use
- ★ Wide supply range
- ★ Low current

Applications

- ★ Domestic and commercial security
- ★ Guard patrol protection
- ★ Lone worker protection
- ★ Medical alert
- ★ Nurse call systems
- ★ Mobile panic attack
- ★ Site paging receivers
- ★ Paging car alarms
- ★ Fire alarms
- ★ Remote control systems
- ★ Door bell

The TXM-418-A radio transmitter and matching SILRX-418-A receiver are low cost PCB mounting modules capable of reliably transferring analogue and digital data over distances of 50m in buildings, and over 200m under open field conditions. The modules can transmit data at speeds up to 5kbit/s. The transmitter is type approved to DTI (RA) specification MPT 1340, thus avoiding the need to submit the finished product for further approvals. Optimised for battery powered operation, both modules are designed for reliability and performance. They perform well with very small antennas, and require no complicated RF alignment.

The modules are suitable for general purpose telemetry/telecommand, where their small size and high data rates may be used to advantage. Typical applications include: domestic and commercial security, guard patrol/lone worker protection, medical alert, nurse call systems, mobile panic attack, site paging receivers, paging car alarms, fire alarms, remote control etc.

The transmitter has a DC to 10kHz modulation bandwidth and will accept direct analogue (AFSK) or digital data. A modulation lowpass filter (10kHz @ -6dB, 1st order) is used internally. Data input, pin 5, is normally driven directly by CMOS logic levels from a data encoder IC, such as a UM3750 (UK77J), which should be powered from the same power supply as the transmitter module.

The positioning of the receiver antenna is very important and will determine the system range. The antenna should be kept clear of other metal in the system, and ideally should protrude directly out of the case in which it is enclosed.

Specification MPT 1340 requires that the transmitter must only be used with an integral antenna.

Three types of integral antenna are approved for use with the TXM-418-A transmitter module: the helical aerial, which is a wire coil connected directly to pin 2 at one end, and left free at the other; the loop aerial which consists of a loop of PCB track, tuned by a fixed or variable capacitor, and fed from pin 2 and the ground end, pin 1; the whip aerial, which can be a wire, rod, PCB track or combination that is connected directly to pin 2 of the module. Optimum total length is 17cm (a quarter-wavelength of 418MHz).

The choice of antenna and its position will greatly influence the effective range of the transmitter.

Antenna parameters	Type of Antenna		
	Helical	Loop	Whip
Ultimate performance	Good	Fair	Excellent
Ease of design set up	Good	Fair	Excellent
Size	Excellent	Good	Fair
Immunity to proximity detuning	Good	Excellent	Fair

Specification - Transmitter

Power supply voltage:	6V to 12V DC
Current consumption:	6mA (6V) to 14mA (12V)
Effective Radiated Power (ERP):	-10dBm (6V) to -6dB (12V)
Initial frequency accuracy:	±50kHz
Overall frequency accuracy:	±80kHz
Spurious radiation:	To MPT 1340
FM deviation:	±25kHz
Modulation bandwidth (analogue):	DC to 10kHz (-3dB)
Pulse width (digital modulation):	100µs

Specification - Receiver

Operating supply range (VCC):	4.5V to 9V DC
Supply current:	13mA
Overall frequency accuracy:	±100kHz
Sensitivity:	0.5µV for 20dB S/N
Carrier detector threshold:	1µV
RF input impedance:	50Ω
LO leakage:	-54dBm
IF bandwidth:	250kHz
AF output level:	500mV pk to pk
AF bandwidth:	DC to 5kHz (-3dB)
Frequency to voltage conversion:	10mV/kHz
Data output - logic low:	0.2V
Data output - logic high:	3.8V
Data bit duration:	0.2ms to 30ms

Data mark/space ratio:	5% to 66%
Data settling time:	10ms
Enable time:	1.5ms
Signal detect time:	1ms

Transmitter

- Pin 1: RF GND - internally connected to pin 4 and should be connected to the ground plane against which the integral antenna radiates.
- Pin 2: RF out - connects to the integral antenna with an output impedance of 50Ω.
- Pin 3: Positive supply.
- Pin 4: 0V connection for the modulation and supply.
- Pin 5: Data In - should be driven directly by a CMOS logic device powered from the same supply voltage as the module.

Receiver

- Pin 1: RF in - nominal impedance 50Ω
- Pin 2: RF ground - internally connected to pin 4, and should be connected to any ground plane against which the antenna works.
- Pin 3: Detect - may be used to derive a carrier detect to enable external circuits when a signal is being used. other wise a 10kΩ pull up resistor to pin 5 should be connected.
- Pin 4: 0V
- Pin 5: +4.5V to 9V DC supply.
- Pin 6: AF - FM demodulated output which can be used to drive analogue data decoders.
- Pin 7: DATA - a digital output derived from an internal data slicer and is a squared version of the AF output.

Experimental circuits and explanations for using these modules are described in the Maplin Magazine Issue 73.

Order Code	Type	Price each
AM27E	418MHz Tx	£17.99
AM28F	418MHz Rx	£29.99

VELLEMAN RADIO PROJECTS

K4500 DIGITAL SYNTHESIZER FM TUNER

3

- ★ Superb sound quality
- ★ Remote control facility (when used with VE47B Infra-red transmitter)
- ★ Complements the VE99H stereo valve amplifier and VE46A digitally-controlled preamplifier
- ★ Search tuning - adjustable sensitivity
- ★ 8-LED signal strength indicator
- ★ 40 available presets
- ★ Two selectable aerial inputs
- ★ Preset station naming

This unit is a microprocessor-controlled single-conversion VHF stereo FM phase-locked loop tuner with alphanumeric display and infra-red remote control facility. The tuner has been designed to complement the Digitally-Controlled Preamplifier (Velleman Kit K4100). This tuner offers many features, one of which is the selection between two 75Ω aerial inputs. This would allow two aerials to be pointing in different directions, for the reception of VHF programmes from different transmitters.

Even with a decent aerial, mounted on the roof, wall, or in the loft, there will always be stations too weak to be heard. For this reason, an adjustable 'stop' sensitivity is provided on the rear panel; this is adjusted so that only the very weakest stations are overlooked when the tuner is operating in 'seek' mode. The tuner is provided with a total of 40 presets to cope with the growing number of VHF broadcasters. A unique feature of this superb tuner is that each of the 40 channels can be assigned a 4-character 'identification tag', such as the abbreviated station name. Station frequency and identification apart, the unit also stores the selected aerial socket, and can even remember which station it was last tuned to on powering up from either 'stand-by' mode or from the mains.

An infra-red remote receiver is incorporated into the unit; this is compatible with the 15-Channel Infra-Red Transmitter that also controls the Digitally-Controlled Preamplifier.

Specification

Tuning range:	87.5 to 108MHz, in 50kHz steps
Sensitivity:	5.5dBu (1 st 8μV)
S/N ratio:	80dB (A-weighted)
Distortion	
mono:	0.08%
stereo:	0.2%
Channel separation:	40dB (1kHz)
Frequency response:	5 to 15kHz (-3dB)
Output voltage:	550mV (100% modulation)
Number of presets:	40
Supply voltage:	220V to 240V AC
No. of 75Ω aerial inputs:	2

Optional Items

The following items, not included in the kit, may also be required.

Heat shrink CP24	1m	(BF87U)
Silicone grease tube	1	(HQ00A)
Hex trim tool	1	(BR48C)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 67.

Order Code	Type	Price each
VF20W	G12 Velleman Kit K4500	£199.99

K2622 AM/FM ANTENNA AMPLIFIER

Do away with weak signals! The K2622 gives you 22dB gain where it's needed. DC supply direct or via the coax cable (50 to 75Ω impedance), metal box included.

Frequency range: 10 to 150MHz.
Power supply: 12V at 3mA.
Dimensions: 86 x 36 x 24mm.

Order Code	Type	Price each
VE18U	Velleman Kit K2622	£9.99

K2659 MORSE DECODER WITH LCD DISPLAY

Features

- ★ LCD readout
- ★ Adjustable centre frequency
- ★ Adjustable sensitivity and lock range
- ★ Low voltage operation
- ★ Compact size

If you have problems trying to decode those mysterious Morse Code signals, or keeping up with experienced signallers or automatic stations, then this decoder is the ideal solution. It will keep up with fast signallers, and conveniently 'notates' everything on a clear alphanumeric LCD readout. The decoder operates over a wide range of audio frequencies and picks up the Morse from the speaker of a suitable receiver using an on board electret microphone. Sensitivity, centre frequency and maximum frequency deviation are adjustable.

Optional Items

Display:	Alphanumeric LCD, 1 line of 16 characters
Power supply voltage:	9V to 12V DC
Power supply current:	100mA DC
Centre frequency:	Variable 700Hz to 1.9kHz
Dimensions:	105 x 70 x 28mm

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 53.

Order Code	Type	Price each
VE89W	Velleman Kit K2659	£59.99

REMOTE CONTROL PROJECTS

INFRA-RED REMOTE CONTROL SWITCH

— a Sound Master Kit

- ★ Ranges in Excess of 10 Metres
- ★ Relay Output
- ★ Latched or Momentary Output

In many situations it may be impractical to use direct manual switching, especially when switches are located in inaccessible places or where it is inconvenient to operate them. A useful option for short range is the use of infra-red remote control. This has the advantage of needing no extra wiring to a control unit and is relatively free from interference associated with radio control. This project will provide remote switching of a single pole changeover relay with the provision of either selecting a latched output or momentary output. LED's on both the transmitter and receiver flash when they are operating. A purpose made case is provided for the transmitter although the receiver needs to be housed, preferably in a metal enclosure.

Specification

Receiver Supply Voltage:	9V to 12V
Standby Current:	35mA @ 12V
Operating Current (relay switched):	120mA @ 12V
Transmitter Power Supply:	9V battery (PP3 alkaline)
Operating Current:	Dependent on required range, but between 35mA to 180mA
Carrier Frequency:	18.5kHz to 23.5kHz

Kit and Special Parts

A complete kit of parts for the transmitter and receiver is available. Full construction details may be found in Maplin Magazine Issue 33. A ready assembled version is also available.

Order Code	Type	Price each
LM69A	IR Remote Switch Kit	£17.99
AM12N	Remote Switch Assm	£32.99

▶ IT'S A FACT! ◀

FETs

FETs operate in a different manner to transistors, which are normally classified as bipolar devices i.e. both positive and negative carriers are used. The FET makes use of the electric field established in a p- or n-type channel of semiconductor material to control the flow of current through the channel. The current path is wholly through one type of channel, normally the n-type as the mobility of its carriers (electrons) is higher than for p-type (holes). Such devices are referred to as *n-channel unipolar* devices. Since the electric field is established by a bias applied to the gate connections, the FET is a voltage controlled device, and therefore, has a very high input impedance.

UM3750 ENCODER/DECODER

Features

- ★ Wide supply voltage range
- ★ Same chip and PCB can be used as encoder and decoder
- ★ Up to 4096 unique codes Applications
- ★ Alarm control systems
- ★ Security systems
- ★ Automatic door openers
- ★ Remote control

The UM3750 encoder/decoder IC is a complete digital code transmit and receive system. A high quality PCB is available on which can be built an infra-red transmitter or a receiver (but not both sharing the same board). In the transmit mode 12-bit data, offering up to 4096 unique values, can be presented in parallel to the IC which is provided with internal pull-up resistors, thus greatly reducing component count and enabling simple, single pole switches or buttons to be used. Using the suggested component values, a clock frequency of 100kHz will generate 43.4 coded 12-bit words per second. The PCB has provision for two infra-red emitter LEDs and an indicator LED if desired. For receiving the addition of a dual op-amp as a preamplifier for an infra-red photo-diode is made instead, and the incoming signal is in serial bit form when received, which is sequentially compared with a local programmed 12-bit word pattern which should be identical for a single signal output to go active low. Several decoders can be cascaded, each simultaneously attempting to match words; in this way two or more 'channels' can be accommodated for simple remote control applications.

Specification	
Supply voltage range:	+3 to 11V DC
For $V_s = 9V$:	
Receive input low:	+0.5V max.
high:	8.5V min.
Transmit/signal	
output level low:	1V, 2mA sink
high:	3.5V, 5µA source

Full information is given in the 'Data File' in Maplin Magazine Issue 36. See end of this section.

A PCB only is available for the UM3750 application circuit.

Note: as these projects are intended as 'building block' projects only, they are not eligible for our 'Get-you-working' service.
PCB dimensions: 76 x 63mm.

Order Code	Type	Price each
GE33L	UM3750 PCB	£2.49

LOW POWER RADIO CONTROL SYSTEM

- ★ 27MHz Operation For Ground-Based Model Control
- ★ Two Positive Pulse PWM Channels
- ★ Two Digital On/Off Channels

Since 1981 and the legalising of Citizens Band Radio on 27MHz, the licensing requirement for model radio control is no longer operative. However, certain conditions apply to both users of this band, and for RC modellers this means that signal transmissions must be within the frequency range 26.96MHz to 27.28MHz at a maximum mean power of 1.5W. Higher frequencies on this band are used for CB transmissions. The 35MHz band (35.005 to 35.205) is also available for radio control, but for use with model aircraft only - not ground-based models, and the 458MHz band would be complex for constructors to set up and align. Therefore a 27MHz system is used with limited power output and receiver sensitivity to avoid interference both to and from other users on the band.

Although capable of six channel operation the design utilises two channels (1 and 2) for pulse width modulation (PWM) and four channels for encoded digital (on/off) information.

Kit and Special Parts

Kits for the 27MHz transmitter and receiver are available, but they do not include crystals, batteries, aerial, or hardware. Full construction details may be found in the Best of Maplin Projects Book 6.

Tx PCB: 57 x 46mm

Rx PCB: 42 x 59mm.

ZN419/409 PRECISION SERVO MOTOR DRIVER

Features

- ★ High output drive
- ★ Low component count

Applications

- ★ PWM motor speed control
- ★ PWM servo control

The ZN419 is a Pulse Width Demodulator chip for servos and motors. This project has been designed with a low component count and small power consumption in mind, making this ideal for boats and planes. Equivalent to the PWM motor drive project this module controls a motor, plus a servo unit. Either one of two different circuits can be built using the PCB: For the servo option a pulse width modulated input is needed to drive the module, with variable pulse width between 0.2ms and 2.5ms. A supply of 4V to 6V at a current of 8mA is needed.

For the motor option a PWM input with variable pulse widths is again required. also a 4V to 6V supply. In addition a high current supply (6V to 8V) is needed to drive the motor.

Parts for the project have to be ordered separately from the PCB.

Full construction details may be found in Maplin Magazine Issue 45.

Note: this is intended as a 'building block' project, and is not eligible for our 'Get-you-working' service.

Printed Circuit Board

Size 75 x 35mm.

Order Code	Type	Price each
GE83E	ZN419 PWM PCB	£3.25

PWM MOTOR DRIVE MODULE

- ★ 6 to 12V Forward and Reverse Model Motor Driver
- ★ Proportional Control Offers Smooth Transition from Off to Full Speed
- ★ Ideal for Model Boats, Cars and Robotics

A Model Motor Drive Module that will operate a small electric motor in either direction as required, with

proportional speed control using the Pulse Width Modulation method. The output circuitry will handle motor stall currents up to 5A, and uses a power pack independent of the control circuit batteries, thus avoiding upsetting modulation of the control circuit. The motor driver initially caters for 6V motor and battery combinations (the model radio control standard), but optional extras can be added to uprate the module for 12V operation, and provide for increased current output demanded by the bigger motors, e.g. electrically driven model aeroplanes. The module also finds applications in robotics, where computer control of movement and direction is required.

Kit and Special Parts

A complete kit excluding optional relay and capacitors is available, the pcb is also available separately. Full construction details may be found in the Best of Maplin Projects Book 3. A ready assembled version is also available.

PCB dimensions: 57 x 71mm.

Order Code	Type	Price each
LK54J	PWM Motor Drive Kit	£10.99
GB71N	PWM Motor Drive PCB	£1.99
AM13P	PWM Motor Dr Assm	£17.99

SERVO TESTER

- ★ Two Automatic Check Modes
- ★ Manual Switch Incorporated
- ★ Checks Servo Travel, Sensitivity, Transit Times and Overshoot
- ★ Simple Construction

Ideal for radio control enthusiasts, this easy to build project can be used to measure the performance of servos and aid fault finding in the unit itself or in the remote control system. Proportional servo output is fully adjustable, and two automatic modes of operation allow testing of the slow and fast response times of the servo. In the first automatic mode the output signal is slowly changed from one end of the range to the other and back again. This tests the slow response of the servo (regulator response). The speed of change is adjustable from about 0.2 seconds to 50 seconds for full travel. The second automatic mode switches the output signal from one end of the range to the other, to test the fast response of the servo (servo response) and repeatable accuracy. The time between switching is adjustable over the same range as in the first automatic mode. The tester uses the standard format train of positive going pulses in a frame rate of 20ms. The Tester requires a 4-8V radio control battery pack as a power supply, or alternatively a suitable 5V supply up to a maximum of 1A output can be used.

Kit and Special Parts

A complete kit of parts is available. A pcb and the printed stick-on front panel for the Servo Tester are also available separately. Full construction details may be found in Maplin Projects Book 23.

Order Code	Type	Price each
LM23A	Servo Tester Kit	£15.49
GD41U	Servo Tester PCB	£2.20
FP75S	Servo Tester FPanel	£2.75

SLOW CHARGER

- ★ Reverse Polarity Protected
- ★ LED Charging Indicator
- ★ Can be Used with 7.2V or 8.4V Packs
- ★ Simple to Construct

High performance model racing cars and electric powered model aircraft make huge demands on their ni-cad racing packs. For optimum model performance, ni-cad's must be able to deliver extremely high currents whilst maintaining the rated terminal voltages for long periods of use. The regular rapid charging techniques employed in the field, tend to reduce the capacity of the ni-cad battery packs, preventing the full charge/discharge parameters from being reached. To maintain maximum ni-cad capacity, it is necessary to regularly slow charge discharge the pack at regular intervals and for reduced capacity ni-cads, a sequential cycle of slow charge/discharge over several days can restore much of the original capacity. The Slow Charger is ideal for charging both 7.2V and 8.4V ni-cad battery packs over a period of 10 to 15 hours. Instructions for the slow discharge of packs are provided in the construction details.

Optional Items

The following items, not included in the kit, may also be required.

Bulb MES 6V 0.6W	1	(WL78K)
MES Batten Holder	1	(RX86T)
Tag 4BA	1 Pkt	(BF28F)
Race Pack Lead Female	1	(JG05F)
High Power Resistor 22Ω 3W	1	(W22R)

Kit and Special Parts

A complete kit of parts excluding Optional items is available. A pcb is also available separately. Full construction details may be found in Maplin Projects Book 25.

PCB dimensions: 38 x 33mm.

RAPID TRACK SIDE CHARGER FOR NI-CAD RACING PACKS

3

- ★ Electronic Timer
- ★ Trickle Charge
- ★ Reverse Polarity Protection
- ★ Audio and Visual Charging Indicator
- ★ Portable

A Rapid Charger for model car Ni-Cad battery packs. The charger is powered from a conventional 12 volt lead acid car battery, which can be left in the vehicle or removed for track side use. Housed in a tough steel case the Rapid Charger is ideally suited for use at outdoor off-road race meetings.

Specification of Prototype

Supply voltage:	12V lead-acid car battery
Supply current:	5A maximum
Batteries charged:	6 cell 7.2V and 7 cell 8.4V racing packs
Charge time:	7.5, 15 and 30 minutes
Charge current:	3A for 7.2V packs and 1.8A for 8.4V packs
Trickle charge:	60mA for 7.2V packs and 40mA for 8.4V packs
Audio/visual:	Red LED charging indicator, Piezo ticker sounder
Case dimensions:	Width 118mm, length 143mm, height 51mm

Kit and Special Parts

A complete kit of parts including pcb but excluding front panel and case is available. The stick-on front panel and pcb are available separately. Full construction details may be found in Maplin Projects Book 25.

PCB dimensions: 101 x 130mm.

Order Code	Type	Price each
LM40T	B2 12V Rapid Charger	£19.99
GD70M	12V Rapid Chgr PCB	£2.99
JG19V	Rapid Chgr F/Trim	£2.99

DIGITAL MULTI-TRAIN CONTROLLER

4

Features:

- ★ 14 locomotives individually controlled on the same track
- ★ Any 4 loco's controlled simultaneously
- ★ Automatic short circuit protection
- ★ Supply always present for carriage lighting, etc.
- ★ Remote control and computer interfacing
- ★ Low-cost, two wire system
- ★ Receiver has modern microprocessor technology

Railway enthusiasts have for many years appreciated the need for a control system that enables trains to be driven as if the operator were in the driving cab of the locomotive. This not only means the control of speed and direction of the locomotive, but also the ability to move anywhere on the layout without the need for

track isolation or switching, thus making the wiring of the layout much simpler.

This system fulfils all these needs by producing a constant 18V DC on the track with digital information superimposed on it, to which only a selected train or trains will respond. The permanent track voltage also means that locomotives' headlights, carriage lighting and many accessories may be used unaffected by the speed of the trains. This system can control up to 14 locomotives all on the same track, and any four of these may be driven independently at one time. Provision is also made for any or all of the four control units to be operated by a 7-bit digital input, thus enabling remote control either from hand-held units (using wire or radio) or from a home computer, giving full control of direction and speed.

The completely redesigned receiver module uses the very latest PIC16C54 IC which replaces most of the components used in the original design. Other advantages are a smaller PCB that has a 'breakable' power section, to allow the controller to be fitted in restricted spaces. This allows the receiver to be used with other motorised models, such as Scalectrix, trams etc.

The common/PSU kit includes all the parts to build the common board and PSU. A suitable punched and painted aluminium case with sloping front is also available.

Kits and Special Parts

A complete kit of parts for the common board and PSU (including the PCB, PSU, and front panel, but not the case) is available. Additionally, a kit of parts for one train controller (up to four will fit in the case) is available. The common board, controller and receiver PCBs are all available separately. Full construction details are described in Maplin Magazine Issue 71.

Order Code	Type	Price each
LW61R	C4 Train Common/PSU Kit	£47.99
LW62S	Train Control Kit	£9.99
LT29G	Train Rx Kit	£14.99

XX47B	Train Cntrl Front Pnl	£6.49
GA72P	Train Common PCB	£3.75
GA73Q	Train Control PCB	£2.75
GH41U	Dig Train Rx PCB	£2.49

CONTROL-A-TRAIN

- ★ Pulse Width Modulated for Excellent Low Speed Performance
- ★ Inertia Control of Momentum and Braking
- ★ Box or Panel Mounted
- ★ Easy to Build
- ★ Low Cost

Things have moved on from the days when model train controllers were little more than a rectifier and a high power potentiometer (called a 'rheostat'), and using modern electronic devices it is possible to produce a simple controller that has quite advanced facilities. This design is based on just two operational amplifiers but it has a pulsed output for good starting and low speed performance, plus simulated inertia, momentum and braking. It also has output current limiting which protects the circuit when the inevitable overloads and short circuits occur. The unit is designed to operate from the 15 volt AC output from a train transformer or from the 15 volt AC auxiliary output of a train controller, or it could easily be built as a self-contained unit having its own built-in mains transformer if desired although details are not given for this. It should also operate from the 12V DC output of a train controller or transformer unit.

This controller uses the method of pulse control; the idea is to provide a series of output pulses that drive the motor at full power. The average output voltage (and thus the speed of the train) is varied by altering the mark-space ratio of the output signal. A must for all serious model train enthusiasts looking for a lifelike, hands-on-throttle feel for their models.

Kit and Special Parts

A complete kit, excluding case and 4mm wander plugs is available. The pcb, printed stick-on front panel and heatsink bracket are also available separately. Full construction details may be found in the Best of Maplin Projects Book 4.

PCB dimensions: 112 x 51mm.

VELLEMAN REMOTE CONTROL PROJECTS

K6700/1 2-WIRE 8-CHANNEL COMMUNICATION TRANSMITTER & RECEIVER

Features

- ★ 8-channel communication
- ★ Expandable to 16 channels
- ★ Power supply through data line
- ★ 2-wire communication between transmitter and receiver
- ★ LED status indication of each output

Applications

- ★ Part of a security system
- ★ Signal and control systems
- ★ Railway modelling
- ★ Data logging

These modules enable up to eight individual switching devices to be operated from a distance of 50m or more. Further expansion using more modules is also possible. There are only two connecting wires between the transmitter and receiver, with power for the transmitter obtained from the data line. It is also possible to connect several receivers to one transmitter, to receive switching connections in several places. There are many more uses for this project, using a combination of switching devices for controlling models, lighting, motors, alarms, locks, various theatrical on-stage applications, and indication wiring in cars and caravans. The hobbyist can control lighting in individual rooms in a doll's house, or houses and street lighting in a model village, where the houses may be situated remotely. Model train enthusiasts can use pairs of transmitters and receivers to cut down on the wiring between the control panel and the layout. Other possibilities include data logging where contacts embedded in remote machinery can be checked to see if the particular piece of equipment is on. Similarly, machinery interfaced, with suitable switching arrangements, such as heavy duty relays, could be switched on remotely.

Specification

Power supply:	+9 to +16V DC
Current quiescent:	80mA
Current maximum (full load):	480mA
Channels:	8 channels expandable to 16

Optional Items

The following items, not included in the kit, may also be required.

Micro-Min Relay 12V	As Req	(BK47B)
Micro-Min 12V 1A 200mW	As Req	(DC52G)
Ultra-Min Relay 12V SPDT	As Req	(YX94C)
Ultra-Min Relay 12V DPDT	As Req	(JX55K)
BT Relay 12V DPDT	As Req	(DC77J)
BT47W/6 Relay 12V	As Req	(DC80B)
Min Relay 3A	As Req	(YX96E)
Min Relay 12V/5A	As Req	(JM18U)
Min Relay 12V/10A	As Req	(JM67X)
Mains Relay 10A	As Req	(YX97F)
Relay 12V 16A	As Req	(YX99H)
Min Relay 12V 6A	As Req	(FJ43W)

Relay Flat 12V	As Req	(HY20W)
Relay 16A 250V AC	As Req	(JG22Y)
Reed Relay 12V SPDT	As Req	(JH13P)
Reed Relay 12V DPST	As Req	(JH16S)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 77.

VE70M	Velleman Kit K6700	£8.99
VE71N	Velleman Kit K6701	£15.99

K6710 15-WIRE INFRA-RED TRANSMITTER

Features

- ★ 15 channels
- ★ Remote control of light dimmer
- ★ 21 keys
- ★ 'Click-touch' keypad
- ★ Robust aluminium case

2

This infra-red transmitter can be used with the universal 15-channel receiver K6711 and/or the one-channel receiver K6712. One key will reset all the outputs at once. The keypad features a superb 'click-touch' design which has a characteristic responsive feel, unlike other membrane designs which offer no tactile feedback whatsoever. Additionally, 'click-touch' offers a high degree of protection against moisture ingress. The transmitter is housed in an attractive and robust aluminium case.

Specification

Range:	30m maximum
Tx carrier frequency:	38kHz
Identification codes:	6
Independent channels:	15
Power supply voltage:	9V (PP3 battery)
Current consumption	
standby:	0.1µA
transmit:	10mA average
Dimensions:	175 x 50 x 23mm

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 59.

Order Code	Type	Price each
VE72P	Velleman Kit K6710	£33.99

K6711 15-CHANNEL INFRA-RED RECEIVER

2

Features

- ★ Controls up to 15 separate open collector outputs
- ★ Each output can have 'pulse' or 'toggle' operation modes
- ★ 'Rotary' switching or independent channels

- ★ Two memories for storing commonly-used output combinations

Applications

- ★ Lighting
- ★ Stage effects
- ★ Home automation
- ★ Adding infra-red remote control to logic-controlled VCRs and cassette decks
- ★ Security systems

The receiver has 15 independent outputs, each of which can be operated separately, and for every single output there is the option of using it as a changeover switch or as a pulse contact. The receiver is built around a modern microcontroller, allowing two output states to be stored in memory, which can be called at any time. A reset function allows the resetting of ALL outputs at once using only one key (could be adapted for use as a panic alarm).

Specification

Number of open collector outputs:	15 outputs at 50V 500mA maximum
Output status monitoring:	LED for every output
Emitting/receiving area:	30m maximum
Supply voltage:	8 to 14V DC, or 2 x 6 to 2 x 12V AC, 150mA

Optional Items

The following items, not included in the kit, may also be required.

15-channel Infra-red Transmitter Kit	1	(VE72P)
250mA Transformer 9V-0-9V	1	(YN15R)
Relays	As Req	
1N4001	As Req	(QL73Q)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 69.

Order Code	Type	Price each
VE73Q	Velleman Kit K6711	£32.99

K6705/K6704 INFRA-RED CODE LOCK RECEIVER AND TRANSMITTER

Features

- ★ 60,000 possible code combinations
- ★ Tx housed in key-ring box
- ★ Tx/Rx LED display
- ★ 10A toggle or momentary-action relay

Applications

- ★ Remote arm/disarm of alarm systems
- ★ Electric door catch release
- ★ Garage door opener
- ★ Remote power switch

In any security system, the quality of the locking device determines the level of difficulty presented to an intruder attempting to gain access. Ordinary mechanical key or combination locks are vulnerable as direct physical access to them is often possible. However, with a remotely controlled electronic code-lock, an additional level of security is provided since no direct access to the lock device is necessary. In this system the transmitter key generates an electronic code (60,000 possible) which is sent to the receiver lock by infra-red where it is decoded.

The Tx (VE10L) is particularly easy to build as at the heart of the system is one IC, many of the remaining devices are SMD and are supplied bonded to the PCB. The Rx (VE09K) consists of two PCBs, a small preamplifier board and a larger main decoder PCB. A very popular application is as an electric door catch controller, using the solenoid-activated mortice lock release mechanism (YU89W).

Specification

Tx/Rx range: 10m
 Code combinations: 60,000
 Rx output mode: Toggle or momentary
 Relay output: 10A at 12V DC
 Power requirements
 Tx: 4 x LR44 button cells
 Rx: 2 x 9V AC or 10V to 16V DC at 100mA

Kits and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 56.

Order Code	Type	Price each
VE09K	Velleman Kit K6705	£23.99
VE10L	Velleman Kit K6704	£15.99

K6703 CODELOCK RECEIVER

The receiver kit for transmitter K6702. There is an LED to indicate receive signal strength.

Relay output: 5A toggle or momentary switching action.

Separate output to switch car alarm on or off.

Power supply: 2 x 9VAC or 12 to 16VDC/100mA max.

Note: this product is not licensable and should not be used in the U.K.

Order Code	Type	Price each
VF13P	Velleman Kit K6703	£25.99

K6712 IR REMOTELY CONTROLLED DIMMER

This one-channel IR-receiver/dimmer works together with the 15-channel IR-transmitter (K6710). The receiving code can be set to one of the 15 transmitting codes so that you could operate up to 15 receivers (K6712 and/or K6713) independently of each other. Can be fitted to a standard light switch wall box by using ZB40T with the back knocked out. Emitting/receiving area up to 30m. Max. load: 2A (4A with cooling). Not suitable for use with halogen lamps.

Order Code	Type	Price each
VE74R	Velleman Kit K6712	£30.99

MULTI-PURPOSE RECHARGEABLE LAMP

A very practical combination lamp which combines a bright torch, a flashing yellow hazard warning light, and an efficient twin tube fluorescent lamp. These features make the lamp ideal for camping, around the home or emergencies. The tubes are 8in. 6W and either one or both can be switched on. The fluorescent lamp can be operated alone or in combination with either the torch or the hazard warning light. The torch end is twisted off for bulb replacement. The lantern is powered by an integral, rechargeable, 6V DC 3Ah sealed lead-acid battery which is recharged from the battery charger supplied, via a standard 2.1mm power socket. A red LED indicates when charging is taking place. Overall dimensions: 282 x 105 x 94mm.

K2650 CALL CODE ACTIVATED SWITCH

A remote control system that operates over a telephone line, yet requires no approval as there is no connection to the telephone line. Moreover, it saves you money as its use is free, even when you are the other side of the world, because the telephone only needs to ring - no communication has to be established. There are a lot of applications e.g. turning on and off the lights at irregular times during a prolonged absence, turning on the heating before you drive home etc. 42 different codes can be set, so abusing the system is almost impossible. Timer can be set from 3s to 56h. Requires a 12V DC 90mA regulated supply and has a 240V/3A relay output.

Order Code	Type	Price each
VE86T	Velleman Kit K2650	£22.99

FOR TOP QUALITY & VALUE!

K6702 CODELOCK TRANSMITTER

Together with the code lock receiver K6703, this kit forms the basis of a remote control system for a variety of applications, such as: Garage door, door lock, car alarm (e.g. K3504) perhaps in combination with the central door lock, wireless operation of lighting inside and outside, etc. You can choose among more than 4000 codes, to give unwanted visitors no chance. It is also possible to configure several transmitters for use with one receiver or vice versa.

Range of the transmitter/receiver 40m

LED on/off indication

Housing in the shape of a key holder

Battery protected against pole reversal

Power supply: 12V battery type V23GA, GP23A, 23, 23M, VR22

Note: this product is not licensable and should not be used in the U.K.

Order Code	Type	Price each
VF12N	Velleman Kit K6702	£17.99

SECURITY PROJECTS

FORGED BANK-NOTE DETECTOR

NEW!

Features

- ★ Visible deterrent
- ★ Simple 3-transistor design
- ★ Powered from +12V DC
- ★ Audible and visual signals
- ★ Adjustable sensitivity
- ★ Fully enclosed to prevent UV exposure
- ★ Low cost

Applications

- ★ Car boot sales
- ★ Small stores and shops
- ★ Bazaars and fêtes
- ★ Pubs and clubs

A slight variation on the standard type of bank-note checker, where an ultra-violet light is used to illuminate the bank-notes. Fake or counterfeit notes reflect the UV light whereas real ones do not. The note is simply slid into the checker, and an extra circuit is incorporated which sounds a buzzer and illuminates an LED if the note is OK, but if it is fake then the LED will not light and the buzzer will not sound. The unit will operate from a single +12V supply, and so is ideal for portable use at car boot sales, bazaars and fetes where counterfeit notes are often tendered. For indoor use the unit can be supplied by a mains adaptor.

Optional items

The following items, not included in the kit, may also be required.

Panel Mount Power Socket 2.5mm	1	(JK10L)
M3 x 30mm Pozzi Screw	1 Pkt	(JC72P)
Steel Nut M3	1 Pkt	(JD61R)
Shakeproof Washer M3	1 Pkt	(BF44X)
AC Adapter Unregulated 12V 800mA	1	(YM85G)
Plain Stripboard Board Type 3962	1	(JP53H)
1 1/4 in. Fuse Clip	2	(KU28F)
Insulated Spacer M3 x 10mm	1 Pkt	(FS36P)
Spacer M3 x 1/4 in.	1 Pkt	(FG33L)

GH76H	Till Saver PCB	£2.59

3

LOW COST HOME ALARM

- ★ Tamper and panic button loop
- ★ Adjustable exit/entry delay
- ★ Extremely low stand-by current

2

This project contains many of the facilities normally found on more expensive alarm systems. These include entrance/exit delay, security loop trigger, siren entry delay, tamper and panic loop trigger, as well as switches for these controls. A small buzzer mounted on the PCB sounds when the entry/exit loop is activated, indicating the alarm is armed.

All usual protection accessories can be connected to the home alarm. A siren can be connected to the PCB as well as switches, panic buttons and arm/disarm key. Indication LEDs show the state of the unit, whether active, intruder, or help sections have been activated.

Specification

Supply voltage:	6V to 12V DC
Current (12V):	Standby 1.3µA
	Active 3mA
	Intruder 7.5mA
	Help 4.5mA
Siren switching current:	1A Max
Entry/exit delay time:	1 to 60 seconds

Security loops:	Normally open
	Normally closed
Tamper loop:	Normally closed
Panic button loop:	Normally open

Optional Items

The following items, not included in the kit, may also be required.

Micro Piezo Siren	1	(JK42V)
Help Button	As Req	(FP12N)
Std Pressure Mat	As Req	(YB91Y)
Surface BA Reed	As Req	(YW47B)
Window Foil	As Req	(YW50E)
Foil Terms	As Req	(YW51F)
4-Wire Burglar Cable	As Req	(XR89W)
Alkaline KAA	8	(FK64U)
12V Battery Box	1	(RK44K)
PP3 Clip	1	(HF28F)

Gen Purpose HP1	1	(YJ22Y)
AC Adaptor Regulated	1	(YB23A)
Rectifier Diode 1N4001	2	(QL73Q)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 45. A ready assembled version is also available. PCB dimensions: 119 x 66mm

Order Code	Type	Price each
LP72P	Lo Cost Alarm	£18.99
GE82D	Lo Cost Alarm PCB	£4.19
AM14Q	Lo Cost Alarm Assm	£26.99

LOOP ALARM

Features

- ★ Low-Cost
- ★ Easy to build
- ★ Needs no complicated adjustment, or test equipment to set up
- ★ Long standby time from 1 set of alkaline batteries – typically 3 years or more

Applications

- ★ Shop loop alarm – protect display items
- ★ Office/school loop alarm – protect computers, monitors etc.
- ★ Home loop alarm – protect ladders, garden tools, bicycles, etc. when left in back gardens.
- ★ Could be adapted for use with a back garden gate or garden shed.

This little gadget was developed in response to a growing problem – the pilfering of items from shops, and as the crime rate is increasing, so shopkeepers need to provide some kind of investment to protect their stock. In the case of this simple but effective Loop Alarm, this investment need not be too great. Also vulnerable are householders. Leaving aside obvious targets like bicycles, surprisingly large objects like ladders (and in one case, a 6 foot satellite dish!), have not been unknown to go missing. This situation has developed to the point that some insurers will not provide cover for such items; even where cover is

Continued on next page.

IT'S A FACT!

THE FREQUENCY SPECTRUM

Frequency	Frequency Band
10kHz to 30kHz	VLF - Very Low Frequency
30kHz to 300kHz	LF - Low Frequencies (long wave)
300kHz to 3MHz	MF - Medium Frequencies (medium wave)
3MHz to 30MHz	HF - High Frequencies (short wave)
30MHz to 300MHz	VHF - Very High Frequency
300MHz to 3GHz	UHF - Ultra High Frequency
3GHz to 30GHz	SHF - Super High Frequency
87.5MHz to 108MHz	'FM' - Normal band for stereo radio
108MHz to 142MHz	Civil Airband Frequencies
Most radio stations transmit on a particular frequency, whereas, amateur radio	

enthusiasts refer to 'bands' which are quoted as wavelengths (in metres). Wavelength is defined as the speed of light (metres per second) divided by the frequency (Hz).

$$\text{Wavelength } \lambda = \frac{300,000,000}{\text{Frequency (Hz)}} = \frac{300}{\text{Frequency (MHz)}}$$

Short wave radio stations broadcast on frequencies between 2MHz and 30MHz, i.e. 150 to 10 metres.

Typical shortwave bands	Frequency MHz
80m	3.560
40m	7.030
30m	10.106
20m	14.060
15m	21.060
10m	28.060

Continued from previous page.

provided, in some cases (garden tools, for example) it is simply not economically viable to pursue claims – but the annoyance and expense of replacement are still there. Again, the Loop Alarm will help considerably at home – it can be used to protect a garden shed, and/or even alarm a back gate – and is priced at a fraction of the cost of a new set of 40ft. aluminium ladders!

Kit and Special Parts

A complete kit of parts (including the PCB) is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 70.

Order Code	Type	Price each
LT36P	Loop Alarm	£16.99
GH46A	Loop Alarm PCB	£1.99

AUTOMATIC FLOODLIGHT CONTROLLER

3

- ★ Interfaces with other Security Systems
- ★ Adjustable Time Delay
- ★ Switches up to 1kW
- ★ Manual or Automatic Control
- ★ Local Alarm Indication
- ★ Recorded Alarm
- ★ Lamp Failure Indication

Used in conjunction with a PIR Sensor (see Protection Section) this unit provides intruder activated mains power switching for powerful flood lamps, sirens, etc. It was primarily designed as a security device in its own right, although provision has been made for it to be linked into a larger security system. This controller also has other applications where it is required to switch on a mains-powered device for a preset period of time after which it will automatically switch off until re-triggered. This system could also be operated from any make or break detection device. The controller supplies the infra-red detector with 12V DC, and the detector's internal relay trips the alarm part of the controller. The controller output is in the form of the 240V AC mains for mains powered appliances. The on time duration is adjustable from 20 seconds to 4 minutes, and a latch signals that the alarm has been tripped until the controller is reset. A buzzer will sound for the duration of the floodlight 'ON' time, and provision is made for a latched output for a low current alarm bell for example which will ring continuously until the controller is reset.

Optional Items

The following items, not included in the kit, may also be required.

Mains Cable	(XR03D).
13A Mains Plug	(RW67K).

Kit and Special Parts

A complete kit is available. The pcb is also available separately. Full construction details may be found in the Best of Maplin Projects Book 4.

Order Code	Type	Price each
LK73Q	B2 Floodlight Alarm Kit	£39.99

TWILIGHT SWITCH

Features

- ★ Photodiode with all on-chip electronics
- ★ 50% hysteresis
- ★ Temperature compensation

Applications

- ★ Night-time security
- ★ Automatic porch light
- ★ Light/dark sensor

This useful module owes its small size and simple construction to the use of a specialised optoelectronic IC, the ULM3390T. Designed for use in twilight sensing applications as well as emergency and outdoor lighting, the ULN3390T optoelectronic switch is a 3-pin, monolithic integrated circuit containing a photodiode, a low-level amplifier, comparator, voltage regulator and output driver. To make the module as simple to use as possible output switching is performed by a relay, providing normally open, normally closed or changeover functions, and allows total electrical isolation between the sensor circuit and the controlled circuit. For increased flexibility, inverted or non-inverted operation of the relay can be selected with an on-board link.

Electrical connections to the on-board relay should not exceed 28V DC and 1A. To control mains powered lighting or other devices, a second 'slave' relay rated for mains use should be used, for example Order Code YX97F (3A max. for inductive loads).

Alternatively the Zero Crossing Opto-Switch kit (Order Code LP55K) can be used.

Specification

Supply voltage range:	4V min. to 16V max.
Supply current:	5.3 to 43.8mA, depending on mode and settings
Output risetime:	<500ns
Output fall time:	<500ns
Light threshold, $\lambda = 880\text{nm}$:	
dark level:	10 $\mu\text{W}/\text{cm}^2$
light level:	20 $\mu\text{W}/\text{cm}^2$
Hysteresis:	50% nominal

Optional Items

The following items, not included in the kit, may also be required.

20mm Single Pattress	1	(YB14Q)
Blanking Plate	1	(HL86T)
Insulated Spacer M3	1 Pkt	(FS36P)
AC Adaptor Unregulated 300mA	1	(XX09K)
2.5mm Panel Mount Power Socket	1	(JK10L)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 73.

The Maplin 'Get-You-Working' Service is not available for this project.

Order Code	Type	Price each

GH63T	Twilight Switch PCB	£2.29

INFRA-RED PROXIMITY DETECTOR

1

Features

- ★ Uses latest pyro-electric device
- ★ Short-range, heat/movement detector
- ★ Low power consumption for long battery life

Applications

- ★ Doorways, stairs and similar proximity systems

This I/R Proximity Detector has been designed as a simple, low-cost system for detecting heat changes, movement of a warm body, etc., such as those emitted from the human body. The unit responds to a definite change or disturbance in ambience – or background – heat levels and could be placed across a doorway or stairs to register movement in those areas.

Supply requirements for the module are 9V DC at 2 to 3mA. With such low current consumption, long periods of use from a PP3 battery are possible. The

module is not capable of switching heavy loads and should only be used with external systems up to 12V DC and current levels below 100mA. Relays could be used for controlling larger voltage/current devices. Any battery supplying the electronics should NOT also be used for supplying the external devices as well (if more than a simple LED arrangement is to be used). Sensing range is 4 to 5 feet, depending upon the sensor's field of view and variations in the light/heat background levels. A whole room could not adequately be covered by this system, but doorways, narrow hallways and corridors are suitable areas.

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 54.

COMPACT DISC LASER LENS CLEANER

This laser lens cleaner is a special encoded cleaning disc provided with a cleverly designed unique brush system that ensures thorough and reliable cleaning without causing any harm to the sensitive, coated lens – it even plays music while it is cleaning. This disc is easy to use and has been designed to be played like a standard CD and work effectively with all CD players. Regular use will prevent the mistracking and distortion which would otherwise be caused by a dirty laser lens. Supplied in a storage

EXPLOSIVE GAS ALARM

- ★ Operates from 12V battery
- ★ Very low average current consumption
- ★ Detects all common explosive or inflammable gases
- ★ Loud strident alarm

Dangerous gas leaks, particularly in confined spaces, causing explosions and fires, are becoming a more common occurrence, usually damaging property and often maiming or even killing people. The Maplin Gas Detector has been designed to prevent the build-up of these gases by sounding a loud alarm before sufficient gas has leaked to cause a damaging explosion. The sensor used consists of two separate units, the sensor itself and a reference compensator. The system will detect all common explosive or inflammable gases such as Butane, Propane, Methane, Town Gas, Natural Gas and Petrol Vapour. The sensors are enclosed in double wire mesh housings to prevent any chance of the sensor itself igniting any gases encountered. Ideal for caravans and boats. Runs from 12V battery and to conserve power, the air is tested for gas approximately every 5 or 6 minutes.

Optional items

The following items, not included in the kit, may also be required

Case	(LH62S)
Knob K7B	(YX02C)

Kit and Special Parts

A complete kit of parts excluding case, control knob and hardware is available. Full construction details may be found in the Best of Maplin Projects Book 6.

Detect PCB: 127 x 82mm.
Alarm PCB: 46 x 26mm.

Order Code	Type	Price each
LK60Q	Explosive Gas Alarm Kit	£28.99
GB79L	Gas Alarm Sensor PCB	£1.20

INFRA-RED DOOR LOCK

Features

- ★ Infra-red controlled
- ★ Uses simple-to-install solenoid-controlled door catch mechanism
- ★ Sensor can be installed away from the receiver for flexibility
- ★ Uses same controller as Compuguard car alarm
- ★ Output for switching external loads
- ★ Adjustable 'on' time for external output

Applications

- ★ No more keys to worry about when your arms are loaded!
- ★ Open your door while you arm your Compuguard!
- ★ Security systems

This project will unlock your door, and can turn on the (porch or hall) light for a few minutes (with the addition of a relay, or the LP55K Mains Opto Switch Kit) by a simple press of a button. The remote control is the one used with the Compuguard car alarm system; if you already have Compuguard fitted to your car, set the same codes for both items and you will only need the one transmitter! This project has many other applications – opening garage doors, for example. By using the optional Mains Opto Switch kit (LP55K) with the Infra-red Door Lock a resistive mains load of 250W (max.) can be switched at the same time as the door solenoid. A porch or hall light would be ideal for use with such a system. The actual 'on' period is, thankfully, a great deal longer than that of the door solenoid – it can be varied between 1 and 2 minutes using RV1. The actual details for the Mains Opto Switch can be found in 'Electronics' Issue 41 (December 1990/January 1991); by a twist of fate, the infra-red transmitter appears in the same issue, but in its original guise as part of the 'Compuguard' system! As an alternative to the Mains Opto Switch, a relay

may be used to switch an external load. This option should be used if the load to be switched exceeds 250W (a 500W halogen lamp, for example), but note that a relay with suitably-rated contacts must be used.

Optional Items

The following items, not included in the kit, may also be required

ABS Box MB2	1	(LH21X)
PSU Box Large	1	(YU31J)
PSU Grommet	1	(JM16S)
250mA Transformer 6V	1	(YN14Q)
Fuse 20mm 50mA	1	(WR93B)
Fuse A/S 315mA	1	(RA07H)
Safuseholder 20	2	(RX96E)
Fuseholder Boot	2	(FT35Q)
Filter Red	1	(FR34M)
Standard Power Plug 2.5mm	1	(HH62S)
Panel Mount Power Skt 2.5mm	1	(JK10L)
Cable P Clip 3/16 in.	1	(LR44X)
Steel Screw M3 x 10mm	1 Pkt	(JY22Y)
Steel Nut M3	1 Pkt	(JD61R)
Steel Washer M3	1 Pkt	(JD76H)
Isoshake M3	1 Pkt	(BF44X)
Zip Wire	1 Pkt	(XR39N)
Lapped Pair	1m	(XR34M)
Twin Mains DS Black	1m	(XR47B)
Double Surface Pattach 47mm	1	(YB17T)
Double Blank Plate	1	(ZB49D)
Mains Opto Switch	1	(LP55K)
5A Mains Relay	1	(YX98G)
Insulated Spacer M3 x 10mm	1 Pkt	(FS36P)
SR Grommet F31	1	(LR47B)
Sub-Min Toggle B	1	(FH01B)
Wire 3202 Brown	1m	(XR34M)
Spade 3.2mm	1 Pkt	(JH64U)
Heat Shrink CP 32	1m	(BF88V)
Double Bubble Satchet	1	(FL45Y)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 68.

Order Code	Type	Price each
LT32K	Infra-Red DoorLock	£37.99
GH50E	I/R Door Lock PCB	£2.49

VHS VIDEO ALARM

- ★ Protect your Video Player
- ★ Simple Construction
- ★ Includes Alarm Set-up Delay
- ★ Blank Case Included

A portable, self-contained, alarm system disguised as a video cassette tape which detects movement from any pre-determined position. The cassette can be inserted into a front or top loader VHS video player and will give an audible warning if the machine is moved or the cassette ejected. The cassette could also be placed on top of a video, television or hi-fi or mixed with other tapes in a library or indeed placed in any position where a video cassette will not seem out of place.

Continued on next page.

Continued from previous page.

The unit is armed and disarmed by an easily accessible switch hidden from view inside the cassette. After switching on, there is a 10 to 12 second delay before the unit arms itself, allowing time for loading or positioning the cassette. When moved the module waits for approximately 6 seconds and then triggers two penetrating electronic buzzers, which will sound continuously until either the module is switched off, or the battery runs down. Power for the unit is provided by a 9 volt PP3 dry cell or ni-cad battery. A constant current charger for the ni-cad battery has been included in the circuit design but will require the addition of a suitable power socket and a 12/15V DC Supply. Details for incorporating the ni-cad facilities are given in the construction details.

Optional Items

The following items, not included in the kit, may also be required:

1 PP3 Battery	(FK62S)
1 PP3 Ni-Cad Battery	(HW31J)
1 Power Socket	(HF82D)
1 Unregulated 300mA DC power supply	(XX09K)

Kit and Special Parts

A complete kit of parts excluding the battery is available. The pcb is also available separately, as is the video cassette shell. Full construction details may be found in the Maplin Projects Book 24. A ready assembled version is also available. PCB dimensions: 64 x 64mm.

Order Code	Type	Price each
LM27E	VHS Video Alarm Kit	£16.99
GD56L	VHS Video Alarm PCB	£5.75
YP27E	Video Cassette Shell	£1.99
AM17T	Video Alarm Assm	£24.99

CYCLE ALARM

- ★ Loud sounder with 2 minute time-out
- ★ Vibration and movement sensing
- ★ Warning and anti-tamper switch facilities
- ★ Keyswitch arming delay

Help protect your expensive custom-designed or mountain bike from theft, with this easy to construct vibration cycle alarm. The unit is completely self-contained in a 129 x 64 x 44mm case, which is simply attached to one of the 'V' frame tube uprights. A special keyswitch 'arms' the system and after a short delay period the alarm will become active. Should the bicycle be tampered with, movement and vibration sensors will trigger the alarm and the sounder will give off a very loud 110dB 'screech' for 2 minutes (depending on the condition of the battery). The case can also be made tamper-proof, and a flashing red LED indicates that the alarm is in an armed state. In addition, an input is provided for connecting a push-to-make handlebar switch (not supplied) which can be used to operate the siren independent of the alarm. The PP3 type 9V battery used to power the unit should have a long operational life.

Optional Items

The following optional items are not included in the kit, but may also be required.

Battery PP3	1	(FK62S)
Min Lever Micro Sw	1	(FP42V)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 49.

Order Code	Type	Price each
LP76H	Vibration Alarm	£20.99
GE89W	Cycle Alarm PCB	£2.49

PEEP ALARM

Features

- ★ Simple effective design
- ★ Light sensitivity control
- ★ LED alarm indicator
- ★ Low quiescent current consumption from 9V PP3 battery
- ★ Reverse-polarity protection

Applications

- ★ Door open reminder
- ★ Case alarm

The Peep Alarm is a light-operated sounder, simple but effective in its operation. In a dark environment, the unit remains quiet, and is for all practical purposes switched off. However, when light falls on the alarm's photosensor, the unit emits a loud, 4-6kHz shrill tone. In addition, an LED illuminates, providing secondary indication that the circuit has been triggered. An on-board sensitivity control is included in the design to allow operation in a variety of situations, over a range of light levels. In a typical application, it could be used to provide an indication that a cupboard or darkroom door, a suitcase or brief case has been opened. This neat, compact alarm is housed in an ABS box. Current consumption from a PP3 alkaline battery is less than 1µA, rising to only 14mA when the alarm is activated.

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available. The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 51. PCB dimensions: 33.7 x 41

Order Code	Type	Price each
LP50E	Peep Alarm	£8.49
GH06G	Peep Alarm PCB	£2.49

µA3730 ELECTRONIC CODE LOCK

Features

- ★ Low power consumption
- ★ Key-pad entry
- ★ 3 different outputs
- ★ 10¹² unique codes
- ★ Programmable up to 12 digit

Applications

- ★ Security systems
- ★ Electronic locks

The µA3730 is a single chip electronic code-lock IC utilising CMOS technology. The IC can handle passcodes of up to 12 digits, allowing the use of up to 1 million million unique codes. If an incorrect code is entered three times or more, an output is activated allowing a burglar alarm to be triggered. The code may be changed as many times as required by the user providing additional security. The IC requires a battery back-up to prevent the code being lost if the main power supply fails. There are three outputs which are activated from the keypad. OUT1 activates for two seconds when the correct code followed by 'K'(#)' is entered. OUT2 changes state when the correct code followed by 'K' is entered providing a toggle action. OUT3 activates for 1 minute if an incorrect code is entered three times or more. All outputs are open drain types and require a pull-up resistor; the total load current should not exceed 40mA at any time as irreparable damage could occur. The module requires a regulated and well decoupled 4V to 6.5V DC power supply, that is capable of supplying at least 20mA. Outputs are provided for 3 LED indicators to show the state of the outputs OUT1 to OUT3.

Note: this is intended as a 'building block' project and not eligible for our 'Get-You-Working' Service.

Specification

Power supply voltage:	4V to 6.5V
Back-up battery voltage:	3.7V to 6V (<supply voltage - 0.5V)
Power supply current at 5V stand-by:	220nA
operating (without LEDs):	310µA
operating (LEDs active):	17mA
PCB size:	71 x 51mm
Output sink current:	40mA (absolute max.)

Optional Items

The following items, not included in the kit, may also be required.

LED Red 5mm 2mA	1	(UK48C)
LED Green 5mm 2mA	1	(UK49D)
LED Yellow 5mm 2mA	1	(UK50E)

Kit and Special Parts

A complete kit of parts (including the PCB, numeric keypad and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 56.

VELLEMAN SECURITY PROJECTS

K2655 ELECTRONIC WATCHDOG

Features

- ★ Choice of two different barks
- ★ Reacts to environmental noise
- ★ External trigger input
- ★ Loudspeaker and audio output
- ★ AC and DC power supply input

The Electronic Watchdog generates two selectable, different dog barks when triggered by environmental noise. Such a loud, furious, barking dog sound should deter even the most determined burglars! The circuit features a highly sensitive electret microphone, with a sensitivity control, to pick-up environmental noise. The barking sounds are held in a non-volatile memory IC that is supplied with the kit. The unit requires either a 6V-0-6V step down mains transformer or a non-stabilised DC power supply. Any 2W, 4Ω or 8Ω loudspeaker can be used, but XQ73Q, a horn speaker, is recommended, as it offers a high sound output without the need for an enclosure.

Specification

Loudspeaker output:	2W at 4Ω
Supply current	
Standby:	75mA
Barking:	400mA maximum

Optional Items

The following items, not included in the kit, may also be required.

Horn Speaker 10W	1	(XQ73Q)
AC Unregulated Adaptor 300mA	1	(XX09K)
Transformer 6V-0-6V 500mA	1	(WB06G)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 53.

Order Code	Type	Price each
VE85G	Velleman Kit K2655	£23.99

K6400 KEYCODE LOCK

Features

- ★ More than 3,000 possible codes
- ★ Relay output
- ★ LED active indicator
- ★ Pulse or switched output
- ★ Nine keys for four digit code

Are you tired of losing your keys? Would you like a high tech way of locking up your valuables? Then the Keycode Lock is the answer. A small numerical keypad is placed by the door, and to open it, the correct code must be entered. However, it doesn't have to be confined to doors, as it could be used on cupboards, filing cabinets, desks, cars, caravans, trailers, lock-ups, garages, equipment, etc. Anything in fact that would normally require a conventional lock to secure a door or lid, and room enough for a door solenoid lock, the number of applications are endless. The PCB mounted connector and track are not suitably spaced for voltages above 50V, and if mains voltages are switched then use an off-board mains rated relay. The external relay may require a diode to protect the circuit from the induced emf produced by the relay when it de-energises.

Using the optional Mains Opto Switch kit (LP55K) with the Keycode Lock enables switched resistive mains loads of up to 250W (maximum). The actual details for the Mains Opto Switch are in Electronics Issue 41 (December 1990/January 1991).

Specification

Power supply:	9 to 15V DC or 8 to 12V AC
Current consumption	
off:	0.3µA
on:	40mA
Time limit for code input:	5s (only in pulse mode)
Dimensions:	80 x 80 x 40mm

Kit and Special Parts

A complete kit of parts (including the PCB) is available. Full construction details may be found in Maplin Magazine Issue 80.

Order Code	Type	Price each
VE76H	Velleman Kit K6400	£22.99

IT'S A FACT!

TYPE NUMBERS

In general, especially among European transistor manufacturers, if a device starts with a 'A' then it is germanium, and if it is a B, then it is silicon. The second letter indicates that the device is one of the following types:

A: Diode	P: Photo type
C: Low power AF	S: Low power switching
D: Power AF	U: Power switching
E: Tunnel diode	Y: Power diode
F: Low power HF	Z: Zener diode
L: Power HF	

TEST PROJECTS

TEMPERATURE CONTROLLED SOLDERING IRON STATION

Features

- ★ Temperature range 70°C to 450°C
- ★ Minimal noise emission
- ★ Negligible element leakage current
- ★ LED indication of heating

Applications

- ★ Precision soldering
- ★ Thermal fault location
- ★ Pyro-graphic pen

Because of the high price of adjustable temperature soldering irons, the home hobbyist is often resigned to having a 'standard issue' 17 to 25W mains powered iron. Although often adequate for most tasks, a fixed temperature iron suffers from several drawbacks. It may be too hot for delicate soldering operations involving thin PCB tracks, signal diodes and small polystyrene capacitors for example, or, at the other extreme, not powerful enough to solder something onto a piece of brass or tin-plate more than two inches square. The Soldering Station is ideal for hobbyists on a budget, who cannot afford the expensive ready built units. This kit version offers a considerable saving over commercially available units, and includes the 50W XSD iron as used with the TCSU-D Solder Station. The temperature of the iron can be adjusted over a range from 70°C to 450°C, making the unit very versatile and having more applications than just soldering, e.g., sealing plastic bags, a pyro-graphic pen, and even a controllable heat source for checking 'thermal faults' in semiconductors.

N.B. This project is designed to operate with the 50W XSD iron, and other irons of this type are NOT suitable for use with this project.

Optional Items

The following items not included in the kit, may also be required.

13A Plug Nylon	1	(RW67X)
2A Plug Fuse	1	(HQ31J)

LIVE WIRE DETECTOR

- ★ Gives Visual and Audible Warning of the Presence of 240V AC mains live
- ★ Does not Require wires under test to be connected to a load
- ★ Adjustable for sensitivity

The Maplin Live-Wire Detector will detect the presence of mains electricity whether there's a current flowing or not. It's better than neon screwdrivers or multimeters because you do not have to make contact with the wire – it signals the presence of mains better than metal detectors, because it only indicates if the wire is live; also, it's considerably cheaper.

It's the sort of device every household should own and anyone can use it because you don't have to actually touch dangerous points with any part of the Live-Wire Detector. Even if the wires are not connected to anything at one end, Live Wire will tell you if they're live. You could use it to find buried wires in dry plaster or plastic conduit or under floor or ceiling boards up to a distance of 2 inches (50mm).

Other uses of Live Wire include detecting breaks in cables or appliance leads. If a fuse blows, Live Wire will indicate mains present up to all the fuses, and mains presence on the wires leaving the fuses except the dead one. Before doing any work on your house wiring use Live Wire to make sure the circuit really is safe after pulling out what you think are the relevant fuses. Uses one PP3 battery.

Kit and Special Parts

A complete kit of all parts is available, excluding PP3 battery. The case and pcb are also available separately. Full construction details may be found in the Maplin Magazine Issue 48. PCB dimensions: 25 x 46mm.

Order Code	Type	Price each
LK63T	Live Wire Det Kit	£4.75
GB85G	Live Wire Detect PCB	60p
FT39N	Live Wire Det Case	£1.35

THE BEST OF SERVICE

MINI METAL DETECTOR

- ★ 25mm Search Range Dependent Upon Size of Object
- ★ Finds Partition Studs From Nailheads or Screws
- ★ Compliments the Live Wire Detector
- ★ Simple to Build and Use

If you have ever had to fit cupboards or shelving to partition walls then you will know how 'hit and miss' it can be when trying to find the studding. With this Mini-metal Detector you can detect the presence of ferrous or various non-ferrous metals within the search area. Along with the Live Wire Detector project, this is a must for DIY'ers of all ages.

Optional Item

The following item, not included in the kit, may also be required.

Battery PP3 9V	1	(FK58N)

TESTER FOR ELECTRICAL DOMESTIC APPLIANCES

- ★ Checks for Earthing Continuity between Appliance and Plug
- ★ Indicates when Live/Neutral Shorting to Appliance Case
- ★ Plug/Appliance Fuse Test
- ★ Low Battery Indicator

The Appliance Tester has a number of safety features which enables the security of the earthing system to be thoroughly checked. Two groups of appliances may be tested, Class 1 types include kettles, washing machines, electric fires and many more. The second

group of appliances are known as 'double insulated' and rely on having two separate sets of insulation. Appliances in this group include electric drills, vacuum cleaners, radios, tape recorders and so on. Fault conditions are indicated by the following: Green LED – no fault; Flashing Red LED – earth pin is not connected to the appliance case. This will occur if the appliance is double insulated; Steady Red LED – The Live or Neutral is shorting to the appliance case; Modulating Red LED – This occurs when all the above faults are on the appliance. The fuse test will illuminate the green LED when the fuse in the appliance is blown. UNDER NO CIRCUMSTANCES CONNECT THE APPLIANCE TESTER TO THE MAINS.

Optional Item

The following will be required to complete the project.

PP3 Battery	1	(FK62S)
-------------	---	---------

Kit and Special Parts

A complete kit excluding battery is available. The pcb and adhesive front panel are also available separately. Full construction details may be found in the Maplin Projects Book 25.

LOW RESISTANCE CONTINUITY TESTER

Features

- ★ Provides 3 ranges of resistance indication
- ★ Buzzer indicates continuity

Applications

- ★ Tracking faults
- ★ Continuity testing
- ★ Testing components

This compact, fast, easy to use, continuity tester is a combined low resistance and continuity tester. It is different from the more familiar type of instrument because it indicates, at a glance, one of three ranges in which the value of the resistance falls. A multicoloured LED is used as the visual indicator together with a continuity beep when the resistance is below 0.5Ω. The LED glows red to indicate very high 'leakage' resistance, and this range is ideal for testing insulation, capacitor dielectrics and even skin. When the resistance across the probes is around 5kΩ, or less, the LED appears to glow orange. This range is ideal for indicating dry joints, the resistance of switch contacts and connectors, semiconductor junctions etc. In the lower range 0.5Ω to 300Ω, the LED glows

green, and below 0.5Ω the buzzer simultaneously beeps, (the LED stays green). The continuity tester is powered by one 9V PP3 battery, and a push-to-make type switch ensures that the unit is not left on by accident.

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding the battery). The PCB and box label are also available separately. Full construction details may be found in Maplin Magazine Issue 53.
PCB dimensions: 89 x 25mm.

LOW-COST AUDIO WAVEFORM GENERATOR

Features

- ★ Four frequency ranges
- ★ Three output waveforms
- ★ Push-button switching
- ★ High and low outputs
- ★ Minimal wiring
- ★ Battery powered

Applications

- ★ Testing projects
- ★ Setting filters
- ★ Bandwidth testing

This simple, low-cost, easily constructed, audio waveform generator is ideal for the hobbyist working on a restricted budget. The generator can be used for a range of applications including test tape production; testing projects; gain and phase measurement; setting filters and bandwidth testing. All the components are mounted on one PCB, keeping internal wiring to a minimum. Long term reliability is excellent due to the use of electronic switching; just two push-to-make non-locking PCB mounted switches. Power is provided by two PP6 9V batteries, not included in the kit, which will provide several hours of continuous use. To give your generator a professional finish, an optional front panel is available.

Specification

Power supply input:	±6V to ±9V DC
Current @ ±9V:	±25mA
Standby current:	<±1μA
Waveforms:	Sine, Triangle, Square
Frequency ranges:	
10 to 100Hz:	9Hz to 105Hz
0.1 to 1kHz:	100Hz to 1.1kHz
1 to 10kHz:	895Hz to 10kHz
10 to 100kHz:	9.2kHz to 106kHz
Output amplitude full:	9V (Pk-to-Pk)
attenuated:	400mV (Pk-to-Pk)
Output impedance:	600Ω
Sinewave distortion:	
10Hz to 10kHz:	<1%
10kHz to 100kHz:	<4%
Triangle linearity:	
10Hz to 40kHz:	<0.1%
40kHz to 100kHz:	<1%
Square rise/fall time:	<2μs

Optional Items

The following items, not included in the kit, may also be required.

Metal Panel Box	1	(WY02C)
PP6 9V Battery	2	(FM03D)
Screw-Cap Phono Black	1	(HQ54J)
Cable Single Black	1	m(XR12N)
Red Croc Clip	1	(FM37S)
Black Croc Clip	1	(FK34M)
100μF 63V PC Elect	2	(FF12N)
Front Panel	1	(KW56L)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB and Front Panel are also available separately. Full construction details may be found in Maplin Project Book 48.

Order Code	Type	Price each
LP01B	Lo cost Wave Gen	£23.99
GE87U	Lo cost Wave Gen PCB	£5.49
KW56L	LC Gen Front Panel	£4.75

WIRING ALLOCATION TESTER

- ★ Electronic wire identifier
- ★ Independent sender and receiver
- ★ Up to 16 wires encoded simultaneously
- ★ Digital readout of wire number
- ★ Crystal controlled accuracy

This project is a handy test instrument which takes the hassle out of identifying and trouble-shooting, multi-way cable installation. The wiring allocation tester can be used over extremely long distances, with the aid of a transmitter and receiver. The transmitter sends different data pulses down each wire, the receiver on the other end converts the data depending on the pulse width of the signal and displays the wire number on an LCD display.

Both the receiver and transmitter are powered by a 9V PP3 battery, approximate operating time is 2000 and 400 hours respectively due to the low power components. Uses include, testing multi-core cables, and for telephone, intercom and alarm systems where long wires need to be interconnected.

Kit

A complete kit is available. Full construction details may be found in Maplin Magazine Issue 45.

Order Code	Type	Price each
LP61R	B1 Wire Tester	£49.99

AUDIO FREQUENCY SINE/SQUARE WAVE GENERATOR

Features

- ★ Excellent performance at low-cost
- ★ 3 frequency ranges
- ★ Low distortion
- ★ Single 9V DC power requirement
- ★ Precision attenuator

Applications

- ★ Testing and designing low-frequency circuits
- ★ Setting up audio systems
- ★ Producing test tapes
- ★ Scientific experiments

An audio frequency (AF) oscillator is an essential piece of test apparatus for the construction and servicing of audio products, such as Hi-Fi, PA and disco equipment. Because of the very low distortion sine wave output from this oscillator, it is suitable for use with even the most sophisticated Hi-Fi equipment. In conjunction with an oscilloscope, problems such as crossover distortion (incorrectly biased amplifier output stage), intermodulation by hum (power supply smoothing capacitors suspect) and the effects of clipping (overdriving) can all be investigated. This essential piece of test equipment can also be switched to produce square waves; these, being rich in harmonics, are useful for evaluating the frequency response and phase shift characteristics of an amplifier.

The unit may be used to make test tapes for the alignment or evaluation of tape recorders. In conjunction with a suitable amplifier, this unit could also be used to drive various transducers; this may be of benefit in certain types of scientific experiment – physics, structural engineering etc.

General Specification

Frequency Range:	17.5Hz to 22.8kHz in 3 ranges
Sine wave distortion (1kHz, maximum output):	<0.05%
Sine wave distortion (1kHz, 2/3 max. output):	<0.042%
Attenuator:	3 ranges; continuously variable
Sine wave output:	4V pk-to-pk
Square wave output:	2V pk-to-pk
Off-load current consumption:	8mA (square wave setting)

Optional Items

The following items, not included in the kit, may also be required.

Verobox 213	1	(LL10L)
PP6 9V Battery	1	(FM03D)
AC Adaptor Regulated	1	(YB23A)

Kit and Special Parts

A complete kit of parts (including the PCB, front panel and instruction leaflet) is available (excluding optional items). The PCB and front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 63.

LT25C	Sine/Square Gen Kit	£39.99
BB72P	Sine/Square Gen PCB	£6.39
BB73Q	Sine/Square Gen FP	£4.25

PROGRAMMABLE PULSE GENERATOR

Features

- ★ High accuracy
- ★ Microsecond and millisecond ranges
- ★ Easy programming (BCD switches)
- ★ Variable and fixed TTL outputs

Applications

- ★ Oscilloscope calibration
- ★ Timing
- ★ Test signals

Modern pulse generators have a wide variety of applications, from the operation of relays or counters, to the calibration of oscilloscopes. The pulse width is usually set by means of a potentiometer, in conjunction with several switched ranges. If the exact frequency needs to be known, it is necessary to monitor the output with a digital frequency meter.

This programmable pulse generator does not require monitoring, as the pulse width is set by using three programmable binary-coded decimal (BCD) switches, together with two non-overlapping ranges. Two outputs are provided, fixed and variable, and it is not recommended that both outputs are used simultaneously. The minimum load impedance is 50Ω, and the outputs should not be shorted, as possible damage to transistors can occur. The unit requires a 9V DC power supply capable of supplying 125mA. The accuracy of the unit depends entirely on the internal 1MHz oscillator, as the rest of the circuit does not cause drift.

General Specification

Power supply:	9V DC @ 125mA (max.)
Standby current:	25mA (approx.)
Pulse width ('µs' range):	0 to 999µs
Pulse width ('ms' range):	0 to 999ms
Rise time:	20ns (approx.)
Accuracy:	±1% (max.)
Reference oscillator frequency:	1MHz
Output voltage (variable output):	0 to 5V
Output current (variable output):	100mA
Output voltage (TTL output):	5V (fixed)
Output current (TTL output):	4mA (max.) into 1.5kΩ

Optional Items

The following items, not included in the kit, may also be required.

Verobox 202	1	(LL06G)
AC Adaptor Regulated	1	(YB23A)
Piezo Sounder	1	(FM59P)
5mm LED Red	1	(WL27E)
220Ω Min Res	1	(M220R)
BNC Round Skt 50Ω	2	(HH18U)

Kit and Special Parts

A complete kit of parts (including the PCB, front panel, and instruction leaflet) is available (excluding optional items). The PCB and front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 61.

SWEEP OSCILLATOR

- ★ Rapid Frequency Response Checks
- ★ Adjustable Sweep Speeds 0.2Hz to 10Hz
- ★ Interconnection To Oscilloscope Provides Instantaneous Assessment

The Maplin sweep oscillator provides a fast method of frequency response, assessment and measurement. Its wide range of sweep speeds allows for connection to an oscilloscope to provide an instantaneous display of frequency characteristics. The easy to assemble module is on one pcb providing easy construction.

Kit and Special Parts

A complete kit, excluding case, is available and the pcb is also available separately. PCB dimensions: 172 x 68mm.

LOW COST 10MHz COUNTER

- ★ Functions as frequency, period and unit counter
- ★ 8-digit display
- ★ Low cost design
- ★ 10/100/1000 cycle gate times

Most multi-function generators are quite expensive, but this three function counter has been designed to be low cost. It is designed around the InterSil ICM7216A, allowing measurements of frequency, periodic time or a totalising count. Maximum frequency is 10MHz in frequency and unit counter modes and 2MHz in periodic time mode. For period measurement there is a 0.1µs resolution whilst frequency modes have gating periods of 0.1, 1 or 10 seconds, and display to an accuracy of 0.1Hz. Four 0.56in high contrast, double digit displays are used, multiplexed at 500Hz with a 12.5% duty cycle. A low cost design, replacing three vital test bench facilities at a fraction of the price!

Specification	
Supply voltage:	10V to 15V
Average current @ 12V:	110mA
Input impedance (nominal):	1MΩ
Input signal amplitude	
10kHz to 1MHz:	30mV
1MHz to 5MHz:	45mV
5MHz to 10MHz:	90mV
Gate times:	0.1, 1, 10 seconds (frequency)
	10, 100, 1000 cycles (period)

Resolution:	0.1Hz (frequency)
	0.1µs (period)
Indicators:	8 seven-segment LEDs
	2 range LEDs
Timebase:	10MHz high-stability crystal

Optional Items

The following items, not included in the kit, may also be required.

Box M4005	1	(WY02C)
Red display filter	1	(FR34M)
Regulated adaptor	1	(YB23A)

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Project Book 45.

LP37S	10MHz Counter	£49.99	
GE55K	10MHz Display PCB	£4.29	

GENERAL PURPOSE 4 1/2 DIGIT COUNTER

A simple general purpose 4 1/2 digit counter with an LCD display and low power consumption. The module may be incorporated into a system requiring a display count readout. It can stand alone as an item of test equipment in the workshop or as a self contained instrument for a particular counting task. The basic module provides incremental counting only with automatic leading zero blanking, and three buffered inputs for COUNT, HOLD and RESET, which have a wide input operating range from 2V to 20V. With some modification to the pcb the module could be updated to form the essential basis of a period or frequency counter. The display provides a maximum count of 19999, and includes plus, minus and decimalpoint symbols which are brought out and

made available on the board. It is even possible to cascade more than one module. Requires a single, +5V stabilised supply.

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 55. PCB dimensions: 84 x 71mm.

DIGITAL CAPACITANCE METER

Testing capacitors properly is something that is beyond the capability of most multimeters and similar test equipment owned by the average amateur electronics enthusiast. A few simple checks are possible with an analogue multimeter, and some oscilloscopes include a component tester function which could be used to indicate a capacitor's value. For accurate measurement of capacitance, a specialised item of test equipment is really required, and here is a capacitance meter covering the values of <math><9.99\text{nF}</math> (100pF absolute minimum) to 99.9 μF in five switched ranges. The actual value of the component under test appears directly on a 3-digit 7-segment LED display, which includes an overflow indicator to avoid range errors. With a small selection of accurate reference components to hand, unknown or suspect values can be determined quite accurately. Battery powered and fully portable, the tester is a must for finding the value of all those capacitors you have never used because their printed value is obscure or long since been rubbed away.

Optional Items

The following items, not included in the kit, may also be required.

9 Volt Battery Holder	1 off	(HQ01B)
Type AA Batteries	6 off	(FK59P)

Kit and Special Parts

CMOS LOGIC PROBE

- ★ Designed for high CMOS levels
- ★ High, low, floating and pulse indicator
- ★ Over voltage protection
- ★ Low current consumption

This logic probe shows its output on a seven segment LED display, as a letter of the alphabet; H for High; L for Low; F for Floating; P for Pulsing. In this way, the logic state is instantly recognisable and totally unambiguous, unlike some commercial logic displays. The use of a special high efficiency display means that the total current consumption at a supply voltage of 15V is only 15mA and quite suited to battery operated circuits. In addition the probe is protected against over voltage inputs and reversed supply. As well as

detecting High and Low logic states, open circuit (floating input) and pulsing inputs are displayed. Pulse trains from around 1Hz are detected as a pulsing input, the upper limit is above that attainable in most common CMOS logic. The two pcb construction, and straightforward design make this probe highly competitive with those costing substantially more.

Kit and Special Parts

A complete kit is available. The pcbs, box and label are also available separately. Full construction details may be found in Maplin Project Book 46.

Order Code	Type	Price each

LOGIC IC TESTER

It is often necessary to check the operation of logic IC's, new or used. When dealing with simple gate circuits, this can be done without too much trouble. However, as the operating mode of the IC's becomes more complex, then checking out circuits, using simple tools such as switches and LEDs, becomes much more troublesome. The Logic IC Tester has been developed to bring about quick and simple testing of the operating mode of these standard devices. Nearly all devices in the standard TTL and CMOS families, up to 20 pin DIL package size, can be tested. IC's are simply inserted into the 'ZIF' test socket. This project is used in conjunction with an IBM PC-XT-AT or compatible clone, the Logic IC Tester card simply plugging into a vacant expansion slot. Software is supplied, ready-to-run on 5 $\frac{1}{4}$ inch floppy disk. Disk contains READ ME files for additional information. Software is compatible with all standard video cards i.e. Hercules, EGA, etc. The cost of the Logic IC Tester compares favourably with other commercial systems and finds many applications in servicing, test and other areas.

Kit and Module

A complete kit and a ready-built version are available. Full construction details for the kit may be found in Maplin Best of Projects Book 8.

Order Code	Type	Price each

AUDIO/VIDEO GENERATOR

- ★ Internal/External Audio/Video
- ★ Low Distortion Audio Oscillator
- ★ Crystal Controlled Video Timing
- ★ Sync and Blanking to CCIR Standard
- ★ RF and Audio/Video Outputs
- ★ 6MHz Sound Sub-carrier

When setting up video equipment, it helps enormously to have a suitable test pattern generator at hand to produce stable test patterns for evaluating picture contrast, convergence and distortion. This project uses a single integrated circuit to generate all the waveforms necessary to produce greyscale, crosshatch, dot, vertical and horizontal lines. The high accuracy line and field timing is derived from a quartz crystal which provides a very stable frequency reference. The output from the generator is black and white composite video at 1V peak to peak, but as not all TV's may have a video socket, a UHF modulator is included to provide an RF output on channel 36. This signal includes a 6 MHz sound sub-carrier for the sound channel which is modulated by a 1kHz tone. The unit can also receive external audio and video signals from a wide range of external sources if required.

Specification

Power supply: 10V to 15V DC
Supply current: 195mA @ 12V

Audio oscillator –
Waveform: Sine
Frequency: 1kHz $\pm 2\%$
Output level: 400mV rms into 1.5k Ω

loadDistortion: 0.015% THD

External audio –
Input level: 400mV rms
Input impedance: 5k Ω
Bandwidth $\pm 3\text{dB}$: 6Hz to 1.7MHz
 $\pm 6\text{dB}$: 4Hz to 2.1MHz

Output level: 1.7V rms into 600 Ω load
Distortion: 0.025% THD
Video generator: Black and white
CCIR timing: Line 15-625kHz (64 μs)
Field 50Hz (20ms)

Video patterns:
Vertical lines, 16 visible
Horizontal lines, 18 visible
Crosshatch, 1.4:1 aspect ratio
Dots
Greyscale, 8 steps
Blank raster
White raster

External video:
Bandwidth: 7MHz
Input level: 1V peak to peak
Input impedance: 1M Ω (no termination)
75 Ω (terminated)

Output level: 1V peak to peak into 75 Ω load

RF output: Channel 36 (591.5MHz)
Sound sub-carrier: 6MHz
Output impedance: 75 Ω
Output socket: Phono

Continued on next page.

Continued from previous page.

Kit and Special Parts

The kit of parts to build the Audio/Video Generator does not include case, AC adaptor, the stick-on panels or phono to coax video lead. Ready printed front and rear panels for the Audio/Video Generator are available separately as well as the double-sided plated-through pcb. Recommended case is YN33L. Full construction details may be found in Maplin Magazine Issue 37.

GE10L	Pat Gen PCB	£14.99

LOW-COST BENCH AMPLIFIER

NEW

Features

- ★ Excellent value
- ★ 500mW output power
- ★ Input bandwidth limiting for optimum efficiency
- ★ High input impedance
- ★ Protected against DC offsets and reverse-polarity power connection

Applications

- ★ Signal tracing during servicing
- ★ Monitoring audio signals

Based on the TDA820M IC, the full output power of the Bench Amp is a little over half a watt before distortion starts to become objectionable. 500mW is quite adequate for test-bench signal tracing and monitoring applications. The input impedance of the amplifier is approximately 400kΩ, which will prevent the circuit under test from being significantly loaded. There is a second-order filter on the input of the amplifier that limits its bandwidth from 50Hz to 15kHz (-6dB). This means that all of the amplifier power is used at frequencies that the speaker can comfortably reproduce.

Optional Items

The following items, not included in the kit, may also be required.

Verobox 215	1	(LQ08J)
AC Adaptor Unreg. 300mA	1	(XX09K)

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available (excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 64.

REUSABLE FUSE

1

Features

- ★ Audio and visual warning
- ★ Low holding value
- ★ Self-resetting
- ★ Easy to use

NEW

Applications

- ★ Protection for test circuits
- ★ Added protection for low-voltage circuits

The important feature of electronic fuses is that they are self-resetting. For this reason, they have a significant advantage over the traditional type for experimental work, especially for initial trials on newly constructed circuits. This project uses as a basis the MFR020 fuse which is the smallest one in the range stocked by Maplin, and suitable for currents up to 200mA. This will usually be sufficient for most purposes.

The Reusable Fuse is an 'intelligent' fuse which is fitted between any test circuit and the power supply. It guards against many problems that the experimenter or electronics constructor may come up against. Thus, if the current exceeds 200mA for any reason, a buzzer gives a short bleep and the LED flashes continuously. The current then falls to a very low holding value until the fault has been corrected.

The device is suitable for circuits needing a supply voltage between +4 and +18V DC and this covers the majority of circuits which the electronics enthusiast is likely to construct. The device must NOT be connected in the mains supply line - it is strictly for low-voltage use only.

Specification

Voltage:	+4 to +18V DC
Quiescent supply current:	7.50mA
Hold current:	200mA
Trip current:	300mA
Power dissipation tripped:	400mW
Nominal resistance:	2.67Ω

Optional Items

The following items, not included in the kit, may also be required.

Plastic Box Type T4	1	(KC93B)
Small Plastic Feet	4	(FE32K)
Solder Tags M3	4	(LR64U)
6.5V 150mA Lamp (See Text)	1	(BU00A)
6.5V 300mA Lamp (See Text)	1	(WL79L)
Lampholder (See Text)	1	(JX87U)

Kit and Special Parts

A complete kit of parts (including the PCB and front panel) is available (excluding optional items). The PCB and front panel are also available separately. Full construction details may be found in Maplin Magazine Issue 79.

Order Code	Type	Price each

GH79L	Re-Usable Fuse PCB	£2.49
KP67X	Re-Use Fuse F/Panel	£1.29

L200 ADJUSTABLE VOLTAGE/CURRENT REGULATOR

- ★ Adjustable output current
- ★ Adjustable output voltage
- ★ Short circuit protection
- ★ Thermal over-load protection

The L200 is a monolithic IC designed for programmable voltage and current regulation. Voltages of 2.85V to 36V, and currents up to 2A, can be achieved. Internal protection in the L200 cuts down the risk of possible damage. This comprises current limiting, power limiting, thermal shut-down and input over-voltage protection (up to 60V for 10ms). The unit can be used for different applications such as a battery charger, power supply or DC-DC converter.

Specification

Supply voltage:	40V max
Current @ 20V:	4.2mA
Voltage range:	2.85V to 36V
Temperature range:	-5°C to +150°C (max)
Line regulation:	60dB (nominal)
Dropout voltage:	2V (nominal)
	2.5V (max)

Reference voltage: 2.77V (nominal)

Note: As this board is intended as a 'building block' project it is not eligible for our 'Get-you-working' service.

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Projects Book 46.

Order Code	Type	Price each

THE BEST OF SERVICE

APPLIANCE RESIDUAL CURRENT DETECTOR

A Residual Current Detector (RCD) for individual appliances that may be plugged into a 13A mains wall socket or distribution block. The device provides added protection for you and your family against the risk of electric shock and is suitable for use with most electrical household appliances and power tools. Once set and in use, it compares the Live terminal current against the Neutral return current. If this shows a difference of more than 30mA, because of a leak either to the Earth terminal or elsewhere, then the device will trip open circuit, disconnecting and isolating both Live and Neutral terminals.

Particularly suitable for use with electric lawnmowers and hedge trimmers where cables are in danger of being cut. Can also be used for all appliances around the home, especially in the kitchen for kettles and irons where water is present. Also for use with an extension lead, you can make sure that the RCD is connected to the plug of the lead. The device plugs into a conventional 3-pin mains socket, and the appliance then plugs into the device. A trip indicator window will show red when reset, indicating that power is available via the device. When tripped the window shows white. A TEST button is included to make sure that the device operates correctly and should be tried before service every time it is used.

Dimensions of unit: 100 x 56 x 54mm deep not including pins.

AMAZING VALUE!
£19.99

RC4195 ±15V REGULATOR

- ★ Low component count
- ★ ±100mA output current
- ★ Short circuit protection
- ★ Thermal shutdown

The RC4195 is a dual-polarity 'tracking' regulator designed to provide balanced positive and negative 15V output voltages. The IC can supply currents of 100mA per supply rail.

Note: this is intended as a 'building block' project only, and is not eligible for our 'Get-You-Working' Service.

Kit and Special Parts

A complete kit of parts (including the PCB and instruction leaflet) is available. The PCB is also available separately. Full construction details may be found in Maplin Projects Book 50/62.

Order Code	Type	Price each
LP88V	4195 15V Regulator	£5.49
XX04E	15V Supply PCB	£1.28

LOW-COST GENERAL PURPOSE PSU

- ★ Variable and fixed outputs
- ★ Current up to 1A
- ★ Stable regulated supply
- ★ Single or split rail outputs
- ★ LED status indicators

This low-cost, general purpose, power supply is a relatively simple design that provides reliable performance and is ideal as a power supply for the home constructor. The supply makes available a variety of voltage combinations which include variable split supply, variable single supply, a fixed 5V and fixed 12V supply. A three position, switchable current limit is also provided and the unit is capable of supplying current levels up to 1A. The supply features full overload protection as it is based around the L200C monolithic IC regulator (YY74R), additionally the outputs are protected against unwanted positive transients.

HIGH QUALITY POWER SUPPLY

- ★ Audio grade transformer and capacitors
- ★ Multifuse™ protection
- ★ Fast recovery rectifier diodes
- ★ Regulated ±12V auxiliary supply

This project uses high grade components to produce a symmetrical ±50V rms at 2A. A stable tonal balance over the audio bandwidth, keeps second and third harmonic distortion to a minimum.

Fast switching rectifier diodes with fast recovery rates are used in conjunction with a high grade transformer to produce a better supply. Large 10000µF capacitors across the DC rails reduce the ripple to 350mV maximum. Protection for the circuit comes in the form of a re-usable fuse that has a high impedance when 'tripped'. The fuse protects the speakers from being overdriven and from large DC offsets due to failed components.

A ±15V preamplifier supply and ±17V for a speaker protection device has been included in the circuit, in addition to the main supply. The low voltage winding of the transformer is capable of delivering 160mA max. This project has been designed for the 150W MOSFET amp, but can be used for any amplifier requiring ±50V DC supply.

K2651 LCD PANEL METER

A digital meter is a lot easier to read and can be much more precise than its analogue equivalent. Moreover this panel meter is hardly more expensive than an analogue one, because no stabilised power supply is required; in many cases, an ordinary 9V battery suffices. As a result of the simple power supply and the compact construction of the meter itself, you will never have problems in finding a mounting place for it. You can easily combine it with an adaptor or a sensor for portable instruments, e.g. a precise thermometer. Measuring range: selectable -200mV to +200mV or -2V to +2V.

Can be used as a thermometer with a range from -50 to +150°C or -60 to +300°F, sensor not included. Power supply: 8 to 15V DC or 9V battery.

Order Code	Type	Price each
VE61R	Velleman Kit K2651	£18.99

THE MAPLIN MINILAB

Features

- ★ Wide variety of power supplies – ±5V, ±12V, -15V and +1.25 to 24V variable
- ★ Eight LED TTL-logic state indicator
- ★ Eight TTL-logic test outputs
- ★ 1Hz/1kHz TTL-level oscillator
- ★ Debounced TTL-level switch with complementary outputs

Applications

- ★ Education
- ★ Servicing analogue and digital equipment
- ★ Project development

The Minilab is a very useful piece of test equipment, for repairing and developing both digital and analogue circuits. Features of the Minilab include fixed DC voltage supplies at ±5V at 500mA continuous (1A peak), ±12V at 500mA continuous (1A peak), and -15V at 100mA continuous (200mA peak). There is also a variable positive DC voltage supply that can be adjusted to give between 1.25V and 24V; the current available from this supply depends upon the output voltage. However, the current drawn by the +5V and +12V rails combined must not exceed a total of 1A – the same comment applies for the ±5V and ±12V rails. Other features of the Minilab include eight TTL-level outputs, and eight TTL-level inputs – each fitted with an LED that indicates a logic 1 ('high') condition when illuminated. There is also a TTL-level oscillator switchable between approximately 1Hz and 1kHz and, a debounced TTL-level 'one-shot' switch with complementary (Q and \bar{Q}) outputs, which is very useful for single-stepping through digital circuits that use sequential logic. Debouncing is, as the name suggests, a 'cleaning up' of the switching action – the complementary outputs are always either high or low.

Specification

Power Supply Voltages: +5V*, +12V*, +1.25V to 24V Variable -5V*, +12V*, +15V (100mA continuous, 200mA peak)

VELLEMAN TEST PROJECTS

K2032 DIGITAL PANEL METER

This panel meter is an almost ideal replacement for the traditional moving coil type instrument, offering greater accuracy and stability, with a bright, highly visible display. This very compact unit can be built into a variety of housings, or even into existing equipment. The unit features positive and negative overload indication.

Display:	-99mV to +999mV (full scale)
Resolution:	1mV
Input impedance:	1MΩ
Supply voltage:	5V DC at 250mA
PCB dimensions:	65 x 35mm

Order Code	Type	Price each
VE60Q	Velleman Kit K2032	£22.99

K1823 1A POWER SUPPLY

This small power supply provides a stable voltage adjustable between 1.5 and 35V at 1A. Its LM317 floating regulator provides markedly better ripple and regulation characteristics than standard regulators. Current limiter and thermal overload protection are on the chip.

Input voltage:	28V AC max.
Line reg:	typ. 0.01%
Load reg:	typ. 0.1%
Ripple rejection:	80dB

Order Code	Type	Price each
VE58N	Velleman Kit K1823	£7.99

K7000 SIGNAL TRACER/INJECTOR

Features

- ★ Low cost
- ★ 1kHz sine wave oscillator (signal injector)
- ★ 40dB gain amplifier with 1W output (signal tracer)
- ★ Battery or mains operation

Applications

- ★ Servicing audio equipment
- ★ 'Hands-on' learning
- ★ Can be used as simple amplifier/oscillator

This low-cost signal tracer/injector is a very useful piece of test equipment that will help to quickly find faults in low-frequency analogue equipment. It will also be an invaluable addition to anyone's toolbox. The module can be used as a simple amplifier/oscillator, making it ideal for Morse Code practice, or just as a general-purpose amplifier. The signal tracer/injector will work from a standard 9V battery, and requires a small low impedance loudspeaker. Total power consumption under full load conditions is 170mA.

Optional Items

The following items, not included in the kit, may also be required.

9V PP3 Alkaline Battery	1	(FK67X)
PP3 Battery Clip	1	(HF27E)
Low-Z 778 Speaker	1	(YW53H)
PX-3 ABS Box	1	(YU54J)

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 54.

Order Code	Type	Price each
VE62S	Velleman Kit K7000	£10.99

K2570 UNIVERSAL POWER SUPPLY 5 TO 14V DC/1A

Suits all Velleman kits which need a regulated power supply between 5 and 14V DC rated at no more than 1A.

Input voltage:	7 to 16V AC, 1A (depending on the application)
Output:	5 to 14V DC stabilised, 1A max.
Ripple rejection:	typ. 78dB
Temperature stability:	0-0.25°C
Thermal overload protected.	

Order Code	Type	Price each
VE59P	Velleman Kit K2570	£7.99

K7202 30V 5A LABORATORY POWER SUPPLY

A laboratory power supply is indispensable for both the professional and amateur electronic engineer. This power supply is short-circuit protected and variable from 0 to 30V and from 0 to 5A. A connection is supplied for both voltage meter and ampere-meters, such as K7201. A front foil and matching buttons are supplied. The heatsink, case, and transformer are not included.

Output voltage variable from 0 to 30V
Fine control over 1V
Output current limit variable from 0 to 5A.
Fine tuning between 0 and 1A
LED (light emitting diode) – indication of current limitation
Output current: 4A continuous/5A peak
Short-circuit protected
Ripple maximum: 0.5mV rms
Input voltage 2 x 15V AC 5-3A
Connection for K7201 digital volt/ampere-meter

Order Code	Type	Price each
VF16S	A Velleman Kit K7202	£56.99

K7201 DOUBLE DIGITAL PANEL METER

This DPM was designed for use with our 30V 5A power supply K7202, but can easily be used in other applications. 3-digit LED (light emitting diode) readouts
Readout one from 0 to 99.9 (0.1 resolution) (e.g. for voltage). 0 to 9.99 (0.01 resolution) (e.g. for current).
Input sensitivity for full scale: 99.9mV
Automatic zero adjust
Input impedance: 10¹⁰ Ohm
Overload indication for current readout
Power supply 125 or 240 VAC
Dimensions: 170 x 70mm

Order Code	Type	Price each
VF15R	Velleman Kit K7201	£42.99

K3507 250W 12V DC TO MAINS AC INVERTER

A very compact 12V car battery to AC mains inverter that has a quartz controlled, 50Hz 'modified' sine wave output frequency. The inverter has a continuous power output of 250W and a peak output of 500W. Additional features include short circuit and overload protection, temperature compensation with full thermal protection, 12V polarity protection and low battery voltage indicator. It is possible to modify the converter to produce a 110V AC 60Hz output at 150W. The inverter is not suitable for driving capacitive loads. Supplied with heavy-duty battery clips, battery cable and 30A fuse.

Continuous output:	220V AC at 200W 210V AC at 250W
Maximum peak power output:	500W
Input voltage:	12V DC (25A approx.)
Size:	270 x 85 x 65mm
Weight:	1.4kg

Order Code	Type	Price each
VF35Q	B4 Velleman Kit K3507	£109.99

K3509 250W 24V DC TO MAINS INVERTER

A very compact 24V DC to 230V AC mains inverter having a quartz controlled 50Hz 'modified' sine wave output frequency. The inverter has a continuous power output of 250W but is capable of handling peak outputs of up to 500W. Other features include short circuit and overload protection, temperature protection of output transistors, 24V DC inverse polarity protection and low battery voltage protection – the unit will shut down if battery power becomes too weak. It is possible to modify the inverter to produce an output of 110V AC at 60Hz that will give 150W. The inverter is not suitable for capacitive loads.

Specification

Input voltage:	20V to 28V DC
Current consumption:	13A max.
No-load consumption:	0.2A
Output voltage:	230V AC at 26V DC input

Continuous output power:	250W
Peak output power:	500W
Output frequency:	50Hz
Efficiency:	80% max.
Battery protection:	±20V
Thermal limit:	90°C
Dimensions:	270 x 85 x 60mm
Weight:	1.4kg

Order Code	Type	Price each
VF42V	H Velleman Kit K3509	£118.99

K7200 30V 10A LABORATORY POWER SUPPLY

Features

- ★ Digital voltage meter: 3 digit 0.1V accuracy
- ★ Digital ampere meter: 3 digit 0.01A accuracy
- ★ Output voltage variable from 0V to +30V (fine adjustment over 1V)
- ★ Variable current limit from 0 to 10A
- ★ LED current limit indicator
- ★ Output short circuit protected
- ★ Maximum output ripple 0.5V rms
- ★ Cooling fan for prolonged usage at full power

Applications

- ★ Laboratories and test benches
- ★ Powering mobile radio equipment
- ★ Precision charging of batteries

This extremely flexible laboratory PSU is capable of supplying a well-regulated continuously variable DC voltage up to 30V at currents up to 8A continuous, 10A peak. As a result, there is a wide range of potential applications for the hobbyist, service department and educational establishments. It is ideal for testing prototypes, and with the current limiting function, suitable for the more sensitive circuits. In addition, it is suitable for the running of CB and amateur radio equipment, and even the charging of batteries. A digital voltage meter and a separate digital ammeter are supplied as indicators. With the built-in fan, the power supply is able to cater for long-term full loads. It is supplied complete with housing, buttons and transformers.

Specification

Output voltage:	0V to 30V variable with fine control over 1V
Output current:	8A continuous, 10A peak, variable limit from 0 to 10A, LED indication when limiting. Short-circuit protected
Maximum ripple:	0.5mV rms
Digital volt meter:	3-digit, 0.1V accuracy
Digital ammeter:	3-digit, 0.01A accuracy
Consumption:	300W maximum
Dimensions:	330 x 90 x 215mm

Optional Items

The following items, not included in the kit, may also be required.

Nylon Mains Plug 13A	1	(RW67X)
Fuse 3A	1	(HQ32K)
Insulating Boot for Fuseholder	1	(FT35Q)
Insulating Boot for Chassis plug	1	(JK66W)
Heat Transfer Compound	1 syringe	(FL79L)
BC Lampholder	1	(FQ02C)
Mains Lamp Bulb 40W	1	

Kit and Special Parts

A complete kit of parts (including the PCB) is available (excluding optional items). Full construction details may be found in Maplin Magazine Issue 58.

VIDEO PROJECTS

COLOUR & MONOCHROME CCD TV CAMERA MODULATOR

Features

- ★ Low-cost
- ★ Easy to build
- ★ Gives boost to upper video frequencies
- ★ Reverse polarity protection
- ★ On board regulator

Applications

- ★ View CCD pictures on a normal TV with no modification
- ★ CCTV security systems
- ★ Interface video only devices to TV sets

The video output from either the colour or black-and-white CCD camera modules (CJ75S and ZA35Q) cannot be connected directly to the majority of domestic TV sets. Some TVs have a direct video input socket (Peritel, or SCART), but many only have a UHF aerial input socket. This add-on project is based around a low cost UHF colour modulator which superimposes the video signals from the CCD camera, or a wide range of other units, onto a high frequency carrier wave. A pre-tuned modulator module (type UM1233) is used to simplify the construction and alignment of the project. The RF output from this modulator is suitable for connection to the aerial input of UK UHF TV sets.

There are two basic methods of using the CCD TV Modulator with your TV set. The first is to plug the RF output lead from the modulator into the UHF aerial socket on your TV and tune to channel 36 (591.5MHz), but this will inhibit the reception of all TV channels. The second method uses a coax 'Y' adaptor to combine the UHF signals from the modulator and the TV aerial, thus allowing signals from both to be received. However, to prevent any stray signals from the modulator reaching the TV aerial, an indoor aerial amplifier should be used in line with the aerial and the 'Y' adaptor to block the modulator signal and to compensate for the insertion loss of the 'Y' adaptor. The modulator can be tuned to a clear channel if it clashes with any TV stations or a VCR/satellite receiver. Ideal for home security applications.

Specification

DC power supply voltage:	10.5V to 17V
Supply current at 12V:	8mA
Video input level:	1V pk to pk
Video input impedance:	600Ω (no termination) 75Ω (R1 terminated)
RF TV output:	Channel 36 (591.5MHz)
Output socket:	Phono

Optional Items

The following items, not included in the kit, may also be required.

Unregulated 300mA Mains Adaptor	1	(XX09K)
Monochrome CCD Video Camera	1	(ZA35Q)

Colour CCD Camera	1	(CJ75S)
2-into-1 'Y' adaptor	1	(FS23A)

Kit and Special Parts

A complete kit of parts, including the PCB, is available (but excluding optional items). The PCB is also available separately. Full construction details may be found in Maplin Magazine Issue 75.

TV COLOUR BAR GENERATOR

Features

- ★ PAL composite video output
- ★ PAL UHF RF output
- ★ RF output channel adjustable
- ★ AC or DC supply
- ★ On-board regulator
- ★ Produces EBU, 100% and 75% colour bars
- ★ Easy to build

Applications

- ★ TV/Monitor servicing
- ★ Video servicing
- ★ Workshop and field use
- ★ TV outside broadcasts
- ★ TV studio

If you are involved in sending TV pictures up and down cables, or to or from VTRs and monitors, it is really necessary to be able to check that the pictures at the far end are being displayed correctly. Whilst the black and white test stripes that some VTRs give out in their 'test mode' are useful, it is not normally possible to properly adjust a TV or monitor to exactly the right settings to display correct colour pictures.

Similarly, when servicing TVs, monitors, VTRs or other video equipment, it is necessary to have a constant and stable colour test signal to accurately set up the various preset controls. Over the last decade, the previously familiar colour test card has vanished from our TV screens, much to the chagrin of TV and video engineers the length and breadth of the country.

The Colour Bar Generator produces a steady, standardised colour bar test signal, of the type and quality widely used by broadcasters for checking and setting up all manner of equipment which is required to work in colour. The colour bars test signal is also used in any situation where sources need to be switched or mixed, as with a studio vision mixer for example.

Important: this project also requires the Colour Encoder Kit (LM66W) to function, see ordering information below.

Specifications

Power supply voltage range:	15V to 25V AC or DC
Power supply current:	105mA at 15V DC
Colour system:	PAL
Colour bar standards:	100%, EBU and 75%
Composite video output:	1V pk to pk into 75Ω (EBU Bars)

UHF RF output: 591.5MHz (channel 36)
 UHF RF output connector: Phono
 PCB dimensions: 99 x 73 x 31mm
 Mounting Holes: M3 clear

Optional Items

The following items are not included in the kit but may also be required.

Rotary Switch 3-pole 4-Way	1	(FF75S)
Ribbon Cable 10-way	1m	(XR06G)
Miniature Coax	As req	(XR88V)
Wire 1.4A Red	As req	(BL07H)
Wire 1.4A Black	As Req	(BL00A)
Phono to Coax Cable	1	(FV90X)
Bolt M3 x 25mm	1 Pkt	(JY26D)
Bolt M3 x 6mm	1 Pkt	(JY21X)
Nut M3	1 Pkt	(JD61R)
Shakeproof Washer M3	1 Pkt	(BF44X)
Threaded Spacer M3 x 14mm	1 Pkt	(FG38R)
Clearance Spacer M3 x 1/8in.	1 Pkt	(FG32K)

Kit and Special Parts

A complete kit of parts, including the PCB, is available (excluding optional items). The PCB is also available separately. Both Colour Bar and Colour Encoder kits can be ordered together as special Order Code BE75S. Full instructions can be found in Magazine Issue 77 and also Projects Book 29.

Order Code	Type	Price each
LT50E	Colour Bar Generator	£22.99
BE75S	C/Bar & PAL Enc Kits	£49.98
GH67X	TV Colour Bar PCB	£3.49

VIDEO AMPLIFIER

An ELV Kit

- ★ High frequency and level controls
- ★ Four buffered outputs
- ★ Requires +12V DC supply

A video amplifier able to distribute one input video signal to four outputs, either monitors or video recorders. A level control allows the input signal strength to be varied whilst an HF booster improves the signal quality. The unit offers high input impedance, minimal phase shift and excellent bandwidth.

Specification

DC voltage:	12V
DC current:	17mA
Gain (max):	8dB (one output terminated 75Ω) 6dB (all outputs terminated 75Ω)
Frequency:	30Hz to 10MHz
Input impedance:	75Ω (nominal)
Output impedance:	75Ω (nominal)
HF Boost:	2dB
Gain boost:	2dB

Optional Items

The following items, not included in the kit, may also be required.

ABS Box MB2	1	(LH21X)
Pozi Screw M3 12mm	1 Pkt	(BF37S)
Steel Nut M3	2 Pkts	(JD61R)
Isoshake M3	1 Pkt	(BF44X)
Steel Washer M3	1 Pkt	(JD76H)
Phono Socket twin	1	(JK15R)
Phono Socket quad	1	(BW74R)
Power Socket 2.1mm	1	(JK09K)
Hook-up Wire (7/0.2) Black	1 Pkt	(BL00A)
Regulated 300mA PSU	1	(YB23A)

Kit and Special Parts

A complete kit of parts is available. Full construction details may be found in Maplin Magazine Issue 44. A ready assembled version is also available.

Order Code	Type	Price each
LP60Q	Video Pre-Amp	£12.99
AM22Y	Video Pre-Amp Assm	£22.99

INFRA-RED VIDEO LINK

Features

- ★ Range up to 100m
- ★ 12V operation
- ★ Replaces long video cables

Applications

- ★ Point-to-point video link
- ★ Security
- ★ General communications

The Infra-red Video Link allows the transmission of monochrome composite video over a distance of up to 100 metres. The system makes use of large fresnel lenses to focus the infra-red energy at much greater distances than are possible using standard techniques. The Infra-red Video Link has many varied applications, but is particularly suited to security, e.g. to link a security camera to a video monitor. This is particularly useful between two buildings on the same premises. In this case, the infra-red link obviates the need for long external cable runs. Clearly, the system is only practical where the buildings are close enough together, and there is a direct line-of-sight between the Transmitter and Receiver. Under typical environmental conditions, a range of up to 100m may be expected from the link; however, if the optical path is attenuated (for example, by fog or heavy rain), reduced range can be expected.

The quality of picture is not as good as that from a TV receiver, or a direct connection to a video monitor, due to the reduced bandwidth. However, it is sufficient for general-purpose surveillance applications where fine detail is less important.

Specification

Supply voltage:	12V to 14V DC
Supply current:	150mA Tx (quiescent @ 12V) 200mA Rx
Range:	Up to 100m.
Video bandwidth:	4MHz approx.
Peak infra-red	
Wavelength:	270mm approx.
Comp. video input:	1V Pk-to-Pk Tx
video output:	1V Pk-to-Pk Rx

Kit and Special Parts

The Transmitter and Receiver are available as two separate complete kits, excluding any power supply. The kits include a case, PCB, fresnel lens, suitable mounting bracket and construction details. Full construction details may be found in Maplin Magazine Issue 52 and Projects Book 51.

Tx PCB: 83 x 94mm.
 Rx PCB: 109 x 94mm.

Order Code	Type	Price each
LP59P	I/R Video Link Tx	£49.99
LP99H	I/R Video Link Rx	£44.99

GH02C	Video Link Rx PCB	£4.49
KW65V	Diode Bracket	£2.99

VIDEO BOX

- ★ Composite colour video in/out
- ★ Sync in/out
- ★ Fade to black
- ★ Normal or negative picture
- ★ DC video control
- ★ Picture synchronised switch functions

The main function of this excellent design is to provide the ability for fading the picture information down to a blank screen. This effect can be used as a 'fade-in' or 'fade-out' on dubbed recordings (e.g. camcorder to VCR), lending a more professional appearance to your video productions. The Video Box permits the reduction in amplitude of picture information, while maintaining the level of the timing signals used to synchronise it. To achieve this, the incoming composite video signal must be split up into its component parts, each of which undergo selective processing. Following this, these components are re-assembled, to produce the final composite output. An additional video inverter has been included, allowing the option for a negative picture to be displayed (useful for home video and long distance/satellite TV enthusiasts!). Apart from its own function as a video fader, the system timing signals have been made available, and as a result the finished unit can be used as a versatile building block for use within other video projects. Two additional video effects have been provided. When operated, the picture inverse switch produces a 'negative' image. The colour burst defeat switch should have the effect of turning off the colour circuits within your video equipment. This function is commonly referred to as the 'colour-killer' circuit, and when activated has the effect of producing a black-and-white picture.

It is strongly recommended that the Video Box is powered from a regulated power supply e.g. 12V

Continued on next page.

Continued from previous page.

300mA type (YB23A). Note: the Video Box is NOT reverse-polarity protected, so damage will occur to the circuit if the power supply connections are reversed.

Specification

DC power requirement:	+12V
DC current:	120mA
Video system:	Comp. PAL colour video; 1V Pk-to-Pk
Video gain:	0dB
Frequency bandwidth:	10MHz
Input impedance:	75Ω (nominal)
Output impedance:	75Ω (nominal)
Video control:	Fade to black External control
Synchronised switches:	Video normal or inverted Video defeat Colour burst defeat Output defeat
Composite sync:	On/off External input
Timing outputs: (All +12V CMOS)	Composite sync. Inverted composite sync. Vertical sync. Odd/even field index Video blanking Inverted video blanking Colour burst gate Inverted colour burst gate

Optional Items

The following items, not included in the kit, may also be required.

Min Slide Pot Lin 10kΩ	1	(JM85G)
Slide Knob B	1	(YG09K)
Knob K14B	1	(FK39N)
LED Clip 5mm	1	(YY40T)
SPST Ultra Min. Toggle	5	(FH97F)

VCR DUBBING AND CHANGEOVER KIT

A KTE Kit

- ★ Eliminates constantly changing leads
- ★ Amplifies the video signal
- ★ Connections for three video recorders

With video cameras becoming more and more popular, a need arises for a simple way of editing tapes. This high quality kit permits two video recorders to be permanently connected together via special video relays in the unit. A switch on the front panel transposes all the connections so that the playback machine becomes the recorder and the VCR that was recording becomes the playback machine. Thus tapes

can be edited backwards and forwards, completely eliminating the laborious task of transferring all the connections each time. The unit also incorporates an amplifier to eliminate losses in the video signal. A further feature is that a third VCR can be connected, which can record the final output to make the finished master. Connections are via scart sockets for all three machines (the plugs are not included in the kit), duplicated on 6-pin DIN sockets for machines 1 and 3 and for machine 2 on phono sockets for right and left audio and BNC socket for the video. NB Not S-VHS compatible.

Kit and Assembled Unit

A complete kit, including case and pcbs, is available. The plugs and interconnecting leads are not supplied and must be made up according to the particular connectors on your VCR's. Full construction details may be found in Maplin Magazine Issue 30. A ready assembled VCR dubbing and changeover unit is also available.

LM71N C2	Video Dubber Kit	£64.99
XM16S H2	Video Dubber Assmbld	£129.99

AUDIO AND VIDEO MODULATOR

2

- ★ No Alignment Equipment Required
- ★ Colour or Black & White
- ★ 6MHz Sound Carrier
- ★ Good Modulation Linearity

When using certain video equipment, an ordinary television receiver cannot be connected directly to the video signal. Some TV sets do have a direct video input socket (SCART), but most domestic sets only have an aerial input for reception of UHF TV stations. To solve this problem, a UHF modulator is required, which superimposes the video and audio signals onto a high frequency carrier wave. To simplify the construction and alignment of the project, a pre-tuned modulator module (UM1286) has been employed in the design. From the composite video and mono sound signals the modulator produces an RF output suitable for connection to the aerial input of a UK UHF TV set. The modulator is tuned to UHF channel 36.

Specification

Supply Voltage:	8V to 16V DC
Supply Current:	26mA at 8V 32mA at 12V 48mA at 16V

Audio Input Level:	1V p-p
Audio Input Impedance:	30kΩ
Video Input Level:	1V p-p
Video Input Impedance:	1MΩ (not terminated) 75Ω (terminated)
RF TV Output:	Channel 36 (591.5MHz)
Sound Sub-carrier:	6MHz
Video Bandwidth:	8MHz
Output Socket:	Phono

Optional Items

The following items, not included in the kit, may also be required.

AC Adaptor unreg. 300mA	1	(XX09K)
Preset Trimmer	1	(BR49D)
Video Lead 6	1	(FV90X)

Kit and Special Parts

A complete kit of parts excluding hardware is available. The hardware kit comprises case, top panel and all fastenings. The following items are also available separately, a high quality fibre-glass pcb, a pre-drilled case, and a self-adhesive top panel. Full construction details may be found in the Maplin Projects Book 30. A ready assembled version of LM78K (Modulator Kit) is also available. PCB dimensions: 102 x 57mm.

Order Code	Type	Price each

TEA2000 PAL COLOUR ENCODER

This colour encoder module is a building block used to convert digital signals into colour video. The module provides two outputs, direct video for a monitor and modulated RF for a domestic colour television. The heart of the unit is the TEA2000, which generates the necessary signals to provide a PAL or NTSC compatible video signal from the colour and timing inputs. The video output is buffered and a link is provided for video termination if required. The on board modulator is tuned to UHF channel 36.

5

Specification (PAL)

Power Supply Voltage:	+11.5V to +12.5V DC
Power Supply Current:	68mA at +12V
Regulator Output:	+5V, 90mA max
Video Output:	1V p-p (75Ω load)
UHF TV Output:	Channel 36 (591.5MHz)

AM24B	PAL Encoder Assm	£36.99

NICAM 728 DIGITAL STEREO TV SOUND SYSTEM

The technique for converting an analogue audio signal into a digital representation for reproduction is now well known in the form of the compact disc player. A similar process is applied to the audio channel of a television signal to produce the high quality stereo sound track that is NICAM 728 – 'NICAM' being an acronym of 'Near Instantaneous Companded Audio Multiplex', and '728' referring to the transmitted data rate of 728k-bits per second. This is going to be the standard for the future of quality TV sound, comparable with compact discs and provides TV sound quality on a par with the kind of picture quality now possible (and not before time). However, if you don't feel ready as yet to go all the way and 'splash-out' on a complete NICAM TV receiver, and there's nothing wrong with your present set in all other respects, then these projects are for you. Independent NICAM compatible TV tuner and NICAM decoder require no modification to your existing TV set, and will be able to use your hi-fi system to the full.

Outside the UK the system is only suitable for use on PAL I systems with NICAM carrier at 6.552MHz.

NICAM 728 Stereo Decoder

- ★ **NICAM mode indicators**
- ★ **Optional external audio input while NICAM is not present**
- ★ **Automatic mono/stereo/bilingual audio switching**
- ★ **Operates from single 12V supply**

To operate a working system using the Toshiba NICAM 728 chip set, an external i.f. input is needed with mono audio inputs, for when NICAM is not active. The output comprises of a left and right channel for a stereo amplifier. 'Reception mode' indicators include red/green NICAM/F.M. LED indicators, with NICAM/F.M. manual override (F.M. = external source, or 'normal' TV mono sound). NICAM active stereo/mono indicators show the mode of operation according to the transmitted 'application control word' and the position of mode selector switches, if used. The module can be made to output either 'M1' or 'M2' only (independent mono sound signals transmitted in alternate picture frames) to outputs L and R as twin channel mono, or both simultaneously ('M1' to L, 'M2' to R). Also includes the NICAM option to receive one mono signal for two channels with a second transparent data channel for other uses. The Maplin Magazine Issue 34 expands on these in greater detail.

TELEPHONE WITH 20 DIRECT MEMORIES

Audioline

This telephone features 20 direct touch memories and pause facility for PABX use, and has full approval for use on the Mercury phone system. Compatible with new BT star services.

Specification

Power supply input voltage:	11 to 13V DC
Supply current at 12V:	157mA (stereo) 190mA (mono)
Input frequency:	6.552MHz
Sensitivity:	100µV
Impedance:	1kΩ at 6.552MHz
External Audio Input frequency:	100mV RMS
Input Impedance:	10kΩ at 1kHz (5kΩ mono)
Audio output level:	1V r.m.s. into 1kΩ
Distortion:	0.01% THD
Signal to noise ratio:	70dB
Dimensions:	142 x 102 x 25mm
Weight:	143g

Optional Items

The following items, not included in the kit, may also be required.

Sub-Min Toggle A	4	(FH00A)
2k2	2	(M2K2)
1N4148	2	(QL80B)
Trim Tool Pot Core Type	1	(BR51F)
Miniature Coax	1m	(XR88V)
Hook-Up 7/0.2 wire 10M Bk	1 Pk	(BL00A)
Hook-Up 7/0.2 wire 10M Red	1 Pk	(BL07H)

Kit and Special Parts

A complete kit is available, the pcb is also available separately. Full construction details may be found in the Maplin Magazine Issue 35.

Order Code	Type	Price each
LP02C	A1 Decoder Kit	£69.95
GE22Y	Decoder PCB	£6.99

NICAM Stereo Tuner Accessory Kit

Features

- ★ **Power input protection**
- ★ **Voltage synthesis tuning system**
- ★ **SCART, DIN and Phono sockets**
- ★ **Push-button function switches**
- ★ **LED indicators**
- ★ **Superbly finished case**
- ★ **Expandable to include Infra-red remote control**

Specification

Power supply input voltage:	11V to 13V
Current at 12V:	130mA 530mA with NICAM tuner and decoder
Input Protection (crowbar)	
Over-voltage:	+15V
Reverse polarity:	-0.6V
Fuse rating:	1A
Tuning System (M491B)	
Station memory:	16 Channel
Memory type:	Non volatile (Ten year data retention)
Memory supply voltage:	+25V (µA78S40 switching regulator)
Channel display:	7 Segment LED
Voltage synthesiser:	13 Bits (8192 steps)
Clock oscillator:	455KHz
Keyboard matrix:	Channel, Tuning Up/Down and Store
Remote control input:	PCM signals
Push-button switching:	Power ON/OFF Audio tune NICAM/FM UK/Continental M1+M2 M1 M2
Sockets	
Stereo audio output:	SCART, DIN and Phono
Composite video output:	SCART and Phono
DC power input:	2.5mm

Designed for use with the Maplin NICAM tuner and decoder projects. Three circuit boards are used to link-up and provide the optimum working environment for the tuner and decoder modules. The socket PCB has a selection of audio/video connections for SCART, DIN and Phono with the DC entering the power input protection circuit via a 2.5mm socket. On the display

Continued on next page.

Continued from previous page.

PCB a voltage synthesis tuning system with a non volatile 16 channel memory supports the tuner board. In addition to the function switches on the switch PCB a voltage generator IC is used to provide the +25V read and write memory supply.

The circuit boards can be housed in a specially manufactured metal case which is available drilled, cut and painted to a very high standard. To power the unit a regulated 12V DC mains adaptor capable of providing up to 600mA must be used (e.g. stock code YZ21X). With its variety of sockets the tuner system can be connected to a wide range of home entertainment equipment and the SCART connector is compatible with most modern single, or twin speaker (stereo) televisions.

Kit and Special Parts

A complete kit is available. The pcbs, bracket and NICAM tuner case are also available separately. Full construction details may be found in Maplin Magazine Issues 38 and 39.

Order Code	Type	Price each
LP18U	H4 NICAM Accessory Kit	£89.99
XM81C	B2 NICAM TV Tuner Case	£19.99
JR72P	NICAM Display Bkt	£2.49

The 'Conventional' (mono) audio sound I.F. is switchable for the U.K. standard of 6MHz or the European standard of 5.5MHz. This is in addition to and parallel with the special NICAM I.F. channel.

Specification

Power supply input voltage range:	11 to 13V DC
Supply current at 12V:	210mA
U.H.F. stages	
Tuning range:	470 to 860MHz (Channels E21 to E69)
Aerial input:	75Ω phono
Gain:	40dB
Noise level:	10dB max.
AGC range:	30dB
AFC range:	±120kHz
I.F. components	
Vision carrier:	39-500MHz
Colour carrier:	35-070MHz
Continental standard F.M. sound:	34-000MHz
U.K. standard F.M. sound:	33-500MHz
NICAM stereo sound:	32-948MHz

Video

Output format:	Composite
Output level:	1V Pk to Pk
Output load:	75Ω
Bandwidth:	7.5MHz
Signal to noise ratio:	58dB

F.M. (mono) sound

Continental standard carrier freq.	5.5MHz
U.K. standard carrier freq.	6.0MHz
Output format:	audio
Output level:	1V Pk to Pk at 50kHz deviation
Output load:	1kΩ
Bandwidth:	10Hz to 15kHz
Distortion:	0.1% T.H.D.
Signal to noise ratio:	60dB

NICAM stereo

Carrier freq.	6.552MHz
Output format:	6.552MHz I.F. for decoder
Output level:	300mV Pk to Pk
Output load:	1kΩ

General

PCB composition:	Double-sided plated-through glass fibre
Dimensions :	142 x 102 x 45mm
Weight:	160g

Optional Items

The following items, not included in the kit, may be required according to installation and use:

Video output chassis connectors:		
1 BNC round	(FE31J),	or
1 BNC square	(YW00A),	or
1 Phono	(YW06G),	or
1 SCART socket	(FV89W)	
SPDT switches:		
1-3 Ultra min. toggle	(FH98G),	or
1-3 Sub-min. toggle A	(FH00A),	or
1-3 Sub-min. slide	(FF77J),	or
1-3 Pushlock	(FH41U),	or
1-3 Latchswitch 2-pole	(FH67X)	

Or any combinations of these. One of these switches fulfils the 'AGC defeat' function and TV electronics enthusiasts upgrading an existing chassis can use a microswitch for this operated by a door concealing the tuning presets for station selectors.

Kit and Special Parts

A complete kit is available and the pcb is also available separately. Full construction details may be found in Maplin Magazine Issue 36.

Order Code	Type	Price each
LP09K	UHF TV Tuner Kit	£54.99
GE35Q	UHF TV Tuner PCB	£9.49

NICAM Infra-red Transmitter and Receiver

Designed for use with the Maplin NICAM stereo TV tuner unit. The receiver board links-up with the display board providing easy installation. The receiver unit has two sections for IR decoding and a stereo volume control. The remote control uses the M708L chip, designed in conjunction with the M491B on the display board, and requires few components to correct the IR data. The hand-held transmitter uses direct (no carrier) transmissions reducing the risk of interfering with other remote devices.

Specification
Infra-red Transmitter

Commands:	TV channel 1 to 16 TV channel +/- Volume +/- Sound mute On/Off Standby On/Off
Transmission mode:	Flash
Transmit source:	Two high power IR emitting diodes
Peak wavelength:	940nm
Clock frequency:	455kHz
Power supply:	Two AA size alkaline cells
DC voltage:	3V
Transmit current:	Average 1.65mA Peak 1.1A

Infra-red Receiver

Receiver detector:	High speed photodiode
Peak response:	950nm
Effective range:	4.5m
Gain:	70dB
Output data:	Negative pulses
DC power supply:	+5V at 1mA

Stereo Volume Control

Frequency response:	5Hz to 150kHz (at -3dB)
Output level:	1V RMS into 1kΩ
Gain:	0dB
Tracking:	0.3dB
Signal to noise:	68dB
Distortion:	0.2% THD
DC voltage:	+12V at 16mA

Optional Items

The following items, not included in the kit, may also be required.

Alkaline AA Batteries	2	(FK64U)
IR Photodiode (see text)	1	(YH71N)

**UHF TV Tuner Kit
NICAM Broadcast Compatible**

- ★ Parallel vision and sound I.F.
- ★ TV video and F.M. mono outputs
- ★ NICAM carrier output
- ★ F.M. squelch control for off-station muting
- ★ Dual standard F.M. sound demodulation
- ★ NICAM S.A.W. filter
- ★ Operates from single 12V supply

This superb TV tuner can be used to provide superior quality video and audio signals for a high grade colour monitor or TV with provision for an external video input. The tuner has many features, not least a video signal bandwidth of 7.5MHz, which may be a considerable improvement over some other tuners. It possesses A.G.C. (automatic gain control), A.F.C. (automatic frequency control), and F.M. audio squelch, driven by the output of noise from the video I.F. detector directly in the absence of a valid TV signal, thus neatly preventing that aggravating 'roaring' noise whilst tuning between stations. The 'front-end' is a ready built commercial module requiring no alignment and using the latest surface mount component technology. Aerial input is as standard via 75Ω coax. feeder from a TV antenna. Parallel vision and sound I.F. are produced using an S.A.W. (surface acoustic wave) filter as is usual in a modern TV receiver, but in this case having a response peak to extract the NICAM I.F. carrier frequency at its best. Tuning is accomplished by the absolute minimum requirement of an on-board rotary control, but the tuning of the front-end module is voltage controlled and so lends itself to all manner of additional alternative tuning systems.

To build the experimental IR Detector mentioned in the construction details the following items will also be required.

4k7	1	(M4K7)
3M3	1	(M3M3)
47k	2	(M47K)
150R	1	(M150R)
10k	1	(M10K)
680R	1	(M680R)
100k	1	(M100K)
100nF Polylayer	2	(WW41U)
1µF 63V Minelect	1	(YY31J)
10µF 16V Minelect	1	(YY34M)
IR Photodiode	1	(YH71N)
Mini LED Red	1	(WL32K)
BC549	2	(QQ15R)
BC559	1	(QQ18U)

Kit and Special Parts

A complete kit is available, excluding batteries and photodiodes, however, the photodiode is included in kit LP18U. Full construction details may be found in Maplin Magazine Issue 41.

Tx PCB: 54 x 115mm.

Rx PCB: 65 x 60mm.

Order Code	Type	Price each
LP20W	NICAM IR Controller	£34.99
ZA00A	Nicam IR Tx Case	£5.99

UHF TV TUNERHEAD MODULE

Philips

The U943 is a high quality varicap tuned TV receiver front-end having three tuned circuits, three stages of amplification including post-I.F. amplifier, and covering the UHF TV channels E21 to E69 (471.25 to 855.25MHz picture carrier frequency). Aerial input is via a phono socket, normally this is linked to a standard 75Ω coaxial chassis socket with coaxial feeder. Output is TV I.F. comprising luminance, chrominance, F.M. sound I.F. and NICAM sound I.F. if present. This output should be processed with an S.A.W. (Surface Acoustic Wave) filter to separate the sound and vision signals. The module is designed for vertical mounting onto a PCB and is provided with five PCB pins and can securing tags at each end.

Specification

Supply voltage:	+12V DC ±10%
Current consumption:	57mA max.
R.F. input impedance:	75Ω
R.F. bandwidth:	20MHz typ.
Voltage gain into I.F. load of 1200Ω/15pF:	40 – 42dB max., E21 – E69
A.G.C. level for gain of 10dB:	+1V min.
A.G.C. voltage range:	+0.85 to 9.2V ±0.5V
A.G.C. current max:	15µA max.
Tunable R.F. range:	471.25MHz (E21) to 855.25MHz (E69)
Tuning voltage range:	+1 to 28V
Tune slope characteristic:	4MHz/V
Current drawn from tuning circuit:	0.6µA max.
I.F. components – Vision:	39.5MHz

Sound:	35.5MHz		
Bandwidth:	9MHz		
Output impedance:	100Ω		
I.F. rejection:	80dB min.		
Image rejection:	60dB typ.		
Cross modulation:	1% typ.		
Dimensions of screening can:	length 66.2mm, height 38mm (not including PCB pins), width 20.1mm		
Length of pins:	5mm.		
With input phono socket (A) at top lefthand side, lead connections are:			
5	A.G.C. input	16	Earth
6	Supply +V	17	I.F. output
11	Tuning voltage		

The case must be connected to ground

Order Code	Type	Price each
JR59P	UHF Tuner Module 943	£16.99

UHF MODULATORS

From composite video, these modulators produce an RF output suitable for connection to the aerial input of a standard UK UHF TV set. The output is preset to approximately channel 36.

They have a wide linear bandwidth to cater for the chroma sub-carrier from a source video generator, and UM1286 has an integral RF oscillator for 6MHz sound carrier. The output on both modules is via a phono socket.

Specification

	UM1233	UM1286
Supply Voltage	5V	5V
Supply Current	6mA	9mA
Bandwidth	8MHz	8MHz
Sound Sub-carrier	—	6MHz
Size (mm)	43x30x18.5	71x37x20

The lead connections are as follows:

	UM1233	UM1286
A	Supply +V	Fine tune
B	Video input	Audio input
C	None	Supply +V
D	None	Video input

The case must be connected to ground.

Order Code	Type	Price each
FT30H	UHF Modulator UM1233	£7.99
BK66W	UM1286 Modulator	£12.99

TVFX MODULE

- ★ Displays full colour
- ★ Video and TV outputs
- ★ Internal/external triggering

3

A 'partylite' for your TV, the TVFX is a sound to light system with patterned or single coloured screens. The circuit uses the TEA2000, SAA1043 and an array of logic circuits to produce each screen.

TVFX can be connected in two ways, either from the preamp to power amp link or from the power amp to speakers link. A switch for low and high sensitivity and a variable sensitivity control on the front panel allows different power levels to be selected. In addition to an audio input, internal triggering with a variable clock speed can change the screen patterns. Outputs to PAL TVs and videos display 64 different patterns, 8 plain screens and 8 different colours.

Specification

Supply voltage:	12V
Supply current:	100mA
Power:	1.2W

RF (UHF)

Carrier output:	Channel 36, 591.5MHz
-----------------	----------------------

Video (composite)

Output level:	1V peak to peak
Impedance:	75Ω

Audio

Input attenuator:	-30dB (Low sensitivity)
Input impedance:	140kΩ (high) 1.2MΩ (low)
Filter response:	15Hz to 90Hz at -6dB
Trigger sensitivity:	100mV (high) max sensitivity 1.5V (low) max sensitivity

Pattern control

Clock speed:	Max 12 screens per second Min 1 screen every 3 seconds
Audio trigger:	Max 9 screens per second

Optional Items

The following items, not included in the kit, may also be required.

Case 3502	1	(YN33L)
Self-Tapping screw no. 4 x 1/4"	1 Pk	(FE68Y)
TVFX Front Panel	1	(JR68Y)
TVFX Back Panel	1	(JR69A)
AC Adaptor Regulated	1	(YB23A)
Phono/Coaxplg Vid Lead	1	(FV90X)

Kit and Special Parts

A complete kit is available. The main pcb, LED pcb, front and back panels are also available separately. Full construction details may be found in Maplin Magazine Issue 42.

Main PCB: 162 x 125mm
LED PCB: 51x12.7mm

Order Code	Type	Price each
LP00A	TVFX Kit	£59.99
GE00A	TVFX Main PCB	£14.99
GE01B	TVFX LED PCB	£2.49
JR68Y	TVFX Front Panel	£3.25
JR69A	TVFX Rear Panel	£2.99

Electronics' Magazine Binder

A binder that holds twelve issues of 'Electronics - The Maplin Magazine'. The binder is made in hard wearing, laminated art board that not only looks good on your bookshelf or workshop desk, but is also a great way to build up an 'Electronics' reference library. Now you can keep all your copies of 'Electronics' together and on hand for whenever you need that extra piece of information, or as an archive of all your favourite articles. Gloss black with red and white lettering. Size 320 x 210 x 70mm.

Order Code	Type	Price each
XH99H	Magazine Binder	£5.99

Magazine Index

A comprehensive index to Electronics - The Maplin Magazine: it covers every issue from December 1981 to October 1994. Included are details of every article, series and project published during that period. Conveniently arranged, sectionally and alphabetically, it'll take minutes instead of hours to find the exact issue number and page you need. You'll be able to rediscover a wealth of information you never knew you had! A list of all of the Corrigenda published is also included so you will be able to find details of changes or amendments. You'll find the index an invaluable addition to the issues of Electronics that you have. If your collection is incomplete, many issues are still available as back issues.

Order Code	Type	Price each
XU87U	Magazine Index	80p NV

BACK ISSUES AND PROJECT FINDER

Looking for that illusive project? Now it's easy to find, just look down the project list and check out the cross reference telling you which Magazine, Projects Book, etc. contains the project. The order codes for the books are listed at the end of this csection. Magazine back issues are available whilst stocks last, then the projects only from the issues are reprinted in the form of Projects Books. As these Projects Books go out of print, Best of Projects Books are compiled to replace them. The key below gives cross-reference designations. Read on and make your selection:

PROFESSIONAL BENCH POWER SUPPLIES from **INSTEK**

GW08J

GW09K

GW10L

GW11M

GW12N

GW13P

GW14Q

GW16S

GW15R

A superb range of Professional Bench Power Supplies from Instek. All models have excellent load and line regulation with very low ripple and noise figures.

There are nine high-quality models in the range, from a single 30V, 3A unit to a dual, voltage tracking, 32V, 2.5A unit with a fixed 5V, 3A output and two built-in digital meters.

All models are capable of operating in constant current mode, as well as constant voltage, the current being set by a rotary front panel control. A front panel LED indicator shows when the unit is operating in constant current mode. The four dual supply units all feature a voltage tracking mode and have a built-in TTL logic compatible 5V, 3A fixed supply. In voltage tracking mode the dual supplies can produce two equal, positive and negative supplies with a central commoned rail, operated from a single rotary control.

GW08J 60V, 1A **H** £139.99

GW09K 30V, 3A **H** £149.99

GW10L 30V, 3A **H** £199.99

GW11M Dual 30V, 3A **H** £299.99

GW12N Dual 32V, 2.5A **H** £349.99

GW13P Dual 60V, 3A **H** £479.99

GW14Q 30V, 6A **H** £279.99

GW16S 30V, 10A **H** £429.99

GW15R Dual 30V, 6A **H** £479.99

All models feature an automatic power saving circuit which reduces dissipation by selecting a lower ratio transformer output if the output voltage of the unit is below a predetermined level.

All prices include VAT. **H** indicates an additional carriage charge, see end of catalogue for details.

Build Your Own Personal Computer

NEW

It has never been easier to build your own powerful and professional looking Personal Computer using our step-by-step instruction booklet. The guide helps you to design your own computer using the parts shown in this section, and no special tools or computer knowledge is needed to assemble and set up the machine. With just the guide and a couple of screwdrivers, you can build your new computer to your own specification in just a few hours, as simply as putting together flat-pack furniture from your local DIY store. You can choose any configuration ranging from a basic 386 SX up to a Multimedia 486 DX machine.

The comprehensively illustrated instruction guide shows you how to choose the motherboard with the processor type you require, the size of memory and the support ancillaries, such as video card, I/O and controller cards and hard and floppy disk drives; the size and style of case to enclose it all in, and then how to actually install the various items into the case and connect them together correctly. In addition you will have the technical back up and experience of Maplin, so if you do have any problems, or are at all uncertain about making the right choices after reading our booklet, you only need to call one of our computer helpline staff on (0702) 552911 (will change to (01702) 552911 as from Sunday 16th April 1995). We will help you to make the best choices for a system that will meet your needs now and in the future, either at home or in the office.

Order Code	Type	Price each
XL73Q	Computer Guide	£1.99 NV

INDIVIDUAL HARDWARE MODULES

System Motherboards

All boards are supplied with licensed AMI BIOS ROM and manufacturer's handbook, memory is expandable using 256K, 1M or 4M SIMMs up to 16 or 32Mb. Some of the motherboard options have a secondary write back cache of either 64K expandable to 128K or 256K. This has an access time of 20ns and reduces bottlenecks between CPU and main memory.

Please note that all motherboards are supplied complete with processor (except ZG13P) but will require the addition of SIMM memory modules. These should be 1M x 9 or 4M x 9 SIMMS and will need to be fitted in pairs or fours, depending on the bank size of the motherboard concerned. None of our motherboards will operate with just a single SIMM module e.g. a 4M configuration will require four 1M x 9 SIMMs NOT one 4M x 9 SIMM module.

New motherboards will require the CMOS set-up program to be run before they will allow normal operation - the board will need to be configured to accept all connected peripherals such as hard drive, floppy drives, monitor etc. Most motherboards have a number of adjustable links which may be used to set processor type and speed, cache memory configurations etc. Please consult the motherboard booklet if you wish to alter configuration or if the board does not seem to function as expected (link changes are not normally required when adding SIMMS).

Code	CPU	Speed	Cache
ZG05F	386SX	33MHz	-
ZG07H	386DX	40MHz	64 to 128K
AJ67X	486SX	25MHz	-
AJ68Y	486SX	25MHz	256K
AJ69A	486DX	33MHz	256K
AJ70M	486DX	50MHz	256K

Code	CPU	Speed	Cache
AJ71N	486DXII	50MHz	256K
AJ76H	486DXII	66MHz	256K

In addition, ZG13P is an upgradable motherboard for 386DX, 486DX and 486DXII processors, providing a low-cost upgrade path by merely replacing the microprocessor (a different clock crystal may also be required).

Order Code	Type	Price each
ZG05F	A1 386SX 33MHz MBoard	£74.99
ZG07H	A1 386DX 40MHz MBoard	£119.99
AJ67X	A 486SX 25MHz M/Board	£175.00
AJ68Y	A 486SX 25MHz + Cache	£199.99
AJ69A	A 486DX 33MHz M/Board	£349.99
AJ70M	A 486DX 50MHz M/Board	£399.99
AJ71N	A 486DX2 50MHz M/Board	£364.99
AJ76H	A 486DX2 66MHz M/Board	£429.99
ZG13P	A1 Upgradable MBoard	£134.99

IMPORTANT NOTE

The prices of the products in this section were correct as of September 1994. However, owing to the volatile nature of the computer industry, we cannot guarantee these prices during the lifetime of this catalogue. We therefore urge you to telephone the sales line for the latest pricing information.

VESA Standard Motherboard and Computer Cards

Modern systems make it possible to develop a very high performance personal computer system because of the high-frequency of operation of modern microprocessors. Although memory designs can cope with the high-speed accesses, the currently standard peripherals are still very slow due to the limited speed of ISA buses.

A new system has now been developed which enables high-speed peripheral controllers to be used to achieve maximum throughput. On a standard IBM/AT or compatible, ISA bus speed is limited to 8MHz, requiring a 250ns wait state on the bus for each peripheral access by the CPU. But with high-speed systems this access does not actually take place; some peripheral controllers are able to complete the cycle in much less time. By putting these controllers on to the CPU local bus, a tremendous performance improvement can be achieved.

VESA is a local bus standard for the hardware interface of peripherals connected directly to a processor local bus. A uniform interface, architecture, timing, electrical and physical specification allows VESA based products from various sources to be completely interchangeable.

VESA Motherboard

The OPTi VESA 486 system main board is a 'half size', fully IBM AT compatible PC motherboard, conforming to latest VESA specifications to allow expansion cards to run using a full 32-bits wide bus at CPU clock speed. As well as having VESA local bus slots, it also features 16 and 8-bit slots, internal clock generator, OPTi chip set, genuine AMI-BIOS, 256K cache and room for up to 32Mb of SIMMs. The board is designed for running a 486 system at 16, 20, 25 and 33MHz, or CYRIX 486DLC at 33 and 40MHz. The board also needs a suitable 486 microprocessor, SIMMs and peripheral cards selected from the VESA range.

Order Code	Type	Price each
AJ72P	VESA Motherboard	£129.99

VESA Local Bus Graphics Card

To make full use of any graphic intensive applications, this high-speed card is a must for any VESA system. Based around the Cirrus Logic AVGA3 (Advanced VGA), it features 1Mb of RAM which can be upgraded to 2Mb, and is capable of displaying 16.7 million colours. Software supplied on 3 1/2 in. disks.

Order Code	Type	Price each
AJ73Q	VESA VGA Card	£84.99

VESA Local Bus HDD Cache Controller

Experience lightning hard disk performance with this IDE cache controller. Compared to the standard ISA HDD controller, you can experience up to 13M-bits per second data transfer rate with access times down to less than 0.3ms. On-board cache is fully expandable to 16Mb using standard SIMMs (note: SIMMs are not supplied with the card but must be purchased also), and capable of supporting two hard drives and two floppy drives.

Order Code	Type	Price each
AJ74R	A1 VESA Controller Card	£139.99

VESA Local Bus Multi I/O Controller

An ideal complement to the VESA motherboard, this interface card can support two hard drives, two floppy drives, two serial ports and one parallel port. Once fitted, it instantly improves hard drive performance by transferring data at the full bus width of 32-bits at the CPU clock speed.

Order Code	Type	Price each
AJ75S	VESA Multi I/O Card	£29.99

Microprocessors

A range of 386 and 486 microprocessors, in speeds from 25MHz to 50MHz.

The 486 SX CPU is supplied with the same one clock cycle per instruction integer core as the 486 DX microprocessor, complete with on-chip cache, memory management unit and 32-bit burst bus.

Order Code	Manufacturer	CPU	Speed
ZG17T	Intel	386DX	33MHz
ZG18U	Intel	486SX	25MHz
ZG19V	Intel	486DX	33MHz
ZG20W	Intel	486DX	50MHz

Order Code	Type	Price each
ZG17T	I386DX 33MHz	£79.99
ZG18U	I486SX 25MHz	£79.99
ZG19V	I486DX 33MHz	£289.99
ZG20W	I486DX 50MHz	£399.99

Co-processors

A range of 386 co-processors with speeds ranging from 25MHz to 50MHz and must match the microprocessor's clock speed.

Order Code	Manufacturer	Type	Speed
ZG22Y	Cyrix	387SX	25MHz
ZG24B	Cyrix	387DX	33MHz
ZG25C	Cyrix	387DX	40MHz

Order Code	Type	Price each
ZG22Y	387SX 25MHz CoProc	£69.99
ZG24B	387DX 33MHz CoProc	£79.99
ZG25C	387DX 40MHz CoProc	£94.99

Memory Modules

A range of DRAM modules for use as memory expansion in computers, including PC's, Apple Mac, Amiga, etc. The range offers the latest high speed technology at the lowest possible cost. Modules are available in SIMM (edge connection type) and SIP (with pins) to suit the different types of sockets found on mother boards in computers. The following types are available.

Please note that most modern motherboards require that each memory bank in use is completely filled with SIMMs. Memory banks are usually configured in blocks of two or four SIMM sockets. It is not usually possible to fit a single SIMM, or an odd number of SIMMs to a motherboard. Most modern motherboards will only accept 9-bit SIMMs, although some of the latest boards do require 36-bit SIMMs, which have 72 pads on the edge connector. It is advisable to use faster SIMM modules on PCs running at 50MHz or above. Please check your motherboard booklet before ordering SIMMs for memory expansion.

Code	Size	Package	Speed
UR61R	256 x 9	SIMM	70ns
UR62S	256 x 9	SIP	80ns
UR63T	1M x 8	SIMM	80ns

AR18U	4M X 36 - 70n/s	£565.00

Disk Controller Cards

A range of two disk controller cards, conforming to the IDE standard. ZG82D is a 16-bit IDE controller with I/O ports. The card supports 2 hard disk drives, 2 floppy disk drives, 2 serial ports (COM1-2), 1 parallel port (LPT1-2) and a games port. Jumper pins allow

**TOP QUALITY
PRODUCTS AT
SUPER LOW
PRICES!**

**Fax your orders to:
01702 553935**

flexibility in the configuration of the card. ZG29G is a cached IDE controller supporting up to 16Mb of cache RAM. By using advanced caching algorithms disk access time can be reduced to less than 0.3ms, ideal for applications involving repeated disk access such as sorts and searches. The card does not have any I/O ports and is supplied with 0K RAM. It can be fitted with 1Mb or 4Mb SIMM modules.

Order Code	Type	Price each
ZG82D	A1 IDE Controller Card	£16.99
ZG29G	A1 IDE Cache Controller	£149.99

Hard Disk Drives

IDE (Integrated Drive Electronic) hard disk drives are the current industry standard being extremely rugged, compact and reliable. Since IDE drives come prepared with a low-level format, they can be quickly and easily interfaced to a computer using one of the IDE controllers listed above. SCSI (Small Computer Systems Interface) drives are normally supplied where there is a demand for large drive capacities providing faster disk access times.

IDE 3.5in. Low-Profile (1in. High) Internal Types

Hard Disk Drive Fixing Kit

A fixing kit and slide-in frame enabling a 3.5in. 'internal' hard drive to be installed in a conventional half-height 5.25in. floppy drive front panel slot

Order Code	Type	Price each
ZG43W	HD to Fixing Kit	£5.99

Floppy Disk Drives

A range of three different floppy disk drives to cater for all capacities and disk types. Type MF504C is a standard slide-in, half-height 5.25in. floppy drive which is able to handle both Double Density (DD, 360K) and High Density (HD, 1.2M) floppy disks. Type OSDA-20C is a slim-line 3.5in. floppy drive, again able to take DD (720K) and HD (1.44M) disks. A slide-in adaptor frame is available to enable the 3.5in. type to be used in a half-height slot, see below.

The MD5501 is a versatile dual floppy drive with two disk slots, packing two disk drives into an unbelievable half-height standard sized unit. It is able to read and write both 5.25in. and 3.5in. disks of both DD and HD capacities, supporting 360K and 1.2M as well as 3.5in. 720K and 1.44M formats. It only utilises one half-height front panel slot and one power connector, leaving the other free.

Please note that this range of floppy drives are designed primarily to fit IBM compatible AT computers. Although it may be possible to fit these drives to some other computer types, we cannot provide support or configuration information for anything other than IBM AT compatibles. We are unable to support expansion of Amstrad PCs and do not recommend the use of these floppy drives in Amstrad machines.

Order Code	Type	Price each
ZG44X	C3 OSDA-20C 3.5 Drive	£39.99
ZG45Y	C3 MF504C 5.25 Drive	£49.99
ZG46A	C3 MD5501 Dual Drive	£109.99

3.5in. Drive Adaptor Fixing Kit

A fixing kit and slide-in frame enabling a slim-line 3.5in. floppy drive to be installed in a conventional half-height, 5.25in. floppy drive front panel slot.

Order Code	Type	Price each
ZG47B	3.5 Inch Fixing Kit	£7.99

SVGA Video Card

A state-of-the-art, Super Video Graphics Adaptor that offers features and functions equal to, if not beyond, any other VGA card in its class. A comprehensive chip, developed by Tseng Labs, combines with register and BIOS compatibility with the IBM VGA adaptor. Extended graphics resolution modes provide 640 x 480, 800 x 600 and 1024 x 768 high resolution modes of operation when used with multi-frequency (multi-sync) colour analogue monitors. It supports 72Hz refresh rate in all high resolution modes and for VESA standard.

A 'Hi-Color' graphics mode (with appropriate hardware support) produces 640 x 480 and 800 x 600 resolution with 32,768 or 65,535 simultaneously displayed colours, and a 'Tru-Color' mode (again with suitable hardware) can produce 640 x 480 with 16.7 million simultaneously displayed colours. There is also a 'Turbo Video Memory Access' option enabling a zero wait-state operation for maximum speed. Extended text modes can provide 132 x 25, 132 x 28, 132 x 44, 132 x 60, 100 x 40 and 80 x 60 character resolutions that let your computer emulate the displays of many widely used terminals.

Supplied on two 3 1/2 in. floppy disks are drivers for running extended text modes in Lotus 1-2-3 and Symphony, and extended graphics mode drivers for Autodesk, AutoCAD, GEM, Windows, WordPerfect, Ventura Publisher and OS/2 Presentation Manager. Font editing and font loading software is included for design and custom character sets, ideal for scientific and foreign language applications.

VGA, SVGA and Enhanced VGA Resolutions:

Pixels	No. of Colours	Frame rate
640 x 480	16, 256, 32K, 64K	60, 72Hz
640 x 480	16.7M	60Hz
800 x 600	16, 256	56, 60, 72Hz
800 x 600	32K, 64K	56, 60Hz
1024 x 768	16, 256	60, 72Hz & interlaced
1280 x 1024	16	Interlaced

Order Code	Type	Price each
RZ09K	A SVGA Video Card	£77.99

VGA Cards

The VGA (Video Graphics Array) and Super VGA video standards supersede the old CGA and EGA standards supporting greater image resolution and faster screen handling.

ZG48C has a basic VGA capability, supporting an image of 640 x 480 in 256 colours using 256K RAM on board.

Continued on next page.

Continued from previous page.

ZG49D will support the Super VGA standard of 800 x 600 in 256 colours. ZG50E extends the SVGA capability to the so-called X VGA standard of 1024 x 768 images in 256 colours (use of a non-interlaced monitor is recommended in this mode – see monitors).

Basic VGA Card Specifications

Code	Format	Colours	Refresh Rate	Memory
ZG48C	800 x 600	16	43.5/56Hz	256K
ZG49D	1024 x 768	16	43.5/60/70Hz	512K
ZG50E	1024 x 768	256	43.5/60/70Hz	1M

S3 Windows Accelerator Card (ZG51F)

This card is highly recommended where WINDOWS is used heavily. Built around the renowned 'S3' chipset, the card will allow speed increases of up to 14 times in the handling of WINDOWS screen images over normal VGA cards. Supplied with 1Mb of RAM, the card will support the highest resolution mode of 1024 x 768 in 256 colours.

Order Code	Type	Price each
ZG48C	A 256K VGA Card	£29.99
ZG49D	A 512K VGA Card	£33.99
ZG50E	A 1M VGA Card	£54.99
ZG51F	A Accelerator Card	£119.99

Keyboard

A conventional, 'cherry type' (tactile response) 102 key, extended AT style keyboard with 12 function keys and cursor move keys separate from the numeric keypad.

Order Code	Type	Price each
ZG57M	C3 102 AT Keyboard	£29.99

Input/Output Card

An I/O card for plugging into expansion slots that offers basic serial and parallel I/O, with 2 serial ports, 1 parallel port, and 1 games port for one joystick. All functions can be enabled or disabled.

Order Code	Type	Price each
ZG67X	A1 Short I/O Card	£14.99

Computer Cases

A range of four PC computer cases, each provided

with a power supply incorporating all internal and mains connectors and an extractor cooling fan.

Slim-Line Type

Construction:	Slide-In
Dimensions:	42cm wide x 11cm high x 40.7cm deep
Drive Capacity:	2 x 5.25in. and 2 x 3.5in.
Expansion Cards slots:	5
Power Supply:	MPS-200P 200W

Desk-Top Type

Construction:	Slide-In
Dimensions:	38cm. wide x 18cm. high x 41.5cm deep
Drive Capacity:	3 x 5.25in. and 1 x 3.5in.
Processor Speed Display:	7-segment LED, 2 digits
Expansion Cards slots:	8
Power Supply:	MPS-200P 200W

Mini-Tower

Construction:	Slide-In
Dimensions:	20cm. wide x 33cm. high x 42cm deep
Drive Capacity:	2 x 5.25in. and 2 x 3.5in.
Processor Speed Display:	7-segment LED, 2 digits
Expansion Cards slots:	8
Power Supply:	MPS-200P 200W

Full-Tower

Construction:	Slide-In
Dimensions:	20.5cm. wide x 62.3cm. high x 39cm deep
Drive Capacity:	3 x 5.25in. and 1 x 3.5in.
Processor Speed Display:	7-segment LED, 3 digits
Expansion Cards slots:	6
Power Supply:	MPS-220P 220W

SWITCH BOXES

Screened Data Switching Boxes

A range of fully screened data switching boxes available as 2 or 4 channels with either 25-way D-type or 36-way Centronics connectors. A high quality rotary switch connects all 25 or 36 connections between the main input/output and any one of the other sockets (female sockets are used on all versions). Positions are marked A, B (and C, D, 4-way types). No power supply required. All connectors have gold-plated contacts, and the steel case provides full electrical shielding with anti-skid feet. Colour cream with black knob. A front panel legend identifying 'A, B' etc. includes an empty panel for writing further identification or sticking a small label.

Dimensions of Case	155 x 132 x 57mm
2-way types:	155 x 132 x 57mm
4-way types:	195 x 152 x 67mm

Below, versions 'AB' are 2-way switching, 'ABCD' 4-way switching.

Order Code	Type	Price each
ZA62S	A1 Data Sw Box 25AB	£12.99

[E1]

Compact 2-Way Data Switch Boxes

A pair of compact, quality, 2-way data switch boxes housed in high impact plastic. The switch boxes allow either two computers to use one device or two devices to use one computer. A typical device may be a printer for instance. The boxes are available with either 25-pin D-type RS232 connectors or 36-pin Centronics connectors. All the connectors on either version are female. The switch boxes feature a high quality PCB, and the change-over switch has a life of more than 15000 operations and includes a visible in-service indicator.

Order Code	Type	Price each
BZ39N	B1 Switch RS232	£14.99
BZ40T	B1 Switch Centronic	£14.99

input port and direct this to the printer. A range of LEDs indicate which computer is using the part at any time.

The parallel switch boxes all use the standard male 25-way D-range connectors as a parallel interface. Time-out is 12 seconds. 2 into 1 and 4 into 1 versions are available.

Order Code	Type	Price each
ZG73Q	A2 2 to 1 Parallel Box	£24.99
ZG74R	A2 4 to 1 Parallel Box	£49.99

Automatic Parallel and Manual Serial Switch Boxes

Primax

A range of switch products to enable PC users to connect with the minimum of interruption, to a range of peripheral devices. The range consists of both serial and parallel switch boxes. The serial switch boxes are manual and can simply be switched between the peripherals/computers required. The parallel switch boxes are automatic and have a number of features. Add a bidirectional two or four way switch box to your PC system to allow up to four users to share one printer or any other parallel or serial peripheral. Alternatively one user send data to one of two or four different peripherals. The unit is designed to operate without a special external power supply in most cases, since it can draw power from the host PC's signal lines, but a 6V power jack is also provided so that a mains adaptor can be connected in the event that the host computer or peripheral is unable to deliver enough power.

On parallel switches various built-in functions are accessible via the function control panel at the end of the switch box case. The reset button allows you to reset the unit to its default state. The 'SEL' (SElect)

button gives you the option to manually select the connection channel for the specific computer or peripheral (depending on how the box is connected and used). repeated operation of the button will 'poll' around the available ports. A DIP switch sets the basic operating modes. Printer time-out can be set to 5, 10, 20 or 40 seconds, and automatic form-feeding can be enabled or disabled. In addition the data direction can be determined as 2 or 4 PCs to 1 peripheral, or 1 computer to 2 or 4 peripherals. (In this latter mode time-out and form-feed functions are not available.) In auto mode operation the 'AUTO' indicator flashes, and any transmission request from any computer will be accepted following the rule of 'first come, first served'. As soon as one of the computers start to send data, the control unit will lock into that channel and the corresponding in-service indicator will flash. After the transmission stops and the time-out period elapses, the in-service indicator will go out and the switch will be ready to accept any other transmission request. Manual selection mode operation is possible to temporarily lock into a specific input port. To select, the 'SEL' button is pressed repeatedly and the 'AUTO' indicator will go out and each in-service indicator will light in turn until the desired input port indicator is flashing. To return to 'AUTO' mode, the process is repeated until the 'AUTO' indicator lights once more or the reset button is pressed. Data from each computer can be sent to the common peripheral in exactly the same manner as though the peripheral were directly connected to the PC. If the auto switch box is busy transferring another computer's data at the time a 'busy' signal will be received by the PC, causing it to wait or indicate a busy state if the supplied software is loaded.

Four types are available, 1 into 2-way and 1 into 4-way automatic parallel port switches, and 1 into 2-way and 1 into 4-way manual serial port switches. Each type has the appropriate 25-way, D-range sockets for conventional serial or parallel connecting cables, and is supplied with a user guide. The parallel version also comes with a 3.5in disc containing printer TSRs and other utilities, (used for interrogating the printer channel when PC users share one peripheral).

Order Code	Type	Price each
RT53H	A2 Parallel 1-2 SwBox	£29.99
RT55K	A2 Parallel 1-4 SwBox	£39.99
RT54J	A2 Serial 1-2 SwBox	£34.99
RT56L	A2 Serial 1-4 SwBox	£49.99

PrinterNET Parallel Peripheral Networking System

A simple but effective system which allows up to 16 PCs to share up to 6 printers, and each PC user can select which printer to use. Selection can be done via software in the PC, or manually by using the Hand Controller unit. Only one PC can download to one printer at any given moment.

Basically the system is made up from two units. The first of these is the Transmitter which plugs into a PC's parallel printer port and has the corresponding 25-way D-range plug. The Transmitter is approximately the same size as a gender changer or similar unit. The Receiver is a similar unit which plugs into the printer (or equivalent peripheral) to be included in the system, and this has the centronics standard 36-way plug

Continued on next page.

Auto Parallel Switching Boxes

A pair of data switch boxes which do not need any manual intervention. The auto data switch allows you to automatically share a printer between 2 to 4 PCs. It operates by connecting the first PC to begin transmitting through to the destination channel. While the printer is active, other computer ports are held in the busy state until the current job is finished, whereupon the switch box will look for the next active

Continued from previous page.

connector. Each Transmitter and Receiver has a pair of identical telephone type connecting sockets, and thus a 'network' is made by daisy-chaining Transmitters and Receivers together.

Each unit (whether Transmitter or Receiver) is provided with a 7.5m long length of 4-way flat telephone cord with plugs on each end. The plugs are wired 'straight-through', that is, pin 1 at one end connects to pin 1 at the other end. Whenever a further Transmitter or Receiver is added to the system a further connecting cable is always provided to extend the system. The Transmitter has DIP switches to configure time-out (1, 10 or 20 seconds), and auto form-feed enable or disable. The Receiver has a rotary preset switch which is used to set the Receiver's identity number; all numbers in the chain of connected receivers must be unique.

Total transmission distance can be up to 1,200 feet (360m), with a high-speed transfer rate up to 128K-bps, suitable for most transmission speeds between a PC and a parallel peripheral. Normally each unit is powered from the parent PC or peripheral to which it is connected, but in the event that it is unable to obtain a satisfactory power supply from the machine, a 6V power jack allows a mains adaptor to be connected to the unit.

The Transmitter package includes utility programs on both 5 1/4 in. and 3 1/2 in. floppy disks, used to control the PrinterNET functions from the computer. This allows you to carry out operations such as select a printer in the network to print to, define the logical names of the printers in the network, select the printer port on your PC, show the current status of the PrinterNET network, and reset the PrinterNET transmitter unit during time-out to abort the current printing job and release the system if the network is locking up. The software can be run either from the command line, or stored in memory as a TSR which can be called up as required. A Windows 3.0 version of the PrinterNET utility is also provided.

In addition a Hand Controller Unit enables printer selection to be performed manually. The controller is plugged into the rear of the Transmitter and has a rotary selector switch to select the required device, with LED indicators to show which numbered device is chosen. This method provides an alternative to the software, which need not be loaded, thus releasing computer memory.

MULTI-MEDIA PRODUCTS

CD ROM Player

Panasonic

NEW

- ★ Uses computer's internal power supply
- ★ Horizontal mounting in standard 5 1/4 in. floppy mounting bay
- ★ Uses a disc tray
- ★ Normal velocity and Double Velocity modes
- ★ Data Transfer Rate up to 2.3MBytes/S
- ★ Stereo headphones socket and volume control for listening to audio CD's.

A high quality CD-Rom player that fits a standard 5 1/4 in. floppy drive horizontally mounting bay and use the computer's own internal power supply. There is no need for bulky caddy system, as a disc tray is utilised. 'Normal Velocity' (NV) and 'Double Velocity' (DV) i.e. double speed and an internal 64kByte buffer is capable of providing a Data Transfer Rate of up to 2.3MBytes/s. Audio line outputs are provided by the use of the separately available Interface card (AQ55K) which includes a connector lead. Certain other cards such as Soudblaster Pro, may also be used.

A 3 1/2 in. utility disk is included containing CD ROM drivers for DOS, and an Audio Playback Utility TSR program which has all the features of a good audio CD player, i.e. Playback, shuffle, memories, FF, FR, Search, Repeat.

Microsoft Windows users can use the Audio CD drivers and Media Player for playing Audio CD's. The TSR program and Media Player both allow the playing of Audio CD's in the background whilst carrying out other tasks on the computer.

Stereo headphones socket and volume control are available for listening to audio CD's.

AQ16S	H4 CD ROM Player	£149.99

CD-ROM Interface Card

NEW

A MKE bus interface card for CD ROM drives that provides stereo audio line out via two phono sockets. An interface cable and audio cable are included to connect the CD ROM drive. Suitable driver software is normally supplied with the CD ROM drive.

Order Code	Type	Price each
AQ55K	CD-ROM Interface Kit	£29.99

Internal CD-ROM Kit

An internal CD-ROM kit option which includes a fast CD-ROM chassis with automatic pick-up, lens cleaning and audio capability, interface card, interconnecting cables and installation and DOS extension software.

Order Code	Type	Price each
ZG84F	H2 Internal CD-ROM Kit	£139.99

Image Grabber

A 24-bit video frame grabber capable of producing DTP quality colour or black and white images from a 'still' video source such as a digital freeze frame VCR, TV camera, CD-ROM etc. Grabbing in black and white will result in 256 shades of grey. The software can save the grabbed images in 24-bit form or merged palette colour for use in slide presentations. The popular TIF, BMP, PCX and LBM format are all supported. The software includes a windows application to allow the grabber to run from windows. Minimum requirements are a 286 PC with 640Kb of RAM and a hard disk.

Order Code	Type	Price each
ZG85G	A1 Image Grabber Card	£229.99

PC to TV Conversion Card

This card enables a VGA signal to be converted to a composite PAL video signal or S-VHS signal, which will allow you to record the VGA on a suitable VCR. The card occupies one slot in an IBM or compatible PC (XT/AT/386). The card is connected to the existing VGA card via the 'feature connector', and it allows you to monitor the display on your VGA monitor as well as the TV monitor or other video equipment. Two versions are available, an internal plug-in card or an external stand-alone module.

Order Code	Type	Price each
ZG86T	A1 Internal TV Card	£159.99
ZG87U	A1 External TV Module	£129.99

Video Converter Card

Displays VCR, TV Games, CD-ROM images or live TV pictures (with the tuner card above) on a PCs VGA monitor. Stereo sound output. Full picture and audio control from the keyboard. Supplied with frame capture, integral animated and live video, imaging and multimedia presentation software.

Order Code	Type	Price each
ZG89W	A1 Video Converter Card	£249.99

ZG91Y A1	Grey Scale Scanner	£99.99

Small Passive Multimedia Loudspeakers

A pair of shielded loudspeakers that are suitable for use near computer monitors. The attractive, light grey plastic case houses a full range 3in speaker. The wide frequency response and low distortion makes the speakers ideal for use in multimedia applications. The speakers are connected via a 1m length of cable to a 3.5mm stereo jack plug which can be used to plug into a computer sound generator card. The maximum input power to the speakers is 2W, and the input impedance is 8Ω. Overall dimensions of each case 114 x 95 x 76mm.

Order Code	Type	Price each
DK32K A1	Passive M/M L/Spkrs	£6.99

Large Passive Multimedia Speakers

A pair of passive 3 1/2 in loudspeakers enclosed in an attractive ivory plastic case with a matching metal grill. The loudspeakers are magnetically shielded and are suitable for use with personal computers (with suitable output) and in particular multimedia applications. The speakers offer excellent sound quality and have a smooth frequency response. The speakers are connected to a miniature stereo jack plug by approximately 1.8m of cable.

Specification
 Nominal impedance: 8Ω
 Frequency response: 100Hz to 15kHz
 Power rating: 5W (PMPO)
 Dimensions: 137 x 98 x 92mm

Order Code	Type	Price each
ZC99H	Ivory Passive Spkrs	£12.99

PORTABLE ACTIVE SPEAKERS

NEW

GREAT VALUE!
£14.99
 RJ94C
[A1]

A compact pair of 7W extension speakers, designed for use with personal stereos, portable CD players and multimedia PC systems. Each speaker has a separate volume control and power switch, to allow each speaker to be controlled totally independently. Power can be supplied from a 6V DC mains adaptor (not supplied), or from four AA batteries, two in each speaker. A dynamic bass boost system automatically boosts low-frequency audio, giving a spacious, full sound. The speaker dimensions are 125 x 85 x 70mm (H x W x D)

Active Multimedia Loudspeakers

NEW

A pair of shielded active loudspeakers which are intended for use with computer sound cards etc. and can operate from either batteries or a suitable mains adaptor. Each high quality loudspeaker has a 1 1/2 in tweeter and a 3in bass and mid-range unit. A level control and two boost switches are incorporated, one switch is used to increase the bass output and the other treble. Each speaker has an on/off switch and an LED which illuminates when the loudspeakers are powered. A battery compartment is built-in to each speaker which requires 2 x 1.5V 'C' cells (Four in total, JY47B). Because the speakers are shielded, they can be mounted near to colour monitors, and the supplied interconnecting cable allows the speakers to be placed upto 1m (approx.) apart. The speakers are connected to the sound source by 1m of cable, which is terminated in a 3.5mm gold plated stereo jack plug. A 6V DC adaptor (YM85G) can be used to power the speakers. Finished in an attractive light beige plastic, overall dimensions of each case: 81 x 104 x 186mm.

SOUND CARDS

Sound Blaster™ Deluxe

Sound Blaster is the industry PC sound standard for hundreds of software products including entertainment, education, music, productivity and multimedia and this latest version is full of advanced features. The FM synthesiser chip produces realistic instrument sounds which are used by synthesiser keyboards. Sounds are produced in two modes - six melodic with five percussion or 9 melodic sounds. The digitised voice playback incorporates an 8-bit digital-to-analogue converter which allows real world sounds to be easily reproduced for multimedia presentations, education and entertainment applications. A digitised voice input allows a microphone to be plugged into the board to record sounds and includes built-in automatic gain control (AGC). A line-in jack is also provided to connect other devices such as a cassette player etc. In addition there is a built-in joystick port and MIDI interface. Finally, the 4W (PMPO) per channel quality amplifier will drive any speakers, headphones or domestic stereo system, and includes a volume control. Complete with assorted Windows, entertainment and multimedia software to demonstrate the Sound Blaster card as well as 'Indianapolis 500', and 'Lemmings' and SoundBlaster software, all on 3 1/2 in disks.

System Requirements
 IBM PC/XT, AT, PS/2 (25 and 30) or 100% PC compatibles.

Sound Blaster™ Pro Deluxe

Sound Blaster Pro is the preferred choice of sound board. It is an enhanced sequel to the original Sound Blaster, and has a host of extra features, including 8-bit stereo digitised recording and playback, an MPC-compatible CD-ROM interface, and a multimedia mixer. This product is completely compatible with Sound Blaster™, and comes complete with all necessary DOS and Windows applications software, voice and music utilities, and two games ('Indianapolis 500' and 'Lemmings'). A 'Multimedia Encyclopedia' CD-ROM is included for free! Also included is 'Monologue for windows'- this software will translate almost any text into speech, and is thus ideal for proof-reading documents, and electronic mail. It would also be of invaluable use to the blind or visually impaired. Sound Blaster Pro represents excellent value for money, and is ideal for recreational or educational use.

Features

- Digitised mono or stereo playback/recording.
- Enhanced OPL3 stereo FM synthesiser.
- Stereo digital/analogue mixer.
- CD-ROM interface.
- Joystick port (standard).
- MIDI interface.
- 4 Watts per channel output power amplifier.
- Microphone input with AGC (Automatic Gain Control) amplifier.
- Configurable jumper selections.
- Manual volume control.

Software Includes:

- 'JukeBox' lets you play background MIDI music whilst you work.
- 'Sound Blaster Pro Mixer' allows you to control sound sources from Windows.
- 'Creative Talking Scheduler' will orally remind you of your appointments.
- 'CD Player' allows you to play audio compact discs.
- 'FM Intelligent Organ' transforms your PC keyboard into an organ.
- Plus many others!

Note that all software is supplied on 3.5in. disks.

System Requirements

- IBM PC/XT, AT, PS/2 (models 25 and 30), or 100% PC compatibles.
- MS-DOS 3.1 or higher.
- 640K Memory for DOS software.
- 2.1Mb Memory for Windows 3.1 software (Microsoft Windows 3.1 is required for Windows software).
- EGA or VGA (VGA recommended).

ZF19V B3	Snd Blast Pro Deluxe	£89.99

Sound Blaster™ 16 (Basic Edition)

The Sound Blaster 16 (Basic Edition) sound board uses the latest in audio technology to provide true 16-bit CD-quality sound; selectable sampling rates and auto dynamic filtering are utilised, during recording and playback, to equip your PC with professional quality sound. This product is completely compatible with Sound Blaster™ (it supports 8-bit recording/playback), and provides the upgrade option to add the Advanced Signal Processor chip, which can perform high speed mathematical algorithms on waveforms for surround sound effects, and data compression, etc. Sound Blaster 16 comes complete with all necessary DOS and Windows applications software, together with voice and music utilities. Also included is 'Monologue for windows'- this software will translate almost any text into speech, and is thus ideal for proof-reading documents, and electronic mail. It would also be of invaluable use to the blind or visually impaired. Sound Blaster 16 (Basic Edition) represents excellent value for money, and is ideal for boardroom presentations, and recreational or educational use.

Features

- True 16-bit CD-quality stereo playback/recording.
- Enhanced 20-voice, 4 operator OPL3 FM synthesiser.
- Improved stereo digital mixer.
- CD-ROM interface.
- Joystick port (standard).
- MIDI interface.
- 4 Watts per channel output power amplifier.
- Microphone input with AGC (Automatic Gain Control) amplifier.
- Manual volume control.
- Bass and Treble control.
- Input/Output gain control.
- Optional Advanced Signal Processor, and Wave Blaster™ Upgrades.

Software Includes:

- 'JukeBox' lets you play background MIDI music whilst you work.
- 'Windows Mixer' allows you to control sound sources from windows.
- 'Creative Talking Scheduler' will orally remind you of your appointments.
- 'FM Intelligent Organ' transforms your PC keyboard into an organ.
- Plus many others!

Note that all software is supplied on 3.5in. disks.

System Requirements

- IBM PC/XT, AT, PS/2 (models 25 and 30), or 100% PC compatibles.
- MS-DOS 3.0 or higher.
- 640K Memory for DOS software.
- Microsoft Windows 3.1 is required for Windows software.
- EGA or VGA (VGA recommended)

ZF20W A2	Sound Blaster 16	£114.99

Sound Blaster™ 16 MultiCD

The Sound Blaster 16 MultiCD sound board uses the latest in audio technology to provide true 16-bit CD-quality sound; selectable sampling rates and auto dynamic filtering are utilised, during recording and playback, to equip your PC with professional quality sound.

One of the most useful features of this product is 'Voice Assist™'; this is a speech recognition system which, by simply running in the background, allows users to activate and control almost any Windows application by voice commands. The system is easy to train, and can support multiple users (training is required for each voice). A maximum of 29,792 commands are supported for a single user! Note that 'Voice Assist™' requires a 386SX-25MHz machine with 4Mb of RAM, which must be running Windows 3.1. A microphone is supplied with this product. This product is completely compatible with Sound Blaster™ (it supports 8-bit recording/playback), and provides the upgrade option to add the Advanced Signal Processor chip, which can perform high speed mathematical algorithms on waveforms for surround sound effects, and data compression, etc. Sound Blaster 16 comes complete with all necessary DOS and Windows applications software, together with voice and music utilities. A 'Multimedia Encyclopedia' CD-ROM is included for free! Also included is 'Monologue for windows'- this software will translate almost any text into speech, and is thus ideal for proof-reading documents, and electronic mail. It would also be of invaluable use to the blind or visually impaired. Sound Blaster 16 MultiCD comes with professional multimedia software, and represents exceptional value for money. It is ideal for boardroom presentations, and recreational or educational use.

Features

- True 16-bit CD-quality stereo playback/recording.
- Audio compression system (16-bit audio compression/decompression ratio of 16:4).
- Enhanced 20-voice, 4 operator OPL3 FM synthesiser.
- Improved stereo digital mixer.
- Three CD-ROM interfaces.
- Joystick port (standard).
- MIDI interface.
- 4W per channel output power amplifier.
- Microphone input with AGC (Automatic Gain Control) amplifier.
- Manual volume control.
- Bass and Treble control.
- Input/Output gain control.
- Optional Advanced Signal Processor, and Wave Blaster™ Upgrades.

Software Includes:

- 'JukeBox' lets you play background MIDI music whilst you work.
- 'Windows Mixer' allows you to control sound sources from windows.
- 'Creative Talking Scheduler' will orally remind you of your appointments.
- 'FM Intelligent Organ' transforms your PC keyboard into an organ.
- 'PC Animate Plus™' allows you to create your own animations.

'HSC Interactive™' lets you create interactive multimedia presentations. Plus many others!

Note that all software is supplied on 3.5in. disks.

System Requirements

IBM PC/XT, AT, PS/2 (models 25 and 30), or 100% PC compatibles.

MS-DOS 3.0 or higher.

640K Memory for DOS software.

Microsoft Windows 3.1 is required for Windows software.

EGA or VGA (VGA recommended).

Sound Blaster PC System IV

Amazing music and sound effects can be yours in an instant with the Sound Blaster all-in-one sound card. This complete package is based around the Sound Blaster version 2.0 card, now recognised as the number one PC sound card worldwide, which is easy to install with no wiring or soldering necessary. It has Adlib compatible FM sound generation producing authentic sounding instruments comparable to an expensive synthesiser. A digitised voice channel is able to sample sounds in the real world; speech, animal calls, special effects, machine noises, thunderstorms and more can be easily reproduced for presentations, educational lectures and games. Simply connect a good quality dynamic or condenser microphone into the built-in mic jack and amplifier to sample sounds. There is also a line input jack to connect to other sources such as tape recorders, and a mechanical volume control to set the basic overall level. All these are mounted on the backplate of the Sound Blaster card. The proprietary voice compression software reduces hard-disk storage requirements.

A built-in games port accepts any PC compatible analogue joystick, and a full duplex, built-in MIDI interface, featuring 64-byte FIFO and time stamping, allows MIDI instruments and keyboards to be connected if a suitable adaptor is used at the games port. A built-in, 4W per channel stereo power amplifier is provided for driving any speakers or headphones, stereo connecting cables are also included.

Free software includes SB Talker, a memory resident program which turns your computer into a talking machine capable of reading ASCII text files. SB Talker also comes with the AI (Artificial Intelligence) software 'Dr. Sbaitso', your personal consultant. The FM Intelligent Organ is powerful, easy to use organ software which lets you play, and learn to play, orchestra-like music using one finger on the PC keyboard. Background accompaniments and rhythms are added automatically. No prior music knowledge necessary, but more experienced musicians can also play from their MIDI keyboards.

Talking Parrot is a mischievous parrot who mimics your speech, talks back, lets loose with outrageous remarks and screams when tickled! (AT 286 required to run properly). With this you can customise or create your own talking animations.

VOXKIT is a voice development toolkit to record, play, compress and store digitised sounds. Also included with this is Jukebox, a Windows 3.0 application to give you some idea of what the future holds for Sound Blaster applications. In fact the Sound Blaster card is supported by a very large library of software from various sources.

The remainder of this comprehensive package includes the new Mach 1 joystick, perfect for the active game player. High performance, easy to use features are combined with superb precision and reliability, with extra large, dual fire buttons located on the control deck, and a newly patented gimble design for dependable performance and longer life. Dual X and Y linear trim controls are provided for precise cursor centring, and the connectors have plug locks for more secure attachment.

Finally a pair of superior quality, monitor type, mountable stereo speakers are also included, which can either stand alone or be hung from the sides of the video monitor using the supplied brackets. Each speaker pod has its own amplifier capable of 2.5W of output power, which can either be powered by internal batteries (4 x AA cells, not supplied), or by an external AC adaptor supplying 6V DC. A switch at the rear of each pod selects either internal amplifier OFF (and the signal is routed direct to the speakers themselves), or ON using battery power, or ON using external 6V DC. Each pod has its own volume control, 'Bass' enhancement push-button switch and power on LED. The pods have magnetic shielding to prevent interference to the monitor display and also have audio/video system protection. A dual phono to single 3.5mm stereo jack adaptor lead is included for line input sampling. All items supplied in one pack.

Order Code	Type	Price each
RT35Q	H5 SoundBlaster Pack 1	£81.99

Sound Blaster Pro Pack

Virtually identical to the Sound Blaster System IV pack, also having the Soundblaster Pro card and stereo speaker pods, but having the 'Flightstick' joystick controller (as RT39N shown elsewhere in this section), and microphone. Software includes 'Comanche-Maximum Overkill', one of the most realistic helicopter combat simulators ever made, fully utilising the digital speech and stereo sound capabilities of Soundblaster Pro. It unleashes unprecedented speed, fluid cinematic animation (voxelspace graphics) and breathtaking action never before experienced on PC. Dive through mountain peaks and desert canyons, unleashing a huge array of hi tech, destructive weaponry from the world's most deadly fighting bird.

SOFTWARE

MS-DOS Version 6.2

Version 6.2 of Microsoft's very popular operating system for PCs, now with more enhanced tools. If you have used earlier versions of MS-DOS, you will find many improvements in version 6.2. These improvements include new commands and programs that make using your computer easier and more efficient.

MS-DOS 6.2 includes the following new, or improved, features:

'DoubleSpace', an integrated disk compression system that increases your available disk space by compressing files. It will operate on both hard and floppy disks. A new '/c' switch for the 'DIR' command that displays information about file compression ratios if 'DoubleSpace' is in use.

'MemMaker', which is a memory optimisation program that makes it easy to move device drivers and memory resident programs from conventional memory into the upper memory area (only suitable for 386 processors and higher).

Enhanced 'EMM386.EXE' device driver which provides access to more upper memory blocks and uses extended memory to simulate expanded memory.

Enhanced 'MEM' transient command that provides more information about computer memory.

Enhanced 'LOADHIGH' and 'DEVICEHIGH' which allow specific high memory regions to be specified into which a DOS driver or TSR is loaded.

Improved 'BACKUP' commands, with both DOS and Windows versions for simple and safe backing up of data.

An AntiVirus program that can identify and remove more than 800 different computer viruses from the system. Improved 'UNDELETE' command, with which you can choose one of three levels of protection in case you accidentally delete a file.

Abilities to define more than one configuration in which it set up differently; plus the facility to bypass 'CONFIG' startup commands.

'Defragmenter' is a program which reorganises files on your hard disk to minimise access time due to various clusters belonging to one file being scattered all over the disk. Defragmenting is a process of recombining files so that each uses only local sectors.

A 'HELP' instruction provides on-line reference to MS-DOS commands. In addition there is an enhanced 'SMARTDrive' caching device driver, a diagnostics program, 'Interlnk' which enables you to easily transfer

Continued on next page.

Continued from previous page.

files between machines; a power saving program for laptops, a genuine, between disks or directories file moving command; 'choice', which (at last!) allows user input for batch files, displaying the required prompt and pausing for user action and returning an 'errorlevel' parameter that the batch file can act on conditionally. And not least 'DELTREE' which can erase an entire directory and its contents, including lower level subdirectories, at one stroke – extremely useful. MS-DOS 6.2 is supplied on three, 1.44Mb high-density floppies, and comes with a 279 page manual.

Order Code	Type	Price each
RT31J	MSDOS 6.2 for IBM PC	£54.99

COMPUTER ACCESSORIES

3-Button Serial Mouse

A neatly styled mouse for use with IBM PC, XT, AT and IBM compatible computers. The mouse produces a serial output signal, which is connected to the serial (RS232C) port of the host computer, thus no extra hardware is required. Mouse 'tail' is 1.8m long and terminated in a 9-way D-type socket. The mouse is supplied complete with instruction manual driver software on 5 1/4 inch floppy disk. The software consists of a test program, mouse driver and pop-up menu and the driver programs may be invoked from batch files and can also be installed on hard disk. The mouse is compatible with most software intended to be mouse driven, and the pop-up menu allows the mouse to be used with programs that are not normally mouse driven. Note that the serial port on some computers may be fitted with a 25-way D-type plug, in this case use the 9-way adaptor which is provided.

Order Code	Type	Price each
YU10L	A1 Serial Mouse	£17.99

Mouse AM-5E

Microsoft and Mouse Systems compatible AM-5E with a dynamic resolution of 350 to 3500 DPI. Supplied with mouse driver software and manual.

Order Code	Type	Price each
ZG99H	A1 Mouse AM-5E	£14.99

FOR TOP QUALITY & VALUE!

Extra High Resolution Mouse AM5-P

A superb, high quality mouse for use with all IBM PC XT, AT and compatible computers. The mouse produces a serial output, connected to the serial (RS232) port of the host PC, hence no extra hardware is required. Connecting lead is 1.9m long and terminated in a 9-way D-range female connector, and a 9-way to 25-way adaptor is included if your PC does not have a 9-way serial port. The mouse can be configured to use either COM1, COM2, COM3 or COM4 if required. Compatible with 2-button Microsoft and 3-button system mouse modes. The mouse driver supports both modes and you can select between two hardware modes using the mode switch on the left side of the mouse. Most software can use either mode.

High resolution is available by 'switch' instructions following typing of the mouse driver's name: resolution can be 1:1 or double, triple, quadruple and quintuple (ranging from 290 to 1,450dpi). In addition a fast tracking speed of 700m/sec. and upwards is possible. Other hardware included comprises (in addition to the serial adaptor) a mouse holder and mouse mat. Supplied software not only includes the mouse driver and test programs, but also a useful screen saver TSR program and IMAGE72 graphics painting software. IMAGE72 is designed specifically for use with a mouse or mouse assistance, and has abundant editing tools and useful utilities. It is able to support *.PCX, *.TIF, *.IMG, *.MSP and *.PUT file formats and read ASCII files. Editing of scanned images is also possible and Hercules, EGA and VGA high resolution modes are also supported. Images can be processed across EMS and conventional memory with auto-detect functions to improve speed. Supports dot matrix, laser and HP paint jet printers. The numerous editing tools include pencil, lines, circle, rectangle, eraser, air spray, air fill, scissors, text entry, rotate, 'Fabit' edit, full page edit, retrieve, etc. To use IMAGE72 the host machine can be an XT, Hercules or EGA or VGA or compatible video card and monitor and DOS 2.1 or higher. Any other mouse can be used. Supplied complete in a pack with software disks and manuals.

Order Code	Type	Price each
RT33L	AM5P Mouse + IMAGE72	£19.99

High Resolution 3-Button Serial Mouse

A smart mouse for use with IBM PC XT, AT and compatible computers. The mouse produces a serial output, connected to the serial (RS232) port of the host PC, hence no extra hardware is required such as extension cards, etc. The connecting lead is 1.9m long and terminated in the usual 9-way D-range female connector. The mouse can be configured to use either COM1 or COM2 serial ports. If your PC does not have a 9-way port you will also need a 9-way to 25-way adaptor. A switch underneath is provided to select two (Microsoft) or three (System Mouse) operation. The mouse is supplied complete with TSR driver software tailored for six different languages: English, French, German, Italian, Spanish and Dutch. The drivers are supplied on both 5 1/2 in. and 3.5 in. diskettes, and also come with test programs. The mouse is compatible with most software intended to be mouse driven, and

options are selected by the usual DOS command method by adding 'switches' to the transient 'MOUSE' command (the name of the driver). This driver should be added to the existing DOS transient command set, on a directory on a hard drive for example, for easy access by start up batch files, etc. The dynamic resolution is in the order of 350 to 700dpi and is programmable, ranging from 1/10 to 30 times hardware resolution. The default is 1:1 (actual hardware resolution).

Available in a choice of four different colours: Ivory, Gunmetal, Red and Blue. Supplied with user manual.

Order Code	Type	Price each
RT46A	Serial Mouse Ivory	£14.99
RT47B	Serial Mouse Gunmetal	£14.99
RT48C	Serial Mouse Red	£14.99
RT49D	Serial Mouse Blue	£14.99

Hand-Held Trackball Mouse

A Microsoft and PS/2 compatible device for any IBM PC XT, AT and equivalents, which functions as a mouse, for directing the cursor on-screen, but consists of a miniature trackball device which can be operated by finger or thumb while held in the hand or placed on any surface where space is restricted. As a 'stationary mouse' it can be operated from within your hand or, when operated on a desk, only a minimum of table space is needed with no mouse pad required, so therefore it never 'falls off' the edge of the pad which often happens with ordinary mice. More accurate movement of the cursor is possible, and two keys are provided for left or right-handed use, together with a 'drag button' to facilitate icon dragging operations. As it fits comfortably in either hand it is particularly convenient for demonstrations and ideal for laptop and notebook computers whilst travelling. The device can automatically switch between Microsoft and PS/2 modes, and the latest available, officially licensed driver software on both 3.5 in. and 5 1/2 in. disks. An opto-mechanical encoder system is used having 200 to 400dpi hardware resolution, and a dynamic software resolution up to 100 times (20,000dpi). Key switches are of 'micro' type and have a life of 1 million operations.

Order Code	Type	Price each
RT50E	Master Mouse PC	£29.99

Thumball Cursor Controller

'Thumball' is a palm sized cursor controller which operates in a manner identical to a larger trackball. It is designed to have the same functions as a mouse, but is much more convenient to use while travelling and especially for laptop and notebook computers. A simple slide switch will enable it to be positioned on the left or right-hand side of a laptop computer, with no complicated software reconfiguration. The device can either be operated while held in the hand, or it can be physically attached to the edge of the keyboard. The two 'left and right' mouse buttons are located around the periphery of the body and are duplicated for both one-handed, left or right-hand operation. The Thumball has a 55cm long lead terminated in a 9-way D-range connector for a 9-way serial port (a 9 to 25-way adaptor is also needed if your machine does not have a 9-way port). Suitable for all IBM PC XT/AT and compatible machines. Supplied with driver software on a 3.5in. floppy disk, soft travelling carry case and instructions.

Order Code	Type	Price each
DM98G	Thumball	£35.99

3 Button Serial Track-Ball

A neatly styled track-ball, which provides an ingenious alternative to a mouse when desk space is limited. Designed for use with IBM PC, XT, AT and IBM compatible computers. The track-ball produces a serial output signal, which is connected to the serial (RS232C) port of the host computer, thus no interface card or extra hardware is required. The unit is supplied with 1 1/2m of cable terminated in a 9 way D-type socket, as some computer serial ports are fitted with a 25 way D-type plug, an adaptor is supplied to facilitate connection. The track-ball is supplied complete with instruction manual and driver software on 5 1/4 inch floppy disk. The software consists of a test program, track-ball driver and pop-up menu, driver programs may be invoked from batch files and can also be installed on hard disk. The track-ball is compatible with most software intended to be track-ball or mouse driven and the pop-up menu allows the track-ball to be used with programs that are not normally track-ball or mouse driven.

Order Code	Type	Price each
YU12N B*	Serial Track-Ball	£39.99

MINI THUMBALL

A compact Serial or PS/2 thumbball ideal for use with Laptop computers where it can be used either hand-held or attached to the computer with the bracket provided. Software drivers for DOS, Windows and a pop-up menu utility are included on a 3 1/2" diskette. Suitable connectors are provided for connection to an IBM PS/2 mouse port or any PC compatible computer with a serial port. Supplied complete with a carrying case and full instructions.

GREAT VALUE!
£34.99
DK28F

NEW

Amiga and Atari Mice

Two versions of a mouse with opto-mechanical encoder having a resolution of 350dpi. Two types are available, one developed for use with Atari computers, and the second specifically for the Amiga. Each type has three buttons which can be configured according to the capabilities and requirements of the software on the machine in question. Since, for these machines, mouse operation is most often software dependent, the mice are NOT supplied with driver software, unlike those for a PC.

Order Code	Type	Price each
RT52G	Atari Mouse	£10.99
RT51F	Amiga Mouse	£10.99

Warrior Joystick Controller

IBM compatible joystick with 2 fire buttons, dual axis trim adjusters and high-speed auto-fire selector. Compatible with high-speed PCs (IBM PC, XT, AT, 386, 486 and compatibles). A game card is needed.

Order Code	Type	Price each
ZH08J	Joystick Controller	£9.99

Flightstick Advanced Performance Joystick

The FlightStick joystick is designed to look and feel like a real aircraft joystick. Its ergonomic design and precision engineered parts help you to shoot faster and score higher. The tough construction and long working life will probably make it the last joystick you will buy.

Wrap your hand around the realistic grip of the FlightStick controller and, whether your 'mission' be fast-paced combat or a record breaking flight of fantasy, you'll come to rely on the extra performance advantages built into it. It features superior design, workmanship and materials for more precise cursor control and a longer life compared with many other available joysticks.

The ergonomic pistol-grip design, 360° precision cursor control and outstanding durability make FlightStick one of the best quality joysticks you can buy. Extra features, such as the audible and tactile click effect fire buttons (one on top and another in a trigger position), added throttle control and extra stable base, make this joystick the best choice for all computer games. A rotary auxiliary axis/throttle control wheel to the left of the stick is provided for advanced programs such as Microsoft's 'Flight Simulator' or Chuck Yeager's 'Advanced Flight Trainer'. Rotary X/Y axis trim controls are also provided below and to the right of the stick for centring the cursor on the screen. Since each computer is different you may need to make this adjustment before starting play.

The two fire buttons are actually different, that at the trigger position is the 'normal' button #1, while the button on top of the stick (button #2) may or may not function in a particular program (each time you

THE BEST OF SERVICE

Continued from previous page.

change between software programs, the exact functions of these buttons may also change, in which case consult the software manual).

The joystick is fitted with 2.3m of connecting lead with a 15-way D-range plug for a PC games port. Compatible with IBM or equivalent PC, XT, AT and PS2 machines.

Order Code	Type	Price each
RT39N A2	FlightStick	£39.99

Mouse Bracket

A useful accessory for anyone who uses a computer with a mouse, the bracket can be attached to a convenient surface, e.g. side of workstation, system unit etc. When the mouse is not in use it can be placed in the bracket, thus preventing it being accidentally damaged. The bracket is moulded in durable plastic and is supplied with a double-sided self-adhesive pad for fixing.

Order Code	Type	Price each
YU11M	Mouse Bracket	£1.49

Mouse Cleaning Kit

The real solution to mouse cleaning. Every mechanical mouse requires some simple maintenance; the three small rollers inside collect dust and grime, and cleaning them is a tedious task with a cotton swab after removing the ball. This mouse cleaner utilises a simple tool, a circular brush on a shaft. One drop of the cleaning solution (supplied) and three twists of the tool is all it takes, (warning: the cleaning solution must not be used to clean the ball). Includes five foam swabs on sticks.

Order Code	Type	Price each
ZA68Y	Mouse Cleaner Kit	£4.99

SPIKE PROTECTOR

A 4-way mains socket strip that redirects transients and surges on the mains supply safely to earth, with a response time of less than ten nanoseconds. A built-in neon glows brightly when three conditions are met: the protection unit is intact, the supply fuse is not ruptured and the correct earth is present. Any problems will cause the neon not to glow, or if the earth is not present, the neon will glow with a reduced light output. To help comply with BS 6396 the socket strip is provided with an external earth terminal to ground other desk mounted electronic equipment. The socket strip can be mounted on a wall or desk and comes with two metres of mains cable and a BS plug fitted with a 13A fuse. The socket strip is fitted with an integral 7A fuse.

AMAZING VALUE!

£37.99

KR41U

Mouse Mat

A non-slip foam rubber mouse mat providing a perfect working surface for any mouse. Protects mouse ball against dirt and damp and the special working surface offers precise tracking and accuracy, and is antistatic. Very smooth and comfortable to use. Note however that it must be used on a perfectly flat, hard surface for best results. Size 260 x 215mm.

Order Code	Type	Price each
JY43W	Mouse Mat	£2.99

Mouse Stage

Optum

Suitable for all mice, this working platform consists of a 265 x 200mm mouse mat supported in a rigid, light grey plastic frame. A foldaway leg at each corner, with anti-skid feet, raises the table to a height of 77mm at rear, gently sloping to 57mm at the front. With the legs retracted the height is 25mm overall.

At the front, a hinged lid conceals a compartment measuring 210 x 45 x 15mm for pens and pencils etc. Finally, a flat drawer with ribbed edges can be set in either side (lefthand or righthand), and pulled out to serve as a mouse stand while the mouse is not in use. Colour of mouse mat is blue. Overall dimensions with legs and drawer retracted, 280 x 260 x 25mm.

Order Code	Type	Price each
ZA85G B1	Mouse Stage	£8.99

Surge Protecting Mains Plug

Bowthorpe

A standard 3-pin mains plug incorporating a voltage dependent varistor device which connects between all three pins. Using standard 13A rated pins and connections, the plug is intended to protect computer and other sensitive equipment against voltage spikes and surges on the mains supply. It need not even be fitted onto a cable at all but can simply be inserted into a socket on its own to control the local supply, and has a removable blanking plate to cover the cable entry for this purpose. Fitted with standard size 5A cartridge fuse. Cable connections are identical to those in normal 13A plug. Dimensions are identical to 13A plug except slightly higher at 33mm.

Order Code	Type	Price each
KU20W	Surge Plug	£12.99

Surge Clock

A device that counts the number of damaging surges on a mains supply. Surges in excess of 700V can create havoc for electronic equipment such as computers etc., this device will register up to nine surges. The clock is operated by simply plugging into the mains: initially the 'clean' green LED will be illuminated. When a potentially damaging surge is detected the clock will change from the 'clean' green LED to a red LED 1, and subsequent surges will cause the indicator to advance one position until '9' is reached. Removal from the mains supply causes the clock to reset. Line-neutral surge voltages that exceed twice the normal peak AC supply will register, surges below 650V will not normally cause damage to electronic equipment so will not be registered. The unit is housed in a flame retardant plastic case with integral pins.

N.B. The Surge Clock does NOT protect equipment from surges.

Size: 100 x 95 x 70mm.

Order Code	Type	Price each
KR42V	Surge Clock	£29.99

3A Filtered Mains Plug

Bowthorpe

A mains plug incorporating a comprehensive noise filter for removing unwanted noise and pulses from the mains supply before entering sensitive electronic equipment such as a computer. The filter includes a double wound toroidal choke, 3-way capacitive decoupling including the earth connection, and a pair of metal oxide varistor surge suppressors. Fitted with a standard mains size cartridge fuse rated at 3A which must not be uprated. Cable connections are to a block of three screw terminals. Dimensions 95mm long x 65mm wide x 58mm high not including pins.

KU19V	Filter Plug	£25.49

13A Pulse Protector

Bowthorpe

These single way 13A pulse protectors are ideal for use with electrical and electronic equipment that is now being supplied fitted with moulded plugs. When plugged into a standard socket the units will provide protection against transients on the mains electrical supply thus preventing electronic equipment from malfunctioning. PP1 is fitted with a multipurpose neon that verifies that the protection unit is intact, power is 'ON' and operation is normal, and that vital earth connection is present.

In the rare event of a high energy strike destroying the internal surge protection, Model PP1 will disconnect power to the associated equipment. Should the light go out, the unit must be replaced to restore power and full protection. This model is ideal for non-essential equipment such as computer games, TVs, VCRs, photocopiers, test equipment, electronic scales etc.

Model PP3 has an audible alarm to announce when the unit needs replacing, should the internal surge protection be overloaded due to severe surge. In such an event, the unit must be replaced to restore surge protection. However, power to the associated equipment will continue WITHOUT surge protection. The unit is ideal for business computers, telephone exchanges, fax machines, modems, or any equipment that must be continually powered. In both models, the internal three mode surge/spike suppressors, have a response time of less than 10ns with a maximum surge rating of 4.5kA. Both models commence clamping below 600V, are noise free in operation and automatically reset after a transient has passed. Incoming and outgoing surges are dissipated so 'no fault found' service calls are reduced and equipment performance improved.

Specification

Protection:	L-N, L-E, N-E
Voltage rating:	220 to 240V AC 50Hz
Maximum current:	13A
Maximum current surge handling 8/20µs:	4500A
Response time:	<10ns
Thermal fuse:	Operates @ 100°C
Housing:	Flame retardant ABS rating UL94 V-O
Plug and socket connections:	Conforms to BS1363

CX64U	Pulse Protector PP1	£13.99
CX65V	Pulse Protector PP3	£18.99

Computer Data Line Noise Filters

An ingenious device to help prevent noise being transmitted along inter-connecting cables between sensitive computer equipment and peripherals. The principle is successfully based on applying effective common-mode countermeasures locally to the cable. The device is hinged to wrap around and grip the single or multi-way cable or bus, and contains a ferrite core which is inductively coupled to the line or lines, and which in turn couples the separate conductors in a common mode rejection arrangement. This can even apply to screened conductors since the screen will not

exclude a magnetic field. Excellent rejection of transmitted or induced electrical noise is possible, protecting central processors and peripherals from random unwanted pulses which might be misinterpreted as data bits. Ideal for long cables which can have a filter at each end to exclude noise induced along the run. The high performance ferrite core removes RF noise in the range of 300MHz and over, but has negligible effect on transmission waveforms, while providing common mode noise countermeasures right at the data line. Can even be used on power leads. Manufactured to UL 94V-0. Effective impedance of cable with filter fitted is 125Ω at 25MHz and 275Ω at 100MHz except round types DK33L and DK34M, which are typically 70Ω at 25MHz and 115Ω at 100MHz. Five types are available for different thicknesses of cable:

Type	L	H	W	D (core dia.)
DK33L	25	14.5	14.5	3.5mm
DK34M	29.5	16	16	5mm
KW37S	32	19	19.5	6.5mm
BZ33L	34	23	25	10mm
BZ34M	34	30	33	13mm

Order Code	Type	Price each
DK33L	Noise Filter 3.5mm	£2.49
DK34M	Noise Filter 5mm	£2.99
KW37S	Noise Filter 6.5	£2.99
BZ33L	Noise Filter 10	£3.29
BZ34M	Noise Filter 13	£3.49

Mains Voltage Inverters

Anyone who has access to a rechargeable 12V car battery can operate mains powered equipment without having to depend on a nearby mains supply or a noisy generator. Essential for any equipment which must be operated in a motor vehicle or isolated place, or during a power cut, these inverters simply and silently convert 12V DC power from a vehicle battery into 230V AC mains equivalent power with very accurate voltage and frequency tolerances. Four models cover almost all conventional, domestic equipment applications ranging from sophisticated devices such as computer equipment, Hi-Fi, TV and VCR through to microwave ovens, power tools, coffee makers and small refrigerators. Each unit draws very

Continued on next page.

Continued from previous page.

little current when offload, and includes low battery, overload and overheating protection. Housed in rugged, lightweight and splashproof diecast cases, they are virtually maintenance free once fitted. Four modules with different power outputs are available and each type is especially suitable to operate the following:

125W TV, computers, recharging of cordless hand tools, Hi-Fi, communications equipment. Supplied with connectors for laptop computers. Dimensions: (H) 40 x (W) 115 x (L) 115mm.

250W As above plus VCRs and small power tools. Supplied with IEC connector. Dimensions: (H) 40 x (W) 115 x (L) 150mm.

800W as above plus microwaves, small refrigerators, toasters, heavy-duty power tools and small vacuum cleaners. Dimensions: (H) 76 x (W) 229 x (L) 254mm.

1500W All the foregoing and also large refrigerators, small freezers, large AC motors and high-power or professional radio/Hi-Fi equipment. Dimensions: (H) 76 x (W) 229 x (L) 381mm.

Specification

General, all units:

Input voltage range: 10 to 15V DC
 Output voltage: 230V AC r.m.s. ±5%
 Output frequency: 50Hz ±0.02%
 Output waveform: Phase corrected quasi-sinusoidal
 Efficiency: Better than 90%

Output power	Continuous	5 min. max.	Surge
125W type	125W	200W	400W

Computer Main Unit Universal Stand

This device saves worktop space by enabling a PC 'main unit' to be stood edgewise and supported securely. Width is adjustable from 98mm to 170mm and locked by two wingnuts underneath. Made in tough injection moulded light grey plastic.

Order Code	Type	Price each
GK31J B2	Universal Stand	£6.99

Universal Type Printer Stands

A very simple yet effective printer stand consisting of a pair of sloping side supports. Each support has a stable base with four non-slip rubber feet, and the top surface has a foam strip attached (these must be assembled by user). The top surfaces are sloped to a height of 90mm at the front, and 150mm at rear, so that the top of the printer is angled gently toward the user for easy access, and leaving plenty of room for fan-fold paper underneath the printer between the supports. Will support a printer of up to 300mm in depth. Paper enters and exits at rear. Colour light grey to match PCs, etc.

Order Code	Type	Price each
GK30H A1	Printer Stand Univ	£4.99

Printer Stand

Optum

A compact printer stand for 80 column printers which permits the paper to be stacked beneath the printer whilst the print-out is deposited automatically in the tray behind the printer. The stand is made of lightweight durable plastic coated steel wire and folds up for storage. This stand is suitable for use with almost all 80 column printers and can support a maximum weight of 60kg. The stand is 330mm wide, 120mm high and 320mm deep when closed and 610mm deep when opened out.

Order Code	Type	Price each
YT33L B3	Printer Stand 80	£8.99

TOP QUALITY PRODUCTS AT SUPER LOW PRICES!

Fax your orders to:
01702 553935

Multi-Purpose Printer Stand

A smart printer stand comprising a base with a transparent cover measuring 380 x 345 x 100mm high, containing a drawer for holding up to 2 inches of fan-fold paper. The drawer is removable from front or rear for replenishment without disturbing the printer itself. The transparent lid will help to keep dust away from paper in situ while not in use. It includes a central slot for printers which draw paper from underneath. In addition a delivery tray is provided for collecting the output, which is stowed flush in the bottom of the base when not in use, but extends to 11 inches, supported by a locking cantilever, to overhang the edge of a table. Only suitable for A4 or 11 x 9 1/2 inch fan-fold paper. Made in light grey ABS.

Order Code	Type	Price each
GK29G D5	Printer Stand Multi	£14.99

Paper Perforation Stripper

At last, a simple tool for removing the sprocket perforations from fan-fold paper quickly and easily without risk of damaging the sheets or leaving bits behind. You probably know how difficult it is to remove these neatly from several sheets of fan-fold all at once. The 'Ripper Stripper' consists of a flat base with sprocket teeth, and a smoked transparent, hinged cover. Simply press the sprocket holes of folded sheets over the teeth, close lid and hold down firmly. For a few sheets, the edge can be removed just by tearing upwards sharply. With more than half a dozen sheets however, don't tear, but begin to separate perforation at top, then pull sideways from top to bottom to guarantee a neat trim. Can cope with up to 15 sheets at a time of 80g/m² paper. If bigger quantity is needed, but sheets must not be separated, then process in batches of a few sheets at a time from one end; remainder simply exit from the 'open' end of the stripper until needed. Two rows of sprocket teeth are in different pitches; 12in. DIN size, and 11in. fan-fold size. Non-slip foam underside to base. Overall size (closed) 325 x 41 x 39mm.

Order Code	Type	Price each
ZA94C	Perf Stripper	£4.99

Monitor Mounting Copy Holder

A simple and ingenious A4 copy holder, which is simply attached to one side of your monitor. To attach, test position the right-angled base to top left or right corner of the monitor. When happy with the position, remove the two protective strips from the self-adhesive velcro pads and press in position. The base is then attached to the monitor via the velcro pads, but can be removed if required. The actual copy holder is attached to the base with a removable hinge, and has a sprung copy clip which slides along the top. Can be folded back out of the way or removed when not in use.

Dimensions

of base: 80 x 80mm angle x 38mm wide
of copy holder: 280 wide x 50mm deep

Order Code	Type	Price each
ZA88V	Copy Holder RT-85	£2.99

Free-standing Copy Holder

A full A4 size copy holder made in light grey, injection moulded plastic. It is entirely free-standing using a hinged support at rear, which has a degree of adjustment to alter the front angle. The support retracts flush into the back of the holder, when not in use. Copy can be propped on the bottom ledge, or securely held at the top with a sprung clip, which slides along the top runner. A transparent horizontal rule, which is hinged to allow easy access to paper, can be clipped onto left or right runners, and slides vertically to mark the position of each line of copy. The rule is graduated to 20 centimetres and 8 inches. Overall dimensions, assembled: 265(W) x 310(H) x 40(D)mm.

Order Code	Type	Price each
ZA87U A1	Copy Holder RT 75	£5.99

Articulated Desktop Copy Holder

Optum

A 9 1/2 x 11 1/2 in. copy holder with smooth sliding, non-magnetic line guide and removable paper clip at top. The line guide is graduated in mm up to 24cm, and 8ths of an inch up to 9 3/8 inches. The copy holder is supported on a jointed arm and, once installed, copy can be positioned anywhere for best visibility. Can be attached with its G-clamp to the rear edge of a desktop. This type of copy holder occupies virtually no desk space whatsoever. Finished in black. Copy board tilts and tums, maximum reach of arm is 560mm (22in.).

Order Code	Type	Price each
ZA60Q B2	DT Copy Holder	£19.99

Desktop Copyholder with Powered Guide

A 9 1/2 x 11 1/2 in. copyholder with a motorised, non-magnetic line guide and integral paper clip at the top. The line guide is graduated in mm up to 23cm, and in 16ths of an inch up to 9in. Maximum reach of arm is 630mm (25in.), and the copy board tilts and tums. The arm is made of grey painted steel and has sleeved springs. The line guide can be hinged open to access paper on the copy board, and is motor driven along its length, controlled by a foot switch unit intended to sit on the floor. A rubber cover fits over the foot switch to protect it and keep it clean. The foot switch has a rocker action for up and down directions, and movement is continuous for as long as the switch is held down. It also contains the battery supply comprising two AA size cells (not supplied), or an external 3V DC supply from a mains adaptor can be connected via a standard power jack socket on the end of a flying lead. The line guide itself is of perspex and has a transparent centre portion which can be used as a text window to aid copy-typing, while advancing the guide a step at a time with the foot switch.

Order Code	Type	Price each
DM99H C	Auto Copy Holder	£27.99

Computer Screen Anti-Glare Filters

Two sizes of monochrome monitor screen contrast filters, available in non-conductive or earthed conductive options, for 12 inch and 14 inch screens. In the non-conductive versions, the screen is a very fine nylon mesh which eliminates reflected artificial and natural light, glare and ultraviolet light, as well as improving the sharpness and contrast of the display. The earthed conductive types have conductive carbon fibre meshes. All screens have a rigid ABS frame supporting the mesh, which is pale grey on one side and black on the other. You can have either side outermost to suit your particular needs. Universal fittings comprise either four velcro pads, for attaching the corners directly to the front of the monitor (12 inch versions only), or through the use of 'hangers'. For 12 inch versions, these are a pair of steel, right-angled rods which are inserted into the top corners of the supporting frames, and the other ends pressed into two rubber blocks resting on the top of the monitor, or attached with velcro pads. The rods are adjustable in both planes for an exact fit. For 14 inch screens, only the 'hangers' can be used, and the rods attach to a pair of moulded plastic supports (which use adhesive pads), at right-angles over the top of the monitor. The static discharge conductive options include an earthing lead, which plugs into one of the sockets provided on either side of the frame, and is then terminated with an alligator clip at the other end to the computer's chassis.

Dimensions

12 inch frame:	300 x 220mm
12 inch viewing area:	275 x 200mm
14 inch frame:	320 x 265mm
14 inch viewing area:	300 x 227mm
Length of earthing cable:	1.5m (conductive option only)

Conductive options specified as '12C' and '14C' below.

Monitor Pedestals

Optum

A very attractive oatmeal coloured monitor pedestal which may be tipped front-to-back and rotated on its base. Top of the pedestal has soft pads for the monitor to sit on and the base has four non-slip soft plastic feet.

TV's up to 12 inch:

Dimensions of base: 253 x 231mm.
Dimensions of pedestal: 281 x 260mm.
Nominal height: 57mm approx.

TV's up to 14 inch:

Dimensions of base: 305 x 270mm.
Dimensions of pedestal: 340 x 290mm.
Nominal height: 70mm.

TV Wall Mounting System

Flame

Mount your TV or monitor on a wall anywhere in the home. Ideal for kitchens, bedrooms, 'dens' etc, it keeps the set out of reach of young children or animals. The platform will take a set of up to 49cm (19in.) screen size and weight up to 30kg (66lbs) in complete safety. The platform can be tilted using a knurled adjuster screw, and swivelled horizontally in any direction. The support comprises a double jointed extension arm for total versatility; can be turned round completely and even around corners. Ideal for alcoves and through rooms, etc. Also ideal for computer monitors for the home and office. Quickly and easily installed using the full instructions provided. Six 2in. screws, a spanner and wall plugs maybe required for wall fixing.

Warning This installation depends on a strong and sturdy attachment to a solid brick or block wall. Attaching to board partitioning is not recommended, unless fixing directly to an underlying, vertical timber support. In any event, if in doubt, consult an experienced person.

Made in high grade steel, painted white. Dimensions of platform, 305mm wide x 280mm deep. 20mm raised lip at front. Distance from wall: fully retracted, 305mm; fully extended, 580mm.

Order Code	Type	Price each
GK28F E6	TV Wall Bracket	£19.99

A-to-D Converter with Oscilloscope, Voltmeter and Spectrum Analyser Software

The ADC-10 A-to-D converter plugs into the parallel port of an IBM PC or compatible computer. It is completely self contained, requiring no external power and taking up no expansion slots. Input to the unit is via a BNC connector allowing standard oscilloscope probes to be used.

Software is supplied which allows the device to be used as a single channel digital storage oscilloscope (DSO), spectrum analyser or voltmeter. Displayed waveforms can be saved to disk or sent to a printer. Additionally, the ADC-10 is ideal for general purpose data acquisition. Typical applications include audio sampling and pressure, temperature and strain gauge measurement. For users who wish to develop their own software, C, Pascal and Basic drivers are supplied.

Specification (Hardware)

Input range: 0 to 5V
Resolution: 8-bits
Maximum sampling rate: 10kHz (8088 cpu)
20kHz (286 12MHz cpu)
25kHz (386 33MHz cpu)
1 lsb
Accuracy: ±30V
Overload protection: Standard BNC
Input connector: 25-way D-type to printer port
Output connector:

Specification (Software)

Compatibility: IBM PC/XT/AT or compatible
Display support: Hercules, CGA, EGA, VGA
Printer support: Epson FX and LQ series, HP Laserjet
Oscilloscope functions: Timebase, trigger, multiplier, notes, rulers.
Spectrum analyser functions: Min/Max frequency, averaging, grid, title.
Voltmeter functions: Min/Max value, decimal places, units, title.

Supplied with manual and software on 3.5in disk.

Order Code	Type	Price each
KR40T	ADC 10 Converter	£59.99

PC to Colour TV Interface

Josty

A compact interface that allows an IBM PC, PC-XT or PC-AT computer (or compatible), fitted with a Colour Graphics Adaptor (CGA) card (or multi-mode display adaptor operating in CGA mode), to be connected to a normal Television Set which has a 21-pin Peritel (SCART) input socket supporting RGB input signals. This compact unit has two connecting cables, one connects to the 9-way D-type video connector on the host computer and the other connects to the 21-pin Peritel (SCART) connector on the TV to be used. A 3.5mm power input jack socket accepts a DC input of between 9 to 12V DC at 300mA, a suitable mains adaptor is XX09K (not supplied). The unit is fitted with three controls, picture shift, brightness and contrast; which allow the TV picture to be optimised.

Please Note:

This unit cannot be used with some early Amstrad PC1512 and PC1640 machines, this can be determined by examining the video output connector, if it is a DIN connector then this interface cannot be used. However if the video connector is a 9-way D-type, then the unit may be used. Please check compatibility before purchasing this unit.

Large Disk Storage Boxes

Optum

Drawer type disk storage boxes similar in operation to the drawers of a filing cabinet. The boxes can be stacked and have positive locating tongue and groove guides and special clips to join two cases together. The boxes are not portable carrying type, but are intended to be sited on a desk or work station. Two types are available to cater for both 5 1/4 and 3 1/2 inch size disks. Type 180 can accommodate 180 x 5 1/4 inch floppy disks in two rows, and is provided with 16 dividers, while type 150 can hold up to 150 x 3 1/2 inch disks, and has 14 dividers. Both are lockable and provided with two keys. Dimensions are identical: width 340mm, height 180mm, depth 285mm. Drawer withdraws to 235mm. Made entirely of tough light grey injection moulded plastic with a smart black fascia 1 in. deep which incorporates a recessed handle, barrel lock and two small recessed panels for labels.

Disk Drive Cleaners

Disk drive head cleaners for use with 5 1/4 in., 3 1/2 in. and 3 in. disk drives. The cleaners utilise a 'wet' system to prolong the life of the head and avoid damage to the critical head gap. Each cleaner contains one diskette with fibre 'disk' and a bottle of specially formulated cleaning fluid. The 5 1/4 in. kit can be used with either single sided or double sided drives, by inserting the diskette the appropriate way round. The 3 in. type is for the 3 in. Amstrad drives as featured on the CPC464, 664, 6128 and 8000 and 9000 series word processors etc. Full instructions for use are supplied, and a chart is printed on each disk for you to keep a record of the number of cleaning operations.

ZA83E	Mini Vacuum Cleaner	£5.99

Computer Accessory Starter Kit

A selection of very useful computer accessories, ideal for the first time computer user, that offers a saving over the individual prices. All items in the kit except the monitor cover, mouse and mouse mat are in an attractive light beige colour. The kit contains the following:

1. **Anti-glare filter.** This has a non-conducting mesh with a viewing area of 290 x 220mm, and is suitable for monitors up to 14in. Supplied with self-adhesive velcro fixing pads and two hangers.
2. **Mouse mat.** A light-grey mat with a black rubber backing measuring 222 x 198mm.
3. **3 1/2 in. lockable disk box.** Holds 100 3 1/2 in. floppy disks and measures 270 x 232 x 115mm, has a clear acrylic top and is supplied with 12 dividers, non-slip rubber feet and two keys.
4. **Printer stand.** A slanting stand measuring 65mm high at the front and 113mm at the rear, with an overall depth of 285mm. Supplied with self-adhesive non-slip neoprene strips. Suitable for a wide range of printers.
5. **Ripper ruler.** A combined 12in./300mm ruler and fan-fold paper perforated edge stripper. Supplied with three self-adhesive non-slip neoprene pads.
6. **A4 Copy Holder.**
7. **14in. monitor dust cover.** A translucent soft plastic dust cover suitable for most 14in monitors up to 400mm deep and 360mm wide. The cover will not scratch the monitor screen, or housing, and must not be used when the monitor is switched on.
8. **3 1/2 in disk cleaning kit.** A 'wet' 3 1/2 in. floppy drive cleaning system.
9. **Mouse holder.** A rectangular bracket to hold a mouse. Supplied with a slot-in partition and a double-sided sticky pad for fixing.
10. **3-Button serial mouse.** MicroSoft & Mouse Systems compatible. Complete with driver software, pop-up menu utility and mouse test program, supplied on a 3 1/2 in. floppy disk. Finished in white

RS232 Multi-Pair Network Cable

NEK Cables

A range of flexible (stranded), multi-pair cables that are suitable for the interconnection of peripheral equipment and host computers, where local area networks are not in use e.g., low-speed data transfer.

Electrical Properties at 20°C

Pair conductance:	98pF/m @ 1kHz
Capacitance @ 1kHz:	164pF/m (between 1 cond. and other cond. connected to screen)
Attenuation 100kHz:	1.3dB/100m
Attenuation 1MHz:	7.3dB/100m

Mechanical Properties

Conductors stranded:	0.22mm ² TC
Insulation type:	SR-PVC
Overall screening:	Foil
Drainwire stranded:	0.22mm ² TC
Jacket type:	PVC
Temperature range:	-20°C to +80°C
Minimum bending radius:	8 x ODmm

Note for Network Users

Don't forget that Maplin can also supply all the cable and connectors you need to make a 50Ω coaxial network link. The network comprises a common, continuous 50Ω feeder into which each network card connects by tapping-in using BNC connectors. The feeder must have a 50Ω terminator at each end to prevent reflections; the network card connections are NOT 50Ω impedance. Suitable items can be found in the Cables and Connectors sections.

These are:

PB15R	Low Loss Coax UR76H
CK06G	50Ω Terminator
JC23A	BNC Crimp Plug
YW03D	BNC-T Connector
HH18U	BNC Round Socket
CK05F	Insulated BNC Socket
CK08J	Insulating Boot
CK07H	Insulating Hood
CK01B	BNC 'Y' Connector

CONVERTERS AND TESTERS

36-way Centronics Gender Changers

Gender changers which allow quick conversion from a female 36-way Centronics to a male 36-way Centronics (M/M) or male 36-way Centronics to female 36-way Centronics (F/F).

Order Code	Type	Price each

RS232 to RS422/RS485 Interface Converters

Two interface converters which individually provide full duplex interface conversion from RS232 to RS422 or RS485 standards respectively. All baud rates from 1200 up to 115,500 are also supported. Very low power, surface-mount CMOS circuitry is used and is powered entirely from the RS232 (host) interface. An external power supply is not required in most situations.

In use, each unit provides full-duplex (bidirectional) conversion between the conventional RS232 interface on one side, and the RS422 or RS485 interface on the other. Both RS422 and RS485 conventions use a twisted-pair of wires for each signal. RS422 provides full-duplex communication using two separate twisted pairs. This means that data can flow in both directions simultaneously. However, it is strictly intended for point-to-point communication only and cannot, in general be used for interconnecting more than two devices.

RS485 however, makes it possible to interconnect up to 32 devices, but it supports half-duplex communication only, i.e. data can flow in either direction, but only one direction can be used at any instant. It requires only one twisted pair and, to avoid contention, the driver of an RS485 interface must be specially designed to ensure that the driver can be enabled to transmit, or disabled to listen. Any apparatus which controls an RS485 interface must be able to enable the driver only at the correct time. Conversion between RS232 and RS485 is straightforward with this converter but requires the correct use of the RS232 RTS signal to control the RS485 driver. This means that, in order to properly use the RS485 converter unit, you must have a means of controlling the RTS output signal of your RS232 device.

Each unit will plug directly into an IBM PC 25-way serial port, and presents a 9-way, D-range male socket at the other end for the RS422/RS485 connection. Each unit is no larger than any other gender changer or adaptor.

Order Code	Type	Price each
RC06G	RS232-RS422 Convtr	£59.99
RC07H	RS232-RS485 Convtr	£59.99

Gender Changers 25-Way D-Type

A gender changer which allows quick conversion from a female 25-way D-type socket to a male 25-way D-type plug (M/M type) or a male 25-way D-type plug to a female 25-way D-type socket (F/F type). Overall

Order Code	Type	Price each
YP87U	GenChange M/M RS232	£5.99
YP86T	GenChange F/F RS232	£5.99

Low Profile D-type Gender Changers

Gender changers which allow quick conversion from a female 25-way D-type to a male 25-way D-type (M/M) or male 25-way D-type to female 25-way D-type (F/F), including 9-way D-type M/M and F/F versions. These gender changers are extremely low profile, overall length 17.5mm (as opposed to 61mm for normal gender changers).

Order Code	Type	Price each
JM48C	L Prfl M/M 25W Gend	£3.99
JM49D	L Prfl F/F 25W Gend	£3.99
JW57M	L Prfl M/M 9W Gend	£3.49
JW58N	L Prfl F/F 9W Gend	£3.49

RS232 25-way D-type to 9-way D-type

Converters for use with serial RS232 equipment to allow connection between devices using 9-way and 25-way D-type connectors, e.g. IBM AT series machines. Two versions are available: 9-way female to 25-way female and 9-way female to 25-way male.

Order Code	Type	Price each
JM08J	9F/25M Changer	£4.99
JM50E	9F/25F Changer	£4.99

Reverser

An adaptor which links each pin with the exception of pins 2 and 3 (the transmit and receive data lines) which are reversed. The unit has a 25-way D plug on one end and a 25-way D socket on the other.

Order Code	Type	Price each
YP82D	Reverser RS232	£5.99

Wiring Box

The wiring adaptor permits any pin on one side to be connected to any pin on the other side of the adaptor (except protective ground, pin 1). The 48 patching sockets are gold-plated and 25 insulated wire links with stripped ends are supplied. The wire links are each approx. 50mm long. The unit has a 25-way D plug on one end and a 25-way D socket on the other.

Order Code	Type	Price each
YP79L	RS232 Wiring Box	£10.25

Wiring Adaptor

A 25-pin D-type, male to female wiring adaptor, enabling any one or more connections on one side to be connected to any one or more connections on the other side of the adaptor. Each connection is terminated at a pin with which socket-ended jumper leads can be used. In addition, four commoning strips of pins are provided for tying up to four separate connections together, from either side. Supplied with 25 jumper leads 90mm long. The unit has a 25-way D-type plug at one end and a 25-way D-type socket at the other.

Order Code	Type	Price each
JY39N	Wiring Box	£10.25

TOP QUALITY PRODUCTS AT SUPER LOW PRICES!

Fax your orders to: 01702 553935

Jumper Box

Optum

Contains a 25-way D plug at one end and a 25-way D socket at the other joined by a fibre glass pcb. Each line is connected to solder pads which may be linked together as required. Pin 1, protective ground, is connected to solder pads and linked through. 25 insulated wire links, each 50mm approx. long with stripped ends, are supplied. The unit is housed in a snap-shut plastic box.

Order Code	Type	Price each
YP78K	RS232 Jumper Box	£5.99

Null Modem

May be connected directly to equipment ports or between two cables to enable communication where a modem is not required, but equipment will not operate without the control of the modem. The unit has a 25-way D plug on one end and a 25-way D socket on the other. Pins 1 and 7 are connected straight through, pins 2 and 3 cross over, pin 4 is linked to pin 5 and crosses over with pin 8, and pins 6 and 20 cross over.

Order Code	Type	Price each
YP85G	Null Modem RS232	£5.99

Surge Protector

This unit protects your RS232 ports from the power surges and spikes generated by motors starting, lightning etc. Varistors protect pins 2, 3 and 7. The unit has a 25-way D plug on one end and a 25-way D socket on the other.

Order Code	Type	Price each
YP84F	Surge Protectr RS232	£6.99

Loopback Tester

A tester which links together pins 2 and 3, 4 and 5, 6 and 20, and 15 and 17. A bicolour LED is connected between each of the four loops and ground and they light to indicate the presence of positive or negative (or both) signals on each loop. The unit has a 25-way D plug on one end and a 25-way D socket on the other.

Order Code	Type	Price each
YP83E	Loopback Testr RS232	£7.99

Quick Tester

Optum

The tester has 9 red and 9 green LED's. The LED's light up red for positive and green for negative on each of 9 lines: pins 2, 3, 4, 5, 6, 8, 11, 19 and 20. Both LED's light if data signals are passing. The unit has a 25-way D plug on one end and a 25-way D socket on the other.

Order Code	Type	Price each
YP81C	Quick Tester RS232	£14.99

Mini Tester

The tester has seven bi-colour LED's connected to pins 2, 3, 4, 5, 6, 8 and 20. They light to indicate the presence of positive or negative (or both) signals on each line. The unit has a 25-way D plug on one end and a 25-way D socket on the other.

Order Code	Type	Price each
YP80B	RS232 Mini Tester	£9.99

RS-232 Break-Out Box

A portable, pocket sized, test set which provides access to all 25 conductors of the RS-232/V-24 interface between the data terminal and the data modem or other destination. Twenty four miniature (DIL) switches allow all interface conductors, except frame ground, pin 1, to be individually interrupted, allowing isolated testing and observation of data or control signals. Sockets on either side of each switch provide cross-patching and monitoring of signals via the small jumper cables, which can be stored under the cover. 50 signal powered LEDs show RS-232 polarity and permanently monitor all connections. No extra power required. Supplied with 20 jumper leads. The unit has one male and one female 25-way D-type connector, and comes in a tough, black plastic case with hinged lid. Dimensions closed: 90 x 83 x 25mm.

Order Code	Type	Price each
JY40T	Break Out Box	£29.99

CALCULATORS

Pocket Solar

Casio

A large 8-digit LCD, solar powered basic four function calculator. Includes three key independent memory, percentages, square roots, time calculation and a large + key. Complete with a handy wallet. Size: 109.4 x 66.4 x 6.9mm. Weight 35g.

Order Code	Type	Price each
BT11M	Casio SL300L	£5.25

Desktop Solar

Casio

Basic four-function calculator with large keys and an angled sloping display for desk-top use. The calculator operates from a solar cell which works perfectly in normal room light, or anywhere there's enough light to read by. Features include memory function, square root and percentage, and constant calculations, add-ons, discounts and mark-ups can be carried out. The 8-digit LCD display indicates the function in use as well as all usual functions. No batteries are required.

Size: 129.5 x 106 x 27mm.
Weight: 90g.

Order Code	Type	Price each
JK54J	Casio MS-70L	£8.99

Printing Portable

Casio

A compact printing calculator with a 10-digit LCD display. In addition to the four basic functions the calculator has a memory and percentage key for add-ons, discounts, mark-ups etc. There is a switch for floating decimal point, cut off or round off at 2 decimal places. The calculator has a flip-out print roll which enables you to switch from internal to external roll, and uses standard 58mm plain paper rolls and operates from an AC adaptor 4.5V DC, available separately, or four AA cells (supplied).

Size: 188 x 98 x 40mm excluding roll holder.
Weight: 298g including batteries.

Order Code	Type	Price each
YT53H	Casio HR-82LB	£22.99

AC Adaptor for Printing Calculators

A 4.5V DC mains adaptor suitable for use with YT53H and AG03D.

Order Code	Type	Price each
YT56L	Print Calc Adaptor	£6.99

Scientific FX-82LB

Casio

A 78-function scientific calculator with true algebraic logic (i.e. the formula can be entered in the same sequence as it is written) and up to six levels of parenthesis. Other features include a single key for display of kilo, mega, micro etc, fluent conversion between polar and rectangular coordinates, easy statistics through standard deviation function, and 3-mode angular measurements (degree, radian and grad). The calculator can perform fraction calculations, has keys for trigonometric and hyperbolic functions, logarithms, square and cube roots, squares, reciprocals and factorials, and there is a random number generator. There are 6 constant memories as well as the normal memory.

The liquid crystal display shows 8 digits with a 2 digit exponent. The calculator gives 9000 hours continuous operation from two alkaline AA cells supplied.

Size: 153 x 76 x 21.5mm.
Weight: 121g.

Order Code	Type	Price each
JK57M	Casio FX-82L	£7.99

MS-270L Desktop C-Power

Casio

NEW

Basic four function calculator with square root, percentage key and memory function. Large keys and an angled sloping 12 digit display make this calculator ideal for desk-top use. The calculator operates from a solar cell, which can power the calculator in normal room light. Should the available light level fall, then an internal battery provides sufficient power, and maintains the memory.

Power: Solar cell, with back-up battery(LR44)
Auto Power-Off: After approx 6 mins
Dimensions: 30(H)x110(W)x133(D)mm
Weight: 110g

Order Code	Type	Price each
AG05F	MS270LBK Calculator	£15.99

Printing Calculator HR-150LA

Casio

NEW

A slim-line printing calculator for desk-top use with a 10-digit display. In addition to the four basic functions, the calculator has a memory function and percentage functions for add-ons, discounts, ratios, mark-ups, mark-downs, profits etc. A switch is provided for floating or fixed 0, 2 or 3 decimal places with round-off. There is also an item counter, repeat function and an instant print key for use when the printer is switched off. The calculator uses standard 58mm plain paper rolls and operates from an AC adaptor 4.5V DC, available separately, or four AA cells (supplied).

Dimensions: 53(H)x162(W)x214(D)mm
Weight: 464g

Scientific C-Power FX-85V

Casio

A 129-function scientific calculator with true algebraic logic (i.e. the formula can be entered in the same sequence as it is written) and up to six levels of parenthesis. Other features include a single key for display of kilo, mega, micro etc, fluent conversion between polar and rectangular coordinates, easy statistics through standard deviation and regression analysis, and 3-mode angular measurements (degree, radian and grad). The calculator can perform fraction calculations, has trigonometric and hyperbolic functions, logarithms, square and cube roots, squares, reciprocals and factorials, and there is a random number generator. There are 6 constant memories as well as the normal memory. The liquid crystal display shows 8 digits with a 2 digit exponent. The C-Power system combines solar power with battery back-up, allowing full operation (including memory retention) in any lighting conditions. Battery life is around 7 years in normal use (lithium battery GR927 included).

Size: 140 x 73 x 17.5mm.
Weight: 64g.

Order Code	Type	Price each
JK58N	Casio FX-85V	£13.99

Scientific C-Power FX115S

Casio

The latest version of this 252 function, scientific calculator operates at speeds up to 2.5 times faster than previous models. Binary, octal and hexadecimal calculations and conversions can be performed. The calculator uses true algebraic logic, where the formula can be entered in the same sequence as it would be written. Recall is possible from an independent memory and six constant memories, plus fast compounding and direct acceptance of all four basic functions. Parenthesis calculations up to six levels can be handled with ease. Also possible is fluent calculation between polar and rectangular coordinates, statistics from standard deviation function and regression analysis, and 3-mode angular measurements in degrees, radians and grads. The calculator can also produce a display in kilo, mega, micro etc. Unlike conventional solar calculators, C-Power models can be used even in total darkness. While solar powered in sunlight, a 6-year lithium battery GR927 is used where light is insufficient.

Weight: 114g.
Size: 24 x 77 x 153mm.

Order Code	Type	Price each
JK59P	Casio FX-115S	£14.99

Scientific Formulae FX5000F

Casio

A 288-function calculator including 128 scientific formulae built in. Formulae include resonant frequency, parallel resistance, time constant in RC circuit, power factor, voltage and current gain, Coulomb's law, power laws, magnetic force etc. After accessing the desired formula, alphabetic prompts appear on the display to let you know what variables require values.

The impedance calculation function permits composite impedance for AC circuits with parallel, serial or mixed resistors, coils and capacitors to be calculated along with deviation angle of composite impedance.

This unit has in addition to the 27 electronic and electrical formulae, 40 mathematical formulae, 9 statistical formulae and 17 mechanics formulae. A programming function allows you to enter up to 12 other formulae for long-term retention and built-in formulae can be copied to this memory area for editing into a different configuration.

The basic functions include trigonometric, hyperbolic, logarithmic, reciprocals, square cube and n roots, powers. Statistical functions include population standard deviation, sample standard deviation, arithmetic mean, etc. The calculator has 6 levels of

parenthesis with true algebraic logic. In addition the calculator has ten constant memories and 13 physical constants, and the statistics section includes regression analysis. A rounding function where you can set the number of significant digits is also included.

The liquid crystal display has two lines. The upper line is a 14-column dot matrix display for formulae and messages. The lower line has two dot matrix characters and a 10 digit mantissa and 2 digit exponent display. During formula execution the two dot matrix characters are used to form an interactive input system.

The calculator gives around 790 hours use from the CR2032 lithium battery included.

Size: 131 x 72 x 9.2mm.
Weight: 93g.

Power Graphic FX-7700GE

Casio

NEW!

The Casio FX-7700GE is a powerful scientific calculator featuring a 16 character by 8 line display, 475 functions, 38 programs and 528 memories.

Features include:

- ★ Icon menu mode selection
- ★ Graphic functions and graph mode
- ★ Graph analysis tools
- ★ Differentials and integrations
- ★ Simultaneous and Quadratic equations
- ★ Matrix operations
- ★ Base conversions/calculations
- ★ Standard deviation, Regression analysis
- ★ Data communications with Power Graphic or PC

Battery Life: 200 Hours on 4xAAA Batteries

Student Graphic Scientific Calculator FX-6300G

Casio

This model contains basic scientific functions and graphing capabilities that were selected to meet the needs of students. It provides students with the means to view actual graphs of formulas and equations, and additionally comes with fraction, Base-n and statistical capabilities. The calculator can be programmed to perform complex calculations at the touch of a key and once a calculation is performed, it can be recalled at the press of a key for modification or for input of new values. Formulas and functions can be entered just as they are written – the calculator automatically assigns priority according to the locations of arithmetic operations, exponents, functions and parenthesis. The calculator comes complete with 20 built-in scientific graphs that can be drawn at the touch of a key, and user generated graphs can be drawn simply by entering the function (formula) after pressing the 'graph' key. Four graphic analysis tools (trace, zoom, plot/line and graph scroll), help to pinpoint exactly the required information, right on the graph itself. Bar graphs and normal distribution curves for single-variable statistical calculations, and regression lines for paired-variable statistical can also be displayed. A 400-step program area provides plenty of room for storage of often repeated programs. Formulas are input just as they are written, without any special programming language. Up to 10 programs can be stored in memory simultaneously. The basic functions include negative numbers, exponents, parenthetical addition/subtraction/multiplication/division, trigonometric/inverse trigonometric functions (units of angular measurement: degrees, radians, grads), hyperbolic/inverse hyperbolic functions, logarithmic/exponential functions, reciprocals, factorials, square roots, cube roots, powers, roots, squares, decimal-sexagesimal, π , random numbers, absolute values, integers and fractions.

General Specification

Power supply: 2 x lithium batteries (CR2032)
 Battery life: 350 hours approx.
 Auto power off: 6 mins approx. after last key operation
 Dimensions: 142 x 73 x 10mm
 Weight: 84g.

Supplied with a slide-on hard case that fits over the back or front, for protection.

Programmable Scientific Calculator FX-3900P

Casio

The FX-3900P is a powerful programmable scientific calculator that allows the user to perform calculations many times over with a range of values, by recording the keystrokes that are necessary to make up the calculation. The calculator has a two line dot matrix screen that allows programming, and editing of previously entered programs, to be viewed. Thus previously entered formulae, stored in the six constant memories, can be recalled after execution for viewing and editing and re-used at any time or programmed to be repeated over and over as often as is required. This is a full function unit with operators shown on the display and will calculate averages and standard deviation, logarithms, polar and rectangular conversions and register exchange, using engineering notation to display results. All trigonometric functions are supported, including hyperbolic and arc of all functions, operating in degrees, radians or gradients. The results can be converted to and from decimal, degrees, minutes and seconds. The unit supports calculations using up to 18 sets of parentheses over six levels with permutations and combinations; maths functions include square, square root, cube root, reciprocal, sign change, factorial and powers with Pi(π) held as a constant. Other features include: Linear regression; numerical integration using Simpson's rule; conditional jumps; memory retention when power is switched off; generation of random numbers; a rounding function that allows the fixing of the number of significant digits.

Specification

Power supply: 1 x CR2025 lithium battery (supplied)
 Battery life: 6,000 hours average

DATABANKS

Credit Card Data Calculator

Casio

A small data calculator with a Qwerty typewriter style key layout, that can store up to 50 items. Each item can be 8 characters and 24 numbers, maximum. Private information can be password protected. As well as normal calculator functions, there are conversion function memories that can be used for metric to imperial or currency conversions. Powered by one CR2025 lithium battery.
 Size: 100 x 64 x 7.7mm. Weight: 32g.

Pocket Size Data Bank

A pocket size LCD data bank with clock, telephone, directory with secret data area, and calculator mode. The upper line of the 2 x 12 character display consists of 5 x 5 dot matrix, and the lower line consists of 7 segment numeric characters. The internal memory of 445 characters allows approximately 26 data entries if 8 characters for name and 12 digits for telephone number are entered. The names and telephone numbers can be recalled by direct, sequential and repeat data search methods. Additional features include: 'secret' feature (up to eight characters) for security protection, 12/24 hour selectable time format, 10 digit calculator with single memory, 200 year calendar (1901-2099), and auto power off after 3 mins.

Specification

3-Line LCD Pocket Size Data Bank

A compact pocket size 3 line LCD data bank and organiser. The upper line consists of twelve 5 x 5 dot matrix, the middle line of twelve 8 segment numeric characters, and the bottom line of twelve 7 segment numeric characters. The 10k of memory stores over 200 names and numbers or over 100 appointments. The telephone and address directory stores name, company, address and two telephone numbers. Names and telephone numbers can be recalled by direct, sequential, or repeat data search methods. This feature packed data bank includes: appointment reminder with alarm (schedule), home date and time feature, daily alarm, world time for 32 cities, 'secret' feature for security protection of telephone data, 12/24 hour selectable time format, 10 digit calculator with single memory, direct or sequential search by name or company information, available memory feature and 'memory full' indication, selectable on/off key tone output, and auto power off after 6 minutes.

Specification

High Capacity Data Bank DC-7500

Casio

The DC-7500 is a personal data bank with a big, easy to read 3-line display and a keyboard layout identical to that of a standard typewriter. Press a key and you get access to a telephone directory, schedule keeper, world time, alarm function, a conversion function and a calculator. The telephone directory can hold approximately 500 entries. Data can be recalled either by scrolling through the data items, or by entering the first letters of the text entry required. A combined total of approximately 112 items may be stored in telephone

directory mode and schedule keeper mode. The conversion function can convert between two units of measurement or two monetary units. Eight data items are programmed in the memory of the unit, and user conversion memories are provided to let you program your own conversion units. The world time function shows the current time in any one of 29 time zones around the world. The home time zone includes both an hourly time signal and daily alarm.

A further feature is a 'Secret Area' that protects data from unauthorised access and requires a password to gain access.

Additional facilities include low battery indicator function; 12-digit arithmetic calculations; constant calculations, memory calculations; 24-digit approximations; percentage calculations; function command signs.

Pocket Digital Diary SFA10

Casio

The SFA10 is in the latest style of folding digital diaries, providing a large range of facilities in a compact, pocket-sized case. This digital diary is provided with a positive click-effect QWERTY keyboard, a large LCD and on-screen icons for ease of mode selection. Data management is easy with the integral search facilities that help to maintain schedules, memos and a telephone directory. Other features include six currency conversion memories and world time selectable from 29 zones for the world traveller, a daily alarm, a reminder facility and schedule alarm for those at the leading edge of business. This diary also has a communications link facility that allows it to communicate with other SFA10's.

Pocket Digital Diary SF-4300A

Casio

- ★ Telephone directory
- ★ Schedule
- ★ Memorandum
- ★ Calendar
- ★ Reminder
- ★ Home and world time
- ★ Data transfer

The Casio SF-4300 is a truly pocket sized digital diary, packed with powerful useful features to help organise your day.

In addition to the standard diary functions, the unit features a Reminder Mode to help you keep track of events that occur once a year, month, or day. Simply input a reminder message, and you can program it to appear at any preset time.

Additional features include a tactile 'qwerty' keyboard, a confidential Secret function and a data transfer capability, enabling the SF-4300 to transfer data between two SF units or a personal computer.

Palm Top Digital Diary with Spreadsheet SF4600

Casio

The SF4600 is the very best in personal data management and features a positive click-effect QWERTY keyboard with a large easy-to-read LCD. Data management is simplified by the versatile search functions that can display the information you need in an instant. In addition to the telephone directory and

schedule keeper, this diary features calendar, world time, reminder, memo and calculator functions, plus the ability to exchange data with a personal computer or another diary. Six user-definable items allow you to record such things as birthdays, hobbies, or any other information, under separate search headings for quick recovery of the desired data. A 'secret' function, allowing data access only to those with the correct password, is available to protect private information. The world time function provides access to the current time in 29 time zones.

Specification

Digital Diary and Personal Organiser SF9600

Casio

This unit features 64kB of on-board memory, and a 32-column by 6-line liquid crystal display allows information to be easily viewed and edited. The Digital Diary provides a business card library, storing company name, personal name, position, telephone number, etc. Data is automatically sorted into alphabetical order for easy reference. Another feature is the telephone directory, providing apart from the usual name, telephone number and address information, data on birthdays, hobbies, etc., can also be stored. A memo function allows all types of information to be entered with speed for ready access, the information held can be easily recalled, edited and updated. The large screen displays two calendars simultaneously, and days that have been scheduled using the schedule keeper function are automatically marked. Timetables can be displayed to show schedules for particular week or day. Schedule alarms can be preset to warn of the approach or arrival of an appointment, each item can be preset with its own independent alarm. Home time and world time can be displayed in the time function mode. Personal and private data can be stored under the protection of a password to ensure only you can access it.

DIGITAL DIARY SF-8500 WITH 3D SPREADSHEET Casio **NEW**

- Spreadsheet
- Telephone directory
- Business card
- Schedule keeper
- Memorandum
- Calendar
- Home and world time
- Data communication

The Casio SF-8500 is a powerful personal organiser with many features to help you organise your day. Apart from the normal calendar and business card, the SF-8500 features world time and a powerful spreadsheet. Now complex data, previously the domain of a desktop PC can be carried in the palm of your hand, since the Lucid 3-D® spreadsheet is Lotus 1-2-3® compatible. Data can be transferred between the SF-8500 and any other SF unit or, using the optional interface unit, a PC.

The SF-8500 has a fast, easy to use tactile keyboard, and large 32 column by 6 line LCD display. The case is attractively contoured and will easily fit the slimmest pocket. Supplied with batteries, and comprehensive instruction manual.

Specification

Display: 32-Column x 6-Line LCD

Did You Know?

Charles Babbage (1791 to 1871) was a prolific writer, inventor, mathematician, philosopher, scientist, mechanical engineer and industrial manager. The Government of the day gave him money to build his 'difference engine' - the first computer. However, he lost interest in the machine, and started work on a better machine - the 'analytical engine'. Unfortunately, he failed to complete this machine as well, and died a disappointed man.

COMPARE OUR PRICE & QUALITY – SAVE MONEY TODAY!

Palm Top Digital Diary with Spreadsheet SFR20

Casio

The SFR20 is a digital diary that puts computer processing power into the palm of your hand. The big 40 column by 10 line display allows you to view more of your data at a glance and, of all the functions provided on this unit, you will find this most useful with the spreadsheet. This function puts the diary streets ahead of its rivals and is data compatible with the popular LOTUS 1-2-3 PC Spreadsheet. Data can be transferred between an IBM compatible computer and the digital diary, or any digital diary, using the comprehensive data communication facilities provided. The spreadsheet size is 9,999 rows by 254 columns maximum, and is 3-dimensional with any cell in any file. There are eight built-in templates, including balance sheet and amortisation table, plus a wide selection of mathematical and data processing functions. Other features of the diary include: telephone directory; business card file with auto sort; schedule file; schedule alarm; a 199 year calendar; memo file; free file; 'to do' list; reminder with alarm; home and world time; secret password protection.

Specification

Display: 40 column x 10 line
 Memory: 256Kb

Digital Diary with Icon Display SF8350

Casio

A feature packed digital diary with a wide 32 x 6 line display, and a 64k memory that allows approximately 2700 telephone numbers to be stored. A unique feature of this digital diary is the multi lingual message capability. All display messages can be produced using any one of nine different languages (English, German, French, Italian, Spanish, Swedish, Polish, Czech, Hungarian). Built-in functions include: business card management function for storage of company name, title, fax number etc.; schedule function with timetable display, and any two month calendar display (between Jan. 1901 - Dec. 2099) with any day's schedule being recalled from calendar display; a clock with world time function and scrolling world map to fix world time location; a daily alarm and schedule alarm; reminder function for anniversaries etc.; telephone

function, memo function, letter memory, secret function, edit function, and auto display. A novel feature is the use of graphic icon symbols which make operations easier to understand and use. The diary uses two CR2032 lithium batteries for the main power source and one CR2032 for memory back-up.

MINIATURE FM RADIO

This miniature, auto-tuning, FM radio receiver is a product of state of the art miniaturisation and produces a quality of reception that is normally only expected from radios many times its size. This little radio is provided with an 'on/off' switch, a 'seek' button and a 'reset' button and a pair of earphones, attached to 800mm of cord, that also doubles as the aerial. The 'seek' and 'reset' buttons are used for tuning. To operate, the 'reset' button is pressed once. This sets the frequency at the low-end of the tuning range (i.e. 88MHz).

Then the 'seek' button is pressed once for each station that is automatically tuned in to, until the desired station is found. If you have a favourite station, then tuning in is not required every time the radio is switched on, as the last station selected is always remembered when the power is switched off.

GREAT VALUE!
£14.99

MOVING COIL METERS

Signal Strength Meter

A square-faced signal strength meter which may be back-lit to show up a green scale. Scale is marked 'Signal' and 0 to 5 for calibration.

Sensitivity: 250µA FSD
Internal resistance: 675Ω ±5%
Dimensions: 40 x 40 x 29mm

Order Code	Type	Price each
LB80B	Sig Strength Meter	£3.49

Dual VU Meter

Two VU meters marked 'R' and 'L' for use with stereo equipment. The meter may be back-lit to illuminate green and red scale. Scale is marked from -20 to 0dB in green, then 0dB to +3dB in red.

Sensitivity: 150µA at 0dB,
280µA at FSD
Internal resistance: 100Ω
Dimensions:
Overall: 80 x 40 x 23mm deep
Scale: 45 x 36mm
Scale is raised by 2mm

Order Code	Type	Price each
YQ47B	Dual VU Meter	£6.99

5A DC Meter

A neat, clear 5A DC meter, ideal for car battery chargers, or high current power supplies. The scale is colour graded for easy reading; blue from 0 to 2.5A, green from 2.5 to 3.5A and red from 3.5 to 5.5A. Connections are by 1/2in. Lucar style push-on receptacle (HF10L).
Overall size: 56 x 48 x 35mm.
Scale size: 50 x 28 x 4mm (raised).

Order Code	Type	Price each
BZ32K	5A DC Meter	£2.99

Rectangular Meters

A range of modern styled panel meters with snap-on plastic covers which can be removed to change scales or to fit scale illumination bulbs (please note that we cannot supply alternative scales). Plastic cover has a black lower portion with zero adjuster. The movement is wired to the larger pair of terminals at rear which include solder tags retained by M2.5 screws.

Front face size: 60 x 46mm
Overall depth: 42mm
Panel cut-out: 38mm (1.5in.)
Accuracy: 2%

The following types (full scale deflection: FSD) are available.

FSD	Internal resistance	Scale marked
100-0-100µA DC	2200Ω	In 10µA steps
50µA DC	4300Ω	0 to 50µA in 1µA steps
100µA DC	3750Ω	0 to 100µA in 2µA steps
1mA DC	400Ω	0 to 1mA in 20µA steps
100mA DC	0.8Ω	0 to 100mA in 2mA steps
1A DC	0.1Ω	0 to 1A in 20mA steps

Scale Illumination Lamps

A pair of wire ended bulbs designed to operate at 6.3V. To use the bulbs with the rectangular or large meters, remove the snap-on front cover. Carefully remove the scale, at all times avoid damaging the needle and do not lose the two small screws.

For 6V Operation

Strip and solder the ends of four short lengths of fine gauge flexible wire of 1mm or less outer diameter, e.g., light duty connection wire. Slide 1 1/4in. lengths of 1mm sleeving over each to insulate the bulb wires. Secure each bulb into one of the holders provided either side of the zero adjuster arm using a drop of adhesive similar to Bostik, Evostik etc. Carefully run each pair of wires from each bulb to the top rear of the meter body, and push them through the hole at each small solder tag at the rear. Trim to length and strip and solder the wires to the centre of each solder tag, make sure both lamps are wired in parallel across the two tags. Make sure the lamps do not foul the needle, meter movement or front cover. Replace front cover. To use, apply 6V AC or DC to the small pair of rear terminals on the meter.

For 12V Operation

Procedure is identical to above except that only two 1mm wires are needed and the bulbs are connected in series across the two solder tags. To use apply 12V AC or DC to terminals.

Current consumption, each bulb: 45mA @ 6V
Dimensions: 10mm x 4mm dia.
Lead length: 20mm

Large Meters

Large moving coil panel micro-ammeters having a 4in scale length. Calibrated 0-50 or 0-100, but front plastic cover unclips to facilitate fitting different scales to your design. (Please note that we do not stock spare scales). Dimensions: 110 x 82 x 46mm deep. Internal resistance 50µA: 4300Ω; 100µA: 3750Ω. To convert these meters to read larger currents use the following formula:

$$\frac{x}{\text{FSD required (in amps)} - (y \times 10^{-6})} = R$$

To convert this meter to a voltmeter use the following formula:

$$\left(\frac{\text{Full scale voltage required (V)}}{y \times 10^{-6}} \right) - r = R_2$$

where R is the resistance required directly across the meter; R₂ is the resistance required in series with either lead; x is 0.215 for the 50µA meter and 0.375 for the 100µA meter; y is 50 for the 50µA meter and 100 for the 100µA meter; and r is 4300 for the 50µA meter and 3750 for the 100µA meter.

MOVING IRON METERS

A range of modern styled panel meters which have a transparent plastic cover and a white base. The coil is exposed at the rear and a set zero adjustment is not provided.

The following types are available.

Range	Internal Resistance	Scale marked
2V to 15V	58Ω	0 to 2V then to 15V in 0.5V steps.
0.5A to 5A	0.028Ω	0 to 0.5A then to 5A in 0.1A steps.
2A to 15A	0.004Ω	0 to 2A then to 15A in 0.5A steps.
4A to 25A	0.0018Ω	0 to 4A then to 25A in 0.5A steps.

Front face size: 69.4 x 53.4mm
Overall depth: 29.1mm
Panel cut-out: 40mm diameter
Accuracy: ±5%

Suitable for AC or DC operation.

Order Code	Type	Price each
RX92A	Meter MI 15V	£12.89
RX90X	Meter MI 5A	£12.89
RX91Y	Meter MI 15A	£12.89
RX93B	Meter MI 25A	£14.49

DIGITAL PANEL METERS

LED Type

A compact low-cost LED Digital Panel Meter having a high brightness display. The meter is fitted with high efficiency 11mm LEDs and is supplied with a circularly polarised red filter and bezel giving a high contrast display. Auto-zero, auto-polarity, programmable decimal points and 200mV fsd are standard features and the meter may be easily programmed by the user to read volts, current etc. May be used in single-ended or differential mode, or to measure floating inputs.

Specification:
Accuracy (±1 count): 0.05% typical (0.1% max.)
Linearity: ±1 count
Sample rate: 3 per second
Temp. stability: 150ppm/°C
Temp. range: 0°C to 50°C
Supply voltage: 5V (5.5V max.)
Supply current: 100mA (200mA max.)
Max. DC input voltage: ±20V
Input impedance: 100MΩ
Overall dimensions: 72 x 36 x 27mm deep
Panel cut-out: 68 x 33mm.

Supplied with connectors, bezel, mounting hardware and full instruction sheet.

Order Code	Type	Price each
FM85G	LED Panel Meter	£33.75

THE BEST
OF SERVICE

10mm LCD Type

A uniquely compact LCD DPM with pins designed to plug directly into a 28-pin DIL socket. The meter may be panel mounted using the separate snap-in bezel (supplied). The low profile bezel incorporates a flat reverse-printed window giving a superb appearance. The meter features auto-zero, auto-polarity, 200mV FSD, 10mm digit height and programmable decimal points. On board solder pads for essential interconnections make selection of operating mode quick and easy with the minimum of external wiring. Very low current consumption allows long battery life. A whole range of useful annunciators are available on separate pins.

Specification:

Accuracy (±1 count): 0.05% (0.1% max)
Linearity: ±1 count
Sample rate: 3 per second
Temperature stability: 100ppm/°C
Temperature range: 0°C to 50°C
Supply voltage: 7.5V to 15V (9V nom.)
Supply current: 150µA
Max DC input voltage: ±20V
Input leakage current: 1pA (10pA max.) (V_{in} = 0V)
Low battery threshold: 7.5V
Overall dimensions: 40 x 20 x 7mm thick
Pin length: 4mm
Display area: 33 x 13mm
Bezel dimensions: 48 x 24mm
Panel cut-out: 45 x 22.2mm

Supplied with detailed instructions.

Order Code	Type	Price each
FD89W	10mm LCD DPM	£26.50

12.5mm LCD Type

A uniquely compact LCD DPM designed to plug directly into a 40-pin DIL socket. The unit is pin-compatible with the 7106/26/36 range of IC's and can be used to directly replace the separate parts otherwise required. The meter may be panel mounted using the separate snap-in bezel supplied. The low profile bezel incorporates a flat reverse-printed window giving a superb appearance. The meter features auto-zero, auto-polarity, 200mV FSD, 12.5mm digit height and programmable decimal points. On board solder pads for essential interconnections make selection of operating mode quick and easy with the minimum of external wiring. Very low current consumption allows long battery life. A whole range of useful annunciators are available on separate pins.

Electrical specification as 10mm type left except:

Overall dimensions: 52 x 25 x 7mm thick
Pin length: 4mm
Display area: 45 x 16mm
Bezel dimensions: 60 x 30mm
Panel cut-out: 57 x 27mm
Supplied with detailed instructions.

Order Code	Type	Price each
FD88V	12.5mm LCD DPM	£26.50

Digital LCD Volt Meter

A compact, low cost digital volt meter (DVM) which consists of a PCB based module for mounting in existing equipment, behind a front panel or for making a dedicated voltmeter type instrument. The LCD is 3½ digits with a digit height of 13mm. The input is up to 200mV with a full scale at ±199.9mV with an accuracy of ±0.1% +1 digit. The module is capable of performing both digital voltmeter and ammeter functions, depending on how the input is configured with extra resistor chains (examples are shown in the instructions supplied). Applications can include custom power supply monitoring and other specialised voltmeter and ammeter uses. Input power is in the range of 9 to 12V DC and can be from battery or power supply.

The panel meter uses 7106 IC which is a high performance, low power CMOS device and specifically designed as a 3½ digit analogue to digital converter. Input impedance is extremely high, making it very easy to calculate resistor chain values without any danger of neglected input impedance introducing errors. An on-board preset can be used to precisely calibrate the circuit against incoming voltage levels.

Specification

Input impedance:	1,000MΩ
Accuracy:	±0.1% + 1 digit
Measurement range:	±199.9mV
Resolution:	100µV
Indication method:	LCD
Power supply:	9 to 12V DC
Current drain:	1mA typical
Operating temperature range:	0°C to 60°C

The module measures just 70 x 50 x 15mm high and has four M3 fixing holes at the corners on 58 x 39mm.

Order Code	Type	Price each
GW01B	DVM Meter Module	£11.99

PROBES AND TEST LEADS

Spring Contact Probes

The CSP contact probes have nickel-plated copper barrel with a gold-plated beryllium copper plunger, extended through the barrel to produce the solder tag. A stainless steel spring provides tension to the plunger enabling the tip to make good contact with the point under test. Current capability is 3A continuous.

Concave Type

The CSP-2A contact probe has a non-slip concave conical tip, ideal for use on solder joints and similar surfaces.

Order Code	Type	Price each
L199H	Concave Probes 2A	80p

Convex Type

The CSP-2E contact probe has a convex conical tip, with a small surface area, ideal for use on fine pcb tracks, solder joints and plated-through holes.

Order Code	Type	Price each
UM00A	Convex Probes 2E	80p

P-Series PCB Test-Jig System Contact Probes

The contact probes are 25mm long, gold sleeved pins which contain a spring loaded tip. When the PCB to be tested is fitted into the jig, the sprung contact tips will press against the preselected PCB solder pads. The range of probes include conical, hollow cylindrical and toothed cylindrical tips. The P-2 series are designed to be mounted into the insulated base board of a test jig which includes the PCB edge securing clamps (see below), and has different pin sizes. Type R-2V-2 is 0.64mm diameter, and the circular pin receptacle type R-2VC has a diameter of 1.46mm. The probes have a current rating of 3A continuous. The contact resistance is less than 50mΩ.

Concave type

Cylindrical tip with a concave centre, used for connection to a soldered component lead on a PCB pad.

Order Code	Type	Price each
UM01B	Concave Probes	80p

Convex type

Convex cylindrical tip, used for connection to plated through holes, eyelets and open unused pads.

Order Code	Type	Price each
UM02C	Convex Probes	80p

Toothed type

Cylindrical tip with small teeth on top, used for connection to short component leads. The teeth provide positive electric connection.

Order Code	Type	Price each
UM03D	Toothed Probes	80p

Square receptacle

A square pin projection receptacle for holding the above probes. Fits into a 0.5mm hole.

Order Code	Type	Price each
UM04E	Square Receptacle	42p

Circular receptacle

A circular pin projection receptacle for holding the above probes. Fits into a 1.5mm hole.

Order Code	Type	Price each
UM05F	Circular Receptacle	38p

Printed Circuit Board Clamps

A plastic moulded clamp for holding printed circuit boards of up to 3mm max. thickness. The clamp can also be screwed onto a board as part of a jig assembly for testing purposes. The clamp has been designed to be used with the various contact probes, so the PCB sitting on the probes with the clamps holding the board in place. A lever with a thumb platform allows the PCBs to be removed with ease, whilst a wide base enables the user to screw the clamp into the desired position.

Base measures:	34 x 25mm
Height to PCB level:	12mm
Total height:	30mm

Order Code	Type	Price each
KU16S	PCB Clamps	99p

Miniature Probe Clips

Ideally suited for use with our extra flexible wire, these probe clips feature a spring-loaded wire hooked probe which retracts into the probe moulding. Two types are available. The 43mm type is available in black, blue, green, red, white or yellow and the 57mm type in black, green or red. Probe material is phosphor bronze plate 0.3mm thick on small and 0.4mm thick on larger type. Housing is nylon. Sold individually.

Dielectric strength: 2kV for 1 minute
Insulation resistance: >100MΩ at 500V DC

Dimensions

	43mm	57mm
Length	43mm	57mm
Cap diameter	8mm	13mm
Cap stroke	3.5mm	4mm
Probe tip	2 x 3mm	2.8 x 4.6mm
Wire entry hole	2.2mm	3mm
Probe length	24mm	40mm

Order Code	Type	Price each
FE16S	Sub-Min Probe Black	49p
FE17T	Sub-Min Probe Blue	49p
FE18U	Sub-Min Probe Green	49p
FE19V	Sub-Min Probe Red	49p
FE20W	Sub-Min Probe White	49p
FE21X	Sub-Min Probe Yellow	49p
YX57M	Min Probe Black	60p
YX59P	Min Probe Green	60p
YX60Q	Min Probe Red	60p

Probe Clip Sets

Sets of the sub-miniature and miniature probe clips described above previously. Each set contains twelve probe clips, two of each colour, black, blue, green, red, white and yellow. Each colour pair is connected together by a wire of the same colour such that the set contains six different colour test leads. Leads are 500mm long tip to tip.

Order Code	Type	Price each
FA96E	S-Min Probe Clip Set	£6.99
FE22Y	Min Probe Clip Set	£7.99

Probe Clip

Deltron

Probe with a positive spring-loaded hook grip for use in confined spaces. Fully insulated, with acetal mouldings and gold-plated contact. Screw or soldered connections. One red and one black. Supplied in pairs only. Overall length 83mm.

Order Code	Type	Price each
HF21X	Probe Clips	£1.49

Solderable Test Prods

A pair of test probes with plastic body, one red and one black, which can be unscrewed so that a cable can be soldered into the threaded well of the tip. Together with the required wander plugs or crocodile clips, and using preferably extra-flexible wire, it is possible to make up your own test leads to your own specifications. The prods have 27mm long tips with 100mm long x 10mm diameter handles.

Order Code	Type	Price each
FK32K	Solder Test Prods	99p

Test Probe Leads

Moulded 2mm

A red and black test lead pair. Terminated in 2mm plugs to suit many multimeters etc. Other end terminated in heavy duty moulded PVC test prods. Heavy duty extra-flexible PVC covered wire 750mm long.

Order Code	Type	Price each
HF32K	Moulded Test Probe	£1.29

Moulded 4mm

A red and black test lead pair. Terminated in moulded 4mm plugs with 4mm socket in the plug. Other end terminated in heavy duty moulded PVC test prods. Heavy duty extra-flexible PVC covered wire 850mm long.

Order Code	Type	Price each
HF33L	4mm Test Probe	£1.99

Silicone Rubber 4mm Safety Test Leads

Suitable for use with analogue and digital multimeters the safety lead set comprises black and red test lead assemblies in a plastic wallet. The test prods are permanently attached to silicone rubber covered leads and for added safety the plugs have spring loaded shrouds. The prods have insulation piercing tips with an integral 4mm plug which in addition to normal probe use enables it to be conveniently plugged into a 4mm socket.

Order Code	Type	Price each
FS95D	Safety Lead 4mm	£6.49

Probe to Croc Clip Leads

A red and black pair of test leads with a 57mm probe clip at one end and a 35mm crocodile clip at the other. Each lead is 1m long tip to tip. Crocodile clips have a vinyl sleeve 42mm long red and black to match wire and clip. Sold only in pairs.

Order Code	Type	Price each
FE23A	Probe/Croc Clip Lead	£2.75

Test Lead Kit

A universal test lead kit comprising one red and one black extra-flexible lead 1m long, and terminated in either a 4mm plug at one end and a test prod at the other, or any combination of terminators; the test prod having a 27mm long tip in a 86mm long x 9mm diameter handle. The 4mm plugs can be plugged into one of three alternative terminations comprising 4mm (minimum) space terminals, 38mm long crocodile clips (maximum gape 8mm), or 20mm long x 2mm diameter needle point plugs, all red/black colour matched pairs.

Order Code	Type	Price each
FK21X	4mm Test Lead Kit	£2.99

Logic Probe

A high quality logic probe for use with TTL, DTL and CMOS IC's. The probe has a memory function which can detect the occurrence of single pulses or logic level. One shot and low repeat rate narrow pulses which are nearly impossible to see even with a fast scope, are easily detectable and visible. The probe has three LED's, red for high logic level, green for low logic level and yellow for pulse. The intensity of the pulse LED is directly proportional to the duty cycle of the signal observed. All single pulses or pulse trains are recognised from 30ns up to 500ms. The probe is supplied with approx. 500mm lead terminated in a red and black probe clip. In use the red clip should be connected to the positive of the circuit under test, and the black to the negative. When making the connection, the yellow LED may blink once or twice, but if it continues to blink, the power supply has excessive ripple. With the switch in TTL position a +5V supply must be used, but in CMOS position voltage may be between +3V and +18V DC.

Pulse Detector: High speed pulse train or single events (+ or - transitions) activate 500ms pulse stretcher. In memory position, first transition lights and latches LED.

Detection Levels

Logic Lights	LED	DTL/TTL	CMOS
1	Red (Hi)	>2.3V ±0.2V	>70% of V_{cc} ±10%
0	Green (Lo)	<0.8V ±0.2V	<30% of V_{cc} ±10%
Bad	No indication	0.8V to 2.3V	30% to 70% of V_{cc}

Detectable Pulse Width: 30ns min
Input Impedance: >1MΩ

METAL & VOLTAGE DETECTOR

A very useful instrument for tracing pipes, detecting nails and screws etc. in walls. In addition to detecting metals it can also detect electric cables that are connected to the mains even if no current is flowing. To distinguish between metal objects and mains cables an LED indicator and buzzer will give a continuous tone and light for metal objects and an intermittent tone and flashing light for mains cable. The detector is housed in a tough plastic case and is powered by one 9V PP3 battery (not supplied).

GREAT VALUE!
£6.99
YP30H

Input Signal
Frequency: >17MHz
Input Overload Protection: ±220V DC/AC for <15s
Probe Power: 25mA to 40mA at 5V to 15V DC

Probe Power
Protection: ±20V max with lead reversal protection

Dimensions: 212 x 26.5 x 18mm

Order Code	Type	Price each
FY73Q	Logic Probe	£12.99

Accessories for Logic Probe

An inset plug on the side of the Logic Probe described above permits the connection of one of two accessories. Approximately 250mm of wire terminated in a socket which connects to plug on side of Logic Probe. A red wire terminated at the other end in a red Probe Clip extends the probe. Or a black wire terminated at the other end with a crocodile clip in a black vinyl sleeve extends the ground connection. Sold separately.

Order Code	Type	Price each
FD34M	Logic Probe Clip Extn	£1.49
FD35Q	Logic Probe Grnd Extn	£1.20

Logic Pulser

A handy and simple to use logic pulser designed to inject pulses directly into logic circuits for powered-up circuit tests and fault finding, suitable for use with TTL, DTL, CMOS and various other kinds of ICs. Using the logic pulser you will not only find wiring errors but other component faults. The pulser is simply powered by direct connection to the test circuit's own supply rails using the red and black probe clips attached to the pulser's 580mm long supply cable. The probe generates alternate and very short duration (10µs) positive and negative pulses which can source or sink up to 100mA. As a result the probe can inject pulses into any part of a digital circuit and overcome the output impedance of the previous stage to produce a result, whether the potential at this point is logic high or low, but because of the extremely short duration of the pulse there is only absolute minimum risk to the preceding stage.

Used in conjunction with a logic probe, oscilloscope or similar monitoring instrument, the pulser can be used to 'trace' through a logic system. In order that results can be observed by the human eye using a monostable driven LED indicator or similar the pulse train can be as slow as 0.5 pps (positive or negative), or the rate can be switched to a faster 400 pps. In addition three pins are provided on the outside of the case to which crocodile clips can be attached, providing a square wave output with 50% duty cycle, and a sync. pulse input for synchronisation with oscilloscope, signal generator etc. A third pin serves as a common ground for these if required.

Specification

Supply voltage max: 20V DC
Nominal supply range: 3 to 15V DC
Sync input impedance: 1MΩ
Pulse repetition rate: 0.5 or 400 pps
Pulse width, 100mA load: 10µs

YU56L	Logic Pulser	£14.99

IC Test Clips

A comprehensive range of double row clips for gaining access to the connector pins of dual-in-line ICs, from 8 pin DIL devices up to 40 pin DIL. Simply clip the spring loaded tool over the IC while in situ and connect the test probes, clips etc. to the pins at the top.

Order Code	Type	Price each
JM28F	IC Test Clip 8	£3.99
JM27E	IC Test Clip 14	£4.25
FY74R	IC Test Clip 16	£3.99
JB70M	IC Test Clip 20	£5.49
JB71N	IC Test Clip 24	£6.99
JB72P	IC Test Clip 28	£6.99
JB81C	IC Test Clip 40	£9.99

Hand Held Transistor Tester

A transistor tester that will indicate the condition of a PN or NP junction of a semiconductor device whether it be in or out of a circuit. Provided that the circuit equivalent parallel resistance is greater than 330Ω , or the shunt capacitance is less than $47\mu F$, then the tester will determine the integrity of the semiconductor under test. As well as all transistors diodes, rectifiers, LED's and SCR's can be tested. The tester uses only two probes, and a flashing LED indicates an operational, open or short circuit junction as well as the polarity. Uses one PP3 style battery (not supplied). Size 120 x 61 x 20mm. Fitted with red and black test leads 850mm long, terminated with probes.

Order Code	Type	Price each
FK50E	Handheld Trans Testr	£34.99

SENSORS

Gas Sensor

The hot wire gas sensor comprises a matched pair of sensor and compensator both containing heaters made of coils of very fine platinum wire covered with high temperature oxides and a special catalyser. This is housed in an explosion-proof stainless steel double mesh. The catalyser on the sensor consists of several metal elements, whilst the compensator has fine metal oxides, sintered and treated so as to keep the bridge in balance when exposed to changes in temperature or humidity or to the effects of alcohol and other nuisance gases.

The platinum heaters stay at $350^\circ C$ in air, but in the presence of combustible gases, the special catalyser on the sensor promotes oxidation (burning) of the gas around the heater which causes the temperature to rise above $350^\circ C$. This causes a change in the electrical resistance and unbalances the bridge, which can be detected by a suitable electronic circuit.

Specification

Detection method	Hot wire
Gases detected	All fuel gases
Rated voltage	$2.2V \pm 10\%$ across bridge
Response time	Within 10 seconds
Initial stabilisation time	Within 10 seconds
Ambient temperature range	$-10^\circ C$ to $50^\circ C$
Alarm set point	$23.8mV \pm 5mV$

The difference voltage is directly proportional to gas concentrations. With the alarm point set at $23.8mV$, the following concentrations of gas will trigger the alarm:

Iso-butane (butane, propane, LPG etc.)	
iso- C_4H_{10} :	$2000 \pm 120ppm$
Methane (natural gas, town gas etc.)	
CH_4 :	$4080 \pm 210ppm$
Hydrogen gas H_2 :	$3300 \pm 200ppm$
Ethanol (alcohol)	
C_2H_5OH :	$4800 \pm 530ppm$

Rated output 1400ppm:

CH_4 =	6 to 9mV
iso- C_4H_{10} =	14 to 19mV
H_2 =	7 to 12mV
C_2H_5OH =	<10mV

Size: 16mm diameter, 22.5mm high
 Weight: 2.8g

The compensator is marked with a dark blue spot, otherwise the two parts are identical.

Order Code	Type	Price each
FM87U	Gas Detector Sensor	£10.99

Geiger-Müller Tube

An end-window, halogen quenched Geiger tube which will detect alpha and beta particles and gamma radiation. Do not touch the mica window, bend the anode pin or solder directly to the tube body or pin. Solder only to the cathode strap and anode clip supplied.

Specification

Radiation detected:	α, β, γ
Filling:	Neon, argon, halogen
Window areal density:	1.5 to $2mg/cm^2$
effective diameter:	9mm
material:	Mica
Cathode thickness:	0.3mm
areal density:	$250mg/cm^2$
effective length:	38mm
effective diameter:	14.4mm
material:	Chrome-iron
Tube overall length:	54mm
diameter:	15mm
Starting voltage:	325V max
Operating voltage:	500V (450V to 600V)
Plateau slope:	0.06%/V max
Dead time:	90 μs min
Background (shielded with 50mm Pb and 3mm Al):	10 counts/minute max
Weight:	8g
Operating temperature range:	$-40^\circ C$ to $+70^\circ C$
Dose rate range:	10^{-3} to $10^2 mGy/h$ 10^{-4} to $10R/h$
Life at $25^\circ C$:	5×10^{10} counts

Order Code	Type	Price each
FP96E	A1 Geiger Tube	£49.99

ANALOGUE MULTIMETERS

A range of quality multimeters having some models designed for home/hobbyist use and some for the professional. The meters in the range offer truly excellent quality at the price.

Pocket Multimeter

Precision Gold

A rugged, easy to operate, general purpose multimeter having a sensitivity of 2000Ω/V for DC and AC voltage ranges. Its compact size and ease of portability makes it ideal for those situations where fast, accurate measurements are required. Ideal for use in the house, boat, car etc.

Ranges:
 DC volts: 10, 50, 250, 500V at 2000 ohms per volt
 AC volts: 10, 50, 250, 500V at 2000 ohms per volt
 DC current: 0.5, 50, 250mA
 Resistance: 0 to 1MΩ (5kΩ at centre of scale) (Minimum reading: 200Ω)
 Decibels: -20 to +56dB, using AC volts ranges

The meter has an accuracy of 4% at full scale deflection for DC and AC voltage ranges, and resistance measurements are accurate to 4° of scale arc. The two-colour mirrored scale has a total arc of 90°. Supplied complete with operating instructions, one red and one black test lead with probes and one battery (replacement type AA size). Dimensions 90 x 60 x 30mm. Weight: 110g.

Order Code	Type	Price each
YJ06G	Pocket Multimeter	£7.99
YN65V	Case CB2K	£1.50

Pocket Multimeter PG108

Precision Gold

The PG108 is a rugged, accurate, easy to operate, pocket sized multimeter with a sensitivity of 2000 ohms per volt for both AC and DC ranges. The linear meter movement offers accurate readings of measurements on all ranges through a 90° arc mirrored scale. The functions included are AC and DC voltage, DC current, resistance, battery check, and decibels. The meter has an accuracy

of 5% of full scale deflection on the AC voltage range and 4% on the DC voltage and current ranges. Resistance measurements are accurate to within a 4° arc of scale length. Zero adjustment is provided for the resistance function. Its compact size and eleven ranges make this multimeter attractive for use in the field as a general purpose instrument or for use in the home by the DIY enthusiast. Supplied with operating instructions, a pair of test leads with probes and a battery (size AA).

Ranges:
 DC volts: 0 to 50, 250, 1000V at 2000Ω/V
 AC volts: 0 to 50, 250, 1000V at 2000Ω/V
 DC current: 0 to 50, 250mA
 Resistance: 0 to 1MΩ (5kΩ at scale centre, minimum useful reading 200Ω)
 Decibels: -20dB to +62dB (on AC voltage range)
 Battery check: 1.5V cells, 9V batteries
 Power supply: 1.5V DC Size AA cell for resistance measurements

Order Code	Type	Price each
GW00A	Multimeter PG108	£12.99
YN65V	Case CB2K	£1.50

Hobby Multimeter

Precision Gold

This analogue Multimeter is a rugged, easy-to-operate instrument offering 10,000Ω/V DC and 4000Ω/V AC sensitivity, with a linear meter movement which provides for accurate measurement of DC and AC voltages, direct currents, resistance and decibels on a 90° arc mirrored scale. The meter uses the most modern components and circuit techniques in a high impact case.

Ranges: 18
 DC volts 0 to 2.5, 50, 250, 1000V
 AC volts 0 to 10, 50, 250, 1000V
 DC current 0 to 10, 250mA
 Resistance R x 10, R x 1k
 Decibels -20dB to 62dB on AC volt ranges

The meter has an accuracy of 4% of full scale deflection for DC voltage ranges and 5% for AC voltage ranges. Resistance readings are accurate to 4% of scale arc. The 18 measuring ranges provided make this meter an ideal instrument for general purpose applications, or for a beginner to electronics who needs an instrument that is not too difficult to operate but at the same time must have most of the basic functions. Also provided with two special 'BAT' test functions for both 1.5V cells and 9V PP3 type batteries. Supplied complete with operating instructions, one red and one black test lead with probes and one battery (replacement type AA size).

Dimensions: 146 x 64 x 32mm.
 Weight: 136g.

Order Code	Type	Price each
YJ76H	Hobby Multimeter	£9.99
YN66W	Case CB10K	£1.36

Multimeter M-102BZ

Precision Gold

A wide range multimeter having a 90° three colour mirrored scale and 40μA F.S.D sensitivity, with a double jewelled precision moving coil movement. A dual silicon diode overload protection system is included with a 1 Amp fuse. The meter has a

sensitivity of 20,000Ω/volt DC, and 8,000Ω/volt AC. There are 23 measuring ranges.

Ranges:
 DC volts: 2.5, 10, 50, 250, 1000V
 AC volts: 10, 50, 250, 1000V
 DC current: 5, 50, 500mA and 10A
 Resistance: 0 to 10kΩ (50Ω at centre of scale) 0 to 100kΩ (500Ω at centre of scale) 0 to 10MΩ (50kΩ at centre of scale) (Minimum reading: 1Ω)
 Decibels: -8dB to +62dB using AC V ranges

The M-102BZ has the additional facilities of a battery test function, for 1.5V cells and 9V power packs, and an audible buzzer so that the meter can be used as a continuity tester. It also has a separate audio input for decibel measurements with an impedance of 600Ω. During the battery testing functions the cells are loaded for a realistic result; the 1.5V cell under test is loaded with 75Ω for 20mA, and the 9V battery under test is loaded with 450Ω for 20mA.

The scale has an accuracy of 4% F.S.D for measuring DC volts, and 5% F.S.D measuring AC volts. When measuring ohms it is accurate to 4° of arc. A full instruction manual is included. The meter incorporates a rugged carrying handle that can also be used as a bench stand. Supplied complete with operating instructions, one red and one black test lead with probes, and batteries (two size AA). Dimensions 133 x 89 x 38mm, not including handle. Weight: 255g.

Multimeter M-2020S

Precision Gold

A quality, comprehensive multimeter having a 90mm, full 90° arc mirrored two-colour scale with a knife edge pointer needle. It features a sensitivity of 20,000Ω/volt DC and 8,000Ω/volt AC, with a rated accuracy of 3% of F.S.D for all ranges.

In addition to the usual multimeter functions this instrument also has a transistor and diode checking facility, which can determine transistor type (npn/ pnp) and operational integrity, by means of one green and one red alternately flashing LEDs, which are very easily interpreted. The green LED flashes if the transistor is an npn type that functions correctly, and the red flashes if it is a working pnp type. If the transistor is open circuit, both flash. If there is a collector-to-emitter short circuit neither LEDs will light.

A front panel 4-pin socket is provided into which the transistor to be tested is inserted. The leakage current of the transistor can also be measured and the scale is marked to show defective types. The diode and LED testing facility uses the resistance ranges, with the added ability to test for reverse leakage current, and measure forward voltage drop.

Ranges:

DC volts: 0.1, 2.5, 10, 50, 250, 1000V
 AC volts: 10, 50, 250, 1000V
 DC current: 50μA, 2.5, 25, 250mA, 10A
 Resistance: 0 to 2kΩ (20Ω at centre of scale)
 0 to 20kΩ (200Ω at centre of scale)
 0 to 2MΩ (20kΩ at centre of scale)
 0 to 20MΩ (200kΩ at centre of scale)
 (Minimum reading: 0.2Ω)
 Decibels: -10dB to +22dB (10VAC range)
 +4dB to +36dB (50VAC range)
 +18dB to +50dB (250VAC range)
 +30dB to +62dB (1000VAC range)

Transistor Tester: I_{CEO}: 15mA, 150mA
 Diode and LED Tester: 150μA, 15mA
 Dimensions: 150 x 100 x 45mm.
 Weight: 365g.

The multimeter includes a polarity reversal switch, overload protection with 2A fuse, and a bench stand. Also has two non-slip rubber feet. Uses 2 x 1.5V AA and a 9V PP3 type battery, supplied. Full operating instructions and one red and one black test lead with safety probes and fully shrouded plugs are included.

Order Code	Type	Price each
YJ08J	A Multimeter M-2020S	£21.99
YN68Y	Case CB25K	£2.99

Multimeter PG102

Precision Gold

The PG102 is a quality rugged, accurate, bench analogue multimeter that has a high sensitivity of 20,000 ohms per volt on its DC range and a sensitivity of 8,000 ohms per volt on its AC range. The linear double-jewelled precision meter movement offers accurate readings on all of its ranges with its 90° arc mirrored scale. The moving-coil movement is protected by a dual diode and a one amp fuse. The functions included are AC and DC voltage, DC current, including a 10A position, resistance, decibel, battery check and audio power level; all selected with a single rotary switch. This multimeter has an accuracy of 5% on the AC voltage range and 4% on the DC voltage and current ranges. Resistance measurements are accurate to within a 4° arc of scale length. Zero adjustment is provided for the resistance function. Three jack sockets labelled 'COM', 'V-Ω-A', and 'DC10A' are provided. With its high sensitivity and range selection this meter would prove to be a useful addition to anyone's workshop. Supplied with operating instructions, test leads with probes, and batteries.

Ranges:

DC volts: 0 to 2.5, 10, 25, 50, 250, 1000V at 20,000Ω/V
 AC volts: 0 to 10, 25, 50, 250, 1000V at 8,000Ω/V
 DC current: 0 to 0.5, 5, 50, 500mA, 10A
 Resistance: 0 to 10k (50Ω at scale centre) 0 to 100k (500Ω at scale centre) 0 to 1M (5kΩ at scale centre) 0 to 10M (50kΩ at scale centre)
 Decibel: -20dB to +22dB on all AC V ranges
 Battery test: 1.5V cells, 9V batteries
 Audio power level: -20dB to +22dB on a 600Ω line
 Power supply: 2 x 1.5V AA cells
 Dimensions: 150 x 100 x 38mm
 Weight: 273g

DIGITAL MULTIMETERS

Calibration Service

Please note that our range of digital multimeters (except ZA37S and YU50E) is now available with a calibration certificate satisfying the requirements of customers having BS5750 registration. The range of digital meters are available, upon request, with either a Standard calibration certificate stating conformance on test, or with a very comprehensive NAMAS calibration certificate detailing all test measurements and uncertainties of Standards used.

All calibrations are traceable to National Physical Laboratory standards and are carried out by a NAMAS accredited laboratory.

Please ring our enquiries line if you require further information regarding ordering or charges for this service.

DIGITAL MULTIMETERS

Pocket Digital Multimeter

Precision Gold

A calculator sized, auto-ranging digital multimeter in a plastic wallet and featuring a 3½-digit LCD readout, continuity test and range hold facility. The leads are permanently connected and fold up into the wallet. In addition to the display and range indication, there is a 'low battery' warning on the LCD panel. The meter is supplied with batteries (replacement type SG13), test leads and instruction manual.

Specification

Display: 3½ Digit LCD

DC volts

Range:	1mV to 200V
Accuracy:	±(2% rdg ±2 digits)

Max. input voltage: ±400V

AC volts

Range:	1mV to 400V
Accuracy:	±(3% rdg ±5 digits)

Max. input voltage: ±400V

Resistance

Range:	0.1Ω to 2MΩ
Accuracy:	±(2% rdg ±2 digits)

Overload protection: 400V RMS

Continuity test: Buzzer sounds if resistance under 200Ω.

921 Digital Probe Multimeter

Precision Gold

A very compact autoranging multimeter with three comprehensive ranges for measuring DC and AC voltage and resistance. The instrument is designed for one handed operation where a standard short or a long reach probe on the instrument is applied to the test point, the circuit being completed by a flying lead terminated in a second probe to which an insulated crocodile clip can be attached. As well as being autoranging the meter also has auto polarity and will show a minus sign for negative values. The 3½ digit LCD display also includes indicators for selected function and low battery warning. The two position thumb switch selects the mode and if held down acts as a continuity tester. In this mode a bleep is sounded if the resistance is approximately 500Ω. At any time the current display can be frozen and retained by a data hold function, very useful while making measurements in awkward places or high voltage situations. All ranges include overrange indication. Supplied with extra long probe tip, negative lead with probe and alligator clip adaptor, batteries (replacement type LR44), carrying case and instruction manual.

Specification

Display: 3½ Digit LCD

DC Voltage

Range	Resolution	Accuracy
200mV	0.1mV	±(0.5% + 2 digits)
2V	1mV	±(0.7% + 2 digits)
20V	10mV	±(0.7% + 2 digits)
200V	0.1V	±(0.7% + 2 digits)
500V	1V	±(0.7% + 2 digits)

Input impedance = 10MΩ for 20V to 500V, 11MΩ for 2V and >100MΩ for 200mV range. Max. input, 700V DC or peak AC.

AC Voltage

Range	Resolution	Accuracy
2V	1mV	±(1.2% + 5 digits)
20V	10mV	±(1.2% + 5 digits)
200V	0.1V	±(1.2% + 5 digits)
500V	1V	±(1.2% + 5 digits)

Input impedance = 10MΩ for 20V to 500V, 11MΩ for 2V range. Max. input, 700V DC or AC peak (40~500Hz).

Resistance

Range	Resolution	Accuracy
200Ω	0.1Ω	±(0.7% + 3 digits)
2kΩ	1Ω	±(0.7% + 2 digits)
20kΩ	10Ω	±(0.7% + 2 digits)
200kΩ	100Ω	±(0.7% + 2 digits)
2MΩ	1kΩ	±(1% + 2 digits)
20MΩ	20kΩ	±(2% + 4 digits)

Overload protection: ±250V DC or peak AC.

Continuity tester

2kΩ range, buzzer sounds at 400Ω approx. Test current = 10μA, max. open circuit voltage ≈ 0.43V. Dimensions: 161 x 30 x 22mm.

POCKET DIGITAL DIARY SFA10

Casio

The SFA10 is in the latest style of folding digital diaries, providing a large range of facilities in a compact, pocket-sized case. This digital diary is provided with a positive click-effect QWERTY keyboard, a large LCD and on-screen icons for ease of mode selection. Data management is easy with the integral search facilities that help to maintain schedules, memos and a telephone directory. Other features include six currency conversion memories and world time selectable from 29 zones for the world traveller, a daily alarm, a reminder facility and schedule alarm for those at the leading edge of business. This diary also has a communications link facility that allows it to communicate with other SFA10's.

Specification

Display:	16 columns x 4 lines
Memory capacity:	28,668 bytes
Power supply:	2 x CR2032 lithium batteries (supplied)
Battery life:	100 hours
Dimensions folded:	120 x 82.5 x 12.7mm
Weight:	88g

GREAT VALUE!

Talking Digital Multimeter

This ingenious 'talking' digital multimeter provides additional safety and convenience when working on mains or high voltage equipment, or in conditions where positioning of the test probes makes reading a meter difficult or impossible. Housed in a slim and easy to hold case, the probes are not detachable, but when not in use, are wrapped round the outside of the case and held in a recess. The probe tips are held in two receptacles on the side of the case for safety. Because of its slim size, the meter can conveniently be slipped into a pocket or toolbox. A 3-position 'voice' switch selects either off, single or auto. In single mode, an announcement is made only when a 'talk' button on the positive probe is pressed, or when there is a change of range in manual mode or change of function. In auto mode, an announcement is made whenever a new reading is captured. Another handy feature is the 'memory' switch, which is used to record the measured data and recall the last memory entry. The 'mem' button is pressed once to record the data, and voice confirmation of the recorded data will follow. To recall the last record, the 'mem' button is pressed and held for two seconds. The meter will hold the current displayed data and speak out the last memory entry. The meter is very easy to use having bright 'easy to read' buttons and switches. The function switch selects off, voltage, ohms and diode check, and a push button selection switch changes from DC to AC, in the voltage measuring mode, or changes to continuity check in the resistance measurement

mode. When the meter is switched on, autoranging is automatically selected, to switch to the manual ranging mode press the 'range hold' button - 'R' is displayed and if voice is on, the meter will speak "RANGE". Pressing the button a second time switches the instrument to the lowest range, and with subsequent button pressing operations the ranges are cycled through. Holding the 'range hold' button down for more than one second reverts to autoranging mode. Additional features include a visual low battery indicator and automatic polarity function, which displays '-' on the display for negative polarity and no indication for positive polarity. The case has a built-in fold-away stand and retractable hook for 'hands-off' operation. Instruction manual supplied.

Specification:

Measuring method:	Dual integration mode
Display:	3.5 digit LCD, max reading of 1999 with auto polarity 2 times/second
Sampling:	
Voltage Range,	
DC:	2V, 20V, 200V, 400V (max)
AC:	2V, 20V, 200V, 400V (max)
Resistance:	200Ω to 2MΩ
Continuity check:	200Ω (max)
Diode check:	0 to 2V
Accuracy,	
DC:	±1.6% rdg ±2 dgts.
AC:	±2.3% rdg ±5 dgts.
Resistance:	±2% ±2 dgts.
Diode check:	±10% rdg ±2 dgts.
Power requirements:	4 x AAA size batteries
Power consumption:	20mW typical (no voice)
Size:	148.5 x 73 x 25.4mm
Weight:	240g approx. (without batteries)

THE BEST OF SERVICE

Academy Range of Low-Cost Digital Multimeters

Digital Multimeter with Test Signal Output PG010

A quality, cost-effective handy multimeter providing measurements over a number of different ranges, and test facilities for diodes, LEDs and transistors. The meter is ideal for the beginner and student working on a budget. The ranges are selected by a single rotary switch and include AC and DC voltage, resistance and a signal source. The switch also selects the test facilities. A 3½-digit LCD screen displays the reading and the polarity indicator. Also shown are the battery low and range overload indicators. With the exception of the 200Ω range, all the resistance ranges are 'low power', which means that accurate measurement of in-circuit resistances can be made, because the test voltage is below that necessary to forward bias a silicon diode junction. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform these measurements on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. Readings on all ranges are sampled at the rate of x2½ per second. Conforms to IEC 1010-1 Standards.

Specification

DC Voltage

Range	Resolution	Accuracy
2V	1mV	±(1.5% rdg + 1dgt)
20V	10mV	±(1.5% rdg + 1dgt)

MAPLIN KEY CALL Phone 01702 556751

Digital Multimeter with Autoranging Frequency Function PG014

A quality, cost-effective multimeter providing measurements over a number of different ranges, test facilities for diodes, transistors and batteries, and a continuity buzzer. The ranges and test facilities are selected by a single rotary switch and include AC and DC voltage, DC current, frequency and resistance. The frequency function is autoranging and the resistance range includes the continuity buzzer which sounds if the resistance is less than 40Ω. A 3½-digit LCD screen displays the reading and the polarity indicator. Also shown are the battery low, frequency range, and range overload indicators. With the exception of the 200Ω range, all the resistance ranges are 'low power', which means that accurate measurement of in-circuit resistances can be made, because the test voltage is below that necessary to forward bias a silicon diode junction. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. The transistor test function allows the actual gain (h_{fe}) to be measured and compared with

other devices. Useful for finding matched pairs, for example. The battery test function is for checking 1.5V and 9V batteries. This loads the battery with a realistic load, to get a true, 'in-service', reading. Readings on all ranges are sampled at a rate of x2½ per second. Current ranges are protected by quick-blow fuses. Conforms to IEC 1010-1 Standards.

Digital Multimeter with Capacitance and Autoranging Frequency Functions PG012

A quality, sensitive multimeter providing measurements over a number of different, very selective, ranges, including plus transistor and diode test facilities and a continuity buzzer. The ranges are selected by a single rotary switch and include voltage, capacitance, frequency, and resistance, which includes the continuity buzzer that sounds if the resistance is less than 40 Ω .

The switch also selects the transistor and diode test facilities. A separate slide switch provides AC/DC selection. The frequency positions are autoranging. A 3 $\frac{1}{2}$ -digit LCD screen displays the reading, the polarity indicator and the frequency ranges. Also shown are the battery low and range overload indicators. With the exception of the 200 Ω and 2000M Ω ranges, all resistance ranges are 'low power', which means that accurate measurement of in-circuit resistances can be made, because the test voltage is below that necessary to forward bias a silicon diode junction. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1k Ω or less. The transistor test function allows the actual gain (h_{fe}) to be measured and compared with other devices – useful for finding matched pairs. Readings on all ranges are sampled at a rate of $x2\frac{1}{2}$ per second. Conforms to IEC 1010-1 Standards.

Specification DC Voltage

Range	Resolution	Accuracy
200mV	100 μ V	$\pm(0.9\% \text{ rdg} + 1 \text{ dgt})$

Digital Multimeter with Frequency and Phase Indicator Functions PG011

A quality, multi-purpose multimeter that provides measurements over a broad selection of different ranges, has a diode test facility, a continuity buzzer and a unique phase indicator function. This function is for checking that the phases of a 3-phase source are in the correct sequence. The ranges are selected by a single rotary switch and include AC and DC voltage, phase, capacitance, frequency, and resistance, which includes the continuity buzzer that sounds if the resistance is less than 40Ω. The switch also selects the diode test facility. A 3½-digit LCD screen displays the reading, the polarity indicator and the phase indicator. Also shown are the battery low and range overload indicators. With the exception of the 200Ω and 2000MΩ range, all resistance ranges are 'low power', which means that accurate measurement of in-circuit resistances can be made, because the test voltage is below that necessary to forward bias a silicon diode junction. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. Readings on all ranges are sampled at a rate of x2½ per second. Conforms to IEC 1010-1 Standards.

FOR TOP QUALITY & VALUE!

Digital Multimeter with Capacitance and Frequency Functions PG013

A quality, cost-effective, sensitive, multimeter that provides measurements over a wide choice of different, very selective, ranges, plus transistor and diode test facilities and a continuity buzzer. The ranges and test facilities are selected by a single rotary switch and include voltage, capacitance, frequency, resistance, transistor h_{fe} and diode test. The resistance range includes the continuity buzzer which sounds if the resistance is less than 40Ω. A separate slide switch provides AC/DC selection. Two jack sockets marked 'VΩ' and 'COM' are provided for the measurement ranges and a 4-way socket is provided for the test facilities. A 3½-digit LCD screen displays the reading and the polarity indicator. Also shown is the battery low and range overload indicators. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. The transistor test function allows the actual gain (h_{fe}) to be measured and compared with other devices. Useful for finding matched pairs, for example. Readings on all ranges are sampled at a rate of x2½ per second. Conforms to IEC 1010-1 Standards.

Autoranging Digital Multimeter with Bar Graph PG019

A superb, general purpose, fully autoranging multimeter which provides measurements over a number of different ranges and functions. The functions are selected by a single rotary switch and include voltage, current, resistance, continuity and diode test. A 'mode' push-button selects the continuity/diode test or AC/DC. The range for each function is selected automatically by the meter, but a 'range' push-button may be used to override the autoranging, to hold a selected range. An LCD screen displays the reading in the form of 3 1/2-digits and a bar-graph display. Readings on all ranges are sampled at a rate of twice per second. The current ranges are protected by quick-blow fuses. Conforms to IEC 1010-1 Standards.

IT'S A FACT!

DECIBELS

The decibel (dB) is the ratio between two quantities, such as power, voltage, current or acoustic pressure. Most sensors, and that includes our ears, have a logarithmic response, which allows them to detect a wide range of intensities.

The ratio in dB of two power levels (P_1 and P_2) is calculated from the formula:

$$\text{dB} = 10 \log (P_1/P_2)$$

If the quantities are voltage, currents or sound pressure levels (X_1 and X_2), then:

$$\text{dB} = 20 \log (X_1/X_2)$$

The dB is not an absolute unit, but certain absolute units using the dB scale have been devised. These include dBµV, dBm and dB SPL.

dBµV is a logarithmic expression of a voltage compared to 1µV, so 76dBµV is equivalent to 6.31mV.

dBm is an expression of a power level compared to 1mW. -20dBm is equivalent to 10µW. Because the unit is a measure of power, 0dBm represents 775mV in a 600Ω impedance but only 224mV in a 50Ω impedance.

dB SPL is a measure of sound pressure level, using 20µPa (micropascals) as a reference, 1 Pascal equals 93.8dB SPL.

PG018 Full Function Digital Multimeter with 3 3/4-Digit LCD

An accurate, versatile multimeter providing measurements over a number of different, very selective, ranges, plus transistor and diode test facilities and a continuity buzzer. The large 3 3/4-digit LCD display provides a very accurate readout in a multimeter that offers exceptional value for money. The ranges are selected by a single rotary switch and include voltage, current, capacitance, resistance and frequency.

The frequency function is autoranging and the resistance function includes the continuity buzzer which sounds if the resistance is less than 40Ω. The switch also selects the transistor and diode test facilities. A separate slide switch provides AC/DC selection. The frequency function is autoranging. A 3 3/4-digit LCD screen displays the reading and the polarity indicator. Also shown are the battery low and range overload indicators. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. The transistor test function allows the actual gain (h_{fe}) to be measured and compared with other devices. Useful for finding matched pairs, for example. Readings on all ranges are sampled at a rate of x2^{1/2} per second. The current ranges are protected by quick-blow fuses. Conforms to IEC 1010-1 Standards.

Capacitance Meter PG015

An accurate, capacitance meter providing measurements over a very wide range. The desired capacitance range is selected by a single rotary switch which also has an 'off' position. A separate rotary control marked '0-ADJ' provides limited adjustment for the more sensitive ranges to counteract stray capacitance. Two jack sockets and a pair of wire lead sockets, marked (+) and (-), are provided for connection to the component being measured. A 3 1/2-digit LCD screen displays the reading, the polarity indicator and the range selected. Also shown is the battery low and range overload indicators. Readings on all ranges are sampled at a rate of two per second. The meter is protected by a quick-blow fuse. Supplied with a pair of test leads, battery and full instruction manual.

Specification

Capacitance Range	Resolution	Test	
		Frequency	Accuracy
200pF	0.1pF	820Hz	±(0.5% rdg + 1dgt - 0.5pF)
2000pF	1pF	820Hz	±(0.5% rdg + 1dgt)

PRECISION GOLD

A quality range of rugged digital multimeters that offer a range of functions at affordable prices.

Rugged Low-Cost Digital Multimeter M105

A low cost, quality multimeter giving accurate measurements over a number of different ranges, including AC and DC voltage, DC current and resistance, together with a diode and transistor junction tester. This rugged, improved model now features SMD technology that provides a greatly extended battery life (up to x10) over the previous model and is now approved to IEC 1010-1 Standards. One rotary switch selects the range required. A 3 1/2-digit, 22mm high LCD display shows the reading and also has polarity, low battery and overload indicators, with a sampling rate of x3 per second. All the resistance ranges (except the 200Ω range) are 'low-power'. The diode test function allows the actual voltage drop across the junction to be measured and compared with other devices. It is also possible to perform these measurements on a device in-circuit, but this is inaccurate if the junction is shunted by a resistance of 1kΩ or less.

Specification DC Voltage

Range	Resolution	Accuracy
200mV	100μV	±0.8% rdg ± 2 dgts
2V	1mV	±0.8% rdg ± 2 dgts
20V	10mV	±0.8% rdg ± 2 dgts
200V	100mV	±0.8% rdg ± 2 dgts
1000V	1V	±0.8% rdg ± 2 dgts

Input impedance: 10MΩ all ranges
 Overload protection: 500V DC, 350V AC for 15s on 200mV range; 1100V DC, 800V AC for all other ranges.

AC Voltage

Range	Resolution	Accuracy
200V	100mV	±1.5% rdg ± 4 dgts
750V	1V	±1.5% rdg ± 4 dgts

Overload protection: 1100V DC, 800V AC for all ranges
 Input impedance: 4.5MΩ

DC Current

Range	Resolution	Accuracy
2mA	1μA	±1.5% rdg ± 2 dgts
20mA	10μA	±1.5% rdg ± 2 dgts
200mA	100μA	±1.5% rdg ± 2 dgts
20A	10mA	±2% rdg ± 2 dgts

Overload protection: 0.5A, 250V fuse all mA ranges
 Voltage drop: 0.3V max.

Digital Multimeter with Transistor Tester M125

A high quality multimeter giving accurate measurements over a number of different ranges, including AC and DC voltage, DC current, and resistance which includes a continuity buzzer which sounds if the resistance is 40Ω or less. This rugged, improved model now features SMD technology that provides a greatly extended battery life (up to x10) over the previous model and is now approved to IEC 1010-1 Standards. All the resistance ranges (except 200Ω range) are 'low-power' which means that accurate measurements of in-circuit resistances can be made, as the test voltage is below that necessary to forward bias a diode junction. The meter also has a battery tester for 1.5V and 9V batteries, which also loads the battery to get a more realistic idea of the actual 'in service' value. The diode tester can measure diode and transistor junction forward voltage drop, and transistor h_{FE} measurement is possible for both NPN and PNP devices up to a DC gain of 999. In addition to the usual test lead sockets, a special 4-pin socket in the meter's front panel is provided for small signal transistors with different pin-outs. The diode test function allows the actual voltage drop across the junction to be measured for comparison with other devices. It is also possible to perform these measurements on a device in-circuit, but this is inaccurate if the junction is shunted by a resistance of 1kΩ or less. One rotary switch selects the range desired.

A 3½-digit 22mm high LCD is used to show the reading and also has polarity, low battery and overload indicators. Readings are sampled at the rate of x3 per second.

Specification DC Voltage

Range	Resolution	Accuracy
200mV	100µV	±0.8% rdg ± 2 dgts

Digital Multimeter with Frequency Counter M135

A high quality multimeter giving accurate measurements over a number of ranges, including DC and AC voltage, DC current, and resistance. This rugged, improved model now features SMD technology that provides a greatly extended battery life (up to x10) over the previous model and is now approved to IEC 1010-1 Standards. A frequency

counter, diode tester, continuity buzzer, and a transistor tester for NPN and PNP devices are all provided. One rotary switch selects the range or facility required. A special 4-pin socket in the meter's front panel is provided for small signal transistors with different pin-outs, and these can be easily inserted where the centre pin can be either a base or collector connection. All the resistance ranges (except 200Ω range) are 'low-power' which means that accurate measurements of in-circuit resistances can be made, as the test voltage is below that necessary to forward bias a diode junction. The diode test function allows the actual voltage drop across the junction to be measured for comparison with other devices. It is also possible to perform these measurements on a device in-circuit, but this is inaccurate if the junction is shunted by a resistance of 1kΩ or less. Transistor junctions can be tested in this way too, and transistor h_{FE} measurements can be made up to a DC gain of 999 with open circuit or reversed connection being shown by a '1' as the overrange indicator. The input connections consist of four sockets for voltage, resistance and frequency measurements, with common, mA current and 20A maximum unfused sockets. The continuity buzzer, if used, sounds if the resistance is less than 40Ω. An autoranging frequency function is included that can be used to measure sine waves on the 'HI' input, or square waves, such as TTL logic, on the 'LO' input. A 3½-digit, 22mm high LCD shows the reading and also has polarity, low battery and overload indicators. Readings are sampled at the rate of x3 per second.

Rugged Digital Multimeter with High Resistance Range M205

A superb rugged digital multimeter that features a battery tester (for 1.5V and 9V batteries) and a high 200M Ω resistance measurement range. Combining quality with accuracy, the display is a 16mm 3 1/2 - digit LCD type, which also offers polarity, low-battery and over-range indicators. In addition to the extensive DC/AC voltage, current and resistance measuring ranges, there are diode, transistor and continuity testers. Supplied with test probes, battery (replacement type PP3) and spare fuse. This meter has been designed to comply with IEC 348 class II and UL1244 safety standards.

Digital Multimeter with Capacitance Meter M225

A superb digital multimeter combining quality and accuracy with a 16mm 3 1/2 - digit LCD type display, which also offers polarity, low-battery and over-range indicators. In addition to the extensive DC/AC voltage, current and resistance measuring ranges, there are diode, transistor, continuity testers, and a capacitance meter. Supplied with test probes, battery (replacement PP3) and spare fuse. It has been designed to meet the new IEC 348 class II and UL1244 safety standards.

Autoranging Digital Multimeter M295

An autoranging multimeter with an especially large, easy to read LCD display, with range/function, continuity and low battery indicators. This meter is very easy to use and represents extraordinarily good

value. Other features include a 10A range on AC and DC, a diode tester, automatic polarity display and overload 'beeper' indication. The meter has a sampling rate of x2 per second, and comes with a pair of test leads, spare fuse, batteries and operators' manual.

Specification DC Voltage

Range	Accuracy	Input impedance
200mV	±0.5%rdg + 4dgt	>100MΩ
2V to 1000V	±0.8%rdg - 4dgt	10MΩ

Resolution on 200mV range: 100µV
Overload protection: 1100V DC, 800V AC.

AC Voltage

Range	Accuracy	Input impedance
2V	±1%rdg + 8dgt	11MΩ
750V	±1%rdg + 8dgt	10MΩ

Resolution on 2V range: 1mV
Overload protection: 1100V DC, 800V AC.

Current

Range	DC Accuracy	AC Accuracy
200mA	±1.2%rdg + 1dgt	±1.5% + 1dgt
10A	±1.5%rdg + dgt	±2% + 8dgt

Resolution on 200mA range: 100µA
Overload protection: 10A, fused to 12A for 30s, other range 0.8A 250V fuse

Resistance

Range	Accuracy	Overload Protection
200kΩ	±0.8%rdg + 4 dgt	500V AC/DC
2MΩ	±1.0%rdg + 4 dgt	500V AC/DC
20MΩ	±3.0%rdg + 4 dgt	500V AC/DC

Resolution on 200kΩ range: 100mΩ
Test voltage: 0.45V max open circuit voltage

Continuity Bleeper

Threshold: <450Ω approx
Response time: <100ms

Diode

Test current: 0.5mA approx
Test voltage: 1.7V max. open circuit voltage
Power requirements: 2 'AA' batteries
Battery life: 500h approx
Dimensions: 150 x 80 x 35mm
Weight: 250g (including batteries)

Push-Button Digital Multimeter M6000

A digital multimeter with a comprehensive range of features. It has a 13mm high LCD display which includes a 'LO BAT' indicator, and overrange indication by blanking the three least significant digits. Display response time is normally 1s to rated accuracy. The five different ranges of DC and AC voltage and current, and the resistance range are fully overload protected, using a low capacitance spark gap for overvoltage protection, and a pair of fast switching diodes for the current ranges. In addition, the mA input is protected by a 2A fuse, and the 20A input is rated at up to 20A for 15s. The input of the AC converter is overvoltage protected by a resistor and diode combination, and the resistance input has an inrush current limiter. The test probe potential is switchable from a 'normal' maximum of 3V, which produces best results to a 'low' 0.6V if resistance measurements are required around semiconductor junctions. The 'high' position is also used to test forward and reverse bias continuity of diodes. The very low power consumption of this meter provides for a battery life of 2000h using an alkaline PP3. The meter has sideways action push-button range selector switches so that it can be held and operated in one hand. Fitted with non-slip feet and bench tilt stand.

Specification

Maximum open circuit voltage: <3V
Input impedance: 10MΩ all ranges

Digital Multimeter with TTL Logic Tester M810

A versatile digital multimeter which combines a range of useful features in one easy to use package. In addition to DC and AC voltage, DC and AC current and resistance ranges, the unit also has a capacitance tester, diode and transistor tester, a frequency counter and logic tester. The very useful logic tester can be used with TTL levels and indicates whether a logic data line is high or low, the state being shown on the display through the use of up and down arrows. Frequency measurements are also possible and the instrument is able to measure frequencies over the range 10Hz to 4MHz. Diode forward drop and the DC gain of NPN and PNP transistors can be tested, with the special sockets provided in the front panel. The capacitance meter

can measure from 1pF to 40F, and special sockets allow capacitors with different pin spacings to be connected, and a display hold facility allows a reading to be kept on the display at any time. The display is a 3³/₄ LCD which can show digits up to 3999, and includes polarity, overrange, low battery indicators and has a peak hold function. Battery life is up to 200 hours.

Specification

DC Voltage

Range	Resolution	Accuracy
400mV	100µV	±(0.5% rdg + 1dgt)
4V	1mV	±(0.5% rdg + 1dgt)
400V	100mV	±(0.5% rdg + 1dgt)
1000V	1V	±(0.5% rdg + 1dgt)

Input impedance: 20MΩ
Overload protection: 500V DC/350V AC for 15s on 400mV range; 1200V DC/800V AC on all other ranges.

AC Voltage

Range	Resolution	Accuracy
400mV	100µV	±(1% rdg + 4dpts)

Digital Multimeter with Electronic Thermometer M285

A very well specified multimeter offering many comprehensive features within its resilient yellow plastic case. Combining quality with accuracy, the display is a 16mm 3¹/₂ - digit LCD type, which also offers polarity, low-battery and over-range indicators. In addition to the extensive DC/AC voltage, current and resistance measuring ranges, there are diode, transistor and continuity testers, a capacitance meter, 200kHz frequency counter and even an electronic thermometer. This product has been designed to meet the IEC 348 class II and UL1244 international safety standards, and is supplied with battery (replacement type PP3; a standard zinc-carbon type will provide up to 200 hours use), test probes, thermocouple probe (for temperature measurement), spare fuse and detailed instruction manual. The case incorporates a bench stand.

Specification

DC Voltage

Range	Resolution	Accuracy
200mV	100µV	±(0.5% rdg + 1dgt)

ZC59P	Meter Case 160	£3.25

Replacement Thermocouple for M285

A replacement K-type thermocouple for use with the 285 multimeter. The thermocouple gives a high degree of accuracy at both high and low temperatures. This unit has heat proof sleeving and a standard K-type plug.

Order

Code	Type	Price each
KW09K	Thermocouple	£6.99

Replacement Thermocouple for M3500TC

A replacement K-type thermocouple for use with the M3500TC multi-purpose digital multimeter. This thermocouple is also suitable for use in temperature measurement applications where a high degree of accuracy is required. The thermocouple consists of two wires; nickel-chromium and nickel-aluminium, the sensor tip is a welded junction between the two metals, which produces an emf proportional to the junction temperature. The conductors are insulated with a heat proof mineral sleeve and terminated in a type-K thermocouple plug. The overall length is 91cm.

DUTY CYCLE	✓	-	-	-	-	-

Where appropriate the table shows the number of ranges for each function. All multimeters are supplied with test leads, battery and full instruction manual. The accuracy stated applies to the basic DC voltage function. All multimeters in the White Gold Range conform to IEC 1010-1 standards

Digital Multimeter with 3³/₄-Digit LCD and Frequency Function WG025

A quality, versatile, digital multimeter which provides a comprehensive range of useful features in one, easy to use package. In addition to AC/DC voltage, AC/DC current and resistance, the meter features functions for the measurement of capacitance and frequency. It also features transistor and diode test facilities, and a continuity buzzer. All of these features are selected by a single rotary switch. The frequency function is autoranging and the resistance function includes the continuity buzzer, which sounds if the resistance is less than 40Ω. A 3³/₄-digit LCD screen displays the reading, the polarity indicator, the logic indicators and the function/range selected. Also shown are the battery low and range overload indicators. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. The transistor test function allows the actual gain (h_{fe}) to be measured and compared with other devices. Useful for finding matched pairs, for example. Readings on all ranges are sampled at a rate of $x2^{1/2}$ per second. Conforms to IEC 1010-1 Standards.

Frequency range: 50Hz to 500Hz
 Input protection: 0.5A/250V quick-blow fuse
 20A/600V quick-blow ceramic fuse

Resistance

Range	Resolution	Accuracy
400Ω	100mΩ	±(1% rdg + 4dgt)
4kΩ	1Ω	±(0.8% rdg + 2dgt)
40kΩ	10Ω	±(0.8% rdg + 2dgt)
400kΩ	100Ω	±(0.8% rdg + 2dgt)
4000kΩ	1kΩ	±(0.8% rdg + 2dgt)
40MΩ	10kΩ	±(3% rdg + 4dgt)

Open circuit voltage: 3.0V DC on 400Ω range
 0.6V DC on all other ranges
 Overload protection: 500V DC or AC rms

Capacitance

Range	Resolution	Accuracy
4nF	1pF	±(5% rdg + 10dgt)
40nF	10pF	±(5% rdg + 10dgt)
400nF	100pF	±(5% rdg + 10dgt)
4μF	1nF	±(5% rdg + 10dgt)
40μF	10nF	±(5% rdg + 10dgt)

Frequency (autoranging)

Range	Resolution	Accuracy
4kHz	1Hz	±(0.5% rdg + 1dgt)
40kHz	10Hz	±(0.5% rdg + 1dgt)
400kHz	100Hz	±(0.5% rdg + 1dgt)
1000kHz	1kHz	±(0.5% rdg + 1dgt)

Sensitivity: 0.2V rms min
 Overload protection: 500V DC or AC rms

Continuity

Audible indication: <40Ω ±20Ω
 Overload protection: 500V DC or AC rms

Diode Test

Accuracy: ±(3% rdg + 3dgt)
 Test current: 1.0mA ±0.6mA
 Open circuit voltage: 3.0V DC typical
 Overload protection: 500V DC or AC rms

Transistor h_{fe}

Ranges: 0 to 1000
 Base current: 10μA DC approx
 Vce: 3.3V DC

Dimensions: 200 x 90 x 40mm
 Weight: 400g including battery
 Battery life: 150h min
 Battery: 9V PP3 type

Supplied with a pair of test leads, battery and a full instruction manual. Spare test leads and a protective holster are available separately.

Digital Multimeter with 'Hold' Function WG026

A quality, versatile, sensitive digital multimeter which provides a comprehensive range of useful features in one, easy to use package. In addition to voltage, current and resistance, the meter features functions for the measurement of capacitance, and frequency. It also features transistor and diode test facilities and a continuity buzzer. All of these features are selected by a single rotary switch with a separate push-button marked 'DC/AC' to toggle between DC or AC and a further push-button marked 'MAX' allowing the highest reading to be held. The frequency function is autoranging and the resistance function includes the continuity buzzer, which sounds if the resistance is less than 40Ω. A 3¹/₂-digit LCD screen displays the reading, the polarity indicator and the function/range selected. Also shown are the battery low and range overload indicators. With the exception of the 20Ω, 200Ω and 2000MΩ ranges, all resistance ranges are 'low power', which means that accurate measurement of in-circuit resistances can be made, because the test voltage is below that necessary to forward bias a silicon diode junction. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. The transistor test function allows the actual gain (h_{fe}) to be measured and compared with other devices. Useful for finding matched pairs, for example. The logic test function is a useful aid for checking the logic high or low state of a digital circuit. Readings on all ranges are sampled at a rate of $x2^{1/2}$ per second. Conforms to IEC 1010-1 Standards.

Digital Multimeter with Capacitance, Inductance and Frequency Measurement WG020

This accurate, versatile multimeter features a comprehensive range of functions for the serious hobbyist and professional. The frequency function is

autoranging, and a 'MAX' hold facility allows the highest reading of a varying measurement to be stored. In addition to the basic functions, a 'duty cycle' measurement facility is provided, which is a useful aid for analysing pulsed signals in digital circuits. Continuity test, diode test, and a transistor h_{FE} tester are also included. A protective holster (GW91Y) is available separately for this multimeter and is strongly recommended.

4 1/2-Digit LCD Precision Digital Multimeter WG023

A high quality, very accurate, digital multimeter with a large 4 1/2-digit LCD readout which combines a comprehensive range of useful features and high sensitivity in one, easy to use package. The meter provides functions for the measurement of AC and DC voltage, AC and DC current and resistance. In addition, it also features transistor and diode test facilities and a continuity buzzer. All of these features are selected by a single rotary switch.

The resistance function includes the continuity buzzer, which sounds if the resistance is less than 40Ω.

A 4 1/2-digit LCD screen displays the reading, the polarity indicator and the function/range selected. Also shown are the battery low and range overload indicators.

The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. The transistor test function allows the actual gain (h_{fe}) to be measured and compared with other devices. Useful for finding matched pairs, for example. Readings on all ranges are sampled at a rate of $x2\frac{1}{2}$ per second. Conforms to IEC 1010-1 Standards.

Specification DC Voltage

Range	Resolution	Accuracy
200mV	10μV	±(0.05% rdg + 4dpts)
2V	100μV	±(0.05% rdg + 4dpts)
20V	1mV	±(0.05% rdg + 4dpts)
200V	10mV	±(0.05% rdg + 4dpts)
1000V	100mV	±(0.05% rdg + 4dpts)

Input impedance: 10MΩ
Overload protection: 1000V DC or 750V AC rms

Autoranging Digital Multimeter with Memory and Bar Graph WG022

A superb, versatile and fully autoranging multimeter providing a comprehensive range of features and functions. The various functions are selected by a single rotary switch and include voltage, current, resistance, capacitance, frequency, continuity and diode test. Various push-buttons above the selector switch allow additional features and modes to be chosen. An LCD screen displays the reading in the form of 4 digits and a bar graph display. Also shown are various mode annunciators, polarity indicator, battery low indication, and range overload indicators (in the form of flashing the most significant digit). The 'memory' mode is taken care of by the 'MEM', 'READ' and 'HOLD' buttons. These provide facilities for monitoring and controlling the last reading taken. The 'HOLD' button is also used for the 'data hold' mode to retain the last reading on the display. The range for each function is selected automatically by the meter but, should it be necessary, the 'RANGE' push-button may be used to override the autoranging, and hold on to a selected range. In the 'max/min' mode the minimum or maximum reading is recorded and stored in memory and becomes available by using the 'MAX/MIN' and 'HOLD' buttons. If the stored value is exceeded, then the new reading replaces the stored value. In the 'RELATIVE' mode the last reading taken is stored as a reference value and all future readings are then referenced from that stored value. The 'REL' button is also used for zero adjustment on the lowest capacitance range. A standby mode is included, should the meter be left unattended, to conserve battery power. Using the 'PON' button returns the meter to the normal operating condition. In the continuity function a buzzer will sound when the circuit resistance is less than 40Ω. The diode test function allows the actual voltage drop across the junction to be measured and compared against other devices. It is also possible to perform the diode test function on a device in-circuit, but this test will be inaccurate if the junction is shunted by a resistance of 1kΩ or less. Readings on all ranges are sampled at a rate of two times per second. The current ranges are protected by quick-blow fuses. Conforms to IEC 1010-1 Standards.

Specification

DC Voltage

Range	Resolution	Accuracy
400mV	100µV	±(0.5% rdg + 1dgt)

FOR TOP QUALITY & VALUE!

REPLACEMENT TEST LEADS

Banana Plug Probes

Test leads for Precision Gold series multimeters M810, M195 and M920. Alligator clips for use with these probes are also available.

Shroud Plug/Probes

Test leads for multimeters M105, M125, M135, M205, M225 and M285. Alligator clips for use with these probes are shown below.

Test Lead TL-30K

Spare test leads for multimeters M2020S, M2500I, M5050B and M5050E multimeters. The probes are threaded to take the crocodile clips illustrated.

Test Lead TL-2SK

Test leads for the Pocket Multimeter and Hobby Multimeter.

Alligator Clips

Alligator clips that screw onto the probes of the M105, M108, M125, M135, M205, M225, M285, M300A, M400D, M775, M779, M810, M874, M920, M990, M1300K, M2020S, M2500I, M3500TC, M4510, M5010, M5010EC, M5020A, M5050DB, M5050E, and M6000. Sold as a red and black pair.

Holsters for Digital Multimeters

Very tough and strong flexible plastic holsters for use with our digital multimeters (except M105 and M6000). The small Holster is suitable for use with the Hobby Digital, M26, M775, M776, M874, M889 and M1300K multimeters. The large Holster is suitable for the M5010 and M4510 digital multimeters.

Order Code	Type	Price each
YN73Q	Small Holster	£4.25
YN74R	Large Holster	£4.89

FLUKE 10 SERIES PROFESSIONAL DIGITAL MULTIMETERS

A range of professional quality, multimeters from Fluke. These precision digital meters offer a smart set of troubleshooting features in a design that's exceptionally fast and simple to operate – with one hand. The versatile Series 10 have a large, easy-to-read, 4000-count autoranging display, that updates 4 times per second. These meters measure AC and DC voltage to 600 volts and ohms to 40MΩ. Also featured are continuity and diode tests and a 'sleep' mode allows the meter to conserve battery power if left on and unused for some time. The Fluke Series 10 range sets a new standard in low-cost, tough, dependable meters, backed by a 3-year warranty.

Fluke 10

This meter has a basic accuracy of 1.5% on DC and ohms and 2.9% on AC, and has a large easy-to-read 4000 count digital display, which gives a far better resolution than 1,999-count meters. Autoranging selects the range with the best resolution for the job and when you want to control the range manually, just push a button – ideal for fast, repetitive testing. In addition to the standard AC and DC voltage ranges, the meter also measures resistance, and the voltage drop of properly working diodes. Fast continuity checks can be made without the need to watch the display, just listen for the bleep; for continuity as short as 250µs.

Specification DC Voltage

Range: 4000mV, 4V, 40V, 400V, 600V

Resolution at 4000mV: 1mV

Accuracy: ±(1.5% rdg + 2 dgt), on 4000mV/4V
±(1.5% rdg + 1 dgt), on other ranges

Input impedance: >10MΩ <100pF

Overload protection: 600V rms

CMRR(50Hz or 60Hz): >100dB

NMRR(50Hz or 60Hz): >50dB

AC Voltage

Range: 4000mV, 4V, 40V, 400V, 600V

Resolution at 4000mV: 1mV

Accuracy: ±(2.9% rdg + 3 dgt) on all ranges

Input impedance: >5MΩ <100pF (AC-coupled)

Overload protection: 600V rms

CMRR(50Hz or 60Hz): >60dB

Resistance

Range: 400Ω, 4kΩ, 40kΩ, 400kΩ, 4MΩ, 40MΩ

Resolution: 0.1Ω on 400Ω range

Accuracy: ±(1.5% rdg + 1 dgt)

±(1.5% rdg + 2 dgt) on 400Ω range

±(1.9% rdg + 3 dgt) on 40MΩ range

Open circuit test voltage: <1.5V

Full scale voltage: <450mV DC to 4MΩ, <1.5V DC 40MΩ

Overload protection: 600V rms

Diode Test

Range: 2V

Accuracy: ±(1.5% rdg + 2 dgt)

Overload protection: 600V rms

Continuity Buzzer

Sensitivity: <25Ω buzzer turns on
>250Ω buzzer turns off

General

Display: 3¾ digits, 4000 counts, updates 4/sec.

Power supply: 9V PP3 battery

Battery life: 650hrs continuous (alkaline)

450hrs continuous

(zinc carbon)

Temperature: -10°C to +50°C (operating)

-30°C to +60°C (storage)

Dimensions: 142.3 x 70.5 x 34.6mm

Weight: 286g

Supplied with battery, instruction manual and a pair of test leads.

Fluke 11

This meter has a basic accuracy of 0.9% on DC and ohms and 1.9% on AC, and has a large easy-to-read 4000 count digital display, which gives a far better resolution than 1,999-count meters. Autoranging selects the range with the best resolution for the job and when you want to control the range manually, just push a button – ideal for fast, repetitive testing. In addition to the standard AC and DC voltage ranges, the meter also measures resistance, capacitance and the voltage drop of properly working diodes. Fast continuity checks can be made without the need to watch the display, just listen for the bleep; for continuity as short as 250µs. The Fluke 11 has V Chek™; an ingenious additional feature that allows you to make fast accurate checks on power sources and supplies. V Chek™ will determine if your circuit is open or if you have a short. If a voltage greater than 4.5V is present, it will automatically change modes to measure AC or DC volts, whichever is detected. If AC and DC are both present, it will display the greater of the two. V Chek™ lowers the meter's normal 10MΩ impedance to a minimum of 2kΩ, so you can distinguish real voltage from false readings caused by leakage from other sources. It even tells you, with a bleep, as it switches function from continuity to voltage. Capacitance can be measured from 1nF to 9999µF in manual or autoranging mode.

Fluke 12

The top of the range Fluke 12 has all the features of the Fluke 11, and in addition, extra features that make solving intermittent, troublesome, faults so much easier. The Fluke 12 has the ability to record the highest and lowest voltage readings during a 100-hour period and 'time stamps' the readings to the nearest minute. Now you can hook up, walk away, come back later and see what happened – and when. Continuity Capture™ will display intermittent shorts as brief as 250µs, and display them as open-to-short and short-to-open transitions. The display shows the initial condition (either an open or short) and if the meter detects a transition, it beeps and the display captures the transition. Subsequent transitions cause the meter to beep, but the display does not change.

Capacitance range: 1µF, 10µF, 100µF, 1000µF, 10000µF

Accuracy: ±(1.9% rdg + 2 dgt)
±(10% rdg + 90) on 10000µF range

General

Display: 3¾ digits, 4000 counts, updates 4/sec.

Power supply: 9V PP3 battery

Battery life: 650hrs continuous (alkaline)
450hrs continuous (zinc carbon)

Temperature: -10°C to +50°C (operating)

-30°C to +60°C (storage)

Dimensions: 142.3 x 70.5 x 34.6mm

Weight: 286g

Supplied with battery, instruction manual and a pair of test leads.

Holster for Fluke 10 Range

A tough, strong, flexible snap-on holster for any Fluke Series 10 meters. The holster fits tightly round the meter and gives a high degree of protection should the meter receive any rough handling. A built-in stand positions the meter for a better viewing angle, and a moulded hanger loop allows the meter to be suspended while taking measurements. The loop can also be used to hold a probe, allowing the meter and a probe to be held conveniently in one hand.
Size: 160 x 76 x 40mm

Fluke 70 Series II Digital Multimeters

These incredible multimeters from Fluke – one of the world's most respected names in laboratory precision instruments – at last bring superb quality to the hobbyist and professional engineer at an affordable price. Yet even at these amazingly low prices these precision digital multimeters (DMM) incorporate a state-of-the-art analogue bar graph which permits instant observation of trends, and makes peaking and nulling particularly easy and finally removes any last advantage an analogue meter could have. These meters feature a large digital display that is easily read from any angle, with accuracy and resolution far greater than even the best analogue meters. The meters offer autoranging, autopolarity, auto-zero, superior overload protection and a ruggedness that makes them virtually indestructible. Each meter carries a full 3-year guarantee. So if you're looking for a meter for a lifetime, there's no longer any choice.

Fluke 70

This meter has a basic accuracy of 0.5% – better than that of the finest analogue-only meters. Autoranging software instantly selects the proper range for maximum resolution. In addition to the standard AC and DC voltage ranges the meter also measures resistance. A diode tester and audible continuity tester are also contained. This meter offers a superb 3200 count resolution and also 31 segment analogue scale. A manual range-holding facility enables a range to be held on-screen, whilst a touch hold facility captures a reading. A 'sleep' mode allows the meter to conserve battery power, should the meter be left on. A diagnostic self-check of critical functions, e.g., battery and all segments will show that everything is working. When measuring, the digital display is updated 21/2 times every second while analogue

display is updated 25 times a second. The meter also indicates overload, low battery and 'sleep' conditions.

Specification

DC Voltage

Range: 320mV, 3.2V, 32V, 320V, 1000V
 Sensitivity at 320mV: 0.1mV
 Accuracy: $\pm 0.5\%$ rdg ± 1 dgt
 $\pm 0.6\%$ rdg ± 1 dgt on 1000V range
 Input resistance: 10M Ω
 Overload protection: 1000V, 500V on 320mV range
 NMRR (50Hz to 60Hz): >60dB
 CMRR (50Hz to 60Hz): >120dB

AC Voltage

Range: 3.2V, 32V, 320V, 750V
 Sensitivity: 1mV on 3.2V range
 Accuracy: $\pm 2\%$ rdg ± 2 dgt
 Overload protection: 750V AC, 1000V AC

Resistance

Range: 320 Ω , 3200 Ω , 32k Ω , 320k Ω , 3.2M Ω , 32M Ω
 Sensitivity: 0.1 Ω
 Accuracy: $\pm 0.5\%$ rdg ± 1 dgt
 $\pm 0.5\%$ rdg ± 2 dgt on 320 Ω range
 $\pm 2\%$ rdg ± 1 dgt on 32 Ω range
 Open circuit voltage: 3.1V
 Full scale voltage: <450mV, <1.4V on 32M Ω range

Overload protection:

500V rms

Diode test

Range: 0 to 2V
 Accuracy: $\pm 0.5\%$ rdg ± 1 dgt
 Overload protection: 500mV rms

Continuity buzzer

Sensitivity: <150 Ω
 Frequency: 4096Hz continuous

General

Power supply: 9V PP3 battery
 Battery life: >2000hrs (alkaline), 1600hrs (zinc carbon)
 Common mode voltage: 1000V DC or peak AC maximum
 Temperature: 0°C to 55°C (operating) -10°C to 60°C (storage)
 Dimensions: 28 x 75 x 166mm
 Weight: 240g
 Supplied with battery (replacement type PB), instruction manual and a pair of test leads.

Order Code	Type	Price each
ZC62S	A1 Fluke 70 Multimeter	£81.00

Fluke 73

This meter has a basic accuracy of 0.4%, which is better than that provided by most other DMMs. Autoranging software instantly selects the proper range for maximum resolution. In addition to the standard AC and DC voltage ranges the meter also measures AC and DC current, resistance. A diode tester and audible continuity tester are also featured. The meter has a 3200 count resolution surpassing most other digital meters and a 31 segment analogue scale. A manual range-holding facility enables a range to be held on-screen, whilst a touch hold facility captures a reading. A 'sleep' mode allows the meter to conserve battery power, should the meter be left on. A diagnostic self-check of critical functions, e.g., battery and all segments will show that everything is working. When taking a reading the digital display is updated 2½ times every second while analogue display is updated 25 times a second. The meter also indicates overload, low battery and 'sleep' conditions.

Specification

DC Voltage

Range: 320mV, 3.2V, 32V, 320V, 1000V
 Sensitivity at 320mV: 0.1mV

Fluke 75

This meter has a basic accuracy of 0.4%, and is similar to the Fluke 73, but with better resolution and featuring a current range with improved accuracy. Autoranging software instantly selects the proper range for maximum resolution. In addition to the standard AC and DC voltage ranges, the meter also measures AC and DC current, and resistance. It contains a diode tester and audible continuity tester, and has a 3200 count resolution (unlike most other digital meters with a 31 segment analogue scale). A manual range-holding facility enables a range to be held on-screen, whilst a touch hold facility captures a reading. A 'sleep' mode allows the meter to conserve battery power, should the meter be left on. A diagnostic self-check of critical functions, e.g., battery and all segments will show that everything is working. When measuring, the digital display is updated 2½ times every second and the analogue display is updated 25 times a second. The meter also indicates overload, low battery and 'sleep' conditions.

YJ88V A1	Fluke 75 Multimeter	£157.50

Fluke 77

This meter has the same resolution as the Fluke 75 and includes the same facilities, but has a better DC voltage accuracy (±0.3% rdg ±1 dgt, and ±0.4% rdg ±1 dgt on 1000V range). A tough protective holster is included for impact protection during everyday use. This item features a stand so that the meter can be angled for better visibility if required. Features of the meter include a basic accuracy of 0.4%, autoranging software, a 3200 count resolution and a 31 segment analogue scale. In addition a 'sleep' mode allows the meter to conserve battery power if left on and unused for some time. When taking readings the digital display is updated 2½ times every second while the analogue display is updated 25 times a second. The LCD panel also indicates overload, low battery and 'sleep' conditions. Supplied with test leads, battery (replacement type PP3), instruction manual and protective holster.

Order Code	Type	Price each
YJ89W A2	Fluke 77 Multimeter	£182.00

Fluke 79

The most comprehensive meter of the Fluke series II range, the Fluke 79 has a better accuracy than most others in its class and offers more facilities. In addition a tough protective holster is included for impact protection during everyday use. This item features a stand so that the meter can be angled for better visibility if required. In addition to several AC/DC voltage/current ranges and resistance measurement (including a 40Ω range), this meter also includes a frequency counter, capacitance meter, diode and continuity testers. Other attributes of the meter include a basic accuracy of 0.3%, autoranging software, a 4000 count resolution, and a 63 segment analogue scale. A 'sleep' mode is provided allowing the meter to conserve battery power if left on and unused for some time. When taking readings the digital display is updated 2½ times every second while the analogue display is updated 25 times a second. The LCD panel also indicates overload, low battery and 'sleep' conditions. Supplied complete with test leads, battery, instruction manual and protective holster.

AVO M2000 SERIES Analogue/Digital Meters

A range of superb quality analogue/digital LCD multimeters which offer a 50mm long 70-segment analogue scale coupled with a 3³/₄ digit display. In addition to auto-ranging voltage and resistance ranges, all models provide continuity buzzer and diode test functions. The 70-point analogue bargraph located along the bottom of the LCD panel displays an accurate representation of the measured value. A negative portion of the display is visible for DC voltages and current measurements so that fluctuations about zero can be studied.

The tough rubber-buffered case resists mechanical shock and incorporates a test prod holder. The terminals are recessed for safety, and each model has been designed to meet BS4743, IEC 348 and VDE 0411 safety specifications. Each model offers over-voltage protection and is supplied with test prods, batteries (replacement type PP3) and full instructions. The range consists of 4 models; M2004, M2005, M2006 and M2007.

M2004 Analogue/Digital Multimeter

This true analogue/digital meter offers a 0.7% basic accuracy, a single 10A (AC and DC) current range, 5 AC and DC voltage ranges and 6 resistance ranges. Overload protection: 500V AC for 10 minutes.

Specification

DC voltage	
Range:	Reads from 300mV to 1000V, 5 ranges autoranging (except 300mV range)
Resolution:	0.1mV max.
Input impedance:	10MΩ/40pF (11MΩ/40pF 3V range)
Accuracy:	±0.7% rdg ±1 dgt (±0.8% rdg ±1 dgt on 100 range)

UNIVERSAL NiCD BATTERY CHARGER AND DISCHARGER

NEW

GREAT VALUE!

£19.99
RZ18U
[B2]

A very high quality universal automatic NiCd charger that has a discharge cycle built-in, and accepts AAA, AA C, D and PP3. The charger will automatically select the correct charge/discharge rate for the different size batteries. Fast charge will not happen until all the batteries have been fully discharged, and a built-in timer automatically changes from 'fast to trickle charge'. This process will help to prevent 'memory' effect. The unit will charge all the cells (except PP3) in 4h and will accept just one or groups of cells. One or two PP3 will be charged at the standard rate. Each cell (except PP3) has an LED which indicates the state of the charge/discharge process. This charger is designed for NiCd batteries only and is not suitable for other types of cells.

Dimensions: 225 x 65 x 115mm

Batteries not included

Specification

Battery type	Capacity	Charging Time
C/D:	600mA	4h
AA:	200mA	4h
AAA:	60mA	4h
PP3:	11mA	4h

DC current

Range:	Single 10A range
Resolution:	0.01A max.
Accuracy:	±1.5% rdg ±2 dpts

AC voltage

Range:	Reads from 300mV to 1000V, 5 ranges autoranging (except 300mV range)
Resolution:	0.1mV max.
Input impedance:	10MΩ/40pF (11MΩ/40pF 3V range)
Accuracy:	±1.5% rdg ±2 dpts

Voltage overload protection: 1200V AC rms continuous, whilst for 300mV range 500V AC for 10 minutes.

AC current

Range:	Single 10A range can measure 20A for 30s
Resolution:	0.01A max.
Accuracy:	±2% rdg ±2 dpts

Current overload protection: 1A AC rms continuous or 2.5A AC rms for 5 minutes, on 3A range 3.6A rms continuous, 10A range 12A AC rms continuous or 15A for 5 minutes or 20A for 30 seconds.

Resistance:

Ranges:	300Ω, 3kΩ, 30kΩ, 300kΩ, 3MΩ, 30MΩ autoranging
Resolution:	0.1Ω max.
Accuracy:	±0.7% rdg ±1 dgt (300Ω range ±0.7% rdg ±1 dgt (30MΩ range ±2% rdg ±1 dgt

Overload protection:	500V AC rms for 10 minutes.
----------------------	-----------------------------

Diode test

Voltage:	2V DC
Resolution:	0.001V max.
Accuracy:	±0.7% rdg ±1 dgt
Overload protection:	500V AC rms for 10 minutes.

General

Temperature:	23°C ±2°C
Humidity:	45% to 55% reference humidity

M2005 AVO Analogue/Digital Multimeter with 'Range Hold'

This model offers several features in addition to those provided with the M2004 meter. The basic accuracy has been improved to 0.5%, additional ranges for AC and DC current measurement have been provided and there is an additional 'Range Hold' facility. Overload protection: 500V AC for 10 minutes +3.15A fuse.

Specification

DC voltage

Range: Reads from 300mV to 1000V, 5 ranges autoranging (except 300mV range)
 Resolution: 0.1mV max.
 Input impedance: 10M Ω /40pF (11M Ω /40pF 3V range)
 Accuracy: $\pm 0.5\%$ rdg ± 1 dgt
 $\pm 0.6\%$ rdg ± 1 dgt on 1000V range

DC current

Range: 3mA, 30mA, 300mA, 3A, 10A can measure 20A for 30s
 Resolution: 0.001mA max.
 Accuracy: $\pm 1.0\%$ rdg ± 1 dgt
 $\pm 1.5\%$ rdg ± 1 dgt on 10A range

AC voltage

Range: Reads from 300mV to 1000V, 5 ranges autoranging (except 300mV range)
 Resolution: 0.1mV max.
 Input impedance: 10M Ω /40pF (11M Ω /40pF 3V range)
 Accuracy: $\pm 1.0\%$ rdg ± 2 dgts
 Voltage overload protection: 1200V AC rms continuous, whilst for 300mV range 500V AC for 10 minutes.

AC current

Range: 3mA, 30mA, 300mA, 3A, 10A can measure 20A for 30s
 Resolution: 0.001mA max.
 Accuracy: $\pm 1.5\%$ rdg ± 2 dgts
 $\pm 2.0\%$ rdg ± 2 dgts on 10A range
 Current overload protection: 1A AC rms continuous or 2.5A AC rms for 5 minutes, on 3A range 3.6A rms continuous, 10A range 12A AC rms continuous or 15A for 5 minutes or 20A for 30 seconds.

Resistance

Range: 300 Ω , 3k Ω , 30k Ω , 300k Ω , 3M Ω , 30M Ω autoranging
 Resolution: 0.1 Ω max.
 Accuracy: $\pm 0.6\%$ rdg ± 1 dgt
 300 Ω range $\pm 0.6\%$ rdg ± 3 dgt
 30M Ω range $\pm 2\%$ rdg ± 1 dgt
 Overload protection: 500V AC rms for 10 minutes

Diode test

Range: 2V DC
 Resolution: 0.001V max.
 Accuracy: $\pm 0.5\%$ rdg ± 1 dgt
 Overload protection: 500V AC rms for 10 minutes

General

Temperature: 23°C ± 2 °C
 Humidity: 45% to 55% reference humidity

 Weight: 0.5kg

Order Code ZC51F A1 Type M2005 A/D Multimeter Price each £159.99

M2006 Analogue/Digital Multimeter with 'Data Hold'

The M2006 meter offers several improvements over the M2005 model. The basic accuracy is improved further still to 0.25%, the number of AC and DC current ranges has been increased to 6 and a 'Data Hold' function has been included. Overload protection: 500V AC for 10 minutes +3.15A fuse.

Specification

DC voltage

Range: 300mV, 3V, 30V, 300V, 1000V autoranging (except 300mV range)
 Resolution: 0.1mV max.
 Input impedance: 10M Ω /40pF (11M Ω /40pF 3V range)
 Accuracy: $\pm 0.25\%$ rdg ± 1 dgt
 $\pm 0.35\%$ rdg ± 1 dgt on 1000V range

DC current

Range: 300 μ A, 3mA, 30mA, 300mA, 3A, 10A can measure 20A for 30s
 Resolution: 0.1 μ A max.
 Accuracy: $\pm 1.0\%$ rdg ± 1 dgt
 $\pm 1.0\%$ rdg ± 2 dgt on 10A and 300 μ A range

AC voltage

Range: 300mV, 3V, 30V, 300V, 1000V autoranging (except 300mV range)
 Resolution: 0.1mV max.
 Input impedance: 10M Ω /40pF (11M Ω /40pF 3V range)
 Accuracy: $\pm 0.75\%$ rdg ± 2 dgts
 Voltage overload protection: 1200V AC rms continuous, whilst for 300mV range 500V AC for 10 minutes.

AC current

Range: 300 μ A, 3mA, 30mA, 300mA, 3A, 10A can measure 20A for 30s
 Resolution: 0.1 μ A max.
 Accuracy: $\pm 1.5\%$ rdg ± 2 dgts
 $\pm 1.5\%$ rdg ± 2 dgts on 10A and 300 μ A range

Current overload protection: 1A AC rms continuous or 2.5A AC rms for 5 minutes, on 3A range 3.6A rms continuous, 10A range 12A AC rms continuous or 15A for 5 minutes or 20A for 30 seconds.

Resistance

Range: 300 Ω , 3k Ω , 30k Ω , 300k Ω , 3M Ω , 30M Ω autoranging
 Resolution: 0.1 Ω max.
 Accuracy: $\pm 0.4\%$ rdg ± 1 dgt
 300 Ω range $\pm 0.5\%$ rdg ± 3 dgts
 30M Ω range $\pm 2\%$ rdg ± 1 dgt
 Overload protection: 500V AC rms for 10 minutes

Diode test

Voltage: 2V DC
 Resolution: 0.001V max.
 Accuracy: $\pm 0.25\%$ rdg ± 1 dgt
 Overload protection: 500V AC rms for 10 minutes

General

Temperature: 23°C ± 2 °C
 Humidity: 45% to 55% reference humidity
 Frequency: 45Hz to 65Hz (sinusoidal)
 Power supply: 9V battery
 Dimensions: 98 x 185 x 47mm
 Weight: 0.5kg

Order Code ZC52G A1 Type M2006 A/D Multimeter Price each £213.99

M2007 Analogue/Digital Multimeter with 'Peak Hold'

This superb meter offers a basic accuracy of 0.1%. It includes all the facilities and ranges of the M2006 meter, but provides an additional 'Peak Hold' facility. Over voltage protection: 500V AC for 10 minutes +3.15A fuse.

Specification

DC voltage

Range: 300mV, 3V, 30V, 300V, 1000V autoranging (except 300mV range)
 Resolution: 0.1mV max.
 Input impedance: 10M Ω /40pF (11M Ω /40pF 3V range)
 Accuracy: $\pm 0.1\%$ rdg ± 1 dgt

DC current

Range: 300 μ A, 3mA, 30mA, 300mA, 3A, 10A
 Resolution: 0.1 μ A max.
 Accuracy: $\pm 0.75\%$ rdg ± 1 dgt
 $\pm 1.0\%$ rdg ± 2 dgt on 10A and 300 μ A range

AC voltage

Range: 300mV, 3V, 30V, 300V, 1000V autoranging (except 300mV range)
 Resolution: 0.1mV max.
 Input impedance: 10M Ω /40pF (11M Ω /40pF 3V range)
 Accuracy: $\pm 0.5\%$ rdg ± 2 dgts

Voltage overload protection: 1200V AC rms continuous, whilst for 300mV range 500V AC for 10 minutes.

AC current

Range: 3mA, 30mA, 300mA, 3A, 10A can measure 20A for 30s
 Resolution: 0.1 μ A max.
 Accuracy: $\pm 1.2\%$ rdg ± 2 dgts
 $\pm 1.5\%$ rdg ± 2 dgts on 10A and 300 μ A range

Current overload protection: 1A AC rms continuous or 2.5A AC rms for 5 mins., on 3A range 3.6A rms continuous, 10A range 12A AC rms continuous or 15A for 5 mins. or 20A for 30sec.

Resistance

Range: 300 Ω , 3k Ω , 30k Ω , 300k Ω , 3M Ω , 30M Ω autoranging
 Resolution: 0.1 Ω max.
 Accuracy: $\pm 0.2\%$ rdg ± 1 dgts
 300 Ω range $\pm 0.4\%$ rdg ± 3 dgts
 3M Ω range $\pm 0.4\%$ rdg ± 1 dgt
 30M Ω range $\pm 2\%$ rdg ± 1 dgt
 Overload protection: 500V AC rms for 10 mins.

Diode test

Voltage: 2V DC
 Resolution: 0.001V max.
 Accuracy: $\pm 0.1\%$ rdg ± 1 dgt
 Overload protection: 500V AC rms for 10 mins.

ELECTRICAL METERS

Insulation Resistance Meter M2500I

Precision Gold

A battery operated insulation resistance meter which employs a transistor type, stable voltage DC – DC converter to generate a test voltage of up to 500V DC max. from four AA batteries. With this instrument you can quickly and directly read the insulation resistance of cables and joints, power lines, insulators and other materials up to 100MΩ. Small, light-weight and easy to operate, the meter uses a jewelled pivot mechanism which is stable and little influenced by external magnetic fields. An AC volts range is also included to measure the voltage of AC supply lines. As a safety feature a resistance measurement is normally performed by a 'push to measure' button, bearing in mind the high voltage output of the instrument, but this can be overridden by the 'measure lock' position of the function switch so that continuous readings can be made. An LED indicator flashes whenever the test voltage exists on the probes, both as a safety measure and as a reminder that the converter is operating, and using battery power, if left in the 'measure lock' mode. The AC voltage meter function caters for up to 450V AC, and is very useful for checking that power lines are not energised before a resistance test is attempted.

Specifications

Insulation resistance

Scale range	Accuracy
1 – 100MΩ effective	±7% of value indicated
0 – 200MΩ max.	±3% of scale length (5MΩ at centre)

Terminal to terminal voltage

±10% of rated voltage at left-hand end of scale. Approx. 90% of rated voltage at centre of scale. Rated V/R = 500V/100MΩ.

AC Voltage

Range	Accuracy
0 – 450V	±5% of max. scale value

Dimensions: 102 x 150 x 45mm. Weight: 370g.

YT88V A1	Insulation Tester	£39.99

Clamp Meter M920

Precision Gold

A very useful electrician's digital multimeter with a built-in clamp-tester which will measure AC current of up to 300A without having to break the circuit under test. It achieves this by using a current transformer, the insulating current-carrying conductor acting as the primary of the transformer while the 'jaws' of the meter act as the secondary. No direct electrical connection to the system being tested is therefore required. The jaws are opened by means of a lever on the side of the meter body and the cable is inserted into the hole (which will accept cables of up to 30mm dia). The lever is then released and the jaws spring shut, completing the magnetic circuit. Measurement can then proceed. In addition to the above function the meter will measure AC/DC voltage and resistance in the conventional way, with test leads and probes. The meter has a 3 1/2-digit LCD panel, which includes overrange, low battery and data hold indication. A continuity buzzer is also available. The meter body is made from an attractive and very tough yellow plastic. Supplied with operating instructions, one red and one black test lead with probes, one battery (replacement type PP3), and carrying strap.

Specification

DC Voltage

Range	Resolution	Accuracy
200mV	100µV	±(0.5% rdg + 1 digit)
200V	0.1V	±(0.5% rdg + 1 digit)
1000V	1V	±(0.5% rdg + 1 digit)

Input impedance: 10MΩ. Overload protection: 500V DC, 350V AC on 200mV range. 1200V DC, 800V AC for all other ranges.

AC Voltage

Range	Resolution	Accuracy
200V	0.1V	±(1.2% rdg + 4 digits)
750V	1V	±(1.5% rdg + 4 digits)

TEST INSTRUMENTS

CMOS TESTER

A logic tester for CMOS devices, for use by the amateur and professional alike. The instrument is ideal for schools and colleges where it can be used to demonstrate logic functions using actual devices. The tester takes the form of DIL sockets on the front panel for the device under test, which can be connected to a number of CMOS compatible outputs and output logic state indicators, by means of the thirteen patch leads supplied. These test points consist of:-

- Four logic '1' outputs
- Four logic '0' outputs
- One 1Hz square wave
- One 100Hz square wave
- One pushbutton (non-latching push to make release to break) for manual logic '1' pulse output
- Eight LED logic state indicators to monitor outputs of the device under test
- One +V (supply)
- One 0V (0VE)

A booklet of fact sheets is also provided outlining testing procedures for some of the more common devices, for example:-

CMOS devices included in the Fact Sheets—

4000	4009	4015	4020	4025	4040	4069	4081
4001	4010	4016	4021	4027	4042	4070	4082
4002	4011	4017	4022	4028	4047	4071	4093
4006	4012	4018	4023	4030	4049	4073	4095
4008	4014	4019	4024	4031	4050	4077	4502

Although not all CMOS devices are covered in the fact sheets, it should be possible to develop your own test procedures using the methods shown in the booklet.

DECADE BOXES

Resistance Box

Precision Gold

A six decade resistance box ideal for schools, laboratories and industry. The box can simulate resistances from 1Ω to 999,999Ω in 1Ω steps very accurately. The resistance is set using push-buttons and the value is displayed in ohms. An additional 1kΩ resistor is provided connected between one of the terminals of the internal resistance and a third terminal so that the box can be used as a very accurate potential divider (but ensure that power rating of resistors is not exceeded). A fourth terminal marked 'Screen' enables the metal box to be connected to earth. Outputs are on terminal posts with 4mm top sockets.

Specification

Decade 1Ω to 9Ω:	1W, ±1% tolerance
Decade 10Ω to 99Ω:	1W, ±0.5% tolerance
Decades 100Ω to 999kΩ:	0.5W, ±0.1% tolerance
Max switching current:	75mA
Max carrying current:	1A
Stability:	100ppm/°C

The unit is housed in a black metal box with non-slip feet.

Box size:	113 x 71 x 50mm high
Overall height:	75mm

Order

Code	Type	Price each
JL63T	C1 Resistance Box	£59.99

Capacitance Box

A five decade capacitance box ideal for schools, laboratories and industry. The box can simulate capacitances from 100pF to 9.9999µF in 100pF steps. The capacitance is set using push-buttons and the value is displayed in µF. A third terminal is provided marked 'Screen' to enable the metal box to be connected to earth. Outputs are on terminal posts with 4mm top sockets.

Specification

Range:	100pF to 9.9999µF in 100pF steps
Tolerance:	±1%
Working voltage:	63V DC, 40V AC
Stability:	200ppm/°C
Residual capacitance:	<40pF

The unit is housed in a black metal box with non-slip feet.

Box size:	113 x 71 x 50mm high
Overall height:	75mm

YT55K	B1 Capacitance Box	£109.99

Capacitance Meter

Powered by a single PP3 battery, this useful piece of test gear will be invaluable in determining the values of capacitors otherwise unknown. Simply insert the leads of the capacitor to be tested into the pair of 1mm sockets on top of the instrument, select the required range and press the button. The five ranges comprise:-

FSD	Resolution
99.9µF	0.1µF
9.99µF	10nF
999nF	1nF
99.9nF	100pF
9.99nF	10pF

The display consists of a 3-digit 7-segment LED display with floating decimal point and an over-range indicator. A pair of short test leads terminated in 1mm plugs at one end and insulated crocodile clips at the other can be used for measuring components that cannot be used with the test sockets. Dimensions: 157 x 81 x 55mm overall. Weight: 200gms.

YJ86T	A1 Capacitance Meter	£59.99

LCR Bridge

This instrument will determine the value of resistance, capacitance or inductance of any device connected to it, using a bridge nulling technique. It is fully built and tested. It has six ranges for each function allowing readings to be made (assuming one can read to a tenth of a large division) of 0.1Ω to 1MΩ, 10pF to 100µF, 1µH to 10H.

Ranges:

Resistance	10Ω, 100Ω, 1kΩ, 10kΩ, 100kΩ, 1MΩ.
Capacitance	1000pF, 0.01µF, 0.1µF, 1µF, 10µF, 100µF.
Inductance	100µH, 1mH, 10mH, 100mH, 1H, 10H.
Accuracy:	±2%
Requires one PP3 battery (not supplied).

M195 LCR Meter

Precision Gold

An immensely useful inductance, resistance, and capacitance meter which will provide accurate measurements of component values. The value of each component can be read from a 0.5 inch high, 3 1/2 -digit LCD display, which includes over-range and low battery indicators. Two sets of red and black test leads are provided; a short set terminates in crocodile clips and a pair of conventional test probes. In addition a two terminal socket on the front panel allows direct connection of a component to the meter. A battery is also supplied, replacement type PP3.

Specification

Capacitance	
Ranges:	200pF, 2nF, 20nF, 200nF, 2µF, 20µF, 200µF
Accuracy:	≤0.5µF ±2% ±1 digit >0.5µF ±3% ±1 digit
Zero error:	<5pF
Resistance	
Ranges:	20Ω, 200Ω, 2kΩ, 20kΩ, 200kΩ, 2MΩ, 20MΩ
Accuracy:	≤1M ±1% ±1 digit >1M ±5% ±1 digit
Zero error:	<100mΩ
Inductance	
Ranges:	2mH, 20mH, 200mH, 2H, 20H, 200H
Accuracy:	≤2mH to 2H ±3% >2H to 200H ±5%
Zero error:	<10µH

The meter is protected up to 250V AC or DC, instantly or from charged capacitors, to any input terminal.

ELECTRICAL METERS

AC Millivoltmeter

Topward

A superb quality AC millivoltmeter which is certain to prove extremely useful to the audio enthusiast. The instrument is capable of registering, at FSD, voltage levels from 1mV to 300V on its generously sized, 110 x 62mm meter scale with knife-edge pointer. A single attenuator control covers the range in 12 calibrated steps in 1, 3, 10 sequence. A signal voltage to be measured, as applied to the input 4mm terminal posts, is reduced as necessary by a first attenuator, before passing on to second and third attenuation stages via an active impedance changer, which ensures that the instrument is presented with the proper input impedance for accurate operation at all times. The result is displayed on the meter movement, driven by an amplifier followed by an Absolute Mean Value detector. The scale is calibrated as 1V at FSD, and this AC voltage (1V max.) is made externally available on a pair of output sockets.

The meter has four calibrated scales; two black scales from 0 to 1.0V and 0 to 3V RMS respectively corresponding to the voltage positions of the attenuator. These range from 1 to 300mV and 1 to 300V. The 1V position is the reference position and corresponds directly with FSD volts on the scale. Signal gain or loss of an audio, AF or similar analogue system in volts can be established by alternate measurements of the input and output, and noting the attenuator positions required to achieve similar scale readings. The gain or loss of the signal can then be calculated.

For 'proper' measurements of this sort, there are also two dB scales provided. A blue dBV scale is calibrated from -20dB to 0dB, where in this case 0dB corresponds to 1V RMS according to the dBV convention, where the standard of 0dB = 1mW into 600Ω cannot apply. For this purpose the attenuator positions are also calibrated from -60 to +50dB, so that signal level comparisons can be made on the dB scale, and where the 1V position of the attenuator also corresponds to 0dB.

A further red dB scale is also provided and is calibrated for the 'correct' 0dBm standard of 0dB @ 0.775V RMS or 1mW into 600Ω. The entire scale covers the range -20 to +2 dB, and this also corresponds to the dB calibrations of the attenuator. The signal output is always 0 - 1V RMS for 0 - FSD of scale reading.

Specification	
Ranges:	
Volts	1mV - 300V RMS in 12 ranges, in 1, 3, 10 sequence
dBV	-90 to +40dB
dBm	-90 to +42dBm, 0dB = 1mW/600Ω
Error	±3% of FSD @ 1kHz
Freq. response, with reference to 1kHz	±10% @ 5Hz - 1MHz ±5% @ 10Hz - 500kHz ±3% @ 20Hz - 200kHz ±2% @ 30Hz - 100kHz
Input impedance	10MΩ ±5% + 45pF
Max. safe input	500V DC or peak AC
Output amplifier:	
Gain	≈ 70dB
Distortion	<1% @ FSD
Output level	1V RMS ±10% max.
Output impedance	600Ω ±10%
Signal to noise ratio	>40dB @ FSD, >30dB @ 0.3mV
Frequency response	±3dB @ 5Hz - 500kHz
Power requirements	240V AC ±10% 50Hz, ≈ 10VA
Stability	±0.5% of FSD for ±10% of supply voltage
Dimensions	138 x 212 x 218mm
Weight	3kg

Signal Generator

A Wien bridge oscillator fully built and tested giving high purity sine or square wave outputs with frequency and amplitude adjustable. Robust, lightweight, simple to use, yet its specification is better than many instruments of far higher price.

Specification		
	Sine wave	Square wave
Output voltage (max)	1V rms	9V peak-to-peak
Frequency range	15Hz to 200kHz	15Hz to 100kHz (then to 200kHz non-linear with scale)
Total harmonic distortion:	0.5%.	
Output via 4mm terminals.	Size: 127 x 102 x 51mm.	
Requires one PP3 battery (not supplied).		

Order Code	Type	Price each
YB81C	Signal Generator	£54.99

Low Distortion AF Signal Generator

Topward

- ★ Distortion less than 0.005%
- ★ Frequency range 5Hz to 500kHz
- ★ Precision output attenuator

A precision audio signal generator covering the range 5Hz to 500kHz with both sine and squarewave outputs. An ideal choice for exacting audio work, for the hobbyist and the professional alike, the instrument has a large, 95mm diameter calibrated frequency scale marked from 5 to 50. A bank of five push-buttons to the right of the scale select the ranges X1 to X10,000. The oscillator uses the Wien bridge principle with a movable part resistance to achieve the variable control. The dial has no end stops and so it is possible to jump from the high end of the scale to the low end directly without having to wind it all the way to the bottom again while changing up to the next range, making it much quicker and easier to traverse a wide range of consecutive frequency bands. The generator is optimised for AF testing and its lowest distortion value of 0.005% is concentrated over the range 20Hz to 20kHz, enabling distortion analysers and THD meters to be used with the audio equipment under test. Outside these limits the distortion is slightly greater.

One of the best features of the instrument is the comprehensive attenuator, calibrated in decibels, comprising three rotary switches which select decades, units and tenths of a decibel respectively. With these it is possible to obtain an output level from as low as -69.9dB to +10dB with a resolution of 0.1dB, very useful for extremely fine frequency response measurements. 1V rms is the level chosen as 0dB. A push-button at the bottom of the front panel selects the squarewave option, for which 0dB corresponds to 4V peak-to-peak. The single output socket is BNC and the impedance is 600Ω. There is also a push-button on/off switch and a red LED power on indicator. The instrument is housed in a painted steel case with heavy-duty feet and a carrying strap handle on top, and the width is only 140mm so that the instrument does not take up too much space on the workbench. Altogether a very impressive instrument. Supplied with 1.7m of mains lead and manual. Fuse included on rear panel.

Specification	
Frequency range:	5Hz to 500kHz over 5 ranges
Waveforms:	Sine and square
Frequency response, with reference to 1kHz:	±0.2dB @ 5Hz - 20kHz ±0.5dB @ 20kHz - 500kHz
Distortion:	<0.005% @ 20Hz - 20kHz <0.01% @ 10Hz - 50kHz <0.1% @ 5Hz - 500kHz
Attenuator ranges:	7 x decade, 9 x units, 9 x tenths
Attenuator output:	-69.9dB to +10dB in 0.1dB steps
Source impedance, sine:	600Ω unbalanced

AM/FM Modulated Function Generator

A high quality, portable bench top function generator with many useful features. The instrument is capable of producing five different waveforms; sine, triangular, square, ramp and pulse, over a frequency range extending from 0.1Hz to 2MHz. A bank of seven interlocked buttons select the frequency bands in 1, 10, 100, 1k, 10k, 100k and 1MHz steps, and an additional calibrated rotary control can be used to 'fill in' between these as well as providing a means of extending the frequency of the selected band from f_0 x1 to f_0 x2. The outputted waveform can be inverted 180° by simply depressing the 'invert' button if required. The output amplitude is continuously variable and can be reduced further by a -30dB attenuator. Three principle square, sine and triangular waveforms can be selected by a further three interlocked buttons, but in addition a rotary control is provided to continuously vary the duty cycle either side of 50%. The knob has to be pulled out to be effective, where the duty cycle can be varied between 20% and 80%. While the knob is pushed in the preset default standard 50% is in effect. It is with this control that both positive or negative going pulse (square wave selected) or ramp (triangular wave selected) outputs are possible with variable duty cycle. A further control is provided to vary the DC offset of the output signal about zero or 0V; again this knob must be pulled out to take effect or else the signal is output with the default of equal amplitude positive and negative peaks either side of 0V. Finally both FM or AM modulation of the output signal is possible, either with an internally generated 400Hz sine wave tone (standard test modulation frequency), or from an external signal applied to a front panel input socket. The modulation depth is continuously variable with a front panel control and can be up to 100% for AM or ±10% of carrier frequency for FM; the two modes are switch selected. If the modulation depth control knob is pulled out then the modulation signal is external as applied to the EXT. socket and must be at least 5V peak to achieve 100% modulation. If the knob is pushed in then the internal 400Hz signal is used, which is also output simultaneously to the EXT. socket for other uses. A rear panel 'VCF' socket is included with which a modulation voltage can be applied direct to the VCO and must be 5V peak to achieve a 1000 : 1 frequency sweep range. The instrument also outputs a TTL compatible synchronisation pulse for each cycle on a second rear panel socket. All front and rear sockets are 50Ω BNC type.

Specifications

Frequency	0.1Hz - 2.0MHz in 7 ranges
Freq. rotary control scale error	±5% of full scale
Output impedance	50Ω ±10%
Output level	5mV p-p to 20V p-p
Output attenuation available	0dB and -30dB
DC offset max.	+ or -10V
Duty cycle	Variable 20% - 80%
Distortion	<1% THD 10Hz - 50kHz
Rise time	<100ns
Sync. pulse	>3V p-p TTL
VCF level	0 - 5V DC for 1000:1 sweep
AM modulation:	
Depth	0 - 100% max.
Frequency, internal	400Hz
Bandwidth, external	DC - 1MHz
Carrier bandwidth	100Hz - 1MHz ±3dB
Ext. sensitivity	<5V p-p for 100% modulation
FM modulation:	
Deviation	0 to ±10% max. of set carrier freq.
Frequency, internal	400Hz ±10%
Bandwidth, external	DC - 20kHz
Power requirements	240V ±10% @ 50Hz, ±9.6VA

Wide Range Pulse Generator Topward

A compact, portable bench-top pulse generator with a usefully wide output frequency range from 0.5Hz to 5MHz. Its simple and rugged design built with high quality components will ensure long and reliable service. The instrument is primarily designed as a clock or pulse source, and is fully compatible with both IC and discrete circuits. The output pulse cycle duration, and frequency, are determined by two identical pulse width and spacing controls, comprising a six position range switch, covering 100ms to 100ns, with an integral and continuously variable vernier in the centre which can be used to 'fill in' between ranges and extend the timed duration by up to 10 times the selected value. Duration of positive going pulses are controlled by the pulse width control, and space time between by the pulse spacing control. The generator is capable of four modes of operation. In the 'run' mode, the instrument behaves like an oscillator and produces a continuous output stream of pulses. In the 'trigger' mode, output remains in the low state until a trigger pulse is applied to the trigger input, generating a positive output pulse synchronised with the trigger signal. The output pulse is initiated by the positive edge of the input trigger. The pulse spacing control is not used in this mode. In the 'gate' mode the generator outputs a stream of pulses with duration defined by the width control and spacing defined by the spacing control, for as long as the gate input is high. The last pulse will be completed even if the gate signal finished before it. In the 'one shot' mode, the 'one shot' button will produce an output pulse of duration determined by the width control only.

If the 'square wave' button is depressed then the 'programmed' waveform is converted into a square wave where the output changes state on every positive edge of the original waveform, with a 50% duty cycle and at half frequency. All the other modes still apply. An invert button can be used to invert the output 180°. The output is simultaneously available on two sockets, one of which is a constant TTL level, the other continuously variable from 0.1V to 10V peak via an amplitude control. In addition a sync. pulse is available on the sync. output socket, and is 20ns @ >2.4V, and leads the main outputs by 20ns for the purpose of triggering oscilloscopes, etc. All front panel sockets are 50Ω BNC type.

Specification

Freq. range	0.5Hz to 5MHz
Pulse width and spacing controls, each	100ns to 100ms in 7 steps +vernier x1 to 10
Duty cycle	10 ⁷ to 1 range variable
Accuracy	±5% while vernier x1
Jitter	<0.1% +50ps
Modes:	
Run mode	0.5Hz to 5MHz continuous
Trig. mode input	DC to ±10MHz external
Gate mode input	Leading edge synchronous start
Trig./gate pulse	>2.4V peak, >40ns width
Trig./gate sine	>1.7V RMS <10MHz
Trig./gate input impedance	400Ω max.
Max. input level, all	±10V
Outputs:	
Var. output	±0.1 to 10V peak, variable
Rise & fall time	30ns
Output impedance	50Ω
TTL output	>2.4V peak
Current sink	64mA
TTL fan-out	40 TTL inputs
Rise & fall time	<20ns
Sync. output	>2.4V
Current sync.	16mA
TTL fan-out	10 TTL inputs
Rise & fall time	<20ns
Power requirements	240V ±10% @ 50Hz, 6VA
Dimensions	251 x 92 x 330 incl. handle/ tilt leg
Weight	1.5kg

Digital Frequency Counters

Two compact, portable hand-held frequency counters that have an 8-digit red LED display and are powered from internal rechargeable batteries. The M415F measures from 10Hz to 1.2GHz, and model M416F measures from 10Hz to 2.7GHz. These easy-to-use counters have only two switches and two BNC input sockets. The lower switch has a centre off position and can select either input A or B. Input A covers the range 20MHz to 1.2GHz (2.7GHz on M416F) and input B covers the range 10Hz to 20MHz. The second switch selects the gate period. These high sensitivity meters can be powered from an external 12V DC supply (not supplied) which will also recharge the internal batteries. Normal recharge time is 5 hours and the meters can operate for 4 hours with a full charge. Overcharge protection is included. These meters are ideal for use by any hobbyist, radio amateur, engineer or student who needs an accurate and versatile means of frequency measurement. A suitable charger is BZ83E (see 'Batteries and PSUs').

Specification	Input B	Input A
Frequency range:		
M415F	10Hz to 20MHz	20MHz to 1.2GHz
M416F	10Hz to 20MHz	20MHz to 2.7GHz
Sensitivity:	M415F and M416F	
	Input B	Input A
10Hz to 20MHz	<3mV	
20MHz to 25MHz	<6mV	
21MHz to 26MHz		<12mV
26MHz to 30MHz		<7mV
30MHz to 50MHz		<6mV
50MHz to 400MHz		<2mV
400MHz to 600MHz		<3mV
600MHz to 700MHz		<5mV
700MHz to 900MHz		<6mV
900MHz to 1.05GHz		<8mV
1.05GHz to 1.1GHz		<9mV
1.1GHz to 1.2GHz		<12mV
M416F only		
1.2GHz to 1.4GHz		<12mV
1.4GHz to 1.7GHz		<14mV
1.7GHz to 2.0GHz		<16mV
2.0GHz to 2.7GHz		<20mV
Impedance:	50Ω	1MΩ
Max. input voltage:	100V pk-pk	1.2 pk-pk (+15dBm)
Gate time:	2.00s, 0.20s, 0.02s	2.56s, 0.25s, 0.02s
Resolution:	1Hz	100Hz
Coupling system:	AC coupled	
Display:	8-digit LED display	
Reference oscillator:	5ppm accuracy within operation temperature	
Operating temp:	0°C to 45°C	
Power source:	8.4V internal Ni-Cad battery pack or 12V 500mA DC	
Dimensions:	82.3 x 34 x 131mm	

Order Code	Type	Price each
BZ70M	H1 1.2GHz Counter M415F	£129.99
BZ71N	H1 2.7GHz Counter M416F	£179.99

Antenna Accessory

A six section telescopic antenna for use with frequency counters. By adjusting the sections according to the chart supplied with the antenna it is possible to tune the antenna to frequencies between 14MHz and 2.79GHz.

Order Code	Type	Price each
CR35Q	FC Antenna	£9.99

1GHz Universal Counter Timer

A high quality, 10Hz to 1GHz multiple function counter. The counter has an eight-digit, high brightness, 7-segment LED display and a high stability crystal oven oscillator for maximum accuracy. The meter has six function switches. Three are associated with frequency mode. With the 10MHz or 80MHz switch selected, the frequency on the channel A input BNC socket will be displayed. With the 1GHz switch selected, the frequency on the channel B input BNC socket will be displayed. The gate time for channel A can be set to 100ms, 1s or 10s. For channel B it can be set to 128ms, 1.28s or 12.8s. For very high voltage inputs an attenuator can be switched in to cut the input by a factor of 10 (20dB) but only on channel A.

Specification

Frequency Measurements Channel A	
Range:	10Hz to 80MHz
Resolution:	10Hz, 1Hz, 0.1Hz
Gate time:	0.1s, 1s, 10s
Accuracy:	±1 count ±time base accuracy
Frequency Measurements Channel B	
Range:	50MHz to 1GHz
Resolution:	1kHz, 100Hz, 10Hz
Gate time:	0.128s, 1.28s, 12.8s
Accuracy:	±1 count ±time base
Input Characteristics Channel A	
Input sensitivity:	25mV R.M.S. 10Hz to 80MHz
Attenuation:	x1, x10
Impedance:	1MΩ/100pF
Max. input voltage:	150V R.M.S. 10Hz to 400Hz 20V R.M.S. 400Hz to 100kHz 5V R.M.S. 100kHz to 100MHz

Input Characteristics Channel B	
Input sensitivity:	25mV R.M.S. 50MHz to 1GHz
Impedance:	50Ω
Max. input voltage:	5V R.M.S. 50MHz to 1GHz

Time Base	
Frequency, Channel A:	10MHz
Channel B:	7.8125MHz
Accuracy:	±1 x 10 ⁻⁵ (±10ppm) from 0°C to +40°C

General	
Display:	8 digit, 7 segment LED display. LED indicators for gate, overflow, Hz and MHz
Size:	251 x 92 x 288mm deep
Weight:	1.4kg approx.
Power requirement:	115V/230V ±10%, 50/60Hz 10VA approx.

The case has heavy-duty rubber feet and a carry handle that can be used as a tilt stand. It is supplied with a removable mains lead and a 1m long lead with a BNC plug at one end and red and black crocodile clips at the other. Operator's manual also supplied.

Order Code	Type	Price each

OSCILLOSCOPES

20MHz 2-Channel Oscilloscope OS-9020A

Goldstar

A portable 2-channel, dual trace oscilloscope built to a high quality. The front panel layout follows a simple and logical format with which the new user will quickly become familiar. The 9020A has all the capabilities required of a general-purpose oscilloscope and will accept signals from DC to 20MHz with a high degree of accuracy, and includes TV field and line triggering for video work.

Features

Large 6in, high luminance CRT with internal graticule of 8 x 10cm. Wide dynamic range even at high frequencies where sensitivity is down -3dB. Fast rise time with low overshoot. Flat frequency response up to half of the -3dB frequency point. Selectable alternate and chop for 2-channel display. Polarity inversion and algebraic summing of CH1 and CH2. Superb, jitterless trigger sensitivity. TV sync separator and hold-off useful for video signal observation. Z-axis brightness modulation available. Electronically compensated for low trace drift. X-Y phase difference measurement possible up to 50kHz.

Specification

CRT:	
Screen:	6in. rectangular with internal graticule, effective area 8 x 10cm
Acceleration:	1.9kV
Z-axis input (intensity modulation):	
Input signal:	Positive going for decreasing intensity, effective from 5V pk-pk at normal brightness
Bandwidth:	DC to 2MHz (-3dB)
Coupling:	DC
Input impedance:	20kΩ to 30kΩ
Maximum input voltage:	30V DC + peak AC
Vertical deflection (CH1 & CH2):	
Bandwidth:	DC (-3dB @ 10Hz) to 20MHz (7MHz if x5 X magnification on)
Modes:	CH1, CH2, Add, Dual, Chop, Alt.
Sensitivity:	5mV/cm to 5V/cm in 10 calibrated steps in 1-2-5 sequence ±3% (1mV/cm to 1V/cm if x5 magnification on, ±5%)
Accuracy:	±3% (±5% if x5 magnification on)
Input impedance:	1MΩ/25pF
Maximum input voltage:	250V DC + peak AC

Continued on next page.

Continued from previous page.

Input coupling: DC/AC/Gnd ref.
 Risetime: <17.5ns (<50ns if x5 magnification on)
 CH1 out: 20mV/cm into 50Ω, DC to 10MHz (-3dB)
 Polarity: CH2 invert option

Horizontal deflection:
 Sweep modes: A, X-Y
 Timebase A: 0.2μs/cm to 0.2s/cm in 19 calibrated steps in 1-2-5 sequence

Hold-off time: Variable
 Sweep magnification: 10 times (20ns/cm max.)
 Accuracy: ±3% (add 2% for magnifier)

Triggering:
 Modes: Auto, Norm, TV vertical, TV horizontal
 Source: CH1, CH2, Line, External
 Coupling: AC
 Slope: + or -
 Sensitivity, Auto, Norm: 0.5cm @ 20Hz to 2MHz internal, 0.2V pk-pk external 1.5cm @ 2MHz to 20MHz internal, 0.8V pk-pk external

TV field or line: At least 1cm internal or 1V pk-pk external

External trigger input impedance: 1MΩ/30pF
 Maximum input voltage: 250V DC + peak AC

X-Y operation:
 Sensitivity: Same as vertical deflection for both CH1 = X and CH2 = Y

X-axis bandwidth: DC to 500kHz (-3dB)
 X-Y phase error: 3° or less (@ DC to 50kHz)

Calibrator: 1kHz square wave, 0.5V pk-pk ±3%, 50% duty cycle

Power supply:
 Line voltage: 240V AC ±10%
 Line frequency: 50/60Hz
 Power consumption: 30W
 Dimensions: (W)320 x (H)135 x (L)320mm
 Weight: 6.8kg
 Supplied with operating manual, mains lead, two spare fuses and probes. Case fitted with stand.

Order Code	Type	Price each

40/60MHz 2-Channel Oscilloscopes OS-9040D/60D

Goldstar

A choice of two portable 2-channel, dual trace oscilloscope built to a high quality and incorporating a full scale delayed sweep function, where any portion of the signal displayed with the main timebase can be magnified, and both the magnified portion and the original display can be shown simultaneously. This is invaluable for examining short duration events. The front panel layout follows a simple and logical format with which the new user will quickly become familiar. The 9040D is ideally suited to the observation of high

speed events in TV, video and the general purpose fields and will accept signals from DC to 40MHz with a high degree of accuracy. A delay line is also included for the observation of fast leading edges. The 9060D will accept signals from DC to 60MHz, again with a high degree of accuracy.

Features

Large 6 inch, high luminance CRT with internal graticule of 8 x 10 cm.
 Wide dynamic range even at high frequencies where sensitivity is down -3dB.
 Fast risetime with low overshoot.
 Flat frequency response up to half of the -3dB frequency point.
 Selectable alternate and chop for 2-channel display.
 Polarity inversion and algebraic summing of channel 1 and channel 2.
 Maximum sweep rates of 20ns/cm for the 9040D and 10ns/cm for the 9060D.
 Variable scale illumination.
 Delayed sweep function with minimum delay time jitter of 1/20,000 or less.
 Superb, jitterless trigger sensitivity.
 TV sync separator and hold-off useful for video signal observation.
 Z-axis brightness modulation available.
 Electronically compensated for low trace drift.
 Signal delay with delay line useful for high speed pulse work.
 X - Y phase difference measurement possible up to 50kHz.

Specification

CRT:
 Screen: 6in. rectangular with internal graticule, effective area 8 x 10cm

Acceleration
 OS-9040D: 12kV
 OS-9060D: 10kV

Z-axis input (intensity modulation)
 Input signal: Positive going for decreasing intensity, effective from 5V pk-pk at normal brightness

Bandwidth
 OS-9040D: DC to 2.0MHz (-3dB)
 OS-9060D: DC to 3.5MHz (-3dB)

Coupling: DC
Input impedance: 20kΩ to 30kΩ
Maximum input voltage: 30V DC + peak AC
Vertical deflection (Ch1 & Ch2):
 OS-9040D: DC (-3dB @ 10Hz) to 40MHz (7MHz if x5 X magnification on)
 OS-9060D: DC (-3dB @ 10Hz) to 60MHz (20MHz if x5 X magnification on)

Modes: Ch1, Ch2, Add, Dual, Chop, Alt. (CHOP: Time/div 0.2s to 5ms ALT: Time/div 2ms to 0.1μs, to 0.1μs on OS-9060D.)

Sensitivity: 5mV/cm to 5V/cm in 10 calibrated steps in 1-2-5 sequence ±3% (1mV/cm to 1V/cm if x5 magnification on, ±5%) ±3% (±5% if x5 magnification on)

Accuracy: ±3% (±5% if x5 magnification on)
Input impedance: 1MΩ/25pF
Maximum input voltage: 250V DC + peak AC
Input coupling: DC/AC/Gnd ref.
Risetime
 OS-9040D: <8.8ns (<50ns if x5 magnification on)
 OS-9060D: <5.8ns (<17.5ns if x5 magnification on)

Ch1 out: 20mV/cm into 50Ω, DC to 10MHz (-3dB)
Polarity: Ch2 invert option

Horizontal deflection:
 Sweep modes: A, A int B, B, B triggered, X-Y
 Timebase A: 0.1μs/cm to 0.2s/cm in 20 calibrated steps in 1-2-5 sequence

Hold-off time: Variable
Timebase B: 0.1μs/cm to 10μs/cm in 7 calibrated steps in 1-2-5 sequence

Delayed sweep start: <1cm to >10cm
Delay time jitter: Better than 1/20,000
Sweep magnification
 OS-9040D: 10 times (20ns/cm max.)
 OS-9060D: 10 times (10ns/cm max.)
Accuracy: ±3% (add 2% for magnifier)

Triggering:
 Modes: Auto, Norm, TV vertical, TV horizontal
 Source: Ch1, Ch2, Line, External
 Coupling: AC
 Slope: + or -
 Sensitivity, Auto, Norm
 OS-9040D: 0.5cm at 20Hz to 2MHz internal, 0.2V pk-pk external 1.5cm at 2MHz to 40MHz internal, 0.8V pk-pk external
 OS-9060D: 0.5cm at 20Hz to 2MHz internal, 0.15V pk-pk external 1.5cm at 2MHz to 60MHz internal, 0.3V pk-pk external

TV field or line: At least 1cm internal or 1V pk-pk external

External trigger input impedance: 1MΩ/30pF
Maximum input voltage: 250V DC + peak AC

X-Y operation:
 Sensitivity: Same as vertical deflection for both Ch1 = X and Ch2 = Y
 X-axis bandwidth: DC to 500kHz (-3dB)
 X-Y phase error: 3° or less (at DC to 50kHz)

Calibrator: 1kHz square wave, 0.5V pk-pk ±3%, 50% duty cycle

Power supply:
 Line voltage: 240V AC ±10%
 Line frequency: 50/60Hz
 Power consumption
 OS-9040D: 40W
 OS-9060D: 50W
 Dimensions: 320(W) x 135(H) x 320(L)mm
 Weight
 OS-9040D: 7.2kg
 OS-9060D: 7.7kg

Supplied with operating manual, mains lead and two spare fuses. Case is fitted with stand. A 60MHz Scope Probe for use on the 9060D is available separately (AQ58N).

Order Code	Type	Price each

AP95D	Manual for GW03/GW04	£14.99 NV

60MHz Oscilloscope Probe HP-2060

The HP-2060 is a high-quality passive oscilloscope probe for use with scopes up to 60MHz. The probe is suited to equipment with an input impedance of 1MΩ shunted by 25pF. However, it is possible to compensate for equipment with an input capacitance in the range 10-35pF. The probe also features a switchable attenuator with X1 and X10 settings as well as a 1.4m flexible screened cable. The probe head can be detached from the cable assembly by unplugging the push-fit BNC connector. Compensation adjustment is available so that the probe does not distort sampled waveforms. Simply apply a 1kHz square waveform to the probe tip and adjust the recessed trimmer concealed in the probe head.

Specification

Attenuation Ratio:	1:1, 10:1 switchable
Bandwidth:	DC to 15MHz (1:1), DC to 60MHz (10:1)
Rise time:	27ns (1:1), 5.5ns (10:1)
Input resistance	
1:1 attenuation:	1MΩ (ie. oscilloscope input)
10:1 attenuation:	10MΩ (when used with 1MΩ input oscilloscopes)
Input capacitance	
1:1 attenuation:	46pF plus oscilloscope capacitance
10:1 attenuation:	≈18pF
Working voltage:	600V DC including peak AC

The probe is supplied with two channel identifier clips, a sprung loaded hook, ground lead, insulating tip, IC test tip, operating manual and an adjustment tool for the internal trimmer.

Order Code	Type	Price each
AQ58N	60MHz Scope Probe	£12.99

100MHz 3-Channel Oscilloscope OS-9100D

Goldstar

A super oscilloscope capable of displaying waveforms or events at frequencies from DC up to greater than 100MHz, with three input channels showing up to six traces. This bandwidth, along with the increased magnification, makes for displaying complex signals with precision and accuracy. It incorporates a full scale delayed sweep function, where any portion of the signal displayed with the main timebase can be magnified, and both the magnified portion and the original display can be shown simultaneously. This is invaluable for examining short duration events. The front panel layout follows a simple and logical format with which the new user will quickly become familiar. Ideal for exacting laboratory tasks, examining RF signals and high-speed logic.

Features

Wider than specified frequency response.
Fast risetime, less than 3.5ns with low overshoot.
Dynamic range up to 100MHz without waveform distortion.
Low input capacitance of less than 22pF.
Three input channels offering six separate traces with alternate sweep function convenient for observation of multiple signals.
High vertical sensitivity down to 1mV/cm.
High brightness, domed-mesh CRT.
Signal delay line useful for observing fast leading edges.
Auto focusing responding to screen intensity changes.
Alternate and chop trace switching modes.
Algebraic summing of CH1 and CH2 possible.
Polarity inversion of CH2 possible.
Z-axis or brightness modulation from external input.
Drift compensated vertical amplifier.
Maximum sweep rate of 5ns/cm.
Delayed sweep function.
High sensitivity and jitterless triggering.
TV sync. separator and hold-off.
X-Y phase difference measurement up to 100kHz.

Specification

CRT:	
Screen:	6in. rectangular with internal graticule, effective area 8 x 10cm
Acceleration:	16.5kV
Z-axis input (intensity modulation):	
Input signal:	Positive going for decreasing intensity, effective from 5V pk-pk at normal brightness
Bandwidth:	DC to 3.5MHz (-3dB)
Coupling:	DC
Input impedance:	15kΩ
Maximum input voltage:	20V DC + peak AC
Vertical deflection (CH1 & CH2):	
Bandwidth:	DC (-3dB @ 10Hz) to 100MHz (20MHz if x5 X magnification on)
Modes:	CH1, CH2, Add, Dual, Chop, Alt.
Sensitivity:	5mV/cm to 5V/cm in 10 calibrated steps in 1-2-5 sequence ±3% (1mV/cm to 1V/cm if x5 magnification on, ±5%)

Accuracy:	±3% (±5% if x5 magnification on)
Input impedance:	1MΩ/25pF
Maximum input voltage:	250V DC + peak AC or 400V pk-pk at 1kHz or less DC/AC/Gnd ref.
Input coupling:	
Risetime:	<3.5ns (<17.5ns if x5 magnification on)
CH1 out:	20mV/cm into 50Ω, DC to 30MHz (-3dB)
Polarity:	CH2 invert option
Channel 3 vertical deflection:	
Sensitivity:	0.1V/cm to 1V/cm
Bandwidth:	DC (-3dB @ 10Hz) to 50MHz
Risetime:	<7ns
Accuracy:	±5%
Input impedance:	1MΩ/25pF
Maximum input voltage:	250V DC + peak AC
Horizontal deflection:	
Sweep modes:	A, Alt., B, B triggered, X-Y
Timebase A:	50ns/cm to 0.5s/cm in 22 calibrated steps in 1-2-5 sequence
Hold-off time:	Variable
Timebase B:	50ns/cm to 50ms/cm in 19 calibrated steps in 1-2-5 sequence
Delayed sweep start:	<1cm to >10cm
Delay time jitter:	Better than 1/20,000
Sweep magnification:	10 times (5ns/cm max.)
Accuracy:	±3% (add 2% for magnifier)

Triggering:	
Modes:	Auto, Norm, TV vertical, TV horizontal
Source:	CH1, CH2, Line, External (CH3)
Coupling:	AC, LF reject, HF reject, DC
Slope:	+ or -
Sensitivity, Auto, Norm:	0.5cm @ DC to 10MHz internal, 0.1V pk-pk external 1.5cm @ DC to 100MHz internal, 0.3V pk-pk external
TV field or line:	At least 1cm internal or 1V pk-pk external
External trigger input impedance:	1MΩ/30pF
Maximum input voltage:	250V DC + peak AC
X-Y operation:	
Sensitivity:	Same as vertical deflection for both CH1 = X and CH2 = Y
X-axis bandwidth:	DC to 2MHz (-3dB)
X-Y phase error:	3° or less (@ DC to 100kHz)
Calibrator:	1kHz square wave, 0.5V pk-pk ±1%, 50% duty cycle
Power supply:	
Line voltage:	240V AC ±10%
Line frequency:	50/60Hz
Power consumption:	60W
Dimensions:	(W)320 x (H)140 x (L)420mm
Weight:	8.5kg
Supplied with operating manual, mains lead, two spare fuses. Case is fitted with a multi-position stand/carrying handle. A service manual is available separately (AP96E). Probes not included. Suitable probes are YR95D and BW05F.	

Order Code	Type	Price each

40MHz 2-Channel Read-Out Oscilloscope OS-904RD

Goldstar

A portable 2-channel, 40MHz bandwidth dual trace oscilloscope built to a high quality and incorporating a full scale delayed sweep function invaluable for examining short duration events. The front panel layout follows a simple and logical format with which the new user will quickly become familiar.

In addition the 904RD has on-screen generated, character read-out capability showing voltage and timing information about the trace if required. The on-waveform potential difference measurement displays the potential difference between two points of the waveform where the moveable cursors intersect. This is helpful for measuring peak to peak voltages of a signal, for example. The measured value is displayed in the top left corner of the screen. In addition the time difference, as measured between the two cursors, is shown top right. The two cursors are shown as 'X' and '+' symbols, and can be positioned horizontally anywhere on the trace. In addition the input channel number, attenuation level (vertical sensitivity per cm) and horizontal timebase sweep per cm are shown at the bottom of the screen.

Finally the read-out can also show the frequency of the waveform, or that part of it that lies between the two cursors. This is most useful for finding the frequency of a harmonic or some other superimposed signal over the fundamental waveform. This display appears at top right in place of the time difference reading in this mode; all other parts of the read-out are as before.

The 904RD is ideally suited to laboratory or workshop uses and the observation of high-speed events in TV, video and the general-purpose fields, and will accept signals from DC to 40MHz with a high degree of accuracy. The read-out facility provides the ability to examine waveforms in minute detail more easily than by interpreting the graticule alone. A delay line is also included for the observation of fast leading edges. The CRT includes automatic focusing responding to screen intensity changes, variable graticule illumination and a rotatable trace.

Features

Large 6-in., 8 x 10cm, high illuminance CRT with internal graticule.

Wide dynamic range even at high frequencies with -3dB.

Fast risetime with low overshoot.

Flat frequency response up to half the -3dB point.

Signal delay line useful for observing fast leading edged waveforms.

Maximum sweep rate of 20ns/cm.

Variable scale illumination.

Delayed sweep function with minimum delay time jitter of 1/20,000 or less.

TV sync separator and hold-off for video signal observation.

X-Y phase shift difference measurement possible up to 50kHz.

Character and cursor read-out on CRT with a selection of character and cursor styles.

High precision measurement of f_V , f_T and $1/f_T$ with the cursors.

Specification

CRT:	
Configuration:	6in. with internal 8 x 10cm graticule also marked for risetime with 2mm divisions along central axes
Accelerating potential:	12kV
Phosphor:	P31 (standard)
Z-axis (intensity modulation):	
Input signal:	Negative going for increase in intensity, 5V pk-pk for discernible change in brightness at normal settings
Bandwidth:	DC to 2MHz (-3dB)
Coupling:	DC
Input impedance:	20kΩ to 30kΩ typical
Maximum input voltage:	30V DC + peak AC
Vertical deflection:	
Bandwidth:	DC (-3dB @ 10Hz AC) to 40MHz (7MHz if x5 magnifier on)
Modes:	CH1, CH2, Add, Dual, Chop (0.2s - 5ms/cm), Alt (2ms - 0.2μs/cm)
Sensitivity:	5mV/cm to 5V/cm in 10 calibrated steps in 1-2-5 sequence (1mV/cm to 1V/cm if x5 magnification on)
Accuracy:	±3% (±5% if x5 magnification)
Input impedance:	1MΩ/25pF
Maximum input voltage:	250V DC + peak AC
Input coupling:	DC, AC, Gnd ref.
Risetime:	<8.8ns (<50ns if x5 magnification on)
CH1 out:	20mVcm into 50Ω, DC to 10MHz (-3dB)
Polarity inversion:	CH2 only
Display modes:	A, A int B, B, B triggered, X-Y
Horizontal deflection:	
Timebase A:	0.2μs/cm to 0.2s/cm in 19 calibrated steps in 1-2-5 sequence
Hold-off:	Variable
Timebase B:	0.2μs/cm to 20μs/cm in 7 calibrated steps in 1-2-5 sequence
Delayed sweep start:	<1cm to >10cm
Delayed sweep jitter:	>1/20,000
Sweep magnification:	10 times (sweep rate 20ns max.)
Accuracy:	±3% (±5% if x10 magnification)
Trigger system:	
Modes:	Auto, Norm, TV vertical, TV horizontal
Source:	CH1, CH2, Line, External AC
Coupling:	+ or -
Slope:	
Sensitivity, Auto, Normal:	0.5V/cm @ 20Hz to 2MHz (1.5V/cm @ 2MHz to 40MHz) internal, 0.2V pk-pk @ 20Hz to 2MHz (0.8V pk-pk @ 2MHz to 40MHz) external
TV field and line:	At least 1cm or 1V pk-pk external
External trigger input impedance:	1MΩ/30pF
Maximum input voltage:	250V DC + peak AC
X-Y operation:	
X-axis:	As CH1 except accuracy, ±6%; frequency response, DC to 500kHz (-3dB)

Y-axis: Same as CH2
X-Y phase error: <3° @ DC to 50kHz

Read-out function:

Cursor read-out: Voltage reference f_V :
 f -REF/time reference;
 f_T : f -REF/frequency
reference; $1/f_T$: f -REF.
Note f_V , f_T changed to
 f_X , f_T when in X-Y mode

Panel setting displays: Vertical axis (CH1,CH2):
V/DIV, UNCAL, MAG
(converted value). Note
displayed when vertical
mode is CH1, CH2 or Dual,
not displayed in ADD or
B modes. Horizontal axis:
S/DIV, UNCAL, MAG
(converted value).
Vertical: within ±3cm;
from centre of horizontal:
within ±4cm graticule:

Resolution: 1/25cm

Calibrator: 1kHz approx., 0.5V (±3%)
square wave, 50%
duty cycle

Power supply:

Line voltage: 240V AC ±10%
Line frequency: 50/60Hz
Power consumption: 45W
Dimensions: (W)320 x (H)140 x
(L)430mm

Weight:

7.5kg
Supplied with operating manual, mains lead, two
spare fuses. Probes not included. Suitable probes will
be found on page 340. Case fitted with stand.

20/40/60MHz 2-Channel Digital Storage Oscilloscopes OS-3020/40/60

Goldstar

A range of superb 2-channel, dual trace oscilloscopes with digital storage capabilities for 'freezing' and continuously displaying fast, complex or non-repeatable events. 'Equivalent sampling' is possible for very high frequencies. This is a useful function for digitising and observing high speed repetitive signals. In this method one data item is sampled for every high speed sweep, and the sampling point is shifted to the right with every sweep. A useful function for digitising and observing high speed repetitive signals up to the bandwidth of the oscilloscope. Another procedure called 'averaging' is used to improve the signal to noise ratio of a signal, i.e. to reduce the noise components from the constantly displayed repetitive waveform shown on the screen which has too much noise. In general, after 'averaging' has been performed a number of times, the noise can be reduced to $1/\sqrt{N}$, where N = the number of times.

The 'pre-trigger' function is also provided to allow the operator to observe what happens prior to the trigger point of a stored waveform. The trigger point may be set from 0.00cm up to 10.00cm.

'Roll mode' provides continuous observation of slow waveforms, whilst linear and sine interpolation functions allow for accurate representation of sampled waveforms (e.g. high speed waveforms) with as little as 2.5 data points per cycle. A RS232 interface is also provided so that stored waveforms can be printed out on paper with a suitable X-Y plotter.

In addition there is an on-screen generated, character read-out capability showing voltage and timing information about the trace if required. The on-waveform potential difference measurement displays the potential difference between two points of the waveform where the moveable cursors intersect. This is helpful for measuring peak to peak voltages of a signal, for example. The measured value is displayed in the top left corner of the screen while the time difference, as measured between the two cursors, is shown at top right. The two cursors are shown as 'X' and '+' symbols, and can be positioned horizontally anywhere on the trace. The input channel number, attenuation level (vertical sensitivity per cm) and horizontal timebase sweep per cm are shown at the bottom of the screen.

Finally, the read-out can also show the frequency of the waveform, or that part of it that lies between the two cursors. This is most useful for finding the frequency of a harmonic or some other superimposed signal over the fundamental waveform. This display appears at top right in place of the time difference reading in this mode; all other parts of the read-out are as before. The read-out also shows the general operating mode of the oscilloscope including active sampling functions. The CRT includes automatic focusing responding to screen intensity changes, variable graticule illumination and a rotatable trace. At the rear of the unit is 'Ch1 Out Connector' which provides an amplified part of the input signal on CH1 for a frequency counter or any other monitoring/measuring device.

Full scale delayed sweep, trace magnification and comprehensive triggering modes are also provided.

Features

- Maximum 2-channel simultaneous sampling rates of 20MS/s.
- Digitised repetitive signal in equivalent mode 60 MHz (OS-3060), 40 MHz (OS-3040), 20 MHz (OS-3020).
- 2-kilowords memory capacity per channel.
- One-touch switching between real and storage modes.
- Two save memories.
- Pre-triggering enables observation of waveform portions before the trigger point.
- Direct copy of screen display using HP-GL commands with RS232C interface.
- Roll mode provides continuous observation of slow waveforms.
- Averaging functions provides summation averaging of up to 256 times.
- Linear and sine interpolation function for optimum pulse or sinusoidal signals.
- Magnification function simplifies detailed waveform observation.
- CRT read-out for displaying set values along with measured values of voltage, time and frequency using the cursor function.

Specifications for models OS-3020;3040;3060.

CRT:

Configuration: 6-inch with internal 8 x 10cm graticule also marked for rise time with 2mm divisions along central axes

Accelerating potential:

OS-3020: 1.9kV
OS-3040: 11.5kV
OS-3060: 10.0kV

Phosphor: P31 (standard)

Z-axis (intensity modulation):

Input signal: Negative going for increase in intensity, 5V pk-pk for discernable change in brightness at normal settings

Bandwidth:

OS-3020; OS-3040 DC to 2MHz (-3dB).
OS-3060 DC to 3.5MHz (-3dB).

Coupling:

DC

Input impedance:

20kΩ to 30kΩ typical

Maximum input voltage:

30V DC + peak AC

Vertical deflection:

Bandwidth:
OS-3020 DC (-3dB @ 10Hz AC) to 20MHz (7MHz if magnified)
OS-3040 DC (-3dB @ 10Hz AC) to 40MHz (7MHz if magnified)
OS-3060 DC (-3dB @ 10Hz AC) to 60MHz (10MHz if magnified)

Modes:

Ch1, Ch2, Add, Dual, Chop (0.2s - 5ms/cm), Alt (2ms - 0.2μs/cm); (2ms - 0.1μs for OS-3060 only)

Sensitivity:

5mV/cm to 5V/cm in 10 calibrated steps in 1-2-5 sequence (1mV/cm to 1V/cm if x5 magnification on)

Accuracy:

±3% (±5% if x5 magnification)

Input impedance:

1MΩ/25pF ±3pF

Maximum input voltage:

250V DC + peak AC

Input coupling:

DC-Gnd-AC.

Rise time:

OS-3020 <17.5ns (<50ns if x5 magnification on)
OS-3040 <8.8ns (50ns if x5 magnification on)
OS-3060 <5.8ns (35ns if x5 magnification on)

Ch1 out: 20mV/cm into 50Ω, DC to 10MHz (-3dB)

Polarity inversion:

Ch2 only

Signal Delay:

OS-3040, OS-3060 only. Delay Cable supplied

Horizontal deflection:

Display modes: A, A int B, B, B triggered, X-Y (OS-3060 push button operation only)

Timebase A:

OS-3020, OS-3040 0.2μs/cm to 0.2s/cm in 19 calibrated steps in 1-2-5 sequence

OS-3060

0.1μs/cm to 0.2s/cm in 20 calibrated steps in 1-2-5 sequence

Hold-off:

Variable
OS-3020, OS-3040 0.2μs/cm to 20μs/cm in 7 calibrated steps in 1-2-5 sequence

OS-3060

0.1μs/cm to 10μs/cm in 7 calibrated steps in 1-2-5 sequence.

Delayed sweep start: <1cm to >10cm

Delayed sweep jitter: >1/20,000

Sweep magnification:

OS-3020, OS-3040: 10 times (sweep rate 20ns max.)

OS-3060:

10 times (sweep rate 10ns max.)

Accuracy:

±3% (±2% additional error for magnifier)

Trigger system:

Modes: Auto, Norm, TV vertical, TV horizontal
Source: Ch1, Ch2, Line, External
Coupling: AC
Slope: + or -

Sensitivity, Auto, Normal:

OS-3020: Internal = 0.5V/cm @ 20Hz to 2MHz (1.5V/cm @ 2MHz to 20MHz)

External = 0.2V pk-pk @ 20Hz to 2MHz (0.8V pk-pk @ 2MHz to 20MHz)

OS-3040: Internal = 0.5V/cm @ 20Hz to 2MHz (1.5V/cm @ 2MHz to 40MHz)

External = 0.2V pk-pk @ 20Hz to 2MHz (0.8V

pk-pk @ 2MHz to 40MHz)

OS-3060: Internal = 0.5V/cm @ 20Hz to 2MHz (1.5V/cm @ 2MHz to 60MHz)

External = 0.15V pk-pk @ 20Hz to 2MHz (0.3V pk-pk @ 2MHz to 60MHz)

TV field and line:

At least 1cm or 1V pk-pk external, composite sync

External trigger input impedance:

1MΩ/30pF

Maximum input voltage:

250V (DC + peak AC)

X-Y operation:

X-axis: As Ch1 except accuracy, ±5%; frequency response, DC to 500kHz (-3dB)

Y-axis:

Same as Ch2

X-Y phase error:

<3° @ DC to 50kHz

Read-out function:

Cursor read-out: Voltage reference ΔV: Δ-REF/time reference; ΔT: Δ-REF/frequency reference; 1/ΔT: Δ-REF

Panel setting displays:

Vertical axis (Ch1, Ch2): V/DIV, UNCAL, MAG (converted value). Note displayed when vertical mode is Ch1, Ch2 or Dual, not displayed in B mode.

Horizontal axis:

S/DIV, UNCAL, MAG (converted value).

Effective cursor range from centre of graticule:

Vertical: within ±3cm;
Horizontal: within ±4cm
1/25cm

Resolution:

Digital storage function:

Display memory: 1000 words per channel

Save memory: 1000 words per channel x 2

Continued on next page.

Continued from previous page.

Acquisition memory:
 OS-3020, OS-3040: 5µs/cm ~ 20s/cm: 2000 words per channel
 0.2µs/cm ~ 2µs/cm: 1000 words per channel
 OS-3060 0-5µs/cm ~ 20s/cm: 2000 words per channel
 0-1µs/cm ~ 2µs/cm: 1000 words per channel

Vertical resolution: 25 points/cm
 Horizontal resolution: 100 points/cm
 Maximum sampling rate: 20Ms/s
 Single-shot event bandwidth: 5MHz
 Repetitive event bandwidth:
 OS-3020: 20MHz
 OS-3040: 40MHz
 OS-3060: 60MHz

Data acquisition method:
 NORM mode: store whole screen each sweep
 Averaging mode: store the average from 4 to 25 times
 Roll mode: continuously read and store and re-display on screen at higher rate
 Hold mode: data is held for NORM, AVG and ROLL
 Single shot: waveform is held after one sweep is stored

Data saving: Up to two screens can be saved and recalled on screen at any time

Pre-trigger: Variable by 0.4cm per step
 Paper plotting: Via RS232 interface
 Magnifier: 10 times by time/cm switch or MAG switch

X-Y operation: Single trace X-Y mode, X-axis = Ch1, Y-axis = Ch2 or X-axis = storage A, Y-axis = storage B; Dual trace mode, X-axis = Ch1, Y-axis = Ch2. Sensitivity, both: 1mV to 5V/cm ±5%. Phase error = <math><3^\circ</math> from DC to 50kHz

Sweep time:
 OS-3020, OS-3040 0.2µs/cm to 20s/cm.
 Repetitive mode: 0.2µs/cm to 2µs/cm.
 Roll mode: 0.5µs/cm to 20s/cm.
 Alternate: 0-2µs/cm to 0-5ms/cm
 Chop: 1ms/cm to 20s/cm .
 OS-3060 0-1µs/cm to 20s/cm.
 Repetitive mode: 0-1µs/cm to 2µs/cm
 Roll mode: 0-5s/cm to 20s/cm
 Alternate: 0-1µs/cm to 0-5ms/cm
 Chop: 1ms/cm to 20s/cm

Read-out function:
 Cursor read-out: Voltage reference ΔV:
 Δ-REF/time reference; ΔT:
 Δ-REF/frequency reference;
 1/ΔT: Δ-REF

Panel setting displays
 V/DIV, UNCAL, MAG. S/DIV, UNCAL, MAG. X-Y, trigger point, number of averaging, roll mode, smoothing, interpolation method, save memory information, probe setting

Calibrator: 1kHz approx., 0.5V (±3%) square wave, 50% duty cycle

Power supply:
 Line voltage: 240V AC ±10%
 Line frequency: 50/60Hz
 Power consumption: 65W

Dimensions: 320(W) x 140(H) x 430(L)mm
 Weight: 8.5kg

Supplied with operating manual, mains lead and two spare fuses. Case is fitted with multi-position stand/carrying handle. Probes, not included, see below. Calibration service available please contact the sales line for details.

OSCILLOSCOPE ACCESSORIES

Oscilloscope Probe

A very high quality probe suitable for use with almost any oscilloscope. Probe has a slide switch on body for immediate selection of either times 10 or times 1.

Specification

Position x1

Attenuation: 1:1
 Bandwidth: DC to 25MHz
 Rise time: 14ns
 Input resistance: 1MΩ (oscilloscope input)
 Input capacitance: 90pF (+ oscilloscope input)
 Working voltage: 200V DC including peak AC derating with frequency

Position Ref

Probe tip grounded via 9MΩ resistor

Position x10

Attenuation: 10:1
 Bandwidth: DC to >250MHz
 Rise time: <math><1.4\text{ns}</math>
 Compensation range: 10 to 50pF
 Input resistance: 9MΩ ±1% (10MΩ when connected to oscilloscopes with 1MΩ input)
 Input capacitance: 16pF
 Working voltage: 500V DC including peak AC derating with frequency
 Cable length: 1.2m terminated in BNC plug
 Working temperature: -25°C to +70°C

The probe is supplied with a 1.2m flexible screened lead and 20cm earth lead with crocodile clip. Supplied in a plastic storage wallet with the following accessories: spring loaded test hook, IC test tip, probe tip, BNC adaptor, insulating tip and compensating tool.

Order Code	Type	Price each
BW05F	Scope Probe BNC	£16.99

Oscilloscope Probe Accessories

A pack of three spring-loaded test hooks and a pack of five probe tips for use with the oscilloscope probe (BW05F).

Order Code	Type	Price each
KR21X	3 Pk Test Hooks	£5.99
KR22Y	5 Pk Probe Tips	£3.75

Low-Cost Scope Probe

A 50Ω co-axial lead connected to a 50Ω BNC plug at one end and a red probe clip with spring loaded hook and a black crocodile clip at the other end. Length 900mm.

Order Code	Type	Price each

DOUBLE POLE CIRCUIT BREAKER

Safeguard yourself with this double pole residual current circuit breaker. Simply plug the circuit breaker into your existing 13A mains socket outlet and then plug the lawn mower, hedge trimmer or any two or three wire domestic appliance into the 13A socket outlet on the unit. The circuit breaker has a rated trip current of 30mA and will trip within 40ms, with a maximum operating current of 13A. A test button and an indicator flag is incorporated in the unit and allows you to visually check its operation. This facility must be used every time the circuit breaker is used to ensure that the unit is functioning correctly. Please note, a circuit breaker is not a substitute for good electrical safety practices, and normal precautions should be observed when in use.

GREAT VALUE!

HOBBYISTS BENCH POWER SUPPLIES

Triple Power Supply

A cost-effective quality power supply, in a strong galvanized steel case, with two fixed outputs and a 0 to 30V DC variable output up to 2.5A max. The two fixed outputs are rated at 5V and 12V DC, each with a 500mA rating (1A surge). Overload and short circuit protection is provided. The PSU has separate analogue voltmeter and ammeter displays, with the output voltage continuously variable over the range, whilst the current can be limited from 0 to 2.5A. The two fixed outputs are fed via 'snap-on' terminals and the variable supply is available at a pair of terminal posts.

Specification

Power requirements: 220V AC 50Hz
Variable output: 0 to 30V DC
Maximum current: 2.5A
Fixed output 1: 5V DC/500mA, 1A surge
Fixed output 2: 12V DC/500mA, 1A surge
Ripple & Noise: 5mV
Line Regulation: 0.05% + 10mV
Load regulation: 0.05% + 10mV
Dimensions: 200 x 150 x 145mm
Weight: 2.8kg

Order

Code	Type	Price each
GW02C F10	Bench PSU 30V/12V/5V	£89.99

30V 2A

A good quality, regulated, variable 30V 2A power supply ideal for the hobbyist's work bench. Featuring a separate voltmeter and ammeter, variable output voltage, and a current limit that can be set to between approximately 300mA and 2.2A. Output is via two terminal posts, and a third post for ground connections that is connected to the chassis and mains earth.

Specification

Input: 210V to 250V AC
Output: 0 to 30V DC in two ranges
Current: 0 to 2A
Voltage regulation
load: <0.1% (30mV) for a no load to full load change
line: <0.15% (45mV) for a 10% line voltage change
Current regulation
load: 0.2% max for a 30V DC load voltage change

Continued on next page.

Continued from previous page.

line: 0.2% max +3mA for a 10% line voltage change
 Ripple and noise: <250µV rms
 Output mode: Automatic crossover between constant voltage and constant current operation
 Overload protection: by an adjustable electronic current limiting circuit and fuse in AC input
 Current limiting: Adjustable from 1% to 110% of rated load current
 Dimensions: 205 x 100 x 195mm deep

Order Code	Type	Price each
XG89V	D8 Bench PSU 2A30V	£99.99

PROFESSIONAL BENCH POWER SUPPLIES

by Instek

All the PSUs in the 'Professional' range feature overload and reverse polarity protection and current limiting which is set by a rotary control. The supply can be forced to leave 'constant voltage' mode and enter 'constant current' mode. Here the output current is maintained for a given setting of the current control by the output voltage being varied to keep the current constant. As an aid red and green front panel LEDs for each channel signal either 'CV' (constant voltage) or 'CC' (constant current) mode as active. Power consumption and dissipation is conserved by a dual level power saving device which selects lower ratios of the main supply transformers' secondaries automatically if the outputs fall below the relevant thresholds.

Single 60V 1A DC Power Supply

A high quality DC power supply with an output of 0 to 60V DC at up to 1A maximum. A separate voltmeter and ammeter are provided for monitoring the output. Voltage output is continuously variable over the range with one 'coarse' rotary control, and is accompanied by an additional 'fine' control which can vary output over 10% of the set value. In addition the voltage level can be remote controlled from an external source and the output can be switched to handle continuous or dynamic loads. Current limiting is provided by further 'coarse' and 'fine' rotary controls.

Specification

	CV Mode	CC Mode
Input:	240V AC ±10% 50/60Hz	
Output:	0 to 60V DC	0 to 1A DC
Load regulation:	0.01% +3-5mV	0.02% +3mA
Line regulation:	0.01% +3mV	0.02% +3mA
Ripple & noise:	0.5mV rms	3mA rms
Dimensions:	128 x 145 x 285mm	
Weight:	5kg	

Order Code	Type	Price each
GW08J	H PSU 60V 1A	£139.99

Single 30V 3A DC Power Supply

A high quality DC power supply providing 0 to 30V DC at up to 3A maximum. A separate voltmeter and ammeter are provided for monitoring the output. Voltage output is continuously variable over the range with one 'coarse' rotary control, and is accompanied by an additional 'fine' control which can vary output over 10% of the set value. In addition the voltage level can be remote controlled from an external source and the output can be switched to handle continuous or dynamic loads. Current limiting is provided by further 'coarse' and 'fine' rotary controls.

Specification

	CV Mode	CC Mode
Input:	240V AC ±10% 50/60Hz	
Output:	0 to 30V DC	0 to 3A DC
Load regulation:	0.01% +5mV	0.02% +3mA
Line regulation:	0.01% +3mV	0.02% +3mA
Ripple & noise:	0.5mV rms	3mA rms
Dimensions:	128 x 145 x 285mm	
Weight:	5kg	

Order Code	Type	Price each
GW09K	H PSU 30V 3A	£149.99

Digital Single 30V 3A DC Power Supply

A high quality DC power supply providing 0 to 30V DC at up to 3A maximum. The instrument includes an auto-ranging digital voltmeter (DVM) with front panel LCD display, and which can also function as a digital ammeter, for monitoring voltage or current output as required according to the setting of the front panel VOLTS/AMPS selector switch. Voltage output is continuously variable over the whole range with one 'coarse' rotary control, accompanied by an additional 'fine' control which can vary output over >5% of the set value. In addition the voltage level can be remote controlled from an external source and current limiting is provided by further 'coarse' and 'fine' rotary controls. The output is provided via three '+', '-' and chassis ground front panel screw terminal posts which accept 4mm wander plugs, spade terminals or stripped wires.

Specification

	CV Mode	CC Mode
Input:	240V AC ±10% 50/60Hz	
Output:	0 to 30V DC	0 to 3A DC
Load regulation:	0.01% +3mV	0.02% +3mA

Order Code	Type	Price each
GW10L	H PSU 30V 3A Digital	£199.99

Dual Tracking 30V 3A DC Power Supply

A high quality DC power supply featuring two 0 to 30V DC outputs, which can operate either as two entirely independent single ended supplies, or be combined in tracking mode to produce equal dual (+) and (-) supply rails, both continuously variable from one single control, with a central common rail. Each supply can deliver up to 3A maximum in either mode.

Separate voltmeters and ammeters are provided for monitoring each output. Voltage output for each independent supply is continuously variable over the range with one rotary control. Outputs are presented via two pairs of front panel screw terminal posts which accept 4mm wander plugs, spade terminals or stripped wires and include two chassis earth terminal posts.

Also provided is one fixed, 5V DC 3A output max., regulated supply to TTL logic circuit standard, the output is available on a pair of 4mm terminal posts on the front panel.

Specification

	CV Mode	CC Mode
Input:	240V AC ±10% 50/60Hz	
Outputs, each:	0 to 30V DC	0 to 3A DC
Load regulation:	0.01% +3-5mV	0.02% +3mA
Line regulation:	0.01% +3mV	0.02% +3mA
Ripple & noise:	<1mV rms	<3mA rms
5V DC supply:		
Deviation limits:	5V ±250mV	
Load regulation:	<10mV	
Line regulation:	<5mV	
Output current:	3A DC ±10% max.	
Dimensions:	255 x 145 x 335mm	
Weight:	11.5kg

Digital Dual Tracking 32V 2.5A DC Power Supply

A high quality DC power supply featuring two 0 to 30V DC outputs, which can operate either as two entirely independent single ended supplies, or be combined in tracking mode to produce equal dual (+) and (-) supply rails, both continuously variable from one single control, and with a central common rail. Each supply can deliver up to 3A maximum in either mode. The instrument includes auto-ranging digital voltmeters (DVM) with front panel LED displays, which can also function as a digital ammeter, for monitoring the voltage or current output, as required according to the position of the front panel VOLTS/AMPS selector switches of either supply. Voltage output for each independent supply is continuously variable over the range with one rotary control. Outputs are presented via two pairs of front panel screw terminal posts which accept 4mm wander plugs, spade terminals or stripped wires, in addition to two chassis earth terminal posts. Also included is one fixed, 5V DC 3A output maximum, regulated supply to TTL logic circuit standard, the output is available on a pair of 4mm terminal posts on the front panel.

Specification

	CV Mode	CC Mode
Input:	240V AC $\pm 10\%$ 50/60Hz	240V AC $\pm 10\%$ 50/60Hz
Outputs, each:	0 to 32V DC	0 to 2.5A DC
Load regulation:	0.01% +3mV	0.02% +3mA
Line regulation:	0.01% +3mV	0.02% +3mA
Ripple & noise:	<1mV rms	<3mA rms

5V DC supply:	
Deviation:	5V ± 250 mV

RAACO STORAGE PRODUCTS

Raaco manufacture a wide range of quality storage products. Each item in the range shows the design, attention to detail and quality of manufacture that have made Raaco world leaders in their field.

Assorted Hobby Boxes

A range of six quality storage boxes and one storage case, made from high grade polypropylene, with a hinged translucent plastic lid and slide locks. Boxes are available in three sizes; A6, A5 and A4. Each type has 2 differently constructed compartment sizes; assorted (red only) or criss-cross (green only) and are fitted with three unbreakable hinges. A groove on the inside of the lid overlocks the base of the box when closed ensuring the the contents of the compartments are held in place, and not mixed when the box is carried.

Hobby Box 15 (Colour Red)	
No. of Compartments:	15
Size:	340 x 260 x 57mm
Stock Code:	KR50E

Storage Tray

A strong cardboard tray in which self-seal bags or components can be stacked. A large self-seal bag fits snugly across the width. The tray is supplied flat and is simply folded into shape. Various different sizes are available to suit every need.

Hobby Box 7 (Colour Red)

Transbox

Raaco

A good quality plastic box with two layers of storage and a clear plastic lid with carrying handle and slide-lock. The box contains several dividers which fit into the base to make between 2 and 15 separate compartments. A clear plastic tray with three large compartments fits tightly on top of the base and with the lid closed contents cannot spill from one compartment to another when the box is carried. Overall size of box 275 x 215 x 80mm high.

Order Code	Type	Price each
XJ03D A1	Transbox	£9.99

Bins on Rails

Raaco

Ideally suited for the garage and the workshop. Four grey handwidth boxes (112 x 110mm internal dimensions) with sloping fronts attached to a 500mm long wall mounting rail which has 4mm fixing holes. The boxes are stackable.

Order Code	Type	Price each
GX27E	Bins on Rails	£3.49

Toolmate

Raaco

A new generation of Toolboxes. Light in weight, their design offers stability in use and a large capacity in relation to their overall size.

Features:

- ★ Do not rust
- ★ Remain stable
- ★ Weatherproof
- ★ Resistant to chemical attack
- ★ Made from durable Polypropylene

Toolmate 1 is supplied with a removable tote tray and two drawers which can be kitted out with compartment inserts.

Toolmate 2 features the removable tote tray, which like Toolmate 1, can be kitted out with compartment inserts.

Toolmate 3 features a removable tote tray but does not use the compartment inserts. Inserts are available as an assorted set of 16, ordered separately (Order Code KU86T), for use only in Toolmates 1 and 2.

Toolmate 1

Compartment Inserts

Raaco

The compartmental inserts provide an organised, movable and flexible storage for small parts in the tote tray and drawer of Toolmate 1 and the tote tray of Toolmate 2. Available in sets of 16 only.

Order Code	Type	Price each
KU86T	Toolmate Inserts	£8.99

Multibox

Raaco

A robust plastic box with separate internal compartmentised tray, carrying handle and revolving clasp. The box has a large open well and the tray fits into this to about half-way down so that the top of the box is level with the top of the tray. With the handle pulled up, the lid when opened out will sit horizontal supported by the handle, with the opened box and the tray can be lifted out of the box and placed in the lid. Overall size 335 x 205 x 162mm high.

Order Code	Type	Price each
XJ05F	A1 Multibox	£10.99

Storage Cabinets

A range of three storage cabinets made from Superlene™, a strong plastic that will not rust, dent, chip or peel, suitable for home, workshop or office. The drawers are made from translucent polypropylene and are divided into compartments, and with the dividers provided, the compartments may be divided in to sections. The cabinets are of one piece construction, and can be stacked to provide additional storage, and can be wall mounted or free-standing.

Type 15 has five drawers (15 compartments), Type 30 has six drawers (30 compartments) and Type 50 has ten drawers (50 compartments).

Dimensions (mm):

	H	W	D
Type 15	183	223	160
Type 30	217	268	132
Type 50	357	268	132

BU93B	G8 Storage Cabinet 50	£16.99

Large Storage Cabinet

A dark grey enamelled steel cabinet with transparent plastic drawers with guides and end-stops. May be screwed to a wall or frame or free-standing. The cabinet contains 60 drawers each 35 x 52 x 135mm

front to back. Each drawer can be subdivided into two or three using optional extra dividers. The drawer front has a label holder; labels can be made out of stiff white card cut to size if required. Overall size 555mm high, 307mm wide, 154mm deep. Dividers are available in packs of 10.

Order Code	Type	Price each
XG98G	F10 60 Drawer Cabinet	£39.99
FP55K	Dividers W Pk of 10	89p

Compact Tool Boxes

A choice of two black tool boxes that are ideal for electronic engineers, service technicians and hobbyists. The tool boxes are molded in Superlene™, a very tough plastic that will not dent, peel, chip or crack. Inside, there is a removable tool/compartment tray that sits securely in the box. A heavy duty rust resistant plated latch (two on the larger box) secures the box for transit, and provision for a padlock is also provided. The smaller box measures 405 x 194 x 220mm, and the larger box measures 480 x 230 x 260mm.

Order Code	Type	Price each
BU90X	F6 Compact Toolbox Sml	£14.99
BU91Y	H9 Compact Toolbox Lrg	£19.99

Open Toolbox

An ingenious open tool box moulded in tough grey plastic with a large red drawer that has compartments for holding smaller items. Ideal for the storage of tools. Dimensions: 481 x 260 x 295mm.

Order Code	Type	Price each
BU92A	E5 Open Toolbox	£16.99

Drawer Organiser

A tough, durable, black plastic cabinet made from Superfene™, has 5 large drawers (139 x 143 x 60 mm), two of which are divided into two compartments, and 8 small drawers (139 x 143 x 28mm) each of which are supplied with dividers. If more storage space is required then the cabinets can be stacked. Slots are provided on the back of the cabinet for wall mounting. Overall dimensions: 448 x 205 x 160mm.

Order Code	Type	Price each
BU96E	G8 Organiser	£19.99

Drawer Organiser with Lids

A high impact polypropylene black case containing five drawers with hinged lids. The drawers can be removed and carried separately, and have varied numbers of compartments. The organiser can be stacked or wall mounted. Size: 313 x 305 x 202mm.

Order Code	Type	Price each
BU97F	H11 Organiser with Lids	£21.99

CARRYING CASES

Light Weight

A range of 4 elegant, black plastic, splashproof, injection-moulded carrying cases which represent superb value for money. When closed, the edge of the top half of the case overlaps the bottom half. Not only does this provide waterproofing, but also increases rigidity for transport. The two halves of the case are locked together by a 'snap' fit fastener, and it features rigid, moulded handles. The dimensions of the four are:

Type	Length (including handle and feet)	Width mm	Depth mm
A	209	247	49
B	265	335	79
C	335	400	96
D	410	440	110

Primarily for use as tool carrying cases, they can find many other applications, which can include transporting documents. In particular, size A can be used as a handy storage case for vehicle documents as it will fit into most glove compartments.

Order Code	Type	Price each
ZF03D	Carrying Case A	£3.99
ZF04E	A1 Carrying Case B	£5.99
ZF05F	B1 Carrying Case C	£7.99
ZF06G	C4 Carrying Case D	£9.99

Aluminium Type

A quality aluminium type flight case in which items to be carried are packed in foam. The case is silver in colour except for the black rounded corners and the two chrome-plated locks. Two keys are supplied for the locks, which are of the clasp action catch variety. The handle is made from tough black plastic and has attractive chrome trimmings. A shoulder carrying strap is provided which hooks onto buckles mounted on either side of the case. The bottom and the back of the case have four feet fitted, which not only reduce shock being transmitted to the contents of the case when it is placed down on a hard surface, but also help to prevent the underside of the case from getting scratched. Weight: 2.6kg; overall dimensions (including

handle and feet): 350mm long x 470mm wide x 165mm deep; overall depth of foam (compressible): 55mm (lid); 80mm (lower body).

Order Code	Type	Price each
GL34M	F6 Metal Flight Case	£39.99

Tools Harness

A rugged tools harness with a 48mm wide waist strap with adjustable buckle and quick-release plastic buckle clip. The waist strap has a metal bar 85mm long to allow a tape measure to be firmly attached. The strap itself is riveted to the main part of the harness for durability. There are five main compartments built into the padded synthetic harness. Compartment sizes:

- 1 Large (210 x 195 x 30mm)
- 1 Medium (160 x 110 x 15mm)
- 1 Small (110 x 125 x 25mm)
- 2 Small (50 x 120 x 20mm)

There are two heavy duty holsters suitable for holding a hammer and similar large tools such as screwdrivers etc.

Order Code	Type	Price each
RJ73Q	Tools Harness	£14.99

TRIMMING TOOLS

Hexagon Type

Tool moulded in blue acetal for adjusting 6mm cores with 0.1in. a/f hexagon centre hole. Hexagon at each end with screwdriver extension at one end only. Length: 127mm.

Order Code	Type	Price each
BR48C	Hex Trimmer	37p

Pot Core Type

Deltron

Moulded tool, with a phosphor bronze blade at each end. Designed to fit 4mm and 6mm cores. Suitable for use with our pot cores. Length: 46mm.

Order Code	Type	Price each
BR51F	Trim Tool	89p

Preset Type

A trim tool for preset potentiometers. Double-ended with protruding blade for single turn presets etc., and recessed blade for our 15-turn cernets etc. Recess prevents blade slipping out during adjustment. Length: 130mm.

Order Code	Type	Price each
BR49D	Preset Trimmer	99p

Alignment Tool Set

A set of moulded plastic tools for alignment of colour TV, Hi-Fi, Radio Amateur, CB and AM and FM radio. This set should enable you to align any combination of cores that require flat-bladed, hex, or square trimming tools.

Order Code	Type	Price each
BK34M	Trim Tool Set	£3.49

TOOL SETS

Miniature Screwdriver Set

Five precision miniature screwdrivers in a plastic wallet. Screwdrivers are chromed and have a swivel cap. Blade widths (overall length of screwdriver in brackets): 1.2mm (85mm); 1.4mm (85mm); 1.6mm (85mm); 1.8mm (92mm); 2.0mm (92mm).

Order Code	Type	Price each
FY07H	Min Screwdriver Set	99p

Precision Screwdriver Set

Six precision instrument screwdrivers in a hinged plastic box with transparent cover. Each consists of a specially hardened, nickel chrome molybdenum steel blade set into a heavily chromed, knurled brass holder with swivel cap. Blade widths (overall length of screwdriver in brackets): 1.0mm (74mm); 1.4mm (85mm); 2mm (92mm); 2.4mm (103mm); 3mm (114mm); 3.8mm (126mm).

Order Code	Type	Price each
BR58N	Jewellers Screwdr Set	£1.99

11-Piece Precision Screwdriver Set

Eleven high quality precision screwdrivers with fully hardened tool steel blades, plated brass bodies and freely revolving heads. Set comes in a hinged plastic box, and consists of six plain slot screwdrivers 1.0, 1.2, 1.4, 1.8, 2.4, and 3mm, three crosspoint screwdrivers blade sizes 00, 0, and 1, an awl and a pair of tweezers.

Order Code	Type	Price each
BK44X	11 Pce S/Driver Set	£2.99

3 Piece Screwdriver Set

A three piece screwdriver set with 2 flat blade and 1 crosspoint screwdriver. The screwdrivers have long shafts and are ideal for reaching recessed screws in electronic equipment. Handles are made from moulded plastic, and incorporate finger grips. Shafts are made from nickel chrome molybdenum steel. Flat blade screwdriver sizes: 2.4 x 75mm, 3.0 x 100mm. Crosspoint screwdriver sizes: (No.0) 2.4 x 75mm.

Order Code	Type	Price each
JM31J	3pc Screwdriver Set	£3.49

6 Piece Screwdriver Set

A six piece screwdriver set with 3 flat blade and 3 crosspoint screwdrivers. The screwdrivers have long shafts and are ideal for reaching recessed screws in electronic equipment. Handles are made from moulded plastic, and incorporate finger grips. Shafts are made from nickel chrome molybdenum steel. Flat blade screwdriver sizes: 2.4 x 75mm, 3.0 x 100mm, 3.8 x 150mm. Crosspoint screwdriver sizes: (No.0) 2.4 x 75mm, (No.1) 3.0 x 100mm, (No.1) 3.8 x 150mm.

GW44X 2	24-Piece Ratchet Set	£9.99

30 Piece Screwdriver Set

A 30-piece screwdriver set, housed in a well designed case, which can be suspended from a wall hook or similar. The case is in two sections which comprise a transparent plastic lid and a grey base. The overall length of the closed box is 237mm. The base is moulded to hold the contents securely.

A magnetic screwdriver with a 1/4in hex socket attachment is included which has a hollow handle to store several of the blades. Overall length of the screwdriver is 185mm (excluding any driver blades). The kit includes; one 1/4" square drive to 1/4" hex drive adaptor; one 1/4" square drive socket to 1/4" hex drive socket, and an assortment of 26 screwdriver bits:-

- 6 Torx blades, T-10, T-15, T-20, T-25, T-30, T-40.
- 5 Flat ended blades, 9/32", 1/4", 3/16", 5/32", 1/8".
- 5 Allen Key heads, 5/64", 3/32", 7/64", 1/8", 9/64".
- 4 Square headed blades, S0, S1, S2, S3.
- 4 Phillips blades, No.0, No.1, No.2, No.3
- 2 Posidriv/Superdriv blades, PZ1, PZ2.

Each blade is identifiable by the type and size which is printed on one edge.

MINI FLOODLIGHT WITH PIR

A compact high-powered floodlight, controlled by a built-in passive infra-red intruder sensor, similar to our popular standard security floodlighting system (GK05F). Like its bigger brother, this outdoor security system offers outstanding value for money, and at the flick of a switch can also double as a source of general illumination for outdoor events. When the floodlight is installed, the infra-red sensor provides detection over 110° of arc up a distance of 12m. This detection range means the unit is sensitive enough for use in commercial as well as domestic applications; the level of sensitivity being adjustable. In use, when any form of infra-red radiation (e.g. body heat) passes through this detection region, the 150W halogen tube (supplied separately) is switched on, for up to 12 minutes, catching any intruders unexpectedly in a brilliant flood of light. The 'on' time is adjustable from 3 seconds to 12 minutes. The lamp is not only a useful deterrent against intruders at night, it is also a handy automatic welcoming light for you, your family and friends. The lamp is prevented from operating wastefully during daylight hours.

GREAT VALUE!
£19.99
DM50E
[F2]

- Operating voltage:** 240V AC 50Hz
Maximum lamp rating: 150W
Detection range: 12m (39ft) at 20°C
Horizontal detection angle: 110°

Students Tool Kit

Ewan James

A 15-piece tool kit ideal for electronics courses at schools and colleges, and for electronics hobbyists. The kit includes a 25W soldering iron with two interchangeable bits (flat and pointed), a detachable hook and small fold-up stand, desoldering tool, a supply of solder and a pot of flux. For working on PCBs and delicate equipment, a 'helping hands', a 'scraper' and a wire wrap tool are included. To help in assembly and repair of most work and projects, two crosspoint and two standard screwdrivers are included, a pair of pliers and wire cutters, and for delicate work, a pair of tweezers. Housed in a grey plastic box with handles and two catches, the tools are held in 'cut-outs' to keep them secure during transit.

A high quality 101-piece 1/4 in. and 1/2 in. square drive socket set containing an extensive range of metric sockets, hex bits and various fittings. Suitable for use in many different applications including maintenance, assembly and service, whether in the field or workshop. Manufactured from chrome vanadium steel and bright chrome-plating, the set includes eleven combination spanners, four double-socket spanners, one 1/4 in. and one 1/2 in. ratchet handle, one 1/4 in. and one 1/2 in. sliding T-bar, two 1/4 in. and two 1/2 in. extension bars, one 1/4 in. and one 1/2 in. universal joint, one spinner ratchet handle for hex driver bits, one hex extension bar, one flexible hex extension bar, a hex to 1/4 in. adaptor, and a spark plug socket. Supplied complete in a tough moulded plastic carrying case. The sockets, hex bits and keys are as follows:-

1/2 in. Square Sockets: 10, 12, 13, 14, 15, 16, 17, 18, 20, 21, 23, 24, 27, 32mm.

3/8, 7/16, 1/2, 9/16, 11/16, 3/4, 13/16, 7/8, 13/16 in. A/F.

1/4 in. Square Standard Sockets:
4, 4.5, 5, 5.5, 6, 7, 8, 9, 10, 11, 12, 13mm.

1/4 in. Square Long Sockets:
4, 5, 6, 7, 8, 9, 10, 11, 13mm.

1/4 in. Hex Bits:

Flat blade: 5, 6, 7mm.

Phillips crosspoint: No's. 1, 2, 3.

Pozidriv/Supadriv crosspoint: No's. 1, 2, 3.

Hexagonal: 1.5, 2, 2.5, 3, 4, 5, 5.5, 6mm.

Torx: T10, T15, T20, T25, T27, T30, T40.

Combination Spanners:

7, 8, 9, 10, 11, 12, 13, 14, 15, 17, 19mm.

Double-socket Spanners:

8 x 9, 10 x 11, 12 x 13, 14 x 15mm.

Allen Key Wrenches:

1.5, 2, 2.5mm.

Order Code	Type	Price each
GW36P H16	101-Piece Toolkit	£54.99

SCREWDRIVERS

Pozidrive Screwdrivers

Screwdrivers suitable for use with Pozidrive screws. Sizes are (blade length in brackets) No. 0 point (75mm), and No. 1 point (100mm).

Order Code	Type	Price each
FT54J	Size 0 Pozidriver	£1.69
FY15R	Size 1 Pozidriver	£1.69

Light Duty Screwdrivers

A range of small screwdrivers primarily intended for light duty work and small screws. Blades are made of tempered and hardened tool steel and nickel plated, in 75mm, 100mm and 150mm lengths respectively. Moulded plastic handles.

Order Code	Type	Price each
BR52G	L/Duty Driver 75mm	59p
BR53H	L/Duty Driver 100mm	69p
FV46A	L/Duty Driver 150mm	79p

Electricians Terminal Screwdriver

A high quality 150mm terminal screwdriver with handle and blade insulated with bright orange 'nylon 11' that complies to ESI Standard 26-3 issue 2, and is therefore suitable for 'live' line working. The screwdriver has a fluted handle and a parallel blade to allow the best sight line for locating recessed or countersunk screw heads.

Dimensions	
handle:	75 x 13mm
basic blade:	75 x 3mm
insulation diameter:	5mm
Weight:	19g

Order Code	Type	Price each
DH04E	Elect Term Driver	£2.39

Screw Grip Driver

A long bladed screwdriver with sprung jaws for gripping the head of the screw whilst reaching into difficult places. The clamp can be slid back up to the handle if not required. Overall length 230mm. Blade length 154mm. Width at tip 4mm.

Order Code	Type	Price each
BK35Q	Screw Grip Driver	£2.25

Standard Screwdrivers

Flat blade screwdrivers with chrome-vanadium shanks and heat-treated fully-hardened tips lightly magnetised to help prevent screws being lost during awkward tasks. On the two larger sizes, the shanks are square section for added strength. The handles are moulded shockproof transparent amber plastic with finger grips.

The following sizes are available:

Type	Blade width	Shaft length	Overall length
3.2/75	3.2mm	75mm	127mm
5/75	5mm	75mm	155mm
5/150	5mm	150mm	230mm

Order Code	Type	Price each
JG97F	CV Dvr Flat 3.2/75mm	60p
JG98G	CV Dvr Flat 5/75mm	68p
JH00A	CV Dvr Flat 5/150mm	89p

Standard Crosspoint Screwdrivers

Crosspoint screwdrivers with chrome-vanadium shanks and heat-treated fully-hardened tips lightly magnetised to help prevent screws being lost during awkward tasks. On the two larger sizes, the shanks are square section for added strength. The handles are moulded shockproof transparent amber plastic with finger grips.

The following sizes are available:

Type	Point size	Shaft length	Overall length
0/75	No. 0	75mm	127mm
1/75	No. 1	75mm	155mm
2/100	No. 2	100mm	188mm

Order Code	Type	Price each
JH03D	CV Dvr X-Point 0/75	60p
JH04E	CV Dvr X-Point 1/75	68p
JH06G	CV Dvr X-Point 2/100	99p

Angle Screwdrivers

Manufactured from chrome vanadium steel for maximum strength, and bright nickel plated for rust protection. The tips are set at 90 degrees to the shaft, which makes these screwdrivers ideal for use in confined areas. Two types are available, the first with a 5mm plain blade on one end and a no. 1 cross slot on the other, and the second with a 6mm plain blade on one end and a no. 2 cross slot on the other. Overall length of the first is 125mm, and the second is 135mm.

Order Code	Type	Price each
FG03D	5mm x no1 Angle Dvr	£1.49
FG04E	6mm x no2 Angle Dvr	£1.59

Flexible Screwdriver

A flexible shaft screwdriver for use where a direct straight approach to the screw is impossible. The flexible shaft can be bent through >90°. Overall length 230mm. Length of shaft and blade 135mm. Width of blade tip 4mm.

Order Code	Type	Price each
BK36P	Flex Driver	£4.49

Screw Grip Crosspoint Driver

Long bladed crosspoint screwdriver with sprung jaws for holding screws. All other specifications as BK35Q.

Order Code	Type	Price each
BK37S	Crosspoint Grip Dvr	£2.25

Ratchet Screwdrivers

A range of quality screwdrivers with a left, right and neutral setting ratchet in the moulded plastic handle. The blade is manufactured from a high alloy chrome vanadium steel and is supplied with either a flat tip or a pozidriv tip.

Specification	
Overall length:	225mm
Blade length:	100mm
Flared flat tip:	6mm wide
Pozidriv tip:	6mm across (No. 2 point size)

Order Code	Type	Price each
RD95D	Ratchet Flat Driver	£3.79
RD96E	Ratchet Pozi Driver	£3.79

FOR TOP QUALITY & VALUE!

Mains Tester

A mains tester screwdriver with neon in handle. Neon lights when screwdriver point is touched on voltages between 100 and 500 volts AC or DC with thumb touching metal clip to give earth reference. Has plastic pocket clip. Blade length 48mm with insulating sleeve.

Order Code	Type	Price each
BR71N	Mains Tester	99p

WIRE CUTTERS

5 Piece Plier/Cutter Set

A set of 5 useful pliers and cutters, all of which are lap-jointed and have insulated handles. The set is comprised of: a pair of long-nosed pliers with sprung handles and smooth jaws; a pair of flat-nosed pliers with serrated jaws, a pair of pliers with medium-sized smooth tapered jaws, a pair of end cutters with sprung handles and a pair of side cutters.

Order Code	Type	Price each
YZ45Y	Plier & Cutter Set	£8.49

4in. Miniature Side Cutters

Ideal for use in electronic assembly, where larger tools would be cumbersome, this miniature 4in. spring-loaded diagonal cutter is made from a special high quality steel which has been heat-treated, ground and polished, with hardened cutting edges for cropping hard and soft wire. The handles are protected with a cushion grip in smooth green PVC, for extra comfort in use. Overall length 100mm. Length of cutting edge 12mm.

Order Code	Type	Price each
GW98G	4in Mini Side	£3.99

Miniature Side Cutters

Miniature spring-loaded diagonal cutters, ideal for use in electronic assembly, made from a special high quality steel, heat-treated, ground and polished, with hardened cutting edges for hard and soft wire. The handles are protected with a cushion grip made from smooth glossy green PVC, for extra comfort in use. Overall length 125mm. Length of cutting edge 15mm.

Order Code	Type	Price each
GW96E	Mini Side	£3.99

Snip Cutter

A pair of cutters designed for cropping leads on pcb's. The head is angled at 45° for use in tight spaces. Insulated sprung handles.

Order Code	Type	Price each
JH20W	Snip Cutter	£2.99

Diagonal Side Cutters

Manufactured from special quality high grade alloy steel with a smoothly ground head and hardened cutting edge that will cut hard, medium-hard and soft wires. Cushion grip handles for extra comfort. Size 125mm.

Order Code	Type	Price each
BU74R	Diagonal Side Cutter	£15.49

Side Cutters 5in

5in. diagonal cutters made from tool steel with a smoothly finished head and hardened cutting edge that will cut hard and soft wire. The handles are protected with a cushion grip in smooth glossy yellow PVC, for extra comfort in use. Overall length 125mm. Length of cutting edge 19mm.

Order Code	Type	Price each
GX00A	5in Side Cuts	£2.99

Side Cutters 6in

A 6in. diagonal cutter made from tool steel with a smoothly finished head and hardened cutting edge that will cut hard and soft wire. The handles are in hard black plastic with a matt finish. Overall length 155mm. Length of cutting edge 24mm.

Order Code	Type	Price each
GW49D	6in Side Cuts	£2.99

Copper Sheet and Ribbon Cable Cutters

NEW!

A sturdy pair of cutters for thin copper sheet and ribbon cable, with deep scissor action jaws to allow effective and clean cutting. A lock is provided to allow the cutters to be locked for storage and for safety. The handles are covered with a PVC material to both insulate and provide cushioning when the cutters are gripped. A strong spring ensures that the jaws return to the open position after use to allow for the next cut to take place. A serrated grip at the tip of the cutters allows these cutters to be also used as a holding and bending tool. Construction is from 3mm pressed steel, and provides an overall cutter length of 30mm. Total length including handles is 155mm, width closed 50mm.

Order Code	Type	Price each
UK94C	Ribbon/Sheet Cutters	£2.99

FOR TOP QUALITY & VALUE!

Slant Edge Cutters

6in. slant-edge cutter/nippers made from a special high quality steel, heat-treated, ground and polished, with hardened cutting edges for hard and soft wire, with two nipping holes. The handles are protected with a cushion grip in smooth glossy green PVC, for extra comfort in use. Overall length 155mm. Length of cutting edge 22mm.

Order Code	Type	Price each
GW39N	Slant Cuts	£3.99

Heavy Duty Cable Croppers

A heavy duty pair of 'crab claw' cutters suitable for cutting even the most heaviest of copper power cables. Construction is from anodised 4mm pressed steel. The spring-loaded action allows these cutters to be used in one hand while the handles are covered with a PVC air-cushioned grip to provide comfort when cutting heavy cables and wires. A lock is also provided on the handle of the cutters to allow them to be locked in the closed position for storage and safety. The jaws pivot on a 12mm metric bolt which may be easily tightened. Overall length: 220mm, width closed 60mm.

Order Code	Type	Price each
UK96E	Heavy Duty Cutters	£6.99

Cable Croppers

A compact pair of light/medium gauge wire 'crab claw' cutters suitable for copper conductors up to 5mm diameter. The handles are covered with an insulating PVC material affording protection to the user and providing comfort during operation. The spring-loaded jaws simplify the use of these cutters by returning the jaws to the 'ready' position for the next cut. A locking clasp on the handle allows the cutters to be stored in the closed position for safety. Construction is from 3mm anodised pressed steel with insulating grips. Overall length: 265mm, width closed 55mm.

Order Code	Type	Price each
RJ72P	Cable Croppers	£3.49

Cutting and Bending Tool

Ewan James

A very useful tool designed for trimming wires on PCB's. After placing components on PCB, turn board over and place angled tip of tool on PCB with a component wire in the notch in the head. Now simply squeeze handles of tool. Component wire is cut with a powerful spring action and the remaining tip of wire bent over to lock the component in place. The wire is now also lying tightly on the PCB track and after soldering this will result in a better connection. Overall length 210mm

Order Code	Type	Price each
FD56L	Cut & Bend Tool	£8.99

TWEEZERS

Nylon

A pair of nylon tweezers with serrated tips. Overall length 128mm. Max jaw opening 25mm.

Order Code	Type	Price each
YW67X	Nylon Tweezers	75p

Stainless Steel

A pair of stainless steel tweezers with serrated jaws and finger grips. Overall length 127mm. Max jaw opening 16mm.

Order Code	Type	Price each
FA65V	Steel Tweezers	80p

Pearl Catcher

A spring-loaded 3-pronged tweezers for reaching into those difficult places to retrieve the smallest screw.

Order Code	Type	Price each
BK43W	Pearl Catcher	99p

Vacuum Pick-up Pencil

Antex

A clever device for picking up, holding and positioning delicate electronic components, especially surface mounted devices, on printed circuit boards. The silicon rubber cup is placed on the component and the button pressed and held, the component will now be held by vacuum against the cup. The device can now be moved, positioned, and soldered in place. The button is then released to free the device. The body is made from nickel-plated aluminium for a long trouble-free life, and the probes are made from stainless steel. Supplied with two probes, straight and angled, and three silicon cups 4mm, 6mm and 9mm. Overall length 150mm and 14mm diameter.

Order Code	Type	Price each
BA21X	Vacuum Pencil	£44.99

PLIERS

Combination Pliers

Manufactured from a special high quality tool steel, with smooth ground heads and specially hardened cutting edges, suitable for cutting hard and soft wires. Cushion grip handles for extra comfort and safety. Size 180mm

Order Code	Type	Price each
BU71N	Combination Pliers	£12.99

Miniature Long Nose Pliers

Quality miniature, spring-loaded, 4 1/2 in. long-nosed pliers, made from a special polished. Ideal for handling small components, the tapered half-round jaws have a smooth flat surface to prevent damage to delicate components. The handles are covered in a green PVC cushion grip, for extra comfort in use. Overall length 120mm. Length of jaws 25mm.

Order Code	Type	Price each
GW97F	4.5in Long Nose	£3.99

RD99H	Mini Combo Plier	£2.99

Internal Circlip Pliers

High quality, internal circlip pliers, manufactured from chrome vanadium alloy steel with 90° tips and cushion grip handles. Size 170mm.

Order Code	Type	Price each
BU70M	Circlip Pliers	£13.99

Hooked Flat-Nosed Pliers

Miniature, high quality hooked flat nosed pliers. Insulated handles with spring. Size 115mm.

Order Code	Type	Price each
BK41U	Min Hook Nose Pliers	£3.99

Miniature Long Nose Pliers

Quality miniature, spring-loaded, 4 3/4 in. long nosed pliers, made from a special polished steel. Ideal for use in electronic assembly, the long, tapered half-round jaws have a smooth flat surface to prevent damage to delicate components. The handles are covered in a green PVC cushion grip, for extra comfort in use. Overall length 120mm. Length of jaws 33mm.

Order Code	Type	Price each
GW94C	4.75in Long Nose	£3.99

Internal/External Circlip Pliers

A versatile pair of circlip pliers that can be used for both internal and external retaining rings. The special handles feature a movable pivot, allowing both types of circlip to be removed by squeezing the handles together. With the pivot point in one position the jaws will move apart, while in the other position they will be forced together. Suitable for circlips with location holes 1mm in diameter and over, and able to cope with circlips up to 6in. in diameter. The handles are covered with as tough PVC coating and fit easily into the hand. Overall length: 150mm, width closed 55mm.

Order Code	Type	Price each
RJ75S	Int/Ext Circlip Pliers	£2.99

5in. Long Nose Pliers

5in. long nosed pliers with a cutting edge for wire. The tapered half-round jaws are serrated for a firm grip of the workpiece, and the handles have a cushion grip made from blue PVC for extra comfort in use. Overall length 130mm. Length of jaws 39mm.

Order Code	Type	Price each
GW99H	5in Long Nose	£2.99

6in. Long Nose Pliers

6in. long nosed pliers that are fully polished, with a cutting edge for wire. The long, tapered half-round jaws are serrated for a firm grip of the workpiece, and the polished handles are covered in glossy PVC, colour may vary. Overall length 160mm. Length of jaws 48mm.

Order Code	Type	Price each
GW48C	6in Long Nose	£3.49

Snipe Nose Pliers

Quality 5in. spring-loaded, snipe nosed pliers, made from a special tool steel, heat-treated, polished and finished in a rounded style, with a cutting edge for wire. Ideal for small component assembly work, the long, tapered half-round jaws are serrated for a firm grip of the workpiece. The tips are less than 1.5 x 2mm, when closed. The handles are covered in a green PVC cushion grip for extra comfort in use. Overall length 130mm. Length of jaws 37mm.

Order Code	Type	Price each
GW95D	Snipe Nose	£3.99

Angled Internal/External Circlip Pliers

An angled pair of circlip pliers that can be used on both internal and external retaining rings. The 45° angled tips allows easy access to concealed or difficult to get at circlips. The special handles feature a movable pivot, allowing both types of circlip to be removed by squeezing the handles together. With the pivot point in one position the jaws will move apart, while in the other position they will be forced together. Suitable for circlips with location holes 1mm in diameter and larger, and able to cope with circlips up to 6in. in diameter. The handles are covered with as tough PVC coating and fit easily into the hand. Overall length: 150mm, width closed 55mm.

Order Code	Type	Price each
RJ76H	Angled Int/Ext Circ Pl	£2.99

Snipe Nose Pliers

Snipe nose pliers with a cutting edge suitable for hard and soft wires. The straight, long, flat-round jaws are serrated for easy grip and the handles have a cushion grip for extra comfort. Manufactured from quality vanadium steel. Size 200mm.

CRIMPING, STRIPPING AND CUTTING TOOLS

Low Cost Type

A useful low-cost combination tool with cushioned plastic handles. Tool has bolt cutters for M2.5, M3, M3.5, M4 and M5 bolts, strippers for wires of conductor area 0.75, 1.0, 1.5, 2.5, 4.0 and 6.0mm², a crimping tool for red, blue and yellow insulated crimp connectors and 1.5, 2.5 and 4.6mm² non-insulated crimp connectors, and a wire cutter. Overall length 232mm.

Order Code	Type	Price each
FY31J	Crimp Tool	£2.99

Heavy Duty Crimping Tool

A crimping tool for use with red, yellow and blue insulated crimp terminals. Simply place the connector to be crimped in the appropriate die in the jaws and squeeze the handles together, until the tool re-opens. A ratchet prevents the tool opening until the crimp is complete. A latch is provided so that the tool can be opened manually after the ratchet has engaged and before the crimp is complete if necessary. Manufactured from 3mm steel plate with plastic handles. Overall length 225mm.

Order Code	Type	Price each
JH19V	Crimp Tool Ratchet	£24.99

Crimping Tools for Modular FCC68 Connectors

Ewan James

Crimping tools for use with FCC68 modular connectors which are used on computers and American telephones. Simply place the plug with the cable in the tool and squeeze the grips together, thus causing the plug to bite into the cable. The handles are spring loaded for automatic opening. Wire can be cut with blades built into the handle. All made from toughened plastic. Overall length 190mm.

The following types are available:

Plastic Crimp 4C4P

This model is used on plugs with 4 contacts in a 4 position shell.

Plastic Crimp 4C6P

This model is used on plugs with 4 contacts in a 6 position shell.

Plastic Crimp 6C6P

This model is used on plugs with 6 contacts in 6 position shell.

Order Code	Type	Price each

Heavy Duty Crimping Tool for Modular FCC68 Connectors

A crimping tool for use with FCC68 modular connectors which are used on computers and American telephones. This model crimps 8 position modular plugs. Simply place the plug with the cable in the tool and squeeze the grips together, thus causing the plug to bite into the cable. The handles are spring loaded for automatic opening. Wire can be stripped and cut with two separate blades built into the handle. Made from 2.5mm steel with comfortable plastic grip. Overall length 200mm.

Order Code	Type	Price each
JW52G	HD FCC68 Crmp 8C8P	£16.99

Coax Connector Crimping Tool

A coax crimping tool that has five separate sections to accept 1-72, 2-5, 5-4, 6-48 and 8-2mm connectors for crimping. The pressure necessary for crimping can be adjusted for individual requirements, and is made easy with the aid of long contoured, plastic covered handles.

Order Code	Type	Price each
ZF41U	Coax Crimper	£19.99

Crimping Tool for IDC Connectors

A crimping tool designed for assembling IDC connectors onto flat cable. The crimping distance is capable of accepting connectors from 6 to 27.5mm in height, between the fixed and moving jaws. A plastic adaptor is supplied with 6mm and 10mm slots to cater for different connector types. Simply place the cable into the connector, load the connector into the tool and squeeze the grips together. The tool is 240mm long by 77mm wide and manufactured from 2mm and 3.5mm carbon steel with comfortable cushioned plastic grips. Black oxide finish.

Order Code	Type	Price each
GW34M A	Crimper IDC	£9.99

Crimping Tool for D-type Connectors

A crimping tool designed for assembling D-type IDC connectors onto flat cable. The crimping distance between the jaws is capable of accepting connectors up to 28mm in height. Easy to use, simply place the cable into the connector, the connector between the fixed and moving jaws of the tool and squeeze the handles together. The tool is 240mm long by 77mm wide and manufactured from 2mm and 3.5mm carbon steel with comfortable cushioned plastic grips. Black oxide finish.

Order Code	Type	Price each
GW35Q A	Crimper D	£12.99

D-Connector Crimp Tool

A high-quality D type connector contact crimp tool for use on 18 to 30 AWG wire/pin combinations. These crimpers incorporate a ratchet action, with adjustable crimp pressure (can be locked), and plastic handle grips. Construction is from heavy duty, high-quality steel.

Order Code	Type	Price each
AQ72P	D-Type Crimp Tool	£19.99

Tab Connector Crimp Tool

A high-quality crimp tool for cable/tab combinations. Suitable for 0.5 to 1mm² and 1.1 to 2.5mm² cable tabs. The crimp pressure is adjusted by a wheel and locking screw. Constructed from high-quality steel, with moulded plastic handle grips.

Order Code	Type	Price each
AQ73Q	Tab Crimp Tool	£19.99

WIRE AND CABLE STRIPPERS

Side-Action Wire Strippers

Ewan James

A range of wire strippers all of which strip insulation quickly and easily from flex and cable without cutting the wire and are easily adjustable to most wire sizes. They also have cutting blades for cutting wire easily and splitting plastic twin flex.

Model 8B

Model 8B: Fitted with a unique 7-gauge selector. Spring incorporated for automatic opening. Easy-grip plastic covered handles.

Model 9: Easily adjusts for most sizes of flex and cable. Fitted with extra strong spring for automatic opening after each stripping operation. Ideal for repetitive work. Easy-grip plastic handles.

Model 9

Order Code	Type	Price each
BR94C	Wire Strippers 8B	£2.99
BR95D	Wire Strippers 9	£2.99

Precision Wire Stripper

A wire stripper made from precision ground, hardened steel, that strips and cuts wire. The wire stripper has six holes that are used to cut and remove the insulation from the wire. The holes are marked in AWG (American wire gauge) sizes, but are suitable for 18 to 27 SWG sizes. At the base of the jaws is the cutting area which will cut copper or aluminium wire. A convenient flat design allows the wire stripper to be used in tight locations and to fit easily in a pocket or tool kit.

Order Code	Type	Price each
KC16S	Stripper	£10.99

Wire Cutter/Stripper Tool

Ewan James

A quick and very easy to use wire stripping tool, which has jaws to grip the wire sheath, whilst a pair of blades strip off the insulation by simply squeezing the handles. The blades do not have to be set for a specific wire thickness, but are internally sprung in order to apply just the pressure required to bite through the insulation before moving backwards taking the insulation with them. The blades can however be adjusted by a simple thumb screw so as to operate effectively for a range of different insulation plastics. It is even possible to strip two or more wires, inserted side by side, simultaneously.

Order Code	Type	Price each
FT44X	Cutter/Stripper Tool	£5.49

High Quality Wire Cutter/Stripper Tool

A quick and very easy to use high quality wire stripping tool, which has jaws to grip the wire sheath, whilst a pair of blades strip off the insulation by simply squeezing the handles. The blades do not have to be set for a specific wire thickness, but are internally sprung in order to apply the correct pressure required to bite through the insulation before moving backwards taking the insulation with them. The blades can be adjusted by a simple thumb screw so as to operate effectively for a range of different insulation plastics. It is possible to strip two or more wires, inserted side by side, simultaneously. A depth of cut adjustment allows precise lengths of insulation to be stripped accurately, and consistently.

Order Code	Type	Price each
AQ74R	Quality Cutter/Strip	£7.99

Single-Action Wire Strippers

For precise rapid wire-stripping without risk of damage to the wire or insulation. Simply place the wire to be stripped between the jaws and squeeze the handles. The tool automatically grips the wire, cuts the insulation, and strips it from the wire in one operation. The tool is manufactured in die cast aluminium and fitted with hardened steel cutting blades. The tool comes complete with blade fitted and is available with a choice of two blades to suit most common wires.

Blade A has holes to strip wires of 0.5, 1.2, 1.6 and 2.0mm diameter. Blade B has holes to strip wires of 1.0mm, 1.6mm, 2.0mm, 2.6mm and 3.2mm.

Size: 180mm (7in.).
Length of strip: 22mm max.

Order Code	Type	Price each
BR96E	Singl Action Stripp	£7.49
YT24B	Singl Action Strip B	£7.49

Low Cost Coax Cable Stripper

Ewan James

A simple, quick to use, coax cable stripper for cables from 4.8 to 7.5mm outer diameter i.e. most RF, radio and TV aerial cables. At one end, the blades are set for removing the outer sheath, and at the other end, the blades are set for removing the dielectric. The cable is inserted to the desired length, the stripper is closed, a quick twist to the left and right and the sheath/dielectric is removed. The coax cable stripper is spring-loaded for ease of use. Overall size 98 x 25mm.

Order Code	Type	Price each
BZ19V	Coax Stripper	£3.99

Co-axial Cable Stripper

Ewan James

A stripper which removes the inner and outer sheath of co-axial cables simultaneously. An allen key is provided to set the blades to suit your cable. Cables from 4mm to 7mm outside diameter can be accommodated. The tool is set at the factory to suit RG58 and RG59 cable. To change from one to the other the die is reversed in the tool. To operate, squeeze to open the jaws, then place the cable on the cable guide and close the jaws. Insert a finger in the loop on the tool and revolve the tool around the cable four to five times. Then holding the tool, pull the cable firmly out of the tool. Both the inner and outer will be neatly trimmed away leaving the cable ready for connection.

Order Code	Type	Price each
JH18U	Co-Ax Stripper	£9.99

Cable Tie Gun

Ewan James

A cable tie wrap gun that tensions and cuts cable ties. The cable tie is simply placed around the cables in the normal way and the 'tail' is inserted into the cable tie gun. Operating the trigger tensions the cable tie and automatically cuts the tail off, all in one fast, simple, action. Ideal for production environments where quick, accurate assembly is important.

Order Code	Type	Price each
JU29G	Cable Tie Gun	£5.99

Self-Gripping Wrench

High quality, standard and long nose wrenches with self-locking, quick-release jaws which are ideal as a third hand when clamping or gripping sheet materials, pipework, nuts, bolts, or other components. Manufactured from chromed alloy steel, with screw adjustment, the standard wrench is 168mm long and the long nosed wrench is 230mm long.

Order Code	Type	Price each
RJ01B	Standard Wrench 230	£3.99
RJ02C	Long Nose Wrench 168	£3.99

HELPING HANDS

A very useful piece of apparatus which allows a PCB or any delicate work to be held in position by means of two large crocodile clips. Enables user to keep both hands free for positioning, soldering, and assembling. Six ball joints allow adjustments to the exact angles needed, and the heavy iron base prevents tipping. Includes a glass magnifier.

Order Code	Type	Price each
YK53H	Helping Hands + Mag.	£6.49

MAGNIFYING GLASSES

Pocket Magnifier

A 50mm glass magnifying lens, which slides away into a protective synthetic leather pouch when not in use. It offers a 5x magnification factor with low distortion.

Order Code	Type	Price each
ZF02C	Pocket Magnifier	£1.75

Large Magnifier

A good quality, general purpose 75mm dia. glass magnifier with a 93mm long handle. It offers a 3.5 x magnification factor with low distortion.

Order Code	Type	Price each
ZF01B	Large Magnifier	£1.99

Illuminated Glass Magnifier

Ewan James

An illuminated glass magnifier that is ideal as an aid for fine inspection of electronic components and circuit boards, but equally suited for reading fine print, maps etc. The handle incorporates an on/off slide switch for the lamp, which is powered by 4 x AA size batteries (not supplied). Magnifier 95mm dia., handle length 135mm.

Order Code	Type	Price each
BZ53H	Illuminated Glass	£3.99

ANTISTATIC PRODUCTS

Work Mat

A tough conductive flexible plastic mat which can be used to prevent the build-up of static charges on devices or equipment likely to be at risk. The mat has an earthing strap which may be clamped to a suitable earth by a jubilee clip. The static charge on any item placed on the mat will leak away to earth. Computers placed on the mat will not generate spurious data when touched by someone holding a static charge for example. The mat is also useful for safe handling of CMOS devices etc. Size 500 x 350 x 1mm.

Order Code	Type	Price each
YJ90X	Antistatic Workmat	£17.49

Wrist-Strap

For use when handling CMOS and other devices that are prone to electrostatic damage. This fabric wrist-strap is comfortable to wear and prevents electrostatic charge building up. The strap is pulled tightly around the wrist and locked in place with a Velcro fastener. Three conductive threads woven into the fabric press against the skin and allow any electrostatic charge to leak away to earth. The earthing cable is a very lightweight coiled wire which attaches to the strap via a press-stud. An insulated alligator clip at the other end of the wire is provided for connection to an earth. The wire contains a 1M ohm resistor for safety, but always remove the strap before working on live equipment. The wrist-strap is washable.

Specification

Material:	Acetate fibre
Size:	230mm x 20mm
Fits wrists from:	160mm to 200mm circumference
Cable length retracted:	430mm (extended: 2m)
Current limiting resistor:	1MΩ moulded into fastener
Net weight:	22g

Order Code	Type	Price each
FE29G	ESD Wrist Strap	£8.99

Foam

Conductive foam sheet 6mm thick in two densities. High density type is suitable for retaining IC's which may be simply pushed into the material and are held tightly in place. Low density type is very flexible for use as a packing material where static sensitive devices are being stored or packaged. Sheets are 12in x 12in (305 x 305mm).

Order Code	Type	Price each
FA82D	Hidensty A/stat Foam	£3.99
FA83E	Lodensty A/stat Foam	£2.49

ALLEN KEYS Standard Sets

A pack of ten Allen keys available in AF or metric sizes. Both types supplied in a plastic wallet. Sizes: AF - 1/16in, 5/64in, 3/32in, 1/8in, 5/32in, 3/16in, 7/32in, 1/4in, 5/16in and 3/8in. Metric: - 1.5, 2, 2.5, 3, 4, 5, 5.5, 6, 8 and 10mm.

Order Code	Type	Price each
FY34M	Allen Keys AF	£2.99
FY35Q	Allen Keys Metric	£2.99

Metric Allen Key and Balldriver Sets

A choice of two sets of Allen Keys that have a balldriver at one end, for all types of socket head screws. The balldriver can be used at an angle up to 25° from the screw centre line, making it easier to access screws in confined places and in equipment with awkward accessibility. Available in sets of eight or ten keys. The eight-key set comprises: 1.5, 2, 2.5, 3, 4, 5, 5.5 and 6mm size keys. The ten-key set comprises: all of the eight-key set plus 8 and 10mm size keys.

Order Code	Type	Price each
AQ76H	8-Key & Driver Set	£4.99
AQ77J	10-Key & Driver Set	£6.99

SPANNERS

Miniature Nut Spinner Set

Five precision miniature nut spinners in a hinged plastic box with a transparent cover. Handles are chromed and have a swivel cap. Spanners are 3mm, 3.5mm, 4mm, 4.5mm and 5mm. The handles have a hole drilled in them and a bar is supplied which fits in the hole to give extra leverage. All tools are approx. 100mm long.

Order Code	Type	Price each
YW61R	Box Spanner Set	£1.99

Miniature BA Open-Ended Spanners

Miniature chrome vanadium open-ended spanners, chrome-plated and polished. Type 24 has 2BA one end, 4BA the other, type 68 has 6BA one end 8BA the other. Overall length: type 24: 79mm; type 68:57mm.

Order Code	Type	Price each
FY36P	Min Spanner 24	£3.99
FY37S	Min Spanner 68	£3.99

Miniature Metric Open-Ended Spanner Set

A set of five chrome plated open-ended spanners angled at 30° at each end. Sizes are as follows, overall length in brackets. 3.2 x 3.5mm (70mm), 4 x 5mm (80mm), 5.5 x 6mm (90mm), 6.5 x 7mm (100mm), 8 x 9mm (110mm). Packed in a vinyl roll-up wallet.

Order Code	Type	Price each
FA66W	Metric Spanner Set	£11.99

Adjustable Spanners

An adjustable spanner in drop-forged steel. Three sizes available.

Overall length:	Max jaw opening:
150mm	19mm
198mm	24mm

Order Code	Type	Price each
FY45Y	Adjust Spanner 150	£2.49
FY46A	Adjust Spanner 200	£2.99
RJ00A	Adjust Spanner 250	£3.99

Metric Spanner Tool Roll

A set of 11 spanners which have both open and ring ends, the spanners are supplied complete with tool roll for storage. Sizes are 8, 9, 10, 11, 12, 13, 14, 15, 17, 19, 22mm.

Order Code	Type	Price each
YZ46A C1	Open/Ring Span Set	£9.99

Box Spanners

These spanners have a tempered and hardened nickel plated tool steel shaft and good-size plastic handle for a firm grip. Available in four sizes to suit nuts that fit M5, M4, M3 and M2.5 bolts. All types have plastic handles and are 210mm in length.

Order Code	Type	Price each
FV56L	Box Spanner M5	£2.99
FY41U	Box Spanner M4	£2.99
FV57M	Box Spanner M3	£2.99
FY42V	Box Spanner M2.5	£2.99

Deep Socket Set

An 8-piece set of high quality extra deep sockets, for use with 1/4 in. drive, manufactured in chrome-vanadium steel and chrome-plated. The set contains the following sizes: 5.5, 6, 7, 8, 9, 10, 12, 13mm. The set includes a storage rack.

Order Code	Type	Price each
RJ10L	Deep Socket Set	£6.99

NEEDLE FILES Diamond Needle File Set

A set of very high quality, industrial standard, needle files coated with diamond grit enabling them to file materials such as tungsten carbide, ceramics, carbon, glass, hardened steels, etc. The set comprises five of the more popular profiles; flat, tapered square, tapered round, tapered triangular, tapered half-round. The files are 120mm long. Supplied in a vinyl wallet.

Order Code	Type	Price each
GW32K	Diamond Files	£7.99

Needle File Set 140mm

A plastic wallet containing twelve needle files of various types. All types are 140mm long, cut length 65mm. A selection of some of the following types are supplied. Hand, flat warding, flat tapered, square, threesquare, round, knife, half-round, half-round flat-sided safe, barrette, oval, and crossing.

Order Code	Type	Price each
YW63T	Needle File Set	£4.99

Needle File Set 140mm

A red plastic wallet containing 10 needle files of various types. All types are 140mm long, with 70mm long working surfaces, and are fitted with a plastic handle. A selection of the following types are supplied: hand, flat tapered, square, triangular, round, knife, half round, barrette, flat oval and round oval.

Order Code	Type	Price each
KW27E	Needle File Set 140	£4.99

Torque Wrench

A 'snap action' torque wrench with a range of 10lbs/ft to 150lbs/ft (1.4kg/m to 20.7kg/m). The required torque is set by turning the knurled handle at the end of the main stem until the zero mark on the bevelled edge of the knurled handle aligns with the required value marked on the main stem. The main scale is graduated in tens of lbs/ft. but extra single units can be added by rotating the handle further to align the numbers on the units scale around the edge of the bevel.

In use the head of the wrench is pivoted on the end of the main bar and will snap over at this joint when the set torque is reached. The head has a reversible ratchet action and has a 1/2 in. square drive to which a 4 inch extension or a 3/8 in. square converter can be attached (supplied). All other standard 1/2 in. drive sockets and extensions will also fit. Overall length of wrench is 18.5cm and a metric version of the main bar scale is repeated on the other side of the bar. Supplied in black plastic carry case.

Order Code	Type	Price each
RJ11M B4	Torque Wrench	£19.99

Needle File Set 170mm

A blue plastic wallet containing 6 needle files of various sizes. All types are 170mm long, have an 85mm working surface and are fitted with a tough blue moulded handle. The six files supplied include the following: hand, square, round, half-round, medium triangular and coarse triangular.

Order Code	Type	Price each
KW26D	Needle File Set 170	£4.99

Needle File Set 180mm

A plastic wallet containing five needle files of various types. All types are 180mm long, cut length 85mm. Types supplied are hand, square, threesquare, round, and half-round.

Order Code	Type	Price each
JH42V	Warding File Set	£4.99

CENTRE PUNCHES

Standard Centre Punch

Ewan James

A chrome plated, hardened and tempered, drop forged steel centre punch. Size 6 x 3/8 in (15.2 x 9.5mm).

Order Code	Type	Price each
FA67X	Centre Punch	£1.39

Automatic Centre Punch

A professional quality automatic centre punch that can be used on iron plate, wood and a variety of other hard materials, and is used to mark or pierce work, particularly prior to drilling holes.

An automatic centre punch does the same task as a conventional centre punch but in a slightly different manner. The tool point is positioned on the required intersection and then pushed down. This automatically releases a striking block which punches the point into the metal. The force can be adjusted by turning the knurled adjuster at the opposite end to the point. Length: 5 inches Weight: 78.5gm

Order Code	Type	Price each
FS96E	HQ Centre Punch	£5.99

ABRASIVES

Wet and Dry Paper

A 280 x 224mm sheet of wet and dry abrasive paper.

Available in three grades:

Fine: (Approx. 600 grade)

Medium: (Approx. 320 grade)

Coarse: (Approx. 80 grade)

Order Code	Type	Price each
FY55K	Wet & Dry Fine	35p
FY56L	Wet & Dry Med	35p
FY57M	Wet & Dry Coarse	45p

Abrasive Fibreglass Pencil

A fibreglass abrasive stick housed in a propelling pencil type case. Designed for removing protective lacquer coatings on PCB board, prior to repair, and generally cleaning copper track for soldering. Refills are also available. **Warning:** A certain amount of fibreglass dust is produced which should be removed with great care. Avoid touching with exposed skin as the particles can easily penetrate flesh and be extremely uncomfortable. Avoid contact with eyes.

Order Code	Type	Price each
KR61R	Fibreglass Pencil	£3.80
KR62S	Pencil Refill	75p

HAMMERS

Tacking Hammer

A small 100g hammer which is ideal for cable clip tacking and other similar light-duty work. The hammer has a steel head, square in cross-section, with bevelled edges and a chisel-shaped cross-pein. The varnished hardwood handle is contoured for good grip. The head is fixed to the shaft with a metal wedge.

Order Code	Type	Price each
YZ43W	Small Hammer	£1.49

HAND DRILLS

Pistol Grip Hand Drill

Draper

A compact design Hand Drill incorporating a spring loaded three jaw chuck with 8mm capacity. The comfortable polycarbonate pistol grip allows good control on small or intricate work and can be used for storing drill bits when not in use. A 2:1 ratio of the internal gears ensures good performance. Length: 210mm. Weight: 347gm.

Order Code	Type	Price each
YP70M A1	Pistolgrip Hnd Drill	£12.49

Hand Drill

A professional quality double pinion drill with semi-enclosed centre metal frame, lacquered wood side and end handles and plated spring-loaded three-jaw chuck with 8mm capacity. Overall length: 294mm

Order Code	Type	Price each
YN56L A1	Hand Drill	£10.99

SAWS Junior

A junior hacksaw with a steel frame and 6in pinned tungsten steel blade. Packs of ten replacement blades are also available.

Order Code	Type	Price each
BR63T	6in Hacksaw	80p
BR64U	6in Hacksaw Blades	£1.29

Junior Hacksaw

A cost-effective, junior sized, adjustable tension hacksaw frame which accepts standard 150mm (6in) hacksaw blades. The chrome frame, and comfortable black plastic handle is of robust construction and includes a knurled blade-tensioning adjusting nut to provide the means of retaining blade tension.

Order Code	Type	Price each
GW31J	Junior Saw	£1.20

6in Hacksaw

A quality 6in alloy hacksaw with a plastic padded handle.

Order Code	Type	Price each
RD79L	6in Alloy Hacksaw	£3.99

Standard

A standard hacksaw with a tubular chromed frame adjustable to suit 200mm, 250mm or 300mm blades. The strong metal handle is finished in hammertone blue. Supplied with one blade 250mm x 24 teeth per inch.

Order Code	Type	Price each
YT12N	Hacksaw	£2.99

Spare Blades

A pack of six spare blades for the standard hacksaw. Blades are 250mm x 24 teeth per inch.

Order Code	Type	Price each
JG71N	10 in Hacksaw Blades	£1.29

Tenon Saw

10in. hardpoint tenon saw with a comfortable moulded plastic handle and strengthened steel back. Saw blade length: 10in. (254mm) Max depth of cut: 3in. (75mm)

Order Code	Type	Price each
ZC32K	Tenon Saw	£6.99

Mitre Box & Saw

A quality, precision engineered tool, this mitre box and saw is designed for making accurate joints in wood, plastic and alloys. It is the ideal tool for the enthusiast, useful for making picture frames, door frames, and in fact, all types of mitre work, enabling four, five, six, and eight-sided frames to be made up accurately, using the readily located preset angles. Alternatively, provision is made for those odd angles to be set up. The mitre box is manufactured as an aluminium pressure casting with a precision ground finish. It carries an arm of similar manufacture, having four saw guides attached. This swings about a graduated scale marked out in degrees on the mitre box. The arm carries a sprung-loaded lever that locates in any one of nine preset positions to lock the guide rods to a selected angle. The bow saw frame is a pre-tensioned assembly of aluminium and steel with a comfortable cast aluminium handle at one end. The blade is of high tensile steel and provided with adjustment at the handle. An adjustable clamp is supplied to restrain the workpiece and an end stop or depth guide is supplied to enable identical work to be repeated. A spare saw blade is available.

Specification	
Maximum width of workpiece 90°:	160mm
Maximum width of workpiece 45°:	110mm
Maximum height of workpiece:	85mm
Table length:	400mm
Blade length:	550mm
Blade width:	45mm

Pre-set angles: $\pm 67.5^\circ$, $\pm 60^\circ$, $\pm 54^\circ$, $\pm 45^\circ$, 90°
Overall dimensions (assembled)
mitre box with arm at 90°: 487 x 256 x 320mm
saw: 648 x 170 x 52mm

Order Code	Type	Price each
RJ08J	F11 Mitre Box & Saw	£29.99
RJ09K	Saw Blades	£3.99

KNIVES

Versatile DIY Knife

Fisco

A very high quality knife which has several features. The blade can be extended or retracted by means of a lever on the side of the knife. When the blade has been pushed out to the required position, it may be 'locked' in place by turning a thumbwheel. The blade can also be mounted horizontally so that the entire cutting edge is exposed, but it cannot be retracted if used in this way so more care is required. The handle features an in-built safety blade dispenser, each of which holds up to 10 spare blades. Packs of 10 replacements are available in two different types; the standard straight edge variety (of which 5 are supplied with the knife) and also a hooked type. Supplied with 5 straight-edge blades, full instructions and clear plastic storage case.

Order Code	Type	Price each
KW23A	Versatile DIY Knife	£8.99

Spare Blades for DIY Knife

Packs of 10 replacement tungsten alloy blades for the versatile DIY knife (above). Two types are available, both of which offer up to double the life of normal blades. The first type is a standard straight edge blade, while the other is a hooked type (used for cutting materials such as linoleum and carpet). The 10 blades are supplied in a safety dispenser which slots into the handle of the knife.

Order Code	Type	Price each
KW24B	Straight Blades	£2.79
KW25C	Hooked Blades	£3.29

Retractable Blade Knife

A retractable action trimming knife supplied with five blades. Blade retracts right back into the handle when not in use. Overall length 150mm.

Order Code	Type	Price each
FY03D	Retractable Knife	£2.65

Spare Blades

A pack of five replacement blades for use with retractable knife.

Order Code	Type	Price each
FY04E	Knife Blades	86p

Snap-Off Blade Knife

A compact knife ideal for intricate model making applications. The tough, impact resistant body houses a steel blade made up of 11 'snap-off' segments. When the blade in use is worn, it can be snapped off by placing it into the slot of the pocket clip. The blade is retractable and is held firmly when in use by a blade locking device.

Length: 127mm
Weight: 11.5gm

Order Code	Type	Price each
YW64U	Snap-Off Blade Knife	60p

Spare Blades

A pack of ten spare blades for YW64U. Blades are supplied in a plastic storage box with slide-on cap.

Order Code	Type	Price each
JK31J	Snap-off Blades	£1.29

Heavy Duty Snap-Off Blade Knife

An all purpose knife with a retractable blade. The tough, impact resistant contoured plastic body houses a steel blade made up of 7 'snap-off' segments. When the blade in use is worn, it can be snapped off by placing it into the slot provided on the end cap. The blade is held firmly when in use by a blade locking device.

Length: 154mm
Weight: 38gm

Order Code	Type	Price each
FS98G	HD Snap Blade Knife	99p

Spare Blades

A pack of ten spare blades for FS98G. Blades are supplied in a plastic storage box with slide-on cap.

Order Code	Type	Price each
JH59P	HD Snap-off Blades	£1.89

Scalpel

A surgical scalpel which will be found the most suitable tool for making PCB artworks using our tapes etc. They are also suitable for all kinds of accurate and delicate cutting work. The handles and blades must be ordered separately.

Handle

A small metal handle designed to hold the blades detailed below.

Order Code	Type	Price each
FY05F	Scalpel Handle	£4.20

Blade

A blade to fit the scalpel handle described above. Blades are made of the finest surgical steel and are supplied in a sterile pack. Supplied in packs of five.

Order Code	Type	Price each
FY06G	Scalpel Bld Type 11	85p

Chassis Punch Set

A set of five punches for thin tin or aluminium sheet up to 1.6mm thick. The punches make it easy to make neat round holes where drills are not practical. Sizes are 16, 18, 20, 25 and 30mm. The set is supplied with a reamer.

Order Code	Type	Price each
YK27E	A1 Chassis Punch Set	£29.99

Electricians Bolster Chisel

The 56mm blade electricians chisel has been especially designed for cutting the tongue of 'tongue and groove' boarding and lifting floorboards. The chisel has been hardened and the blade tempered to give a keen cutting edge to make it easier to remove floorboards.

Order Code	Type	Price each
RJ05F	Bolster	£4.99

Sheet Metal Punches

A range of sheet metal punches for cutting perfect holes in stainless and mild steel up to 16swg (1.62mm), sheet copper, brass, and aluminium up to 2.0mm, and many other sheet materials, ductile plastics etc. These sheet metal cutters are ideal for electricians, electronic engineers, plumbers, vehicle mechanics, in fact anywhere that requires clean, accurate and burr-free holes. At the centre of where the hole is to be punched, a hole is drilled large enough to clear the Allen screw of the punch to be used. The punch is assembled with the panel between

the two parts of the punch, and the Allen screw is tightened, with a suitable Allen key (not supplied), until the hole is cleanly punched out.

Sizes available (mm)	Allen Key required A/F
12.5	6mm
16	6mm
20	8mm
22.5	8mm
25	8mm
32.5	10mm

Order Code	Type	Price each
KR29G	Metal Punch 12.5	£4.99
BA66W	Metal Punch 16	£4.95
BA67X	Metal Punch 20	£5.65
BA68Y	Metal Punch 22.5	£5.65
BA69A	Metal Punch 25	£5.99
BA70M	Metal Punch 32.5	£6.99

Reamer

A hand operated, tapered reamer for finishing and deburring panel holes.

Made from carbon-chrome alloy steel, it may also be useful in opening holes out to non-preferred diameters. Will cover holes from 3mm up to 12mm (1/8 to 1/2 in).

Order Code	Type	Price each
FG11M	Reamer	£5.75

Metal Sheet Folding Tool

A heavy duty manual sheet metal folding machine made from thick steel plate and angle sections. It is particularly useful for producing metal boxes and brackets. A slotted former bolted to the jig holds the sheet metal to be bent, in place, the slots being occupied by previously bent sections. This arrangement allows 33 different widths of box to be produced, ranging from 10mm to 420mm. The former also has eccentric adjustment screws to allow for different thicknesses of metal. Sheet steel of up to 0.6mm thick, and aluminium to 1.5mm thick or less, can be safely bent. The folder must be bolted down securely at 4 points before use. It is supplied with two steel handle bars (used to operate the pivoted bending mechanism) and full operating instructions.

Order Code	Type	Price each
GK13P	H15 Metal Folder	£89.99

Riveting Kit

A useful riveting kit comprising a heavy-duty hand riveter with four heads and a spanner, plus an assortment of rivets. The riveter is made from two alloy castings finished in blue with black plastic handles, one of which has a pocket to store the spanner. The rivet sizes supplied are 2.4, 3.2, 4.0 and 4.8mm.

Order Code	Type	Price each
RJ07H	Riveter Kit	£8.99

Bench Vices

Ewan James

Two good quality steel bench mounting vices with smooth jaws. 2 inch type fixes to benches from 2mm to 32mm thick. Jaw width 50mm, max opening 40mm. 3 inch type fixes to benches from 13mm to 46mm thick. Jaw width 75mm, max opening 60mm. Finished in hammertone.

Order Code	Type	Price each
YJ83E	A2 2 inch Vice	£14.99
YJ84F	D4 3 inch Vice	£24.99

G Clamp Set

Ewan James

A three piece, diecast G clamp set comprising 20mm, 30mm and 40mm capacity clamps. A shoe on the end of the threaded screw protects the workpiece. The screw is operated by a knurled knob. A round, magnetic base is included, which incorporates a slot to accept any of the three clamp frames, such that two may be combined to form a small table edge vice, or to make the clamp free-standing for holding small items. Ideal as a third hand for holding pcb's etc., holding together small objects being bonded, and many other uses.

Order Code	Type	Price each
FT76H	Mini G Clamp Set	£3.75

VICES & CLAMPS

Hobby Vice

Ewan James

A small modellers vice in tough plastic construction with metal faced jaws. The vice has a very strong suction clamp for mounting to flat non-porous surfaces. Jaw width: 37mm. Max opening 27mm. Overall dimensions fully closed 90mm long x 70mm wide x 68mm high.

Order Code	Type	Price each
YP38R	Hobby Vice	£2.65

Large Hobby Vice

Ewan James

A modellers vice in a tough plastic construction with metal faced jaws. The vice has a very strong suction clamp for mounting to flat non-porous surfaces. Jaw width: 62mm. Max opening 40mm. Overall dimensions fully closed: 115mm long x 85mm wide x 90mm high.

Order Code	Type	Price each
YT06G	Large Hobby Vice	£3.65

Bench Vice with Swivel Base

A quality 75mm vice with integral swivel base that is manufactured from cast steel and finished in blue. The swivel base can rotate 360° and can be locked in any position with two locking handles. Maximum jaw opening is 105mm. The vice has three fixing holes 8mm diameter for securing to a bench. Overall dimensions: 268 x 155 x 136mm.

Order Code	Type	Price each
RJ13P	D4 75mm Bench Vice	£14.99

Pin Vice

A quality, handy, versatile pin vice suitable for holding small files, taps, drills, scriber points, wires, etc. All steel construction, with bright chrome finish, the pin vice has a revolving head and ribbed sides for ease of use. Supplied with two double-ended jaws, giving it a wide handling capacity of 0.1 to 3.2mm diameter. The second set of jaws is retained at the top of the pin vice. Removing the cap, to which the revolving head is attached, uncovers this second set. Overall length 94mm.

Order Code	Type	Price each
GW33L	Pin Vice	£6.99

Fast Action Screw Clamps

Two fast action screw clamps that are ideal for clamping work to benches, or to hold work securely while glue sets. As the adjustable part of the clamp is tightened and starts to secure the work, it 'locks' into a ratchet on the stem. When the clamp is unscrewed, the clamp 'unlocks' and can slide down the stem, instantly releasing the work. The centre of the clamp to the stem is 50mm and the clamp can open to either 100mm or 300mm.

Order Code	Type	Price each
KR45Y	Screw Clamp 100	£3.99
KR46A	Screw Clamp 300	£4.99

TAPS AND DIES

Tap Wrench

A general purpose T-type tap wrench with nickel-plated body and jaws and a black barrel. The jaws open from 1/16 in. to 3/16 in. Supplied with instructions for use.

Order Code	Type	Price each
JK88V	Tap Wrench 1/16-3/16	£2.99

Taps

A range of hand taps for cutting metric threads. Manufactured in high carbon steel with accurately cut threads. Each set contains a taper and a bottoming plug. The following thread sizes are available M2, M2.5, M3, M3.5, M4 and M5 to suit our range of bolts (M3.5 is size of thread in electrical boxes).

Order Code	Type	Price each
JK89W	Hand Tap 2mm	£2.75
JK90X	Hand Tap 2.5mm	£2.75
JK91Y	Hand Tap 3mm	£2.75
JK92A	Hand Tap 3.5mm	£2.75
JK93B	Hand Tap 4mm	£2.75
JK94C	Hand Tap 5mm	£2.75

Die Holder

A steel die holder for use with the dies shown below. Holds dies of $\frac{13}{16}$ in. diameter. Overall width: 155mm.

Order Code	Type	Price each
JK81C	Die Holder 13/16	£3.99

Dies

Circular dies manufactured from high carbon steel with accurately cut threads. The following thread sizes are available M2, M2.5, M3, M3.5, M4 and M5 to suit our range of nuts (M3.5 is size of thread in electrical wall plates etc.).

Order Code	Type	Price each
JK82D	Split Die 2mm	£3.49
JK83E	Split Die 2.5mm	£3.49
JK84F	Split Die 3mm	£3.49
JK85G	Split Die 3.5mm	£3.49
JK86T	Split Die 4mm	£3.49
JK87U	Split Die 5mm	£3.49

Cutting Compound

A general purpose cutting compound for use with drills, taps, dies and other cutting tools. The cutting compound gives enhanced performance when cutting metals and other hard materials and also prolongs the life of the cutting tool itself. Supplied in a 30cc container with nozzle applicator.

Order Code	Type	Price each
JU38R	Cutting Compound	£2.49

MEASURES AND LEVELS

Circular Level

A top mounted circular level allowing adjustment in all directions without re-positioning the level. The level is suitable for levelling domestic appliances, hi-fi equipment, caravans and trailers etc. Fixing holes are provided for permanent fixing to the equipment if required.

Order Code	Type	Price each
YP55K	Circular Level	£2.50

Multi Level

A level with the reading vials set at right angles to each other to allow adjustment in all directions without re-positioning the level. The level is suitable for levelling domestic appliances, hi-fi equipment, caravans and trailers etc. Fixing holes are provided for permanent attachment to the equipment.

Order Code	Type	Price each
YP56L	Multi Level	£3.60

Pocket Level

A 250mm (10in.) spirit level, fitted with ultrasonically sealed acrylic multi-way vials. Accuracy is 1mm per 1m (=0.058°).

Order Code	Type	Price each
KR43W	Pocket Level	£5.99

36in. Level

A bright yellow plastic-covered aluminium level which has an 'H' shape cross-section and three vials, for vertical, horizontal and 45° planes. Suitable for indoor and outdoor use, the level has an overall length of 36in. Cross-sectional dimensions $2\frac{1}{4}$ x 1in.

Order Code	Type	Price each
KR44X	C1 36in Level	£10.99

9in Spirit Level

A tough, light weight plastic non-conductive, non-corrosive, spirit level that will not mark wood surfaces, or scratch paint on household appliances. The level is fitted with three large acrylic vials with etched graduations for improved visibility.

Order Code	Type	Price each
RZ77J	9in Spirit Level	£3.99

Steel Tape Rule

A metal tape rule marked in inches and metres. It has a smart black plastic case, contoured to fit neatly in the hand. The rule has a coil spring return to retract the tape and a lock mechanism to keep it extended at the required length. The case has a chromed belt clip. The tape rule is available in two lengths, 3m (10 ft) and 5m (16 ft). 3m rule: overall size is 58 x 55 x 23mm (excluding belt clip) and tape is 12.5mm wide. 5m rule: overall size 67 x 65 x 30mm (excluding belt clip) and tape is 18mm wide. Both types have sliding tips for accurate internal and external measurements.

Order Code	Type	Price each
FY59P	Tape Measure 3m	£1.75
JM90X	Tape Measure 5m	£2.99

Ultrasonic Tape Measure (Range Finder)

A precision made, fast and convenient measuring device in matt black ABS with a range from 61cm to 13.72cm or 2 feet to 45 feet. A slide switch instantly converts any measurement from metric to imperial or vice versa. The range finder measures from the rear of the case to the target, and is very easy to use. For example to measure a room, place the back of the unit against one wall, pointing at the opposite wall. Press the clear key, then 'measure'. A short beep indicates that the press button has registered. The display flashes zero, then displays the distance. As soon as the display settles, a long beep sounds for confirmation. The reading can now be taken. If no key is pressed for over 1 minute, the range finder automatically switches off to conserve power. If you want to measure the area or volume of a space, the range finder has three memories to allow this to be

Maplin
Stockist of Assessed Capability
YOUR GUARANTEE OF QUALITY & SERVICE

PHONE BEFORE 5PM FOR SAME DAY DESPATCH

01702 554161

done. The memories are not cleared when the unit is switched off and can be recalled at any time. In the example above, after taking the first measurement, simply press the 'store' and then 'M1' key to store the distance in the first memory. Now follow the same procedure with the other two walls in the room, this time pressing the 'M2' key to store that distance in the second memory. Pressing the 'area' key followed by 'M1' and then 'M2' will instantly display the floor area of the room.

To measure the height of the room, place the unit on the floor pointing up at the ceiling, press 'measure', then after the long beep, press 'store' and then 'M3'. Now pressing the 'volume' key will instantly display the volume. Pressing the 'area' key followed by 'M1' and then 'M3' will display the area of two of the walls and 'area' followed by 'M2' and then 'M3', will display the area of the room's other two walls.

A '+' key and '-' key allow you to add to or subtract from measurements stored in memory (providing units are the same e.g. both metric). If the sonic signal is not cleanly reflected, or the range is over the maximum, the display shows 'error'. This may happen if the unit is pointed at soft furnishings such as curtains or carpets, or irregular surfaces, though windows are an excellent reflector. Objects such as chairs, tables, wall corners, door frames etc, in the path of the sonic beam will give you false readings. A low battery indicator shows on the display when the batteries need replacing.

Specification

Range: 61cm to 13.72m, 2ft to 45ft
 Accuracy: Better than 0.5% reading at 13.81ft, 25°C
 Resolution: 1cm, 0.1ft
 LCD: 7-digit, indicates measurement being taken
 Sensor: Polaroid ultrasonic sensor
 Power saving: Automatic shut off after 1 minute
 Memories: 3 non-volatile memories for length, width and height (memory is retained after switch off)
 Volume: Single key calculation
 Area: Three key calculation
 Other features: Allows addition or subtraction of results. Automatic and accurate temperature compensation from 0°C to 40°C. Beep tone indicates measurement is complete. Error tone and LCD indicator if measurement fails. Easy to use 10 key panel.
 Battery life: 1 year in normal use
 Size: 127 x 66 x 27mm (length of unit automatically incorporated in measurement)
 Weight: 156g with batteries

The range finder requires four AAA cells to operate (not supplied).

 GW46A

FOLDING SACK TRUCK

A high quality, strong, extendable two-wheeled truck, with a folding platform, that is useful in the home or industry but small enough to fit in the boot of a car. The truck is of rugged construction, manufactured from aluminium alloy with a chromed handle and fitted with rubber tyred wheels 152mm (6in.). The wheels run on ball bearings secured to a solid axle. A strong spring-loaded latch holds the platform open or folded. The platform is painted black. The extendable handle is locked in the open or closed position by a sprung-loaded mechanism. In the closed position the truck is 725mm high x 400mm wide and 190mm deep. In the open position the platform extends the depth by a further 217mm and the handle extends the height up to 1095mm. The truck weighs 7kgs.

ELECTRICAL TOOLS

MINICRAFT

Precision Collet Drill

The MB130 is a high-quality, low cost, lightweight precision drill fitted with a collet chuck for a greater degree of accuracy in drilling and detailing in modelling, jewellery and other miniature work. This drill has been ergonomically styled for comfortable handling to allow for long periods of continuous use without excess fatigue. Fitted with a high-torque, high-speed, fan-cooled motor to ensure that it will give a long and trouble-free life. A locking ring provides for simple and straightforward switching of collets. Alternatively, the drill can be fitted with a keyless chuck (BA96E).

Specification

Operating voltage: 9 to 18V DC
 Maximum power: 25W
 Off load speed: 16000rpm
 Chuck type: Collet
 Chuck capacity: 1.0, 1.5, 2.3mm
 Cable type: Straight
 Cable length: 1.9m
 Dimensions: 160 x 32mm approximately
 Weight: 190g

Hobby Drill

The MB150 is a high-quality, low cost, miniature lightweight drill ideal for use in electronics for PCB preparation, in jewellery fabrication and in model making. This drill has been ergonomically styled for comfortable handling to allow for long periods of continuous use without excess fatigue. A high-torque, high-speed, fan-cooled motor ensures that it will give a long and trouble-free life. A lightweight keyless chuck allows for simple accessory changeover and versatility in use. Alternatively, the drill can be fitted with a collet chuck (BA95D) for a greater degree of accuracy in drilling and detailing.

Specification

Operating voltage: 9 to 18V DC
 Maximum power: 25W
 Off load speed: 16000rpm
 Chuck type: Keyless
 Chuck capacity: 0.4 to 3.2mm
 Cable type: Extendable
 Cable length: 1.8m
 Dimensions: 165 x 32mm approximately

FOR TOP QUALITY & VALUE!

High-Speed Precision Drill for the Hobbyist

- ★ **Lightweight ergonomically designed housing**
- ★ **Keyless chuck for easy accessory changeover**
- ★ **Twin bearing drive shaft for smoother running**
- ★ **Powerful 40W fan cooled motor**
- ★ **Very high speed for increased versatility**

For the hobbyist who requires a drill that offers a perfect balance between speed and handling, then this drill is the ideal choice. This lightweight ergonomically designed drill has a powerful high speed motor with a twin bearing drive shaft for smoother running. A lightweight keyless chuck ensures easy accessory changeover and for extra flexibility, a collet set (BA95D) can be fitted.

Specification

Operating voltage:	9 to 18V DC
Power:	40W
Off-load speed (12V):	20,000 r.p.m.
Chuck type:	Keyless
Chuck capacity:	0.4 to 3.2mm
Cable type:	Extendable
Cable length:	1.8m
Weight:	210g

High Power High Precision Miniature 'Buffalo II' Drill

- ★ **Very powerful 100W fan cooled motor**
- ★ **Twin bearing drive shaft**
- ★ **Precision key operated chuck**
- ★ **Integral on/off/push-on**
- ★ **Coiled cable**
- ★ **Ergonomically styled**

A highly recommended miniature drill which offers both power and precision. The drill has an extremely powerful motor and a special on/off/push-on switch which allows continuous use or intermittent use. Twin drive shaft bearings ensure long life, accuracy and smooth operation. The key operated chuck accepts drill bits or accessories between 0.4 and 6mm dia. The drill is neatly styled, comfortable to hold, well balanced and easy to use. Supplied with chuck key. Spare chuck keys available (BA97F). This versatile drill, when used with the MB540 twin pillar vertical drill stand (XP21X) is ideal for printed circuit board fabrication and other precision drilling applications.

Specification

Operating voltage:	9 to 18V DC
Power:	100W
Off-load speed (12V):	12,500 r.p.m.
Chuck type:	Key operated
Chuck capacity:	0.4 to 6.0mm dia.
Cable type:	Extendable, coiled

MINICRAFT®

10VA Transformer Unit

A well made, compact transformer unit for use with all 40W drills and engraving pen. The unit is self contained, with integral 13A plug pins and output cable with free socket. The unit is double insulated and thermally protected against overload, the thermal trip is self resetting. This unit is suitable for indoor use only.

Specification

Input voltage:	240V AC 50Hz
Output voltage:	12V DC
Output power:	10VA
Output cable connector:	Minicraft 2-pin socket
Cable length:	2m
Weight:	520g

YZ97F B1	MB714 10VA Xformer	£24.99

24VA Variable Speed Transformer Unit

A variable speed transformer unit for use with all Minicraft tools. The unit is well made and compact and features a manually resettable trip to guard against overload. Mains input is via a two core mains cable to which a 13A plug with 2A fuse should be fitted (plug and fuse not supplied). A rotary front panel control allows adjustment of output voltage, thus controlling speed. The unit is double insulated and is suitable for indoor use only.

Specification

Input voltage:	240V AC 50Hz
Output voltage:	9V to 16V DC
Output power:	24VA
Speed control range:	~ 7,000 to 30,000 r.p.m.
Output connector:	Minicraft 2-pin socket
Mains cable length:	2m
Weight:	1.05kg

Order Code	Type	Price each

Universal Variable Speed Transformer

This top of the range power centre is suitable for all Minicraft® precision tools, and has a massive 100VA peak output. This unit is equipped with a unique microchip controlled electronic variable speed for smoother running, with full torque control for effective work at lower speeds. Additionally, a re-settable overload cut-off facility is incorporated for extra safety and longer life, and for added convenience, three outputs are included for easy tool changeover. Storage space for 60 accessories is included along with a tool rest for quick and easy access.

Specification

Input voltage:	240V AC 50Hz
Output voltage:	8.8V to 16.2V DC
Output power:	50VA constant 100VA peak
Speed control range:	500 to 18,000 r.p.m.
Cable type:	Standard

JW08J	MB1661 Sil Polishers	£3.49

Steel and Brass Wire Brushes

A selection of steel and brass wire brushes suitable for use with the Minicraft range of drills. The brushes can be used for a wide variety of metal cleaning tasks including derusting and paint removal. Each type is supplied in a pack containing 3 different brushes: one pencil shape, one cup shape and one wheel shape. Note: the maximum recommended speed is 10,000 r.p.m.

Order Code	Type	Price each
JW09K	MB1670 Steel brushes	£3.65
JW10L	MB1671 Brass brushes	£3.65

15 Piece Cleaning and Polishing Set

A set of 15 cleaning and polishing accessories for use with the Minicraft range of drills. The set contains accessories suitable for sanding, cleaning, grinding, deburring and polishing on wood, plastics and soft metals.

Order Code	Type	Price each
JW19V	MB1902 Clean&Polish	£9.49

Grinding Stones

A pack of three grinding stones of various types. They are used for grinding, deburring and engraving metal, glass, stone, ceramics, plastic and wood. They can also be used for sharpening knives, etc. The three stones supplied are: 7mm cylindrical, small taper and reverse taper. All types have an integral 2mm mandrel. Maximum drill speed: 35,000 r.p.m.

Order Code	Type	Price each
KW15R	Grinding Stones 3Pk	£3.25

Grinding Wheels

A pack of 22mm grinding wheels. There are three in the pack; graded as coarse grit (purple), medium grit (brown) and fine grit (white). The chosen wheel is screw-fitted to a separate 3mm dia. mandrel, the free end of which is inserted into the drill's chuck. These grinding wheels are suitable for using on ceramics, metals, stones and glass, with a maximum speed of 40,000 r.p.m.

Order Code	Type	Price each
KW16S	Grinding Wheels 3Pk	£3.25

Mandrels

A pack of three mandrels for use with Minicraft drill fitting sawblades and cutting discs. Suitable for all Minicraft drills.

Order Code	Type	Price each
JW18U	MB1625 Mandrels	£1.99

Collet Set

A four piece collet set suitable for use with Minicraft® drills MB1010, MB170 (BA80B) and MB160. Diameter sizes: 0.5, 1.0, 2.3, 3.2mm.

Order Code	Type	Price each
BA95D	MB1925 Collet Set	£4.49

Keyless Chuck

A keyless chuck for use with Minicraft® collet drill MB120. Size: 0.4 to 3.2mm.

Order Code	Type	Price each
BA96E	MB1932 Keyless Chuck	£4.49

Chuck Key

A replacement chuck key for use with the Minicraft® high power, high precision drill MB1012 (YZ94C).

Order Code	Type	Price each
BA97F	MB1936 Chuck Key	£2.49

Extension Cables

Two extension cables for use with the majority of Minicraft® power tools. The cables are 5m long and one has a Minicraft® socket at one end and a compatible plug at the other end. The other version has battery clips at one end and a Minicraft® compatible socket at the other end (BA94C).

Order Code	Type	Price each
BA93B	MB1802 Ext Cable	£4.99
BA94C	MB1805 Cable + Clips	£5.99

15 Piece Modelling Set

A 15 piece modelling set comprising five carborundum cutting discs, one mini saw blade, two mandrels, three fine milling cutters, one hard felt polisher, two steel wire brushes and one brass wire brush.

Order Code	Type	Price each
BA89W	MB1901 Modelling Set	£9.99

Engraving Pen

An extremely simple to use engraving pen for craft and security engraving on glass or metal. The lightweight pen-style unit is comfortable to hold. The on/off switch requires very little pressure to operate, thus reducing operator fatigue. Accessory bits simply push-in/pull-out for fast interchangeability. Tip speed is 20000 R.P.M. (off-load) for fast efficient engraving. Supplied with one diamond tipped engraving bit.

Order Code	Type	Price each
YZ96E	MB185 Engraving Pen	£15.99

Engraving and Security Kit

A superb kit ideal for the craft enthusiast and householder. This comprehensive, simple to use engraving kit comes with a lightweight pen-style engraver, plug-in transformer, one diamond bit and two grinding stones. The kit also includes a paper stencil for craft engraving on glass and a plastic stencil for security marking on valuables i.e. videos, cameras, car radio. Supplied with a handy carry and storage case.

Order Code	Type	Price each
BA86T	MB186 Engraving Kit	£27.99

MINICRAFT®

Diamond Engraving Bit Set

A set of diamond engraving bits designed for use with the Minicraft MB185 engraving pen. The bits are suitable for fine engraving work on a wide range of plastics, metals and glass. The set contains three different types as follows: 1mm diameter round bit, 1.4mm diameter round bit, 1.5mm diameter oval bit.

Order Code	Type	Price each
JW06G	MB1766 Engravers	£9.49

Drum Mandrels and Sanding Drums

A pack of three drum mandrels for use with all Minicraft sanding drums. Suitable for all Minicraft drills. Drum diameter 10mm. A selection of sanding drums for use with Minicraft drum mandrels is also available. Three types of sanding drum are available: fine grade, coarse grade, silicon carbide. The sanding drums are sold in packs of five.

Order Code	Type	Price each
RZ62S	MB1784 Fine	£3.49
RZ63T	MB1785 Coarse	£3.49
RZ64U	MB1786 SilCarbide	£3.49
RD77J	Drum Mandrels	£2.99

Precision Circular Saw Table

- ★ Powerful 100W fan cooled motor
- ★ Diecast table
- ★ Rip fence
- ★ Mitre guide
- ★ Transparent blade guard
- ★ Supplied with two blades

A precision circular saw table for modellers, a fan cooled 100W motor provides power to the saw blade which rotates at 12,500 r.p.m. off-load. The saw table is made from die cast metal for accuracy and reliability. A transparent saw blade guard protects the operator whilst allowing the progress of the blade through the workpiece to be observed. A rip fence ensures precise straight cuts in wood, metal and plastic. An adjustable mitre guide is also provided to allow mitres to be cut accurately, the guide is adjustable from 0° to 90°. Supplied with two blades; an 84-tooth blade for wood and plastic and a 106-tooth blade for metal and plastic.

Specification	
Voltage:	9 to 18V DC
Power:	100W
Off-load speed:	12,500 r.p.m.
Table area:	169 x 119mm
Cutting capacity:	
Non-ferrous metal:	1mm
Plastic:	2mm
Wood:	6mm
Mitre guide angle:	0° to 90°
Blade diameter:	50mm or 60mm
Cable connector:	Minicraft 2-pin plug
Cable length:	1.8m
Weight:	900g

Order Code	Type	Price each
XP18U	D2 MB410 Circular Saw	£49.99

Blades to Fit Circular Saw

A range of blades designed for use with the Minicraft MB410 circular saw table. Two different types of blade are available, each designed for cutting different materials. The blades are supplied in packs of two as follows:
 MB1647 has 50mm diameter saw blade for plastic and non-ferrous metals (pack of 2).
 MB1648 has 60mm diameter saw blade for wood (pack of 2).

Order Code	Type	Price each
JU93B	MB1647 Saw Bls50PM	£11.99
JU94C	MB1648 Saw Bls60W	£7.49

CALL CASHTEL NOW PHONE 01702 552941

Reliant Drill Kit

A kit comprising the Reliant electric drill, fitted with latest automatic 3 jaw pin chuck, adjustable to take any size drill bit up to 2.9mm dia. Kit includes 16 twist drills, one axial brush, one radial brush, polishing pad, tommy bar and Allen key. A mains adaptor is included in the kit.

Order Code	Type	Price each
LH79L	A1 Reliant Kit	£34.99

Reliant Electric Drill

A sub-miniature 12V electric drill suitable for drilling printed circuit boards etc, and similiary light duties. Features the latest automatic 3 jaw pin chuck with up to 2.9mm capacity. Suitable power supply XM20W.

Rated voltage:	12V DC
No load current:	175mA
Full load current:	1.5A
Torque:	100gm cm
Speed:	9,000 r.p.m. $\pm 7\frac{1}{2}\%$
Body dimensions:	76mm long x 33mm diameter
Weight:	160g

Order Code	Type	Price each
BW03D	Reliant Drill	£12.99

Zircon Electric Drill

Miniature 12V DC electric drill suitable for drilling printed circuit boards, thin aluminium and other light duty work. The T section magnets and 5-pole motor produce more torque than drills of twice this size. The drill utilises a ground shaft, ball race drive and 3-jaw pin chuck which has a capacity of 0.5mm to 3.0mm. The drill is well balanced, comfortable to hold and easy to use.

Specification

Rated voltage:	12V
No load current:	390mA
Full load current:	2.25A
Running torque:	150g.cm
Stall torque:	1150g.cm
Speed on load:	9,700 r.p.m.
No load speed:	11,200 r.p.m.
Dimensions:	170mm x 35mm dia.

Order Code	Type	Price each
YU92A	Zircon Drill	£19.99

Drill Stands

A range of drill stands for use with the Reliant and Zircon miniature electric drills. A lever on the stand lowers/raises the drill; thus accurate alignment can be easily achieved.

Order Code	Type	Price each
XM82D	B3 Reliant Stand	£26.99
XP05F	B3 Zircon Stand	£26.99

POWER TOOLS

Cordless Variable Speed Reversing Hammer Drill

Black & Decker

- ★ Cordless
- ★ 7.2V battery pack
- ★ Variable speed trigger and two-speed gearbox
- ★ Bright steel 10mm chuck
- ★ Comfortable 'pistol grip' case
- ★ Switchable two-stage hammer action
- ★ Reversible
- ★ Chuck key storage
- ★ Supplied with double-ended screwdriver bit
- ★ Fast recharge

The BD602 is a highly versatile cordless drill with a number of innovative features not often found on cordless drills. The drill is equipped with a variable speed trigger and two-speed gearbox. Chuck speed is variable from 0 to 300 r.p.m. or 0 to 600 r.p.m. depending on which gear ratio is selected. The direction of chuck rotation is reversible, making the drill ideal for use as a powerful cordless screwdriver. The drill also has a two-stage hammer action to cope with large holes in concrete and masonry. Recharging takes only 3 hours compared to 16 hours of many other units. Drilling capacity is 16mm in wood, 10mm in steel and 10mm in masonry. Supplied complete with double-ended screwdriver bit (suitable for Philips and slotted screws) and charger unit.

Order Code	Type	Price each

Two Speed Hammer Drill

Black & Decker

The BD562 is a rugged, two-speed hammer drill capable of drilling into wood, steel and concrete. Fitted with a powerful 400W motor driving a 10mm chuck at either 2100 or 2500 rpm, provide superb drilling capacities of 20mm in wood and 10mm for all metals. The hammer action is selected by another switch, the drilling capacity for concrete and masonry is 10mm. A lock-on button in the base of the handle, along with the carefully designed and contoured 'pistol-grip' casing, enables easy continuous drilling. The high specification of all moving parts ensures a longer working life for the drill.

Order Code	Type	Price each
RJ22Y	G4 BD562 Drill	£41.99

Cordless Variable Speed Reversing Drill with Two-speed Gearbox

Black & Decker

- ★ Proline™ professional
- ★ Cordless
- ★ Two-speed gearbox
- ★ Variable speed
- ★ Hammer action
- ★ Reversible
- ★ 9.6V battery pack

The PL97K is a robust, versatile professional cordless drill. The drill is equipped with a variable speed, high and low ratio gearbox. Chuck speed is variable from 0 to 450 rpm or 0 to 1100 rpm depending on which gear ratio is selected. This helps to conserve battery power and gives extra torque at low speeds. The hammer action makes the drill ideal for drilling into masonry, and the ability to reverse the direction of rotation of the chuck makes the drill a powerful cordless screwdriver as well. Equipped with a $\frac{3}{8}$ in. chuck and supplied with a tough moulded kit box and detachable battery pack. Additional battery packs are available separately.

Order Code	Type	Price each
BU30H	G6 Drill PL97K	£99.99

Cordless Variable Speed Hammer Drill

Black & Decker

The PL99K is a versatile, industrial quality cordless drill having more than enough power and endurance to meet the needs of the professional. The powerful 12V motor is equipped with a variable speed and a reversing facility. With two, switchable, speed ranges available, of 0 to 500 rpm and 0 to 1200 rpm, helping to conserve battery power and provide extra torque at low speed. The drill can easily handle the chuck capacities of 16mm in wood, 10mm in steel and, with the added hammer action, 10mm in masonry. The detachable battery pack caters for two-pack operation, with one pack in use and the other on charge, enables easy continuous drilling. The high specification of all moving parts ensures a long working life for the drill. Equipped with a 10mm chuck and supplied with a tough moulded kit box. Additional battery packs (RJ29G) are available separately.

Order Code	Type	Price each
RJ23A	H5 PL99K Drill	£124.99

Battery Packs

Black & Decker

Battery packs suitable for use with the Proline™ range of cordless drills. 8-cell, 9.6V battery pack for use with Model PL97K (BU30H) 10-cell, 12V battery pack for use with Model PL99K (RJ23A).

Order Code	Type	Price each
BU34M	9.6V Battery Pack	£38.99
RJ29G	12V Battery Pack	£47.99

2 Hour Charger for Proline™ Cordless Drills

Black & Decker

A 2 hour charger compatible with all Proline™ cordless drills. A red light indicates when the battery is charging and flashes when the battery is ready.

Order Code	Type	Price each
BU31J	2 Hour Charger	£19.99

1 Hour Charger for Proline™ Cordless Drills

Black & Decker

A 1 hour charger compatible with all Proline™ cordless drills. A red light indicates when the battery is charging and a green lamp indicates when the battery is ready. A 'maintenance' charge mode ensures the battery is always fully charged.

Order Code	Type	Price each
BU32K	1 Hour Charger	£39.99

Horizontal Drill Stand

Black & Decker

A rigid high quality horizontal drill stand for use with Black & Decker claw grip drills. Ideal for use when sanding or polishing, or when a flexible drive shaft is to be used and a secure mounting bed for the drill is required. Features a strong cast alloy body having a silver grey finish and a large chemically blackened steel screw with locknut for retaining the drill. Four fixing holes are provided for securing the stand to a workbench.

Order Code	Type	Price each
RJ34M	Horizont Drill Stand	£12.99

Vertical Drill Stand

Black & Decker

The D2037 is a rigid high quality vertical drill stand, for use with Black & Decker claw grip drills, that is perfect for precision drilling. The single solid support column is fitted with a multi-position handle that can be set to any position. The handle operates a spring loaded drill support bracket which can be rotated through 360° and provides automatic retraction. Included on the support bracket is a calibrated depth scale and drill stop for accurate drilling control. The professional quality of this drill stand will ensure a long working life.

Order Code	Type	Price each
RJ33L	C4 Vertical Drill Stand	£32.99

Hobby Shop

Black & Decker

The D2057 Hobby Shop is designed for all hobbyists work such as mitre cutting, grinding and sanding, and comprises a horizontal stand and tilting table. The horizontal stand is suitable for all Black & Decker 43mm DIN nose drills and allows the drill to be rotated through 360°. The tilting table is adjustable for greater accuracy of finish. The stand can be held in a vice, a Black & Decker Workmate™, or secured with screws to a worksurface.

Order Code	Type	Price each
RJ35Q	D2057 Hobby Shop	£12.99

Lathe Attachment

Black & Decker

The D2160 lathe attachment is a high quality unit designed for use with Black & Decker 43mm DIN nosed drills. This lathe is ideal for all wood turning and, with a working length of 650mm and working diameter of 125mm, quite large pieces can be turned. Accuracy of workmanship is aided by the easily adjustable quick-release tool rest and ball bearing tailstock. The horizontal drill stand can be used separately.

Order Code	Type	Price each
RJ36P	G5 D2160 Lathe	£54.99

Machine Vice

Black & Decker

A machine vice that features a quick-release adjustment mechanism and jaw width of 100mm (4in.) with a jaw opening of 100mm (4in.). Suitable for use with the Black & Decker vertical drill stand.

DRILL BITS AND ACCESSORIES

Drill Bits with 2.35mm Shank

A range of high speed drill bits all with 2.35mm shanks designed for use with the older type Reliant, Titan or Mini Mains drills that do not have the new 3-jaw pin chucks. The following sizes are available: 0.8mm (for IC pins), 1mm (for most components), 1.4mm (for presets etc).

Order Code	Type	Price each
BR85G	HS Twist Drill 0.8mm	99p
BR86T	HS Twist Drill 1mm	99p
BR87U	HS Twist Drill 1.4mm	99p

Tungsten Carbide Drills

A range of very high quality solid tungsten carbide drills which offer extended life when drilling pcb's especially fibre-glass. All drills have an 1/8 in. 3.175mm diameter shank approx 24mm long. Overall drill length 38mm. Tungsten carbide drills are not recommended for hand-held use as they snap very easily under sideways pressure. For best results, use a drill stand and run the drill at a slower speed than would be normal for high-speed steel. Available in six sizes 0.6, 0.8, 0.9, 1 and 1.3mm diameter.

Order Code	Type	Price each
FE48C	Tung/carb Drill 0.6	£2.99
FE49D	Tung/carb Drill 0.8	£2.99
FE50E	Tung/carb Drill 0.9	£2.99
FE51F	Tung/carb Drill 1.0	£2.99
FE52G	Tung/carb Drill 1.3	£2.99

Burrs

Two burrs suitable for making shaped holes; and cleaning out holes etc. Both have 2.35mm shanks for use with the Reliant, Titan or Satum drills. Two sizes are available: 1mm dia; 1.4mm dia.

Order Code	Type	Price each
BR65V	Twist Burr 1.0mm	£1.10
BR66W	Twist Burr 1.4mm	£1.10

Tool Sets

Packs of tools with 2.35mm shanks to fit our Reliant, Titan and Mini Mains electric drills. Two are available, one with 20 pieces and one with 37 pieces.

20-Piece

Tools vary, but a typical set comprises four drills, four abrasives, nine burrs of various shapes, one polishing pad, one radial brush and one axial brush.

Order Code	Type	Price each
LH77J	20-Piece Tool Kit	£12.99

37-Piece

Tools vary, but a typical set comprises of drills, abrasives, burrs of various shapes, polishing pads, brushes, axial and radial, mandrels on which fit abrasives, or saws of different sizes, tommy bar and allen key.

Order Code	Type	Price each
LH78K	37-Piece Tool Set	£24.99

Pin Drill

A 55mm long pin drill with a 3-jaw chuck having a capacity up to 1/8 in.

Order Code	Type	Price each
YW66W	Pin Drill	£6.99

Pin Vice Set

A well made pin vice set comprising 6 pin vices, 0.7mm, 1mm, 1.5mm, 2mm, 2.5mm, 3mm; 3 chucks 11mm square, 11mm hex and 11mm round with knurl. Each vice is marked with grooves to indicate the size and these markings are repeated in the box to assist in identification. The set is supplied in a hinged plastic box with a transparent cover.

Order Code	Type	Price each
YP54J	Pin Vice Set	£9.99

1/4 in. Keyless Chuck

A 3-jaw keyless pin chuck for handling shank diameters up to 1/4 in. The shank of the chuck is hexagonal in cross-section, and 6mm across flats by 22mm long. All steel construction with black and chrome finish. Overall diameter 26mm. Overall length 62mm.

Order Code	Type	Price each
RD80B	1/4in Chuck	£2.99

High Speed Metric Drills

A range of miniature high speed steel straight shank twist drills in metric sizes. Ideal for metal and suitable for pcb's.

Order Code	Type	Price each
QY64U	Metric Drill 0.8mm	80p
QY65V	Metric Drill 1mm	75p

Masonry Drills

Tungsten carbide tipped masonry drills with a special flute spiral for fast material removal. $\frac{3}{16}$ and $\frac{1}{4}$ in sizes have straight shanks 85mm long for use with hand or power drills.

Order Code	Type	Price each
FV65V	Masonry Drill 3/16	82p
FV66W	Masonry Drill 1/4	92p

Professional Quality Metric Masonry Drill Set

Black & Decker

A set of 5 superb quality metric masonry drills suitable for use in both rotary and hammer action drills. The precision ground tip is hardened for longer life and is suitable for drilling through brick, concrete and all natural stones. The 5 sizes provided are 4mm, 5mm, 6mm, 8mm and 10mm. All 5 drills are supplied in a plastic hinged storage case.

Order Code	Type	Price each
ZC92A	Metric Masonry Drills	£9.99

Professional Quality HSS Metric Drill Set

Black & Decker

A set of 6 top quality high-speed metric drill bits which offer long-life coupled with fast drilling speeds. They can be used with both hand and power drills, and will penetrate steel, iron, alloys, most other metals, laminates, plastics and wood. Sizes: 2mm, 3mm, 4mm, 5mm, 6mm and 8mm. The drills are supplied in a hinged plastic storage case.

Order Code	Type	Price each
ZC93B	Metric HSS Drills	£9.99

13 piece Imperial HSS Drill Set

High-speed drill bits which are suitable for use with hand or power drills on wood, mild steel, soft non-ferrous metals, plastics, etc. They are supplied in a sturdy metal hinged storage case. The set contains 13 imperial sizes:

$\frac{1}{16}$ in., $\frac{5}{64}$ in., $\frac{3}{32}$ in., $\frac{7}{64}$ in., $\frac{1}{8}$ in., $\frac{9}{64}$ in., $\frac{5}{32}$ in., $\frac{11}{64}$ in., $\frac{3}{16}$ in., $\frac{13}{64}$ in., $\frac{7}{32}$ in., $\frac{15}{64}$ in., $\frac{1}{4}$ in.

Order Code	Type	Price each
FM97F	Imperial HSS Drills	£4.99

19 Piece Metric HSS Drill Set

A nineteen piece HSS drill set, complete with a strong hinged metal box for storing drills. These drills are suitable for use on wood, mild steel, soft non-ferrous metals, plastics, etc. The set contains the following metric sizes: 1mm, 1.5mm, 2mm, 2.5mm, 3mm, 3.5mm, 4mm, 4.5mm, 5mm, 5.5mm, 6mm, 6.5mm, 7mm, 7.5mm, 8mm, 8.5mm, 9mm, 9.5mm, 10mm.

Order Code	Type	Price each
YU68Y A1	19pc Met Drill Set	£8.99

29 Piece Imperial HSS Drill Set

A twenty nine piece HSS drill set, complete with a strong hinged metal box for storing drills. These drills are suitable for use on wood, mild steel, soft non-ferrous metals, plastics, etc. The set contains the following imperial sizes:

$\frac{1}{16}$ in., $\frac{5}{64}$ in., $\frac{3}{32}$ in., $\frac{7}{64}$ in., $\frac{1}{8}$ in., $\frac{9}{64}$ in., $\frac{5}{32}$ in., $\frac{11}{64}$ in., $\frac{3}{16}$ in., $\frac{13}{64}$ in., $\frac{7}{32}$ in., $\frac{15}{64}$ in., $\frac{1}{4}$ in., $\frac{17}{64}$ in., $\frac{9}{32}$ in., $\frac{19}{64}$ in., $\frac{5}{16}$ in., $\frac{21}{64}$ in., $\frac{11}{32}$ in., $\frac{23}{64}$ in., $\frac{3}{8}$ in., $\frac{25}{64}$ in., $\frac{13}{32}$ in., $\frac{27}{64}$ in., $\frac{7}{16}$ in., $\frac{29}{64}$ in., $\frac{15}{32}$ in., $\frac{31}{64}$ in., $\frac{1}{2}$ in.

Order Code	Type	Price each
YU25C B3	29pc Imp Drill Set	£17.99

Power Tool Nibbler

A high quality nibbler that fits any power drill for cutting sheet metals and plastics. The nibbler cuts cleanly without distortion in straight or curved lines and will also cut corrugated sections. For most work a drill speed of 2500 to 3000 rpm is used, but for heavy continuous cuts a slower speed is recommended. It is important that plenty of oil is used on the cutting edges and along the job. This is very important when cutting aluminium. The width of cut is 3mm and the maximum gauge is 1.5mm (16swg) for mild steel and 2mm (14swg) for aluminium etc. Replacement punches and dies are available.

Order Code	Type	Price each
BA25C	Nibbler Attachment	£24.99
BA26D	Spare Die	£4.99
BA27E	Spare Punch	£2.75

Single Speed Jigsaw

Black & Decker

- ★ Powerful 350W motor
- ★ Dust extraction facility
- ★ Blade support roller
- ★ Blade guard
- ★ 45° - 0° - 45° tilting sole-plate
- ★ Smooth, balanced action

A general purpose single speed jigsaw, suitable for wood, metal, plastic, plasterboard, tiles, laminates and other materials when fitted with suitable blades. The blade is driven in a vertical plane by a balanced reciprocating mechanism at a rate of 3200 strokes per minute. Cutting capacity is 50mm in wood, 3mm in steel, 8mm in aluminum and 35mm in plastic. This jigsaw features a blade support roller which helps to reduce blade stress when cutting through thick or hard materials. A transparent, retractable full-depth blade-guard is provided for operator safety. By attaching a vacuum cleaner hose to the rear of the jigsaw, dust can be extracted and collected. An adjustable sole-plate allows angles of up to $\pm 45^\circ$ from vertical to be cut.

Order Code	Type	Price each
XP17T D4	BD531 Jigsaw	£37.99

Variable Speed Jigsaw

Black & Decker

The BD538SE is a rugged, high quality jigsaw that is ideally suited for those more intricate tasks, with a powerful 350W motor that enables you to cut plastics, wood, metal, tiles and plasterboard when fitted with suitable blades. The variable electronic speed facility controls the power and sawing rate from 800 to 3200 strokes per minute, so that even difficult materials cut easily. The scrolling facility control on top of the jigsaw, selected by a switch on the side, allows ornamental tasks to be undertaken, whilst the adjustable, tilting sole plate means that you can make cuts

close to vertical surfaces and you can cut chamfers or mitres with angles of up to $\pm 45^\circ$ from the vertical. The cutting capacity of the jigsaw is such that it will cut through materials such as wood, up to 55mm thick, plastic up to 35mm thick, aluminium up to 8mm thick and steel up to 3mm thick, to give but a few examples. Blade stowage, for spare blades, is provided in the base of the jigsaw. On the rear of the jigsaw, provision is made for the attachment of a vacuum hose to remove the sawdust from the job in hand. This maintains a clean working environment and means less clearing up. The high specification of all moving parts ensures a long working life for the jigsaw.

Order Code	Type	Price each
RJ24B	F3 BD538SE Jigsaw	£64.99

Jigsaw Blades

Black & Decker

Blades suitable for use with Black & Decker jigsaws. Two types are available; medium finish in metal and medium finish in wood, supplied in packs of three.

Order Code	Type	Price each
JU87U	Jig Bls Med Metal	£4.99
JU88V	Jig Bls Med Wood	£3.49

Jigsaw Blade Set

A quality 5-piece set of universal shank jigsaw blades suitable for most makes of jigsaw. The set contains a saw-blade for each of the following requirements: cross-cutting timber; cutting plywood; rip-cutting timber; scroll-cutting timber; cutting metal.

Order Code	Type	Price each
RJ03D	Jigsaw Blade set	£2.99

Orbital Sander

Black & Decker

The BD175 orbital sander is a quality product that is ideal for smoothing and achieving that perfect finish prior to painting or varnishing, making light work of a time consuming task. The sander is equipped with a powerful

135W motor driving the base at a high orbital speed of 10,000 orbits per minute, an action that, coupled with a sheet size of $1\frac{1}{4}$ (93 x 230mm), is ideal for large sanding tasks. Dust extraction is provided in the form of a vacuum spout fitted to the rear of the sander, allowing a vacuum hose to be attached. The sander comes with a high specification of all moving parts thus ensuring a longer working life.

Order Code	Type	Price each
RJ25C	E3 Orbital Sander	£37.99

Cordless Power Screwdriver

Black & Decker

- ★ 2.4V battery pack
- ★ Reversing
- ★ Shaft lock
- ★ Wall mounting
- ★ Supplied with charger
- ★ Supplied with double-ended screwdriver bit

A compact, yet powerful, cordless screwdriver with numerous applications where screws need to be inserted or removed. Shaft rotational speed 130 R.P.M. The screwdriver is easy to use; with one switch that selects the direction of rotation by sliding to the left or right and applies power when pressed. With the switch in the centre 'neutral' position power cannot be applied, thus acting as a safety lock against accidental operation. A shaft lock is provided so that screws can still be driven home if for any reason the battery pack runs flat during a job. Supplied with a double-ended screwdriver bit, suitable for philips and slotted screws; and a wall mounting bracket/charging receptacle. Recharge time is 12 hours.

Order Code	Type	Price each
XP15R	A1 Cordless Driver 9018	£20.99

Cordless Power Screwdriver with Clutch

Black & Decker

- ★ 3.6V battery pack
- ★ Reversing
- ★ Adjustable clutch
- ★ Wall mounting
- ★ Supplied with charger
- ★ Supplied with double-ended screwdriver bit

A compact, yet powerful, cordless screwdriver with numerous applications where screws need to be inserted or removed. Shaft rotational speed 180 R.P.M. The screwdriver is easy to use; with one switch that selects the direction of rotation by sliding to the left or right and applies power when pressed. With the switch in the centre 'neutral'

position power cannot be applied, thus acting as a safety lock against accidental operation. An adjustable clutch is provided so that screws can be tightened by the correct amount. Supplied with a double-ended screwdriver bit, suitable for philips and slotted screws; and a wall mounting bracket/charging receptacle. Recharge time is 12 hours.

Order Code	Type	Price each
XP16S	A1 Cordless Driver 9019	£31.99

Powerdriver Kit

Black & Decker

A handy, rechargeable, cordless power screwdriver, that drives in and removes screws quickly and easily at the press of a button. The rotational speed is 130 rpm in forward and reverse. A locking feature enables the powerdriver to be used as a standard screwdriver. The powerdriver comes with three double function bits, three 'pozidrive' bits (no. 1, 2, 3), three 'philips' bits (no. 1, 2, 3), three slotted (4, 6, 7.2mm), a magnetic bit holder to keep the bits tidy and a kit box. The kit includes a wall-mounting bracket and a charger which takes 12 hours to fully charge the powerdriver.

Order Code	Type	Price each
BU28F	B2 Powerdriver Kit	£31.99

Power Screwdriver Kit

Black & Decker

A compact, powerful rechargeable cordless screwdriver that drives and removes screws quickly and easily at the press of a button. The shaft rotational speed is 180 r.p.m. in forward and reverse - the direction being selected by a single switch - with a six position torque control for a wide variety of screwdriving tasks, from the most delicate screws to the more stubborn. For the exceptionally tough screws the neutral position of the direction switch includes an auto locking feature that enables the screwdriver to be used conventionally, like a standard tool. The screwdriver kit comes complete with three double function bits, three pozidriv bits, three philips bits, three flat bladed bits, a magnetic bit holder, wall mounted battery charger and a tough moulded plastic kit box. The battery charging time is 12 hours.

Order Code	Type	Price each
RJ28F	B2 9019 Powerdriver Kit	£42.99

Screwdriver Bits for Cordless Screwdrivers and Variable Speed Drills

Black & Decker

A set of 10 screwdriver bits, housed in a dial-a-bit storage drum. These bits are suitable for use with Black & Decker cordless screwdrivers and variable speed drills. The set consists for 4 slotted bits, 3 pozidrive, 2 philips bits and 1 magnetic bit holder.

Order Code	Type	Price each
JU86T	10pc Screw Bit Set	£9.99

Socket Set

Black & Decker

A seven piece socket set for use with Black and Decker cordless screwdrivers and variable speed reversing drills. The set consists of six sockets 6, 7, 8, 10, 11, 13mm and an adaptor.

Order Code	Type	Price each
RJ31J	7pc Socket Set	£6.99

SOLDERING TOOLS AND ACCESSORIES

Soldering Station PSU24

Antex

An attractively styled soldering station, powered from 240V AC mains and provides a 24V AC output to power 24V CS and 24V XS irons (see below). This unit provides isolation between the mains supply and soldering iron output, thus providing low voltage safety and very low leakage currents. The unit incorporates a mains on/off switch and a mains fuse. Note: soldering irons must be purchased separately. Included with the unit is a detachable sponge tray and a coil spring iron holder.

Specifications	
Maximum power output:	50W
Input voltage:	240V AC mains
Output voltage:	24V AC
Weight:	0.8kg
Mains cable length:	1.8m
Dimensions:	200 x 110 x 70mm

Order Code	Type	Price each
XM79L C3	Solder Station PSU24	£47.99

Replacement 17W/24V CS Element

A replacement heating element for the 17 watt 24V CS iron.

Order Code	Type	Price each
JR42V	24V 17W CS Element	£5.29

25W 24V XS Iron for PSU24

A 25W precision miniature soldering iron intended for use with the above soldering station PSU24. The double shaft element ensures minimal leakage current whilst retaining good mechanical strength. This iron is designed for use with modern miniature components. Supplied with Bit No. 51. Note: this iron must not under any circumstances be directly connected to 240V AC mains. Fitted with 1.8m of cable. The iron requires a plug for connection to XM79L. Please order JU67X (see Connectors section) if required.

Specification	
Operating voltage:	24V
Power consumption:	25W
Breakdown voltage:	>2,500V
Leakage current:	<1µA
Max. bit temperature:	420°C
Length:	193mm
Weight:	42g

Order Code	Type	Price each
YZ16S	24V 25W XS Iron	£10.49

SAFETY GOGGLES

BS Lens

Safety goggles for use when working with power tools, machinery or in situations where flying debris is a hazard. These safety goggles are manufactured from impact resistant polycarbonate to BS2092/1. The goggles have a comfortable, ventilated soft plastic surround and adjustable elastic head-band. Suitable for protection when drilling, filing, sanding, planing, chipping, spraying, grinding and other hazardous jobs.

Order Code	Type	Price each
YZ68Y	BS Safety Goggles	£4.99

17W 24V CS Iron for PSU24

Antex

A 17W precision miniature soldering iron intended for use with the above soldering station PSU24. The double shaft element ensures minimal leakage current whilst retaining good mechanical strength. This iron is designed for use with modern miniature components. Supplied with Bit No. 1100. Note: this iron must not under any circumstances be directly connected to 240V AC mains. Fitted with 1.8m of cable. The iron requires a plug for connection to XM79L. Please order JU67X (see Connectors section) if required. This iron is also available with a 'bum proof' silicon rubber cable.

Specification	
Operating voltage:	24V
Power consumption:	17W
Breakdown voltage:	>2,500V
Leakage current:	<2µA
Max bit temperature:	390°C
Length:	183mm
Weight:	26g

Order Code	Type	Price each
YZ15R	24V 17W CS Iron	£10.99
BA22Y	17W Iron Silicon Lead	£13.49

Replacement 25W/24V XS Element

A replacement heating element for the 25 watt 24V XS iron.

Order Code	Type	Price each
JR43W	24V 25W XS Element	£5.59

24V Soldering Station U500

Antex

A rugged and neatly styled industrial soldering station featuring polycarbonate case construction for use with the following irons: Antex A545 in-handle adjustable temperature controlled soldering iron, Antex 24V A718, 24V CS or 24V XS fixed temperature soldering irons, Weller 24V TCP irons or any 24V soldering irons up to 50W. The unit is 240V AC 50Hz mains powered and provides a 24V AC output. The unit provides isolation between the mains supply and soldering iron output, thus providing low voltage safety and low leakage

45 Watt 24V Iron A545 & A545F

Antex

An industrial 45 Watt A245 soldering iron with in-handle temperature adjustment for use with Antex U500, Weller PS and other 24V solder stations. Temperature is adjustable over the range 200°C to 450°C. The iron features a polycarbonate body which gives good balance and tip visibility. The element is a long life ceramic thick film unit which incorporates the temperature sensor. The iron is fitted with 1.5m of silicone rubber cable terminated in a 3-pin P631 connector. Two versions are available; with and without fume extraction tube, fume extraction version is indicated by 'F' suffix. Both versions are supplied with a 1106 chrome bit. These irons must not under any circumstances be connected to 240V AC mains.

Specification		
Max power:	45W	
Voltage:	24V	
Leakage current:	5µA max.	
Temperature range:	200°C to 450°C	
Length:	221mm

MAINS SOLDERING IRONS

Beginners Soldering Iron

A robust mains-powered 25W general-purpose soldering iron. The handle is yellow and ribbed for extra grip, and a removable clip is supplied to enable the iron to be safely hung up whilst not being used. If the iron is remaining idle while still hot then the iron MUST be placed in a stand, or hung by its clip, for safety reasons. The bit has a 5mm chisel tip and is held in place by one of the grub screws on the barrel. A replacement bit is available separately. The element cannot be changed.

17W Miniature Soldering Iron Type CS

A 17W precision miniature soldering iron featuring a double shaft. An inner shaft of ceramic provides a very low leakage current of <math><2\mu\text{A}</math>, and has an outer stainless steel sleeve for strength. It is intended for use with modern miniature components. The iron comes fitted with a Bit No. 1100, but many alternative bits are available. 240V AC mains operated. Fitted with 1.8m of mains lead.

Specification

Power consumption:	17W
Breakdown voltage:	>2,500V
Leakage current:	<math><2\mu\text{A}</math>
Max bit temperature:	390°C
Length:	183mm
Weight:	26g

Soldering Iron Kit SK5

Antex

An attractive presentation kit that makes the perfect present for the beginner. A superb CS soldering iron and a Stand ST4 neatly packaged with full instructions on how to use the iron as well as some general hints on soldering.

Order Code	Type	Price each
FY68Y	CS Kit SK5	£14.29

25 Watt Soldering Iron Type XS

A strongly recommended 25W 240V mains soldering iron ideal for soldering transistors and integrated circuits since the leakage current is <math><1\mu\text{A}</math>. It has a shatterproof handle and detachable hook. The iron is designed to use the same bits as the X25 model which it replaces. The iron comes fitted with a Bit No. 51. 240V AC mains operated, with 1.8 metres of mains lead attached.

Specification:

Power consumption:	25 watts
Breakdown voltage:	>2,500V
Leakage current:	<math><1\mu\text{A}</math>
Max bit temperature:	420°C

TEMPERATURE CONTROLLED IRONS

50W Temperature Controlled Iron Type TCS240

A 50W 240V AC mains operated Temperature Controlled Soldering Iron with the temperature controller built into the handle of the iron. A Thermocouple near the tip of the heating element provides feedback for temperature control within the range 200 to 450°C, with an accuracy of ±1%. The temperature may be selected by using a screwdriver inserted into an adjuster in the body of the iron. The iron comes fitted with a Bit No 1100, but many alternative bits are available. Fitted with 1.2 metres of mains lead. Bits for the CS iron will fit this iron.

Specification	
Power consumption:	50W
Voltage to Element:	240V AC
Warm up time:	60 seconds to 450°C

Control:	Analogue Proportional
Temperature range:	200 - 450°C
Control accuracy:	±1% typical
Length:	222mm
Weight:	50gm

Order Code	Type	Price each

Soldering Iron Kit TCS

Antex

A quality soldering kit that is ideal for the serious hobbyist and offering excellent value for money. The kit includes a temperature controlled TCS240 soldering iron complete with a moulded mains plug fitted with a 3A fuse, a ST5 heavy duty stand with TCS bezel, a desolder pump and 2m of fluxed solder wire.

Order Code	Type	Price each
BA14Q	A1 TCS Solder Kit	£40.79

Solder Station TCSU-1

A very robust soldering unit with a choice of 30W (CSTC) or 40W (XSTC) temperature controlled irons. Temperature range is controllable from 70°C to 435°C with an accuracy of 2%, using a slider control. Electronically controlled zero voltage switching of the heating element is employed to avoid radiated fields and transient pulses, and a thermocouple near the tip of the iron provides for feedback control. The iron, which must be ordered separately, plugs into the controller's 24V output via a 5-pin DIN plug and socket and 1.2m of silicone covered 5-core cable, completely isolating the user from the mains voltage. The TCSU-1 has the additional provision of a separate earthing jack, into which a cable can be plugged terminating in a crocodile clip, which when attached to the work nullifies any static charge problems developing between the iron and the work. Provided with a separate sponge tray. The control unit is fitted with 1.8 metres of mains lead.

Specification	
Power consumption:	60 watts max
Voltage output:	24 to 26V AC
Dimensions:	145 x 104 x 142mm
Weight:	1.6kg (3½lbs)

Order Code	Type	Price each
XG55K	C4 Solder Station TCSU1	£89.99

30W Iron CSTC for TCSU-1

A 30 watt iron for use with the TCSU-1 controller. The iron is fitted with 1.2 metres of 5-core cable and is supplied with three bits.

Specification	
Max power:	30 watts
Current leakage:	Negligible
Length:	183mm
Standard bit:	102
Weight:	23gm

Solder Station TCSU-D2

Antex

An elegantly designed, moderately priced, 240V AC temperature controlled soldering unit giving an accurate and continuous display of soldering tip temperature. The unit is built around a unique ULA; custom-built by Ferranti. Temperature range is adjustable by means of setting the temperature required in degrees centigrade on the display. The control unit is then allowed to 'run' whereupon it will maintain the soldering tip at that temperature. The range is from ambient to 450°C, with an accuracy of ±5°C, handled by a 50W soldering iron type XSD. Other features include zero crossing switching control and a detachable sponge tray. The iron is fitted with 1.2 metres of 5-core cable which plugs into the control unit's 5-pin DIN socket.

Specification

Control unit:
 Power consumption: 60 watts
 Output voltage: 24 to 26V AC
 Dimensions: 200 x 110 x 70mm
 Weight: 1kg
 Iron:
 Power: 50 watts max
 Current leakage: Negligible

Replacement Iron for TCSU-D2

A replacement 50 watt iron type XSD for use with the TCSU-D2 controller. The iron is fitted with a bit No. 1100, plus 1.2 metres of 5-core cable terminated in a 5-pin DIN plug.

Order Code	Type	Price each
FT12N	50 Watt Iron XSD	£28.59

Replacement Element for Iron XSD

A replacement 50 watt heating element for the XSD iron used with the TCSU-D2 controller.

Order Code	Type	Price each
FT29G	XSD Element	£15.79

TCSU-D2 Sponge Tray

A spare sponge tray for the TCSU-D2 controller unit.

Order Code	Type	Price each
FT11M	Sponge Tray TCSUD2	£1.59

TCSU-D2 Sponge

A replacement sponge for the TCSU-D2 sponge tray.

Order Code	Type	Price each
FT08J	Sponge TCSUD2	69p

Temperature Controlled Solder Station U100

A rugged and neatly styled industrial soldering station featuring polycarbonate case construction for use with the Antex A245 soldering iron. The unit is 240V AC 50Hz mains powered and provides a 24V output. The temperature of the iron is selected by means of a rotary potentiometer, temperature is controlled over the range 50°C to 450°C using state of the art electronics linked to a precision sensor housed in the iron. An LED indicator lights when power is being delivered to the iron. The proportional temperature control system only switches during the zero-crossing point of the mains cycle, therefore reducing EMI and allowing the unit to be used with sensitive components. The unit provides isolation between the mains supply and soldering iron output, thus providing low voltage safety and low leakage currents. The unit incorporates a mains on/off switch and a mains fuse. Included with the unit is a detachable sponge tray and coil spring iron holder. The iron holder bezel will accept irons fitted with fume extraction tubes. Note: soldering iron must be purchased separately.

Specification

Maximum power output: 50W
 Input voltage: 240V AC 50Hz mains
 Output voltage: 24V
 Temperature range: 50°C to 450°C
 Accuracy: ±5°C
 Weight: 1.5Kg
 Mains cable length: 1.5m
 Dimensions: 200 x 110 x 70mm

Order Code	Type	Price each
XP06G B3	Solder Station U100	£86.99

Temperature Controlled Solder Station with Digital Temperature Readout U200

Antex

A rugged and neatly styled industrial soldering station featuring polycarbonate case construction for use with the Antex A245 soldering iron. The unit is 240V AC 50Hz mains powered and provides a 24V output. The temperature of the iron is selected by means of a rotary potentiometer and a set/run switch, the actual temperature of the bit is displayed on a 3-digit digital LED display with a 1°C resolution. Temperature is controlled over the range 50°C to 450°C using state of the art electronics linked to a precision sensor housed in the iron. The proportional temperature control system only switches during the zero-crossing point of the mains cycle, therefore reducing EMI and allowing the unit to be used with sensitive components. The unit provides isolation between the mains supply and soldering iron output, thus providing low voltage safety and low leakage currents. The unit incorporates a mains on/off switch and a mains fuse. Included with the unit is a detachable sponge tray and coil spring iron holder. The iron holder bezel will accept irons fitted with fume extraction tubes. Note: soldering iron must be purchased separately.

Specification

Maximum power output: 50W
 Input voltage: 240V AC 50Hz mains
 Output voltage: 24V
 Temperature range: 50°C to 450°C
 Accuracy: ±5°C
 Weight: 1.5Kg
 Mains cable length: 1.5m

45 Watt Iron A245 & A245F

An industrial 45 Watt A245 soldering iron for use with Antex U100, U200; Weller EC2100/2000; WECP and EC2002 solder stations. The iron features a polycarbonate body which gives good balance and tip visibility. The element is a long life ceramic thick film unit which incorporates the temperature sensor. The iron is fitted with 1.2m of silicone rubber cable terminated in a locking 5-pin bayonet DIN plug. Two versions are available; with and without fume extraction tube, fume extraction version is indicated by 'F' suffix. Both versions are supplied with a 1106 chrome bit.

Specification

Max power:	45W
Voltage:	24V
Leakage current:	1.5µA max.
Temperature range:	50°C to 450°C
Length:	221mm
Weight	
without fume extraction:	47g
with fume extraction:	67g
Standard bit:	1106 chrome

Order Code	Type	Price each
YZ80B	45W Ind Iron A245	£37.49
YZ81C	45W Ind Iron A245F	£47.99

Replacement Element for Iron A245

A replacement 45W element for the A245 soldering iron.

Order Code	Type	Price each
YZ76H	A245 Element	£17.49

Fume Extraction Kit

Antex

A fume extraction upgrade kit suitable for the Antex series 'A' industrial soldering irons with sufficient parts to upgrade 10 irons. The kit includes: 10 stainless steel tubes, 20m silicone rubber tubing, 5 cleaning brushes and 50 ties (to tie tubing to cable). A single iron kit is also available, order code DK73Q.

Order Code	Type	Price each
KR26D	81 Fume Extraction Kit	£79.99
DK73Q	Single Fume Ext Kit	£8.75

Fax your orders to:

Replacement Bits

A range of replacement bits for the indicated soldering irons. These bits are all iron clad to give long life and they must therefore not be filed or they will quickly disintegrate. They should only be cleaned by wiping with a damp sponge when they are hot. The following types are available:

Type No.	Tip Size	For Iron	
102	2.3mm	C, CSTC, M	
103	4mm	C, CSTC, M	
104	4.7mm	C, CSTC, M	
106	1mm	C, CSTC, M	
820	2.3mm	C, M	
821	3mm	C, M	
822	4.7mm	C, M	
202	2.3mm*	C, CSTC, M	
302	2.3mm	C, CSTC, M	
10	0.5mm	C, CSTC, M	
1100	2.3mm	CS, CX, TCS, XSD, XSTC, A	
1101	3mm	CS, CX, TCS, XSD, XSTC, A

Surface Mount Technology Desoldering Bit Set

A range of special SMT desoldering bits designed for use with A series irons but can also be used with CS, TCS, XSTC and XSD series irons. The set comprises of 12 bits with profiles engineered to fit the majority of SMT components. Desoldering of SMT components requires sufficient localised heat to melt the solder, whilst not overheating adjacent components and tracks. It is strongly advised that a temperature controlled iron is used so that the lowest possible temperature consistent with efficient desoldering is used, thus minimising the possibility of damage to components or PCB. A spade bit is included which can be dressed (filed) to suit any component that is not catered for in the standard range. By using either of the miniature 0.1mm or 0.5mm bits, SMT components can be resoldered after a replacement device has been positioned. The 12 bits are stored in a neat tray, which is supplied with the set.

Order Code	Type	Price each
YZ82D	SMT Desolder Set	£43.99

FOR TOP QUALITY & VALUE!

PORTABLE AND GAS POWERED SOLDERING TOOLS

Portable Battery Powered Soldering Iron

Ewan James

A novel soldering iron which is powered by either 4 alkaline C cells or two Ni-Cd C cells. The combined low voltage element/bit retracts when not in use which serves both as a safety feature and also protects the element/bit from damage. A conveniently placed push-to-heat button operates the iron, working temperature is reached in approximately 10 seconds. A charging socket is provided so that Ni-Cd cells may be charged in situ from an AC or DC adaptor (suitable type XX09K). Charging time is 12 to 16 hours. Important: Under no circumstances must any attempt be made to recharge non-rechargeable cells. Supplied with one element/bit and solder. Batteries not included. Spare element/bits are available separately.

Order Code	Type	Price each
YZ42V	Portable Iron	£4.99
JU28F	Spare Tip	£2.25

Replacement Parts for Rechargeable Iron

Replacement bits and spare sponges are available for use with rechargeable iron WY05F we sold up to mid-1992.

Order Code	Type	Price each
FP32K	Bit for Rechgbl Iron	£3.75
FP33L	Sponge fr Chgbl Iron	99p

Gas Soldering Iron Flame Master

An extremely useful soldering iron and gas torch for engineers and hobbyists alike, this gas torch is butane gas (lighter fuel) powered and is therefore extremely portable. Ideal for field service engineers where power points may not always be close to hand. The soldering head contains a platinum catalyst which heats the bit without a flame! (Gas will burn when first ignited, but flame will extinguish when catalyst is up to temperature). The torch head may be used for engineering, jewellery and model making work. The flame is adjustable and reaches a temperature of 1300°C (2370°F). Refilling is achieved using standard gas lighter fuel available from newsagents and tobacconists.

Overall dimensions: 230mm x 19mm dia (soldering head fitted).

Note: gas torch is supplied unfilled. Spare soldering iron bits and catalytic converters are available, see below.

WARNING: extreme care must be exercised when using this gas torch due to the very high temperature of the gas flame.

Order Code	Type	Price each
YT72P	Gas Soldering Iron	£12.99

01702 554161

Gas Torch Combination Kit Flame Master

A combination kit which incorporates a gas torch and includes the following accessories: pencil flame head, hot blower head, flat flame head, soldering head, four bits, hot knife, soldering iron sponge, reel of solder and storage box. This kit is ideal for engineers and hobbyists alike. The gas torch is butane gas (lighter fuel) powered and is therefore extremely portable. Ideal for field service engineers where power points may not always be close to hand. The soldering head contains a platinum catalyst which heats the bit without

a flame! (gas will burn when first ignited, but flame will extinguish when catalyst is up to temperature). The torch head may be used for engineering, jewellery and model making work. The flame is adjustable and reaches a temperature of 1300°C (2370°F).

Note: gas torch is supplied unfilled. Refilling is achieved using standard gas lighter fuel available from newsagents and tobacconists.

Overall dimensions of gas torch (accessories not fitted): 168mm x 19mm dia. Accessories and spare soldering iron bits are available, see below.

WARNING: extreme care must be exercised when using this gas torch due to the very high temperature of the gas flame.

Order Code	Type	Price each
YT73Q	A1 Gas Torch Kit	£24.99

Glue Gun Attachment

A hot glue attachment (complete with sticks) and replacement glue sticks supplied in packs of 18 which fit YT72P/YT73Q.

Order Code	Type	Price each
JU33L	Glue Gun + Glue Stks	£5.99
JU34M	18 Glue Sticks	£1.39

Replacement Parts for Gas Soldering Iron and Combination Gas Torch Kit

Soldering iron bit, pointed tip.

Gas Soldering Iron Antex

A compact, pocket sized, butane gas (lighter fuel) soldering iron for use in those areas of soldering where mains power is unavailable or trailing leads are a hindrance. The strong nylon casing will hold sufficient liquid butane for one hours' continuous use. An adjustable fuel regulator controls the tip temperature up to a maximum of 400°C. The iron is supplied with a 1mm soldering tip fitted as standard and a protective cap, which has an integral flint lighter and a pocket clip. Supplied with instructions. A range of spare tips are available separately.

Specifications

Max. tip temperature:	400°C
Max. torch temperature:	1300°C
Max. operating time:	1 hour
Flint life:	900 cycles
Length:	188mm
Weight:	52g

Order Code	Type	Price each
RD51F	Compact Gas Iron	£19.99

Gas Soldering Iron Kit Antex

A compact, handy, pocket sized kit, containing our butane gas (lighter fuel) soldering iron (RD51F) with the 1mm tip, a tube of 1mm diameter 60/40 resin cored solder, a cleaning pad, a hot flame tip, a hot knife tip, a hot air tip, and spring clip that fits into two holes as an iron rest when the iron is being used. The kit is supplied in a plastic case 205 x 103 x 38mm in size and includes instructions. A range of spare tips are available separately.

Order Code	Type	Price each
AJ97F	Gas Iron Kit	£32.99

RD59P	Shield	£6.49

Soldering Aid Set

A set of three useful soldering aids ideal for printed circuit board work. Each tool has two different ends, and the six available in this set are a reamer, a hook, a knife, a scraper, a brush, and a fork.

Order Code	Type	Price each
FG08J	Soldering Aid Set	£6.49

Tip Tinner/Cleaner TTC 1

The TTC 1 is a small block of electronics-grade solder powder and chemicals compacted into the shape of a thick disc. It is packaged in a metal container complete with lid and self adhesive pad on the underside so that it can be fixed to any convenient surface. A single wipe of the iron across the TTC 1 block at once cleans, wets and tins the tip.

The composition will remove the stubborn tin/iron intermetallic layer that forms on iron plated tips and resists resin based fluxes. The Tip/Tinner Cleaner does all the work of sponges or wipes and acid-cored solder wire which, although often used for tinning, does not really belong in an electronics assembly environment. Net Weight: 15gm

Order Code	Type	Price each
JG06G	Tip Tinner Cleaner	£2.99

Heat Shunt

A pair of locking metal tweezers which when clipped to a transistor lead for example, will prevent the heat of soldering reaching the device.

Order Code	Type	Price each
FR10L	Heat Sink Tweezers	99p

DESOLDERING TOOLS

Low Cost

Powerful desoldering tool quickly removes molten solder from joint. Spring loaded piston is closed while solder is being melted, then released by a simple push button. The cylinder is made of aluminium for increased resistance to wear. The nozzle is easily removed for cleaning or replacement. Plunger has a plastic shroud so that the knob cannot spring up into the operators face or eyes.

Order Code	Type	Price each
FR26D	Desolder Tool	£3.99

Nozzles

Replacement nozzles for the desolder tool above. The tool is supplied fitted with teflon nozzle type T1. An antistatic version T2 is also available.

Order Code	Type	Price each
UJ00A	Tip T1	60p
UJ01B	Tip T2	70p

Desoldering Pumps

Antex

A range of three desoldering pumps in various sizes and construction. To operate, the plunger is pushed down until it locks, the pump tip is then placed over the molten solder and the button pressed to release the plunger, the molten solder is now sucked up into the body of the pump. The 'Mini' has a glass filled nylon body with a white Teflon tip and the 'Pro-Desold' has the same construction but with a larger capacity and a black conductive Teflon tip. The 'Conductive' version has a nickel-plated aluminium body with a black conductive Teflon tip. This results in a low 'top-to-tip' resistance. Replacement tips are available for each version.

	Mini	Pro-Desold	Conductive
Overall length:	198mm	210mm	195mm
External diameter:	22mm	26mm	20mm
Suction volume:	9.0cc	14.0cc	7.7cc
'Top-to-tip' resistance:	Infinite	Infinite	10Ω
Spare tip:	BA16S	BA18U	BA20W

Order Code	Type	Price each
BA15R	Mini Pump	£5.99
BA16S	Mini Tip	£1.19
BA17T	Pro-Desold Pump	£9.99
BA18U	Pro-Desold Tip	£1.49
BA19V	Conductive Pump	£11.99
BA20W	Conductive Tip	£1.60

Desolder Braid

A flux-impregnated copper braid approx. 1.5m long which speedily removes unwanted solder from a joint. Place braid on defective joint and apply soldering iron for about one second. Then remove braid and iron together and joint will be left clean. Braid width: 2mm.

Order Code	Type	Price each
FR29G	Solda-Mop	99p

SOLDER Standard Solder

Adapto

A 60% tin, 40% lead alloy solder containing a non-corrosive flux. We recommend this solder for use with the iron-clad and nickel-clad bits supplied with our soldering irons and for use with all the electronic components shown in this catalogue. Melting temperature 188°C. Suggested bit temperature 248°C. Solder is available in 18 swg (1.22mm) and 22 swg (0.71mm). 18 swg is sold in packs of 5m and on 1/2kg reels (approx 61m). 22 swg is sold in packs of 10m and on 1/2kg reels (approx 178m).

Order Code	Type	Price each
FV53H	5 Mtr Pk 18swg Sldr	99p
FR21X	Solder 22swg 10m pk	99p
YJ92A	18 swg Solder Reel	£8.99
FY70M	22 swg Solder Reel	£9.99

Silver Solder

A specially designed solder containing 10% silver that will join copper, brass, nickel more cleanly and with a lower resistance than standard solder, to give an improved joint for higher quality hi-fi equipment. The melting point of this solder is 420°C to 450°C, therefore a high temperature soldering iron will be required, to obtain satisfactory results. Solder is 18 s.w.g., sold in 50cm lengths.

Order Code	Type	Price each
GW45Y	Silver Solder	99p

Aluminium Solder

Multicore

A specially designed solder that will joint aluminium, brass, copper, nickel, stainless steel and tin-plate more easily than standard solder. This solder is 18% tin, 80% lead and 2% silver alloy. A higher temperature is required to melt this solder than ordinary solder so it is unlikely that a miniature iron will be satisfactory unless the volume of the parts to be jointed is very small. The solder contains four cores of non-corrosive flux. Melting temperature 270°C. Solder is 16 s.w.g. (1.63mm) Sold only in packs of 1m.

Order Code	Type	Price each
FY71N	Aluminium Solder	£1.49

Solder Pots

Antex

Two sizes of solder pots are available, the 'Major' and 'Minor'. Both models operate at a stabilised temperature of 310°C (typically the melting point of solders used in electronics is around 185°C). It is recommended that 60/40 solder pellets are used, (solder containing flux MUST NOT be used), and it will normally take up to 30 minutes for the solder to melt and the temperature to stabilise. The solder pots are of sturdy construction with a wide base giving excellent stability on the work bench, although holes are provided in the base for those installations where permanent fixing is required. The 'Major' has a removable dross tray which retains excess dross when cleaning the solder surface. The 'Minor' has a smaller capacity and lower power consumption and no dross tray. The pots are supplied with 1.5m of mains lead.

Specification

	Major	Minor
Input voltage:	220/240V AC	
Power consumption:	60W	45W
Nominal stabilised running temperature:	310°C	
Full solder capacity:	17cm ³	9.5cm ³
Normal solder depth:	17mm	14mm
Weight without solder:	960g	770g

Order Code	Type	Price each
KR27E	A2 Major Solder Pot	£69.99
KR28F	A2 Minor Solder Pot	£59.99

High Purity Pellets and Bar Solder

Warton

Two types of non-fluxed solder, 60/40 and 63/37, available in pellet and/or bar form. Can be used with the Solder Pots KR27E and KR28F. Pellets are supplied per kilo and the bars are supplied in nominal kilo bars.

Order Code	Type	Price each
KP57M	A2 Pellet Solder 63/37	£9.99
AY10B	A2 Bar Solder 63/37	£8.99

General Purpose Silver Brazing Alloy Silver-Flo 55

A general purpose, low temperature, silver brazing alloy that is free from cadmium (cadmium content not greater than 0.025%). Applications include model making, model railways, precision engineering, fluid carrying vessels & pipes and joining of metal objects where higher strength and operation temperature is required than can be achieved with conventional soft soldering. The alloy consists of 55% silver, 21% copper, 22% zinc and 2% tin. Melting temperature range is 630 to 600°C and is therefore suitable for use with the Mini Gas Torch (JL98G) and many other gas torches that can achieve sufficiently high temperature. Full instructions and details of safety precautions supplied. Supplied in 600mm x 1.5mm diameter rods. This brazing alloy requires the use of a special flux (JX39N).

Order Code	Type	Price each
ZA19V	Brazing Rod	£3.75

Silver Brazing Alloy 'Easy-Flo' Flux

A special flux powder for use with Silver-Flow 55 and other silver brazing alloys. Suitable for use at temperatures up to 800°C. The flux powder should be mixed with water to a creamy consistency and applied to the metals to be joined. Metals should be clean and degreased before applying flux. Mix only sufficient flux for the joint(s) to be undertaken. Replace lid to keep contents dry and in good condition. The flux powder is harmful if swallowed and irritating to eyes and skin, therefore wear suitable gloves and goggles. Avoid inhalation of dust. Keep out of reach of children. Full instructions and details of safety precautions supplied. Flux powder is supplied in 25g tubs.

Order Code	Type	Price each
JX39N	Brazing Flux	£1.10

Micro Gas Torch

Flame Master

An extremely compact, butane (gas lighter fuel) powered gas flame torch. Ideal for engineering, jewellery and model making work. The flame is adjustable and reaches a temperature of 1300°C (2370°F). A full charge of gas will last 40 minutes. Refilling is achieved using standard gas lighter fuel available from newsagents and tobacconists. Overall dimensions: 184mm x 15mm dia. Note: Gas torch is supplied unfilled.

WARNING: extreme care must be exercised when using this gas torch due to the very high temperature of the gas flame.

Order Code	Type	Price each
JL97F	Micro Gas Torch	£6.49

Tools for Mini Gas Torch

A range of accessory tools which fit onto the Gas Torches. The following accessory tools are available: A heat director tube and reflector attachment, a hot air blower, and a soldering iron attachment which fit JL98G.

Order Code	Type	Price each
JU30H	Heat Director	£2.99
JU31J	Hot Air Blower	£4.99
JU32K	Soldering Iron	£6.99

HEATING TOOLS

Heat Gun Black & Decker

A very useful mains powered 240V 1600W heat gun for paint stripping, thawing pipes, shrink-wrapping, welding plastics (in a very well ventilated area) etc. The heat gun has two heat settings, 300°C and 560°C and extreme care MUST be exercised when using the heat gun to avoid personal injury. The air flow of either 270 l/min. or 450 l/min. ensures faster paint stripping using the push-and-pull scrapers supplied with the heat gun. The heat gun is fitted with a two way handle for either conventional pistol grip, or in-line grip for one handed use, which provides added safety, particularly during external use.

Order Code	Type	Price each
BU36P	D2 Heat Gun	£32.99

Pipemaster Antex

A unique product from Antex which makes central heating fitting quick and easy. Allows Yorkshire-type capillary fittings and end feed capillary fittings to be soldered without the use of a blow-torch. This is particularly useful when working in roof spaces, underfloor, or close to decorated surfaces, carpets etc. Simply slide the copper tube into the fitting, place Pipemaster jaws around edge of fitting and squeeze handles. Joint is complete in 10 to 40 seconds. The tool requires about 5 minutes to reach working temperature and care should be taken as the heads reach a temperature of 520°C.

For integral solder ring fittings, joint is complete when molten solder appears at outer edge of fitting. For end feed fittings, close heads around pipe beside fitting and apply solder. When solder flows it will be drawn into the fitting and the joint is made.

The tool is supplied with heads suitable for 15mm pipe. Heads for 22mm pipe are also available. Complete with approx. 1.8m of mains lead. A safety stand is also included. Manufactured in rugged yellow polycarbonate. Overall length 285mm. Supplied with full instructions for use

Order Code	Type	Price each
YP01B	B3 Pipemaster 240V	£32.49

Replacement Parts for Pipemaster

Replacement heads in 8mm, 10mm, 15mm and 22mm, and replacement elements for the Pipemaster are available. They are supplied in pairs (each tool has a pair of elements and a pair of heads).

Order Code	Type	Price each
JG16S	Pipemastr 8mm Heads	£7.49
JG17T	Pipemastr 10mm Heads	£7.49
FP36P	Pipemastr 15mm Heads	£7.49
FP37S	Pipemastr 22mm Heads	£8.49
FP38R	Pipemastr 240V Element	£15.99

WELDING EQUIPMENT

MIG Welder Clarke

A high quality rugged 'metal inert gas' (MIG) arc welder designed for the hobbyist, professional and light industrial user who needs the advantages of standard mig welding that are offered by this welder. The welder is used with a mild steel wire and a CO₂ gas bottle, strapped to the rear, to produce its own gas shroud as it burns, to weld steel. It can be used for other metals with only a change of wire and gas, if necessary. Stowage for a spare bottle is provided. The wire is retained inside the machine and automatically fed out by a feeder unit through the torch nozzle: the rate of feed being controlled by a 'min/max' switch and wire tension controlled by a 0 to

10 position variable rotary control. Two switches provide four power settings for optimum welding power control at the torch. The torch incorporates a control 'switch' for full 'on/off' control. Designed to be simple to use, yet capable of producing professional results, this machine is ideal for welding thin sheet metal-work and car body repairs. Supplied with CO₂ gas bottle, welding torch, gas regulator, mild steel welding wire, earth clamp, face mask and full operating instructions.

Specification	
Input voltage:	240V AC 50Hz
Open-circuit output voltage:	21 to 28V
Output current	
Max:	90A
60%:	30A
Min:	25A
Maximum metal thickness:	3 to 4mm mild steel
Wire size:	0.6/0.8mm
Wire spool capacity:	Mini or 5kg
Max wire feed speed:	14m/min
Dimensions:	430 x 370 x 250mm
Weight:	23.0kg

RJ47B	H49 90A MIG Welder	£179.99

Welding Gases Clarke

A selection of gases, for use with MIG welder RJ47B, are available. Supplied in standard bottles, the gases are CO₂ for mild steel, Argon for aluminium/stainless steel, and a CO₂ Argon Mix for thin sheet metal/mild steel.

Order Code	Type	Price each
RJ48C	H CO2 Welding Gas	£9.99
RJ49D	H Argon Welding Gas	£9.99
RJ50E	H3 CO2/Argon Weld Gas	£9.99

Mig Welder Clarke

The NO GAS MIG 85EN is a high quality rugged 'metal inert gas' (MIG) welder for professionals and DIY'ers alike offering the advantages of standard mig welding but without the need for a CO₂ gas bottle. The welder is used with a special flux-cored mild steel wire that produces its own gas shroud as it burns allowing these machines to weld steel without the need for additional gas, thus simplifying their use. The wire is retained inside the machine and automatically fed out by a feeder unit through the torch nozzle: the rate of feed being controlled by a 'min/max' switch. A second

Continued from previous page.

'min/max' switch provides two power settings at the torch, to give increased welding power control. The torch incorporates an 'on/off' control 'switch'. Designed solely for use without gas and simple to use, yet capable of producing professional results, this machine is ideal for welding thin sheet metal-work and car body repairs. Supplied with welding torch, flux-cored mild steel wire, earth clamp, face mask and full operating instructions.

Welding Wire

Clarke

Supplied on mini-spools, welding wire is available for the MIG welders RJ46A (which uses flux-cored wire) and RJ47B, in a selection of types and sizes.

Description	Order Code
Mild steel wire spool, 0.6mm diam.	RJ51F
Mild steel wire spool, 0.8mm diam.	RJ52G
Mild steel wire spool, 0.9mm diam. flux-cored	RJ53H
Stainless steel wire spool, 0.8mm diam.	RJ54J
Aluminium wire spool, 0.8mm diam.	RJ55K

Order Code	Type	Price each
RJ51F	M/S Weld Wire 0.6mm	£5.49
RJ52G	M/S Weld Wire 0.8mm	£5.49
RJ53H	M/S W/W 0.9mm Fluxed	£8.99
RJ54J	S/S Weld Wire 0.8mm	£14.99
RJ55K	Alum Weld Wire 0.8mm	£14.99

Welding Tips

Clarke

Supplied in packs of five, a selection of welding tips is available for the MIG welders RJ46A and RJ47B. Three sizes are available: 0.6mm, 0.8mm, and 1.0mm.

Order Code	Type	Price each
RJ57M	0.6mm Welding Tip	£3.49
RJ26D	0.8mm Welding Tip	£3.49
RJ58N	1.0mm Welding Tip	£3.49

CAR BATTERY BOOSTER/CHARGER

A high quality, powerful battery charger that besides supplying a useful 15A charge is also capable of providing a short boost charge or even starting a car. This compact charger will prove a useful tool to anyone who uses machinery, such as the building and farming industries, or the motor trade. It will also prove valuable to most car owners in winter when engines and batteries are cold and indifferent towards starting, because it can supply a healthy 12V 100A boost for up to 5 seconds. The charger is housed in a robust plastic case with a built-in handle and can be wall mounted. Two sturdy leads, terminating in heavy duty crocodile clips, carry the charge to the battery. Built-in overload protection is provided and reset with a push switch. Overall dimensions: 130 x 173 x 240mm. Weight: 4.0kg.

GREAT VALUE!
£39.99
RJ600

Welding Torch Shroud

Clarke

A spare shroud for use with the torches supplied with MIG welders RJ46A and RJ47B. Supplied in packs of two.

Order Code	Type	Price each
RJ56L	Welding Torch Shroud	£4.49

Glass for Welding Mask

Clarke

A spare darkened safety glass for the welding mask supplied with MIG welders RJ46A and RJ47B.

Order Code	Type	Price each
RJ59P	Weld Mask Dark Glass	£3.99

SERVICE AIDS AND ADHESIVES

Magnetic Pick-up

A magnetic extendable tool for capturing small metallic objects that are in inaccessible places. The tool has a telescopic rod which is attached to a plastic screwdriver handle. The rod extends from 167mm to 537mm with a small magnet fixed to the end of the rod. Care must be exercised when working round electrical equipment as the telescopic rod is conductive.

Order Code	Type	Price each
JM89W	Magnetic Pick Up	£3.99

Motorist's First-Aid Kit

A first-aid kit especially for the motorist, that is housed in a green polypropylene carry case. All dressings are packed in a sterile wrapping.

Contents

Sterile wound dressing:	1
Triangular bandage:	1
Tube antiseptic cream:	1
Alcohol-free wipes:	4
8in. waterproof dressing strip:	1
2.5cm cotton bandage:	1
5cm cotton bandage:	1
15gm cotton wool:	1
Assorted sterile plasters:	6
Assorted safety pins:	6
Pair of 4in. scissors:	1
Vehicle label:	1
Guidance card:	1
Dimensions:	230 x 195 x 50mm
Weight:	406g

Order Code	Type	Price each
DH83E	Car First-Aid Kit	£14.99

60W Magnifier Lamp

A magnifying lamp which is a practical and functional aid for hobbyists, and whenever magnification and extra light are needed for viewing small objects. It comes with a 60W incandescent bulb and a 1.75x magnification lens. It has an impact resistant, coloured plastic shade and a well-balanced, easily adjustable angle-poise arm. Provided with clamp for table fixing. Dimensions: arm length 80cm; shade 22 x 8cm. Colour: grey.

Order Code	Type	Price each
RJ4CT	60W Magnifier Grey	£49.99

Desk Lamp

Reading/work lamp suitable for use with incandescent bulbs. Ideal for desk-work, at the drawing board and work bench, anywhere, in fact, where a substantial light is required. The shade has a functionally correct design and distributes the light evenly over a large area. The lamp is supported on a jointed, angle-poise arm with sprung suspension and table clamp, to position the light precisely where needed. Bulb not included. Dimensions: arm length 75cm; shade diameter 18cm.

Order Code	Type	Price each
RJ41U	60W Lamp Round	£21.99

11W Fluorescent Lamp

A good basic angle-poise lamp at a reasonable price. Its parallel controlled, spring suspended arm makes it very simple to adjust, to provide the desired angle of light. The required degree of arm length is easily set, using the arm adjustment knobs. Uses a single, 11W compact fluorescent tube. Supplied with table edge fixing clamp. Dimensions: overall length including shade: 108cm. Colour: black.

Order Code	Type	Price each
RJ42V	11W Lamp Black	£49.99
AP15R	Spare 11W Lamp	£5.99

Electrically Conductive Silver Paint

Electrolube

An air drying electrically conductive paint containing pure silver. The paint should be applied to dry, grease and oil free surfaces with a soft bristled brush to obtain as thin a coating as possible to ensure minimum resistance. After approx 15 minutes the paint will be dry, but is not completely cured for 12 hours. The resistance will be about 001Ω per cm. However, by applying heat (e.g. from a hair dryer) to speed the drying time immediately after application the resistance can be reduced to less than 0.5mΩ per cm. Before use always shake the tube well. Applications include: repairing broken tracks on pcb's; repairing demisters on car rear windows; bonding wires together; rf shielding; prototype pcb manufacturing; conductive ink and many more. Supplied in a phial containing 3gm. Note: Shake well before use.

Order Code	Type	Price each
FY72P	Conductive Paint	£6.49

Nickel Screening Spray

Electrolube

An electro-conductive coating based on nickel for EMI and RFI screening (electro-magnetic and radio frequency interference). Adheres to a wide variety of materials and ideal for spraying the insides of plastic boxes to provide a screen. Has a surface resistivity of 0.7Ω per sq.cm. with 50 microns thickness. The can must be shaken for at least 2 minutes before use. Supplied in a 400g aerosol can.

Order Code	Type	Price each
DM10L	Screening Spray	£18.75

Contact Cleaner Lubricant Pen

Identical with the aerosol electro-mechanical lubricant below, but in the form of a pen containing 5ml.

Order Code	Type	Price each
FM77J	Switch Cleaner Pen	£1.68

Contact Cleaner Lubricant

Electrolube

An electro-mechanical lubricant in aerosol form. It consists of a solvent suspended oil for use where a thin film of contact lubricant is required having good penetrating and cleaning properties. It is safe to use on all metals and most plastics and rubbers. Supplied in 200ml aerosol can. Uses pentane propellant.

Order Code	Type	Price each
DM85G	Switch Cleaner	£4.20

Contact Lubricant

Electrolube

An extra high quality contact treatment oil for preserving long term reliability and performance. It is anti-static, and safe to use on most plastics, paints and rubbers. Supplied in 200ml aerosol can.

Order Code	Type	Price each
DM86T	Contact Lubricant	£8.49

Contact Treatment Grease

Electrolube

A grease version of the contact treatment oil DM86T. A high quality, non-melting, tenacious grease giving better protection for vertical surfaces, sliding contacts and connections than DM86T. It is antistatic and is safe on most plastics, paints and rubbers. Supplied in 200ml aerosol can.

Order Code	Type	Price each
DM87U	Contact Grease	£4.80

Freezer Spray

Electrolube

A non-corrosive refrigerant aerosol for the rapid cooling of electronic components as an aid in tracking down and detecting thermally related faults. Can also find invaluable uses such as cooling semiconductors during soldering to prevent damage, and/or shrinking mechanical components having an interference fit with one another and thereby making fitting easier. The freezer spray can lower temperature to as much as -56°C (70°C below ambient). Supplied in 200ml aerosol can.

Order Code	Type	Price each
DM88V	Freezer	£5.75

Ultrasolve Degreasing Solvent

Electrolube

A special cleansing solvent of very high purity for the most critical electro-mechanical applications. It is highly recommended for cold cleaning applications in conjunction with all types of electro-mechanical equipment. This solvent has a powerful penetrating action and works faster and more thoroughly than conventional solvents. Supplied in a 200ml aerosol can.

Order Code	Type	Price each
DM89W	Ultrasolve	£4.75

Degreasing Solvent

Electrolube

A fast drying, non-toxic electronic cleaning and degreasing solvent which is non-flammable and leaves no residue. Intended for delicate electronic and electrical components and contacts, and also precision components. It is harmless to plastics and rubbers etc. Supplied in a 200ml aerosol

Order Code	Type	Price each
DM90X	Ultrasolve	£3.49

Sprayduster

Simply contains a microscopically clean, inert gas which is non-toxic, non-flammable and non-corrosive, for use as a pressurised gas jet for clearing accumulated debris, dust and fluff from otherwise inaccessible nooks and crannies of radio and TV chassis, variable capacitor assemblies and similarly difficult and sensitive areas where any alternative attempt at cleaning may cause damage. Supplied in 164gm aerosol can.

Order Code	Type	Price each
YB73Q	Spray Duster	£4.75

Airduster

Electrolube

Pure compressed inert gas for removal of dust and airborne contamination from very delicate or inaccessible areas of electrical and electronic equipment. Supplied in a 400ml aerosol can. Contains no CFC.

Order Code	Type	Price each
KR69A	Airduster	£8.25

Silicone Grease

Electrolube

A high quality, tenacious, electrically insulating compound which is resistant to water and extremes of temperature. It has the property of preventing high voltage tracking, arcing or corona discharge. It makes an excellent releasing agent whilst casting resin in a mould, for example. Will not harden with age. Supplied in 200ml aerosol can.

Order Code	Type	Price each
DM91Y	Silicone Compound	£4.25

Anti-Static Foam Cleanser

Electrolube

In addition to its ability to remove general grease and grime this foaming cleanser has lasting anti-static properties, defeating static charges, eliminating dust attraction and preventing the advent of further static charges for long periods. Particularly suitable for all hard surfaces and crackle finish paints. If in doubt about its suitability for a particular surface test a small area first before using. Supplied in a 200gm aerosol can.

LOW ENVIRONMENTAL HAZARD

Order Code	Type	Price each
YB76H	Foam Cleanser	£1.89

Aqueous Foam Cleaner

Electrolube

An ozone friendly biodegradable foam cleanser for removing flux and heavy contamination from PCBs, and electromechanical assemblies. It is recommended that 'Saferinse 2000' KR71N be used to remove the foam cleaner. Supplied in a 400ml aerosol can. Contains no CFC.

LOW ENVIRONMENTAL HAZARD

Order Code	Type	Price each
KR70M	Safewash 2000	£6.49

THE BEST OF SERVICE

FOR TOP QUALITY & VALUE!

Rinsing Solution

Electrolube

A non-flammable biodegradable rinsing solution for use with 'Safewash 2000'. The solution is used to remove all foam and contaminant residue and drying may be assisted with 'Airduster' KR69A. Supplied in a 400ml aerosol can. Contains no CFC.

Order Code	Type	Price each
KR71N	Safewash 2000	£4.99

Antistatic Polish

A high grade polish containing a blend of waxes, cleansing and anti-static agents. Cleans at the same time as it polishes. Can be used on wood, paint, glass, metal, plastic surfaces etc. Leaves a high gloss durable finish. Supplied in 289gm aerosol can.

Order Code	Type	Price each
YB78K	Antistatic Polish	£3.25

Antistatic Spray

Electrolube

A water based antistatic spray in a pump action container, used for nullifying static charge problems. Supplied in a 250ml bottle.

Order Code	Type	Price each
YB79L	Anti-Static Spray	£3.49

Cleaning Strips
