

We have been asked time after time for a list of transmitting stations, but a list of stations is not much use without a map. Hereunder you will find as nearly complete a map of stations in Great Britain and Ireland as it is possible to obtain.

When listening-in you will be able to look up the station at once, without referring to books, and find exactly where it is on the map.

This will help you considerably in determining the efficiency of your set by comparing how strongly you are able to hear certain stations.

"Popular Wireless" MAP OF RADIO STATIONS

We are glad to be able to publish in this issue the first section of a list of amateur transmitting stations. This list is as nearly complete as it is possible to get it, and by far the most comprehensive guide to Radio work yet published.

It will be of great use to you, besides being of absorbing interest. You will be able to see at a glance who any station belongs to, where it is, and what power and wave length is being used. For details of amateur stations, see special list in this issue.

- PRINCIPAL STATIONS.
- ✱ DIRECTION FINDING STATIONS.
- AMATEUR EXPERIMENTAL STATIONS.
- ⊙ RADIO TELEPHONY.
- † CONTINUOUS WAVE ONLY.
