# avnsales@advalue.com

# (The hottest address for TV advertising since Peyton Place.)

Every day more and more buyers and sellers of broadcast media are making the move to AdValue, the first system ever to connect agencies, reps and stations in an interactive online environment that tracks every action and transaction—even better than a busybody gossip in TV soaps.

The lack of disputes and discrepancies that results may not be the stuff that prime time drama is made of, but it's the most dramatic improvement in media management since the buying of time began. To find out why, write us at our e-mail address above or call us at (212) 726-5300.

# **Television Assignments by State**

The following table of assignments contains the channels designated for the listed communities in the United States, its territories, and possessions. Channels designated with an asterisk (*) are assigned for use by noncommercial educational broadcast stations only. A station on a channel identified by a plus (+) or minus (-) mark is required to operate with its carrier frequencies offset 10 khz above or below, respectively, the normal carrier frequencies.

10 khz above or below, respectively, the normal carrier frequencies. Footnotes: 1) Following the decision in Docket No. 18261, channels so indicated will not be available for television use until further action by the Commission. 2) Operation on this channel is subject to the conditions, terms and requirements set out in the report and order in Docket No. 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972, FCC 72-19 (Added 72-19, 17/72). 3) This channel is not available for use at Splin unless and until it is determined by the Commission that it is not needed for use at Jolliet, III. 4) Stations using these allotments shall limit radiation toward stations on the same channel in Puerto Rico, to no more than the effective radiated power which would be radiated by an omnidirectional radio station using maximum permissible effective radiated power for antenna height above average terrain, at the minimum distances from such stations specified in § 73.610(b). The FCC shall consider the status of the negotiations with the appropriate British authorities concerning these allotments when the applications for construction permits come before the FCC.

## **Nielsen DMA Market Atlas**

The Designated Market Area (DMA) is a geographic market design that defines each television market exclusive of others, based on measured viewing patterns. Each market's DMA consists of all the counties in which the home market stations receive a preponderance of viewing, and every county is allocated exclusively to one DMA—there is no overlap. The total of all DMAs represents the total television households in the U.S.

The DMA is a standard market definition. As a television buying tool, it is a geographical and demographic means for maximum efficiency. As a station tool, it has applications for sales, programming and promotion planning.

Following, in alphabetical order, are Nielsen's 211 DMA markets for 1997 with coverage maps (1996) for each, with county by county breakouts of TV households. Other data includes the markets' stations, their cities of license, channel numbers and network affiliations.

Coverage maps show total survey areas in light shading, the DMAs themselves in dark shading and white, with Nielsen Metro rating areas in white. The survey areas consist of all counties in which the home market stations are viewed to a significant extent, including via cable. The Metro Areas usually conform to U.S. Census Standard Metropolitan statistical areas.

Non-DMA markets do not meet Nielsen's criteria for having a DMA of their own. They are listed with the DMA of which they are a part.

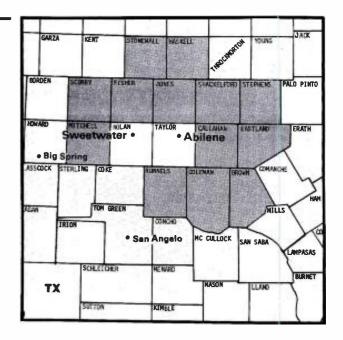

A cross-reference list of cities in multi-city DMAs appears on C-228.

# TV Markets by Nielsen Marketing Research Territory

Nielsen Marketing Research territory groups are another standard way of reporting sales data. The following table ranks TV markets, known as Designated Market Areas (DMAs), within each Nielsen territory. This provides a yardstick for determining the number of spot markets needed to achieve a given coverage of territory. For example, if the national media are not delivering sufficient advertising weight in New England, the planner will find that three TV markets (Boston, Hartford and Providence) contain over 75% of New England territory households. The planner can also use the table to get a better idea of what TV markets are needed to cover all of New England. Data is from the Nielsen Station Index with tabulations based on a January 1997 estimate. Copyright 1997 Nielsen Media Research.

# Now You Can Get Consumers' Answers to Your Marketing Questions in 72 Hours.

Low-cost, top quality custom market research from a nationally representative sample.

OmniTel—The preferred source of answers to a few custom questions.

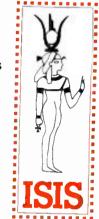

ISIS—For interviews up to 15 minutes in length.

hese are the *only* telephone omnibus services *proven* to deliver the accuracy of premium dedicated surveys. This accuracy is the result of extensive experimental research. Our unique improvements include: question block rotation to eliminate order bias; ensuring that five callbacks

are made to maintain representativeness; sample balancing to census data on age, sex, region, education and race; and daily geographic quotas.

**Specifications:** 1,000 adults interviewed every weekend from computergenerated random samples; 72-hour survey completion through tabulation by a standard demographic banner. (Custom banners are also available). Costs average \$600-\$700 per question for 1,000 interviews.

**Suggested Uses:** Brand equity; awareness, attitude and usage; media research; customer satisfaction; concept screening and testing; image and positioning; public relations effectiveness; market structure and price sensitivity studies.

America's most popular national telephone omnibus services... from one of America's best-known custom research companies.

Background Information: PRI is a public radio network headquartered in Minneapolis that acquires, develops, funds & distributes public radio progmg from stnbased, independent & international producers. PRI has more than 550 affil stns throughout the United

States, Guam & Puerto Rico. PRI was founded in 1983 as American Public Radio by five leading public radio stns to provide a diversity of program sources & production styles to the public radio audience. PRI joined forces with NPR & the Corporation for Public Broadcasting (CPB) to launch AMERICA ONE, a 24-hr English language audio channel serving all of Europe. Headquartered in Munich, AMERICA ONE's audience includes English-speaking Europeans & Americans living and working abroad. AMERICA ONE reaches this audience via direct to-home satellite, cable & AMFM radio stns throughout the continent. In addition to its ongoing programs, which include Garrison Keillor's A Prairie Home Companion, Whad'Ya Know? with Michael Feidman, Marketplace, and Saint Paul Sunday, the network distributes an average of four special programs per month & emphasizes progmg in four general areas: news & info, comedy/var, classical music & contemporary music. The new global radio news magazine The World is co-produced by PRI, BBC World Service & WGBH Boston. This one-hrweekday news program, distributed throughout the United States by Public Radio International & in Europe on AMERICA ONE, is the first daily radio collaboration between U.S. public broadcasters & the BBC.

## Canadian Radio Networks

### Canadian Broadcasting Corp.

The Canadian Broadcasting Corp. (CBC) is a publicly owned corporation established by the Broadcasting Act (1936) of the Canadian Parliament to provide the natl bostg syc in Canada in the two official languages, English & French. Under this legislation, the CBC is subject to regulations of the Canadian Radio-Television and Telecommunications Commission (CRTC).

Program Services: The CBC operates English and French AM & FM stereo networks. The progma on these networks is nearly all Canadian and virtually free of comi adv. CBC North bosts radio programs to Canada's north in English, French and seven native languages, serving the special needs of native & non-native groups in the Yukon, the Northwest Territories and northern Quebec. Radio Canada International is Canada's voice abroad. Bostg on shortwave in seven languages, RCI's progmg reflects Canada's political, economic, social & cultural spectrum to an international audience. Newsworld is a 24-hour nat! satellite to cable English-language news & info svc. Le Réeseau de l'information (RDI) is a 24-hour natl satellite to cable French-language news & info svc. The heart of CBC's natl distribution system is Canada's Anik E2 satellite, carrying progmg through six different time zones. CBC's progmg is best over 684 AM & FM

# DigitalTV. The big picture.

It's an exciting time to purchase a new TV transmitter.

There are so many questions about the impact of DTV. Who can you turn to for answers?

# Comark is the world leader in UHF high power transmitters.

Nobody knows UHF high power transmitters better than

We've dominated the IOT transmitter market for five years.

Comark. We invented the IOT amplifier in 1986. And over the past five years, have supplied the overwhelming majority of IOT transmitters worldwide. Today, IOT's are the standard technology for both analog and digital TV.

# Comark has been part of the DTV research team from the very beginning.

MODEL HOTY STATION PROJECT, INC.

Our DTV knowledge comes from real world experience. Since the 1992 AD-HDTV tests at WRC in Washington, DC, Comark has been the transmitter supplier of choice for

virtually every major DTV test or demonstration.

## Comark is already well down the road to DTV.

At NAB '96, we introduced the AdvantageTV series, the first transmitter designed specifically to meet the ATSC

recommended standard. Engineered from the ground up for ease of use, low-cost maintenance and no-hassle installation, it's available as an air-cooled or water-cooled product at any required power level.

And it's only the beginning. In just a few

Comark offers a transmitter that meets tomorrow's U.S. standard today.

months, we'll introduce new products and U.S. standard todal services that will make your transition to DTV even easier.

We'll also introduce innovative solid-state technologies that

deliver ultra-high performance and reliability.

Up to 200 cable channels? Same thing. With features like regional commercial breakaway and true multi-user, full-featured cart and video server control. Or multi-channel look-ahead tape compile, video server caching, net delay, satellite recording and much more.

automation runs it like clockwork.

With Alamar automation, any source device in your facility can be available to any channel. The system is easily expandable, so there are no performance problems as you add equipment or channels in the future.

For your peace of mind, there's a hot backup system with a central error monitoring computer. And you're never alone... Alamar's remote diagnostics

From single to multi-channel automation only Alamar has the technical depth to make it happen.

Alamar automation systems are designed to interface with a wide range of video servers including this one at TCL

puts our talented pool of in-house software engineers at your side to analyze glitches or download software via modem while you're on-air.

Those are only a few of the capabilities available in Alamar's modular, upgradeable systems. Over 450 facilities – from independent and network broadcasters to the largest direct satellite broadcaster in the world – run with Alamar automation all day – every day.

Alamar is now a subsidiary of Philips Electronics North America Corporation, which means additional resources and even better worldwide support for all our customers.

Call, fax, or e-mail us for information on how you can automate your on-air operations cost-effectively and reliably.
