information concerning the whereabouts of one Old Philosopher. He is an old man with young ideas. When last seen he was wearing burlap, sandals and no hat.

We want him because he helped us prepare the first coverage story of WOR's 50,000-watt, high-fidelity transmitter — based on a field intensity survey and day and night mail analyses. His rock-bound conservatism will be appreciated by the whole industry.

You will want the information in his book which is now on the press. If you run into him send him back to our New York office, 1440 Broadway—at Times Square. He is a good fellow to have around.

WOR

Member of the Mutual Broadcasting System

WANTED

I want a copy of WOR's new coverage story, IT'S A SMALL WORLD, as soon as it comes off the press. Hope you find the Old Philosopher. He sounds interesting.

TWO PROMISES

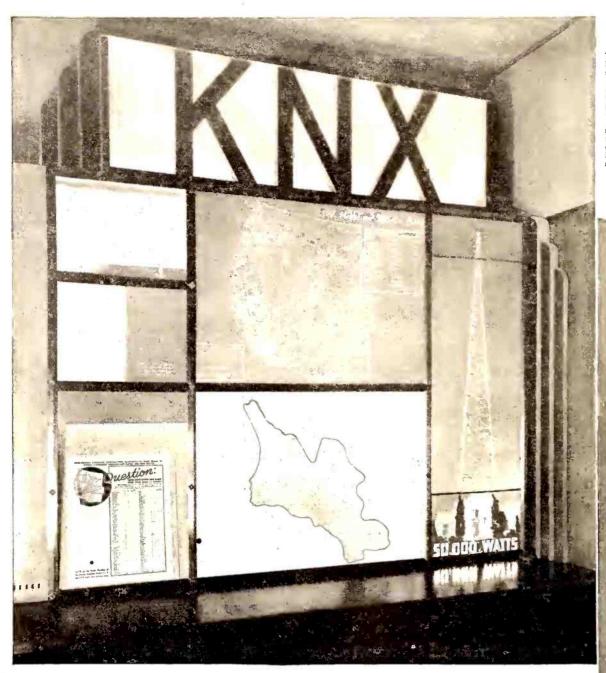

RICHLY FULFILLED

To bring to the people of Detroit the finest programs on the air is the promise WJR once made to its public. Yesterday that promise was brilliantly fulfilled. Yesterday WJR joined Columbia, began to broadcast the programs which have made CBS America's favorite network.

Columbia too has been on record with a pledge... to make available for its advertisers the most desirable stations and the most effective coverage throughout the vast sweep of American markets.

Yesterday Columbia again made good its word. It proceeded to deliver to CBS clients incomparable coverage in the nation's fourth largest market where WJR, expanding to 50,000 watts, now broadcasts with greater power than all other Michigan stations combined.

THE COLUMBIA BROADCASTING SYSTEM WORLD'S LARGEST RADIO NETWORK

The audition room in KNX's new \$220,000 studio combines the very latest in auditory and visual presentation. As the sponsor's program is being auditioned he has flashed before his eyes, by means of illuminated maps in color, the coverage story of KNX, both daytime and nighttime.

DAYTIME or NIGHTTIME

KNX's Coverage Story is Entirely Different

Buyers of KNX now know that their nighttime service area is the eleven western states. They also know that their daytime service area is the eleven southern California counties. One or the other *better* suits their merchandising needs. Consult KNX's agency file folder for the complete story before you buy any Pacific Coast stations.

Facsimile Looms as Press Rushes Into Radio

By SOL TAISHOFF

Four New York Publishers Study RCA Image Transmission; More Newspapers Now Eyeing the Broadcasting Field

FACSIMILE broadcasting, regarded by many radio experts as the next important step in the radio transmission of intelligence as well as a potentially powerful advertising medium, is being studied in a preliminary way by four important New York newspapers after discussions with RCA, which holds some of the basic patents on the system.

Disclosures of the facsimile conversations comes at a time when the quest of newspapers for radio stations, chiefly for regular sound broadcasting, has reached an all-time peak. In he fortnight that has elapsed since BROADCASTING in its Sept. 15 issue exclusively reported the decision of the Scripps-How-

ard newspaper organization of enter the broadcasting field, activity among newspaper publishers for the purchase of existing radio stations or the acquisition of new stations has been accelerated.

The FCC, especially its engieering department, has been visitd by a steady stream of publishrs seeking information about the ling of applications for radio staions.

While far from the consummaion stage, the facsimile developaent nevertheless represents the rst tangible step toward commerial introduction of facsimile roadcasting. Optimistic radio cientists envision the day when omplete newspapers, including isplay advertising, will be "radiohotographed" and delivered via adio to the home.

Cost of Receivers

cca executives, it is learned, ave discussed the introduction of acsimile with the heads of such lew York newspapers as the imes, Herald-Tribune, World-'elegram and American. The report was that one of the proposals avolved the manufacture of some 5,000 facsimile receiving units or distribution by the newspapers. Is a matter of fact it was ascerained that a working model factimile receiver is now being built of RCA. Estimates covering the ost of the experimental unit are a the neighborhood of \$100, but it thought that if mass production attained the cost might be as sow as \$30.

The conversations with the newsaper executives are believed to ave covered several possible methis by which facsimile could be attroduced under newspaper auspices. For RCA they have been carried on by Henry Kittridge Norton, executive assistant to David Sarnoff, RCA president and chairman of the board of NBC.

Asked by BROADCASTING about the developments, RCA said officially Sept. 24 that the reports of a definite development "are evidently premature". These reports, the statement said, "are based, it is understood, on investigation by various leading newspapers of the possibilities of radio facsimile as a special service to their subscribers. Ways and means of developing this type of transmission on a commercial basis have been under study by the RCA ever since the demonstration of facsimile in Washington and New York last winter.

Newspaper Service

"WHILE already in limited commercial use for the transmission of weather maps to ships at sea and similar services, the development of a facsimile service for the home has been the larger goal of RCA research engineering. It has been optimistically envisioned that the day will come when complete pages of newspapers may be reproduced on a home facsimile recorder.

corder.

"While still in the preliminary stage some of the discussion has centered around a suggestion for providing technical facilities for newspapers which might then maintain a news and editorial service for their subscribers. RCA executives state that no definite procedures have as yet been determined. Among the obstacles to be overcome is the cost of facsimile recorders. The goal is to produce such recorders under \$100 per unit in order to give the service as wide an appeal as possible."

Facsimile receivers, several de-

PHOTORADIO — Here is C. J. Young, son of Owen D. Young, and RCA facsimile experimenter, with a model of the reproducing apparatus he has developed. (See next page for sample of facsimile.)

signs of which have been perfected by independent inventors as well as by RCA, can be affixed to the ordinary radio receiver or operated separately. Under the main plan proposed to the New York newspapers by RCA, it is indicated, the visual broadcasts would be from a central station built and maintained by RCA. Service for the newspapers, which would get the "credit lines" and actually become the facsimile broadcasters, would be on a leasehold basis, with maintenance, operation and research carried on by RCA.

come the facsimile broadcasters, would be on a leasehold basis, with maintenance, operation and research carried on by RCA.

In the case of the Times, the matter has been discussed with Arthur Sulzburger, its president and publisher. Howard Davis, business manager of the Herald-Tribune; Karl A. Bickel, radio executive of the Scripps-Howard newspapers, publishing the World-Telegram, and T. J. White, general manager of Hearst Enterprises, in the interest of the American, also have been parties in the conversations.

Presumably, under the basic plan, RCA proposes to test facsimile transmission as a medium of visual transmission in New York prior to expansion to other cities.

With the exception of Hearst's American, which is affiliated with

WINS, New York, none of the newspapers involved in the negotiations has any ownership affiliation with a broadcasting station. For that reason New York is regarded as a fertile field for the introduction of facsimile.

An Advertising Medium

ENORMOUS advertising potentialities are envisioned for facsimile. Display advertising in newspaper style and format, for example, conceivably can be reproduced in the home during the early morning hours at a negligible cost to the listener or "looker".

In facsimile, it is not a case of sitting in rapt attention and "looking" into a reflector on the receiving set, as is necessary in television. Instead, the "home printing device" reproduces an exact likeness of the news page or photograph, inch by inch, across the 8x11 inch page. "Facsimile" advertisers, sponsoring printed newspapers or program presentations, for example, could procure a check on the audience receiving their programs by sending into the home facsimiles of coupons which the recipient would be asked to mail in.

In the field of regular sound broadcasting the current influx of applications and the more or less wholesale purchases of stations by newspapers actually got under way early this year when the matter of news broadcasting became acute. Then, last March, when the bars were let down on the sale of press association services to broadcasting stations, the activity reached unprecedented proportions.

Today there are 134 broadcast-

Today there are 134 broadcasting stations owned or controlled by or affiliated with newspapers through stock ownership, as against less than 100 at the start of 1934. There are 33 applications pending for new newspaper stations. An undetermined number of newspapers in all parts of the country are planning new station applications—perhaps as many as 20. This is indicated in calls made at the FCC seeking information to be used in filling out the requisite application forms.

Scripps-Howard's Move

THE SCRIPPS-HOWARD decision to acquire broadcasting station affiliations in cities in which it publishes newspapers was the most significant step in this field since the UP and INS began to sell their news services to stations. The decision to invade broadcast-

ing on a large scale represented a complete about-face in the policy of the Scripps-Howard organiza-

The Broadcast Division of the FCC at its meeting Sept. 24 approved the application of the Continental Radio Co., radio subsidiary created by the Scripps-Howard organization, for acquisition of WFBE, Cincinnati, the call letters of which will be changed to WCPO. The station is a 100-watt local. Applications for new stations in Columbus and Toledo, also sought by Continental, probably will be designated for hearing by the FCC, following the usual procedure.

Besides WFBE, other additions to the list of newspaper-owned stations negotiated the last fort-night are WAAW, Omaha; KGBZ, York. Neb., and KMMJ, Clay Center, Neb., purchased by the Omaha World-Herald. This newspaper also has purchased control of WJAG, Norfolk, Neb., from the Norfolk Daily News.

In addition, KGKO, Wichita Falls, Tex., has been purchased from the Wichita Falls Broadcasting Co. by the Fort Worth Star-Telegram, the assignment of license being approved by the FCC Broadcasting Division at its Sept. 24 meeting.

Aside from new station applications filed in recent weeks, it was learned the Cleveland Plain-Dealer, already operating WHK, Cleveland, and WAIU, Columbus, also has a controlling interest in WHK. Cleve-WJAY, Cleveland, and a 40% interest in WKBN, Youngstown. There is now pending before the FCC applications for assignment of control of both WHK and of control of both WHK and WJAY to the U. B. Corporation, controlled by the Plain-Dealer.

On Sept. 24 the FCC granted a full license renewal to WLBF, Kansas City, Kan., thus presumably paying the year for experience of the

paying the way for exercise of the purchase option on that 100-watt station held by Senator Capper's Kansas City Kansan.

More Newspaper Stations

ADDITIONS to the list of applications by newspapers for new sta-tions include those of the Portland (Me.) Herald & Express, St. Paul Daily News, Richmond Times-Dispatch (owned by the same interests as the Norfolk Virginian-Pilot, operating WTAR); Albany
(N. Y.) Knickerbocker Press & News, seeking a 100-watt station in Schenectady. These should be added to the list published in the Aug. 15 issue of BROADCASTING.

With a glimpse into the future of broadcasting over heaved for

of broadcasting, even beyond fac-simile transmission, a number of newspapers are contemplating invasion of the so-called ultra-high frequencies, a bove 30,000 kilocycles, for broadcasting. These channels are in what is regarded as the "No Man's Land" of radio.

Bank Studying Media

COOPERATION of bankers in an intensive study of media has been asked by A. R. Gruenwald, chairman of the general research committee of the Financial Advertisers Association and advertising manager of Marshall & Illsley Bank, Milwaukee. The study is under the direction of L. E. Townsend, advertising manager of the Bank of America, National Trust & Savings Assn., San Francisco.

RADIO FACSIMILE—Here is a sample of a facsimile portion of a newspaper page transmitted by the system developed by Charles J. Young, of the RCA Manufacturing Co., Camden. The Young system is one of carronal developed in recent years. Other systems include those of W. several developed in recent years. Other systems include those of W. G. H. Finch, former assistant chief engineer of the FCC, and of John V. L. Hogan, New York consulting engineer.

The most widely prevalent idea about facsimile use in the home is that of an attachment for the ordinary receiver, which would wholesale at perhaps \$25. This receiver would work while its master slept, for the plan would be to have it "print" the newspaper during the night, so that in the morning there would be laid down in a basket under the set a series of "filmsies" of tissue-paper texture carrying all of the newspaper features "photographed" by radio, with headlines, comics, fashions and display advertising.

Principles of transmission are not very different from "sound" broadcasting. For example, a broadcasting station now sends electrical impulses which reproduce over the loud speaker the exact sounds within the studio. The vibrations actuate the loud speaker and reproduce the sounds. If the incoming vibrations are fed to a control magnet on a moving stylus, rather than on a loud speaker, the stylus will be lifted on and off the paper as the vibrations are received. At the sending station, the material to be transmitted is placed on a cylinder which revolves laterally and shifts longitudinally. Upon this text falls a tiny light ray which traverses the page until all points have been exposed. That is called "scanning", and is done through use of photoelectric cells. Then the reverse operation takes place at the receiving end, and the magnetic device or "radio pen" moves over the receiver's sheet and by synchronous movement of the "pen" with the original cylinder, the paths taken at the sending end are faithfully reproduced on the receiver, and the facsimile page is produced. moving stylus, rather than on a loud speaker, the stylus will be lifted ceiver, and the facsimile page is produced.

New Stratosphere Flight KGKOShifttoFt. Worth; To Be Broadcast by NBC

ROBERT M. MORRIS, NBC development engineer, and a special events staff of NBC will again establish ground contacts, including pickups by network member stations, when the National Geographic Society-Army Air Corps undertakes another stratosphere flight some time in October, weather permitting. The NBC has once more obtained exclusive rights to the broadcasts from the gondola in flight, which furnished one of the greatest feats in radio history during the first successful attempt and was scheduled for the second ill-fated attempt.

Engineer Morris has shipped his equipment to the Strato-Camp at Rapid City, N. D., and has gone there to handle the setup.

Two NBCOutlets Planned

APPROVAL of the recent purchase of KGKO, Wichita Falls, Tex., by Amon Carter, publisher of the Fort Worth Star-Telegram, was given by the FCC Broadcast Division Sept. 24 when it authorized the star of the star ized the assignment of the license to Mr. Carter and its removal into Fort Worth. The Fort Worth Star-Telegram is now operating WBAP, which shares the 800 kc. clear channel with WFAA, of the Dallas News, utilizing the same 50,000watt transmitter. It is intimated that Mr. Carter may now sell WBAP to the Dallas News, thus giving each newspaper a full-time outlet in its city and paving the way for each station to secure basic NBC network service. WFAA-WBAP now receives both Red and Blue programs.

First Steps Taken For Audit Bureau

Committee of 15 to Meet Again **During Latter Part of Month**

FIRST TANGIBLE steps toward the establishment of a cooperative bureau to audit station audience and coverage data were taker Sept. 19 at the initial joint meeting of the Committee of 15, equal ly representative of the NAB American Association of Advertis ing Agencies and Association of National Advertisers. No state ment was forthcoming following the meeting but it was understood that another general session wil be held toward the latter part of October. A subcommittee was

The fact that the conferees agreed to hold another meeting in the immediate future was accepted as meaning that the first session was harmonious and that there was no rift whatever in connection with the basic idea. There had been reports current that all three of the trade associations were not in accord on the plan that an in dependent bureau be set up, to pro vide for radio data which would

vide for radio data which would be the counterpart of that offered in the publications field through the Audit Bureau of Circulations. Those who attended the Sept. 15 meeting held at the Waldorf-Astoria, were: For the NAB—Chair man, Arthur B. Church, KMBC Alfred J. McCosker, WOR; Edgan Kohak NRC: Hugh K. Boice Kobak, NBC; Hugh K. Boice CBS; J. O. Maland, WHO; for the ANA—Chairman, Stuart Peabody (chairman of the board of ANA) D. P. Smelzer, Procter and Gamble Co.; M. H. Leister, Sun Oil Co. Harold B. Thomas, Centaur Co. Paul B. West, managing director for the AAAA—Charles F. Gan non, Erwin, Wasey & Co.; L. D. H. Weld, McCann-Erickson Inc.; Dr. Coarse Collys Young Co. George Gallup, Young and Rubi cam Inc.; John Benson, president and F. R. Gamble, executive secretary of the AAAA.

NAB Gives Up Proposal For Agency Recognition

ALL HOPE for creation of ar agency recognition bureau for rat dio at any time in the immediate future has been abandoned by the NAB, since only 35 stations of the minimum of 120 which would have been required to launch the project had signified their intentions of subscribing to it as BROADCASTING went to press with its Oct. 1 issue When the campaign for subscriptions was started last July, James W. Baldwin, NAB managing director, declared the plan would go by default unless the cost for the first year of approximately \$16,000 had been underwritten by subscriptions from 120 stations at \$120 per year

The last subscriptions received by the NAB, as of Sept. 14, were from CBS for its seven owned sta-tions. These were KMOX, WBBM WCCO, WKRC, WBT, WJSV and WABC. Other subscriptions which WABC. Other subscriptions which had been received were: KFI KJBS, KDYL, WAIU, KFSD WKBN, WHOM, WFAA, KMBC WLS, WHO-WOC, WGBI, WTIC KFPY, KGNC, WMBC, KSO WGAR, WGR-WKBW, WRVA KFBK, WPRO. WHK, WFBL KFBK, WPRO. WHK, WOW, WJBK, and WPTF.

CC Continues Scrutiny of Programs

Score of Stations Get Temporary License Renewals; Post Office Department Issues Order on Congoin

SPITE expectations of a subntial let-down in the FCC onlight against questionable proms, notably those in the mediclassification, the Broadcast ision of the FCC is continuing activity in that line and at its sting Sept. 24 issued temporary nses to nearly a score of stans. These temporary grants, it said, were sought by the Law artment, pending further intigations into "questionable" grams on which the Federal de Commission and Food & 12 Administration of the Detment of Agriculture are being sulted.

temporary licenses, it was astained, had broadcast the proms sponsored by the Congoin. Los Angeles (herb tea), which is cited Sept. 20 by the Post ice Department in a fraud or-Other reasons for the tempoy licenses were broadcasts of dical accounts, failure to proses, fortune-telling programs, i violation of regulations.

Federal Conference

HAD BEEN expected that the pulation method devised by the B with the Trade Commission, ler which stations would be perted to follow procedure sucsfully employed in newspaper I magazine fields, would cause relaxation in the FCC drive. der the FTC stipulations, stans would be permitted to sign livers agreeing that they would de by any orders issued against vertisers using their facilities, as being saved from punitive ion.

n line with a resolution adopted the Broadcast Division Sept. 10, airman Sykes of the Broadcast vision was planning to arrange conference with a committee presenting the FTC to discuss relopment of a liaison between two agencies in the light of new stipulation procedure. lge Sykes declared Sept. 24 that was hopeful that the conference held within two weeks. Meanwhile, developments affectradio advertising from the regtory standpoint came thick and it during the last fortnight. In drastic action, the Post Office partment Sept. 20 issued a and order against the Congoin ., manufacturers and distribus of a South American yerba te beverage similar to tea. The ect of this order is to deny the mpany the use of the U. S. ils. All mail to it is stamped audulent". Congoin has been ing time on some 100 stations d the FCC has sent inquiries to number of them in its investition of this account.

Also at its meeting Sent 24 the Also at its meeting Sept. 24, the

Also at its meeting Sept. 24, the oadcast Division postponed the aring on the Marmola case (antitremedy) from Oct. 3 to Oct., presumably because Andrew aley, attorney of its legal staff indling the program investigans, would not be able to be sent. Simultaneously it released MBC, Kansas City, from the armola hearing docket because

it had found after investigation that the station had dropped the program some time ago, and because there were no other program charges against it.

Remaining on the Marmola docket are KFRC, San Francisco, KNX, Los Angeles, and WTMJ, Milwaukee, each of which is operating under temporary licenses during the pendency of the cases. On July 30, the FCC cited 21 stations on the Marmola program but subsequently released 17 after it announced it had ascertained that they had dropped the program and otherwise were not under investigation.

Haley was sent to Los Angeles three weeks ago to take depositions in connection with the Marmola case and others, with particular reference to KNX, it was reported. He was also instructed by the Law Department to stop off in New Mexico on his return trip to make further investigations. The Congoin case has been a tempestuous one, with a half-dozen recommental agencies involved.

The Congoin case has been a tempestuous one, with a half-dozen governmental agencies involved. The State Department has become embroiled in it because of protests it had received from several South American governments contending that their foreign trade with the United States was being interfered with by U. S. regulatory agencies. The Congoin Co. is the leading importer of yerba mate, exports of which from South America amount to about \$1,000,000 annually. E. S. Woolrich, president of Congoin,

has been in Washington for a month on the case and on Sept. 24 was joined by some of his associates in Los Angeles. Radio has been used extensively by the company, and the contention was that only a very small percentage of its business was through the mails.

Postal Charges

IN A voluminous fraud order, the Post Office Department held that Congoin used the mails in a "scheme or device" to obtain money by false or fraudulent representations as to the merits of its product. Specifically it mentioned testimonials and literature which purported to show that Congoin had an excellent stimulating effect, that it was better than tea or coffee, and that doctors recommended it as a marching ration for soldiers on the ground that it would sustain life without other food, due to its nutritive value. Mr. Woolrich claimed that the Post Office Department based its findings entirely upon one individual from the Food & Drug Administration

Significantly, the Postal order concluded with the statement that it was regrettable that such a meritorious product as yerba mate should have been marketed on the basis of exaggerated representations and claims, since it is highly respected product in South America.

Mr. Woolrich contemplated a pe-(Continued on page 49)

World Series Again Will Be Sponsored On NBC, CBS and MBS by Ford Motor Co.

ANTICIPATING expenditures of \$500,000 or more for the network time and broadcasting rights, Ford Motor Co., Detroit, has signed contracts to sponsor the World Series on the entire list of stations available on NBC, CBS and MBS. N. W. Ayer & Son, Inc., New York, is the agency. More than 90 outlets will be included in the hookup which CBS can assemble during the daylight hours, and nearly 70 NBC affiliates will be available. MBS will use its basic hookup of WOR, WGN, WLW and CKLW. No radical departures from the procedure followed last year (when

No radical departures from the procedure followed last year (when Ford made radio history by bankrolling the series and an increased schedule of entertainment programs) are expected to be made. Commercial announcements, so short as to amount to little more than sponsor identification, will be made in such a way as not to intrude too much on the listeners' attention. After the first game they probably will be made between all innings.

Before negotiations with the Ford company began, Judge Kenesaw Mountain Landis, czar of the big leagues, announced that radio rights would cost \$100,000, so it is assumed that this figure was embodied in the contract.

In addition, the sponsor pays for time at the hourly rate, the games averaging about two-and-a-half hours each in length. Last year the total broadcasting time

amounted to 19 hours. The present rates would total approximately \$9,000 an hour on CBS, and \$14,000 for the combined NBC chains. The MBS hour rate is \$1,550. Nineteen hours at these prices would total about \$470,000.

Talent costs for commentators on the actual play and the scenes in the ball parks will be small in comparison to the time outlay. However, even if the series should, due to some miscalculation on the part of the owners, finish in four games, the total for time, air rights, talent and incidental costs could hardly be kept below \$400,000.

Local sponsorship by individual Ford dealers is permitted by the parent company only in cases where the dealer is willing to assume the entire burden for the time costs in his area. Tie-in announcements by dealers are expected to be made during station-break periods in most cases.

For NBC, Hal Totten, Ty Tyson

For NBC, Hal Totten, Ty Tyson and Graham McNamee, all veteran sports announcers, will describe the series over the combined networks. For CBS, France Laux, of KMOX, and Jan Graney, of WHK, will call the plays, with Truman Bradley assisting with the network announcements. Quin Ryan, manager of WGN, and pioneer sports announcer, will be at the MBS mike, assisted by Bob Elson, WGN sports announcer.

Agencies' Billings On CBS This Year

THE SAME agency which led all others in all national network billings during 1934 was top on the list of agency billings on the CBS network during the first six months of 1935, it was disclosed Sept. 25. It is Blackett-Sample-Hummert Inc., which placed \$1,316,808 worth of business with CBS during the first half of this year. Reports on spot billings are unavailable, nor were the agency billings on NBC made public.

The CBS tabulation was made

AGENCY ORGANIZED BY E. A. FELLERS

E. A. FELLERS, who as assistant to the vice president of Mantle Lamp Co. of America, has devoted most of his time to that concern's broadcast advertising, has resigned after 11 years to become one of the principals of a new advertising agency — Presba, Fellers, Presba Inc., which has opened offices at 360 N. Michigan Ave., Chicago.

The other principals are Bert S. Presba, for 23 years vice president of Mantle Lamp in charge of sales and advertising and for the seven years previous with the Mahin Adv. Co., which later became the William H. Rankin Co., and Will B. Presba, formerly sales manager of WROK, Rockford, Ill.

Presba, Fellers, Presba Inc., is placing advertising for Mantle Lamp Co., Chicago (Aladdin lamps); The Crest Co., Chicago (electric lamps), and Aladdin Industries, Chicago (vacuum bottles). While a general agency using every type of medium, the new agency expects to make liberal use of broadcasting because of the outstanding success of this medium in advertising Aladdin Lamps.

Standard Oil to Use UP News In Broadcasts on NBC Group

Network's Owned and Operated Stations to Carry Series for 13 Weeks, With NBC Buying the News

A HALF-DOZEN of the NBCowned and operated stations will break into the constantly growing break into the constantly growing roster of stations offering sponsored broadcasts on Oct. 7, when Standard Oil Co. of N. J., begins sponsorship of United Press flashes on the NBC-owned stations East of Pittsburgh. The Standard Oil contract is for 13 weeks, with strong possibility of renewal, and calls for four five-minute news re-

calls for four five-minute news reports daily except Sunday.

In negotiating the purchase of the UP news reports for these stations, however, NBC contracted for 52 weeks service under a non-cancellable arrangement. Compen-sation to UP is on the basis of 25% of the night rates of the stations used - its regular rate. had been erroneously reported that UP had sold its press reports to the Standard Oil Co., instead of to NBC.

Alka-Seltzer Dickering

MEANWHILE, it was learned authoritatively that NBC is negotiating with Dr. Miles Laboratories, Elkhart, Ind., (Alka-Seltzer), for sponsorship of UP news flashes on another group of NBC owned and operated stations. Wade Adv. Agency, Chicago, handles this account. It is understood that these conversations have to do with use of stations other than those on the Standard

Oil schedule.

The Standard Oil account, placed by Marschalk & Pratt Inc., New York, is the first using spot news reports to be placed on NBC stations. The news broadcasts will be at 8:30 a. m., noon, 6:30 p. m. and 11 p. m. This time coincides with the regular network news reports prepared by the Press-Radio Bureau. NBC will continue to subscribe to Press-Padio Russon convice for retresting to the press-Padio Russon convice for retresting the pressure of Radio Bureau service for network

Stations to carry the account are WEAF and WJZ, New York; WGY, Schenectady; KDKA, Pittsburgh; WMAL, Washington; WBZ-WBZA, Boston - Springfield. Because WBAL, Baltimore, is synchronized with WJZ after 9 o'clock, broadcasting its identical programs, this station also will carry the late evening broadcast at 11

The contract with these stations also covers a guaranteed minimum to UP should Standard Oil fail to renew after the 13-week schedule, and should the stations fail to get new sponsors. This also is identical with the contracts UP has signed with some 45 other stations

since it began sale of its report for broadcasting use last Spring. It was indicated that there is strong likelihood that Standard Oil would increase the number of stations it is using to coincide with the territory in which its products (Esso gasoline and motor oil) are marketed. The news reports will be known as the Esso Extra and the theme will be to hit the high spots of both national and local news. News editors in each station will compose the broadcasts from UP reports.

Esso products are marketed in these states: New York, New England states, Pennsylvania, New Jersey, Delaware, Maryland, West Virginia, South Carolina, Tennessee, North Carolina, Arkansas, Louisiana, Virginia, District of Columbia.

UP Sponsored on WJSV

UNITED PRESS news reports over WJSV, Washington CBS-owned outlet, effective Sept. 30 were sponsored by the Wilkins Coffee Co., of Washington, under an 11-month contract. For the last two months WJSV has been broadcasting UP news as a sustaining feature. The coffee account was placed by Lewis Edwin Ryan Inc., Washington agency. The broadcasts, of five minutes each, are handled four times daily, every day except Sundays at 10 a. m., 1 p. m., 3 p. m. and 5:55

Tip to Politicians

WCAE, Pittsburgh, duced a new type of political broadcasting when a candidate who wanted something different was given a special dramatic program, with vocal and piano accompani-ment. The theme was a visit to a friend's home and discussion of the political situa-tion, including a sales argu-ment for the sponsoring candidate.

MBS Gets Playhouse

THE FORMER NBC Times Square Studio, abandoned when NBC moved into Radio City, has been renamed the Mutual Radio Play-house and will be used for public performances of shows sponsored over the Mutual Broadcasting System. The first program to be presented in the theatre, which seats 800, will be Good Evening Serenade, featuring Isham Jones' or-chestra, Loretta Lee and the Eton Boys, which starts over MBS Oct. 1 under sponsorship of the United Cigar Stores Delaware Corp., to be heard Tuesdays, 8:30-9 p. m. The playhouse will thereafter be available to all MBS clients.

RCA Begins NBC Seri On Progress of Rad

RADIO itself and the technical complishments of its laborator and services are being prome in a new institutional progr in a new institutional programmers sponsored by the Radio Corpction of America, parent compaover a nation-wide NBC-WJZ report starting Corp. work starting Sept. 29. The j gram, heard Sundays 2-3 p. (EST), is an institutional c The r

paign under the title The Ma Key of RCA, and is handled Lord & Thomas, New York. Outstanding artists from concert, operatic and radio wor. with noted dance bands, are participate in this series, wh will be offered for rebroadca throughout the world and will clude pickups from all parts of world through the facilities RCA Communications Inc. John Kennedy, the commentator, a devote part of the hour to expla ing the various actual and pot tial services of radio.

Coca-Cola Returning

COCA COLA Co., Atlanta, will turn to radio with a musical sh around Nov. 1. No definite pla have been made regarding tal and stations. D'Arcy Adv. Co., lanta, is the agency.

Networks Book Many New Programs for Autumn . . .

BOOKINGS by major networks for the autumn find many popular programs returning to the air, many new ones making their bow, and a large number of yearround presentations continuing on the schedules. Following is a list of new autumn programs, as furnished by the networks when daylight savings time schedules shifted to regular time Sept. 29:

NBC

RADIO CORPORATION OF AMERICA, with Magic Key of RCA, John B. Kennedy and guest artists, Sundays, 2-3 p. m. Started Sept. 29 (WJZ).

GENERAL FOODS Corp. (Jello), with Jack Benny and Johnny Green's orchestra, Sundays, 7 p. m. Started Sept. 29 (WJZ).

PROCTER & GAMBLE Co. (Ivory soap), with The O'Neils, Mon. thru Fri., 3:45-4 p. m. Started Sept. 30 (WEAF).

RALSTON PURINA Co., with Tom Mix program, Mon. Wed. Fri., 5:30-5:45 p. m. Started Sept. 30 (WEAF).

PROCTOR & GAMBLE Co. (Ivory soap), with Ivory Stamp Club, Mon., Wed., Fri., 7:15-7:30 p. m. Started Sept. 30 (WJZ).

AMERICAN HOME PRODUCTS Corp.

AMERICAN HOME PRODUCTS Corp.

AMERICAN HOME PRODUCTS Corp. (Kolynos toothpaste), with Easy Aces, Tues., Wed., Thurs., 7-7:15 p. m. Starts Oct. 1 (WJZ).

DELAWARE, LACKAWANNA & WESTERN COAL Co., with Studio 7, Tues., Wed., Thurs., 11:15-11:30 a. m. Starts Oct. 1 (WEAF).

GENERAL FOODS Corp., (Sanka coffee), with Helen Hayes, Tuesdays, 9:30-10 p. m. Starts Oct. 1 (WJZ).

TEXAS Co., with Eddy Duchin orchestra, Tuesday, 9:30-10 p. m. Starts Oct. 1 (WEAF).

BEST FOODS Inc., with Ida Bailey Allen,

Tuesday, 9:30-10 p. m. Starts Oct. 1 (WEAF).

BEST FOODS Inc., with Ida Bailey Allen, Tues., Wed., Thurs., 11-11:15 a. m. Starts Oct. 1 (WEAF).

GENERAL FOODS Corp. (Log Cabin syrup), with The Log Cabin, Conrad Thibault, Harry Salter's orchestra and Frank Crummit, Wednesdays, 10-10:30 p. m. Starts Oct. 2 (WEAF).

BRISTOL-MYERS Co., with Town Hall Tonight, Fred Allen, Peter Van Steeden's orchestra, Tuesdays, 9-10 p. m. Starts Oct. 2 (WEAF).

PACIFIC COAST BORAX Co., with Death Valley Days, Thursdays, 9-9:30 p. m. Starts Oct. 3 (WJZ).

ELGIN NATIONAL WATCH Co., with Elgin Campus Revue, Mills Brothers, Art Kassel's orchestra, Hal Totten, Fridays, 10:30-11 p. m. Starts Oct. 4 (WEAF).

P. LORILLARD & Co., with Old Gold Sports Page of the Air, Thornton Fisher, Saturdays, 7-7:15 p. m. Starts Oct. 5 (WEAF).
LUDENS Inc., with Al Goodman orchestra, Sundays, 5:45-6 p. m. Starts Oct. 6 (WEAF).
STANDARD BRANDS Inc. (Fleischmann's bread yeast), with Ozzie Nelson's orchestra, Rohert L. Ripley, Sundays, 7:30-8 p. m. Starts Oct. 6 (WJZ).
GENERAL MOTORS Corp., with symphony orchestra and guest conductors, Sundays, 10-11 p. m. Starts Oct. 6 (WEAF).
PEPSODENT Co., with Al Pearce and

Sundays, 10-11 p. m. Starts Oct. 6
(WEAF).

PEPSODENT Co., with Al Pearce and
His Gang, Mon., Wed., Fri., 5-5:30 p.
m. Starts Oct. 7 (WEAF).

MAYBELLINE Co., with Penthouse Serenade, Charles Gaylord's orchestra, Don
Mario, tenor, Sundays. 5-5:30 p. m.
Starts Oct. 13 (WEAF).

COLGATE-PALMOLIVE-PEET Co. (Super-Suds), with Clara, Lu 'n' Em, Mon.
thru Fri., 5:45-6 p. m. Starts Oct. 14
(WEAF).

PINEX Co., with Kentucky Mountain
Folk. John Lair, Sundays, 5:15-5:45 p.
m. Starts Oct. 20 (WJZ).

ROGER & GALLET Inc., with Bob Crosby and orchestra, Fridays, 8:15-8:30 p.
m. Starts Oct. 25 (WJZ).

AMERICAN ROLLING MILLS Inc., with
Armco Ironmaster Program, Frank Simon's band, Mondays, 10:30-11 p. m.
Starts Oct. 28 (WJZ).

GEORGE W. LUFT Co., with Jimmy
Fidler Hollywood gossip, Wednesdays,
10:30-10:45 p. m. Starts Oct. 30 (WJZ).

CBS

TIME Inc. & REMINGTON-RAND Inc., with March of Time, Mon. thru Fri., 10:30-10:45 p. m. (EDST). Started

Aug. 26.

JULIAN & KOKENGE Co., with Musical Footnotes, Sundays, 12:30-12:45 p. m. (EDST). Started Sept. 8.

CONSOLIDATED CIGAR Corp., with Harv & Esther comedy serial, Thursdays, 8-8:30 p. m. (EDST). Started Sept. 12.

ATLANTIC REFINING Co., with Atlantic Family and Frank Parker, Saturdays, 7-7:30 p. m. (EDST). Started Sept. 14.

CHARIS Corp., with Sisters of the Skillet, Sundays, 1:45-2 p. m. (EDST). Started Sept. 15.

MALTEX CEREAL Co., with Dale Car-

Sept. 15.

MALTEX CEREAL Co., with Dale Carnegie and Sunrise Ensemble, Sundays, 10:35-11 a. m. (EDST). Started Sept. 15.

Broadcasts Open the Market for Dari-Rich

By BRUCE ROBERTSON

truggling Company, Lost in the Red, Turns to the Air and Obtains National Distribution of New Product

1 1895 Charles F. Bowey founded wey's Inc. in Chicago and ben manufacturing the fruit flavs and syrups used by ice cream anufacturers and at soda founins. For 35 years all went well. nen Mr. Bowey died; the com-ny's secretary died; the chief emist died; the general sales anager resigned; the depression me along, and, at the end of 32 young Donald Bowey and his other Charles, who had inherited e business from their father, sat aring at red - inked figures on e year's statement, the first year e company had ever shown a

Trying to find a new market, owey's soon decided that the iry industry offered the biggest portunity and developed a chocote syrup especially for mixing ith milk. Of course, chocolate ilk was nothing new, but Dariich has the advantage of show-ig no settling or separation, so at it keeps both appearance and

A Series of Spots

WE WERE sure we had some-ning great," says Don Bowey, but when we took it to the milk istributors they did not share our anthusiasm. They admitted our product was good, but they said nat with so many factories closing own their market for it was praccally gone, as the major part of neir chocolate milk sales had been o workmen who bought it to drink

ith their lunches.
"This forced us to the concluion that if we were ever going to evelop a real business with the airies we would first have to conince them that Dari-Rich could be old to the home market as an ensyment beverage. At the same ime we decided that we could not fford to gamble in entering a new eld, and that Dari-Rich would ave to pay its own way as it went long.

Thus, instead of an elaborate, ation-wide advertising campaign, t was a series of spot announce-nents over a small Chicago staion that introduced Dari-Rich to The public. These were first broadast in February, 1933, last month of the Hoover regime and probably the worst time to launch a new product that could have been found. But, even so, the announcements began to create an interest m the product on the part of the public, and, what was more important to Bowey's, on the part of he dairy-products distributors.

So more announcements were placed on a second Chicago staion, and later on the campaign was extended to include Detroit and Grand Rapids. In the spring of 1934, Bowey's, extending themselves a little but still making each month's business pay for the next month's advertising, used a quarter-hour stock transcription

THOSE dark days of early 1933 were sorry ones for Bowey's Inc. Everything was black but the ink on the ledger—and that was so red that something had to be done about it. Something WAS done, and that's the key to this interesting plot. Dari-Rich has found a rich market. How did it find it? Read Mr. Robertson's biography of the fall and rise of Bowey's Inc. It's a radio thriller of the first water—or milk; chocolate milk.

in Chicago, Detroit, Pittsburgh and Denver.

Easier to Sell

MEANWHILE, Dari-Rich was proving a profitable item for its distributors and was becoming distributors and was becoming easier to sell to milk companies in other cities. By the beginning of 1935 Bowey's had distribution in every state in the union and in two foreign countries. This, they decided, justified a more ambitious advertising program, and in March of this year While the City Sleeps, a quarter-hour transcription series dealing with the adventures of Dari Dan, a typical milkman, on his early morning round, made its appearance.

Each program presents an actual experience of a milk-man, selected from the thousands of contributions which have come in from both milkman and listeners. The scripts are written by Finney Briggs, who also plays the part of Dari Dan, and are recorded by RCA-Victor in Chicago under the supervision of R. A. Sorensen, head of the Chicago office of Russell C. Comer Adv. Co., agency for Bowey's.

Commercials do not over-emphasize the health angle, as it is felt that the public is already sold on the idea that any product delivered by their milkman is healthbuilding. Instead, the radio copy develops the idea that here is an building.

Newspaper Prints Your Name Here INVITES YOU TO LEARNI What the Milkman sees "WHILE THE CITY SLEEPS" Tune to (Station Time) To Order Telephone DARI-RICH

DARI-RICH TIEUP - One of series of spotlight teasers used in connection with Dari-Rich programs.

enjoyable drink, ideal for the child who does not like the taste of milk, and for the adult as a pleasant energy drink in place of coffee or tea. As a sales stimulant, model airplanes and similar premiums are offered to children sending in bottle caps.

The programs are merchandised to the public with frequent radio page newspaper advertisements and to the dairy distributors with generous trade paper space. When-ever a new station is added—there are 16 now and the list is constantly growing—all dairies in the territory are notified by mail a month before the first broadcast. At the same time Bowey's sends a sales crew with an elaborate prospectus into the territory to stimulate cooperation from the dairies, such as the use of bottle collars ad-vertising Dari-Rich and the pro-motion of driver contests. Store displays, signs and window streamers are placed with all stores hand-ling this chocolate drink. Dairy men are invited to a preview of the program at the station, which has proved to be a most effective way of stimulating their interest.

ALTHOUGH practically all deal-

CHEVROLET DEALERS LIKE RADIO

Survey Conducted in the Twin Cities Region by WCCO

- Marked by Preference for Air Medium -

ers were enthusiastic about their present radio program, 55 stated that they preferred live talent to recordings. Radio draws wide customer comment, the dealers re-ported almost unanimously. According to the response to the questionnaires it is the most widely discussed of any of the advertising media and establishes a sound talking point which leads to sales. 90% of the dealers reported Chevrolet customers themselves mentioning the radio program without suggestion by the dealer.

Approximately 75% of the dealers who took part in WCCO's survey found definite sales increases on their records as a direct result of Chevrolet's radio advertising.

In addition, dealers in the Northwest territory have themselves bought football broadcasts on WCCO this year. This unsual step on the part of a dealer organiza-tion came as a result of the success of last year's football broad-casts. When the Chevrolet Motor Co., which had bought the time last fall, decided not to make the purchase this year, your dealers thought the radio advertising so important that they invested their own money in order to bring the broadcasts to the public.

Sixty-seven Chevrolet dealers in St. Paul-Minneapolis territory voted strongly in favor of radio as an advertising medium in a recent survey conducted by the WCCO, Minneapolis, CBS-owned station. Chevrolet, which formerly used network broadcasting and is now featuring spot program in key cities throughout the country, has at the present time three 15-min-ute WBC transcription shows on WCCO every week.

For the purposes of the survey WCCO sent questionnaires to all Chevrolet dealers in the station's primary listening area. Six points were raised in these questionnaires:

- 1. Which do you prefer, radio, newspaper, or outdoor advertising?
- 2. Do you like your present radio program?
- 3. Do you prefer a live program to a recorded one?
- 4. Do your customers refer to your radio program? 5. Do you think your radio program has increased sales?
- 6. What is your opinion of the value of this program?

Asked which advertising medium they preferred, 44 dealers replied in favor of radio, 14 for newspapers, and 3 for outdoor.

Sales 50% Ahead of 1934

SALES of Dari-Rich in 1934 were double those of '33 and so far this year are 50% ahead of '34. In July alone more than 3,000,000 quarts of this chocolate drink were sold. The eastern market has grown to such proportions that Bowey's have had to open a plant in Jersey City just to handle it.

Their radio advertising has also helped their soda fountain supply business because so many druggists have heard and liked the programs that they give a friendly reception to the salesmen from

Bowey's.

Ohio State Replies To Grid Protests

Explains Football Sponsorship Contract With Ohio Oil Co.

ALTHOUGH the Ohio Oil Co. Columbus, has contracted with Ohio State University's athletic department for the exclusive right to broadcast its eight football games in Ohio, the sponsor and its agency have not only extended permission to WOSU, the state university station, to carry the games but "will consider applications from other stations to carry the games if they take the oil com-pany's broadcasts and bear the additional costs.

This advice comes to BROADCAST-ING from Herbert Byer, of Byer & Bowman Inc., Columbus agency, in response to an inquiry based on the protest raised by the Scripps-Howard newspapers against sale of exclusive rights to football games by a state institution. Scripps-Howard recently acquired WFBE, Cincinnati (now WCPO) and wants to carry the games.

Commercials Limited

THE Ohio Oil Co. broadcasts will be over WLW, Cincinnati, and it paid the university \$6.000 for the exclusive broadcast privilege. agency estimates that additional costs for station time, line charges, announcers, etc., will amount to about \$11,000, and it is spending \$10,000 more for newspaper advertising and other promotion incident to the broadcasts.

"You may be interested in knowing," Mr. Byer stated, "that we plan an absolute minimum of commercial in connection with the broadcasts. There will be a bare mention of the company name and product and a gift of a score chart for a minute or less before the game; about 30 seconds just be-fore the start of the second half; and about 10 seconds at the end of the game. As you can see, there be no commercial between quarters or at any time during the course of the play."

Although Mr. Byer disclaimed any knowledge of the Scripps-How-

ard protest, Karl Bickel, heading the newspaper organization's radio activities, revealed that on behalf of the Cincinnati Post and other Scripps - Howard newspapers, as

Tires and Radios

KADA, Ada, Okla., places remote equipment on the highway between Ada and Oklahoma City once a week, stopping motorists and asking them if their cars are equipped with radios. program is sponsored by a tire distributor. Some 81% those interviewed their cars radio equipped. "How are your tires?" is one of the questions.

well as WFBE, he had protested to Lou Morrill, vice president of Ohio State University, against the sale of exclusive broadcast privileges to any one sponsor in a man-ner that would exclude other radio stations from carrying the games. Mr. Bickel took the stand that

no state institution should be permitted to debar others from broadcasting its games any more than that it should discriminate between newspapers in the press box, and pointed out that Cincinnati University is following an open-to-all policy. He said he appreciated the fact that a contract was already signed but added that he had received assurances from Mr. Morrell that the university would not sell the games on an exclusive

basis after this year.
Questioned by BROADCASTING about the broadcasts, Mr. Morrill replied: "We know of no formal 'Scripps-Howard protest' but have had conferences with Karl Bickel of Scripps-Howard and Continental Radio Co., and with Nelson Poynter, editor and publisher of the Scripps-Howard Columbus Citizen, in an endeavor to work out some arrangements whereby the Scripps-Howard station. WCPO (WFBE) might broadcast the games without violation of the university's contract made in good faith with the Ohio Oil Co. last April. Mr. Bickel has represented to us that it is his belief that the University has no ethical or legal right to sell football radio rights exclusively to one sponsor, and he has suggested alternative policies which have sound merit but which the University by reason of its bona fide contract with the Ohio Oil Co. is unable to adopt this year."

Plain-Dealer Gets WJAY

ASSIGNMENT of the control of WJAY, Cleveland, to the U. B. Co., controlled by the Cleveland Plain-Dealer, which now operates WHK, Cleveland, and WAIU, Columbus, was sought in an applica-tion field with the FCC Sept. 17. Simultaneously, the Plain - Dealer asked for transfer of control of WHK to the U. B. Co. WJAY, a daytime 500-watt station on 610 kc. is licensed to the Cleveland Radio Broadcasting Corp., control of which is held by Monroe F. and Ruth Rubin. The application seeks transfer of 666 2/3 shares of common stock to the U. B. Co., pursuant to an agreement held by the Plain - Dealer for that purpose.
The purchase price was not divulged.

Paul Whiteman Is Signed By John H. Woodbury Co. To Three - year Contract

PAUL WHITEMAN and his entire aggregation have signed a three-year contract, effective Jan. 1, 1936, for broadcasting exclusively under the sponsorship of the John H. Woodbury Co., Cincinnati (soaps), through the agency of Lennen & Mitchell Inc., New York. The agreement is so framed that either the agency or the sponsor would continue the contract if either one should drop out.

The Woodbury company formerly sponsored Bing Crosby on CBS, and it is by a coincidence that it has now signed Whiteman while Crosby has been engaged to succeed the king of jazz on the Kraft-Phenix program (NBC-WEAF, Thursdays, 10-11 p. m. EST). Crosby's booking for this spot becomes effective early in December.

Time has not yet been cleared for the Woodbury program, but negotiations are taking place with NBC for a full hour on a coast-tocoast hook-up. The Whiteman band and soloists will be augmented for these shows with other stars to be signed later or developed by Whiteman personally. He will be permitted to produce a show according to his own ideas. The three-year contract is said to involve total expenditure of more than a million dollars.

FCC RULING BALKS BUICK DISC SPOT

PLANS of the Buick Motor Co. 4 run an extensive schedule of 1 second transcribed spots for str tion breaks probably will be a tered or dropped because of ruling by the FCC that the spot would have to be announced a "electrical transcriptions" befor rendition.

The question of announcemer was raised by James W. Baldwin NAB managing director in a letter to the FCC, sent on behalf c Edward Petry & Co., station representatives. Mr. Baldwin wrot that the continuity proposed which would consume only 15 sec onds without music would be a follows:
"Horn: (Sound of automo-

bile horn)
"Flash! Here's the big automobile news Buick's the buy! for 1936!

"Horn: (Sound of automobile horn)

On Sept. 20, Chairman E. O Sykes of the Broadcast Division replied to Mr. Baldwin that Rule 176 requires that a mechanical re production shall be announced as such immediately preceding the use thereof, "unless its use if merely incidental as in the case when such electrical transcribed material constitutes an identification of a program or used for background purposes. If in fact the proposed electrically transcribed material is not merely incidental to the main program, it must be announced in conformity with the rule.

Dodge Grid Sponsorship

ALTHOUGH it will carry no sponsorships of collegiate football games, WGN, Chicago, for the third successive season has signed with the Dodge Dealers Assn. Inc., of Chicago, for sponsorship of eight Sunday afternoon professional grid games starting Oct. 13. Following the football series, the same sponsor will launch a new series of Gloom Dodger programs such as it sponsored during the spring and summer for 90 minutes. Sunday mornings over WBBM, Chicago. Ruthrauff & Ryan Inc., Chicago, handles the account.

MISSION MOTIF-Elaborate new quarters of KNX, Hollywood, opened in September at 5939 Sunset Blvd., involved construction costs in excess of \$250,000. Modernistic color treatment in the six studios is combined with utility in the six floating studios. Studio A, the major unit, is 30 x 60 feet. The new \$35,000 Morton organ is in Studio B. Double-doored vestibule approaches prevent sound leakage. Broadcasting equipment is RCA, including speech input apparatus and ribbon pedestal microphones. Programs may be monitored from individual control rooms adjoining each studio, with all monitor rooms visible from the central control panel. Conceivers and executors of the new plant were Guy C. Earl Jr., chief exscutive of Western Broadcast Co., and Naylor Rogers, general manager. An audition and map room depicts the KNX coverage area, frosted panes showing the coverage when illuminated. A concealed speaker also permits audible presentation of the KNX story to prospective sponsors.

Broadcasts Made Sanders What It Is Today

By EDWARD J. SANDERS

President, Sanders Clothing Co., Milwaukee

Big Clothing Store, From Humble Start, Grows and Grows, With Radio Merchandising Receiving All the Credit

HE ever-increasing volume of dio advertising attests the value this medium as a business buildbut in our case advertising over 7TMJ, Milwaukee, not only in-reased our sales volume tremenously but was also responsible for complete revamping of our mernandising methods and of the ore itself. The Sanders Clothing o. of today can hardly be recogized as the same store which tarted in business in August, 1931. Our first contract with WTMJ alled for only one 50-word an-ouncement daily on the noon proram of Heinie and His Grenathers at a net cost to us of only 3.50 per broadcast. This schedule tarted on May 19, 1933. At that me the interior of our store did ot present a very beautiful pic-are, inasmuch as all of the limted stock was racked on poles which were held in suspension by ery crude stands.

Quick Results

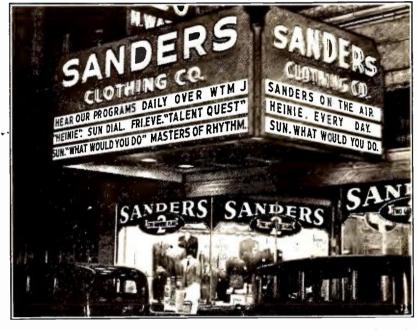

HE exterior of the store was ithout any identifying sign other han a painted board across the ront and only one large window xisted, which was very poorly ghted and trimmed. The only enrance to the store was at the side. he type of buyer who frequented ur store could be classed in the anguage of the day as the "sheik" The stock of merchandise gether with announcements on the early morning Sun Dial program over WTMJ.

During the latter part of 1933 but more particularly in the spring of 1934, the increase in business which we could credit to our radio effort was very noticeable, both in volume and particularly in the class of clientele developed. More stable, sound and conservative buyers supplanted the original type and the merchandise we were forced to purchase to meet this new class of trade was of a better quality and more conservative than in the past.

The interior of the store changed gradually from that time to the present. The stock is now kept within especially constructed showcases, the entire store having been remodeled and redecorated. More recently the only modern daylight lighting system in any Milwaukee retail store was installed through-out our establishments. This system eliminates the old manner of determining color by walking to the store doors to see by natural

Exterior improvements of the store consist of a change to modern windows, center entrance and modern sign. The original painted board outdoor sign was replaced with what was considered to be a satisfactory identifying electrical sign, but this has just recently circumstance which shows how widely our air message is spread. Many unusual and profitable sales have been made in the most unexpected quarters. For instance, the sheriff of La Crosse county, more than 200 miles distant, came to Milwaukee on an overnight train, telephoned the store from the rail-

Another interesting phase of our radio experience is the increase in the number of women visiting our store. In the old days our men customers, for the most part, came in to shop alone. In an attempt to correct this situation we sponsored a special series of programs over WTMJ in the year 1934 — these programs designed to appeal particularly to women. As a result of this series, as well as our other broadcasting, we now find that eight out of every 10 men who

SIX STORIES HIGH—Towering far above the sidewalks, Sanders, in Milwaukee, an electric sign identifies the store. At its base is this canopy which merchandises the store's radio programs on WTMJ.

HAD YOU GONE into the tiny room that housed Sanders store back in 1931 shortly after it entered the Milwaukee retail scene, you might have bought a cheap, lashy suit from humble racks. Let history skip a few vears, and you find a big, up-to-the-minute establishnent with a sign six stories high and an electric canopy lescribing the extensive radio merchandising that the tore promotes. It's a miracle in merchandising, and Mr. Sanders knows the whole story, because he created he situation, drafted the plot, and acted the parts.

arried in our store was conseuently a cheap but sporty class f clothing designed to satisfy that

ype of customer.

The first small schedule of announcements on WTMJ began to roduce business quickly. It was not long before clothing buyers becan to enter the store with the ypical expression of "Heinie sent ne", referring of course to the German character who conducted he program on which our an-

ouncements were broadcast.

In the fall of 1933 we added a loweeks' schedule of announcements on a special Friday night proadcast, entitled Campus Revue. About Jan. 1, 1934, announcements on the evening Heinie broadcast were added to our schedule to-

been replaced in turn by a large sign rising six stories in height above the canopy which covers the main entrance. This canopy was constructed especially with a view to promoting our radio broadcasts (See accompanying photograph). Provision is made on the three sides of this canopy for a complete listing of all of our programs over

Before we began using radio our business was purely local in character. Today more than 40% of our total volume of sales is made persons outside the immediate Milwaukee trading territory. People have come to our store from all points in Wisconsin and from neighboring states. Not a day passes without some interesting

way depot to get his bearings, and purchased five garments, the sale of which he was insistent should be credited to a WTMJ radio character.

Numerous persons from the northern peninsula of Michigan buy suits, overcoats and topcoats for the entire male members of their families, coming to Milwaukee en masse for this purpose. In all instances these folk seem to feel quite at home in our store. Our name and the story of our store coming into their homes day after day over a long period of time has evidently made them feel that they already know us.

And They Buy Clothes

IN MANY cases out-of-town visi-WTMJ's studios with a desire to view one of the broadcasts over which they hear our messages. Recently two individuals from Oklahoma, who claimed to be regular listeners, made a business trip to Wisconsin. As they were within driving distance of Milwaukee, they came here and their visit resulted in the sale of four suits. It is a common happening for people from Chicago to buy their clothes at Sanders, as we find that many folks in that city hear our programs regularly.

come into our store are accompanied by women members of their family. To make the most of this changing situation it was necessary to give our salesmen special training in the best methods of selling the weaker sex the merit of our merchandise.

As our business steadily increased, and as the physical lay-

out of the store and the quality of the merchandise was being improved, we made consistent surveys of our daily sales to determine the influences which brought customers to our store. In only a very few instances did we find anyone who mentioned any other medium than WTMJ. Consequently more and more time was enlisted on this station. We eliminated en-tirely many of the small mediums which we had previously employed, concentrating practically our en-tire advertising appropriation in the purchase of station time and talent. Today we are the leading retail radio account in Milwaukee by a large margin. We have announcements daily on both the programs of Heine and His Grenadiers and the cost is considerably greater than the small original contract which we first signed back in 1933.

Broadcasting Comes to the Campus

Realizing Need of Training in Newest of Industries, Many Colleges Now Are Providing Instruction in Radio

By RICHARD A. COBB

RADIO as an industry is so new that, until recently, it had not seemed necessary to try to train young men and women for positions in this newest and biggest branch of advertising. But overnight radio has become a business that requires thousands of trained men and women to keep the machinery behind the microphone

moving day and night.

Formerly a few adventurers came out of college and landed a job with a radio station just for the thrill of "being on the air". Some of them liked radio, learned the business, and now hold respon-sible positions. Since there now is "break-in" newcomers, they must come prepared to battle with important problems and decisions from the very first.

What They Are Doing

ALTHOUGH colleges and universities are now recessed for the summer except where summer school is maintained, it is interesting to note what they are doing to help their students prepare for this \$100,000,000 a year business.

Oglethorpe University, Atlanta, has established a School of Radio Broadcasting and grants a degree

to students who complete the course. The University of Denver gives six evening courses in radio writing and production. Western Reserve, Cleveland, offers three courses: radio announcing and acting, radio writing, and play production.

Northwestern, School of Com-merce (evening division) Chicago, offers four courses in radio advertising. A course in writing for ra-dio was inaugurated at Northwestern three years ago, but the courses have been revised to provide a background in fundamentals before offering more complex instruction.

Prof. Lloyd Herrold of the department of advertising at North-western said: "I certainly feel that cooperation with radio stations is necessary for a college course in radio advertising. We find it very helpful to students to call on various radio men for a

lecture during the first course."

Boston University, College of
Business Administration, had two Business Administration, had two courses in radio advertising which were given in the evening division by Ralph Rogers of Radio Writers Inc. They were the general course, radio advertising, and radio program production. Mr. Rogers expressed the opinion that college courses in radio advertising are of practical value in that they give a practical value in that they give a student a wedge into an advertising agency. This is especially true in the cities outside New York, Chicago and Hollywood, where local programs must have plenty of showmanship to compete with

network shows opposite them.
At the School of Commerce of
New York University a single
course titled Radio Advertising has been given for the last three years, and has proved popular. Hugh E.

THE CAMPUS is coming into the radio fold. More and more colleges are providing courses in the various phases of broadcasting and broadcast advertising. Here Mr. Ross discusses data obtained from questionnaires sent to colleges and from a survey made by Cline M. Koon, radio specialist of the U.S. Office of Education. Among colleges giving radio courses, exclusive of art, musical and junior colleges, are University of Southern California, University of Denver, Oglethorpe University, Northwestern, Iowa State, Drake, Kansas State, Boston University, Michigan, Syracuse, New York University, Rochester, Akron, Western Reserve.

Agnew, chairman of the Department of Marketing at New York University, said: "College courses in radio advertising should be designed basically to give the stu-dent enough practical information to enable him to follow this work with a broadcasting company, advertising agency, etc., in a minor capacity to start. I feel that radio is a very popular subject and it is possible that there should be a gen-

eral course for those advertising and business students who merely want to round out their marketing education."

At Wharton School, University of Pennsylvania, radio advertising is discussed as part of the general advertising course. Dr. Herman S. Hettinger, author of A Decade of Radio Advertising, and an executive in the National Association of Broadcasters, ex-

TEACHING RADIO AT MICHIGAN

Six Courses in Technique of Broadcasting Offered -With Practical Aspects Emphasized

By PROF. WALDO M. ABBOTT

LAST fall, the University of Michigan inaugurated six courses in broadcasting technique. The close of the 1934-35 college year provided the initial opportunity for a review of the courses and their apparent effectiveness, both in training future graduates for practical work in the studio and in training teachers to receive the greatest advantage from educational radio programs heard in their classrooms.

Outstanding among the many features of these college classes is the fact that they have successfully combined the practical with the theoretical and have offered students training which will be in-valuable to them in work with commercial stations while also giv-ing them a knowledge of the shortcomings and faults of radio broadcasting of today.

Actual Experience

ON THE practical side, students enrolled in the courses took part in programs broadcast by the University over WJR, Detroit. They presented, in answer to the requirements for a mid-term examination, a full morning's broadcast over the studio's public address system. In this instance they served as station managers and announcers, artists, continuity writers, and, in short, in every other capacity required of a station worker with the exception of advertising solicitation.

Movies to give students a picture of tennis matches, ball games, and other sports events to be described over the studio public address system. The movies were projected on a small screen in front of the announcer and were then described as though they were actually taking place at the time. In this manner students were given practice with so-called "running accounts" over the radio.

Another feature of the work in

radio technique was the inclusion of short discussions on various phases of the work by experienced broadcasters from WJR. After being interviewed on the air for 15 minutes on some phase of radio endeavor, these speakers conducted discussions by the class. speakers were: Leo Fitzpatrick, vice-president and general manager of WJR; Ty Tyson, sports announcer for WWJ; Lewis Allen announcer for WWJ; Lewis Alien Weisse, assistant general manager of WJR; Brace Beemar, general manager of WXYZ, and others.

Actual programs have been broadcast from the University campus since 1923, when they were

first sent out over a student-constructed, 200-watt station, WCBC. Since 1925 programs have been broadcast annually over WJR.

Until last year, however, these programs were of four types: Paradastical construction.

ent education programs, music in-struction classes, school programs, (Continued on page 43)

pressed the opinion that there room for one single-term, thre hour course in radio advertisi at the University of Pennsylvar In answer to the question "A courses in radio and a college ex cation sufficient background entrance into active broadca ing?", Dr. Hettinger replied: "Experience is needed. It is nec sary to learn the application theoretical training by actua

Kansas State College of Ag culture and Applied Science Manhattan, Kan., offered thr courses in the general field of r dio in the Department of Pub Speaking: Radio speaking and a nouncing, the radio program, a program participation. Prof. B. Summers of the Department Public Speaking at Kansas Sta has this to say about colle courses in radio broadcasting:
"The most practical feature

our courses as they now stand the presentation over the colle radio station, KSAC, of seven st dent programs each week; pr pared, directed and presented e tirely by students. Five of the programs are of the informati type, each covering current nev and timely discussions in son given field, such as national a fairs, news of the colleges, etc. each, from four to six students a used; one presenting a review the news of the week, with con ments; a second (usually) presenting a feature-type talk, stressing novelty, humor or human-intere elements; and others presenting either more serious talks, or usin dialogue, dramatic, interview forum methods of presenting info

Dominated by Students

"THE SIXTH program includten minutes of music, and a 2 minute period modeled after the March of Time broadcasts, but taking up high lights in historical events which occured during the corresponding seven days. The seventh program includes 20 minutes of music, and a ten-minut dramatic presentation, with scene laid in college settings.

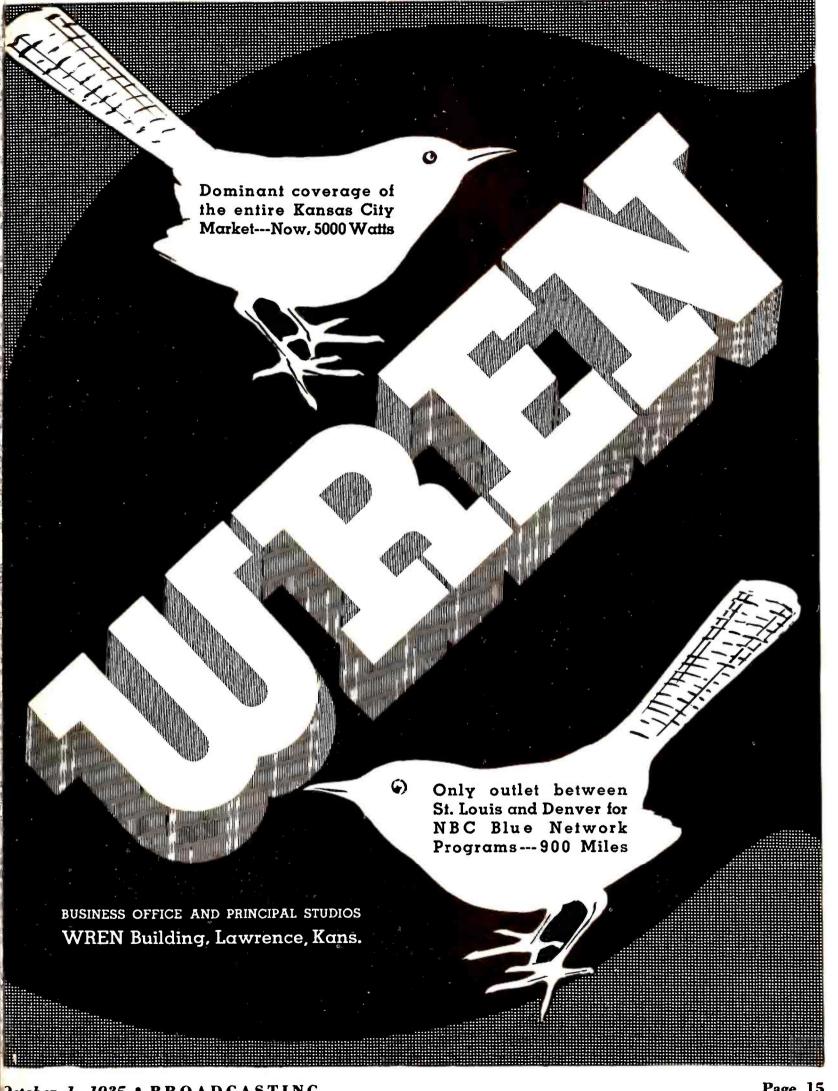

"All of these programs are stu dent planned and student director Continuities for all programs ar prepared entirely by students. An only students take part in the pro grams themselves, as directors continuity writers, speakers, mu sicians, or actors. Probably from the standpoint of actual studen participation, our courses here about as far as do any offered in any college in the country — a least, as far as I have been able to discover."

Thus we see that many college.

are aware of the newest trend in advertising — to the air — and ar doing their part to help under graduates, as well as business an professional men and women t become more familiar with a business that interests and influence everyone within earshot of a loud-

speaker.

Radio stations are cooperating with the colleges, realizing that education must come first, but that experience has the edge on education in this fast-moving business. In the not too distant future, the roster of radio executives will contain the names of many college students who have worked their way to the top.

Summer Slump Is Overcome; **Record Winter Now Foreseen**

August Advertising Volume Only 3.5% Below July And 48.6% in Excess of Figure a Year Ago

THE FIRST definite break in the traditional summer decline in broadcast advertising and the promise of a banner winter were indicated in the August broadcast

advertising figures released Sept. 25 by the NAB.

August radio advertising volume totaled \$5,637,490. Whereas in 1933 the July - August decline in broadcast advertising was 5.9%, and 10.2% in 1934, revenues for August of the current year were but 3.5% below the preceding month's level.

More significant is the fact that an actual increase was recorded in one portion of the medium. National non - network advertising rose 3.8% in August as compared with July volume. This is probably the first time in the history of the medium that an upward trend has been experienced at this time of the year.

Increased national non-network business during the month, com-bined with a rise in general non-network volume on clear channel and regional stations, seems to indicate an attempt on the part of national advertisers to secure preferred spots on individual stations in anticipation of a growing fall and winter volume of national network and non-network business.

Far Above 1934 Level

BROADCAST advertising volume in August showed more pronounced increases over the corresponding period of previous years than has any month of the current year.

any month of the current year. Total broadcast advertising was 48.6% greater than during the same month of 1934, and exceeded August 1933 by 52.5%

National non-network advertising showed the greatest gains, exceeding the previous August's level by 128.2%. National network volume was 30.7% above August 1934 and more than half again as much and more than half again as much as in 1933. Regional network vol-ume was double that of last year. Local broadcast advertising exceeded last year's figure for the corresponding month by 22%.

Radio advertising volume for the first eight months of the current year points to the very great pos-sibility that the total business for the year will approximate or possibly exceed the \$90,000,000. Previous estimates had placed the figwith the strong August showing and reported business, a larger total volume is envisioned.

Gross time sales for the first

eight months of the current year have been equal to the estimated total of the medium for the entire year of 1933, and exceed those of the corresponding period of 1934 by 21.6%.

Radio broadcast advertising volume in August is found in the following table:

July Aug. Jan.-Aug. National networks \$3,175,042 \$2,939,097 \$32.234,549 Regional 92,102 82,993 networks National nonwork 1,297,065 1,347,440 11,235,558 1,283,795 1,267,960 12,450,365 Total \$5,848,004 \$5,637,490 \$56,561,466

July

General non-network advertising rose 1.3% during the month and was 59.6% above the corresponding month of 1934. Gains occurred on clear channel and regional stations, local volume dropping 13% as compared with July. Local station advertising remained 22.4% above the level of the same month of 1934 and was 78.5% greater than in August of the previous

Particularly interesting trends are revealed by an examination of types of rendition used by advertisers during the current August as compared with the corresponding month of the two preceding

In the national field, transcription volume has begun to show seemingly important gains following an uncertain course for a period of months. August national transcription business exceeded that of 1934 by 165.5%, and was 137.0% above the 1933 level.

National live talent volume continued its strong showing. Non-network advertising of this type showed a gain of 176% as compared to last August and exceeded the level of the corresponding month of 1933 by more than three times. On the other hand, national announcement volume gained but 3.8% as compared to August of last year, and was 2.4% greater than during the corresponding than during month of 1933.

month of 1933.

Local transcription volume also showed strength, registering a gain of 33.7% over August of last year, and 68.3% over the same month of 1933. Live talent business fared less well, gaining but 10.2% as compared to 1934 and showing a decline of 81% as showing a decline of 8.1% as against August 1933. Announcement volume showed an increase of 28.7% as against last August. Taken as a whole, and in spite

vertising expenditures of various groups of advertisers during the

current August and August, 193 probably the low point of rad advertising during the depression reveals interesting trends.

in the field of sponsorshi

August gains were restricted a most exclusively to the nation non-network field, in which the principal increases occurred in a

tomotive, tobacco, soap and kitche

supply and food advertising. Gain

were fairly general as compared the preceding year. Retail sto: advertising volume was partic

larly encouraging, increasing 1.8

over the July level, and showir a gain of 55.9% as against la August. Department store volun

August. Department store volun was 58.6% greater than durin

A General Increase

A COMPARISON of the radio ac

August of last year.

In the national network fiel general gains have been exper enced, the heaviest ones occurin with regard to convenience good Accessories, food, soaps and ki chen supplies have been amon the field showing the greatest an most consistent gains. Confectionery advertising and household equipment advertising have begu to make a strong showing follow ing declines in 1934. Tobacco ac vertising regained its 1933 leve On the other hand losses were ex perienced in automotive, beverag and financial advertising whe compared to 1933. Automotive net work advertising however, wa 33.5% greater than during th corresponding month of last year

In the national non-network fiel marked gains have occurred is automotive, food, drug, beverage household equipment, soap an nousehold equipment, soap air kitchen supply and tobacco advertising. In many of these field current August volume exceede that of the same month of 1933 by more than three times. Tobacc advertising increased from \$1,29 in August 1933 to \$50,300 during Tobacc the same month of the curren year. National non-network cos metic advertising, on the othe hand, decreased more than two thirds from its August 1933 level Few changes of importance have

occurred in the local field during the past two years. Following decided upswing in the summer o 1933, due seemingly to New Dea and NRA optimism, local broad cast advertising followed an un certain course for some months reflecting the uncertain retail con ditions of a considerable portion of 1934. Since then marked gain have occurred however.

Principal local gains have been in the clothing and apparel field in housefurnishing advertising beverage and automotive advertis

Network Income for 8 Months of 1935 Almost Equals Total for All of Last Year

THE LARGEST monthly gain recorded by any of the major net-works in the total dollar volume of business was achieved by CBS in August, when it grossed \$879,-019, an increase of 71.2% over the previous year's figure for the same month, and the largest August income on record. The NBC-WJZ blue network hung up a record increase of 55%, with a gross of \$756,797.

For the first eight months of the year, CBS has now a cumulative total income of \$12,463,371, 22.1% better than last year, and the combined NBC networks (including the Pacific coast) have \$20.667,094, which is 16.5% better.

The first eight months, with a network income of slightly more than \$35,000,000, came within striking distance of the complete

Total\$7,721.651

total for 1934, which was a little over \$36,000,000, and of course the latter figure will be easily sur-passed when the figures for September, completing the first threequarters of the year, have been computed.

Detailed analysis of the CBS business for September on an hourly basis (dollar figures are not yet available) shows an improvement of 45.9% over September, 1934. Daytime hours (from 9 a. m. to 6 p. m.) were 13.1% sold in 1934, and 25% sold last month; the percentages for evening time (to 11 p. m.) were 47.9 and 59.3. On the day's total. 1934 showed 25.5% sold, and 1935 registered 37.2%. The gain of 11.7% constitutes 45.9% of the 1934

OWNED AND OPERATED BY THE DALLAS TIMES-HERALD

Kenyon&Eckhardt Names Peter Dixon

Will Head Radio Department: Lehn & Fink to Use Spots EXPANSION of

the radio activities of Kenyon & Eckhardt In c., New York, was revealed with the naming Sept. 23 of Peter Dixon, well known radio program producer and writer, as

Mr. Dixon that agency's radio director. Working with Robert Leavitt, account representative, Mr. Dixon will handle the account of Lehn & Fink, New York (Hinds Honey and Almond Cream), among others, including not only a net-work show starting on CBS Oct. 6 but a 20-station spot campaign to start the week of Nov. 4. Mr. Dixon for several years had

headed his own program producing organization, Peter Dixon & Associates, which will be continued under the direction of Aline Berry (Mrs. Dixon), who was the fem-inine lead with him in their first script show Raising Junior, forscript snow kaising Junior, for-merly carried on NBC for Whea-tena. Mr. Dixon will drop his well-known newspaper column "In-side the Studios".

Another addition to the firm of Kenyon & Eckhardt during the last fortnight was William P. Gaines, formerly with the Associated Press and with New York newspapers, to become director of publicity.

Hinds Spot Campaign

IN ITS SPOT campaign, Hinds intends to sponsor selected local programs in the various cities. The first and only program signed to date is the *Life of Mary Sothern*, over WLW, Cincinnati.

The Hinds network show will begin Out 6, 2,20,0 n.m., to be program of the control of

gin Oct. 6, 8:30-9 p. m., to be preceded for a half hour by the Eddie Cantor show also sponsored by Lehn & Fink but for another prod-uct—Pebeco toothpaste. The Eddie Cantor show is handled by Lennen & Mitchell, this sponsor fol-

hardt is Piel Bros., Brooklyn (Piel's beer), currently using one to five-minute spots in nine Southto five-minute spots in nine Southern cities to announce its new "stub" bottles of beer in competition with canned beer. Two to eight spots are used daily over WBT, Charlotte; WMBG, Richmond; WMMN, Fairmont, W. Va.; WMFD, Wilmington, N. C.; WTOC, Savannah; WFBC, Greenville, S. C.; WCSC, Charleston; WIS, Columbia, S. C.

GUGLIELMO MARCONI, the wireless inventor, has announced his intention of joining the Italian forces in Ethiopia as communications expert following his return from Brazil where he went to attend the opening of a new station at Santos.

RADIO WRITERS LABORA-TORY, offering a script service to stations and advertising agencies, has been formed with headquar-ters at 53 N. Duke St., Lancaster, Pa. M. S. Miller is the director.

FROM THE SEAS Indiana S-O to Put Orchestra On Air Enroute

A NOVEL wrinkle in commercial programs will be introduced over CBS Oct. 13 when, on behalf of its sponsor, Standard Oil Co. of In-diana, it carries the first of a series of broadcasts by Jack Hylton and his orchestra from London and then follows this by broadcasting the band from aboard the Normandie Oct. 15 while en route to America. To facilitate the handling of the relays, CBS on Sept. 26 sent Lester Bowman, chief engineer of its WJSV, Washington, to London to collaborate with the BBC in the first transmission and with the Normandie wireless men in the second.

After the band arrives, it will proceed to Chicago whence it will broadcast a weekly program, Sundays 10:30-11 p. m. (EST), over a 19-station hookup of CBS Middle Western outlets. The Hylton band is one of the most popular in England, and is planning to tour this country. McCann-Erickson Inc., handles the account. Engineer Bowman was one of the CBS technicians who went abroad last summer to handle the relays from the maiden trip of the Normandie.

Radio Gaining in Power To Sell Goods to Women, Mr. Bijur Tells Ad Club

WITH the rapid increase in the number of sponsored programs aimed at the feminine audience, radio has achieved many outstanding sales successes, George Bi-jur, CBS sales promotion direc-

Mr. Bijur told the Advertising Women

of New York Sept. 24.

Among these he cited the Lady Esther cosmetics series on both CBS and NBC, using Wayne CBS and NBC, using Wayne King's orchestra. "Without salesmen, demonstrators or discounts," Mr. Bijur said, "their sales inmr. Bijur said, their sales increased until, from fifteenth place among popular brands of face powder in 1932, Lady Esther had risen to first place in 1934. Lady Esther concentrated 96% of their adversales. tising appropriation in radio broadcasts.

Another success story he mentioned was Campbell Soup's radio campaign. All of which goes to prove that woman's place is in the home, where she listens to an average of four hours and a half to radio programs, as well as in professional life, he added, explaining how there now are four times as many sponsored daytime programs as was the case five years ago.

KFRU Changes Hands

RECONSIDERING its action of the preceding week setting the application for hearing, the Broad-cast Division of the FCC on Sept. 24 granted the application of KFRU Inc., operating KFRU, Columbia, Mo., for transfer of con-trol from Nelson R. Darragh, of St. Louis, to Luther L. Hill, of

WHOPPERS - These three marlin swordfish were caught on Freeman Lang's yacht "Content" recently, weighing 220, 212 and 182 lbs. respectively. Left to right: Free-man Lang, Los Angeles transcrip-tion producer; Paul Grade; C. Ellsworth (Dick) Wylie, general manager, Don Lee System.

ELLIOTT ROOSEVELT SBS VICE PRESIDENT

ELLIOTT ROOSEVELT, 27-year-old son of the President, has taken up his new duties as president of the Southwest Broadcasting Co., in charge of sales promotion, Lee

Mr. Roosevelt Armer, president of the network, announced Sept. 26 while in Washington. Mr. Roosevelt left his post as an executive of the Aeronautical Chamber of Commerce to accept the new assignment and will headquarter in Fort Worth. During the week of Sept. 24, Mr. Roosevelt visited New York agencies on behalf of

the Southwest organization.
Simultaneously, Mr. Armer announced that Humboldt Greig, commercial manager of the network, had been transferred to Dallas as manager of its new office in the Adolphus Hotel. He also will continue as commercial supervisor

of the network.

The Southwest network is now represented nationally by Free, Johns & Field, having terminated its association with John Blair & Co. on Sept. 21. F. J. & S. will represent both the network and the five Southwest-owned stations—KTAT, KOMA, KTSA, WACO and KNOW.

Larson Named as Rep

G. B. LARSON, radio director of The Joseph Katz Co., advertising agency of New York and Baltimore, has been named American resident manager of Radiodiffusion Europeenne, a European chain of commercial broadcasting stations, according to an announcement Sept. 23. He will continue, however, as the Katz radio director in New York. Mr. Larson succeeds Wendell Snow Gibbs, American representative of the European group, who has been transferred to the London office. American headquarters are at 30 Rockefeller Plaza, New York.

15 Sponsors Signed By Texas Quality

SHORTLY after celebrating it first anniversary with a special program Sept. 11, the Texas Qual ity Network signed its fifteentl account-Humble Oil Co., Hous ton, which on Sept. 18 purchased 12 weekly quarter-hour program and undertook the sponsorship o 10 Southwest football games Franke - Wilkinson - Schwietz Inc. Houston, placed the account on the regional network which include: WFAA - WBAP, Dallas - For Worth; WOAI, San Antonio, and KPRC, Houston. The anniversary program was

dedicated to the sponsors of the 3: weekly programs carried on the network, with the names of each of the TQN sponsors woven inte the continuity. In addition to the Humble account, 11½ hours of sponsored programs are carried weekly on the hookup and two sus tainings, the Sunday morning Texas Farm and Home Hour and the Wednesday night variety show titled The Passing Show.

American Newspaper Publishers Associa-MA

—short for Maggie —which is short for Magazines.

MIKĔ -short for Microphones -which, in this script, is short for: Radio Networks

ote: All lines to be played straight, not for laughs. Music: None required

If used, stick to brassy dissonance, up and under, with occasional brief moments of har-

ANNOUNCER: We find Pa and Ma and Mike closing up their general store in Ad-Town, after a busy day. Pa (short for ANPA) is shoving home the bolt on the front door after the last departing customers with whom he has been talking earnestly. He is muttering to himself. Young Mike (short for Microphone or Radio Networks) is still busy behind a long counter. Pencil in hand, shirt-sleeves rolled up, he is apparently absorbed in a long list he is checking. Ma (other-wise Maggie, otherwise Magazines) cocks a weather eye at Pa, as she takes off a bright four-color apron and lays it carefully aside for further use. She is, of course, past middle age. In her plain black and white dress with saddle-stitched yoke, she looks prim and severe as she tidies up the bedding de-partment which is her special province.

(Click of door-sound of bolt

sliding home)
Now Ma calls out to Pa in a

Now Ma calls out to Pa in a harsh but not unkindly voice.

MA: (Magazines) You thunderin' fool—you did it again!
PA: (Newspapers) Quit your naggin' Maggie. Wha'd I do?

MA: Ye talked those customers right out of buyin' anything. Have ye no sense at all stall? You were

ye no sense at-all at-all? You were so busy tellin' 'em about young Mike that you didn't sell any of your own groceries. I heard every

word of it.
PA: Eavesdroppin', eh? When
ye should have been sellin' yer own

slow-movin' stock!

MA: Slow-movin' indeed! While you were dishin' out the dirt about our foster-child—'twas me sold 13 of my finest spreads to the General Motors Family. And a dozen large coverage blankets! Ye'll have to turn over a new leaf to offset that, m'dear!

PA: (sullenly) A nasty pun, Maggie. Hold yer tongue.

MA: (vehemently) My tongue? Hmph! It's yours I'm talkin' about! Runnin' down the lad with the store full of people! Can't we keep our family squabbles to our-

MIKE: (Radio Networks) (Looking up from large cardboard A Five-minute Radio Script Revealing The Futility of ANPA's "Yardsticks"

box he is packing with groceries for delivery) Oh pipe down, Ma. Let him rave. Nobody listens to him anymore-

PA: (voice takes on fretful pitch) You ungrateful young pup. Twas me took you in when they left you on our doorstep in a box full of wires and gadgets. If it hadn't been for me feedin' you fresh radio columns and sterilized Sunday features when you was a little tike, ye'd never have grown up at-all—for all the thought that Maggie gave ye in them days.

Maggie gave ye in them days.

MIKE: I've heard all that Pap.
But haven't I turned to and
worked in this store nearly 16
hours a day ever since I was big
enough to carry a tune?

PA: More's the pity. An' as fer
nobody listenin' to me—ye young
squirt—Did ye see Mr. and Mrs.
Advertises open their eyes when I

Advertiser open their eyes when I told 'em you'd lost 400 out of 600 customers you used to have?

MIKE: (anger mounting slowly MIKE: (anger mounting slowly into his face and voice as he lifts himself to his full height above the counter) Did he say that, Ma? Did he say THAT?

MA: I told ye, Pa, you'd get 'im mad someday. And he's gettin' big enough to pin yer ears back if he ever takes a mind to.

PA: (eding toward large rack)

PA: (edging toward large rack of slightly warped yardsticks) A fine kettle of fish y're stirring up, Maggie. Ye've always treated 'im like an orphan yerself. When did YOU turn so sweet and sugary? 'Twas yerself set Mr. Clark and Mr. Hooper on 'im just a few months back.

MIKE: Never mind that. An-

swer me, Pa-did you say what Ma said you said? About me losing 400 out of 600 customers? Did you?

MA: Sure an' he did. He was settin' right on that tub o' soft-soap yonder. Y'd have heard it yerself, Mike, if ye hadn't been so busy sellin' soup to the Joneses.

MIKE: (leaps over counter—sound of feet landing on floor then footsteps as he advances on Pa) Of all the goofy statistics! As twisted as those flimsy yardsticks you've been handing out for souvenirs. (Footsteps stop. Suddenly Mike laughs, regaining good na-ture, and turning back toward counter) Oh you needn't duck behind them, Pap. I'm not going to touch you. But you know darn well, Pap, what the truth is—

PA: Don't call me Pap.
MIKE: You know the truth as well as I do. Sure I've had 600 customers since 1928, when I was just a kid. But never all at one timea kid. But never all at one time—because I've never had enough hours to sell. And in the early days, most of them just spent nickels and dimes. You know what's happened—they're still buying radio, but not from me. Not if my middle name is Network!

MA: (sighing) There's truth in what the how says. Pa. He's took

what the boy says, Pa. He's took after me, instead of you—he's gone after the national customers and ye can't say he hasn't sold 'em.

PA: Not accordin' to the papers! MIKE: That's a laugh! You're fine one to talk about the papers! Why, a few years back I was selling two stations of this and six stations of that, and getting no-where just like you, Pap, when you sell a few inches of this and a column of that. Now I have customers that never buy less than a couple of dozen stations at a time, and usually a lot more. I just sold those Campbell's 76 stations of tomato juice on top of 85 stations of soup.

PA: But you've still lost 400 of them 600 customers since 1928! (Dramatically) And here's the proof!

BIZ: Rustle of paper. MIKE: Proof? Let's see. (Pause) Oh, Pap, you will have your jokethat's just a proof from your own ANPA bureau. It's all wet! Take it away!

PA: Sissy. Afraid of a wet

MIKE: (laughing) It isn't that, Pap. I just don't want to get my hands smeary. I've got to call on a lot of nice people tonight in their homes. But lay it down and let me oh! I get it! Why, the joke's on you again, Pap. (Then speaking slowly and patiently as though explaining something to a child) Now listen—Over 300 of those 400 customers you're talking about never even bought my basic network. Most of them now are buying radio down the street from Local Stations & Co. After all, Pap, the networks are for national

advertisers, and you know it.

PA: (snorts once or twice)

When I was your age, I was glad
to sell a dozen sticks of classi-

MIKE: (hitting word hard as an expletive) Pap! PA: Don't call me Pap.

MIKE: I wasn't, that time.

MA: (laughing at Pa) 'Tis a
quick tongue the boy has. Y'd better leave 'im be and tend to your
own marbles, Pa.

PA: Morbles?

PA: Marbles? MIKE: She means agates, Pap. You've been losing them fast, you know.

MA: Now don't tech yer Pa on

his raw spot, Mike m'boy.

MIKE: Well, he deserves it. Talking about me losing customraiking about me losing customers since 1928—why, look at my order book! I've shown a 300% gain since 1928 in actual dollars—an' Pa shows a 30% loss.

MA: Yer Pa ain't so spry as he used to be, and then there was the depression—took 'im hard y'know.

He's been limpin' a good bit since. Doctor calls it—displayfoot. Said somethin' about his circulation,

PA: Never mind my circulation.

MIKE: All right, all right. (Adopting patient tone again)
Here's how it is, Pap. I'm shipping my groceries all over the country. I'm selling bigger networks and I'm serving the public better. Everybody hears my stuff now. That's better than tying up the whole network with two-or-three station orders—leaving 70 or 80 stations with no network program to hear.

PA: (on rising pitch) Network -NETWORK — NETWORK! Wish I'd never heard the word!
MIKE: Well, it isn't just a case!

NAB Board to Study Copyright; Few Stations Extend Contracts

Warner Bros. Publishing Houses Still With ASCAP; Washington State Stations Seeking Redress

WITH FUTURE performing rights contracts for use of ASCAP music hanging in the balance, the NAB board of directors will meet Oct. 17 in New York to consider the entire copyright problem in the hope of finding a solution before current contracts expire Dec. 31. The date was set by the NAB executive committee at a special meeting in New York Sept. 23. The executive committee comprises Leo J. Fitzpatrick, NAB president, Isaac D. Levy, treasurer, and James W. Baldwin, managing director.

The committee met with E. C. Mills, ASCAP general manager, during its Sept. 23 session, to discuss informally, it is understood, provisions of the contract offered stations, as well as the "per piece" method of payment of royalties

method of payment of royalties.

Meanwhile, many stations were negotiating with ASCAP on extensions of their present contracts, but few were signing. Best obtainable information was that ASCAP officials privately are advising stations to defer signing until the copyright organization puts its own house in order. Warner Bros. publishing houses, which have threatened to withdraw from ASCAP effective Dec. 31, have not yet done so and there is still some possibility that they will fall in line and remain in ASCAP.

Increase in Cost

THE KEY to contract renewals is in the Warner Bros. stand. Should it withdraw, as it has informed all inquirers, then the ASCAP catalog will be diminished by about 40%. Despite this, the new contracts offered by ASCAP to stations for extension for a five-year period beyond Dec. 31, carry a rider which is construed to mean that stations must continue to pay the same fees for the ASCAP catalog, minus the Warner list. This would mean a 40% increase in the cost of music to broadcasters, if they propose to use Warner Bros. music under separate nurchase

music under separate purchase.

In Tin Pan Alley, according to best advices, it is felt that Warner Bros. at the last minute will decide to remain in ASCAP rather than set up its own copyright collection and licensing organization. The story, briefly, is that Warner Bros. has been dissatisfied with the allotment of royalties it has been receiving from ASCAP, which last year purportedly amounted to \$300,000 out of some \$2,500,000 which ASCAP gets annually for radio performance fees. Warner is said to be asking \$1,000,000, and without that guarantee has announced it intended to withdraw.

Those who feel that the movie subsidiary will remain in the fold assert it would cost Warner Bros. more than the amount it wants to collect to set up its own licensing organization, and as a consequence it would net far less than the \$300,000 it now receives. On that basis they reason that Warner Bros., even though reluctant, will remain in ASCAP.

ASCAP itself apparently would like to see this inter-organization squabble settled before seriously negotiating on a blanket basis with the broadcasting industry. At present broadcasting stations are in position to extend their present licenses for five years, but with the rider under which ASCAP declines to make any provision for reduction of royalties but does permit the station to cancel the contract upon due notice. The present rates of royalties are an arbitrary sustaining fee, plus 5% of the net receipts of stations.

Naturally ASCAP would find

Naturally ASCAP would find itself in a more favorable position to renew contracts on the present basis if Warner Bros. stay within the ASCAP pool. Many stations, it is understood, have protested the rider on the ground that ASCAP is breaking faith with the broadcasters, since it promised to extend all contracts for five years under present terms.

Contract Negotiations

IN ALMOST every instance it appears that individual stations are seeking from ASCAP contracts equivalent to the best contract it has granted any station. On behalf of a group of larger stations, Philip G. Loucks, former NAB managing director, and now a practicing attorney, is having conversations with E. C. Mills, ASCAP general manager. Sol A. Rosenblatt, former NRA deputy and division administrator, and before that a member of the ASCAP law firm, has been retained by the Yankee Network, and WCKY, Cincinnati.

NEW WJR RADIATOR—Here is the modernistic brick and tile structure housing the 50 kw. transmitter.

being sought are for 5% of station receipts on programs using music, with no sustaining fee, and with deduction of both agency and sales commissions, amounting to two 15 per cents. That also is the tack taken by the score of broadcasting stations in Washington State, which, by state court order, have been enjoined from doing business with ASCAP, which has been judged a monopoly doing business in violation of the State laws.

Latest word from Washington

Latest word from Washington State is that a number of the broadcasting stations there have filed triple-damage suits against ASCAP, seeking redress amounting to approximately \$750,000, as an outgrowth of the court action perpetually enjoining ASCAP from doing business in that state.

Mr. Baldwin has been holding conferences with Mr. Mills from time to time, discussing the copynight cityation

It is evident that the contracts right situation. NewsIsPublicPropertyWhenPublished,

Senator Dill Tells Court in KVOS Case

UPHOLDING the right of broad-casting stations to distribute news published in newspapers once they are sold, on the ground that the news then becomes public property, former U. S. Senator C.

Mr. Dill

C. Dill last month asked the Circuit Court of Appeals at Seattle to sustain the lower court's finding in favor of radio in the so-called news piracy suit of The Associated Press vs. KVOS, Bellingham, Wash.

As chief counsel for the Bellingham station, Senator Dill delivered a strong argument and an even stronger brief in support of the right of a broadcasting station in effect to read the front page of a newspaper, after that newspaper has been printed and sold. The case was on the appeal of the AP, on behalf of three of its Washington state newspaper clients, from the decision of Federal Judge John C. Bowen, of Seattle, rendered last

December, in which he denied a temporary injunction sought by the AP against KVOS. The court held that the station had a perfect right, legally, to disseminate the news by this more rapid means after the newspapers carrying the AP dispatches had been published.

The decision, regarded as a revolutionary one in the newspaper and radio fields, proved sensational. The KVOS appeal, to a degree, is being financed by contributions from a number of broadcasting stations because of the importance of the issue involved and the desire for a final adjudication.

Argument for KVOS was made by Senator Dill, Kenneth C. Davis, Seattle attorney, and William H. Pemberton, Olympia attorney. John W. Davis, of New York, 1924 Democratic presidential nominee, was to have been chief counsel for the AP but was unable to be present. Argument had been postponed on that account, from Sept. 10 to Sept. 13, but when Mr. Davis failed to appear on the latter date, Joseph Kindall, attorney of Bellingham, delivered the argument.

Stations in Detroit Realigned Sept. 29

Formal Welcomes to Networks Staged in Special Programs

SEPT. 29 proved a red-letter day in Detroit radio history as three network outlets switched positions, with each welcomed into its new fold with special inaugural programs. WJR formally dedicated its new 50,000 watt transmitter on that day, coincident with its new affiliation with CBS, leaving the NBC-WJZ network. WXYZ, for the last year the Detroit outlet of Mutual Broadcasting System, took WJR's place on the NBC Blue while CKLW signed off the CBS chain and supplanted WXYZ as the MBS outlet.

Also joining the NBC-WJZ network in the shuffling of outlets was WOOD-WASH, Grand Rapids, operated by the Kunsky-Trendle Broadcasting Corp., also licensee of WXYZ. NBC sustaining features on the WJZ network will be fed through WXYZ to the Michigan network, of which it is the key, until next June.

MBS at Million Mark

CKLW joined MBS just one day before that network observed its first birthday, as a basic chain comprising WOR, WGN and WLW as well as the Detroit outlet. During that time it developed into an important working unit with a record of approximately \$1,000,000 in sponsored business for the first year and promised that the total would be doubled in the year 1935-36. At present about 20 hours a week is being carried over the network commercially and approximately 40 hours of sustaining time is being fed by the chain to member stations.

CBS staged an elaborate welcoming program for WJR when it joined the network and simultaneously dedicated its new transmitter at Trenton, Mich., with an increase in power from 10,000 to

50,000 watts.

George A. Richards, president of WJR, at 8 p. m. pressed a button which formally started operation of the Trenton transmitter. The program opened with a two-way radio conversation between Ted Husing, CBS announcer, and Leo J. Fitzpatrick, general manager of WJR, both radio pioneers. A dramatic sketch in which two telephone linemen retraced the growth of WJR from its inception preceded the ceremony.

Other speakers welcoming the station to CBS were William S. Paley, CBS president, and Gov. Frank Fitzgerald, of Michigan. A list of stars participating included Burns & Allen, Stoopnagle & Budd and Mickey Cochrane.

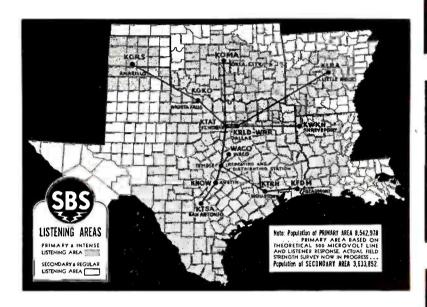

Burns & Allen, Stoopnagle & Budd, and Mickey Cochrane.

The new WJR antenna is 733 feet high, with a wheel-shaped ground system with 120 miles of copper wire.

CKLW was welcomed to MBS with a one-hour program, which included addresses by Alfred J. McCosker, chairman of the board, and W. E. Macfarlane, president of the network. Other stations on the network contributed welcome programs, and during the last half-hour CKLW offered its first MBS presentation which included messages from officers of the sta-

Mackay Radio

Canada's Newest Station

CANADA'S newest broadcasting station, CKSO, Sudbury, Ont., which went on the air last Aug. 30, will join the Canadian Radio Commission network as a basic outlet Oct. 1, taking at least three hours of its programs daily. The station is owned and operated by the Sudbury Star. Its equipment is Canadian Marconi throughout. Manager is W. E. Mason, who is also publisher of the newspaper. Parkes is chief engineer. The station operates with 1,000 watts

Al Jolson Closes Series For Shell Oil on NBC

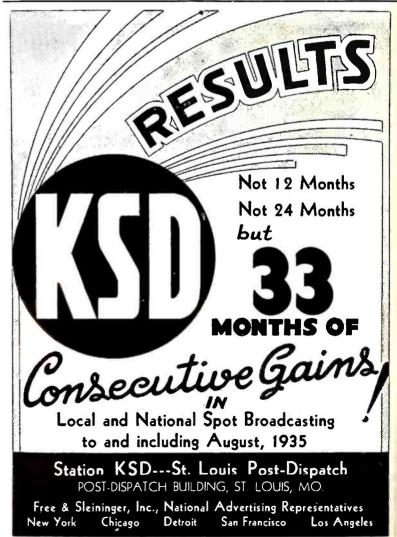

AL JOLSON has left the Shell Oil Co.'s Shell Chateau program Saturday nights over the NBC-WEAF network, his Sept. 28 appearance being his last. The sponsor's effort, through J. Walter Thompson Co., its agency, to induce the Pre-mier Pabst Sales Corp., Chicago (Pabst Blue Ribbon beer) to have Ben Bernie take over the period was regarded in radio circles as indicating that Jolson will not be reengaged.

No show had been set for Oct. 5 as BROADCASTING went to press, but on Oct. 12 the sponsor, which has a contract running Christmas week, will have Walter Winchell as m.c., Eleanor Powell and Niela Goodelle as guest stars.

Pabst would not release Bernie, instead offering him a new 52-week contract for his Tuesday night NBC-WEAF network period, which is handled by Morris, Wind-muller & Enzinger Inc., Chicago.

End of Daylight Saving **Brings Program Revision** On NBC Pacific Network

WITH RETURN of standard time in Eastern cities Sept. 29, a new alignment of NBC network Western programs is greeting dialers, Eastern broadcasts now reach the Pacific Coast one hour later, necessitating switching many NBC Western division programs. Among Pacific Coast sponsored presentations heard at new time are: The Sperry Sunday Spe-cial (Sperry Flour Co.), Sundays, 1 p. m.; One Man's Family (Chase & Sanborn, Tender Leaf Tea), & Sanborn, Tender Leaf Tea), Sundays, 9:30 p. m., and Wednesdays, 5 p. m.; Death Valley Days (Pacific Coast Borax Co.), Tuesdays, 9 p. m.; Winning the West (Occidental) Life Insurance Co. of California), Thursdays, 9:15 p. m.; Caswell Concert (George W. Caswell Co.), Wednesdays, 7:45 p. m.; Langendorf Pictorial (Langendorf United Bakeries). Mondays endorf United Bakeries), Mondays endorf United Bakeries), Mondays to Fridays inclusive, 4:45 p. m.; and the Woman's Magazine of the Air, daily except Saturday and Sunday, 3 p. m., under sponsorship of the following: Mondays, Campbell Soup Co., and George W. Caswell Co.; Tuesdays, Campbell Soup Co., Pet Milk Co., and Swift & Co.; Wednesdays, Bank of America. Wednesdays, Bank of America, Elmo Sales Corp., and Easy Washing Machine Co.; Thursdays, Campbell Soup Co.; Fridays, Bank of America, California Brewing Assn. and Elmo Sales Corp. Western Farm and Home Hour, NBC western division network week-day sustaining since January 1931, has been switched to 11:30 a. m.

NBC Showmanship

in Detroit

In Detroit, America's fourth city, radio showmanship has got to be good to win. Demand only responds to sales power of an unusual sort—the sort which NBC offers advertisers through its two fine Detroit outlets, WWJ, on the Red Network, and WXYZ, on the Blue. Here is undisputed leadership in broadcasting facilities, top-flight showmanship, business ethics, and local prestige.

Both stations' transmitters are centrally located in "Greater Detroit". Their 1000-watt signals dominate this concentrated buying area with the country's most popular programs. The unique prestige of WWJ and WXYZ among Detroit listeners is evidenced by the sales reports of their advertisers. They make fine reading for both advertisers and stations!

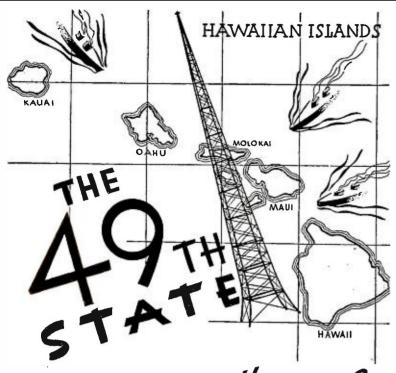

STATION WWJ is one of the outstanding stations of the famous NBC Red Network—one of the very first stations in America to broadcast, back in 1920. Construction on WWJ's new transmitting station will be completed this fall, and it will feature the latest High Fidelity transmission and many other improvements.

STATION WXYZ, the newest addition to the powarful NBC Blue Network, is owned and operated by the Kunsky-Trendle Broadcasting Corporation, identified with the theatre business in Detroit for over 25 years. WXYZ has the largest staff of announcers and engineers in Detroit, and can operate five separate programs simultaneously. It has a notable record for long term local advertisers.

- 27 hardware stores
- 25 shoe stores
- 443 restaurants
- 32 auto tire dealers

This rich retail market is covered comprehensively by KGMB, Hawaii's premier broadcasting station.

KGMB is affiliated with the Columbia Broadcasting System, and by actual survey had more than 60% of the "radio circulation" of the Islands last January. Completely modernized equipment and vastly improved program service has increased appreciably this circulation.

> Each day, seven days a week during 1934 Hawaii bought an average of \$250,000 worth of food, automobiles, radio sets, clothing, and other goods from the mainland United States.

CONQUEST ALLIANCE COMPANY NEW YORK, 515 MADISON AVE. - CHICAGO, 100 N. LaSALLE ST.

ABOVE THE HUDSON ing 190 feet above the Palisades at Cliffside, N. J., this self-supporting Truscon antenna of WBNX, New York, is supported by three insu-lators of 125 pounds each. Sec-tions are circular instead of flat and the quarter-wave structure is designed to resist a 90-mile gale. It has an 18-inch sway.

OMAHA PUBLISHERS TO ACQUIRE WAAW

ACQUISITION of WAAW, Omaha, by the Nebraska Broadcasting Co., 98% of whose stock is held by the Omaha World-Herald, was revealed Sept. 18 with the filing of an application with the FCC for transfer of ownership from the Omaha Grain Exchange. The purchase price is said to have been \$150,000.

The station is the fourth in Neworld-Herald interests, subject to FCC approval. The others are KGBZ, York, purchase price \$48,000; WJAG, Norfolk, \$50,000, and WMMI. Control \$75,000. and KMMJ, Clay Center, \$75,000. Henry Doorley, president and publisher of the Omaha World-Herald, is president of the Nebraska Broadcasting Co., with Paul Martin, Omaha attorney and director of the newspaper concern, handling the negotiations.

It is expected that Lloyd Thomas, operator of WROK, Rockford, Ill., will become directing head of the four stations for the Omaha World - Herald. Alex Sherwood, formerly associated with Mr. Thomas at KDKA, Pittsburgh, is now managing KGBZ and will become Mr. Thomas' assistant.

Chevrolet to Renew

CHEVROLET Motor Co. is scheduled to renew its transcription series Musical Moments over some 300 stations during the week of Oct. 14 for a third 13-week run, breaking the all time transcription spot record with an expenditure involving about \$1,500,000. The campaign, produced by World Broadcasting System and placed through Campbell-Ewald Co., Detroit, so far as known, will not be changed, since the majority of local Chevrolet dealers are enthusiastic about results.

Pacific Disc Firm Signs With MPPA

AFTER MONTHS of dispute con-AFTER MONTHS of dispute con-cerning payment of royalties on music used in production of its transcriptions, MacGregor & Sol-lie Inc., San Francisco, has de-cided to sign a contract with Music Publishers Protective Association similar to those understood to be in force with other transcription proforce with other transcription pro-

ducers, according to advices received Sept. 23 from C. P. MacGregor, president.

This decision has been reached, Mr. MacGregor informed BROAD-CASTING, not because it feels that MPPA, a sister organization of ASCAP, is entitled to the recording fees but because the contract ASCAP, is entitled to the recording fees, but because the contract proposal is on a more reasonable basis than original demands. The contract, he reported, was being made with Harry Fox, of MPPA. Simultaneously, Mr. MacGregor indicated that his organization—the pioneer in transcriptions on the Coast—planned to create a new transcription library but he did not disclose its scope.

The original demands of MPPA, Mr. MacGregor pointed out, were for payment of 25 cents per selection per broadcast for

per selection per broadcast for regular numbers and 50 cents for "asterisk" or restricted numbers. On this score he said he feels and always has felt that so long as stations pay ASCAP 5% of their gross to play this copyrighted music they should not be forced to pay anything in addition, through any source, for the same music.

In a letter to Mr. Fox informing him of the willingness of his organization to enter a contract unon the last terms offered by MPPA, Mr. MacGregor wrote:

"If you will recall, when you were in San Francisco, we said we would be satisfied with a deal like this and would pay you a premium this and would pay you a premium to handle the matter of getting permission through the publishers direct instead of through you, as outlined in my former letter as well as Mr. Bibo's (MPPA representative) to you; the deal being \$5 for non-show tunes and \$10 for show tunes."

The negotiations of MacGregor & Sollie with MPPA were rather sharp at times, with the latter organization on one occasion having advised stations that the tran-scription organization had no license from it for the recording of its numbers.

Humble Oil Sponsoring Football in Southwest HUMBLE OIL & REFINING Co.,

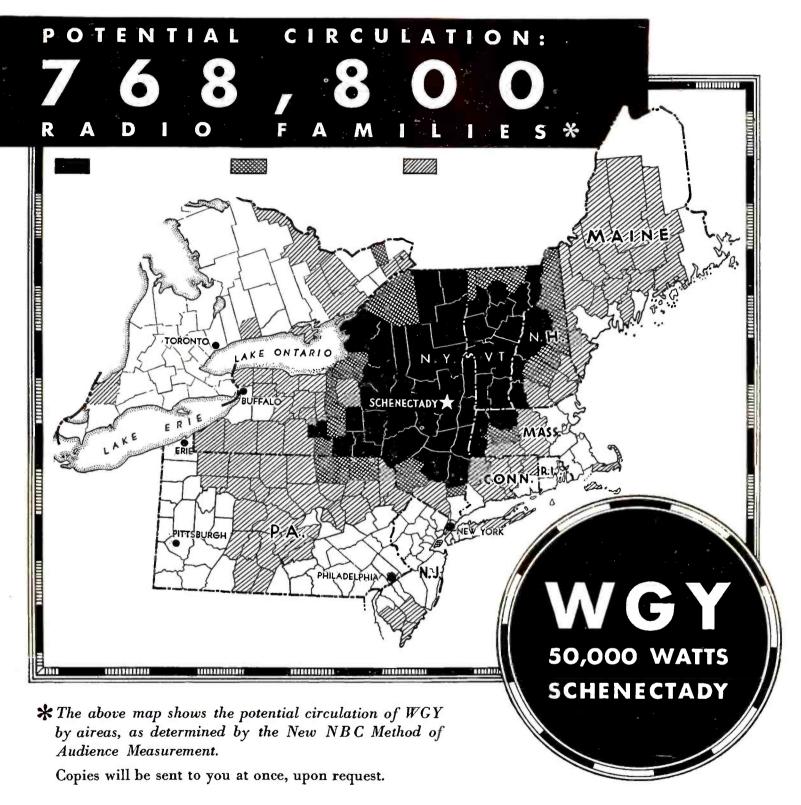

Houston, is sponsoring play-byplay broadcasts of Southwest Conference football games over six Southwest Broadcasting System stations. Byrum Saam, Paul Lindsey and Mike Gallagher are handling the programs. Conference of ficials are cooperating with the network and sponsor, believing that the proper radio promotion of the games will build up gate receipts as has been the case on the

West Coast.

On Nov. 23 a Southwest Conference game will be broadcast on both SBS and CBS, with Ted Husing, CBS sports announcer, and Saam handling the event. Mc-Cann-Erickson Inc., New York, is

the Humble agency.

TYPEWRITTEN RECORD

ONE notable advantage of Bell System Teletypewriter Service — one reason why it has been adopted so widely by the broadcasting industry - is the fact that it provides fast, two-way, typewritten communication.

A character typed on one machine is simultaneously reproduced on all others connected with it. Information flashes back and forth on the same connection. Messages are identical at all points and as many copies as necessary can be made in the original typing. No need to rewrite and check. No room for errors or misunderstandings.

The principal networks and more than 200 separate stations regularly use Teletypewriter Service. Probably you'd find it just as valuable. Call the local Bell Company for full information.

DISCS POPULAR Transcribed Program Is Among First Ten on WTMJ-

THAT TRANSCRIBED programs can attain the same popularity as live talent features was revealed in a contest conducted by WTMJ, Milwaukee. The contest asked listeners to write a 25-word letter telling which WTMJ program the listener enjoyed most and why. More than 60 different programs were listed in the 1,500 replies. The transcription feature Sons of the Pioneers, produced by Standard Radio Inc., according to W. F. Dittman, WTMJ commercial manager, was among the first ten.

The transcription show was topped in popularity only by such features as Major Bowes, Ma Perkins, and Today's Children, over NBC, and such local live talent shows as Heinie and His Grenadiers, Sports Summary and news

programs.

INS Signs Four More; Transradio Lands Two; Texas Co. Using News

INTERNATIONAL NEWS SER-VICE announced the signing of contracts, during the fortnight before BROADCASTING went to press, with the following stations: KSL, Salt Lake City; KVOO, Tulsa; KPCB, Seattle, and KFKA, Greeley, Colo.

Two stations in South Carolina—WIS, Columbia, and WCSC, Charleston—were added to the Charleston—were added to the Transradio roster, along with the following: WDBJ, Roanoke, Va.; WDAE, Tampa, Fla.; WCHS, Charleston, W. Va.; WCFL, Chicago; WHBC, Canton, O.; WSOC, Charlotte, N. C.; WDBO, Orlando, Fla.; KPQ, Wenatchee, Wash.; KELD, Eldorado, Ark.; KIUN, Pecos, Tex.; KWYO, Sheridan, Wyo.; KALB, Alexander, La.; KUOA, Fayetteville, Ark.; KGHL, Billings; WEHC, Charlottesville. Products advertised are "O Boy Vitex Vitamin D Breads" in all places, "Southern Cakes" in the Carolinas and Virginia; "Stone Cakes" in Georgia and "Seybold's Cakes" in Florida. The account is handled by the Freitag Adv. Agency, Atlanta, under supervision of J. V. Freitag, president; A. L. Malone, secretary - treasurer, and Norman Frankel, radio director.

Debt of Listeners To Artist, Sponsor

Public Not Indebted to Radio Itself, Says Mr. Patterson

TO THE SPONSOR and the artist the radio listener feels an in-debtedness and not to the institu-tion of radio, Richard C. Patterson Jr., executive vice president of NBC, told the Boston Conference NBC, told the Boson on Distribution Sept. 24. "People to their favorite are attached to their favorite broadcasts," he said, adding that 'we have not tried to inject ourselves between the program and the audience."

This means, said Mr. Patterson, that business which has been identified with the production of goods, has now become identified with providing the good things of life. Thus the American citizen "is made to feel an entirely new sort of obligation to American business. It is an obligation for education, entertainment and culture. Business produces the equipment with which to enjoy life. And then business turns around and helps to provide the enjoyment.

Creating the Desire

REFERRING to the business depression, Mr. Patterson explained that radio's major contribution to recovery is its elevation of the sales level by keeping up the desire level.

The job of American business is only half done, he told the conference, when new products have been created or old ones made better; equally important is the job of creating new appreciations or lift-ing the level of old ones.

During the depression years, he said, there has been an increase in the quality-aspirations of the American people. "People have not bought so many of the things with which those aspirations can be satisfied. But that has not been due to any falling off in income. It has not been due to any falling off in desire. Perhaps the American standard of living has delined." This decline, he continued, is temporary because one characteristic of Americans is their irrepressible desire for something bet-

Grove Disc Drive

GROVE LABORATORIES Inc., St. Louis, is recording at World Broadcasting System studios a series of 15-minute dramatic programs based on the cartoon feature Flash Gordon, for Groves Emulsified Nose Drops. The programs start Oct. 14 on eight stations in major markets in the East and Midwest. Plans call for four programs weekly, probably Mondays through Thursdays, for 13 weeks, before 6 p. m. Stack-Goble Adv. Agency, New York, is handling the account.

WRBX Off Air

WITH the cessation of the opera-tion of WRBX, Roanoke, Va., WHIS, Bluefield, W. Va., on Sept. 22 began operation as a full-time station on 1410 kc. The licensee of the Roanoke station consented to the operation of the Bluefield station with full time and voluntarily relinquished its license. The two stations formerly shared time. WHIS operates with 250 watts power at night and 500 day.

Are you letting the South's First Market slip thru your fingers?

There are two ways that sales executives can do this. One is to overlook the fact that Memphis is the South's biggest market in trading population, namely, over 2,000,000. The other is the fallacious notion that any high-powered, far-away station can cover this market economically.

Surveys and costly experience have proved that WMC is the only station in this market bringing listeners their favorite NBC features with dependably clear reception.

Memphis, incidentally, is one of the very brightest spots on the national marketing map. A combination of market and medium that is making sales sheets look like old times again for some of America's smartest media buyers.

FROM FIRE ZONE KGW-KEX First to Broadcast Blaze From Forest

A WORD picture of a forest fire, broadcast directly from the fire line, was brought to KGW and KEX, Portland, Ore., listeners in September in cooperation with the U. S. regional forester, C. J. Buck. Rebroadcast by means of two short wave stations, the program is believed to be the first to originate from the scene of a major forest fire. The fire, which was the most serious of the year in Oregon, covered 2600 acres 60 miles east of Eugene.

While 1500 men labored day and night under the direction of the forest service to stem the tide of flame, Assistant Regional Forester F. V. Horton described in detail for radio listeners just what was going on. His report was broadcast by forest service short wave equipment 100 miles to the receiving station in Portland, and rebroadcast by direct wire over KGW and KEX. The progress of the fire and fire fighting was reported during five 15-minute broadcasts over a period of three days.

PHILIP J. HENNESSEY, member of the NBC legal staff, on Sept. 26 was assigned to the Washington office of NBC in the National Press Bldg., under. a temporary transfer from New York headquarters. Presumably he will interest himself in legal activities of NBC owned and operated stations before the Broadcast Division of the FCC.

WGN to Start Operating Oct. 1 in New Edifice

THE NEW WGN Building, located just north of Tribune Tower on Chicago's Michigan Avenue, was opened to the public for a pre-view Sept. 22 when more than 4,000 visitors were shown through the structure which took 13 months to build and which cost the Chicago Tribune, its owner, more than

Architecturally Gothic in design, the radio building is constructed of Bedford limestone in which are embedded a score of famous stones of history, from a block of the Great Pyramid to stones from Bunker Hill and Fort Sumter. The interior is simply designed in the modern manner, with colored lighting effects furnishing most of the decoration. The building endouses six studios, three of which are open to the public. The main "public observation auditorium" seats 558 persons; the others are "intimate" studios, one seating 22, the other 18. WGN will also continue to use its three studios in Tribune Tower.

Broadcasting from the new building will be started Oct. 1, with a two-hour show, the audience in the studio to be limited to the men who worked on the building and their families.

NEW YORK UNIVERSITY'S course in dramatic radio writing will include lectures by Courtney Savage, CBS director of dramatics and continuity, and Robert Caldwell, continuity director of J. Walter Thompson Co.

Collins Radio

Directs YOUR ATTENTION TO

THE COLLINS 20C ONE-KILOWATT BROADCAST TRANSMITTER

REASONABLE COST

The price of the 20C bears a sensible relation to the actual cost of design and manufacture.

HIGH FIDELITY

Collins broadcast equipment has established a unique reputation for faithful transmission. The frequency response of the 20C is uniform within plus or minus 1.5 decibels from 30 to 10,000 c.p.s. Total r.m.s. harmonic content is less than 5 per cent of the fundamental at 95 per cent modulation.

QUIET CARRIER

Carrier noise is held at least 60 decibels below program level by generous circuit design and without resorting to "hum bucking."

RELIABILITY

All components are oversized and adequately protected by overload devices.

SIMPLICITY OF INSTALLATION

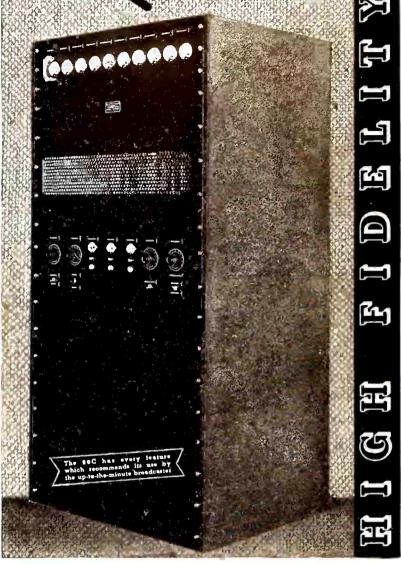

The 20C operates from single phase current which is readily obtainable. There are no external auxiliaries and all wiring including transmission line is carried through standard conduit.

EXCELLENT CONSTRUCTION

The use of the very best materials and the most skillful mechanical design gives a fine appearance inside and out.

NEW CIRCUITS

Low loss inductive neutralization and a new high stability oscillator are among the many important electrical features.

REAR VIEW-CLOSED

Collins Radio Company manufacture's every type of transmitting apparatus. Microphones — Series 12 Speech Input Systems — Studio Accessories—Concentric Transmission Lines — Tower Impedance Matching Units — every component from microphone to antenna is coordinated for best performance.

REAR VIEW-OPEN

100 WATT STATIONS — Wait for announcement of the NEW COLLINS 100/250 WATT TRANSMITTER.

"On The Spot"

RADIO regulation again proves that it is not keeping pace with broadcasting development, with the FCC's ruling that even a 15-second transcribed announcement must bear the usual "this is an electrical transcription" identity line. Buick wanted to use the short spots in a rather extensive campaign. But the FCC said that its regulations specify that the "transcription" line must be carried, even though such an announcement would be nearly as long as the actual continuity proposed.

Technically, interpreting its regulations strictly, the FCC probably is right. But those regulations were adopted before there were such things as 15-second spots. The original purpose of the transcription announcement requirement, as we recall it, was to prevent stations from misleading the public by pretending that orchestras or singers were actually in the studios rather than on discs. Buick proposed no performance at all-its continuity simply called for a one-sentence statement and a couple of honks from an auto horn. History demands that laws keep pace with progress, and it seems to us that the FCC should profit by history. Its regulations must be amended to confirm with modern practice, so long as that practice is legitimate.

Lest We Forget

MORE THAN a month has elapsed since Congress adjourned. All industry was awaiting that "breathing spell" until the next session which convenes in January, and all industry welcomed President Roosevelt's pronunciamento that there would be a vacation insofar as his legislative planning is concerned.

The broadcasting industry, including its many components, is doing the expected thing—just relaxing. The feeling generally is that Congress is done and that there's no use worrying until the new one gets going.

That, sadly, should not be so. Those who know their radio from the legislative and regulatory side foresee an investigation of some kind into broadcasting at the next session—not because any investigation is needed but because one is about overdue. The agitators and professional opponents of commercial radio have been busy inciting members of Congress into the belief that something should be done.

At this writing there are a half-dozen measures directly or indirectly pleading for a Congressional investigation or broadcasting. Two

of them deal with government ownership. All are outgrowths of the machinations of the lobbying minorities. More of them are in prospect.

Next year will be a presidential campaign year. It will afford politicians the opportunity that comes only once each four years to brandish their oratorical wares in the major league of politics. Radio is always a lively political topic. The politicians can be expected to "eat up" the propaganda of these agitating reformers—that is, unless they are forewarned.

And that brings us to our point. Now, when Congress is out of session and when Senators and Representatives are in their own bailiwicks, is the time to get them thoroughly acquainted with their broadcasting institutions. For eight months they have heard the wails of the anti-radio lobbyists. It is time to set them straight.

Broadcasters and other elements in the industry need not go beyond the basic facts in telling their story. They can inform their Congressmen, whose duty it is to see that public interest is served, of the true broadcasting situation. Every broadcaster knows how certain misguided religious and educational groups have assidiously bored in and how one of them even now is trying to tear asunder the whole existing broadcasting structure because it was unable to carve a choice slice of spectrum, for commercial use, for itself.

If broadcasters will keep their duly elected legislators informed of the true situation, there will be little to fear. They will be less gullible when the professional lobbyists resume their inevitable crusades. The broadcasters' rule should be "Don't put off until the next session what can be done now."

Awards For Merit

IF MORE incentive is needed to spur to even greater success those who build our everyday radio performances, then the new project for a foundation for radio awards will amply provide it. We are four-square behind the plan, not because we feel the incentive is needed, but because broadcasting as an art and industry is now big enough to be worthy of a foundation that will be the radio counterpart of the Pulitzer awards in journalism and literature.

The committee of ten distinguished radio executives, equally representative of the broadcasting and manufacturing industries, has a wealth of material with which to work in devising its preliminary plans. Awards can be made for a wide range of conspicuous ex-

The RADIO BOOK SHELF

A LAST CALL to organizations engaged in domestic marketing research in the United States who wish to be listed in the forthcoming issue of the Commerce Department's publication Market Research Sources, 1935, was announced Sept. 21. To give additional opportunity to all eligible research bodies who have not yet supplied data necessary for inclusion the time limit for listings has been extended to Oct. 8. The booklet is issued periodically by the Commerce Department as a national handbook and guide to research activities in the domestic commerce field. Titles of research reports issued, with the name and address of the organization making the study, may be listed in the revised edition provided certain conditions are satisfactorily met.

EDUCATIONAL broadcasters the world over can learn a lot from the highly-developed technique of American commercial broadcasters. This conclusion is bound to come to readers of The Educational Role of Broadcasting published by the International Institute of Intellectual Cooperation of the League of Nations (\$4.25). The volume consists of a compendium of expert opinion drawn from leading nations and was financed by the Norwegian Nobel Institute. Dr. Cline M. Koon, senior specialist in radio and visual education, U. S. Office of Education, contributes a review of the American situation. The book is refreshingly sane and objective, and is not marred by propagandist zeal.

FINDING its tourist business at Radio City increasing, NBC has prepared a booklet On the Air to be given all guests taking the tour. With pictures and text it graphically tells the story of radio from earliest experiments to the complexities of modern broadcasting.

THE annual Advertising and Publishing Production Yearbook has just been published by Colton Press Inc., New York, containing 300 pages of information on printing and graphic arts.

amples of both public and program services. There can be awards for the outstanding example of emergency public service by stations in each of the several classes; for the most meritorious performance of a special events broadcast; to the sponsor of the best commercial program, and also to its agency; to the program builder of the outstanding feature; for the outstanding sustaining program; for the best announcing job; and even to the technician who distinguishes himself in his field.

The committee must now set as its goal the shaping of the Foundation so first awards car be made in 1936. No more representative group of distinguished broadcasters could have been selected by NAB President Fitzpatrick. The Radio Manufacturers Association likewise has named as strong a committee as appears possible from its ranks. The funds for the endowments appear to be available. The results should have a salutary effect upon the art and industry, and tend to enhance of the healthy competition among stations, networks and individuals to outdo one another.

We Pay Our Respects To _

JAMES McCOSH CECIL

IN THE United States, more than in any other country, to say that one is a "pioneer" is to pay such compliment as usually instantly conveys the appropriate impression that the person has done "big things" in laying the foundation for something successful, lasting and appreciated.

Although the type is rare, we find, in the evolution of broadcasting there has appeared one who, while grounded in the prinicples of the written word, is a decided pioneer in promoting spoken word media—James McCosh Cecil, secretary and treasurer of the advertising agency of Cecil, Warwick & Cecil Inc. New York

retary and treasurer of the advertising agency of Cecil, Warwick & Cecil Inc., New York.

When radio broadcasting was in its infancy, James M. Cecil, then a partner in the Cecil Advertising Co., Richmond, started his pioneering by putting "Planter's Peanuts" on the NBC network in one of the early commercial programs.

Pioneering, which has always been a feature and a factor in the success of the prominent programs which Cecil has originated, is outstanding in his Gulf Refining Co. radio show, as, following the opening commercial, each program in that show continues to its conclusion without any interruption by commercial interspersions.

Looking backward, a pronounced "high spot" in Cecil's pioneering in radio was his decision, contrary to the then prevailing advice of both networks, to delegate to performers in his programs the presentation of the commercials. First tried in the Sherlock Holmes program sponsored by G. Washington Coffee, more than 700,000 letter responses so highly commended that style of advertising that Bertha Brainard, NBC commercial program manager, immediately called it to the attention of other NBC advertisers. Since then performers present the commercial in the shows of a number of radio's most prominent advertisers.

Born in Selma, Ala., June 2, 1891, Cecil was raised and received all his schooling in Richmond, Va. On being graduated, in 1910, from Hampden Sydney

University, where he was active in dramatics and in the glee club, he turned to the newspaper field for his first job—a reporter for three years on the Richmond Times Dispatch. To supplement interesting work by additional earning power, Cecil at the same time engaged in publicity promotion for local concerns. The latter effort proved so remunerative, especially when he produced a most successful educational campaign for Trust Associations, that newspaper work was entirely abandoned in favor of publicity activity.

Convinced of the success which would crown well-planned publicity

Convinced of the success which would crown well-planned publicity and advertising, he induced his brother, John H. Cecil, a Princeton University alumnus, to give up a good position as sales manager of a paint and varnish concern to join in creating, in 1915, the Cecil Advertising Co. Planter's Nut & Chocolate Co., Wilkes-Barre, Pa., their first account, was closely followed by the advertising of Maxwell House Coffee, and then that of some large Baltimore concerns, necessitating the opening of a branch office in that city for its supervision.

Further expansion necessitated moving the executive offices from Richmond to New York in 1920, followed seven years later by the organization of Cecil, Warwick & Cecil, Inc., through the association of Paul Warwick.

In the opinion of Cecil, the most interesting thing he ever did in radio was associated with the G. Washington Coffee program on Christmas Eve three years ago. In the belief that the Sherlock Holmes program was not appropriate for that night, he made a special trip to Italy to arrange and to perfect one broadcast by the world-famous Sistine Chapel Choir (the Pope's Own Choir) of St. Peter's Cathedral, Rome, for that occasion. Although commercially sponsored, that program enjoyed a tremendously wide and large audience and received much advance favorable publicity and no end of commendation.

In explaining why his concern constantly uses "big artists" on

PERSONAL NOTES

MAJ. JOSEPH T. CLEMENT, vice president of RCA Manufacturing Co. in charge of its Washington activities, on Sept. 18 was notified by the Chinese government that he had been awarded the Decoration of the First Class because of services he rendered to the Chinese Communications Mission which visited this country last spring.

II. C. VOGEL, for the last nine years vice-president and treasurer of the Milwaukee advertising firm of Freeze - Vogel - Crawford Inc., has joined the NBC Central Division sales department, Chicago. Before he entered the agency Vogel was with Pfister and Vogel Leather Co., Milwaukee. He was graduated from Cornell University in 1919.

C. L. (Chet) THOMAS, on Sept. 20 submitted his resignation as assistant manager of WINS. New York, to Burt Squire, who recently assumed management of the station. Mr. Thomas had been with WINS for a year and a half, and prior to that was traffic manager of WLW. Cincinnati. He did not disclose his plans.

W. R. WATSON, for a number of years associated with the Midwest Farm Paper Unit, has been added to the commercial staff of WLS, Chicago. He will represent WLS in Chicago, Michigan, Ohio, Missouri and Lowa.

WILLIAM B. GELLATLY, formerly of the CBS sales force and advertising sales representative for the New York Herald-Tribune and Chicago Herald-Examiner, has joined the local sales staff of WOR, Newark.

JACK MIMS, formerly of KPRC, Houston and the Texas Quality Group, has joined the advertising staff of WSB, Atlanta. Norman Crane. formerly of WHO, Des Moines, and WGN, Chicago, has been promoted to production manager.

J. K. MASON, of the NBC sales promotion department, gave a talk before the Atlantic Coast Premium Buyer's Exposition which was held at the Hotel Pennsylvania. New York. Sept. 23-27, on "Contests and Offers, from the Radio Viewpoint." A round table discussion followed.

GEORGE BIJUR, CBS director of advertising and sales promotion, is conducting an evening course on "The Principles of Advertising" at Columbia University.

their programs, Cecil says: "It is important to reach a large audience on the first as well as on the thirteenth broadcast. Performers with a following insure, without several broadcasts, the desired large and appropriate audience. Thus, from the start, the program 'goes over big,' producing an immediate and constant favorable result for the large national advertiser."

In discussing the rapid development of commercial broadcasting, Cecil emphasizes what he regards as important in present and future trends, namely:

That merchandising tieup is highly desirable, especially in connection with the program of the national advertiser. All of the clients of his concern use it, on his recommendation.

That the networks are now exercising good judgment, looking to the future of broadcasting, in curbing "the commercial", as in his opinion the advertising announcement ought readily to fit into and be generally accepted as an integral and interesting part of the

NEW YORK CITY

64% MORE LISTENERS!

Four separate surveys by the Ross Federal Research Corporation one in October, 1934; one in January, 1935; one in April, 1935, and the latest one in July, 1935 show that WDAF is Kansas City's preferred station at all seasons of the year.

These four surveys, each for a period of seven days, and each covering the hours of 7 a.m. to 10:30 p.m., represent a total of 20,103 completed calls, or in other words, a composite picture of the listening habits of 20,103 families in the Kansas City area.

Each of the four investigations shows WDAF in top place. Taken collectively, they show that WDAF has 64.7% more listeners than has the second Kansas City station.

For such a service advertisers might expect to pay a higher rate than for time over other stations. As a matter of fact, advertisers will find that, program for program, period for period, schedule for schedule, WDAF's rates in dollars

and cents are actually lower in many cases than those of other Kansas City stations.

NOT BY US

These surveys were not made by WDAF, but by the Ross Federal Research Corporation. It is the policy of WDAF to quote only the findings of independent auditing concerns of national repute.

HOW THEY RANK

The following count of station preferences represents a total of 20,103 completed calls* made by the Ross Federal Research Corporation:

WDAF	8711
2d Station	5289
3d Station	2418
4th Station	1204
All Others	2481
_	

20,103

*A completed call as listed here is complete only when the person called states that he has a radio, that the radio is turned on, and he does identify the radio station to which he is listening.

OWNED & OPERATED BY THE KANSAS CITY STAR

BRIDGING GAPS is a SAN FRANCISCO SPECIALTY!

● Over San Francisco Bay, the world's two largest bridges are being constructed. ● BUT...There is a third bridge already constructed where your sales and advertising engineers can overcome the difficult hurdle of sales resistance. AND THAT IS...

More sales from your consumers and dealers, or, the need of new outlets on the Pacific Coast, at the lowest cost, through the facilities offered by KYA. ● KYA is "YOUR BRIDGE" for more sales, as its programs and signal strength is keyed to fit the taste of the populace that lives within this rich market.

HEARST RADIO - NEW YORK - CHICAGO - SAN FRANCISCO

Everywhere That Jean Goes

HER RADIO is sure to follow. For daddy, E. S. Darlington, pioneer General Electric radio engineer, built a little radio set that five-year-old Jean trundles around with her in a small cart. The set is permanently tuned to her father's amateur station, and when she is wanted at home, the order goes out via radio. When Jean was an infant, Mr. Darlington rigged up a phonograph in her bedroom that automatically played a lullaby when she awoke at night, a loudspeaker in his room being connected to the nursery where a phonograph was connected with a control button by his bed.

Hill - Billy Song Catalog Now Controlled by AMP

ACQUISITION of exclusive control of the performance rights of the United Publishing Co. catalog, said to comprise the best known hill-billy tunes, was announced Sept. 20 by Associated Music Publishers Inc., of New York. AMP has licensed a number of broadcasting stations for use of its regular catalog, as supplemental to that of American Society of Composers, Authors & Publishers.

The United Publishing Co. cata-

The United Publishing Co. catalog, comprising approximately 600 numbers, according to AMP, has never been under the control of ASCAP, as has been generally assumed. "Although closely affiliated with the Southern Music Co.," said the announcement, "it has always been an independent unit, under private ownership. It was originally started as a publishing outlet for tunes acquired and recorded by Victor and while all of the numbers are recorded it said that all are not available in printed form. Among the authors are Jimmy Rodgers, Blue Steel, Bob Nolan, 'Fats' Waller, and the Carter Family."

IN THE CONTROL ROOM

LAVERNE POAST, graduate of the University of Wisconsin department of electrical engineering, and Ronald H. Culer, graduate of the same department at the University of Michigan, have joined the staff of Jansky & Bailey, consulting radio engineers in Washington. The Jansky organization now has eight staff engineers.

HOWARD FRAZER, formerly chief engineer of WPEN and WRAX, Philadelphia, and chief consulting engineer of General Broadcasting System, has joined WDAS, Philadelphia, as chief engineer. Frank Untelberger has been placed in charge of maintenance and remote broadcasts.

RAY SCHROEDER, who received his radio training at the RCA Institute and who was formerly head of the electrical appliance department of a leading chain department store, has taken over the duties of chief engineer at WJJD, Chicago.

J. R. POPPELE, chief engineer of WOR, Newark, on Sept. 27 addressed a group of students taking the radio broadcasting section of courses offered by RCA Institute on "Desirable Personal Characteristics of the Broadcast Engineer."

CHARLES BRANNON, formerly of WCLO, Janesville, Wis., and George Kovell, of WTAQ, Eau Claire, Wis., have joined the control staff of WDAY, Fargo, N. D. Julius Hetland, WDAY chief engineer, has installed a stabilized feed-back at the transmitter.

ROBERT CONNER, formerly of WHA, Madison, Wis., has joined the engineering staff of WMBD, Peoria, 111.

HAROLD PRICE, remote operator of KDLR, Devils Lake, N. D., who is an aviator, was awarded the Tellner Sportsmanship Trophy at the Jamestown, N. D. air meet. Ber Wick is back after spending the sum mer operating sound systems at Western fairs.

CHENN THAYER, formerly of WINH, Laconia, N. H., has joined the engineering staff of WJIM, Lansing, Mich.

GEORGE McELRATH. NBC operating engineer, Radio City, and Mis Gene Weston, of Amityville, Long Island, were married Sept. 14. O. B Hanson, NBC chief engineer, wabest man. The couple sailed for Bermuda honeymoon.

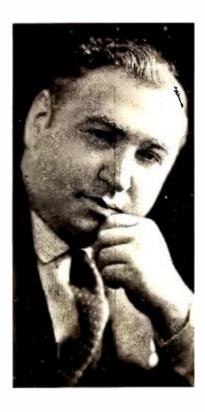

DAVID C. WOODS, of the controstaff of WRVA, Richmond, Va., if the father of a third daughter bor recently

ELMER THIERBACH, engineer of WTMJ, Milwaukee, was married recently to Miss Anita Barrett, of Milwaukee.

BBC Names U. S. Contact

THE FIRST "ambassador" of foreign broadcasting system to b sent to the United States will b Felix Greene, British Broadcasting Corp. staff member, who wi establish headquarters in Nev York toward the end of the year Official announcement of his appointment as BBC representative for North America was made by the BBC in September. The BBC thus follows the examples of the American networks which were the first to send "correspondents" abroad that act as arrangers and announce of relay programs. NBC has Fred Bate in London and D Max Jordan in Basle, Switzerland while CBS has Cesar Saerchinge in London.

BROADCASTING • October 1, 193.

"Director of Music at WINS"

Louis Katzman, well-known director, has been named musical director of WINS, New York under an exclusive contract for the metropolitan area. He will take charge of the musical division Oct. 1. The director has been identified with 42 network programs in the last four years.

—Broadcasting, September 15

Louis Katzman moves into WINS, New York, as musical director Oct. I. Alfredo Antonio, who's been holding down the post for some time, remains for pianology chores.

-Variety, September 11

Louis Katzman was appointed musical director of WINS yesterday by Burt Squire, manager of the station. Katzman will have complete charge of the station's musical presentation. He was last heard on the air with the George Gershwin series.

—New York American, September 10

Louis Katzman, the network band leader, has been made musical chief of WINS.

--Ben Gross, Radio Editor Daily News, September 11

Louis Katzman has been appointed musical director of WINS.

-New York Times, September 15

114 East 58th Street

A "NATURAL" So They SAY

"Hold That Line!" "Watch That Kick!"

Ah, My Friends, 'tis an ambitious and pretentious football schedule that officials of WINS have planned for the 1935 season, in keeping with the sports traditions of this up and coming station!

Major colleges whose games with Manhattan College at Ebbets Field will be broadcast via WINS to date include Louisiana State University, Holy Cross, North Carolina State, LaSalle University and Georgetown. WINS will also broadcast, exclusively, play-by-play descriptions of the professional games played by the New York Giants and the Brooklyn Dodgers.

In addition to the actual play-by-play descriptions WINS will present a series of college programs, a half-hour in length, featuring short talks by famous alumni of the school to be honored.

The football broadcasts on WINS start September 21, at 2:30 p. m., when Manhattan College meets Niagara. Earl Harper will do the announcing.

—Daily Mirror, September 14

WINS, New York, to air all football games of N. Y. Giants and Brooklyn Dodgers, both professional gridiron groups, this year. Earl Harper handling the m. c. job.

—Variety, September 11

Station WINS reports it is planning "a most pretentious football schedule."

-New York Times, September 15

LET'S TELL YOU MORE ABOUT THESE "NATURALS" AND ABOUT OUR OTHER TESTED PROGRAMS WHICH WE KNOW HAVE PULLED RETURNS AND SALES IN THE NEW YORK MARKET. FOR RATES ADDRESS

WINS

"Song Bird from Met"

WINS sends in a flash to the effect that it has signed Myrtle Leonard, Metropolitan Opera contralto, whose voice is likened by her teacher, Francis Stuart, to that of the great Schalchi.

Her story is of the Horatio Alger type. She rose from a piano player in pigtails in a Wild West Nicolodeon to her present status as the country's most promising contralto. From timidity and uncertainty to the poise and assurance of stardom. She amazes the critics with her depth and musicianship. You'll hear her on WINS thrice weekly, starting Monday at 6:15 P. M.

—Nick Kenny, Radio Editor Daily Mirror, September 11

One of the most attractive contralto voices that has come into the parlors in months is that of Myrtle Leonard, new "Met" songbird on WINS... One trouble with radio is that there are not enough contraltos and too many sopranos.

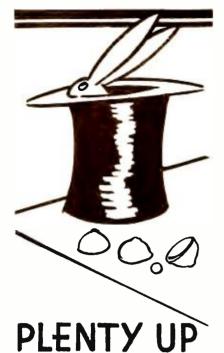

—Louis Reid, Radio Editor N. Y. American, September 18

WINS: Inaugural of a Monday, Wednesday and Friday series by Myrtle Leonard, Met Contralto, a youthful prodigy, whom the station has signed for a record period of two years, 6:15 P. M.

of bigger networks. There's more to it than that, I've been selling bigger customers bigger packages of time. In the old days, almost everybody bought a quarter-hour once or twice a week. Look at it once or twice a week. Look at it now. Look at these packages I'm shipping this week! Two hours for Ford. Two half-hours each for Chesterfield and Camel. Five quarter-hours for Wrigley. An hour and a half for Campbell's. Why, that eats up the time that ten or 15 advertisers used to buy in smaller packages in the old days. And you know I only have just so much time to sell.

PA: (a little puzzled but still stubborn) But statisticks don't lie.

Y'still lost 400 customers.

MIKE: Oh, so they don't lie?

Don't be so Cross-ley with me, Pap.

And listen to this if you like sta-

In 1928, 30 of the 100 biggest advertisers used network broadcasting.

In 1930, 48 of the 100 biggest advertisers used network broadcasting.
In 1932, 54 of the 100 biggest

advertisers used network broad-

casting.
In 1932, 54 of the 100 biggest advertisers used network broadcasting.

And in 1935, 68 of the 100 biggest advertisers are using network broadcasting.

How's that for a success story? (Waxing enthusiastic) And I'll tell you something else! It's the big companies that know their adver-tising groceries. They don't buy on hunches, but facts. And 80% of them are "repeaters" right now. But I haven't any more time to

MA: Y'must admit the lad has a lot of steady P.T.'s, Pa.
PA: They're the D.T.'s to me!

MA: A pretty wit, Pa. That's more like ye. (Sighs) Now this is like old times—just fightin' among ourselves. That's the way it ought to be—after the store is all closed up. I like a good scrap as well as the next one. But for pity's sake, Pa, stick to sellin' your own goods when the cash customers are here instead of knockin' Mike's. (Suspiciously) Seems to me y'take a swipe at my beddin' department now an' then, too, y'rascal. What was that y'said about my monthly salesbolsters and my weekly innersprings for debilitant dealers?
BIZ: Voices outside door-

sounds of pounding on door—several voices ad lib.

Open up! We want to see Mike! Open the door!

Sound of door being shaken. MA: For heavens sake! Who's

trying to break down the door at this ungodly hour of the night? Oh dear, mebbe it's burglars!

PA: (peering timidily through window) No, it's half a dozen of Mike's customers. (Gloatingly)

And they look as mad as bees. They're after Mike!

MA: (bustling into her four-color apron) Ah me, 'tis on your own head, Pa. 'Tis you that's stirred 'em up. But turn on the lights and open up. Mebbe I can

sell 'em some nice inside coverlets while they're here.
MIKE: (striding forward) Out

of the way, I'll let them in.

ANNOUNCER: What is the meaning of this visit of Mike's customers? What brings them through the night to the door of Ad-Town's General Store? What lies ahead for Mike? Another five-minute carrier of PA and MA and minute script of PA and MA and MIKE will be sent to you next week at this time-full of thrills, packed with action. Don't miss it!

WDAS Is Enjoined For Waring Record

NAB Joins Station in Defense Of Suit for Performance

TO DEFEND the right of broad-TO DEFEND the right of proad-casting stations to use phonograph records without prior permission of the artist, the NAB has decided to cooperate with WDAS, Phila-delphia, against which an injunc-tion is sought by Fred Waring, orchestra leader who recently was elected president of an organization having as its purpose prevention of performances of phonograph recordings over the air. James W. Baldwin, NAB managing director, announced Sept. 25 the NAB would cooperate with the Philadelphia law firm of Carr & Krauss, counsel for WDAS, in the defense.

The suit against WDAS, seeks to enjoin it from performing War-ing recordings for broadcasting purposes, either commercial or sustaining. It brought out that the RCA Victor record of the Waring orchestra contained a notice that it could not be used for broadcasting. Waring claimed that use of these records is a "serious menace" to his business, interests, rights, contractual engagements and in-come, and that the continued "illegal" use would "seriously in-jure" his contractual and property

No Court Decision

THERE has never been a court decision upholding the right of the recording artist to prevent performance of his works. Broadcast. ers have contended that in purchasing the records, they pay a 2-cent royalty to the performer covered in the purchase price, and that the musical compositions themselves are covered in their performing rights contracts from ASCAP or other copyright owners.

W. Maurice Steppacher, secretary-treasurer of WDAS, said that the station has only one recording by Waring and as it plays only those selections for which requests are made, this record was performed "only at the insistence of some one who first phoned in the request and then was obliged to write in for it according to station rules."

Molle Takes Vox Pop

MOLLE Co., Bedford (shaving cream) will return to the airwaves on Sunday, Oct. 6, 2:30-3 p. m., over the NBC-WEAF network. Vox Pop, which was sponsored by Standard Brands Inc., for Fleischmann's Yeast, will be the program. Standard Brands released Vox Pop Sept. 29. Jerry Belcher and Parks Johnson will continue to conduct the interviews on the streets of New York. Stack-Goble Adv. Agency, New York, handles the

(According to Variety, Sept. 18, 1935)

Sincerity of Purpose

Thank you, Variety. It didn't occur to us that we were establishing a precedent in effecting a sharp reduction in our list. The decision was based first, on the realization that each and every station on our list is entitled to aggressive "Selling Representation". Second, to enable us to render the advertiser and the agency a more complete, comprehensive, and intelligent service. Naturally, this requires concentration. We did not feel that it could be accomplished except by limiting the number of stations represented. It is our belief that this policy is sound.

Squibs Peace Promotion—Shadow Lamps—Mobil Magazine—Robin Hood Newspaper—WMAQ's Policy

E. R. SQUIBB & SONS, New York (drug products), sponsoring To Arms for Peace on 51 CBS stations, Thursdays, 9:30-10 p. m., is displaying specially designed forms in 35,000 drug stores on which the public will be able to pledge support to the President and Congress "for all they may do to keep war from this country."

Explaining his company's sponsorship of the World Peaceway Series, featuring persons prominent in public life, Theodore Weicker, executive vice president of Squibb, said the program is in line with the company's policy of devoting its advertising to educational and welfare movements. In connection with the promotion of peace, he said: "We hope that this ideal may become a reality. Behind every project of human beings, hope has been a major force. In undertaking this new expression of the desire of the House of Squibb to contribute to human progress and welfare, we are strongly motivated by a hope that peace shall some day be a reality, and by a firm conviction that all that human beings are doing and will do to achieve peace will stem from the hope we share with millions." Geyer, Cornell & Newell Inc., New York, is the agency.

STARTING with the first anniversary Sept. 13 of its Witches Tales

program on KHJ, Los Angeles, Wilshire Oil Co., that city (Economy gasoline), is offering "shadow lamps" weekly for best letters on "Why I Patronize an Independent Economy Dealer". The anniversary program was increased to a full hour. Dan B. Miner Co., Los Angeles, has the account.

YOUNG listeners to Robin Hood Junior, juvenile serial broadcast twice weekly over WBBM, Chicago, for Central Shoe Co., St. Louis (Robin Hood shoes), have not only a club, "The Archers Club", but a newspaper as well to which they are invited to send contributions and which is published from time to time (supposedly by Robin Hood Jr.), giving the sponsor an excellent opportunity to back up his broadcasts with a most effective form of direct mail advertising. Morenus Adv. Agency, Chicago, is in charge.

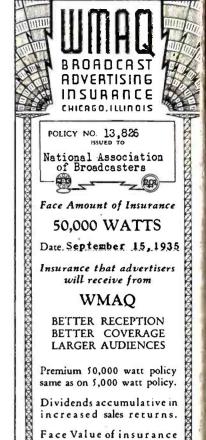

THE PROGRAMS of Ellis VanderPyl, sales manager and sports announcer of WGAR, Cleveland, "have sold more suits and topcoats for us than any other medium of advertising", according to James Riley, general manager of nine Northern Ohio Bond Clothes stores. The Bond schedule includes six five-minute sports periods weekly with additional football scores during the season. Listeners picking the highest percentage of football winners each week get Bond merchandise and other prizes.

"MOBIL MAGAZINE", produced for a weekly half hour from KHJ, Los Angeles, to stations of the Don Lee network since January of this year for the General Petroleum Corp., Los Angeles, has largely been responsible for an increase in sales. Newspapers and outdoor media were used to supplement the broadcasts.

Percentages released by the agency, Smith and Drum Inc., Los Angeles, indicate that Mobil gas sales were up 14.5% for the first seven months of 1935 as compared with the previous year. Mobiloil sales were up 33.6% for the same period of the year as against 1934. The July figures showed gas sales up 44% over the '34 July, and oil sales up 36% for the same month.

The Mobil Magazine uses David Broekman's Orchestra, soloists and choir in musical pages including the hit song of the week, a musical specialty and grand finale with dramatic interludes devoted to a news oddity, humor in the news and interviews. The commercials use the opinions of historical characters, screen stars and "everyday people".

ON OCT. 6, opening day of the Milk Foundation's Stars of the Milky Way broadcasts over WBBM, Chicago, some 700,000 householders in the Chicago area will find eight-page rotogravure booklets describing the programs on their back porches along with the morning milk.

WMAQ POLICY—Here is the portion of the "insurance policy" sul mitted to prospects.

delivered upon receipt of order.

S-FOR-D

SOMETHING new in station promotion is the "insurance policy sent out by WMAQ, Chicago Dressed in an oil paper jacket, the policy is numbered, personally acdressed, gives "premium" rate benefits, and is signed personally by executives of the station. A inside spread gives a pictorial view of the transmitter and studios.

Decorations are in a radio moti: and prospects are informed thathe insurance is in effect "durin the life of advertising contract' The title is "WMAQ Broadcas Advertising Insurance, Chicago.

SCOTT & BOWNE Inc., Bloomfield, N. J. (Scott's Emulsion) is trade publication ads has this to say regarding its new radiseries: "It is a well known faothat news broadcasts are the quickest and biggest a udience builders." The sponsor is usin two-color ads in drug publications to announce the prize contest and the new series of programs.

GENERAL PEROLEUM Corp., of California, Los Angeles, uses deft ly dramatized commercial at nouncements in its Don Lee-CB program keyed from KHJ, Lo Angeles, occasionally enlisting the unwitting opinions of famed historical figures, screen notables, of plain, every-day folks of today.

A FREE cake of Fairy soap wa offered radio listeners who woul write for it by Rosaline Greene i the last ten days of her currer events broadcasts for Gold Dus Corp., New York, over WOR, New ark. Some 2400 requests were received.

Teaching Radio at Michigan

(Continued from page 14)

and adult education programs. They were conducted primarily by faculty of the University, Dr. Joseph E. Maddy of the School of Music taking personal charge of classes in the playing of string and wind instruments, and in elementary singing.

The six courses opened by the speech department have added to the list morning programs concerning campus events and news, talks about student life, "tours" of the college campus, and skits of classroom instruction, all prepared and presented by student members of the speech classes. For the most part these were 15-minute programs broadcast each Wednesday, Thursday and Friday. They served the dual purpose of providing practical training for the students while at the same time giving radio listeners — including the more distant parents of the students— an opportunity to listen in on ac-tual classroom instruction and talks concerning everyday affairs of student life.

Radio Technique

MOST important of these are two courses concerned solely with broadcasting technique, one of which is offered each semester, un-der the personal direction of Pro-fessor Abbot. The first semester's work covers the fundamentals of radio broadcasting and includes radio mechanics, acoustics, speech, writing for the radio, radio advertising, radio dramatics, interviewing, and news and sports reporting. The second semester offers a study of school programs, the preparation of programs, and studio management. Both courses provide opportunities for actual broadcasting experience. as students who have qualified for additional work are allowed to announce other university programs in addition to those presented by members of the speech classes.

Two other radio courses, one being offered during each of the two semesters of the academic year, are concerned with advanced public speaking, with special emphasis upon radio talks. The courses present instruction and practice in ra-dio speaking and the study of various types of long public speeches such as the lecture, oration, and political speech. Professors Abbot and Gail E. Densmore cooperate in conducting the classes and in offering constructive criticism to the students.

A different type of course, offered during the second semester only, covers the field of radio read-ing and dramatics. Special atten-tion is paid to the technique and practice in presenting readings and plays on the radio. The course is offered by Professors Abbot and Louis M. Eich.

The sixth course is one concerning the problems of music instruc-tion by radio which is offered only to graduate students. In this

BENJAMIN SOBY AND ASSOCIATES 1023 Wallace Ave. Wilkinsburg. Pa.

course, Professor Maddy, probably the outstanding authority on the teaching of music by radio, passes on the results of his valuable experience gained through many years of constructive endeavor.

In addition to the courses offered regularly enrolled university students, the Extension Division also provides courses in radio technique for graduates living in Detroit. Classes are held in the main studios of WJR under the direction of Professor Abbot. The interests of graduates in such courses is evidenced in the fact that during this first year they were offered 120 persons enrolled. In an attempt to estimate the

worth and effect of university broadcasts, including those presented by students, officials of the Extension Division recently evaluated the various programs. Listing the worth of different programs from the price of a postage stamp to 25 cents, it was estimated that the broadcasts furnish annual educational opportunities worth at least \$935,338 to the school chil-dren and adults of the state. This disregards the additional benefits derived by students taking radio courses.

From the results of listener surveys made by WJR, it was estimated that 1,540,078 Michigan residents listen regularly or occasionally to the general university broadcasts on topics of current interest.

New A & P Series On CBS Promoted By Elaborate Drive

INAUGURATION of the Great Atlantic & Pacific Tea Co. cam-paign Sept. 23 with Kate Smith

paign Sept. 23 with Kate Smith on CBS was the subject of a comprehensive program of merchandising and special showmanship for the company's employes.

Outstanding among the several methods used to arouse interest was the playing of one-night stands by Kate Smith and the personnel of the program in larger eastern cities—for an audience composed entirely of A & P employes and their families. These events gave rise to the erroneous events gave rise to the erroneous impression that free shows for the public were going to be presented, an interpretation which was dean interpretation which was denied by the sponsor and broadcasting officials. Additional features of this kind are being arranged for other cities, outside the north-eastern area in which the first few were staged.

After preliminary shows in Detroit, Pittsburgh and Boston, the climax of the series was reached in New York on the eve of the Sept. 30 broadcast, when Madison Square Garden was engaged at a rental cost of \$4,000, to permit an attendance of 20,000 from among the army of A & P workers and invited guests from closely related companies. Staff members ed companies. Staff members from the Eastern sales area attended—a district which corresponds roughly with the primary coverage area of WABC.

An employe who had just completed 50 years of service with

the company was introduced to his

Radio Imposters

BEWARE of imposters who masquerade as radio inspectors, warns the FCC. Last June, the FCC announced Sept. 17, a Jerry Stowell was reported to be visiting stations on the Pacific Coast, purporting to be a special radio inspector, and on occasions obtained money on the basis of a promise that he provided taken as further action. would take no further action against alleged discrepancies. In July he was indicted in San Diego County, Cal., and received a suspended sentence. The FCC stated other cases of impersonation have been reported. It pointed out that FCC inspectors carry a gold badge bearing the FCC seal. Also it reminded the public that radio receivers are not subject to regulation or inspection by Uncle Sam.

junior colleagues, and there was a brief and informal greeting from John Hartford, president of A & P. After half an hour of vaudeville, Kate Smith was announced, and Harry Horlick's nounced, and Harry Horlick's Gypsies, who have been playing on NBC for the same sponsor for a number of years, were invited to round out the evening's entertainment. The entire program was designed in such a way as to let A & P employes generate their own enthusiasm about the new radio series instead of forcing per radio series, instead of forcing pep talks down their throats. Mr. Hartford would not even occupy a seat on the stage but remained in his place in a ringside seat.

The thrice-weekly broadcasts

The thrice-weekly broadcasts now beginning are to further the sales of A & P's three coffees—Red Circle, Bokar and 8 O'Clock. Large blow-ups with Kate Smith's head, and brief text tying up her broadcasts with the brands of coffee, were displayed in all A & P stores during the week preceding the premiere. In most cases the products were exhibited in a window specially set aside. Special steps were taken to insure adequate prominence over week-ends with door and window posters, while during the week displays were set up around the coffee mill on the counter.

Small display cards were dis-tributed for use in various parts of the stores; salesmen were given lapel badges drawing attention to the program; newspaper ads, two columns by nine inches, were booked for Sept. 23 papers in all major cities in the area covered by the program. Streamers and box-type inserts are used in all regular A & P advertisements.

A complete change in the dis-

A complete change in the display and promotional material was to be made at the end of a month. Anticipating the regional meetings at which the entertainment took place, Alfred G. Peart, of Paris & Peart, advertising agency, made a tour of all regional headquarters, explaining the drive.

MINNEAPOLIS

ommissioner Stewart Criticizes Action f Broadcast Division On Regulations

A HITHERTO unprecedented ocedure, Chairman Irvin Stew-of the FCC Telegraph Division a meeting of the full commis-n Sept. 18, protested actions of Broadcast Division which he arged were in conflict with its n technical regulations. He subtted for inclusion in the minutes the meeting a statement setg forth his views on such issues, expressed the hope that in the ure, all regulations "will be obved rigorously by all divisions the Commission"

The statement was offered in nection with a petition of SMB, New Orleans, for reconeration of an application for in-ased facilities. The petition was nied because the statutory time

it for filing had expired, and
Stewart concurred in this acn under the regulations. He took asion, however, to criticize the padcast Division for past ac-ns, notably in the case of KRNT, s Moines, which he charged had n granted increased facilities on r occasions without any hears on the merits of the applicahs.

Stewart's statement follows full text:

concur in dismissing the petition of MB for lack of jurisdiction, but I wish record my views with respect to cerfacts which first came to my attenas I was studying the record in this

as I was studying the record in this ter.

ation KSO (KRNT) has been raised a a local to a regional station and ated three increases in power since, 1934, without any hearing on the its of the respective applications. of defending them; and that licensee or applicant must bear the burden of proof in showing tbat the Commission's rules and standards should be followed by the Commission where he is concerned.

When the Commission adopts rules and promulgates standards, it must be presumed to do so because their observance will best serve the public interest. If any one seeks to evade their application to him, he should be required to submit to a full hearing on the merits; and the Commission's decision should be based solely upon a complete record developed in a public hearing. I believe that the granting of an application violating standards announced by the Commission, where no bearing has been held on the merits of the application, is contrary to the public interest. It is my hope that in the future, so long as the Commission sees fit to prescribe rules and to publish standards, they will be observed rigorously by all of the Divisions of the Commission.

Ticker Would Expand

EXPANSION of wire sports services, two of which have entered the field in the east for service to cigar stores, cafes and similar retail outlets, to the point where they plan acceptance of advertising accounts patterned after broadcasting, is indicated in current negotiations for musical performance licenses from ASCAP. Ticker News Service Inc., using telephone lines into the retail establishments, with sev-eral hundred clients in New York and Philadelphia, is said to be considering an ASCAP license calling for 13 per cent on revenues from "commercials", which would be in the nature of spot announcements. The other company is Tele-Flash. a competitive organization, a likewise is said to be considering sale of spot announcements.

A CRIME PARADE KYA Airs Daily Line-up From -San Francisco Jail-

KYA, San Francisco, for the first time in radio history, is broadcast-ing the morning police "line-up" direct from the Hall of Justice in that city. Persons picked up by the police during the night are paraded before the kleig lights of the line-up and the microphone. They are questioned and their records are given by Captain of Detectives Charles Dullea for the benefit of sheriffs and police chiefs of neighboring communities as well as the listening public.

Although broadcasts, heard Mondays, Wednesdays and Fridays at 9:30 a. m., are heartily endorsed by civic leaders and organizations in the San Francisco metropolitan area, indignation has been expressed by attorneys over the new procedure. The feature was arranged by Harry Rogers, KYA program manager and Chief of Police William J. Quinn, as a feature in crime prevention.

Harry C. Whitehill

HARRY C. WHITEHILL, operator of WDEV, Waterbury, Vt., and publisher of the Waterbury Record & Stowe Jorunal, weeklies, died at his Vermont home Sept. 21 after a heart attack. He was 60 years old, and formerly was active in state politics. He is survived by the widow, Mary Moody Whitehill, who will become the licensee of the radio station, which is managed by Lloyd E. Squire.

A SUPER DOUBLE-X TRIPLE-A NO. ONE BARGAIN!

Several reliable surveys indicate that, at any given time, about 40% that, at any given time, about 40% of the Louisville audience is tuned in on Station WAVE. This 40% can be bought for "X" dollars.... To reach the remaining 60%, you'd have to use several stations, the least expensive one of which costs. least expensive one of which costs "2X" dollars ... We get the listeners because we're N. B. C. You get the low rates because we're content to be heard only by the 1,000,000 people in Louisville's logical tradeterritory.

National Representatives: FREE & SLEININGER, INC.

Dill's Arguments in KVOS Case

(Continued from page 22)

Upon its conclusion AP counsel was granted three weeks additional time in which to file a new brief.

Circuit judges hearing the case are Curtis D. Wilbur, former Secretary of the Navy; Francis A. Garrecht, and Clifton Mathews.

In his 56-page brief, submitted following the oral arguments, Sen-ator Dill delved comprehensively into the law and fact relating to newspaper publication and broadcasting station operation. former newspaper reporter as well as an authority on broadcasting in Congress, Mr. Dill argued that the only way in which broadcasting of news published in newspapers could be prohibited would be by Federal statute.

Piracy Alleged

BRIEFLY summarizing the issue, Senator Dill said the case is a legal contest between the Belling Daily Herald and KVOS, over the right of the station to broadcast news that has already been published and delivered to the public in the regular course of newspaper distribution. While the bill of complaint has the AP the nominal complainant, and the Herald, the Seattle Post-Intelligencer, and the Seattle Times as parties in interest, he said the affi-davits in the record "show that in reality the bitter, personal and political differences between the ownof the Bellingham newspaper and the Bellingham radio station, precipated this contest which involves principles that are of nation-wide interest and importance." Senator Dill brought out that

H. K. CARPENTER, General Manager

Represented Nationally by

FREE & SLEININGER

wnen you can use with at no more cost than for a less powerful station. Fall time is going rapidly but desirently but desir the Herald originally owned KVOS, and that, when it failed to pay financially, sold to its present owner—Rogan Jones. "As soon as the present owner got it on a paying basis, this newspaper-radio fight began," he said.

As to the news issues, the Dill brief said that KVOS about two years ago began a "newspaper of the air" program, hiring its own local reporters and securing its general news from the Radio News Association (a subsidiary of Transradio Press). On the program, according to the AP allegations, cording some AP dispatches were read.

Referring to the opinion of Judge Bowen, the brief stated that while KVOS in some specific instances broadcast news picked up from the AP newspapers but "in no in-stances has the defendant ever taken or pirated any of the news claimed by complainant or its members, before such news items were published and distributed to the public in the regular editions of the newspapers of complain-ant's members."

Lack of Competition

THE AP complaint, said Senator Dill, alleges unfair competition by charging that both parties dis-seminate news to popularize their respective agencies and thereby increase the value of advertising for their respective mediums; and also, that when the radio station broadcasts news already published to listeners who are actual or po-tential subscribers, it works direct and irreparable injury to complain-

ant and its member newspapers.
"The court below," continued the brief, "found this did not constitute unfair competition and that complainant had no property right in news after it had been so published and delivered to the public in the ordinary course of distribution, as against the right of the defendant radio station then to redistribute said news gratuitiously

to the public."
Senator Dill contended that the AP is not the proper party to bring the action against KVOS because it has no advertisers, and distributes news only to its members, and never for a profit, since it is a cooperative organization. "How can appellants maintain, then, that their business is in danger of destruction or other irreparable harm and damage by appel-lee's acts?"

Arguing against the contention that unfair competition is involved,

the Dill brief stated that the A argument was that newspaper and stations are in competition be cause both disseminate news. said there could be no competitive because in the case of KVOS it do votes less than 10% of its time in news broadcasting, while the new paper uses the entire 100% of i space, not devoted to advertisin' for news features and commen on news. "Thus," he said, "90' of the KVOS radio programs can not possibly compete with newspapers of complainant, cause only 10% of the radio's tin is devoted to news."

Moreover, contended Senate Dill, there is a lack of compet tion because the radio static "gives away" the news to all wh will but tune in and listen, and the newspaper "sells the news". KVO like other stations, sells musical and dramatic programs to advetisers which bring good-will an popularity to the sponsors, sa Senator Dill, while it is impossib for newspapers to sell music

drama to their advertisers.
"In fact," he said, "a newspap
cannot sell anything to an adve tiser except space and printi statements about the thing adve tised in a published form to placed before all readers of the newspapers. All a newspaper of do for an advertiser is to print h advertisement along with all oth advertisers. The more space uses, the more he must pay, matter how large he makes advertisement or ingeniously words it, he cannot add to the number of readers of the new

paper thereby.
"Not so with the radio advetiser. He can increase the numb of his listeners by the program sponsors. When he enlarges t number of his listeners he e larges the number of potential cu tomers. He can attract listene to a popular program who ha never listened to any other pr gram over the station he is usin and who may never listen to a other program from that station

Cites Court Rulings

THE SHORT, sketchy, momenta announcement of the highlights the news over the air "res serves to whet the appetites radio listeners, and make the anxious to secure the news in c tailed, permanent form and whi is to be found only in the new paper," said the Dill brief. "Mo than 120 newspapers in the Unit States recognize this fact so ful that they have spent hundreds thousands of dollars to own control radio stations over whi they broadcast full 15-minute priods of news from their new papers in order to whet the apprint of the public for the detail news."

AP, the brief continued, rel: upon a misapplication of the r ing of the U.S. Supreme Cou in the case of International Ne Service vs. AP to prove its por of property rights in news. In the case, Senator Dill contended, the was admitted a 100% competitive between the INS and the AP news gathering. "When one news gathering.

WFIL adelphia

Only Philadelphia outlet for N. B. C. Basic Blue Network

560 Kilocycles

1000 Watts

nese services took the news disatches of the other and sold it is its own merchandise, there was that transaction all of the elenents of unfair competition," he

Senator Dill cited a long line of purt decisions holding news is not roperty and that facts are pubc, not private property. "News of vents of spontaneous origin is and as always been held to be public roperty, and complainant has no roperty right in such news," he

rgued.

He pointed out that newspapers ied in 1884 to have Congress entet legislation which would give iem an eight-hour protection. The leasure, however, died when the enate committee reported it unavorably. "If the newspapers puld not obtain eight-hour news rotection from Congress in 1884," is asserted, "on what theory do ney hope to obtain 24-hour proction from this court in 1935?"

Mr. Dill also pointed to a text

Mr. Dill also pointed to a text ook titled Rights and Privileges f the Press, from which he noted:
"Whether an afternoon news-

"Whether an afternoon newsaper may lift from a morning aper has never been decided by the courts, but the custom of the profession seems to sanction such practice."

practice."

"From this," continued the atorney, "it is clear that a practice thich the custom of the newspaper profession sanctions as ethial, appellant in this case asks the burt to denominate as 'piracy' then done by a radio station in a news broadcasts. It should be beted here also that those press sociations now selling news to adio stations for broadcasting urposes, sell only news which has of the type them published. They cannot sell news already published, ecause it is stale news and has a commercial value for broadcasting purposes. This is likewise true f appellant. The news KVOS is legged to have used had no value a property right."

Public Service

N HIS closing argument, Senaor Dill urged the court to keep in
ind that newspapers, as well as
adio stations, are under obligation
render a public service. He said:
"They are indirectly subsidized
y the government through reduced
ates for second-class mail. Reorts by the Postmaster - General
or the last ten years since radio
as become an active institution in
nis country show that subsidy
mounts to between \$40,000,000
ad \$50,000,000 annually. In other
ords, the newspapers pay about
ne-third of what it costs the govmment to handle them, and the
ifference amounts to approximate\$50,000,000 annually.

ifference amounts to approximate\$50,000,000 annually.

"The reason Congress grants
nese low second-class postage
ates for newspapers is to encourge newspapers to do the thing
VOS has been doing, that is,
read public information in the
arm of news to the people. Ours
a democratic form of governent. An intelligent, well-informed
ectorate is the first necessity to
the continued existence, as well as
the improvement and development
our Government."

RADIO'S BIG BUY

STUDIO NOTES

WHEN daylight savings ended Sept. 29, WOR, Newark, which several years ago instituted a policy of signing on at 10 a. m. Sundays rather than at the usual earlier hour of weekdays, will start its Sunday broadcast day at 8 a. m. This will be the station's permanent policy hereafter. The Silver Strains transcription series and Rainbow House, with Bob Emery and his child entertainers, will be heard from 8-9 and 9-10 a. m. respectively.

9-10 a. m. respectively. ELEVEN musicians have been added to the musical staff of WFAA, Dallas, making a total of 25 men in that department. This makes the Dallas station the possessor of the largest staff orchestra of any radio station with the exception of NBC key stations in Chicago, New York, Los Angeles, San Francisco and the Mutual network in Cincinnati. Besides having a regular staff of 25 orchestra members, many of whom have been with big name bands, WFAA will have some 15 extra musicians available on immediate call. The eleven new musicians have taken over the Early Birds spot, a program nearing its 2000th consecutive performance.

WORK has been begun on the reconstruction and enlargement of the studios of WJJD, in the Trustees System Bldg., Chicago, which involves the addition of three new studios, one with a 19-foot ceiling to house the new \$25,000 Wurlitzer organ, a new reception room, and several additional offices. According to Ralph L. Atlass, president of the station, when the work is completed WJJD will occupy not only the remainder of the 22d floor where the station is now located, but the entire 21st floor as well.

THE Daily Californian, University of California daily newspaper, in a recent feature story stated: "Radio Station KSFO in San Francisco and Oakland has practically become an extension of the University. At last count, ten students or graduates from this institution were appearing regularly on programs at that station." Among the U. of C. graduates on the KSFO staff are Ralph Edwards, announcer-producer; Bob Dumm, announcer; William Bernal, dramatic director; Donald Currlin, Raymoud Parker, Esther Simpson, Gertrude McSpedden, Curtis Roberts and Harry Couzins.

WCKY, Cincinnati, at 10:30 each evening makes this courtesy announcement: "It is now the hour of Many of your neighbors are in

WCKY, Cincinnati, at 10:30 each evening makes this courtesy announcement: "It is now the hour of Many of your neighbors are in bed and asleep. Out of consideration for them we suggest that your radio be turned no louder than is necessary. They will appreciate it." WLBC, Muncie, Ind., has adopted a new policy limiting all commercial messages and announcements to 75 words.

A NEW BOOM in radio set sales this year is predicted by Radio Retailing, due to improved business conditions and on the premise that the set manufacturing industry is in the "healthiest position since 1929".

DR. HETTINGER BACK AT UNIVERSITY POST

HAVING completed the major portion of the projects for which he joined the NAB as director of research last fall, Dr. Herman S. Hettinger, effective Oct. 1, will return to the University of Pennsylvania to resume teaching of marketing and advertising in the Wharton School of Finance and Commerce. He will continue to serve as economic consultant for the NAB, retaining supervision over trade statistics and advising on economic matters.

Dr. Hettinger was granted a leave of absence from the University last year to assist the NAB. Among other things he developed the agency recognition system approved by the last convention, but which appears to have fallen by the wayside for lack of station support. He also carried out the preliminary investigations looking toward establishment of a cooperative bureau of radio research now under consideration by the NAB, AAAA and ANA.

In addition he enlarged and improved the trade statistics service of the NAB, which at present furnishes the only comprehensive data on broadcast advertising volume. He has contributed numerous articles to BROADCASTING on radio economics, and while at the University, plans to continue his radio research and writing.

FCC Program Scrutiny

(Continued from page 9)

tition to the Post Office Department for reconsideration of its action, since he contended that he was not given ample notice when the original hearing was held several months ago, and therefore was unable to bring competent witnesses from the Coast. Also under consideration was an appeal to the Supreme Court of the Dis-trict of Columbia for a temporary injunction to restrain the Post Office Department from making its fraud order effective.

So far as is known, radio con-So far as is known, radio continuities used by Congoin were not under fire in the postal proceedings. They are, however, under investigation by the FCC. On Sept. 19 the FCC notified Arthur W. vestigation by the FCC. On Se 19 the FCC notified Arthur Scharfeld, counsel for a station which had been asked to supply under oath, a vast amount of material and information on the program and product, that if the request was unreasonable, "no doubt the Commission would modify its request in such a manner as not to work an unreasonable hardship on your client." Mr. Scharfeld had challenged the FCC authority to request all of the information sought on the ground that it fell outside the scope of its authority. The Law Department, however, maintained that the FCC had the jurisdiction to inform itself completely concerning the activities of the station.

Basis for FCC Action

BECAUSE of FCC policy, the nature of the investigation being conducted by the FCC of stations granted temporary licenses was not divulged. The policy is to keep these matters confidential until the investigations are completed and then to announce those which have been cited for hearing to-gether with the charges. It was stated that the fact that the stations are being investigated does not necessarily mean that they will be cited, but that it was felt desirable to give them temporary license extensions rather than full six-month renewals until the FCC definitely ascertained its course in each individual case.

All told, according to FCC information, there are upwards of 100 stations being investigated for one type of program or another construed to be either borderline or questionable. The identity of these stations is not divulged until such time as their renewals

Sponsored Fires

MERLE TUCKER, announcer-producer of KTAT, Fort Worth, has started a news-advertisement service for a Fort Worth insurance company. As alarms are turned in, KTAT gives listeners all available information, tying in a commercial to the effect that "this might have been your home", and mentioning the sponsor. Tucker, by the way, lost his trousers, stopwatch and other valuables in a fire at the Sylvan Club where he was master of cere-

come due for extension, or until definite charges are made.

At its Sept. 24 meeting the FCC set for hearing the applications of KFOX, Long Beach, and KELW, Los Angeles, Cal., because of medical programs. Stations granted the 60-day renewals because of pendou-day renewals because of pending program investigations were WNEL, San Juan, P. R.; KYA, San Francisco; WIP, Philadelphia; KROW, Oakland; KFBB, Great Falls, Mont.; KFIO, Spokane; KDYL, Salt Lake City; KEHE, Los Angeles; KOIN, Portland; KQW, San Jose, Cal. Others granted 60-day extensions for reactions. granted 60-day extensions for reagranted ob-day extensions for reasons other than medical program broadcasts were KUMA, Flagstaff, Ariz.; KTFI, Twin Falls, Id.; KLPM, Minot, N. D.; KCMC, Texarkana, Ark., and WTNJ, Trenton, N. J.

Public Utility on WEAF

NBC has sold WEAF without a network for one hour Sunday evenings, beginning at 6:30 p. m., for a program sponsored by Consolidated Gas Co., New York. The hour from 6 to 7 is reserved, under the NBC standard station contract, for local programs, so the possibility of a network sale is sacrificed only for the second half hour. Booked by McCann-Erickson Inc., the program deals with New York history and comprises dramatizations and music. The campaign is institutional, to bring Consolidated and its numerous subsidiaries (including electric power companies) to the attention of its consumers. It started Sept. 29.

Full Meals for News-Hungry Listeners

Still hungry after its daily ration of 35,000,000 newspapers, the public's insatiable appetite for news has made newscasting one of radio's most popular features.

WKY for years has served its listeners with spot news bulletins supplied through the cooperation of the Daily Oklahoman and Oklahoma City Times, scoring smashing news beats consistently.

So when it began airing four regular 15-minute news

periods daily on September 16th, WKY already had an established reputation for alert and reliable newscasting.

With this more comprehensive and regular newscasting service for its news-hungry listeners, WKY more truly than ever is the leader in radio entertainment and education in Oklahoma.

WIRO

DATES for the first annual Pacific Coast convention of the American Association of Advertising Agencies at Del Monte, Cal., have been set for Oct. 24-25. All sessions will be invitational. First day sessions, for members only, will feature talks and round table discussions by agency executives. The second day will also be for members and probably in vite d guests. Attendance of several eastern officers of the AAAA is expected.

Dana H. Jones, president of the Dana H. Jones Adv. Agency, Los Angeles, and chairman of the convention program committee, stated that all sessions will follow closely the style set by the AAAA in White Sulphur Springs last April Particular emphasis will be placed on agency management rather than on advertising technique, it was stated. Walter A. Burke, McCann-Erickson Inc., San Francisco, regional executive of the AAAA for the Pacific Coast, is acting as "clearing house" for the convention.

AMONG the 30 million U. S farmers, 25% have radios ever though 93% have neither bathtube nor showers and 76% still us kerosene or gasoline lamps, reporte the Rural Electrification Administration.

"Romance Reporter"

THE Romance Reporter, who picks the most typical romantic couple coming from the marriage license bureau and interviews them before the microphone, is a new quarter-hour program broadcast each noon over WBBM, Chicago, under the sponsorship of Nelson Brothers Storage & Furniture Co., Chicago. Martha Linn, Chicago advertising woman who devised the program, herself selects the couple and handles the interviews, asking such questions as "Where did you meet? Was it love at first sight? When will you be married?", and suggesting that they buy their furniture from the sponsor, who gives each couple a pair of lamps as a wedding gift.

EDWARD F. STEVENSON has been appointed director of radio for Kelly, Nason & Roosevelt Inc., New York agency. Mr. Stevenson was formerly connected with Crosby-Gaige, New York stage producer.

REINCKE - ELLIS-YOUNGGREEN & FINN Inc., Chicago, on Oct. 1 will move to larger quarters in the McGraw-Hill Bldg.

C. HALSTEAD COTTINGHAM, for more than six years with Campbell-Ewald Co. Inc., in Detroit and New York where he served as art director, radio executive and account executive, has rejoined N. W. Ayer & Son Inc., as an account executive in the Philadelphia office.

FRANCIS WOODWORTH, assistant account executive, Lord & Thomas, San Francisco, resigned Sept. 15, to join National Geographic Magazine in Washington, in an editorial capacity.

THOMAS AITKEN Jr., formerly with Bowman, Deute, Cummings Inc., San Francisco, has joined Kelly, Nason & Roosevelt Inc., that city, as account executive, succeeding Worth Hale, resigned.

INNES HARRIS has been promoted to director of publicity for Erwin. Wasey & Co., New York. Mr. Harris was formerly in charge of radio publicity.

FRANK T. SAMUEL, vice president of Harold Cabot & Co., Boston agency, has been placed in charge of the radio and merchandising departments.

JANE ROBINSON, formerly in the advertising department of Ransohoff's, exclusive San Francisco woman's apparel shop, has joined the Maurice H. Hyde Co. advertising agency in that city. She will service radio as well as other accounts.

—That Boarding-House Reach!

—YESSIR, Northwestern Ohio's ONLY Radio Station, WSPD, has just acquired a 1935 edition of the "boarding-house reach"—and if you don't think we're reaching out and holding the listening audience at the western end of Lake Erie, you haven't been taking your iron lately.

We mention the above, not to press you for business, but to remind you that you're missing part of your target unless WSPD carries your advertising message.

A Few Important Facts to Consider

WSPD is the ONLY Radio Station in Toledo.

WSPD is a basic Columbia outlet.

WSPD has just installed a new 5000 Kw. Transmitter.

WSPD now operates on 2500 Watts day and 1000 Watts night.

Representatives:

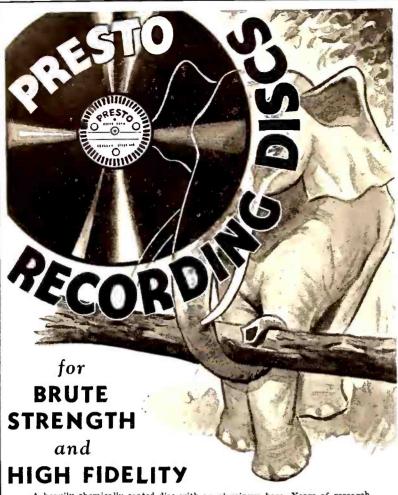

Joseph H. McGillvra 485 Madison Avenue New York, N. Y.

National Representatives

Right over the old "HOME PLATE"

• We've been "putting it over" for Wheaties in Cleveland ... yes, and into the "home plate" of thousands who go for sports as well as breakfast foods. In fact, Wheaties, sponsoring the regular broadcasting of Indian baseball games, have climbed from fifth to second place in the cereal league standings. And that from the famous Parent-Teachers' Association "Pantry Survey" made

annually by a local newspaper.

Aired over our wave recently have been Mel Harder, ace pitcher, who drew more than 10,000 entries in a sponsored contest...the All-Star game played in Cleveland's giant stadium . . . Lawson Little's smashing victory in the National Amateur... the Baer-Louis battle...official weekly programs of golf and amateur baseball associations. We could go on

and on ... could tell of the commercial possibilities offered by football, hockey and basketball programs now coming up, ready for sponsorship.

But, before we let our modesty run away with us, we're doing a sign-off. This is WGAR, suggesting that all advertisers who wonder what on earth to do about Northern Ohio sales, consider well the sports features of Cleveland's Friendly Station.

ELLIS VANDERPYL

whose daily Sports Flashes helped win a \$200,000 business increase in a single year for a local clothier.

BIG LEAGUE

WHAT A LINE-UP! Just scan this select list of stars in the broadcasting firmament. Yes, every one of them is currently using display space in BROADCASTING Magazine, because Big League stations know the Big League advertising medium. They know that those grandstands and those bleachers are filled to capacity with the "fans" for whom they want to perform . . . the advertising agencies and the advertisers who buy radio time. They have discovered that BROADCASTING Magazine is the bee-line to the men who place spot business. Those stations which don't aspire to graduate from the Bush Leagues should disregard this advertisement. We ask all others to follow the ball

Agency's Effort to Prevent Other Broadcasts Ignored

NEWS broadcasting of the Baer-Louis fight in New York on Sept. 24 resulted in complications for all the parties concerned, but it finally developed that the commercial sponsor had the ringside, blow-byblow description exclusively, while radio stations not carrying this

radio stations not carrying this broadcast were well served with prompt accounts by wire.

Mike Jacobs and the Twentieth Century Sporting Club sold exclusive broadcasting rights to the Buick Motor Co. for \$27,500, through NBC and Arthur Kudner Inc., and the suggestion was made Inc., and the suggestion was made that this deal precluded the transmission of news from the ringside to radio stations for use on the air while the fight was in progress. At a meeting on the eve of the fight, attended by representatives of the four press associations, NBC, the sponsor and agency and the Press-Radio Bureau, counsel for Arthur Kudner propounded the view that the promoters had a property right in the broadcasting, which they could sell and restrain

Agreement Fails

THIS was disputed by Isaac W. Gigges, counsel for Transradio Gigges, counsel for Transradio Press Service, who refused to give any promise that news of the fight would be kept off clients' transmitters. A compromise was suggested, that bulletins be broadcast at the end of every three rounds and then at the conclusion.

There being no general agree-ment among the conferees, the meeting broke up without any definite decision, but it was expected that the press associations (other than Transradio) would communicate to their station clients (or stations associated with newspa-per clients) the desire of Mr. Jacobs to keep off the air except at the intervals mentioned. Since Jacobs did not put this request on paper, the press associations at the last minute decided that they were free to serve their radio clients as they wished, and gave them full reports. These were in the natural course of events conveved to the Press-Radio Bureau, and edited for retransmission.

PRB decided not to give blow-by-blow description of the fight, but to wait until there was some devisive action before putting out a bulletin. The first came at the end of the second round, another in the third when Baer was down for the count of eight, and a comprehensive summary after the

knock-out.

Transradio press sent a man to the Yankee Stadium, armed with a concealed portable short-wave code transmitter. He sat in one of the 50 or so rows of so-called ringside seats, and sent out a running commentary which was picked up on the roof of a nearby build-ing, relayed to Transradio down-town, and edited for the wires.

WORLD BROADCASTING SYS-TEM has moved its San Francisco headquarters to 1050 Howard St., where an entire building is being taken over, with complete Western Electric reproducing equipment installed. C. C. Langevin remains the WBS representative in that **Profits to Edison**

AN INDICATION of the extent to which the listening public, as well as the paying audience, was interested in the Baer-Louis fight is contained in power consumption reports of the New York Edison Co. During the evening 341,000 kw. hours more than the normal consumption was recorded on the company's meters. This greatly exceeds any of the "humps" reported after previous prizefight broadcasts. On the occasion of the Baer-Braddock title bout, the added load was 274,000 kw. hours.

Frequency Signals **NowThriceWeekly**

THE Bureau of Standards, which provides a standard frequency service which is broadcast, on Oct. 1, will place the service on a three days per week basis from its station, WWV, Beltsville, Md., near Washington, D. C. The object of these radio emissions is to provide standard for scientific or other a standard for scientific or other measurements requiring an accurate radio or audio frequency or time rate. They are likewise useful to radio transmitting stations for adjusting their transmitters to exact frequency, and to the public generally for calibrating frequency standards, it was stated.

On Tuesdays and Fridays the emissions will be continuous unmodulated waves (CW), and on Wednesdays they will be modulated by an audio frequency. The audio frequency will be in general 1,000 cycles per second. On all 1,000 cycles per second. On all emissions three radio carrier frequencies will be transmitted as follows: noon to 1 p. m., Eastern Standard Time, 15,000 kc.; 1:15 to 2:15 p. m., 10,000 kc.; 2:30 to 3.30 p. m., 5,000 kc.

The emissions on 5,000 kc. will be found particularly useful at dis-

be found particularly useful at distances within a few hundred miles from Washington, those on 10,000 kc. will be useful for the rest of the United States, and those on 15,000 kc. will be useful in the western half of the United States and to some extent in other parts of the world.

During the first five minutes of the one-hour emission on each carrier frequency, announcements will be given. For the CW emissions, the announcements will be made by telegraphic keying and will consist of the call letters WWV and statement of the frequency. This announcement will be repeated every 10 minutes. For the modulated emissions, the announcements will be given only at the beginning of the hour. They will be given by voice and will include the station call letters and a statement of the carrier frequency and the audio modulatic frequency.

Except during the announce-

ments, the CW emissions will consist of continuous, unkeyed carrier frequency, giving a continuous beat note in the telephone receiver in heterodyne reception. The radiated power in the CW emissions will be 20,000 watts.

The modulated emissions, except during the voice announcements at the beginning of the hour, will consist of an uninterrupted audio frequency superposed on the carrier frequency. The radiated power will be only 1,000 watts; reception is therefore not as reliable as for the emissions of Tuesdays and Fridays.

PROGRAM NOTES

A SERIES of quarter-hour weekly talks on "Patents and Inventions" by H. E. Taylor, president of the Manufacturers Research Institute, over WIND, Gary, Ind., has resulted in a flood of telephone calls, telegrams and letters from people who want to know more about the business of putting an invention on the market conversing and pleasing the ness of putting an invention on the market, surprising and pleasing the sponsors, who were hesitant about launching the series as they thought only a small number of people were interested in the subject.

A GROUP of performers from WXYZ, Detroit, presented a special Concert Caravan program from Toronto Sept. 18 by invitation of the Canadian Radio Commission. The program was broadcast over the CRC and Michigan and Michigan networks. Heading the group was Brace Beemer, WXYZ manager, who was master of ceremonies. With him were Virginia Hooper, soprano; Eve Gladstone, pianist; Eduard Werner, until receutly musical director of WXYZ, and Salvatore Cucchiara, tenor. NORTH Carolina leads as Southeast in volume foretail trade . . . and WNC blankets resortedustrial Western North arolina — "The Quality larket of The Southeast".

IN A RECENT public contest conducted by the Chicago Tribune to pick the "Three Golden Voices" available for the paper's classified advertising department telephone solicitation room, WGN played an important part. Several hundred girls competed over WGN out of which a final 15 were selected by judges. These 15 were then presented for popular vote on a one-hour program, August 7 over WGN. Some 4600 votes were received from listeners who heard the one hour's Golden Voice contest.

WIP, Philadelphia, plans a series of autumn civic programs, the first to be dramatizations of petty rackets and means of avoiding them. The show will be handled by the Better Business Bureau and titled It's a Racket. President Ben Gimbel has arranged a series of safety programs with autoclubs, police and other groups cooperating.

KSFO, San Francisco, has inaugurated a novel idea in correct time broadcast by picking up the 12 noon and 4:30 p. m. siren atop the San Francisco Ferry Bldg. The studios are located on the thirty-first floor of the Russ Building, San Francisco's highest, and the pickup is accomplished by a parabola microphone on the roof of the structure, accurately aimed at the Ferry siren half a mile distant.

HIGHLIGHTS of musical comedy and light opera are presented Fridays by KSD, St. Louis, with matinee and evening performances, titled Romance in the Air. During the illness of Allen Clarke the program featured Mario Silva, baritone and KSD musical director.

ARBAUGH'S, leading Lansing department store, is sponsoring a daily hour Musical Clock program on WJIM, Lansing, using Thesaurus service.

"Banner Newshawk"

ONCE one of the bitterest critics of radio, James G. Stahlman, publisher of the Nashville Banner and former president of the Southern Newspaper Publishers Association, on Sept. 22 announced in a full-page advertisement in that paper that the Banner Newshawk, radio voice of the publication, would thereafter be heard six noondays weekly on WSM. Joining the newspaper staff to handle radio promotion is George Ellis, formerly identified with such radio serials as the Trial of Vivian Ware and What Would You Do? The daily bulletins of the Banner Newshawk will be edited from the AP, UP and INS reports in addition to the local and state news gathered by the newspaper.

You can't match the intimacy of a second frontier station like WAAT with anything else in broadcasting. Dude schedule makers too often skip the fascinating grip which it holds on its geographically "small town" and suburban audience. Those on our client-list know better. Somehow broadcasters just naturally turn hard boiled with a station like WAAT. Mere sentiment could never keep these friendships so long. Cash dollar business does.

WAAT grew to what it is—on the astonishing response it gets for its users. Operating daytime only, WAAT has a vast following all its own—in the rich cosmopolis of Newark, Jersey City, Hoboken, West New York, Passaic, Bayonne, Union City, Elizabeth, Hackensack, the Oranges and Montclair. Over 2,250,000 people are in its primary reach. 87.1% of the area's homes are radio homes (largest ratio in the Union). Uncharged for, you get a jumbo bonus in New York City, Brooklyn, Staten Island, Long Island and Westchester. Rates are more than moderate.

Full details and success examples on request.

CASE HISTORY 16 Manufacturer establishes 2710 new customers after 41 spot announcements.

CASE HISTORY 21 National spot advertiser found WAAT produced the lowest cost per inquiry in the New York Metropolitan area.

CASE HISTORY 38 Local retailer using WAAT exclusively increased average monthly dollar volume by \$5,000.00 during 1935.

EQUIPMENT

GATES RADIO & SUPPLY Co., Quincy, Ill., has released a new 34-page catalog of broadcast and studio equipment. It is available to all broadcasters and engineers and gives a full description of new Gates high-fidelity speech equipment, transcription turn-tables, microphones and remote amplifiers.

mote amplifiers.

BELL TELEPHONE LABORA-TORIES announces designing of a new output switching panel for Western Electric, the panel providing facilities for dispatching programs from as many as six amplifier channels over four output circuits to line amplifiers. The panel may be used to assign any one amplifier simultaneously to a combination of two, three or four outgoing circuits for independently controlled networks to separate destinations. Preselection of amplifier channels for programs to follow is a feature. The equipment is described in a Western Electric bulletin Output Switching Panel 271A.

AMPERITE Corp., New York, has designed a ball-bearing microphone stand moving up and down with a smooth pneumatic action and requiring only % turn for a positive stop. The ball-bearing clutch permits the stand to be rotated without loosening the clutch. It can be obtained in chrome or black finish with two base sizes.

WOWO, Fort Wayne, Ind., is erecting a 450-foot vertical Blaw-Knox antenna. Completion is set for the latter part of October, at which time present power of 10,000 watts will be raised to 25,000 watts.

PAUL DANIELS, chief operator of KFBI, Abilene, Kan.. is revising speech input equipment to insure high fidelity.

WLW NEWS ROOM—Caught in action is the news staff of the cinnati 500 kw. station, with its INS, Transradio and Dow-Jones lea wires. Left to right are H. Lee Macewen, news editor; Fred M. Wichard Early, Robert Heidler.

CHARLES E. SCHULER, in charge of tower sales for International-Stacey Corp., Columbus, on Sept. 18 was granted two patents by the U. S. Patent Office covering a vertical radiator antenna system. The patent numbers were 2,014,784 and 2,014,785.

KOW-KEX, Portland, Ore., have added a portable sound-effects machine, devised by Harry Singleton, chief engineer, and Earl Missner, his assistant. It has two speakers, an elaborate mixing panel with silent switches using mercury tumblers. A control regulates highs and lows, and the device can be used for talk-back to create the effect of loud-speaker or telephone. Audition records of the light, pre-grooved variety can be made. Three turntables permit novel sound combinations and split-hair timing.

WMPC, Lapeer, Mich., has installed new equipment including velocity microphones, pre-amplifiers, station amplifier and four-channel mixer, with apparatus supplied by Doolittle & Falknor Inc., and the radiator built by Blaw-Knox Co.

WDAS, Philadelphia, has placed in operation its new Blaw-Knox quarter-wave antenna, at Woodside, in Fairmount Park, Philadelphia, as well as an RCA transmitter.

WREC, Memphis, will install two 420-foot Truscon self-supporting radiators which Hoyt Wooten, manager of the station, says will be the tallest of its kind in the South. The transmitter is being moved locally and a new transmitting house will be built.

KFEQ, St. Joseph, Mo., has installed new equipment in the power input stage, eliminating motor generators. WMFF, Plattsburg, N. Y., is inling a new vertical quarter-wave nator purchased from the U. S. V. Engine & Pump Co. The transm will be moved outside the city al Nov. 1 when power is stepped up 250 watts. Transmitting equipments furnished by Collins Radio Co.

KDLR, Devils Lake, N. D., has stalled new Collins high-fidelity plifying equipment with Wes Electric preamplifiers and RCA vity microphones. New Western tric ball-type microphones have ordered. Studios are being decora

9ts here!..Western Electric's new NON-DIRECTIONAL MIKE

rom every angle, Western Electric's finest microphone

stern Electric's new non-directional microphone gives you highest grade x-up regardless of the direction of sound approach. It gives you, in even ster degree, the advantages of former Western Electric dynamic types. frequency range is from 40 to approximately 15,000 cycles per second. Engineered by Bell Telephone Laboratories, Western Electric's finest rophone is designed to operate into your present equipment. And it is ed so low that no station can afford to be without Western Electric quality.

Order yours from Graybar today!

Brussels Monitor Plans

THE BRUSSELS wave length monitoring bureau, which is maintained by Europe's International Broadcasting Union along much the same lines as the FCC's master monitoring station at Grand Island, Neb., is to be considerably enlarged, according to European reports. Not only will frequency measurements of European stations be continued but the wave lengths and modulation of American stations are to be studied.

Equipment Clean Up

To the Editor of BROADCASTING:

Congratulations on your recent editorial "Exit, Hay-Wire". We editorial "Exit, Hay-Wire". We are in complete accord with the proposed action of the FCC as is evidenced by the fact that in June of last year we put into effect in the Westinghouse broadcasting stations a set of safety rules, which we hoped would discourage as completely as possible any acts on the part of our operating per-sonnel which might endanger their lives or those of their associates. In addition, arrangements were made with the local public service companies to have their safety representatives call at the respective stations periodically to review the proficiency of the staff in firstaid procedure, in order to keep the personnel conscious of potential hazards surrounding their work. Of course, the establishment of

any safety rules must necessarily follow the "clean-up" of equipment and the installation of adequate and the installation of adequate safety devices. We have tried to make our own stations "fool proof". For example, you will recall that the new KYW transmitter at Philadelphia is protected not only with electrical interlocks but also with mechanical grounding switches on the high voltage recti-

We highly recommend that station owners and operators insure safe operating conditions for their personnel by setting up definite safety rules instead of leaving the matter to chance. Our rules were drawn up with the cooperation of the safety engineers of the Travelers Insurance Co., General Electric Co., Duquesne Light Co., West Penn Power Co., and our own company. We realize that these rules may not meet the conditions of broadcasting stations generally but hope that they may contribute to establishment of a set of standard rules.

We feel certain that many other station owners and operators join us in endorsing the action of the Engineering Division of the Com-mission in recommending the adoption of regulations requiring sta-tions to "clean up the hay-wire".

S. D. GREGORY,

Asst. to Manager Broadcasting,
Westinghouse Elec. & Mfg. Co.,
Sept. 19, 1935 Chicopee Falls, Mass.

Local Gets Nationals

To the Editor of BROADCASTING:

The postmaster in Texarkana just advised me that he positive evidence that the transcribed broadcast pertaining to "Baby" Bonds actually produced results in this territory, which, of course, enhances the value of ra-dio stations to our government.

I am thoroughly convinced that if a local manager goes after national business, even though the station be a 100 watter, it can be done. National business has been the salvation of KCMC. From time to time we will mail you items that you may rewrite and use. If at any time we may be of service to you, feel at liberty to call on us. With very best wishes for the continued growth and success of broadcasting.

R. E. Rives, Manager, KCMC, Texarkana, Ark.

Mr. Tyler Will Conduct School Broadcast Survey

TRACY F. TY-LER, secretary of the National Committee on Education by Radio, anti-commer-cial broadcasting group which is slated to lose its endowment from the Payne Fund

cation Board to make a six-month survey of school broadcasting in Europe and in the United States, he announced Sept. 23. Dr. Tyler

Dr. Tyler said his first study will be in England and Scotland where he will "have the coopera-tion of the British Broadcasting Corp., and the Central Council for School Broadcasting, as well as the British educational authorities." He said he expected also to study school broadcasting in Strong Cormany and several other France, Germany and several other European countries. Upon his re-turn he declared he would make a thorough study of the various centers in which school broadcasting is carried on and then submit a report to the Board.

Prall Presents Medal

IN A CEREMONY broadcast a nation-wide CBS network, miral Richard E. Byrd on Sept was presented the CBS Medal Distinguished Contribution to dio in recognition of his broadc from Little America over a month period which ended e this year. The presentation made by Chairman Anning Prall, of the FCC, in a brief dress in which he paid tribut! Admiral Byrd's accomplishmentably as to radio. The second notably as to radio. The so from the South Pole, broad each Saturday night, was sored by General Foods Corp., York (Grape Nuts). The acc was placed by Young & Rubi Inc., New York.
