Anyone Can Build These High Quality Precision S&M Kits At a Substantial Savings

**Precision Decade
Resistance Box**

Designed so the electronic experimenter can get any value of resistance at 1% accuracy. Made of precision components, this decade box offers such advantages as fast fingertip switching from any resistance value from 1 ohm to 1,111,110 ohms within seconds. Add or subtract as little as 1 ohm with 1% accuracy. And ordinary hand tools are all that's needed to assemble it in less than 2 hours.

**All Purpose
Shop Tachometer**

This tachometer is guaranteed to outperform any \$50 tach available today or your money will be refunded. This tach belongs in the tool chest of every machinist, electrician, model maker, motor serviceman and inventor. A six position rotary switch enables you to select three speed ranges in either forward or reverse rotation. Three ranges—0—500, 5000 and 15,000—cover the gamut of rpms in the home workshop or laboratory on machine tools, such as lathe cutting speeds, motor rpm, drilling speeds and other motor driven tools where rpm is an important factor.

**Pocket-Size
Hearing Aid**

New hearing aid design provides a minimum of 42 decibels of gain and is adequate for 75% of all cases of partial deafness. The aid weighs only three ounces and is smaller than a king-size cigarette pack. Uses latest electromagnetic earphone and miniature crystal microphone. Powered by a 10¢ pen light flashlight battery and has a switch for turning power off when not in use and a control that lets you adjust the volume to a comfortable sound level.

SCIENCE & MECHANICS, KIT DIVISION
505 Park Avenue, New York, N. Y. 10022

RTV-45 106

Please send the S&M kits that have complete assembly plans, or the assembled and fully tested electronic aids checked below. I understand that if I am not completely satisfied I may return the kits within 10 days for a complete refund of the purchase price.

Let I. C. S. equip you for success in radio-TV-electronics— with professional equipment!

Brand-new "Electronic Laboratory," now being offered for the first time, can help you land in this big money-making field—FAST!

Here's an opportunity for you to turn spare time into cold cash, or begin a whole new career—in a field where the rewards have never been greater. And you *don't* need previous experience to do it!

International Correspondence Schools has just developed a new I. C. S. Electronic Laboratory you can construct in your own home. Includes series of training kits, plus the new I. C. S. VTVM—the professional quality vacuum tube voltmeter shown here. With it comes complete course instruction combining all the fundamentals with practical knowledge you can apply at once. And best of all, you build your own professional test instrument!

I. C. S. instruction gets you going with equipment you can really use!

A famous manufacturer of nationally known electronic testing equipment worked closely with I. C. S. to develop the Electronic Laboratory and the VTVM itself. Everything you get is geared to increase your skill and knowledge step by step. Until finally, you've completed a precision testing

unit you can use for practically any kind of experimentation, design or servicing work.

Here's how I. C. S. instruction works. You begin with basic study lessons. Texts are clearly worded and easy to follow. At the same time, you "act out" what you learn with simple experiments. Then, in 3 easy stages, you assemble your own precision testing unit. Throughout, your instructor gives you expert, professional help. You learn at home, in spare time, as fast as ability permits.

Coupon brings full details on your future in this fast-growing field!

Make up your mind right now to find out how I. C. S. training in Radio-TV-Electronics can pay off for *you*. See how it can help you cash in on the tremendous demand for men skilled in installation, maintenance and servicing of radios, TV sets, hi-fis, computers, automation systems and a host of other space-age devices. Clip and mail the coupon below. You'll receive 3 valuable *free* booklets—including sample lesson. They'll show how you can land in this big money-making field *fast!*

Coupon brings 3 valuable FREE booklets. Mail it today!

43. Want to learn about computers the easy way? Brochure from *Digication Electronics* describes its line of transistorized kits.
44. A new short-form catalog (pocket size) is yours for the asking from *EICO*. Includes hi-fi, test gear. CB rigs and amateur equipment—many kits are solid-state projects.

AMATEUR RADIO

45. Catering to hams for 29 years, *World Radio Laboratories* has a new FREE 1965 catalog which includes all products deserving space in any ham shack. Quarterly fliers, chock-full of electronic bargains are also available.

46. A long-time builder of ham equipment, *Hallcrafters, Inc.* will happily send you lots of info on the ham, CB and commercial radio-equipment.

CITIZENS BAND SHORT-WAVE RADIO

48. *Hy-Gain's* new 16-page CB antenna catalog is packed full of useful information and product data that every CB'er should know about. Get a copy.

49. Want to see the latest in communication receivers? *National Radio Co.* puts out a line of mighty fine ones and their catalog will tell you all about them.

50. Are you getting all you can from your Citizens Band radio equipment? *Cadre Industries* has a booklet that answers lots of the questions you may have.

51. If you're a bug on CB communications or like to listen in on VHF police, fire, emergency bands, then *Regency Electronics* would like to send you their latest specs on their receivers.

53. When private citizens group together for the mutual good, something big happens. *Hallcrafters, Inc.* is backing the CB React teams and if you're interested in CB, circle #53.

54. A catalog for CB'ers, hams and experimenters, with outstanding values. Terrific buys on antennas, mikes and accessories. Just circle #54 to get *Grove Electronics* free 1964 Catalog of Values.

55. Interested in CB or business-band radio? Then you will be interested in the catalogs and literature *Mosley Electronics* has to offer.

Also see Item 46.

SCHOOLS AND EDUCATIONAL

56. *Bailey Institute of Technology* offers courses in electronics, basic electricity and drafting as well as refrigeration. More information in their informative pamphlet.

57. *National Radio Institute*, a pioneer in home-study technical training, has a new book describing your opportunities in all branches of electronics. Unique training methods make learning as close to being fun as any school can make it.

58. Would you like to learn all about television servicing quickly at home? *Coyne Electronics Institute* would like to show you how easy it is, and at a low cost, too.

59. For a complete rundown on curriculum, lesson outlines, and full details from a leading electronic school, ask for this brochure from the *Indiana Home Study Institute*.

60. Facts on accredited curriculum in E. E. Technology is available from *Central Technical Institute* plus a 64-page catalog on modern practical electronics.

61. *ICS (International Correspondence Schools)* offers 236 courses including many in the fields of radio, TV, and electronics. Send for free booklet "It's Your Future."

ELECTRONIC PRODUCTS

62. Information on a new lab transistor kit is yours for the asking from *Arkay International*. Educational kit makes 20 projects.

63. A complete booklet and price list giving you the inside data on *Schober Organs* are yours for the asking.

64. If you can use 117-volts, 60-cycle power where no power is available, the *Terado Corp.* Trav-Electric 50-160 is for you. Specifications are for the asking.

65. Want power plus for your auto? New Transistorized Ignition adds 20% more MPG. 3 to 5 times more spark plug life. Lower maintenance cost. Free catalog and instruction booklet.

67. Get the most measurement value per dollar." That's what *Electronic Measurements Corp.* says. Looking through the catalogue they send out, they very well might be right!

TELEVISION

70. The first entry into the color-TV market in kit form comes from the *Heath Company*. A do-it-yourself money saver that all TV watchers should know about.

71. Attention, TV servicemen! *Barry Electronics* "Green Sheet" lists many TV tube, parts, and equipment buys worth while examining. Good values, sensible prices.

72. Get your 1964 catalog of *Cis'n's* TV, radio, and hi-fi service books. Bonus—TV tube substitution guide and trouble-chaser chart is yours for the asking.

SLIDE RULE

74. Get your copy of *CIE's (Cleveland Institute of Electronics)* 2-color data sheet on their electronics slide rule and information on their free "Auto-Programmed" 4-lesson instruction course.

TOOLS

78. Do more jobs with fewer tools. *Xcelite* bulletin N563 describes double-duty midget-nut and screwdriver sets that have power and reach of standard drivers.

WHITE'S RADIO LOG

An up-to-date Broadcasting Directory of North American AM, FM and TV Stations. Including a Special Section on World-Wide Short-Wave Stations

This is the third and last part of *White's Radio Log*, now published in three parts twice each year. This format presentation enables the Editors of RADIO-TV EXPERIMENTER to offer its readers two complete volumes of *White's Radio Log* each year, while increasing the scope of the *Log* and its accuracy.

In this issue of *White's Radio Log* we have included the following listings: U. S. AM Stations by Call Letters, U. S. FM Stations by Call Letters, Canadian AM Stations by Call Letters, Canadian FM Stations by Call Letters, Cuban and Mexican AM Stations by Call Letters, and the World-Wide Short-Wave Section.

In August-September, 1965 issue of RADIO-TV EXPERIMENTER, Volume 44, No. 1, the *Log* will contain the following listings: U. S.

AM Stations by Frequency, Canadian AM Stations by Frequency, U. S. Television Stations by States, Canadian Television Stations by Location and the World-Wide Short-Wave Section. In the event you missed a part of the *Log* published during the first half of 1965, you will have a complete volume of *White's Radio Log* by collecting any three consecutive issues of RADIO-TV EXPERIMENTER during the remainder of the year. The three consecutive issues are an entire volume of *White's Radio Log* that offers complete listings with last minute station change data that are not offered in any other magazine or book. If you are a broadcast band DX'er, FM station logger, like to photograph distant TV test patterns, or tune the short-wave bands, you will find the new *White's* format an unbeatable and up-to-date reference.

World-Wide Short-Wave Stations

The World-Wide short wave stations section of *White's Radio Log* is, as its name implies, a *log*, that lists stations actually monitored by listeners in the United States, Canada and overseas. It is *not* intended to be a listing of *all* shortwave transmitters, licensed as such listings contain numerous inactive transmitters, and low powered stations which are rarely heard by DX'ers. The stations listed here, therefore, are those most often reported and consistently heard during the past few months. Many have been monitored by DX CENTRAL, the official RADIO-TV EXPERIMENTER monitoring post in New York City.

Because of the fact that this log represents actual monitoring reports rather than data taken from published program schedules received from the stations, you may find that frequencies (and operating times) given here differ from *official listings*. This is because foreign short-wave stations frequently operate several kilocycles away from their assigned (and announced) frequencies. In addition, the schedules of these stations are often changed and the changes are not published in the schedules until many months later. We feel that the type of log which *White's Radio Log* is presenting represents a very realistic picture of the current status of short-wave broadcasting, and is something which cannot be obtained elsewhere.

For the DX'er. If you care to roam the bands for DX, we present here some information which will be of invaluable use to you in tracking down DX stations.

Although the current radio propagation conditions have made the high frequency bands (11 and 13 meter bands) relatively poor for DX'ers, the other bands are generally good during certain periods of the year. As a general rule, the following bands are "hot for DX" during the daily and seasonal times indicated:

- 60-meter band=Winter nights.
- 49-meter band=Winter nights.
- 41-meter band=Winter nights.
- 31-meter band=Nights, all year.
- 25-meter band=Nights, all year.
- 19-meter band=Days all year, and
Summer nights.
- 16-meter band=Days, all year, and
Summer nights.
- 13-meter band=Days, all year.
- 11-meter band=Days, all year.

More on QSL's. In the last issue of RADIO-TV EXPERIMENTER we discussed the collecting of QSL cards from broadcasting stations, one of the finer aspects of the art of DX'ing. When our issue came out we received considerable mail asking about the possibilities of QSL cards from *non-broadcasting* radio stations, such as hams, police, ships, etc.

Ham stations generally swap QSL cards with each other after a "contact," and a good percentage of ham operators will also QSL a monitoring report if they find it useful. The addresses of ham operators may be obtained from *The Radio Amateurs Callbook* which may be purchased at Ham radio stores or by mail from any of the major parts supply houses.

Police stations, ships, and other "odd ball" stations sometimes QSL, but generally they will ignore your report unless you include with it a prepared QSL card (stamped, too) which they can sign and return to you without much bother. The radio-telephone stations frequently heard with test tapes on single-sideband are tough to QSL because they prefer to keep their transmissions as unpublicized as possible.

Citizens Band operators will frequently QSL SWL reports, but finding their addresses is a problem because of the absence of adequate callbooks. Each month there is a listing of about 1000 CB operators in *S9 Magazine*, which is available on many newsstands throughout the U. S. and Canada.

In our December-January issue we had an item about a station calling itself "Radio Free Dixie." In a report just received from Bill Brubaker of Miami, Fla., we understand that they are on from 2300 to 2400 EST on 690 kc's with a powerful signal. Programs consist of jazz music and commentaries. Our expert on "weirdo stations," Tom Kneitel, K3FLL/WB2AAI, says that this is a bootleg station operated in Cuba by Castro, designed to stir racial unrest throughout our southern states.

In our listings, a station or frequency marked with an asterisk (*) indicates a non-broadcast station or frequency. This might include aeronautical, maritime, military, or other type of transmission, either in regular AM or single sideband (SSB). In instances where many non-broadcast stations use the

same frequency, we have given you a clue as to the type of stations to be found there, rather than pin down only one station.

Let Us Know. Listeners are invited to submit their loggings to us for publication in the Shortwave section of *White's Radio Log*. Be sure to include the following information for each station you report: approximate frequency, callsign and/or station name, city and country, and time heard in Eastern Standard Time, 24 hour clock. Address your reports to: DX CENTRAL, *White's Radio Log*, c/o RADIO-TV EXPERIMENTER, 505 Park Avenue, New York, N. Y. 10022, U.S.A.

Time To Listen. All times shown in *White's Radio Log* are in the 24 hour EST clock system. For example, 0800 is 8:00 AM EST, 1200 is noon EST, 1800 is 6 PM EST, and so on. For conversion to other time zones, subtract 1 hour for CST (0800 EST is 7 AM CST), 2 hours for MST, 3 hours for PST.

The following abbreviations are used in our listings: BC—Broadcasting Company, Corporation, or System; E—Emissora; R—Radio or Radiodiffusion; V—Voice or Voz.

TNX. We are indebted to the following DX'ers who added their loggings to those of DX CENTRAL, the official RADIO-TV EXPERIMENTER monitoring station in New York City, to bring you this month's listings:

Tom Kneitel, New York, N.Y.
 Dave Mateyka, Steger, Ill.
 Richard F. Kline, Englewood, N.J.

"Meet Ed, our ace high-voltage expert"

Build the Aqua-Con

Continued from page 46

amplifier module. After the silicon rubber is applied, set the speaker aside to dry.

Final assembly and testing. The grommets are installed in "B" holes and the strain reliefs are mounted with 6-32 x $\frac{3}{8}$ -inch screws in holes "A" and "F." Center the speaker in the opening of the case, the speaker should be mounted face down in the case as shown in the Detail Drawing with the speaker lugs facing directly away from the two grommet holes "B." If done correctly the speaker cone will be facing the open end closest to grommet holes "B." The two strain reliefs in the case should face toward the back of the case.

Next prepare the 6-volt battery cable. Cut a piece of plastic lamp cord 3-feet long, and strip off $\frac{3}{8}$ -inch of insulation from the end of each wire. Solder terminal lugs on the wires as shown in the photos. Knot one wire of the pair at each end of the cable to identify the positive lead. Using the silicon rubber carefully coat the area of the terminal lug where the wire is soldered and the insulation is stripped off. This seals water out of the cable safeguarding the copper wires from corrosion. Leave enough of the terminal lug free of silicon rubber so the lug can make good electrical connection with the battery terminals.

Solder 8-inch leads to B1's battery clip. Coat the terminals on the battery clip with silicon rubber. Pass these leads through the cable clamp mounted in hole "F" on the back cover plate. It may be necessary to wrap several layers of plastic tape around these wires so they can be gripped by the cable clamp. Pass about 8 inches of wire from the microphone and 6-volt battery cable through the cable clamps in the side of the case, but don't tighten the clamps yet.

Wire the unit according to the detailed wiring diagram. When complete, recheck all connections and the polarity of the battery connectors. Remember the end of the battery cable with the knot is the positive lead. When you wire terminal strip TS1, dress the leads so they come out straight away from the terminal strip. Don't mount TS1 until the unit has been tested and coated with silicon rubber. Tighten the cable clamps.

Install B1 in its holder, noting that if you use the mercury cell, the case is positive,

not negative, as in the alkaline cell. Connect the 6-volt battery cable to B2.

Testing. Adjust the microphone on your throat, positioned just above the adams apple. The microphone elements should be equally spaced on both sides of the throat. When you speak, you should hear your amplified voice coming from the speaker. When you're sure that the unit is working, coat and seal TS1 with silicon rubber. Pay special attention to the points where the leads emerge. Mount TS1 with 4-40 x $\frac{1}{4}$ -inch hardware.

Mount transformer T1 between TS1 and the rear lip of the case. Connect the leads from T1 to terminal strip TS1, and cover everything over with silicon rubber.

The battery harness is assembled from two cotton straps. One strap is cut down to 18 inches and sewn onto the second strap, at a right angle, seven inches from the buckle of the first strap. The two rubber pads are cut out of $\frac{3}{8}$ -inch closed-cell neoprene rubber. This is the same material that wet suits are made of. If you can't obtain this rubber in a $\frac{3}{8}$ -inch thickness, use the more common $\frac{1}{4}$ -inch thickness. These rubber pads are used to provide a non-slip surface between the tank and the battery.

Use and care. When you're using the Aqua-Com, speak slowly and enunciate each word carefully. If your Scuba rig uses either a single-, or a double-hose system, you won't be able to pronounce some sounds. You won't have this difficulty if you use a full face mask.

Adjust the microphone strap for a snug, but comfortable fit with the elements positioned so they are spaced equally on both sides of the neck, just above the adams apple.

Don't forget to remove both B1 and B2 between dives to conserve battery life. After the last dive of the day, remove the batteries and rinse all parts of the Aqua-Com including the batteries with clear water. Try to keep the Aqua-Com out of enclosed hot areas and out of direct sunlight as temperatures over 140 degrees may damage the transistorized amplifier. Incorrect connection of battery B2 may also permanently damage the battery. Remember that the positive lug is the one with the knot on it. If the Aqua-Com is treated with the same care normally accorded to Scuba equipment, the only maintenance likely to be needed is the replacement of the batteries when necessary. See you at 10 fathoms. ■

BUILD, EXPERIMENT, EXPLORE, DISCOVER WITH NRI CUSTOM-DESIGNED TRAINING KITS

BUILD YOUR OWN PHONE/CODE TRANSMITTER

This is just one of seven training kits programmed into NRI's Complete Communications course. You get actual practice in building your own crystal-controlled, phone/code transmitter and putting it on the air. You experiment with modulation, "clamping" circuits, key filters, other aspects of commercial transmitter operation. Can be put on the air simply by attaching an antenna and complies with FCC regulations. As with all NRI training kits, you get the most modern features and parts.

BUILD ACTUAL ANALOG COMPUTER CIRCUITS

Industry, business offices, the government and military all need trained Electronics Technicians. NRI's Industrial Electronics course prepares you. You progress through 10 carefully designed training kits, topping off your practical experience phase of training by experimenting with feedback control systems, analog computers and digital computer elements. You actually solve problems on this analog computer you build yourself. This is the *practical*, fast way to a good paying, career position.

BUILD A CUSTOM-ENGINEERED TELEVISION RECEIVER

Want to earn \$3 to \$5 an hour in spare time? Want your own part-time or full-time business? In Radio-TV Servicing you learn to install, maintain, service radios, TV sets, hi-fi and stereo, other home Electronics equipment. In your training are eight training kits, including this complete, modern, slim-line TV receiver. You build it yourself, become familiar with components and circuits, learn servicing procedures . . . and earn extra money as you train. National Radio Institute, Washington, D.C.

Join the Thousands Who
Gained Success with NRI

"I am Frequency Coordinator for the 11th Naval District. The course was priceless." J. J. JENKINS, San Diego, Calif.

"Many thanks to NRI. I hold FCC License, am master control engineer with KXIB-TV." R.L. WOOD, Fargo, N.D.

"I am a Senior Engineering Aide. Without NRI I would still be working in a factory at a lower standard of living." D. F. CONRAD, Reseda, Calif.

GET FAST START WITH NEW ACHIEVEMENT KIT

Delivered to your door—everything you need to make a significant start in the Electronics field of your choice. An outstanding, logical way to introduce you to home-study training. It includes your first set of lesson texts and all the "classroom tools" you need. No other school has anything like the new NRI Achievement Kit.

ELECTRONICS COMES ALIVE WITH NRI TRAINING KITS

Nothing is as effective as learning by doing . . . and NRI pioneered the "home lab" technique of training. NRI invites comparison with training equipment offered by any other school. Begin NOW this exciting program of practical learning. Make the skills of the finest Electronic Technicians your own. Mail card below.

"BITE SIZE" TEXTS PROGRAM YOUR TRAINING

Certainly, lesson texts are necessary. NRI's programmed texts are as simple, direct and well illustrated as 50 years of teaching experience can make them. They are carefully programmed with NRI training kits to make the things you read about come alive. You experience all the excitement of original discovery.

HOBBY? CAREER? MAIL CARD NOW TO NRI

Whatever your need . . . whatever your education . . . there's an NRI training plan to fit your requirements. Choose from three major courses or select one of seven special courses in particular Electronics subjects. Check the postage-free card below, fill in and mail. National Radio Institute, Washington, D.C.
