### Introducing EICO's New "Cortina Series"!

Today's electro-technology makes possible near-perfect stereo at moderate manufacturing cost; that's the design concept behind the new EICO "Cortina" all solid-state stereo components. All are 100% professional, conveniently compact (3 1/8" H, 12" W, 8" D), in an esthetically striking "low silhouette." Yes, you can pay more for high quality stereo. But now there's no need to. The refinements will be marginal and probably inaudible. Each is \$89.95 kit, \$119.95 wired.

Model 3070 All-Silicon Solid-State 70-Watt Stereo

Amplifier: Distortionless, natural sound with unrestricted bass and perfect transient response (no inter-stage or output transformers); complete input, filter and control facilities; failure-proof rugged all-silicon transistor circuitry.

Model 3200 Solid-State FM/MPX Automatic Stereo Tuner: Driftless, noiseless performance; 2.4uV for 30db quieting; RF, IF, MX are pre-wired and pre-tuned on printed circuit boards — you wire only non-critical power supply.

# WHITE'S RADIO LOG

**An up-to-date Broadcasting Directory of North American AM, FM and TV Stations. Including a Special Section on World-Wide Shortwave Stations**

**T**his is the third and last part of *White's Radio Log*, published in three parts twice each year. This format presentation enables the Editors of RADIO-TV EXPERIMENTER to offer its readers two complete volumes of *White's Radio Log* each year, while increasing the scope of the *Log* and its accuracy.

In this issue of *White's Radio Log* we have included the following listings: U. S. AM Stations by Call Letters, U. S. FM Stations by Call Letters, Canadian AM Stations by Call Letters, Canadian FM Stations by Call Letters and the World-Wide Shortwave Stations section.

In the February-March, 1967 issue of RADIO-TV EXPERIMENTER the *Log* will contain the following listings: U. S. AM Stations by Frequency, Canadian AM Stations

by Frequency, U. S. Television Stations by States, Canadian Television Stations by Cities and the World-Wide Shortwave Stations section. In the event you missed a part of the *Log* published during 1966, you will have a complete volume of *White's Radio Log* by collecting any three consecutive issues of RADIO-TV EXPERIMENTER published during 1966. The three consecutive issues are an entire volume of *White's Radio Log* that offers complete listings with up-to-the minute station change data that are not offered in any other magazine or book.

If you are a broadcast band DX'er, FM station logger, like to photograph distant TV test patterns, or tune the shortwave bands, you will find the new *White's* format an unbeatable and up-to-date handy reference.

## World-Wide Shortwave Stations

■ In response to many inquiries regarding DX Central and the compilation of the shortwave section of *White's Radio Log*, we thought that a few words of explanation might be in order at this point.

DX Central is a completely equipped, professionally-manned DX monitoring station in New York City and one sub-station near the top of Long Island, New York. We are always abreast of current trends in international broadcasting as well as the latest activities of "utilities"-stations. Whenever we hear a station we enter it in a master log-book. Shortly after the station is entered in the log, it is checked against published statistics for the station so that the information in the log might be as complete as possible. Frequently, we will monitor stations on frequencies which differ from those announced, and at hours during which the station is on record as being silent—our listings in *White's Radio Log*, however, indicate *actual* loggings rather than announced schedules and frequencies.

Readers are invited to send in reports of their own loggings to be combined with ours so that the shortwave section of *White's Radio Log* will not only be as complete as possible but will also reflect a survey of stations heard throughout North America. When sending reports for listing here please include the following data: station name/callsign, time heard (in GMT), approximate frequency. Address your reports to: DX Central, WHITE'S RADIO LOG, RADIO-TV EXPERI-

MENTER, 505 Park Avenue, New York, N. Y. 10022, U.S.A.

Stations in our listings which are indicated with an asterisk (\*) are "utilities" (non-broadcast) stations. The following abbreviations are used in our listings: BC—Broadcasting Company, Corporation, or System; E—Emissora; R—Radio; V—Voz or Voice.
