Total Stations: 12
Rotation Leaders: KTUX

Rotation leaders are those monitored stations which registered 30 or more detections on any record registering 400 or more total detections in the survey week. For records with less than 400 total detections, rotation leaders register 20 or more detections. New airplay lists those stations registering six or more detections per week on a record for the first time. *Initial impact: records registering 75 or more total detections for the first time.

Monitor ROCK AIRPLAY

DETECTIONS

MARCH 7—13, 1994

Compiled from a national sample of airplay supplied by Broadcast Data Systems' Radio Track service to Airplay Monitor. 110 album rock and 32 modern rock stations are electronically monitored 24 hours a day, 7 days a week. Songs ranked by number of detections. ©1994, Billboard/BPI Communications.

Records showing an increase in detections over the previous week, regardless of chart movement. A record which has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records which attain 750 detections (album) or 300 detections (modern) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the charts after 26 weeks.
