Radio Today
How America Listens to Radio
2004 Edition
Introduction

Radio Today looks at the evolving relationship between radio and its varied listeners. There are more than 13,800 radio stations currently broadcasting around the country. Radio Today illustrates that radio continues to be one of the most popular and pervasive forms of media among Americans. The information it provides will help demonstrate to advertisers that radio is the ideal medium for reaching across all segments of the American population anytime or anyplace.

Recognizing Radio’s Reach

Radio reaches more than 94 percent of the U.S. 12+ population each week. On average, Americans spend about 20 hours per week listening to their favorite stations. These numbers have remained relatively steady across recent surveys, despite a growing number of consumer media options. Radio clearly remains a popular media choice among consumers.

Radio Rules

The impressive number of radio stations broadcasting in the U.S. today is a testimony to radio’s never-waning popularity. Although the number of AM stations has remained fairly constant over the past 20+ years, the number of FM stations has more than doubled.

In 2003, there were a total of 13,898 radio stations across the U.S.: Over 80 percent were commercial stations.
Radio Reaches All Ages

Battle of the Sexes
The number of people listening to radio weekly is fairly consistent across genders for people 18-64. Interestingly, both the oldest male and the oldest female age groups are the least likely to tune in to radio each week.

Among men, share of radio listening peaks among 35- to 44-year-olds (95.8 percent). This group also spends the most time listening (22:45). Meanwhile, male teens spend the least time listening (11:45).

Among women, share of radio listening peaks among 25- to 34-year-olds (96.6 percent). Female teens spend the least time listening each week (15:00), compared to 19:30 or more among other female age groups. Older women, 65+, are the least likely to tune in each week (85.9 percent). Otherwise, listening patterns for women 18-64 don’t vary greatly by age.

Source: Maximi$er® Plus National Regional Database, Spring 2003, Mon-Sun, 6AM-Mid
Hour-by-Hour Listening

Timing Is Everything
Radio listening peaks most noticeably during wake-ups and commutes at 7AM every weekday. Listening remains strong through 6PM, after which it begins to taper off.

On weekends, listening is at its highest between the hours of 9AM and 3PM.

Regardless of the day of the week, listening drops to its lowest levels while most people are sleeping—12Midnight through 5AM.

Source: Maximizer® Plus National Regional Database, Spring 2003, Mon-Fri, 5AM-5AM
Overnight Listening

Tuning In at Twilight
Overnight listening patterns remain consistent across age groups but not across genders. Men of all ages are more likely than their female counterparts to tune in to radio from 12 Midnight to 6 AM.

Weekly time spent listening from 12 Midnight to 6 AM is fairly consistent for both men and women and among listeners of all ages.

Source: Maximizer® Plus National Regional Database, Spring 2003, Mon-Fri, Mid-6 AM
Where People Listen: Weekdays

Radio Is a Moving Medium
Monday through Friday, the majority of radio listeners tune in at home in the morning before 7AM and in the evening after 7PM.

Between 8AM and 6PM a giant shift occurs, with 66 percent to 75 percent of radio listening occurring at places outside the home.

Source: Maximizer® Plus National Regional Database, Spring 2003, Mon-Fri, 5AM-5AM
Where People Listen: Weekends

Strong Weekend Listening at Home

Not surprisingly, listening on weekends is more likely to take place at home. Peak listening hours are before 12Noon and after 7PM. Between those hours, away-from-home listening climbs to between 51 percent and 54 percent.

Source: Maximi$er® Plus National/Regional Database, Spring 2003, Sat-Sun, 5AM-5AM

Where Men and Women Listen

Radio Is an Out-of-Home Medium for Adults 18-64

The over-65 crowd spends more time listening at home than any other age group. Interestingly, teenage girls spend a surprising amount of time tuning in at home as well. Women across all age groups tend to listen at home more than their male counterparts.

Conversely, men are more likely to listen to radio away from home; 25- to 54-year-old men are the most likely to tune in at work or at some other location outside the home.

Listening Location

At Home, at Work, or in the Car—Radio Goes Along

One of the great strengths of radio has always been its portability. Radio has the flexibility to reach listeners at home, in the car, at work, or at other away-from-home locations. And listening location can shift dramatically, depending on the time of day during the week (Monday through Sunday, 6AM to 12Midnight).

At night (7PM to 12Midnight), at-home listening hits a high of 59.6 percent. In-car listening is more consistent across dayparts, with peak listening occurring during the times most people are commuting to and from work (39.1 percent). At work, 41.7 percent of listening occurs on weekdays between 10AM and 3PM.

Source: Maximizer® Plus National Regional Database, Spring 2003
Different age groups listen to radio at different times. Peak listening times for most men and women are weekday mornings from 6AM to 10AM and late afternoons from 3PM to 7PM. Teenagers are most likely to tune in on weekends and weekday afternoons, after school. The Monday-Friday midday time slot (10AM-3PM) captures the attention of more women than men. Monday through Friday, the most dedicated nighttime listeners are teens and young Adults 18-24.

People’s Favorite Formats

This section highlights 13 specific formats available to millions of people across the country. The information illustrates that every format is unique and attracts its own distinct audience. It also demonstrates radio’s effectiveness in targeting its audience and reinforces the fact that there is a format out there for everyone!

Here is a sampling of the facts you’ll find in the following pages:

Teens 12-17 strongly prefer to listen to music that is “current”—formats such as CHR (pages 27-30) and, to a lesser extent, Urban (pages 63-66) and Alternative (pages 23-26). As they get older, young adults 18-24 lean more toward Alternative music while maintaining a continued interest in CHR and Urban. Adults 25-34 retain their habit of strong listening to Alternative (pages 23-26) but are open to a wide variety of new sounds and stations: Rock (pages 55-58) and Spanish (pages 59-62) are strong favorites, but Urban (pages 63-66), CHR (pages 27-30) and AC (pages 15-18) are popular formats, as well. After age 35, format preferences start to change. Rock (pages 55-58) is the first listening choice, but softer formats and those that hark back to an earlier era—AC (pages 15-18), New AC/Smooth Jazz (pages 39-42) and Oldies (pages 47-50)—are increasingly popular. Oldies (pages 47-50) is the format of choice for older baby boomers in the 45-54 age group, followed closely by New AC/Smooth Jazz (pages 39-42). Classical (pages 31-34) takes first place for Adults 55-64, with Adult Standards (pages 19-22), New AC/Smooth Jazz (pages 39-42) and News/Talk/Information (pages 43-46) emerging as strong contenders, as well. Adults 65+ have a very clear favorite—51.5 percent of their listening is devoted to Adult Standards (pages 19-22). Classical (pages 31-34) and News/Talk/Information (pages 43-46) are also popular formats for this crowd.

Source: Maximizer® Plus National Regional Database, Spring 2003
Adult Contemporary

Encompasses all variants of Adult Contemporary: Soft/Light, Hot AC, Mainstream AC, Full-Service AC and Adult Rock.

A Few Format Highlights
Sixty-four percent of the AC audience are Women 18+, and 36 percent are Men 18+.
Approximately half of the AC audience is aged 25-44.

Note: Due to rounding, totals may differ.
Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
Adult Contemporary

Thirty-eight percent of Adult Contemporary listening is done at work.

AC has the second highest AQH share after News/Talk/Information.

AC is also just behind News/Talk/Information for the highest share of listening 10AM-3PM. AC is tied with country for the second highest share of listening in the drive-time dayparts, 6AM-10AM and 3PM-7PM.

New Englanders are 52 percent more likely to tune in to Adult Contemporary, when compared with other regions of the country.

Note: Due to rounding, totals may differ.
Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
Adult Contemporary

Sixty-seven percent of AC listeners have either attended some college or hold a college degree. A majority, 55 percent, earn $50,000 or more per year.

Seven percent of AC listeners are black and 10 percent are Hispanic.

AC fans in the 35-64 age group spend the most time listening (9.5 hours) per week.

AC listeners are 17 percent more likely than the general population to have children in the household. Sixty-nine percent own their own homes, a figure that parallels the national average.

### Adult Contemporary

#### Purchasing Behavior

Nearly one-third of the people living in households planning to buy a new SUV are AC listeners. Nearly 22 percent of the AC audience live in households planning to buy furniture in the next 12 months and are 10 percent more likely than average to spend $200+ on groceries each week. They are 23 percent more likely to live in a household that has a 401(k) plan and 15 percent more likely to use a debit card.

#### Leisure Activities

AC listeners are 31 percent more likely than the general population to have gone in-line skating and 24 percent more likely to have gone snow-skiing. They are nine percent more likely to have eaten at a fast-food restaurant 5+ times in the past 30 days. AC fans are 20 percent more likely than average to have attended movies 3+ times in the last 3 months.

---

Note: Due to rounding, totals may differ. Source: Format definitions are from Scarborough USA+, Release 1, 2003.
Adult Standards

Features a substantial amount of pre-Rock era music. Includes Easy Listening, Middle-of-the-Road, Nostalgia and Variety outlets.

A Few Format Highlights
Fifty-five percent of the Adult Standards listening audience are Women 18+; 45 percent are Men 18+.

Fifty-one and a half percent of Adult Standards’ listening audience are Adults 65+. No other format has such a large share of its audience in a single age group.

Note: Due to rounding, totals may differ. Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
Adult Standards

Adult Standards listeners strongly prefer to listen at home. Sixty percent listen at home, while about 26 percent listen in their cars.

The most popular dayparts for listening to Adult Standards are weekdays 10AM-3PM and weekends.

Adult Standards has its largest following among listeners in the New England region, where they are 77 percent more likely to tune in than the average listener.

Note: Due to rounding, totals may differ.
Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
Adult Standards

Sixty-three percent of Adult Standards listeners have gone beyond the high school level. Thirty-six percent have household incomes between $25,000 and $50,000.

Seven and a half percent of Adult Standards enthusiasts are black, and the same percentage are Hispanic.

Listeners ages 35-64 tune in for the longest periods of time, 7.5 hours per week.

Adult Standards fans are the least likely of any format group to have children in the household. They are slightly more likely than the general population to own their own homes.

Adult Standards continued
Adult Standards

Purchasing Behavior
Adult Standards listeners are 12 percent more likely than the norm to live in a household planning to purchase a new luxury vehicle and six percent more likely to purchase a new midsize vehicle in the next year. Adult Standards fans are the least likely of any format group to buy furniture in the next 12 months.

Among financial services and products, Adult Standards listeners purchase conservative, liquid investments, such as money market accounts, at rates well above the norm (43 percent more likely).

Leisure Activities
Adult Standards listeners are more likely to participate in bicycling and snow-skiing than the general population. They are infrequent patrons of fast-food restaurants, preferring sit-down restaurants or home-cooked meals instead. Adult Standards fans are 9 percent more likely than average to have gone to the movies 3+ times in the last 3 months.

Note: Due to rounding, totals may differ.

Contemporary Hit Radio

Contemporary Hit Radio (CHR) emphasizes current hit music. Also known as Top 40. Includes stations specializing in "Pop CHR" and "Rhythmic CHR."

A Few Format Highlights
CHR listeners are more likely to be women than men. Fifty-seven percent of this audience are Women 18+.

Of all formats, CHR has the highest share of teen listeners (26 percent). Approximately three-quarters of its listeners are 34 and under.

Note: Due to rounding, totals may differ.
Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.

CHR Stations

13,898 Total Stations

CHR continued
Contemporary Hit Radio

More CHR listening occurs at home (40 percent) than in the car (36 percent) or at work (19 percent).

This format has a greater share of evening listening (14.8 percent) than any other.

CHR performs best in the Middle Atlantic (122) and New England (119) regions.

Note: Due to rounding, totals may differ.
Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
Contemporary Hit Radio

About forty percent of CHR listeners have attended some college, suggesting that many may be in the process of earning their degrees. One quarter of CHR listeners have household incomes between $50,000 and $75,000.

CHR has a strong ethnic following: 20 percent of listeners are black and 24 percent are Hispanic.

Young adults in the 12-24 age group spend the most time listening to CHR (8.25 hours) each week.

CHR fans are 40 percent more likely than the national average to have children in the household. They are 20 percent less likely than average to own their own homes.

Note: Due to rounding, totals may differ.

Contemporary Hit Radio

Purchasing Behavior
CHR listeners are 39 percent more likely to live in a household planning to buy a new SUV and 47 percent more likely to buy a used one in the next 12 months. Nearly one-quarter plan to buy furniture within the next year. CHR fans are 16 percent more likely to live in a household that spends $200+ per week on groceries.

Nearly 57 percent of CHR listeners have/use a debit card, and almost 55 percent have/use an ATM card.

Leisure Activities
In-line skating, free weights/circuit training, and jogging/running appeal greatly to CHR listeners. CHR listeners are movie enthusiasts with 28 percent having gone to the movies 3+ times in the last 3 months. Nearly a quarter have eaten at fast-food restaurants 10 or more times in the past month.

Note: Due to rounding, totals may differ.

News/Talk/Information

Almost half of News/Talk/Information listening occurs at home. More than one-third of News/Talk/Information listening takes place in cars.

Tops in morning drive time, News/Talk/Information has the largest share of listeners tuning in from 6AM to 10AM of any format.

This format performs best in the New England (133) and Pacific (119) regions.

Note: Due to rounding, totals may differ.
Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
News/Talk/Information

Forty-one percent of News/Talk/Information (NTI) listeners hold college degrees. A large majority, 61 percent, have household incomes of $50,000+. Eight percent of the NTI audience is black and five percent is Hispanic.

Listeners tune in to NTI for an average of 10 hours and 15 minutes per week.

NTI fans are 15 percent more likely than the norm to own their own homes. They are much less likely (15 percent) than the typical consumer to have children in the household.

Note: Due to rounding, totals may differ. Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
News/Talk/Information

Purchasing Behavior
News/Talk/Information (NTI) buffs are 26 percent more likely than average to live in a household planning to buy or lease a new luxury vehicle in the next 12 months.

About 30 percent of those who spend $200+ on groceries weekly, per household, are NTI listeners.

NTI fans consume all types of financial products/services at rates well above the national average.

Leisure Activities
Nearly 39 percent of those who have played golf and 31 percent of those who have gardened are NTI listeners.

NTI buffs are slightly more likely than the norm to have gone to the movies 3+ times in the past 3 months.

They patronize fast-food restaurants less often than the average consumer.

Oldies continued
Oldies

Oldies listeners listen in various locations: at work (33 percent), in their cars (34 percent) and at home (31 percent).

The most popular dayparts for listening to Oldies are weekdays 10AM-3PM and weekends.

This format performs best in the East North Central (116) and West North Central (115) regions.

Note: Due to rounding, totals may differ.
Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
Oldies

About 60 percent of the Oldies audience have gone beyond the high-school level. Almost 33 percent have household incomes between $25,000 and $50,000.

Hispanics compose more than 13 percent of the Oldies audience. Blacks account for six percent.

Fans in the 25-54 and 35-64 age groups spend about 8 hours per week listening to their favorite Oldies stations.

Oldies listeners are slightly more likely than average to own their own homes. They are about as likely as the typical American to have children in the household.

Oldies

Purchasing Behavior
Oldies listeners are 16 percent more likely than average to live in households planning to purchase a new midsize car or SUV in the next 12 months. They are slightly more likely than the general population to purchase furniture in the next 12 months.

The average Oldies fan has spent $107 weekly, per household, on groceries—a figure that is slightly above the norm.

Nearly 29 percent of the Oldies audience have 401(k) plans.

Leisure Activities
Oldies listeners are more likely to have gone golfing, powerboating and swimming than the general population. They are slightly more likely to have gone to the movies than the typical American. Oldies fans have eaten at fast-food restaurants slightly more often than the average consumer.

Oldies Strengths
This format’s listeners are more likely to:

Rock

The majority of listening for Rock is done away from home, either at work (36 percent) or in the car (37 percent).

Morning drive has the highest share of listening for this format, but throughout the day listening to Rock stations remains fairly consistent.

West North Central listeners are 46 percent more likely to tune in to Rock stations than listeners in other regions. Rock is quite popular in the Mountain region as well.

Note: Due to rounding, totals may differ.
Source: Format definitions are from Arbitron. Data come from Maximizer® Plus National Regional Database, Spring 2003.
Rock

Fifty-eight percent of Rock listeners have gone beyond the high school level. Nearly thirty-five percent have household incomes between $25,000 and $50,000.

Two percent of the Rock audience is black and eight percent is Hispanic.

Most Rock format fans spend about 8.5 hours per week listening to their favorite stations.

Sixty-eight percent of Rock listeners own their own homes, a rate that is comparable with the national average. They are 27 percent more likely than average to have children in the household.

Note: Due to rounding, totals may differ.

% of population for top 100 markets
Urban

Almost half (48 percent) of Urban listening occurs at home. Nearly one-third (30 percent) occurs in cars.

Urban stations are enjoyed at night: 11.3 percent of listening occurs during weekdays from 7PM to Midnight.

Listeners in the South Atlantic region are 61 percent more likely to listen to Urban than the average listener.

Note: Due to rounding, totals may differ.

100 = National Average
Mon-Sun, 6AM-Mid, Persons 12+, AQH Shares
Urban

Fifty-four percent of Urban listeners have gone beyond the high-school level. Over one-third have household incomes of $50,000+.

Black listeners compose the overwhelming majority, 82 percent, of the Urban audience.

Urban listeners spend 11 hours and 45 minutes per week tuning in to their favorite stations—the second highest time spent listening among all the format groups.

Over 56 percent of Urban fans have children in the household. Fifty-one percent own their own homes, which is well below the national average of 69 percent.

Note: Due to rounding, totals may differ.

Urban

Purchasing Behavior
Urban listeners are 61 percent more likely than the norm to live in a household planning to purchase/lease a new luxury vehicle in the next 12 months. They are 36 percent more likely than the norm to plan to buy furniture in the next year. They are more likely to have spent $200+ on groceries per household, weekly.

Like Spanish-language listeners, Urban fans are less likely to use financial products and services than the typical consumer.

Leisure Activities
Twenty-eight percent of Urban listeners enjoyed jogging or running, and almost 25 percent have engaged in free weights/circuit training. They have eaten at fast-food restaurants more frequently than any other format group. Urban listeners are 29 percent more likely than the norm to have gone to the movies 3+ times in the last 3 months.

### Urban Strengths
This format's listeners are more likely to:

Sources

*Radio Today* contains general statistics on radio and listening trends. Data for charts and graphs come from Arbitron's American Radio Listening Trends, Spring 2003; Maximi$er Plus National Regional Database, Spring 2003; and Scarborough USA+, Release 1, 2003. The American Radio Listening Trends combine radio listening data in Arbitron's 97 continuously measured markets with Arbitron's own format information. The Maximi$er Plus National Regional Database includes radio audience information from every market surveyed by Arbitron in the United States. Scarborough data are gathered from more than 200,000 interviews with adults, age 18 and over, in 75 of the country's largest markets. The reports are single-source studies that examine a variety of characteristics including demographics, socioeconomic characteristics, lifestyle activities, online and offline consumer habits, local market shopping patterns and product usage as well as media behavior.
Glossary

Average Quarter-Hour Persons (AQH Persons)
The average number of persons listening to a particular station for at least five minutes during a 15-minute period.

Average Quarter-Hour Rating (AQH Rating or AQH PUR)
The average Quarter-Hour Persons estimate expressed as a percentage of the population being measured.

\[
\frac{\text{AQH Persons}}{\text{Population}} \times 100 = \text{AQH Rating (\%)}
\]

Cume Persons
The total number of different persons who tune to a radio station during the course of a daypart for at least five minutes.

Cume Rating or Cume PUR
The Cume Persons audience expressed as a percentage of all persons estimated to be in the specified demographic group.

\[
\frac{\text{Cume Persons}}{\text{Population}} \times 100 = \text{Cume Rating (\%)}
\]

Format Share
The percentage of those listening to radio in the Metro who are listening to a particular radio station format.

\[
\frac{\text{AQH Persons to a specific format}}{\text{AQH Persons to all formats}} \times 100 = \text{Share (\%)}
\]

Index
A numerical comparison of one percentage to another, with an index of 100 being the norm.

P1 – First Preference Listening
Persons who listen to one radio station more than any other are P1 listeners for that station.

Time Spent Listening (TSL)
An estimate of the amount of time the average listener spent with a station (or total radio) during a particular daypart. This estimate, expressed in hours and minutes, is reported for the Metro only.

\[
\frac{\text{Quarter-Hours}}{\text{In a time period}} \times \frac{\text{AQH Persons}}{\text{Cume Audience}} = \text{TSL}
\]
