Big News About Something Small.

The Varian Compact Satcom MPA.

Our new Compact Medium Power Amplifier (CMPA) is big news in the portable satcom market. It's ideal for SNG, flyaway and small earth terminals.

The CMPA packs high efficiency in a 5.25" single rack drawer. It's also easy to use, featuring microprocessor control. Digital and analog control interfaces make the CMPA a snap to integrate into the system. Plus, it's easy to maintain with modular construction and built-in fault diagnostics— all in a rugged design that can stand up to a world of conditions.

And, as with all Varian amplifiers, the CMPA is backed by the industry's largest sales and global service network.

No matter where in the world your story breaks, Varian's CMPA will be there transmitting the news.

ENERGY SAVING EEV IOTs

...the tubes with the proven track record!

EEV has been a prime mover in energy efficiency improvements throughout its involvement in the US UHF television industry. One of the most recent technologically advanced products added to the EEV range is the high power UHF TV IOT. In addition to its energy saving features, the EEV IOT has shown that it is ideally suited to combined amplification transmitters for conventional NTSC service, together with the requirements of digital HDTV transmission.

EEV IOTs follow the Company's established philosophy of providing customers with products that are user friendly, while satisfying their technical requirements. This, together with applications engineering support and a reputation for service second to none, has established EEV as the market leader.

Why not contact EEV today to find out how you can save up to 50% on your electric power bills.

IOTs are presently available for 40kW and 60kW visual service and combined amplification powers of up to 42/4.2kW.

Dear Subscriber:

This edition of the **Television & Cable Factbook** marks the 50th year of its publication. It has been my privilege to assist in its preparation since 1945. The first Factbook actually wasn't called the Factbook—it was called simply Supplement No. 1, issued Sept. 1, 1945, accompanying the first edition of our first newsletter, **Television Digest with FM Reports**. The publisher was Martin Codel.

That Supplement comprised all of 2 pages. It consisted of a listing of the nation's 6 licensed TV stations and the 3 construction permits authorized. The licensed stations operated as many as 2 hours a day—occasionally. Supplement No. 1 is reproduced on pages v & vi. The number of TV receivers in the hands of the public was about 5,000—all monochrome sets built before World War II. Today there are over 260 million receivers in use in the U.S.—the majority color sets. Elsewhere in the world in 1945, there were a few thousand sets in England—and that was about it. Today, there are more than 600 million receivers outside the U.S.

The first edition of what was to become the Factbook Cable Volume was called Supplement No. 79, issued May 10, 1952. It consisted of just 4 pages. It listed 70 cable systems; they served some 14,000 subscribers. Today, about 58.3 million U.S. homes are linked to cable.

Now, the Factbook comprises 3 volumes totalling approximately 4,800 pages. The Stations Volume runs 2,000 pages, covering more than 1,500 TV stations. The Cable Volume has 2,200 pages, providing details on approximately 11,200 systems. The Services Volume covers over 600 pages.

The astonishing growth of these industries is a story of people, of leadership. I have had the rare opportunity to know most of the pioneers and those who built on the foundations laid by the pioneers, and to report their work. There were literally thousands of such people, prominent among them David Sarnoff of RCA and NBC, William Paley of CBS, Leonard Goldenson of ABC, FM inventor Edwin Armstrong, tube inventor Lee DeForest, big-picture-tube advocate Allen DuMont, cable pioneers Martin Malarkey, Bill Daniels, Milton Shapp and Irving Kahn, FCC chairmen such as Paul Porter and Wayne Coy, Colorado Senator Edwin Johnson and Rhode Island Senator John Pastore, lawyers such as Harry Plotkin, engineers such as Andrew Ring.

The expansion of this Factbook is likewise a story of people—our talented colleagues with a passion for accuracy, a devotion to detail.

The development of television and related industries is one of incredible technical and economic advance. I bought my first TV set in 1946—a 10-inch Admiral, black-&-white of course—for \$440, about 20% of my year's salary. What kind of set could you buy for that now? Suppose Cadillacs followed the same trend—how much would one cost today?

Celebrate these 50 years with us—and prepare for the next 50!

Sincerely,

A handwritten signature in cursive script, appearing to read "Albert Warren".

1988	8,500	44,000,000
1989	9,050	47,500,000
1990	9,575	50,000,000
1991	10,704	51,000,000
1992	11,035	53,000,000
1993	11,108	54,200,000
1994	11,214	55,300,000
1995	11,351	56,500,000

Note: The change in the number of systems operating each year is determined by three factors: (1) New systems which began operation during the year. (2) Older systems coming to the attention of Television & Cable Factbook for the first time and therefore included in the total for the first time. (3) The splitting or combining of systems by operators.

Commercial Television License and CP Holders as of Sept. 1, 1945

This directory is compiled from questionnaires sent to all principals and from FCC docket sources. Channel assignments pend changes under the new FCC allocations. Changes and current applications and decisions will be reported regularly in supplements to *Television Digest & FM Reports*. Dagger (†) indicates station has no AM broadcasting affiliation.

CALIFORNIA

LOS ANGELES . . . KTSL, construction permit issued to Don Lee Broadcasting System, 5515 Melrose Ave., Hollywood, Cal.; presently operating under experimental call letters W6XAO. Studio and transmitter, 3800 Mt. Lee Drive, Hollywood; new transmitter projected atop Mt. Wilson. Frequency, Channel No. 1 (50-56 mc.). Estimated cost of installation, \$1,500,000. No estimates as to cost of operation. First went on air, Dec. 23, 1931. On air (wartime schedule), alternate Mondays 7:30-10 p.m. PWT. Ownership is same as Don Lee Broadcasting System, regional AM network, also licensee of KHJ, Los Angeles; KFRC, San Francisco; KGB, San Diego; KDB, Santa Barbara; KHJ-FM, Los Angeles. Officers: Thomas S. Lee, president; Lewis Allen Weiss, executive v.p. and general manager; Willett H. Brown, v.p. and assistant general manager. KTSL personnel: Harry R. Lubcke, director of television; Harold W. Jury, assistant director; Marjorie Campbell, film editor and secretary; Jack Stewart, program director; Grace Neville, assistant program director; William S. Klein, Gilbert Wyland, Joseph Dean, Lloyd Roe, Frederick Mueller, television engineers. Washington counsel, Dempsey & Koplovitz. CP covers new 50 kw. GE transmitter atop Mt. Wilson, elevation 5,800 ft.
Commercial Accounts: KTSL carries no commercials, but has handled experimental commercials for Safeway Stores and for film "Lorraine" thru Dan B. Miner Agency.

ILLINOIS

CHICAGO †WBKB, licensed to Balaban & Katz Corp., 175 No. State St., Chicago, motion picture theater operators, controlled by Paramount Pictures Inc.; controls Television Productions Inc., Los Angeles. Studio and transmitter, 190 No. LaSalle St. Frequency, Channel No. 2 (60-66 mc.). Estimated cost of installation, \$169,000. Estimated monthly cost of operation, \$11,000. First went on air, March 27, 1941. On air Tuesdays, Thursdays and Fridays, 7:30-8:45 p.m., Wednesdays 3-4 p.m. Station personnel: Elmer C. Upton, general manager; Herb Lyon, advertising director; Helen Carson, program director; Beulah Zachary, producer and director; Arch Broly, chief engineer. FIBER OPTIC SYSTEMS

Design • Installation • Testing • Full Turn Key Services

APPLICATIONS:

Telephone • Cable TV • 802 Networks • Process Control
Security • IVHS • Educational Networks

SERVICES INCLUDE:

SYSTEM ENGINEERING & DESIGN
OUTSIDE PLANT CONSTRUCTION
PROJECT MANAGEMENT
AERIAL & UNDERGROUND CABLE INSTALLATION
SYSTEMS INTEGRATION • PREMISES WIRING • SPLICING
TERMINATION • TESTING • ACTIVATION • TRAINING
EMERGENCY SERVICE

P.O. Box 571
Danielson, CT 06239-0571

Description of Station Directory

THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official and uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the *Factbook*.

The three grades of predicted contours required by the FCC are as follows:

Grade B Service: The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

Grade A Service: Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

Principal City Service: Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B."

NIELSEN TV STATION CIRCULATION

The *Average Weekly Circulation* estimates are based on NSI (Nielsen Station Index) diary households from the most recent February, May, July and November

— NEW AREA CODES —			
State	Before	After	Effective Date
Alabama	205	205	Northern half of Alabama; including Birmingham, Huntsville & Tuscaloosa.
		334	Southern half of Alabama; including Auburn, Mobile, Montgomery & Selma.
Arizona	602	602	Metropolitan Phoenix.
		520	Remainder of Arizona.
Colorado	303	303	Metropolitan Denver.
		970	Remainder of previous 303.
Florida	813	813	Hillsborough, Pasco & Pinellas counties.
		941	Charlotte, Collier, DeSoto, Glades, Hardee, Henry, Highlands, Lee, Manatee, Monroe, Okeechobee, Polk & Sarasota counties.
Pennsylvania	215	215	Majority of Bucks County, northeastern half of Montgomery County, Philadelphia County.
		610	Berks, Chester, Delaware, Lehigh & Northampton counties & southwestern half of Montgomery County.
Virginia	703	703	Fairfax & Prince William counties, eastern portion of Loudoun County & northern portion of Stafford County.
		540	Remainder of previous 703.
Washington	206	206	Seattle-Tacoma-Everett metropolitan area.
		360	Remainder of previous 206.

survey periods. These Sunday-Saturday 7 a.m.-1 a.m. average quarter-hour tuning shares are based on commercial television stations only.

DEFINITIONS OF NIELSEN TERMS

Designated Market Area—An area comprised of all counties wherein the combined share of audience for the home market commercial station(s) is larger than the combined share of audience for any station(s) assigned to another home market.

Television Households—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county, rounded and expressed in tens, are prepared annually by the Nielsen Research Department. Those estimates are derived by applying percent television set ownership estimates, county by county, to the estimates of total households made by Market Statistics.

Cable Television Households—A cable television household is an occupied dwelling unit which subscribes to some level of delivery service for television signals, rounded and expressed in tens.

Non-Cable Television Households—A television household which receives broadcast television signals, rounded and expressed in tens.

TV Penetration—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

Average Weekly Circulation—The estimated average number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

Average Daily Circulation—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.

SURVEY METHODS, DESCRIBED BY NIELSEN

Nielsen collects household tuning over a four week measurement period using a diary methodology. Telephone calls are made to a sample of listed and unlisted telephone numbers in the survey area. The telephone calls enlist the cooperation of the household for a one week survey, verify names and addresses among listed households and obtain names and addresses for unlisted households. In addition, the households are asked several basic questions regarding their household composition and television set ownership. Diaries are mailed to all households where an address is available. Reminder phone calls are made and mailings sent during the diary-keeping week to encourage the household to record their tuning and return the completed diary.

As diaries are returned, they are edited using established procedures and are entered into a computer system for processing. In order to compensate for differences in response rates, a weighting methodology is used to adjust the final intab sample data so that the weighted sample is in balance with the universe for various household characteristics—including geography. NSI measures the viewing in over 200 television markets across the United States at least four times a year.

EXPLANATION OF FCC SYMBOLS

FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.
2. BMPCT: Broadcast Modification of Permit Commercial Television.
3. DOC: Docket (designation applied by FCC to hearing cases).
4. GRANTED: Date of authorization by FCC.

Note: "BPCT" and "BMPCT" designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the Factbook is accompanied with its file number to facilitate reference to the Commission's official files. In each case, the file number used is the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this Factbook was published. "Docket" numbers are used in those few cases where the application was in a hearing status and a file number had not been assigned. The "granted" date indicates when the FCC approved construction of facilities involved.

After a station is completed according to the terms of its construction permit, it receives a license; this is identified by a number with a "BLCT" (Broadcast License Commercial Television) prefix. When a license is renewed, a number with a "BRCT" (Broadcast Renewal Commercial Television) prefix is employed. Applications for licenses or license renewals do not include requests for changes in facilities, thus do not affect predicted Grade A & B contours. Therefore, they are not employed as references in the Factbook.

The Grade A & B contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of Factbook publication.

Latitude and longitude coordinates on the station pages are taken from the FCC's official files. They currently are based on the North American Datum of 1927 (NAD 27). In 1995, the FCC will begin converting records to reflect the North American Datum of 1983 (NAD 83). The Factbook will continue to reflect accurately the data as on file at the FCC.

U.S. Television Station Index

Data updated to November 1, 1994 unless otherwise indicated. Includes rate digests, personnel, facilities and other data.

THE STATE PAGES

Following the map of each state, rankings for Nielsen's Designated Market Area Television Households are shown. DMA Household Rank is established by Nielsen.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of November 1, 1994.

STATION PAGES

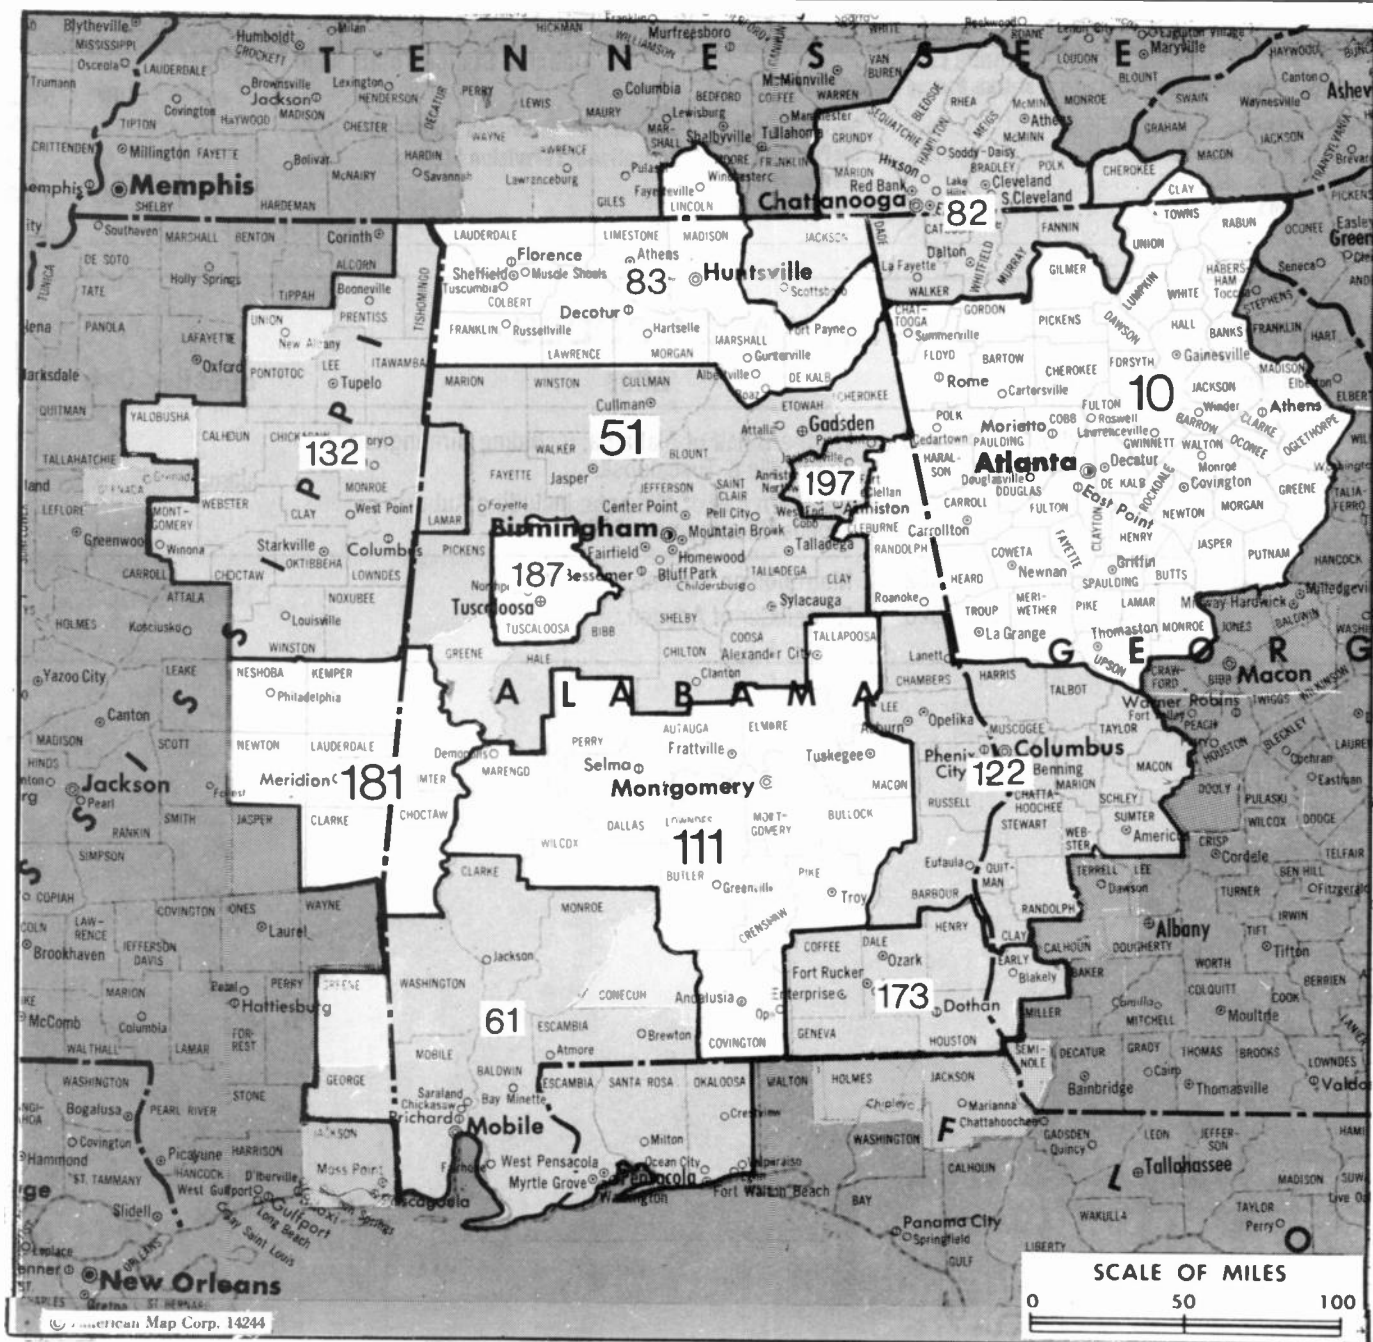

Rates, personnel and other data supplied by stations.

RATE DIGESTS: These show only the highest one-time rate charged by the stations. Most rates are also subject to frequency discounts, separate or additional rehearsal charges, talent & production charges, etc. For further details and for contract conditions, specifications etc., consult complete station rate cards, available from the stations on request.

STATION POWER: Powers shown are Effective Radiated Powers (ERP).

NIELSEN DATA: The individual stations show Total TV Households, both cable and non-cable, Average Weekly Circulation totals and an Average Daily Circulation total. For definitions of Nielsen terms, consult Description of Station section.

SATELLITE STATIONS are shown with a dash line pattern in relation to the parent listing. In the satellite listing the parent station is shown with a dash line pattern.

WHO IS WTMV?

WTMV is one of the nation's few remaining locally owned and operated stations featuring movies, music, sports and so much more!

WHY ADVERTISE WITH WTMV?

Do you want your advertising dollar to stretch a little further? WTMV is tuned to the community and to the needs of our advertisers. WTMV is advertiser friendly. We get viewers involved through a constant stream of promotions and giveaways. They pay attention to what they see and what they hear on TV-32.

WHAT YOU'LL GET FROM WTMV?

WTMV will get results! Our professional staff will work hard to make your advertising dollars go a long way. WTMV has a wide range of programs just right for you, from movies to music to sports.

WTMV - The Station It Pays To Watch!

New from Warren Publishing, Inc.

...the up-to-the-minute bench mark Survey of the consumer interactive multimedia landscape...the emerging market of the '90s... must reading for strategists involved with television, cable, telephone, consumer electronics, computer hardware and software, and for other interested communications professionals, including those in communications law firms, and in the financial and advertising communities...

THE INTERACTIVE HOME: Technologies, Strategies & Business Opportunities

By Robert Wells, Lennox Research

"The Interactive Home won't be focused on any one device, but rather will be a network of interlinked devices, some already known, some still being invented. There will be pockets of interactivity throughout the house. Interactive services will be on computers in dens, TVs in living rooms, and in kids' TVs and game boxes in what has been called 'the wired bedroom.'"

With The Editors of Warren Publishing, Inc., publisher of Communications Daily, Television Digest With Consumer Electronics, Consumer Multimedia Report, Audio Week, Video Week, and other significant publications covering all aspects of telecommunications

Chapter 2, THE INTERACTIVE HOME

The digitization of content and the development of two-way networks will make dramatic, fundamental changes in communications into and out of the American home. Vast new markets will be created; existing delivery systems will be affected radically.

Partial-service networks (offering limited video on demand, low-resolution networked games, teleshopping, etc.) are almost here; *full-service networks*—FSNs—(with multimedia, videoconferencing, high-resolution networked games, telecommuting, etc.) will be available by the end of the century.

How will FSNs affect you?

Where will this technology lead? What opportunities await you? In your business? And within your home? Broadband, two-way networks will obviously spawn many applications that have not yet been conceived. But much has already been learned. And much can be predicted, at least in terms of the next 5-10 years. For instance, it seems obvious that Americans will lead the world in pursuing this new entrepreneurial mother lode. But how will you be able to take profitable advantage of this technology of the 90s and beyond?

Robert Wells, of Lennox Research in Boulder, Colorado, who knows as much about the future of interactive networks as anyone in the U.S., has prepared, with the assistance of the editors of Warren Publishing, this comprehensive Survey of broadband interactive networks for technologists, corporate strategists, money managers and entrepreneurs. It explains the technology and the strategies of the most significant key players, and draws many reasoned conclusions about future winners, losers and opportunities.

Killer apps...

Author Wells surveys the entire interactive scene and speculates candidly about 6 possible "killer applications" (beyond the commonly recognized video on demand and videogames), offering informed assessments that, alone, are worth the price of the Study. You'll have to purchase your own copy of THE INTERACTIVE HOME to discover them for yourself, but they are all "services that uniquely take advantage of broadband, on-line interactivity."

In addition to dozens of information-filled charts and tables included in the Study, THE INTERACTIVE HOME concludes with 3 *invaluable* Appendices, each made up of information that will offer you immediate, practical assistance in formulating your own interactive plans:

- 1) **Appendix A: Strategy profiles**—an inside look at the major participants—12 carriers, 6 vendors, 11 manufacturers, 22 service and content providers—to see where they are, and where they appear to be heading.
- 2) **Appendix B: Glossary of terms**—the vocabulary of interactive multimedia is growing almost as fast as the technology; this handy Glossary will get you up to speed quickly.
- 3) **Appendix C: Directory of key players**—a complete listing of 289 of the major industry players (including addresses, phone, and fax numbers), from William Samuels of ACTV Inc., to Scott Wills of Zing Systems. Whether you want to buy, sell or network, this unique directory will point you in exactly the right direction.

A reference tool and wake-up call...

If you are becoming increasingly aware that broadband interactive networks will play a significant role in your future, you won't want to make any further decisions in that area without familiarizing yourself and the members of your staff with this important Study. *Order your copies today.* This is definitely not the time to allow your competitors to get the jump on you.

PRICE BREAK FOR MULTIPLE-COPY ORDERS

Order your 1st copy of THE INTERACTIVE HOME for the regular price of \$495. Order additional copies for \$250 per copy.

ORDER CERTIFICATE

THE INTERACTIVE HOME

YES, send THE INTERACTIVE HOME right away. I'm enclosing check credit card authorization in the amount of \$_____ for ___ copies. I understand the price of the Study is \$495 (*additional* copies at \$250 per copy).

Washington, D.C., orders add 7% sales tax.

NO-RISK GUARANTEE: If I am not 100% satisfied with THE INTERACTIVE HOME for any reason—no questions asked—I may return it to you in good condition within 30 days of receipt and receive a full refund.

Check enclosed. Credit card authorization.

Video Week is the widely-respected information service that will keep you *informed* about your industry in just 20 minutes per week.

If you have a real stake in any area of the *home video industry*, you literally cannot do without it! **Subscribe now!**

Video Week is a *weekly information service* devoted to the business of program sales and distribution for videocassettes, discs, pay television and allied media.

Video Week is filled with the kind of practical, level-headed information that is invaluable to anyone involved in the home video industry. And let's face it, information is *crucial* to your business success. Markets. Merchandising. Mergers. Finance. Competition. Litigation. Programming. **Video Week** covers it all!

Video Week offers you more content, more scope, more depth and more currency than any other publication in the home video field. And with video, cable, satellite dishes and allied fields growing more interrelated every week, action in any one sector can trigger profound changes throughout the entire industry. **Video Week** allows you to enlarge your perspective . . . to keep up with the entire industry in a single, weekly, authoritative report.

With your weekly subscription to **Video Week**, you'll be the *first* to know all about:

- pre-recorded cassettes and VCRs
- pay TV basic cable
- pay-per-view
- direct broadcast via satellite
- home computers and games

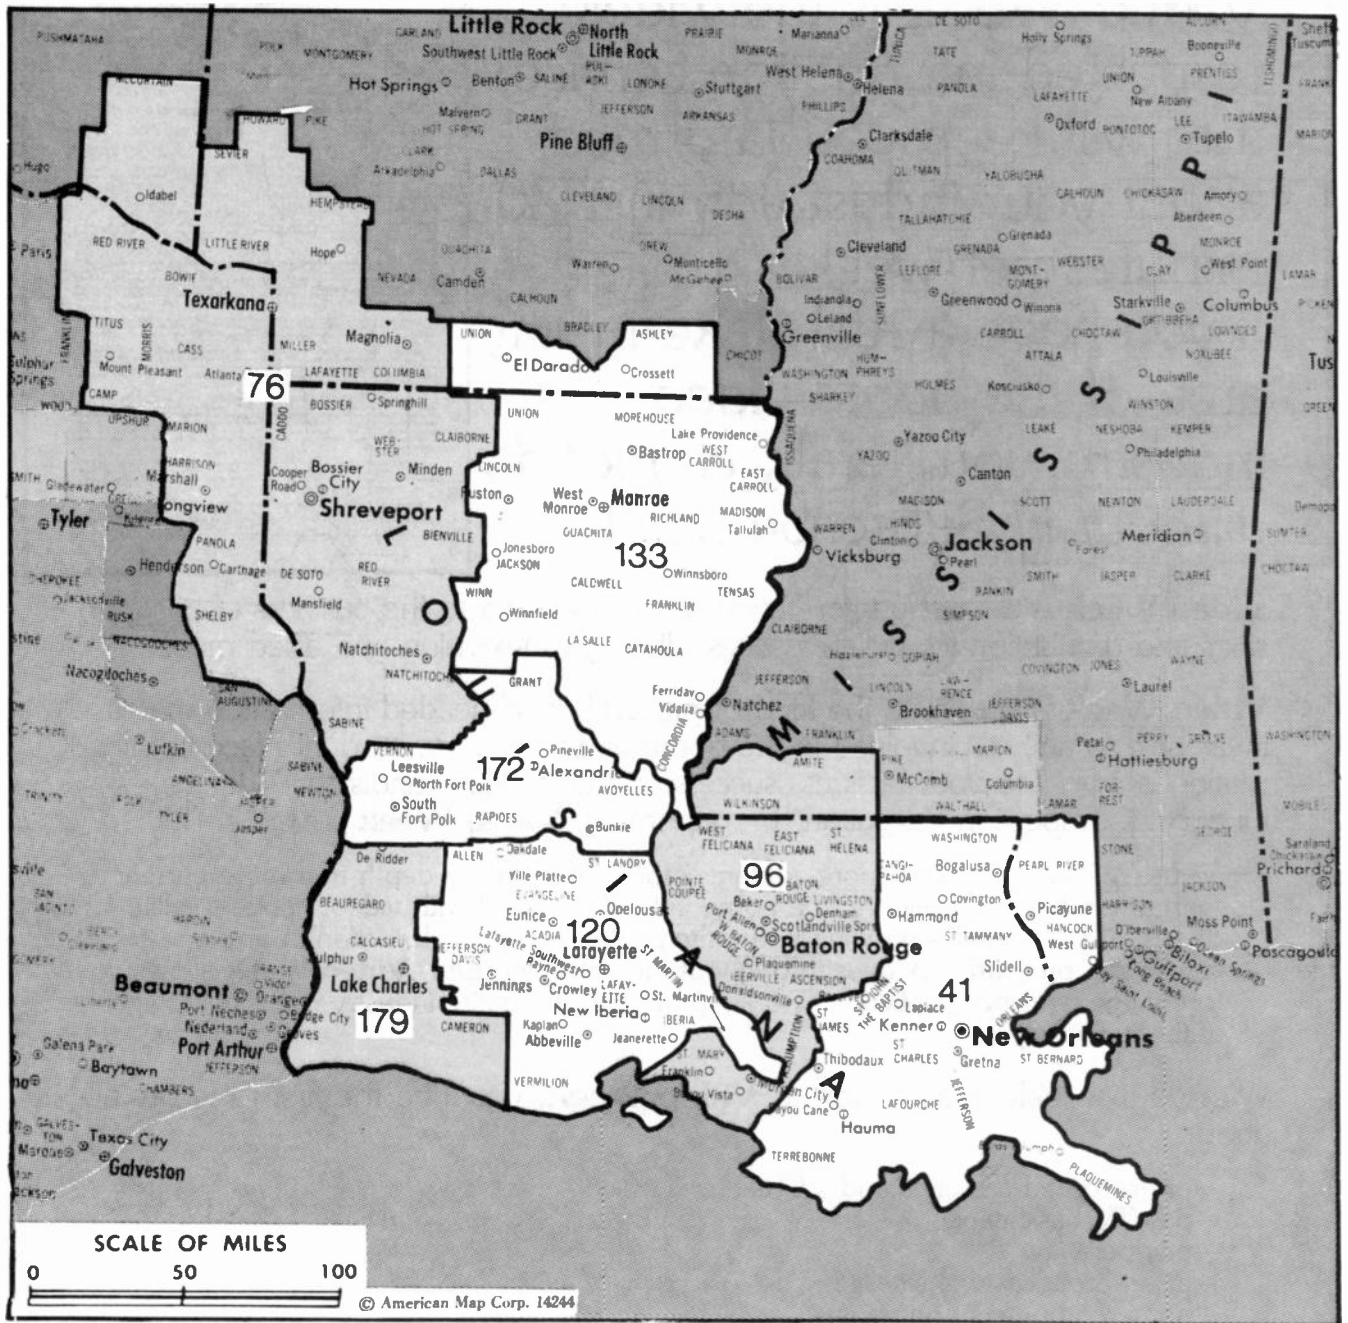

And **Video Week** has an extensive network of correspondents that cover the Congress, the courts and the FCC, to ask the questions that *need* to be answered. These seasoned reporters consult with industry leaders, advertising agencies, producers, manufacturers, distributors, duplicators. They gather information, reaction and speculation about developments from key contacts established in the almost 16 years since **Video Week's** start . . . and in the nearly half a century since the start of Television Digest.

Shouldn't you be taking advantage of all this critical information each and every week? After all, *each issue* of **Video Week** is actually an *early-warning system* about what leaders in the home video industry are thinking and saying about key issues, mergers and acquisitions, antitrust, programming and copyright law.

For subscription information, call collect: **202-872-9200.**

Ownership: Burnham Broadcasting Co. (Group Owner).

Began Operation: December 17, 1958 on Ch. 13, and on Jan. 28, 1959 FCC granted temporary Ch. 13 operation by New Orleans Television Corp. (*Television Digest*, Vol. 14:51; 15:5). Supreme Bcstg. Co. started operation on Ch. 20 Nov. 1, 1953, using WJMR-TV call letters. In Oct. 1957, WJMR-TV began experimental operation on Ch. 12 but FCC ruled in 1958 that this operation was to close by Jan. 1, 1959 but WVUE did not begin on Ch. 12 until Sept. 1, 1962. Sale of 60% by New Orleans Television Inc. (Joseph A. Paretti and associates) to Screen Gems and contingent transfer by Rust Craft of its 40% to Screen Gems approved June 2, 1965 by FCC (Vol. 5:8, 23). Switched to Ch. 8 June 8, 1970. Sale to Gaylord Bcstg. approved by FCC June 30, 1977 (Vol. 16:26; 17:28). Sale to Burnham Bcstg. L.P. by Gaylord approved by FCC June 8, 1987 (Vol. 26:47; 27:3). Sale pends (Vol. 34:35).

The concise, easy-to-digest, well-organized information service that allows you . . . in just minutes each week . . . to keep up with the latest, most accurate, relevant, indispensable information covering the entire telecommunications industry.

COMMON CARRIER WEEK

Common Carrier Week is *the* authoritative weekly news service for the telecommunications industry.

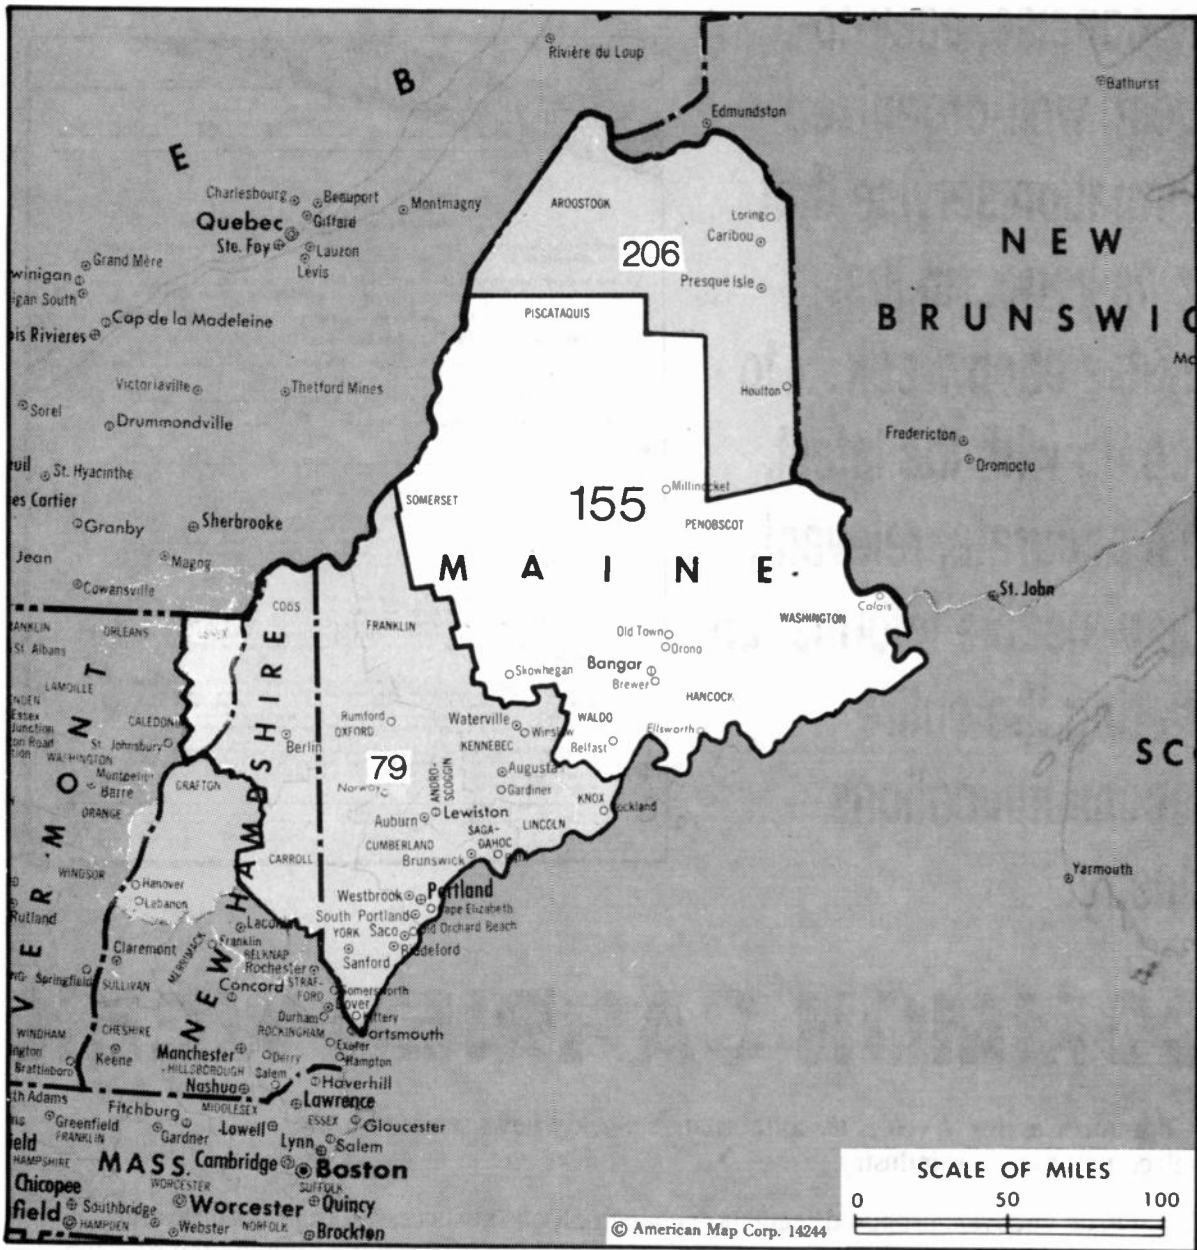

Each issue uncovers proposed regulation changes, looks at successful (and unsuccessful) business strategies, comments on new equipment and services, reports on what the decision-makers in the industry are up to, and provides the key intelligence that busy telecommunications executives *need*.

Common Carrier Week is presented in a way that makes the information you're looking for easy to find. There's a logic to each issue—you can scan the spot you're looking for and find your relevant information instantly.

Common Carrier Week will give *you* the advance intelligence to move quickly to make the management decisions that will help your business move ahead. Each week you'll receive hard-nosed business advice from the award-winning team of journalists who also keep the top leaders of the communications industry informed every day with Communications Daily.

to the authoritative weekly information service covering the latest developments in broadcasting, cable, consumer electronics and allied industries. . .

Television Digest With Consumer Electronics

Television Digest has been keeping leading communications executives informed since 1945 and is published for all those decision-makers—like you—who have a big stake in the ever-changing broadcasting, cable and consumer electronics industries.

Television Digest goes beyond the scope of any other publication by bringing into sharp focus all the conflicting forces at work—broadcast, cable, home video, MDS, DBS, SMATV and others. It provides experienced, authoritative coverage. The Los Angeles Times recently referred to **Television Digest** as “a publication considered the bible of the TV industry.” Tack Nail, covering broadcasting, and Dave Lachenbruch, covering consumer electronics, are known and respected throughout the entire industry.

And each issue of **TVD** provides thorough coverage of government activities—the FCC, Capitol Hill, the White House. **Television Digest** also gives you the latest news on marketing strategies . . . programming ploys . . . personnel shifts . . . and current standings on the volatile revenue and ratings picture.

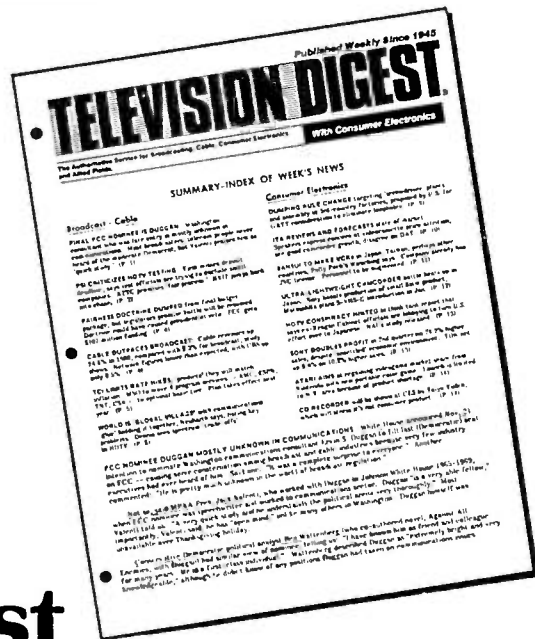

Television Digest regularly includes a host of industry surveys and statistics that cannot be found anywhere else. And because conventions, professional meetings and trade shows are of such vital importance to the communications industry, **TVD** provides complete pre- and post-meeting coverage of virtually every major professional meeting and trade show, whether in the U.S. or abroad.

Television Digest gives you the information you need, delivered in a fast-paced style and clear format that always respects your busy schedule. **TVD** is designed to be read quickly . . . to help you spend less time gathering information and more time using what you've found.

Hagerstown- Chambersburg-Martinsburg

Don'tcha just love it when you find a hidden market that everyone else is just beginning to discover?

WJAL-TV's contour reaches the Washington DMA heartland that five other DMAs can't touch...

...And we do it with the Finest Programming in the #7 DMA, programs like:

Regis + Kathi Lee	Hawkeye
Family Feud	Heaven Help Us
Disney Animation	Space Precinct
Rescue 911	Babylon 5
Heat Of The Night	Super Dave
Lonesome Dove	The Crusaders

Grade A Signals

...and Sports, like Penn State, WVU, Big East Football, Basketball, and the Baltimore Orioles.

Your program or advertising can experience the impact so many others are finding - on WJAL-TV, Washington's other Indy. Call us today and let us show you how a custom package can buy you a great audience for very little money.

The biweekly newsletter
that covers everything
that's happening in public
broadcasting... the news
and the facts behind the
news...

PUBLIC BROADCASTING REPORT

Public Broadcasting Report is the totally independent information service that covers significant developments on all public broadcasting fronts... from CPB and PBS to NPR and other network programming... from marketing innovations to new technologies... you will follow all the action, *as it develops!*

Public Broadcasting Report will keep you up to date with every important development that affects public broadcasting with:

- key reports on critical local and federal legislative action
- interviews and inside information from top executives at PBS, NPR, CPB and stations nationwide
- coverage of the latest industry studies and research
- in-depth analyses of regulatory developments
- early warnings about grants and awards complete with application deadlines

If you have a stake in public broadcasting, a personal subscription to **PBR** could make a substantial difference in your ability to pursue funding, spot trends, anticipate the impact of developments and make even more informed business decisions.

For subscription information, call collect: (202) 872-9200.

KEYC TELEVISION MANKATO

Serving one of Minnesota's fastest growing retail centers and the most productive farmland in North America!

Before making your next Mankato buy, remember the facts:

- ▶ KEYC-TV dominates its own DMA
- ▶ KEYC-TV is the #1 station in 6 additional non-DMA counties
- ▶ KEYC-TV is the only NAFB member television station in Minnesota

Began Operation: July 1, 1949 as WTCN-TV. Sold to Midwest Communications August 1952 (Television Digest, Vol. 8:10, 33); CBS sold 47% interest to Minneapolis Star & Tribune Co. in November 1954 (Vol. 10:45). Transfer of control of Mid-Continent Radio-Television Inc. (equally owned by MTC Properties & Northwest Publications Inc.) to MTC Properties approved by FCC June 30, 1976 following merger of Ridder Publications with Knight Newspapers & spin-off of Ridder broadcast properties (Vol. 14:28, 30). Acquisition of Minneapolis Star-Tribune interest by MTC Properties was accomplished Aug. 16, 1976. Sale to CBS Inc. was approved by FCC Dec. 19, 1991 (Vol. 31:25, 30, 45, 51).

News Service: CNN.

Ownership: Chris-Craft Industries Inc. (Group Owner).

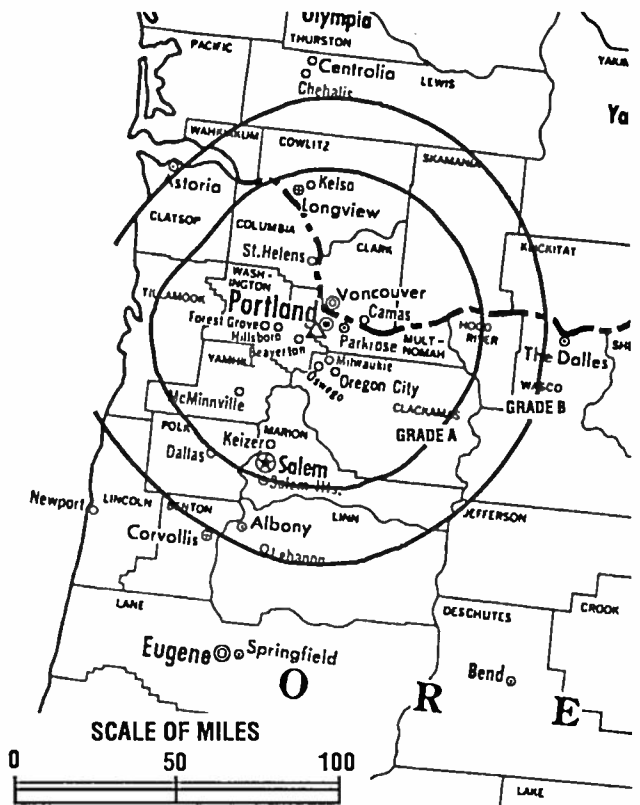

Began Operation: September 20, 1952. George Haggarty's purchase of KFOR (Ch. 12) from Henry A. White-Stephen E. Thompson-Julius L. Meier Jr. group approved April 17, 1957 by FCC; at same time Haggarty purchased KPTV (Ch. 27) from Storer and took Ch. 27 off air (Television Digest, Vol. 13:10, 11, 16, 18). Transfer from George Haggarty to NAFI Corp. approved July 22, 1959 (NAFI Corp. name changed to Chris-Craft Industries Inc.). Transfer of stock of Chris-Craft Industries Inc. by shareholders to Baldwin-Montrose Chemical Co. Inc. bringing holdings to 35% approved Nov. 8, 1967 (Vol. 7:46). Later Baldwin-Montrose merged into Chris-Craft.
