# Radio Formats Defined

*Broadcasting & Cable Yearbook* defines a radio format as programming broadcast over 20 hours weekly. Programming broadcast from one to 20 hours weekly is defined as special programming. This is not a hard and fast rule, however. Some stations may report programming unique to their main programming format(s) as "special" programming regardless of the number of broadcast hours.

Most stations broadcast one format, though some stations report having two or more formats. A station that lists four or more formats is categorized as "Variety/Diverse" or "Diverse." Formats that did not fit into a specific category are listed as "Other."

At present, *Broadcasting & Cable Yearbook* recognizes 91 different formats. These formats are listed below with appropriate definitions.

This listing is followed by a breakdown of formats by state and by province. The chart on page D-638 gives a breakdown of radio programming by AM/FM and commercial/noncommercial stations in the U.S. and Canada.

**AAA (or Tripla A)**—Adult Album Alternative. Eclectic choice of music ranging from hard rock to folk music.

**Adult Contemporary**—Recent popular songs, with a few oldies. The songs tend to be upbeat and soft. News and talk segments are prominent during rush hour "drive times." Also known as Light Rock.

**Agriculture & Farm**—News, weather and features of interest to farmers and others involved in agriculture.

**Albanian.**

**Album-Oriented Rock**—Popular rock music from past and present rock albums. Also see Rock/AOR.

# U.S. Radio Markets

The following is the Arbitron population ranking for Fall 1998, based on market definitions at that time. It is based on the 1990 U.S. Bureau of Census estimates updated and projected to January 1, 1999.

The MSA number is the population of all persons aged 12 or older in the Metro Survey Area. The TSA number is the population total of all persons 12 or older in the Total Survey Area. Following that are the call letters of stations that fall within the market as defined by Arbitron.

Certain market population totals are also embedded in larger nearby markets. It is therefore possible for a station to be listed in more than one market.

Prior to 1971, data reflects factory sales by U.S. manufacturers plus those products imported directly by distributors or dealers for resale. All import statistics are based upon average value as published by the U.S. Department of Commerce, which is F.O.B. and therefore excludes U.S. import duties, freight charged from the foreign country to the United States, and insurance.
