Television Assignments by State

The following table of assignments contains the channels designated for the listed communities in the United States, its territories, and possessions. Channels designated with an astensk (*) are assigned for use by noncommercial educational broadcast stations only. A station on a channel identified by a plus (+) or minus (-) mark is required to operate with its carrier frequencies offset 10 khz above or below, respectively, the normal carrier frequencies.

Footnotes: 1) Following the decision in Docket No. 18261, channels so indicated will not be available for television use until further action by the Commission. 2) Operation on this channel is subject to the conditions, terms and requirements set out in the report and order in Docket No. 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972, FCC 72-19 (Added 72-19, 1/7/72). 3) This channel is not available for use as Elgin unless and until it is determined by the Commission that it is not needed for use at Joliet, Ill. 4) Stations using these allotments shall limit radiation toward stations on the same channel in Puerto Rico, to no more than the effective radiated power which would be radiated by an omnidirectional radio station using maximum permissible effective radiated power for antenna height above average terrain, at the minimum distances from such stations specified in §73.610(b). The FCC shall consider the status of the negotiations with the appropriate British authorities concerning these allotments when the applications for construction permits come before the FCC.

Nielsen DMA Market Atlas

The Designated Market Area (DMA) is a geographic market design that defines each television market exclusive of others, based on measured viewing patterns. Each market's DMA consists of all the counties in which the home market stations receive a preponderance of viewing, and every county is allocated exclusively to one DMA-there is no overlap. The total of all DMAs represents the total television households in the U.S.

The DMA is a standard market definition. As a television buying tool, it is a geographical and demographic means for maximum efficiency. As a station tool, it has applications for sales, programming and promotion planning.

Following, in alphabetical order, are Nielsen's 210 markets for 2000 with coverage maps (1999) for each, with county by county breakouts of TV households. Other data includes the markets' stations, their cities of license, channel numbers and network affiliations.

Coverage maps show total survey areas in light shading, the DMAs themselves in dark shading and white, with Nielsen Metro rating areas in white. The survey areas consist of all counties in which the home market stations are viewed to a significant extent including via cable. The Metro Areas usually conform to U.S. Census Standard Metropolitan statistical areas.

Non-DMA markets do not meet Nielsen's criteria for having a DMA of their own. They are listed with the DMA of which they are a part.

A cross-reference list of cities in multi-city DMAs appears on B-241.

TV Markets by Nielsen Marketing Research Territory

Nielsen Marketing Research territory groups are another standard way of reporting sales data. The following table ranks TV markets, known as Designated Market Areas (DMAs), within each Nielsen territory. This provides a yardstick for determining the number of spot markets needed to achieve a given coverage of territory. For example, if the national media are not delivering sufficient advertising weight in New England, the planner will find that three TV markets (Boston, Hartford and Providence) contain over 75% of New England territory households. The planner can also use the table to get a better idea of what TV markets are needed to cover all of New England. Data is from the Nielsen Station Index with tabulations based on a January 1998 estimate. Copyright 1998 Nielsen Media Research.

It also provides active Notices of Proposed Rulemaking, the Telecommunications Act of 1996 and the Communications Act of 1934, and FCC decisions since 1994 affecting broadcasters. Also available in print (print version does not include Part 101 or any FCC decisions).

Broadcast Regulation

Now Available on the Internet.

Broadcast Regulation Service available on the Internet is the ultimate electronic library of the FCC Rules, proposed rules, federal statutes, and FCC decisions that govern broadcast operations. **Service is updated continuously and is fully searchable!** It will put everything you need to stay up-to-date at your fingertips. Service covers FCC Rule Parts 1, 11, 17, 25, 26, 27, 73, 74, 79, and 101. It also provides active Notices of Proposed Rulemaking, the Telecommunications Act of 1996 and the Communications Act of 1934, and FCC decisions since 1994 affecting broadcasters.

Communications Regulation

Updated every month!

Communications Regulation on CD-ROM is a fully searchable CD that includes all of the FCC Rules, all active FCC Notices of Proposed Rulemaking and Notices of Inquiry, and the full text of a variety of communications related statutes, including the Telecommunications Act of 1996 (with legislative history materials) and the Communications Act of 1934, as amended.

In addition, you can choose to subscribe to the most comprehensive collection of communications law decisions available on CD-ROM, with recent decisions not yet published in the FCC Record, the entire FCC Record (1986 to present), FCC Reports 2d (1965 to 1986), and past FCC and court decisions published exclusively by Pike & Fischer. Also available is Pike & Fischer's exclusive library of more than 60,000 topical digests covering every significant communications law holding since 1965. Also available in print.

Key to Radio Listings

Radio listings include AM (amplitude modulation) and FM (frequency modulation) radio stations in the United States, its territories and Canada. All collected data for these listings include information current to January 2000. The following is a breakdown of a sample radio listing. The sample, WOF, is a co-owned AM/FM station. To use the radio key, see boldface numbers and corresponding explanations.

(1) WOF(AM)—(2) Oct 8, 1946: **(3)** 1000 khz; 1 kw-D, 250 w-N, DA-D. (L-KQSL) TL: N35 48 31 W121 43 28 (CP: 5 kw-U). **(3a)** Stereo. **(3b)** Hrs opn: 24. **(4)** Box 1000 (99999). (909) 555-1000. FAX: (909) 999-9999. **(5)** Licensee: General Broadcasting Corp. (group owner; acq 7-20-69; $255,000 with co-located FM; **(5a)** FTR 2-12-83). **(6)** Net: ABC/E, AP; Mountain State Network. Rep: Jones & Company, Penn State. Format: MOR, C&W. Spec prog: Sp 3 hrs wkly. **(7)** John Jones, gen mgr; David Smith, chief engr. **(8)** Rates: $14; 13.50; 14; 12.50.

(1a) WOF-FM—(2) October 1959: **(9)** 101.1 mhz; 3 kw. Ant 300 ft. **(3a)** Stereo. **(10)** Dups AM 50%. Format: C&W. **(11)** WOF-TV affil. **(8)** Rates: $8.50; 7; 8.50; na.

(1) Station call letters as assigned by the Federal Communications Commission (FCC) or Canadian Radio-television and Telecommunications Commission (CRTC).

(1a) Station call letters for co-owned FM station. WOF-FM has the same ownership as WOF(AM), and the FM listing contains only information different from the AM. Co-owned AM and FM stations are often listed together, even when they have dissimilar call letters. In some instances FM may be listed first.

(2) Date station first went on air (regardless of subsequent ownership changes).

(3) Frequency in kilohertz; power and hours of operation. WOF operates with one kilowatt in daytime hours, 250 watts at night, and uses a directional antenna in daytime. Nighttime operation is limited to hours when dominant station KQSL is operating in daylight. TL refers to the geographical coordinates (longitude and latitude) of the transmitter. WOF holds a construction permit for five kilowatts power day and night.

(3a) WOF broadcasts in stereo.

(3b) WOF broadcasts 24 hours daily.

(4) Address and zip code, telephone and FAX. Teletype Writer Exchange number may also be included.

(5) Licensee name and date of acquisition (if not original owner). If the licensee is a group owner—a company with several broadcast properties—it is so identified, as a group owner of which the licensee is a subsidiary. Details on group owners are listed in Section A. If the station has been sold and the sale information is available, it is recorded after the acquisition date, ie. acq. date; purchase price; FTR date.

(5a) FTR date. FTR refers to *Broadcasting & Cable* magazine's weekly "For the Record" column that appeared in the magazine until June 8, 1998, where station sales were recorded as received from the FCC. The column (renamed FCC Actions) has been moved from the magazine to the broadcastingcable.com Web Site.

(6) Network, representative and programming. WOF national affiliates are ABC Entertainment Network and AP Network. The regional affiliate is Mountain State. The WOF national sales representative is Jones & Company and their regional sales representative is Penn State. The WOF program format is part middle-of-the-road, part country and western, with three hours weekly of special programming in Spanish. For radio format definitions, see page D-630.

(7) Key personnel.

(8) Advertising rates. This data indicates the prices the station charges for a one-minute spot, run 12-times-a-week during the following time slots: 6 a.m.-10 a.m.; 10 a.m.-3 p.m.; 3 p.m.-7 p.m.; 7 p.m.-midnight, respectively. If a time slot is not applicable, "na" replaces the rate.

(9) Frequency for WOF-FM is 101.1 megahertz, with 3 kilowatts of effective radiated power and an antenna height of 300 feet above average terrain. WOF-FM broadcasts in stereo (see **(3a)**).

(10) Programming. WOF-FM duplicates WOF(AM) programs 50% of the time and has a country and western format.

(11) Co-owned TV. WOF-TV has the same licensee as WOF-AM-FM.

Note: Listings for independent AM & FM stations follow the sample shown for WOF(AM).

An asterisk (*) preceding station call letters indicates noncommercial stations.
