## Television & Cable Factbook No. 76

### TV STATIONS VOLUME

#### Section A
- Applications Pending for U.S. Analog Television Stations . . . . A-2852
- Call Letters (U.S.) ........................................... A-9
- Construction Permits for Analog U.S. Television Stations . . . . A-2850
- Ownership of U.S. Commercial Television Stations . . . . A-2862
- Television Market Rankings (Nielsen) ........................................... A-1
- Television Stations, Commercial ........................................... A-18
- Television Stations, Public/Educational ........................................... A-2721

#### Section B
- Low Power Television/Translator Stations ........................................... B-1
- Low Power Television/Translator Station Ownership ........................................... B-213

#### Section C – Charts
- Affiliations by Market ........................................... C-32
- Channel Allocations—UHF and VHF ........................................... C-4
- Digital TV Channel Allocations ........................................... C-14
- Nielsen Geographic Regions Summary ........................................... C-37
- Nielsen TV Household Estimates ranked by DMA ........................................... C-38
- Nielsen TV Households by States and Counties ........................................... C-40
- Parent/Satellite Stations ........................................... C-2
- Television Stations on Air ........................................... C-1
- TV Households by States and Counties ........................................... C-40
- Unused Channel Allocations ........................................... C-29

### CABLE SYSTEMS VOLUME

#### Section D
- Call Letters (U.S.) ........................................... D-1
- Cable Systems ........................................... D-11
- Cable Community Index ........................................... (Back of Cable Volume 2)
- Cable Owners ........................................... D-1676

#### Section E
- Brokerage & Financing Services ........................................... E-93
- Management & Technical Consulting Services ........................................... E-100
- Pay TV & Satellite Services ........................................... E-1
- Program Sources & Services ........................................... E-65

#### Section F – Charts
- Abbreviations ........................................... F-14
- Cable Penetration State by State ........................................... F-3
- Cable Systems by Subscriber Size ........................................... F-2
- Cable System Totals by State ........................................... F-12
- Channel Capacity of Cable Systems ........................................... F-2
- Estimated Growth of the Cable Industry ........................................... F-1
- Glossary of Cable Terms ........................................... F-19
- Largest U.S. Cable Systems ........................................... F-4
- Nielsen Cable TV Household Estimates alphabetical by DMA ........................................... F-9
- Nielsen Cable TV Household Estimates by State ........................................... F-11

This page contains a list of television stations with their call letters and their respective cities. The list is organized alphabetically by city and includes information on the station's call letters. The page is from the 2008 Edition.
THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each analog TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all analog stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official or uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the Factbook.

The standards for predicted contours as required by the FCC are as follows:

Grade B Service: The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

Grade A Service: Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

Principal City Service: Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

Digital Service: Satisfactory service expected at least 90% of the time for at least 50% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B." For stations which have filed applications to provide, have been granted a permit to provide, or are providing digital service, we publish a third contour line to represent predicted digital service. Digital contours are shown by a broken line.

(The composite maps and all other contents of this book are copyrighted by Warren Communications News, publishers of Television & Cable Factbook. Reproduction in whole or part is prohibited without written permission.)

NIelsen TV STATION CIRCULATION

The Average Weekly Circulation estimates are based on NSI (Nielsen Station Index) diary households from the most recent February, May, July and November survey periods. These Sunday-Saturday 7 a.m.-1 a.m. average quarter-hour tuning shares are based on commercial television stations only.

All viewing numbers include only those estimates which surpass 5%. The Station DMA Total estimates are for viewing within the station's Designated Market Area, as defined by Nielsen. The Other DMA Total estimates are for viewing in a Designated Market Area other than the station's. The Grand Total estimates are a sum of the Station and Other DMA totals. Some stations have no viewing over 5% outside the station DMA, and therefore do not show all three categories.

DEFINITIONS OF NIelsen TERMS

Designated Market Area—An area comprised of all counties wherein the combined share of audience for the home market commercial station(s) is larger than the combined share of audience for any station(s) assigned to another home market. In a few instances, a county has a marked division in household viewing patterns, so that the county is split by Nielsen, and each portion assigned to a DMA.

Television Households—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county, rounded and expressed in tens, are prepared annually by the Nielsen Research Department. Those estimates are derived by applying percent television set ownership estimates, county by county, to the estimates of total households made by Market Statistics.

Cable Television Households—A cable television household is an occupied dwelling unit which subscribes to some level of delivery service for television signals, rounded and expressed in tens.

Non-Cable Television Households—A television household which receives broadcast television signals, rounded and expressed in tens.

TV Penetration—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

Average Weekly Circulation—The estimated average number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

Average Daily Circulation—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.
SURVEY METHODS, DESCRIBED BY NIELSEN

Nielsen collects household tuning over a four week measurement period using a diary methodology. Telephone calls are made to a sample of listed and unlisted telephone numbers in the survey area. The telephone calls enlist the cooperation of the household for a one week survey, verify names and addresses among listed households and obtain names and addresses for unlisted households. In addition, the households are asked several basic questions regarding their household composition and television set ownership. Diaries are mailed to all households where an address is available. Reminder phone calls are made and mailings sent during the diary-keeping week to encourage the household to record their tuning and return the completed diary.

As diaries are returned, they are edited using established procedures and are entered into a computer system for processing. In order to compensate for differences in response rates, a weighting methodology is used to adjust the final intab sample data so that the weighted sample is in balance with the universe for various household characteristics—including geography. NSI measures the viewing in over 200 television markets across the United States at least four times a year.

EXPLANATION OF FCC SYMBOLS

FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.
2. BMPCT: Broadcast Modification of Permit Commercial Television.
3. DOC: Docket (designation applied by FCC to hearing cases).
4. BPCDT: Broadcast Permit Commercial Digital Television.
5. BMPCDT: Broadcast Modification of Permit Commercial Digital Television.
6. GRANTED: Date of authorization by FCC.

Note: "BPCT" and "BMPCT" designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the Factbook is accompanied with its file number for analog facilities to help reference the Commission's official files. In each case, the file number used is the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this Factbook was published. "Docket" numbers are used in those few cases where the application was in a hearing status and a file number had not been assigned. File numbers for digital facilities accompany those figures in the text of the listing. Call letters for digital facilities add "-DT" to the core call letters of the parallel analog station.

The Grade A & B and digital service contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of Factbook publication.
U.S. Television Station Index

Data updated to October 1, 2007 unless otherwise indicated. Includes personnel, facilities and other data.

THE STATE PAGES

Following the map of each state, rankings for Nielsen's Designated Market Area Television Households are shown if they are available. DMA Household Rank is established by Nielsen.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of October 1, 2007.

# Index to Sections

Television & Cable Factbook No. 76

## TV STATIONS VOLUME

### Section A
- Applications Pending for U.S. Analog Television Stations A-2852
- Call Letters (U.S.) A-9
- Construction Permits for Analog U.S. Television Stations A-2850
- Digital Construction Permits and Applications Pending for U.S. Television Stations A-2855
- Ownership of U.S. Commercial Television Stations A-2862
- Television Market Rankings (Nielsen) A-1
- Television Stations, Commercial A-18
- Television Stations, Public/Educational A-2721

### Section B
- Low Power Television/Translator Stations B-1
- Low Power Television/Translator Station Ownership B-213

### Section C – Charts
- Affiliations by Market C-32
- Channel Allocations—UHF and VHF C-4
- Digital TV Channel Allocations C-14
- Nielsen Geographic Regions Summary C-37
- Nielsen TV Household Estimates ranked by DMA C-38
- Nielsen TV Households by States and Counties C-40
- Parent/Satellite Stations C-2
- Television Stations On Air C-1
- TV Households by States and Counties C-40
- Unused Channel Allocations C-29

## CABLE SYSTEMS VOLUME

### Section D
- Call Letters (U.S.) D-1
- Cable Systems D-11
- Cable Community Index D-1676
- Cable Owners D-1676

### Section E
- Brokerage & Financing Services E-93
- Management & Technical Consulting Services E-100
- Pay TV & Satellite Services E-1
- Program Sources & Services E-65

### Section F – Charts
- Abbreviations F-14
- Cable Penetration State by State F-3
- Cable Systems by Subscriber Size F-2
- Cable System Totals by State F-12
- Channel Capacity of Cable Systems F-2
- Estimated Growth of the Cable Industry F-1
- Glossary of Cable Terms F-19
- Largest U.S. Cable Systems F-4
- Nielsen Cable TV Household Estimates alphabetical by DMA F-9
- Nielsen Cable TV Household Estimates by State F-11

2008 Edition
THE STATE PAGES

Following the map of each state, rankings for Nielsen’s Designated Market Area Television Households are shown if they are available. DMA Household Rank is established by Nielsen.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of October 1, 2007.

Alabama .......................... A-19
Alaska ............................ A-83
Arizona .......................... A-110

STATION PAGES

Rates, personnel and other data supplied by stations.

STATION POWER: Powers shown are Effective Radiated Powers (ERP).

NIELSEN DATA: The individual stations show Total TV Households, both cable and non-cable, Average Weekly Circulation totals and an Average Daily Circulation total. For definitions of Nielsen terms, consult Description of Station section. These totals shown for circulation within the station DMA and outside it.
The only daily publication covering the entire telecommunications industry, Communications Daily follows the latest news in telephone, broadcasting, cable TV, electronic information distribution, satellites, cellular radio and all other important segments of communications.

The Daily condenses a tremendous amount of valuable information into each compact issue. You get the maximum amount of news about your industry—the very latest intelligence to help you make key business decisions—in an easy-to-read format that takes you just minutes each day to digest.

Fifteen veteran editors and reporters cover the news for Communications Daily. They keep you abreast of new developments in industry, the FCC, Congress, the White House and of other important telecommunications news at home and around the world.

Communications Daily makes news by covering the news. Order your subscription today. If you have a computer and e-mail address, you may choose to have your subscription to CD delivered electronically (via the Internet).
As an industry leader with more than $5 billion in sales and closings, the professional team at CobbCorp offers a unique integrity-based approach. CobbCorp provides the highest level of experience and expertise in broadcasting brokerage services. They emphasize service with discretion to buyers, sellers and investors in small, medium and large markets.
