Square D Plug-In Duct is an extremely flexible system of power distribution to branch circuits. Round bus bars provide greater mechanical strength and resistance to short circuit stresses. Steel enclosure and rotating doors over plug-in openings exclude dust and dirt.

Plug-in units are easily attached. Powerful contact jaws, affording positive pressure, can be "rocked" into position on bus bars. Five units may be attached to either side of each ten-foot section. Flexible couplings join Plug-in bus bars—absorb expansion or contraction and eliminate section alignment problems.

Straight Lengths—Available in 6, 7, 8, and 10-foot lengths. When ordering by catalog numbers add suffix number to designate other than 10-foot length (i.e., SD-1342-6, SD-1342-7, SD-1341-8). Other lengths can be furnished special and will require longer delivery. Sliding type hanger brackets are included in prices of straight lengths—one bracket for each 5 feet of duct.

Elbow—Labor only prices do not include duct material; complete device prices include labor and 4 feet of duct material.

Tee—Labor only, prices do not include duct material; complete device prices include labor and 6 feet of duct material.

Cross—Labor only, prices do not include duct materials; complete device prices include labor and 8 feet of duct material.

*When ordering elbows, tees, or crosses add suffix letter to catalog number "E" (edgewise) or "F" (flatwise) (i.e., SD-1342-LE, SD-1343-LF).

★Cable Tap Box price does not include an end closure, when tap box is used at end of run, order an end closure. When ordering cable tap box, add suffix letter to catalog number—"C" (center type) or "E" (end type), (i.e., SD-3342-C, SD-3341-E).

†Flanged End prices cover flanged collar fittings, either with or without bus extension as listed above and do not include any duct footage. For flanged end fitting with bus extensions longer than 7" standard, use price of fitting as listed without bus extension, then add for necessary bus extension from price table above.

Bus Extension—Used in conjunction with flanged ends. When connecting a flanged end to a panel or safety switch, a 2-foot bus extension is usually required. When connecting

a flanged end to a switchboard, a 3-foot bus extension is usually required.

Reducer (Unfused)—Is a joint where copper is reduced to a lower capacity, above prices include labor and material for reducer only. (Duct footage not included). Estimate duct footage of capacity required, to center of reducer and add price from above.

Plug-in duct reducers from 600A. or 400A. to a lower capacity do not require an addition in price or change in length of duct run. When plug-in or feed-in ducts of 800A. or larger are to be reduced, use the price of the larger duct capacity to be connected to the reducer. Local inspection ruling or National Electrical Code (1951), Article 364, shall govern the use of unfused reducers.

Finish—Blue-Gray.

Square D Feed-In Duct

Straight Lengths And Fittings

A very high efficiency, heavy power feeder with lowest known voltage drop characteristics. Exclusive design requires no ventilation for limiting temperature rise, permits completely enclosed dust-excluding structure.

Rigid construction resists heavy electrical stresses. Absence of all-metal enclosure eliminates "hum" and iron losses. Underwriters' approved Feed-In Duct available with either aluminum or copper bus bars. Ebonized asbestos insulating sheets permit close spacing of bus bars to obtain extremely low energy loss and voltage drop.

The solid ebonized asbestos insulating plates which totally enclose bus, have great mechanical and high dielectric strength, conduct heat readily, are impervious to moisture and resistant to arc. The surge clamps provide structural and mechanical strength necessary to withstand high short circuit currents in accordance with NEMA standards.

Pricing Of A Feed-In Duct Run

Aluminum or copper feed-in duct runs are priced in the same manner. A layout sketch of the run showing all dimensions in feet and inches and all fittings such as elbows, tees, crosses, flanged ends, end closures, cable tap boxes, expansion joints and reducers should first be made. Add all dimensions together and adjust the total to the next higher whole foot. Multiply this total by the list price per foot as determined by the type (aluminum or copper) the ampere rating and the number of poles. To this add the labor only charge for each of the elbows, tees, crosses, flanged ends, expansion joints and reducers. To this add the list price for each of the cable tap boxes and end closures. Add for any bus extension needed. The sum total of all these items is the list price of the entire run of duct. The price breakdown for each of the various fittings will be done by the factory.

Straight Lengths

Aluminum straight lengths available in 3, 5, 7 and 10 foot lengths. When ordering by catalog number, add suffix number to designate length (i.e. AFD-3160-S7, AFD-5200-S10). Hanger brackets (one for each 5 feet of duct) and joint connection parts are included in duct prices.

Copper straight lengths are available in 6, 7, 8 and 10 foot lengths. When ordering by catalog number, add suffix number to designate length (i.e. FD-3080-S6, FD-3160-S10). Hanger brackets (one for each 5 feet of duct) and joint connection parts are included in duct prices.

Elbows

Aluminum elbow labor only price does not include duct footage. Edgewise elbows are adjustable from 12 to 18 in. on each leg. Flatwise elbows are adjustable from 12 to 18 in. on each leg in the 600 A. to 1000 A. ratings, from 15 to 21 in. on each leg in the 1350 A. to 2000 A. ratings, and from 18 to 24 in. on each leg in the 2500 A. to 3000 A. ratings. The 4000 A. duct consists of two parallel runs of 2000 A. duct, therefore the adjustment of 4000 A. elbows is the same as 2000 A. Catalog numbers indicate flatwise or edgewise type by "F" or "E" suffix letter. Factory set dimensions of each leg are indicated by suffix numbers in inches (i.e. a 15 in. by 13 in. edgewise elbow would be AFD-3160-LE1513).

Copper elbow labor only price does not include duct footage. Edgewise and flatwise elbows of all ratings from 600 A. to 3000 A. are 2 feet on each leg. The 4000 A. duct consists of two parallel runs of 2000 A. duct. Elbows are not adjustable.

Flanged Ends

Aluminum flanged end labor only price does not include duct footage but does include 6 inch flared bus extension. Flanged end footage is adjustable from 6 to 12 in. in length when connected to straight length. When connected to edgewise elbow, footage between switchboard and center line of elbow is adjustable from 12 to 18 in. When connected to flatwise elbow, footage between switchboard and center line of elbow is adjustable from 12 to 18 in. in the 600 A. to 1000 A. ratings, from 15 in. to 21 in. in the 1350 A. to 2000 A. ratings, and from 18 in. to 24 in. in the 2500 A. to 3000 A. ratings. The 4000 A. duct consists of two parallel runs of 2000 A. duct, therefore the adjustment of 4000 A. flanged ends is the same as 2000 A.

Copper flanged end labor only price does not include duct footage but does include 7 inch flared bus extension. Complete flanged end footage is 2 feet long. Flanged ends are not adjustable.

Cable Tap Box

Aluminum and copper cable tap boxes do not require end closures when used at end of run. When ordering cable tap box, add suffix letter to catalog number; "C" (center type) or "E" (end type). (i.e. AFD-3160-CTB, FD-5200-ETB).

Reducer (Unfused)

Aluminum and copper unfused reducers are used at a joint where copper is reduced to a lower capacity. Prices listed in table are labor only and do not include any duct footage. Reducers do not occupy any footage in the duct run.

Bus Extension

Aluminum and copper bus extension is used in conjunction with flanged ends or transformer tap connections. Price per foot listed in the table is for straight bus extension. For formed bus extension add 20% to price listed in table.

Tees And Crosses

Aluminum tee or cross labor only price does not include duct footage. Edgewise and flatwise tees and crosses are adjustable throughout exactly the same dimensional range per leg as elbows.

Copper tee or cross labor only price does not include duct footage. Flatwise tees and crosses are 2 feet on each leg. For dimensions of edgewise tees and crosses contact Graybar. Tees and crosses are not adjustable.

Expansion Joint

Aluminum and copper expansion joint labor only prices do not include duct footage. Expansion joints occupy 3 inches of duct length.

Joint Package Assembly

Aluminum joint package assemblies consist of all necessary parts to connect two straight lengths together and also hanger brackets (one for each 5 feet of duct). One package assembly is included with each straight length. Package assemblies are not needed with other fittings. Prices of package assemblies are included in duct prices.

Copper joint package assemblies consist of all necessary parts to connect any two straight lengths or fittings together and also hanger brackets (one for each 5 feet of duct). One package assembly is included with each straight length, elbow, tee, or flanged end and two with each cross. Prices of package assemblies are included in duct prices.

Adjustable Joint Assembly

Aluminum adjustable joint assemblies consist of all necessary parts to connect two straight lengths together and also two hanger brackets. This assembly is adjustable from 0" to 12" and is supplied for use on any run of duct when needed to obtain odd dimensions in feet and inches not possible with standard straight lengths and adjustable fittings. The need for an adjustable joint assembly will be determined by the factory from the sketch of the duct run. The assembly will be set to the exact dimension needed by the factory. Copper adjustable joint assemblies are not available.

Finish

Aluminum and Copper duct is finished in blue-grey baked enamel.

Weatherproof duct enclosure consists of two-piece galvanealed steel housing with drip hoods on top of duct, joint connections and cable tap boxes.

Blue gray baked enamel finish.

Pricing Weatherproof Duct: Use the price per foot from the adjacent table for the "footage charge" and add the "labor only" charges and cable tap box and end closure prices from the above tables.

Ordering Information: When ordering weatherproof feed-in duct, it is necessary that a layout sketch accompany the order. Sketch must bear all dimensions and also whether duct is in flatwise, vertical or edgewise mounting position. If duct passes through a wall be sure to indicate wall thickness and dimension from wall surface to tap box, elbow, flanged end or end of run.

Bulldog Flexible BUStribution®DUCT Systems

Ventilated LO-X® Duct for Feeder Circuits

Available in capacities ranging from 800 to 4000 amperes inclusive, for 2-Pole, 3-Pole and 3-Phase, 4-Pole, 600 volts or less a-c or d-c, with Aluminum or Copper Bus bars.

Assures cooled electricity for feeder circuits, welders and similar heavy inductive loads.

It is a prefabricated busway designed for general feeder runs and for serving single or grouped welders and other large inductive loads.

Standard factory-built units, including elbows, tees and crosses, as well as straight sections are merely bolted together to form runs of desired length and arrangement.

Closely-spaced bus bars arranged in paired phase configuration neutralize magnetic fields and result in superior efficiency. This greatly reduces reactance and holds the voltage drop to a minimum.

Bus bars are wrapped with high-dielectric tape and securely positioned in the casing by compression type insulators. The ventilated nature of the reinforced expanded metal casing provides for natural heat dissipation, insuring cool operation.

DUCT SECTION—In addition to standard 10-foot duct sections, fittings can be furnished to meet any building contour or installation requirements.

Note—For Corrosion-Resistant Bus Duct suitable for installation outdoors or in wet or damp locations, contact Graybar. 600 Amp. and 4000 Amp. prices furnished on request—contact Graybar.

Bulldog Flexible BUStribution® DUCT Systems

Bus Plugs for Type BD Plug-in Duct for Branch Circuits

Circuit Breaker Plugs

Rated from 15 to 600 amperes, 2, 3 and 4 pole, 600 volts or less.

Used where an automatic protective device of the industrial breaker type with inverse time limit feature is required.

Quick-make and quick-break, with cover interlock.

Temperature Indicating Plugs

This plug warns, by visual indication through a lamp, when temperatures along a Bus Duct run exceed an efficient operating temperature—100° C. (212° F.) so that remedial measures can be taken to relieve the situation.

Ground Detector Plugs

For 1-Phase and 3-Phase, 480 volts and 240 volts.

Affords an easy means, through lamps, for quickly indicating grounds on the system. They also serve as potentializers by establishing a potential to ground between bus bars and casing.

Ground Detector, Potentializer Plugs

240 and 480 Volt

No.	No. of Poles	Each
*PGR6214	Two	\$70.00
*PGR6314	Three	76.00

Temperature Indicating Plugs

230 and 460 Volts

*No. TIP614..... Ea. \$71.00

*When Bus Plugs are used on 800, 1000 or 1350 ampere Duct it is necessary to specify spacers for each plug.

Bull Dog fuse grips are standard on all Fusible Bus Plugs. Prices of Non-Fusible Plugs are same as 250 Volt Fusible.

Vacu-Break "BOS" Switch Plugs

The Vacu-Break principle minimizes arcing, also prevents pitting and beading of contacts. Plugs are Quick-make and quick-break and horsepower rated.

Fusible and non-fusible types are available from 30 to 600 amperes, 2 or 3-pole 600 Volts or less, or 4-pole solid neutral 240 Volts A-C.

"BP" Type Bus Plugs

Fusible and non-fusible "BP" plugs are for disconnecting purposes only. Opening and closing the hinged cover makes or breaks the circuit. They are horsepower rated.

Ratings are 30, 60 and 100 amperes for 2 or 3 pole, 600 volts or less, or 4-pole solid neutral 240 volts A-C.

Capacitor Plugs

Afford a convenient and flexible means for reducing inductive heating and improving the power factor on Bus Duct systems. The thermal protective device and capacitor unit are contained in one housing.

Rated from 1 to 7.5 Kva at 240 volts and to 15 Kva at 480 volts, 60 cycles A-C.

Bulldog Flexible BUStribution® DUCT Systems

Type BD Plug-in Duct for Branch Circuits With Aluminum or Copper Conductors

Capacities 225 to 1000 Amperes, for 2-Pole, 3-Pole Service, 600 Volts or less A-C or D-C; and For 3-Phase, 4-Pole, 250 Volts or Less.

Provides Flexible Plug-in Lighting and Motor Circuits wherever and whenever desired.

This prefabricated electrical distribution system has the flexibility to match today's dynamic production methods. It enables plant engineers to plan with freedom. Change-overs can be taken in stride because electrically driven equipment can be disconnected, moved and reconnected to the bus duct with minimum expenditure in time and money.

When moving a machine, the protective Bus Plug, or tap-off device, is removed from the Duct and reinserted at any convenient plug-in opening.

Each 10 foot section has ten plug-in openings, five on each side. Duct is installed by bolting together the standard sections, elbows, tees, crosses and fittings required to make runs of any desired length and pattern.

It is 100% salvageable — the factory-built units can be reused in the same or new combinations.

No. 3 — Left-hand Flatwise. No. 4 Left-hand Edgewise. Designate type of cross by adding suffix figure to number: No. 5 — Flatwise. No. 6 — Edgewise.

General Information and Ordering Instruction

Standard Ducts—Furnished in 10-ft. lengths only. Prices include labor and material for making duct. For ampere ratings below standard, use next larger size. Full rating neutral prices furnished on request—contact Graybar. (600 amperes is the maximum for which a full rating neutral can be supplied. Elbows, Tees and Crosses—Prices include labor charge only for manufacturing. Figure material required for these fittings on a footage basis. Prices for 3-Phase, 4-Pole are for fittings having $\frac{1}{2}$ rating neutrals. Full rating neutral prices on request—contact Graybar. End Closers—Prices include labor and material. Flange Ends—Prices include labor and material. Bus bar extensions or hole in switchboard NOT included. Transformer Tap Openings—Prices include one opening in side of duct and ebony cover plate. Bus bar extensions NOT included. Ebony Ends—Furnished with or without bus bar openings as specified. Bus Bar extensions NOT included.

1000	3-500MCM		TB410-3	TB413-3	TB416-3	TB420-3	TB425-3	TB430-3
*Tap Box..... Each		\$178.00	\$184.00	\$190.00	\$216.00	\$224.00	\$254.00	\$260.00

Also Available in Box Ampere Ratings of 1350, 1600, 2000, 2500, 3000 and 4000 Amperes. For complete construction details and catalog numbers, contact Graybar. Prices as follows:

Duct Rating..... Amperes	1350	1600	2000	2500	3000
*Tap Box..... Each	\$196.00	\$226.00	\$238.00	\$262.00	\$290.00

*Tap Box prices are based on maximum Duct Ampere Ratings. Suffix letters A, B and C designate 225, 400 and 600 Ampere lugs per leg. Suffix letters D and E designate 2 — 400 and 2 — 600 Ampere lugs per leg respectively. For larger rating boxes the size and number of cables per leg must be specified for each Tap Box required.

**Full Rating Neutral prices furnished on request — Contact Graybar.

Note—600 Amp. and 4000 Amp. prices furnished on request—Contact GRAYBAR

General Information and Ordering Instructions

Standard Ducts — Prices include labor and material for making duct. 10-ft. lengths are standard. Figure on pro rata basis for less than standard lengths. Do not figure fractional footage — figure the next higher even foot. For ampere ratings below standard ratings use next larger size. Full rating neutral prices furnished on request — contact Graybar.

These Ducts have Tap Box Opening provisions at each handhole opening. When Tap Box is required over a hand hole opening, add price of required Tap Box. When Tap Box is required in a location other than at the handhole opening, add to the price of the proper section of Duct the Tap Box Opening and price of the Tap Box. When Tap Box Opening only is required in a location other than at a handle opening, add the Top Box Opening price to the price of the section of duct.

Elbows, Tees and Crosses — Prices include labor charge only for manufacturing. Figure material required for these fittings on a footage basis.

Prices for 3-Phase, 4-Pole are for fittings having 1/2 rating neutrals. Full rating neutrals prices on request — contact Graybar.

The arm or projection having the highest rating determines the fitting rating. Designate type elbow or tee by adding suffix figure to catalog number: No. 1 — Right-hand Flatwise. No. 2 — Right-hand Edgewise. No. 3 — Left-hand Flatwise. No. 4 — Left-hand Edgewise. Designate type of cross by adding suffix figure to catalog number: No. 5 — Flatwise. No. 6 — Edgewise.

End Closers — Prices include labor and material.

Flange Ends — Prices include labor and material. Bus bar extensions or hole in switchboard NOT included.

Transformer Tap Opening — Prices include one opening in side of duct and ebony cover plate. Bus bar extensions NOT included.

Ebony Ends — Furnished with or without bus bar openings as specified. Bus bar extensions NOT included.

Bulldog Flexible Trol-E-Duct® Systems
Industrial Type
Portable Electricity

These mobile electrical systems provide a constant source of electrical power for cranes, hoists, portable electric tools and other moving loads. Current is carried through copper busbars enclosed in insulated steel ducts.

The current is collected by trolleys which are wired portable to movable devices. Their flexible, unit construction and standardized design makes it possible to install, dismantle and reinstall many times to meet the ever-changing nature of modern industry.

Drop-Out Section

No. TD310, 3-Pole Standard 10-ft. Duct Section

With each Duct Section, Drop-Out and Drop-Out Sectionalizing Section is furnished as standard: One Hanger Assembly, complete with Hanger, Cover and Set of Bus Connectors.

Feedrail* Pre-Fabricated Electrical Distribution Systems

FEEDRAIL® is the modern system of distributing electric power. Sturdy prefabricated track sections, enclosing copper bus conductors can be joined together to form runs of any length, straight or curved. Trolleys with positive pressured contacts roll freely in the track and act as electric power outlets which can be moved to any point along the track run.

The FEEDRAIL® Systems—engineered and constructed by specialists who devote their time exclusively to trolley busway electrification systems—are available in 60, 100, 225, 375 and 500 ampere capacities. Superior to ordinary wiring methods in safety, convenience and adaptability, they provide a dependable source of power for cranes and hoists, production and assembly lines, test lines, movable machinery, machine tools, business machines, lighting, etc. Feedrail Systems are readily installed without any special tools.

Feedrail "60" Straight Track Section 60 Amps—250 V.—A-C. or D-C.

10'-0" Lengths Complete with bus bars.

	Single Phase		Three Phase	
	No.	Each	No.	Each
Plain Track	FRS-200	\$38.00	FRS-100	\$44.00
Door Track	FRS-201	44.00	FRS-101	50.00

5'-0" Lengths complete with bus bars.

Plain Track	FRS-200-5	\$24.00	FRS-100-5	\$27.00
Door Track	FRS-201-5	30.00	FRS-101-5	33.00

Note: It is recommended that a minimum of one door section for insertion and removal of trolleys be used with every five sections of plain track.

For sections less than 10'-0" long, consider fractions of a foot as an extra foot and multiply this length by the per foot list price of the corresponding 10'-0" STRAIGHT and add \$12.00 list.

10'-0" Lengths without bus bars.

	No.	Each
Plain Track	FRS-130	\$26.00
Door Track	FRS-131	32.00

5'-0" Lengths without bus bars.

Plain Track	FRS-130-5	\$18.00
Door Track	FRS-131-5	24.00

For sections without bus bars less than 10'-0" long, consider fractions of a foot as an extra foot and multiply this length by the per foot list price of the corresponding 10'-0" STRAIGHT without bus bars and add \$9.00 list.

Feedrail "60" Sectionalizing Track Sections

10'-0" Lengths complete with bus bars.

	Single Phase		Three Phase	
	No.	Each	No.	Each
Plain Track	FRS-227	\$50.00	FRS-127	\$56.00
Door Track	FRS-228	56.00	FRS-128	62.00

5'-0" Lengths complete with bus bars.

Plain Track	FRS-227-5	\$36.00	FRS-127-5	\$39.00
Door Track	FRS-228-5	42.00	FRS-128-5	45.00

For sections less than 10'-0" long, consider fractions of a foot as an extra foot and multiply this length by the per foot list price of the corresponding 10'-0" STRAIGHT and add \$24.00 list.

*Registered Trade Mark.

Feedrail "60" Transfer Track Sections

10'-0" Lengths Complete with bus bars—one flared end.

	Single Phase		Three Phase	
	No.	Each	No.	Each
Plain Track	FRS-225	\$66.00	FRS-125	\$72.00
Door Track	FRS-226	72.00	FRS-126	78.00

5'-0" Lengths complete with bus bars—one flared end.

Plain Track	FRS-225-5	\$52.00	FRS-125-5	\$55.00
Door Track	FRS-226-5	58.00	FRS-126-5	61.00

For sections less than 10'-0" long, consider fractions of a foot as an extra foot and multiply this length by the per foot list price of the corresponding 10'-0" STRAIGHT and add \$40.00 list for one flared end and \$68.00 list for two flared ends. Add \$12.00 list for each feed box in a transfer section.

10'-0" Lengths Without bus bars—one flared end.

	No.	Each
Plain Track	FRS-132	\$45.00
Door Track	FRS-133	51.00

5'-0" Lengths without bus bars—one flared end.

Plain Track	FRS-132-5	\$37.00
Door Track	FRS-133-5	43.00

For sections without bus bars less than 10'-0" long, consider fractions of a foot as an extra foot and multiply this length by the per foot list price of the corresponding 10'-0" STRAIGHT without bus bars and add \$28.00 list for one flared end and \$47.00 list for two flared ends.

Feedrail "60" Accessories

Description	No.	Each
Coupling Set.....	FRS-102	\$1.50

No.	Phase	Amps.	Contact	Each
FR-37	2	40	Roller	\$62.00
FR-92	2	60	Brush	76.00
FR-27	3	40	Roller	70.00
FR-82	3	60	Brush	91.00

Note—"C" or "D" type trolleys must be used with curved track sections of less than 5'-6" radius. All trolleys listed can be furnished in "C" or "D" type by adding the suffix C or D to catalog number of the trolley selected. The rating of "D" type trolleys when furnished with receptacles or dead front fuse blocks is limited to the rating of those devices. For prices on "C" or "D" type trolleys with cabinet consult us. Fuses are not included with fusible trolleys.

Feedrail "100" Trolleys

Crane and Hoist Type Trolleys

250 Volts D-C, 575 Volts A-C—Non-Fusible—30 Amps.

Heavy Duty Type

Short Radius "C" Type

Plain Type—For track without transfer points and for curves with radius of 5'-6" or over.

No.	Phase	220 A-C	440 A-C	550 A-C	230 D-C	Contact	Each
FR-66	DC				3 HP	Brush	\$57.00
FR-66	2	3 HP				Brush	57.00
FR-6	3	7½ HP	15 HP	20 HP		Brush	64.50

Short Radius "C" Type—For track without transfer points, and for curves—minimum radius of 2'-6".

No.	Phase	220 A-C	440 A-C	550 A-C	230 D-C	Contact	Each
FR-66C	DC				3 HP	Brush	\$57.00
FR-66C	2	3 HP				Brush	57.00
FR-6C	3	7½ HP	15 HP	20 HP		Brush	64.50

Non-Fusible—60 Amps.

Heavy Duty "D" Type—For high amperage on tracks without transfer points and for curves—minimum radius 2'-6"

No.	Phase	220 A-C	440 A-C	550 A-C	230 D-C	Contact	Each
FR-66D	DC				7½ HP	Brush	\$100.00
FR-66D	2	7½ HP				Brush	100.00
FR-6D	3	15 HP	30 HP	40 HP		Brush	115.00

Non-Fusible—100 Amps.

Special Service Type—For straight track without transfer points.

No.	Phase	220 A-C	440 A-C	550 A-C	230 D-C	Contact	Each
FR-75	2	10 HP			10 HP	Brush	\$166.00
FR-75	3	25 HP	50 HP	60 HP		Brush	198.00

Note—"C" or "D" type trolleys must be used with curved track sections of less than 5'-6" radius. All trolleys listed can be furnished in "C" or "D" type by adding the suffix C or D to the catalog number of the trolley selected. "D" type trolleys with receptacles or 440 volt fuse blocks have a maximum capacity of 30 amperes. For "C" type add \$13.00 to the list price. For "D" type add \$36.00 to the list price.

Trolleys With Beveled Type Ever-Lok Cabinets

Non-Fusible—With Receptacles

Hoffman Oil Tight Sectional Wireway

Used for electrical wiring on machinery, equipment and buildings, inside or outdoors, where protection is desired from oil, dirt, dust or water. A suitable substitute for conduit.

Constructed of 14 gauge sheet steel throughout except on the welded connection flanges which are made of 10 gauge.

No holes in cover, trough, or fittings to permit foreign material to enter. Cover, which has neoprene gasket, is hinged to trough on one side and held with external clamps on the other. Flanges are welded to both ends of each section, on all fittings and bolt together.

Standard finish is gray prime coat on a phosphatized surface. Special sizes and modifications may be specified.

Hoffman "JIC" Electrical Wiring Troughs

Listed by Underwriters' Laboratories, Inc.

Totally Enclosed

Used to provide protection against oil, coolant, water, dust or dirt.

The 2 1/2-in. square sizes made of 16 gauge steel; 4-in. square sizes are of 14 gauge. Mounting feet are of 12 gauge steel.

All seams of trough and cover are welded. Cover, which is gasketed with cellular neoprene, is held to trough by external clamps and lift-off hinges and chained to trough to prevent loss. Trough available with cover held on by screws. Mounting feet welded to trough.

Standard finish is a baked gray hammertone enamel over a phosphatized surface. Special finishes, sizes and modifications, such as holes for conduit, can be provided.

G-E Hinged-Cover Wireways

4" x 4", 6" x 6", 8" x 8"

(Listed by Underwriters' Laboratories as wireways and associated fittings under File E-6780)

Telescopic Fitting

Standard 5-foot Length

Elbow

Tee Fitting

The Type HW wireway is an enclosed wiring trough or auxiliary wiring gutter which is provided with a hinged cover. It is especially useful where space is limited and building contours complicated. All lengths and associated fittings are designed with a hinged cover arrangement which permits an unobstructed opening over the entire length of the run. Thus, all conductors can be "laid in" quickly and easily without the need of threading through the collars at the joints as is the case with conventional wireways.

The new design introduces a hook-and-slot arrangement which permits the quick assembly of sections and fittings. One screw is used for a grounding. The hinged covers are provided with snap latches which replace the conventional nuts and bolts. Ample knockouts on both sides of the wireway help as sure easy wiring. The wireway is finished in ASA No. 49 medium-light-grey enamel over a rust inhibitor.

Advantages

Low initial cost: G-E wireways provide today's most economical means of wiring factories, offices, and commercial buildings. Dollar for dollar, foot for foot, no other method of wiring can be installed at a comparable low cost.

Quick, easy installation: Hook-and-slot arrangement permits quick assembly of the wireway sections and fittings, eliminating need for screws. The elimination of all obstructions allows wiring to be "laid-in" without usual threading under collars.

Permits future expansion: Additional conductors can be laid in or existing wiring can be altered without extensive labor. No other method of wiring permits such easy expandability to meet changing load requirements.

Flexible: A complete line of standardized fittings are available, allowing the wireway to be virtually tailored to the requirements of any installation.

Selection Data

The National Electrical Code limits the use of wireways as follows:

No conductor larger than 500,000 cm shall be installed in any wireway.

Wireways shall not contain more than 30 conductors at any cross section, unless the conductors are for signaling circuits or are control conductors between a motor and its starter and used only for starting duty. The sum of the cross-sectional areas of all contained conductors at any cross-section of a wireway shall not exceed 20-percent of the interior cross-sectional area of wireway.

Splices or taps, made and insulated by approved methods, may be located within the wireway if they are accessible. The conductors, including splices and taps, shall not fill the wireway to more than 75 percent of its area.

Conductors of various sizes may be included in one wireway but the total cross-sectional area of all conductors must not exceed the above limitations.

Circuit Breaker Plug

Fig. 9. Universal
Hanger

Fig. 10. Single
Edgewise Hanger

Type DH is a low-cost, plug-in busway for indoor use wherever the convenience of plug-in receptacles over a wide area is desired. Its principal applications are in industrial plants, commercial buildings, manual training shops, laboratories, and garages.

Type DH busway is like a panelboard mounted overhead and extending out over the area served. With its nine outlets on each side of a ten-foot length, it is used as a feeder for lighting systems and as a feeder or branch circuit from switchboard or panelboard to a motor or other power-consuming equipment. When a 60 ampere (or less) power receptacle is required to feed a portable welder or similar machine, the busway can be run down a column or wall to the desired height.

The busway is rated 100 amperes, 600 volts maximum and manufactured in 3 and 4 wire construction. It will withstand a short circuit of 15,000 amperes RMS asymmetrical or 12,000 amperes RMS symmetrical.

A wide variety of fittings and accessories are available. Joints between the components are easily assembled by tightening six screws. Snap-on hangers for flatwise or edgewise mounting require minimum labor.

Type DH busway can be hung on ten-foot centers in the edgewise position or on five-foot centers in the flatwise position.

The adjustable length and flexible fitting (elbow, offset or expansion fitting) eliminate the necessity for exact field measurements before ordering. Simply order by catalog number.

There is a minimum number of units to meet virtually all installation requirements.

Standardized units can be taken down as load requirements change and moved to new location with complete reuse of all components.

Dead-front plug outlets, even with knockout covers removed, assure safety to personnel. The joints can be checked for tightness without shutting down the system.

Straight Lengths

The following lengths are available: 10-ft.—18 outlets; 5-ft.—10 outlets; 3-ft.—6 outlets; 2-ft.—4 outlets; and 1-ft.—2 outlets.

The outlets are arranged in pairs back-to-back on the busway, i.e., a 10-ft. length has 9 outlets on each side. A plug may be inserted in only one outlet of the pair on either side of the busway. The outlets are the knockout type.

Four-wire busway has full-capacity neutral.

Three Wire

No.	Length Ft.	Net Wt. Lbs.	List Price Each
DH1A31	10	27	\$30.00
DH1A315	5	14	20.00

Fusible Plug

Circuit Breaker Plug

Type LTG busway provides a pre-fabricated power distribution system of 50-amp. capacity for use in industrial plants, office buildings, department stores, garages and warehouses. The formed steel housing provides a slot the full length of the run for insertion of tap-off plugs at any point. Plugs can be easily removed and relocated without disconnecting the system.

Can be used to feed groups of machines and to support lighting fixtures.

A complete system is made up of prefabricated units and fittings, and a large variety of accessories are available to conform with requirements of virtually any plant layout.

Should relocation of busway be necessary, an entire installation can be quickly and easily dismantled and reinstalled with complete reuse of all parts.

The "Roll-in" System of hanging LTG busway provides savings of as much as half the normal installation cost of busway and lighting fixtures.

**G-E Busways
Type FVK Plug-In**

225-1000 Amperes, 600 Volts Maximum

3 and 4 Wire

(Listed by Underwriters' Laboratories, Inc., except as noted.)

Standard 10-ft. Length

Cross-Section with Hanger

Application

Type FVK prefabricated Flex-A-Power busways are designed for 225- to 1000-ampere, 600-volt secondary feeder systems. They are used for 3-pole, 600-volt, and 3-phase, 4-wire, 120/208Y-volt, and 480Y/277-volt applications. 2-pole type also available.

1000-ampere aluminum bus type also available.

Construction of standardized sections permits busway to be virtually form-fitted to needs of industrial plants, schools, offices, commercial and public buildings. Type FVK busways are ideal as power risers in multi-storied buildings and as feeders for incoming services.

Each 10-foot straight section has outlets every foot along the run which permit plug-in to power right at load. Allows quick addition or relocation of machinery and other equip-

ment without lengthy shutdowns. Can be easily expanded to meet increased requirements. If necessary, entire system can be dismantled, moved, and reassembled in minimum time without unnecessary loss of material.

Ordering Directions

Except on simple installations of standard units the following information should be furnished:

- a. Complete layout plans showing location, and any limitations in dimensions or specifications.
- b. Whether system is to be run flat-wise, edgewise or as a vertical riser.
- c. Complete details of any equipment to which busway will be connected such as switchboards.
- d. Number and size of all cable terminal lugs.

Notes:

1. Price is per foot or any fraction thereof and includes material and labor of forming, two hangers per section, and necessary joint hardware.
2. Prices include labor of forming only. Add for material straight footage price. Use forming price of highest ampere-rated Type FVK busway entering, "Tee" or "X" connections. Prices cover 90-degree angle units. For other angles, double the price.
3. Price includes material and labor of forming.
4. Price includes material and labor of forming and lugs of appropriate size. End-of-run type includes busway end closure.

G-E Busways

Type FVK Plug-In

225-1000 Amperes, 600 Volts Maximum

3 and 4 Wire

A complete Type FVK busway installation consists of standardized units which can be quickly and easily coupled and suspended to conform to the individual requirements of virtually any plant layout. These units consist of straight lengths, elbows, offsets, end and feed-in boxes, etc. The busway is available with either copper or aluminum bus bars.

Each 10-foot straight section has outlets on one-foot centers to permit plug-in directly at the load. Take-off is made by Flex-A-Plug units of either the fusible switch or circuit-breaker type. Cover plates keep unused outlets closed to dust and dirt.

These Flex-A-Plug units provide a direct plug-in to the bus bars, even when the run is energized. Safety for operating personnel is assured because handle must be switched to OFF position before the fuses can be reached.

Bus bars are supported on porcelain insulators of high-dielectric strength to eliminate possibility of tracking or carbonization. Supports in housing are spaced on maximum two-foot centers.

The housing is of formed 16-gage sheet steel with a baked grey enamel finish over a rust inhibitor. An 18-inch removable joint inspection cover is provided between sections to permit easy assembly of sections during installation and to provide easy access for inspections if necessary.

A complete line of fittings and accessories is available to meet the requirements of virtually any plant layout.

For changes in direction of runs and to permit run to avoid beams, columns, and obstructions, four types of elbows can be provided—edgewise internal; edgewise external; flat left; and flat right.

For intersections of runs there are flat or edgewise tees and flat or edgewise crosses available.

Cable tap boxes are used for connection of incoming power at end or center; transformer taps for connecting run to transformers; and switchboard stubs for connecting run to switchboards.

End boxes are used for closing the end of runs.

Other Types

Type FVK busway is available without plug outlets at same prices as listed below.

Standard short-circuit ratings are as follows: 225-ampere type, 15,000 amperes RMS asymmetrical; 400-1000 ampere type, 25,000 amperes asymmetrical.

The following ratings are available at a price increase of \$2.00 per ft.: 225-amp type, 25,000 amps RMS asymmetrical 400-1000 amp type, 50,000 amps RMS asymmetrical.

Notes:

- Prices include material and labor of forming.
- Price includes material and labor of forming but no busway footage. Switchboards stubs include flange, minimum length of bus-bar extensions, and lugs. Price of transformer taps includes opening in side of housing, slotted ebony-asbestos cover, minimum length bus-bar extensions, and lugs.
- Includes material and labor of forming. No bus-bar extensions or lugs included. Price of flange ends includes flange and slotted ebony-asbestos cover only. Price of transformer tap includes opening in side of housing and slotted ebony-asbestos cover only.
- Price is per foot or any fraction thereof. The price includes material, labor of forming, and drilling but no lugs.
- Price includes labor of forming only. Add for material at straight footage price. Use price of higher ampere-rated busway entering adapter or reducer. Adaptors are for connecting type DE, FVK or FAP busway systems of same or different ampere ratings. Unfused reducers are for changing size of type FVK busway.
- Price includes material and labor of forming. Floor or wall flange not included.

G-E Plug-In Busways Type FVK Flex-A-Plug Switch Units

Type FG fusible switch plugs include Type HCl individually removable pole units. Type FD similar except include Type RBA mechanism.

Type FL hinged-cover-operated fusible plug.

Type FCE molded-case circuit breaker plug.

Combination Ground Detector and Neutralizer Flex-A-Plug Units

Indicates grounds in system and maintains definite potential between bus bars and housing on ungrounded systems.

*The cat. no. as listed identifies stab location for connection to outside bars. For stab connections to narrow spaced bars, add suffix "N". For stab connection to wide spaced bars add suffix "W".

†Not Underwriters' listed.

Capacitor type plugs Types FG and FCE also available consult your Graybar office.

‡These plugs have long neutral stub for FVK and FVA systems. For plugs with short neutral stub for FVK5, FVA5 and LVDP systems, add suffix "S" to catalog number. No change in price.

G-E Feeder Busways

Type LVD

600 to 4000 Amperes 600 Volts or Less
2, 3, or 4-Pole 3-Phase, 4-Wire, Solid Neutral

Straight Length of Type LVD Feeder Busway

Cross-Sectional View

The Type LVD is an enclosed bus-bar system incorporating low impedance with sturdy construction. It is extensively used for these applications:

Incoming service from transformers to switchboards

Feeders from switchboards to other distribution points or to branch busways

As complete riser distribution system for multi-story buildings

Welder feeders.

Type LVD is available in 600 to 4000 ampere ratings, 2, 3, or 4-pole and in 3-phase, 4-wire solid neutral construction. It is suitable for 600 volts or less. Because of its prefabricated standardized sections and fittings, it is simple to install and can be easily dismantled and moved to new locations without loss of materials. Additions to meet in-

creased production or expansion programs can be easily made at any time. A variety of hanging and supporting arrangements are available to permit horizontal mounting at any level between floor and ceiling or vertical mounting where risers are required. All parts are shipped ready for installation.

Available with either copper or aluminum bus bars. Aluminum bus bars are particularly recommended for applications where surrounding atmospheres contain high sulfur-dioxide concentrations. Both systems are alike in construction and both have the same performance features.

The housing is made of rigidly formed steel perforated to provide proper ventilation. Solid-cover-type housings for dusty or humid locations or enclosed weather-proof housings for outdoor use are also available.

Components of LVD Busway

Typical Installation of Type LVD Busway

Standard Section—Consists of rigid steel housing which encloses bus bars of either hard-drawn, round-edge copper or aluminum. Low temperature rise at joints is assured through use of silver plating. Aluminum bus bars are first treated with a modified zincate process to prevent formation of high-resistance oxides and galvanic action. Special compression spring washers are provided to compensate for cold flow. Bus bars are narrow, closely spaced, and interlaced to assure low voltage drop. Air-rated type, designed for general purpose indoor use, has perforated cover to permit ventilation; solid cover type is designed for atmospheres of excessive dust or moisture; and weatherproof type is used for outdoor applications.

Elbows—Used where Type LVD runs in irregular paths around pillars, beams, pipes, etc. Available in four types: edgewise external, edgewise internal, flat right, and flat left.

Offsets—Used where run must move short distances up, down, or sideways to avoid obstacles or to conform to building contours. Flat offset consists of two flat elbows. Edgewise

offset is made up of two edgewise elbows fabricated in one piece.

T-Connections—Used where run is to be center-fed or where a branch is to be tapped from a main feeder.

"X"-Connection—Used to feed branch circuits from feeder runs; also to connect from an LVD circuit to branch or subfeeder on a multi-circuit installation.

Unfused Reducers—Used to decrease size of run without overcurrent protection.

End Boxes—Seal off end of run, giving mechanical and electrical protection to busway.

Switchboard Stubs—Used where LVD enters or leaves a switchboard.

Cable Tap Boxes—Serve as junctions for main cable feeders or branches or for connecting to power transformers. Boxes are mounted at end, or at any joint of LVD run.

Circuit Breaker Adapters and Fuse Adapters—Provide overcurrent protection on branch runs.

G-E Plug-In Busways
Type LVDP With Copper or Aluminum Bus Bars
 600 to 4000 Amperes 600 Volts or Less 3-Pole 3-Phase, 4-Wire

Cross-Sectional View for Dim. "W"

Standard 10-ft. Length of Type LVDP with Flex-A-Plug Switch Unit Installed

A plug-in-type, enclosed bus-bar system with low-voltage-drop characteristics. It can be installed at lower cost than most conventional low-voltage-drop feeder systems utilizing cable tap boxes for tap-offs.

Designed for use in industrial plants where high capacity and low voltage drop are required to feed welders and similar equipment. It is also used as risers in multi-story buildings where frequent tap-offs are required.

Type LVDP plug-in busway is provided in standard straight 10-ft. lengths only for use with components of the Type LVD3 and Type LVD5 feeder busways. Bus-bar sizes are the same, rating for rating, as for those systems. These standard lengths can be installed in new or existing Type LVD busway systems wherever plug-in tap-offs are required, as they are interchangeable with standard 10-ft. lengths of Type LVD busway. Each standard length is provided with 10 plug outlets—5 on each side. Standard Flex-A-Plug switch units such as are used with the Type FVK

Flex-A-Power* plug-in busway can be installed on Type LVDP busway without the need for alterations. The continuous current drawn from one 10-ft. length should normally not exceed a total of 400 amperes.

The low power loss and extremely low voltage drop of Type LVDP, even for low-power-factor loads, are obtained by interlacing closely spaced bus bars in recurring sequence with no adjacent bars having the same polarity.

Phase-collection straps are provided with each standard length of Type LVDP to assure that all bus bars of the same phase will be connected together at each joint in accordance with NEMA standards. This also provides higher short-circuit strength.

The general construction of the Type LVDP is the same as the Type LVD busway. The joints and plug contacts are silver plated and the bus bars are individually wrapped. A ventilated type housing is provided as standard, but a solid cover-type housing is also available.

Short-Circuit Ratings

When properly protected, the Type LVDP busway will mechanically and electrically operate the same after being subjected to its rated short-circuit current as it operated before the short circuit.

The following table shows the short-circuit ratings in RMS asymmetrical amperes which have been assigned to the Type LVDP busway. These ratings apply only when short circuits external to the busway are considered.

Note: In order to take advantage of these high ratings of LVDP, current-limiting fuses are recommended in Type FG Flex-A-Plugs.

Short Circuit Ratings in RMS Asymmetrical Amperes

Square D Light Duty Enclosed Safety Switches Type LD (Formerly Types D or G) Single Throw

Light Duty

Type LD light duty safety switches are designed for residential and commercial applications where price is limited and the service factor is not great—such as lighting, room conditioning and appliance loads. U/L approved File E2875. Meets Federal Specification W-S-865 for type D switches.

Positive make, positive break spring assisted operating mechanism. Side operated.

Plug fuse switches rated 120/240 volts a-c only. All neutrals—Insulated groundable.

Blue-gray enamel finish. Raintight has extra coat of Glyptal. NEMA 1—General Purpose. NEMA 3R—Raintight.

φ Catalog number 90000 series and 93000 series switches are rotor disc type—others are swing out type.

†Dual water heater switch not hp. rated. (Two 93211's in one box.)

‡Same as 90211 except in larger box.

*Has dead-front shield over interior not hp. rated. 120 or 120/240 volts, a-c.

▲Raintight switches without threaded openings available. Use R suffix instead of RO. Same price level.

▲Interchangeable Hubs for raintight enclosures. Type RO devices have threaded opening for interchangeable hubs or closing caps. Order hub or cap separately from table below, and simply screw into place.

Square D Normal Duty Safety Switches Type ND (Formerly Types H, S or A)—Single Throw

Normal Duty

Designed for application where safety is essential and reasonable performance and continuity of service are required. Meet the new NEMA standards and Federal Specifications W-S-865 for type A switches. U/L approved. File E2875. 800 and 1200 amp. are quick break only and have vault cover handle.

Quick make, quick break, independent of handle 30 to 600 amperes. 30 to 200 ampere are front operated, close ganging; 400 and up are side operated. NEMA 1—general purpose; NEMA type 3R—raintight.

All neutrals—insulated groundable. Finish: Blue-gray enamel, raintight—extra coat of glyptal.

Not Fusible

Square D Heavy Duty Safety Switches New Type HD—Single Throw

Heavy Duty

Designed for applications where safety, performance and continuity of service are emphasized, such as mass production industries. This type exceeds Federal Specification W-S-865 for Type A switches. U/L approved.

Side operated. File E2875 and E10673 full cover interlock and padlock attachment. Quick-make, quick-break independent of handle.

NEMA 12—industrial use (Gasketed); NEMA 4 & 5—watertight and dust-tight; NEMA 7 explosion resisting Class I—Group D. NEMA 9—explosion resisting Class II—Group G.

●Cast iron NEMA 7 enclosures have threaded conduit holes as follows: 30 amp. two ¼ in. bottom; 60 amp. two 1½ in. bottom.

*60 ampere switch with 30 amp. fuse spacings and clips.

★600 volts a-c—250 volts d-c only. †600 volts a-c only.

Square D Double Throw Safety Switches

No. 82263

No. 92351F

Designed to transfer loads from one supply source to another. Horsepower ratings are not necessary, since use as motor circuit switches is not expected.

Fusible Top and Bottom Sheet Steel Enclosure—NEMA Type 1

Bulldog Junior Vacu-Break Clampmatic®
and
Rotor Type Safety Switches

Bulldog Jr.

Rotor—With Dead Front Shield

Rotor—Cartridge Type

Rotor—Plug Type

Junior Vacu-Break Safety Switches

Junior Vacu-Break Safety Switches features, Vacu-Break head assembly, ample wiring gutters, pressure wire connectors, conveniently located concentric K. O.'s, and spring reinforced fuse grips.

Junior Vacu-Break Safety Switches exceed NEMA standards for Type LD (light duty) Switches.

Listed by Underwriters' Laboratories, Inc.

Master Vacu-Break Safety Switches exceed NEMA standards for Type ND (normal duty) switches. Comply with NEMA standards for Type HD (heavy duty) switches excepting switch mechanism is in a NEMA 1 enclosure.

The maximum horsepower ratings are applicable when fuses having time delay appropriate for the starting characteristics of the motor are used.

Listed by Underwriters' as "Enclosed Switches" (also suitable for use as "Service Equipment") under file E-4776.

NOTE: When ordering SN-327, SN-328, SN-427, SN-428, specify GROUNDLED or GROUNDABLE NEUTRAL.

Fusible 240 V. Raintight Safety Switches meet NEMA Standards for Type LD (light duty) Switches.

All 600 V. Raintight Safety Switches meet NEMA Standards for Type ND (normal duty) Switches.

Listed by Underwriters' as "Enclosed Switches Raintight" (also suitable for use as "Service Equipment").

Removable Hubs

Bulldog Raintight Switches have removable plates at the top of boxes to allow use of hubs where required.

Hubs are NOT supplied with Bulldog Raintight Switches, but must be ordered separately.

All Hubs listed except HU2-200 and HU2-250 are adapted for 30-60-100A. switches. HU2-200 are adapted only for 200A. switches.

Hubs are packed 5 to a standard package carton.

G-E Standard-Duty Industrial Safety Switches

Type ND, Style HCI

(U/L Listed as Enclosed Switches under File E-4669. Meet Federal Government Spec. WS-865 for Enclosed Safety Switches, Type A)

Switch is designed for all but the most severe applications. They are ideal for small industrial, institutional and commercial applications where service demands are not severe. Typical applications include motor-circuit protection and service entrance switches. These switches give circuit protection under normal indoor atmospheric conditions.

Features: meet NEMA standards for Type ND switches; general-purpose enclosure—NEMA Type 1; quick-make, quick-break; visible contact blades; double-break contacts; interlocking covers; finish—medium light grey.

Order by complete catalog number and specify cable lugs if other than standard.

*400 and 600 Ampere Switches are Knife Blade Type construction. Prices do not include fuses.

G-E Light Duty Safety Switches General Purpose NEMA Type 1 Enclosures

(U/L Listed as Enclosed Switches Under File E4669. Meet Federal Government Spec. WS865, Type D.)

These switches are designed primarily for indoor use in distribution and branch circuits. They are used in service entrance applications in homes, commercial and farm-type buildings and for light industrial use where switch operation is infrequent. Typical industrial applications include heavy lighting circuits, power tools, air compressors, refrigerating and heating equipment.

Features: meet NEMA standards for Type LD switches; general purpose enclosures—NEMA Type 1; fusible, plug or cartridge; positive make and break; locking provision; Bonderite* treated for increased corrosion resistance; silver-plated current-carrying parts.

*Parker Rust Proof Company.

G-E Normal-Duty Industrial Safety Switches

Type ND, Style HCI and Knife Blade — Raintight NEMA Type 3R Enclosures

(U/L Listed as Enclosed Switches under File E-4669. Meet Federal Government Spec. WS-865 for Enclosed Safety Switches, Type C)

Switches are mounted in an enclosure which gives circuit protection under outdoor atmospheric conditions including a driving rain. They are designed for all but the most severe applications and are ideally suited for industrial, institutional and commercial applications.

Features: interchangeable raintight conduit hubs for ratings through 200 amp; non-releasable interlock available; quick-make, quick-break; visible contact blades; double-break contacts through 200 amp; handle padlocks ON or OFF; Bonderite* treated to resist corrosion; galvanized steel enclosures.

*Parker Rust Proof Company.

Ordering Directions

1. Order switch by complete catalog number. Specify cable lugs if other than standard, and non-releasable interlock if desired.

2. Order interchangeable raintight conduit hubs or closing cap by catalog number for conduit size required. Specify

Type TC2 hubs for switch catalog numbers ending in 2, and Type TC4 hubs for switch catalog numbers ending in 4.
3. Order 400-amp switches by complete catalog number and add catalog number suffix for size of welded-in raintight conduit hub desired.

G-E Light Duty Safety Switches

Type LD Raintight NEMA Type 3R Enclosures

Side Operated Fusible Single Throw

Switches are mounted in an enclosure which gives circuit protection under outdoor atmospheric conditions including a driving rain. Designed primarily for distribution and branch circuits and service entrance applications, they are used for homes, commercial and farm-type buildings and for light industrial use where switch operation is infrequent. Typical industrial applications include heavy lighting circuits, power tools, air compressors, refrigerating and heating equipment.

Order switch by catalog number. Order size hub needed or closing cap by catalog number. Select Type TC2 hubs for switches with catalog number ending in 2, and Type TC4 hubs for switches with catalog number ending in 4.

Heinemann Magnetic Circuit Breakers

120-240 A-C

No. MH 802-50

**16 Gauge Corrosion-Proofed Steel.
Finish Is Grey Alcold Resin Enamel.
Dimensions Shown are Approximate.**

All Service Equipment And Circuit Breakers Are Listed By The Underwriters' Laboratories.

Overall Height

10¾"

Height of Box

8¾"

Width

5¾"

Depth

3½"

Size of Hub*

1¼"

*Standard 1¼" hub will be furnished unless otherwise specified. 1" hub also available.

Outdoor type breaker which serves as main disconnect and over-current protection for the electrified farm. Install on yard pole or farm building.

Magnetic trip. Time delay holds breaker from tripping on harmless overloads, gives quick trip on short circuits, or dangerous overloads. After the circuit breaker opens, it may be closed at once if current has returned to normal. No resetting necessary, no confusing trip position—handle moves one way to "on" and the other way to "off." Wattage loss negligible since nothing heats. Wiring compartment may be secured with meter seal or padlock. Solderless connections to circuit breakers and to neutral.

Square D Industrial Circuit Breakers

Thermal—Coilless Magnetic
Type ML—General and Special Purpose Enclosures
240 Volts A-C, 125/250 Volts D-C

All industrial circuit breakers are quick make and quick break. Types ML, ML-1 and ML-3 have permanently calibrated integral trip mechanisms. Type KL and WL are equipped with interchangeable trip mechanism.

U/L approved File E10027 and E10944. Blue-gray enamel finish.

Square D Industrial Circuit Breakers

Thermal—Coilless Magnetic
Type ML—General and Special Purpose Enclosures
600 Volts, A-C., 250 Volts, D-C

All industrial circuit breakers are quick make and quick break. Types ML, ML-1 and ML-3 have permanently calibrated integral trip mechanisms. Type KL and WL are equipped with interchangeable trip mechanism.

‡These cast enclosures are furnished with standard conduit openings of sizes as shown, one in top, two in bottom, except 3 wire and 4 wire devices which have 2 in top and 1 in bottom. Holes differing from standard can be supplied at extra charge. All cast enclosures for KL and WL breakers furnished without conduit openings unless size and location are specified on order.

▲For 250 volt d-c devices add suffix D.C. after catalog number in this group.

●Explosion resisting enclosures for systems above 250 volt d-c are furnished without Underwriters' label. Enclosures for devices requiring hydrostatic tests—contact GRAYBAR.

φNot available—use WL Frame Breaker.

*Type WL: 225 A-400 A available upon order.

Square D Industrial Circuit Breakers

Thermal—Coilless Magnetic

Type ML—Service Entrance Type—Common Trip

Insulated groundable neutral. Blue-gray enamel finish. Raintight has extra coat Glyptal.

High & Low Voltage

Type ML3
225 Ampere Frame
High Voltage

These non-automatic circuit interrupters are manually operated and are quick make, quick break. Construction is identical with corresponding size circuit breakers except for the omission of the automatic trip feature. Interruption capacity is much higher than comparable safety switches. Circuit interrupter units without enclosures are also available. Finish: Blue gray-enamel.

U/L Approved File E6294 and E19608.

I-T-E Commercial Building and Service Equipment Type Circuit Breakers
 Individually Enclosed—Sheet Steel Enclosures
General Purpose Surface Mounting NEMA 1, Flush Mounting NEMA 1B,
and Weatherproof (Raintight) NEMA 3
 120 to 600 Volts A-C, 125 to 250 Volts D-C, 15 to 225 Amps., 1, 2, 3 Poles

Weatherproof (Raintight) NEMA 3 Enclosure

General Purpose Surface Mounting NEMA 1 Enclosure for 100 Ampere "E" Frame Circuit Breaker

General Purpose Flush Mounting NEMA 1B Enclosure

General purpose surface mounting NEMA 1 enclosures are suitable for applications indoors where normal atmospheric conditions prevail.

The Flush mounted NEMA 1B enclosure is for recessed wall mounting. Enclosure cover serves as flush plate. The

circuit breaker operating handle extends through the cover in both enclosures.

The NEMA 3 is for outdoor use to provide protection against driving rain, snow or sleet. Enclosure is equipped with threaded conduit hub, matching knockout in bottom, and inner dead front sheet over the breaker.

I-T-E Individually Enclosed (Large Air) Circuit Breakers

“Urelites”

600 Volts A-C—250 Volts D-C 15 to 4000 Amperes

“K” line breakers provide overcurrent protection on main and feeder circuits where severe service, requiring frequent opening and closing operations, is encountered. Interrupting capacities are from 15,000 to 150,000 amperes, depending on the breaker selected. Breakers when incorporated into their own individual enclosures are referred to as Urelites.

Type KA, KB and KC Urelites are push-in, pull-out type with separable main contacts. Solderless connectors and stationary disconnect devices are mounted on insulating base attached to back of enclosure. This permits connection of cable before breaker is installed.

Type KC, KD and KE Urelites utilize a pull box with removable top, side, and bottom plates providing ample room for fast connection of cable.

Operating mechanism is compact and easy to operate with construction assuring simultaneous closing of all poles. Each pole is an assembly of stationary and movable silver composition main and arcing contacts. Contacts respond to pressure of compression springs at all times. Magnetic arc chutes provide short arcing time, safe confinement of arc within the extinguishing chamber.

“K” line circuit breakers are electrically and mechanically nonclosable (trip free) on overload. Urelite general purpose enclosure exteriors are finished in gray; weatherproof enclosures, blue black.

 - For Type KB—40, 50, 70, 90, 100, 125, 150, 175, 200, 225, 250, 300, 350, 400, 500, and 600 amperes.
 - For Type KC—200, 225, 250, 300, 350, 400, 500, 600, 800, 1000, 1200, and 1600 amperes.
 - For Type KD—2000 and 3000. For Type KE—4000.
- Range of Tripping, Adjustment—80% to 160% amperes rating of breaker.
Special calibration additional. Please contact Graybar.
Specify a-c frequency. Applications higher than 60 cycles, contact Graybar.

I-T-E Individually Enclosed Circuit Breakers

125 to 250 Volts D-C—125 to 600 Volts A-C

15 to 800 Amperes—1, 2 and 3 Pole

Semi-Dust-Tight

Explosion Proof

Type ET circuit breakers are designed to provide maximum over current protection and long service life under various conditions. Rugged quality construction and ability to restore power quickly without replacement of parts or elements, make them ideally suited for industrial applications. The semi-dust-tight, NEMA 1A enclosure, incorporating the I-T-E operating handle mechanism feature, and gasketed cover, is for indoor applications where limited protection is required.

Water-tight and dust-tight enclosures, NEMA 4 and 5, are suitable for applications outdoors or indoors, where the enclosure is exposed to rain, sleet and dust. The NEMA 12 enclosure is designed for applications where the surrounding atmosphere contains lint, fine dust, oils, or coolants. NEMA 1A and NEMA 12 enclosure prices are identical.

Cast iron enclosures for hazardous locations, NEMA 7 and 9, are designed for use in locations where combustible dust and flammable gases or vapors are or may be present to produce explosive or ignitable mixtures. Prices on cast iron enclosures supplied on request.

"Cordon" Circuit Breakers

Combine the operating features of the ET type molded case circuit breaker and the current limiting high interrupting characteristics of the Amp-trap to provide 100,000 rms amperes at 600 volts a-c, 250 volts d-c. The coordination is such that unless the magnitude of the fault reaches the fusing point of the Amp-traps they are unaffected and the standard circuit breaker overload devices perform their normal function.

Can be used in load centers, switchboards, panelboards, or individual enclosures. Prices for Cordon circuit breakers will be supplied on request.

Hope Current Limiting Type Enclosed Circuit Breakers

Weatherproof and Explosion Resisting

Weatherproof-Raintight
Class III—NEMA III, IV, V

Molded case air circuit breakers of high interrupting capacity that provide a practical, economic answer to low voltage distribution problems, are now available in the "Cordon" type. They combine the design and operating features of molded case circuit breakers and current limiting Amp-Traps in one compact unit to afford fault protection up to 100,000 rms amperes. Low magnitude fault conditions are cleared through the breaker without affecting the Amp-Traps. At higher magnitudes, the Amp-Traps assume the fault clearing duty in less than 1/2 cycle, limiting the short circuit current to a fraction of peak available value. Bus supporting members or current carrying parts need not be designed to withstand maximum peak currents.

Explosion Resisting
Class I, Group D—NEMA VII
Class II, E, F, G—NEMA IX

Enclosures are fabricated of close-grained cast iron and finished in enduring hot dip galvanize. Wiring spaces exceed requirements and gutters will accommodate seven wires. To afford high strength and corrosion resistance, hinges on covers and breaker actuating mechanism are of manganese or silicon bronze. Handle and shaft are of one-piece construction; eccentric, adjustable stops on covers prevent overthrow of handle.

Boxes are additionally bossed in back and sides for tappings other than "standard" locations.

NEMA III, IV, V apparatus enclosures are equipped with raintight neoprene gaskets.

NEMA VII and NEMA IX enclosures are precision machined to exceed the requirements of the Underwriters' Laboratories, Inc. for flame- or dust-tight closure between bolt-on cover and flange of box.

G-E Circuit Breakers

E-Frame 100 Amperes Type TE—15 to 100 Amperes

Single Pole

1, 2, and 3 Pole

Voltage Ratings: single pole—125 a-c or d-c, two and three pole—240 a-c and 125/250 d-c.

Interrupting Rating: 7500 amps. a-c, 500 amps d-c.

Circuit breaker has the following features: Thermal-magnetic trip; Quick-make and Quick-break; Tamperproof; Trip Free and Trip Indicating and Straight-in wiring.

For use in panelboards or in individual enclosures for the protection of a-c or d-c lighting branch circuits and for power circuits.

*70-100	5 ¹ / ₄	TF3	4.00	4-1/0	TS1234	1	2.00

*When assembling studs to panel or breaker a short and long stud must be assembled adjacent to each other in order to maintain proper clearance between poles on either 250- or 600-volt circuits.

**Provided with short and long insulating tubes respectively.

Type R Single-Pole

Available for standard duty applications in ratings from 15 to 50 amperes, 120 volts a-c. When two Type R breakers are used with handle ties for 2-pole applications, they are rated 120/240 volts a-c, 2-wire. Interrupting rating is 5000 amperes a-c. A thermal-magnetic trip element provides overload and short circuit protection for lighting and appliance circuits. Listed by Underwriters' Laboratories Inc.

Order by catalog number. The following basic requirements should be known and checked when selecting catalog numbers from table: (1) Rating—amperes and voltage; (2) Number of poles. For 2-pole operation, order handle extension, catalog number THIT-102. No charge if ordered with breakers.

No.	Amp. Rating	Each	Std. Pkg.	Approx. Ship. Wt. Each in Lbs.

TRP1150	50	3.10	20	.3

G-E Circuit Breakers

Type TR "Twin"*

Available for standard duty application in ratings of 15 and 20 amperes, 120 v. a-c and 120/240 volts a-c, two-wire, and is suitable for use in protecting a-c lighting and appliance branch circuits.

Handle ties are available for combining one pole from each of two adjacent breakers for two-pole operation.

Rejection pins may be used in load centers at "twin" breaker positions to prevent over protecting wire with higher rated breakers at a later date.

No.	Amp. Rating		Each
	Left	Right	
TR1515	15	15	\$6.20
TR2015	20	15	6.20
TR12020	20	20	6.20

*Trade-mark of General Electric Co.

Type TQL Two-Pole

Designed to meet standard duty 120/240 v. a-c lighting and appliance circuit requirements. Thermal and independent magnetic trip elements provide automatic short circuit and overload protection. If one pole trips, the common trip action will cause the other pole to trip, thereby completely disconnecting the circuit.

Available in rating from 10 to 70 amps., 120/240 v. a-c. Interrupting rating 5000 amps. a-c.

No.	Amp. Rating	Each
TQL2110	10	\$6.90

TQL2130	30	6.90
TQL2140	40	6.90
TQL2150	50	6.90
TQL2170	70	13.00

Type TQL 2-pole switching neutral breaker is designed for use in gasoline station dispensing pump circuits. It provides circuit protection in compliance with NEC Article 510, Section 5120e.

One pole, with line and load terminals, contains thermal and independent magnet trip elements for automatic short circuit and overload protection. The other pole provides an isolated terminal for connecting the incoming neutral wire to a nonautomatic switching mechanism. A wired-in lead completes the neutral circuit to the load center neutral assembly.

Available in ratings of 15 and 20 amperes, 120 volts a.c. Interrupting rating: 5000 amperes a.c.

No.	Amp. Rating	Each
TQL21WY15	15	\$9.10
TQL21WY20	20	9.10

Above circuit breakers are listed by Underwriters' Laboratories, Inc. (except TQL2170).

Standard packaging quantity—10. Approx. Ship. Wt.—6 lbs.

Accessories For Circuit Breakers

No.	Description	Std. Pkg.	Each
TRT-100	Handle tie for adjacent Type TR "twin" breakers	20	\$0.10
TRT-102	Handle tie for two adjacent Type R breakers	20	.40

Note: No charge when ordered with appropriate circuit breakers.

G-E Circuit Breaker Enclosures

General Purpose, Semi-dust-tight, NEMA Type 1A.

General Purpose NEMA Type 1, surface or flush mounting, grounded solid neutral.

Boxes and covers are Bonderite* treated to resist corrosion.

Die-cast aluminum operating handles on front provide extra ease of operation.

Handles can be padlocked in ON or OFF position.

For complete information on molded case circuit breakers in NEMA type 4 & 5 enclosures, consult Graybar.

FSP230
FSP260
30 Amp. or
60 Amp.
Cartridge Fuse
Pullout

FSP130
30 Amp. Twin
Plug Fuse
Section

New fusible service equipment with plug-in construction is the answer to today's increasing residential loads. Devices are available with either 100 ampere or 200 ampere main pullouts feeding busses which will take plug-in fusible branches — plug fuses or 30 and 60 ampere pullouts.

Select the number and rating of the necessary branches and plug them into the exact combination needed for each job. Two twin plug fuse sections (4 plugs) occupy the same space as a single 30 or 60 ampere pullout.

120/240 volt a-c, single phase, 3 wire systems. U/L approved — File E23600.

Buss Super-Lag Renewable Fuses and Renewal Links

3 to 60 Ampere

70 to 600 Ampere

Save time and money by decreasing out-of-service losses. Buss Super-Lag Renewable fuses and renewal links will reduce the number of shutdowns caused by needless blows. Patent fuse-case and Super-Lag link make this possible.

8 to 60 Ampere

70 to 200 Ampere

Super-Lag design gives Buss Links a long time-lag that reduces number of blows on starting currents or other harmless overloads.

Links are made in one piece in all sizes. This makes renewal handy and prevents possibility of poor contact.

For convenience and to prevent dust, moisture or oxidation from affecting them, links are packed in sealed boxes, each holding a small quantity.

BUSS Super-Lag links are interchangeable with all makes of standard fuse links.

For complete information contact Graybar.

Buss Fusetron Dual-Element Fuses
250 and 600 Volts

0 to 60 Amperes

70 to 600 Amperes

Fits ordinary fuse holders. A Fusetron fuse has both a fuse link element and a thermal cut-out element. Has long time lag and less electrical resistance.

For all types of circuits or feeders. Long time-lag prevents blowing on starting currents or other harmless overloads, yet they protect against short-circuit with speed of a fuse.

On normal installations, a size about 100 to 125% ampere rating of motor, installed in disconnect switch or branch circuit panel gives safe and dependable motor-running protection.

Carries Underwriters' Laboratories label and is approved for both motor-running and circuit protection.

250 Volts

600 Volts

Buss 15 to 30-Ampere Fusetron Dual-Element Plug Fuses

For Voltages up to 125

On the ordinary circuit a 15 ampere fuse is the largest size that can safely be used, but such fuses often blow when motors start on washing machines and other devices. 15 ampere Fusetron dual-element fuses won't blow on motor starting currents or any momentary harmless overload, because of their thermal element, yet give exacting protection on dangerous overloads or short circuits. Larger ampere sizes give the same dependable protection on appliance circuits. Packed 4 in a box. 100 in a shelf package.

Symbol	Amperes	Wt. Lbs. Per 100	Per 100
T15	15	6.8	\$10.00
T20	20	6.8	10.00
T25	25	6.8	10.00
T30	30	6.8	10.00

Buss 15 to 30-Ampere Fustats
Type "S" Base

For Voltages up to 125

The Buss Fustat is a dual-element fuse with a fuse link and a thermal cutout.

A Fustat will not blow from motor starting currents or harmless overloads of short duration, but gives safe, dependable protection on dangerous overloads or short circuits.

Stops dangerous practice of over-fusing as a larger ampere fuse will not fit adapter. Adapter locks in place so that Fustat can be changed like a fuse.

Packed 4 in a box. 100 in a shelf package.

Fustats

Adapters

Amperes	Symbol	Wt. Lbs. Per 100	Per 100	Symbol	Wt. Lbs. Per 100	Per 100
15	S15	6 1/2	\$15.00	SA15	4	\$12.00
20	S20	6 1/2	15.00	SA20	4	12.00
25	S25	6 1/2	15.00	SA30	4	12.00
30	S30	6 1/2	15.00	SA30	4	12.00

Buss 0 to 14 Ampere Fustats

To protect against burn-out of motors and apparatus of voltages up to 125.

Correct size Fustats protect 0-125 volt motors against burn-out from such causes as dry bearings, tight belts, overload, etc. Adapter makes Fustats fit any plug fuse holder, locks in place so that Fustat can be changed just like a fuse. Prevents the use of oversize Fustats.

Fustats and Adapters are packed separately, each 4 in a carton. 100 in a shelf package.

Fustats

Adapters

12.	S12	20.00	SA15	12.00
14.	S14	20.00	SA15	12.00

Many other sizes from 3/10 to 9 ampere can also be obtained.

Adapters are not included with Fustats—order them separately and specify size Fustat for which they are required. Fusetron and Buss plug fuses and Buss Fustats may be assorted to obtain quantity price.

Weight per 100: Fustats, 7 lbs.; Adapters, 4 lbs.

Listed as standard by Underwriters' Laboratories, Inc.

For further information contact your nearest Graybar office.

Buss Special Fuses

Special fuses for every purpose can be furnished. Submit a sample of the fuse needed if possible, otherwise submit full details as to type, voltage, amperage, etc. Care must be exercised in ordering fuses as they are made to order and are not returnable. Contact Graybar.

Buss Open Link Fuses

Buss open link fuses can be obtained with many other styles of terminals and in larger capacities. For open link fuses not listed below send sample or complete description.

Terminal OD Terminal OL, OS, ON, or OW Terminal OH or OJ

Amperes	Terminal Symbol	Each	SET-UP CHARGE
1 to 30	OD or OH	\$0.056	\$1.50 for each size and type fuse ordered on each shipment.
35 to 60	OH or OJ	.07	
65 to 100	OJ	.11	
100 to 200	OL or OS	.18	
225 to 400	OS or ON	.30	
450 to 600	ON or OS	.56	
650 to 1000	OW or ON	1.10	

Unless otherwise specified, first mentioned terminal as above listed will be furnished.

Symbol	Dimensions of Terminals		Slot	Width
	Old No.	Terminal		
OD	1		5/32"	3/8"
OH	3		3/16"	9/16"
OJ	5		1/4"	11/16"
OL	7		3/8"	3/4"
OS	16		7/16"	1 1/32"
ON	10		1/2"	1 3/8"
OW	28		5/8"	2 1/16"

If terminals larger than those shown with above amperages are desired, the price is not determined by the amperage of the fuse—the price that will apply will be the lowest shown for terminal desired.

Slots are slightly larger than dimensions given so that bolts of such sizes will fit the slot. Terminals are all copper.

In ordering, be sure to specify exact amperage and length desired.

By length is meant the center to center dimension of the slots in the terminals. This dimension will be indicated by one of symbols shown alongside. This symbol immediately follows the terminal symbol.

Buss Stamped Open Link Fuses

WGA and WHA are usually made of copper. All others are usually made of zinc.

Symbol	Old No.	Center to Center	Slot	Max. Width of Terminal Portion	Usual Amperages	Each	Set-up Charge
WAA	A	1 1/4"	3/16"	3/8"	3 to 60	\$0.04	\$1.50
WBA	B	1 5/8"	3/16"	15/32"	3 to 175	.04	1.50

					125 to 300	.20	2.50
					350 to 600	.30	2.50
					650 to 1000	.40	2.50
WHIA	H	3"	3/16"	2"	100 to 450	.30	2.50
					500 to 3000	.50	2.50
WEA 66A		1 9/16"	1/4"	3/4"	75 to 250	.05	1.50

SET-UP CHARGE applies on each shipment ON EACH SIZE AND TYPE.

Buss Large Open Link Fuses

Terminals of cold rolled copper—entirely flat, one edge being slotted to receive the fuse strip.

When ordering, specify:

- ampere rating desired,
- width, length and thickness of terminals,
- size of hole desired,
- center to center dimensions of terminal hole.

If more than one hole in each terminal is desired, a sketch of the fuse must be submitted in addition to the information above requested.

Buss Clear Window Plug Fuses

Carry Underwriters' Laboratories Inspected label.

Buss fuses have an extra large, clear window which makes it easy to see if fuse is blown. Metal cap protects fuse against any chipping of the top. Insulated with porcelain and mica.

Packed 5 in a box. Information printed on box tells what to do when a fuse blows.

Shelf package, 100. Weight Per 1000, 65 pounds.

Type AGC fuses 3 amperes and smaller can be used on 250-volt circuits.

G-E Type CLF Fuses
High-Interrupting Capacity
6-4000 Amps. Continuous 200,000 RMS Symmetrical
Amps. Interrupting Rating

High-interrupting-capacity fuses are required in power circuits where available short-circuit currents exceed the interrupting rating of NEC fuses. (NEC fuses are usually considered to have an interrupting rating of 10,000 amp.) Has a tested interrupting rating of 200,000 rms symmetrical amps. at rated voltage and frequency. In addition, it provides improved protection because of its current-limiting action even on circuits where the NEC fuse can be properly applied.

Provides efficient and economical short-circuit protection for feeders, lighting-branch circuits, motor-branch circuits, motor starters, control power circuits, and similar application, at 600 volts and below.

Silvered copper ferrules or knife blades at each end fit any standard NEC fuse holder or corresponding voltage and current rating, 600 amps. and below. Above 600 amps. tangs are provided for bolt mounting.

Buss Fustat Box-Cover Units

Simple, Low Cost Way To Protect 125 Volt Motors

A box-cover on which a Fustat can be mounted—alone or in combination with a plug-in receptacle or switch.

There are four different cover sizes to fit box you have. Units have Edison base fuseholder so proper size Fustat Adapter can be used. They are listed as approved by Underwriters' Laboratories when Adapter has been inserted.

Use them to guard motors on home, farm, office, factory appliances and equipment—from such things as lack of oil, worn bearings, tight belts, overloading wrong or low voltage.

Simply install desired cover on box, then screw in proper size Fustat and Adapter. Units without switch for any motor 3/4 h.p. or smaller. Units with switch for a-c motors only 1/2 h.p. or smaller.

On normal installations use Fustat of a size nearest to ampere rating of motors or a little larger.

Holder For Fustat Only

No.	Description	Wt. Lbs. Per 100	Price Each

Note: Fustats and Adapter are not included with Box-Cover Units, order them separately.

Buss Fuse Wire and Strip

Will carry indefinitely current shown under heading "Carrying Capacity." Will open the circuit when subjected to overload 25 per cent in excess thereof.

This is based on a distance between contacts or terminals of 2 inches.

When used on contacts of other distances the carrying capacity is affected as shown in the table below.

Will Carry More Current		Will Carry Less Current	
Distance Between Contacts Inches	Per Cent Additional	Distance Between Contacts Inches	Per Cent Less
1/2	100	2 1/2	5
3/4	70	3	10
1	45	4	15
1 1/4	30	5	20
1 1/2	15	6	25

The size of terminal and other local conditions will greatly affect these figures. They are only approximate.

Fuse Wire

The 1/4-ampere size is furnished on 250-foot spools; sizes 1/2 to 3-amperes, on 1/2-pound spools; and 4 to 100-amperes, on 1-pound spools.

Furnished only in full spools.

Size Amp.	Carrying Capacity Amperes	Feet per Pound	Per Spool	Size Amp.	Carrying Capacity Amperes	Feet per Pound	Per Spool

Ideal Safe-T-Grip Fuse Pullers

Ideal Safe-T-Grip Fuse Pullers have notched edges which give a sure grip, eliminating any possibility of slipping. Eliminates the danger of pulling and replacing cartridge fuses by hand and the bending of fuse clips through improper removal. Also adapted for adjusting loose cutout clips, handling electrical parts, etc.

No.	Size	Description	Each
34-001	Midget	For Small Fuses, 1/4 to 1/2-in. in Diameter.....	\$0.45
34-002	Pocket	1 to 200-Amp., 250-Volt, & 1 to 100-Amp., 600-Volt.....	1.00

Buss Fuse Reducers

60 to 30 Amp.

Make it possible to use ordinary or Fusetron fuses of a size smaller than the fuse clips are intended to hold.

Will fit any form of the spring type or clamp type clip, in any panel or switch.

They take no more space than would a fuse of a size to fit clips.

Reducers provide clamp contact throughout eliminating troubles resulting from poor contacts.

Packed, one pair in a carton.

200 to 100 Amp.

250 Volt

No.	Amperes	Wt. Lbs. Per 100	Per Pair
263	60 to 30	16	\$0.70
213	100 to 30	31	1.30
216	100 to 60	34	.95
226	200 to 60	60	2.90
2621	200 to 100	30	1.90
2642	400 to 200	35	2.90

600 Volt

663	60 to 30	16	.80
216	100 to 30	34	.95
616	100 to 60	39	1.70
626	200 to 60	65	4.75
2621	200 to 100	30	1.90
2642	400 to 200	35	2.90

600 to 100 amp. size reducer not needed. 225 to 400 amp. fuses will fit in 600 amp. clips—contact surface is reduced some, but if necessary the effect of that can be offset by using clip-clamps to give tighter contact.

Ideal Fuse Reducers

Protect overfused circuits without expense of special fuses. change in switch panel or equipment. Handy for emergency use. Fully approved. Listed by Underwriters' Laboratories.

Ideal Fuse Puller and Testlite

Safe, convenient, dual-purpose electrician's tool with "Sure Grip" handles.

Used for pulling cartridge-type fuses and checking electrical connections.

Constructed of sturdy dielectric plastic. One end serves as sure-grip fuse puller; test prods on opposite end fit both parallel and tandem slot receptacles. Test prods are only exposed metal parts. Internal wires connecting test prods fully insulated.

Designed for use on fuses up to 100 amp., 250 v. and 60 amp., 600 v. Test capacity from 100 v. to 600 v. a-c or d-c.

No.	Description	Each

Buss Clip-Clamps

Built for hard service.

Insure good contact between clips and ordinary or Fusetron fuses. Eliminates heating from poor contact that often causes fuses to blow. Clip-clamps make replacement of fuse-clips unnecessary as they generally permit even injured clips to be used with perfect satisfaction. To prevent corrosion, all steel parts are heavily cadmium plated.

Hoffman "JIC" Electrical Wiring Boxes

Listed by Underwriters' Laboratories, Inc.

Constructed of 14 gauge steel, except the three small sizes, which are of 16 gauge. Mounting feet are made from 12 gauge steel.

Cover is chained to box to prevent loss. No holes in box or cover; all seams welded. Cover is gasketed with cellular neoprene and held to box by external clamp and lift-off hinges. Covers held on by screws available.

Standard finish is baked gray hammerstone enamel over a phosphatized surface. Special finishes, sizes and modifications including holes for conduit connections and continuous hinges can be provided.

All models except 404 LP have four weld-nuts for supporting panel on which chassis, terminal strips, relays and other components can be assembled.

**Hoffman Control Panel Enclosures
NEMA Standards**

NEMA Type 12

Used to house electrical controls providing protection from dust, dirt, oil, coolant or water.

Door hinged to body with a continuous hinge, and gasketed with cellular neoprene. All 14 gauge enclosures have rolled edge extending around door opening. Special clamps welded to body hold door closed. Single door units have padlock hasp and feet for wall mounting. Each enclosure has removable print pocket.

Two door units have specially gasketed, overlapping doors which eliminate the need for center-posts. They are floor mounted on 12-in. stands and fitted with lifting eyes. Two door units have locking handle with three point latch.

Mounting panels finished with baked white enamel. The interior finished with baked white enamel. Exterior has gray prime coat. All surfaces phosphatized prior to painting. Special materials, sizes, modifications and corrosion resistant finishes quoted on request. Disconnect switches installed on request.

Columbia Type A Surface Cabinets

Adapted to nearly all installations where a cabinet for surface mounting is to be used as a junction, service, switch, panel, or cutout cabinet.

Construction. Sheet steel, required thickness to conform with Underwriters' Laboratories specifications.

Finish. The standard finish is a high grade baked on, durable gray enamel or aluminum paint. Olive green, all enamels or other special finishes can be furnished at an extra charge.

Hardware. Cabinets up to 18 inches in width or height are regularly equipped with flush ring handle and friction catch. Over 18 inches wide and not exceeding 24 inches high a turn knob and latch is used. Larger cabinets and all double door cabinets are fitted with vault handle latch. Unless otherwise specified, all boxes are hinged on the long side. Code

requirements for double and three-point catches are provided for in these listings.

Knockouts. Boxes 15 inches wide and up; one 1 1/2" one 1" knockout near center of each side, two 3/4"-1" concentric knockouts on each side, balance 1/2"-3/4" concentric. Boxes 10 to 12 inches wide; one 3/4"-1" concentric knockout in ends, two 3/4"-1" concentric knockouts in sides, balance 1/2"-3/4" concentric. Smaller size boxes; one 3/4"-1" concentric knockout in center of each side, balance 1/2"-3/4" concentric. Boxes narrower than 6 inches; 1/2"-3/4" concentric knockouts only. Special knockouts can be made at an extra charge. Box can also be furnished without knockouts on request.

Galvanized Cabinets can be furnished at an additional charge.

See cost sheet.

*Hinged on width or short side.

Columbia Type P Flush Cabinets

Construction. Sheet steel, required thickness to conform with Underwriters' Laboratories specifications. Removable trim and door. Plain type without ornamental beads; body is formed from one piece of steel with corners folded in and securely welded.

Finish. Standard finish is gray enamel or aluminum paint.

Hardware. Cabinet is regularly equipped with knob and turn catch. Cabinets with surface area of over 360 square inches are furnished with vault handle. Cabinets can be supplied with any style hinges, catch or lock.

Knockouts. Boxes 15 inches wide and up; one 1 1/4", one 1" knockout near center of each side, two 3/4"-1" concentric knockouts on each side, balance 1/2-3/4" concentric. Boxes 10 to 12 inches wide; one 3/4"-1" concentric knockout in ends, two 3/4"-1" concentric knockouts in sides, balance 1/2-3/4" concentric. Smaller size boxes; one 3/4"-1" concentric knockout in center of each side, balance 1/2-3/4" concentric. Boxes narrower than 6 inches; 1/2-3/4" concentric knockouts only. For special knockouts, add \$2.00 for each additional size change. Specify if boxes are desired without knockouts.

Square D Interchangeable Hubs

Raintight with Removable Hubs

Square D Raintight enclosures use interchangeable hubs. Thus a minimum stock of boxes, together with a variety of hubs can easily satisfy any customer application.

Flexibility is provided, merely screw hub into special threaded opening at top of the raintight box. Inside of hub is threaded for conduit.

Interchangeable hubs are available in the following conduit sizes: 3/4, 1, 1 1/4, 1 1/2, 2 and 2 1/2 inches. Type RO raintight devices having mains rating up to 70 amperes will accept 3/4, 1 and 1 1/4 inch hubs. RO devices rated 100 amperes will accept 1 1/2 and 2 inch hubs directly, and the 3/4, 1 and 1 1/4 inch hubs through a reducer furnished with the raintight device. RO devices having 200 amperes mains will accept the 2 1/2 inch hub directly and the 1 1/2 and 2 inch hub through a reducer furnished with the device.

Closing caps may be used to close the threaded openings when no hub is required. Hubs may be added to any device by cutting a hole and locking the hub in place with a locking nut of the size shown.

Type R devices without the threaded hub provisions are available in popular sizes.

No.	Conduit Size In.	Description	Each
HC	3/4	Interchangeable Hub	\$2.60
HC2	3/4	Interchangeable Hub	2.60
HD	1	Interchangeable Hub	2.60

Square D Class 9070 Control Circuit Transformers

Class 9070 Type ACO-50 Transformer

These control circuit transformers are specifically designed for industrial control applications, to provide good transformer regulation when high inrush currents are drawn.

50-60 cycles. 25 cycle transformers also available in 500 VA and smaller ratings.

Standard voltage transformers.

General Purpose Enclosure NEMA Type 1

Square D Voltage Testers

No. 5008

No. SK3986

Tests without lamps—eliminates breakage. Voltage directly indicated on easily read, colored scale. May be operated using one or both hands. Can be carried in pocket.

Heavy fibre case withstands 10,000 volts. Lead wires have vulcanized oil resisting insulation and 4-in. fibre grips covering insulation—piercing prongs.

Testers cover the a-c and d-c scale up to 600 volts and from 25 to 400 cycles. Polarity cap indicates d-c polarity and is optional on all testers.

Testers Complete With Polarity Cap

Square D Fusible Distribution Panelboards—Unassembled With QMB Saflex HP Rated Plug-In Switch Units

Single Phase 2 Wire, 250 Volts A-C or D-C

Single Phase 3 Wire, S/N 125/250 Volts

Three Phase 3 Wire, 250 Volts or 600 Volts A-C

Three Phase 4 Wire S/N 120/208 Volts or 277/480 Volts A-C

QMB Saflex Available Locally

Panelboards with any combination of 30, 60, 100 or 200 ampere, 2 or 3 pole switches, 250 volts or 600 volts and main lugs up to 600 amperes are now available from your local Graybar distributor.

For switches over 200 amperes or mains in excess of 600 amperes contact GRAYBAR so that these custom built panelboards can be ordered for you direct from factory.

Switch Units

Each unit individually enclosed in steel. Dead front construction. Quick make, quick break, horsepower rated. Heavy duty cast operating handle. Double spring mechanism insures positive opening under full load.

Visible blades for maximum safety. Positive pressure fuse clips and switch jaws assure maintenance free connections. Cover interlock prevents unauthorized access but permits entrance for maintenance. 30 ampere thru 200 ampere units are plug-in type. Service entrance approved with six circuits or less or with main switch.

Mains: Main lug only; 200, 400 or 600 ampere, main switch 200 ampere only.

Branches: Quick-make, quick-break hp. rated plug-in switch units, two or three pole, 30 to 200 ampere capacity.

Boxes: Code gauge steel without knockouts, finished blue-grey over rust resisting phosphate primer. Dimensions: 30-in. wide by 10½-in. deep.

Fronts: Code gauge steel, flush or surface mounting, with or without door with adjustable indicating trim clamps. Finished blue-grey.

Wire Gutters: End gutters 7 inch. Side gutters 5½ inch.

Selection of Components

1. List required circuits including main switch if desired (ampere rating and poles).
2. Select catalog numbers of switch units and determine total required unit space from Table One. If solid neutral is required, select from Table Three and include height required when determining unit space.
3. Select interior, box and front catalog numbers based on required unit space from Table Two (or Mains capacity).
4. Select blanks if required to complete unit space from Table Three. For 1 ph. 2 W. or 1 ph. 3 W. applications select switch units having CA bus connections. For 3 ph. 4 W. "Delta" applications all 2P switch units should have CA bus connections. For distributed phasing of 2P switch units select proper assortment of AB, CA and BC bus connections.

Sub-Feed Breaker: 70-100 ampere, two and three pole breakers are available as sub-feed branches with no more than one per Main Lug Only panel at \$52.50 for each two pole and \$69.00 for each three pole. No sub-feed breakers are available for main breaker panels.

Space Only: When space only for future branches is required, figure panel on basis of total number of branches, including the future branches, and deduct \$3.10 list for each breaker pole omitted.

*Deep Boxes: When 14-in. wide by 5¾ in. deep boxes are required, add the number "5" to the box catalog number, i.e. QO519B. No extra charge.

120/208 volts a-c only rating when one and two pole branches are in panel. A 240 volt a-c only rating may be obtained when all three pole branches are used.

Type NAB-3LX

Single Phase, 3 Wire, S/N A-C or D-C Narrow Width

Mains: 125/250 volts a-c or d-c.

Branches: Single pole, 15 ampere 125 volts 2-wire S/N type ML breakers.†

Boxes: 8 $\frac{5}{8}$ in. wide, 5 in. deep. Galvanized steel.

Fronts: Trim with door and flush lock. Blue-gray finish.

Note: Box height is indicated by last two figures of box number. Wiring gutters at top, bottom and left side. Top and bottom gutters are 4-in. high in Type NQO and 5 in. high in Type NAB; left side gutter is 2 $\frac{1}{2}$ in. wide on NQO type and 1 $\frac{3}{4}$ in. wide on NAB type.

†Ratings: 15 ampere single pole branches will be furnished unless otherwise specified; 20, 30, 40 and 50 ampere single pole breakers can be substituted without price change. Use of branch breakers rated more than 15 amperes may necessitate increased mains.

Cable Troughs and Pull Boxes: Can be furnished with these panels for H-Beam mounting.

Type NQO-4LX

3 Phase, 4 Wire, S/N A-C Only Narrow Width

Mains: 120/208 volts a-c only.

Branches: Single pole 15 ampere 120 volts 2-wire S/N.

Boxes: 8 $\frac{3}{8}$ in. wide, 5 in. deep. Galvanized steel.

Fronts: Trim with door and flush lock. Blue-gray finish.

Two or Three Pole: 70-100 ampere breakers may be furnished as sub-feed breakers with not more than two per panel.

Space Only: When space only for future branches is required, figure panels on basis of total number of branches and deduct \$9.70 list for each breaker pole omitted.

Solid Neutral Bar: Deduct \$11.00 if solid neutral is not required.

Handle Lock-Off Device: Cat. No. SK-2894, List price \$0.65 each.

Square D Type MHP Circuit Breaker Distribution Panelboards With Plug-In Type MM, M1 and M2 Thermal-Magnetic Circuit Breakers Unassembled Type

- 3 Phase, 4 Wire, S/N 120/208 Volts A-C
- 3 Phase, 3 Wire, 240 Volts A-C
- 1 Phase, 3 Wire, S/N 120/240 Volts A-C
- 1 Phase, 2 Wire, 240 Volts A-C

Mains: Lugs only.

Branches: Single pole 15 to 50 ampere 120 volts a-c. Two pole 15 to 100 ampere 240 volts a-c. Three pole 15 to 100 ampere 240 volts a-c.

Boxes: Galvanized steel. Single row—14 in. wide, 5 3/4 in. deep. Double row—20 in. wide, 5 3/4 in. deep.

Fronts: Trim with door and flush lock. Blue gray finish.

Wiring Gutters: Single row—4 in. end and side gutters. Double row—6 in. end gutters, 4 in. side gutters.

Selection of Components

1. List required circuits (ampere rating and poles).
2. Determine total breaker mounting space required from breaker mounting space dimensions under "Plug-In Breakers" table. Include breaker mounting space for planned future circuits.
3. Select interior from "Interior Box and Front" table on basis of total "Breaker Mounting Space" required. Corresponding box and front are also listed in this table.
4. Select required breakers from "Plug-In Breakers" table.

*Single Phase Three Wire mains are accommodated by selecting breaker units having Type CA bus connections.

Three Phase Four Wire "Wye" mains arrangement is a standard feature.

Three Phase Four Wire "Delta" mains can be accommodated. The neutral on three phase four wire "Delta" systems is derived by center tapping one of the transformer phases. For this application, all single-pole and two pole branches requiring a neutral are connected to the two outside bus bars through the use of breaker units having Type CA bus connections. The third bus bar would be used only for 3 pole breakers in this system.

Distributed Phase bus connections for single pole or two pole branches are available by selecting proper assortment

of Type AB, BC and CA breaker units to provide sequence phase connections.

Subfeed Lugs package assembly kits are available for adding a second set of lugs in the panelboards:

- SK-4052 200 A. lugs for MHP-18 and MHP-27 \$15.00
- SK-4053 400 A. lugs for MHP-36 and MHP-54 20.00

*Handle Tie can be used for converting two single poles to a double pole individual trip heater No. 40HT List Each \$0.10

225 Ampere Breaker Addition

Flush or surface type fronts with blue-gray finish. Type M1-3 thermal magnetic breakers 2 or 3 pole, 240 volts a-c ratings from 125 to 225 amps.; meets Federal spec.

Galvanized steel 14-in. wide by 18-in. high by 5 3/4-in. deep for single row panels. Available 20-in. wide for double row panels. Will not mount in P-33RO boxes.

14-in. Wide Box No.	Each	20-in. Wide Box No.	Each	Item

Square D Power-Style Switchboards

Series I

For Compact Installations to 2000 A.

Series I Power-Style switchboards are completely standardized front-connected switchboards that are used mainly on service entrance in small and medium size commercial, industrial, and institutional type buildings. The wide selection of section arrangements plus complete standardization make possible a compact, economical service installation with the shortest possible delivery.

- Entirely front connected.
- Only 14-in. deep, 90-in. high.
- Can always be mounted against a wall.
- Removable rolled-edge steel plates on front sides, and top.

Standardized current transformer compartments to meet Power-Company's requirement.

- Standard horizontal main bus from 400 A. to 2000 A.
- Bus duct connections to Feed-in or Plug-in Duct.
- Molded case main or branch circuit breakers up to 800 A.
- Fusible switches up to 600 A. in either QMB or Saflex construction.
- Knife type and bolted pressure contact main switches up to 2000 A.
- Standard bus provisions for future sections.
- Complete standardization for fast delivery.

Bolted Contact Switch Service Station

Standard current transformer compartment.
1200 A. bolted contact main switch.

QMB Combination Service Section

Standard current transformer compartment.
Six QMB main switches.

ML Combination Service Section

Standard current transformer compartment.
400 A. molded case main breaker.
Molded case branch breakers.

QMB Switchboard

800 A. molded case main breaker.
Standard current transformer compartment.
QMB branch switches.
Standard horizontal main bussing.
Standard drillings for future sections on either end.

ML Switchboard

800 A. molded case main breaker.
Standard current transformer compartment.
Molded case branch breakers.

Square D Power-Style Switchboards

Series II

For Large Services and Equipment

ACB-ML Switchboard

1600 A. main air circuit breaker.
ML mounted molded case branch breakers.

ACB-QMB Switchboard

1600 A. main air circuit breaker.
Quick-make, quick-break QMB branch switches.
Power Company C/T compartment.

ACB-CBI Switchboard

1600 A. main air circuit breaker.
CBI mounted molded case branch breakers.

Series II Power-Style switchboards are designed for use on service entrance and power distribution in commercial, industrial and institutional type buildings. The unlimited range of available equipment coupled with the following features make this the finest and most complete line of switchboards on the market:

- Die formed steel framework, welded and bolted together.
- Removable rolled-edge steel plates all around.
- Standard depths from 20-in. to 60-in.
- Main bussing from 600 A. to 6000 A.
- Channel iron sills.
- Stationary mounted air circuit breakers up to 5000 A.
- Molded case circuit breakers up to 800 A. in either ML or CBI construction.
- Fusible switches up to 600 A. in either QMB or Saflex construction.
- Knife type and bolted pressure contact switches up to 5000 A.
- Any arrangement of Power Company or customer's metering equipment.
- Bus duct connections to Plug-in or Feed-in Duct.
- Weather-proof construction.
- 18-in. or 30-in. high pullboxes.

Square D Control Centers

Class 8998

Matched Design of the New Square D Power-Style Switchboards and Plug-In Control Centers

Square D "Plug-In" Model 3 control centers offer all the advantages of simplified planning, safety and economy gained by grouping electric motor controls in factory assembled, free standing structures. Control centers basically consist of standardized combination starter units and vertical sections, but are custom-assembled for the job.

Space Economy: Up to six combination starter units fit in 20-in. x 20-in. x 90-in. sections. Sections 20-in. deep accommodate all starters through size 5.

Plant Changes: Units or whole sections may be added, removed or exchanged at will. Plug-in design and a wide variety of standard, interchangeable units provide the economical way to keep motor control in step with plant changes. Salvage value is practically 100%.

Safety Features: Disconnect operators are specifically designed with full cover interlocking provisions to encourage modern safety practices. Busses and wiring are fully enclosed and designed for ample full load and short circuit capacity. Unit enclosures isolate the control equipment for each motor.

NEMA 5 Dust-Tight Control Center for Excessively Dusty Locations

Front-of-Board Mounting: Usually recommended because it allows full use of floor area next to walls or locations where the rear of the control center is not accessible. All equipment is mounted on the front face of the structure and wiring gutters are front accessible.

Back-to-Back Mounting: Provides control units mounted on both faces of the structure. Less length is required, but greater depth of floor area is needed for aisle room on each side. Sections for front-of-board and back-to-back type mountings are 20-in. deep.

Control Units: Available in wide variety to handle any a-c installation. Standard units cover the normal requirements for disconnecting means, magnetic starters, lighting transformers, and lighting panels. Special control units are designed and built to order for the more unusual requirements.

Combination Starter Units: Include both disconnect and starter elements. The disconnect may be either a circuit breaker or a fusible switch. The starters may be reversing or non-reversing, line voltage or reduced voltage, single speed or two speed, and may have such optional features as push buttons, pilot lights, control transformers, and extra electrical interlocks.

Special Purpose Control

Class 8930 A-C

A-C Special Purpose Control Panel for Multiple Spindle Drilling Machines

Custom-built control is recommended for efficient operation of machine tools, processing machinery, conveyor systems, and other equipment involving motor drives or electrically controlled hydraulic or pneumatic systems. Such control requires careful engineering to include features which insure maximum safety, uninterrupted production, and long service.

Square D special purpose control panels are grouped assemblies of motor starters, relays, timers, and other devices, complete with user terminals and interwiring for convenience of installation and maintenance. Circuits are usually designed for automatic dequencing of machine functions with minimum attention required of the operator.

Standard lines of devices are physically and electrically proportioned for efficient combination on special panels. A complete variety of enclosure types are available, and open panels can be supplied for mounting within machine cavities.

Other features available include line and reduced voltage starting, main line disconnect means with external operating handles, low voltage control circuits, branch circuit over-current protection, and motor running protection. Square D custom-built control can be furnished to conform with the latest NMTBA or JIC standards.

Square D Stage Dimmerboards

Cross-Connect Stage Dimmerboard

**Separable Cord System—Motor Driven House Dimmer
Master Assembly—Branch Breakers**

Square D Company now provides a complete line of stage dimmerboards for complete control of stage lighting. Each board contains all necessary control and protective devices arranged in a neat, convenient manner for maximum ease of operation. A large variety of control systems are available, making it possible to select the right board for every application.

In addition to free standing stage dimmerboards designed for controlling stage lighting in large auditoriums, small wall mounted dimmer banks and single units are available for variable lighting control in smaller installations.

Among the many optional features available in Square D stage dimmerboards are direct and multi-scene preset, electrical and mechanical mastering, motor driven auto-transformer dimmers, and various types of cross-connect systems. These, and many other fine standard and optional features, make this a truly outstanding line of stage lighting control equipment.

Square D QMB Motor Centers

QMB Motor Starter Switchboard

This switchboard contains two 30A. 3P., QMB switches feeding two size 1 starters, two 60A. 3P., QMB switches feeding two size 2 starters, and two 100A. QMB switches, one of which feeds a size 3 starter. The other 100A switch can be used either to feed an external device or feed future size 3 starter. This section is 14-in. deep, 30-in. wide and 90-in. high.

Motor Starters can now be mounted in QMB Switchboards or QMB Panelboards.

Starters: Twin Units—Size 0 to 5; Cover Interlocked with Disconnect Switch; Line Side Wiring to Disconnect Switch above Starter; Non-Reversing (or Reversing—Single Unit)—Across the Line Type; External Reset—Melting Alloy Overloads; Pushbuttons and Pilot Lights in Covers of Units (Optional).

QMB Disconnect Switches: Quick-Make, Quick-Break; Visible Blades; Plug-In Type; Horsepower Rated—250 volt or 600 volt; Voidable Cover Interlock to permit testing of fuses.

Starters combined in same Enclosure with Light and Power Distribution. Starters and Disconnect Switches are integrally mounted.

Factory mounting and wiring of Starters saves labor. Extra Conduit Fittings not required.

Can be used any place where Motor Control can be combined with Distribution Equipment.

Square D Manual Starters

A-C Manual Starters—Line Voltage Type

Class 2510 General Purpose Enclosure
Class 2510—Water and Dust-Tight Enclosure

Used where it is convenient for the operator to start and stop small single phase or polyphase motors by pressing push buttons mounted in the cover of the starter enclosure.

Low voltage protection and low voltage release are not available with the manually operated mechanism. If power should fail, the starter contacts will remain closed until the stop button is operated. Type W starters are operated from push buttons and employ melting alloy overload relay units.

Note: Prices include thermal overload relay units. Deduct \$1.50 each if relay units are omitted.

*These two speed starters are suitable for star-connected separate winding motors only.

Ordering Instructions: Specify class and type number of starters; give horsepower, voltage, phase and full load current rating of motor. For starters in NEMA 7 and 9 enclosures specify location of conduit fittings.

A-C Manual Compensators

Class 2605 Manual Compensator

Designed for starting a-c squirrel cage motors when it is practical to have manually operated control, but where inrush currents must be reduced or starting torque limited.

Reduced voltage for starting is obtained through the windings of an auto-transformer.

Prices are for 3 pole, 50-60 cycle, compensators. Four pole or 25-10 cycle compensator prices on request.

Three pole overload protection available at additional cost.

Auto-Transformer Type Reduced Voltage Starters
Oil Immersed Contacts—Three Wire Control

Note: When ordering specify class number, horsepower, voltage, phase, cycles and full load current rating of motor.

Square D Manual Starters
Fractional Horsepower Manual Starters

Used whenever it is desired to have overload protection as well as "off-on" control of small a-c single phase or d-c motors. Motor is started at line voltage. Low voltage protection and low voltage release are not possible with these manually operated starters. Open type starters fit in a standard switch or conduit box, and can be used with a standard flush plate.

Square D Loom Switches

Manual Starters For Textile Industry Applications

Class 2510

Lint Tight Enclosure

General Purpose Enclosure

The Class 2510 Type R and S manual starters are particularly designed for severe service required of loom motor starters. They have a toggle lever for operation and use protected type melting alloy overload relays. May be group fused if all motors are rated 2 hp. or less. Low voltage protection and low voltage release are not provided.

These starters are also suitable for general use, similar to the type W manual starters.

Prices include thermal overload relay units. Select relay units from Table. Deduct \$1.50 each if relay units are omitted.

Ordering Instructions: Specify Class and Type number of starter; give horsepower, voltage, phase and full load current rating of motor.

Square D Reversing Drum Switches

Class 2601

May be used for across-the-line starting and reversing of a-c polyphase or single phase motors, or d-c motors.

Compact and inexpensive, ruggedly constructed.

Type AG-3 breaks two lines to the motor; type AG-2 breaks three lines. These switches do not provide overload protection or low voltage protection.

Ordering Instructions: Specify Class and Type Number of drum switch. Give horsepower, voltage and phase of motor.

Square D A-C Magnetic Relays
Class 8501

Used as auxiliary devices for controlling small single phase motors or other light loads such as electric heaters, pilot lights or audible signals.

They do not provide motor overload protection and are ordinarily used in a two-wire control system; however any available normally open contact can be wired to serve as a holding circuit in a three-wire system when a momentary contact pilot device is used. Pushbuttons, float switches, pressure switches and thermostats can be used for pilot service.

Two Wire Separate Control

Ordering Instructions: Specify Class and Type number of relay; number of poles; and voltage and frequency of the operating coil.

Square D A-C Machine Tool Relays

Class 8501

Multipole, 15 Ampere

General Purpose
NEMA 1 Enclosure

Class 8501
Type BHO-40

Types BR and BII multipole 15 ampere heavy duty relays may be used for switching control circuits or for controlling small single phase or polyphase motors. If motor overload protection is required it must be provided separately.

Extremely long mechanical life is an important feature of these relays to the machine tool industry. All steel parts with wearing surfaces are hardened, this includes the complete magnet assembly, movable contacts and movable contact guides.

The resilient contacts on the BR type relays provide overlap between normally open and normally closed poles. The "wipe" characteristics of the beryllium copper resilient contacts makes these devices suitable where low voltage and low current may tend to give trouble with normally closed contacts.

Class 8501

Multipole—Without Overload Protection or Holding Circuit—Unwired

Hardened Parts—Rigid Contacts
25-60 Cycles—15 Ampere—6-600 Volts

Contacts on Types BII and BR multipole relays are easily convertible from normally open to normally closed (or vice versa), without the addition of extra parts.

▲Devices with all normally open contacts are built in quantities for stock. Devices with normally closed contacts are built to order only. It is therefore generally recommended that devices with all normally open contacts be purchased. This will result in a minimum inventory of relays and yet will permit coverage of all contact arrangement requirements by the simple conversion operation.

Ordering Instructions

1. Specify Class and Type number of relay; number of poles; and the voltage and frequency of the operating coil.
2. Order suitable accessories and pilot control devices.
3. Describe clearly any special features or modifications of standard devices that are desired.

Square D A-C Magnetic Contactors

Sizes 00 to 7, Three Wire Control
Class 8502

Without Overload Protection

Magnetic contactors are commonly used for many types of non-inductive loads. May be used also for electric motor loads within the horsepower rating shown, if overload protection is not required, or if other provision is made for it.

A holding circuit interlock for three wire control is provided on all of these Class 8502 magnetic contactors.

When ordering, specify Class and Type number; give hp., voltage, phase, cycles and full load motor current. Order suitable pushbutton stations. Describe clearly any special features or modifications of standard devices which are desired.

Melting Alloy Overload Relays

Line voltage magnetic starters provide the simplest method for starting and stopping a-c squirrel cage motors. They are used when full starting torque may be safely applied to the driven machine and where the resulting current inrush is not objectionable.

Motor overload protection is provided by melting alloy type thermal overload relays.

Price includes thermal overload relay units. Deduct \$1.50 each if relay units are omitted. Select relay units from Tables 1 and 3.

▲Also functionally equivalent to NEMA Type 5.

Ordering Instructions

Specify class and type number of starter. Give hp., voltage, phase, cycles and full load motor current. Select thermal units or heaters from proper tables. Order suitable push button stations and accessories shown elsewhere in catalog.

*Relays operate from secondary of a current transformer. Order relay units by number..... Price Each \$1.50

Selection of Relay Units for Special Applications

Motor Duty Rating	Ambient Temperature of Motor Same as Controller	Ambient Temperature of Motor 15° C. (27° F.) Higher Than Controller	Ambient Temperature of Motor 15° C. (27° F.) Lower Than Controller
40°C. Continuous	Select Relay from table	Use 1 Size smaller than in table	May be 1 size smaller than table
50-55°C. Continuous	Use 1 Size smaller than in table	Use 2 Sizes smaller than in table	Select Relay from table
1 Hour Intermittent	Use 1 Size smaller than in table	Use 2 Sizes smaller than in table	Select Relay from table

Square D Class 8538 A-C Switch Type Combination Magnetic Starters

3 Pole Line Voltage Type—25-60 Cycles—600 V Max.

**Class 8538
Switch Type
General Purpose
Enclosure**

**Class 8539
Water-Tight
Enclosure**

Combination starters provide all the control functions of Class 8536 line voltage starters, described on the preceding pages, plus all the advantages of a disconnect means in the same enclosure. Class 8538 starters have a knife switch—either fusible or non-fusible—while Class 8539 covers similar devices with a circuit breaker.

The single enclosure used has many advantages over separate starters and disconnects. A single device takes up less mounting space, and makes a neat installation. Installation and wiring costs are less because all wiring between the starter and the disconnect is made at the factory. Greater safety for the operator is provided in a combination starter, as the cover of the enclosing case is interlocked with the disconnect means to prevent opening of the cover with the disconnect closed—a feature not available with separate devices.

Order by Class and Type number of starter. Give horsepower, voltage, phase, and full load current rating of motor.

If special features are desired order Class....., Type....., Form....., selecting the correct Form letter from the table on the following page. If more than one Form letter is used, arrange the Form letters in alphabetical order as "Class 8538, Type DG-4, Form A1T." Describe modification which cannot be covered by Form Letters.

Prices include thermal overload relay units. Deduct \$1.50 each if relay units are omitted.

*These trip ratings and breaker types do not necessarily apply to starters in NEMA 7 enclosures.

**Functionally equivalent to NEMA Type 5. Standard devices do not include external reset for overload relays. External reset will be furnished as an optional feature.

†Current production is design Series A, except NEMA Size 5, which is design Series B.

▲Give motor horsepower, full load current, and locked rotor current or KVA, to select proper breaker trip unit.

Ordering Instructions: Specify Class and Type Number of starters; give horsepower, voltage, phase, cycles and full load current rating of motor. Select thermal relays from proper table. If special features are desired, order class 8539, type . . . , form . . . , selecting the correct form letter from table. If more than one form letter is used arrange the letters in alphabetical order as "Class 8539, Type EG-2, Form AFT." Describe clearly any modification which cannot be covered by form letters.

Square D A-C Magnetic Starters

Reduced Voltage, Primary Resistor and Part Winding Types

Class 8547
Type CG-3

Class 8547 and 8549 Primary Resistor Type

Primary resistor starters provide smooth acceleration and reduced starting current by inserting resistors in series with the motor windings.

Ordering Instructions: Specify Class and Type Number of starter; give hp., voltage, phase, cycles, full load current and type of motor.

Melting alloy overload relays.

Class 8640
Type DG-1

Class 8640

Part Winding Motor Starters

Class 8640 starters are used with part winding squirrel cage motors to provide reduced starting torque and current.

Melting alloy overload relays.

When ordering specify Class and Type Number of starter; give hp., voltage, phase, and cycles of motor and full load current of each motor winding.

Prices include four thermal overload relay units. Deduct \$1.50 each if relay units are omitted.

*Four pole two step part winding motor starters and three pole step part winding motor starters also available.

Square D A-C Magnetic Starters

**Class 8606—Reduced Voltage—Auto-Transformer Type—Air Break
*Three Phase—Melting Alloy Overload Relays**

25-60 Cycles

Starters are fully automatic in operation.

These starters apply a reduced voltage across the motor terminals during the acceleration period by means of an auto-transformer.

Greater starting torque per ampere of line current is provided than with any other form of reduced voltage starter.

Ordering Instructions

1. Specify Class and Type number; give horsepower, voltage, phase, cycles and full load current rating of motor.
2. Select relay units from Table 3, listed elsewhere in this catalog.
3. Order suitable push button station. Spare parts, electrical interlock, and user modification kits may be ordered.
4. If special features are required order "Class 8606 similar to Type . . ." and state clearly features required.

Square D A-C Reversing Magnetic Contactors

Class 8702—Without Overload Protection

Type DG-1

Type CO-8

Reversing type magnetic contactors are used to start, stop and reverse a-c squirrel cage motors where overload protection is not needed or is provided separately.

25-60 cycles; 600 volts maximum.

Ordering instructions: Specify Class and Type Number of contactor; give horsepower, voltage phase, cycles and full load current rating of motor. Spare parts, electrical interlock and user modification kits also available.

▲Also functionally equivalent to NEMA Type 5.

Type DG-1

Type EO-1 Two Pole, Single Phase

Square D A-C Reversing Magnetic Starters

Class 8736—Melting Alloy Overload Relays

25-60 Cycles

Reversing type line voltage magnetic starters are used to start, stop and reverse a-c squirrel cage motors where full motor starting torque will not damage the driven machinery and where the starting inrush current is not objectionable.

Motor protection is provided by melting alloy type thermal overload relays.

Ordering instructions: Specify Class and Type Number of starter; give horsepower, voltage, phase, cycles and full load current rating of motor. Spare parts, electrical interlock and user modification kits also available.

Square D A-C Multi-Speed Magnetic Starters

Class 8810—8811—8812

Ordering Instructions

Class 8810—Type DG-3

Line voltage type a-c multi-speed starters designed to control separate winding and consequent pole winding squirrel cage motors which operate at 2, 3, or 4 different speeds.

Starters available for constant torque, variable torque and constant hp. motor applications.

Motors protected by melting alloy type thermal overload relay.

Specify Class and Type Number of starter; hp., voltage, phase, cycles, Rpm and full load current of the motor at each speed. Furnish motor connection diagram.

Order suitable push button stations from Class 9001 section. Specify either two or three wire control.

If Form 1 compelling relay is required, add suffix "F1" to Type number. If Form 2 accelerating relays are required, add suffix "F2" to type number. If other special features are desired, order "Class . . . similar to Type . . ." and state clearly the features required.

Prices include thermal overload relays, deduct \$1.50 each if omitted.

EC & M Synchronous Motor Starters

Full and reduced voltage types. The synchronous motor starters provide fully automatic push button operation. Motor is brought up to speed as a squirrel-cage motor and pulled into synchronism by automatic application of direct current to the field.

The polarized field-frequency relay applies full field excitation at the most favorable speed and also provides field removal and re-synchronization automatically.

Class 8820—8821, 25-60 cycles, 600 volts max.

Square D Class 9001 Push Button Stations

Standard Duty

Class 9001
Type B-30

Class 9001 standard duty control stations are designed for use with magnetic motor starters to govern the starting, stopping, or reversing of all types of electric motors. Push buttons, either momentary contact or maintained contact, are assembled in various combinations to form unified control stations. Enclosures are furnished for surface or flush mounting.

Order by Class and Type number. Specify voltage and frequency for pilot lights.

Square D Oil-Tight Push Button Stations

Class 9001

Heavy duty oil-tight push button stations are well suited for machine tool controls or similar industrial applications. They may be purchased in three different ways, to meet a variety of requirements.

1. Individual units—operators, contact blocks and legend plates may be purchased separately and combined as needed. Since any block fits any operator, a wide variety of combinations can be readily assembled from a small stock of standard parts.

2. Complete devices can be ordered, consisting of an operator, a block and a legend plate, packed together in one carton.

3. Assembled control stations are available, with any desired arrangement of units in an oil-tight cast enclosure.

Push Button Units Operator Only

Type No.	Type of Operator	Color of Button	*Each

Class No.	Type No.	Description	Each
9001	TA	Single pole, double throw	\$3.00
9001	TB	Duplex double throw	6.00
9001	†TE	Duplex double throw	7.50
9001	*TF	Dup. D. T. tandem mounting	6.00

*It is not possible to mount more than one Type TF and one additional contact block on one operator.

†Type TE contact block is for use where safety interlocking requires that one pole always close before the other.

Square D Class 9001 Attachments

Type	Description	Each
TL-1	Padlock attachment, latch type (holds button depressed).....	\$3.00
TL-2	Padlock attachment, cover type (prevents depressing button).....	3.00
TL-3	Padlock attachment, window in cover (prevents operation of selector switch or push-button).....	3.00
TM-1	Maintained Contact Attachment (Use with 2 type TR operators, 1 contact block)....	3.00
TU-1	Black, Neoprene Cap for push button.....	2.00
TU-2	Red, Neoprene Cap for push button.....	2.00
TU-3	Blue, Neoprene Cap for push button.....	2.00
TU-4	Brown, Neoprene Cap for push button.....	2.00
TU-5	Green, Neoprene Cap for push button.....	2.00
TU-6	Yellow, Neoprene Cap for push button.....	2.00
144-X5	Washer for use when Legend plates are not used.....	30
.....	Wrench for mounting Type T units.....	3.00
TW-1	Wobble Stick complete with operator.....	5.00
TO-1	Closing plate, for covering unused holes in enclosure cover.....	1.00

TN3	.30	10-24	1.10	1.30
		25-49	1.00	1.20
		50-99	.90	1.10
		100 or More	.70	.90

Ordering Instructions:

- Order as Class 9001, Type....., and give the following additional information.
- For pilot lights, specify color cap, voltage and frequency.
- For push button units, selector switch units and pilot lights with legend plates, specify legend plate marking.
 - If standard legend plate marking is desired, use unit price as shown. (See table No. 1 for list of standard markings).
 - If special legend plate marking is desired, add price of specially marked legend plate to price of unit. (See table No. 2 above for price additions).
 - If a unit with TN3 large size legend plate is required, order control unit by Class and Type number. Specify "with TN3 Legend plate". See table No. 1 for standard markings. Use table No. 2 for additions.

Square D Oil-Tight Push Button Stations Class 9001

Heavy duty oil-tight control stations available for surface or flush mounting. One, two, three, four, six, nine, twelve and sixteen control units can be accommodated in any desired location.

Completely assembled stations can be supplied, or enclosures only and various control units can be purchased for assembly as control stations.

Standard Assembled Control Stations

Type No.	No. of Units	Name Plate Marking	Feature	Each
Surface Mounting Type				
TY-11	1	Start	\$19.00

Closing plate assembly for covering unused hole in cover Type TO-1..... Each \$1.00

▲Base prices include enclosure only, any closing plate assemblies necessary and charge for assembly of units. include box and cover plate.

Note: Sheet Steel NEMA 12 heavy duty oil-tight enclosures for mounting Type T control units available.

Ordering Instructions:

- Order enclosure only, flush plate only or closing plate assembly by Class and Type number. Order separate oil-tight control units, legend plates or attachments.
- Order standard assembled stations by Class and Type number. Select control units desired. Furnish sketch or list control units by Class and Type number, reading from top to bottom of station in successive vertical columns from left to right.
- Price assembled stations at base price from table above plus total of prices for all control units specified. Use price of control unit with legend plate. For markings other than standard add \$1.10 list per legend plate.
- Specify conduit drilling if other than standard.

Square D Class 9007 Limit Switches

Type AF-22

Type AB-2

Type AP-221

Type AC-1

Type AW12-B1

Type A Limit Switch: Designed for modern machine tools, to govern starting, stopping, or reversing of electric motors and for use as a "built-in" contact mechanism on other types of applications. Highly accurate, precision snap action; capable of withstanding severe service without losing its accuracy or reliability of performance.

Type M Limit Switch: Designed primarily for machine tool applications. Provides accurate tripping, quick make and break contact mechanisms and latch type mechanisms. Can be furnished with several kinds of roller arms, all adjustable through 360°. Only 8° travel is necessary for operation and 8° overtravel is provided.

Type A Small Precision Limit Switches

Quick Make and Break

600 Volts Maximum—A-C and D-C

Oil-Tight Enclosure—Spring Return

Note: For further information concerning Operating Lever Arms, contact GRAYBAR.

Square D Class 9050 Pneumatic Timing Relays

Adjustable Range—2 Seconds to 3 Minutes
Single Pole, Double Throw, Separate Circuit

Type CO-1E

Type AG-1E

Timing relays are used in many industrial applications where dependable operation and ease of adjustment over suitable ranges of timing are required.

Timers of the pneumatic type may be obtained for delay in making or breaking a circuit either after energization or de-energization of the relay. All a-c timing relays, except flush mounting types have an invertible magnet which allows conversion from one type of operation to other in the field.

Type A 50-60 Cycle Operation 600 Volts Max.

Type of Operation	Time Delay after De-energization of Relay (Off Delay)	Time Delay after Energization of Relay (On Delay)	General Purpose Enclosure NEMA Type 1		Open Type		Volts	A-C Pilot Duty—Amperes	
			Type	Each	Type	Each		Make	Break
			AG-1D	\$41.00	AO-1D	\$38.00	110	30	3
							220	15	1.5
							440	7.5	.75
			AG-1E	41.00	AO-1E	38.00	550	6	.6

Type B 25-60 Cycle Operation 600 Volts Max.

Hardened Magnet Parts—Form HA \$6.00 list additional. (Available on a-c timers only, furnished as standard on flush mounting type timers.)

Electrical Interlock Kit (containing parts required to add one interlock unit to a timer—a total of 2 interlock units may be mounted on a Class 9050 Timer). Class 9999, Type R-1 \$5.00 list each.

Type RO-2

Square D Electronic Timing Relays

Time Delay After Energization—Adjustable Range 0 to 30 Seconds

115 Volts A-C—50/60 Cycles

Class	Panel Mounting Timer	Open Type		General Purpose Enclosure	
		Type	Each	Type	Each
9050	With adjustable dial on base	EO-1	\$76.00	EG-1	\$78.00
9050	With separate adjuster dial for remote mounting	EO-2	78.00	EG-2	80.00

Ordering instructions: Order by Class and Type number. Specify voltage and if a-c the frequency.

**Square D User Modification Kits
Class 9999**

For motor control and pump control. The Class 9999 push button and selector switch kits are provided to enable one of these units to be added to the cover of a magnetic starter. Easily and quickly installed. These kits may be used on any Series A under Class 8502, 8536, 8538 or 8539 starter in NEMA 1 enclosure only.

**For A-C Series A Contactors and Starters
In NEMA 1 Enclosures***

Class	Type	NEMA Size	Description	Each
9999	A-1	0 or 1	Start-Stop momentary contact push button.....	\$8.00
9999	C-1	0 or 1	Hand-Off-Auto selector switch	8.00

**Square D Class 9999 Electrical Interlocks
For A-C Magnetic Controls**

Interlock kits provide all the necessary parts needed to install an electrical interlock on Size 0 and 1 Series A devices and any Size 2, 3, or 4 vertical action magnetic contactor or starter or on a Class 9050 Types B & R timer with invertible magnet.

**For Addition To A-C Magnetic Contactors
Starters and A-C Pneumatic Timers**

Square D Class 9999 A-C Magnet Coils

These magnet coils are easily installed on any standard a-c magnetic contactor or starter.

Size 00-3 coils in the 110 and 440 volt, 60 cycle ratings are attractively packaged and marked for easy identification and convenience in stocking.

A large selection of coils are available. Contact GRAYBAR for additional information.

**Square D Class 9013 Pressure Switches
Water Pump and Air Compressor Types**

Used for the control of electrically driven water pumps and air compressors. Class 9013 devices cover the important electrical ratings for the direct control of motors in the usual pump and compressor applications. Switches are of two pole construction to open both lines.

Standard enclosure finished in machine gray enamel. The special enclosures of Types ASW and ASR are of sheet steel and cast iron respectively to provide dripproof and explosion resisting features where required. Interior parts treated to prevent corrosion.

For air compressor applications a pressure release valve is desired; feature ordered as "Form X" or "Form Y."

Square D Industrial Pressure Switches

Industrial pressure switches are designed for the control of pneumatic or hydraulic machines—welders, machine tools, lubricating systems, etc. Devices are SPDT and are usually used as piloting controls for magnetic starters. Rating: a-c single phase 15 amperes, 115V; 10 amperes 230V; d-c 1/2 ampere, 115V; 1/4 ampere 230V.

9012	ADR-6	400-3000	210-475	10000	1390 1700	93.90

Footnote symbols apply to bellows actuated (ACW) switches only.

*Limits of pressure between which switch can be adjusted to operate on falling pressure.

†Add to range setting to obtain operating point on rising pressure.

Note: The following applies to piston units ADW only: Range setting is limit of adjustment on rising pressure. Subtract differential to obtain operating point on falling pressure.

Type ADW Surge Reducer (Specify 9049A25) \$8.00 Add'l.

Type ACW Surge Reducer (Specify 9049A26) \$8.00 Add'l.

Square D Vacuum Pump Controls

Class 9016

Designed for the control of electrically driven vacuum pumps. Controls cover the important electrical ratings for direct control of motors.

Contacts close on loss of vacuum. Pipe tap 1/4 inch. Two pole. Range (inches of Hg.) 5-25. Differential (inches of Hg.) 4-12.

Type VGV-1

Heavy Duty Type

†Three Pole.

Class 9037 Condensate Pumps

Class 9037, Type GG-4

Class 9037 Type GG controls are primarily used on condensate pumps.

Float movement is through a bellows seal. Switches are flange mounted.

8-in. rod length is measured from fulcrum of rod to center of round float. Lengths of 6, 10, 12, 14 and 16 inches also available. Two pole. Contacts close on liquid rise. For standard duty application.

General Purpose Enclosures

Class	Type	Float Movement	Each
9037	GG-4	Above and below center line	\$52.30
9037	GG-5	Below center line	52.30
9037	GG-6	For vertically mounted switch	52.30

Class 9036 Sumptrols

Class 9036, Type KG-1

Designed specifically for sump pumps or cellar drainers of the small domestic type.

A wide selection of switches with various enclosure modifications are available.

Controls can easily be adapted to practically all sump pump applications. Contacts close on liquid rise.

General Purpose Enclosures
With Mounting Bracket and Two Cord Entrances

Marathon Medium Duty Terminal Blocks

200 Series Controlead® Medium Duty Terminal Blocks

Class A—Group 1

Improved disposition of material in this block results in barriers that are stronger, better supported on a base that resists breakage. Insulating plugs are molded as an integral part of the block, yet are designed for clean knock-out to readily provide end holes or additional thru-holes.

Unobstructed circuit identification is possible without disturbing the ease of wiring. Blocks also furnished with marking directly on the blocks.

- Series 200: Standard screw terminals both sides.
- Series 200-L: Screw Terminals on one side. Through-type solder terminals other side.
- Series 200-HS: Screw Terminals one side. Solder terminals other side.
- Series 200-S: Solder terminals both sides.
- Series 200-HF: Screw Terminals one side. Push-on wire terminals other side.
- Series 200-F: Push-on Terminals both sides.

Marathon Heavy Duty Terminal Blocks

1000 Series Solderless Connector Controlead® Blocks

For solid or stranded wires. Positive wire insertion guide. Secure wire grip—no wire damage. Most compact design available.

Specifications:

- Sizes: 2, 4, 6, 7, 8 and 12 lines.
- Rating: (At 30° Rise) 750 Volts—80 ampere.
- Dielectric: Line-to-line. 8000 volts (RMS).
Line-to-ground. 9000 volts (RMS).
- Wire size: No. 6 to No. 18 Awg. Solid, No. 8 to No. 16 Awg. stranded.

Series 1000 with Standard Markers, No Covers

No.	No. of Lines	Pieces in Std. Pkg.	Mtg. Length, In.	O.A. Length, In.	Ship. Wt., Lbs. Per 100 Pcs.

1012	12	25	5 ⁵ / ₈	6	60

Note: When ordered with blocks to correspond, covers and screws are furnished in sets and enclosed in same packages as the blocks.

6000 Series Screw Terminal Controlead® Blocks

Wide slot openings for lugs. Terminals accommodate two lugs each. Nickel plated brass hardware.

Specifications:

- Sizes: 2, 3, 4, 6, 8 and 12 lines.
- Rating: (At 30° Rise) 750 Volts—60 ampere.
- Dielectric: Line-to-line. 11000 Volts (RMS).
Line-to-ground, 13000 Volts (RMS).
- Wire Size: (Max.) No. 8 AWG.

Marathon Marker Strips

MEMC

Fibre or Bakelite

Markers or circuit identification strips are for use with Class A—Group 1 Terminal Blocks. Three kind available. 1. MEMC Markers. 2. Fibre Markers. 3. Bakelite Markers. Markers are available either plain or imprinted.

Marathon Sectional Terminal Blocks Heavy Duty—Controlead® Pre-Assembled Units

The new sectional controlead® offers versatility of hardware; arrangement; assembly, wire ranges, and electrical ratings. Double barrier guards assure you of positive protection. White vinylite strip provides flexible marking.

Stainless steel mounting channel may be quickly and easily attached. Provides rigid, accurate alignment of block.

No special tools required for mounting.

Series 10,000: Screw Terminals; Series 11,000: "Sems" Connectors; Series 12,000: Pressure Connectors.

Superior "Luxtrol" Equipment

The light control equipment exactly right for your needs. Provides smooth, stepless dimming, brightening and blending from full-on to blackout. Operation is cool, silent, efficient

and economical. Will control any number of lamps up to their full rated capacity and can be used with incandescent, cold cathode or fluorescent.

**Non-Interlocking LUXTROL Light Controls
Manually Operated Models
Two Wire—Single Phase**

In auditoriums, single rooms and other installations where only a few circuits require dimming, non-interlocking LUXTROL controls find their widest use.

Type	Each	Type	Each
D1000R	\$35.00	D5000-3P	\$517.50
D1000H	50.00	D5000-4E	726.00

D5000-2P	342.00	D5000-2E3P	1236.00
D5000-3E	499.50		

Note: Three wire-single phase and four wire-three phase also available in D2000 and D5000 series.

**Motor-Driven Models
Two Wire—Single Phase**

For effortless operation of the larger models or for convenient remote control, motor-driven LUXTROL controls are available in the same ratings as manually operated assemblies.

Note: Three-wire single phase and four-wire three phase also available in DM2000 and DM5000 series.

Packaged LUXTROL Light Controls

Particularly well suited for small theaters, schools, churches and other applications where expense is a governing factor, PACKAGED LUXTROL controls provide big switchboard effects at modest cost. Numerous models are available in ratings from 6,000 to 15,000 watts.

Units may be purchased singly and others added later as finances permit.

Type	Description	Each
DCT6M-1000	With 6000 watt master-dimmer. . . .	\$690.00
DCIP4-2500	Other models equipped with 3, 5 and 6 independent handles and with separate master handle.	772.00

For Mounting in a Wall

This new concept in light control is used in place of regular wallswitches and is easy to install.

Available in several optional finish wall plates, knob and fuse cap combinations.

Type	Each
WBD360	\$33.00

G-E Circuit Breaker Load Centers (Trumbull)

General Purpose NEMA Type 1 and Raintight NEMA Type 3R Enclosures

**Raintight Circuit Breaker Load Center
No. TRP240R2**

G-E circuit breaker load centers can be used for the distribution of electric energy in homes of all sizes, farms, apartment houses, light commercial applications such as garages, and small office buildings. The smaller load centers can be used in small apartments and for the connection of water heaters, dryers and other 220-volt appliance loads.

The 2- through 12-circuit load centers, as well as the 12- through 20-circuit split-bus load centers, are suitable for use as service entrance equipment when installed with a maximum of six operating handles where main disconnect not required ahead of the load center.

Raintight circuit breaker load centers provide for the distribution of electrical energy in the same types of applications as do the general purpose enclosures. Also permits installation outdoors for areas in which this is desirable.

In these devices, conduit may enter the box through an interchangeable hub in the top or through convenient knockouts in the bottom, sides and back.

Raintight NEMA Type 3R Enclosures with Interchangeable Conduit Hubs

(Prices do not include hub. Order hubs separately.)

G-E Panel-Base Assemblies

Single, 2 and 3 Pole Plug-In Branch Breakers Lugs or Circuit Breakers in Mains Maximum 240 Volts A-C

Type TQLP Panel-base Assembly with Breakers

Standard-duty assemblies designed for control and protection of power, distribution, lighting and appliance circuits. Single, 2 and 3 pole branch breakers available. For a-c only. Plug-in branch circuit breakers and unit packaging provide for flexibility in stock handling.

Box, panel interior and surface front are packaged as one unit. Plug-in circuit breakers are ordered separately.

Assemblies are furnished only as listed. No modifications available.

Interior mounted on reinforced back plate with panel busing arranged to maintain sequence phasing. Bus bars and connection straps supported by thermal-setting plastic insulators. Solderless main lugs. Code-gage galvanized steel box has NEC-size wiring gutters and amplet knockouts. Special knockout arrangements not available.

Fronts constructed of code-gage sheet steel, ASA No. 49 medium-light-grey enamel finish over rust inhibitor, single door with heavy-duty semi-concealed steel hinges and paracentric tumbler combination catch and lock, with directory card and card holder inside door. Surface fronts are standard. Dual-purpose type also available.

*Catalog Number includes surface front. If dual-purpose front is required, change suffix letter S to F. No change in price.

†Boxes are 20 inches wide and 5¼ inches deep, inside dimensions. For outside dimensions, add ¼ inch to dimensions shown.

‡225-ampere breakers Type TJ. 400-ampere breakers Type TKL.

Branch Circuit Breakers

Plug-in single, two, and three-pole circuit breakers used in branches. Interrupting rating of 5000 amperes RMS. Double-pole branch circuit breakers can be provided by using two single-pole Type R or TQL circuit breakers with handle

extensions, permitting simultaneous manual operation but independent tripping of each pole or by 2-pole, common-trip circuit breakers, Type TQL.

Ampere Rating	Single Pole, Type R 120 Volts, A-C		Single Pole, Type TQL 120 Volts, A-C		2 Pole, Type TQL 120/240 Volts, A-C		2 Pole, Type TQL 240 Volts, A-C		3 Pole, Type TQL 240 Volts, A-C

Accessories Available for Branch Circuit Breakers

Handle extensions for two single-pole circuit breakers to provide double-pole manual operation with independent tripping. Cat. No. DAHT102.....List Price per set \$0.40.

Handle locking device for locking circuit breaker in ON or

OFF position, non-padlocking, for plug-in circuit breakers. Cat. No. DAHL103.....List Price each \$0.70.

Knockout closure for single-pole plug-in circuit breaker, Cat. No. DNC-100.....List Price each \$0.20.

G-E Lighting Panelboards

Type NAB

(Trumbull)

8 to 42 Branch Circuits
Lugs or Breakers in Mains

3 Wire, 125/250 Volts, A.C. or D.C.
4 Wire, 120/208Y Volts, A.C.

(Listed as panelboards by Underwriters' Laboratories under File E-2366; comply with U. S. Federal Spec. W-P-131a, Classes A & C.)

Heavy-duty panelboards designed for control and protection of 2-wire, 120-volt lighting and appliance branch circuits. Recommended where highest quality, most dependable equipment is required. Suitable for both alternating and direct current.

4-Wire, 3-Phase 277/480Y-Volt Service.

Type NHB panels for this service and type NHBX column type also available for this service. Consult Graybar.

Description

Panel Interiors: Type TE interchangeable, single-pole breakers in branch circuits, and in mains (if required). Breakers are quick-make, quick-break, trip-free, trip-indicating with thermal-magnetic tripping mechanism.

Mains: Solderless lugs only or circuit breakers: 50 and 100 amp, Type TE (E frame), with interrupting rating of 7500 amp RMS, ac; 5000 amp dc; or 225 amp, Type TJ (J frame), with interrupting rating of 25,000 amp RMS at 240v, ac, 10,000 amp dc.

Branches: 15 to 50 amp, single-pole, Type TE breakers (E frame) with interrupting rating of 7500 amp RMS, ac; 5000 amp dc.

Boxes: Code-gage steel with 4-in. wiring gutters and plenty of knockouts.

Fronts: Code-gage steel finished in ASA No. 49 medium light-grey enamel over a rust inhibitor; single door with semi-concealed heavy-duty hinges and cylinder tumbler combination catch and lock. For flush or surface mounting. Circuit directory, card and cardholder on inside of door.

*Prices include 15-amp branch breakers. Also available in 20, 30, 40 and 50 amp ratings at no increase in price.

†All boxes are 20 in. wide by 4 1/2 in. deep except as noted. For outside box dimensions, add 1/2 in. to dimensions shown. Boxes provided with knockouts.

‡Box is 5 3/4 in. deep.

1. Space for future circuits—Select panelboard as if all circuits were required. A price deduction of \$9.70 is allowed for each single-pole breaker omitted and space provided.

2. Two- and/or three-pole circuits using Class C, Type TE circuit breakers, 15 to 50 amperes—Convert 2- and/or 3-pole circuit breakers to equivalent number of single-pole circuit breakers. Select panel having total number of single-pole branches required and add \$5.50 for each 2-pole breaker substituted for two single-pole breakers and \$7.00 for each 3-pole breaker substituted for three single-pole breakers. 70 to 100 amps—Not more than two breakers per panel are allowed and they must always be furnished as subfeed circuit breakers. Add \$52.50 for each 2-pole breaker and \$69.00 for each 3-pole breaker.

G-E Lighting Panelboards

Type NLAB

(Trumbull)

8 to 42 Circuits
Lugs or Breakers in Mains

3-Wire, 120/240 Volts, A-C
4-Wire, 120/208Y Volts, A-C

(Listed as panelboards by Underwriters' Laboratories under File E-2366; comply with U. S. Federal Specification W-P-131a, Class A)

Type NLAB standard-duty panelboards are designed for control and protection of 2-wire, 120-volt lighting and appliance branch circuits. For a-c only.

Description

Panel interiors: Type TQ interchangeable, single-pole breakers in branch circuits, and Type TE or TJ breakers in mains (if required). Breakers are quick-make, quick-break, trip-free, trip-indicating with thermal-magnetic tripping mechanism.

Mains: Solderless lugs only or circuit breakers: 50 and 100 amp, Type TE (E frame) with interrupting rating of 7500 amp RMS; or 225 amp, Type TJ (J frame) with interrupting rating of 25,000 amp RMS.

Branches: 10- to 50-amp, single-pole, Type TQ breaker, with interrupting rating of 5000 amp RMS. Double-pole breakers also available. See below.

Boxes: Code-gage steel with 4-in. wiring gutters and plenty of knockouts.

Fronts: Code-gage steel finished in ASA No. 49 medium light-gray enamel over a rust inhibitor; single door with semi-concealed heavy-duty hinges and cylinder tumbler combination catch and lock. For flush or surface mounting. Circuit directory card and cardholder on inside of door.

*Price includes 15-amp branch breakers. 20, 30, 40 and 50 amp ratings also available at no increase in price.

†All boxes are 20 in. wide by 4 1/2 in. deep, except as noted. For outside dimensions, add 1/4 in. to dimensions shown. Boxes provided with knockouts.

‡Box is 5 3/4 in. deep.

1. Space for future circuits—select panel-board as if all circuits were required. A price deduction of \$3.60 is allowed for single-pole breaker omitted and space provided.

2. Double-pole breakers can be provided as follows:

Class A, Type TQ circuit breakers, 15 to 50 amps—Convert the 2-pole breakers to equivalent number of single-pole breakers. Select panel having total no. of single-pole breakers required and add as follows:

Independent trip type—Add handle extension to two adjacent breakers at \$0.50 for each 2-pole breaker.

Common trip type—For each 2-pole (common trip) breaker substituted for two single-pole breakers add \$6.30.

3. Two, and/or three-pole circuits using Class C, Type TE circuit breakers:

15 to 50 amps—Select the Type NLAB panelboard having required no. of Class A (Type TQ) breakers. Add \$32.50 for each 2-pole, Class C (Type TE) breaker and \$47.50 for each 3-pole, Class C (Type TE) breaker required.

70 to 100 amps—Not more than two breakers per panel are allowed and they must be furnished as sub-feed breakers. Add \$52.50 for each 2-pole breaker and \$69.00 for each 3-pole breaker.

G-E Lighting Panelboards Type NLP Panel Base Assemblies (Trumbull)

6 to 42 Circuits

Lugs or Circuit Breakers in Mains

(Listed by Underwriters' Laboratories as panel base assemblies under File E-24521; comply with U. S. Federal Spec. W-P-131a, Class A)

3 Wire, 120/240 Volts A.C., Solid Neutral

4 Wire, 120/208Y Volts A.C., Solid Neutral

Type NLP panels are standard-duty panel assemblies designed for control and protection of 2-wire, 120-volt lighting and appliance circuits. For A.C. only. Plug-in branch circuit breakers and unit packaging provide for flexibility in stock handling.

Box and panel interior are packaged as one unit; dual-purpose or surface front as a second unit; and plug-in circuit breakers as third unit.

Assemblies are furnished only as listed. No modifications are available.

Type NLP with breakers

provided by using two single-pole Type R or TQL circuit breakers used in branches. Interrupting rating of 5000 amps RMS. Double-pole branch circuit breakers can be provided by using two single-pole Type R or TQL circuit breakers with handle extensions, permitting simultaneous manual operation but independent tripping of each pole or by 2-pole, common-trip circuit breakers, Type TQL.

Description

Panel Interior and Box: Unit-type interior mounted on reinforced back plate with panel bushing arranged to maintain sequence phasing. Bus bars and connection straps supported by thermal-setting plastic insulators, each accommodating six branch circuits. Solderless main lugs. Code-gage galvanized steel box with 4 in. wiring gutters and ample knockouts. Special knockout arrangements not available.

Fronts: Code-gage sheet steel, ASA No. 49 medium-light-grey enamel finish over rust inhibitor, single door with heavy-duty semi-concealed steel hinges and cylinder tumbler combination catch and lock, and directory card and card holder inside door. Choice of dual-purpose or surface front.

Circuit Breakers: Plug-in single-, two- and three-pole circuit breakers used in branches.

G-E Distribution Panelboards

Type CCB Convertible Circuit Breaker

15-800 Amp Molded Case Breakers

(Trumbull)

Maximum 600 Volts A.C., 250 Volts D.C.

(Listed by Underwriters' Laboratories as panelboards under File E-2366. Comply with U. S. Federal Specification W-P-131A, Classes A, C, D, and E)

Type CCB panelboard with four E frame breakers at top, four J frame breakers in middle & two K frame breakers at bottom as branch circuits.

Type CCB is a heavy-duty panel-board designed for distribution of power from main feeders to power loads, to other distribution panelboards, and to lighting panelboards. For service where rating of mains does not exceed 1200 amps. when lugs are used or 800 amps. when circuit breaker mains are used. Suitable for 600-v a.c. or 250-v d.c. service, 2- or 3-wire, single-phase, or d.c., 3- or 4-wire, 3-phase applications.

Unitized construction of Type CCB permits easy expansion to meet future requirements. New circuits can be added without removing panel from box.

Description

Molded case heavy-duty circuit breakers used in branch circuits, and in mains (if required). Breakers are quick-make, quick-break, trip-free, trip-indicating with thermal-magnetic tripping mechanism.

Interrupting Ratings: The lowest-rated breaker in the panel-board determines the rating of the panel-board. The following interrupting ratings for G-E molded case circuit breakers are based on NEMA test procedures:

Frame Type	240-V A.C. RMS Amperes	480-V A.C. RMS Amperes	600-V A.C. RMS Amperes	250-C D.C. Amperes	125/250-V D.C. Amperes
TE*	7,500	5,000
TF	20,000	15,000	15,000	10,000	10,000
TJ	25,000	20,000	15,000	10,000	10,000
TKM	50,000	35,000	25,000	20,000	20,000

*Ratings shown are for 1- 2- and 3-pole breakers. The 277-volt, single-pole breaker is rated 10,000 amps a.c. or d.c.

Mains: Max. 1200 amp. lugs or 800 amp. molded case circuit breakers.

Branches: Molded case breakers in six types—E Frame - 15 to 100 amp; 1, 2, and 3 pole F Frame - 15 to 100 amp; 2 and 3 pole J and K Frame - 70 to 225 amp; 2 and 3 pole KM Frame - 125 to 800 amp; breakers have sealed interchangeable trip units.

Boxes: Code-gage galvanized sheet steel with ample code-size wiring gutters. Furnished as standard without knockouts.

Fronts: Code-gage sheet steel, finished in ASA No. 49 medium-light-grey enamel finish over rust inhibitor, single door with heavy-duty flush hinges and cylinder tumbler combination catch and lock, directory inside door. Surface-type front furnished as standard.

Modifications

Sub-Feed, Double, or Feed-Thru Lugs

No. of Bus Bars	200 Amps	400 Amps	600 Amps	800 Amps	1200 Amps
2	\$18	\$37	\$65	\$ 92	\$110
3	24	43	72	102	120

Split Bus or Meter Loop (Including Lugs)*

2	\$46	\$55	\$65	\$ 92	\$110
3	55	65	72	102	119

*Price of split bus or meter loop is based on size and no. of poles of separately controlled or metered section, and not on mains of panelboard. For increased dimensions, refer to Company.

Dimensions

1. Determine the total "X" units of ht. Be sure to include "X" units for top and bottom sections if required. Each "X" unit equals 1 7/8 in.

2. Note that circuits 225 amps. or less (except K frame) are arranged double branch.

3. Select box size from table below. Note box width and depth shown in table. Specify cat. no. of box.

4. Select appropriate front from same table. Specify cat. no. Panelboards are furnished with front for surface mounting as standard. Where flush-mounting front is required, please specify. Change suffix letter in cat. no. from S to F. No change in price.

Boxes and Fronts

*For outside box dimensions, add 1/4 in. to dimensions shown. Box ht. includes both top and bottom gutters.

†Cat. no. fronts are for surface mounting. Flush fronts available at same price. Change suffix letter S to F.

‡List prices apply only when box or front is ordered separately.

Sheet metal gage of boxes and fronts (U/L standards) are as follows: DASW3109-18, DACB3509-15 and DACB4009-12 boxes and respective fronts . . . 12 gage; all other boxes and fronts . . . 10 gage.

G-E Distribution Panelboards

Type CCB Convertible Circuit Breaker

15-800 Amp Molded Case Breakers

(Trumbull)

Maximum 600 Volts A.C., 250 Volts D.C.

Pricing Information

Type CCB panelboards are not listed by cat. no. because of the wide range of combinations available. The desired panelboard is priced from the table below. The total list price of the panelboard, including box and front, is the sum of the prices for the following items:

1. Neutral bar (if required). Select rating the same as the mains.

2. Branch circuits (note that list prices are "per circuit" but circuits 225 amps. or less, except TK-frame, are arranged in double branch construction.

3. Base list price, main lugs or main circuit breaker.

4. Additions for modifications.

Each.....	End Section With or Without Neutral	No Neutral*	Rating of Neutral Bar in Amperes

Note: X—1 3/8 inches.

*Height of end sections includes necessary space to provide larger wiring gutter. All wiring gutters conform to Underwriters' Laboratories standards.

†F-frame branch breakers can be located opposite each other, either 2- or 3-pole (double-branch construction), except that no breaker can be placed opposite an F-frame breaker which is serving as a main breaker.

‡Branch breaker, single-pole, with frame rated 125 volts a.c./d.c. maximum.

§Single-pole, E-frame breaker rated 277 volts a.c. with 15- or 20-amp trips only available.

¶Only J-frame breakers or blank fillers can be mounted opposite J-frame breakers in double-branch construction.

Ordering Directions

The following information should be included when ordering:

1. Service characteristics: wires, phase, voltage, a.c. or d.c.
2. Mains: Ampere rating, type (lugs or breakers), incoming wire size and location (top or bottom).

3. Branches: quantity, ampere rating, number of poles and frame type.
4. Neutral connections, if any.
5. Modifications.
6. Mounting: flush or surface.
7. Any special arrangement instructions.

G-E Distribution Panelboards

Type NCB Convertible Circuit Breaker (Trumbull)

15-100 Amp E-Frame Branch Breakers

(Listed by Underwriters' Laboratories as panelboards under File E-2366. Comply with U. S. Federal Specifications W-P-131a, Classes A and C)

Maximum 240 Volts A.C., 125/250 Volts D.C.

Type NCB with two 3-pole breakers on left side and one single-pole, one 2-pole, and one 3-pole breaker on right side as branch circuits.

A heavy-duty panelboard designed for distribution of power from main feeders to power loads, to other distribution panelboards, and to lighting panelboards. Designed for service where rating of mains does not exceed 600 amps. when lugs are used or 400 amps. when circuit breaker mains are required. Suitable for maximum 240 volt a.c., or 125/250 volt d.c. service, single-phase or d.c., 2- or 3-wire, or three-phase, 3- or 4-wire applications.

Description

Panel Interior: Heavy-duty circuit breakers used in branch circuits and in mains (if required). Breakers are quick-make, quick-break, trip-free, trip-indicating, with thermal-magnetic tripping mechanism.

Mains: Maximum 600 amp. lugs or 400 amp. circuit breakers.

Branches: 15- to 100-ampere, 1-, 2-, and 3-pole Type TE breakers (E frame) with interrupting rating of 7500 amps. RMS, a.c. or 5000 amps. d.c.

Boxes: Code-gage galvanized sheet steel with code-size wiring gutters (minimum 4-inch) and ample knockouts.

Fronts: Code-gage sheet steel, finished in ASA No. 49 medium-light-grey enamel over a rust inhibitor, single door with heavy-duty flush hinges and cylinder tumbler combination catch and lock, directory inside door. Dual-purpose front furnished as standard.

Pricing Information

The total list price of the panelboard, including box and front is the sum of the prices for the following items:

1. Neutral bar (if required). Select rating the same as the mains.
2. Branch circuits (note that list prices are "per circuit" but circuits are arranged in double branch construction).
3. Base list price, main lugs or main circuit breaker.
4. Additions for modifications.

End Section With/Without Neutral	Each	Ht. in.*
No Neutral.....	None	3

*Height of end sections includes necessary space to provide larger wiring gutters. All wiring gutters conform to Underwriters' Laboratories standards.

†Price includes necessary straps and mounting provisions for future breakers.

‡Allow space for E-frame main breaker of required no. of poles in branch circuit section of panel in same manner as for a branch circuit.

Bulldog Duo-Guard® Pushmatic® Circuit Breakers

Pushbutton Convenience Bolt-Tight Connection Pushmatic Protection

Listed by Underwriter's Laboratories, Inc. Capacities: 15, 20, 30, 40, 50 amperes at 120 V. AC Single Pole; 15, 20, 30, 40, 50 amperes at 120/240 V. AC Two Pole Common Trip. Short Circuit Interrupting capacity: 5000 amperes.

Pushmatics are small, compact, single and two pole (common trip) devices for controlling and protecting electric circuits. Their operation is simple. A slight push of the single operating button switches the circuit either "ON" or "OFF". Another push, ONE MOTION, restores service after automatic tripping without any intermediate reset procedure. With Pushmatic there is only one operating rule: Push the Button.

Ambient compensated Pushmatics (single pole only) employ an additional thermal element that automatically compensates for the effects of the surrounding air temperatures on the main thermal element. Constant tripping characteristics are maintained over a broad range of ambient temperatures (30° F. to 150° F.).

Single Pole Pushmatic shown at right.

Two Pole—Common Trip—Pushmatic, left.

To add or change Pushmatic units they are merely hooked on mounting rib.

Easy to Install or Change

A screwdriver is all that is needed to remove or attach a Pushmatic to any point along the mounting rib. Disconnect service, raise locking bar on mounting rib, remove wiring from the Pushmatic and remove Pushmatic. To install or replace, the procedure is merely reversed. Both operations are easily and quickly made.

The extreme compactness of the Pushmatic means that more space is available in the cabinet for uncluttered wiring. If more space is required, the adjustable interior may be raised on its mounting posts until it is completely out of the cabinet, providing unlimited wiring space.

Wiring, itself, is easy. The "line" side of the Pushmatic is quickly attached to the tapped silvered bus bars by a screw with a smooth pointed leader. Threads quickly align themselves without unnecessary fumbling. The "load" side terminal consists of a washer-head screw with a deep, rugged slot. The branch circuit wire is inserted straight into the terminal that can be tightened down without fear of destroying the slot.

Type P2B

Complete Factory Assembled

Single Phase, 3-Wire, Solid Neutral, 120/240 Volts A-C

Type P2B Panel

Designed to provide group phasing of 1-pole branch circuits. Where 2-pole branches are required a tie-handle is available for joining two horizontally adjacent 1-pole Pushmatics.

Ideally suited for installation where available space requires a compact control center having a minimum height. (See table for heights).

Mains: Lugs only (Solderless Wire Grips).

Branches: 1-pole, 15-amp. 120 volt Pushmatics, with Solid Neutral.

(20, 30, 40 or 50 amp. units may be specified; Price is same except when use of higher rated units necessitate increased mains.)

Boxes: Code gauge galvanized steel 20-in. wide, 5 1/2-in. deep. Wiring gutters 4 in. (I. D.). Height indicated by numerals in box numbers.

Fronts: Code gauge steel, attractive gray finish.

Service Entrance Panels

XD (Splitbus) Panels

100 Ampere—12 and 18 Branch Circuits

3-Wire, Single-Phase, Solid Neutral 120/240-Volt A-C

For residential and commercial use

Provide a separate lighting section controlled by a 2-pole, 50-amp. Commontrip Pushmatic. Ahead of, and independent of, the lighting section there is space for adding 2-pole 120/240 v. a-c Pushmatics for electric range, dryer, or similar sub-feed circuits.

Split bus feeds two separate sections of Pushmatic circuits as follows:

- (a) 1-pole, 120 v. a-c branch lighting circuits.
- (b) 2-pole, 120/240 v. a-c circuits for range, dryer or other appliances.

Panelboard consists of box, interior and front. Interior includes one 50A.

2-pole Commontrip Pushmatic lighting Main circuit Breaker.

Mains: 100 amp. wire grips.

12 Circuit Type: Has space and provisions for installing these additional circuits; two 2 Pole Pushmatics above Lighting Main, eight 1 Pole Pushmatics below Lighting Main.

Box 20¼-in. high, 10¾-in. wide, 3¾-in. deep.

18 Circuit Type: Has space and provisions for installing these additional circuits; four 2 Pole Pushmatics above Lighting Main; ten 1 Pole Pushmatics below Lighting Main.

Box 24¼-in. high, 10¾-in. wide, 3¾-in. deep.

Panels and Cabinets

Type P3B

Complete Factory Assembled

Line-A-Phase Panels for Sequence Wiring

Type P3B Panel

3-Phase, 4-Wire, Solid Neutral, 120/208 Volts A-C.

These Electri-Centers, when properly installed and operated provide perfect sequence phasing for constant balanced loading of phases.

Three vertical rows (one for each phase) are assembled side by side in the enclosure. Each row of Pushmatic units is connected to one main bus bar or phase. This provides evident and natural phase association for each Pushmatic unit and its branch circuit.

Mains: Lugs Only (Solderless Wire Grips).

Branches: 1-Pole, 15-Amp, 120 Volt Pushmatics with solid neutral.

(20, 30, 40 or 50 amp. Pushmatics may be specified; price is same except when use of higher rated units necessitate increased mains.)

Boxes: Code gauge galvanized steel 20-in. wide, 5½-in. deep, with four wiring gutters 4-in. (1. D.), Height indicated by numerals in box numbers.

Fronts: Code gauge steel, attractive gray finish.

Note—Circuit identification adhesive strips supplement the regular directory frame on Electri-Center door. Each strip is divided into spaces the same height as face of Pushmatic unit, for writing positive and easy identification of each Pushmatic-controlled circuit.

**Bulldog Duo-Guard Pushmatic
Electri-Centers®**

**Pushbutton Convenience with Pushmatic Protection
and Bolt-Tight Connection**

Listed by Underwriters' Laboratories, Inc.

Accessories for Narrow Column Panels

Narrow column Electri-Centers are usually combined with a wireway extension designed to extend up the columns and pull boxes to be mounted at top of extension. Such combinations permit free wiring space in the Electri-Center, obviate the use of conduits running down to the Electri-Center and lend a streamlined appearance to the finished installation.

Extensions

Standard Extensions: 56-in. long. One end provided with a sleeve that fits snugly over a collar provided at the top of the Electri-Center. The opposite end of the extension is closed. A large rectangular hole near top of extension matches with a similar hole in the back of pull box when pull box is to be mounted on face of extension to complete the wireway. Where a pull box is to be mounted at the top of wireway extension, the end plate for extension is omitted and pull box without cut-out in backplate is mounted in its place. When ordering it is necessary to state type of pull box required.

Auxiliary Extensions: Short pieces of wireway designed to fit between Electri-Center (A) and Standard extensions where additional wireway height is required. Available in 24- and 48-in. lengths (D). Each auxiliary extension is provided with a sleeve on one end and a collar on the other. These lengths will permit wireway extensions to 14- or 16-ft. ceiling or truss heights. For intermediate heights between 12- and 14- ft. and 14- and 16-ft., the sleeve end only of the auxiliary extensions may be cut down by user to the length required.

Wireway Extensions

No.	Size, In.	Type	Wt., Lbs.	Each
NEX24	24	Extension	15	\$19.00
NEX48	48	Extension	30	37.00
NEX2548	48	Adjustable Extension	31	37.00
NEX56	56	Extension	34	38.00

Pull Boxes

Two types of pull boxes are available — one for front mounting and one for top mounting. The front-mounted pull box can only be installed on the surface or front of the 56-in. standard extensions. The top-mounted is for mounting on the top of the panel proper or

either of the 24- or 48-in. auxiliary extensions. Where a pull box is used, the neutral connections can be mounted therein.

Pull Boxes

No.	Description	Wt., Lbs.	Each
NTB2448	Top Mounted	26	\$28.00
NFB56	Front Mounted	25	28.00

Chance Holdfast Lamp Changers

Rubber covered flexible spring fingers grip lamp bulb firmly for removal or replacement in high places such as ceilings, side walls, electric signs, etc. Pull-cord at base of fingers will bend wristlike coil spring at any angle from vertical to 90 degrees. Changer will work as easily at right angle to the rotating pole as it will in the vertical position. Also available with rigid neck.

Changers are equipped with a coupling adapter for attachment to specifically designed pole, when purchased in combination with one or more of these poles. When ordered individually, changers are equipped with regular neck for receiving round poles of the specified diameters. Coupling adapters can be purchased separately.

Flexible Neck Changers

- | No. | Description |
|-----|---|
| L2 | For 50-Watt Rough Service, 15 to 100-Watt Mazda, and other lamps up to 3 inches in diameter. Shipping weight 1 pound. |
| L3 | For 150 to 500-Watt Mazda Lamps and other large and odd shapes up to 5 inches in diameter. Shipping weight, 1 pound. |

Rigid Neck Changers

McGill Lamp Guards

Approved by Underwriters' Laboratories, Inc.

LoXon Locking Lamp Guards

No. 1100

Prevent theft and breakage of lamps—lock them on with McGill LoXon Guards. Easily attached and locked with key. Made of steel wire, heavily zinc plated, available in sizes to fit all sockets and for regular and mill type lamps. Key fits two triangular head screws protected by collars just large enough to admit key only. Guard bottoms are closed, making use of key necessary for removal.

Used in garages, factories, yards, shops, basements, closets, securing double protection against breakage and unauthorized removal.

No.	Lamp Size Watts	Fits Socket	Wt., Lbs. Per Doz.	Each
1075	75	Brass	2½	\$0.80

McGill Lamp Guards

Approved by Underwriters' Laboratories, Inc.

Protector "O" Lamp Guards

No. 1429

Protector "O" Lamp Guards give full protection to lamp bulbs—removable trap at bottom prevents pilfering. Trap can be attached and removed quickly and easily for lamp replacement and cleaning. Simply press inward on the guard rim where the trap hooks on it and snap the trap on or off.

Guards are built of heavily zinc plated steel wire, and are furnished with plain steel screws for attaching to sockets.

Rubber Hook Handle—Plastic Closed End Cage

No. 999R

For use wherever thorough protection is desired against shorts—no exposed metal. The macerated plastic cage is strong and tough—withstands impacts and hard usage, and has high resistance to heat, cold, moisture, oils, fumes, most chemicals and weak alkalis.

For 50 Watt Rough Service Lamps

McGill Portable Lamp Guards

Approved by Underwriters' Laboratories, Inc.

Vaporproof—Dust-Tight Plastic Handle—Annealed Globe Brass Wire Cage

No. 3005

A heavy duty vaporproof portable with 1/16-inch hard brass bands to hold the glass globe rigid. Glass globe seals against a shoulder on a pliable rubber gasket.

Fire resisting, breakproof plastic handle uses a grounded 660-watt, 250-volt socket. Pliable rubber gasket squeezes around wire and in handle recess to seal out air, moisture and vapor.

Safe for use where vapor and dust-infused air is encountered.

No.	Description	Wt. Oz. Each	Each
3002	Lamp size max. 60-w, Keyless, Grounded Socket.	50	\$14.50
3002R	No. 3002 with Reflector.	54	17.00

Vaporproof—Dust-Tight Plastic Handle—Annealed Globe—Steel Wire or Fibre Cage

No. 3007

Watertight dust-tight and moisture-proof. The plastic handle, and fibre cage on the No. 3007 are shock-proof and non-sparking. A rubber gasket placed between the cage and handle absorbs all stress and strain, preventing breakage. The heavy glass protective globe eliminates possibility of breakage of the lamp bulb inside from splashing liquids. Safe for use where vapor and dust infused air is prevalent. They have no equal for safety, service and convenience in flour mills, paint booths, finishing rooms, airports, warehouses, food processing plants, shipyards, aboard ships, and many other places.

Daniel Woodhead Bunghole Lamps

Vaprotex—Vaportight

No. 1300

No. 1301

Vaprotex bunghole lamp is a vaporproof lighting unit for inspecting gasoline, oil, chemical and other drums. Made of non-sparking metal throughout. Furnished with 15 or 25-watt, 120-volt lamp. Can be had with spear if desired.

No.	Watts	Length	Size, Inches O.D.	Std. Pkg.	Wt. Lbs. Std. Pkg.	Each
1300	15	30	1 1/2	1	4	\$37.75
1301	15	12	1 1/2	1	3	27.00
1303	25	32	1 1/2	1	5	38.00
1304	25	14	1 1/2	1	3	28.25

Protex—Non-Vaportight

No. 1302

Protex bunghole lamp is a non-vaporproof lighting unit for inspecting barrels used for non-explosive solutions. Furnished with a 15- or 25-watt, 120-volt lamp. Exceptionally suitable for use in brewery wash-houses as foreign matter can be removed from barrels by spear.

No.	Watts	Length	Size, Inches O.D.	Std. Pkg.	Wt. Lbs. Std. Pkg.	Each
1302	15	30	1	1	3	\$25.65
1305	25	32	1	1	4	26.60

The above prices do not include cord and plug, but these items can be furnished assembled to the lamps, either 2 or 3 conductor cord, at additional costs. Prices furnished upon application to Graybar.

**Daniel Woodhead Protex Portable Lamps
With "Safety Yellow" Neotex Handle**

Protex "Safety Yellow" portables wired complete with "Safety Yellow" cord and cord grip cap, add the following prices to any Protex portable:

Type Cord	Lgth., Cord Ft.	Each	Type Cord	Lgth., Cord Ft.	Each
18-2-S	25	\$ 8.15	16-2-S	25	\$ 8.99
18-2-S	50	14.30	16-2-S	50	15.95
18-2-S	100	26.60	16-2-S	100	29.90
18-3-S	25	10.14	16-3-S	25	11.49
18-3-S	50	18.00	16-3-S	50	20.70
18-3-S	100	33.75	16-3-S	100	39.15

How to Order: Add to Protex catalog number length of cord and size. Example: No. 102 with 50 ft. of 16-3-S cord would be 102-50-16-3-S.

With Open End Wire Guard

No. 110

Constructed with open end guard so unit can be relamped without removing guard.

Packed 6 in a carton. 30 in a standard package.

All Protex portables are available with the new "U" blade side outlet for NEMA type grounding caps. Add to Protex catalog number the letter "U" and add \$1.85 to the list price.

Daniel Woodhead Protex Portable Lamps With New "Safety Yellow" Neotex Handle

No. 100

With Wire Guard

Protex lamps are designed to meet exacting safety requirements. All handles are oilproof and are made of new "Safety Yellow" Neotex synthetic rubber. Socket is molded Neotex and is water tight. Guards are extra heavy steel wire, spot welded and heavily plated to prevent rusting. Packed 6 in a carton. 30 in a standard package.

Closed End Guards

No Reflector				With Reflector			
No.	Watts	Wt. Lbs. Std. Pkg.	Each	No.	Watts	Wt. Lbs. Std. Pkg.	Each

103	300	63	6.60	107	300	68	7.25

With Side Outlet

No. 100K

Often the availability of an additional outlet near light source proves of great convenience—especially if user is working in close quarters where use of small tool or heating device is necessary.

Any Protex unit can be obtained with side convenience outlet in any of the following three types:

Parallel: Add letter "K" after catalog number and add to list price each \$1.50.

Polarity: (2-wire "T" type)—add letter "T" after catalog number and add to list price each \$1.70.

Polarity: (3-wire type)—add letter "Y" after catalog number and add to list price each \$1.95.

With Neotex Covered Guard

No. 100-I

All steel wire guards are available with oilproof synthetic Neotex insulation in sizes up to 100 watts with or without reflector; add letter "I" to catalog number and add to list price each, \$3.10 for Neotex covered guard only; for Neotex covered guard and reflector add \$5.10. If ground clip is desired, specify so, and add \$.65 each to list price.

With Key Socket

No. 100S

All Protex portable lamps are available with push through key sockets. Key is removable fibre type for extra safety. Add to catalog number, letter "S" and add to list price each \$1.00.

Daniel Woodhead Portable Lighting Units
Safeway LoVolt Portable
Made with New "Safety Yellow" Neotex

No. 1621

The ultimate in portable lighting units where electrical hazards exist due to dampness. A step down transformer is inserted in the line resulting in a low secondary voltage that assures the user of complete safety regardless of moisture conditions. Complete unit is made from "Safety Yellow" Neotex synthetic rubber including cord, transformer cover, handle and plug cap. Oil, grease, most chemicals will not affect the unit. Available in longer secondary lengths than listed and also available with vaporproof or non-vaporproof handle.

Transformer capacity, 75 watts. Voltage: Primary, 110; secondary, 6, 60 cycle; 1 in a standard package.

Wired Complete with Protex Unit

No.	Length, Feet		Reflector	Wt., Lbs. Each	Each
	Primary	Secondary			
1600	10	20	No	12	\$81.10
1601	10	20	Yes	12	81.85

Wired Complete with Vaprotex Unit with Steel Guard

No.	Length, Feet		Sealing Gland	Wt., Lbs. Each	Each
	Primary	Secondary			
1620	10	20	No	14	\$92.90
1621	10	20	Yes	14	94.70

Wired Complete with Vaprotex Unit with Aluminum Guard

No.	Primary	Secondary	No	Yes	Wt., Lbs. Each	Each
1631	10	20	Yes	14	102.40	

Additional cable lengths are obtainable within the output capacity of the transformer.

While only the 110 to 6-volt stepdown is listed, other combinations are available: 110 to 12 volts, 110 to 32 volts, 220 to 6 volts, 220 to 12 volts and 220 to 32 volts.

All Lo-Volt transformer units come equipped with 50-watt lamps.

Daniel Woodhead Safeway 4-Way LoVolt

No. 1640

Low voltage protection for more than one operator. Four light units can be used simultaneously. Individually fused circuits, watertight construction. Listed complete with 50 ft. primary cord only.

Secondary cord sets available on request. Size depends on secondary voltage.

No.	Description	Std. Pkg.	Wt., Lbs. Std. Pkg.	Each

Hubbell 3-Wire Grounding Type Convenience Outlets With 2 Grounding Terminals
15 Amperes, 125 Volts, Polarized—Side Wired Only

No. 5252

For grounding exposed metal parts of portable electrical equipment.

Competitive, dependable, duplex flush-mounted receptacle for all practical applications.

Can be used with metallic or non-metallic wiring systems.

Two green hexagonal grounding screws, one per side, permits wiring flexibility.

Has break-off feature for two-circuit installations. Accommodates two armored or rubber caps. Has slots for 2-wire regular and 3-wire polarized caps. U-shaped slots for ground blade.

Washer-type plaster ears and wire looping slot. Rugged 2-piece bakelite construction.

Hubbell 250 Volt Grounding Devices
3-Wire—Back or Side Wiring
15 Amperes, 250 Volts—Polarized

No. 5662

No. 5684

No. 5661

This series features tandem slots in receptacles and tandem blades in caps.

Can be used with metallic or non-metallic wiring systems. Grounding of metallic wiring system is directly through metal enclosure. Grounding of non-metallic systems is through a third wire acting as a grounding connector.

U-shaped slots take grounding blade, also assures positive identification of grounding circuit.

These outlets are designed with holes for back wiring as well as binding screws for conventional side wiring.

Has wire strip gauge, break-off feature for two-circuit installations, and washer type plaster ears.

Single Grounding Outlets
15 Amperes, 250 Volts—Side Wired

No. 5658

Shallow, compact device, round "shoulderless" design permits mounting in restricted spaces.

Slots for 2-wire parallel and 3-wire polarized grounding caps. Used with metallic or non-metallic wiring systems.

Designed with two current-carrying contacts and one grounding contact.

Has green hexagonal grounding screw. Rugged bakelite construction.

5658	Single Receptacle on 1 3/4-in. Short Strap, Side Wired Only	10	50	7	\$87.00
5656	3-Wire Brown Bakelite Female Grounding Motor Base, Flush-Mounted, Tandem Contacts	10	50	14	167.00

Hubbelock Wiring Devices

These devices combine a highly practical and exceptionally safe medium of applying electric current to industrial use. Cap contacts are heavy brass stock machined to dimension and molded into special impact-resisting Bakelite supporting posts. This sturdy construction assures ground connection and position polarity at all times, and under any condition. The lock is positive and prevents any loss of production through the accidental breaking of electric current. The Dead Front Safety Shutter isolates contacts, snuffs arc, and keeps out dust.

3-Wire Connectors

Adjustable Cord Grip

10 Amperes, 250 Volts D-C; 460 Volts A-C
20 Amperes, 125 Volts A-C or D-C

No. 23002

No. 23005

All metal parts finished to resist corrosion. Suffix letter G to number if desired with ground shunt from contact to casing or cover.

No.	Description	Cable Diameter Inches	Car-ton	Std. Pkg.	Wt. Lbs. Std. Pkg.	Per 100

Hubbell "Twist-Lock" Devices

10 Amperes, 250 Volts; 15 Amperes, 125 Volts

By a mere twist of the cap Twist-Lock devices make a fast and positive electrical connection which cannot be accidentally disconnected. Twist-Lock devices meet the recommendations of the National Electric Code rules advising installation of polarized and grounded devices to protect the operators of portable motor driven tools and equipment. These devices combine the no-break contact feature of a permanent connection with the convenience of a plug-in connection for easy servicing of electrically operated and motor driven machines.

2-Wire Midget Cord Connectors

Brown Bakelite

Without Cord Grip— $\frac{3}{8}$ -Inch Cord Hole

Hubbell Super "Twist-Lock" Connectors

2-Wire—3-Wire—4-Wire

No. 3321

No. 3323

With screwless pressure-grip terminals for faster, safer, more secure wiring. Both cap and connector body

are designed in two independent sections.

Terminal pockets hold wire ends securely in position and prevent spreading. The dead front "locks in" the strands, no wires are exposed on the surface.

Super "Twist-Lock" is small, light in weight, compact and rugged. Either cap or connector body can be interchanged with regular "Twist-Lock" units of equal size and rating.

2-Wire 20 Amp., 250 V.

No.	Description	Cord Grip Diam., In.	Car-ton	Std. Pkg.	Wt. Lbs. Std. Pkg.	Per 100

Hubbell "Insulprene" "Twist-Lock" Connectors

2-Wire 3-Wire—4-Wire

Strongest, toughest, most wear-resistant Rubber Connector ever produced—Oil resistant, water resistant, impact resistant.

Tough fibre disc has been molded into the Insulprene 1/2-in. from the face to insure positive polarity and anchor the blades securely in position, thus preventing accidental pull-out. Blade slots in disc accurately die-stamped, prevent incorrect insertion of blades.

No. 9966

Fibre retaining piece anchors terminal plates and seals off wiring area from lint and dust. Large screws with No. 8 heads simplify wiring and provide a secure connection.

Powerful Hubbell cord grips eliminate tension from terminals. Extra rugged 1/16-in. brass terminal plates.

Double wire lugs on each terminal plate effectively confine wires strands. Will accommodate same caps used with regular Twist-Lock units.

2-Wire 20 Amp., 250 V. (A-C or D-C)

No.	Description	Cord Grip Diam., In.	Car-ton	Std. Pkg.	Wt. Lbs. Std. Pkg.	Per 100

T-Slots

For Back or Side Wiring

No. 9260

No. 9260—Back View

No. 9260 is a sturdily constructed two-piece outlet with pressure type terminals which permit either back or side wiring. For back wiring strip wire to length indicated on strip gauge at back, insert wires in recesses and tighten binding screws at side. Convenient slots under plaster ears can be used for looping wire when outlet is side wired. Outlet becomes two-circuit type when connection between binding screws is broken.

P & S Plastic Pin Type Lampholder

Conform to N.E.C. Standards

Medium Base—660 Watts, 250 Volts

Indoor or outdoor decorative lighting. No stripping, splicing, soldering or tapping of wires. Lampholder applied directly to wire. Sharp pointed pins pierce insulation and make positive contact. Wires held in place by lampholder cap.

Lampholders may be positioned or moved to any desired spacing at any time, as pin contacts will not injure insulation of wire.

A detachable hook is furnished with each lampholder for hanging from tree or messenger wire.

For No. 12 or 14RW stranded wire.

McGill Levolver Industrial Sockets

Approved by Underwriters' Laboratories, Inc.

Series 4100

No. 4100

Sturdily constructed throughout with a screw shell .006-inch heavier than standard practice—for added strength at the lamp base. Double thickness wall section locked together with threaded collar prevents cap and casing separation with actuating pull.

No. 4100 with Universal Lever control uses a No. 41 Levolver switch.

No. 4100-PB with Push Button control involves this basic mechanism and provides the same positive action.

**Single Circuit—Lever Operated
Push Button**

†For use in pilot light receptacles and night lights. Lamps are rated 6 watts, 120 volts.

§No. 1342 can be furnished on special order in Amber, Green, Opal, Blue and Clear—Specify regular catalog number with suffix A, G, O, B or C, respectively.

Name Plates

No. 1330

For use with all P & S Despard plate openings. Consists of a rust-proof frame, transparent window and white card. Packed 10 in a carton. 30 in a standard package.

No. 1330 With Stainless Steel Frame..... **\$24.00** Per 100

No. 1344

Bell Push and Blank Inserts
Plastic

No. 1345

Bell Push for 6 to 12 volt circuits can be assembled in same strap with P & S-Despard switch, outlet or night light.

Blank Insert may be used to fill unused openings in plates—is made with knock-out which can be punched through for use as cord hole or telephone outlet.

No.	Description	Carton	Std. Pkg.	Wt. Lbs. Std. Pkg.	Per 100
1344	Bell Push, Brown	10	20	1	\$35.00

1345	Blank Insert, Brown	5	10	1	15.50
1445	Blank Insert, Ivory	5	10	1	24.00

When installing the above devices, it is necessary to use mounting straps.

New Process Metal Plates for P & S Despard Devices

Conform to N.E.C. Standards

No. 98041

No. 97141

No. 99021

Brown-X and Ivory-X plates have a multiple coat of baked-on, insulating enamel. Closely resembling bakelite, they will not warp or crack, and are very satisfactory for painting.

Chrome-X plates are made of .040-inch stainless steel. Their soft, semi-polished, silverlike finish will last indefinitely.

Plates are supplied complete with the necessary straps for mounting P & S-Despard devices. When P & S-Despard outlets are used with non-insulated metal plates, we recommend the use of insulating adapters.

Hubbell Combination Brass Plates

Hubbell Standard Combination Plates are made in .100-inch solid brass, also struck up .060 and .040-inch brass. Combination plates with sections for Interchangeable Line made in .060-inch brass only. Standard finish is brush brass. Special finishes are available at extra cost.

If plates are ordered by letter only and no finish is specified, brush brass will be supplied. A combination plate must be made of 2 or more different letters and not gangs of standard plates. For example: AA is not a combination plate.

.060-Inch

*Screw spacing, 2 3/8 inches. Adapter to 3 1/2 inches for box mounting supplied with this section.

‡Available in .060-inch metal only.

§Combinations embracing two adjacent G,Y, or K sections for Nos. 7250, 7310, 7410 or 7438 receptacles, require an extra blank gang between them to provide space for insertion of caps.

¶Vertical openings are available without extra cost.

Standard package of special combination plates consists of 10 identical plates; carton, 2 identical plates.

In ordering combination plates, use letter symbols from left to right, or bottom to top, in the position plates are to be ganged, i.e., P C G .060-inch would specify a plate to take one toggle switch, one bull's-eye, and one single convenience outlet—in that sequence, to be of .060-inch brass.

Order all of the above plates by symbol letters.

Prices on application.

No. 7169 Screwdriver 7170 Screwdriver (Special Equipment) *Ivoryine.

Screws for Hubbell Flush Plates

Brass screws (No. 7341) to match bakelite are supplied on all bakelite plates. Bakelite headed screw No. 7213 available on special order at extra cost. Special ornamental head screws and special screwdriver will be supplied with standard package quantities of plates when so specified without extra charge, or may be purchased separately.

Bryant Flush Plate Combinations

Combination plates can be furnished in .040 inch and .060 inch thicknesses of stamped brass. When ordering combination plates specify type symbols as shown with the illustration of each plate. In ordering place the symbols from left to right or top to bottom as the plates are to be mounted, and give the thickness desired, i.e., "BSV .060-Inch". For multiple gang plates, prices will be furnished upon application.

Standard Finish is Brush Brass.

Type F Single Outlet Plates

Without door. Can be used with Nos. 556, 1708, 4831, 5261, 5661, 9116, 9120, and 9326 receptacles.

Quiet Type, 15 Ampere A-C For Residential Use

No. AC11

Compact totally enclosed plastic bodies allow ample wiring room in box. Switches may be installed in any position.

Available in two types—with easy-to-wire, screwless (pressure) terminals and with conventional binding screw terminals.

15 Amperes, 120 Volts, A-C

P & S Flush Tumbler Switches

Approved by Underwriters' Laboratories

No. 20AC1-I

No. 20AC1

Quiet, High Capacity, Specification Type

20 Amperes, A-C For Heavy Duty Service

Large silver alloy contacts assure long life under continuous, heavy duty service. Can be used to full rated capacity on fluorescent loads at voltages from 120 to 277. Can be used at full rated capacity on tungsten filament lamp loads and on motor loads up to 277 volts at 80% of switch rating.

Designed for side or back wiring—will accommodate up to No. 10 solid or stranded wire.

Length 2⅝-in.; width 1½-in.; depth 1⅝-in.

20 Amps., 120/277 Volts, A-C

Hubbell Mercury Switch

Silent—Easy to Find

Light Up Handle Shines in Dark when in "Off" Position

For any area where quick location of light switch in the dark is important. Also useful as a "reverse" pilot light.

Operates like any other mercury activated switch, plus the advantage of a translucent ivory handle which, when in off position, is lighted by a tiny neon lamp.

Has convenient top wiring, large head binding screws, compact size.

Available in Single Pole and 3-Way types.

Meets REA and Federal specifications.

**Hubbell "Topper" A-C Switches
To Withstand Inductive Loads of Large Fluorescent
Lighting Installations**

No. 1201

Economical and efficient for use at full rated capacity on inductive loads. Controls many more fixtures than conventional switches.

Heavier circuits can be operated, and fewer of them, resulting in lower material and labor costs for wiring. Features shallow size, quiet operation (without mercury), large silver contacts. Upset binding screws, back and side wiring with easy-to-find back wiring entry holes.

Operates in any position. Balanced action eliminates annoying click-click of ordinary switches.

Brown top indicates 15 ampere, 120-277 volt units.

Red top indicates 20 ampere, 120-277 volt units.

**15 Amperes, 120 Volts—15 Amperes, 277 Volts

**Hubbell Pacemaker A-C Switches
For Residential Buildings**

Standard grade switch for use at full rated capacity on tungsten filament and fluorescent lamp loads. Quiet in operation, thoroughly dependable, easy to install, compact in size, and available at competitive prices.

Designed for 120-volt applications only.

Silver contacts hold temperature rise to a minimum. Side wiring convenience with large, deep-slotted screws "upset" to prevent falling out. Withstands resistance, surge, or inductive loads, also motor loads up to 80% of switch rating.

Bryant Flush Tumbler Switches

Quiet A-C Type

Designed specifically for interrupting Alternating Current; consequently much quieter than the conventional a-c/d-c type. They are able to handle inductive and fluorescent lamp loads, as well as tungsten filament lamp loads, up to the full rating of the switch. This means fewer switches and lower job costs.

**Residential Type
15 Amperes, 120 Volts**

Back Wired

Equipped with spring grip terminals, these switches are easily and quickly wired.

Mechanism enclosed in strong plastic cups.

Accommodate Nos. 14, 12 or 10 solid and No. 14 or 12 stranded wire.

Dimensions of cup: 1 3/4 x 1 1/2 x 1 3/4 inches deep.

Lever Operated—Single Circuit

6 Amp. "T," 125 Volt—3 Amp., 250 Volt

No. 39

Can be used on any chain fixture, and between any two links of chain. When installed in fixtures that have been previously hung it fits in place of one of the chain links without altering the length of the fixture or necessitating rewiring or splicing of lead wires.

The Levolver link switch consists of a standard Levolver pull switch, and Levolver link.

No.	Description	Carton	Std. Pkg.	Pkg. WL	Per 100
39	With Mounting Link	10	100	13	\$110.00

Lever Operated—Two Circuit

3 Amp., 125 Volt—1 Amp., 250 Volt

No. 201

Designed to operate with three-light lamps. When installed in the canopy of a fixture using the three-light lamp, it operates as follows: First pull turns on smaller filament, second pull turns off small filament and turns on the larger filament, third pull turns both filaments on and fourth turns both off. Standard finishes: brass, dark bronze and burnished nickel. Size $\frac{7}{8}$ x $1\frac{3}{8}$ inches.

No.	Diam.	Stem, In. Length	Carton	Std. Pkg.	Pkg. WL	Per 100

203	$\frac{7}{16}$	$\frac{3}{4}$	10	100	12	118.00

Lever Operated—Three Way

3 Amp., 125 Volt—1 Amp., 250 Volt

No. 301

Permits the control of one or more lights from two different points. Also used as reversing switch and for fractional horsepower motors. Standard finishes: brass, burnished nickel. Size $\frac{7}{8}$ x $1\frac{3}{8}$ inches.

No.	Diam.	Stem, In. Length	Carton	Std. Pkg.	Pkg. WL	Per 100
301	$\frac{7}{16}$	$\frac{3}{16}$	10	100	12	\$118.00

Lever Operated—Single Circuit

10 Amp. "T," 125 Volt—5 Amp., 250 Volt

No. 1010

Smallest 10 Amp. pull switch made yet has the ability to withstand the same loads as switches much larger. Single pole double break mechanism with 6-ft. cord and bell. For individual control of high wattage lamps and fluorescent banks up to six 4-tube fixtures. 1-piece molded phenolic casing.

No.	Diam.	Stem, In. Length	Carton	Std. Pkg.	Pkg. WL	Per 100
1010	$\frac{1}{2}$	$\frac{3}{8}$	10	100	20	\$180.00

1039	With Mounting Link		10	100	26	180.00

Pull Chain—Single Circuit

3 Amp. "T," 125 V.—1 Amp., 250 V.

No. 21

A durable, inexpensive 3 Amp., 250-Volt switch with single pole, double break mechanism, enclosed in plastic case. 6-inch wire leads secured to terminals by pressure connections—no soldered terminals. Equipped with 6-ft. cord and bell. Size $1 \times 1\frac{1}{4}$ inches.

No.	Diam.	Stem, Inches Length	Carton	Std. Pkg.	Pkg. WL	Per 100
21	$1\frac{3}{32}$	$\frac{5}{16}$	10	100	7	\$72.00

Lever Operated—Two Circuit

10 Amp. "T," 125 Volt—5 Amp., 250 Volt

No. 1020-S

Sturdy single pole 10 Amp. switch to control double filament, three light lamps. Also suitable for fluorescent groups where it is desirable to light one or more tubes in individual fixtures. Circuit control sequence: 1, 2, 1 and 2, off. Equipped with 6-ft. cord and bell. Standard finishes: brass, nickel and burnished nickel. Size $\frac{7}{8}$ x $1\frac{3}{4}$ inches.

No.	Diam.	Stem, In. Length	Carton	Std. Pkg.	Pkg. WL	Per 100
1020	$\frac{7}{16}$	$\frac{3}{8}$	10	100	13	\$186.00
1020L	$\frac{7}{16}$	$\frac{3}{4}$	10	100	13	186.00

Toggle—Single and 2 Circuits

6 Amp., 125 Volt—3 Amp., 250 Volt

No. 10

A toggle switch that provides lever action operating in line with the switch body. Has a horizontal acting metal lever. Especially suited for power tools, appliances, etc. Size $\frac{1}{2}$ " x $\frac{1}{2}$ " x 1".

No.	Description	Std. Pkg. WL	Price Per 100
10	Single Circuit, Wire Leads.....	6	\$64.00
10-L	Single Circuit, w/sold. Lugs.....	5	64.00
10-T	Single Circuit, w/terminals.....	5	70.00
12	Two Circuit, Wire Leads, No Off....	6	84.00

Switch No. 12 can be furnished with soldering lugs or terminals. Prices on request.

McGill Levolver Switches

Approved by Underwriters' Laboratories, Inc.

For Multiple Circuits

No. 400

The following are typical of the many Special Use Switches built by McGill for controlling all types of circuits. Others can be designed readily with the McGill method of assembling interchangeable component parts.

Rated from 4 to 10 Amps., 250-volt, these switches are especially serviceable for ventilating fans, circulators and fractional horsepower motors. Overall sizes are small.

Brass Caps and Casings for above Special Use Switches Nos. 275, 400, 402, 404, 406 and 501 furnished at \$40.00 per 100 list. Caps and Casings for above Special Use Switches Nos. 405, 471, 472, 473, 841, 842 and 843 not available. Other Special Use Switches take No. 1080 Molded Phenolic Housings.

Levolver Vertical Pull Adapter

No. 84

For Levolver Switches With 3/16-inch Stem Diameter

Adapts Levolver switches to vertical or straight down mounting in odd shaped or close to the ceiling canopies. It has a short extension arm that clips to switch lever and is aligned by slot in guide arm that is tightened under mounting nut. Adapter can be installed in a few seconds.

No.	Carton	Std. Pkg.	Wt. Lbs. Std. Pkg.	Per 100
84	10	100	2	\$22.00

Lever Operated—Single Circuit

6 Amp. "T," 125 Volt—3 Amp., 250 Volt

No. 71

The thinnest 6 Amp., 250 Volt "T" rated switch made—only 1 1/2 inch thick. Plastic cased with 6-inch wire leads, it has the famous Levolver mechanism. Size 1 1/2 x 1 1/2 inches.

Ideal for small, and especially thin sectional fixture canopies.

No.	Diam.	Length	Carton	Std. Pkg.	Pkg. Wt.	Per 100
71	1 1/2	3/2	10	100	8	\$96.00

Push Type—Single Circuit

6 Amp. "T," 125 Volt—3 Amp., 250 Volt

No. 71P

Similar to the No. 71 switch with molded phenolic case and wire leads. Has push type control instead of universal lever. Stem dia. 1 1/2", stem length 1/2" SPST.

Cat. No.	Description	Carton	Std. Pkg.	Pkg. Wt.	Price Per 100
71-P	Single Circuit, Wire Leads....	10	100	8 1/2	\$96.00

Single Circuit—Two Circuit—Three Way

6 Amp., 125 Volt—3 Amp., 250 Volt

Plastic cased toggle switches, wire leads or soldering lugs. Single pole, double break mechanism. No. 25 is single circuit for individual control of lights, "T" rated. Size 1/2 x 1/2 x 1 inch.

No. 25

No. 27 is three-way for control of one or more lights from two points. No. 28 for controlling either of two circuits. No off position.

No.	Description	Carton	Std. Pkg.	Pkg. Wt.	Per 100
25	Single Circuit, Wire Leads....	10	100	6	\$ 66.00

27	Three-Way, Wire Leads.....	10	100	6	82.00
28	Two Circuit, Wire Leads.....	10	100	6	102.00

All stem diameters 1 1/2", length 1/4".

Standard with metal lever but plastic levers available in ivory, black, red, dark red, green, yellow, blue, brown, grey or orange. Switches Nos. 27 and 28 can be furnished with soldering lugs or terminals. Prices on request.

Levolver Extension Arms

No. 85W

No. 85

No. 86L

No. 86

Prevents the pulling of lamp cords against reflectors, shades, and bowls that causes needless wear, expense, fixture swaying and risk. The arm slips over the Levolver switch lever, cord is inserted through end hole and knotted to hold.

No. 85-W can be extended for use with 18-22-in. and larger basin fixtures. Standard or special finished to match all Levolver switches.

No.	Overall Length Inches	Carton	Std. Pkg.	Wt. Lbs. Std. Pkg.	Per 100

Superior "Luxtrol" Light Control

Type WBD360
For Mounting in the Wall

LUXTROL replaces old-style "on-off" switches in new or existing structures to produce any desired light intensity from complete darkness to full brightness by auto-transformer action. Because it is not a rheostat, operation is always cool, smooth and without flicker—only the current required to produce the desired illumination is used.

LUXTROL type WBD360 controls 360 watts of incandescent or cold-cathode lamp load or up to six 40-watt rapid start fluorescent lamps. A switch incorporated at the "off" position shuts off the entire circuit. Both a fuse and a thermal overload are provided to assure complete safety. The knob and faceplate are smartly styled to harmonize with any room decor.

Standard LUXTROL Light Controls

No.	Cover Plate Material and Finish	Knob and Fuse Cap, Color	Each
WBD360-P2-K1	Prime Painted—Steel	Ivory	\$33.00
WBD360-P2-K2	Prime Painted—Steel	Black	33.00
WBD360-P2-K3	Prime Painted—Steel	Gray	33.00
WBD360-P3-K1	Brushed Aluminum	Ivory	33.00
WBD360-P3-K2	Brushed Aluminum	Black	33.00
WBD360-P3-K3	Brushed Aluminum	Gray	33.00
WBD360-P4-K1	Bright Chrome	Ivory	33.00
WBD360-P4-K2	Bright Chrome	Black	33.00
WBD360-P4-K3	Bright Chrome	Gray	33.00
WBD360-P5-K1	Brushed Brass	Ivory	33.00
WBD360-P5-K2	Brushed Brass	Black	33.00
WBD360-P5-K3	Brushed Brass	Gray	33.00

Easy To Install

1. Attach wallbox to studs . . . feed input and output load BX through knockouts.

2. Screw control assembly to wallbox.

3. Connect circuit leads to color identified control leads.

4. Screw on face plate, attach dial, insert fuse . . . and LUXTROL is ready for operation.

FOR LOADS UP TO 750 WATTS . . .

LUXTROL light control type WBD750 provides control up to a full 750 watts of incandescent lamp load or 1240-watt rapid-start fluorescents. The functionally designed prime painted faceplate can be repainted or wallpapered to match or contrast with the wall finish. Knobs are either ivory, black or gray plastic.

An input switch disconnects the unit and load when the knob is in the "off" position. A thermal overload and a fuse link protect the unit from accidental overloads and excessive overheating conditions.

Price \$49.00

Touch-Plate Remote Control Switch System

**Low Voltage
Home Lighting Control**

Touch-Plate low voltage remote control wiring brings to the home lighting field a combination of utility, convenience, attractiveness, and safety that is actually amazing.

This superlative method of home lighting control costs only slightly more than conventional wiring and offers so many new and exceptional advantages over older methods of home lighting that Touch-Plate is being installed in both new and older homes of every price category. Here are the reasons why TOUCH-PLATE has received such widespread acceptance all over the country.

1. Switches at the entrances of all rooms which eliminates groping in the dark and the needless burning of lights.
2. An intriguing master panel which controls all lights from one convenient location and shows which lights are on in the home.
3. The lightest touch of the hand or elbow and lights go on or off. This easy operation is attractive to every member of the family.
4. It's safe because of the low voltage, even current. Carrying parts can be touched safely with wet hands.
5. The switches operate noiselessly.

You get all these extra, luxury features with Touch-Plate plus the fact that the units are built to last longer than the lifetime of the home.

Switches

No. 1400A

No. 1400B

No. 1400C

Low voltage momentary contact switches only should be used to operate Touch-Plate relays. Wiring to Touch-Plate switches is open run low voltage—no conduit necessary.* No BOX NEEDED because of low voltage.* Touch-Plate switches can be attached directly to plywood, etc. Wire in parallel for multiple switches. Switches fit standard outlet boxes or plaster rings. Both two-gang and three-gang switches fit two-gang boxes or plaster rings. Available in both ivory or brown with either ivory or brown buttons. Specify colors when ordering.

No.	Type	Car- ton	Std. Pkg.	Wt. Lbs. Std. Pkg.	Each

Master Panels With Pilot Lights

No. CC6

No. CC12

No. CC18

Provides a central point—such as the master bedroom—for the individual control of all house lights. The Famous TOUCH-PLATE Master Panel. All lights can be controlled from any convenient location (near bedside, in garage, etc.). Lucite buttons automatically illuminate indicating which lights are on in the home. Most installations have two master panels; one in the garage to turn on or off all lights before entering or after leaving the house, the other in the bedroom. Touch buttons control individual relays. The low voltage indicator pilot lamps are controlled by individual transformers, also in GB gang box, which are wired in parallel with individual fixtures. Touch-Plate master panels mount on single or two-gang switch rings, or, where code requires—to extra deep (3 1/2") switch box.

No.	Description	Car- ton	Std. Pkg.	Wt., Lbs. Std. Pkg.	Each
CC6	6 buttons, 6 lights	1	2	1	\$17.50
CC12	12 buttons, 12 lights	1	2	2	30.00
CC18	18 buttons, 18 lights	1	1	1 1/2	45.00

Control Units

MRU-6

RU-6

Prewired relay control units are completely color coded and can be ganged in multiples to fit any installation. The MRU6 unit has 6 pilot light transformers for master panel indicator lights. The RU6 unit is not equipped with pilot light transformers. Both units consist of 6 relays mounted in a GB6 gang box available for either flush or surface mounting.

For Lights on Master Control

No.	Std. Pkg.	Pkg. Wt., Lbs.	Each
MRU6	2	25	\$52.00

For Lights Not on Master Control

No.	Std. Pkg.	Pkg. Wt., Lbs.	Each
RU6	2	20	35.00

Transverter

TVR-1

Transverter is the source of the low voltage direct current to operate the relays. One such power supply only is needed for each complete installation. Built around a current limiting transformer and gives an impulse of direct current for operation. Cannot be burned out or damaged by direct short circuit on low voltage side. Comes installed in PWU Series. May be attached to mounting holes on MRU-6 and RU-6 units. All gang boxes have provisions for mounting the TVR-1. For separate installation a mounting plate is available that fits a standard 4-S box.

No.	Description	Std. Pkg.	Pkg. Wt., Lbs.	Each
TVR-1	Transverter.....	10	10	\$10.00

Touch-Plate Display in Carrying Case

Use This Display to Up-Sell Wiring Jobs

This display board is a very effective sales tool—it will create interest and desire wherever it is shown. It effectively demonstrates entire system including the Master Panel. Let your customer see this amazing low voltage system in actual operation. This display will aid you in presenting your sales story so that your prospect can readily visualize the convenience, utility and safety features and many other advantages of having Touch-Plate lighting control in his home.

Touch-Plate Gang Boxes

For group mounting of relays

No. GB20 made to receive up to 20 No. 1550A relays, and 1 TVR-1 transverter. Adequate KO's provided for 115V runs.

No. 1620 GB9

115 V. wiring is within box and low voltage connections are outside box. Dimensions 5 x 20 x 4 inches. For surface mounting only.

No. GB15 made to receive 20 No. 1550A relays (and 1 TVR-1 transverter. All 115 V and low-voltage connections within box. Dimensions: 9 x 24 x 4 inches. GB15 should be used when Master Panels are installed and can be either surface or flush mounted.

No.	Description	Car- ton	Std. Pkg.	Wt. Lbs. Std. Pkg.	Each

Hoffman "Switch-O-Lite" Controls

Listed by Underwriters' Laboratories, Inc.

Remote Control

Consists of single-pole, single-throw, magnetically operated relay, fuse holder, and terminal board, all housed in die-cast aluminum enclosure, machined and gasketed to provide a completely weather-proof container. Relay rated at 115 volts, 60 cycle A.C., 10 ampere tungsten rating, with an operating coil suitable for continuous duty.

Connection outlets provided on both top and bottom of relay box, which permits installation with either conduit or flexible cable.

Used for Yard lights, Motors, Pumps, Machines, etc. Controls lighting, etc. from any number of wired locations with a single extra wire. Tested at 40° below zero.

No.	Std. Pkg.	Ship. Wt. Lbs.	Each
560	1	3	\$23.10

Minneapolis-Honeywell Dim-A-Lite

Listed By Underwriters' Laboratories, Inc.

A multi-stage wall switch that varies light intensity to fit every activity in any room.

For use in homes, churches, mortuaries, restaurants or wherever controlled lighting is desirable.

By turning dial, light can be dimmed to 6% illumination; softened to 38% illumination; moderated to 68%; illumination and brightened to 100% illumination.

Has full 175 watt rating and overload safety. No extra wiring, relays or transformers required.

Equipped with durable Plexiglas cover that snaps off easily allowing four background insert colors provided with each switch to be interchanged.

Cover and conduit box included in each unit package.

No.	Each

Kett Tall Reach Joist Borer

Here, in a single tool, is all needed for drilling holes, anywhere at any angle, and through any material.

Requiring less than eight inches clearance, the wood borer operates between joists and studs. Users report that often this new tool pays for itself on one or two wiring jobs. Saves climbing up and down ladders, giving a big saving in time and money.

The rugged Tall Reach Borer has ample power for every job and stands up under severe use. It has ball-bearing construction with sealed in lubrication. Takes standard 1/2-in. shank machine bits with 3/8-in. flat. Total weight with 9-ft. extension is less than 18 lbs. Supplied with 12-ft. cord.

Removed from extension with a twist of the wrist, the head becomes a light, easy to use hand borer.

No.	Description	Each
KU-21	Complete with extension	\$149.50
KU-21	Less extension	137.50

Kett Panel Master Saws

The Panel Master Saw with its 3/8-in. depth of cut is designed expressly for cutting metal laminated wall panelings such as Armorply, Met-L-Wall, Mirawal, Porc-Lin-Ply, chalkboard, etc. It is the ideal tool for store front and interior contractors; partition installers; custom auto body, trailer, truck, and bus builders; and plastic fabricators.

It will cut mild steel, aluminum, brass, lead, fibreglas, reinforced polyesters and resins, and all laminated and plain plastic sheets.

Powered with a 5/8-in. capacity heavy duty, industrial type ball bearing, 110-volt universal motor. It comes complete with four assorted blades and wrenches. A carrying case is also available for the tool.

No. KS-3AM	Panel Master Saw	Each \$124.50

Toledo Ratchet Boring Tools

1 to 3-in. Expansive Bit

Bores through joist and beams where parallel or adjoining timbers interfere with use of brace and bit.

Bit is automatically fed by means of strong steel spring in telescopic barrel of tool, making it easy to operate in confined quarters. Bits have long shank, providing an adjustment range of approximately 6-in.

	WL, Lbs.	Each
Ratchet boring tool, without bit	5	\$18.00
Expansive bit for tool	1	9.75

Greenlee Ship-Auger Electric-Drill Bits

No. 64-PT

Available in 17 sizes from 5/16 in. through 3/16 in. with 12 in. twist and over-all length approx. 16 in. on sizes up to 1 1/16 in. Larger sizes have 15 in. twist with an over-all length of approximately 18 in. Shank sizes same as No. 56-PT except 1/2 in. on bits of 1 1/16 in. and larger. Has single twist and a single-cutter head, but no outlining spur.

Greenlee Power Pipe Bits

No. 87

Designed for electricians to bore holes for pipe or conduit. Double twist type, having twist lengths ranging from 7 1/4 to 8 1/2 inch. Overall dimensions, 14 to 17 in. Shanks are 2 inches long milled with three flats, milled 120° apart for securely gripping by 3-jaw chuck. Flat cut heads permit boring with minimum of power. Screw points have a lead of 16 turns to the inch to accommodate power driven equipment. The elimination of spurs makes regrinding easy if damage occurs from nails or other obstructions.

Size, In.	Each	Size, In.	Each
1 1/4	\$5.60	2	\$ 9.15
1 1/2	6.70	2 1/2	14.00

**Greenlee Bit Extensions
No. 902**

Has a 2 1/32-in. body section 1 1/2 in. in length provided with two set screws to hold bits with a 2 3/64-in. shank. Three flats milled 120° apart on the shank of the extension fit the standard 3-jaw chuck, one flat has two set screw holes to allow two or more extensions to be locked together for a longer reach. Shaft portion between body and shank is 3/8 in. in diameter.

Length, In.	Each	Length, In.	Each
18	\$2.35	24	\$2.50

**Greenlee Brace Adapters
No. 902-1**

Permits the use of No. 18 or No. 45 power bits, or the No. 902 extension, in any standard brace. 4 1/2 in. long with standard brace shank and 2 1/32-in. diameter head provided with two set screws for positive coupling.

No. 902-1 Brace Adapter.....	Each \$1.80
------------------------------	-------------

**Greenlee Heavy-Duty Bit Extensions
No. 904**

A heavy-duty extension for use with the Greenlee No. 18 Unispur Power Electricians' Bit in sizes 1 1/16 in. and 2 1/16 in., the Greenlee No. 45 short Unispur Power Bit in sizes 1 1/16 in. through 3/16 in., and other tools with 1/2 in. shanks. Head size is 1 1/16 in., shank size is 1/2 in., hole size is 1/2 in. Available in 18 and 24 in. lengths.

This extension is similar to the Greenlee No. 902 Power Bit Extension with three flats, 120° apart, milled on the extension to fit standard 3-jaw chucks. One flat has two set-screw holes enabling two or more extensions to be locked together for longer reach.

Greenlee Auger, Car and Bell Hanger Drills

No. 44 Short Unispur Auger Bits

Specially designed with a short twist and the proper overall length for electrician's use in boring holes for pipe and conduit. Medium pitch screw point for smaller sizes, finer point for larger sizes. Sizes up to 1-in. have 3-in. twist and 5½-in. overall length. Larger sizes, 2½-in. twist and 5½-in. overall length.

Size, 16th In.	Each	Size, 16th In.	Each	Size, 16th In.	Each

Greenlee Pipe Bit Set

No. 1440

Specially designed for boring holes in wood for pipe and conduit. Six bits in set for following pipe sizes:

- Bit diam., 7/8-in. for ½-in. pipe.
- Bit diam., 1½-in. for ¾-in. pipe.
- Bit diam., 1¾-in. for 1-in. pipe.
- Bit diam., 1¾-in. for 1¼-in. pipe.
- Bit diam., 2-in. for 1½-in. pipe.
- Bit diam., 2½-in. for 2-in. pipe.

Bits have overall length of 6-in.

Have ½-in. milled shanks for use in portable electric or

pneumatic drills or stationary boring machines. Adapter is provided for using standard auger-bit brace. In metal set box with carrying handle. Weight, 7 pounds.

No.	Each
1440 Pipe Bit Set Complete	\$45.00

Diamond Di-Forge Twist Drills
No. 720

A tough and durable drill forged from a solid bar of Vanadium tool steel. Use with hand or electric hammer. May be used with Diamond Drill Holders Styles A, B, and C.

TEC Combination Drill and Saw Drillsaws

No. 1

Drills its own hole, then saws rapidly in any direction. Fine steel blade has fast-boring tip; main portion of blade is sharply toothed spirally. Works without clogging on plywood, hardwood, plaster, wallboards and plastic.

Blade of tough alloy steel, hollow-ground; will take rough usage, but is not brittle. Set securely in lacquered hardwood handle.

No.	Length, Inch	Diameter, Inch	Each
1	7	3/16	\$1.85
2	10	1/4	2.45
3	13	5/16	2.95

Arrow Automatic Gun Tackers
Type T-75

For non-metallic sheathed cable up to 1/2 in. in diameter. No short circuits possible. The driving blade automatically stops short—does not allow staple to injure wire covering. Patented jam-proof mechanism uses 1/16, 1/8, 3/8 in. divergent pointed (.075 wire) staples, galalloy coated for high rust resistance, rosin coated for greater holding power. Also in rustproof monel; and in ivory and brown.

Type T-75 Automatic Gun Tacker..... Each \$15.00

Type T-25

For any wire up to 1/4 in. in diameter—telephone, bell, thermostat, hi-fi, radiant heat, inter-com wires, etc. Patented jam-proof mechanism. Driving blade automatically stops short—does not allow staple to injure wire covering. Tapered head gets into tight corners. Uses round top (.050 wire) 3/8, 1/6, 1/8 in. galalloy coated staples. Also in rustproof monel.

Type T-25 Automatic Gun Tacker..... Each \$15.00

Capewell All-Purpose Saw Blades
Dafiles—Cut in Any Direction

Cuts any material in any direction. Can be used for high-speed cutting in a power jig. Manufactured from a mild steel, cyanide hardened and water quenched.

Case hardened to a depth of approximately .005-in., the core remaining relatively soft to give pliability and tensioning strength. Fits any standard hack saw frame when used with Dafile links. Blades: rough, medium and smooth. Specify when ordering.

No.	Description	Per Doz.

K-D Convertible Hack Saw Frames

Spans Obstructions and Projections on Difficult Jobs. Cuts Around Corners.

A finely balanced, solid steel frame. Quick, easy adjustment for 3, 4 1/2, 6, 8, 10, or 12-inch blades. One 3-inch and one 12-inch blade furnished. Net weight, 1 lb., 7 oz.

No. 99..... Each \$4.45

Capewell Hand Hack Saw Blades

Technite High Speed: Made from special alloy steel for use on hardest metals and are the finest hand hack saw blades for cutting high speed steel, carbon tool steel, chrome, chrome-nickel and other hard alloys.

Safetech High Speed Shatterproof: Designed to cut tough metals easily and with complete safety. Hardened tooth edge eliminates stripping and its soft, tough back makes it a truly safe, shatterproof blade.

High Speed Tungsten: Made from tungsten high speed steel for cutting hard metals. An excellent all-hard blade for use principally by the skilled mechanic.

Ryan Chisel and Punch Sets

Ryan cold chisels and machinists punches are hot forged of fine quality octagon tool steel. They are heat treated in automatic equipment, and will give excellent service.

Kits are of durable plastic in attractive red; pockets are transparent edged with silver braid.

Ryan Punch Sets

No. 11 Ryan Kit

Contains 1 each of the following pin punches:

- $\frac{5}{16} \times \frac{3}{32} \times 4 \frac{1}{2}$
- $\frac{3}{16} \times \frac{1}{8} \times 4 \frac{1}{2}$
- $\frac{3}{8} \times \frac{3}{16} \times 5$
- $\frac{1}{16} \times \frac{1}{4} \times 6$
- $\frac{1}{16} \times \frac{3}{16} \times 6$

Kit weight, 1 lb.
Kit, Complete
Each... \$2.40

No. 10 Ryan Kit

Contains chisels and punches as listed.

- 1 Cold Chisel $\frac{1}{2} \times \frac{3}{8} \times 6$
- 1 Cold Chisel $\frac{3}{8} \times \frac{1}{16} \times 5$
- 1 Solid Punch $\frac{1}{2} \times \frac{3}{16} \times 6$
- 1 Pin Punch $\frac{3}{8} \times \frac{3}{16} \times 5$
- 1 Center Punch $\frac{3}{8} \times 4$

Kit Weight, 1 lb.
Kit, Complete
Each... \$2.40

Ryan Chisel Sets

No. 12 Ryan Kit

Contains 1 each of the following Cold Chisels:

- $\frac{1}{4} \times \frac{1}{4} \times 4 \frac{1}{2}$
- $\frac{3}{16} \times \frac{3}{16} \times 5$
- $\frac{3}{8} \times \frac{3}{16} \times 5$
- $\frac{1}{16} \times \frac{1}{2} \times 5 \frac{1}{2}$
- $\frac{1}{2} \times \frac{5}{8} \times 6$

Kit weight, 1 lb.
Kit, Complete
Each... \$2.40

Ryan Chisel Sets

No. 948K Kit

Contains 4 popular size wood chisels.

1 each of the following sizes:

- $\frac{1}{4}$ -inch
- $\frac{1}{2}$ -inch
- $\frac{3}{4}$ -inch
- 1-inch

Kit weight, 1 $\frac{1}{4}$ lbs.

Kit, Complete
Each... \$7.00

Simonds Red Tang Files

MILL files . . . are single cut used in sharpening saws and knives and for draw filing.

FLAT files . . . are double cut, a utility file for general use.

ROUND files . . . are used for enlarging round holes and on curved surfaces.

Bartlett Shears

For Heavy Metal Cutting

Snips are forged with solid blades of crucible tool steel, heat treated. All pivots and parts made for the most trying work on metal.

Compound lever action gives an evenly distributed cutting strain from a close throat start to the finish at the point of the blade. In difficult cutting it is not necessary to start with blades open to the full span, because of the even pressure at all positions. The short cutting blade is connected to the short lever handle by links on each side with close fitting shoulder rivets, making a rigid connecting frame without side springing tendencies.

No. 10: Length 10½-in., cut 20 gauge or multiples of thinner gauges.

No. 12: Length 12-in., cuts seams or multiples of thicknesses: is used for splitting large sheets and for many classes of work that usually require bench shears.

No. 14: Length 14-in., is capable of much heavier work than the usual hand shear of the same length and in many ways takes the place of a bench shear for heavy cutting.

No.	Wt., Lbs.	Each
10	1⅛	\$11.00
12	1⅞	14.50
14	2½	17.00

Evans Pocket Tapes

Practical for measurements in production and maintenance work. Chrome plated die cast case. ½-in. tempered steel blade finished with bonderized white enamel on both sides.

Jet black "quick conversion" foot and inch markings on blade which is marked in eighths and sixteenths, thirty-seconds on first six inches. Packed 12 in a box.

No.	Length, Ft.	Wt., Lbs. Per Box	Each
106W	6	3⅜	\$0.98

106WE/M	2 Meters—78⅜ ins.	3⅜	\$1.10
110WE/M	3 Meters—119 ins.	3¾	1.49

Mainco Distance Measuring Wheels

Sturdily built aluminum chassis carries the wheel which is exactly 3-ft. in circumference. Flat rubber tire insures accurate rolling without slip. Counter geared to the wheel indicates feet. Inches are graduated on the stationary disc. Spring operated plunger brake keeps wheel locked; is released by means of trigger shown inside handle.

Counter has capacity of 99,999-ft. but can be reset at will of operator.

Measuring Wheel	Wt., Lbs.	Each
	5½	\$75.00

Evans Long Tapes

Vinyl leatherette covered steel case. Snow-white ⅜-in. steel blade has black figures and is marked in eighths. Foot marked at every inch. Each tape equipped with hook ring at no extra charge. Packed in plastic carrying case.

No.	Length of Blade	Wt., Lbs. Each	Each
25W	25 Foot	¾	\$3.98
50W	50 Foot	1	4.98
75W	75 Foot	1⅝	5.98
100W	100 Foot	1¾	6.98

Evans Folding Rules

White plastic sticks with jet black markings. Can be cleaned with soap and water. Heavily plated steel joints. Packed 12 in a box.

No.	Length, Ft.	Type Reading	Each
FR1	6	Outside	\$0.98
FR2	6	Inside	

Lufkin Flexible Spring Joint Rules

5/8-in. wide, white enameled. Six-inch folds. Marked consecutive inches to 16ths, both sides. 6-ft. length.

No. 8616.....Each **\$1.45**

Lufkin Folding Extension Rules

For inside measurements. A six-inch graduated brass slide fitted into first section. Rule is hardwood, 1/8-in. thick for durability. Marked both sides consecutive inches to 16ths. Length, 6-ft.

No. X-46.....Each **\$2.50**

Lufkin Sterling Linen Tapes

Two color markings, one side only, to feet, inches and half inches. Case is genuine leather over rust resisting metal case. Folding flush handle. Nickel plated trimmings.

No.....	400	403	405	406

Lufkin Michigan Chain Tapes

Line is of extra tough steel, white metal coated. Graduations and figures are deeply stamped into babbit metal. Line is detachable from reel, and has heavy brass end clips, and is furnished with a pair of leather thongs. Sturdy metal reel

is dull nickel plated finish with polished hardwood handle.

No. 3100, 100-Ft. Length, with Reel.....Each **\$22.70**
 No. 03100, Tape Only, 100-Ft. Length.....Each **14.70**

Lufkin Leader Chrome-Clad Steel Tapes

Chromium plated; resists rust and is easily kept clean. Markings are extremely easy to read, being jet black against the cream white chrome. Has plated steel ring at end of tape. Markings are inches and 8ths. The case is covered with maroon-covered vinyl over a substantial rust-resistant coated steel liner.

A strong, durable and very easy to read tape at a moderate price. Width, 3/8-in.

No.	Length Feet	Weight Ounces	Each
C-250	25	9	\$ 6.60
C-253	50	15	8.00
C-255	75	20	10.70
C-256	100	25	13.10

Lufkin Anchor Chrome-Clad Steel Tapes

This is a high grade chrome-plated steel tape in genuine leather case. The heavy chrome plate is extremely durable and the jet black markings made for great ease in reading. Blade is 3/8-in. wide. The case is finest grade genuine leather, hand sewed over a heavy steel plated inner case.

Choice of markings: feet, inches and 8ths; or 10ths, and 100ths.

No. Feet, In., and 8ths	No. Feet, 10ths and 100ths	Length Feet	Weight Ounces	Each

Nye Triad Dies

One piece dies assure operator perfect alignment and size. Die is locked in place by threaded screw cap. Same dies are used with all Triad stocks but diehead diameters vary for each ratchet stock.

For threading short nipples or a stub of pipe, even to within 1/4 in. of wall or ceiling, the dies can be quickly reversed and a ceiling bushing inserted between die and cap.

Triad Dies for Pipe or Conduit

Oster "Bull Dog" Stocks and Dies

Plain Type Bull Dog

Ratchet Type Bull Dog

The tools with five big features. Lever-locking, adjustable dies, self-locking, self-centering guides. No backing off, dies open and release tool from pipe. Dies reset to size instantly. Big range of sizes, right and left hand threads. The self-centering universal guides with which all Bull Dog die stocks are equipped accurately center all sizes of pipe and eliminate pipe bushings and set screws. The guides which are controlled by a lever handle, will pass a coupling so that short nipples as well as longer lengths of pipe can be threaded.

Bull Dog dies are made of high quality tool steel, properly hardened and ground to size on all sides.

Equipment furnished as standard consists of tool body, self-centering guides, 1 set handle and one complete set of R.H. pipe dies to cover the designated range. Made in plain and ratchet types.

Plain	Ratchet	Number	Pipe Range, Inches	Bolts	Plain	Ratchet

**Oster Leader Die Stocks
2 1/2-inch to 4-inch Pipe**

A high quality tool. Designed for use with power drives, as well as for hand operation. No. 54 dies are extra wide for longer life and ground with a special long lead for easy starting. Standard equipment consists of tool body, self-centering chuck, handles, separate ratchet frame and four individual sets of dies to standard range. Weight, 72 pounds.

No. 54 Complete	Each	\$116.60
Extra pipe dies, 1 set for each size	Set	9.90

Armstrong Adjustable Stocks and Dies For Pipe or Conduit

Set consists of adjustable stock with "Kalarized" adjustable pipe or conduit dies and ring bushings for each threading size, with screws, handles and wrench.

"Kalarized" dies are stronger, tougher, yet slide smoothly around the pipe. The full sizes leading threads in the throat pull the dies on pipe, even over the meanest burrs. No wavy threads.

Beaver Ratchet Threaders

1 Set of Dies Threads 1 to 2 In.

The only fully adjustable tool that will cut under or over-standard lengths.

The only threader that will cut either standard taper threads or electric conduit straight threads with same dies.

The only threader with radio dial setting. Dies easily removable from outside in few seconds. Very rugged and easy working. Low upkeep cost.

No. 26-R. Ratchet Threader, 1 to 2-in. Each \$50.90

Beaver Geared Threaders

1 Set of Dies Threads 2 1/2 to 4 In.

Will cut standard, oversize or undersize threads of standard length.

Being adjustable, it is always possible to compensate for variations in off-standard or reused pipe fittings, still giving tight joints. Very rugged and easy working. Threads pipe or conduit with same set of dies.

No. 41-E. Geared Threader, 2 1/2 to 4-in. Each 134.10

No. 61-E. Geared Threader, 2 1/2 to 6-in. Each 275.00

No. 61-EX. Geared Threader, 4 to 6-in. Each 235.00

Beaver Pipe and Conduit Threaders

Delux with Fully Enclosed Ratchet

Finest set available. Ratchet mechanism fully enclosed, prevents wear on teeth and thereby eliminates danger of slipping which might result in serious injury to workman. Die-heads available for pipe, bolt, conduit, right or left.

No. 3. Ratchet with handle Each \$5.90

Diehead with Dies. 1/8, 1/4, 3/8, 1/2, 3/4 in.,

R. or L. Each 5.80

1" as above. Each 6.40

Die Segments Only. R. or L. 1/8 to 3/4" Per Set 4.20

1" Per Set 5.05

Beaver 3-Way Threaders

Many advantages.

Oil hole between dies for oiling and chip clearance.

Dies square, no offset to break.

Dies easily removed for resharpening. Extra long handle bosses give great strength.

No. 34. 1/2 to 1 in. pipe or conduit (specify which). 3-Way threaders. Each \$20.10

Toledo Geared Adjustable Threading Devices
Capacity, 2½ to 4 In. Pipe

Receding die principle produces a perfect tapered thread. Net weight only 57 lbs. Easily handled by one man. Consists of tool body, complete set of 2½ to 4 in. dies and bushings, set screw wrench and ratchet handle.

No. 2 BR same as No. 2 except equipped with new type 3-jaw pipe holder. No bushings needed; action is more positive than cam operated mechanism. Either model can be furnished to produce straight running conduit threads for electrical work.

For Pipe

Nye Ratchet Pipe Threaders

No. 51B

Cuts pipe thread or straight thread for plumbing, conduit or mechanical joints with one set of high speed dies on pipe sizes 1, 1 1/4, 1 1/2 and 2-in.

Opens automatically on both power and hand operation, when approximately eleven threads have been cut. Cannot jam lead screw.

Opens manually at any time during cut if spin back knob is pulled out. Pipe size selector can be changed from one size to another in an instant. Simple adjustment is provided for deep or shallow threads.

Adjustable guide allows quick clamping to pipe by three jaws synchronized to operate with one movement of guide ring. Dual purpose spin back knob permits turning stock back in a few seconds to starting position before removal from pipe.

Chaser removal easy and quick. Change effected in one minute without loosening a single screw.

No.	Description	Approx. Ship. Wt. Lbs.	Each

Armstrong Heavy Duty Vistands

Hinged and Chain Type

No. 833BX

No. 933

No. 934C

Integral Vistand is three units in one; a vise, a three legged stand and pipe bender. Light and well balanced. Can be easily carried in one hand.

The three legs, correctly adjusted for height and 3 point suspension, are bolted to platform so that each Vistand is completely assembled when received.

Nos. 833BX and 933 are equipped with the regular No. 233 Armstrong hinged pipe-vise tops.

No. 833BX has 3/4-in. pipe bender and slot for tools. The platform provides space for oil can and loose fittings.

Nos. 933 and 934C heavy duty have all the features of the No. 833BX, plus 2 extra benders, 1/2 and 3/4 in. for reverse bends, more slots for tools, a ceiling brace and a cast-in dope pot.

Toledo Universal Power Drives

Provides power right where it is needed on the job. Particularly designed for use with hand threading or cutting tools, but is equally efficient in any application where a portable power source is needed for rolling, cranking or turning operations.

Motor automatically adjusts speed to load, increasing power and decreasing speed on heavy loads and increasing speed on light loads. Under load, bushing rotates about 30 rpm.

Has 1/2 hp. universal motor. Operates from light socket on 115 volt current, or can be furnished with back off dies.

230 volt universal motor. Motor is reversible to back off dies.

Weighs only 165 lbs. Furnished with 20-ft. rubber-covered cable. In ordering, be sure to specify whether 115 or 230 volt motor is desired. Shipping wt., 238 lbs.

Universal Power Drive..... Each **\$408.00**

Toledo Power Drive

With Semi-Automatic Chuck

No. 78-A

A portable power drive that provides effortless cutting, threading and reaming of pipe and conduit.

Sturdily built with all gear drive. The chuck grips like a pipe wrench and is self-centering. Machine equipped with folding legs; can be carried over the shoulder.

Provides power for hand operated pipe tools. Excellent for fitting make up work.

1/2 hp. 115 volt motor. Weight 75 lbs.

Oster "Tom Thumb" Portable Pipe Machines

Equipped with ball-bearing mounted spindle and worm drive, giving it suitable speeds for most every requirement. New "Power-Matic" Front chuck speeds up operation and eliminates the use of chuck bar or wrench. Nipples as short as 4 1/2-in. in the 2-in. size can be held in the regular chuck and threaded on both ends without using a nipple chuck. Pipe or studs as short as 3 1/2-in. can be held and threaded on one end. Standard range 1/2 to 2-in. pipe. Extra range 1/8 to 3/8-in. pipe. Range with drive shaft 2 1/2 to 12-inch pipe. Bolt range 1/4 to 2-in.

Standard equipment includes roller type cutter, self-centering with length gauge, "Power-Matic" wrenchless type front chuck, universal centering rear chuck, universal variable speed 110 volt, a-c or d-c motor, reversing switch, gauge for thread length, reversible oil pump with relief valve, 3-gal. Oster cutting oil. Weight, 525 lbs.

No. 582 Complete with standard equipment, but less all dieheads and dies Each **\$790.85**

**"Tom Thumb" Portable Pipe Machine
No. 582R**

Differs from No. 582 by having revolving diehead. Its revolving dieheads and open type vise make it possible to thread long or short, straight or bent pipe, as well as nipples, rods, studs and bolts. Standard range 1/2 to 2-in. pipe. Extra range 1/8 to 3/8-in. pipe. Range with drive shaft 2 1/2 to 8-in. pipe. Bolt range 1/4 to 2-in.

No. 582R. With standard equipment and three sets of dies to cover standard pipe ranges, carbon steel 1/2 to 3/4-in.—high speed steel 1 to 2-in..... Each **\$1060.00**

**"Tom Thumb" Portable Bolt Machines
Nos. 581A and 582A**

These machines embody all the basic quality features of the Tom Thumb line plus the added advantages of the semi-automatic opening and closing of the dieheads which give greater production. Nos. 581A and 582A are identical with the exception that the bore of the diehead of the No. 582A and its spindle speeds permit pipe up to 2 in. to be handled. No. 581A standard bolt range 1/4 to 1 1/2-in. pipe or nipple range 1/8 to 1 1/4-in. No. 582A standard bolt range 1/4 to 2-in. Pipe or nipple range 1/4 to 2-in.

No. 581A. With standard equipment, less dies (order only dies required)..... Each **\$1485.00**

No. 582A. With standard equipment, less dies (order only dies required)..... Each **\$1540.00**

Oster "Rapiduction Jr." Pipe Machines

No. 792A

These completely new, modern machines are designed both for general purpose threading work and long run, high speed production.

Using tangential die-heads the standard range is 1/4-in. to 2-in. pipe. With radial die-heads the standard range is 1/8-in. to 2-in. pipe. Bolt range 1/4-in. to 2-in.

Constructed of fabricated steel, with spindle mounted in Timken tapered, roller bearings. Other entirely new features are the front chuck with Oster "power-matic" jaws which grip securely in both right and left hand direction and the availability of tangential die-heads and dies as well as the radial type.

Regular equipment includes 3 hp., 1800 rpm., 3-phase, 60 cycle motor; reamer; roller cutter; "power-matic" front chuck; self-centering, revolving, rear chuck; thread length gauge; oil pump and 5 gal. Oster "Bestoil."

No.	Net Wt. Lbs.	Shp. Wt. Lbs.	Each
*792 Machine with Standard Equipment, less Die-Heads and Dies	900	1200	\$1545.00

Die-heads and dies extra.

*Also available in revolving radial die-head type No. 792R.

**"Rapiduction Jr." Bolt Machines
With Semi-Automatic, Revolving Die-Heads**

Newly designed Nos. 791A and 792A machines are high-quality, high-production units, suitable for a wide variety of threading work. Movement of carriage opens and resets die-heads to size, automatically. Open type vises permit quick handling of work in and out of machine without stopping the motor. Spindles are mounted in Timken tapered, roller bearings, for long life and accuracy.

Regular equipment includes 3 hp., 1800 rpm., 3-phase, 60 cycle motor; revolving, semi-automatic, adjustable die-head; die-head control; quick-acting, open type vise; automatic stock stop; thread length gauge; oil pump and 5 gal. Oster "Bestoil."

Oster "Pipe Master" Portable Pipe Machines

"Pipe Master" is a low priced, complete portable power pipe machine. Equipped with "Power-Matic" Front chuck which eliminates the use of a chuck bar or wrench and quick opening adjustable diehead. Nipples as short as 4 1/2-in. in the 2-in. size can be held in the regular chuck and threaded on both

ends without using special nipple holder. Pipe or studs as short as 3 1/2-in. can be threaded on one end.

Standard equipment includes roller type cutter; self-centering with length gauge; "Power-Matic" wrenchless front chuck; universal centering rear chuck; universal geared type motor, 110 volts either a-c, single phase or d-c; reversing switch; gauge for thread length; oil pump and 3-gal. Oster cutting oil. Weight, 370 pounds.

No. 552

- Standard range 1/2 to 2-in. pipe. Extra range 1/8 to 3/8-in. pipe. With drive shaft 2 1/2 to 12-in. pipe. Bolt range 1/4 to 2-in.
- Complete with standard equipment, with 1 diehead and 3 sets of dies, 1/2 to 2-in..... Each **\$460.00**
- With 3 dieheads and 3 sets of dies, 1/2 to 2-in..... **518.00**
- With 4 dieheads and 4 sets of dies, 1/4 to 2-in..... **554.00**
- With 6 dieheads and 6 sets of dies, 1/2 to 2-in..... **626.45**
- With 8 dieheads and 8 sets of dies, 1/4 to 2-in..... **698.75**

Beaver Pipe and Bolt Machines

Model A

The world's fastest portable machine. A 2-in. thread in 12 seconds, for example. A rugged heavy duty, deluxe pipe and bolt machine that cuts, threads and reams 1/8-in. to 2-in. pipe.

With a drive shaft and geared tools it will cut and thread 2 1/2 to 12-in. pipe. Threads bolts 1/4-in. to 2-in. Cuts off bolts (with wheel cutter) up to 1/8-in.

Features include: New Power-Grip Wrenchless Chuck, right hand lathe-like operation, all controls in front, new Quadra-Type Die Head, 12-in. of working space and oil pump forward or reverse. Increased oil flow delivers two gallons oil per minute — means perfect threads and long die life. Pump accessible for easy cleaning. High speed steel dies throughout for pipe, bolt or conduit. Choice of wheel or automatic knife cutoff. Built-in outboard Pipe Support — instantly indexes for size — no double chucking. Equipped with thread length gauge.

Your choice of 110 or 220 volt universal, reversible motor.

Knife cutoff **\$25.00** extra.

This is a greatly improved version of the old Beaver Model A machine. Productivity has been increased at least 40 per cent, by faster, more powerful motor and many new advantages.

Weight 226 lbs.

With Quadra-Type and Duo-Type Die Heads

No.	Description	Each
A-5	With one Quadra-type die head and one set of quadra-type dies to thread 1, 1 1/4, 1 1/2 and 2-in.....	\$680.00
A-6	With one Quadra-type die head to thread 1 to 2-in. and one duo-type die head with dies to thread 1/2-in. to 3/4-in.....	720.00
A-7	With one Quadra-type die head to thread 1-in. to 2-in. and two duo-type die heads with dies to thread 1/2 x 3/4-in. and 1/4 x 3/8-in.....	755.00
A-8	With one Quadra-type die head 1-in. to 2-in. and one each duo-type die head and dies 1/2-in. x 3/4-in. 1/4 x 3/8 and 1/8-in.....	795.00

Note: Also available with Duo type or Mono-type die-heads and dies.

Speed-O-Matic

Fastest — most powerful — most rugged — lightest weight pipe and bolt machine in its class. Weights only 170 lbs. Equipped with amazing new power grip wrenchless chuck. 1/8 to 2-in. pipe, 1/4 to 2-in. bolts. Up to 12-in. with drive shaft. Motor and switch fully protected. 110 or 220 volt, single phase. Machine lubricated for life.

Cut-off, dieheads and reamer all pivot mounted, swing out of way when not needed. New full-floating Clear-Vu self-centering wheel and roller cut off. Pulsating oil flow produces even distribution of oil on all dies for perfect threads and long die life. Instant and accurate easy setting rear pipe support, quickly indexes for size of pipe or bolt, eliminates double chucking.

All parts accessible for minimum upkeep and maintenance. Quick acting alloy steel 3-flute reamer. Carriage always protected against damage.

Renewable bearings for long life and low up keep. Lathe type thread length indicator located right before your eyes. Made of high grade, tough alloy aluminum housing.

With Quadra-Type and Duo-Type Die Heads

No.	Description	Each
S-5	With one Quadra-type die head and one set of quadra-type dies to thread 1, 1 1/4, 1 1/2 and 2-in.....	\$490.00
S-6	With one Quadra-type die head to thread 1 to 2-in. and one duo-type die head and dies to thread 1/2-in. x 3/4-in.....	520.00
S-7	With one Quadra-type die head to thread 1-in. to 2-in. and two duo-type die heads with dies to thread 1/2-in. x 3/4-in. and 1/4-in. x 3/8-in.....	550.00
S-8	With one Quadra-type die head 1 to 2-in. and one each duo-type die head and dies 1/2 x 3/4-in., 1/4 x 3/8 and 1/8-in.....	575.00

Note: Also available with Duo-type or Mono-type Die-heads and dies.

Beaver Porto-Mite Super-Drive

The world's lightest 4-legged power drive — with tremendous power and ruggedness. Weighs only 84 pounds. Lubricated for life. Faster, more powerful, completely new and greatly improved motor. Motor and switch fully protected. Quick-acting power grip wrenchless chuck — positive grip forward or reverse. Accurate and easy-setting rear pipe support eliminates double chucking.

All parts easily accessible for minimum upkeep and maintenance. Power to spare to drive up to 12-in. geared tools. Entirely new throughout.

**Greenlee Hydraulic Benders
For Pipe, Conduit and Bus-Bars**

Greenlee Hydraulic Benders greatly speed conduit and pipe installations. One-man operated. Pumping the handle produces a powerful hydraulic force resulting in smooth, accurate bends without kinks or damage to pipe or conduit. No. 770 Series has a 25-ton hydraulic power unit. No. 775 Series has a 40-ton hydraulic power unit.

- No. **770** For 1¼, 1½, 2, 2½ and 3-inch rigid conduit and pipe. Weight, 205 pounds..... Each **\$197.50**
- No. **770T** For bending thin wall electric metallic tubing ¾, 1, 1¼, 1½ and 2-inch. Weight, 350 lbs..... Each **\$330.00**
- No. **770R** For bending small conduit and pipe in ½, ¾, 1, 1¼, 1½ and 2-inch sizes. Especially adaptable for radiant heating installations. Weight, 360 lbs..... Each **\$397.50**
- No. **770BB** For making U-bends in a wide range of sizes up to 4 inches wide and ¾ inches thick. Wt., 155 lbs..... Each **\$181.00**
- No. **775** For bending larger size pipe and conduit—3, 3½, 4 and 5-inch pipe. Weight, 402 pounds..... Each **\$276.50**
- No. **775R** For bending small pipe (including full 90° bend). For pipe sizes, ½, ¾, 1, 1¼, 1½, 2, 2½, 3-inch. Weight, 760 pounds. Each **\$787.50**
- No. **775BB** Bus-Bar Bender. For making U-bends in material up to 6-in. wide by 1-in. thick. Wt., 235 lbs..... Each **\$252.50**

**Greenlee Power Pipe Benders
For Bending Pipe or Rigid Conduit**

A powerful portable bender capable of licking the toughest pipe bending job. Handles rigid conduit or standard pipe 1¼ to 5 in. diam. Is rugged enough to bend 5-in. extra heavy material. Hydraulically operated. Gives fast smooth bends. 100-ton ram pressure. 20-in. stroke permits 90° bends in one setting. Can be driven by any suitable electric or gasoline motor.

Furnished complete with 2 upper connecting bars; 2 lower connecting bar assemblies; 1 upper cross bar; 1 lower cross bar assembly; 1 piston insert; 4 pipe supports, range 1¼- to 5-in.; 2 pipe support pins and 2 cylinder head pins. Weight, 609 pounds.

- No. **785-BE** Hydraulic Bender (without Motor or Shoes)..... Each **\$1525.00**

Bending Shoes for Greenlee Power Pipe Bender

Greenlee Hand Pipe Benders

For Hand Bending Steel, Iron and Non-Ferrous Pipe, Conduit and Tubing

Makes small radius bends without flattening or kinking and especially designed to make neat bends for sharp corners. Save up to 75% in time and material on many jobs. For the larger sizes of pipe and conduit, the bender is clamped in a vise. The smaller sizes can be bent without using a vise. No. 761 is for pipe and rigid conduit. No. 764 is for thinwall conduit (EMT-Electrical Metallic Tubing). Nos. 760 and 762 for soft copper and aluminum tubing. No. 763 for steel, copper, brass and aluminum tubing.

Greenlee Lightweight Hydraulic Power Bender

No. 884

Bends pipe and rigid conduit to 90° with one ram stroke. Handles 10 sizes from 4 in. down to 1/2 in. Develops 40 tons of ram pressure. High-strength aluminum alloy is used for the plates, pipe supports, bending shoes, and ram. The piston is of high-alloy steel.

One man can set up and operate. Applied to pipe in any position without loss of fluid or power.

For faster jobs bender may be used with Greenlee No. 797-E-SA Power Pump which can bend 4-in. pipe 90° in only 30 seconds.

No.	Description	Each
884	Bender, complete with No. 798-AC-SA Hydraulic Power Pump, to bend 10 sizes, 1/2" to 4".....	\$1239.50
884-A	Bender, (same as above—complete with pump) to bend only four sizes, 2 1/2", 3", 3 1/2", 4".....	1185.50

Greenlee Lightweight Hydraulic Bender

No. 880

Portable hydraulic bender designed for bending 6 sizes of pipe and rigid conduit from 1/2 in. to 2 in. up to 90° with one ram stroke. Consisting of a hydraulic hand pump and a bending ram assembly, the Bender units can be quickly disconnected by using a special speed coupling on the hose and hand pump.

Power punch of 15 tons. Safety valve in the hand pump opens any time the pressure limit is exceeded. Aluminum alloy used in construction wherever possible.

Has a two speed hydraulic hand pump with fast approach for moving ram rapidly to work piece. Can be used with No. 798 AC-SA Power Pump to speed bending.

No.	Description	Each
880	For 1/2 in. to 2 in. Pipe or Conduit.....	\$235.00
880-A	For 3/4 in. to 2 in. Pipe or Conduit.....	230.00
880-B	For 1 in. to 2 in. Pipe or Conduit.....	225.00

Tal Tube Benders

No. TT-57

Bends 5/8-in. and 3/4-in. O.D. hard and soft copper tubing. Has one forming section with two grooves for both sizes. Easy... Quick... Efficient. Low Cost.

Made of lightweight aluminum alloy with only two loose parts.

Nominal Tube Size In.	Tube O.D. In.	Radius to Center of Bend In.
1/2	5/8	3
3/4	7/8	3

No. TT-57 Tube Bender. Approx. ship. wt. 9 lbs. for two sizes. Without pipe handle..... Each **\$26.40**

Tal Pipe Benders

RC 200 Remote Control Benders

RC200 C or PH

Lightest One-Shot Bender

Only 68 lbs.

Two speeds, step-up bending time.

Removable top plate on frame lets pipe be inserted in bender three ways; Top, side, or hook over installed pipe.

Easily retract bends from shoes because of push-out pin and holes in shoes.

Easy assembling and durable construction—No threads, the few parts are assembled with pins. One bender, with one frame only.

No.	Description	Shp. Wt., Lbs.	Each
RC200C	For conduit: 1, 1 1/4, 1 1/2, 2-in. shoes	96	\$189.00
RC200PH	For pipe: 1/2, 3/4, 1, 1 1/4, 2-in. shoes	100	204.00

2 and 3-Inch Hydraulic Portable Pipe Benders

No. 3C or No. 3PH

No. 2EMT or CT For Steel or Copper Tubing

Only Tal one-shot benders have one and the same universal frame that can be used to make "one-shot" bends for the following purposes.

Code Letter	Bend
PH	Pipe
CT	Copper Tubing
X	180° Radiant Heat
EMT	Thinwall Conduit
C	Rigid Conduit
BB	Bus Bar
MP	Motor Pump (MP-26)
RC	Remote Control

Motor pump and remote control is available for all models of the 2 and 3-in. benders.

TAL Hydraulic Oil, 1 Gallon Can.....				\$2.50

All benders are offered with Standard Hydraulic Unit No. 99 which on special request can be exchanged for RC Remote Control Unit. Price remains the same.

Tal Large One Shot Benders

No. 400

No. 600

For bending pipe (standard X, XX) rigid and thinwall conduit, copper tubing, bus bar, shapes in any size from 3/8-inch to 8-inch and larger.

Bends cold without filling and in one shot, without moving the pipe. Larger benders can be had with built-in hoist for handling and positioning pipe. Saves expensive handling, cutting, threading or welding, assembly and costly fittings such as elbows and couplings. Takes only 3 minutes actual bending time on the job to make a complete 90° bend in an 8-inch pipe.

Tal Manual Six-Way Hickey

Guaranteed for Life Against Breakage

Long, safety neck extending into pipe handle guards against accidents caused by pipe handle breakage. New, extra stub hole for bending very short offsets or working conduit protruding from concrete. Sure grip jaws will not let conduit slip in the grooves of the hickey. An ideal tool for perfect work. Special design assures accurate, rapid and easy bending.

Lidseen Chicago Pipe Benders Hand Portable

These pipe benders may be attached to any brace, beam, or 2x4 on the job and used without stand. When ordering

without stand, plates (see list of parts) are necessary for attaching.

For 1/2, 3/4 and 1-inch Pipe

No. 1 Chicago Pipe Bender for regular 1/2, 3/4 and 1-inch conduit or pipe. Makes 4-inch diameter bends with 1/2-inch pipe, 8-inch diameter bends with 3/4-inch pipe, 11-inch diameter bends with 1-inch pipe. No. 1T Chicago Pipe Bender for 1/2, 3/4 and 1-inch thinwall conduit.

Both the **No. 1** and **No. 1T** pipe benders each have two operating handles. No. 1 handle is direct acting. Only one draw necessary for all kinds of uniform bends or offsets with 1/2 or 3/4-inch pipe. No. 2 handle operates toggle attachment for 1-inch pipe. 4 or 5 strokes required for a 90° bend.

No.	Description	Shipping Wt. Lbs.	Each
1	With Stand	66	\$110.00

T&B Lakin Hickeys

Extra-long shank assures great strength. Shank has bushed hole designed to slip over end of conduit for making short bends at end of conduit.

Bushed opening in shank fits snugly over end of conduit; prevents damaging threads while bend is being made.

No.	Size In.	Std. Pkg.	Each
335	1/2	10	\$3.76
336*	3/4	10	6.00
337	1	2	10.40

*Can also be used to bend 1/2-inch conduit.

T&B Benders and Hickeys

T&B Standard Conduit Elbow Formers

For 1/2-Inch and 3/4-Inch Conduit

Not merely a pipe bender; this practical conduit Elbow Former forms standard shaped elbows perfectly and accurately, exactly where wanted.

Saves time over old methods and saves material by eliminating the waste of conduit.

No.	Wt., Lbs. Each	Each
339	38	\$163.20

Steel City Allen Conduit Benders

Schedule S

For Heavy Wall Conduit

Heat treated, case hardened. Made from electric steel. Will not crush or deform conduit.

Nos. 1 and 6: For conduit sizes 1/4-, 3/8-, 1/2- and 3/4-in.

Nos. 2 and 7: For conduit sizes 3/4-, 1- and 1 1/4-in.

1474	1	1	1	800	8.24

Republic Electrunitite Mandrel Springs

Used inside E.M.T. When making bends, permitting short-radius bends to be made with Hickey Type benders without "inching" bender.

Springs serves as a mandrel, supporting the tube wall and preventing crimping. Easily removed by twisting.

No.	Size, In.	Wt., Lbs.	Each
50	1/2	1/2	\$0.80
75	3/4	1	1.00

Republic Hickory Benders

For making bends of any desired radius; particularly useful for making short or close bends or for stubbing-up in concrete work.

Standard package, 1.

No.	Size, In.	Pipe Handle Size, In.	Wt., Lbs.	Each
2195	1/2	3/4	1 3/4	\$ 2.65

Ideal BX Armor Cutters

Cuts BX Armor of any make, two or three wire, in one operation. Hardened steel cutting blade is removable for sharpening or replacement.

No. 45-079 BX Armor Cutter Each \$3.95

Steel City Allen Conduit Benders

Schedule S

For Thinwall Conduit

No. 4 and 5

No. 3

Alloy-steel. Nos. 4 and 5 for true offsets, accurate stubs and perfect back-to-back bends on thinwall. No. 3 is a combination bender for thin or heavy wall.

No.	Description	Size Inches	Wt. Lbs. Each	Each
3	For EMT, or 1/2" Heavy Wall	1/2-3/4	1 3/4	\$4.20
4	End Threaded 3/4" Male	1/2	2	3.85
5	End Threaded 1" Male	3/4	4	5.00

Ideal Cable Ripper and Wire Gauge

For use on non-metallic sheathed duplex cable or lead-covered cable where outside diameter is 5/8 inches or smaller.

No. 45-018 Each \$0.43

Ideal E-Z Automatic Wire Strippers

For stripping standard lamp and fixture wire, automotive wire and all other stranded wire.

Provided with lever to stop the return of the arms until the wire is removed after stripping. This prevents crushing of stranded wire by returning stripper arm.

Suitable for stripping solid wires.

No.	Wire Gauge No.	No. of Holes	Per Pair
45-200	16 through 26	6	\$5.75
45-201	10 through 18	5	5.75
45-202	10 through 22	6	5.75
45-203	8 through 14	4	5.75
45-204	T.V.		5.75
45-205	P.W.C.		5.75
Extra Blades for the E-Z Stripper			1.15

Ideal T-5 Wire Strippers

Used for stripping, cutting and looping wires.

Sturdy, compact, constructed of hardened steel for rugged duty and long service life. Comfortable plastic

grips for sure handling and safety.

Strips wires from 10 to 18 gauge size. Has flat design to conveniently fit in pocket or tool kit.

No.	Overall Length, In.	Wt. Dz.	Each
45-120	6	5	\$1.95

Ideal Teflon Wire Strippers

Makes Teflon as easy to strip as any other insulation. Unique blade construction and extreme holding power of broad jaws permits fast, accurate stripping while meeting most rigid inspection standards—where marking of insulation must be kept to an absolute minimum. Simple one-squeeze operation — just insert wire between blades at desired length (or adjust wire stop), squeeze handle and release. Jaws snap back into position, ready for next strip.

No.	Description	Each
45-170	For Nos. 10 through 14 Wire	\$16.95
45-171	For Nos. 16 through 26 Wire	16.95
45-172	For Nos. 26 through 30 Wire	16.95
45-180	For Nos. 10 through 14 Wire (Includes Short Stop Latch and Transparent Wire Stop)..	20.75
45-181	For Nos. 16 through 26 Wire (Includes Short Stop Latch and Transparent Wire Stop)..	20.75
45-182	For Nos. 26 through 30 Wire (Includes Short Stop Latch and Transparent Wire Stop)	20.75

Ideal Stripmaster Wire Strippers

The only hand type Wire Stripper with automatic single-squeeze operation. Exclusive automatic feature holds jaws open after stripping to permit removal of wire and prevent crushing. A single squeeze of the handles strip wire clean up to a full 3/8 inch. No nicking or fraying. Blades can be changed with the removal of only two screws. Strips building, fixture or telephone wire. Automotive, radio and aviation wire, also FM and TV down lead wire.

No.	Wire Ga.	Weight Oz.	Each
45-090	8 to 10	10	\$5.75
45-091	10 to 18	10	5.75
45-092	10 to 22	10	5.75
45-093	14 to 22	10	5.75
45-095	16 or 18, and POSJ	10	5.75
45-098	20 to 30	10	5.75

Ideal Bench Type Wire Strippers

Strips solid or stranded wire up to 3/16" diam. For single conductor plastic, cotton or rubber covered wire where quantities are limited. Has 8-hole dial wire guide to center different sized wire between cutting blades.

No. 45-069 Complete..... Each \$31.80

Ideal Rotary Type Wire Strippers

Strips all types of solid or stranded wire up to a maximum of 1/2 inch outside diameter. Motor is reversible, stripping according to natural twist of wire. Wire is properly twisted and polished after stripping. Furnished with 1/8, 1/4 and 3/8-inch guide bushings.

No. 45-009 Complete, 115 v., 60 cy..... Each \$166.75

Ideal Production Wire Strippers

Ideal Brush Type

Strips and cleans enamel, cotton, silk, string asbestos and similar types of light insulation from round, flat, or rectangular wires—solid or stranded. Removes coating from "Formex" or "Formvar" wire—cleans fibre glass insulation — removes gummy insulation embedded in stranded wires.

No.	Description	Each
45-070	115 v., 60 cy., Unit complete.....	\$283.60
45-072	230 v., 60 cy., a-c Unit.....	302.65

Ideal Hot Blade Wire Strippers

Burns off insulation. Strips cotton, silk, synthetic (plastic) insulation or rubber coverings from stranded or solid conductors, that do not exceed 3/8-inches. Stripping length adjustable from 1/4-to 1 1/2-inch. Except for foot pedal, all parts are in a single unit. (Note: this unit is not suited for stripping asbestos, metallic, or other weather-proof covering.)

No. 45-073 115 v., 50-60 cy..... Each \$310.80

Ideal Lever Type Cable and Wire Strippers

Production Stripper strips single and parallel conductors and cables up to 3/8" diam. Recommended for Type S, SJ and Power Cables. Blades are available in 15 standard sizes to accommodate other sizes and types of wire.

No. 45-064 Complete..... Each \$114.65

Ideal Twin Wheel Wire Strippers

Bench Type

Quickly strips every known type of film insulation from AWG No. 50 to No. 25 wires. The fibre glass cylindrical wheels strip up to 3/4-in. from body of winding. Simplicity of operation results in increased production, fewer rejects.

No.	Description	Each
45-107	With 115 volt a-c Motor.....	\$145.00
L-5278	Replacement Wheels per pair.....	3.90

Ideal Twin Cone Wire Strippers

Bench Type

The fibre glass conical wheels of this stripper remove all types of film-insulation from AWG No. 50 to No. 25 wires efficiently without damage to wires or coils.

Designed to permit close stripping, within 1/8-in. of coils, armatures, etc.

Recommended for miniaturized components when work can be brought to the stripper.

No.	Description	Each
45-101	With 115 volt a-c Motor	\$175 00
L-5279	Replacement wheels, per pair	4 25

Hand Type

Efficiently removes film insulation from AWG No. 50 to No. 30 wire. Long flexible shaft permits portable motor to be suspended overhead. Rheostat foot pedal gives operator complete control for added out put and safety.

Fibre glass conical wheels allow perfect stripping of leads to within 1/8-in. of gang-wound coils without dismantling set-up.

Unit can be moved anywhere in the production line, thus eliminating double handling of parts to be stripped. Light-weight feature of hand stripper increases speed of operation—decreases operator fatigue.

No.	Description	Each
45-104	With 115 volt a-c/d-c Motor	\$150 00
L-5279	Replacement Wheels per pair	4 25

Greenlee Hydraulic Knockout Drivers

Specifically designed for driving the standard Greenlee Punches. Develops over eleven tons of ram pressure and easily cuts holes up to 4 1/2-in. in 10-gauge metal. Can be used even in tight places.

Consists of hand hydraulic pump, high pressure hose, 1 1/2-in. threaded sleeve, 3/8-in. stud and bushing. Pump body machined from single piece of steel with attached reservoir of steel tubing. Air locks eliminated by automatic follower. By unscrewing the steel tube it is simple to add oil.

Will handle knockout punches for cutting 1/2 to 4-in. conduit holes and all Greenlee radio punches using 3/8-in. diameter screw. Packed in strong metal case. Priced without punches. Weight, 20 pounds.

No. 7646A	Each	\$100 00
-----------	------	----------

Nye Knockout Punches

Four Point—Hydraulic

No. NHPS

All hydraulic sets furnished in sturdy metal boxes. Patented coupler in RAM connecting piston and cutter prevents damage to piston and punch. The high pressure coupler is tested to 24,000 p.s.i. Size feet of high pressure 10,000 pound hose tested for 24,000 lbs. bursting pressure.

Each set has own special ram. Capacity of rams #1 — 10 ton, #2 — 20 ton, #3 — 25 ton. Pump develops 10,000 lbs. p.s.i.

No.	Description	Each
N1HS	Cuts 1/2, 3/4, 1 and 1 1/4 in. pipe size holes in 1/8 in. steel. 3/4, 1 and 1 1/4 in. cuts holes in 3/16 in. steel. Shipping weight 6 lbs. . . .	\$52 00
N2HS	Cuts 1 1/2, 2 and 2 1/2 in. pipe size holes in 1/4 in. steel. Shipping weight 13 lbs. . . .	75 10
N3HS	Cuts 3, 3 1/2 and 4 in. pipe size holes in 1/4 in. steel. Shipping weight 33 lbs.	114 35
NHPS	Hydraulic pump complete with hose and coupler. Shipping weight 26 lbs.	56 50

Nye Knockout Punches

"Four Point" Ball Bearing—Hand Operated

No. N 1/2MS

No. N1MS

Small, light, compact punches made of highest grade steel and engineered to do the best possible work. Ball bearing equipped chuck eliminates steel on steel friction thus producing a fast, easy out. Cuts clean burrless holes thus eliminates reaming.

Four cutting points provide greater shear angle, and consequently double the number of shearing edges. Four sets available, ten different sizes.

No.	Description	Each
N1/2MS	Cuts 1/2 in. pipe size holes in 1/8 in. steel. Furnished in leather pouch. Shipping weight 6 1/2 oz.	\$5 25
N1MS	Cuts 3/4, 1 and 1 1/4 in. pipe size holes in 3/16 in. steel. Furnished in sturdy metal box. Shipping weight 3 3/4 lbs.	14 20
N2MS	Cuts 1 1/2, 2 and 2 1/2 in. pipe size holes in 3/16 in. steel. Furnished in sturdy metal box. Shipping weight 11 3/4 lbs.	45 05
N3MS	Cuts 3, 3 1/2 and 4 in. pipe size holes in 3/16 in. steel. Shipping weight 33 lbs.	86 85

Whitney Punches

Hand Lever Punches

Built for the hardest kind of service according to their rated capacity. Fine balance, simple construction make punches easy to use and keep maintenance at minimum.

All main parts of the punches are made of drop-forged high-grade alloy steel, with wearing parts heat-treated. Punches and dies are of A-1 grade tool steel, heat-treated and tempered, and are guaranteed against defects in material and workmanship.

May be furnished with button (tip) punches.

No. 1
For Punching $\frac{3}{8}$ -In. Hole Through $\frac{1}{4}$ -In. Iron

Has insertable pipe handles. Furnished complete with one punch and one die of specified size, and with die adjusting key.

Supplied with $\frac{5}{16}$ -inch punch and die, unless otherwise specified. Extra punches and dies made in squares and ovals on specification; largest size, $1\frac{1}{32}$ -in. square.

No. 2
For Punching $\frac{5}{16}$ -In. Hole Through $\frac{1}{4}$ -In. Iron

Furnished complete with one punch and one die of specified size, and with die adjusting key.

Supplied with $\frac{1}{4}$ -in. punch and die unless otherwise specified. Extra punches and dies made in square and oval on specification; largest size, $\frac{3}{8}$ -in. square.

No. 4-B
Tinners Punch for punching $\frac{1}{4}$ -in. hole through 16 gauge iron.

Furnished complete with 7 punches and 7 dies of specified size and with die adjusting key and metal box.

Unless otherwise specified, supplied with $\frac{3}{32}$, $\frac{1}{8}$, $\frac{5}{32}$, $\frac{3}{16}$, $\frac{1}{2}$, $\frac{1}{4}$, and $\frac{3}{32}$ -in. punches and dies.

No. 8-B
For Punching $\frac{1}{4}$ -In. Hole Through $\frac{1}{8}$ -In. Iron

Has side gauge marked in fractions of inches. Upper lever does not throw back to right-angle.

Furnished complete with three punches and three dies ($\frac{3}{16}$, $\frac{1}{2}$ and $\frac{1}{4}$ -in. unless otherwise specified) and with die-adjusting key.

Special square or oval punches and dies on specification; largest size, $\frac{3}{16}$ -inch square.

*Also available with three punches and dies and corrugated carton, complete \$8.50

Skylight, Ventilating and Tank Flange Punch

No. 6
For Punching $\frac{1}{4}$ -In. Hole Through $\frac{3}{16}$ -In. Iron

Particularly adapted for button punching, fastening standing seams without making a hole.

Punches within $\frac{3}{8}$ -in. of inside corner of angle iron; punch will strip where handle cannot be opened to 90 degrees.

Supplied complete with three punches and dies of specified sizes, and with die adjusting key. Unless other sizes are specified, $\frac{3}{16}$, $\frac{1}{2}$ and $\frac{1}{4}$ -in. dies and punches will be furnished.

No.	Stock Sizes of Punches, Inches	Depth of Throat, In.	Lgth. In.	Wt. Lbs.	Each

Lever Type Bench Punches

No. 91

No. 92

Provide powerful punching action for work on heavier angles and channels. Available with 5 or 10-in. throat depth.

Will punch $\frac{1}{2}$ -in. hole through $\frac{1}{4}$ -in. iron, $\frac{3}{4}$ -in. hole through $\frac{3}{16}$ -in. iron or a 2-in. hole through $\frac{1}{8}$ -in. iron. Will also punch oval holes $\frac{1}{2}$ -in. wide by 1-in. long in $\frac{3}{16}$ -in. iron.

Made of drop forged steel, with chrome-nickel cast steel jaw.

Furnished complete with one round punch and die for any one size up to $\frac{3}{16}$ -in. round, and with one bolster plate. Special shape punches and dies available on request.

†Also for angles and channels.

Notching Attachment: For making right-angle bends in angle iron up to $1\frac{1}{2}$ x $1\frac{1}{2}$ $\frac{1}{8}$ -in. each \$37.50.

Whitney Bench Punches

Lever Type

No. 93

No. 94

All parts chrome nickel drop forgings except the jaw, which is made from steel plate. Construction and capacity same as No. 91 punch. All parts interchangeable with No. 91 and No. 92 bench punch including punches, dies and bolsters. Equipped with one round punch and die up to 3/16 in. and one bolster plate.

No.	Plate, in.	Depth of Throat, in.	Approx. Weight, Lbs.	Each
93	4	18	425	\$198.00
94	6	24	675	298.50

Whitney Clip Punches

A special tool for fastening seams in duct and sheet metal work. No second operation or hammering down necessary, accurate—fast—neat; guaranteed to please.

Capacity—three thicknesses of No. 20 gauge steel. Equipped with one punch and die.

No.	Description	Length, in.	Wt., Lbs.	Each
8-C	Clip punch	18 1/2	8	\$38.00

Whitney Hydraulic Punches

No. 95A Cabinet Model

Built on same principle as the well known No. 91 bench punch but hydraulically operated. Tooling cost low, because all punches, dies, bolsters and notcher punch and die interchangeable with No. 91 punch.

Depth gauge at punch line. Can be used on channel or angle iron as well as on sheets. Operated by foot treadle.

Standard motor, 1 1/2 hp., 1750 rpm's. 110-220 volt single phase; 220-440 volt, three phase. Depth throat, 10-in.

Rated capacity 12 1/2 tons. 5/8-in. hole through 1/4-in. iron; 3/8-in. hole through 3/16-in. iron; 2-in. hole through 1/8-in. iron. 20 strokes per minute. Floor space 18 x 25 in. Weight 525 lbs.

No.	Description	Each
95A	12 1/2-ton hydraulic punch press, less motor, with one round punch, one round die, up to 9/16" round, one bolster plate, model A cabinet type.....	\$692.00

No. 95B Hydraulic Bench Punch

Same as No. 95A except for cabinet. Punch unit can be placed below, above or on either side of power pack. Standard hose 6 feet, additional lengths at slight extra cost.

No.	Description	Each
95B	Bench type, less motor.....	641.00
....	Electricals—110/220 volt (motor included)....	179.00
....	Electricals—220/440 volt (motor included)....	145.00

Whitney Chicago Steel Slitting Shears

Main frame made of one-piece steel. Lever and gear segment is one-piece steel drop forging.

Has adjustable hold down.

Capacity
3/16 x 2 In. Bars
10 gauge sheets

Chicago Steel Slitting Shear.....	Each \$39.60
-----------------------------------	--------------

Bartlett Bench Shears

For tool room, garage use and metal patterns shops. Powerful tool with steel castings used in its construction. Blades made from fine grade of crucible steel.

Designed to cut metal up to 12 gauge easily and the eccentric principle embodied makes it possible to adjust the blade to suit the operator's requirements.

Adopted for use in cutting automobile brake bands, leather belting, wire cloth and strip metal. In order that wide sheets may be handled to advantage, tool designed to allow the sheared portion to clear the knife freely.

Blades adjusted by means of a taper wedge.

No.	Length, Inc. Handle, In.	Length Blade, In.	Wt., Lbs.	Each
20	13 1/2	3	24	\$45 00
25	17 1/2	4 1/2	40	60 00

Made with the Bartlett compound lever principle. Constructed of well designed steel casting with all parts interchangeable for duplicate shears. Blades are solid crucible tool steel 1/32-in. thick. Blades run full length of the jaw, including pivot hole, so that the bearing back of this point is on hardened steel. Can be removed for sharpening when desired.

Will cut 12 gauge steel easily and the arrangement of the jaws allows a full sheet to be handled to advantage.

Furnished with either right or left hand cut.

No.	Length Overall, In.	Length Blade, In.	Length of Cut, In.	Wt., Lbs.	Each
30	33	8	4 1/2	17	\$50 00

Greenlee Knockout Cutters

Enlarges knockouts to take 1 1/2, 2, 2 1/2 and 3-in. conduit by cutting holes 1 3/8, 2 3/8, 2 7/8 and 3 1/2-in. respectively.

Cutting is done by drive action of two wheel cutters. Operation is simple; an ordinary wrench drives the tool. Packed in leather case. Weight, 4 1/2 lbs.

No. 740.....Each \$17.50

Greenlee Radio Chasis Punches

Round

Cuts clean accurate round holes in radio chassis for connectors and other receptacles. Operates simply with ordinary wrench for drive power. No reaming or filing. Hole is smooth and perfect.

Thirteen sizes from 1/2 to 2 1/4-in. diameter. Packed individually in boxes.

No.	Punch Sizes, Inch	Each
730	1/2, 5/8, 11/16, 3/4, 13/16, 7/8.....	\$2.60

Blackhawk Porto-Power Hydraulic Equipment

Knock-Out Punches

For pull boxes, cabinets, troughs, panels. Work in cramped quarters and punch clean holes exactly where you want them. No distortion or loosening of boxes. Kit includes punches and "pull-ram" for use with the same "Porto-Power" hydraulic pump and pressure hose serving Blackhawk benders.

No.	Description	Each
SB-62	Kit—punch conduit openings from 1/2 to 4-in. Weight 60 lbs.....	\$234.00
SB-61	Kit—punch conduit openings from 1/2 to 2-in. Weight 30 lbs., 2 oz.....	124.85

Electrically Driven Pumps

Helps you install conduit up to 3 times faster. Converts hand-operated hydraulic equipment (such as benders and knock-out punches) into speedy, electrically driven equipment. Can be used on benders other than Blackhawk type. Prevents fatigue and loss of efficiency. Pushbutton action permits continuous output. Adaptable to all popular types of current. Wt., 90 lbs.

No.	Description	Each
P-182	With a-c motor.....	\$355.00
P-254	With d-c motor.....	467.50

"Featherweight" Pipe and Conduit Benders

Makes 90 degree bends in one setup. Completely portable. Bending frame weighs only 16 1/2 lbs. Frame, swivel and bending shoes are rigid lightweight aluminum. Degree of bend constantly indicated with Optik Angle gauge. Speeds making 180° bends, double offsets, compound bends. Removable top plate. Lock-on bending shoes eliminates threading. Bends 1/2-in. through 2-in. pipe and rigid conduit.

No.	Description	Each
S-130	Weight 111 lbs., 7 oz.....	\$218.90
S-132	Same as above but has speedy electric P-182 Pump.....	546.00

Blackhawk Rigid Pipe and Conduit Benders

It is now possible to make 90-degree bends through 3-in. pipe and rigid conduit in just one setting—only three quick setups through 4-in. Modeled after S-130, all units are completely portable. Easy-to-read Optik Angle gauge eliminates multi-setups, assures perfect bend everytime.

All models constructed of rigid, lightweight aluminum. All have removable top plates. Newly designed ram has longer stroke, requires less effort. Ram works in any position, upright, vertical, overhead—all angles.

No.	Description	Each
S-137	Bends 1 1/4-in. through 4-in. pipe and rigid conduit. Includes P-80 pump.....	\$621.50
S-138	Bends 1 1/4-in. through 3-in. pipe and rigid conduit. Has P-80 pump.....	522.50
S-139	Same as S-138 except includes P-182 electric pump for production bends.....	803.00

Appleton Utility Tools

Schedule TW

For use with Compression-type Couplings, Connectors, and Appleton 2-Piece Connectors.

Combines a unique non-slip wrench and a handy de-burring tool for smoothing

both inside and outside of freshly cut thin wall conduit.

All steel, smoothly finished for comfortable gripping and scientifically balanced for proper leverage. Has case hardened replaceable plate for the de-burring and non-slip sections.

The non-slip plate holds wrench positively on the individual nut to be tightened and will not slip from one nut to another. Rough edges of pipe are rotated in the V-shaped slots of the de-burring plate.

No.	For Conduit, In.	Length, In.	Wt., Lbs. Each	Each
TW-W5075	1/2 and 3/4	8 1/4	1	\$4.00
TW-W1125	1 and 1 1/4	14	1 1/2	6.25

**T&B Combination Wrench and Reamer
For E.M.T.**

A combination tool, extremely handy for all 1/2-inch and 3/4-inch E. M. T. installations. The same tool tightens the glands on couplings and connectors, removes burrs from tubing, and reams edge of conduit. Drop-forged steel, heat-treated and tempered.

No. 33.....Each **\$2.02**

T&B Fish Tapes

Furnished with patented ball-points which enable the wire to turn sharpest bends with ease.

Wire has rounded edges; made of best grade of tempered steel, insuring strength and flexibility.

Furnished in 50, 100, 150, or 200-ft. coils. Standard package, 1000 feet.

No.	Size Inches	Per 100 Ft.	No.	Size Inches	Per 100 Ft.
3600	1/8 x .030	\$5.75	3602	3/16 x .060	\$10.60
3601	1/8 x .060	8.50	3603	1/4 x .060	13.80

T&B Fish Tape Balls

For use with any standard make of fish tape. Consists of threaded insert and ball. Tape is installed in slot in insert; ball is then screwed onto insert.

Unit quantity, 10; Standard package, 50.

No.	Description	Wt., Lbs. Per 100	Per 100
3615	1/8 x .060	2	\$80.00
3616	3/16 x .060	6	96.00
3617	1/2 x .060	6	96.00

Barth Snake Charmers

"Leads" flat fish tape through conduit having twists between 90° bends. Tapered for maximum flexibility which helps on many impossible pushes. Makes any push easier.

Complete with wrench for fastening to flat fish tape.

No.	Description	Each
120	For tape 1/8-in. wide.....	\$3.90
121	For tape 1/4-in. wide.....	4.08

Klein Chicago Fish Tape Pullers

A simple, husky come-along for fish-tape.

Fish-tape slips sideways into slot and a ratchet wheel assures a strong, positive grip. For a new bite slide the puller forward on the tape. Simple, strong, automatic . . . grips like a vise . . . never slips. Will not injure tape. Pocket size.

No.	Description	Each
1629	For Std. fish-tapes.....	\$1.80
1629-A	For No. 12 iron wire.....	1.80

**Steel City Fish Wire Pullers
Schedule S
Red Head**

Operates on lever principal, guard holds wire in place and it is not necessary to remove wire to secure new grip. 6 1/2-inches long, 2 1/4-inches wide.

No.	Std. Pkg.	Wt., Lbs. Each	Each
15	5	1	\$2.00

Ideal Fish Tape Pullers

Mechanical advantage of 2 1/2 times for tough pulling jobs. Tapes "frozen" into conduit can be readily freed with this new tool.

This tool pulls tape and presses the box or other outlet firmly against wall or structural member—no chance of pulling outlet loose.

Can be used in outlet boxes, fuse boxes, large pull boxes, large & small conduits—wherever there is a tough wire pulling job.

No.	Description	Each
31-185	Fish Tape Puller.....	\$20.50

Ideal Fish Tape Reels and Pullers

For building construction and industrial work. Reel serves as handle to give firm grip in pulling on fish tape, eliminating special pullers, or dangerous bare-hand pulling.

Keeps tape fully protected. Tape is locked in reel when not in use and can not spring loose. Nine stock sizes of complete Fish Tape, Reels, and Pullers.

No.	Length and Size of Tape	Each
31-007	50 ft. x 1/8 x .015 (3/64").....	\$ 3.00
31-008	50 ft. x 1/8 x .060 (1/16").....	4.40
31-009	100 ft. x 1/8 x .060 (1/16").....	7.45

31-016	200 ft. x 1/8 x .060 (1/16").....	10.95

Ideal Round Fish Tape

Constructed for use in small conduit (1/2-in. and less). Easily goes through small radius bends.

Has less friction-resistance than flat tapes so it can be readily pushed or pulled through conduit. Rolls onto reel without kinking or binding.

Tape is .080-in. in diameter with Fish Tape Ball on one end which lets it swivel and turn.

No.	Description	Ship. Wt. Lbs.	Length Ft.	Each
31-191	Tape with Reel	5	100	\$8.45
31-195	Round Tape & Ball.	1 1/2	50	2.90

31-197	Round Tape & Ball.	5 1/2	200	7.40
31-084	Fish Tape Ball for Round Tape.			1.15

Ideal Fish Tape

Highest grade tempered spring steel is used. No curling. Flexible and easy to use on long runs of conduit having several bends.

No.	Length and Size of Tape	Each
31-004	50 ft. x 1/8 x .060 (1/16")	\$ 1.65
31-036	100 ft. x 1/8 x .060 (1/16")	2.95
31-038	200 ft. x 1/8 x .060 (1/16")	5.70
31-050	100 ft. x 1/4 x .060 (1/16")	4.65
31-052	200 ft. x 1/4 x .060 (1/16")	9.30
31-078	50 ft. x 1/8 x .045 (3/64")	1.35
31-079	100 ft. x 1/8 x .045 (3/64")	2.45

Ideal Fish Tapes

Nylon Covered

Nylon-insulated Round Fish Tape gives more protection to workmen and equipment than bare fish tape when pulling new wires into live panel boards, switches and other "hot" equipment.

Wire is .080-in. in diameter and nylon is .020-in. thick. For easy turning and swiveling, tape has special Fish Tape Ball.

No.	Description	Ship. Wt. Lbs. Oz.	Length Ft.	Each
31-211	Nylon Covered Tape & Reel.	4 12	100	\$15.80
31-215	Nylon Covered Tape & Ball.	1 9	50	7.30
31-216	Nylon Covered Tape & Ball.	2 9	100	10.70
31-217	Nylon Covered Tape & Ball.	4 10	200	20.90

Ideal Coil-Flex Fish Tape

For all types of conduit. The Ideal Coil-Flex is extremely flexible; can be pushed or pulled with little effort through any and all bends allowed by the electrical code. Positively prevents cutting or damaging of aluminum. Ends are smooth and round to avoid catching or snagging.

The Coil-Flex consists of a 25-ft. length of steel spring 1/2 inch in diameter with a rustproof inner steel cable. A male fitting on one end and a

female fitting on the other makes it easy to join together two or more lengths for jobs requiring a longer tape. Easy on the hands, it gives a safe, positive grip. Every Coil-Flex is factory inspected and tested at 400 pounds pull.

No. 31-081	25-ft. length.	Each	\$9.60
------------	------------------------	------	--------

Ideal Fish Tape Winders

A new tool designed to make the Ideal Fish Tape Reel and Puller still easier to use.

As the Winder handle is pulled around the Reel, a wheel spreads the reel housing allowing the fish tape to wind or unwind easily. Tape can be reeled in or out with less effort.

Three sizes available for all Ideal Fish Tape Reels.

No.	Description	Each
31-180	For Reels No. 31-007 & 31-008.	\$2.90
31-181	For Reels No. 31-009, 31-016, 31-191 & 31-211.	2.90
21-182	For Reel No. 31-011.	2.90

Ideal Fish Tape Leaders

"Guides" flat fish tape easily around bends in conduit—allows the tape to slide without jamming or binding around 90° bends. Leader fastens easily to flat tape. Factory tested for 400-lb. pull.

No. 31-082	20 in. Leader.	Each	\$4.20
No. 31-083	Fish Tape Ball.	Each	1.15

Steel City Fish Wire

Schedule S

Flat shape increases flexibility. Efficient for conduit having several bends and is stiff enough for pushing through long runs.

Tempered wire does not have tendency to curl after constant use. Furnished in an assortment of cut lengths, in coils of 100 feet or more, or in reels holding from 2,000 to 4,000 feet according to size of wire. Various sizes may be combined to obtain lowest price.

G-E Soldering Irons

Cutaway view of Industrial Soldering Iron, 6A161 and 6A162 Series

Cutaway view of Industrial Soldering Iron 6A200, 6A201 and 6A202 Series

Highly efficient for all work requiring soft soldering. Recommended for continuous production soldering as well as for intermittent duty.

Available with the following features:

Calorized Copper Tips: Durable, interchangeable, designed for extra-long life. Calorized coating retards corrosion and oxidation, prevents freezing of tips to tip holder, slows pitting action of solder and flux on body of tip, and increases tip life.

Ironclad Copper Tips: Last up to 10 times longer than conventional tips. For high-speed, repetitive soldering. Affords greater protection in use with solder having minimum of 35% tin. Prevents amalgamation of tin with copper for extra-long life.

Illustration at left shows effect of solder (250° C. for 363.5 hours) on plain copper (left) and Ironclad copper (right) soldering tips.

Heating Elements: Provide quick, dependable heating.

Heat-resistant Shell: Provides high corrosion resistance and low heat loss.

Handle: Cool, easy to grip.

Cord Strain Insulator: Will withstand pull of 35 lbs.

§Includes 6-ft. integral cord set.

American Beauty Electric Soldering Irons

Transformer Type

No. T-30

Designed primarily for production line use, it is intended for heavy duty, fine, precision soldering requiring extremely high tip-temperatures constantly maintained.

Tip-elements made of ARMCO ingot iron brazed to stainless steel casings — are pre-tinned, will maintain their shape. Split-collet receptacle in handle permits quick change of tip-elements, either hot or cold with transformer remaining connected to outlet.

Has heavy duty, adequately ventilated transformer 110-120 or 220-240* volts (a-c only). 12 volt output, 30-watt maximum capacity, 2500 volt-insulation.

Equipped with 7-ft., Type SV, rubber-covered cord. Handle constructed of bright red, hi-impact thermo-setting plastic.

No.	Tip Diam. In.	Watts	Overall Length In.	Wt. Lbs.	Each

*On special order. No extra charge.

American Beauty Electric Soldering Irons

Bantam

No. 3118-SC

Lightweight irons with flared handles protect hand of user from coming in contact with casing of hot iron.

Especially designed for the electronic trade. Available for 110 volts only. Diamond point tips standard. Equipped with chisel type if specified.

Stainless steel casing; nickel-chromium heating element, mica insulated. Equipped with 6 foot Type HPD super-flexible heater cord and Sta-tite rubber attachment plug-cap. Type SV rubber-covered cord also available. Separate heat-insulating stand supplied with each iron. For a-c/d-c use.

Angle-Type Casing

Designed and intended especially for use on soldering jobs difficult to accomplish with conventional straight-casing soldering irons.

Streamlined, one-piece, projection-free casings, highest grade material throughout.

All irons equipped with attached 6 foot Type HPD heater cord and Sta-tite rubber attachment plug-cap.

Diamond point tips standard. Equipped with chisel point if specified.

Available with rubber-covered cord, also 3 conductor cord either HPD or SJ or HSJ at additional charge.

Nos. 3118-A and 3120-A: For use in television, radio, radar and similar lines of work.

No. 3128-A: Intended for servicing TV, electronic and radio equipment and similar work.

No. 3138-A: Designed for production and maintenance in TV, radio, telephone, telegraph, ignition, switchboard and telephone installation work and similar applications.

*Available in 40 watt input. **Available in 150 watt input.

Transformer Type Electric Soldering Iron For Precision Soldering

For fine precision soldering on miniature and sub-miniature electronic components and similar assemblies. Equally adapted to other light soldering operations.

Tip elements are extremely quick-heating. Heavy duty type transformer. Equipped with 7 ft. Twin-parallel thermoplastic cord.

110-120 volts a-c only. Diamond point tip standard. Specify if chisel point is desired.

No.	Diam. of Tip, In.	Watts	Lgth. O.A., In.	Net Weight Lbs.	Oz.	Each

Note: Specify number and diam. of Tip when ordering.

American Beauty Electric Soldering Irons

3128 3138 3158 3178 3198

Sturdily constructed of fine material. Will withstand for long periods the hard service of industrial usage.

For use on either alternating or direct current.

Solid steel rod core wound with chrome-nickel ribbon resistance wire, mica insulated. Metal outer casing and shank.

Equipped with attached 6 ft. length of Type HPD super flexible heater cord and Sta-Tite rubber attachment plug cap. Available also with 3 conductor cord, either Type HPD or SJ or HJS, one wire grounded without attachment cap at additional charge.

Equipped with heat insulating stand. 110 volts.

No. **3128**: For servicing TV, electronic and radio equipment and similar light work. Also available with angle-type casing covered by No. 3128-A.

No. **3128**: For production and maintenance in TV, radio, telephone, telegraph, ignition, switchboard and telephone installation work and similar applications. Popular as a general purpose iron for home use. If angle-type casing is required order No. 3138-A.

No. **3158**: For same general uses as No. 3138 but for those particular applications that require an iron of greater heat capacity and larger tip.

No. **3178**: For still heavier work than that for which the No. 3158 is adapted; for medium-heavy soldering of all kinds.

No. **3198**: For use on the very heaviest soldering operations.

*A modified model of standard No. 3138 is the No. 3138-X. Equipped with 175 watt heating element and tip of 3/8-in. diameter. Intended for special applications on production lines of radio, television and electronics plants. Recommended that it be placed only on production lines where high soldering rates are maintained. Price \$11.03. The No. 3138-XY same as No.3138-X except equipped with tip of 1/4-in. diameter. Price \$11.03

Pencil Type

Designed especially for the electronics industry. Equally adapted to many other uses where fine or extremely intricate connections necessitating fast, precision soldering are required.

Lightweight, rugged construction. Hi-heat output, ultra fast recovery. Streamlined, satin finished stainless steel casing. Unique, simple tip-element holding method. Cool, comfortable, resilient, pencil-type handle. 110 volts only.

Equipped with attached 6 foot length Type S-P-1 rubber covered heater cord and molded-on rubber plug cap. Separate heat-insulating stand supplied with each iron.

American Beauty Temperature Regulating Stands

Automatic device for controlling tip temperature of electric soldering iron while iron is connected to current.

Sturdy base made from high-impact heat-resistant, shatter-proof plastic. A steel covering plate encloses bottom to protect connections and thermostat

Enameled steel adjustable handle support-bracket provides a sure, safe and easy rest for the handle of soldering iron. Cradle of stand is of high-heat conductivity cop-

per-alloy for maximum transmission of heat from casing of soldering iron to thermostat of stand.

Designed for use with electric soldering irons from 80 to 660 watts output. Equipped with 6 foot HPD super-flexible heater cord and Sta-Tite rubber attachment plug-cap. Available with 3 conductor cord either HPD or rubber covered SJ or HJS and 3 prong attachment plug-cap; also grounding receptacle. Both may be had at additional cost.

Standard Copper Tips For American Beauty Electric Soldering Irons

Diamond Point

Chisel Point

Made from commercially pure drawn copper rod, heavily nickled to resist corrosion and oxidation. Plug type.

Tip lengths are proportioned to size of the iron for which they are intended. All available in either diamond or chisel point.

Their heat-transfer qualities are such that their basic design has remained virtually unchanged. Plug type tip and set-screw method of holding it in casing of the soldering iron allows quick and easy removal for replacement or cleaning purposes.

Vulcan Safety Soldering Iron Holders With Thermostatic Control

No. 2100-T

Holds and guards soldering iron and keeps tip at soldering temperature while in stand. Prevents overheating, tips retain tinning, saves current and assures long life of iron.

When iron is removed from holder full current is automatically applied. Adjusting screw on bottom of holder for setting thermostat to maintain proper temperature for iron used. Complete with cord and attachment plug for connection to current, and receptacle for plugging in soldering iron.

Cast iron stand, with slip-proof feet. Protecting cage made of expanded steel.

For Use on A-C Only

No. 2100-T—As described; weight 4 lbs..... each \$7.30
No. 2100—Without thermostatic control; weight 3 3/4 lbs..... each 4.50

Vulcan Electric Soldering Irons

Approved by Underwriters' Laboratories, Inc.

These high powered irons are light in weight and have the hang or balance which makes them convenient to use. Very efficient; will produce maximum work for current used.

Made of the best grade materials obtainable for the purpose; finest forged copper tips; steel element housing and tube; selected birch handles shaped to fit the hand; fireproof terminals. Fitted with 6-ft. heater cord and unbreakable rubber plug.

Screw Tip Type

Plug Tip Type

Nos. 20 and 25—For fine instruments, small fuses, light telephone repairs, radio and all very light soldering.

Nos. 30 and 35—For radio and home use, fuses, instruments, inspectors' or linemen's tool kits, etc.

Nos. 40 and 45—High speed tools; for telephone switchboards, electrical instruments, light manufacturing, fuses and radio apparatus.

No. 453—For high speed soldering for radio, television and electronic assembly and parts.

No. 50—For fast telephone work, art glass, light tinware and general home use.

Nos. 55 and 60—For light automobile repairs, light tinware, general utility and home use.

Nos. 70 and 75—For medium tinware, general manufacturing, metal patterns, automobile work, etc.

No. 80—For heavy tinware, sheet steel and galvanized iron, metal boats, refrigerators, automobile radiators, roofing, etc.

No. 90—For automobile radiators, copper sinks, roofs, leaders, heavy metal patterns and all heavy soldering.

No. 900—For extra heavy soldering.

For Operation on A-C or D-C—Specify Voltage

Unique Soldering Copper Handles

Air-Cooled

Hardwood handle, cool and safe. Clings to the soldering copper shank. Piano wire grip, expands and contracts as the iron heats and cools and prevents charring of wood. Ample air circulation over the entire length of shank. Easy to attach—simply drive the handle over the pointed shank.

Handle 6 in. long, 1 1/4 in. diameter.

No.	For Shanks, In.	Each
1	1/16 to 3/8	\$2.90
2	3/8 to 1/2	3.30

Vulcan Industrial Soldering Pencils

No. P314

The new "Dart" industrial soldering pencil is a heavy duty tool recommended for rapid, continuous production line work on electrical or electronic components and assemblies. Weighs only three ounces, less cord.

Slim tapering plastic handle with pencil grip stays cool even after eight hours of continuous use.

Easily replaceable plug type tips held in place in tip chamber with nonoxidizing set screw. Heating elements replaceable.

Equipped with 6-ft. approved rubber cord and plug cap. Operates equally well on a-c or d-c current.

Standard voltage 110/120.

Special features available: odd tip sizes and shapes and three wire cord and attachment plug.

No.	Watts	Tip Diam. In.	Ship. Wt. Lbs.	Each	Tips	Heating Elements

12-156	1/8-in. Double Carbon Attachment.....	7.90
12-157	.062 Double Metal Attachment.....	7.90

Chisel Tip Irons are also available.

Ideal Thermo-Grip Soldering Tools

1000 Watt Standard Model

Faster
Safer
Easier

1000-watt model Thermo-Grip is adaptable to practically all soldering jobs—closely grouped parts, difficult positions, cramped spaces, inflammable surroundings. Does all type of soldering quicker, safer and easier. Heats instantly and concentrates heat only on the part to be soldered. Eliminates fire hazard and danger of melting nearby joints or burning other parts. Does not oxidize the tin in solder, weaken the solder, or discolor the finished job. Reaches soldering temperature in less than one minute. Handy thumb-switch permits close heat control for better soldering. All parts are fully insulated. Current is reduced to harmless low voltage. Operates on resistance heating principle. Can be used for long periods of time without overheating.

Attachments

Plier Attachment (Illustrated above with Power Unit)—for soldering applications—where work may be held in jaws and heated; i.e., removing or applying solder lugs, sweating and unsweating copper tubing and fittings. Carbons are replaceable. Rating: 1000 volts amps.

Fork Attachment—for soldering in restricted spaces—where straight tools cannot be used; i.e., soldering lugs, terminals or connections in switch boxes, switchboards, inside machines, etc. The electrode holders can be turned locked in any position. Rating: 600 volt amps.

Pencil Attachment—for spot soldering—where ground clamp may be attached to a metal part of work to complete secondary circuit; i.e., spot soldering, soldering sheet metal, wire joints, commutator risers, etc. Includes "C" type ground clamp. Rating: 600 volt amps.

No.	Description	Each
12-094	Deluxe Set—includes Power Unit, 115 v., 50-60 cycle, Secondary Leads and Plier Attachment—complete with Thumb-Switch.	\$86 20
12-067	Plier Attachment Only.	12 95
12-068	Fork Attachment only.	14 55
12-069	Pencil Attachment only.	10 20

Call Graybar **FIRST** For . . .

Ideal 450-Watt Model Thermo-Grips

Heats 1/2-inch copper tubing to soldering temperature in 40 seconds using 40-60 solder. Handles solder lugs up to 225 amperes.

Heats quickly — has thumbswitch for close heat control — modern in design, light-weight, compact — can be used with ease and safety on small parts, wires, terminals, lugs, copper tubing up to 3/4-inch, etc.

Safe — all current carryings parts fully insulated.

Attachments—identical to 1000 Watt Unit except proportionately smaller in size. When ordering specify (1) Power Unit; (2) Secondary Leads; (3) Attachments desired.

No.	Description	Each
12-072	Power Unit only 115 v., 50-60 cy.	\$50 85

12-079	Pencil Attachment only.	8 40

Heavy Duty Model

Designed for big soldering jobs. 2500 watt capacity. Stud type lugs for attaching secondary leads. Has Hi-Lo heat switch Hi—2500 watts intermittent, Lo—2125 watts.

Has Plier Attachment for soldering lugs up to 1050 amp.

size, making stator connections, sweating copper pipe and fittings up to 4-in. diameter with soft solder.

12-115	115 v., 50-60 cycle, Power Unit.	\$110 90
12-116	230 v., 50-60 cycle, Power Unit.	114 35
12-120	Heavy Duty Plier Attachment.	56 05

WEN Soldering Guns

Model 250

Heats instantly in 3 seconds. Heat capacity up to 250 watts, 120 v., a-c only.

Rigid, nickel-plated "long reach" tip fits into tightest corners. Tip designed so that with normal operation it will remain tinned indefinitely, burning and corrosion materially retarded.

Has built-in spotlight for greater visibility.

Sturdily constructed Black Ebony finished handle and case both heat and shock resistant.

No.	Units Per Carton	Ship. Wt., Lbs. Per Carton	Each
250	3	12	\$12 95
25A4	Standard Soldering Tip (one in an envelope) .25		
25X20	"Feraloy" Long-Life Tip (one in an envelope) .50		
25C1	Plastic Tile Cutting Tip (one in an envelope) .50		
25-F-33	Flat Iron (Dent Removing) Tip (one in an envelope) (Same as 28-F-33) .60		

WEN Soldering Guns

"Quick-Hot"
120 V.A.C.—60 Cycle 1.1 Amp. Max.

Constructed with new type steel nose long-life tips, extra long and narrow making it easy to reach tight spots. Tips easily removed by loosening set screws. Heats working hot in 2½ seconds. Built-in spot light angled to focus light on work at tip. Light, small slips readily into tool kit or pocket. Sturdy molded, red cherry handle and case, both heat and shock resistant.

No.	Overall Length, In. Without Tip	Units Per Carton	Ship. Wt., Lbs. Per Carton	Each
199	5	6	15	\$7.95

Model 199K Home Utility Kits

This kit includes: Model 199 Gun with 1 long-nosed Soldering Tip No. 19-B-4; plastic Tile Cutting and Putty removing Tip No. 19-C-1; Flat Iron Tip for removing dents from wood and many other uses No. 19-F-33; package 5-in. Rosin Core Solder.

Kit box constructed of heavy gauge metal. Order in multiples of six.

No.	Units Per Carton	Ship. Wt., Lbs. Per Carton	Each
199K	6	24	\$9.95
19-B-4	Long-Life Soldering Tip (one in an envelope)		.50
19-C-1	Plastic Tile Cutting Tip (one in an envelope)		.60
19-F-33	Flat Iron Tip (one in an envelope)		.60

Heavy Duty Model 288

Delivers a large volume of heat; over 200 Watts. Working hot in less than 5 seconds. Has Silver-Plated Tip and Connectors to insure positive electrical contact. Equipped with a rigid, long nose, long-life heavy gauge steel nose tip. Has built-in spotlight angled to focus light on work without shadow.

Operates on 110-120 v. 60 cycles a-c only. 2 amps. max. Furnished with 6-ft. Prenex cord with molded plug. Approved by Underwriters' Laboratories. Provided with high impact, shatter proof, Ebony Black plastic handle and case.

No.	Overall Lgth., In. With Tip	Units Per Carton	Ship. Wt., Lbs. Per Carton	Each
288	9½	3	10	\$9.95
28-C-4	Long-Life Soldering Tip (one in an envelope)			.60
28-C-1	Plastic Tile Cutting Tip (one in an envelope)			.60
28-F-33	Flat Iron (Dent Removing) Tip (one in an envelope) (Same as 25-F-33)			.60

Chromalox Electric Metal Melting Pots

Shows 3-Heat Switch and Flexible Conduit Furnished with P-15, P-25 and P-50

Type P—For Soft Metals

For melting solder, lead, babbitt metal, tin and type metal (other than zinc).

High grade nickel-chrome cast iron pot, with heating elements clamped to bottom or sides totally enclosed by sheet metal jacket and insulating material. The location of heaters leaves interior of pot free for maximum capacity.

Maximum safe operating temperatures: Type P8 to P50, 750°F with or without control; larger sizes 900°F.

Controls—Types P15 to P50 have 3-heat manual switch mounted on a conduit box, with 3 ft. flexible conduit. Type P8 is supplied with 3 ft. flexible conduit and an armored attachment plug for single heat operation only.

Type P100A to P750 must be controlled by a thermostat and magnetic contactor to prevent excessive temperature. (For prices of Model MS Control and Magnetic Contactor contact Graybar).

For 115, 230 and 460 Volts, Single Phase, A-C or D-C

General Electric Metal Melting and Glue Pots

For Soft Metals

No. 2881146

Nos. 2666404 and 2666407

For melting lead, babbitt, tin, solder, type metal and similar metals at a temperature up to 950°F.

Zinc (spelter) should not be used in these pots as that metal will erode cast-iron. For these metals the jacketed-type pot is recommended. Lead is usually used in the jacket with cast-in heaters immersed in lead.

Some of the applications are dip soldering of subassemblies, pretinning before soldering, can soldering, remelting metal, curing rubber hose, storing molten metal, etc.

Other applications—railway repair shops, electric service shops, newspaper and printing plants, tin-plating shops, storage battery manufacturing plants, auto-body repair shops, bearing and fitting manufacturing plants and foundries.

Maximum Operating Temperature, 950° F

Vulcan Electric Glue Pots

Water Jacket Type, with Thermostat Control

Will hold glue to a maximum temperature of 150° F. The liquid heating medium used in these pots permits controlled transfer of heat to the glue without danger of localized over-heating which safeguards the quality of the adhesive.

Heavy cast aluminum with attached base. Aluminum inside pot or bowl. Heated with long-life, flat, enclosed replaceable heating elements. Complete with 6-ft. Underwriters' listed heater cord.

For 110-120 or 220-230 Volts A-C or D-C
(Please specify voltage and whether for A-C or D-C)

Unique Balanced Ladles

Air-Cooled

Makes it possible to pour metal drop by drop or in a steady stream, exactly where wanted. The positive "close-to-bowl" grip on the cool wood handle reduces overhang to a minimum, eliminates strain, and makes it easy to direct and control flow of the molten metal.

Pressed steel ladle, treated to prevent sticking of solder. Wood handle inexpensive and easy to replace.

Diam. Bowl, in.	Capacity, Pints	Weight Each, Lbs.	Each
3	1/8	3/4	\$3.90
3 1/2	1/4	7/8	4.20
4	3/8	1	4.40

G-E Industrial Heating Thermostats

Type "N"

Type "S"

General-purpose industrial thermostat, diaphragm-type; maximum temperature of thermostat is 700 F. Supporting base constructed of steel; cover is pressed aluminum.

Switching mechanism is double-pole, single-throw, snap-action construction. Contacts close at temperature below dial setting and open when dial temperature is reached.

Has Underwriters' approval, except for d-c operation with capacitors.

Two types of cases available: Type S (screwdriver adjustment) in the 30-110 F. range. Type N (knob adjustment) for all other listed ranges. Bulbs will stand 400 lbs. per sq. in. external pressure.

Approximate shipping weight is 4 lbs.

*Thermostats with normally open contacts or for d-c operation are available at slightly higher cost.

Dillon Wiping Solder Thermometers

For obtaining the correct temperatures of wiping solder, compounds, impregnation and cable damming waxes, paraffin, etc. Stainless steel, with 2 1/4 in. easy to read dial. Stem 7 1/16 in. long, 5/32 in. diameter. Working range from 200° to 1000° F.

No. **DWST**—Weight each 3 ozs. Each **\$7.25**

Babcock Safety Step Ladders

**U-L Inspected
Twin-Front**

Heavy Duty Industrial

Perfect stepladder for maximum convenience.

Twin-front safety steps provides 1-in. thick steps on both sides of ladder. Bottom steps braced with steel.

Equipped with heavy duty steel spreaders and heavy duty "U" hinges.

Truss blocks; 1/4-in. steel rods.

Steps 1 x 3 3/4-in., rails 1 1/16 x 3 1/4-in.

Ladders available in sizes from 4 to 12 feet.

Length, Feet. 4 to 12

Length, Feet. 14 to 16

Length, Feet. 18 to 20

Safety Type

Light, durable air-dried 1 1/4-in. lumber, with strong oval hickory bars on back legs.

Front risers 1 1/16 x 3 1/4-in.; back legs 1 1/16 x 2 1/2-in., with bars 1 3/16 x 1 3/4-in. Steps 1 x 3 3/4-in.

All steps are reinforced with a strong steel rod with wood block to form a truss. All parts are heavily riveted. Hinges and spreaders 1 1/4-in. iron. Back section rung braced each 4 ft. of ladder length. Front section bottom step braced.

Lengths, Ft.: 4, 5, 6, 7, 8, 10, 12, 14, 16, 18, 20.
Prices on application.

Babcock Safety Step Ladders

Mechanics

U-L Inspected Through 12 Feet

For use by electricians, carpenters, painters, masons and mechanics generally.

These ladders are made of light, durable air-dried lumber, with strong hickory rungs on back legs.

Front risers 1 3/16 x 3 1/4-in.; back legs 1 1/16 x 2 1/4-in., with 1 1/8-in. rungs. Complete with bucket shelf.

Steps are 1 3/16 x 3 3/4-in. reinforced with a strong steel rod with wood block in center to form a truss. Strong, durable hinges or ears, securely riveted. All metal parts are zinc plated to prevent rust.

Back section rung braced each 4 ft. of ladder length. Front section every other step braced.
Length, Ft. 4 to 10 12 to 16

Babcock Platform Step Ladders

U-L Inspected

Heavy Duty

A safe, practical ladder for overhead work, especially in schools, churches, stock rooms and theaters. Also for sign work and on ships.

Light, durable air-dried lumber with strong oval hickory bars on back legs.

Front risers 1 1/16 x 3 1/4-in.; back legs 1 1/16 x 3 1/4-in., with bars 7/8 x 1 3/4. Steps 1 x 3 3/4-in.

All steps are reinforced with a strong steel rod with wood block to form a truss. All metal parts are heavily riveted, zinc plated to prevent rust.

Large	For 2-Section Extension Ladders from 30 ft. up to and including 40 ft.....	3.50
	For all 3-Section Extension Ladders up to and including 60 ft.....	3.50
	For Straight Ladders from 21 ft. up to and including 30 ft.....	3.50
Large Plus	For 2-Section Extension Ladders from 42 ft. up to and including 50 ft.....	3.50

NOTE: When ordering safety feet be sure to stipulate size and type of ladder for which the feet are intended.

Ideal Commutator Resurfacers

Hand Type Resurfacers

Equipped with various style handles to meet conditions in any commutator or slip ring. Simply hold against the commutator as the motor turns over.

Pencil Type

For fans, auto generators, locomotive headlight motors and other fractional hp. motors.

No.	*Grade	Size	Each
80-075	X,C,M,F,P,E	5/8 x 3/8 x 6	\$1.05

Fan—Small Motor Type

Has a medium-grade stone on one end and a finish-grade stone on the other end of the handle. For use on small fractional hp. motors.

No.	*Grade	Size	Each
80-012	A,B,D,G,II	3/4 x 1/2 x 3/8	\$1.65

Pocket Type

A handy "two-in-one" utility tool. Available in any two grade combination. Especially designed for use on small fractional hp. motors.

No.	*Grade	Size	Each
80-112	A,B,D,G,II	2 x 1 x 6	\$5.30
80-137	A,B,D,G,II	2 x 1 x 8	7.05

Straight Handle Types

Used primarily on inaccessible types of commutators on small enclosed motors.

No.	*Grade	Size	Each
80-155	X,C,M,F,P	1 x 1 x 1	\$1.65
80-165	X,C,M,F,P	1 x 1 x 2	1.65
80-174	X,C,M,F,P	2 x 1 x 1	1.65
80-184	X,C,M,F,P	2 x 1 x 2	1.75
80-193	X,C,M,F,P	3 x 1 x 2	2.65

For Medium Sized Motors and Small Generators

Tramway Handle—10 1/2 in. handle permanently mounted at a 45-degree angle.

No.	*Grade	Size	Each
80-255	X,C,M,F,P	2 x 1 1/2 x 2	\$2.65
80-265	X,C,M,F,P	2 x 2 x 2	3.50
80-274	X,C,M,F,P	3 x 2 x 2	5.30
80-284	X,C,M,F,P	3 x 3 x 2	7.90
80-293	X,C,M,F,P	4 x 3 x 2	10.55

Vertical Adjustable Handle—The 10 in. rod handle adjustable to three positions.

No.	*Grade	Size	Each
80-205	X,C,M,F,P	2x1 1/2x2	\$2.65
80-215	X,C,M,F,P	2x2 x2	3.50
80-224	X,C,M,F,P	3x2 x2	5.30
80-234	X,C,M,F,P	3x3 x2	7.90
80-243	X,C,M,F,P	4x3 x2	10.55

Railway Handle—7 1/2 in. handle permanently mounted in a vertical position.

No.	*Grade	Size	Each
80-305	X,C,M,F,P	2 x 1 1/2 x 2	\$2.65
80-315	X,C,M,F,P	2 x 2 x 2	3.50

Ideal Hand Type Cleaners

Developed through years of air-engineering experience, the improved Ideal Cleaner will do a better job, faster, at less cost. These light weight, perfectly balanced cleaners handle a wide range of work. Blows, vacuums and sprays. Can be operated continuously at peak efficiency and with amazing economy. Delivers air at higher velocity (Heavy Duty Model—26,500 feet per minute), yet, because it blows only dry air at low pressure the Ideal Cleaner does not harm even delicate equipment. Blower Nozzle is furnished as standard with Ideal Hand Type Cleaners.

No.	Description	Each
22-110	Heavy Duty Model (1½ Hp.)	\$129.25
22-113	Medium Duty Model (¾ Hp.)	102.75
22-163	Light Duty Model (¾ Hp.)	70.00

Standard Attachments for Use With Hand Type Cleaners

Dust-proof bag, hose connection (inlet side), flexible hose (4 ft. x 1½ inches), metal nozzle (5-inch) and brush, flat fibre nozzle and shoulder strap.

No. 22-109 Std. Attachment Set.....Each \$26.55

Heater Nozzle

Fits any Ideal Light Duty Hand Type Cleaner. Especially suitable for use where rapid removal of moisture is desirable in conjunction with cleaning. Also for quickly drying paints, varnish, ink, etc.

No. 22-116 Heater Nozzle.....Each \$18.15

Scrap Collector

(For Hand Type when used as Vacuum Cleaner). Catches and holds heavy metal particles such as nails, screws, nuts, washers, etc. Protects fan and fan housing. Separates dust and dirt from scrap.

No. 22-138 Scrap Collector.....Each \$9.50

Sprayer Attachment

For spraying liquids, insecticides, varnish, lacquer, calamine, etc.

No. 22-139 Quart size.....Each \$ 5.10

Ideal Tank-Type Cleaners

Ideal Tank-Type Cleaner—for better, faster cleaning. Particularly valuable for scrap collection and in removing water from factory or service station floors.

Unique filtering system eliminates the (conventional) external bag. Easily emptied. Remove the vacuum sealed lid and lift out the 9-gallon tank and dust bag.

Cleaner has large 5-inch wheels. Swivel wheels in the front. Small width clearance permits the Cleaner to be moved down narrow aisles. Low center of gravity makes it difficult to upset.

The 1½ hp. motor provides ample power without overheating. Complete with 30-foot cord and a handy storage compartment for attachments.

Order Attachments Separately

No.	Description	Each
22-200	Tank Cleaner Only, 115 v. ac, dc.....	\$362.25*
22-201	Tank Cleaner Only, 230 v., ac, dc.....	365.35*

*Price does not include attachments.

Ideal Standard Tank Cleaners

Tank Cleaner, Hand Cleaner and Blower All in One

Here is the answer to cleaning requirements for industrial, and commercial establishments, theatres and institutions. Does the work of two or more ordinary Cleaners. Used as a Tank Cleaner, it picks up dirt, dust and metal particles. Quickly removes water from floors after scrubbing and it is especially valuable in scrap collection. The power unit is complete in

itself. Removed from the tank it becomes a powerful, hand-type vacuum cleaner or blower.

Standard Cleaners are available in two models: Heavy Duty (1½ hp.) and Medium Duty (¾ hp.) Furnished with attachments.

No. 22-210	1½ hp., 115 v., ac, dc.....	Each \$225.25
No. 22-213	¾ hp., 115 v., ac, dc.....	Each 198.75

Ideal Tank Cleaner Attachments

No. 22-217 All Purpose Tank-Type Set of attachments. (May be used with all Tank-Type Cleaners.) Includes Nos. 22-130 Hose (10-ft.), 22-175 Floor Nozzle (12-inch), K-1706 Brush, 22-178 Fibre Floor Tool, 22-199 Two Section Metal Floor Wand.
Each.....\$57.25

Many other special attachments available. Complete information on request to Graybar.

Ideal Conversion Pack

Convert your Ideal Blower into a Tank Cleaner with the Conversion Pack. Consists of 12-gallon tank and dust-tight bag. Adaptable to any of the following:
Heavy Duty Models: Nos. 22-110, 22-111, 22-112, Medium Duty Models: Nos. 22-113, 22-114, 22-115.

No. 22-216.....Each \$96.00

Additional printed information on these products and other items not listed is available on request to Graybar.

Ideal Conversion Packs

55-Gallon Drum

A conversion unit that quickly converts Ideals' Heavy - Duty Hand Cleaner into an economical, large-capacity industrial cleaner. Large capacity eliminates frequent stopping to empty tank and bag.

Powerful suction picks up dirt, water and scrap metal.

Also available is a 25-in. x 25-in. dolly with two 4-in. rubber wheels and two 4-in. rubber casters. Dolly makes unit almost impossible to tip, very easily rolled.

No.	Description	Each
22-219	Conversion Pack (cover and bag)	\$105.70
22-220	Cleaner Dolly	56.45

Premier Central Vacuum Cleaning Systems

Kit No. 2

Here's a complete low-cost answer to vacuum cleaning problems in old homes and new. Since the system is built right into the home, no portable cleaners are needed. Feather-light attachments slide into convenient wall inlets. Dirt and dust are carried out of the home through concealed ducts into one centralized unit, usually in the garage. Requires emptying only 2 or 3 times yearly.

The System is quiet, and creates a healthier, dustless home atmosphere. Easily installed in old or new homes. The central vacuum unit is the industrial type Premier P-950.

Model	Each
P-950	\$112.50

The following is a list of installation material and attachments. Recommend 30 min. Timer Switch.

Kit No. 1 includes: 48-ft. S-100 2-in. aluminum tubing extended 12-ft. lengths; 3 S-101 Wall inlet assemblies, choice of plating; 1 S-102 Wall inlet assembly; 3 S-103 TY-90's; 4 S-105 90 degree els; 2 S-106 45 degree els; 2 S-110 2-in. slip couplings; 1 S-115 1/2 pt. Pliobond cement and 1-SX500 Reducer Coupling. Other special fittings available. Each \$92.64

Kit No. 2 includes: 21-ft. hose (1 1/2 x 10); Floor Brush; Dusting Brush; Crevice tool; Carpet nozzle with polisher; 2 Steel wands; Upholstery tool; Attachment storage bag. Each \$69.50

Premier Floor Machines

Listed by Underwriters' Laboratories, Inc.

Model PR-12A

An easy to carry, easy to use, portable floor machine. Ideal for buildings that lack elevators. Scrubs, waxes, polishes, and steel wools all types of floors without effort.

Brush speed of 175 rpm. gives highest quality polishing and scrubbing without splatter.

Equipped with 1/3 hp. GE motor with quiet sealed gear case.

Model	Description	Each
PR-12A	With Polishing Brush	\$155.00

Model PR-12AW

Same as PR-12A but includes simple wheel attachment kit (small photo) for much greater portability and handling ease.

Model	Description	Each
PR-12AW	Includes Polishing Brush	\$175.00
700312	Wheel Kit only (W Kit)	20.00

Model PR-22

22-Inch

A heavy duty machine of balanced construction that scrubs, waxes, polishes, shampoos, buffs, steel wools, and does many other jobs.

Also available in 13-in., 15-in. and 18-in. sizes. All sizes give you professional maintenance for all type floors.

Heavy duty GE motor is wound for 110/220 v. or reverse rotation by simple adjustment.

Price includes polishing brush.

Model	Size, In.	Each
PR-22	22	\$475.00
PR-18	18	395.00
PR-15	15	339.50
PR-13	13	295.00

If your floor area requires 1 hour of cleaning with Model PR-12A, it will take the following:

Use PR-13 in areas to 5,000 sq. ft., PR-15 to 10,000 sq. ft., PR-18 to 20,000 sq. ft., and PR-22 over 20,000 sq. ft.

Premier Heavy-Duty Cleaners

Listed by Underwriters' Laboratories, Inc.

**Model P-901-S
Quiet Type**

For wet or dry pick-up in large installations. Equipped with GE1000W series-type motor (comparable input watts hp. = 1 1/8, actual shaft hp. = 1).

Has stainless steel tank with 13 gal. liquid-capacity, 1 1/4 bu. dry capacity; giant 1000 sq. in. filter area for powerful suction.

Provided with ball-bearing casters.

Model	Description	Each
P-901-S	With Hose and Coupling only	\$349.50
700151	Basic Dry Tool Kit	22.50
601375-2	Wet Pic-up Kit	38.80

**Model P-905
Quiet Type**

Ideal for hospitals, hotels, industry, etc. Top cleaning performance at low cost.

Equipped with GE1300W air bypass motor (comparable input watts hp. = 1 3/8, actual shaft hp. = 1 1/4). Has 10 gal. liquid capacity, 1 bu. dry capacity; 1000 sq. in. filter area. Weight 38 lbs.

Model	Description	Each
P-905	With Hose and Coupling only	\$249.50
700151	Basic Dry Tool Kit	22.50
400142	Wet Squeegee	12.00

**Model P-908
"Old Reliable"**

Triple purpose wet-dry cleaner for industry, furnace and boiler cleaning. Equipped with GE1100W motor (comparable input watts hp. = 1 1/2, actual shaft hp. = 1).

Designed for separate use as shoulder vac, blower. Separate cooling fan permits use on "hot jobs".

Has 10 gal. liquid capacity, 1.04 bu. dry. Huge 1625 sq. in. filter area. Weighs 40 lbs.

Model	Description	Each
P-908	With Hose and Coupling only	\$197.50
700151	Basic Dry Tool Kit	22.50
400142	Wet Squeegee	12.00

**Model P-909
Quiet Type**

Portable; tops for wet or dry use in limited areas. Equipped with GE600W air-bypass motor (comparable input watts hp. = 3/4, actual shaft hp. = 1/2 hp.). Compact, weighs 32 lbs. and has carrying handle and rubber bumper guard.

Capacity, 3 3/4 gal. liquid, 1/2 bu. dry. Has 750 sq. in. filter area.

Perfect for hospital, hotel or office.

Model	Description	Each
P-909	With Hose coupling only	\$189.50
700025	Master Dry Tool Kit	36.00
400142	Wet Squeegee	12.00

Premier Heavy-Duty Cleaners

Model P-150

Blower

Same power unit as Master Vac Model P-908 (220 cfm). Utmost in mobility, weighs just 16 lbs.

Special tools available for conversion to hand or shoulder cleaner.

Model P-66 Blower (not illustrated) features same design with

lower hp. rating (comparable input watts hp. = 1/2, actual shaft hp. = 1/8).

Model	Each
P-150	\$119.50
P-66	69.50

Ideal Dust Collectors

For Precision Grinders

An industrial vacuum attachment that picks up metal and stone dust before it can cause bearing trouble and hard-to-locate short circuits.

Unit mounts on either grinder, generator frame, or motor. Simple and compact; easily attached to any Ideal industrial vacuum cleaner hose.

Unit includes adjustable nozzle with brush and all necessary mounting brackets.

No.	Description	Each
24-073	For "Midget" Model Grinder.....	\$44.10
24-074	For "Perfect" or "Ideal" Model Grinder....	44.10

Ideal Motor Maintenance Tools

Commutator, Motor Winding and Repair Shop

Commutator Turning Tool Heads

A good tool for removing the bead or ridge of copper left on the inside of the commutator next to the riser.

Net weight, 7 pounds.

No. 24-045, for Perfect and Ideal Model Precision Grinders.....Each \$53.25

No. 24-046, for Midget Model Precision Grinders.....Each 49.95

Slotting Files

Specially designed and constructed for commutator use.

Weight per dozen, 1 pound.

No. 20-007, Large 8-Inch Type.....Each \$2.00

No. 20-009, 9 1/2-Inch Single End Type (Specify Draw-Cut or Double-Cut).....Each 1.85

No. 20-006 Hand Type Commutator Mica Slotters and Scrapers

Designed for use on small commutators, and for plants which do not have sufficient work to justify the cost of a power driven unit.

No. 20-006.....Each \$3.95

Ideal Motor Maintenance Products

Ideal Electric Tachometer

Two sizes for speeds up to 5000 rpm. Accurate to plus or minus 1 per cent of full scale deflection.

Consists of small generator coupled to electric meter, which is capable of withstanding a momentary overload up to four times the maximum speed. The meter has two scales—"high" and "low" easily changed from one to the other with a switch. The units may be used together as a "Hand Type" Tachometer, or for many applications including permanent mounting.

No.	Description	Wt., lbs. Each	Each
50-001	0-2500 rpm.....	3	\$108.95
50-002	0-5000 rpm.....	3	108.95

Ideal Electric Etchers

"Universal" Etcher marks iron, steel and their alloys, such as tools, parts and material. Four etching heats—120, 240, 420 and 700 watts—give a wide range of marking control. Cover forms work plate for small tools and parts. Unit includes 4 oz. etching tool, ground clamp with 4-ft. leads. Size 8 5/8 in. x 5 3/8 in. x 7 in. Shipping weight 19 lbs. Standard unit for lighter work; "Machine Shop" for heavy duty service.

No.	Description	Each
11-009	Standard, 115 v., 50-60 cy.....	\$34.35
11-048	Machine Shop, 115 v., 50-60 cy.....	85.80
11-081	Universal, 115 v., 50-60 cy.....	61.30

Ideal Insulation Tester

Detects grounds, shorts and broken wires. Test up to 2500 volts. Seven test voltages: 500, 1000, 1250, 1500, 1750, 2000, and 2500.

Operates from any electrical outlet. All current carrying parts are fully and carefully insulated. Spring operated safety sleeves, conceal the test points, which can only be bared by pressing forward the buttons on side of handles. Has three wire safety type cord. Rating 600-volt amp. (maximum).

No.	Description	Each
41-001	115 v., 50-60 cy.....	\$75.00

**Ideal Precision Grinders
For Commutators and Slip Rings**

Portable. For truing commutators and slip rings in their own bearings at normal operating speeds. Accurate to 1/1000-inch. Inherent "slaps" and bearing eccentricities automatically allowed for. New bracket supports make possible use on practically every type of machine. Carrying case at no extra charge.

24-033	"Midget" Grinder, 6 in. overall length...	96.55

Ideal Universal Commutator Mica Undercutters

For field and shop use—heavy duty service. Used for large or small commutators. Undercuts in narrow, confined spaces and to within 1/4-inch of risers; works in spaces only 2 3/4 inches wide. Undercuts without removing brush rigging. Speedy, accurate and easily controlled. Carrying case at no extra charge.

No.	Description	Each
25-029	Complete with 115 v., 60 cy. motor.....	\$166.40
25-032	Complete with 230 v., 60 cy. motor.....	169.75

Ideal Direct Drive Undercutters

The Direct Drive Model for medium service in the field and shop requires no dismantling of brushes or motor. The Cutter Head only 2 1/2 inches wide cuts to within 3/16 inch of the riser. Designed

for use with 2 3/32 inch diam. x 5/16-inch bore Ideal Saws and Milling Cutters. Overall length, 14 1/2 inches; width of head 2 1/2 inches; cutter spindle speed approximately 3,000 rpm. Motor is "universal" type for either a-c or d-c. Shipping weight 9 pounds.

No.	Rating	Each
25-001	115 volt, a-c, d-c.....	\$108.30
25-002	230 volt, a-c, d-c.....	116.50

Ideal Small Motor Undercutters

For fractional horsepower motors having armature 1-in. to 7-in.

No.	Description	Each
25-048	115 volts, a-c, d-c.....	\$84.25

Ideal Commutator Slotting Saws and Milling Cutters

High speed steel and special high speed steel. Available in all types and sizes.

Specifications and prices on request to Graybar.

National Carbon Brush Assortments

For Fractional Horsepower Motor

Contains brushes for fans, vacuum cleaners, vibrators, electric ironers, washing machines, sewing machines, food and drink mixers, heat regulators, pumps, electric tools, cash registers and office appliances.

Assortment No. 40 and No. 55 each contain brushes of 17 different sizes and three different sizes of springs.

Assortment of the finest quality and will take care of replacements on fractional horsepower motors (a-c/d-c and Universal) used on the popular makes of home, office and shop appliances and equipment.

Each assortment provides brush replacements for over 100 types of vacuum cleaners. Packed in container designed for effective counter or store display.

No.	Contents	Each
40	Assortment consist of 102 brushes (17 types and sizes) 55 springs (3 sizes)	\$13.20
55	Assortment consist of 198 brushes (17 types and sizes) 100 springs (3 sizes)	21.65

Dillon Weight Indicators

Weighs light or heavy objects with equal ease. Can be hung on crane or hoist hook or suspended from any convenient support. Will save many man hours at inventory time and throughout the entire year.

This indicator is dampened; that is, the pointer comes to rest quickly. Large dial, 16 in. diameter, makes accurate reading possible even from considerable distance. Can be used indoors or outdoors.

Incoming shipments can be weighed as they are lifted from the car. Heavy loads can be weighed at the stock rack and replaced in the same operation—no lost motion.

Heavy metal case encases the precision mechanism. Dial is fully linear and is covered with thick plastic crystal to prevent breakage.

The calibrated beam is set in frictionless precision needle bearings. Loads hang straight—no critical leveling or balancing necessary.

Manufacturer guarantees accuracy to ONE division at any point on the dial. This represents 1/2 lb. on the 250-lb. model, 5 lbs. on the 2500-lb. model, etc. All readings can be split visually to one-half this value.

Comes complete with oversize attachment eye and swiveling hook. (Can be replaced with any type special fitting desired.) Quickly adjustable for tare.

Cap. Lbs.	Dial Div. Lbs.	Each
0- 250	1/2	\$395.00
0- 500	1	395.00
0- 750	1	395.00
0-1000	2	395.00
0-2500	5	395.00
0-5000	10	450.00

Approx. weight, each 42 lbs. net.

Ideal Test Glo

Industrial quality for safe, easy testing of electrical circuits, spark-plugs, motors, fuses, etc.

High-grade resistors between each test prod and lead reduce voltage reaching leads.

Long thin handles with "no-slip" safety rings permit deep probing.

Neon lamp at front of prod handle, always in line of vision. 24-in. lead wire (rated 10,000 v.) permits wide span. Cement sealed and moisture proof. For 80 to 600 v. a-c or d-c.

No. 61-040 Each \$2.75

Ideal Fluorescent Fixture Testers

Flur-Test

New pocket-size tester that quickly locates the trouble and indicates whether it is in the circuit, starter or the tube.

Tester simply plugs into starter socket to make all three tests. Two models are available—one for fixtures with 15 to 40 watt tubes and one of fixtures with 85 to 100 watt tubes.

Each tester has a lead of 8-in. between the Flur-Test tube and the male plug, which fits into the starter socket of the fixture.

No.	Description	Each
61-015	Tests 15 to 40 Watt	\$5.25
61-016	Tests 85 to 100 Watt	5.25

Ideal Continuity Testers

Handy tester for checking continuity of dead circuits, grounds on conduit systems, identifying wires in multi-wire cables. Perfect for checking electrical control equipment, panel-board wiring and many other uses.

Unit is powered with two pen-lite batteries (not furnished) and gives light signal to indicate completed circuit.

Has 4-ft. removable cord equipped with alligator clip. Fits into pocket like fountain pen.

No.	Description	Length In.	Wt. Oz.	Each
61-030	Tester (less batteries)	5 1/2	3	\$2.75

Ray-O-Vac Continuity Testers

A combination continuity tester and flashlight. The flashlight is unaffected by all common chemicals and withstands extremes of temperature. Completely replaceable parts. Uses two No. 3LP or 2LP batteries and bulb No. PR6.

The tester has heavily insulated jack and leads, with positive grip clips. Tests fuses, bulbs, wire leads, switches, etc. The jack is removed for flashlight use.

It is not a voltage tester and is not to be used on live wiring.

No. N22T Each \$6.75

Brach Test-O-Lites

For locating burned-out fuses, motor troubles, short circuits, etc. For all voltages from 100 to 550 a-c or d-c. Bakelite, neon tube, small size. Guaranteed for a lifetime.

Longer leads can be furnished at nominal extra charge.

Test-O-Lite, With 3¾-in. Leads. Each **\$1.25**

Kett Universal Saws

Cuts Practically Any Sheet Material

This Kett saw cuts mild steel, cast iron, copper, lead, zinc, aluminum, Masonite, plywood, plastic, Fiberglas and other similar materials. It is compact, sturdy, powerful and easy to use. It cuts plastics and other soft materials up to ¼-in., aluminum up to ⅜-in. and mild steel up to 12 gauge. Specially designed lead guide enables operator to follow contours and cut shapes of 6-in. radius or larger. Starts anywhere without starting holes. Cuts to any desired depth up to ¼-in. Cuts over ribs and supporting structures without fear of damage. Standard equipment includes three 1¼-in. x 44 tooth blades, three 1½-in. x 60 tooth blades. Weight, 8½ lbs.

No. KS-1AM, with a-c/d-c Universal Motor and Standard Equipment. Each **\$103.50**

Kett Attachments

KS-1, Kett ¼-in. capacity saw unit complete with geared angle head, portable tool connectors and six blades. Each **\$54.50**

JC-1, Kett Jacobs chuck adapter with ¼-in. capacity No. 7B Jacobs chuck for use with Kett universal cutting tools to instantly convert them into portable electric drills. . Each **\$ 7.50**

R. C. S. Electric Saws

Model 250

Has Extra Heavy Duty 5.0 Amp. motor for fast cutting, 2500 strokes per minute. Lightweight; ruggedly constructed with high-grade bearings for long life.

Counterbalanced; no vibration; always perfect control. Has more blade clamping surface than any other saw.

Safe; no exposed moving parts. With exclusive Rocker Guide no starting hole is necessary in wood or composition material.

Provided with metal carrying case, six blades, and blade wrench.

Model No.	Wt. Lbs.	Shipping Wt. w/Case	Each
250	7½	18 lbs.	\$97.50

Model T Super Saw For Electric Drills

This direct drive attachment fits any ¼-in. or ⅝-in. or ⅜-in. heavy duty drill, compressed air or flexible shaft equipment.

Has complete 360° rotating ability for hard-to-get-at places. No starting hole necessary.

Equipped with drill spindle adapter and drill chuck adapter, blade and wrench. Unless specified standard drill spindle adapter with ⅜-24 thread furnished. Adapter stays on drill allowing you to switch saw and drill easily.

Safe; rugged; no torque or spin. Furnished with built-in blower.

Model	Overall Length In.	Wt. Lbs.	Each
T	10¾	4	\$49.50

3-In. x 21-In. Belt Sander

Produces fine straight-line finish without ripples or gouges. Special belt tension device permits changing abrasives in seconds. Easy to use in any position, horizontal, vertical or overhead.

Polished aluminum housing. 6 ampere universal motor, 115 volts, a-c or d-c, 25-60 cycles. Equipped with 7 ft. cord. Comes complete with 3 assorted abrasive belts, operating manual.

136 3 x 21 1425 850 11 3/4 6 5/8 7 10 \$69.50

Model 153 is basically the same as Model 136 except it is a heavy-duty model.

Porter Cable Finishing Sanders

Heavy Duty

Orbital motion finishing sander that is used for "all day" production surfacing. Simplified transmission reduces service problems and assures trouble free operation.

Polished aluminum frame. 2.5 ampere Universal motor 115 volts, a-c or d-c, 25-60 cycle. 3/8-in. diameter orbit size.

Sander comes complete with wrench; tube of grease; package of assorted abrasive sheets; operating manual.

Thor Safety Balancers

For Tool Suspension

No. 5LB6

Has automatic, built-in brake. Positively prevents load from dropping under any circumstances.

Provided with full swivel upper hook for easier handling, longer life, greater safety. Auxiliary suspension provision for double safety.

Adjustable counterweight tension; no special tool required. Shock-absorber cable stop has simple adjustment from zero to full 6-ft. travel.

Constructed of heavy gauge steel housing with ¾-in. nylon-sheathed steel cable and durable aircraft-type cable fittings.

Equipped with self-lubricating oilite bearings.

The No. 5LB6 features in-line hook-to-hook suspension. The No. 10LB6 has tangential suspension for minimum cable wear with heavier tools.

No.	Max. Cap. Lbs.	Min. Cap. Lbs.	Distance Hook to Hook In.	Wt. Lbs.	Each
5LB6	5	0	11½	3⅝	\$18.00

1/4-Inch—Heavy Duty

1/4-Inch Silver Line—Grip Handle

For continuous service in either metal or wood work.

Grip handle has momentary trigger switch.

Furnished with geared chuck, cable with ground wire, and plug. Free speed,

2000 rpm. Overall length, 12 5/16 in.; weight 6 1/2 lbs.

No. EJO.....Each \$59.00

5/16 and 3/8-Inch—Heavy Duty

Silver Line

Ball bearings used throughout.

Recommended for continuous performance heavy duty drilling.

EJ1, EJ2 and EJ3 furnished with grip handle and momentary trigger switch. All other sizes furnished with momentary side switch handle and dead handle.

*Specify "Code EJ2 with 5/16-in. chuck."

1/2-Inch—Heavy Duty

Non-Reversible—and Reversible

Silver Line

Compact, powerful design develops stall-proof drilling torque at rated capacity.

Full ball-bearing construction.

Slotted ventilating ports and new design fan maintain lower operating temperature.

Free speed, 500 rpm. Overall length, 12 1/4 inches; weight 8 lbs.

Reversing switch on handle available \$10.00 extra, specify EJ9R-T.

No. EJ9.....Each \$68.00

**Thor Drills
Copper Line**

**1/4-In. To 3/8-In. Capacity
Standard Duty**

Pistol grip series drills, 4 1/2 lbs. weight. Length 9-in. overall.

Bearings: Ball on armature and spindle; anti-friction; oilless.

Available in standard duty classification, speeds for drilling 1/4, 5/16 or 3/8 in. holes in steel.

No.	Capacity In.	Speed RPM*	Each
1116CL	1/4	2000	\$29.95

**Thor Saber Saw Attachments
For Electric Drills**

Converts electric drill to heavy duty Saber Saw. Cuts its own starting hole in wood, plaster or composition. No gears. Few moving parts—pre-lubricated for years of maintenance free service. Can be chucked in 1/4 in. or larger chuck, or threaded on 1/2 in. x 20 or 3/8 in. x 24 spindle.

Weight, 3 lbs. 3 oz.; length 7 1/4 in.; blade offset 1 in.; stroke 1 1/16 in.; driver speed 1000 to 2500 rpm.

No.	Description	Each
567	Saber Saw Attachment.....	\$45.00

**Thor Orbital Speedsanders
With Universal Motors For A-C or D-C**

No. 1500: High-speed heavy-duty production sander. Perfect for all automotive feather-edging and all marine work. 3/16 in. orbit.

Full load speed 5000 rpm. Sanding area 4 1/2 x 9 in. Paper size 4 1/2 x 11 in. Equipped with 10 ft. 3 conductor "SJ" cord. Net weight 7 3/4 lbs. Each \$54.50

Thor Utility Air Hammers

Combination Star Drill And Chipping Hammer

A new light-weight air hammer that offers choice of automatic rotation for star drilling, or "stop rotation" for straight non-rotative hammering. Simple external lever control. Weight 14 lbs.; length overall 17 1/4 in.; chuck for shank size 7/8 x 3/4 in.; 3/8 in. air inlet for 3/8 in. air hose.

No.	Description	Each
15D	Utility Air Hammer.....	\$280.00
15DK	Carrying Case Kit, includes hammer, adapters, steel and bits.....	305.00

Note: Available also for WET operation.

Thor Electric Hammers

Well-balanced, easy to handle. Designed for star drilling, channelling, chipping, cleaning, cutting and numerous other jobs in stone, wood or metal.

Over-capacity motor, housed at right-angle to the barrel, delivers power to "slingshot" drive through heavy duty helical gears.

For use in concrete, takes up to 1 1/8 inch star drill. Blows per minute, 1600. Net weight, 14 lbs. Overall length 13 1/2 inches.

Equipment: 1 turning handle; 1 ejector pin; 1 extra rubber slingshot connector; 3-conductor cable with ground wire and plug; momentary grip switch with lock; carrying case; dust shield.

No. U100 Each **\$155.00**

Star Drills

Recommended for use with Thor Electric Hammer.

Allen Steel Shelving

Combine These Parts to Meet Your Specific Storage Needs

Above illustration is a "composite" assembly of standard shelving parts, to show many possible applications.

- No. 1—POST—Has adjustment holes punched on 1-in. centers. Four per unit.
- No. 2—LEDGE POST—Same as full-height posts, with notch where bottom rests on ledge. Two per unit.
- No. 3—PARTITION—Used on ends. One furnished between each two units in a rack.
- No. 4—BACK—One used on single units, or in between back-to-back units.
- No. 5—SHELF—All sides channel-formed for extra strength and safety. Reinforcements available. May be spaced with openings as little as 3/4-in. apart.
- No. 6—CORNICE TOP—Used at top of full or counter height shelving. Extra heavy gauge.
- No. 7—LEDGE SHELF—Used on ledge units or as top of counter-high unit.
- No. 8—BASE PLATE—Used to fill space between bottom shelf and floor.
- No. 9—DIVIDER—Can be bolted anywhere on shelf. Adjustable right or left on 1-in. centers. Beaded at front and back.
- No. 10—DOUBLE-BEADED BIN FRONT and Label Holder Combined—For use on first opening above a ledge, or any shelf, if desired.
- No. 11—LABEL HOLDER—Continuous type 1-in. high, bolted to shelf. 5-in. by 1-in. snap-on type available.
- No. 12—SWAY BRACES—Used on sides and backs of open type units.
- No. 13—LEDGE OR SHELF SUPPORT ANGLE—Used under sides of ledge shelves, and to reinforce regular shelves.
- No. 14—CORNER COVER PLATE—Covers adjustment holes on exterior of post. Intermediate and side cover plates also available.
- No. 15—DOOR—Has 3-point latch, malleable iron handle and flat key lock (optional).
- No. 16—FLOOR SHOE—Single type, for corner posts. Double type used between units. Protects floor.
- No. 17—ANGLE SWAY BRACE—Used when back or side sway braces are omitted to permit access to shelves.
- No. 18—FLUSH BAR—Used to keep books or packages from getting behind posts.

Open Type

Consists of posts, shelves (any number) and sway braces. Two units are shown, bolted side by side. Each is self-supporting, having four posts. When used as separate units only extra side braces are needed. Any number of units can be bolted together to form a continuous rack.

Dimensions				Each
Width	Depth	Height		
36-in.	18-in.	6 ft. 3-in.		\$28.04

Closed Type

Consists of posts, shelves (any number), backs, partitions and bases. Two units are shown, bolted side by side. Each unit is self-supporting. Any number can be bolted together to form a continuous rack with partitions between units.

Dimensions				Each
Width	Depth	Height		
36-in.	18-in.	6 ft. 3-in.		\$37.02

Allen Storage Racks

Storage racks transform square feet into cubic feet. Inventories more accessible; service to customers faster. Allen is equipped to make storage racks, pallet racks and stacking racks of all sizes and types; of angle, channel, plate, tubing and bar. Decks of wood, steel or skeleton construction. Available in 17 sizes and capacities of platforms; 13 sizes of Legs.

Allen Stacking Racks

Constructed of ruggedly welded 3-in. channel; 2-in. x 2-in. angle. Has formed cup feet and sturdy tube supports.

Stack or store reels, coils, or messenger strands up to 36-in. in diameter, and weighing up to 2,000 pounds. Racks can be stacked two or three high.

Finished in Green enamel.

Call Graybar FIRST For . . .

Allen Lockers

The benefits of a private locker are fully realized with the single tier type preferred by workers and students because clothes hang full length without crowding or mussing.

Lockers 18-in. or more in depth are equipped with a coat rod for the use of clothes hangers. Lockers less in depth have

double prong ceiling hooks, in addition to standard back and side hooks.

Silent automatic prelocking is featured which locks door automatically or by key. Equipped with number plates.

Type 50

*For overall outside height with legs, add 6-in. Add 1/16-in. for lockers without legs. Slope tops increase height by half of locker depth.

Unique Gasoline and Kerosene Blow Torches

Designed especially for those requiring large volume of flame and extra heat and for heavy duty hard service under severe weather conditions.

No. 3L

No. 7

Steel tank, copper brazed throughout. Filled through bottom funnel filler. Flame 1½ x 12-in. 2000° F. can be regulated to small jet. Replaceable needle and orifice block. Removable channel plugs for cleaning. Powerful dependable pump.

No.	For	Tank Capacity, Quarts	Wt. Ea. Lbs.	Each
3-L	Gasoline	1	4½	\$19.25
3-K	Kerosene	1	4½	21.00
7	Gasoline	2	5½	29.00
7-K	Kerosene	2	5½	30.50

Unique Gasoline Blow Torches

A safe, compact torch for many practical uses. Fine for use in close quarters and for sweating joints on small size copper tubing.

Flame 1 x 6-in., 1900° F., can be regulated to a fine-pointed jet. Closing valve forces needle through orifice, keeping it clean and full size. Replaceable needle and orifice block. Removable channel plugs for cleaning.

Flat steel tank, welded construction, with brazed fittings, 2¾-in. thick, 5-in. diameter. Top filler

opening. Attractively finished in red. Powerful, dependable pump. Complete with generator windshield.

Capacity 1 pint.

No. 0—Weight each 3 lbs. Each \$12.52

A high-grade torch for the electrician, plumber, tinsmith, mechanic and maintenance man.

Steel tank, copper brazed throughout. Filled through bottom funnel filler. Flame 1 x 6-in. 1900° F. can be regulated to small jet.

Closing the valve forces slender needle through orifice, keeping it clean and full size. Replaceable needle and orifice block. Removable channel plugs for cleaning. Powerful dependable pump. Attractively finished in red.

No. 1—Capacity 1 qt.; Wt. each 3¾ lbs. Each \$12.52

Unique Solder Melting Furnaces

These heavy duty furnaces are for use by utilities, municipalities, railroad, telephone and heavy industries, plumbers and others for melting solder, paraffin and compounds.

Their powerful blast melts 50 lbs. of solder in approximately 10 minutes. Built to withstand the abuse of splicing service.

For Gasoline

Generator—Finest nonscalable bronze alloy casting, fitted with replaceable orifice block. Easily cleaned throughout by removing plugs from straight lined channel.

Produces a clean flame 1½x12-in., of 2000° F.

Tank—Heavy steel, with broad base. Copper brazed throughout.

Windproof—requires no additional protection. When revolving shield is open the generator is in full view for priming and attention.

Top-Plate—Rugged, with ample lug support for large pots and kettles. The handle locks to support solder irons.

Hood—Style "A" open top hood is standard and is usually furnished. Style "B" soldering iron hood accommodates iron up to 12 lbs. per pair, and can be substituted; heating time 4 minutes.

Tank capacity 1 gallon. Size of furnace 8 x 13-in. No. 50—Weight each 15 lbs. Each \$34.30

For Kerosene

A kerosene furnace is just the thing if unleaded gasoline cannot be secured. It starts in 4 minutes and is just as efficient in every way as a gasoline furnace.

Generator is the figure-8 type that burns kerosene without carbon formation, produces a clean flame of 2000° F. Regulating the flame volume valve for full or reduced flame automatically passes the scraper blades under orifice, clearing it of foreign particles.

Tank—Heavy steel, copper brazed throughout, with powerful, dependable pump.

Hood—Style "A" open top hood is standard and is usually furnished. Style "B" soldering iron hood accommodates irons up to 12 lbs. per pair and can be substituted; heating time 4 minutes.

Tank capacity 1 gallon. Size of furnace 8 x 13-in. No. 55—Weight each 13 lbs. Each \$30.95

Unique Safety Folding Shields

For Furnaces and Fire Pots

For protecting workers and the public from flame and hot materials. Shields furnace from wind and affords a storage space for pot, ladle and small tools.

Made of galvanized iron, completely rust-proof. Panel edges rolled around ¼-in. rod—no sharp corners. Folds flat for carrying and storing.

No. 50

No. Description Each
50-C Three-Panel Type; Wt. each 15 lbs. \$10.30

50 Four-Panel Type; with welded steel grate and supporting brackets; broad supports for large pots and kettles; Wt. each 27 lbs. \$22.00

Klein-Kord Safety Straps

An original fabric material developed by Klein for safety straps.

"Klein-Kord" consists of multiple plies of fabric of special weave available in cotton, cotton and nylon, or all nylon fabric. The plies are bonded together with neoprene frictioning and vulcanized—a construction that provides maximum strength and safety.

Red center plies provide an unmistakable signal when the use of the traps should be discontinued. "Klein-Kord" may be used with perfect safety until the two outer plies are worn through.

Klein Climber Gaff Guards

Use on any Klein climber. Made of top grade harness leather.

No. 1901-MG

One piece leather with fiber to keep point from penetrating guard.

No. 1945-G

Top piece riveted construction. Harness leather.

No. 1901-MG or 1945-G. Pair \$0.80

Klein Climbers

Safety and comfort are vital in the design of any climber. These climbers are drop forged from selected electric furnace steel and are individually tempered and tested. The gaff is drop forged from electric furnace alloy tool steel and set into the leg iron at the proper angle.

For maximum life, leg irons are fully polished in critical sections before aluminum finish is applied.

"Pole Master" Climbers Adjustable or Fixed Length

Matched pairs. One right, one left. Wide stirrup gives better support. Offset shank brings gaff in proper line with leg bone to provide greater security and comfort. Adjustable 15-18 inches, 17-20 inches, or fixed length sizes of 15, 15½, 16, 16½, 17, 17½, and 18-inches, measured from instep to top of slide. Gaff 3½-in. long measured on the out side.

No.		Per Pair
1945	Fixed Length	\$7.80
1945A	Adjustable	9.60
C-1945A	Adjustable	17.80*
1945AL	Adjustable	9.60**

*Has straps and pads.
**Adjustable 17-20-inches.

Standard Climbers Adjustable or Fixed Length

Accepted as standard by utilities for many years. Adjustable 15-18 inches, 17-20 inches, or fixed length sizes of 15, 15½, 16, 16½, 17, 17½, and 18-inches, measured from the instep to the top of the slide. Gaff 3½-in. long measured on the outside. Riveted strap loops.

1956AL	Adjustable 17-20 in.	9.60

Riveted Loop "Pole Master" Climbers Adjustable

Same as 1945A except that a riveted loop is provided to carry the ankle strap in place of a triangular ring. Adjustable 15-18 inches and 17-20 inches.

No.		Per Pair
1957A	Adj. 15-18 in.	\$9.60
C-1957A	Has straps and pads	17.20
1957AL	Adjustable 17-20-in.	9.60

Klein Tree Climbers

The tree climber used by forest rangers, high riggers, fire wardens and surveyors. Extra long gaff to penetrate bark of trees. Gaffs are 3½-in. long measured on the underside and are set high in the leg iron so points clear the ground when walking. Fixed length pattern in the following sizes: 15, 15½, 16, 16½, 17, 17½, and 18 inches, measured from instep to end of shank. Special sizes to order. Straps loops are riveted. Aluminum finish. Every climber individually tested.

No.	Per Pair
1907	\$7.60

Adjustable Tree Climbers

Same as 1907 except that it is made in the adjustable pattern. Sliding portion is made in one-piece steel construction and permits adjustment to 15, 15½, 16, 16½, 17, 17½, and 18-inch sizes. Riveted strap loops. Every climber individually tested.

No.	Per Pair
1907A	\$9.30

General Machine Sleeve Pressers

Type B

For pressing single-tube brass sleeves in splicing and dead-ending drop and block wires. May also be used in splicing aluminum conductor.

Designed specifically for field work. Convenient in size; handles easily on poles among wires. Light weight; can be easily carried in lineman's belt.

No. 7149—Wt. 6-oz..... Price on application

T&B Method Compression Tool

For No. 8AWG to 250MCM Copper Conductors

Tool is mechanical, lightweight, and develops tons of pressure. Dies snap in and out. Dies are located in one position for a given wire size. High strength steel tool with tubular aluminum handles and forged steel dies.

Complete with steel carrying case and 3 color-coded dies.

No.	Description	Each
TBM5	Compression Tool	\$80.00

Klein "Chicago" Grips

Klein grips have been the accepted standard of public utility companies and others requiring a strong, non-slipping grip.

Klein Grips are available for use on any type of conductor and patterns are available specially designed for hot line work.

These grips are to be used for pulling up lines to tension only and are not recommended for use as anchors.

Recommended are Klein "Chicago" Grips with bronze-lined jaws to avoid possible damage to surface of conductor.

Grips with bronze-lined jaws are indicated by the letter "B" after the catalog number. All grips furnished with galvanized finish.

All Chicago Grips are furnished with self-locking loop handles which allow the Grip Jaws to be locked in any open position. To lock, open Jaws and fold loop handle toward side plates.

Bartlett Tree Pruners and Saws

This combination has two head tool sections, one a pruner, one a saw. Each mounted on a short pole with ferrule. Each is 30-in. overall. Handles of desired length is obtained by the addition of a pole section, or sections. Either head can be used with the same handle section. The pole is 1 1/4-in. octagon Sitka spruce.

No.	Description	Wt., Lbs.	Each
1-WE	Pruner Head	2 3/4	\$11.30
44-WE	Saw Head	1 1/2	8.50

Bartlett Extension Pole Sections, Rectangular

1 1/4 x 1 1/8-in. pole sections to extend pole length of tree trimmers and pole saws. For use with Nos. 1-W and 1-B Tree Trimmers and Nos. 44 and 50 Pole Saws.

6	2	5.20	1 3/4	4.35
8	2 1/2	6.10	2 1/4	5.20

Oshkosh Tree Trimmers

A light, strong and efficient trimmer that cuts limbs up to 1 1/2 in. diameter very easily.

The head is made of two pieces of light forged steel, properly reinforced and riveted together; and acts as a guide for the thin saw steel cutting blade, and will not permit the blade to climb over the wood and wedge to one side.

Blade being pivoted starts cutting with a slicing motion the instant the rope is pulled.

Pole consists of three sections of straight-grained clear Washington fir 1 1/2 in. in diameter—one 6-ft. section attached to head and two 7-ft. sections each fitted with positive couplings; very rigid when coupled but easily dismantled.

Complete with short section of rope, pulley and ring. (Any size or kind of rope can be attached to lengthen pull; 1/2-in. rope is suggested for best results.)

No.	Description	Wt. Lbs.	Each
915	Complete Trimmer	13	\$26.50
915S	Spring	1/8	1.15
915EM	7-Ft. Middle Section Pole	4	8.70
915EE	7-Ft. End Section Pole	4	6.55
915R	20-Ft. 1/2-In. Rope	1 1/2	4.45
915B	Extra Blade for Tree Trimmer		6.75

Oshkosh Tree Saws

This tree saw, and tree trimmer listed above, fills need of the lineman and others when trimming around wires, etc.

Steel frame and cap, with hook for hanging saw in tree and pulling out cut hanging branches. Strong, thin, fine-tooth steel blade 18-in. long, cuts fast and clean and leaves a smooth cut. Blade is fastened in frame so that parts cannot fall if blade is broken.

Handle is clear, straight-grained Washington fir 6 ft. long, 1 1/2 in. diameter, with ferrule at bottom which can be connected to pole sections of No. 915 trimmer.

No.	Description	Wt. Lbs.	Each
916	Complete Tree Saw	5	\$15.85
916B	Saw Blade 18-In. Long	1/4	3.65
916T	Saw Tightener	1/4	2.90

Bartlett Pole Saws

No. 44

For limbs larger than the capacity of a tree trimmer. Head is made of two strips of steel riveted together so as to form a truss shaped support for the blade which is fastened between the two sides.

Saw can be adjusted to three angles to suit operator's position. The hook serves to hang the tool on a limb when not in use. The pruning saw is 16-inches long, peg tooth with 7 teeth to the inch.

Complete with pole and saw.

Pole Length, Feet	Wt., Lbs.	Each
4	3	\$10.00
6	3 1/2	10.60
8	4	11.15
10	4 1/2	11.70
12	5	12.25
14	5 1/2	12.75
16	6	13.25

If ferrules are required for adding extra sections, add \$1.05 ea.

Bartlett Tree Trimmers, Saws and Pruners

No. 1-WJ and No. 1-W Pulley Type Tree Trimmer

The compound lever plus the double leverage of the pulley which is attached to the curved lever makes this a powerful cutting tool. It will easily cut any branch up to 1 1/4 inch diameter.

A special coil spring immediately and positively returns the blade to cutting position. Pole is rectangular, 1 1/4 x 1 1/8 in. Price is complete with pole and rope.

- No. 1-WJ (2-4' sections).... **\$15.95**
- No. 1-WJ (3-4' sections).... **20.35**

Bartlett Tree Trimmers, Saws and Pruners

No. 1-B Bakelite-Insulated Tree Trimmer

An efficient trimming tool which will handle all light-weight branches . . . plus insulation. It has been tested and proven safe at 105,000 volts.

The insulator is 1/2 inch round Bakelite 30 inches long, divided between the short top and bottom pull rounds. For further insulation, the pull lever handle is made of wood. The pull lever is 42 inch from the head.

Price is complete with pole and rope.

Pole is laminated spruce 1 1/4" x 1 1/8".

Pole Length, Feet	Wt., Lbs.	Each
6	5	\$21.50
8	5 1/2	22.30

Bartlett Wire Raising Tools

Wire raising tool made of malleable casting with two hooks for the simultaneous placing of steel strand and open telephone line.

A hole in the base of the casting permits the locking pin to fasten the head securely to pole and more than one section can be attached if a longer pole is required.

Ideal wire raising tool for telephone industry.

No.	Weight of Head Only, Lbs.	Each
LC-65	1 lb. 3 oz.	\$5.25

Bartlett Pole Saws and Hand Saws

Safety-Back Pole Saw

The safety wood back protects against metallic contact with energized wires. The bent wood back tapers from regular size pole to a narrow point. This enables the saw to work in close crotches.

Blade can be adjusted to three angles. Rigidity of frame and tension of blade adjusted by a thumb screw.

Saw is 36 in. long by 7/8 in. wide, with a draw cut of 5 points to the inch. Will cut limbs up to 5 in. diameter. The head with pole, fitted with ferrule, is 5 ft. in length. The desired length can be provided by the addition of a pole section, or sections, as listed for tree trimmers.

No. 50, Wt., 5 lbs. Each **\$13.25**

Utility Saw

Has special extra large, easy grip handle. Tuttle tooth blade. Designed for heavy cutting.

No.	Description	Wt., Lbs.	Each
41	20-In. Blade	1 1/2	\$6.60
41	24-In. Blade	1 5/8	8.40

Pruning Saw

Has two styles of teeth on same cutting edge. A 10-in. section at the point has 6 points to the inch for starting, and balance of blade has large tooth similar to the Tuttle tooth. Handle has large opening for glove hand. Has 26 in. blade, 1 1/2 in. wide at point. Wt., 1 7/8 lbs.

No. 26.....Each **\$9.20**

Tree Experts' Saw

Has large opening, easy grip handle. Special set teeth, 6 points to the inch and beveled forward. A special saw preferred by many tree experts. 1 1/2 in. wide at point. Wt., 2 lbs.

No	Description	Each
27W	26-In. Length	\$8.50
28	28-In. Length	9.20

Bracket Type Pole Saws

A bracket type saw with a 11 1/2-inch blade, 8 points to the inch. A convenient and easy saw to use. It is not suitable for large limbs. Tightening screw keeps blade at proper tension. The hook is used for pulling out cut branches and hanging the saw on a limb when not in use. Furnished with a 10-ft. 1 1/4 x 1 1/8 in. pole. Weight, 4 1/2 lbs.

No. 45.....Each **\$11.50**

*If hickory handles are wanted add "H" to catalog number.

Oshkosh Pole Hole Diggers

Will dig a hole 6 in. in diameter. Handles are conveniently marked to enable workman to determine depth of hole.

Special alloy steel blades securely welded to fulcrum members which are heavy channel-shaped steel forgings. One pivot point on each side of blade give greater leverage and durability.

Handles are straight-grained hardwood 8 ft. long.

Made in two models—with split handles or with two solid handles.

No.	Type Handle	Ship. Wt., Lbs.	Each
2050	Split	13	\$17.05
2051	Two, Solid	14 1/2	17.05
Extra Handles			
2050A	Split	6	Per Pr. \$7.25
2051A	Two, Solid	6 1/2	Per Pr. 7.25

Oshkosh Tamping Bars

With Light Steel Shoe

Hard rock maple handle and head. Tamping head 1 1/4 x 4 in., faced with light steel shoe 1/4 in. thick.

No.	Length, Ft.	Ship. Weight, Lbs.	Each
854	7	13	\$10.70
855	8	14	11.50
856	9	16	13.45

With Heavy Steel Shoe

Hard Rock maple handle and head. Handle 1 5/8 in. diameter; tamping head 1 1/4 x 3 1/2 in., faced with heavy steel shoe 1/2 in. thick.

No.	Length, Ft.	Ship. Weight, Lbs.	Each
1054	7	13	\$12.00
1055	8	15	13.00
1056	9	17	14.15

Electric Pattern

Steel tubing 1 1/8 in. diameter, with malleable iron tampers on each end—one 2 3/4 x 6 in., the other 2 1/2 x 3 3/4 in.

No. 1044 Length, 8 ft., Ship. wt., 15 lbs. Each \$13.95

Oshkosh Crow and Digging Bars

Octagon shape special crucible steel, strong and stiff with ability to hold edge with 2-in. chisel on one end, pointed on the other.

No.	Length, Ft.	Diam., In.	Ship. Wt., Lbs.	Each

Oshkosh Pike Pole Guards

For guarding the dangerous point on pike poles. Will fit either the 2" or 2½-inch poles.

The guard works very easy and fastens securely in either guarding or open position. When in guarding position it locks automatically in place and affords complete protection from pike point. When not in guarding position it fits snugly around the pole completely out of the way.

(Can be attached to Pike Pole at Cost of guard only.)

No. 10—Shipping weight ¼ lb. Each **\$2.80**

Oshkosh Pike Pole Coating

A special prepared smooth, hard and transparent finish for coating pike poles to prevent raising of grain and loss of time caused by splinters and splinters. It is also a non-conductor of electricity.

Can be applied to above pike poles at a slight additional charge.

Oshkosh Cant Hooks

Malleable iron clamp and toe ring. Crucible steel duck bill, with stop to prevent hook falling back onto handle and injuring fingers.

With Hard Maple Handles

Oshkosh Pole Cradles

E-Z-UP

For lifting poles in position to work on them.

Can be operated by one man without much lifting strain. Works on the simple cam system and rocks the pole off the ground and up.

Is operated by placing the cradle against the pole and dropping the point of a cant hook or peavy between the two rockers. Then by catching the hook in the opposite side of the pole and pulling back on the handle it is placed in the cradle.

Pole can be rotated in saddle of cradle by using a cant hook. Made of high grade malleable iron.

No. 3668—Shipping Weight, 26 Lbs.....Each **\$38.70**

Chance Pike Poles With Standard Points

Straight poles available in tough Maplac plastic coating or linseed oil finish. Tapered poles in linseed oil finish only.

Chance Pole Tongs

Permit one man to guide and control the setting of a pole while it is lowered by a winch line.

Sharp points hook firmly into pole as the workman regulates the forward, backward and rotary movements.

Use of pole tongs replaces the clumsy system of setting poles using two peavies or cant hooks.

Adjustable jaws fit poles from 7 to 18-in. diameter.

Sturdy three-ft. handles put the workman a safe distance from the pole.

No.	Handle Length, Ft.	Wt., Lbs.	Each

General Machine Warning Signs

Type B

Unusually stable; panel is pivoted on A-frame so that wind pressure exerts a downward force, anchoring sign more firmly.

Panel is free to move 35° from vertical; 1½-ft. square. Frame is held in open position by spreaders.

Socket on side supports warning flag or lantern.

No. 7358—Wt. 23 lbs.....Prices on Application

General Machine Warning Stands

For use as base for B Warning Mast or demountable warning signs, or as support for Warning Flasher.

Four-legged; collapsible.

Spring-actuated ring detent locks stand in open or closed position.

Open dimensions: base 31-in. square; height 38-in. Closed dimensions: 4-in. wide; 32-in. high.

No. 7328—Wt. 20 lbs.....Prices on application

General Machine C Warning Masts

Used with B Warning Stand. Consists of ¾-in. aluminum pipe with sliding aluminum rod. Collapsed length 71-in.; extended length 115-in.

No. 7603—Wt. 6 lbs.....Prices on application

Oshkosh Warning Signs

A lightweight, extremely durable sign, the legs of which are made of 1/2 in. high carbon steel and will not bend. Has 1 1/4 in. flange around the edge of sign that acts as a reinforcement and protects the lettering from damage when being transported in trucks.

Each sign is equipped with two convenient handles for adjusting the angle of the legs. Handles are hollow and can also serve as flag sockets. Each handle is also fitted with a handy lantern lock.

The solid black 5 1/2-in. letters on a 20 x 20-in. background of brilliant traffic yellow flashes a signal which cannot be ignored.

The sign proper can be made luminous for night use and still be as efficient for day time use. (For prices see below).
 Dimensions: 13 in. high, 28 in. wide. Folds to 28 x 28 x 1 1/4 in. Shipping weight 23 lbs.

- No. **3513**—As Described.....Each **\$17 20**
- No. **3513.1**—Luminous, One Side Only.....Each **\$23 20**
- No. **3513.2**—Luminous, Both Sides.....Each **28.40**

Bartlett Road Signs

Automatic Type

A durable warning signal which folds into a compact form for carrying.

Locking cam on base of tripod locks legs when open, preventing the wind from blowing sign over. Black letters on yellow background for maximum visibility.

Flagger has three sockets; two flags supplied with each complete outfit.

Four feet high.

Available with sign illustrated, 18 x 18-in., or with following warn-

ings: Men Working (15 x 15-in.); Men Working Above (18 x 18-in.).

Description	Wt., Lbs.	Each
Complete Sign as Described	13	\$15 00

Metal Sign Only (15 x 15-in.)	2 1/2	4.15
Flags Only (Red)	1	.50

Coffing Flag and Flag Holders

Flag holder eliminates need of nailing the flag staff to pole, prevents split flag staffs and is easier and faster to attach.

Holder will fit any size pole. Chain wraps around pole and fastens to main body of clamp.

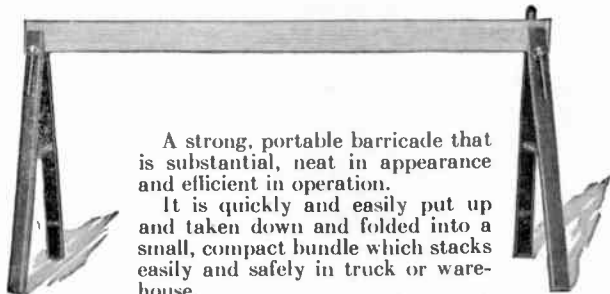

Equipped with a strong coil spring that provides strong tension on the chain.

Flag is made of 6 oz. Army Duck, 12-in. x 16-in. Hardwood flag staff is 1-in. x 18-in.

Description	Each
Flag only (with staff) Ship. Weight 1 lb.....	\$1.75
Flag Holder only, Ship. Weight 2 1/2 lbs.....	3.95
Flag Holder and Flag, Ship. Weight 3 1/2 lbs.....	5.70

Oshkosh Folding Barricades

A strong, portable barricade that is substantial, neat in appearance and efficient in operation.

It is quickly and easily put up and taken down and folded into a small, compact bundle which stacks easily and safely in truck or warehouse.

To set up quickly and easily, open the legs, latch the cross-piece, put in the cross-rail and turn the handle. The cross-rail is then held in a vice-like grip without injury. Will hold wood from 1 to 3 in. thick.

Heavy gauge steel legs, with steel pipe handle, latch and extension swivel. Hollow in pipe handle is handy for holding danger flag. Also equipped with lantern lock to hold lantern securely. Orange enamel finish.

Extension swivel makes it possible to erect a square barricade with two pairs of barricade legs instead of four. (Extension swivel not included—see below.)

No.	Height, In.	Width Open, In.	Size Folded, In.	Ship. Wt., Lbs.	Per Pair
3372-101	32	20 to 23	3x2x35	25	\$17 60
3372-102	42	25 to 29	3x2x44	32	22.40

Extension Swivels.....Each **\$4.75**

Note—Wooden cross rails are not included.

Fairmount B Warning Flag Bases

Red cast iron base used to support B warning flag. 1-3/16-in. hole in center accommodates flag staff; may be used in either of two positions. With convex surface down base is self sighting, when reversed serves as fixed support for flag. Approx. Wt. 8 Lbs.

Neo-Flasher Warning Lights

Model 0-100LSY

Shines in two directions. Flashes 1000 hours on one battery. Locks to barricade. Tamper proof switch. Clear, red or amber lens.

Model **0-100LSY** Each **\$27 00**

Model 1-100LSY

Visible from all directions. Flashes 1000 hours on one battery. Locks to any barricade. Tamper proof switch. Clear, red or amber lens.

Model **1-100LSY** Each **\$25 35**

Model 2-100LSY "Two-Head"

Super bright in two directions. Flashes 600 hours on one battery. Locks to any barricade. Tamper proof switch. Clear, red or amber lens.

Model **2-100LSY** Each **\$35 40**

Model 4-100LSY Directional Light

Super bright in one direction. Flashes 1000 hours on one battery. Locks to any barricade. Tamper proof switch. Clear, red or amber lens.

Model **4-100LSY** Each **\$31 10**

Neo-Flasher Warning Lights

**Model 9-100
Truck Flasher**

Wire connects to truck battery with switch on dash board. Will flash for long periods without discharging battery. Lens 5 3/8-in. Hood is optional.

Model **9-100** Each **\$35.40**

**Model 5-100
12 Volt
"Stop" or "Caution" Light**

Used for stop signs or school crossings. Will operate 750 hours (30 days and nights) on two ignition dry cell batteries. Standard 8 3/8-in. lens. Neon tube does not burn out. Red or amber lens. Aluminum case.

Model **5-100** Each **\$110.00**

Neo-Flasher Utility Flashers

**Warning Stand With
Model A-100 Flasher**

360° Alternate Head

Model A-100 Telephone Company Flasher is a very bright flasher for use at manholes. Mounts on General Machine Warning Stand. Directional lens visible for 4 miles. Will flash continuously for 750 hours on two 6 volt ignition dry cells.

Equipped with plastic lens. Head mounts on telescope mast and tightens with wing nut. Steel battery case on ground has 12-ft. cord.

Model **A-100** (Without Warning Stand) Each **\$92.50**

360° Alternate Head

Has glass Fresnel and Prismatic clear lens. Neon tube does not burn out. Sleeve same as Directional Head.

Model **360° Alternate Head** Each **\$20.00**

Warning Stand (General Machine Products Co.)

For use as base for Neo-Flasher Model A-100 and Warning Signs, four legged, collapsible. Spring actuated ring detent locks stand in open or closed position.

Open dimensions, base 31-in. sq., 38-in. high. Closed dimensions, 4-in. wide, 32-in. high.

Model **7328** Model B Warning Stand Each **\$16.25**
7605 Model C Warning Mast **14.50**

Neo-Flasher Public Utility Barricade

Model B

For use with warning light at manholes. Made with 1-in. angle iron into two frames 21-in. x 38-in. and hinged together at top.

Holds swinging 20-in. x 24-in. panel, painted yellow, reading "MEN AND EQUIPMENT WORKING".

Flashers mount on top, if desired.

Model **B** (Without Light) Each **\$17.00**

Neo-Flasher Neo-Power Pak Batteries

6 Volt

For use in Models 0-100, 1-100, 2-100 and 4-100 lights. Metal encased and leakproof. Will operate lights approximately five weeks.

Model **100BM** Each **\$1.75**

Neo-Flasher Battery Cases

For use with "Stop" or "Caution" Light Model 5-100. Complete with 6-in. wheels. Hinged lid is threaded to receive 2-in. pipe standard and may be locked closed. Will hold four 6 volt ignition dry cell batteries. Portable. Painted yellow. Dimensions 15-in. x 11-in. x 9 1/4-in.

Model **A. W.** Each **\$77.50**

Standard Railway Fusee Linemen's Flare Lights

Yellow Light

For Night Repairs and Line Patrol

These lights burn with a brilliant yellow light for approximately 30 minutes. Equipped with a friction cap ignition for instantaneous lighting, without matches. Not affected by wind, rain or snow.

They are invaluable during outages or other emergencies which require a quick, general illumination. Has spike point in one end which makes it possible to attach to a post or tree, or on the cross arms of a pole, where they afford ample illumination for safe, speedy work. Can be carried in the hand on line patrol.

No.	No. Per Case	Wt., Lbs. Per Case	Per Case
3025	72 Yellow Flares	56	\$27.00
2725	36 Red & 36 Yellow	52	23.75

Red Flare Light

Protection on the Highways After Dark

An unmistakable warning signal for use in case of highway accidents, truck breakdowns, or when power lines are down on thoroughfares. They serve a two-fold purpose of warning the public of existing danger and protecting men and equipment on the highways at night.

Equipped with friction cap ignition for instantaneous lighting, without matches. Has spike point for attaching to wood surface or other convenient place.

No.	Burns, Minutes	Std. Pkg., Case	Ship. Wt., Lbs.	Per Case
2715	15 Red	72	29	\$14.00
2720	20 Red	72	34	15.50
2730	30 Red	36	25	10.50

Flare Rack For Truck Cabs

No. **500** Rack holds 5 Flares, Ship. Wt., 2 lbs. Each **\$1.10**

Oshkosh Combination Pay-Out and Take-Up Reels

An extremely lightweight, strong and durable Pay-Out and Take-Up Reel all in one. Steel tubing frame. The guide pins fold flat and the entire reel is compact and easy to carry or slide on truck.

Guide pins are easily and quickly adjusted to take coils of wire as below.

Automatic Brake—as the wire is pulled the brake releases and the wire pays out freely. The instant tension is slackened the brake sets and prevents backlashing.

Easily converted into a take-up reel by using two braces furnished to hold reel in upright position. Hand crank, which is also furnished makes possible a fast and easy job of taking-up.

Carrier frame easily removable so that reel can be bolted to truck. A thumbscrew terminal is provided for grounding reel.

Will hold coils of wire—inside diameter 13 to 27 in.; Outside diameter 31 in.

Dimensions: Length over all 63 in.; width 34 in.; height over all (guides up) 13¼ in.; guides down, 8¾ in.

Oshkosh Pay-Out Reels

For mounting in gangs on wagons or trucks when paying out several wires simultaneously.

Finished hardwood braced and reinforced with sheet steel.

Overall dimensions: Diameter 34 in.; height 19 in.

Reels are adjustable for 12, 18 and 24 inch reels.

No. 902—Shipping Weight 40 Lbs.....Each \$32.00

Oshkosh Barrow Reels

Heavy Western Union Type

Made of heavy material for heavy wire and heavy work. Fine quality hardwood, braced and reinforced with steel. A wide bearing, with long pivot and sleeve permits reel to turn easily no matter how heavy the coil of wire on the reel. The friction developed by this bearing is not sufficient to prevent the reel from turning easily, but keeps reel from paying out the wire too fast and tangling it. Strong steel legs.

Reel pins adjustable for 12, 18 and 24 in. coils. Dimensions: 72 in. long, 42 in. wide; height over all 31 in.

No. 900	—Shipping Weight 80 Lbs.....	Each	\$63.35
No. 901	—Extra Guard Pins; Weight Set		
	1½ Lbs.....	Per Set of 4	5.90

Oshkosh Folding Take-Up Reels

A handy tool to have on a truck. When taking down good wire it will coil it neatly in standard sized coils entirely undamaged. Even when taking down or picking up wire to be sold as scrap it is easier to handle and takes up less space when in coils, and takes no longer to coil with the reel as to throw it loosely on the truck.

The reel is made of malleable iron and steel. The stand is hardwood, mortised and framed, and reinforced with steel. Both the reel and the stand collapse, so that when not in use takes up very little space.

Dimensions: Stand is 36 in. high, 19 in. wide; collapses to 4½ x 19 x 39 in.

For 21 inch coil.

No. 897—Shipping Weight 42 Lbs.....Each \$43.60

General Machine Terminal Wire Reels

Used in terminal room for paying out or re-reeling standard interior wiring. Made entirely of heat treated aluminum alloy. Handle at top for easy carrying. Fool-proof spring device allows outer half of reel to be disengaged quickly to remove completed reel of wire. Two flanges may be adjusted by this spring device to vary the inside width of reel from 3¾ to 4⅞ inches. Automatic brake prevents over-running. 1¼-inch solid oak base with non-skid

rubber washers. Two holes are provided for mounting on wall or side of truck. Overall dimensions of reel: 21¾ x 16 x 9 inches. Weight, approximately 18 pounds. Bright aluminum finish.

No. 8047.....Price on application

General Machine Wire Portable Reels

Consist of flanged steel drum mounted on a spindle extending from the vertical surface of an L-shaped sheet steel base.

Outer flange readily removed; drum has spring takeup for gripping the center of coil. Handle makes portable use easy.

No. 8289—Wt. 24 lbs.

Price on application

General Machine Power Reels

Type RS

Consist of one spool, driving spindle, pole spindle and two brake assemblies.

Spool mounts on either spindle; has capacity for 1000-ft. of 1/4-in. wire rope. Spool of heavy-gage steel, welded construction throughout, reinforced on outer facings; 18-in. diameter, 7 1/4-in. wide.

Driving spindle mounts on the extending winch shaft on line construction trucks. Length 18 5/16-in.

Pole spindle used to support spool on the side of a pole. Length 13 1/4-in.

No. D1436—Wt. 114 lbs. Price on application

Allen Payout Reels

With Brake

Used to hold coils of wire or other material when using Coiling Machine No. 1200. Reel is made of metal to carry heavy loads. Will hold coils with inside diameter from 12-in. to 21-in. inclusive.

No.	Shipping Wt., Lbs.	Each
1300	112	\$66.00

Allen Payout Reels

All metal construction. Turntable of reel is 36-in. in diameter and will not wobble. Reel pins can be moved for coils 17-in., 19-in. and 21-in. diameter circles.

Furnished with brake.

No. 100 Each **\$64.00**

Allen Twin Payout Reels

With Brake

Sturdy reel constructed of metal to carry heavy loads. Will hold coils with inside diameter from 12-in. to 21-in. inclusive. Has small pay-out reel mounted directly on top of spindle for paying out small and medium wire in coils or from spools. A companion reel to the No. 1250 Twin Coiling Machine.

No. 1350 Each **\$98.00**

Allen Utility Reels

Mounted on strong steel tubing stand. Handy reel has 12-in. diameter. Used for coiling and paying out wire leads to public addressing systems, electric tools and other wire handling uses.

No. 400 Each **\$70.00**

Call Graybar FIRST For . . .

Allen Reel-O-Matics

With Reel-O-Matic equipment one man can measure, coil and cut an order of cable, wire rope, or messenger strand from pay-out to take-up reel all in a matter of minutes. All models are furnished with permanent drive-shaft attachment

for the Coil-O-Matic reel. With this device either coiling or reeling or both may be accomplished without setting up or changing.

Model 30-60 "Giant"

Designed to handle larger reels of cable, wire rope and messenger strand and lead cable. Reel capacity to 66-in. diameter, 44-in. wide weighing 4,100 lbs. Fits in space 3 x 8 ft. Variable speed reel drive is remotely controlled (note control clipped to operator's belt.) Hydraulic lift platform raises and lowers reels quickly and safely.

Other models of the "Giant" handle reels of 72-in. and 84-in. diameter.

Model 30-60 "Giant"..... Each **\$3,960.00**

Model A

Equipped with two NEMA standard 110 volt A.C. motors, one for raising and lowering the lift platform by finger-tip control, the other for turning the take-up reel which is controlled by a foot pedal.

Mounted on 30-in. by 60-in. cold-rolled steel base. Has four driving speeds. Built to handle reels up to 54-in. in diameter and 36-in. in width. Supplied with foot control and cord and power-supply cord.

Model A..... Each **\$950.00**

Model B

Equipped with a single NEMA standard 110-volt A.C. 1/2 H.P. motor which actuates the take-up reel by foot pedal start-and-stop operation. Platform is raised and lowered manually by wheel-crank mechanism. Other specifications the same as Model "A".

Model B..... Each **\$792.00**

Model E "Midget"

Handles reels up to 54-in. in diameter by 36-in. wide. Four speeds for various sizes of wire cable. Compact, fits 30-in. by 60-in. floor space. Has stationary platform. Equipped with permanent drive shaft attachment for Coil-O-Matic Reel.

Model E "Midget"..... Each **\$530.00**

Model F, Single Speed, no reverse, 48" Reel... Each **\$454.00**

Allen Kart-O-Matics

Designed to provide an economical, efficient method of reeling and coiling wire and cable from a standard Reel-O-Matic reel cart or a rack-mounted reel.

Accomodate reels to 54-in. diameter by 32-in. in width.

Complete with 2 carts, power unit, meter . . . Each **\$670.50**

Allen Reel Carts

Sturdily constructed of heavy gauge steel to meet a wide range of everyday warehousing and material-handling operations. Supports reels up to 54-in. in diameter by 32-in. in width. 2000 Lb. capacity.

Top cross member is drilled for quick, easy placing of measuring meter.

Model R Each **\$176.00**
 Model F, Hydraulic, 48" Reels, 2000 Lbs. Each **\$198.00**

Allen Coiling Machines

For measuring and coiling small and medium wire, cordage and other materials to be taken from large coils or spools and rewound to special lengths. Will make coils 12-in. inside diameter.

Designed for maximum strength from high quality steel tubing. Meter not included.

No.	Base Length, In.	Base Width, In.	Each
500	48	24	\$129.00

Allen Twin Coiling Machines

Composed of two reels mounted on one stand. Large reel measures and coils heavy wire, cable cordage, hose and other materials that can be successfully coiled. Large reel makes coils 21-in. inside diameter. Small reel makes coils 12-in. inside diameter and is used for small and medium wire. It will handle 500 feet of No. 8 Type R rubber covered wire or its equivalent. Both reels are collapsible for easy removal of coils and are provided with a friction brake to prevent backlash.

The Measuring Meter can be moved from one standard to another in line with reel being used.

Furnished as a complete package unit or as separate parts as follows: Twin Reels (with stand); Wood Base; Stands for Meter; No. 1 Meter.

No.	Base Length, In.	Base Width, In.	Each
1250	60	28	\$283.00

Same as the No. 1250, except that the small reel and one meter stand have been omitted. Furnished as a complete package unit, or separate parts as follows: Reel with stand; Wood Base; Meter with stand.

No.	Base Length, In.	Base Width, In.	Wt. Lbs.	Each
1200	60	22	224	\$212.00

Allen Reliable Meters

Meters are used to measure accurately lengths of wire, cable, cordage, tape, small hose, strip steel, plastic products, etc.

Measuring wheel rides the material eliminating error caused by bends or twists in material. Brake on meter stops wheel immediately when material runs out. Counts up to four digits.

Will measure up to and including 1 1/4-in. diameter material, with standard counter. (Special counter on request.)

No.	Shipping Wt., Lbs.	Each
1	22	\$65.00

Allen Type CVM Meters

Available with or without swivel bracket to fit Reel Cart. Mechanical action; oilite bearings; no maintenance; great accuracy; direct reading.

Capacity, from building wire up to 750,000 MCM.

Type CVM, with bracket. Each **\$88.00**

Chance Guy Wire Dispensers

Feed guy wire smoothly and rapidly through a square opening. The square hole catches strand, prevents uncoiling and protects the workman from the whipping of loose ends.

Wire can be unreeled from either vertical or horizontal position, permitting dispenser to be hung from truck by the ring holder or placed flat on the ground.

Excellent for storage; convenient to use when guys are cut and made up in the warehouse.

No.	Wt. Lbs.	Each
3001	21	\$16.75

**American Brand Rope
Manila Rope**

Rope in Cartons

Six sizes and 10 put-ups individually packaged for ease of handling and cleanliness. All types of rope are available. Each coil is marked at five-foot intervals for fast measuring.

Sizes 1/4-in., 5/16-in., 3/8-in., 1/2-in. diam. in 600 and 1200-ft. coils. Sizes 5/8-in. and 3/4-in. diameter in 600-ft. coils only.

Manila and Sisal Handy Coils

First grade pure manila rope in 100-ft. connected coils. Also in sisal fiber.

Available in 1/4-in., 5/16-in., 3/8-in., 1/2-in. diameters.

Nylon Handy Coils

Individual connected coils, available in the following sizes:

Diameter In.	No. of Coils	Individual Length, Ft.
1/4	7	50
5/16	5	50
3/8	4	50
1/2	4	25

Tarred Marline

For use principally by power and light companies, contractors, telephone companies and by manufacturers of conduits and cables.

Either 2 or 3 yarn construction in 1 lb. balls and 10 lb. tubes.

*Weight of 4-strand approximately 7% more than above.

**Safe working load 20% of Tensile Strength.

Floterope

Made of pure polyethylene fiber. Non-absorbent, it retains its buoyancy indefinitely. Comes in contrasting color combinations.

Available in all sizes up to 1 1/2-in.

Tarred Ratline

Can be furnished in 9, 12, 15 and 18 thread. In 50 lb. coils.

Contact Graybar for additional information and prices.

General Machine Wire Raising Tools

Made with two hooks for the simultaneous placing of steel strand and open telephone line. Made of solid, cast bronze or malleable iron and is provided with a shaft for placing on the end of a wooden tree pruning pole. A hole in the shaft allows the locking pin in the sleeve of the pole to fasten the tool securely to the pole. Length, 11 5/16 inches. Weight, 1 pound, 3 ounces. Oiled finish.

No. 6355.....Price on application

General Machine Extension Handles

For Use with Wire Raising Tools and Cable Block Lifters

Female end of handles have spring-mounted pin to lock tool handles securely in place. Other extension handle sections may be added similarly for greater lengths.

Of seasoned lumber, 1 1/4-in. diameter, 6-feet long.

No. 6600—Wt. 3 lbs.....Price on application

B & L Pole Butt Pullers

Eliminates use of line truck derrick or lazy bar. Consists of a double block with a shackle and a triple block for mounting on a truck. 6 In. diameter bronze bushed steel sheaves for 1/2 in. or 5/8 in. diameter winch line. Heavy duty construction for 10 ton safe working load.

Small loop splice easily dead ended to sheave pin becket, saving valuable head room. May be furnished with 10 ft. of 1/2 in. alloy steel sling chain with grab hook—please specify if this is required when ordering.

No. 5111.....Prices on application

B & L Snubbing Blocks

For taking slack out of light wire; working loads up to 700 pounds.

Snap hook easily and safely engages come-along; anchor hook fits around insulator pin.

Use with 3/8-in. diameter manila rope or No. 10 sash cord.

With iron, roller or self-lubricating bronze bushings. Galvanized. Sheaves are easily replaced.

Furnished without rope and anchor hook unless otherwise specified. Weight, less hook and rope 2 3/4 lbs.

No. 5021.....Price on application

B & L Light Wire Blocks

**"Bosloc"
Self-Locking**

For pulling or snubbing wire where maximum load is about 500 lbs. Lock when fall line is pulled to one side; release when pulled to straight position.

Consist of two single blocks with replaceable roller-bushed sheaves. Pressed steel shells and forged steel shackles; all parts galvanized.

No. 5023—Weight per set 2 1/4 lbs.

Klein Self-Locking Block Tackles

Light gal. steel shell blocks with snubbing hook to lock load in any position. Bronze bushed aluminum

alloy sheaves. Furnished with 25-ft. 3/8-in. 4-strand Manila rope. Supplied with drop forged No. 258 hook or swivel hook No. 259. Both hooks designed to fit under insulator and engage pin on cross arm. Rope not spliced to block.

455-SP-6	Male fixture for 3 ton hoist swivel housing	3.60

Klein Anchor Hooks for Tackles

A drop forged steel hook approx. 5½-in. long by 3¼-in. across the hook. Eye I.D. 5/8-in. Engages with snap on Klein Tackle Nos. 1802-30 and 111802-30. Gal. finished. Designed to slip under insulator and engage pin on the cross arm. Safe load 1,500-lbs.

No. 258 Each \$1.20

Swivel Type

Drop forged steel. Approx. 6½-in. long by 3¼-in. across the hook. Swivel clevis will engage with snap on Klein Tackles Nos. 1802-30 and 111802-30. Swivel prevents twisting and kinking of rope. Safe load 1,500-lbs. Designed to engage pin as above No. 258 hook.

No. 259 Each \$1.60

B & L Star Brand Booster Hooks

Specially designed to support the cable while being pulled through the supporting rings.

These hooks are securely clamped to the messenger strand and present a smooth rounded surface to the moving cable. While in this position it performs the dual function of supporting and resisting movement while the cable is being placed.

No. 5011—Weight, 3 lbs.

B & L Star Brand Come-Along Hooks

Forged steel flatted hook and swivel eye.

No. 5012—Galvanized

Half-inch size for use with 3-in. single, double and triple blocks and 4-in. single.

Five-eighths size for use with 4-in. double and triple blocks.

Drop Forged Flatted

No. 4182 available in sizes 22 through 36; No. 4181 available in 7/16 through 2-inches; No. 4185 available in sizes 1 through 14. Available either galvanized or jappanned.

For prices contact Graybar.

B & L Star Brand Bosloc Winch Rope Hooks

Used primarily in telephone work for pulling and lifting poles.

Made of drop forged steel. Serves as a choker at end of truck mounted winch line.

Quickly installed in small loop splice—point of hook inserted through splice and allowed to pass along hook until stopped by button.

No. 5015 Approx. net wt. 5 lbs.
Overall length 8 in.

Hooks furnished with 7/16-in. opening at narrowest point for 1/2-in. winch line unless larger winch line specified.

Coffing Safety Hooks

(Patent No. 2,706,318)

Stays Open Until Closed

Safety Hook With Swivel Eye

1. Full Throat opening allows full use of inside hook area.
2. Latch fits snugly over the point of the hook to prevent snagging.
3. Highest tensile strength for its size. Plated to prevent rust and corrosion.
4. Positive lock securely holds latch in place.
5. Slight pressure on the release unlocks the latch. Latch stays open until closed.

B & L Star Brand C Hooks

Very convenient for connecting a winch or pulling line to a cable grip or core hitch. Can also be used at the end of a winch line for attaching to poles, transformers, etc.

No. 5013—Wt., each 2½ lbs.

B & L Star Brand Cable Blocks

This one-sheave block is a companion piece to the aerial guide and can be clamped to the messenger strand in a similar manner.

Used for guiding the winch line from the cable rings and messenger to the winch or other power apparatus.

Also for pulling cable around a slight corner; when used this way it guides the pulling-in line and also the cable when it reaches this point.

Steel frame, with steel roller and supplementary steel sleeve over sheave pin. Frame is hinged and fitted with clamp for fastening to messenger.

No.	Description	Wt. Lbs.
5051	For cable 2½-in. in diameter	11

For cable blocks to handle larger cables contact Graybar.

General Machine Wire Cable Blocks

A quick detachable cable block, used as a temporary support for multi-wire cable in rural areas where poles are considerable distance apart.

Easily mounted or demounted from the suspension bolt with unique opening for wires or cable.

Limited space on suspension bolt permits cable block to be mounted between pole and suspension clamp. Wt. ¾ lb.

No. G1023.....Price on application

General Machine Cable Blocks

For supporting aerial cable on suspension strand prior to lashing cable.

Frame and sheave of heat-treated aluminum alloy; sheave has oilite bearings. Strand hooks have steel inserts on bearing surfaces.

Locking lever reversible; blocks may be locked in either position so cable can be pulled in opposite direction.

No. 7268—Wt. 3¼ lbs.....Price on application

General Machine Cable Block Lifters

Used with tree pruner handle sections for placing cable blocks on suspension strand. Consists of an aluminum alloy tubular section which fits into the tree pruner handle, an aluminum alloy cradle for supporting the block, and a hook for operating the block cam lever. The hook can be set in either of two positions 180° apart for either right or left hand cable positioning. Height over all, 11¾ inches; cradle width, 3¾ inches. Weight, approximately ¾ pound. Steel hook is zinc or cadmium plated.

No. 7163. Price on application

General Machine Cable Block Pushers

No. 7180

Used for pushing cable blocks along 6,000, 10,000 and 16,000 suspension strand during lashing operations. Consists of a slotted tube with semi-rotatable sleeves at each end which lock in open and closed positions. One end has a circular flange for bearing against the lashing machine. The other end bears against the strand hooks of the cable blocks. Cannot fall off during the lashing operation. Diameter 1¼ inches, diameter of flange, 1¾ inches; length 35 inches. Weight, approximately 2 pounds. Zinc or cadmium plated.

No. 7180.....Price on application

B & L Aerial Cable Guide & Straighteners

For guiding cable into supporting rings when pulling; also serve to straighten out small kinks or waves in cable. Made of pressed steel in two parts readily joined together, a curved open section for guiding and a straight closed section for straightening.

Easily attached to messenger wire; securely clamped to prevent end motion.

No.	Description	Wt., Lbs.
5053	Complete for up to 2½ in. Diam. Cable.....	24
	Straighteners only, for 2½ in. Diam. Cable.....	9
	Guides only, for 2½ in. Diam. Cable.....	15

General Machine Aerial Cable Guides

Used ahead of cable lasher to raise cable into position for lashing to strand.

Ideal in construction using cable 1-in. diameter or less.

Shoe is cast aluminum with steel insert on bend to eliminate excessive wear; suspended by steel straps from two strand rollers locked on strand.

No. G1012—Wt. 11 lbs. Price on application

Type C—With Straightener Section

For use with cable up to 3-in. size. Where no obstructions exist, it may be used approximately 3-feet ahead of lasher, or may be mounted stationary on the strand above the cable reel to straighten cable. Size, 40-in. long, 25-in. high.

No. 7474—Wt. 60 lbs. Price on application

B & L Aerial Cable Rollers

Single

No. 5061

No. 5062

No. 5063

For medium span construction. Use with pin-type insulators.

Double

No. 5064

No. 5065

For use on long pulls or on curves. Latch opens easily and locks securely. Specify size of cross arm when ordering. Other types available on application.

B & L Star Brand Aerial Cable Guides

With Wood Rollers

For pulling large cable in the supporting rings.

When attached to the strand by a hook and special clamp, the lower part, carrying tow sheaves, provides an easy bend for the cable as it approaches the ring.

Consists of a steel frame, with the necessary hooks and clamps to fasten to the strand and two well seasoned hardwood sheaves, with smooth finished groove which will not damage cable sheath. Sheaves have brass bushings which can be lubricated for easy operation.

No. 5052—Weight, each 32 lbs.

Simplex Aerial Cable and Wire Tensioning Jacks

Single Acting—Ratchet Releasing

A lightweight jack, sufficiently powerful to pull overhead and underground cables easily and to take up slack in trolley, guy and transport wires. For public and private utility maintenance and construction work.

Speed trigger permits instant slack take up when jack is not under load. Non-flexible rack bar facilitates set up. Steel lever is held securely with spring safety clip.

Capacity 2 Tons—20 1/4 In. Travel

No. 324—Shipping Weight 13 Lbs. Each \$38.00

Extra Equipment Needed—For tensioning bare wire as shown in illustration: Two bare wire grips and two wire slings. For splicing overhead cable: Two double-eye split cable grips, two three-bolt clamps and two wire slings—This equipment IS NOT FURNISHED WITH JACK—consult this catalog for this equipment.

General Machine Cable Suspension Hooks

For use on long spans where two messenger strands are necessary to support cable, the second messenger acting as a suspension strand.

Hook allows cable car to pass over strand.

Made of galvanized steel forging; will withstand tensile load of 4000 pounds.

Size, 17 5/8 x 7-in.

No. 6523—Wt. 13 lbs. Price on Application

Diamond Manhole Cover Hooks

A useful tool for the subway construction force. Designed to easily raise a heavy manhole cover by prying the wedged-point end of the hook under the groove provided in the cover.

Made of excellent quality electric tool steel, suitably hardened to prevent bending and breakage. Overall length 26½ inches.

No. 860 Price on application

Fairmount B Manhole Sumps

Cast iron sump used in manholes. Cover 10⅞-in. wide.

Height In.	Width In.	Wt. Lbs.
4⅜	13½	33

General Machine Manhole Tents

Used in conjunction with manhole guard rail for protection against inclement weather.

Made of mildew-resistant canvas and two pipe members, attached to front corners of cover, which insert into manhole guard.

Size, 36-in. square; 70-in. overall height.

No. 6881—Wt. 15 lbs. Price on application

General Machine Ground Tents

For the protection of personnel in cold or inclement weather. Consists of fire, water and mildew-resistant canvas cover on collapsible metal frame.

Size, 6'9½" square at base, with 1-ft. sod flap; 6'5" high.

No. 6282—Wt. 64 lbs. Prices on application

Oshkosh Sectional Ladders

These ladders are handy to have around for miscellaneous uses where a long extension ladder cannot be used. For small service trucks, one or two of these sections can be hooked on and carried all the time for emergency use.

The sections join together interchangeably. One section fits into the other at either end as shown in illustration. The joint is stiff, solid and secure. Do not use more than three sections to make one long ladder.

The material used in these ladders is the same as in Safety Extension Ladders, but do not include any of their safety features. Sections lap 1-ft. when joined together.

Length 6 feet. Outside width, top, 16½ in.; inside width, bottom, 17 in. Rungs 1⅝ in. diameter. Rails 1⅝ x 2¾ in. Wt. 11 lbs.

Special length sections can be furnished if wanted; also rubber pikes on special order. Contact Graybar for specials.

Sectional Ladders—6-ft. Length Per Section **\$13.55**

Chance Swivel Hook Maintenance Ladders

Makes line repairs possible at almost-inaccessible places on maintenance and construction jobs.

Hooks swivel in complete circle. Ladder can be suspended from virtually any point on 11-frame or towers.

Strong link chains are anchored to top reinforcing rod. Safety snap-hooks make chains easy to attach to swivel hooks with one hand.

Heavy-duty rungs spaced at 12-in. intervals. Reinforcing rods at top and bottom.

No.	Description	Overall Length		Wt. Lbs.	Each

M1904-14	Hook for 14-in. diam. arms			24½	24.00

General Machine Ladder Hooks

Designed to enable ladders to be hooked over and supported by steel suspension strands for aerial cable. When not in use, hooks may be swung inside uprights parallel to the rungs. Hooks are formed hot from steel pipe. Heavy phosphor bronze springs and a square manganese bronze collar holds the hooks firmly in either of the two positions. Hooks will support a load of approximately 300 pounds each. Finish: Steel parts cadmium plated. Weight, 1¾ lbs.

No. 7254 Price on application

Pennington Steel Buildings

No. 952 Tee Pee

Portable, all-steel building that's completely adaptable; useful on a construction project storing heavy equipment; handsome enough to be placed in yard of any home. Has 512 cubic ft. of storage space. Easily assembled, screw driver and wrench are only tools required.

Bevel edged steel walls and formed steel shingle roof. Can be erected on wood or concrete foundation. All parts are precision pre-cut and pre-drilled for bolt type construction.

Window openings are factory pre-cut. Two beautifully crafted V-panel doors. Natural finish, kiln-dried, clear yellow pine with sturdy cross panels, interlocking corners and weatherproof glue throughout. Doors are dipped in the finest type clear wood preservative, to assure long life. Doors open to a service width of 48-in. Each door is 1½-in. thick, 24-in. wide and 72-in. high and hinged at right and left, overlap in center. Comes complete with four black nickel hinges and two "L" cabinet handles, one with lock. There is a 52-in. rain gutter above the doors.

No.	Building Dimensions (At Eaves)	Height at Peak, in.	Base Measurement Width, in.	Base Measurement Length, in.	Ship. Wt. Lbs.

956	Wood Floor (Optional) is 1-in. tongue-and-grooved flooring and 2-in. x 4-in. supporting members, cut to size and metal strapped.				

No. 950 Hideaway

Same building as Model No. 952 Tee Pee, except without windows. Shipping weight 600 lbs.

**Pennington Steel Buildings
No. 957 Cottage Cabin**

Designed for all around use. This rugged steel building can be put up by anyone in just a few hours. Constructed for long life without maintenance, the bevel edged steel walls and formed steel shingle roof are bonderized and zinc coated for years of weather protection. Has 85 mph wind load and unlimited snow load.

Building with 512 cu. ft. of storage space is shipped knocked down, only tools needed to assemble are a screw driver and wrench. Can be converted as a trailer. (Trailer available upon request.)

Two solid louver shutter doors (open to a service width of 48-in.); each door is 1½-in. thick, 24-in. wide and 72-in. high, are hinged at right and left, overlap in center, come complete with black nickel hinges and two "L" cabinet handles, one with lock. Four matching louvered shutter windows.

Base and truss framing is constructed of 10½-gauge steel; 5-in. x 5-in. corners are 14-gauge steel; roof and sides are 26-gauge steel.

Oshkosh Safety Extension Ladders

Designed and built especially for public utilities. Has many outstanding features, the most outstanding one being the automatic safety lock, which is absolutely foolproof.

When extending the ladder, the locking device lifts up automatically to allow the rungs to pass; but, the instant operator lets go of rope, the locking device drops in place and the top section is firmly locked. To lower, the operator gives a slight pull on rope, then lets top section descend slowly—it cannot drop accidentally.

Side rails are straight - grained, properly seasoned airplane spruce. Rungs are tough Mountain Hickory, absolutely straight - grained. Each rung has a shouldered tenon joint which is pressed tightly into side rails, assuring a safe, tight fit. The side rails of each section are connected at top, middle and bottom with steel tie rods.

Each section is equipped with safety-tips and pikes and either section can be used as an individual ladder.

Other exclusive safety features: rubber faced tips; transparent safety finish; safety pole grippers; rubber guarded safety pikes. All metal parts are parkerized.

BE SURE to specify whether Straight Side Rails or Flared Side Rails are wanted—for STRAIGHT Side Rails add letter "S" to number; for FLARED Side Rails add letter "F".

No.	Length, Ft.		Each	No.	Length, Ft.		Each

General Machine Aerial Tents

For the protection of workers on aerial cable in cold or stormy weather. Made of fire- and water-resistant canvas. Collapsible aluminum frames support the tents from cable suspension strand. Heavy canvas covers are reinforced at points of contact with frames. Vertical openings on both sides accommodate single cables. The C cover has T-shaped opening on both sides for second cable when supported on opposite sides of the pole. Openings are equipped with ropes and grommets for closing the tents securely. Finish: Cover, unbleached 10-oz. cotton duck. Frame, natural aluminum; steel parts galvanized.

No.	Size	Width Inches	Weight Lbs.

Price on application.

General Machine Ladder Tents

One-man tents designed for the cable splicer working from a ladder.

Frame of $\frac{5}{16}$ -in. diameter stainless steel strand attached to bronze clamps which fasten on messenger in two places to form a 42-in. diameter circle to support canvas.

Weather-resistant canvas.

No. 7524—Wt. 15 lbs. Price on application

General Machine Cable Lashers

Type B

No. 7019-2

A quick-adjusting automatic aerial cable lasher for cables from $\frac{1}{2}$ -inch to $2\frac{1}{2}$ -inch diameter, using .091 to .061 lashing wire. Aluminum alloy casting gives maximum strength with minimum weight. Spinning drum operates on 10 sealed ball-bearing surfaces, and lashing machine has 24 ball bearings and 5 needle bearings. All parts enclosed in streamlined housing prevents fouling in tree branches. Two cable lifting arrangements, one at each end. Two rubber strand wheels located on opposite ends of the cable lasher provide continuous power to the drum. When tension on the pulling bridle is relieved, a back tensioning device allows practically no slack in the lashing. All steel parts are cadmium plated; other metal parts are non-corrosive metals. Overall length, $19\frac{1}{2}$ inches; overall diameter, $12\frac{1}{4}$ inches; weight, 43 lbs. Lashing Wire: diameter of coil, 7 inches; lengths, 325 feet; tensile strength, 390 lbs. weight, $7\frac{1}{8}$ lbs.

No. 7019-2 Type B Cable Lasher, complete with towing bridle and instruction manual. Price on application.

No. 6991-1 Sturdy fiber carrying case for No. 7019-2, size, 22 x 14 x 14 inches. Price on application.

Can be supplied with conversion unit using 045 stainless steel lashing wire.

General Machine Cable Lashers

Type C

No. 7142-2

Holds two 1200-ft. coils of .045 lashing wire. Will lash all cables up to $1\frac{5}{8}$ -inch diameter. Aluminum alloy casting. Has sealed-for-life ball bearings on all vital shafts and on the spinning drum. Other moving parts are mounted on Oilite bushings. Two rubber strand drive wheels are mounted in the forward part of the carriage and a small trailer wheel is located in the rear. Driving is accomplished by direct gearing. This lasher embodies all the engineering principles of the "B" Lasher, plus automatic features, including the fingertip operated all-range tensioning device; the self-registering drum lock; the two-way brake to prevent back roll and the center feed non-rotating wire coil. Weight without wire, approximately 33 lbs.

No. 7142-2 Type C cable lasher complete with operating instructions.

No. 7143-2 Sturdy carrying case.

Prices on application

General Machine Cable Lashers

Type D

Latest model in automatic cable lashers for aerial cable up to $3\frac{1}{4}$ -in. diameter. Will lash to suspension strand with diameters from $\frac{1}{4}$ to $\frac{1}{2}$ -in. New tensioning device assures traction on strand far superior to previous lashers.

Two or more cables can be lashed to one strand if total diameter of cable assembly does not exceed 3-in.

Hold two 1200 foot coils of .045-in. lashing wire at one loading; can be operated by one man from the ground.

No. 7360—Wt. 43 lbs. Price on application

**General Machine Cable Lashers
Type G**

Similar to the Type D Cable Lasher, except designed to lash 2½-in. to 5-in. diameter cable to 1¼ up to ½-in. diameter strand with one or two left lay spiral wrapping of .045 SS wire. The lead of the lashing wire will vary from 15 ½-in. to 17 ½-in., depending on the size of the strand.

The pulling mechanism pivots about the axis of the rear driving roller and applies a hold down force on the strand roller approximately 2.2 times the forward component of the towing force. Approximate weight 75 lbs.

No. G1050—Shipping weight w/case 106 lbs.

Price on application.

General Machine Lashing Wire Grips

For securing lashing wire to suspension strand before releasing tension in wire. May also be used for temporarily fastening wire before lashing.

May be used with .065 or .091-in. lashing wire on all strand sizes and with .045-in. lashing wire on 6M and 10M strands. Not for use as a permanent installation.

No. 7362, Wt. 10 oz.....Price on application

Perfection Cable Splicers' Tent Heaters

Affords a convenient, safe, economical and dependable method of tent heating. Portable and easy to operate.

Has built-in soldering iron holder and will heat iron for any soldering purpose.

Tank holds ½-gallon of kerosene and will burn from 5 to 24 hours on one filling.

Sturdily constructed of heavy metal, securely welded and riveted. Heavy iron bottom band to prevent wear.

Body and inside base has baked enamel finish; zinc-plated steel top and ventilating cone; porcelain-enameled heating drum.

Famous Perfection "High-Power" wick-type burner gives instant heat, finger-tip control.

Dimensions: 11¾ in. diameter, 19¾ in. high.

No. 11-B—Approx. shipping weight 12 lbs.

Price on application.

Chance Adjustable Cable Cars

Adjustable to desired height for the convenience and comfort of the user. Can be collapsed and strapped or tied for convenient transportation. Safety hand brake holds car steady during cable hanging or splicing and makes it possible to stop car anywhere on the line.

High quality rubber tread wheels provide long wearing service.

No.	Height	Width In.	Wt. Lbs.	*Each
27	Adjustable	21	27	\$38.35

*Western zone prices; Eastern prices lower.

Chance Pole-Top Gins

Transformer Gin

Designed for hoisting small distribution and rural line transformers, circuit breakers, and reclosers for pole mounting. May be used for other hoisting jobs. Fittings are aluminum for lightweight and easy handling. May be quickly applied to pole with safety latching chain tightener.

Wood mast provides insulation—tested to withstand 75,000 volts per foot.

Rated maximum load including pull on fall line—1500 lbs.

No.	Chain Length, In.	Approx. Wt., Lbs.	Each
*30 TG	21	11	\$32.00
30 TG-1	36	11¾	33.00

*Lineman's Preference (LP)—recommended by Chance Hot Line Tool Demonstrators.

Rotating Gin

Designed for quick attachment to poles for hoisting transformers, crossarms, switches, or other heavy equipment.

Swivels to positions desired for hoisting equipment up around crossarms, conductors, etc. This also aids in maneuvering the load to desired positions.

Rated maximum load including pull on fall line—1300 lbs.

No.	Length, In.	Wt., Lbs.	Each
C50	82	53	\$100.00

Chance Multi-Duty Gins

Pole-Top Gin

Side Mounting Gin

Transformer Gin

This gin will serve as the workhorse of line-construction and maintenance crews. It's a pole-top gin, a side mounting gin and a transformer gin in one tool.

The Multi-Duty Gin clamps on top of the pole to lift heavy equipment. On ridge pins and other types of construction where a gin cannot be mounted on top of the pole, the gin can be mounted down the pole without changing the mounting bracket. With the beam removed, the bracket can be used by itself for hanging single transformers or transformer clusters.

The "Y" design of the aluminum-alloy bracket, and the sturdy maple beam, account for the great lifting power of the gin. The wide opening between the two arms of the mounting bracket gives sufficient clearance so that the bracket can be fitted over cross arms when used as a pole-top gin. Chain binders with wind-up tighteners speed application to the pole.

The bracket will also straddle a cross-arm when mounted at the top of the pole.

The Multi-Duty Gin is available with two sizes of beams. The same mounting-bracket assembly is used for both ratings.

No.	Description	Max. Loads, Lbs.*	Each
C55	Light Multi-Duty Gin	1500	\$133.05
C55B	Light Multi-Duty Beam Only	1500	67.25
^C65	Heavy Multi-Duty Gin	2500	154.40
C65B	Heavy Multi-Duty Beam Only	2500	88.60
C75	Multi-Duty Bracket Only, with Pulley Wheel Assembly	2500	65.80
C85	Multi-Duty Bracket Only, without Pulley Wheel Assembly	2500	56.00

^Linemen's Preference (LP) — Recommended by Chance Hot Line Tool Demonstrators.

*Based on proper installation of gin as shown on the instruction tag.

Chance Insulated Gin Poles

Made for lifting heavy conductors or heavy line materials. May be used as a pole top gin or as a boom pole for heavy duty work. Provided with means for guying at top when used on extra heavy loads. Heavy wood laminated; voltage tested construction provides exceptional strength and insulation protection.

No.	Length Ft.	Bending Strength Ft.-Lbs.	Approx. Wt., Lbs.	Each
M1970	8	5000	41 1/4	\$119.00
M1970-10	10	5000	46	130.00

Coffing Transformer Gins

Model OST

Model WT

Model ST

Model OST: Constructed of spring steel curved edgways with two angle iron legs bolted to a malleable iron clamp. Constructed for pole top use. Rated capacity 2000 lbs.

Model WT: Constructed of well-seasoned hardwood with a malleable iron clamp. It cannot be pulled off the pole. Constructed as a non-conductor. Rated capacity 1500 lbs.

Model ST: Made of steel with malleable iron clamp. Constructed for side of pole use. Rated 1500 lb. capacity.

No.	Description	Ship. Wgt., Lbs.	Each
OST	Transformer Gin	35	\$35.50
WT	Transformer Gin	30	45.50
ST	Transformer Gin	25	32.50

Coffing Temporary Guy Clamps

Designed on the vise principle with vise screw and enclosed in a steel tube. Easy to use, provides powerful grip. Permits necking close to the pole. Temporary guy clamp makes it unnecessary to drive 3-bolt clamp on and prevents stripping off the protective coating.

Description	Ship. Wt. Lbs.	Each
Temporary Guy Clamp	3 1/2	\$15.00

Chance Load-Indicating Chain Hoists

1-Ton

Have all the features of Chance 1-ton chain hoist, plus visual load indication.

Scale graduated in 250-lb. increments up to 2000 lbs.

A quick-operating tool for sagging conductors or for determining sag loads of conductors on wire tongs.

Indicator easily calibrated with an Allen wrench.

No.	Safety Latch	Standard Lift, Ft.	Wt. Lbs.	Each
3010L	No	5 1/2	14	\$63.00

Coffing Ratchet Lever Hoists

AG

ATG

FTG

Lightweight, safe and dependable. Operate in any position, horizontal, vertical, diagonal or upside down. No friction discs to slip or "freeze". Safety lever will bend at approximately 100% overload before hooks fail or chain breaks; gives visible warning of dangerous overload.

Hooks are drop forged, alloy steel with highest tensile strength for their size. Chain thoroughly tested before use.

All multiple chained hoists through 6 tons can be instantly converted to next smaller capacity by merely unhooking a special lug.

Bartlett Emergency Wire Cutters

The double pulley and compound lever provides tremendous power, ease of operation.

Lightweight, convenient sectional handle. Laminated sitka spruce pole is furnished in two 6 ft. lengths. Can be used as a 6 ft. pole or easily joined together with a P156 Sleeve to make a 12 foot pole.

Wire cutters are used to cut 110 and 220 RC wire. Can easily be used from the ground without use of a ladder.

Can also be used safely for cutting hot 4800 volt primary and service wire when hanging down close to the ground.

Weight 8 lbs. 5 oz.

No.	Each
1-BC	\$26.00

Bartlett Wire Cutters

Especially made to facilitate the unloading of car lots of poles.

Operated from a safe distance, it easily cuts No. 7 bare wire or steel straps at one stroke.

Has compound lever action. Head has a hardened hook with serrated edges.

Blade is ½-in. crucible 4001 steel, operated with pull lever.

Pole is 1¼ x 1½-in. laminated, treated to prevent moisture absorption. Pole length, 12-ft.

No.	Description	Each
1-SC		\$30.00

Coffing Chain Electric Hoists

"Quik-Lift"

With Lug and Trolley Suspension

With Hook Suspension

Built for rugged, continuous production line operation. Special hoist motor with very high starting torque, pendant rope controls with fool-proof safety limit switches, large heavy duty contact points provide sensitive action.

For added safety and durability the positive action shoe type brake has 10 to 12 sq. inches of breaking surface.

Model J Hoists: Have a four step gear reduction. Available with 110/220 volts, 1 phase, 60 cy. motors or 220/440 volts, 3 phase, 60 cycles motors.

Model S Hoists: Uses exclusive Perry speed reducer. With this type of gearing there are more teeth in contact for better load holding. Available with 220/440 volts, 3 phase, 60 cycles motors. Special currents available on application.

Duff-Norton Pole Pulling Jack

Genuine Barrett

Single Acting, Ratchet Lowering

For light, power, railroad, street railways, telephone and telegraph companies.

With this handy jack, one or two men can pull or straighten poles, remove butts or move loaded poles without interrupting service. Regardless of size of poles or depth in ground no digging is required to loosen them for pulling.

The hinged channel base permits jack to be operated at an angle on level ground, or upright on a hillside.

The No. 500 Duff-Norton polejack has the power to pull, straighten or move the heaviest poles. With steel operating lever 1 1/4 x 66 in. long. Has 3/4-in. BBB chain.

No. 500

No.	Cap. Tons	Ht. In.	Raise. In.	Lgth. Chain. Ft.	Size Base, In.	Wt. Ea., Lbs.	Each
500	15	37 1/2	23	10	10 x 24	250	\$118.00

If wanted without chain, please specify "Without Chain," and deduct \$11.00.

**Simplex Emergency Jacks
Ratchet Lowering**

For Utilities and general duty service in industry. Also for pushing and pulling.

Lifts vertically—lifts or pushes at any angle. Double lever socket for close quarter operation. Any link of chain can be engaged on the recessed cap. Base locking hook is foot operated. Corrugated toe keeps load from slipping. Large base area insures stability. Convenient carrying handle.

Complete with 5 ft. chain, auxiliary cap shoe and lever.

Capacity 15 tons; Height 22 1/4 inches; Lift 13 1/2 inches; Minimum toe lift 2 1/4 inches. Weight; Jack only, 74 lbs.; Complete 109 lbs.

No. 310A Each \$101.75

**Simplex Pole Pulling and
Straightening Jacks**

For telephone and telegraph, light and power, railroad and street railway companies to pull or straighten poles.

One or two men can pull, straighten or move poles, with no service interruption and without digging, regardless of pole size or depth in the ground.

No. 325

No. A1538

No. 325 Simplex Junior Jack: will handle poles up to 30 ft. high. Pivots on its channel base to any angle; also used as guy line tightener or for pulling underground cables. Complete with 8-ft. pike pole for straightening poles located beside ditches. Recommended for rural maintenance and repair.

Nos. 1538 and A1538 Jacks will pull or straighten any size pole. The "I" beam base provides a firm foundation and the jack will pivot on its base when base pawl is disengaged.

The No. A1538 has an aluminum housing, making it much lighter for easier portability without sacrifice of strength.

Duff-Norton Ratchet Lowering Jacks

Genuine Barrett

Single Acting, With Foot Lift

These jacks are expertly engineered, scientifically designed and constructed of the finest and best materials, specially selected for the purpose for which they are intended.

Each one is guaranteed by the maker to lift its full-rated capacity with maximum safety.

The rack bar can be pulled up to the required load height and lifting begins with the first down-stroke of the lever bar.

Being single acting, the load is raised only on the down-stroke of the lever bar, but can be ratchet-lowered, notch by notch.

Nos. 514MT to 521MT: For contractors, mills, mines, quarries and general farm and industrial use. Can be dropped instantly (tripped) when not under load.

Nos. 1020 to 1528: For use in mines, shipyards and industrial plants; building and road work; by riggers, drillers, truckers, etc.

No. 2028: For boilermakers, contractors, riggers, wreckers, railroads, heavy machinery manufacturers and movers.

All have round double sockets. 10 and 20-ton models can be furnished with small single round socket. Equipped with operating lever of adequate diameter and length for ease of operation. Nos. 1522, 1528 and 2028 can be furnished with large round sockets for use with wooden operating lever; or with square sockets to fit lining bars.

Simplex Ratchet Lowering Jacks

Single Acting

No. 85A

These jacks cannot be tripped—they raise or lower the load notch by notch.

General purpose jacks, ruggedly constructed—permit safe lifting, lowering, skidding, moving and leveling.

Fine material, precision machined and heat treated; adjustable cadmium plated springs and links; reinforced inner-ribbed housings.

For moving machinery, re-railing mine locomotives, mine track work and for lifting or skidding mechanical equipment.

Minimum toe lift 1 5/8 in.

Capacity 5 Tons

Simplex Ratchet Lowering Jacks

Single Acting

Sturdy, efficient jacks for heavy work. Recommended for railway refrigerator and empty car repairs; also for rigging, street railways, utilities and heavy duty construction jobs.

Can be used in pairs in lieu of overhead cranes for loading and unloading heavy machinery, equipment, forgings or castings. Minimum toe lift 2½ in. Lifts 27% easier than the No. 29.

Furnished with 1¼-in. round double socket with 5-ft. steel lever bar. Available, upon request, oval or round socket and 6-ft. oval or 6-ft. round hickory pole, or square socket for your lining bars. Specify type wanted.

No.	Capacity 20 Tons			Ship. Wt., Lbs.	Each
	Height, In.	Lift, In.	Base, In.		
2029	28¼	18	8x11	104	\$85.50

Single Acting—Geared Type

No. 126

The powerful geared type mechanism of these jacks provides both speed and ease of lifting—and considerably faster than standard speed jacks.

No. 135: For refrigerator and loaded car repair.

Nos. 126 and 127: For trencher, power shovel repair; for construction, oil field, tank erector, rigging and other heavy duty lifting. These models have 3 x 3¼ right and left hand toe lifts, respectively, for operation in pairs.

All are complete with oval lever sockets and oval hickory poles which cannot be inserted across the grain.

Duff-Norton Ratchet Reel Jacks

Genuine Barrett

Single Acting—Ratchet Lowering

No. 524-MCR

No. 1022-MCR

For the speedy handling of reels of different diameters. Hooks will seat 2-in. spindles.

No. 524-MCR: Especially adapted to industrial, shop and warehouse use for handling reels of cable, wire, rope, leather belting, etc. Fitted with adjustable hook lifts for handling reels of different diameters. Has double round operating lever 1- x 30-in. long. Reinforced solid oak base for outdoor use.

No. 1022-CR: For utilities as well as warehouses, industrial plants, shipbuilders and contractors for a wide range of applications. Fitted with extra long lifting racks with hooks placed at various heights for handling reels of different sizes. Furnished with single round socket and steel operating lever 1¼- x 62-in. long. Hooks are located 12, 22½, 33 and 38-in. from ground level; housing bolted to solid oak base.

Duff-Norton Ratchet Reel Jacks

Genuine Barrett

Single Acting—Ratchet Lowering

“T” Frame Base

For lifting and holding heavy reels on outdoor jobs. This jack is standard with many major utility companies throughout the country. Designed to meet the most exacting service demands of cable crews under adverse field conditions. Laminated oak weatherproof base, firmly bolted to prevent splitting. Tough malleable iron jack housing is spray-painted for protection against rust.

“T” frame base overcomes rocking on uneven ground; swivel joint of head hook allows most advantageous spotting without binding spindle.

For rapid jacking, the rack bar is pulled up until the selected hook engages reel spindle—then a few easy down strokes of operating lever and the reel is clear of the ground.

Can be furnished in pairs—one right and one left—so operators can lift in sight of each other for uniform raise.

Top swivel hook holds 3 in. diameter spindles, two lower hooks hold 2½ in. diameter spindles.

Single round socket; complete with operating lever 1¼ x 62 in. long. “T” leg 7½ x 11¼ in.

Duff-Norton Journal Jacks

Low Height Ball-Bearing Screw Type

No. 2510-C-2

Small, lightweight jacks that are easy to operate and easy to carry.

For inspecting and renewing journal brasses, bridge and structural steel erection, machine and mill work, shipbuilding and in all other industries where powerful lifting and low height are required.

Rapid raising and lowering, powerful in lifting ability, absolutely safe up to rated capacity.

Low height range and small base diameters permit quick spotting and full operation in cramped areas and

limited heights. Mechanical design permits safe operation at any angle or upside-down.

Smooth ball-bearing screw action permits even precise increments of lifting and lowering.

Weatherproofed for rough outdoor use. Lifting mechanism is totally enclosed, packed in grease and sealed against leakage. Ratchet unit is open and accessible for cleaning and oiling.

Duff-Norton Screw Type Reel Jacks

With Three-Way Nut

"A" Frame Base

For lifting and holding cable, wire, rope and belting in shops and warehouses.

Sturdy, lightweight and fast to operate.

Frame is built of "L" shaped steel angles, securely welded. Lateral spread of legs 38 1/2 in. to insure firm, nontipping support. Screw is machine cut, heat-treated alloy steel for lasting service.

The operation is simple and quick. Only necessary to lift the curved cap to the reel spindle and spin the three-way nut down to the frame—lifting begins at the first turn of the lever. Lifting hook will accommodate spindles up to 2 1/2 in. diameter.

No.	Cap., Tons	Height, In.	Raise, In.	For Reels, In.	Base, In.	Wt. Ea., Lbs.	Each
520-CR	5	20	11 1/2	42-60	12 1/2 x 26 1/2	66	\$37.00
530-CR	5	30	16 1/2	60-90	15 1/2 x 38 1/2	90	49.00

Simplex Lever Type Reel Jacks

For the fast, safe handling of cable, wire, rope or belting on reels.

All are equipped with laminated, oil-treated oak bases for protection against dampness and exposure to weather.

No. 320A

No. A-1029

No. 320A: **Single Acting.** For lighter service than No. 321. Handles reels from 20-in. to 60-in. in diameter. Equipped with 3 lifting hooks 9 1/2, 15 1/2-in. and 21-in. respectively from ground level. Top hook for 2 1/2-in. spindles and other 2 for 2-in. spindles.

No. 321: **Single Acting.** Handles reels from 20-in. to 96-in. in diameter. Equipped with 5 lifting hooks 9-in., 15 1/4-in., 21 3/4-in., 28-in. and 39-in. respectively from ground level. Top hook for 3 1/2-in. spindles, second from top for 3-in. spindles and the remaining 3 hooks for 2 1/2 in. spindles.

No. A1029: **Single Acting.** Aluminum alloy housing reduces weight 21 lbs. For outside work where footing may be uneven. T-shaped base has total area of 319 square inches with three threaded and adjustable steel rods. Furnished with left and right hand bases. Handles reels from 36 to 84-in. in diameter. Equipped with 3 lifting hooks 17-in., 23-in. and 29-in. respectively from ground level. Top hook for 3-in. spindles and other 2 for 2 1/2-in. spindles.

Duff-Norton Hy-Power Hydraulic Jacks

3 to 100-Ton Capacities

No. 8H9

For all industrial applications—in mines, mills and factories, oil fields, and ship yards; in railroad shops and on repair tracks.

Precision manufacture assures smooth, positive and unfailing operation, saves time and energy on every lifting and lowering job.

3 to 12-Ton Models—Have extension screws which can be quickly run up by hand to load height—lifting begins with the first stroke of the lever bar. Bases are heavily ribbed, one-piece malleable iron, with integral pump barrels.

20-Ton Model: Single pump jacks designed for strength with light weight.

30 to 50-Ton Models: Have dual pumps; the speed pumps brings head up to load position instantly—switchover to power pump is then automatic without changing or missing a lever stroke. Bases are special alloy steel, with "Armor Plate" steel guards to protect pump barrels.

Rams and cylinders are high carbon seamless steel tubing, accurately machined and ground to gauges for close sliding fit.

*Independent pump jack. Prices on application.

Simplex Rol-Toe Hydraulic Jacks

10, 25 and 50 Ton Capacities

Will operate equally well in either horizontal or upright position and are ideal for lifting heavy machinery, transformers, etc., with minimum effort and maximum speed.

The lifting toe rides on a roller bearing which carries the radial load against the stationary ram's flat-milled surface. The lifting capacity on the toe is the same as that on the cap. The heavy, sturdy body lifts the load, reducing off-center loading by bringing the toe closer to the center of the ram.

The oil reservoir is independent of the load-lifting housing. Double pumps provide extremely quick operation. The high speed pump, positions, and lifts lighter loads and the high pressure pump handles the heavy lifting.

No.	Cap., Tons	Height, Closed	Travel, In.	Ht. Top, Closed	Base, In.	Wt., Lbs.	Each

Simplex Hydraulic Jacks

These jacks are precision made of the very best materials selected especially for the purpose and engineered for ease of operation, safety and versatility. Their lifting power makes them suitable for general application as well as for specialized jobs.

All models are tested to lift 50% over rated capacities. Can be operated in either vertical or horizontal position with same high efficiency and safety.

Single Pump Models

No. 5HJ

Single, long stroke pump, positioned for maximum lift with minimum effort.

Tough malleable iron bases, pressure tested and ribbed on top for extra strength.

Single lever

sockets. Complete with lever—1/2-in. pipe, 20-in. long.

No. 20HJ

Double Pump Models

No. 50HJ

These jacks have both high and low speed pumps which can be operated singly or in unison. Double lever sockets for close quarter operation.

Suitable for mill and factory work; for construction, mining, drilling, journal inspection, bridge work, culvert pushing or pipe bending.

High carbon solid rolled plate bases. No. 100HJ has safety by-pass.

Complete with operating lever, 1 3/16 in. solid steel, 20-in. long.

Simplex Re-Mo-Trol Hydraulic Pumps and Rams Remote Controlled

Consists basically of a powerful pump and a remotely controlled hydraulic ram, connected by a high pressure hose. Offers extremely simple operation for a thousand and one applications that it does better. Re-Mo-Trol's adaptability unlimited; can be used to apply force in any direction.

Re-Mo-Trol can be used where cramped space or other difficulties make the use of self-contained jacks or pullers impossible. One outstanding advantage is the famous "Center Hole" tubular ram (on 7 models). It is only necessary to insert a pull rod or screw through the tubular ram plunger. Rod is drawn through in a direct-line pull.

Pumps

RP3—Hand pump, 7/16 in. Dia. Piston—1 in. Stroke—54 cu. in. capacity for RC102, RC106 and RC302 rams. **\$26.95**

RP6A—Two speed hand pump with automatic changeover from high to low speed with pressure increase. 126 cu. in. capacity for RC306—RC506—RC613—RC1103A—RC2112 rams. **\$67.90**

RP8A—Hand pump similar to RP6A with the addition of a selector valve to reverse oil flow to raise and lower two way rams. 161 cu. in. oil capacity. Used with RC315—RC6010—RC1110A rams. **\$112.00**

No. 798AC—**Electric Hydraulic Pump.** Operates at continuous pressures of 5,000 P.S.I. and intermittent pressures of 10,000 P.S.I. Has built-in 3/4 horsepower 1725 R.M.P., 115-230 volt, 60 cycle, A. C., single phase capacitor start motor. Selector valve reverses flow of oil to raise or lower ram plunger. For all rams. **\$373.50**

All pumps have built-in Safety By-Pass Valve. Also available Air and Gasoline Powered Hydraulic Pumps.

B & L Star Brand Pulling-In Frames

Designed to aid in installing cable in underground ducts. Consists of two 13-ft. sections of 6-in. steel channel, each with 24 holes on 6-in. centers to permit spacing the two sheaves to the proper position for any cable installation.

Has two aluminum sheaves, one 20 in. and one 5 3/4 in. in diameter, each provided with Graphite Bronze self-lubricating bushings which do not require lubrication.

The diameter and groove of the large sheave are of sufficient size to allow cable to be pulled over it without injuring cable sheath when it is necessary to pull sufficient cable into the manhole for splicing.

No. 5032—Weight Each 260 Lbs.

Simplex Pipe Pushing and Pulling Jacks

For contractors and public utilities engaged in pipe, duct and culvert installations under streets, alleys, tracks, walks or lawns.

A powerful, accurate and economical jack with reversible carriage which eliminates the need of reversing track when pulling pipe. Its design permits use of longer pipe lengths and considerable saving in threading and coupling. Tapered steel jaws completely surround the pipe—no crushing or flattening.

Has double levers and extensions for operating singly, alternately or in unison on double tracks.

Equipment Includes: One set tapered jaws and one pilot for single diameter pipe, two 3 1/2-ft. steel lever bars and two steel pipes for extending levers. (Specify size of jaws and pilot required).

Greenlee Hydraulic Power Pumps No. 797

Pumps consist of double-piston, single-valve, high-pressure units, specifically designed for operating Greenlee hydraulic equipment and other hydraulic systems adaptable to their power. These pumps deliver 106 cubic in. of oil per min. at 10,000 psi max. pressure with a 2 hp electric motor and 213 cubic in. of oil per min. with a 3 hp motor.

They operate at an intermittent pressure of 10,000 psi and at a continuous pressure of 6000 psi. Available with either a four-way valve (TA) for two-direction operation (high-pressure advance and low-pressure return of a ram or piston) or a two-way (SA) valve for one-direction operation (high-pressure advance only).

No.	Description	Each
797E-SA	Electric Power Pump—Single Acting Valve without motor and control.	\$425.00
797E-TA	Electric Power Pump—Double Acting Valve without motor and control.	475.00

Greenlee Portable Power Pumps

No. 798

No. 798-AC

The fast approach, high pressure No. 798 Portable Hydraulic Power Pumps can be used with any Greenlee Bender, Knockout Punch Ram, and other hydraulic systems requiring similar power. The same pump is used on all three basic models and features a low pressure pumping arrangement for high volume delivery and rapid advance of the ram to the work and automatic change-over to low volume, high pressure delivery when the ram pressure exceeds 150 psi. The pump unit is a two piston radial type, capable of developing 6000 psi constant pressure and up to 10,000 psi intermittent pressure.

Each basic model is supplied with a choice of two valve controls: SA type for one-direction operation (high pressure advance only) and TA type for two-direction operation (high-pressure advance and low-pressure high-speed return of ram). Base dimensions all models, 10 in. x 12 in. Ht., 19 in., except No. 798-CO which is 15 in. Useable oil volume, 4½ qts., reservoir oil capacity, 1½ gals.

Hose not included in price.

Duff-Norton Push and Pull Jacks

Screw Type, With Ratchet Lever Sockets

For contractors, drillers, riggers, railroads, shipyards and industrial plants.

Widely used in erecting bridges, docks, tanks and piling, and for pulling together or pushing apart steel plates, sheets and beams. Also handy for straightening sides and ends of steel freight cars, as well as spreading or drawing in bent or split center sills.

With chains, hooks or pipe sleeves the range of application is greatly increased. (These items are not included in price.)

Steel screw, nuts and ratchet wheel are machine cut for easy, positive operation.

Nos. 1024 and 1029 furnished with wooden operating lever 1½ x 2½ in. long; No. 1538 square socket, without lining bar.

No.	Cap. Tons	Screw Diam., In.	Overall Length, In.	Weight Each, Lbs.	Each
1024	10	2	24	46	\$48.00
1029	10	2	28	50	50.00
1538	15	2½	38	97	84.00

Can be furnished in greater lengths than listed above. Contact Graybar for specifications and prices.

Simplex Trench Braces

Drop-Forged

The only trench and timber braces constructed entirely of steel drop forgings. Blunt safety lever nut prevents injuries and damage; ball and socket joints at each end allow quick adjustment, tight gripping. Has nail holes in shoes. Three-way nuts furnished in place of lever nuts if specified.

Complete With Pipe

Simplex Manhole Sheaves

For pulling cable or carrying winch line at right angles in utility maintenance work.

Can be used on the end of a truck or over top of manhole in connection with snatch block in manhole. Eliminates need for manhole skids. Handles cable up to 3 in. diameter and any size winch line.

Complete with 1/4-in. chain, 24 in. long, with special hook for anchoring and protection when winch line is released suddenly.

Large sheave 7 1/4 in. diameter, 3 in. wide. Small sheave 4 1/4 in. diameter, 3 in. wide.

No. 220—Shipping Weight 100 Lbs. Each **\$119.00**

Ideal Wire Guides

Prevents kinks and enables several conductors to slide into conduit smoothly and easily. Tempered steel spring forms smooth bend for wire to follow.

Knurled aluminum fitting can be used with all types and sizes of boxes, in any position with plaster rings on or off. Spring will not slip off under pull, yet can be removed with single twist.

No.	Description	Each
31-230	Set of four sizes	\$9.20
*31-231	1/2-inch	1.90
31-232	3/4-inch	2.15
31-233	1-inch	2.65
31-234	1 1/4-inch	3.60

*No bushing necessary with 1/2-inch size.

General Machine Cable Feeders and Nozzles

For protection of cables being pulled into underground conduit. Complete feeders consist of main section and extension section with appropriate nozzles to fit conduit.

Main section is a 4-in. flexible metal hose with bell mouth on one end and sleeve for nozzle on other end. Extension section is a 4-in. hose with bell mouth on one end and tube on the other end.

Separate bell-mouthed nozzles available for both round and square conduit.

No.	Description	Nozzle I. D.	Dimensions, in.		Wt. Lbs.
			O. D.	Length	
6058	Main Section		7 1/2	90	35

Prices on application.

Greenlee Cable Pullers

For pulling cable through conduit without damaging cable insulation or loosening hangers. Provides all the power needed. easy to operate and portable. Has positive anchorage. Clamps directly to the conduit and pulls in line with it so that hangers are not loosened. Can be used to pull horizontal or vertical conduit. With flexible elbow attachment works on concealed conduit.

Cable is not furnished, but 3/8-in., 6-9 strand having a breaking strength of 11,000 lbs., or higher, is recommended.

No.	Description	Wt., Lbs.	Each
765	With Two Cranks (without cable)	225	\$215.00
765-4	Flexible Elbow Attachment, complete.	86	65.00

Barth Cable Pullers

A power-driven tool which pushes the tape into the conduit and then pulls the cable through. Will push 30% more bends than the code allows at a speed of 45 ft. per minute.

Has safety control which stops the pushing if an obstruction is encountered, and is overload protected. Will pull 1200 lbs. dead weight (approximate pull of 8 men) which is sufficient for all normal runs of 3/4-in. through 2-in. conduit sizes at 15 ft. per minute full load. Can be used in any position on 115 volt a-c or d-c.

Useable tape length is 175 ft. of .060 x 1/4-in. best quality. Light weight and compact for easy set up. Complete with attachments ready to use.

No.	Wt. Lbs.	Each
1-CP	65	\$469.00

118	3 1/2-in. Conduit Adapter	6.00
119	4-in. Conduit Adapter	6.50

General Machine Slack Pullers

Type E

For temporarily deflecting suspension strand in order to introduce slack into aerial cables for splicing and repair work.

Consist of an arc-shaped frame supporting grooved pulleys at each end and a lifting screw in the center. Screw is mounted on roller bearings and has a hook at the lower end for engaging the strand; has handle at the upper end.

No. 7522—Wt. 10¾ lbs.....Price on Application

General Machine Duct Rod Rollers

For use between lengths of rods for ease in movement.

Consists of aluminum disc having 6 fiber rollers around its edge which enable assembly to move easily through duct or conduit.

Furnished with one bronze swivel joint. Three-inch diameter only.

No. G1017—Wt. 2⅛ lbs.....Price on application

General Machine Test Mandrels

Round

Available round or square, of seasoned hardwood.

Square

Tool steel cutting ends provide means of testing conduit before laying cable. Specify size and shape on orders.

No.	Shape	Size, In.	Wt., Lbs.
6318-T	Round	3¼	7
6318-T	Square	3¼	7
6318-T	Square	4¼	8

Price on application.

General Machine Laying Mandrels

For use in laying conduit. Made of hardwood, with steel disc at front end and leather wiping washer at other end.

Length 36-in., made in 3¼-in. round only.

No. 6318-L—Wt. 16 lbs.....Price on application

General Machine Washer Duct Cleaners

For cleaning conduit before laying cable. Tough leather washers, graduated in sizes, wipe inside of conduit clean.

Three-inch diameter.

No. G1014—Wt. 8 lbs.....Price on application

General Machine Crisscross Cleaners

For cleaning conduit of all foreign matter before laying cable.

Made of flexible spring steel; tool presents sharp cutting edge to interior of conduit, regardless of direction pulled.

Three-inch diameter.

No. G1011—Wt. 5 lbs.....Price on application

General Machine Flexible Mandrels

For use in conduit with extreme bends; flexible cable of mandrel will follow contour of conduit.

Graduated discs of hardened steel provide a means of efficiently cleaning out obstructions within conduit.

Three-inch diameter.

No. G1010—Wt. 15 lbs.....Price on application

General Machine Cable Benders

Type D

For making compound bends in lead cable up to 3-in. diameter. Saddles are swivel-mounted for any kind of bend, including spiral. Tool may be rotated around cable for compound bends in restricted areas such as manholes.

Central section arched to bend cables without harm. Frame of aircraft alloy steel tubing. Hardened steel ratchets have deep-cut teeth.

Over 1-ton pressure can be applied on cable with approximately 100 pounds pressure on handle.

No. 7410—Wt. 13 lbs.....Price on application

General Machine Water Tool Brush

For use by installers for washing and cleaning the base plate of terminals. With nylon bristles 1-in. in diameter and 2½-in. long, vulcanized into heavy ferrule of varnished wood handle. Overall length 7¼-in.

No. 7260—Wt. ½-lb.....Price on Application

General Machine Jar Hammers

For transmitting hammer blows by rod to working end. Used with cutting tool in removing obstructions.

Heavy plunger, with 12-in. stroke, delivers a solid blow when rod is pulled back and forth.

Two-inch diameter.

No. G1015—Wt. 8 lbs.....Price on application

General Machine Rod Grapples

For use in rod-ding long lengths or muddy conduit.

Two loops on one grapple and four

hooks on other permit positive engagement.

Useful in working from both ends of conduit at the same time.

No. 6931—Wt. per pair 2 lbs.....Price on application

General Machine Pipe Ripper

Re-designed to efficiently cut a longitudinal slot in pipe used as a conduit for cable, preparatory to removing the pipe from the cable. Tool consists of a hardened steel cutting blade, two bearing points which serve as the pivot for the cutting action on the pipe, and a tubular handle. Removable blades are heat-treated tool steel with two cutting edges. Heat-treated tool steel bearing points are triangular in shape, so that three individual cutting edges are available by rotating their position. Tubular handle is attachable to the head in two different positions. For greater leverage, a bar may be inserted in handle. Ripper can be used in restricted areas. Finish: Oiled. Length overall, 42 inches; handle, 30½ inches. Weight, 18 lbs.

No. 7044.....Price on application

General Machine Soldering Coppers

Consists of pyramid-type forged copper bits swaged on one end of one-piece steel shanks. With coolant-type handles.

Available in 1, 1½, 2 and 2½ lb. sizes.

Length, approximately 16-in.

No. 6722.....Price on application

General Machine Numbering Dies

For stamping numbers on tools or other steel items.

Roller, made of hardened tool steel, has figures 1 to 9, dash-mark and letter X.

Overall length 3½-in.

No. 6688—Wt. ½ lb.....Price on application

General Machine Lead Sleeve Spreaders

Facilitates the work of spreading split-lead sleeves, particularly the smaller sizes difficult to open by hand. Steel handle is formed at an angle of 45° to the flattened shank to provide clearance for the hands in the spreading operation. Two steel blades, pivoted to the flattened shank, are so spaced that openings up to 2 inches may be obtained. Length, 8½ inches. Finish: Oiled. Weight, 10½ ounces.

No. 6748.....Price on application

General Machine Pipe Spreaders

Quickly and easily enlarges the slot produced by the pipe ripper to facilitate the removal of conduit from a cable. Hardened steel fork engages the edges of the pipe wall at the slot. Handle is made of 1½-inch steel pipe for lightness and also so that a bar may be inserted when greater leverage is required. Length, 39 inches; width of fork, 2 inches. Finish: Oiled. Weight, 9½ pounds.

No. 7045.....Price on application

General Machine B Cable Lubricators

For use in applying lubricant to underground cable by passing the cable directly through the lubricator. It consists of a sheet-steel funnel for holding the lubricant, a flexible leather tube for spreading and controlling the amount of lubricant applied, and a hose clamp for attaching the tube to the funnel. Funnel is equipped with two handles. This device is the most effective method of spreading lubricant evenly over an entire length of cable. Height, 22³/₄ inches; diameter of funnel, 11 inches. Funnel has 3-inch throat.

Weight, 7 pounds. Finish: Metal parts oiled.
No. 7287.....Price on application.

B & L Star Brand Cable Sheaves and Shackles
No. 5033

For use instead of a pulling-in frame when advisable or possible to locate the truck directly over a manhole.

This device is attached to the manhole pulling iron, the winch line going over a roller or sheave at the rear of the truck, then down and under the cable sheave and shackle, then into the duct.

Special aluminum alloy sheave 20 in. in diameter with groove large enough to take 2⁵/₈-in. cable. Steel yoke, with drop forged steel hook.

Description
Complete Sheave and Shackle; Weight Each 65 Lbs.
Complete Frame, without Sheave; Weight Each 37 Lbs.
Aluminum Sheave Only, 20 in. Diam.; Weight Each 28 Lbs.

Empire Conduit and Sewer Rods
With or Without Wheels

Best quality hickory, with quick acting automatic couplings. Furnished with straight sticks of uniform 1 inch diameter throughout. Furnished in three and four foot lengths. Specify whether rods are wanted with or without wheels, and length.

No.	Length Feet]	Weight, Lbs.	Wheel Diam.
850	3	1 ¹ / ₂	1 ¹ / ₂
851	4	1 ³ / ₄	1 ¹ / ₂
852	3	1 ¹ / ₄	No wheels
853	4	1 ¹ / ₂	No wheels

Diamond Screw Duct Rods

⁷/₈-inch diameter best quality hickory, bronze new type coupling. Furnished in three and four foot lengths.

No.	Length, Ft.	Wt., Lbs.
855	3	1 ¹ / ₄
856	4	1 ¹ / ₂

Chance Conductor Cleaning Brushes

V-position of brushes gives 2-sided cleaning action. As brushes wear, they can be rotated, by loosening the anchor screws, so that unused bristles will come in contact with conductor.

Steel bristles. Will handle a wide range of conductor sizes.

No. M4455-63

Rawl-Grips

To Fit Standard Tool Holders

Made of live hard rubber in two sizes, easily applied to No. 14 and No. 20 Rawl-drill holders. Gives safe, comfortable and firm cushion grip.

No.	Description	Each
8703	Fits No. 14 Holder	\$2.25
8704	Fits No. 20 Holder	2.25

Rawl-Chucks

For Electric or Pneumatic Hammer. Made of special tool steel accurately machined and heat treated for severe service in all standard electric and pneumatic chipping hammers.

Available for all popular Electric and Air Hammers.

No.	Description	Each
8730	14 Drill Taper	\$8.00
8740	20 Drill Taper	8.00
8758	5/8-In. Drill Taper	8.00

Diamond N Drill Points

No. 730

Point is carefully tempered to sufficient hardness to withstand the wear of cutting and the temper is drawn away toward the shank, to produce a softer steel where it enters the handle to prevent its breaking off at that point.

May be used with Diamond Drill Holders Styles A, B and C.

Diamond N Drills

No. 700 4-Point or Star Type Drill

No. 710 Diamond or Single Point Drill

Highest grade octagon drill rod. Quality of steel is tested for uniformity. Heat treatment is scientifically conducted; heats for hardening and drawing the temper are determined by pyrometer and thermometer. Actual tests on various kinds of stone are made from each batch of drills.

Diamond Crimp Nuts

The Sheet Metal Fastener

Screws are not furnished. Packed 100 in a box.

No.	Screw Size	Length Inches	Hole Diam. Inches	Wt., Lbs. Per 100
7620	6-32	9/16	3/8	0.7
7625	8-32	9/16	3/8	0.7
7630	10-24	9/16	3/8	0.7
7632	10-32	9/16	3/8	0.7
7640	1/4-20	1/2	15/32	0.9
7650	3/16-18	1/2	17/32	1.0

When fastening is complete the Crimp-Nut is crimped tightly to the metal and it will not turn when screw is entered or removed. This is particularly essential where provision must be made for removing and replacing work.

Prices on application.

Diamond P Lag Screw Expansion Shields

Malleable iron except 1/4 and 5/16 in. Prices do not include lag screws.

†These sizes furnished in die cast only.
 ††Can be supplied in die cast as well as malleable.

Di-En-Key Expansion Shields

Interlocking Key

INTERLOCKING KEY

Malleable iron. Closed back or bottom bearing. For making attachments where direct bearing of the work against the surface is not required. Smaller

sizes are particularly adapted to opera chairs and school furniture work.

Prices do not include machine bolt.

Closed Back No.	Bolt Diam. In.	Length In.	Drill Size In.	No. Per Box	Wt., Lbs. Per 100

1/4-20 and smaller furnished with aluminum nuts. Can be supplied with brass nuts at extra cost.

Diamond DHD Hammer Drive Anchors

For attaching trim, partitions, flooring and fixtures to concrete structures.

Aluminum. Steel nails, hot galvanized by the patented Diamond Process. Holds a greater load when fastened to stone than a wood screw of same diameter screwed into wood. No special skill or tools needed, drill hole, place shield through hardware and hammer nail in.

Anchors are packed with nails in same containers.

Use same diameter drill as diameter of anchor.

Double headed nails for temporary installations can be supplied at no extra cost.

*Mushroom head bolts on these sizes only.

Types of Heads available on No. 7500 series and No. 7000 series toggle bolts.

Type F—With flat head screws.

Type R—With round head screws.

Type M—With mushroom head—certain sizes.

Type N—Revere R & F screw and add nut.

Prices on application.

Ramset Hammer-In Fastening Tools

Shure-Set®

For Masonry . . . Concrete . . . Light Gauge Steel
Drives Like a Nail . . . Holds Like an Anchor

Shure-Set holds and guides fasteners with pin-point accuracy. No need to drill, fill, chip or plug. Just drive with a few hammer blows and the job is done. Use 2½-lb. hammer for best results.

Austempered Shure-Set Fasteners

Ramset Contractor's Kit

Model R-150

Complete kit contains Model R-150 Shure-Set tool assembled with 3/16-in. fastener holder and drive rod, deluxe metal carrying case with tray 2½ lb. Shure-Set hammer, heavy duty contractor's two-pocket apron, complete instructions.

Wt. of tool, 1 lb. 7 oz.

Shipping wt of complete kit, 9 lbs. \$27.95

Shure-Set Tool Uses

Used for conduit straps; conduit boxes, panel boards; fixtures; standoffs; wire mold; switch boxes; Wall ties; channels and raceways.

Truco Drill Motor and Swivel Kit

Heavy duty 2500 rpm drill motor; integral Truco Water Swivel attached; complete in carrying case—weighs 17½ lbs. Drills holes up to 1¾ in. in all masonry except where reinforcing bars may be encountered. Excellent for anchor holes.

No. TIHK-114 Each \$95.00

Truco Hand Swivel Drill Motor and Stand

Hand Swivel Drill Motor (TH-111) mounted in Drill Stand (TDS-111) permits drilling larger holes in vertical positions or in horizontal positions with machine anchored to wall.

No. TH-111 Each \$175.00
No. TDS-111 Each \$127.50

Truco Portable Masonry Diamond Drilling Machines

1. Drill holes ten to fifteen times faster than any other method in reinforced concrete, tile, marble, granite. Easy one-man drilling in any location.
2. Can save its cost in a single day's use in air conditioning, plumbing, tile setting, electrical, maintenance, utilities work.
3. Pivot permits drilling at any angle through 360°.

4. Telescopic post locks unit between floor and ceiling or between walls for rigidity.
5. Column slide bracket locks on post at any point.
6. Motor carriage advances along track by gear and rack (screw feed on Model A) to give pressure for cutting.

*For nickel or cadmium finishes only. Other finishes, prices on application.

†One-eighth inch length machine screws not available with flat or oval heads.

§One-half inch diameter machine screws furnished only with flat or round heads.

Prices for brass machine screws on application.

Anaconda Filling Compounds

Anaconda filling compounds are available in several formulas to provide the best temperature characteristics and insulation for a particular job.

Superseal Compounds

No. 100—For High Temperatures: A hard, asphaltic compound not subject to flow at unusually high temperatures. Recommended for use in potheads operating continuously at high ambient temperatures.

Pouring temperatures: Summer 375°F.; Winter 425°F.

No. 150—For General Use: Plastic; recommended for use where a wide variation of operating temperatures is encountered. Remains plastic at low temperatures, yet has a minimum tendency to flow at high temperatures. Adheres to both porcelain and metals, thus preventing internal creepage.

Pouring temperatures: Summer 325°F.; Winter 375°F.

No. 250—For Flushing Potheads and Joints: Also used between layers of insulated tapes in hand-wrapped insulation. A compounded mineral oil, having relatively high viscosity.

Pouring temperatures: Summer 225°F.; Winter 250°F.

No. 300: For high voltage joints and potheads with reservoirs.

Pouring temperatures: Summer 225°F.; Winter 250°F.

Packaging

Superseal Nos. 100 and 150: Available in one and two-gallon steel buckets, or in tin cans 1/2 and 5 gallons.

Superseal No. 250 and 300: Available in 1/2-, 1-, 2- and 5-gallon tin cans.

Insoluseal Compound

For filling cable joints and potheads of paper or varnished-cambric insulated cables. Compounded of mineral oil and other hydrocarbons.

Recommended for voltages up to and including 69 kv.

As hydrocarbons are injurious to rubber, this compound is not recommended for use with rubber-insulated cables.

Pouring temperatures: Summer 250°F.; Winter 250°F.

Available in one- or two-gallon steel buckets.

Prices on application.

Anaconda Safety Compound Kettles

A double-jacketed kettle for safe melting of filling compounds.

Heat-conducting tube, brazed to the bottom of the outer jacket, extends through the inner jacket into the compound chamber, allowing vents to form. This prevents accumulation of gas which otherwise might develop pressure at the bottom of the kettle.

Capacity, 5 qts. Shipping weight, 7 lbs.

Prices on application.

Anaconda Jointing Material

Unit Packages for Making One Complete Joint on a Specific Size and Type of Cable

Jointing materials in unit packages are available for all sizes and types of cable . . . solid, paper-insulated, varnished-cambric, rubber or thermoplastic insulated or jacketed.

Each Unit Package contains all the materials necessary to make one complete, secure joint on the specified cable.

For each type of cable the Unit Package is shipped with a bill of materials and a drawing showing the steps in making a proper splice. Makes splicing simpler and easier for the workman. A typical bill of materials is shown above.

Prices on application.

Alcoa Joint Compounds

No. 2 Electrical Joint Compound

For superior results with aluminum to aluminum or aluminum to copper connections, either bolted or non-tension compression types.

The compound is noncorrosive to aluminum or copper.

Available in cartons of 12—8 oz. polyethylene bottles.

No. 2 Electrical Compound for bus conductor use is now available in 1-pint and 25-lb. bulk containers.

Zinc Chromate Paste

Approximately 70 percent zinc chromate powder and 30 percent boiled linseed oil, by weight. Recommended as a filler for compression fittings used on conductor subject to tension. Compressing the fitting forces the paste between the strands and effectively seals out air and moisture.

Zinc Chromate Paste in plastic bags containing 1¼-lb. or compound are packed 12 per carton.

Salisbury Non-Spillable—P. B. Compound Pots

Made of semi-hard durable rubber, they are non-conducting, non-breakable and not affected by usual P.B. compounds. Safer; more convenient; both materials and brush are contained in one unit.

Will stand upright or can be hung on wire, bus bar or brace. Inner flange of compound pot prevents contents from splashing out with rough handling.

Single Compartment, holds 1 pint.....Each **\$5.50**
 Double Compartment, holds 1 pint with added small pocket for soldering paste.....Each **\$5.80**

Graybar Permagem

Soft, plastic, weatherproof, mastic compound for use on metal, wood, and other surfaces.

Keeps out moisture-laden air, protecting insulation against saturation and reduction of its insulating efficiency.

Readily workable, it can be thumbbed into any opening and formed for sealing around inspection plates, conduits, openings, cable joints, etc.

Soft mastic consistency permits easy working with fingers at temperatures as low as 30° F. Will not melt or run at any temperature up to 350° F. Non-oxidizing, remains soft and plastic for an indefinite period at 70° F. Does not become brittle at 0° F.

Will not irritate or adhere to skin.

Pkg. per Carton	Wt., Lb. per Pkg.	Price per 5 Lb. Carton
10	5	\$2.10

Graybar Permagem—On Spools

Conveniently packaged, six handy rolls per carton. Easy to use, the lineman can handle even with gloves, tear off a section at a time, no waste material. The roll fits onto the tape thong attached to lineman's belt.

The dielectric strength is much higher than friction tape and is not affected by extreme cold or hot weather conditions.

Permagem can be kneaded or worked into any desired shape or size as the material will adhere to itself permanently. Packaged 5-ft. of Permagem 4-in. wide on a spool.

No.	Std. Carton, Spools	Carton Wt. Lbs.	Per Carton, Each
G1031	6	9	\$11.50

Minerallac Insulating Compounds

For High and Low Voltage Cable Joints, Potheads, Junction Boxes, Terminal Bells, etc.

High Voltage Compounds

No. 33. A specially compounded oil-insoluble insulating medium for Cable Joints, Potheads, Terminals and other electrical apparatus where a close seal against oil filtration is specified. Also as a protection to transformer bushings on oil-filled transformers. Melting point 49 degrees C. Dielectric strength 627 volts per mil at 30 degrees C.

No. 78. Cable Joint or Pothead Compound. Dense and very adhesive. Recommended as an all-purpose insulating material. For voltages 600 and up. Melting point 90° C. Dielectric strength 940 volts per mil at 30 degrees C.

	Per Gallon

33	\$4.70	4.00	3.60	3.50	\$3.10
78	3.05	2.35	2.05	1.80	1.10

Approximate shipping weight, 10 pounds, 1 gallon.
 *In drums of approximately 400 lbs.

G & W Insulating Compounds

Compound is not included in the price of G&W cable devices, except splicing kits (Ozite B) and oil fuse cutouts (Novoid A).

Asphalt Base

Novoid A (medium soft). For hermetically sealed high and low voltage potheads, boxes and cableheads.

Novoid C (medium hard). For splice boxes and indoor potheads without definite seals.

Ozite B. For cable joints.

Oil Insoluble

Novoid X (medium hard). For special cases to help prevent migration of impregnating oil and compound in paper-insulated cables.

General Machine Sealing Compound

When mixed, sealing compound and activator form the proper flowable compound to produce a plug or dam when desirable to seal cable terminals. Compound and activator packed as one unit to a carton.

No. 7458.....Prices on application

O. Z. Sealing Compound

This compound is recommended for use in compound bushings, cable terminators and other electrical equipment where a high grade sealing compound is indicated.

Made of fine materials, expertly blended for the purpose for which it is intended.

Flashpoint..... 415° F.

Minerallac "Pull-In" Compounds

Listed by Underwriters' Laboratories, Inc.

For Rubber, Synthetic, Plastic or Lead-Covered Wires or Cables

For lubricating wires and cables to facilitate pulling them into conduits. Not injurious to wire or wire covers. Free of objectionable odors. White in color. Will not drip or run. Packed in pint, quart, 1/2-gal., gal., and 5-gal. cans.

No. 100 Compound

Minerallac Cable Pulling Compounds

For lead-covered cables. Not recommended for rubber.

Minerallac Cable Pulling Compound is applied with a stiff brush to the cable at the entrance of the cable feeder. This compound clings to and lubricates the full length of the cable and conduit. The compound follows through curves and bends in the conduit, eliminating damage to the cable sheath. It is chemically inert and causes no deterioration to either cable or conduit, including fiber conduit. To pull a 2.83-inch diameter cable into approximately 400 feet of 3 1/2-inch tile conduit requires only 5 to 7 pounds. Feature of economy that should not be overlooked. Temperature does not affect it and cables may be pulled at temperatures as low as 10° above zero (F.).

Size Can..... pounds	12	25	60	*600
No. 150..... per pound	\$0.19	\$0.18	\$0.16	\$0.14

*Steel drum approximately 650 pounds shipping wt.

Y-er Eas Wire Pulling Lubricants

(Say: "Wire Ease")

For pulling lead, rubber, braided, or synthetic covered cables. Not messy or greasy to use. Saves time and labor by giving more slip to electric cables. Prevents sticking and setting of cable. Will not run back on cable. Facilitates removal of cable at a later date. Not harmful to hands or clothing. Will not deteriorate in transit or storage.

Approved by Underwriters' Laboratories, Inc.

Packaged in wooden pails as follows:

1 gal. Approx. shipping weight, pounds.....	5
2 gal. Approx. shipping weight, pounds.....	11
3 gal. Approx. shipping weight, pounds.....	14
4 gal. Approx. shipping weight, pounds.....	19

Also available in 1 Qt. cans and 55 Gal. Steel drums.

Prices on application.

Ideal Wire-Pulling Lubricants

"Wire-Lube"

Makes wire pulling easier and saves time. Protects insulation against breaks and strains. It can be used on rubber, lead or plastic covered wire or cable. The lubricant may be applied by hand or brush. Wire or cable actually "rides" on a film of lubricant which dries to a fine powder. Ideal for use when adding extra wires in a conduit already containing wires.

No	Description	Each
31-247	Tube (Packed 12 per carton)	\$.50
31-250	Quart (Packed 12 quarts per case)	.80
31-251	Gallon (Packed 4 gallons per case)	2.00
31-253	Three Gallon	4.90
31-254	Four Gallon	5.40
31-255	Five Gallon	6.50
31-265	55 Gallon Drum (Non-returnable)	68.75

"Scotchkote" Electrical Coating

A fast drying sealant and strong bonding agent.

Recommended for use as an inner and outer seal over cable splices subjected to oils, acids, alkalies and severe weathering in man-holes, underwater cable installations and corrosive atmospheric conditions in chemical plants, oil refineries, etc.

Resists oil, moisture and aliphatic hydrocarbons.

Size, Dz.	Cans Per Ctn.	Ship. Wt. Per Ctn.	Per Can
8	12	8	\$0.85

"Scotchfil" Electrical Insulation Putty

Useful for filling voids and padding sharp edges of cable connectors, motor terminals, bus bars and tee connectors. Will not corrode copper.

Uniform thickness of 1/8 inch, gives rapid build-up to the full thickness of the cable.

Good dielectric and excellent aging properties insure thorough seal and long service life.

Width, In.	Per Roll, In.	Packing Type	Carton	Ship. Wt. Per Ctn.	Per Roll
1 1/2	60	1/Box	48	26 1/2	\$1.17

"Scotchcast" Resins

No. 4 "UNIPAK"

An all epoxy type resin of 100% solids, offering advantages of high adhesion, minimum shrinkage and greater heat stability than other synthetic resin classes.

No. 4 is a semi-rigid, insulating, moisture sealing resin.

The "UNIPAK" is a two-part plastic bag separated by a dividing membrane. When the seal is broken the container is kneaded, mixing the two parts. A corner of the container is clipped and the resin poured.

Through its own chemical action the resins become a solid in approximately 15 minutes, depending on size of molds, temperature, etc. Class A Temperature Classification.

"Scotchcast" Splicing Kits

82-A Series

For straight or wye splices. Designed to provide a tailor-made field splice conforming in strength and electrical properties to the cable itself.

Provides excellent physical and electrical protection and uniformity of moisture-proof qualities.

Splicing kits contain all the materials necessary for encapsulating cable splices.

No.	Kits Per Ctn.	Ship. Wt. Per Ctn.	Cable O.D. Range		Per Kit

"Scotchlok" Electrical Spring Connectors

Wires spliced with "SCOTCH-LOK" connectors will not shake loose regardless of vibration.

Simple to apply and zinc plating over the spring steel prevents corrosion.

To apply, simply twist connector on wires using winding stem as a handle.

To complete the splice, wrap with "SCOTCH" No. 33.

Wire Ranges: Solid or Stranded

"Scotchcast" Splicing Kits

No. 90-B1

Designed to give positive service in cathodic protection ground bed splicing, street lighting and traffic signal systems.

Offers speedy, easy-to-make, factory-tailored

splices which are moisture-proof and electrically tight. No special skill is required. Each kit contains "SCOTCHCAST" Resin No. 4, Size B, in the "UNIPAK" container.

The self-venting split mold, made of durable plastic, offers a choice of 3 different positions from which the mold may be filled.

The stepped ends snugly accommodate cables of varying outside diameters simply by cutting the mold ends at the proper step diameter.

"Scotchcast" Resin Pressure Splices

Combines the features of epoxy resin sealing and insulating and easy field application with adaptability to all configurations.

Is the most universal moisture seal and insulation.

Ease and simplicity of application afford it wide acceptance as a splice sealing and insulating medium.

Items needed are sold individually as its universal application makes a combined package impractical due to varying requirements.

G & W Telephone Cable Splicing Kits

Typical Unit Package Kit for Paraffin Type Splice

Paraffin Type (TP)

Unit package includes all necessary splicing materials in the proper quantity and size for one straight 2-Way joint.* Lead sleeve, for housing the joint. Wiping solder, for wiping lead sleeve to cable sheaths. Stearine, flux for wiping joints. Paper pasters, for limiting the wipes. Dry cotton tape, for protecting the individual conductors at the ends of the lead sheaths. Insulating sleeves, woven impregnated cotton tubes for enclosing splices of individual conductors. Muslin, for wrapping the spliced conductors. Paraffin, for removing moisture by boiling out the core.

Desiccant Type (TD)

Same as paraffin type, except instead of paraffin it contains desiccant for removing moisture by absorption and Stripping oil to facilitate removal of insulation.

*Bridge (3-way) joint kits quoted on request. Give complete cable data.

Splicing Kits

G & W splicing kits are also available for all types of cables and all kinds of joints. Printed bulletins will be sent on request to Graybar. Please give complete cable data, fully describe cable, give operating voltage and state whether grounded or ungrounded neutral.

Prices on application.

G & W Splicing Kits

Each item supplied in the correct quantity for properly designed joint. Economical; accumulation of dead stock avoided.

Each kit is labeled for easy identification.

Splicing Kits For Light & Power Cable Joints

Fig. 11—Kits are available for ANY kind of cable, single or multiple conductor, lead, braid or Neoprene covered.

Fig. 21—Straight 2-way joint. Kits also furnished for 3-way Y.

When ordering splicing kits specify:

- Total number of joints to be made
- Type of joint (straight 2-way, 3-way Y, etc.)

Complete description of the cable:

- Number of conductors (1/c, 2/c, 3/c, 4/c)
- Size of conductors
- Type of conductors (solid, concentric stranded, compact round, compact sector, etc.)
- Type and thickness of insulation
- Type of cable (shielded or unshielded) 1/c (belted or shielded) 3/c
- Lead sheath or jacket thickness

Operating voltage as:

- Grounded or ungrounded neutral (Important)

Catalog number of kit, if available

Shipment wanted (specify date)

Ruberoid Rapid Asphalt Paint

A very quick-drying, glossy black coating with high insulating and moisture-proofing qualities. Resistant to acid, acid fumes and alkali.

For coating switchboards, wires, cables, fibre conduit joints, taped connections and other electrical insulating applications. Also for coating the inside of tanks, vats, troughs holding liquids, refrigerators, etc., and for all surfaces subject to extreme moisture or severe exposure.

Graybar Insulating Materials

Quality Insulation Meeting Rigid Specifications

Class H—180° C.

Graybar Silicone Glass (Extra Thin)—An extra thin material of high tensile strength, good flexibility, exceptional dielectric strength.

Graybar Elastic Fiberglas—Fully cured silicone rubber coated fiberglas, flexible, tough, abrasive resistant, high dielectric strength, low power factor.

Graybar Silicone Asbestos—An inorganic asbestos paper saturated and coated with silicone resin. Extremely flexible, plus high dielectric and mechanical strength.

Graybar Silicone Glass (Regular)—Impregnated and coated with silicone resin, having exceptional resistance to moisture, corrosive vapors. Mechanical stability and flexibility. High dielectric, low power factor.

Class B—130° C.

Graybar Bias-Glass—Has good dielectric and mechanical strength. As a tape it provides uniform, tight, and smooth lapping over irregular surfaces. Retention of varnish film after elongation, high abrasion resistance and protection of fraying action of the glass fibres.

Graybestos—Reinforced combination of treated glass cloth and purified asbestos paper. High degree of flexibility, maximum electrical and physical properties. A low cost composite insulation.

Graybar Adhesi-Glass—Varnished fiberglas with pressure sensitive adhesive. Provides excellent sealing without the use of added adhesion or further processing.

Graybar Varnished Glass—An insulating material of exceptionally high tensile strength, flexibility, thermal conductivity and dielectric strength.

Class A—105° C.

Graybar Glass—New low cost Varnished Glass Cloth which provides stronger more permanent support for insulating varnish than organic textile, material of equal thickness. Stronger and longer lasting, permitting Class A rated machines to withstand higher temperatures.

Dielectric Board—Highly refined coated paper which eliminates the necessity of vacuum impregnation of untreated paper when used as layer insulation in transformers. Can be activated by heat; it softens and cures, providing a firm bond between wire and paper.

Graybar Varnished Cambric—General purpose insulating material possessing high dielectric and mechanical strength. Available in straight cut and bias woven. Both types possess good flexibility in tape or sheet form. Exceptional elongation without film rupture.

Graybar Pli—An insulating material using polyester film bonded to Rag or Kraft paper, possessing exceptional high dielectric and mechanical strength, available in duplex or tri-ply combinations.

Newer Insulations Available

Graybar Isocyanate Glass

A flexible high temperature insulation suitable for continuous service at temperatures up to 150° C. Exceptional resistance to mechanical stress, flexing and creasing. High dielectric, approximately 1900 VPM, non-corrosive, low temperature flexibility.

Graybar Banding Tape

High tensile, high modulus, high impact strength, thermosetting tying and banding tape with good electrical properties. Thermoseals to continuous tape at point of contact with no loss of tensile. Furnished in the "B" stage (semi-cured), complete curing effected after baking 3½ hours at 125° C.

Graybar Polyester Glass

Specially constructed woven fiberglas cloth pre-impregnated with a modified temperature stable polyester resin.

Available in a semi-cured stage requiring heat and pressure to effect the final cure.

Can be formed, molded, or laminated at low pressure, even contact pressure, curing completely at 5 to 10 minutes at 250° to 300° F.

Graybar Coated Mylar®

Flexible polyester film coated on one or two sides with a special compound producing a very hard surface which reduces slippage and provides a wettable surface permitting varnish to adhere to the roughened surface.

Has good chemical and moisture resistance, high dielectric and mechanical strength.

Atlas Insulating Materials

Glaspun* Woven Tapes

All-purpose electrical insulating tape which resists moisture, rot, chemicals and high temperatures. Will not burn. Good carrying medium and reinforcement for impregnants used to insulate. Made entirely of glass fibre yarn.

Approximate Temperature Limit: Strength begins to decrease at 600° F. and declines to limiting temperature of about 1000 to 1500° F. Softens at 1500° F.

Applications: Electric motor windings—field coil wrapping, field coil supports, armature coil lead separators. Flame-proofing of cable. Protective wrapping on exposed aircraft engine parts and exhausts.

Continuous Filament Types

Has high strength—low bulk ratio, smooth, white, evenly woven.

Made with colored center stripe to guide operator's eye on half-laps in coil winding. Style 2151 has black line; Style 2152 has orange line.

"B" Weave

Tight Weave—Conforms to O-C ECC-11B

Style No.	Warp Yarn	Fill Yarn	Std. Width In.	Std. Thickness In.	Approx. Wt. Lbs. Per Gr. Yds.	Length Yds. Per Roll
2171	450	450	3/8 to 1 1/2	.003	.25 to 1.2	72

2153	150	150	1/2 to 1 1/2	.025	3.3 to 10.25	36

Note: Wider widths in all styles up to 6-in., thicknesses .005-in. and above available on request.

Staple Fibre Types

Used where a more resilient wrapper is desired and space is not of primary importance. Appearance similar to natural wool.

Conforms to O-C Type ESS-13A

Style No.	Width In.	Thickness In.	Roll Length Yd.
2275	1/2 to 2	.010	36
2275	3/4 to 2	.015, .020, .025	36

Style 2544: Generally lighter in weight and somewhat more open in weave than Style 2275. Widths 1/2-in. to 3-in. Thicknesses .010-in., .015-in., .020-in., .025-in., .030-in., .040-in. and .060-in.

Widths over 3-in. and other thicknesses or designs on request.

Treatments Available at Extra Cost

- No. 2519:** Chemical treatment to remove most of binder oils.
- No. 1713:** Heat treatment to remove binder oils completely and anneal glass to reduce fraying.
- No. 1983:** Chemical stiffening treatment—applied to base fabric or after either above treatment, as desired.

*Trademark of Atlas Asbestos Co.

Asbestos Woven Cloth

Used for packings, safety clothing, pipe insulating jackets, fire blankets, theatre and welding curtains, laminated plastics, conveyor belts, covers for laundry rolls and ironing boards, etc. Custom fabrics made on request.

Standard widths 36-in. and 40-in.

Standard roll lengths approximately 50 yds.

**Underwriters' Grade Only
(Or Grades A, AA, AAAA to Order)**

Textile Products

Glaspun Tapes for Plastic Reinforcement: Continuous filament with woven selvages. Widths—1/2-in. to 12-in. Thicknesses—.005-in. to .022-in. Treatments—"114" chrome-complex, Volan A, Garan, or Heat-Annealed.

Glaspun Tape for Pipe Lagging: Navy Spec. 32-G-9 Class "C", MIL-C-20079B.

Glaspun Webbing: With Staple Fibre. Thicknesses to 1/4-in. Widths to 6-in.

Glaspun Cloths for Tooling by Plastic-Reinforcement: Heavy Staple Fibre. Width 38-in. Thickness to .120-in. Requires fewer plies in lay-up than conventional fabrics.

Glaspun Rope: With Braided Staple Fibre.

Glaspun-Dacron and Glaspun-Asbestos: Tapes of combination fibres.

Ceramic Fibre Tapes: Withstand temperatures to 2000°F.

Other tapes, tubings and cloths available. When ordering forward details of requirements.

Asbestos Textiles

For industrial applications. Made of high-grade asbestos yarn. Non-combustible, withstand high temperatures, durable. Resist moisture, fire, corrosion, heat, alkalis, mild acids, vermin. Insulate against heat, vibration, electricity and sound.

**Asbestos Textile Grade Classification
(A. S. T. M.)**

Grade	Asbestos Content By Weight	Approx. Temp. Limit
Commercial	75% up to but not incl. 80%	Up to 400° F.
Underwriters'	80% up to but not incl. 85%	Up to 405° F.
Grade A	85% up to but not incl. 90%	Up to 550° F.
Grade AA	90% up to but not incl. 95%	Up to 600° F.
*Grade AAA	95% up to but not incl. 99%	Up to 750° F.
Grade AAAA	99% to 100% inclusive	Up to 900° F.

*Not offered, use Grade AAAA.

Data in tables cover grades shown in headings.

Other grades can be furnished on request.

Atlas Insulating Materials

Asbestos Woven Tapes
Selvage Edges—Ferrous Type
Underwriters' Grade

For electrical insulating, such as motor windings. Capable of absorbing a high percentage of resin to provide moisture barrier for efficient motor operation.

*Data for 1/16-in. thickness.

†Data for 1/8-in. thickness.

Asbestos Braided Tubing

A flexible sleeving for insulating electrical conductors. Used as a jacket for high-temperature packing, fire-proofing fuel lines, covering on items such as tongs (to protect hot glass-ware from injury in handling during production), numerous other uses. Can be expanded or contracted to fit slightly larger or smaller diameters.

Yarn used conforms to ASTM Spec. D299.

Underwriters' Grade 1/16-in., 1/32-in. or 1/64-in. Wall

G-E Insulating Materials

Irrathene® Irradiated Polyethylene Insulating Tape

A new electrical insulating tape providing all the excellent mechanical and electrical properties of conventional polyethylene plus being non-melting. Will heat shrink and heat bond when exposed to 135-150°C. temperatures, shrinking to the configuration of the object on which it is wrapped forming a tough, tight, waterproof sheath impervious to dirt and dust.

Available in unspliced roll lengths from 36 yds. to 360 yds. Tape widths vary in 1/8-in. increments from 1/2-in. up to 6-in. for the shrinkable grades and to 12-in. for the regular grades. Standard mil thicknesses are 4 and 8 for shrinkable grades and 5 and 10 for the regular.

Grade	Type	Color	Oxidation Stabilized
101	Regular	Clear	No
110	Shrinkable	Clear	No
201	Regular	Clear	Yes
210	Shrinkable	Clear	Yes
202	Regular	Black	Yes
212	Shrinkable	Black	Yes

Mica Mat Electrical Insulation

A new insulating product produced in a thin, uniform, flexible continuous sheet. Made from tiny mica flakes without the use of binders or other strengthening agents. Has dielectric strength of about 500 volts per mil, a tensile strength of about 1500 psi, and a thickness variation of less than 10 per cent.

Can be used to form molded insulating products. Can also be treated with silicones or other resins to improve tensile strength and water resistance. Mica Mat is limber and flexible. Mica Mat raw material can be bonded to glass cloth, synthetic films or paper-backing materials, to improve its tensile and tearing strength.

Tapes and wrappers applied to end turns

Pressed composite sheets as slot liners

In tube form as center of coil form

Segments for insulation in commutators

Note—Mica mat tapes and wrappers are supplied in widths from 1/2 to 38 inches in 1/4 inch increments.

Tapes are supplied in 1 inch OD cores in 36 yd. lengths.

†When stored in the original package.

‡Tensile is difficult to measure due to the glass threads.

Mica Insulation

When properly selected and processed, mica has exceptionally good electrical properties, high dielectric strength, very low power factor and stability under varying humidity conditions and over a wide range of temperatures.

G-E segments and heater plate make use of special heat

resistant and stable resins with high resistance to flow and distortion. G-E insulating varnishes are used in making flexible mica sheets and composites. These varnishes give added resistance to heat and chemicals, excellent electrical properties and good mechanical strength.

Sealing and Filling Compounds

Used for filling and sealing spaces in windings as in revolving a-c fields; between coils and case as in transformers, or over screw and bolt heads as in receptacles, sockets, and other wiring devices. They are highly filled and will not saturate porous materials like paper or cotton. The bonding constit-

uent is most often a natural or synthetic resin or varnish. Treating compounds such as G-E 1332 are made especially for the penetration of porous materials such as wood, asbestos board, cloth and paper.

Applications and Properties

G-E No.	Recommended for	Characteristics	Color	Type of Base	Weight Per Gallon, Lb., Av.	Method of Application	Thinner (If Required)
805	Filling between primary and secondary windings of transformers; also between coils and leads.	A putty like material which becomes infusible, hard, and stonelike on baking 2-4 hrs. at 100°C. Oil resistant.	Brown	Clear Synthetic Varnish	13.5	Knife	Toluene or Xylene
1282	Filling and coating of end windings which must be completely smoothed over on motors and generators.	An asbestos-filled compound which cures to a tough, infusible, oil-resistant coating on baking approx. 1-1½ hrs. at 150°C.	Brown	Clear Synthetic Varnish	12.2	Knife	G-E 1500 or Xylene
1287	Filling and protecting of end windings of motors and generators and random wound stators.	A mineral-filled compound for providing a smooth surface and extra protection. Gives much heavier coating and filling than G-E 1201.	Red	Clear Synthetic Varnish	13.3	Dip, flow, spray, or brush	G-E 1500 or Xylene
1332	Filling solid-filled cable accessories.	An oil-resistant compound which flows at 65-70°C. High dielectric strength.	Clear	Resin-Oil	7.8	Pours at 170-190°C.	

Electrical Insulating Varnishes

Used for impregnation and filling of the spaces in porous insulation and the interstices between coil turns and assemblies of transformers and all forms of rotating apparatus. Varnishes are useful in building up film insulation upon wires, coils and coil assemblies. The varnish coating serves as a seal to pro-

tect windings and insulation against moisture, dirt, oil and chemicals. It is also useful in bonding coils and winding assemblies, as in transformers or in cementing together mica splittings to produce built-up mica insulation.

G-E No.	Type of Varnish	Typical Uses
457	Black air drying	General purpose fast air drying varnish especially useful in treating white cotton coils, pole leads, collector rings, armature coils, and all types of windings. Excellent for use where baking is not practical.
9470	Black baking	Treating form and random wound coils, stators, armature and field coils and form windings requiring multiplicity of dips and bakes. Suited to high voltage machines when it can be well baked.
9564 and 1202	Clear air drying	Quick-drying varnish, suitable for treating small windings or as a finishing coat, particularly when baked. Not recommended for deep coils or uses where a thermo-setting type is needed. Good finish coat where resistance to moisture, acid, salt water and oil is desired, especially when baked. Often used as the final coat over other varnishes. G-E 1202 gives a faster air dry.

G-E Insulation Materials
Electrical Insulating Varnishes

G-E No.	Type of Varnish	Typical Uses
1673	Clear baking	Especially suited for treating all types of coils, windings, etc., as found in motors and transformers. Has good heat life and flexibility combined with excellent penetration and good moisture, acid, and oil resistance. Not recommended where high bonding strength at elevated temperatures is required. Where good hot bonding strength is necessary use G-E 9700 or 9700C.
9700 and 9700C	Clear baking	General-purpose, giving maximum protection. Treats all types of windings, rotors, stators, etc., except high-speed armatures. Can be used as packaged or can be thinned. Good bonding strength at elevated temperatures. G-E 9700 is medium viscosity, medium baking grade and G-E 9700C is low viscosity, fast baking grade.

Glyptal Insulating Finishes

Glyptal Alkyd resin finishes used as protective coatings, insulating compounds and adhesives and are noted for their stability when exposed to heat, arcs, moisture, acid and oil.

Available in a variety of colors, and presents an attractive appearance, and provides rapid-drying, hard, glossy, durable surfaces which withstand oil spray and splash, weak acid and saline conditions.

G-E Insulation Materials

Varnished Cloths and Tapes

Due to their flexibility and high mechanical strength, they may be wound or wrapped tightly in place on many different devices such as cables, armature, field, transformer, and various types of coils. Their high dielectric strength, greater resistance to moisture, and superior heat-aging characteristics make them preferable to untreated fabrics.

The base cloth used in G-E tapes is selected for its high mechanical strength and controlled sizing content. This permits thorough penetration by the treating varnishes.

The varnishes are chemically inert in relation to the cloth to which they are applied, producing varnished cloth tapes which have high dielectric strength, permanent flexibility and high resistance to heat, oil and water.

M-S-A All-Weather First Aid Kits

All M-S-A first aid materials for kits are packaged uniformly and to great advantage in the Type D System. This method employs cardboard packages of a standard unit size (or multiples of the unit size) for each type of dressing or treatment.

Each package contains one or more complete dressings or treatments for a single injury; each treatment is complete in itself, avoiding waste.

The unit packages fit like blocks in the cases, enabling rapid selection and use of the desired material, and simplifying re-filling and maintenance.

All dressings are sterilized for instant use; all liquids are contained in hermetically-sealed ampoules or vials to prevent leakage or deterioration.

Kit cases are heavy-gauge steel, with welded rounded corners, durable blue metallic finish. Rubber gasket seals out dust and moisture. Have snap lock and carrying handle. Mounting brackets enable attachment to wall or vehicle. All packages extend above sides of case for easy removal.

Ten-Unit Kit

- Packages**
 1 4-in. compress bandage.
 1 2-in. compress bandage.
 2 1-in. adhesive bandages.
 1 1/8-oz. tube Foille for burns.
 1 Merthiolate Swabs.
 1 Ammonia inhalants
 1 40-in. triangular bandage.
 1 Tourniquet and forceps.
 Size of Kit: 7 3/8 x 5 1/2 x 2 1/2 in.

No. FA-12035—Weight Each 4 Lbs.....Each **\$8.27**

Twenty-four Unit Kit

- Packages**
 3 4-in. compress bandages.
 3 2-in. compress bandages.
 3 1-in. adhesive bandages.
 2 40-in. triangular bandages.
 1 1/8-oz. tube Foille for burns.
 1 1/4-oz. tube Foille for burns.
 2 Absorbent gauze compresses.
 2 Merthiolate Swabs.
 1 Ammonia inhalants.
 1 Ammonia ampoules.
 1 Wire splint.
 1 4 in. gauze bandage.
 1 Paper cups.
 1 Tourniquet and forceps.
 Size of Kit: 9 1/8 x 10 x 2 1/2 in.

No. FA-12037—Weight Each 9 Lbs.....Each **\$16.37**

M-S-A Snake Bite Outfits

This outfit contains selected and tested materials for the treatment of snake bite. All in a sturdy plastic case 4 x 2 1/4 x 1 in.

- Contents include:**
 Plastic suction pump for removing venom.
 Lancet for enlarging wound.
 Tourniquet. Antiseptic swabs for painting around wound.
 Ammonia inhalant.

All in 1 1/2-unit Type D packages. With instructions.

No. FA-12619—Weight each 4 oz.....Each **\$3.00**

M-S-A Pocket First Aid Packets

Small

A metal hinged-cover box 4 x 2 1/2 x 7/8 in. containing a handy assortment of first aid materials for minor injuries—fits in the pocket.

Contents include:

- Ammonia inhalants.
- Merthiolate applicator.
- Adhesive bandages.
- Compress bandages.
- Foille for burns.

No. FA-12260—Weight Each 3 Oz.....Per 100 **\$98.00**

M-S-A Poison Ivy Wash

Effectively relieves irritation and dries up inflammation if applied in early stages. Type D package of six.

No. FA-2682—In 4 cc. Vials.....Each **\$0.57**

M-S-A Creosote-Burn Wash

For the effective treatment of burns or irritation of the skin caused by contact with creosote from line pole, ties and creosoted timber. Type D package of six.

No. FA-2604—In 4 cc. Vials.....Each **\$0.57**

M-S-A Foille For Burns

A modern treatment for burns; for emergency and hospital use. Rapidly anesthetizes injured tissues with characteristic absence of infection. Aids rapid healing, lessens contractures and reduces scarring.

Can be applied directly to injured area at scene of accident and does not require removal when treatment is continued by physician. Provides quicker emergency aid with marked control of pain and resultant shock. Type D package of two.

No. FA-12560—In 5/8-oz. Tubes.....Each **\$0.53**

Note—Available in emulsion or ointment; and in larger packages.

Salisbury Marshall Tagging Devices

For tagging out open disconnect switches. "Hold Cards" can be placed directly at source of the circuit's energy and thus prevent anyone from inadvertently closing the switch.

Equipped with rubber spear-shaped button to hold as many as five cards. A slot through one side of the cup accommodates the pulling lug of the switch pole.

Marshall Tagging Device.....Each **\$1.30**

Salisbury Static Resisting Linemens' Coats

Special construction coat that retards static tingling at neck or wrists when garment is used during wet weather on work adjacent to energized conductors.

This safety factor plus comfort and strength makes coat popular with linemen and troublemen. Recently redesigned; now lighter in weight and more pliable, collar less rigid and cuffs are larger with an accordion pleat construction for easier insertion of glove gauntlets.

No metal used in construction of this coat. Button fastened. Material is a bright yellow Neoprene surfaced on cotton sheeting. Will not crack or peel or stiffen up in cold weather.

Guaranteed to be free from all defects in material or workmanship.

Length 47 inches. Weight 4 lbs. Two-piece suits instead of full length coats as rain gear is also available.

Coat Size.....	36 to 46	48	50
Each.....	\$18.70	\$19.20	\$19.70

Static Resisting All Rubber Line Suits, Jackets and Pants

Small, Medium, Large.....	Per Suit	\$25.10
Extra Large, per unit.....	Additional	1.00

Salisbury Curved Jaw Clamp Pins

Jaws open wide enough to clamp a blanket over line hose, the arm of an insulator hood or even a cross arm and yet grip firmly when used simply to hold the edges of a blanket together.

Strong spring provides lasting hold and steel washer is inserted to prevent jaws from racking. Constructed from oiled oak and sanded for a sliver free finish.

No.	Length, In.	Opening Jaw, In.	Per Dozen
20	8 1/2	4 3/4	\$6.80

Salisbury Linemen's Rubber Sleeves Curved Elbow

Full length sleeves used to protect electrical worker's arms and shoulders from accidental contact with energized equipment.

Seamless new curved elbow style is comfortable to wear and convenient to use.

Available in either the "regular" or the new "light" weight.

Two adjustable rubber straps are furnished with each pair. Each sleeve tested at factory at 10,000 volts for three minutes. Packed 1 pr. in carton. Approx. ship. wt., 3 lbs.

Curved Elbow Sleeves

No.	Type	O.A. Lgh., In.	Underarm Lgh., In.	Color	Per Pair

50	Regular	27	18	Maroon	10.50
50-41	Light	27	18	Black	10.50

Salisbury Linemen's Rubber Gloves Curved Finger Style

The curved finger style offers linemen the advantage of greater comfort and convenience. There is no surplus rubber to "bunch" in the palm and thus permits a better grasp on tools.

The curved shape of the fingers is less conducive to hand fatigue. Standard length of gloves 11-in.; also available in 16 and 18-inch lengths.

Sizes are 9, 9 1/2, 10, 10 1/2, 11, 11 1/2 and 12.

Color: Maroon. Black available.

All gloves are steam cured, seamless and form fitting, with finger lengths and widths adjusted to best meet average conditions. Guaranteed to meet A.S.T.M. specifications.

No.	Class	Voltage	Per Dozen Pairs		
			14 In.	16 In.	18 In.
100-10	Class 1	10 K.V.	\$ 93.00	\$ 96.96	\$114.12
100-15	Class 2	15 K.V.	104.28	106.92	124.68
100-20	Class 3	20 K.V.	114.12	117.48	132.60

All Sizes 9 to 12 Packed one Pair to box.

Note: When ordering specify catalog number, size and length desired.

Salisbury Gauntlet Protector Gloves

Made from specially tanned Grade "A" buffed leather. They remain soft and pliable under all conditions.

Solid nylon thread used throughout. Extra wide reinforcement at thumb seam.

Equipped with leather pull straps and self engaging buckle to tighten at wrist. Maroon color.

Average weight 1/2 lb. per pair. Semi-gauntlet and band top styles are also available.

Semi-Gauntlet Style

No.	Sizes	Per Dozen
118-C	9, 9 1/2, 10	\$48.60
120-C	10 1/2, 11	49.56

124-C	10 1/2, 11	47.88
144-C	11 1/2, 12	48.84

Salisbury Rubber Cuff Protector Gloves

To be worn over rubber gloves, protecting them from sagging and abrasive wear.

Glove part is Grade A buffed leather, remaining soft and pliable under all conditions.

Cuffs are made of fabric-inserted voltage resisting rubber, extending to 1/4-in. of top of rubber gloves.

These protector gloves give much greater safety to the lineman, and result in a substantial saving in rubber glove cost.

Regular style has tapered cuff. Flared style cuff can be furnished.

No.	Sizes	Per Dozen
130	9, 9 1/2 and 10	\$60.24
132	10 1/2 and 11	61.08
134	11 1/2 and 12	61.80

Salisbury Bags for Linemen's Gloves

Made of tight-woven 42-oz. duck with non-raveling edges. They are water-proof and very durable, 8-in. wide and large enough to hold one pair of rubber gloves together with leather protector gloves.

The 17- and 19-in. length bags made with expansion sides. A snap hook and "D" ring attached to each bag.

No.	Lgth., In.	For Glove Size, In.	Wt., Lbs.	Each

35-17	17	16	1	2.95
35-19	19	18	1 1/4	3.15

Other lengths furnished special orders.

Salisbury Protective Bags for Linemen's Sleeves

Sleeve bags for protection of sleeves while in field storage.

Full length tube shaped bag accommodates one pair of sleeves when rolled lengthwise. Ring attached for hanging on truck. Top opening 7 1/2 inches, length 29 inches.

Description	Size, In.	Each
Tube Shape	29	\$1.90
Roll-up	29	3.75
Combination	16	3.75

Salisbury Rib-Grip Rubber Insulator Hoods

Used in conjunction with line hose to cover tie wires and conductors as they pass the insulators, completely covering this hazard point in a close-fitting, positive manner.

Require no accessory attachments to hold them in place; securely lock themselves to the under side of the insulators and cannot open, turn or become accidentally dislodged.

Easily installed and removed. Can be placed from a position below the cross arms as well as from above. May be used on double arm as well as single arm construction.

Made in new rib-grip style to firmly hold line hose.

Type Hood	Lgth., In.	Hgt., In.	Wt., Lbs.	Each
Universal	14 3/4	6 1/4	5	\$7.50
Style J	16	6 1/4	6 1/2	8.00

For Telephone Use

Telephone and telegraph companies use a special hood that is shaped to fit telephone style insulators. As it is used on single arm poles only, both extending arms of the hood are of the same diameter and will grip the 1/4-in. size line hose. Rubber Insulator Hoods..... Each \$6.00

Salisbury Cable Bandages

Rubber cable bandages are for general use as temporary insulation.

Flexible, unusually strong, made of highest grade pure gum rubber.

Furnished in rolls.

Lgth., In.	Width, In.	Wt., Oz. Per Roll	Per Roll
14	3	10	\$2.10
14	4	12	2.75

Salisbury Rib Grip Rubber Line Hose

Rib-Grip line hose furnished in three sizes and in three lengths. When ordering specify both the inside diameter and the length of line hose desired also whether it is to be connector end or straight type.

Used for protection from live wires by completely surrounding the wire with a substantial wall of voltage resisting rubber. Snaps on wire and is self-locking. Stays secure even under bends.

I.D. In.	3-Ft. Length		4 1/2-Ft. Length		6-Ft. Length	
	Wt., Lbs.	Each	Wt., Lbs.	Each	Wt., Lbs.	Each
1	2 3/4	\$3.90	4 1/2	\$5.55	5 3/4	\$7.30
1 1/4	3 1/2	5.30	5 1/4	7.70	7 1/4	10.10
1 1/2	5 1/2	6.80	6 3/4	9.95	8 3/4	13.10

Note: Plain rubber line hose available.

Salisbury Rib-Grip Connector End Line Hose

Standard line hose with connector end. The connector end overlaps adjoining line hose, forming continuous, unbroken protective line. Also used to overlap ends of line hose separated by bulky joints.

The adapter at one end of Connector End Type Line Hose is additional to the stock lengths of straight line Hose; but for convenient reference, the sizes are designated the same although the actual overall length is 8-in. longer.

I.D. In.	3-Ft. Length		4 1/2-Ft. Length		6-Ft. Length	
	Wt., Lbs.	Each	Wt., Lbs.	Each	Wt., Lbs.	Each

1 1/2	6 3/4	14.00	9	17.30	11 1/4	20.50

Note: Plain Connector end line hose available.

Rib-Grip Line Hose Connectors

This connector overlaps line hose and is designed for use where two pieces of line hose meet. It prevents the pieces from slipping apart and eliminates possibility of conductor being exposed between adjoining ends. Also used to overlap line hose at bulky joints. Length 12-in.

Type	Description	Each
Line Hose Connector	For 1-in. Line Hose	\$3.00

Salisbury Line Hose Bag

For raising Salisbury line hose up the pole. Will hold 8 pieces of 3 or 4 1/2-ft. lengths of 1-in. diameter.

Can also be used to raise protective blankets. Made of 18-oz. duck. Bottom is hardened and water-proofed leather, reinforced with 3-in. cuff of harness leather.

Top held in form with non-metallic ring. Heavy rope handle is spliced through leather reinforcements.

Weight, 2 1/4 lbs.

Description	Each
Line Hose Bag	\$7.00

Klein Rubber Glove Pouches

Made of leather for carrying rubber gloves (folded).

Equipped with snap and ring for attaching to body belt.

No.	Size, In.	Each
5120-15	7½ x 15	\$4.65

Chance Insulator and Conductor Hoods

Made of formica, equipped with stops that lock them securely together. Each cover is locked on the conductor by a spring hook. Ropes on the hood tie under cross arm.

Designed for covering distribution lines, and underbuild lines that hamper getting to and working on the lines above. Recommended for use in place of rubber.

Hoods and covers are tested to withstand 34.5 Kv. 48-in. long covers can be swung from the hood at a 15-degree angle. Both hood and cover will fit over all straight armor rod clips. Both have aluminum fittings for installation with Grip-All Clamp Sticks.

No.	Description	Wt. Lbs.	Each
M4912	3-piece set for single arms, 2 conductor covers & 1 insulator hood	15½	\$113.50
M4912-1	Conductor cover	6¾	42.50
M4912-2	Insulator Hood	3¾	28.50
M4912-3	4-piece set for double arms, 2 conductor covers & 2 insulator hoods	19¼	142.00

Salisbury Switchboard Rubber Matting

Provides insulation when placed before switchboards or at any location where protection from a possible ground is necessary. It is solid rubber with a corrugated surface. Meets A. S. T. M. specifications. Weight, 15 lbs. per square yard.

Widths, 24, 30, 36-in. Thickness, ¼-in. Lengths, up to 75 ft.

Prices on Application.

Salisbury Snap Button Blankets and Jackets

Will fold, wrap or hang in any position; particularly useful in covering secondary racks, dead ends, cut outs, pot heads, arresters and similar equipment, or for use in station and underground work. Because of the button method of fastening these blankets can be fixed in practically any shape. Buttons hold blanket edges fast and prevent opening or shifting of its position. Thickness, ½-inch.

With Slot To Center			
Size In.	Description	Wt., Lbs.	Each
22 x 22	Jacket	2¾	\$ 5.00
Without Slot To Center			
36 x 36	Blanket	6¾	13.60

Salisbury Protector Blankets

All rubber. It is light in weight, extremely flexible and yet tough enough for the hardest kind of usage. Blankets are ½-in. thick and have beaded edges. Two sizes, either plain or with six reinforced eyelets to the blanket.

No.	Size, In.	Wt., Lbs.	Eyelets	Each
300	36 x 36	6½	No	\$12.50
300-E	36 x 36	6¾	Yes	13.00
400	27 x 36	5	No	10.10
400-E	27 x 36	5¼	Yes	10.60

Salisbury Slotted Rubber Blankets

A blanket of larger than the standard size and provided with a slot from one edge to center has been found especially useful in covering the electrical hazard usually present around secondary racks.

By centering this blanket over the top wire, the slot permits the divided side to hang down as a curtain on the pole side of the secondary lines. The opposite side either hangs down or is draped over the service wires. As all parts of the rack, as well as the wires, are adequately covered, the workmen are well protected when climbing past, working above or closely adjacent to this type of construction. Size 46 x 46 x ½-in. Weight, 12¾ lbs.

Slotted Rubber Blanket Each \$23.00

Salisbury Lineman's Blanket Cannisters

Rubber blankets should not be folded when in storage. Folding will damage the blanket and considerably shorten its life. These cannisters, holding rolled blankets, provide safe storage and convenient and safe transportation. They are made of strong galvanized iron, with caps of same material fastened to cannister with a chain.

No.	Length, In.	Diam., In.	Wt., Lbs.	No. Blankets Hold	Each

General Machine Pressure Guns

Type B

For injecting plugging compound into cable for making pressure plugs.

Screw-actuated cup type, operated by a ratchet wrench. Handle provided for holding gun.

Both end caps removable for ease in loading and cleaning. Replaceable nozzle. Length 7¼-in.; diameter of caps 2⅝-in.

No. 7413—Wt. 4 lbs. Prices on application

General Machine C Gun

For injecting plugging compound into cables for making pressure plugs. It is a screw-actuated cup type, operated by a ratchet wrench. Replaceable nozzle with ⅛-in. pipe thread.

The "C" does not supersede the type "B" gun. Length 8-in. Wt. 2 lbs.

No. 7534 Price on application

General Machine Pressure Gun Cleaning Rod

For cleaning the orifice of Type B pressure gun nozzle and for mixing plugging compound in the gun barrel.

Consists of flat steel blade with ⅛-in. diameter rod at one end for inserting into nozzle. Blade width ½-in.; overall length 6⅝-in.

No. 7415—Wt. ¼ lb. Prices on application

General Machine Pressure Gun Holders

For Use with Type B Guns

Hold gun in a vertical position for loading and mixing plugging compound in the gun barrel.

Frame has four prongs to prevent holder from slipping when secured to pole or other support by spring-tensioned chain, 36-in. long.

Size 3⅝-in. long, 2⅝-in. high, 3-in. deep.

No. 7414—Wt. ¾ lb. Prices on application

General Machine Pull Finder

For determining the "pull" on corner poles and for bisecting the corner angle to facilitate locating guy wire. It consists of a prod which screws into the corner pole and supports two pivoted sighting arms. A pointer on one arm indicates the pull on a scale inscribed on the other arm. A scale on the first arm and an index mark on the second arm enables one arm to be set to point along the bisecting line of the corner angle. A fine-grain cowhide carrying case is provided with each pull finder.

Finish: Metal parts brass, heavily nickel plated and polished. Weight, ½ lb. including case.

No. 7200 Price on Application

General Machine Pressure Plug Flanges

For attaching the threaded nozzle of pressure gun to lead-covered cable.

Consists of a body for soldering to cable sheath and a screw for sealing the hole in the body.

Length ⅝-in.; diameter ⅛-in.

Packed 50 flanges and 50 screws per box.

No. 7418—Wt. 1 lb. Prices on application

General Machine Flange Clamps

Type C

For holding pressure plugs in place while soldering to cable sheath.

One jaw of spring clip has pilot for holding and centering flange over hole in sheath.

Length 4-in.; height 2-in.; width 1 1/8-in.

No. 7419—Wt. 1/2 lb..... **Prices on Application**

General Machine Contactor Terminals

Type T

Used on cables maintained under gas pressure where talking facilities are required. Contactor mechanism and a terminal for the alarm and talking pair are contained in a metal housing with an external adjustment screw to secure desired operating pressure.

Terminal chamber sealed against entrance of gas from the main housing by means of a fused glass-to-metal seal. A pressure-testing valve is provided for testing operating pressure and another one for flash-testing terminal cover to determine the possibility of the entrance of any moisture.

Factory adjusted at 17.7 p.s.i. at 60°F. Size, approximately 8 1/2 x 8 1/2 x 4-in. plus 15-ft. lead stub.

No. 6766—Wt. complete 27 lbs..... **Price on Application**

Type E—High Pressure

For use in connection with supplementary gas reservoirs to operate an alarm when auxiliary gas supply falls to a pre-determined value.

Have a relief valve in housing to prevent damage to apparatus and cable should a leak occur in the high-pressure Bourdon tube.

Factory adjusted at 800 lbs., including 15-ft. lead stub and 4-ft. capillary tube. Approximate size, 8 1/2 x 8 1/2 x 4-in. plus stub.

No. 7229—Wt. complete 28 lbs..... **Price on Application**

General Machine Pressure Contactors

Type G

For use at contactor points on cables maintained under gas pressure. Supersede Type C; have adjustment screw to secure desired operating pressure outside the brass casting which houses the Bourdon tube and contact spring assembly. Factory adjusted at 17.7 p.s.i. at 60° F. as standard.

Furnished with 15-ft. stub containing two conductors for bridging to alarm pair of cable.

Approximate size 6 x 4 1/2 x 2 1/4-in. plus stub.

No. 7442—Wt. 20 lbs..... **Price on application.**

Type H

For use on cables maintained under gas pressure; designed for installation within a cable sleeve. Pressure-operated switches of the Bourdon tube type; adjustment switch provided outside the brass case that may be locked at the desired operating pressure. Factory adjusted at 20.7 p.s.i. at 60° F. as standard for underground and buried cables.

Two insulated leads from the contact springs extend through the case for bridging to the alarm pair of the cable.

Size 1 1/4 x 3 3/4-in.

No. 7443—Wt. 1 lb..... **Price on application.**

General Machine B Pressure Testing Kits

Complete equipment necessary for cable pressure testing, in convenient carrying case. Consists of apparatus case, testing clamp for temporary reading points, two-gauge regulator for use in charging cables with dry nitrogen for testing, cable drill for sheath and sleeves, regulator and acetylene torch wrench, 2-in. pressure gauge for approximate measurements, valve repair tool and 8-ft. hose assembly for connecting regulator to testing valve.

No. 7267—Wt. complete 18 lbs.....Price on Application

Pressure Testing Accessories

Flanges

Consist of body to be soldered to cable and plug for sealing hole. Bodies and plugs available in Type F for Type F pressure-testing valves and Type L for installing pressure testing plugs.

No.	Type	No. of Bodies	No. of Plugs
6808F	F	25	30
6808L	L	6	7

Valve Stem and Caps

Provide pressure measuring and gas admission points for cable testing.

Available in Types C, F, H and P; have valve cores with stainless steel springs; furnished with stems and cores assembled.

No.	Type	Qty.
6914C	C	5
6914F	F	5
6914H	H	5
6914P	P	5

Prices on application.

General Machine Pressure Testing Accessories

B Flow Indicators

For determining direction of flow of gas for locating leaks in cables maintained under pressure. Can be used to show quantitatively the pressure difference between two cable points. Consists of alcohol manometer mounted on hinged aluminum plate and base, wood carrying case, and two 10-ft. lengths of rubber hose with snap-on chucks for connecting to pressure testing valves.

No. 7291—Wt. 21 lbs.....Price on Application

Pressure Testing Ells

For use in soldering 1/4-in. i.d. lead pipes to lead covered cables. Made of seamless copper tubing, tinned for soldering.

Length 1 5/8-in.; height 1/2-in. Furnished 10 in a package.

No. 6817.....Price on Application

Portable Pressure Testing Gauges

For use where more accurate pressure measurements are necessary. Gauge has a 3 1/2-in. dial. Graduated from 0 to 30 lbs. in 0.2 lb. steps. Complete with 18-in. rubber hose and leather carrying case with shoulder strap.

No. 6215.....Price on Application

General Machine Bypass Valves

Type B

For use in connection with pressure testing work on telephone cables where it is desirable to isolate a portion of the gas pressure system for leak locating purposes.

When closed, valve should withstand 25-lb. gas pressure; when open, valve will allow an uninterrupted flow of gas.

Main construction of brass with exposed parts tin-coated. Size: 4 1/16-in., 2-in. wide.

No. 7050—Wt. 1/2 lb.....Price on Application

General Machine B Desiccant Injectors

Aluminum body injector with brass fittings.
Used with standard 160-gram desiccant can.
Compressed air, applied to tank valve, forces granules of desiccant into cable joints.

No.	Description	Wt. Oz.
7014	160-gram can	
7361	Injector	2

Price on application

Dillon Wire Stringing Dynamometers

Model "AN"

This traction type instrument is widely used for placing conductor, strand and guys at correct tension. It indicates load applied to new lines going up or can be used to check tension in old lines long standing.

Uses no springs or hydraulic pistons. Scientifically designed on cantilever beam principle and individually calibrated for greatest possible accuracy. Compact, 5 in. dia. dial is easy to read even from distance. Red maximum pointer remains at peak load until manually reset.

Dial protected by thick, shatterproof crystal. Each unit furnished with set of alloy steel shackles and pins. All capacities will sustain substantial accidental overloads without injury to calibration. Extremely high safety factor. No levers to adjust. No charts to refer to. All loads are read directly on the face of the dial the instant applied. Strong steel storage case included at prices shown.

Net wt. with shackles and pins: 8½ lbs. Gross wt.: 12½ lbs.

Chance Telefaults

A compact instrument that will exactly locate shorts of all kinds, damp spots, crosses, grounds, split pairs — in fact every kind of cable trouble except "opens."

Very easy to operate — uses only one dry cell battery (Battery not included).

Because of the inductive field created it does not "noise" up other pairs.

With the instrument connected, the exploring coil is moved along the cable until a point is reached where the woodpecker tapping tone cannot be heard in the earphone, which indicates the exact location of the fault. The woodpecker tapping tone is very distinct and cannot be confused with other inductive noises. Maximum voltage under 5 volts.

Expertly constructed of finest material obtainable for the purpose. Hardwood, nicely finished. Size: 4 x 7¾ x 10-in.

No.	Description	Each
L	Telefault, complete with Coil, Cord and Receiver: Weight 15 lbs.	\$86.00
	Extra Exploring Coil only; Wt. 2 lbs.	21.15
	Extra Receiver only; Wt. 2 lbs.	9.25

Chance Teleheight

This handy little instrument will save valuable time in quickly and accurately figuring heights of poles, trees, wires, buildings or other objects. No moving parts. Eliminates guessing.

Used by power companies, municipalities, electrical contractors, telephone and telegraph companies, and railroads.

Highly recommended for appraisal work. Real estate men use them for figuring cubical contents of buildings.

Finest quality materials and workmanship. Complete with leather carrying case. Size: 1 x 2¼ x 5¼-in.

No. CW—Weight Each 1 lb. Each \$13.80

Chance Safety Pole Guards

Protects linemen from shock by preventing the power line pole from touching energized lines when being raised or lowered through them. Safe to remove or replace poles from hot lines up to 45 kv. between phases. Easily assembled and disassembled. Attaches to poles ranging in diameter from 6 to 12-inches.

No.	Length Ft.	Approx. Wt., Lbs.	Each

Chance Hot Line Auxiliary Arm Tool Sets

For Use on 3-Phase Circuits through 15,000 Volts

Contain the essential tools for working straight rural line construction. Fittings are heat treated aluminum, minimizing weight for easier handling

Laminated poles and auxiliary crossarm are of Sitka spruce, tested to withstand 75,000 volts per foot. Durable, weather-proof, canvas tool bags, for sets or individual tools are available. Poles are plastic protected.

Chance Rigid Auxiliary Arms

Specially designed for use as a side arm, but may also be used with wire tongs as a lifting arm. Provides quick, safe changes of insulators, crossarms and installations of new poles.

Attached to pole with fast action safety chain tightener.

Principle fittings are heat treated aluminum alloy. Furnished with automatic latching wire holders. Conductors may be quickly released by unlatching holders with a tie stick.

Arms are fitted with safety brackets on each end, preventing conductors from accidentally slipping off during change-over.

Straight-grained sitka spruce arm is tested to 75,000 volts per foot.

Wire Tong Blocks Clamp and Pole Clevis

Clamp

Clevis

Blocks Clamp. For attaching blocks to wire tong where blocks pull in line with tong.

Pole Clevis. Clamps around vertical wire tongs used to support auxiliary crossarms. For attaching butt of other tongs used as side braces. Heat treated aluminum alloy except for bronze eye screws.

No.	Description	Pole Diam. Inches	Approx. Wt. Lbs.	Each
M4743	Blocks Clamp	1½	2 10	\$10.25
M1728-4	Pole Clevis	2	2 5	15.00
M1728-5	Pole Clevis	2½	2 8	16.75
M1728-6	Pole Clevis	3	2 14	18.25

Chance Wire Tong Saddles

Lightweight aluminum alloy makes saddle and clamp easy to handle. Saddle is fitted with lever operated safety chain tightener for speedy application to poles.

No.	Description	Approx. Wt. Lbs. Oz.	Each
*M4740-3	With 1½" clamp	8 3	\$31.50
M4740-4	With 2" clamp	8 7	34.00
*M4740-5	With 2½" clamp	8 11	36.50
M4740-9	With 3" clamp	8 14	38.75
M4740-10	Without clamp	6 2	23.25
M4741-1	1½" pole clamp only	2 1	9.00
M4741-2	2" pole clamp only	2 5	10.80
M4741-3	2½" pole clamp only	2 9	12.75
M4741-5	3" pole clamp only	2 12	15.60

*Linemen's Preference (LP)—Recommended by Chance Hot Line Tool Demonstrators.

Extension Chain

Extension chain for large poles is easily attached to saddle or auxiliary arm. Tested working load, 2500 pounds. Length 18-in.

No. M1847 Weight 1 lb., 10 oz. Each \$3.85

Cross Arm Type Wire Tong Saddle

For attaching wire tong clamps where it is necessary to mount wire tongs on cross-arms. Clamp attachment swivels. Adjustable.

No.	Wt., Lbs.	Each
M4744	6	\$21.25

**Chance Wire Tong Saddles
Tower Type**

Designed to fit tower legs. Tong clamp swivels in two directions to aid use of wire tongs. Bronze with steel bolts. Clamps, aluminum alloy.

No.	Description	Approx. WL Lbs. Ozs.	Each
M4742	Saddle less clamp	11 4	\$29.00
M4742-1	Saddle and 1½" clamp	13 5	37.50
M4742-2	Saddle and 2" clamp	13 9	40.00
M4742-3	Saddle and 2½" clamp	13 13	43.00
M4742-4	Saddle and 3" clamp	14	45.50

Wire Tong Saddle Fittings

Extension

Clevis

Extension: Provides 4-inch additional clearance for wire tong saddle.

Clevis: For attaching wire tong butt ring to wire tong saddle. Applicable where wire tongs are used as a brace for auxiliary arms.

No.	Description	Approx. WL, Oz.	Each
M4740-6	Extension	12	\$5.75
M4740-14	Clevis	9	7.50

Chance Wire Tong Supports

For attaching wire tongs to poles for lifting and lowering conductors. Secured to poles with safety chain tightener.

Single Lever. Specially designed for use on H-frames or where working space is limited. Loop permits block attachment. Aluminum alloy.

Double Lever. For lifting two wire tongs simultaneously. Generally used on H-frame suspension insulator changes with heavy conductors. Aluminum alloy.

No.	Description	Lift Inches	Working Load, Lbs.	Approx. WL, Lbs.	Each
M4760	Single	20¾	750	9¾	\$40.00
M4760-1	Double	13	*750	15½	43.50

*Per holder.

Slide Type

For attaching wire tongs on hot line jobs where considerable vertical movement of tongs is required. Attaches to pole or tower. Has rings for attaching rope blocks. Binding chains are steel. Seamless steel tubing galvanized. Holder and end fittings are bronze.

No.	Overall Length	Tong Holders	Approx. WL, Lbs.	Each
M1741-1	40 in.	1	23½	\$ 47.25
M1741-2	72 in.	3	35	64.00
M1741-3	76 in.	4	38½	76.00
M1741-4	96 in.	3	39½	76.00
M1741-5	100 in.	4	43	87.00
M1741-6	108 in.	6	51	111.00
M1741-7	{Wire tong holder only}	3		10.75

Chance Rope Snubbing Brackets

For snubbing hand lines or hitching blocks at base of pole. Each ring has 1000 pound working load. Attached with chain tightener.

Heat treated aluminum alloy with high strength steel chain.

No.	Description	Approx. WL	Each
M1846	Bracket and Block Hitch with Chain Tighteners and 36" Chain.....	7 lbs.	\$18.50
M1847	18" Extension Chain for Tightener.....	1 lb. 10 ozs.	3.85

Chance Temporary Grounding Equipment

Designed to furnish extra protection to linemen making repairs on supposedly "cold" lines, overhead or in substations. Prevent injury due to accidental energization of lines while work is in progress.

3-Wire Grounding Set

With Eye Screws

Mounted on Poles

For 3-phase lines. Lightweight, high-strength clamps furnished with duck bills for ease of installation. Pressure type jumper contacts provide high-conductivity connections.

Main line maximum wire size, 4/0 stranded copper or 3/0 A.C.S.R. Jumper maximum wire size, No. 2 ground cable.

No.	Description	Net WL Pounds	Each
G1710-3	Mounted, 1¼" x 6' Laminated Spruce	8½	\$45.50
G1710-5	Eye Screw.....	4½	17.60

Chance Screw Ground Rod

High-conductivity, copper-clad rod.

No.	Rod Diam. Inches	Screw Length Inches	Overall Length	Net WL Pounds	Each
G3370	5/8	14	6'2"	15	\$17.10

Chance Grounding Clamps
Flat Face For Temporary Grounds

Used for attaching cable to ground rod, bus bar, tower leg, or other flat surfaces. Special set screws provide low resistance contact on rusted or painted surfaces.

Copper to Copper Connections

Max. Jumper — 2/0 Flex. Grd. Cable or 4/0 Str. Cu.

No.	Type	Net Wt. Lbs.	Each
G3363-1	Eye Screw	3 1/2	\$8.50
G3363-2	Tee Handle	3 1/2	8.50

Aluminum to Aluminum Connections

G3363-3	Eye Screw	2 1/2	\$8.50
G3363-4	Tee Handle	2 1/2	8.50

Chance Jumper Clamps
For Use Through 5 KV

Polyethylene Insulated

Main Line Sizes:

No. 10 Sol. Cu. to 750 MCM Str. Cu.

Jumper Sizes:

No. 4 to 4/0 cable, 5000 Volt.

Furnished with tough, weather resistant polyethylene plastic handles and caps. This material has high dielectric strength and is less subject to deterioration from aging and weather than crude rubber. Not affected by oil, water, grease, or dirt.

Tested to 15,000 volts before shipment.

Overall length 9-in. Clamps weight 1 pound, 10 ounces each.

Furnished in pairs. Also available with cable completely assembled; prices on application; specify size and length of cable desired for complete assembly and add suffix "A" to catalog number.

Main Line Sizes: No. 10 Sol. Cu. to 750 MCM Str. Cu.

Jumper Sizes: No. 4 to 4/0 cable, 5000 Volt.

No.	Description	Each
G4767-04	2 Clamps for No. 4 Cable.....	\$15.40

G4787-40	For No. 4/0 Cable.....	1.10

Spindle and Nut Only

G4787	Spindle and Nut.....	
-------	----------------------	--

Chance Storm Tools

Pole-Mounted

Universal Type

For emergency work on energized lines during stormy weather. Special insulated skirts protect upper portion of tool from moisture and break up water streams. Designed for attaching Chance universal tools for varied maintenance jobs. Pole is tested to exceed the rate shown below. Also available as a universal tool for attachment to universal pole.

No.	Description	Voltage	Wt., Lbs.	Each
M1761	1 1/4" x 8' Two Insulators....	23 KV	3 1/4	\$16.85
M4455-64	Universal, Two Insulators..	23 KV	1 1/4	11.00

Chance Lever Type Wire Cutters

Lever Type Cutters

Lightweight with heat treated aluminum alloy fittings. Leverage 4 to 1. Blades are forged steel. Poles are laminated hardwood tested to 75,000 volts per foot. Lever pull rod has high dielectric strength.

No.	Pole Size	Cutting Max.	Wt., Lbs.	Each
M1871-4	1 1/4" x 4'	2/0 Weatherproof Sol...	6 1/4	\$28.50
*M1871-6	1 1/4" x 6'	Cu. or 1/0 ACSR	6 3/4	31.00

Coffing Temporary Cross Arms

Model 10-A

Model 10-C

Model 10-A: Constructed for electrical use. Hooks are self-locking and large enough to hold line hose to prevent current arcing. Well seasoned hardwood used for crossarm. Built to stand hard usage.

Model 10-C: Crossarm constructed of seasoned hardwood. This model is designed for changing crossarms on corners. Malleable iron hooks are constructed so either side can be used.

No.	Description	Ship. Wgt., Lbs.	Each
10-A	Temporary Cross Arms.....	30	\$48.50
10-C	Temporary Cross Arms.....	35	44.50
....	Pole Clamp only without crossarm....		16.50

Chance Temporary Distribution Cross Arms

For changing cross arms, insulators or poles on short spans up to and including 4 kv, quickly and without interrupting service.

Secure lines protected with rubber line hose; hold up to six conductors in the clear. Unbalanced load, 150 lbs. Each hook rated at 150 lbs.

Cross arm assembly can be lifted from the mast pole and replaced with Gin Head Adapter, converting the rig to a transformer gin. Maximum load as a gin, 2000 lbs.

No.	Description	Wt. Lbs.	Each
M4800-30	Complete cross arm with mast pole	38	\$109.00
M4800-31	Cross arm only.....		46.50
*C-51	Complete gin assembly.....	25	62.50
C-51-1	Gin head adapter only.....	3 1/4	6.70

*—Lineman's Preference (LP)—recommended by Chance Hot Line Tool Demonstrators.

Chance Positive Grip Clamp Sticks

Made for use on eye screw grounding or tap off clamps. Socket holds eye screw securely, body rests in a groove holding the clamp rigid for easy mounting on the line. When a clamp is picked up, a one-quarter turn locks it in the clamp stick head. Clamp cannot be dislodged accidentally.

Clamp can be mounted on the line and tightened at angles.

Maplac® coated, laminated Sitka spruce poles, tested to 75 kv. per foot for five minutes.

Can be furnished with an extra long head for long eye screw ground clamps. Can also be furnished with a strong rigid splice.

No.	Description	Approx. Wt. Lbs.	Each
G3030-2	1 1/4" x 8' pole, with comb. tool hanger & universal head.....	3 3/4	\$17.60
G3030-3	Same as above with splice.....	5 3/4	23.25
G3030-12	1 1/4" x 8', with long head, comb. tool hanger & universal head...	3 13/16	18.80
G3042-2	Reg. Clamp stick head only....	1 5/16	5.60
G3042-5	Special long clamp stick head..	1	6.80
M4455B	Universal pole head with tool hanger.....	5/8	3.50

Chance Hand Line Hooks

Can be attached any place along the hand line by the two large holes. Long point accommodates most items to be raised or lowered at the pole.

Working load of the hook is 500 pounds.

Weight, 1/2-lb.

No. M1849..... Each \$2.00

Chance Wire-Holding Sticks

Used on or around energized lines for forming, bending, and positioning jumper wires; for holding conductors during splicing operations; for pulling tie wires tight before tying. Many other similar and related applications, and can often be used on jobs usually done by hand. Strong, tool will bend 4/0 ACSR. Gripper has eye. Can handle No. 8 solid copper through 4/0 ACSR.

Maplac® coated laminated pole. Tested to 75 kv. per foot for five minutes. Aluminum and bronze castings. 1 1/2-in. diam.

No.	Length, Ft.	Weight, Lbs.	Each
M1954-6	6 1/4	5 1/2	\$35.75
M1954-8	8 1/4	6 3/4	42.50

Chance Roller Link Sticks

Used to spread and hold conductors aside at mid-span when relocating poles.

Also useful for measuring span clearance to ground. Hook opening, 1 1/4 inches. Will roll over maximum wire size of 605 MCM ACSR. Working load, 1000 pounds.

No.	Description	Approx. Wt.	Each
M4714-4	Complete, 1 1/4" x 4' pole	3 lbs. 12 oz.	\$26.45
M4714-6	Complete, 1 1/4" x 6' pole	4 lbs. 4 oz.	28.50
M4714-1	Head only (for 1 1/4" pole)	1 lb. 14 oz.	15.60

Chance Cum-a-Long Hook

The Cum-a-Long Hook is designed to engage wire grips sometimes used with the Chance Rural Strain Carrier.

Fits in Strain Clamp Socket.

No. M1843-9 Weight 1 lb., 7 oz. Each \$4.10

Chance Suspension Link Stick

Laminated, voltage tested pole with heat treated aluminum alloy hook used for lifting conductors for making suspension insulator changes. Lift adjusts to size of insulator string.

No.	Pole Diam. Inches	Overall Length	Working Load, Lbs.	Weight	Each
M4710-4	2 1/2	6' 4"	2500	12 lbs., 8 oz.	\$44.50

Chance Dead-End Tools and Link Sticks

Rural Strain Carrier

For insulator changes up to 23 kv. on pole or crossarm. Made in two sizes, adjustable to different length insulator strings. Maximum insulator diameter—10". Conductor slack is taken up with removable ratchet handle. Lightweight, aluminum castings—hardwood board.

No.	Take-up Insulator Space	Min. In.	Max. In.	Maximum Work. Load Pounds	Approx. Weight Pounds	Each
M1843-6	4"	17	47	2500	17	\$ 83.00
M1843-7	4"	17	71	2500	21½	89.25

Combination Cradle

Used to support dead end, long suspension and swinging corner insulator units while insulators are replaced. Laminated hardwood cradle poles are nine inches apart, permitting insulators to lie securely between them. Castings are aluminum and bronze.

No.	Overall Length In.	Number of Insulators Single Dead End	Multiple Dead End	WL Lbs.	Each
M1840-4	48	3 to 6	8 to 11	13½	\$43.35
M1840-6	72	5 to 10	11 to 16	19¾	55.65
M1840-8	96	8 to 12	16 to 21	25¼	62.00
M1840-10	120	10 to 12	18 to 23	30¾	70.00
M1840-12	144	12 to 16	20 to 25	35½	75.00

Cradle Carrier

Used with Combination Cradle on a swinging boom for long tower dead ends. When loaded, the cradle cannot be accidentally unlatched. Pole is made of laminated spruce. Castings are bronze and aluminum. Cradle can be used up through 330 kv. Furnished with clevis to attach boom pole.

No.	Hook Openings, In.	Wt., Lbs.
M1950-8	1¾	18

Price on application

Single-String Dead-End Insulator Tool

Used on wood crossarms or tower arm dead-ends on H-frames or vertical construction. Mounting brackets are not required. The carrier is chained or roped to the structure. The strain is taken up by a removable ratchet jack or crescent wrench. Self-locking latch holds the conductor in place in the bronze pulling shoe.

With Spruce Poles

No.	Length Between Yokes, Inches Max.	Min.	Inside Width, In.	Take-up In.	*Working Strength	Approx. Wt., Lbs.	Each
M2943-6	75	26	16	7½	7000	42	\$210.00

**Linemen's Preference (LP)—recommended by Chance Hot Line Demonstrators.

Chance Hot Line Tie Sticks

Tie sticks for quick, easy installation and removal of all types of ties are available as single tools, in combinations of two heads on one pole, or with tie wire heads on one end and, a Universal fitting on the other. With Universal heads, other line tools may be attached to provide two tools in one. Poles are plastic protected. Single tools have plastic cap on opposite end of pole.

Rotary Blade, a new development with swivel action that permits greater freedom of movement than the fixed blade type.

3-Prong, for handling hot ties with loops. Third prong is a short, stubby finger for making short bends in tie wire.

2-Prong, provides additional clearance between prongs.

Fixed Blade, particularly suited for undoing close ties that do not have looped ends. Sharp, notched blades pry tight ties loose.

Rotary Prong, permits greater maneuverability than fixed prong for handling looped ties.

Chance Universal Poles

For attaching a variety of universal tools used on hot line jobs. Poles are laminated spruce, covered with Chance Maplac plastic and tested to 75,000 volts. Made as full length poles with rigid splices or with hinged splices and with universal fittings on one or both ends. The hinged splice has an automatic lock which is released by spring buttons. Single tools have plastic cap on opposite end of pole.

Hinged		No.	Description	Pole Diam., In.	Pole Length	Weight	Each

*Linemen's Preference (LP)—Recommended by Chance Hot Line Tool Demonstrators.

Chance Universal Tools
For Use with Chance Universal Poles

Rotary Prong Heads

Prongs swivel freely, permitting a full turn on the tie wire without releasing contact.

*No. M4455-69—Wt. 6 oz.....Each \$6.50

Rotary Blade Heads

Wire is wrapped or unwrapped without turning universal pole. A V-notched carbon steel blade grasps tie wire securely.

*No. M4455-70—Wt. 6 oz.....Each \$8.00

Adjustable Insulator Forks

Designed to grasp 8 and 10-in. disk type insulators used in dead end construction. It will raise most pin type insulators up to 15 lbs. Fiber jaws are opened and closed by rotating spline screw.

*No. M4455-67—Wt. 1 lb., 11 oz. Each \$18.00

Self Aligning Shepherd Hooks

For pulling and lifting insulator strings. Swivel action permits it to rotate and maintain its alignment with the insulator at all times.

*No. M4455-39—Wt. 14 oz.....Each \$7.50

Ball Socket Adjusters

Useful in controlling the adapter between clevis clamps and ball and socket insulator pins. Chisel point for spreading cotter keys.

*No. M4455-22—Wt. 9 oz.....Each \$2.75

Bolt Holders

For replacing pins and bolts up to 5/8-in. diameter.

*No. M4455-2—Wt. 10 oz.....Each \$6.75

Cotter Key Installing Tools

Used for replacing cotter keys in insulator fittings or in fittings which are out of reach of linemen or near energized lines. Spring gripping jaw traps cotter key on tool, making installation easy.

*No. M4455-18—Wt. 3 oz.....Each \$3.75

Snapout Cotter Key Removers

Hammer-like action makes it extremely useful in pulling out stuck cotter keys. Release of the compression spring by a quick jerk of the pole deals the cotter key a hammer blow without disengaging the eye.

*No. M4455-12—Wt. 8 oz.....Each \$5.50

Snap Out Disconnects

Impart a hammer blow to the pulling ring of a cutout door or disconnect switch. Release of the compression spring by a downward jerk of pole gives momentum to the blow, permitting operation in a confined area.

No. M4455-13—Wt. 8 oz.....Each \$6.25

*—Lineman's Preference (LP)—recommended by Chance Hot Line Tool Demonstrators.

Chance Insulated Hand Tools
Poles Tested to 75,000 Volts per Foot
Flexible Wrenches

The flexibility of these wrenches permits application of nuts on hardware at varied angles. They may be provided with or without ratchet handle. Socket plugs are 1/2" square. Pole diameter, 1 1/2 inches.

All Angle Cog Wrench

Adjusts nuts easily in any position. Thumb lever on side of pole controls the position of the head until socket is fitted over the nut to be tightened. A cog wheel arrangement permits tightening nut at any position within 140° angle by simply turning the pole. Pole is laminated spruce. Cogs are case hardened steel. Wrench fits any standard socket with 1/2" square recess.

No.	Description	Approx. Wt.	Each

*M1892-1	Mounted on 1 1/2" x 6' pole	2 lbs., 14 oz..	36.25

Amertong

For Weston Model 633 Ammeter

For holding and manipulating ammeter when taking readings on or near energized conductors where insulation is necessary or for reaching inaccessible points. Holds ammeter at 120° angle for easy reading. May be converted to fit other ammeters. Laminated spruce pole. Plastic control rod has high dielectric strength.

No.	Pole Size	Weight	Each

Chance Insulated Hand Tools
Poles Tested to 75,000 Volts per Foot
Grip-all Clamp Sticks

Straight Pole

Hinged Pole

For applying tap clamps, grounding clamps, grounding sets and suspension cutouts to conductors. The jaws are opened and closed by sliding the hand grip. Clamps may be pulled down into the barrel for control in hanging clamp on the line.

Locking screw holds jaws in any position. A safety latch prevents accidental dropping of the load. The pole and operating rod are of specially selected hardwood. The 12" fiber sleeve has high dielectric strength. Fittings are heat treated aluminum alloy except for bronze locking screws, safety latch, and jaws. Poles tested to 75,000 volts per foot. Plastic protected.

Hinged. Folds to half its length for easy transportation. Held securely in open position by two spring buttons, operates in the same manner as the regular Grip-all clamp stick.

Adams Winch Rope Winder

This is a positive drive, level winding device for use on power winches to distribute the coils of line evenly onto the drum. This increases the capacity of the drum, makes possible smoother, steadier pulls, makes accurate alignment of the truck with the pull unnecessary and prevents the line from cutting down through the lower coils with the resulting damage to the line and difficulty in unwinding.

Ruggedly constructed of highest grade materials, accurately machined for long, smooth and satisfactory operation.

This rope winder can be installed on A. T. & T. type winches already in service, as illustrated above.

For other installations consult Graybar. Wt. each 255 lbs. No. C. H. Winch Rope Winder.

Prices on Application

Adams Winches and Power Take-Offs

The A. T. & T. Type equipment includes all the latest changes dictated by up-to-date operation in every section of the country.

Double Drum Winch and Power Take-Off Assembly

Winch and power take-off integrally mounted and complete with sprockets, idlers, chains and spacers—ready for mounting on chassis. It is engineered and designed to eliminate costly mounting expenses and installation costs. (Available with adjustable mounting brackets which permit rapid adjustment of the power take-off of truck propeller shaft). Single drum winch and power take-off package unit assembly is also available.

Single Door Package Assembly.

Double Door Package Assembly.

Single Drum Winch

Double Drum Winch

These winches are standard for either 86 or 90 in. body widths. Drum diameter 8 in., flanges 19 in. diameter. Single drum has a flange dividing the drum into 6 in. and 16 in. sections. Double drums are 6 in. and 16 in. between flanges. (Special Drum Widths available).

No.	Description	Wt., Lbs.
L6-16-DE	Single Drum Winch	573
L16D-KE	Double Drum Winch	834

Prices on Application

Adams Collapsible Power Reels

For winding and stringing small diameter cable and wire quickly and easily.

Due to its construction and light weight one man can mount the reel on an extended winch shaft and manage its operation.

CR Reel

A half-turn of locking handle collapses outer rim segments, reduces diameter and allows wire to be slipped on or off reel.

All parts are precision machined to insure easy and trouble-free operation. Box section, reinforced edges of rim segments, fixed spider, yokes and segments are heat-treated aluminum alloy.

Handle and sliding spider are cast steel. Spindle and shaft seamless carbon steel tubing.

Reel dimensions: Inside, 20-in.; expanded, 28-in.;

collapsed, 18 3/4-in. Winch shaft 2 1/16-in. diameter. Finish — Red.

No. CR — Weight each 70 lbs.

Prices on application

Adams Adaloy Winches

No. M-18-BS

Designed to safely handle a working load of 18,000 pounds, and have many exclusive features to assure longer service, with minimum maintenance cost.

The large braking surface, positive clutch action, flush-type cable clamp and the exclusive oil-cooled automatic fast operating safety worm brake make these the outstanding winches for all kinds of general work.

The large pitch worm and gear absorb shock and heavy loads. Cast steel drum. Rugged overall construction with easy interchangeability of parts.

Dimensions: Drum 6-in. diameter; flange, 14-in. diameter; length overall 67-in.

No.	Description
M-18-BS	*With Band Brake.
M-18-DS	With Double Action Drag Brake, preloaded for more even braking (approximately 450 pounds).
M-18-BE	*Band Brake type with extended Shaft for Bayonet Type Niggerhead or Collapsible Power Reel.
M-18-DE	Drag Brake Type with extended Shaft for Bayonet Type Niggerhead or Collapsible Power Reel (approximately 510 pounds).

Winches equipped with oilless trouble-free bearings in the drum are also available. When ordering designate as "O" type.

*Band Brake feature provides 20% more braking area than other comparable makes.

Prices on application

**Adams Light Cable Reel Trailers
or
Pole and/or Cargo Trailer (Optional)**

This trailer can be quickly and easily converted from a Cable Reel Trailer to a Pole Carrying and/or Cargo Carrying Trailer by adding optional items: Crossbar and Pole Seat Assembly, and/or Quick Removable Body.

Capacity: 2000 lbs. with 7.00 x 15 (6 ply) Tires (Standard)
4000 lbs. with 7.50 x 16 (8 ply) Tires (Optional)

Maximum Capacity: Up to 6000 lbs. with larger tires (Optional)

Reel Capacity Width: Up to 38 in. (Standard)
Up to 48 in. (Optional)

Maximum: Up to 58 in. (Optional)

Reel Capacity Diameter: Up to 60 in. (Standard)
Maximum: Up to 67 in. with Spacer (Optional)

Track: 56 in.—Trailer made for 38 in. Reel
66 in.—Trailer made for 48 in. Reel
76 in.—Trailer made for 58 in. Reel

Model: SRC-1 (2000 lb. capacity)
SRC-2 (4000 lb. capacity)
SRC-3 (6000 lb. capacity)

Prices on Application.

Adams Pole and Anchor Hole Diggers

For digging holes up to 20 in. diameter to a depth of 9 ft. either vertical or at an angle, and can be maneuvered for digging on hills, in gullies or other rough terrain.

Can be operated by regular line crew from any line truck carrying pole derricks.

Operator has complete control of auger speed, direction and depth. Hand control lever with five operating positions in a 180°

arc permits operator to work from the most desirable position.

Has 8 hp. engine mounting assembly which clamps on truck bed — easily removed — no power take-off needed. Power is transmitted through automatic clutch providing automatic overload control — engine will not stall if auger strikes obstruction (therefore no shear pins to replace). Nor does auger flight start to rotate until operator brings engine up to predetermined operating speed.

All steel construction, with castings of electric furnace steel. Finest material and workmanship.

Uses 9, 12, 16 or 20 inch augers and digs holes up to 9 feet deep at distances to 15 feet from truck. (Augers not included.) Shipping weight approximately 525 pounds.

No.	Description
P. E.	Digger, including Transmission, Flexible Drive Shaft, Engine Mounting Assembly and Torque Arm, less Auger Flight.

Adams Take-Offs

Single Power Take-Off

Double Power Take-Off

Have split propeller shaft, and are made for single or double drive applications. Main drive shafts of the standard take-off have 1 1/4-in. — 10 splined ends, although a heavy duty unit is available having shafts with a 1 3/8 in. — 10 spline.

No.	Description	Wt. Lbs.
LP	Single Power Take Off	152
LP2	Double Power Take Off	183

Note—When ordering, give name of truck, model and year for which winch, side take-off or split take-off is wanted. For additional information contact Graybar.

Prices on Application.

Adams Hydraulic Loading Cable Reel Trailers

Reels weighing up to 12000 lbs. can be quickly and easily loaded and unloaded safely, by one man, without the use of a winch or truck.

Cantilever spring provided on each wheel keeps road shock at a minimum. Also provided with independent wheel suspension which is recognized as the finest method for safe easy riding.

Shipping weight: Approximately 3800 lbs.

Model: HRC.

Prices on Application.

General Machine Collapsible Power Reels

Type CR

For rewinding and stringing small diameter wire or cable; mount on the extending winch shaft of line construction tracks.

Wire easily mounted or removed by a half-twist locking member on end of shaft, collapsing the movable segments.

Fixed spider, yokes and segments are heat-treated aluminum alloy for lightness.

No. 176-A-80—Wt. 62 lbs. Price on application

Premax Embossed Aluminum Letters and Figures

Made of 99% pure aluminum rolled especially for this purpose, will neither rust, tarnish nor corrode. Plain finish. Smooth letters and figures do not catch or hold dirt. Standard package, 100 per carton.

Size, In.	Type	Size, In.	Type
1/2	Roman	2	Roman
3/4	Roman	3	Roman
1	Roman	4	Roman
1 1/2	Roman	6	Roman
1 1/2	Gothic (Figures only)

Escutcheon Pins and Nails

Size, In.	Description	No. Per Lb.
1	No. 15 Galvanized Steel	700
1	No. 15 Brass	700

National Poles

No more than two incising heads touch the pole at any one time. Action is thorough, but not damaging.

“Wood Engineered Incising”

National’s exclusive incising method insures uniform penetration of preservative in a band 1-ft. above and 2-ft. below the critical ground line where rot is most likely to strike. “Wood-engineered” knives cut, rather than crush, the wood cells, with incisions spaced at regular intervals. Famous “Super Cedar,” is incised full length, then pressure treated with creosote, giving one of the most lasting poles known.

Quality Controlled Treating

National Pole is a pioneer in butt treatment, starting about 1914, and pressure treatment, starting about 1920. Its mechanical facilities are complete at both plants. Pressure and open tank creosote and full length open tank Penta treatment is available for National customers. All treating operations are supervised by a graduate chemist and a graduate timber pathologist. Temperature, pressure and duration of each treatment is carefully controlled by scientific instruments. Complete records are kept, insuring consistency, from one cycle to another.

National Pole maintains at its concentrating yards, trained workmen who, for a small extra charge, roof, gain and stain poles to specifications.

Pressure Treated Cedar and Fir Poles

Full Length, Incised, Pressure Treated

“Super Cedar”

Butt Treated Cedar and Fir Poles

Full Length Open Tank Penta Treatment

Specifications, prices and full information will be furnished on application to your nearby Graybar Company office.

Full length treatment is given in pressure retorts, equipped to give any standard type of creosote treatment.

Poles receiving open tank butt treatment at the Minnesota Transfer Plant. Nine carloads can be treated simultaneously.

All poles comply with A. S. A. current standard specifications, and all treatments comply fully with American Wood Preservers Association Specifications.

International Creosoted Pine Poles

Specifications for Southern Pine Poles

(Continued)

Knots” and “Defective Butts”; Nails, spikes, and other metal not specifically authorized by the purchaser.

2.3—Permitted Defects

2.3.1. Sap Stain. Sap stain that is not accompanied by softening or other disintegration (decay) of the wood is permitted.

2.3.2. Firm Red Heart. Firm red heart not accompanied by softening or other disintegration (decay) of the wood is permitted.

2.3.3. Spiral Grain. Spiral grain (twist grain) is permitted as follows:

Length of pole	Maximum Twist of Grain Permitted
30 feet and shorter	1 complete twist in any 10 feet.
35 feet to 45 feet, incl.	1 complete twist in any 16 feet.
50 feet and longer	1 complete twist in any 20 feet.

2.3.4. Hollow Pith Centers. Hollow pith centers in the tops or butts are permitted.

2.4—Limited Defects

2.4.1. Checks and Splits in Butts. Through-checks or splits in the butt surface are permitted, provided that their height from the butt along the side surface does not exceed 2 feet.

2.4.2. Shakes. Shakes in the butt surface extending through an arc of not more than 90 degrees are permitted. Shakes extending through an arc of more than 90 degrees are permitted when they are inside of a circle the center of which corresponds to the center of the butt surface and the diameter of which is not greater than one-half the average butt diameter.

Shakes in the top surface are permitted in poles that are to be given full-length treatment provided that the width of the shake does not exceed 1/16 inch and provided that the diameter of the shake is not greater than one-half the diameter of the top of the pole.

2.4.3. Insect Damage. Insect damage consisting of holes 1/16 inch or less in diameter, or surface scoring or channeling are permitted. All other forms of insect damage are prohibited.

2.4.4. Knots. The diameter of any single knot or the sum of the diameters of all knots in any 1-foot section shall not exceed the limits set up in the following table. Knots 1/2-inch or less in diameter shall be ignored in applying the limitations for the sum of diameters.

Limitations of Knot Size

Length of Pole (Feet)	Maximum Sizes Permitted		
	Diameter of Any Single Knot (Inches) Classes	4 to 10	Sum of Diameters of All Knots in Any One-Foot Section (Inches)
45 and shorter.....	1 to 3 4	3	8
50 and longer.....	5	5	10

2.4.4.1. Dead Knots. Decay is permitted in knots provided it is not associated with heart rot.

2.4.5. Scars. No pole shall have a scar or turpentine face (southern pine) located within 2 feet of the ground line. Turpentine scars need be trimmed only to the extent necessary to examine for evidence of fungus infection and insect damage. Other sound scars are permitted elsewhere on the pole surface, provided they are smoothly trimmed and do not interfere with the cutting of any grain, and provided: (a) That the circumference at any point on trimmed surfaces located between the butt and 2 feet below the ground line is not less than the minimum circumference specified at 6 feet from the butt for the class and length of the pole; and (b) That the depth of the trimmed scar is not more than 2 inches, if the diameter is 10 inches or less, or one-fifth of the pole diameter at the location of the scar if such diameter is more than 10 inches.

2.4.6. Dead Streaks. Sound dead streaks, not wider than one-fourth of the circumference of the pole at the point of measurement, are permitted.

2.4.7. Compression Wood. The outer 1-inch of all poles shall be free from compression wood.

2.4.8. Defective Butts. Hollowing in the butt caused by “splinter pulling” in felling the tree is permitted, provided that the area of such a hollow is less than 10 percent of the butt area.

2.4.9. Shape. Poles shall be free from short crooks. A pole may have sweep subject to the following limitations:

(a) Where sweep is in one plane and one direction only, a straight line joining the surface of the pole at the ground line and the edge of the pole at the top shall not be distant from the surface of the pole at any point by more than 1 inch for each 6 feet of length between those points. (See Diagram 1 of subsidiary drawing entitled “Measurement of Sweep and Short Crook in Poles”).

(Continued on following page.)

International Creosoted Pine Poles

Specifications for Southern Pine Poles

(Continued)

(b) Where sweep is in two planes (double sweep), or in two directions in one plane (reverse sweep), a straight line connecting the mid-point at the ground line with the mid-point at the top shall not at any intermediate point pass through the surface of the pole. (See Diagram 2 of subsidiary drawing entitled "Measurement of Sweep and Short Crook in Poles").

3.—Pole Dimensions

3.1 Length. Poles less than 50 feet in length shall be not more than 3 inches shorter or 6 inches longer than the nominal length. Poles 50 feet or more in length shall be not more than 6 inches shorter or 12 inches longer than the nominal length.

Length shall be measured between the extreme ends of the pole.

3.2 Circumference. The minimum circumferences at 6 feet from the butt (except for Classes 8, 9 and 10) and at the top, for each length and class of pole, are listed in the tables of dimensions. The circumference at 6 feet from the butt of poles in Classes 1 to 7, inclusive, shall be not more than 7 inches larger than the specified minimum.

The top dimensional requirement shall apply at a point corresponding to the minimum length permitted for the pole.

3.3 Classification. The true circumference class shall be determined as follows:

Measure the circumference at 6 feet from the butt. This dimension shall determine the true class of the pole, provided that its top (measured at the minimum length point) is large enough. Otherwise the circumference at the top will determine the true class, provided that the circumference at 6 feet from the butt does not exceed the specified minimum by more than 7 inches.

*The figures in this column are intended solely for use whenever a definition of ground line is necessary in order to apply specification requirements relating to scars, straightness, etc.

▲ No butt requirements on Classes 8, 9, and 10.

4.—Manufacturing Requirements

4.1 Bark Removal. Outer bark shall be completely removed from all poles.

On all poles no patch of inner bark more than 1 inch wide shall be left on the pole surface between the butt and 2 feet below the ground line.

No patch of inner bark larger than 1 inch wide and 6 inches long shall be left on the pole surface between the top and 2 feet below the ground line.

4.2 Sawing. All poles shall be neatly sawed at the top (unless otherwise ordered) and at the butt along a plane which shall not be out of square of the axis of the pole by more than 2 inches per foot of diameter of the sawed surface. Bevelling at the edge of the sawed butt surface not more than one-twelfth of the butt diameter in width, or an equivalent area unsymmetrically located, is permitted.

4.3 Trimming. Completely overgrown knots rising more than one inch above the pole surface, branch stubs, and partially overgrown knots shall be trimmed close. Completely overgrown knots less than 1 inch high need not be trimmed. Trimming may be done by shaving machine or by hand.

4.4 Framing. All poles shall be roofed, gained, and bored in accordance with the terms of the purchase order before treatment.

All gains (mortise or slab type) shall be cut on the face of the pole; and the gained surfaces shall be in approximately parallel planes.

5.—Storage and Handling

5.1 Storage. When it is necessary to hold poles in storage, they shall be stacked on treated skids of such dimensions and so arranged as to support the poles without producing noticeable distortion of any of them. The height of the piles shall be limited so as to avoid damage to poles on the bottom layers.

Poles shall be piled and supported in such a manner that all poles are at least 1 foot above the general ground level and any vegetation growing thereon.

No decayed or decaying wood shall be permitted to remain underneath stored poles.

5.2 Handling. Treated poles shall not be dragged along the ground. Cant hooks, pole tongs, or other tools shall not be applied to the ground line section of any pole.

6.—Definition of Terms

The following definitions shall apply in these specifications:

6.1 Check. A check is a separation of the wood along the grain, the greater part of which occurs across the rings of annual growth.

A through check extends from surface to surface of the pole, usually through the pith center.

6.2 Compression Wood. Compression wood is abnormal wood that often forms on the lower side of branches and inclined trunks of coniferous trees. Compression wood is:

(a) Characterized by relatively wide annual rings, usually eccentric;

(b) Has a relatively high proportion of summerwood (frequently more than 50 per cent of the width of the annual rings in which it occurs);

(c) Exhibits but little contrast in color between springwood and summerwood; and

(d) Shrinks excessively lengthwise as compared with normal wood.

6.3 Cross-break (Crack). A cross-break is a separation of the wood cells across the grain. Such breaks may be due to internal strains resulting from unequal longitudinal shrinkage or to external forces.

6.4 Dead Knot. A dead knot is a knot left by a branch that dies before the tree is cut. An encased knot is a dead knot in which the growth layers are not intergrown with those of the surrounding wood. Dead knots may contain soft fibers (decay) that usually do not extend deeper than an inch or two from the pole surface. They are distinct from rotten or decayed knots in which the loose or soft fibers (decay) may extend the full length of the knot into the pole, and which are frequently associated with heart rot.

(Continued on following page.)

International Creosoted Pine Poles Specifications for Southern Pine Poles (Concluded)

6.5. **Dead Streak.** A dead streak is any portion of the sapwood in which the life processes had ended prior to the cutting of the tree. A dead streak starts from the butt and differs from a wound, such as a cat face or scar, where the growth of new wood shows that life processes are still acting to repair the injured part.

6.6. **Decay.** Decay is the disintegration of wood substance due to the action of wood-destroying fungi. Rot and dote mean the same as decay.

6.7. **Face of Pole.** The face of a pole is the concave side, or the side of greatest curvature in poles having reverse or double sweep, between the ground line and top.

6.8. **Ground Line Section.** The ground line section is that portion of a pole between 1 foot above and 2 feet below the ground line as defined in the pole dimension tables.

6.9. **Hollow Heart.** A hollow heart is a hollow in the heartwood of a living tree caused by insects or fungi.

6.10. **Hollow Pith Center.** A hollow pith center is a small hole at the pith center of the trunk or of a knot, caused by disintegration of the pith (small soft core occurring in the structural center of a tree or branch).

6.11. **Insect Damage.** Insect damage is the result of boring in the pole by insects or insect larvae. Scoring or channeling of the pole surface is not classed as insect damage.

6.12. **Knot Diameter.** A knot diameter is the diameter of a knot on the surface of the pole measured in a direction at right angles to the lengthwise axis of the pole.

6.13. **Red Heart.** Red heart is caused by a fungus, *Fomes pini*, that occurs in the living tree. It is characterized in the early stages of infection by a reddish or brownish color in the heartwood. This is known as "firm red heart." Later the wood, in the case of the living tree, disintegrates (decays) in small, usually distinct, areas that develop into white-line pockets.

6.14. **Sap Stain.** Sap stain is a discoloration of the sapwood caused by the action of certain molds and fungi that is not accompanied by softening or other disintegration of the wood.

6.15. **Scar (Cat Face).** A scar is a depression in the surface of the pole resulting from a wound where healing has not re-established the normal cross section of the pole.

6.16. **Shake.** A shake is a separation along the grain, the greater part of which occurs between the rings of annual growth.

6.17. **Short Crook.** A short crook is a localized deviation from straightness which, within any section 5 feet or less in length, is more than one-half the mean diameter of the crooked section. (See Diagram 3 of the subsidiary drawing entitled "Measurement or Sweep and Short Crook in Poles.")

6.18. **Spiral Grain (Twist Grain).** Spiral grain is a type of growth in which the fibers take a spiral course about the bole of a tree instead of the normal vertical course. The spiral may extend right-handed or left-handed around the tree trunk. The amount of spiral grain in a pole is measured as the distance in feet, along the axis of the pole, in which one complete twist of the spiral occurs, and is expressed as, for example, 1 in 10.

6.19. **Split.** A split is a lengthwise separation of the wood due to the tearing apart of the wood cells, extending from surface to surface of the pole.

6.20. **Sweep.** Sweep is the deviation of a pole from straightness. (See Diagrams 1 and 2 of the subsidiary drawing entitled "Measurement of Sweep and Short Crook in Poles.")

7.—Subsidiary Drawing

The following drawing is subsidiary to the text of these specifications:

"Measurement or Sweep and Short Crook in Poles."

8.—Subsidiary Standard

The foregoing dimension table is subsidiary to the text of these specifications: It is designated as: American Standard Dimensions of Creosoted Southern Pine Poles (05.1-1948).

International Creosoted Pine Poles

Stacks Such as Here Shown on One of International's Conditioning Yards Make Possible Our Quick Shipment of Quality Creosoted Pine Poles

Top Dimension Poles

Top dimension poles conform in all respects to American Standards Association Specification poles, with the sole difference that top diameter poles specify minimum top diameter only; whereas A.S.A. Specification poles specify both minimum top circumference and circumference six feet from the butt.

Length Feet	Top Diameter in Inches*

*Note: Top diameter is determined by placing a tape around the circumference of the pole at the base of the roof.

What an Order Should Show

To avoid delays and prevent the possibility of error, an inquiry or an order for International poles should contain the following information:

- 1—Name of consignee.
- 2—Destination of shipment.
- 3—Date shipment is desired.
- 4—Number of poles required.
- 5—Length and minimum top diameter.
- 6—Number of pounds of creosote required per cubic foot of wood.
- 7—Type of framing desired. A blue print or sketch is preferable. Poles can be framed more economically at a treating plant than in the field at point of installation. Insofar as possible therefore complete framing instructions are desirable.

International Creosoted Pine Poles
Measurement of Sweep and Short Crook in Poles

Diagram 1—Measurement of Sweep in One Plane and One Direction

Diagram 2—Measurement of Sweep in 2 Planes (Double Sweep) or in 2 Directions in One Plane (Reverse Sweep)

Note: Diagram No. 2 applies to the measurement of double sweep in Western Red Cedar and Southern Pine Poles.

For measurement of double sweep in Northern White Cedar and Chestnut Poles, see text.

Diagram 3—Measurement of Short Crook (Three Cases Shown)

Case 1—Where the Reference Axes are Approximately Parallel

Case 2—Where Axes of Sections above and below the Crook Coincide or are Practically Coincident

Case 3—Where Axis of Section above Short Crook is not Parallel or Coincident with Axis below the Crook

Note: The three cases shown under diagram 3 are typical and are intended to establish the principle of measuring

short crooks. There may be other cases not exactly like those illustrated.

International Pine Poles have the Straightness and Symmetry of a Machined Product

International Creosoted Pine Poles

*Specification for the Preservative Treatment of Southern Yellow Pine Poles

Ruiping Empty Cell Process

*Note: A descriptive specification only. It must be recognized that specifications do not guarantee quality, and should not be regarded as adequate protection to the buyer. In any treated wood, the all important factor is the source of supply.

General

The following specification is intended to obtain an empty cell treatment for the poles; and if the material to be treated is in a different condition as to moisture and seasoning, material for each retort charge shall be selected as to condition of moisture so that there will be no great difference in degree of seasoning in any one charge. Only perfectly sound poles shall be treated. The treating plant shall be equipped with indicating and recording gauges and other necessary apparatus for accurately observing and recording the treating process. Above the level of the creosoting cylinder there shall be an overhead drum for the purpose of determining that the cylinder is full of preservative and free from air and the gauge reading indicating a full cylinder shall not be taken until the preservative is seen to overflow through the valve on top of this drum; there shall also be a sap drum below the level of the cylinder by means of which sap and condensation shall be removed regularly. The treating plant must have all the necessary chemicals, a laboratory and laboratory apparatus to enable the quality of preservative to be determined.

Seasoning

Air-Seasoning

In air-seasoning, the poles shall be stacked in such a manner as to provide free air circulation and minimum contact between individual pieces in each stack. These stacks shall be placed on treated or otherwise permanent skids at least six inches above the ground on a well drained storage yard free from vegetation and decaying wood, so located that prevailing winds strike it freely, and each layer shall be separated by creosoted strips. Alleys between the stacks shall be wide, continuous and straight. The material shall remain until in the judgment of the inspector it is sufficiently seasoned to obtain the maximum benefit from the treatment.

Seasoning By Steam

When time for air-seasoning is not available, steam seasoning shall be used. Live, saturated steam shall be admitted to the treating cylinder taking care that all air is swept from the cylinder before the outlet valve is closed. Pressure shall then be raised gradually to the maximum temperature desired, this maximum being determined by the treating inspector. It should not be less than 251° F., not more than 259° F. The duration of the steaming process is dependent upon the degree of seasoning of the poles in the cylinder charge but shall in no case be carried to such an extent as to injure the timber.

Initial Vacuum

After the steaming process has been completed the steam shall be blown off and the treating cylinder exhausted as quickly as possible to as high a vacuum as possible, which must be at least twenty-four inches at sea level or proportionately less at higher altitudes. This vacuum shall be maintained for at least one hour or for whatever longer period is necessary, so that the wood may be as dry and free from air as practicable. During the exhaustion process the temperature within the treating cylinder shall be maintained by means of steam under pressure in the closed coils. The cylinder shall be relieved of sap and condensation continuously.

Seasoning—Continued

Initial Air Pressure

In the case of air-seasoned poles, Initial Air Pressure is the first step in the treating process. With steam-seasoned poles this step immediately follows the Initial Vacuum.

The poles shall be subjected to air pressure of sufficient intensity and duration (usually 40 lbs. to 100 lbs.) to provide under a quick high vacuum the ejection of surplus preservative, and to insure a retention and proper distribution of the stipulated number of pounds of preservative per cubic foot of wood.

Treatment

The creosote shall be introduced between 170° F. and 210° F., the cylinder pressure being maintained constant until the cylinder is filled. The oil must be seen by the inspector to flow from the overhead drum on top of the treating cylinder, thus assuring him that the cylinder is completely filled with the preservative. The pressure shall then be gradually raised to and maintained at a minimum of 150 lbs. per square inch until there is obtained the largest gross absorption that can be reduced to the stipulated final retention, calculation being based on readings of the working tank gauges and the weight of the creosote at 100° F. The quantity of oil for final retention shall be based on the cubic content of wood in the treating cylinder as determined by actual measurement of the top and butt of each pole in each charge. Under no conditions may shortage of oil in one charge be offset by overage in another; the minimum final retention in each case must be 100 per cent of the quantity of creosote specified.

Final Vacuum

After pressure is completed and the cylinder is emptied of oil a sufficient vacuum shall be promptly created and maintained until the timber can be removed from the cylinder free from dripping oil.

Penetration

The treating processes shall be directed toward complete sapwood penetration with the preservative.

Preservative

For preservative see Creosote Specification:

Note: A final retention of 8, 10 or 12 pounds of creosote per cubic foot is most frequently used. Of these, the 8-pound treatment is specified in the great majority of cases. Nonetheless, 12-pound final retention gives 50% more preservative in the wood at very little extra cost. Important pole lines, costing more all the time to build, merit ample preservation.

For areas that are climatically severe; that is, high humidity or prolonged warm temperatures, or areas of abnormally heavy rainfall, 12-pound creosote final retention is urged. While the 8-pound treatment, even in these areas, gives superb service the small cost of the additional creosote to protect poles and pole lines, whose value is constantly increasing, is an investment in efficiency.

Creosote . . . Pentachlorophenol

Since International began business in 1875 there has been a constant stream of new preservatives entering the wood preserving field. They have been tried for a while—and they almost invariably have been discarded after having been found wanting in some characteristic. International will continue to watch and test new preservatives, but will offer them to the trade only when sure of their value. Meanwhile as to the standard preservatives:

CREOSOTE has stood the test of time and has had such widespread use as to prove its effectiveness under all conditions. It stays well in the wood, whether the service condition is dry area, swamp, or even salt water subject to marine borer attack. International pole lines ten, twenty, thirty years in service still in perfect preservation, attest to creosote's lasting qualities.

PENTACHLOROPHENOL while not nearly as long used as creosote has given a good record since its introduction into the treating industry, and is having growing acceptance.

**Standard Specification for Creosote Oil
American Wood Preservers' Association**

- 1—The oil shall be a distillate of coal-gas tar or coke-oven tar¹.
- 2—It shall not contain more than three per cent of water.
- 3—It shall not contain more than 0.5 per cent of matter insoluble in benzol².
- 4—The specific gravity of the oil at 38° C., compared with water at 15.5° C., shall not be less than 1.03.
- 5—The distillate, based on water-free oil, shall be within the following limits:
Up to 210° C., not more than 5 per cent.
Up to 235° C., not more than 25 per cent.
- 6—The oil shall yield not more than 2 per cent of coke residue.
- 7—The foregoing tests shall be made in accordance with the standard methods of the American Wood-Preservers' Association.
(See Manual—Methods of Analysis.)

¹Owing to the complexity of the chemical composition and physical properties of coal tar creosote, and to the fact that some of the same compounds and properties which characterize coal tar creosote are found in certain petroleum derivatives, the determination of the purity of creosote is difficult. When there is not certain assurance that the creosote is a pure product, the following tests will aid in arriving at an opinion as to its coal tar origin:

A. Fraction distilling between 210° and 235° C. is usually solid or contains some solids when cooled to 25° C.

B. All of the fractions up to 315° C. contain tar acids in varying amounts, usually at least 1%, calculated on the amount of the fraction tested. (See MANUAL-MI.)

C. The specific gravity of the fraction between 235° and 315° C. is usually not lower than 1.025 and specific gravity of the fraction between 315° and 355° is usually not lower than 1.085 at 38° C. compared with water at 15.5° C. However, some pure coal tar distillates fall slightly below these limits.

If the sample does not comply with at least one of the foregoing tests it is undoubtedly not a pure coal tar creosote.

²Samples of creosote taken from working tanks may show increases in matter insoluble in benzol and coke residue due to treating operations. If neither the matter insoluble in benzol, nor the coke residue exceeds the specification limits by more than 1 per cent of the sample, and if it can be shown that the original creosote was of specified quality, the used creosote shall be regarded as conforming to the specification.

Depth of Preservative Penetration

Increment Borer

The increment borer shown here is used for extracting sections of wood from poles to determine how deeply the preservative has penetrated into the wood.

**Standard Specification for Creosote Oil
American Wood Preservers' Association**

Depth of Preservative Penetration—Continued

The use of this instrument is recommended as one means by which the buyer can gauge the quality of the product he receives. It does not damage the pole and the only precaution is that a creosoted wood plug be driven into the hole after the boring has been extracted.

For adequate protection it is essential that the preservative penetrates wood deeply (see discussion on penetration later in this section).

Price for increment borers, on request to Graybar.

Machine Trimming

The surface of all International poles is machine-smoothed over the entire length. These lathe-like turning machines are a modern improvement in the pole industry. Only a light shaving is made to remove the knots and other protuberances. The grading into sizes is done after trimming.

Machine trimming has many advantages. The freshly trimmed surface facilitates seasoning. Unnecessary cutting into the body of the pole by hand trimming or gouging is eliminated. The appearance of the pole is greatly improved and bleeding is further reduced.

**International Creosoted Pine Poles
Characteristics of Quality Pine Poles**

Status of Pine Poles

During the period covering the past several years, more treated pine poles have been used than all other treated poles. The utility company that uses treated pine poles is using the most generally accepted pole of the utility field. Important lines that must stand up under greatest stress and for the longest period of time are well built when built with quality treated pine poles. Every sleet storm brings a further degree of proof of this fact. Knowing the salvage value even of an abandoned line of treated pine poles, the costliness of individual pole failures, and treated pine's comparatively low annual cost, it is difficult to think of any line not sufficiently important to justify their use.

Transmission and Distribution Use

International treated pine poles of long length are being used increasingly in the higher voltage lines that continue to gain favor in power-line construction. Lines carrying 330-K.V. are in the planning stage for International pine poles and such construction undoubtedly will be used in the near future.

Life of Creosoted Pine Poles

Entire lines of creosoted pine poles furnished by our supplier 25 and 30 years ago are still in use with practically no replacements, and are obviously good for many years to come. Estimates have been made by many of the life to expect, and Pennsylvania Electric Association, as the result of a research and study, estimated 35 years. This estimate of longevity seems conservative with so many International creosoted pine lines now approaching that age and still in good condition. The oldest lines still standing, and differences in climatic conditions, make it impossible to forecast definitely just what life to expect from the creosoted pine pole.

**Section of the Chemistry Laboratory
Scientific Control is Essential**

International Creosoted Pine Poles

Characteristics of Quality Pine Poles

(Continued)

Value of Penetration

Uniform Penetration
Is a Criterion of Good
Treatment

Deep Penetration
Means Long Life
For the Poles

Several factors are important, particularly the grade of preservative, but no single factor has such bearing on the life and the quality of treated pine poles as the depth and the uniformity of preservative penetration. Untreated wood of any kind commonly used for poles will decay eventually, and the only preventive is to have the penetration of the preservative deep and uniform and of proper grade. This is accomplished only when skilled technicians analyze the preservative and apply the treating process.

Strength

The standard for ultimate fiber stresses for the commonly used pole woods has been developed by the Sectional Committee on Wood Poles under the sponsorship of the Telephone Group, American Standards Association.

These ultimate fiber stresses quoted verbatim are tabulated below.

Northern White Cedar.....	3600 lbs. per sq. in.
Western Red Cedar.....	5600 lbs. per sq. in.
Chestnut.....	6000 lbs. per sq. in.
Southern Yellow Pine (Creosoted).....	7400 lbs. per sq. in.

Fire Resistance

Fires raging across the dry cane fields of Cuba crack insulators, melt steel, and burn untreated wood to ashes, but creosoted pine poles stand the flames. This is the actual experience. Along railroad right-of-ways fire gangs burn the weeds and it is a matter of common record that untreated posts burn completely while creosoted pine poles are undamaged. Under these severe conditions the creosoted pine pole may take fire and smolder and smoke, but finally the fire smothers itself out, leaving the pole practically undamaged. The action is analogous to a burning oil lamp wherein the wick though it forms the support for the flame is itself consumed very slowly.

Appearance and Cleanliness

Early in the history of the development of creosoted pine poles the question was raised to their use on city streets. It was believed the bleeding of some of the poles might cause trouble if the clothing of pedestrians rubbed against them. Such objections are heard no longer either in protest or propaganda.

International's care in timber selection, the skill of its production and manufacturing forces, and advances in the science of timber treatment have all contributed to overcome these objections and to give to business district and residential area the economy and security of the creosoted pine pole.

Graybar-International poles are in use in the business and residential districts of the largest cities of the United States, and in thousands of the smaller ones.

The present-day pole is clean, smooth, shapely, and stands with the appearance of tapered wrought-iron pipe, rather than of processed trees.

Termites

Termite attacks on poles are attracting more and more attention. Termites are native to the forest, but as the forests become depleted they seek shelter elsewhere and find their way into untreated structural wood. Untreated pole lines have been accused of acting as termite highways by means of which they could fly from pole to pole and then to residences; infesting new areas. Termites have now been found in all but three states of the United States.

Creosoted pine poles are practically immune to termite attack. Checks in the wood may form, but they do not go deep enough to expose untreated interior wood that would afford shelter for termites.

Improved Roof

The illustration shows a new type of pole roof that many of the utility companies are standardizing upon. It is a one-way roof, cut at an angle of 15°. It is to be recommended. The advantages of this roof are:

1. Reduces Checking

A roof cut in this  manner leaves a minimum of wood along the center line, the natural cleavage point of the pole. This invites checking. The one-way roof eliminates this disadvantage.

2. Provides Better Drainage

As the roof of a pole weathers, the springwood rings of any species being softer than the summerwood, weather faster, causing the summer wood to stand out in ridges. On the two-way roof these ridges form retaining cups for rain water while on the one-way roof they drain.

3. Conserves the Preservative

Evaporation is a surface phenomenon. There is less surface on a one-way than on a two-way roof.

Marked Poles

58

Above are the marks by which Graybar-International poles are identified wherever found. A date-brand is on the side ten feet from the butt of the pole; and is supplemented by an identifying brand on the top and the butt of each pole. These marks are positive evidence of our confidence in the quality of the product and the desire to be permanently identified with it.

Beware of unmarked poles. If in a few years they began to fail, the experience is that it is not possible to tie them definitely to the source of supply. On the other hand when a company consistently uses high grade materials and good preservation treatment which result in long-time dependable service, the company willingly and permanently attaches its name to the product.

Rainier Douglas Fir Crossarms

Indispensable characteristics in crossarms are strength and durability. Strength to carry the dead load of conductor, sleet and wind, and to withstand shock within any combination of these two duties that may be imposed upon the arm in service. Durability is as necessary as strength because the arm is intended for many years of service and the cost to replace an arm in the line is many times the price of the arm itself.

Light weight is also important. Lighter arms cost less to transport and install, and place a lighter burden on the pole structures.

Rainier fir crossarms meet all of these requirements. They are carefully graded with strength-reducing defects eliminated and are seasoned to approximately equilibrium moisture content which adds further to the strength. These crossarms are seasoned slowly and so controlled that from the start to the finish of the seasoning process, the moisture content of the interior is substantially the same as the surface of the arm.

Microscopic as well as visible checking is held to a minimum, and the finished arm is sound and solid. It will not readily soak up moisture nor admit decay fungi to the interior of the arm.

The largest factory is at Chehalis, Washington. The finest dry kilns and kiln control equipment are located there. Dry kiln operations are supervised by specialists and experts in the drying of crossarm sizes of Douglas fir. Carload orders are shipped economically from Chehalis to all parts of the United States.

Minimum Carload Weight—Fir from Pacific Coast Mills, 44,000 pounds. Small cars are scarce and a weight of not less than 50,000 pounds should be figured on. Cars to contain as much as 90,000 pounds can be had.

For customers who desire LCL quantities of crossarms, particularly with drillings of non-standard sizes or specially spaced, and to provide immediate delivery of any quantities in emergencies, factories are maintained at Chicago, Minneapolis, Kansas City, Danville, Pa. and Gainesville, Florida. These factories are fully provided with manufacturing equipment and are substantially stocked with crossarm lumber which permits prompt attention to the requirements of users in all parts of the country. Kiln drying at these factories is not economical due to the cost of fuel, but each point carries a reasonable stock of blanks, kiln dried on the West Coast, for customers who ask for kiln dried arms. All these factories have well designed drying sheds with controlled ventilation and are also equipped with precision instruments for checking the character of drying while the lumber is being conditioned. In all of them the highest standards of lumber grading are followed.

Actual use in the line proves that untreated Douglas Fir crossarms have given satisfactory service for over 50 years, and have an average life of 25 to 35 years. With the use of full length pressure treated poles has created a demand for pressure treated crossarms. We can furnish Douglas Fir crossarms incised or unincised, treated with either Pentachlorophenol or Creosote, either pressure, hot and cold dip, or five-minute hot dip.

Rainier Douglas Fir Crossarm Specifications

1.2 Species. These specifications cover crossarms made of Douglas Fir (*Pseudotsuga taxifolia*), air dried or kiln dried, treated or untreated.

1.3 Grades. Two grades are included, namely: *Dense and †Close Grain. Manufacturers may supply a mixture of both grades in any shipment.

1.4 Strength of Both Grades. It is the intent of these specifications to have the quality of both grades so described and limited that a crossarm meeting the minimum requirements for one grade will have equal strength with a crossarm meeting the minimum requirements for the other grade. (Crossarms of both grades having better quality than the minimum limits of these specifications will, of course, have greater strength, depending upon other factors, such as density, straightness of grain and freedom from strength-affecting defects.)

1.5 Cross-Section Limits. These specifications are intended for crossarms having cross sections of not more than four (4) inches on one face by not more than six (6) inches on the other face.

2.1 General. Unless otherwise specified on the purchase order, all crossarms furnished under these specifications shall conform in all respects to the requirements hereinafter stated. The definitions in these specifications and the drawings which will be supplied, supplement the text and all shall be considered as parts of the specifications.

3. Options in these Specifications

3.1 Because these specifications cover crossarms for use throughout the entire United States where usage may be different and exposure to decay and insect damage varies between extremes, it is not logical to limit these specifications to but one grade, dimension, treatment or preservative. Therefore the following options are listed and the selection desired must be specified on the purchase order.

3.11 Grade. If a mixture of both grades is not acceptable to the purchaser, then the grade desired shall be specified, that is, whether dense or close grain.

*Dense Grade formerly was called Dense Select Structural Grade. (Type B).

†Close Grain Grade formerly was called Standard Crossarm Stock (Type A).

(Continued on following Page)

Rainier Douglas Fir Crossarm Specifications

3.12 Dimensions, length, drilling details and allowable tolerances shall be specified. (These details are customarily shown by drawings.)

3.13 A preservative treatment, if required, shall be specified. The options covering preservative treatment are:

- (a) Pressure treatment and retention, namely, 6 or 4 pounds per cubic foot, or
- (b) An open tank hot and cold treatment.

3.14 The preservative to be used (if crossarms are to be given a preservative treatment) shall be specified. (See paragraph 7.4.) Options for preservatives are:

- (a) Creosote,
- (b) Pentachlorophenol, or
- (c) Mixtures of (a) and (b) above.

3.15 If the identifying letters "DF" for Douglas Fir are required on each crossarm, it shall be specified.

3.16 When the purchaser does not wish to have the top center 12 inches of crossarms chamfered or rounded he shall so specify.

4. Grade Conformance

4.1 All close grain grade crossarms shall conform to the limitations listed in Tables I and III. However, if the density of the wood in a crossarm is determined to be in accordance with the requirements of the density rule, as stated in Table II, item 1, the crossarm shall then be considered to be dense and required to meet only the more lenient limitations of Tables I and II. Therefore, the density of the wood shall first be determined prior to further examination.

5. Manufacturing Requirements

5.1 Workmanship. All crossarms shall be of first quality workmanship. Crossarms shall be dressed on four sides, although heavy skips on the bottom and slight skips on one side are permissible. Splintering around holes resulting from bits breaking through shall be kept to a minimum.

5.2 Dimensions and Tolerances. The dimensions and drilling details of crossarms supplied shall conform to specifications or drawings supplied by the purchaser.

5.41 Marking, Treated Crossarms. All treated crossarms shall be legibly and permanently marked or branded with the following information: (a) manufacturer's designation, (b) year of manufacture, and (c) code (as shown below) indicating treatment given. When specified on the purchase order all treated crossarms shall also be legibly and permanently marked or branded with the letters "DF" to indicate Douglas Fir.

(a) Coding. The type of treatment shall be indicated first, "6" or "4" to indicate a pressure treatment with 6 or 4 pounds final retention, respectively; or, "0" to indicate non-pressure "hot and cold" method.

The preservative to be used shall be indicated next, "C" for creosote; "P" for pentachlorophenol. For example, "6C" would indicate a pressure treatment having a final retention of 6 pounds with number 1 creosote. "OP" would indicate "hot and cold" non-pressure treatment with pentachlorophenol.

Other letters as found necessary may be used to indicate other treatments and preservatives.

5.42 Untreated Crossarms. All untreated crossarms shall be legibly and permanently marked or branded with the manufacturer's designation and the year of manufacture.

6. Limitations

6.1 Limitations shall be in accordance with Tables I, II and III as applicable.

7. Preservative Treatment

7.1 Explanation. It seems logical to have crossarms last as long as poles. There is now a definite trend toward full length treatment of all poles, whether southern pine, cedar or miscellaneous conifers. Therefore, to make the normal life expectancy of crossarms the same as poles, it is recommended that all crossarms—particularly for use with full length treated poles—be given a preservative treatment.

The treatment to be given crossarms must be decided upon after consideration is given to the conditions favoring decay and insect damage encountered in the area where the arms are to be used. Since crossarms do not have direct contact with soil, as do poles, the need for heavy retentions of preservative is not so great. The major penetration resulting from any treatment of non-incised fir crossarms will be (1) in the sapwood, (2) longitudinally from the ends and from all drilled holes. Fir crossarms usually have little volume of sapwood. They have many drilled holes which improve ease of penetration of preservative where needed.

7.2 Available Options. The required preservative, treatment and retention—where applicable—shall be specified on the purchase order.

7.3 Treatments. Any treatment giving the results required by paragraph 7.5 and 7.6 is acceptable. The most common acceptable treatments are:

- (a) Pressure treatments with final retentions of 6 or 4 pounds per cubic foot.
- (b) Non-pressure treatments using the "hot and cold" method. It is generally necessary to use a minimum treating time of 2 hours at approximately 230 F and 2 hours at approximately 130 F.

7.4 Preservatives. There are a number of satisfactory preservatives. Those preservatives, acceptable at present are:

- (a) No. 1 creosote, in accordance with Specification P1 of the American Wood-Preservers' Association, except that the residue above 355 C shall be less than 25%.
- (b) 5% solution of pentachlorophenol in a suitable petroleum carrier.
- (c) Mixture of (a) and (b) above. Usually about 15% of creosote is used.

7.5 Penetration. The preservative should penetrate all the sapwood. It shall penetrate longitudinally not less than one and one-half inches from pinholes, bolt holes and from the ends.

7.6 Effects of Treatments, and Cleanliness. The treating method used shall not injure the wood. After treatment, crossarms shall be reasonably clean to the touch and should remain so.

8. Inspection

8.1 Inspection and acceptance shall be made at the place of manufacture, treating plant, or upon delivery. The supplier shall give to the purchaser, or his representative, such access to his works during working hours as is reasonable and necessary to determine the suitability of material to be supplied, and shall furnish all necessary apparatus, labor and other facilities for making the tests herein called for without cost to the purchaser. Inspection by the purchaser's representatives or the waiving of inspection shall not relieve the supplier from obligation to furnish material in accordance with these specifications.

9. Rejection

9.1 All crossarms not in accordance with these specifications shall be rejected.

Rainier Wood Insulator Pin Specifications

Standard

Scope. This specification covers wood pins made of yellow locust (sometimes called black locust from the color of its bark).

General. The specifications and drawings are intended to include all instructions necessary for the guidance of the manufacturer in his work. They are intended to supplement each other and any details indicated in one and not in the other shall be executed the same as if indicated in both.

Dimensions. Pins shall be of the style and dimensions shown, and allowable variations must not be exceeded. Pins and threads shall be smoothly and accurately formed. Figures on the drawing shall be followed in preference to scale measurements.

Seasoning. Pins manufactured from green or partially seasoned wood shall, when seasoned, conform to the requirements of this specification.

Material

Finished pins shall not contain any of the defects listed below, and where any of these defects are present, they shall be cause for rejection.

Annular Rings. Rings which depart from parallelism with the center line of pin by a sufficient amount to allow a ring starting at the center of the bottom of the pin to run out of the side below the lower thread.

Checks. Checks exceeding 3 inches in length or 1/8-inch in width.

Knots. Loose or unsound knots. Sound knots exceeding 1/8 inch in diameter above the shoulder or exceeding 1/4 inch in diameter below the shoulder. The least diameter of a knot shall be considered its diameter for the purpose of this specification.

Loose Heart. Pitch Pockets. Rot.

Sapwood. Sapwood exceeding 1/8 inch in thickness except on the shoulder of the pin.

Shakes. Cracks or splits concentric to the annular rings of the wood.

Wane. Wane or bark above the shoulder.

Worm Holes. In the top 7-inch section of the pin.

Rainier Wood Insulator Bracket Specifications

Bracket

Pole Step

Scope. Specification covers wood brackets made of oak. Brackets shall be free from cracks, shakes, brashy wood and all other imperfections, except as hereinafter specified.

Seasoning. The maximum moisture content of seasoned brackets shall be 20%.

Checks. Presence of checks is permitted provided they do not extend into threaded section of bracket or intersect any nail hole and are not greater than 2 inches in length.

Grain. The grain shall be straight and shall be practically parallel to the axis of the threaded portion of the bracket. The grain at either of the right-angled corners at the end of the bracket shall not run out below the bottom thread of the opposite side of the bracket.

Insect-Holes. In wood otherwise sound, a few small insect holes not exceeding 1/8 inch in diameter may be present, provided that they are scattered and appear only in the portion of the bracket between the turned section and the small nail hole. No more than 5% of the brackets furnished shall contain such insect holes.

Knots. Brackets shall be free from loose or unsound knots. Sound knots are permitted in the turned section of the bracket up to a diameter not greater than 1/4 inch, provided that the distance between 2 knots is not less than 1 inch. Sound knots are also permitted in the portion between the turned section and the small nail hole up to a diameter not greater than 1/2 inch, provided that not more than 3 knots are present in this portion of the bracket and that all such knots are at least 1/4 inch distant from either nail hole.

Sapwood. Brackets may contain sapwood along any edge provided it does not appear on any face to a distance greater than 1/4 inch from the edge.

Rainier Wood Cross Braces

Wood cross braces increase the transverse strength of H-frame structures. Steel fittings are tapped to insure static-free performance and are double-dip hot galvanized. Wood is structural grade Rainier fir.

No.	Size of Wood (Inches)	A	Mtg. Bolt Diam. in.	Wt. Lbs. 100 Pcs.
1000	3 3/8 x 4 3/8	7' to 8' 4"	7/8	11500
		8' 6" to 9' 10"	7/8	12500
		10' to 11' 0"	7/8	13500

		15' 6" to 16' 10"	7/8	25000
		17' to 18' 6"	7/8	27500

Ordering Data: Specify center to center pole spacing and series number on order.

Braces are furnished with all Necessary Mounting Bolts. Unless otherwise specified each set will include two 1/8" x 14" and two 7/8" x 16" bolts.

Rainier "Vee" & "Knee" Braces 2000 Series

The mounting holes for Knee and Vee Braces may be punched for 5/8, 3/4, or 7/8 inch mounting bolts. Specify size of hole and give dimensions S & D when ordering.

Knee and Vee Braces are identical except for angle fitting on one end. Knee Braces fit against side of pole and top of wood filler block. Vee Braces fit against side of pole and side of metal spacer fitting. Mounting bolts for both Knee and Vee Braces are ordered separately as they are not included with the brace assembly.

Pricing on application.

Treated Wood Braces

Unless otherwise specified wooden members of these braces are furnished treated with a pentachlorophenol dip. Other types of treatment are readily available upon request.

Rainier Wood Crossarm Braces

Rainier Transmission Line Fir Crossarms and Timbers

American Crossarm & Conduit Company crossarms for transmission lines are manufactured from carefully graded Douglas Fir timbers.

Douglas Fir is "King of Trees" in the great forests of the Northwest. Douglas Fir grows in dense stands and produces a clear, straight grained heartwood that is materially stronger than the average wood of its weight. Because of its close, tight grain, it is highly resistant to weather in any climate and has the strength and long lasting qualities so vital to a transmission line structure.

Kiln drying and air seasoning operations are scientifically controlled by expert timber engineers, and each piece of wood conditioned for long years of service in the line.

Each of the manufacturing plants of the American Crossarm & Conduit Company is fully equipped for precision manufacture of transmission line crossarms, timbers, and braces.

Complete transmission line crossarm units, manufactured to the customer's own specification, either with or without hardware attached, are available from their plants at Chehalis, Wash.; Kansas City, Mo.; Chicago, Ill.; Minneapolis, Minn.; Danville, Pa.; Gainesville, Florida.

The 50 foot dual member crossarms, together with the cross braces and knee braces for this 230 kv. transmission line, were fabricated, shipped, and serving in the line less than four months after the order was received.

Design engineers may specify different sizes for their structures to suit some special service demands. We are prepared to furnish crossarms, timbers, and braces to meet the engineers' specifications, and your nearby Graybar sales office will gladly supply full and complete data, including treating, stress and loading tables for all sizes and types of transmission timber.

Prices on application.

Soil Classification

As an aid in determining the type and size of anchor best suited for a specific job, classification has been made of anchor holding strengths in different types of soil and under different moisture conditions. Classification of holding power on the basis of soil type alone has been found to be insufficient, not only from the standpoint of soil identification, but also because of variations experienced in the holding power values.

Numerous tests under different moisture conditions and in all types of soil have proven moisture content to be a greater factor than soil composition in determining soil-anchor holding power. The following soil classifications give consideration to both the type of soil and the moisture content, providing a more accurate and easily-recognized means of soil identification.

Class 1. HARD ROCK (solid).

Class 2. SHALE, SANDSTONE, (solid or in adjacent layers).

Class 3. HARD, DRY, (hardpan). Usually found under a Class 4 strata, resembling soft rock. Requires use of digging bar).

Class 4. CRUMBLY, DAMP, (usually clay predominates. Insufficiently moist to pack into a ball when squeezing by hand. Particles crumble off).

Class 5. FIRM, MOIST, (usually clay predominates. Other soils commonly present. When squeezed by hand will form into a firm ball. Most soils in well drained areas will fall into this classification).

Class 6. PLASTIC WET, (usually clay predominates as in Class 5. Due to unfavorable moisture conditions such as areas subjected seasonally to heavy rainfall, sufficient water is present to penetrate the soil to appreciable depth and though the area is fairly well drained, the soil during such seasons becomes plastic and when squeezed will readily assume any shape. This soil is not uncommon in fairly flat terrain).

Class 7. LOOSE, DRY, (found in arid regions; usually sand and gravel predominates. Filled in or built up areas in dry regions fall into this class. As the term implies, there is very little bond to hold the particles together).

LOOSE, WET, (same as Loose, Dry, for holding power. High in sand, gravel, or loam content. Holding power at some seasons good, but during rainy seasons absorbs excessive moisture readily with resultant loss of holding power. Predominant in poorly drained areas. This Class also includes very soft wet clay).

Class 8. SWAMPS and MARSHES (includes areas that are marshes only seasonally).

Moist soils will vary in their classification during the year due to changes in their moisture content. Extreme conditions should be estimated.

Ultimate Holding Strengths

The ultimate soil-anchor holding strengths evaluated on the basis of the preceding soil classifications are the values at which the anchor will start to pull out in the type of soil and under the conditions indicated. Values given in the tables on the following pages are based on tests with anchor rods set at 45° and anchors set 7-feet deep. For lesser depths, values are about 15% less for the first foot and 10% less for the next foot. A safety factor of 2 to 1, or greater, is suggested.

Chance Expanding and Tamping Bars

For use with expanding anchors; the weight of the bar does the work. Also used for tamping-in the dirt above the anchor.

Hook wraps around the anchor rod for guide.

No.	Lgth., Ft.	Wt., Lbs.	*Each
10	10	24	\$15.40
12	12	25	16.85

Chance 8-Way Expanding Anchors

Without Rods

Eight steel blades expand to form a square, distributing the load evenly over the entire anchor area.

There are no non-holding areas between blades.

Base plate causes anchor to expand in a cone shape. Anchor has no hinges or moving parts to hinder its smooth operation. Furnished with nut retainer and coated with special asphalt paint to guard against corrosion.

Chance Never-Creep Plate Anchors

For permanent or temporary guys.

Pull entirely against solid earth, providing holding power independent of tamping of back-filled earth.

Formed of structural steel and dipped in asphalt paint. Steel plate is heavily reinforced in areas of greatest stress.

Creep guards welded to the top of plate prevent creep and aid in guiding rod into the rod sockets.

Never-Creep Anchor Dimensions, Weights and Prices

Fits all Iwan and Standard Auger Blades as well as 3-in. Iwan "Pilot" Blade. Extension holders make length easily adjustable.

No.		Wt., Lbs.	Each
8	For boring hole up to 8 ft. in depth....	19	\$6.50
10	For boring hole up to 10 ft. in depth....	22	6.50

Prices slightly higher West of the Rockies, or in other zones.

Hubbard Steelwing Screw Anchors

Hot Galvanized

Provide quickly installed, permanent anchorage with sufficient holding power for normal pole line work. Easily reclaimed; has no parts to come loose and remain underground. To indicate holding strength, wing diameters are stamped on rod below eye (except Nos. 7542 and 7543). Available with Three-Hubeye or E.E.I. oval eye. Three-Hubeye eliminates need for a thimble. Nos. 7542 and 7543 designed for anchoring fences, trees and for similar light guying.

†Average Soil.

Chance Swamp Screw Anchors

For guying in swamp areas, marshy or sandy soil or other difficult locations where anchor must be set deep to reach firm soil.

Swamp anchors are set to the desired depth by attaching the required lengths of standard pipe. Pipe is not furnished.

Threaded to receive standard pipe.

Flanged cutting edge is sharpened to aid in cutting through roots, etc. Hub is pointed to aid installation.

Cast iron anchor shipped complete with malleable iron Tripleye nut. Single Thimbleye nut available on specification.

Asphalt dipped.

No.	Anchor Size Inches	Area Sq. In.	Pipe Size In.	Approx. Wt. Per 100, Pounds	§Holding Power Class 8	‡Each

§Eight feet into plastic clay. For soil classifications see page 753.

Chance No-Wrench Screw Anchors

May be installed by hand or by machine. "King Size" Thimbleye® or Tripleye® on the rod has a large opening to admit a turning bar for screwing the anchor down. Eye will also fit adapters for most boring machines. One piece Screw Anchor consists of a drop forged heavily galvanized steel Thimbleye or Tripleye rod, double arc welded to a high strength structural steel blade, dipped in rust-resistant black asphalt paint.

More accurately pitched cutting blade than any other type of screw anchor. Every size anchor is individually "pitch controlled" for fastest installation and greatest holding power. A small hub minimizes friction and also reduces earth disturbance during installation, helps increase holding power of the anchor.

Thimbleye groove designed to protect the guy strand during slack pulling or under load.

Prices slightly higher West of the Rockies, or in other zones.

Chance Cone Anchors

Recommended for use with rock backfill for maximum efficiency. Particularly effective in hardpan, adobe clay or rocky soil.

Chance Steel Cone Anchor Without Rod

Has eight flat faces which are directly opposite, forming flat wedges against tamped rock.

Flaring base supports rock at the bottom of the hole, greatly increasing the effectiveness of the wedge.

Nut retainer prevents anchor from riding up during installation and permits salvaging of rod.

Made of drop forged steel, dipped in corrosion-resistant black asphalt paint.

Anchor Rod Specifications

Chance cone anchors are designed for use with standard threaded anchor rods. The following table shows rod sizes for each anchor. Rods must be ordered separately.

Anchor No.	Rod Size	Anchor No.	Rod Size
6S	1/2" x 6' & 5/8" x 7'	12S	5/8" x 7' & 3/4" x 8'
8S	5/8" x 7' & 3/4" x 8'	16S	5/8" x 7' & 3/4" x 8'
10S	5/8" x 7' & 3/4" x 8'	16S-1	1" x 10'

‡Western zone prices; slightly lower in Eastern zone.

Chance Expanding Rock Anchor

Provides secure anchorage in rock without use of concrete or lead grouting.

Anchor expands against the side of a 2-inch drilled hole. After anchor is expanded the pull on the rod tends to wedge the anchor tighter against the edge of the hole.

Anchor is malleable iron, dipped in corrosion-resistant asphalt paint. Drop forged steel rods have large Triplye to accommodate bar for expanding anchor.

Holding power limited to rod strength of 25,000 pounds.

Closed Expanded

No.	Anchor Size In.	Rod Diam. In.	Rod Length In.	Approx. Wt. Per 100, Lbs.	Each

Set in holes drilled 12-in. deep in class 1 hard rock, these anchors will develop the full strength of the anchor rod. 3/4-in. rod ultimate strength of 25,000 pounds. 1-in. rod ultimate strength of 40,000 pounds.

No. 7545

Hubbard Rock Guy Anchors Hot Galvanized

No. 7545 consists of two drop-forged wedge-shaped sides, one shim and a 3/4 by 2 1/2 inch machine bolt. Installed by placing sides in hole, driving shims between sides and assembling bolt.

Rock anchors provide maximum holding power when installed at right angle to line of guy pull.

No.	Size Hole to be Drilled Inches	Overall Length Inches	Approx. Shp. Wt. per 100, Pounds
†7545	1 3/4	9 1/2	520

Hubbard Rock Guy Bolts Hot Galvanized

No. 7547

Used in solid rock formations or in stone or concrete walls. Made of 1-inch diameter steel.

No. 7547 and No. 7547-G have bottom end split and are furnished with a wedge which spreads the end as bolt is driven against bottom of hole.

No. 7547 has standard oval eye; No. 7547-G has Hubeye.

Chance Cross-Plate Anchors

Helps speed up big line-construction jobs.

An inexpensive anchor that will take the place of logs, iron slugs, cross planks, and concrete dead-men for man-dug holes in areas where loose rock or other obstructions make it difficult to bore holes with an auger and expand or install conventional anchors. It's less expensive than putting an opened expanding anchor of comparable area in this type of hole. Can be installed in a smaller hole than usually required for log or concrete dead-men.

Nut retainer helps control and prevent anchor from riding up the rod when dropped in the hole.

Formed of two structural steel plates, heavily ribbed, for reinforcement, and securely welded together with a steel reinforcing plate at the base.

No.	Dimensions, In.		Area Sq. In.	Rod Size In.	Approx. Wt./100 Lbs.	Each

Hubbard Pole Struts

Hot Galvanized

Used to make pole self-supporting by hog-guying when circumstances prevent normal guying. Struts are made of heavy steel channel with a broad bearing surface against the pole. They may be sprung slightly during installation to fit a variation in pole diameter. Two struts are needed for each pole. Three 1/2-inch lag screws attach them rigidly in position.

Braces are 1 x 1/2 x 1/8-inch channels for all sizes listed.

Hubbard Pipe Sidewalk Guy Arms And Attachments

Hot Galvanized

No. 1501

No. 1511

No. 1502

Sidewalk Guy Arms provide a substantial anchorage, using minimum space where the standard method of guying is not practicable. The fittings listed on this page are designed for 2 or 2 1/2-inch pipe.

Nos. 1501 and 1502 are the standard Pole Plate and End Clamp for this style of guy. No. 1511 replaces the clamp plate of No. 1502 to form assembly No. 1503, for separating the guy into two parts above and below the arm. No. 1512 consists of No. 1502 with an extra clamp plate so that two guy wires may be used and attached at two points on the pole. Pipe is not included unless specified. Set screw fittings Nos. 1521 and 1522 require no drilling of pipe.

No.	Description	Pipe Size In.	Approx. Shipping Wt. Lbs. Per 100 Pcs.

Hubbard-Copperweld Sectional Ground Rods

Molten-Welded

Cutaway View Showing Coupling and driving stud Installed

Designed to meet the requirements for deep, dependable, low resistance grounds. May be driven to satisfactory depths by hand, air hammer, or mechanical rotary drivers. Rod sections are joined by heavy, tapped, bronze couplings. Steel driving studs protect the threading.

Hubbard Sectional Ground Rods

Hot Galvanized

No. 9609

No. 9515

For use where deep grounding is desired.

Rods are 5/8-inch diameter steel. All rods are pointed on one end and threaded on the other, except No. 9609 Extension which is threaded both ends, No. 9512 which is threaded on both the blunt and pointed end.

Continuous sections may be coupled together with a No. 9611 coupling and driven to any desired depth.

For driving by hammer, No. 9607 driving tool is furnished. It screws securely over end threads of ground rod and will not jam or injure threads during driving.

Hubbard-Copperweld Ground Wire Clamps

Type A

No. 9492 with Safety Set-Screw

The great strength and high elastic limit of these non-ferrous clamps enables them to maintain permanently low-resistance grounding connections.

They accommodate solid or stranded ground wires, and are furnished either with safety set-screws or square head set-screws.

No. 9592 with Square Head Bolt

Hubbard-Copperweld Alarm Box Grounders

No. 9335

For Boxes Having No Boss

For Boxes Having Boss

The alarm-box grounder takes the place of the conduit and grounding wire previously used for connecting police and fire alarm boxes to ground. Consists of 3/8-inch Copperweld rod with a universal connector.

Copperweld staples for attachment to pole are also included. At bottom, it is connected to a 5/8-inch ground rod by a Copperweld Ground Rod Clamp one size over-size. Clamps not furnished.

Hubbard Drive-Head Ground Rods
Hot Galvanized—With Non-Ferrous Fittings

A combination of rod and clamp designed to eliminate the fault of battering a rod by driving to such an extent that a clamp will not slide down over the abnormally expanded top. Heads of all rods are formed to prevent malformation by driving. These rods are furnished in permanent Hubbard-Copperweld or galvanized steel as listed. Non-Ferrous Stud and Clip Washer will accommodate ground wires from No. 000 to No. 8 A.W.G. bare solid, or No. 00 to No. 8 stranded bare.

Hubbard Steel Ground Rods
Hot Galvanized

Made of new open hearth steel. Has a length of No. 12 gage copper wire bonded firmly to upper end with five inches free for making ground wire connection. Top turn is looped under itself, relieving the bond from carrying strain concentrated at that point. Special lengths of wire can be furnished.

Hubbard Detachable Pole Steps

Hot Galvanized

To install, slip the plate, which acts as a bearing surface for the step, over lag screw and drive lag in until plate bites into pole. Step slips down in a groove on each side of the lag screw head and

is prevented from turning by a lug projecting from bottom of the plate. A nail driven through a hole in the plate offers additional security against turning. Five steps per pole are generally used. Uncensored climbing is prevented by removing steps.

Hubbard Pole Gains and Reinforcing Plates

Hot Galvanized

Pole Gains

Used to attach crossarms to poles efficiently and quickly without the need for gaining the pole.

They permit easy adjustment for alignment of the crossarm and space the arm away from the pole allowing drainage and ventilation.

Compared with gaining a pole for double arming, an added spacing of approximately 2-inches between arms is obtained by using metal gains. Four spurs on the gain hold the original alignment.

No.	Arm Size In.	Bearing Surface on Crossarm Inches	Steel Gage No.	Ship. Wt. Lbs. Per 100

Hubbard Palnut Locknuts
Hot Galvanized

Palnut Installed
Showing how Palnut Prongs are drawn into the root of the bolt thread thus preventing the nut from working off

Applied after the regular nut is completely tightened. By continued turning of the Palnut, after it has contacted the regular nut, the prongs of the Palnut are drawn into the root of the bolt thread locking the nut permanently.

The resilient Palnut takes no load from the regular nut. The Palnut grips like the jaws of a chuck.

Hubbard Crossarm Back Braces
Hot Galvanized

Used to reinforce crossarms at corners and terminal poles and in many cases eliminate the necessity for double arming. The angles are made of new open hearth steel.

Nos. 7966, 7967 and 7979 are attached to the arm by means of two 1/2-inch machine bolts at each end. Nos. 7964 and 7965 use only one 1/2-inch bolt at each end.

If vertical braces are not used, crossarm attachment may be made by using 1/2-inch carriage bolts.

No.	Angle Size Inches	Overall Length Inches	Shipping Wt. Lbs. Per 100

Hubbard Extension Fixtures
Hot Galvanized

No. 8054

Vertical Brace

Diagonal Brace, Back Brace, and Vertical Brace Installed

Used to clear buildings or trees without the use of high poles, or to offset arms on a pole to partially relieve the strain of a slight angle in the line. With extension fixtures the poles may be set at the roadside, and by extending arms either toward road or away from road, to compensate for conditions, the wires may be strung in a straight line.

Hubbard Diagonal Brace, Back Braces and Vertical Brace Communication Type

The Diagonal Brace is intended for use on both the 6 and 10-pin arms. It is provided with a 6-inch step for the lineman and may be used on either side of the pole.

No. 8051 is used with 6-pin arms, and the No. 8052 with 10-pin arms. They are attached to the pole by a 5/8-inch crossarm bolt and to the crossarm by a 1/2-inch crossarm or carriage bolt.

The Vertical Brace shown is designed for 3 arms spaced 12 inches apart, or 2 arms on 24 inch centers; additional arms being cared for by placing other Vertical Braces in "Series" with the first.

Hubbard Wood Crossarm Braces
"4800 Series"—Fir Wood

No. 4800 Series Braces are made from a wood section of 1 1/8 by 2 1/8 inches of clear, straight grained Douglas Fir; treated by immersion in Pentachlorophenol.

Extensive testing has shown that these braces are the strongest that Hubbard and Company has ever produced.

No. 4800 series braces are neat in appearance, are easily installed, and are interchangeable since there are no "rights" or "lefts."

*Can be furnished with any size tapped holes. Specify if other than the standard tap is desired.

Hubbard Static-Proof Hardware

Static-proof hardware is a type of hardware that can be permanently locked in place by using threaded washers and lock nuts.

Standard hardware is subject to loosening by shrinkage of wood and vibration; it is necessary to retighten hardware regularly twice a year.

Static-proof hardware provides a bond between all metal parts, secured by threaded washers and lock nuts and has the effect of making the hardware into a one-piece assembly.

All holes in arms of poles should be bored the same size as the bolt, for a drive fit. When ordering brace bolts, add $\frac{1}{2}$ -inch to standard lengths to allow for the use of threaded washers, and 1-inch to standard lengths where both standard nuts and washer nuts are to be used.

8390	Bolt—1/2" Fittings.....	1/2 x 1 1/2

†Used on Wood, Steel and Concrete Poles.

Hubbard Pole Reinforcing Material

Hot Galvanized

When pole butts become rotted and weakened, reinforcing is accomplished by banding to a stub. Band and pipe assemblies are tightened in place by drawing the band together. No. 7852-A is a malleable casting which serves the same purpose as the pipe.

The band is first attached by a nail through the small hole in the end of the band. After wrapping pole and stub tightly by hand, a 1/2-inch lag screw is driven through the loose end so that it engages both inside and outside wrap. Lag screws may be driven in either of end holes which are spaced farther apart than others. This allows lining up with nearest inside hole. Four bands and four pipes are needed for a set. Lag screws and take-up bolts should be ordered separately.

Type "A"

No.	Description	Size	Shipping Wt., Lbs. Per 100
7850	Reinforcing Band	12-Ga. x 2" x 68 1/2"	451
7851	Reinforcing Band	12-Ga. x 2" x 89 1/2"	577
7852	Reinforcing Pipe	Ex. Hvy. 2" x 5"	242
7852A	Reinforcing Casting	5 3/8" ong. 1 1/4" Rad.	150
7855	Reinforcing Band	12-Ga. x 2" x 99"	858
7856	Reinforcing Band	12-Ga. x 2" x 120"	1100

Type "B" Sleeve Nut Style

Tension is provided by the turnbuckle nut. In general, poles are stubbed across the line. If they must be stubbed on the line, dowels are used. Peep-holes are provided in the nut for gauging take-up. Order two or more bands for a set.

No.	Pole and Stub Diam. In.	Length Sleeve Nut In.	Shipping Wt., Lbs. Per 100

7751	10	6	550
7752	12	6	625
7753	14	6	700
7754	16	6	780

Hubbard Universal Messenger Hangers
Hot Galvanized

Universal Hangers are formed from new open hearth steel. They have a curved messenger groove which permits their use on slight angles as well as straight runs. Two 1/2-inch clamp bolts hold the messenger securely in place. The hanger is mounted by means of a 5/8-inch cross-arm bolt and a 1/2-inch lag screw.

No.	Steel Size	Dimensions—Inches		Size of Strand	Approx. Wt., Lbs. Per 100
		Length of Legs	Width of Groove		
§8911	2 x 1/2	4 7/8 x 4 1/4	3/4	5/16 to 1/2	345
§8912	1 3/4 x 3/8	4 7/8 x 3 3/4	3/4	3/16 to 1/2	250

Hubbard Non-Breakable Messenger Hangers
Hot Galvanized

Made of certified malleable iron, the non-breakable messenger hanger combines spacer and clamp. It is used over a 5/8-inch machine bolt and is curved to fit the pole. Messengers are held in place while stringing by a vertical finger-like projection.

No.	Dimensions—Inches		Size of Strand	Ship. Wt., Lbs. Per 100
	Length Clamping Surface	Width of Groove		
§8914	3	3/4	1/4 to 5/16	150
§8915	3	3/4	3/8 to 1/2	150

Hubbard Crossover Clamps
Hot Galvanized

For clamping messengers together when they cross at right angles.

Size of strand, 5/16 to 1/2 inch. Size of clamping members 3/4 x 1 1/2 x 1/2 inches.

Bolts furnished are 1/2 inch oval shoulder, clamp bolts. No. 8930, Ship. Wt., 170 Lbs.

Hubbard Angle Steel Cable Crossarms
Hot Galvanized

For telephone cables. Furnished complete with No. 8901 messenger clamps, clamp bolts and nut spacers. Braces and mounting bolts are not included.

No.	Use Crossarm Brace No.	No. of Cables	Overall Length In.	Spacing Between Cables, Inches		Size Angle In.	Ship. Wt., Lbs. Per 100
				Center	Side		
§8938	8130	4	48	32	6	5 x 3 x 1/2	6525

Hubbard Strand Ground Clamps
Hot Galvanized

No. 8956

Used to provide a permanent electrical ground between cable sheath and messenger. The connection is soldered to cable sheath and mechanically clamped to the messenger wire. The bolt can be completely removed so that clamp can be dropped over the messenger.

Size steel, 3/16 x 1 3/4-inches. Overall length, 1 3/4-inches. Bolt size, 1/2 x 1 3/4-inches.

No. 8956, Ship. Wt., 57 pounds.

Hubbard Strand Connectors
Hot Galvanized

No. 8900

No. 8913

No. 8900 used to connect spiral wrapped messenger cable at the pole. No. 8913 used with two or more guy clamps for joining messenger ends. Both are non-insulating.

No.	Width Groove	Dimensions—Inches		Approx. Shipping Wt. Lbs., 100 Pcs
		Diameter Holes	Length	
8900	3/4	13/16 (Mtg.)	3 3/4	398
8913	9/16	3/4	3 3/4	100

Hubbard Cable Extension Arms
Hot Galvanized

Cable Extension Arms are used to suspend cables at a distance from the pole. They are attached at the top by one 5/8-inch crossarm bolt. The

"T" iron brace is fastened by lag screws. Cables are attached by means of a short 5/8-inch machine bolt with a washer under the head. A three-bolt Cable Suspension Clamp, No. 8903 is attached on the machine bolt under the arm in a flat position. When drawn tight, the machine bolt clamps the

entire assembly firmly together. Extension of the cable from the pole can be varied 8 1/2-inches with No. 8920 and 18-inches with No. 8921.

No.	Extensions From Center of Pole	Angle Size	Approx. Shipping Wt. Lbs., 100 Pcs.
8921	26 1/2 to 44 1/2	3 1/2 x 2 1/2 x 5/16	6050

Hubbard Guard Arm Hooks
Hot Galvanized

Used on guard arms as dead-ends for telephone services. They bolt through the arm.

Diameter steel, 1/2-inch. Overall length, 5 7/8-inches.

Diameter eye, 7/8-inch.

Approximate shipping weight, 45 pounds per 100.

No. 9245.

Hubbard Guard Arm Braces
Hot Galvanized

No. 9240

Guard arm braces are used for supporting guard arms at points on poles where a cable is suspended.

Steel size, 18 x 1 1/2 x 1/2 inches. Diameter hole straight end, 1/16 inch. Diameter hole bent end, 3/16 inch.

Approximate shipping weight, 170 pounds per 100 pcs.

No. 9240.

Hubbard U-Cable Guards and Straps
Hot Galvanized

U-Cable guards protect power cables entering the ground at the base of poles or buildings. Made from No. 14 gage steel.

Mounting Straps

Hubbard Grade Clamps
Hot Galvanized

No. 8984

No. 8989

Used to prevent creepage where cables are run on grades. The pressed steel type is made with a large clamping area so that the soft cable may be firmly gripped but not crushed. It is tightened by means of the 3/8 x 1-inch stove bolts furnished.

Drop-forged clamps are equipped with four 1/2-inch, oval neck clamp bolts, which cannot turn while nuts are being tightened.

Tolerances on all styles are held very close in order to grip both cable and messenger with the proper pressure when tightened in place.

General Machine Cable Guards
Type B

For use on cable at poles to prevent abrasion to sheath from wind, etc.

Made of polyethylene; 8 inches long. Available in four sizes: 1/2-in., 4 lbs. per carton; 1-in., 6 lbs. per carton; 1 1/2-in., 8 lbs. per carton; 2-in., 10 lbs. per carton. Specify sizes on orders. Packed 50 in carton.

No. 7422 Price on application

Diamond "C" Cable Lashing Clamps
Hot Dipped Galvanized

For securing cable lashing wire at end of span. Bolt end peined over to prevent nuts running off. Can be securely attached to messenger before taking up tension on cable lashed wire. Square hole in plate and square shoulder under head of stud bolt, prevent rotation of bolt while tightening clamp.

No. 900 Packed carton 100
Shipping weight per 100 pounds 15 1/2

Diamond "C" Span Clamps
Hot Dipped Galvanized

Used to take off drop wire leads along the span and for pull-offs to hold cable from trees and so avoid use of tree guards. Can be used with suspended or lashed cable.

No. 869 Packed carton 100
Shipping weight per 100 pounds 41

Reliable Cable Hangers

The use of the hangers eliminate wear on cable sheath. Grade clamp is not required as the entire sheath is grounded solidly to messenger, cable does not creep on steepest grade.

Zinc: For supporting lead covered cable or insulated conductors to galvanized strand. They wrap around the cable — no sheath cuts. They also bond the sheath and strand to give added protection against lightning. Should be used with neoprene jacketed wires.

Copper: For supporting insulated wires or cable to copperweld and bronze strand. Hold firmly and will not cut the cable. Where cable consists of separate insulated conductors held together against the messenger, this close-fitting support will reduce wear or wind whipping.

827	R	1 5/8	1/4-20	11

Bridle rings with machine screw threads are used with Insulator Supports. Tapped—10-24 or 1/4-20 as indicated.

Prices on application.

Hubbard Point Type Transposition Brackets

Hot Galvanized

H-On Insulator—High Point. L-On Insulator—Low Point

The "Point Type" Bracket is designed to effect the transposition of a pair of wires on a single, solid bracket by providing two diagonally opposite pins at the correct elevation, approximately 2-inches above that of the other diagonally opposite pair. No cutting of wires is necessary at each location. For existing pairs which are to be transposed, it is practical and efficient from a labor-saving standpoint, to THROW IN the transposition. The utility of this process is its applicability for voice frequencies on carrier systems (single or multi-channel) where brackets support the wires above the arms.

Right and left hand Point Type Transposition Brackets are a thoroughly tried and proven development. They have been in use for many years. Patent No. 2,299,960 covers a method or system of transposing wires. Hubbard Point Type Brackets listed on this page were designed specifically for use with this system. The purchaser of Hubbard Brackets is assured a license permitting the transposing of wires as covered by the above patent.

The bracket is attached to standard-bored crossarms through adjacent pin holes by 1/2-inch by 6-inch crossarm bolts fitted with clipped washers. Both attachment holes are slotted to provide a total of two inches of adjustment. Additional mechanical features may be noted in the illustrations. Transpositions taken place on a rigid bracket, mounted above the arm, and wire spacings are maintained uniformly the entire length of the span. There is no spiraling of wires about each other as is the case with ordinary transposing methods. This is a tremendous advantage in cases of damaged or destroyed lines where restoration of transpositions must be made.

With the right and left point type method of transposing, it is unnecessary to cut wires to straighten out tangles during reconstruction. Simply untie the transposed wires and pull out of the working lengths of line ready for re-stringing.

Mounting bolts and washers are furnished. Threads, either of the wood cob or lead variety, are made to fit transposition insulators having 1-inch pin holes. Specify the type of thread desired.

For more complete information communicate with the nearest Graybar office.

Hubbard Standard Transposition Brackets

Hot Galvanized

No. 9251

Nos. 9252 and 9255 furnished in heavy stock for use with pins having transposition insulators.

Except for No. 9255 all sizes have 3/8-inch hole for a wood screw. Nos. 9249 and 9250 have holes for 3/8-inch carriage bolts. Nos. 9251, 9252, and 9255 have holes for 1/2-inch carriage bolts. Nos. 9253 and 9255 are fitted for 5/8-inch pin shanks. All others for 1/2-inch short shanks. Pins and carriage bolts not included.

Hubbard Transposition Brackets

For Phantom Circuits

Hot Galvanized

No. 9275

Furnished in two pieces covered by a single catalog number.

Pin holes are for 1/2-inch short shank pins.

Assembly on arm is accomplished with 1/2-inch machine bolts. Can be used on all sizes of crossarms. Pins and bolts are not included.

Size steel, 1 1/2 x 3/8 inches.

Western Union Std.

Approximate shipping weight, 797 pounds per 100.

No. 9275.....

Hubbard Channel Transposition Brackets

Hot Galvanized

No. 9265

Popular in the oil lands of the Southwest. Mounted on the side of a pole by 1/2-inch mounting bolts on an 8-inch spacing. 5/8-inch threaded short shank insulator pins are used.

Dimensions: Pin hole, 1 1/16-inch; Pole mounting hole, 3/16-inch; Mounting hole spacing 8-inches; Channel size, 1 1/2 x 3/16 x 3/16-inches; Approximate shipping weight, 250 pounds per 100.

No. 9265.....

No. 7838

Bridging washer (not included) No. 7838, made from 12 gage by 1 1/2-inch steel, provides a base for the top pin. Weight 11 lbs., per 100.

No. 7838.....

Hubbard One-Piece Transposition Brackets

For Phantom Circuits

Hot Galvanized

No. 9263

Bracket Nos. 9260 and 9261 are similar to No. 9251 except that their ends are turned up and fitted with standard wood cobs. No Pin is necessary. No. 9262, is mounted with 1/2-inch machine bolts. No. 9263 Brackets do not include insulator pins. Forged steel teeth bite into arm, when the No. 9263 is installed, and prevent slipping.

Hubbard Wire, Pinch and Transposition Brackets

Hot Galvanized

No. 9256

No. 9266

The Pinch bracket is employed as a device for balancing a carrier on each side of the transposition.

Hubbard Wire Brackets are used for pole and arm attachments of multiple wire communication lines. Attachment is made by means of the clamp which is designed to take the messenger contained in the cable group. An insulating tube is employed to prevent abrasion of the cable against the bracket. One 5/16-in. lag screw is used in the center hole on No. 9256.

Point transposition brackets are used with short shank, 5/8-in. diameter pins and attached to the arm with a 1/2-in. carriage bolt. Transposition clearance is 5/8 in.

No.	Description
9256	C Wire Bracket
9266	B Wire Bracket
9288	Pinch Bracket
9289	Transposition Bracket

Hubbard Offset Neutral Bracket

Bracket is intended to hold the neutral conductor away from the surface of the pole, so that the neutral conductor is placed in a different vertical plane from the phase wire carried above the neutral on single phase construction. The need for this bracket is due to the consideration that when the neutral and phase conductors are subjected to ice loading, and the ice subsequently drops from the neutral conductor, the conductor flips up into the phase wire and causes burning of the phase and neutral conductors. This bracket materially reduces the possibility of this contact occurring.

Spool insulator No. 355 or No. 455 should be ordered separately.

No.	Description	Wt., Lbs. Per 100

Hubbard Service Mast Kits

No. 2200

A complete kit consists of one each of Items No. 1, 3, and 5 and two of Item No. 4.

Wireholders for one, two or three-wire service attachments (Item No. 2) and the Pull-off Fitting used for cable grip attachments (Item 6) are not included in the kit and must be ordered separately stating quantity per kit.

Standard kit offset adapters fit a 1 1/4 in. pipe meter connection. If 1 1/2 in. size meter connection (Item No. 5) is needed it should be specified. In ordering kits or wireholders it is important to specify either the 2 in. or 2 1/2 in. kit according to the nominal pipe size of the mast to be used. Masts are not supplied.

**Hubbard Transposition Break Iron Brackets
Hot Galvanized**

No. 9284 is similar to No. 9286 except lighter and 6" x 9" pin spacing.

No. 9285 includes a plate, one round washer, and a machine bolt. Two brackets are needed for transposition. No. 8061 pins, with non-standard steel threads, or 8015 pins with standard 1-inch wood cobs may be used; either pin must be ordered separately.

No. 9286 and 9287 accomplish the same result as No. 9285, except that the entire assembly is made up in one piece. Nos. 9286 and 9287 do not include pins or mounting bolts.

Pin hole diameter on all numbers is 1 1/16-inch. Mounting hole size on No. 9285 is 1 1/16 inch; on Nos. 9286 and 9287, 3/16 inch square. Approximate shipping weights per 100 are: No. 9284, 480 pounds; No. 9285, 470 pounds; No. 9286, 660 pounds; No. 9287, 1100 pounds.

Hubbard 1-Inch Drop-Forged Clamp Pins
Hot Galvanized

No. 4420
Cross Arm Strap
Not Included

May be used at angles in the line when assembled with a crossarm reinforcing plate.

On straight line runs the pin is used without the plate and is prevented from canting by two 1/4-inch lugs. Mounting slots are for 1/2-inch diameter crossarm straps. Straps are not included.

Has 1-inch lead thread.
Size of crossarm, 4 x 5 inches or smaller.
Pin height above arm, 4 3/4 inches.

No. 4420 4420
Approx. Shipping Weight Pounds, per 100 175

Hubbard Wide Base Clamp Pins

For 1-Inch Pin Hole
Hot Galvanized

No. 4320

Designed for angle and corner construction.

Each pin is forged from a single piece of hot rolled open hearth steel. The broad base rests evenly on the arm and prevents pin from cutting into the wood, while the four lugs hold the pin from twisting on the crossarm.

U-Strap type pins include crossarm mounting strap. Carriage bolt type includes 2 carriage bolts, 2 square nuts, 2 M. F. locknuts and a 5/16-inch flat steel washer plate. Pin height above arm, 5 3/4 inches.

**Hubbard Forged Steel Pins
Tapered Body—Lead Thread
Hot Galvanized**

**No. 5724
Long Shank Type**

**No. 5725
Short Shank Type**

Lead threads are securely bonded to the steel and carefully formed to meet insulator manufacturers' standards. There are no troublesome fins or mold marks. Pins for use on wood crossarms are furnished with Square Washer, Square Nut, and M.F. Locknut. A Saddle Washer adapts these pins for use with roofed crossarms. Short shank Pins, for use on steel crossarms, are furnished with a square nut and spring lock washer.

Hubbard Malleable Iron Centering Washers

Hot Galvanized

No. 5664 and No. 5684 Installed

Hubbard Centering Washers, often called Pin Hole Adapters, are used on stock crossarms, which have been drilled for wood pins, to adapt them to the smaller shanks of steel pins. Top Centering Washers are designed to draw down into the pin hole, when the pin is tightened on the arm, leaving the top surface clear for the pin base. They may be used on either flat or roofed arms.

A Top Centering Washer may also be used on the bottom of the arm if a standard flat washer is placed between it and the nut.

Hubbard Pressed Steel Corner Pole Top Pins

Hot Galvanizee

Made of 3/16-inch sheet steel. Lead threaded pin top makes an angle of 20° with pole face, back is curved on a 4-inch radius. There are two 1/16-inch mounting holes and one 1 1/4 x 1 1/4 inch mounting slot for 5/8-inch bolts. Vertical bolt spacing can be 5 or 8 inches.

Insulator threads are standard 1-inch lead threads.

Mounting bolts are not included.

No.	Length Overall	Ship. Wt. Lbs. Per 100
3029	16-inches	490

Hubbard Pressed Steel Pole Top Pins

Hot Galvanized

These pressed steel pole top pins have great strength and endurance. They have a specially formed conical top and the channel size is 1 7/8 by 1 5/16 by 5/8-inch.

Straight base pins are mounted with the flat back next to the pole surface.

Pins are made with either straight or flared bases.

Pole Top Pins for use with separable thimbles are also made from 5/8-inch flat steel. The lead thread thimble No. 5052 is recommended for use with these pins.

No. 8090

Hubbard Clip Washers

Hot Galvanized

Used to attach wood insulator brackets to a pole. They grip the wood firmly across its width and prevent splitting. Made from 12 gage by 1-inch steel. Mounting holes 5/16-inch diameter.

No.	Description	Dimensions, In. Spread Between Legs	Approx. Shipping Wt. Lbs., 100 Pcs.	Mounting Hole Diam. In.
8089	Top Strap	1 1/2	17	5/16
8090	Bottom Strap	1 1/2	6	5/16
8098	Top Strap	2	28	5/16
8099	Bottom Strap	2	8	5/16

Hubbard Bracket Straps

Hot Galvanized

Two bracket straps, top and bottom, are used on each wood bracket. Made from 12 Ga. x 1 7/8 Steel.

No. 8065

No.	Description	Dimensions A In.	B In.	C	Mounting Hole Diam. In.	Ship. Wt. Lbs. Per 100

Hubbard Pole Top Brackets

For Long or Short Shank Insulator Pins or Post Type Insulators

By using a No. 3051 Pole Top Bracket, forged steel insulator pins — commonly used on crossarms — may be employed at the top of the pole. This bracket will accommodate not only long or short shank pins, but will also take Post Type Insulators. Mounted by two 5/8-inch diameter mounting bolts. Holes for Pin mounting are 13/16-inch diameter.

No.	Steel Size	Dimensions—Inches Mtg. Hole Diam.	Mtg. Slot Size	Approx. Ship. Wt. Lbs., 100
3051	3/8 x 4	1 1/16	1 1/16 x 1	1031

Two Point Brackets
Hot Galvanized

Recommended for areas where woodpeckers, termites, and other wood destroying insect pests are prevalent. Also much used on pipe line communication lines.

No. 3144

No.	Steel Size	Dimensions—Inches Spread	Mtg. Hole Diam.	Mtg. Hole Spacing	Approx. Ship. Wt. Lbs., 100 Pcs.
3144	3/4 dia.	16	9/16	7 3/8	540

Hubbard Wire Stringing Tools

Hot Galvanized

No. 1240 Pin Type

No. 1243 Suspension

Economical aids in the stringing and sagging of conductors. When a section of conductor has been sagged properly and tied in, the Wire Stringing Tools are removed and employed further along the line.

Made in two styles. The Pin type tool is placed over the threads of a 1-inch lead thread insulator pin for sagging along a straight run or a slight angle, while the Suspension type is used for stringing conductors on angles of from 30 to 60 degrees and is attached to the insulator string. Both types are assembled with special alloy steel stripper bolts and oil retaining bronze bushings.

No.	Clearance For Conductor, Inches	Attachment	Approx. Shipping Wt. Lbs., 100 Pcs.
1240	13/32	1-in. lead thread pin	315
1243	15/32	5/8-inch Bolt	335

Hubbard Static Wire Supports

Loop Type

Made from 5/8-inch diameter steel and include one No. 6783 end link for wire clamp attachment. Inside pole plate is welded to the support legs for greater strength. Thread length, 7 1/2-inches.

No.	Pole Diam.	Dimensions, Inches Steel Size	Washer Plate Size	Approx. Ship. Wt. Lbs., 100 Pcs.
6432	8 to 10	5/8 diam.	7 x 2 1/2 x 1/4	565
6433	10 to 12	5/8 diam.	7 x 2 1/2 x 1/4	600
6434	12 to 14	5/8 diam.	7 x 2 1/2 x 1/4	635

Band Type

Bands are made from No. 9 ga. by 3 7/8 inch open hearth steel. Grounding clip and clevis are not included and must be ordered separately. Grounding clip may be attached through a 1/16 inch hole in the band.

No. 6816 Shackle not included.

No.	Pole Diam.	Dimensions, Inches Size Band Steel	Carriage Bolt Size	Approx. Ship. Wt. Lbs., 100 Pcs.
6443	7 to 9	3 7/8 x No. 9 Ga.	1/2 x 6	661

6445	10 to 13	3 7/8 x No. 9 Ga.	1/2 x 7 1/2	835
6499	Ground Clip for above bands (Not incl.)			25

Prices on application.

Hubbard Static Wire Brackets

Angle Steel Type

No. 6464

Static wire clamp is attached to a No. 6801 Clevis which in turn is attached to the No. 6464 Bracket through the 1 1/16-inch hole of the ridge member. Ridge member may be raised and the neutral inserted without threading. Side members restrain the neutral at the top of the pole where it cannot fall across conductors. The two necessary 5/8-inch diameter mounting bolts are not included.

No.	Dimensions, Inches Angle Steel Size	Range Pole Diam.	Approx. Ship. Wt. Lbs., 100 Pcs.
6464	3 x 2 x 3/16	6 1/2 to 11	1550

No. 555

Peirce Drop Forged Steel Thimble Clevises

Hot Galvanized

No. 655 Installed

For dead-ending lines to suspension insulators. The wire groove is designed to provide a safe bending radius for the strand and to maintain the shape of the strand under heavy stresses.

Dimensions: No. 655, Cotter bolt diameter, 5/8-inch; Groove diameter, 1 1/4-inches; Strand or Wire size, 3/4-inch or under.

No. 654 is identical to No. 655 except that it has a 1/2-inch Cotter Bolt.

Approximate shipping weight of No. 655, 122 pounds per 100.

Approximate shipping weight of No. 654, 115 pounds per 100.

Hubbard Standard Thimble Clevises

Hot Galvanized

No. 673

Used for dead-ending lines to suspension insulators.

Formed with a 2-inch diameter for the conductor loop and a groove to accommodate 3/4-inch strand or smaller.

No.	Steel Gauge	Cotter Bolt Diam.	Strand or Wire Size	Approx. Ship. Wt. Lbs. Per 100
673	9	5/8	3/4 or under	95

Hubbard Open Side and Open End Thimble Clevises

Hot Galvanized

No. 675

No. 674

Nos. 674 and 675 are designed for corner or dead-end conductor attachments. No. 674 is particularly desirable due to its open side design which eliminates threading of the conductor through the clevis.

No.	Steel Gauge	Dimensions—Cotter Bolt Diameter	Inches Strand or Wire Size	Approx. Ship. Wt. Lbs. 100 Pcs.
674	14 (thimble)	5/8	3/4 or under	145
675	12	5/8	3/4 or under	95

Hubbard Four-Way Wood Strain Insulators

Horn gap and clearance dimensions D and C may be varied but must be specified when ordering. Sheave wheel* and cotter machine bolt are included. Arcing horns are included unless otherwise specified.

20,000 Lb. Min. Breaking Load—Wood Section 1 15/16 x 2 15/16 inches.

Hubbard Full Adjustable Pole Bands

Hot Galvanized

No. 7278

No. 7277

Designed so that deadends and guys may be attached at many different angles.

Shipped assembled with one 3/4 x 4-inch curved bolt and one 3/4 x 2 1/2-inch cone head bolt. Extra cone head bolts for attaching dead-end clevises and clips must be ordered separately.

No. 7278 guy clip attaches around the band by means of No. 7280 conical head bolt. Guy clip is furnished in two pieces, the top part of 5/8 x 2 1/2-inch steel and the bottom of 3/8 x 2 1/2-inch steel. The clevis bolt is a 3/4 x 2 1/2-inch cotter fitted machine bolt.

No. 7279 Square Curved Washer is used under the head of the Cone Head Bolt when the Guy Clip is used over a single thickness of the band.

No. 7299 is furnished with conical head bolt, lock washer, and clip plate. Ground wire is inserted between the clip plate and the band.

Nos. 7281 and 7282 have reinforced "ears" for greater strength.

Hubbard Wedge-Grip Brackets

Hot Galvanized

No. 3930

Wedge Grip Brackets provide an ample anchorage for all house service tensions. They may be attached to any solid, flat surface or the rack bolt of a secondary rack. Cable must be threaded through the solid jaw bracket, while the open jaw style requires no threading or cutting of cable during installation.

Open Jaw Type

3930	Flat Cable	$\frac{1}{4}$ x 1 to $1\frac{1}{16}$ x $1\frac{1}{8}$	132
3932	Round Cable	$\frac{1}{16}$ to $1\frac{5}{16}$	132

Hubbard Snub-Grip Brackets

Hot Galvanized

Snub Grips are furnished in two sizes, one with a "snub" diameter of $1\frac{3}{4}$ " (No. 3940) and the other $2\frac{1}{2}$ " (No. 3942). They have many and varied uses, the most common of which are attachments to secondary racks or to frame buildings. No. 3945, a bail and plate combination for attaching snub grips to wooden surfaces, must be ordered separately.

No.	Item	Cable Sizes — Inches				Approx. Ship. Wt. Lbs. 100 Pcs.

3945	Base & Bail					40

**Hubbard Wireholders
Hot Galvanized Fittings**

Wire hole $\frac{7}{8}$ x 1-inch. The strong Copper-weld wire bail is firmly positioned by the first few hundred pounds of pull applied on it, providing perfect insulator bearing for heavier stresses.

Screws are smooth, sharp pointed for easy starting, and full threaded so they will hold any normal loading, even when attached through timbers thinner than the length of the screw.

No. 4-11-100 furnished with non-ferrous base and screw.

Hot Galvanized Fittings**

Not affected by temperature changes or by difference in coefficient of expansion of its various parts. No. 190 is for making house service connections. All wood screws are full threaded. No. 290 is similar to No. 190 except No. 290 has wet process porcelain insulator and $\frac{5}{8}$ " diameter wire hole.

No. 1190

No.	Size of Screw, Bolt, or Tap	Extension Base to Ctr. Wire Hole In.	Size of Wire Hole In.	Ship. Wt., Lbs. Per 100

Rack Type

No. 299A is same as No. 299 except that it has a hole in center of back. When No. 191A is mounted in this hole it changes No. 299 from 2-wire 9-inch spacing to 3-wire 4 $\frac{1}{2}$ -inch spacing. No. 191A is equipped with $\frac{5}{16}$ x $\frac{5}{8}$ -inch stove bolt for attaching to back. Mounting slots are for $\frac{1}{4}$ and $\frac{3}{8}$ -inch screws. Insulator Wire Hole is $\frac{3}{16}$ x $\frac{3}{4}$ -inch.

No.	No. Wires	Wire Spacing In.	Ship. Wt., Lbs. Per 100	No.	No. Wires	Wire Spacing In.	Ship. Wt., Lbs. Per 100

299A	2*	9	229		Wire Hole $\frac{3}{16}$ x $\frac{3}{4}$		38

*No. 191A may be added to this wire holder to convert it to a three point bracket with 4 $\frac{1}{2}$ -inch spacing.

**Hubbard Single Neutral Wire Brackets
Hot Galvanized**

Wire size, $\frac{1}{2}$ -inch or under. Mounting bolt size, $\frac{5}{8}$ -inch. Length of pole bearing surface, 2 $\frac{7}{8}$ inches. Mtg. Bolt not included. Approx. ship. wt. per 100 pcs., 105 pounds.

No. 4470

No. 4470.....

**Hubbard Insulated Clevises
Hot Galvanized**

Nos. 1342 and 1333

Used extensively in rural areas. Flat steel size $\frac{3}{16}$ x $1\frac{1}{2}$ inches. Mounting hole size $1\frac{1}{16}$ x $\frac{3}{4}$ inch. Mounting bolt, $\frac{5}{8}$ inch. Approximate shipping weight 279 pounds per 100.

No. 1342, with Insulators (No. 355 Dry).....
No. 1333, with Insulators (No. 455 Wet).....

Nos. 1341 and 1343

Uses No. 1606 dry process insulator. Clevises are similar except for the attachment hole. No. 1341 has oval hole for $\frac{5}{8}$ inch bolts; No. 1343 has round hole for $\frac{1}{2}$ inch bolts.

No.	Steel Size	Extension	Mounting Hole	Approx. Ship. Wt. Lbs., Per 100
1341	$\frac{3}{16}$ x $1\frac{1}{2}$	$4\frac{3}{16}$	$1\frac{1}{16}$ x $\frac{3}{4}$	154
1343	$\frac{3}{16}$ x $1\frac{1}{2}$	$4\frac{3}{16}$	$\frac{3}{8}$ diam.	154

No. 1339

Popular for rural construction. Has sufficient conductor clearance for low or medium voltage lines. Uses No. 1608 wet process insulator. Oval mounting hole, $1\frac{1}{16}$ x $\frac{3}{4}$ inches.

Approximate shipping weight, 165 pounds per 100.
No. 1339, with Insulators.....

No. 1340

Has a higher flashover rating than the No. 1339. An asset on lines requiring high mechanical strength and endurance. Steel size $\frac{3}{16}$ x $1\frac{1}{2}$ inch with $\frac{5}{8}$ inch diameter cotter clevis bolt. Uses No. 1609 wet process insulator. Oval mounting slot $1\frac{1}{16}$ x $\frac{3}{4}$ inches. Approximate shipping weight, 315 pounds per 100.

No. 1340, with Insulators.....

No. 1330

Used extensively on medium voltage lines for corner or dead-end attachments. Recommended especially for 4000-volt primaries. The $\frac{5}{8}$ inch attachment bolt is designed for fastening on eye or hook bolts. Pole mounting bolts not included. Lead sleeve on insulator bolt available at extra cost. Uses No. 1613 wet process insulator.

Shipping weight, 609 pounds per 100.
No. 1330, with Insulators.....

No. 1344

Designed for through bolt or crossarm bolt mounting. Similar to No. 1330 clevis shown above. Mounting bolts on insulator available at extra cost. Uses No. 1613 wet process insulator. Oval mounting slot, $1\frac{1}{16}$ x $\frac{3}{4}$ inches. Approximate shipping weight 550 pounds per 100.

No. 1344, with Insulators.....

**Hubbard Insulated Clevises
Hot Galvanized**

No. 561
Formed of heavy channel steel. A sturdy dead-end or corner attachment. Used with No. 355 dry process insulator for low voltage lines.
Oval mounting hole, $1\frac{1}{16}$ x $2\frac{5}{16}$ inches. Approximate shipping weight, 306 pounds per 100.

No. 561, with Insulators.....

Nos. 8820 and 8821

Formed of flat steel.
Has $1\frac{1}{16}$ -inch diameter mounting hole for $\frac{3}{8}$ -inch mounting bolts.
Uses No. 357 dry process insulator.
Shipping weight, per 100, No. 8820, 131 lbs. No. 8821, 131 lbs.

No. 8820, with Insulators.....

No. 8821, same as No. 8820, except with $\frac{1}{16}$ -inch mounting hole. Includes $\frac{1}{2}$ x $4\frac{1}{2}$ -in. Mach. Bolt and Round Washer.....

Nos. 1352 and 1353

$\frac{5}{8}$ " Cotter Insulator bolt.
Steel size $\frac{3}{16}$ x $1\frac{1}{2}$ inches.
Extension to center of bolt, 5 inches.

No.	Style of Insulator	Approx. Ship. Wt. Lbs. Per 100

**Hubbard Dead End Brackets
Hot Galvanized**

A very popular rural bracket. Wide back resists line pull. The same bracket applies to all three stock numbers.

No. 1327 includes bracket only. Nos. 1328 and 1329 include the insulators listed.

Center hole is $1\frac{1}{16}$ inch and side holes are $\frac{9}{16}$ inch. Extension from back to center of insulator bolt is 4-inches.

No.	Style of Insulator	Back Radius	Steel Gauge	Approx. Ship. Wt. Lbs., Per 100
1327	Not inc.	$2\frac{3}{8}$	9	350
1328	No. 455	$2\frac{3}{8}$	9	462
1329	No. 1716	$2\frac{3}{8}$	9	600

**Hubbard Sagger Brackets
Hot Galvanized—Patented**

No. 710

Fig. 1

Fig. 2

Sagger Brackets provide flexibility in the solution of secondary distribution problems. They serve as single point secondary racks which may be used with any desired spacing in whatever numbers the situation requires. Figure 1 is of an installation approaching a three wire secondary rack with the spacing defined by the engineer. 1† shows the sagger bracket with insulators in horizontal position free to rotate about insulator bolt and act as a wire stringing tool. When the correct sag has been set, the conductor is "tied in" to the insulator and the insulator is raised to the vertical position, Figure 2 to be snapped home over the two keeper lugs. Sagger bracket snap fit assures faultless service and yet allows for on-the-spot repairs.

No.	Extension Pole to Bolt Ctr.	Width of Back	Mtg. Hole	Insul. No.	Approx. Ship. Wt. Lbs. Per 100 Pcs.

Hubbard Extension Brackets
For Secondary Racks
Hot Galvanized

No. 3355

Used for mounting secondary racks when a greater extension from the supporting structure is desired than the rack itself offers.

Made in two styles, with flat and curved backs, for wall and pole use respectively. Both styles have one 1/16-inch hole and two 3/16-inch holes for mounting. Made from No. 9 gage steel, they have a 4-inch bearing on the pole or wall.

Equipped with one 5/8 x 2-inch carriage bolt.

Also has two 1/2-inch holes in bottom (one at each end) to allow water to drain out.

No.	Type Back	Type Mtg.	Ext. In.	Mounting Holes		Approx. Ship. Wt. Lbs. Per 100

Hub-Rak
Medium and Heavy
Hot Galvanized

A solidly constructed durable rack, the criterion for rack quality and workmanship. Forged steel points are permanently aligned and riveted to the Hub-Rak back. The permanent alignment of points assures a more even stress distribution along the entire length of the 5/8-inch diameter rack bolt.

Hub-Rak Secondary Racks are furnished with No. 355 dry process porcelain insulators.

Available with either extended or nonextended backs. See table below for ordering data.

Ohio Brass Spools

Made of highest grade wet process porcelain, providing high electrical and mechanical values.

Have tapered hole which distributes load more evenly and minimizes the possibilities of breakage.

No.	EI-NEMA Class	Size, in.	Ship. Wt. Lbs. Per 100
36139	(53-1)	2 1/8	46
36361	(53-2 & 3)	3	112
38911	(53-4)	3	215
36140	(53-5)	4 1/8	275

Ohio Brass Insulated Clevis Assemblies

Clevises are made of steel, hot-dip galvanized. On the larger two assemblies, the clevis is offset near the spool, increasing the flashover value of the units.

Ohio Brass Angle Clamps

No. 81460

No. 82860

For turning angles from 10 to 120 degrees. Clamp attaches directly to eye or clevis of suspension insulator.

Reversible keeper piece; clamp takes conductors from No. 6 A. W. G. copper to No. 2 ACSR with armor rod.

Clamp body and keeper of malleable iron; bolt of steel. All parts hot-dip galvanized.

Suffix Number System

O-B high-voltage pintype and line post insulators combine a choice of pinhole dimensions or stud arrangements, and in certain cases offer an option between Tie-Top and Clamptop heads. Because of the large number of possible combinations involved, a suffix system is used. The basic catalog numbers above describe the porcelain body. A suffix number should be selected from this chart to specify the complete assembly required.

*Information on larger sizes furnished upon request.

Malleable clamps will be furnished with either copper or aluminum liners when specified. Deduct 0.1 in. from max. conductor diameter to allow for liner.

Prices on application.

Ohio Brass Strateline Clamps

These clamps provide an inexpensive and effective means for deadending distribution primaries and station buses. Easily hooded for hot-line work, they can be detached from supporting insulators simply by removing cotter pin and rivet. Holding power of these clamps meets the requirements of primary distribution service where larger sizes of aluminum cable are involved.

Ohio Brass Hi-Lite Strain Clamps

Malleable Iron

For use with copper, ACSR, Copperweld and steel conductors. Develops ultimate strengths of standard conductors having rated strengths within the limits of the clamps.

Clamp bodies, keepers and fittings are of malleable iron; bolts and rivets are steel. All ferrous parts are hot-dip galvanized.

No. 83835

Continental Rubber Communications Insulators

Western Union Standard

Eliminates danger of insulator breakage in transit or during installation; minimizes breakage due to rifle-fire or other maliciousness.

Resilience of these insulators reduces line breakage due to crystallization or abrasion of the line near poles. Provide ample strength to take the increased load on angle turns.

High operating efficiency in severe fog and humidity conditions; excellent weather resistance. One model designed for standard wood pin or the threaded wood cob on steel pin, and one model designed for steel pins. Interior threading gives tight, screw fit on pins.

No.	Pin Type	Wt., Lbs. Per 100	*Unit Qty.	Less Than Unit Qty.	†Per 1000	Unit Qty. and Over
R-3	Steel	17½	1200	\$220.50		\$198.50
R-4	Wood	40	500	402.50		365.20

†Prices slightly higher West of the Mississippi River.

*Minimum quantity on which freight allowances will apply.

Hubbard Linemen's Safety Platforms

Patented

Used in connecting transformers, making up cable joints, replacing and washing hi-line insulators, and soldering joints. Developed for efficiency and safety in line construction and operation. Is readily adaptable to almost any position. Steel spears for pole contact are designed to eliminate side movement of the platform while in use. Width, 9⅝-inches; length, 71-inches.

No. 600, Shipping Wt., Lbs., Each 50.....

Hubbard Pole Balconies

Hot Galvanized

Used for convenience and comfort in telephone terminal box work and serve as switching platforms with the power companies. Frame, braces, and guard rails of this balcony are made of open hearth steel. Platform wood is thoroughly seasoned and, painted with two coats of standard green pole paint. Seat 14 x 30-inches. Nos. 9035 and 9045 are identical except railing of No. 9035 fastens to a telephone terminal box and No. 9045 fastens to pole. The complete balcony includes all bolts for fastening the parts together but not the bolts for attaching to pole.

No.	Description	Approx. Shipping Wt., Lbs. 100 Pcs.
9033	Collapsible	6200
9035	Box Fastening	6300
9045	Pole Fastening	6700

Hubbard Pole Seats

Hot Galvanized

Under test, these seats are found to be capable of supporting more than three fourths of a ton safely. The frames and braces of all sizes are of 1x½-inch channel steel, except No. 758 which is constructed from 1½x1½x⅜-inch angle steel.

No.	Style of Seat	Size of Seat, In.	Approx. Shipping Wt., Lbs. 100 Pieces
753	Wood-Creosoted	11x20	1400
755	Steel-Galv.	12x13⅞	1400
758	Pinta Dipped.	8x20	2603

Prices on application.

Chance Universal Platforms

Universal platforms provide a safe, time- and labor-saving means for working on transmission and distribution lines, switches and other equipment. Particularly useful for prolonged jobs or work on lines otherwise inaccessible from pole or tower leg.

High-strength aluminum alloy is used in most platform fittings to minimize weight. Double brace provides extra stability; folds for easy transportation. A wood keel provides added rigidity on 8-foot platform. All platforms furnished with non-skid safety tread.

Platform Assemblies: Universal platforms are available in either adjustable or pivot type assemblies. Pole and tower attachments of both adjustable and pivot designs are interchangeable; by removing a hinge pin and attaching the de-

sired fitting, the platform is quickly adapted to the specific job. Attachments are available separately.

Pivot Type Platform: Use of pivot attachments facilitates work on H-frame suspension construction and other jobs requiring platforms to be set at several angles. This can be done without changing the position on the pole. Platform may be rotated within a 180° arc; turning hand nut holds platform in desired working position.

Adjustable Assembly

No.	Description	Length Feet	Wt. Lbs.	Each
*M4901-2	Pole Type assembly, less keel	6	44	\$78.00
M4901-3	Pole Type assembly, with keel	8	55 1/4	90.00

*M4901-13	Pole attachment only	..	27 1/4
M4901-15	Tower attachment only	..	30 1/2

Chance Rope Railings

Provides additional security to linemen on platforms. Railing is made of 3/4" manila fiber rope and 4 laminated spruce poles. Stands 24" above board. Complete with 2" double blocks. Folds flat for easy transportation.

No.	Platform Size	Wt., Lbs.	Each
*M4901-35	1 5/8" x 11" x 6'	12 3/4	\$38.00
M4901-45	1 5/8" x 11" x 8'	13 1/8	39.00

Chance Utility Platforms

Designed for use on poles, in substations where space is limited, or where linemen must work for long periods. Attached with a single safety locking chain tightener. Cannot be accidentally loosened. Aluminum alloy fittings keep weight down.

Has folding brace for convenience of transportation.

Non-skid tread and cleats at end provide safe, sure footing.

No.	Platform Size, In.	Wt., Lbs.	Each
*M4950	1 5/8 x 11 x 30	20	\$40.75
M4950-42	1 5/8 x 11 x 42	22	44.55

M4960-42	1 5/8 x 11 x 42	24	44.50

*—Linemen's Preference (L.P.)—Recommended by Chance Hot Line Tool Demonstrators.

Hanlon & Wilson Rail Bonds

Type RHD-9

Made with solid cadmium copper terminals. Selected because of its similarity of expansion to railroad steel, excellent "cold flow" properties, and high conductivity.

Average pull-out test is more than double ordinary other types.

Punch supplied with every 200 RHD-9 Bonds.

Type BSB-6CH

A high conductivity conductor made entirely of cadmium copper and stainless steel.

Powerful wedging action makes strong positive electrical connection.

Has maximum resistance to vibration fatigue.

Quickly and easily installed with a hammer. The flexible strand permits rapid and easy forming into the most suitable shape and location.

This bond was designed for use at switch points and frogs.

Type 7B-10C

A hard drawn "copper-weld" strand. No heat or welding used in compression process.

Has pulled as high as 10,000 lbs. in destruction tests.

Added Copper Sleeve serves as a cushion for the strand in the steel terminal and at point of greatest stress.

No special skill to install the one-piece pin. Available in other strand constructions on request.

Type BSB-5CH

An improved and perfected plug-type signal bond easily installed behind or in front of the splice bar.

Stainless steel terminals offer maximum resistance to corrosion.

The strand is composed of hard drawn cadmium copper with a high fatigue resistance.

Type RHD-6

A high conductivity strand mechanically applied. Non-chipping tool steel drive pins assure safety in installation.

Has complete over-all protective zinc plating and pull test equaling the tensile strength of wire.

Expands excessively to fit over-sized holes.

Type DS-1T

Bonds and jumpers, shunt connectors, track circuit connectors made of a combination of copper and steel wires, butt welded.

Prices on application.

Macoid Plastic Tree Wire Guards

For auxiliary protection on power and light conductor or telephone drop wire where it is impracticable to obtain adequate clearance from trees, making it necessary to protect conductor or wire from abrasion. Particularly useful where conditions require protection on a considerable length of wire. Can be spiraled on wire already in place or can be threaded over the free end of a wire. Furnished in five types:

Type "P", 1/8" I.D. x .045" wall, 36" length. Tree guard. 10 pieces in a package. Also furnished in coils 100 to 500 feet long. Approx. weight per package, 1.4 pounds.

Price per package, \$2.40.

Type "S", 1/8" I.D. x .045" wall, 36" length. Tree guard. 10 pieces in a package. Approx. weight per package, 1.4 pounds.

Price per package, \$1.80.

Type "L", 3/8" I.D. x .037 wall. For use in insulating line wires. 100 feet in a coil, 10 coils in a carton. Approx. weight per carton, 16 pounds.

Price per coil, \$1.90.

Type "E", 1/4" x .040" wall. To protect station wires where attached to walls or passed through partitions. 50 feet per coil, 10 coils in a carton. Approx. weight per carton, 11 1/2 pounds.

Price per coil, \$1.80.

Type "LL", 3/8" O.D. x .035" wall. For insulating line wires. 100 feet in a coil, 5 coils in a carton. Approx. weight per carton, 11 1/2 pounds.

Price per coil, \$2.90.

Copperweld Grip-Flex Insulator Ties

Use Copperweld Grip-Flex Ties wherever Copperweld or copper line wires are being tied to pin-type insulators. This preformed tie assures uniformity of construction—reinforces the conductor over the entire length of the tie and prevents chafing of conductors. It's strong, non-rusting, simple in design, easy and inexpensive to apply. When ordering specify the size of the line conductor. Each tie consists of one preformed Copperweld Reinforcing Wire plus a length of straightened, annealed Copperweld Binding Wire sufficient for making a pigtail type of binding on any standard type of side groove insulator.

Complete Grip-Flex Tie packed in bundles of 100.

No.	Approx. Weight Per 100 Ties	Line Wire Size, In.
GFC-78	14 Lbs.	.128
GFC-910	8 Lbs.	.104
GFC-1012	7 Lbs.	.080

Crapo Galvanized High-Tensile Telephone Line Wire

These high-tensile, low-resistance telephone line wires make possible longer-span, lower-cost construction on new lines; provide stronger spans, with lower maintenance expense, on present lines. Development of Indiana Steel and Wire Company.

Galvanized by the Crapo process, which produces a heavy, dense, uniform coating of zinc that adheres tenaciously to the wire and provides dependable protection against corrosion.

Crapo HTL-85

Used extensively for both new construction and for replacement. When used on existing pole structures it tends to increase strength of line, lessens hazard of ice and wind, minimizes service interruptions, and reduces maintenance costs.

Affords improved transmission at voice frequency with currents of voice frequency magnitude.

Has a tensile strength more than 60 per cent greater than standard B.B. wire of the same diameter. No. 12 B.W.G. size makes possible spans of 210 feet in heavy loading, 330 feet in medium loading, and 440 feet in light loading districts.

Furnished in continuous lengths without splices or joints. Galvanized steel compression-type sleeves are recommended for splicing this wire.

Size B.W.G.	9	10	12	14
Diameter..... in.	.118	.134	.109	.083

COPYRIGHT 1936, 1939, AND 1945 BY INDIANA STEEL & WIRE CO.

Crapo HTL-135

Possesses two and one-half times the strength of standard B.B. wire, which makes possible spans of 350 feet in heavy loading districts, 510 feet in medium loading districts, and 650 feet in light loading districts.

The average number of pole structures per mile can usually be reduced to approximately one-half the number required for B.B. wire.

The effective resistance at voice frequencies with currents of voice frequency magnitude is superior to that of the older grade.

Regularly furnished in No. 12 B.W.G. and in continuous lengths without splices or joints.

Galvanized steel compression-type sleeves and dead-ends are recommended for use with this wire.

COPYRIGHT 1950 BY INDIANA STEEL & WIRE CO.

Crapo Galvanized Steel Strand
Class A, B and C Coatings

All wire used in forming a particular size and grade is produced from steel of selected properties, scientifically processed under laboratory supervision and galvanized by heavy, uniform zinc coatings. Both wire and strand are subjected to laboratory tests for tensile strength, elongation galvanizing, ductility and gage to insure high uniform quality in the finished product.

Available in Class A, B & C coatings, conforming respectively with ASTM designations A122-54T, and A218-54T or latest revisions thereof.

Furnished in following standard lengths: 3/8-inch diameter and smaller in 250, 500 and 1000-foot coils and 2500 and 5000-foot reels; 1/2-inch diameter and larger in 250 and 500-foot coils and 1000, 2500 and 5000-foot reels. When ordering, specify size and grade, method of packing (coils or reels) and number of feet per coil or reel.

Crapo Preformed Armor Rods

Preformed Armor Rods provide a simple, practical economical method of reinforcing and protecting overhead conductors and static wires at the point of, and in the region of, the supports. They minimize wear and chafing, eliminate danger from ties and clamps, absorb and dissipate vibration, and act as an armor over the conductor, protecting it against flash-overs and arcing. Provide excellent holding power against slippage.

Installation

Easily and quickly installed. Each rod accurately preformed into an open helix or spiral with an inside diameter slightly less than the outside diameter of the conductor.

Applied in sets, the rods form a snug-fitting, compact, cylindrical armor over the conductor.

No clamps or clips are required to hold the rods in place. Installations on energized circuits can be made with "hot-line" tools designed for the purpose.

Repair of Conductors

Used successfully to repair stranded conductors and to restore the strength of worn or broken conductors where lines are being rebuilt.

Short length rods are also available to protect conductors against abrasion where taps are applied.

Made by Indiana Steel & Wire Company. Available in Galvanized Steel, Stainless Steel, Aluminum, Copperweld and Bronze for all sizes and types of overhead conductor and static wire.

*Recommended for double pin-type insulators and single suspension insulator supports.

Crapo Galvanized Steel Strand
For Overhead Ground (Static) Wire

Designed and manufactured for shielding transmission lines against lightning. Produced in continuous lengths, without welds or joints in the individual wires or finished strand.

Made in accordance with ASTM designation A363-55T or latest revision thereof.

Available in Class A, B and C coatings in High Strength and Extra High Strength Grades in 1/8-in., 3/8-in., 1/2-in., and 3/4-in. sizes.

Furnished in the following lengths for at least 95% of the order.

1/2-in., 3600 to 6100-ft., 3/8-in., 4700 to 7900-ft.; 3/8-in., (a) 3600 to 5800-ft.; 5/16-in. (b) 4800 to 7700-ft.

Up to 5% of the order may be furnished in lengths below these minimums but not in less than 1500-ft. lengths.

(a) Lengths up to 9400-ft. and (b) 12,000-ft. available on special order.

Prices on application.

Crapo Galvanized Steel Cable Lashing Wire

"C" Coated

Used with modern cable spinning machines to lash cable to messenger strand. Extra heavy Class "C" coating.

Wire Diam.—.091 & .061-in. In neat, compact, three-lay coils with straight or tapered arbor holes. Packed 6 in crtn.

Dimensions: Straight Hub Arbor hole—1 7/8-in.; Tapered Hub, 2 to 2 1/2-in.; Coil O.D.—6-in.; Width—1 1/2-in. Length Wire: Size .091" — 325-ft.; .061" — 650-ft. Weight: .091" — 7.2 lbs.; .061" — 6.45 lbs.

Crapo Stainless Steel Cable Lashing Wire

Developed specifically to meet demands for a spinning wire with a high strength to weight ratio and superior resistance to corrosion.

For general application, regularly produced from Type 430 Stainless Steel—A chrome alloy. Also available in Type 302 — A chrome-nickel, and Type 316 — A chrome-nickel-molybdenum steel.

Size Diam., In.	Type Arbor Hole	Nominal Coil Length, Ft.	Nominal Coil Wt., Lbs.
.045	Straight	1200	642
.061	Straight or Tapered	735	717
.065	Straight	450	500

Put up in neat, compact, thread-lay coils. Packed 6 coils to the carton.

Crapo Deadends

For Plastic-Coated Telephone Line Wire

Designed to hold the rated breaking strength of one-pair parallel rural telephone distribution wire.

Formed from tough, springy stainless steel, neoprene coated. Oval shaped to conform to the conductor. No abrasives necessary to provide ample holding power. Extra long length of spiral sections tends to distribute load over greater area and reduce stress concentration.

Deadends are packed in corrugated cartons, 50 sets to the carton.

Crapo Galvanized Steel Conductors

A high tensile, low-resistance steel conductor which makes possible long spans, reduces the number of pole structures required, saves man-hours and material, and reduces over-all construction expense.

Used for rural taplines and single-phase extensions, high-tension transmission lines and branches, primary distribution lines, primary circuits; for mixed commercial, residential and farm service, primary neutrals of three-phase rural feeders and series street lighting circuits.

Available in two grades: Crapo HTC-130 and Crapo HTC-80. Each grade available in stranded (3-wire) construction.

Resistance and Reactance in Ohms per Mile of Single Conductor at 60 Cycles for Various Currents and Conductor Spacings When the Ambient Temperature is 20°C. (68°F.)

**Crapo Tie Splints
For Telephone Line Wire**

Crapo Pre-Tied Splints

A radically new method of "tying-in" telephone line wire. Tie wire and insulator can be pre-assembled in the shop or warehouse on a production line basis, or on the ground at the project site. The applied splint grips the line wire securely and prevents slippage. Protects line wire against wear and abrasion. Simplifies the re-sagging problem. In galvanized steel for use with galvanized line wire and in copper covered steel for use with a copper/steel or copper line wire.

Galvanized Pre-Tied Splints

No.	Line Wire Diam., In.	Diam. In.	Length In.	Wt. Lbs. Per 100
109PT134	.109	.134	17.5	8

Copper/Steel Pre-Tied Splints

080PT114	.080	.114	16.5	6
102PT128	.102	.128	17.5	8

Crapo Double V Tie Splints

Especially designed for long span construction. Reinforce and protect telephone line wire at the point of support. The twin "V" notches prevent contact between line wire and insulator, minimizing wear and abrasion. Spiral sections provide a gripping action to prevent slippage under loading.

Available in galvanized steel for use with galvanized line wire and in copper-covered steel for use with copper-steel or copper line wire.

Galvanized Double V Tie Splints

No.	Line Wire Diam., In.	Diam. In.	Length In.

165VC144	.165	.144	21

Crapo Preformed Spiral Tie Splints

A simple, economical means of reinforcing and protecting telephone line wire from abrasion and wear at the insulator. Prevents stress concentration at points of support, reduces possibility of failure due to vibration. Easily and quickly applied by hand. No tools required.

Available in galvanized steel for use with galvanized steel telephone wire. Can also be furnished in copper-covered steel for copper/steel or copper telephone line wire.

Crapo Tangent Supports

For plastic-coated one-pair parallel rural telephone distribution wire of galvanized steel or copper-covered steel.

Performed from tough, springy, corrosion-resistant stainless steel wire, and coated with neoprene. Provides simplest and most effective method for suspending plastic-coated one-pair parallel telephone wire.

Neoprene coating increases friction between support and conductor, further reducing the possibility of slippage.

Support is formed from a large single stainless steel wire of 109-in. diam. The spirals conform to conductor shape, provide a closer, more uniform gripping action. Loop eye attaches support to pole easily and quickly.

Packed 125 pieces in corrugated carton. Weight, 9.5 Lbs.

Copperweld Power Transmission and Distribution Conductors

Copperweld-Copper—3-Wire Stranded

Used for all types of overhead distribution lines and are particularly well suited for long span lines where high strengths are advantageous. They provide safe, permanent and economical construction, and are available in a wide range of strengths and conductances.

The three wire triangular shape of these conductors tends to minimize line vibration, and their large individual wires provide a very substantial and rugged conductor. Easily installed and give excellent performance.

They combine the high conductance of copper with the high strength of Copperweld. The Type A conductors are composed of one extra high strength Copperweld wire and two hard-drawn copper wires. Other types include the Type C, composed of one 40% conductivity Copperweld wire and two hard-drawn copper wires, and the Type D, composed of two Copperweld wires and one copper wire.

The following table includes the more generally used sizes of Copperweld-copper 3-wire strands. Other sizes, and Copperweld-copper 7-wire strands used principally for the higher conductance requirements are available upon request to GRAYBAR.

Copperweld Telephone Line Wire

Use Copperweld Line Wire wherever you need to combine strength with good conductance. It is non-rusting, light in weight, easy to handle and economical to string.

Copperweld's voice transmission characteristics are better than any other high-strength conductor. It is the only long-span wire suitable for carrier current systems. The permanent high strength of Copperweld permits

safer long spans that stand up under severe weather conditions. For long distance and carrier current lines, the recommended sizes are .128-in. 40% conductivity High Strength and .104-in. 40% conductivity High Strength. The choice usually depends

on electrical requirements. For short subscriber loops, the .080-in. 30% conductivity Extra High Strength Copperweld Wire has adequate conductance and is most economical. For longer loops where the electrical requirements are more demanding, use .104-in. 40% or .080-in. 40% High Strength Copperweld.

Rods can be bulked packed or furnished in sets. If requested, armor rods .182-in. and larger are center-marked at no additional charge. A small charge will be made for center-marking rods smaller than .182-in.

Specifications for the following Preformed Armor Rods furnished on request:

Aluminum alloy rods for A.C.S.R. Generally used as overhead ground wire.

Copperweld and bronze rods for copperweld, copperweld-copper and copper conductors.

Aluminum alloy line guards for A.C.S.R. and all-aluminum conductors.

Aluminum alloy line guards for self-supporting service-drop cable.

Aluminum alloy tap rods for A.C.S.R. and all-aluminum conductors.

Copperweld and bronze tap rods for copper and copperweld conductors.

Aluminum alloy patch rods for A.C.S.R. and all-aluminum conductors

Alcoa Tapered Armor Rods

For A.C.S.R.

Illustrations below show the common applications of tapered armor rods on the larger sizes of A.C.S.R. Table below gives detailed information for ordering by catalog number, and for choosing suitable cable grooves in clamps or insulators.

Where double supports are widely spaced, as sometimes occurs when two strings of suspension insulators are used, armor rods of special length may be required. When ordering such special armor rods, specify distance between centers of supports.

Armor rods are shipped in straight bundles tied in sets as follows:

- (a) 67" and less in length are tied at each end and at two intermediate points equally spaced.
- (b) Over 67" in length are tied at each end and at three intermediate points equally spaced.

*Choose suspension clamps or pin insulators with grooves preferable 5 to 15 per cent larger than this dimension.

§Armor rods for double supports.

†Armor rod clips (V-bolt type) or armor rod clamps are required for holding the ends of the armor rods. On high voltage lines where corona is a factor, armor rod clamps are preferred. Two clips or two clamps are required per set of rods.

For prices, and for details of larger-size rods, contact Graybar.

Each joint consists of two aluminum sleeves. Catalog number specifies complete joint i. e., two sleeves. For making this joint two twisting wrenches are required. In ordering wrenches, specify same catalog number as joint. Prices on application.
 †Order Catalog No. 551 Twisting Joint Wrenches.

Perma-Grip Clamp

Protected Thread Clamp

Chance Hot-Line Clamps

Provide secure, high-conductivity connections. Current carrying capacity is in proportion to that of the maximum jumper wire for which each clamp is designed.

Perma-Grip Clamps: These clamps made in a complete range of sizes, each being scientifically proportioned to give electrical conductivity without heating. They have high mechanical strength and have been proved in use for many years. Gripping jaws make a 3-point contact with conductors. USS threads permit quick, easy application and a tight, positive grip.

Protected Thread "P.C." Clamps: Have protective hood over all working parts and include a sealed waterproof thread chamber filled with corrosion-resistant compound. Clamps may be easily removed from the line after long periods of exposure and use.

Wide jaws assure good current distribution. Secure contact assured by locking spring. Jumper terminal above the conductor balances the eye screw to alleviate torsional stress.

"P.C." Clamps are available with contact surfaces precoated with Chance z.l.n. 100 Electrical Contact Aid. Each clamp is sealed in a transparent plastic bag to protect it from damage and foreign matter. Linemen can remove clamp without removing their globes by snipping end of bag with side-cutters.

*Straight and Preformed Aluminum Armor.

To order precoated individually packaged "P.C." Clamps, substitute "P" for "S" in the catalog numbers listed above. For example, S1515-CC becomes P1515-CC.

Quantity prices on request.

Chance Uniclamp Connectors

510 AGP Uniclamp

O-UC Uniclamp

Made in cadmium-coated and uncoated aluminum-bodied and copper-alloy bodied styles.

One-piece construction means there are no loose parts to drop. Castings swivel independently for easy installation.

For connecting large size copper or aluminum wires from No. 1/0 to 1000 Mcm.

Series 500 are available with contact surfaces precoated with z.l.n. 100 Electrical Contact Aid. Each clamp is sealed in a transparent plastic bag to protect it from damage and foreign matter. Linemen can remove clamp without removing their gloves by snipping end of bag with sidecutters.

Reliable Flip-On Tap Clamps

No. 555AL

No. 555ALC

High strength heat treated aluminum alloys.

For connecting to copper or copperweld wires, bimetallic aluminum-copper inserts are used. The copper faces of this bimetal contact the copper wire, and the aluminum sides are locked into heavy sections of aluminum alloy which separate dissimilar wires and prevent corrosive action between them.

Chance U-Bolt Connectors

1U-Bolt Connector

2U-Bolt Connector

Excellent for general-transmission and heavy-distribution connections, loops, taps, etc.

Available in a 1-bolt (with either aluminum or steel hardware) and a 2-bolt type (with aluminum hardware only).

Cast of high-strength, heat-treated aluminum alloy, these connectors are designed for making aluminum-to-aluminum connections.

They are "brightdipped" and coated with compound to assure low-resistance contact surfaces.

Both 1U-Bolt and 2M-Bolt Connectors are engineered for long-lived joint efficiency.

Contact surfaces have the area required to make tight, low-resistance connections.

Conductor grooves are contoured to trap all outside conductor strands — within the clamp-design range — to prevent "bird caging" under surge conditions.

Normal installation torque places castings and bolts under a resilient stress that maintains a good connection under varying operating loads and temperatures.

Chance 1U-Bolt and 2U-Bolt Connectors are designed to meet all applicable NEMA and REA specifications. They have been thoroughly tested to assure performance.

Available with contact surfaces precoated with Chance z.l.n. Electrical Contact Aid. Each connector is sealed in a transparent plastic bag to protect it from damage and foreign matter. Linemen can remove connector without removing their gloves by snipping end of bag with sidecutters.

Wire-Brush Conductors—Apply Contact Aid

Contact GRAYBAR for quantity prices.

Reliable Two-Bolt Connectors

For Copper and Copperweld Wires

Designed to give high clamping pressure over the largest possible area. One-piece design . . . even when supplied with spacer.

Also supplied plated for use in making aluminum-to-aluminum connections and aluminum-to-copper connections.

Without Spacer

Reliable Service Entrance Connectors

Aluminum Bodies

An extruded aluminum body with a lot of area and with slotted aluminum screw and two spacers provides a technically proper connector for aluminum to copper and aluminum to aluminum—the entire connection, when made up with conductors, is preponderantly aluminum.

The first spacer under the screw protects the one conductor from screw. The second spacer separates the two conductors. Opposing spacer surfaces are grooved to line up the conductor. Aluminum bodies and aluminum spacers are cleaned and treated to eliminate oxidized contact surfaces.

Two Aluminum Spacers For Aluminum to Aluminum

Service Entrance Connectors may not be assorted with Split Bolt Connectors to obtain quantity price. Quantity prices on request.

Chance Parallel Groove Clamps

No. PG100

These aluminum-alloy-bodied clamps are designed for low-cost, easy-to-install power-line connections. They are made in "AA" series for aluminum-to-aluminum connections and an "APG" series for all connection combinations. "AGP" clamps are protected with a heavy FORTIFIED cadmium coating that wards off oxidation and corrosion between unlike metals. "AA" clamps are uncoated.

No. PG200

There are two types of clamps as to contacts. Series 100 clamps have overlapping contacts on one side and a straight slide-in groove on the other. Series 200 clamps have overlapping contacts on both sides. Clamps are available with steel hardware.

Clamps are available with contact surfaces precoated with Chance z.l.n. 100 Electrical Contact Aid. Each clamp is sealed in a transparent plastic bag to protect it from damage and foreign matter. Linemen can remove clamp without removing gloves by snipping end of bag with sidecutters.

100 Series

No.	Line	Description	Tap	Wt. Per 100, Lbs.	Per 100
PG110-AA	1/0 to 6		1/0 to 6	18	\$ 29.25
PG110-AGP	1/0 to 6		1/0 to 6	18	49.00
PG120-AA	4/0 to 2		1/0 to 6	29.3	39.55
PG120-AGP	4/0 to 2		1/0 to 6	29.3	58.45
PG130-AA	336 MCM to 1/0		1/0 to 6	31.6	41.75
PG130-AGP	336 MCM to 1/0		1/0 to 6	31.6	57.55
PG140-AA	4/0 to 2		4/0 to 2	29.4	63.00
PG140-AGP	4/0 to 2		4/0 to 2	29.4	74.65
PG150-AA	556 MCM to 4/0		4/0 to 2	55.3	121.90
PG150-AGP	556 MCM to 4/0		4/0 to 2	55.3	174.20

200 Series

PG210-AA	1/0 to 8		1/0 to 8	19	29.25
PG210-AGP	1/0 to 8		1/0 to 8	19	49.00
PG220-AA	4/0 to 2		1/0 to 6	30.3	39.55
PG220-AGP	4/0 to 2		1/0 to 6	30.3	58.45
PG240-AA	4/0 to 2		4/0 to 2	30.4	63.00
PG240-AGP	4/0 to 2		4/0 to 2	30.4	74.65

Note: If aluminum hardware is desired, substitute "1" for "0" in the above numbers. For example: PG110-AA becomes PG111-AA.

To order precoated individually packaged Parallel Groove Clamps, add the suffix "P" to the Catalog numbers. For example, PG110-AA becomes PG110-AA-P.

Chance Parallel Groove Clamps

2-Bolt Clamp

3-Bolt Clamp

Designed to withstand high mechanical and electrical stress, for maximum joint efficiency and current-carrying capacity. They are adaptable to both distribution and heavy-service connections—for making jumper connections at dead-ends, or to connect tap lines or branch feeders to main-line conductors. They meet NEMA and REA specifications for power connectors.

Clamps are cast of high-strength, heat-treated aluminum alloy for use on ACSR or all-aluminum conductors. "Bright dipping" and a coating of compound assure low-resistance contact surfaces. Clamps available with either aluminum or steel hardware.

Clamp body is contoured to make the bolts self-aligning and self-centering, thus applying equal pressure on both main and tap lines. Conductor grooves contact and support all conductor strands.

Installed on brushed conductors, they will carry fault currents without pitting, arcing, or burning. Fault currents ranging from 8500 to 25,000 amperes were employed in tests.

Available with contact surfaces precoated with Chance z.l.n. 100 Electrical Contact Aid. Each clamp is sealed in a transparent plastic bag to protect it from damage and foreign matter. Linemen can remove clamp by snipping end of bag with sidecutters.

2-Bolt Parallel Groove Clamps

Chance Cable Clamps

For use on outside and inside cable installations; also for supporting power cables at dead ends, corner turns, etc.

Can be used on all copper power cables from 3/0 to 2000 MCM inclusive. Only one size required. Must be clamped on bare wire after removing 4 1/2 in. of insulation.

They eliminate the need for costly splices, hazardous soldering operations and waste of costly cable, where power cable is used in industrial plants or on transmission cable where strains do not exceed 1200 lbs. (They are not for use on telephone or aluminum power cables.)

9057	For 61 & 41 LD.....	1.00
9058	For 101, 107, 207, 307, 407, 250 LD.....	1.00

Reliable Wirelink and Wirevise

**Tension Splice and Deadend (Automatic Type)
For Communications Steel, Copper and Copperweld Wires**

Wirevise

Wirelink

Wirevise

For use with rural distribution telephone cable supporting wire, and .109 and .120 conductor, and all 12 BWG steel wire. Heat-treated aluminum tubes with case-hardened, triple-protected steel jaws—deadend has aluminum yoke and stainless steel bail.

No.	Description	Wire Size	Shp. Wt. Lbs. Per 100	Net Price Per 100 Broken Package
5058	Wirevise	12 BWG .109	4 1/2	\$52.50
5062	Wirevise	.120-.134	18 3/4	70.60
5059	Wirelink	12 BWG .109	4	35.00
5063	Wirelink	.120-.134	8	45.90
*5059N	Wirelink	12 BWG .109	6	59.00
*5063N	Wirelink	.120-.134	11

*Neoprene covered.

Wirelink

Copper tubes, bronze jaws—deadend has bronze yoke and stainless steel bail for use with copper and copperweld.

5078	Wirevise	9 and 10 AWG	7 1/2	65.00
5079	Wirelink	9 and 10 AWG	6 1/2	45.00

Wirelink and Wirevise may be assorted in carton quantities or standard packages along with Strandlink and Strandvise to obtain quantity prices.

Quantity prices on request.

Reliable Snub Deadends

For use on ACSR without armor tape.

Develops approximately the strength of the conductor and distributes the strain equally on all strands. The spiral form carries the snub principle to full advantage.

Easy to install; has enough margin of holding power so that moderate tightening of the clamp develops the full strength of the wire.

The light weight of the clamp minimizes vibration fatigue strains and prolongs the life of the conductor.

For Sizes 2 or 4 ACSR Wires.

No. 420 Shipping Weight 1 1/4 lbs..... Each \$1.42

Pulling Hook for Snub Deadend

No. 9054—Pulling Hook for Snub Deadend.... Each \$0.75

Reliable Strandvise With Stainless Steel Bail

For deadending galvanized, corrosion resistant or stainless steel suspension strand; guy strand; static wire. All grades and all tension ratings.

Short Bail for All Standard Hardware Eyes

No.	Strand Size Inches	Shp. Wt. Lbs. Per 100	Net Price Per 100 Brkn. Pkg.

Reliable Steelcase Strandvise and Gripping Chucks

End Anchors for Prestressed Concrete

The self-acting parts are removable. Gripping chuck, catalogued separately by the set, can be speedily renewed. Strandvise is packed two pieces in a sealed oil proof pouch with twelve pair (24 pcs.) in a carton or std. pkg.

Steelcase Strandvise (Complete)

No.	Wire Range	Dimensions, In. Width Lgth.	Shp. Wt. Lbs. Per 100	Net Price Each

Quantity prices on request.

Reliable Insulated Tension Splices

Consist of two straightline splice units attached to an insulating section of strong, tough glass melamine with high dielectric strength, low moisture absorption and great chemical stability. Convenient for sectionalizing secondaries, for secondary banking, for series street lighting and wherever a break is needed in the line. They will develop full line wire strength and can be installed on existing construction without splicing in an extra piece of wire or resagging the line.

For Copper Wires

(Two Sizes—1 and 3 In. Insulation)

No.	Max. Wire Size, A.W.G.		Insulated Lgth. In.	Std. Pkg.	Shp. Wt. Per 100, Pounds	Net Price Per 100 Broken Pkg.

*27XMC-3	1	2	3	50	55	451.20

*Maximum load capacity, 2,000 lbs.

Reliable Reducer Splices

These combination splices will save money in urban distribution where a line drops a portion of its load and the next smaller wire size will carry the current flowing through the rest of the line.

Reliable Straightline Splices

"55" Series Tension Splice For Copper Conductors

A new splice designed to prevent improper installation of stranded conductors. Conductor ends reach well past the gripping jaws. Factory-installed pilot cups prevent jaws from gripping conductor until conductor is "home".

No.	Solid	Max. Wire Size (AWG) 7 or 19 Str.	3 Str.	Std. Pkg.	Ship. Wt. Lbs. Per 100	Net Price Per 100 Broken Pkg.

"55" Series Feed-Thru Type Tension Splice For Aluminum Conductors

Heat treated aluminum tubes, housing heat treated aluminum gripping chucks make up these tension splices and deadends for all aluminum solid and stranded conductors. These same splices and deadends are also suitable for aluminum alloy conductors.

Only splice cat. nos. AL61, AL41 and AL21 for solid conductors have release slots. Starting with cat. no. AL5547, all splices for stranded conductors are "55" Series feed-thru type with pilot cups. Strand end is enclosed by cup and guided through gripping chuck to center stop. All splices are greased and individually packaged at the factory.

Reliable Split Cable Sleeves

Tinned Copper

Conform to E.E. I. recommended specification TD-8, 1940, for straight tinned copper connectors for stranded conductors. Smoothly tinned; easily soldered.

For use on round or sector cable. Dead soft anneal permits tight clamping on conductor before soldering.

Single Tube Compression Type

Squeez Sleeves and Tools with standard dies are made to the close tolerances characteristically necessary for the work to be done. Sleeve sizes, as well as die groove dimensions, are pre-determined by the size and tensile strength of the wire to be joined.

All types of Reliable Squeez Sleeves except Squeez Taps, are internally impregnated with a dispersion of fine, sharp silicon carbide particles to assist holding ability. The electrical properties of a made-up joint are highly efficient. The resistance of a made-up joint is less than an equal length of wire. This high electrical efficiency is stable.

For Galvanized Steel Conductors

Reliable Aluminum Squeeze Sleeves
Service Tension Sleeves

For service extension or repair, sleeves develop the ultimate strength of all-aluminum and approximately 50% of ultimate with ACSR and are coated internally with inhibitor compound.

All sleeves and deadends are clearly marked showing Cat. No., conductor size and die groove. Std. Pkg. 50.

Design Strength, AL—Ultimate, ACSR—800 Lbs. Min.

No.	Conductor Sizes	Die Groove	Compress. Per Side	Net Price Per 100
7064	6 str. AL, ACSR 4 sol. AL to same	P	6	\$15.20

Reliable Span Clamps

For One or More Mid-Span Service Drops

No. 6066 Copper Saddle

No. 5535 Span Clamp

Designed for 1/4 in. thru 1/2 in. Dia. steel, copper-weld or ACSR ground or supporting strand.

No.	Description	Equivalent Conductor Size	Std. Pkg.	Ship. Wt. Lbs. Per 100	Net Price Per 100
5535	Galvanized Steel Span Clamp (Less Saddle)		25	126	\$72.00
Al5535	Aluminum Span Clamp (Less Saddle)		25	57	89.00
6066	Copper Saddle	4 Cu	25	18	27.60
6067	Plated Copper Saddle	4 Cu, 2 Al	25	18	30.00
6068	Aluminum Saddle	4 Al	25	6	18.00
6069	Aluminum Saddle (Heavy)	2 Al	25	6 1/2	20.50

Appropriate saddles are listed separately. They provide means for ground connections.

Reliable Squeeze Deadends

For Communication Circuits and Power Distribution

Reliable Squeeze Deadends consist of a Squeeze Sleeve (splicing) with a factory-assembled loop (bail) in one end. The other end is for the line wire, and only the line wire is installed by the lineman. The loop, or bail, is a corrosion resistant, high strength, D-shaped wire (stainless steel or bronze) which is factory-assembled by power compression to one-half of the sleeve. Thus you have a prefabricated loop deadend, ready for insulator, or other deadend fixture, that is stronger than the line wire itself.

For Copper Conductors

All-Stainless Steel Clamps for general purpose use (including Coastal), and economical combination Stainless and Aluminum Clamps for "normal" areas.

Advantages of floating type shim are: (1) Permits smoother clamping of the drop wire; (2) Clamps sets-in readily at initial installation yet will compensate for further loading and (3) Plain floating shim makes removal easy and prevents damage to insulation.

Reliable Concentric Cable Clamps

Flexible Bail Type

Low cost clamps that hold the cable securely under all conditions without bending or snubbing, or otherwise damaging the insulation. Have a large margin of strength over field requirements, are easy to install and neat in appearance.

Made of non-corrosive materials — the phosphor bronze bail is a universal attachment for racks, wire-holders, eye-bolts, hooks, messengers, etc.

For Round Conductors

No.	Cable No.	Range of Clamp Cond. In.	Max. In.	Min. In.	Width, In.	Bail Lgth., In.	Std. Pkg.	Shp. Wt. Per 100 Lbs.	Net Price Per 100

Emery Treat Copper Shell	T	4.00

Sizes and types service clamps may be assorted in std. pkgs. to obtain quantity prices.

Terms: Net 30 days, F.O.B. point shipment with freight allowed on 50 lbs. or more.

Note: Crossed bails are standard. The spring tension with crossed bail insures that detachable leg will not disengage before installation is completed.

Chance Nico-Press Splice Tools

Used with the Universal Splice Tool to apply Nico-Press type sleeve splices on energized lines. Crimps sleeves to form a firm, fast bond when conductors are spliced.

Maplac® coated pole, tested to 75 kv. per foot for five minutes to assure safety.

Heavy Duty Nico-Press Splice Tool is of the same design as the standard tool, but has a four-step rack incorporated into the handle-lever assembly, which permits travel necessary for the smooth operation of the jaws . . . supplies leverage for crimping.

No.	Description Length, Ft.	Type	For Nico-Press Jaws No.*	Wt. Lbs.	Each

*Jaws not included.

†LINEMEN'S PREFERENCE—Recommended by Chance Hot Line Tool Demonstrators.

Chance Universal Splice Tools

Used in conjunction with Nico-Press splice tool or with any automatic splices.

M4455-52 Universal Splice Tool Each \$12.25

Alcoa Hydraulic Compressors

Model 12-A

Designed primarily for installing Alcoa Tubular Compression Accessories on distribution line conductor. Twelve tons thrust can be developed by this portable hand-operated compressor.

With a C-head capable of being rotated through 180 degrees, the compressor is easily hooked over conductor or accessory. Dies are advanced, closed under compression, and retracted by simple manipulations at the compressor handles. An audible safety valve operates when the compression is completed.

Neoprene covering for body and handles is recommended to provide mechanical protection for tool as well as guard against contact with live parts. It is not intended to afford protection to operator for hot line work.

The Model 12-A may be adapted to use with "Hot Sticks."

Metal case provided for the compressor contains steel rack for dies.

Model No.	Length, In.	Width, In.	Height, In.	Wt. Lbs.

Reliable Squeeze Tools

No. 2-DJ

No. 3-BA

The Reliable Squeeze Tools are made in two types. The Number 1, 2 and 10 tools are rugged toggle type tools which operate smoothly and easily, yet which apply a maximum amount of pressure on the sleeve. Can be easily and accurately adjusted. The Number 3 tool has Vinyl Plastisol handles. Other tools available with insulated handles, at additional cost, when specified.

Hubbard Underground Cable Racks
Channel Steel
Hot Galvanized

Made from 4 x 1 1/2 x 3/16-inch channel and attached to manhole wall by 1/2 x 4-inch expansion bolts or No. 2246 Anchor Bolts. Cable rack extensions for mounting racks away from wall are available. 12 gage pressed steel hooks will accommodate from one to four cable rack insulators installed as shown in the above illustration. Insulators No. 2114 and 2115 occupy the same hook length and are interchangeable. That is, No. 2114 designed for 1 3/4-inch cable requires 4 1/2-inches of hook length, and No. 2115, while designed for 2 5/8-inch cable requires the same space.

When more than one insulator is used, they are generally placed an inch or so apart to provide electrical and mechanical clearance. A stop is provided on each hook to prevent the insulators from sliding off the end.

†Heavy Type Rack.

Hubbard Cable Rack Extensions
Hot Galvanized

For mounting racks away from the wall. Racks mounted on extensions take approximately 4 1/2-inches less wall space than is needed for the rack. If extension is turned around and mounted, it will occupy 10 to 13-inches more wall space than the length of rack. Mounting holes are for 1/2-inch bolts. Order two extensions for each rack to be mounted.

No.	Steel Size	2101	2102

Extension from Wall	in.	7/8	7/8
Ship. Wt. per 100	lbs.	550	660

*Western Union Std.

**Hubbard Underground Cable Racks
Hot Galvanized**

The Rack sections are made in three lengths which can be combined into almost any desired length. Made from 1½ x ¾ x ¾-inch open hearth steel channel, strong enough to support the heaviest cable. Fasten to man-hole wall with ½ x 4-inch Peirce Expansion Bolts. The hooks are cut from open hearth steel T sections and have a smooth, well rounded top surface 1½ inches wide which will not injure the sheaths of cables. Hooks are easily attached and, with the weight of the cable on them, hold securely to the channel back.

Locktype

Designed to allow for variations of cable spacings where desired. Hooks are certified malleable iron, and lock into place easily. Locktype design eliminates loose, wobbly fits and insures minimum movement in all directions. Insulators are locked on the hook by a stop at the outer end.

Heavy Type

Offset at the lower end to permit the joining of successive racks vertically. Racks may be mounted to manhole walls with two ½-inch by 4-inch expansion bolts or two No. 2246 anchor bolts. Insulators fit snugly over the pressed steel hooks and are held in place by the weight of the cable.

958	3½	4	24,600	4½	11.10

Plain Flexible Pulling Grips

Single weave are for pulling aerial cable and feed through rings without displacing

them. Also for small underground cables where ducts are clean or soil is not gritty.

Double weave are for pulling underground cables where wear is light and use of reinforced grips is not required.

Single Weave — Length 18-In.

Reliable Hard Wire Pulling Grips

Solid Wire — Double Weave

These grips are very tough and rather stiff and will withstand great

wear. For use where large quantities of underground cable must be pulled. The grip must fit exactly for proper performance.

For swabbing ducts this grip can be heavily packed with waste and is very satisfactory.

Reliable Bronze Cable Grips

Used for permanent fastenings and supports for cable. Can be furnished in all standard designs and sizes specified for steel.

To determine prices: Add 20% to steel prices for sizes ½-in. minimum diameter to 1½-in. minimum diameter. For sizes 2-in. minimum diameter and larger, add 30%. Example: No. 1023, steel price \$7.90: Bronze price, \$9.48.

Reliable Split Grips

For moving working cable or any cables where the end is not accessible. A special arrangement of strong hooks, with few hooking operations, makes the grip easy to fasten or loosen.

Double Eye Split

Single Weave — Length 18-In.

Anaconda Potheads

For use in sealing, insulating and protecting terminations of insulated power cables and to provide a means for continuing the electrical conducting path beyond the pothead.

Designed to exclude moisture, prevent compound leakage and to avoid internal flashover.

Typical potheads and accessories are illustrated below. A complete line of cable terminating equipment is available to meet your particular system requirements. For detailed information, ask Graybar for Anaconda Catalog No. C-79-13-14.

Natco Underground Clay Conduit

This conduit has many features that make it ideal for cable protection. Made of special high-grade clays, vitrified into a flint-like rock and glazed to smooth glass-like surfaces. It will not soften or swell, deform or disintegrate on exposure to heat, moisture, steam or chemical attack. Absolutely free from caustic alkalis, acids and organic compounds. Protects cable from corrosive soils or ground waters, from cinder fills or chemical wastes. Will safely carry all normal street loads and stand up under severe traffic vibration. Also permits immediate back-filling of trenches.

Natco Standard Single Duct Conduit

Adapted for high tension power lines, single cable terminals or for low tension laterals, as in telephone or signal lines.

When building up duct banks it provides two heavy insulating walls between adjacent cables, and permits breaking or staggering of all joints throughout duct bank.
