CASH IN ON THE "30 DAY *Free Trial* OFFER"

WOULD you buy an automobile while you were blindfolded? Of course not! You would want to examine it carefully. Try it for 20 miles or more. Take it up a hill. Watch it step out in traffic. Give it every conceivable test of performance. Then, if it meets your requirements, you're ready to talk business.

Then why should you buy a radio set blindfolded? That is just what the average purchaser does. Mr. and Mrs. Radio Buyer

listen to a set perform for a half hour—perhaps for even an hour—and if it sounds good they purchase it. They fail to realize that the very same set may sound entirely different when it is installed in their own home, because of differences in local receiving conditions.

WE GUARANTEE TO SATISFY!

We don't ask you to take our word that Lafayette will satisfy you! Instead, we give you an unequalled opportunity to test Lafayette in the privacy of your own home—for a full 30 days. Listen to it perform. Make it pull in every local station in your vicinity during the busy early evening hours. Then go after distance. You'll be thrilled.

Compare Lafayette with your neighbors' sets. Listen to its tone quality. Try it on clear, sunny days, or stormy, rainy nights. Put it through every test you can possibly give a radio set. Try it for two weeks, three weeks or a full 30 days. See for yourself how trouble-free the set is at all times. Yes, try Lafayette for 30 days, in your own home! Make your own decision as to whether or not Lafayette represents a truly fine investment in radio quality and satisfaction. Then, and then only, consider that you have purchased your Lafayette.

If, however, for any reason whatsoever you do not care to keep your set—if you are not absolutely and completely satisfied—your money will be refunded, without questions.

That is the famous 30 day FREE TRIAL OFFER originated by LAFAYETTE. It is, to the best of our knowledge and belief, the most liberal trial offer ever made by a radio manufacturer. Only our unlimited confidence in the quality that has been built into every Lafayette receiver makes it possible for us to offer such a broad guarantee.

This Guarantee Protects You

Guarantee

We guarantee Lafayette—the Bonded Radio—to be satisfactory in every detail and to reach you in perfect condition—that it will give you the service you have a right to expect—that it represents full value for the price you pay.

Every buyer of a Lafayette radio set, purchased from Wholesale Radio Service Company, Inc., is entitled to 30 days' free trial, in accordance with the terms of our regular 30 day Free Trial Offer. If at the end of the period you are not absolutely satisfied with your Lafayette receiver, return it to us on or before the 30th day and your money will be refunded in full, less transportation charges.

experts, is fully prepared at all times to better our pledge of same-day shipments. Every modern device for speeding up deliveries is utilized. Huge stocks of merchandise are maintained at all of our branches—our famed teletype service insures shipment from another point should a

1920 AN INDUSTRY IS BORN!

1920—AN INDUSTRY IS BORN! In the turmoil and confusion of radio's pioneer days, Wholesale Radio Service Company, Inc., came into existence. To a field racked by uncertainty, instability and haphazard business methods it brought three cardinal principles from which it has never deviated: To sell only dependable, quality merchandise . . . to sell at the lowest possible prices consistent with such quality . . . to render the fastest service it is possible to provide on every order. These things were promised—and through 15 years these promises have been kept.

RADIO MARCHES ON!

1936—RADIO MARCHES ON! The infant business has developed into one of the largest industries in the U. S. And Wholesale Radio Service Company, Inc., has kept pace—grown in size to the largest organization of its kind in the world. Today, more than ever, we realize the importance of the principles which have built this organization, because we have, in our own growth, evidence that you—our customers—have placed your seal of approval on **WHOLESALE RADIO'S** policy of Quality Merchandise—**Lowest WHOLESALE Prices and SERVICE!**

THE Lafayette

4 TUBE with **DYNAMIC SPEAKER**
A.C.-D.C.

The Little CAPTAIN

THE new Lafayette CAPTAIN is a little fellow who does a mighty big job. His efficient four tube circuit will capture many interesting hours of entertainment for you. Take him with you when traveling or keep him at home—he's the finest companion you ever had.

WORKS ON A.C. OR D.C.

No matter whether you have A.C. or D.C., just so long as it's 110 volts he will perform to your entire satisfaction. His four tubes include: one 38, one 6C6, one 12Z3 and one 6D6 in a T.R.F. circuit that is both sensitive and selective. Wave length range 200 to 500 meters.

BEAUTIFUL CABINET

And he's dressed up in a neat little cabinet that's polished to perfection. The large airplane dial is clearly calibrated and easy to read too. He's a mighty big value for the money.

MODEL J-10—Lafayette CAPTAIN 4 tube T.R.F. receiver complete with tubes. For operation on 110 V. D.C. or 110 V. 60 cycle

A.C. Dimensions: 9½" wide, 5¾" deep, 8" high. Shpg. wt. 10 lbs. Code, TRAVES.

List Price, \$14.90.

YOUR COST,

With Tubes

\$7.45

The Little MAJOR

THE Lafayette MAJOR is a five tube T.R.F. A.C.-D.C. set incorporating two of the new metal-jacketed tubes. These tubes add considerably to the performance of this excellent little receiver.

EFFICIENT CIRCUIT

The highly efficient T.R.F. circuit employs five tubes including: 1-6J7, 1-6K7, 1-25Z5, 1-43 and 1-185R8 ballast tube. The tuning range is from 200 to 550 meters.

DYNAMIC SPEAKER

Tone quality is excellent due to the electro-dynamic speaker employed. A large, accurately calibrated airplane dial makes station logging and tuning easy. The MAJOR is housed in an attractive cabinet beautifully polished.

MODEL J-14—Lafayette MAJOR 5 tube T.R.F. receiver complete with tubes. For 110 V. D.C. or 60 cycle A.C. operation. Dimensions: 9½" wide, 5¾" deep, 8" high. Shpg. wt. 11 lbs. Code, TOMIL. List Price, \$18.90.

The Little COLONEL

THE proudest little fellow in the parade is the Lafayette COLONEL. But he's no prouder than you will be when you own one like him! A thoroughbred six tube superheterodyne, he reaches out and brings in those stations as clear and crisp as many a big set ten times his size. His tuning range is from 200 to 550 meters.

METAL JACKET TUBES

Two of the new metal-jacketed tubes are included in its tube complement, consisting of one 6A8 as combined mixer-oscillator, one 6K7 as I.F. amplifier, one 76 as second detector, one 43 as power output tube, one 25Z5 as rectifier and one 185-R as ballast tube.

FULL TONED DYNAMIC SPEAKER

The tone quality of the COLONEL is exceptionally fine due to the true electro-dynamic speaker. The cabinet is made of highly polished hardwood beautifully designed.

The large, accurately calibrated airplane dial makes logging and tuning of stations simple. MODEL J-16—Lafayette COLONEL 6 tube super-het complete with tubes. For 110 V. D.C. or 60 cycle A.C. operation. Dimensions: 11" wide, 6 1/4" deep, 8" high. Shpg. wt. 13 lbs. Code TOYIA. List Price, \$27.50.

YOUR COST \$13.75

The Lafayette Little GENERAL

HE'S the biggest little fellow in the parade and he leads them all! No matter what you want—in the line of stations—he'll get them for you.

Short wave? Yes, sir! His short wave band from 18 to 50 meters will get them—both foreign and domestic—clearly and easily. And as for regular domestic broadcast stations, he'll capture them for you by the score on his 175-to-550 meter band.

NEW ALL-METAL TUBES

The six-tube superheterodyne circuit includes two of the new all-metal tubes in its tube complement, which consists of one 6A7, one 6K7, one 6J7, one 43, one 25Z5 and one resistor or ballast tube. A three-gang condenser is used in this excellent receiver, employing one section to tune a pre-selector stage. The tuning dial is of the airplane type and a 6 1/2" electro-dynamic speaker provides exceptionally fine tone. Beautiful walnut cabinet.

MODEL A-24—Lafayette GENERAL 6 tube two band super-het complete with tubes. Range 18-50 and 175 to 550 meters. For 110 V. D.C. or 60 cycle A.C. Dimensions 14" wide, 6" deep, 12 1/4" high. Shpg. wt. 16 lbs. Code WILMA. List Price, \$35.90.

YOUR COST \$17.95

EUROPEAN (190 to 2000 Meter) MODEL EUROPEAN Model A-25 Lafayette General, same as above but with 190 to 550 and 850 to 2000 meter range. No short wave range. Complete with tubes.

5 Tube Super Het.

6" DYNAMIC SPEAKER

The three distinct bands cover the following wavelengths: 200-560 meters, 66-187 meters, 16-50 meters, thus bringing you American broadcast, police and foreign stations. This receiver has a 6" dynamic speaker. The large dial is fully calibrated. Surely you must agree that here is true value that include those three prime prerequisites: **Power-Performance-Price!**

LAFAYETTE engineers have made every endeavor, in designing this receiver, to give you the very most value for your money! They have utilized latest type tubes, including the metal types, in a superhet circuit that really is outstanding. The tube complement includes: 1-6A7 as oscillator-modulator; 1-6K7 as I.F. amplifier; 1-75 as diode detector and amplifier; 1-6F6 as power output amplifier and 1-80 rectifier.

Auburn 5 Tube Super Het.

175 METERS TO 560 METERS

In its endeavor to bring you **power and performance** at a price, Wholesale Radio Service Company canvassed scores of markets. The result: a splendid, worthy receiver that will win your instant admiration—The AUBURN 5 tube AC Hi-Gain Superheterodyne. Not only is this receiver handsome in appearance, but the mantel cabinet houses a chassis which is notable for its performance.

IMPROVED SUPERHET CIRCUIT

In addition to the large airplane type dial, full range electro-dynamic speaker and its three watts output, the AUBURN is conspicuous for its new, improved superhet circuit, utilizing the latest tubes as follows: 1-6A7 as 1st detector; 1-6D6 as I.F. Stage; 1-6C6 as 2nd detector; 1-42 as output and 1-80 rectifier. For mellow tone and true-to-life reproduction, the Auburn represents an exceptional value.

Model J-20—AUBURN 5 tube Hi-Gain Superhet. Complete with tubes. For 110 volt, 60 cycle AC operation. Dimensions: 11¹/₂" wide x 7" deep x 14¹/₂" high. Shpg. wt. 15 lbs. Code Kevas. List price \$27.90.

Lafayette 6 TUBE AC-DC 5 BAND Superhet Tunes in the World! 13-2000 Meters

THIS new 1936 FIVE BAND AC-DC Superheterodyne by Lafayette will simply delight you. Not only is it eye-arresting in its beauty but in performance it wins and holds your admiration. Here is a truly GREAT little receiver which will afford you many pleasure-filled hours while adventuring by air to remote and romantic lands.

This is not a receiver to be confused with the so-called little midgets that sell at "bargain" prices. Here is a musical instrument of rare distinction. The programs that you hear come to you with lifelike realism. There is no dullness; high notes are sharp and brilliant; low notes are deep and sonorous... just as produced in the broadcasting studio. Such perfection, such rich mellowness of tone, is due not only to the carefully designed audio amplifier but also to the full electro-dynamic speaker.

The possibilities for thrilling world-wide reception are endless. Five distinct bands enable you to select a broadcast itinerary which will carry you to the ends of the earth. It includes within its tuning

range every short, standard and long wave entertainment broadcasting station in the world in addition to weather reports, airplane, amateur, ship-to-shore and other interesting stations. These five bands are as follows: 13-30 meters, 30-75 meters, 75-200 meters, 200-550 meters, 850-1000 meters!

Technically, the latest type dual purpose tubes including the new metal types have been incorporated in an entirely new superheterodyne circuit. The tube complement includes: 1-6A7 as oscillator, 2-6K7 as I.F. amplifiers, 1-75 as 2nd detector, 1-43 as output and 1-25Z5 as rectifier. Note these outstanding features; airplane dial with reduction drive ratio for easy short-wave tuning, continuously variable tone control, automatic volume control, phono-jack, 7 tuned circuits, 8" dynamic speaker.

Here, surely, is the very most that your money can buy: a modern receiver that will thrill you with delightful entertainment.

List price \$70.50. Your Cost.....

Any of the above models for 220 volts.....\$2.50 additional

See page 29 for consoles in which this chassis can be mounted.

EVERY MAN IN THE RADIO HIMSELF TO READ

THE STORY OF ROBERT L. STUART

THIS is the simple, unadorned tale of a radio serviceman who made a discovery.

Bob Stuart has been servicing and selling sets and accessories ever since radio first began to be talked about in the small middle-western city where he lives. He knows his stuff—you can't fool Bob much when it comes to radio. He knows merchandise and he knows prices.

Up until the time the depression blew the lid off the easy-money pot, Bob was riding along quite well. People didn't seem to mind paying a hundred or more dollars for something that sounded like a radio set. Service jobs were plentiful—and profitable.

And then—as the movie writers say, came the crash! The smiling, good-natured customers who seldom questioned the cost of a repair job or a replacement part kicked like a steer over the smallest charges. When a job was done, they expected it to last—and they couldn't afford to pay much for it. When they actually bought a radio set, they wanted a better set at a cheaper price. And when they wanted something, they wanted it in a hurry.

It was a buyer's market! Mr. and Mrs. Consumer counted their pennies and saved them. They demanded better merchandise, lower prices.

Bob just couldn't seem to fill that demand. In the good old days his customers didn't mind a slight delay. When Bob had to order a part, and it took a couple of extra days for the part to arrive, the customer never kicked very hard. Sometimes Bob wasn't very fussy about his supply sources—he didn't pay much attention to the people from whom he bought. If a repair job didn't last very long—or if a radio set performed poorly—a chat about the stock market soothed the ruffled customer's feelings without much trouble.

But times changed—and how they changed! If the supply house kept Bob waiting, and he in turn kept the customer waiting, he lost that customer. If a replacement part or accessory failed to give lasting service, the customer went elsewhere the next time.

Sets, tubes, parts—everything had to be of good value or Bob would lose another buyer.

And so circumstances forced our prosperity-cradled radio man to an important discovery . . . the same discovery that all of us have made during the past few years . . . "TODAY YOU HAVE TO DELIVER THE GOODS IN ORDER TO GET BUSINESS!"

"DELIVER THE GOODS" sounds simple enough. It means, first and foremost, service and price. It stands for a job done well and promptly—reliable merchandise that is priced low, delivers good performance, and gives the serviceman a worthwhile profit.

Then and there friend Bob decided it was time for him to get started on a new task. He reasoned that one of the first things he needed to set his house in order was a supply source where he could get what he wanted when he wanted it—at the right price.

And so naturally, Bob came to the house of "Everything in Radio at Lowest Wholesale Prices." The fact that he selected Wholesale Radio Service Company is not the only point to this story—his discovery of the business fundamental that success in the radio field depends on delivering the goods is the reason why this true story is published in the interest of every radio serviceman and dealer.

The finish of this story is really its beginning—because it marks the building of a solid foundation for friend Bob. He found that his business methods brought him steady growth. It paid—and paid well in the long run—to give his customers service and value. His customers stuck to him—new customers came through recommendations—and his reputation grew to be a valued asset.

We take no credit for this success story. Our job was to deliver service and merchandise—and we have Bob's word for it that we accomplished—and are accomplishing—our job. But the credit must go to the man who faced his problem—and conquered it. Congratulations to you, Bob.

(The facts in this story are true in every detail—the name "Bob Stuart," for obvious reasons, is fictional.)

LAFAYETTE
HI-FIDELITY **7** TUBE *Super Het*

HERE is a new 7-tube Hi-Fidelity All-Wave receiver that is truly a "Radio Robot." It practically thinks for itself!

Turn the dial to indicate the station you want—and it automatically excludes the stations you don't want. The doors are wide open to welcome into your home, through the loud speaker, the station whose program you wish to hear—but to all others its selectivity provides an impenetrable wall that effectively keeps them from interfering with the station being heard.

Its automatic sensitivity control—sometimes called automatic volume control—instantly adjusts the sensitivity of the receiver to compensate for the strength of the station being received. It increases the sensitivity if the station is weak, and decreases the sensitivity if the station is strong—but never does it permit the signal to blare out suddenly.

A twist of the "high-fidelity" control and the I.F. band width widens automatically so that all of the high frequencies, that add to the crispness and definition of musical reproduction, come through. But, when only a speaker's voice is to be listened to, the band width can again be decreased so that only those frequencies necessary for voice reproduction are received and consequently all extraneous sounds are omitted.

All of these actions are automatic—the "Radio Robot" never forgets—he's waiting for you from the moment you turn on the switch and he doesn't rest till you turn it off again.

IN step with the latest developments in the tube industry, four of the new metal tubes are included in this new custom-built receiver. The high efficiency of these tubes adds considerably to the excellent performance of this receiver.

NEW 7 TUBE CIRCUIT

Seven tubes in all are used including: one 6B7, three 6K7, one 6F6, one 76 and one type 80. A stage of radio frequency amplification ahead of the first detector assures a high degree of sensitivity and selectivity. In addition, a sensitivity control, that works simultaneously with the volume control, eliminates interstation noise on average strength signals.

CONTINUOUS ALL WAVE COVERAGE

Three extended wave bands are covered including first, the 5,750 to 18,300 kc. (52.2 to 16.4 meters) band for foreign and domestic daytime reception; second, the 1,715 to 5,800 kc. (175 to 51.8 meters) band for foreign, intermediate short wave and police broadcast; third, the 535 to 1,730 kc. (560 to 173 meters) band for general domestic broadcast reception.

HIGH FIDELITY RECEPTION

The high-fidelity control, which varies the I.F. band width, together with an improved eight inch electro-dynamic speaker assures the finest possible tone quality at all times and at all volume levels. This new high-fidelity control assures purer tone by enabling the passage of the higher frequencies.

Broadcasting - Police - Foreign

Accurate Logging Micrometer Dial

A NEW micrometer-type dial makes tuning and logging of stations a simple matter. The "second-hand" pointer provides an effective band-spread on all wave bands. It enables you to read a fraction of a division on the "hour-hand," or main dial pointer, scale. This second-hand pointer has a ratio of 16 to 1 with relation to the regular dial pointer, and the regular dial pointer has a drive ratio of 30 to 1.

Both tone and volume controls have their own individual scale and pointer on the main dial. A unique three-color lighted band indicator shows a colored light to indicate which scale is in use on the dial—the color of the scale coinciding with the color of the light.

FULL RANGE TONE CONTROL

A tone control allows full graduation of tone from low bass to brilliant highs. An undistorted output of 3 watts assures volume considerably in excess of room requirements. Fidelity is particularly good, being flat within six decibels from 100 to 5,500 cycles.

Full Range Sensitivity

CUSTOM BUILT ...

Handsomely Designed Hardwood Cabinets

EXQUISITELY grained hardwoods were fashioned into handsomely designed cabinets by master craftsmen to house this excellent receiver.

Both mantel and console models are available. The mantel model, while compact in size, so that it can readily be moved from room to room, is still large enough to provide effective baffling for the high quality speaker so that all the full rounded tone of the reproduction is retained.

The large console model provides ample room so that a large eight inch speaker can be used and consequently all of the fidelity and clarity of tone possible with this excellent receiver is brought to full perfection.

EUROPEAN RECEPTION GUARANTEED

Under reasonably favorable weather conditions this new 7 tube receiver is guaranteed to provide enjoyable European reception. You can prove this to yourself by taking advantage of our liberal 30 day free trial guarantee right in your own home!

MODEL B-21—Lafayette 7 tube All Wave chassis, complete with tubes and 8" speaker. Size of chassis, 13½" wide, 10½" deep and 10" high. For 105 to 120 V., 50 to 60 cycle A.C. operation. Shpg. wt. 30 lbs. Code BAREN. List Price, \$67.00.

YOUR COST **\$33.50**

MODEL B-22—Lafayette 7 tube All Wave superheterodyne in mantel cabinet, as illustrated at top of page, complete with tubes and 8" speaker. For 105 to 120 V., 50 to 60 cycle A.C. operation. Dimensions: 16" wide, 10½" deep and 19" high. Shpg. wt. 41 lbs. Code BETRIC. List Price, \$73.90. YOUR COST..... **\$36.95**

MODEL B-23—Lafayette 7 tube All Wave superheterodyne in console cabinet as illustrated, complete with tubes and 8" speaker. For 105 to 120 V., 50 to 60 cycle A.C. operation. Shpg. wt., 66 lbs. Code BASEK. Dimensions: 21" wide, 38½" high and 13¼" deep. List Price, \$93.90. YOUR COST..... **\$46.95**

Tube

New Metal Tubes

TRUE tone reproduction, excellent sensitivity and selectivity are the outstanding features of this extraordinary receiver. Incorporating an entirely new idea in high-fidelity I.F. band with control in conjunction with a new "curvilinear cone" 10" electrodynamic speaker, this new Lafayette 10 tubes All Wave Superheterodyne provides an entirely new conception of radio reproduction. Flat, lifeless reception gives way to a new, full-bodied, startlingly clear and crisp reproduction that makes one forget a radio receiver is being heard and not the actual performer.

CONTINUOUS ALL-WAVE COVERAGE

It is a complete receiver—including within its tuning range all stations, both short wave and regular broadcast, between 16.4 and 560 meters. No stations are skipped—they are all there for you to enjoy. When you have the "wanderlust," listen to Spain, France, Russia or far away Australia—they are all at your fingertips with this new masterpiece from the Lafayette engineering laboratories.

THE TRI-LITE RADIO DIAL

HI-FIDELITY ALL WAVE

CUSTOM BUILT

3 BAND Super Het

WITH METAL TUBES

FOUR of the new highly efficient metal tubes are incorporated in the Lafayette 10 tube All Wave Superheterodyne. Entirely different in construction and in performance, these new tubes play a considerable part in the excellent results obtained with this new receiver.

10 TUBE SUPERHETERODYNE CIRCUIT

A highly developed all wave superheterodyne circuit is employed in this receiver, using ten tubes, including: four 6K7's as radio frequency amplifier, first detector or mixer, first and second I.F. stages; three 76's as oscillator, second detector and A.V.C. stage, and first audio amplifier stage; two 45's in the class A output stage; and one 80 as rectifier.

Sensitivity of the receiver is rated at from .7 microvolt absolute (per 4 meters) on the standard band to 2 microvolts absolute on the short wave band. Selectivity is 25 kc. broad at 1000 times down, indicating non-interference between signals of a field strength ratio anything less than 1000 to 1 at 12½ kc.

The complete tuning range of the receiver from 18,300 kc. to 535 kc. is covered as follows; one range from 5,750 to 18,300 kc. (52.2 to 16.4 meters); the second from 1,715 to 5,800 kc. (175 to 51.8 meters); the third from 535 to 1,730 kc. (560 to 173 meters).

Each range has its own individually calibrated scale on the large illuminated dial in a distinctive color. A colored light, operating together with the range selector switch, indicates which scale is in use by flashing a light having the same color as the scale.

I.F. "BAND-WIDTH" CONTROL

An outstanding feature of this new receiver is a high-fidelity switch that widens the band width acceptance of the I.F. stages and permits the passage of the high frequencies essential to high-fidelity reproduction. Controls include a sensitivity control working in conjunction with the volume control and a full range tone control.

Fidelity of the receiver is unusually good being flat within 6 db from 40 to 5,500 cycles—a remarkable achievement.

A large airplane dial incorporates a micrometer or "second-hand" pointer that provides an effective band-spread on any of the three tuning ranges. This second-hand pointer has a ratio of 16 to 1 in relation to the regular pointer. The drive ratio of the regular pointer is 30 to 1.

AUTOMATIC VOLUME CONTROL

A diode type automatic volume control assures steady reception volume and prevents blasting when tuning from weak to strong signals. MODEL B-35—Lafayette All Wave 10 tube chassis only, complete with tubes and speaker. For 110 V. 60 cycle A.C. operation. Dimensions: 15½" wide, 10½" deep, 10" high. Shpg. wt. 38 lbs. Code BERME. List Price, \$89.90.

RECEIVER

NOT just one—but a multiplicity of good features make this the most outstanding ten-tube receiver on the market today! Compare this receiver with any other on the market—nowhere will you find so many worthwhile features in a single receiver. And each one is perfected to the nth degree—none is experimental—but all have been time tried and proven after hours, weeks and months of continuous operation in the Lafayette laboratories and in the field. Mere words cannot describe the excellent performance of this new Lafayette High-Fidelity 10-tube All Wave Superheterodyne—so we urge you to take advantage of the Lafayette 30 day free trial to prove to yourself—in your own home—how good a receiver it really is.

A FEW OF THE MORE IMPORTANT FEATURES

Ten tube superheterodyne circuit including four of the new metal tubes in its tube complement, which consists of: four 6K7's, three 76's, two 45's and one 80.

Continuous short wave reception in three bands. 5,750 to 18,300 kc. (52.2 to 16.4 meters), 1,715 to 5,800 kc. (175 to 51.8 meters), 535 to 1,730 kc. (560 to 173 meters).

Extraordinary sensitivity rated at from .7 microvolt absolute on the standard band to .2 microvolt on the short wave band.

Unusual selectivity—rated at 25 kc. broad at 1000 times down—indicating non-interference between signals of a field strength ratio of anything less than 1000 to 1 at 12½ kc.

Excellent fidelity—being flat within six decibels from 40 to 5,500 cycles.

Variable band-width I.F.'s permitting the spreading of the intermediate frequency selectivity so as to pass more of the higher frequencies so essential for musical reproduction.

Automatic volume control assures steady reception volume and eliminates blasting when tuning from weak to strong signals.

Micrometer airplane dial enables accurate logging and tuning of stations by means of a micrometer or second-hand pointer.

MODEL B-37—Lafayette High Fidelity 10 tube All Wave superheterodyne mounted in beautiful hardwood console as illustrated. Complete with tubes. Dimensions: 24" wide, 12" deep, 39" high. Shpg. wt. 79 lbs. Code BENGAL. List Price, \$113.90.

YOUR COST **\$56.95**
For 220 volt operation \$3.00 additional

HERE IS ANOTHER OUTSTANDING
VALUE BY *Lafayette*

**6 TUBE
AC**

3 BAND

SUPERHET

3 BANDS—6.0 TO 16.0 MC.—1.6 TO 4.5 MC.—535 TO 1500 KC.

A 6 TUBE three band all wave receiver incorporating such valuable quality features as a three gang tuning condenser—a six inch electro-dynamic speaker—metal tubes, etc., makes this one of the most outstanding values in radio today! It is not a "midget" set but a full size AC operated superheterodyne with excellent sensitivity and selectivity—and surprisingly fine tone quality. It will provide many pleasant hours of entertainment for you either from local domestic broadcasting stations or from intriguing foreign short wave stations.

The highly perfected superheterodyne circuit employs one 6K7 as modulator, one 76 as oscillator, one 6K7 metal tube as I.F. amplifier, one 75 as diode detector and audio amplifier, one 6B5 as power output tube and one 80 as rectifier. Tuning range is covered in three bands; 6.0 to 16.0 MC. (18.7 to 50 meters), 1.6 to 4.5 MC. (66.6 to 187.4 meters), 535 to 1500 KC. (200 to 560 meters). Full automatic volume control assures steady volume when tuning from weak to strong signals and eliminates blasting and consequent overloading of the power output stage. Manual tone control permits accurate adjustment of high frequency response. The new 6B5 output tube provides an undistorted output of over 3 watts!

BEAUTIFUL MANTEL AND CONSOLE MODELS

THIS NEW LAFAYETTE model is available in either of two handsome cabinet models. The mantel cabinet is especially beautiful and is a distinct departure from the usual in design. It is of the modified modern type—simple yet not severe and its beautiful flowing lines lend themselves admirably to a design that will blend unobtrusively with the finest room furnishings.

The console does full justice to the excellence of this new receiver. Fashioned of beautifully grained hardwoods matched into attractive patterns it adds a distinctive note of its own to the decorative scheme of any room. The design is such that the baffling provided for the speaker is particularly effective and does much toward enhancing the tone of the reproduction.

Model C-13 Lafayette 6 tube 3 band superheterodyne in Mantel cabinet complete with tubes. For 110 volt 60 cycle AC operation. Dimensions: 12 3/4" wide, 9 1/2" deep, 16" high. Shpg. wt. 22 lbs. Code Wegan. List price \$48.00.

Your Cost.....\$23.95

RADIO CENTER

HI-FIDELITY

Metal

Tubes

12 TUBE Custom Built!

Undistorted

TWIN VOICE REPRODUCTION

POWER to thrill you—and tone that makes you forget that you are listening to a radio receiver and not the performer in person! Never before have you heard a receiver like this new Lafayette 12 tube "twin-voice" superheterodyne. Tune in on a symphony orchestra—note the "third dimensional" effect that twin speakers provide—the absolute clarity of tone due to the high-fidelity circuit—and then, when the final "crescendo" arrives, thrill to the undistorted volume that only a receiver with real power can deliver!

TWIN VOICE REPRODUCTION

Have you ever looked through a stereoscope at two pictures at the same time and noticed the "third dimensional" effect? The two 12" high-fidelity speakers in this new receiver do exactly the same thing for your ears. Gone is that flatness of tone—a new realistic effect is produced that makes each instrument stand out clearly and distinctly.

POWERFUL TWELVE TUBE CIRCUIT

A new high-fidelity twelve tube circuit, incorporating seven of the new metal tubes, assures the utmost in sensitivity and selectivity. The tube complement includes; 4-6K7 metal tubes as R.F. amplifier, converter, 1st and 2nd I.F. amplifiers; 3-6F6 metal tubes as audio power output and driver, 3-76 glass tubes as oscillator, diode detector and audio amplifier, 2-80 glass tubes as rectifiers.

For actual sensitivity and selectivity ratings see page 20 describing the beautiful console model.

CONTINUOUS SHORT WAVE RECEPTION

Three extended wave bands are covered as follows; 5,750 to 18,300 kc. (52.2 to 16.4 meters); 1,715 to 5,800 kc. (175 to 51.8 meters); and 535 to 1,730 kc. (560 to 173 meters). All short wave stations, both foreign and domestic broadcast, police, amateur, aircraft, as well as the general domestic broadcast stations operating between 16.5 and 560 meters can be heard.

You don't buy a car with a powerful motor capable of driving the car at high speed, because you intend to run the car at such high speeds all the time. But you know that the extra power is of great advantage in climbing a hill or in spurting out of a tight spot. Similarly in a radio receiver, when a particular musical passage requires a considerable amount of power, the receiver must be capable of supplying this power immediately or distortion will occur. An undistorted power output of fifteen watts assures ample reserve power for all peak demands in the new Lafayette "twin-voice" 12 tube Super-het. It enables a precision of tone reproduction at either "whisper" or "concert hall" volume. An automatic volume control prevents blasting and overloading.

HIGH FIDELITY RECEPTION

A new "high-fidelity" control, which widens the band acceptance of the I.F. amplifier and permits the passage of the higher frequencies, provides a fidelity of reception that is truly amazing. You actually forget that you are listening to a radio receiver and feel that the performer is there with you in person. A full range tone control permits you to adjust the high frequency response to suit the particular acoustic conditions of your room.

MICROMETER AIRPLANE DIAL

A new airplane dial enables the accurate logging of short wave stations through the use of an accessory (micrometer) pointer having a ratio of 16 to 1 with relation to the regular station indicator. Drive ratio of station indicator is 30 to 1. Overall diameter of the escutcheon is 7".

MODEL B-30—Lafayette "Twin Voice" 12 tube super-het chassis only complete with tubes and two high-fidelity 12" concert type speakers. For operation on 50-60 cycle 100 V. A.C. Dimensions; 20 1/4" wide, 12" deep and 10" high. Shpg. wt. 59 lbs. Code BOSIL. List Price, \$125.00. **\$62.50**

YOUR COST
Available for 220 Volts 40 to 60 cycles at \$3.00 additional

*As Modern as Tomorrow
Built for You Today*

Lafayette 12 Tube ALL WAVE

TRUE modernism does not lie in extreme design—but in the perfection of proven ideas. Just because a receiver possesses some one new feature does not stamp it as being the ideal of tomorrow. That feature may be discarded before tomorrow ever comes. But one thing is certain—tomorrow's receiver will incorporate every idea and every feature that has proven its worth, but each one brought to a higher state of perfection. A truly modern receiver, therefore, is the product of the most careful adherence to the perfection of each individual component and its inherent quality.

TOMORROW'S RECEIVER TODAY

The new Lafayette High-Fidelity 12 tube All-Wave receiver is, in this sense, tomorrow's receiver. Listening to its faithful reproduction, you will find that radio reception now has a new meaning for you. Gone are all your previous conceptions of radio—for here is a new receiver that reawakens your interest in radio entertainment. You breathlessly tune from program to program and gradually realize that radio has changed—but that it takes a new modern receiver, such as this, to bring it to you at its best.

HIGH-FIDELITY REPRODUCTION

Many receivers have been called "high-fidelity," but not till you hear this new receiver and its perfected high-fidelity circuit with "band width control," do you realize to the fullest the meaning of true tone reproduction.

BALANCED DESIGN

This circuit of itself, however, is not enough to realize tonal perfection—but complete balance must be attained by "following through" with "twin voice" high-fidelity speakers and high-fidelity cabinet construction. High fidelity cabinet construction means the careful utilization of cabinet design so that a maximum of speaker baffling and a minimum of cabinet resonance are obtained. Yet the finished design must be such as to harmonize with the finest furnishings.

For those technically inclined we offer the following figures. Sensitivity from .5 microvolt absolute (per 4 meters) on the broadcast band to 2 microvolts absolute on the short wave band. Selectivity 20 kc. broad at 1000 times down—indicating non-interference between signals of a field strength ratio of anything less than 1000 to 1 at 10 kc. separation. Fidelity flat within 6 db from 25 to 7000 cycles. For a more complete description of the receiver chassis refer to page 18.

MODEL B-32—Lafayette High Fidelity 12 tube All Wave superheterodyne in console cabinet as illustrated, with tubes. For 110 V. 60 cycles A.C. Dimensions: 25½" wide, 14½" deep, 42½" high. Shpg. wt. 140 lbs. Code BATON.

List Price, \$165.00.

LAFAYETTE 10 TUBE COMBINATION

THE EXCELLENT high-fidelity response of the audio system in the 10 tube Lafayette superheterodyne, employed for the reproduction of recorded entertainment in this new combination, brings new life to your favorite records. The ample reserve power assures undistorted reproduction at all volume levels and at all frequencies from lowest bass to highest treble.

The twelve inch turntable is driven by a two speed motor for playing either standard 78 r.p.m. or slow speed 33 1/3 r.p.m. records. The pickup is a new high fidelity model especially designed for this instrument. For a complete description of the receiver refer to page 14.

The cabinet, which is illustrated at the right, is particularly handsome and is fashioned of rare hardwoods beautifully grained and matched into attractive patterns. It is modern yet not extremely so and will blend artistically into the finest decorative scheme.

Model B-42 Lafayette 10 tube Combination as described complete with tubes. For 110 V. 60 cycle AC. Dimensions: 21" wide, 16" deep, 40" high. Shpg. wt. 160 lbs. Code

The New

24 Tubes

OPENS NEW HORIZONS WITH SUPER POWER RECEPTION

DESIGNED to create a new standard in radio reception the new Lafayette "24" Tube Super-heterodyne with "cathode-ray tuning" is the most sensational receiver ever to be offered to the consumer. For the first time it is possible for you to enjoy in your own home, "laboratory reception"—the kind of reception only engineers have been able to enjoy, in their own laboratories, with individual laboratory-built and adjusted receivers.

Super-Power makes possible enjoyable reception in the many "tough spot" reception areas throughout the world. It also furnishes the most startlingly realistic tone quality ever reproduced by a radio receiver. Reserve power for peaks up to 50 watts assures crystal clear undistorted reproduction at any volume from a bare whisper to "auditorium volume".

A total of 37 outstanding features — each one of them indicative of the fine quality that characterizes this exceptional receiver — makes the Lafayette "24" without a doubt the "world's finest receiver!"

Nothing has been spared — If a greater number of tubes would have improved it, they would have been added — only the finest speaker design was good enough — only the latest, most improved metal tubes would do for the RF system — only "step-wise" IF band-width control could even be considered for the intermediate frequency amplifier! But check it yourself — feature for feature — and compare it with anything on the market today — and you, too, will say "Boyl! It has everything!"

CONSTRUCTION

BATTLESHIP

5 BANDS
8 TO 2,050 METERS
140 K.C. TO 30 M.C.

LABORATORY RECEPTION IN YOUR OWN HOME

Lafayette 24 Tube SUPER HET

37 SENSATIONAL FEATURES!

- (1) Total of 24 tubes including: 5—6K7's, 1—6A8, 2—6H6's, 4—6CS's, 8—45's, 1—76, 2—5Z3's, and 1—6E5.
- (2) Step-wise expanding selector makes possible high-fidelity response (60 to 8000 cycles) with good adjacent channel selectivity or hairline selectivity by varying the intermediate frequency band width acceptance.
- (3) Cathode-Ray tuning indicator operates effectively on weak as well as strong signals and permits accurate visual tuning on all bands.
- (4) Dual High-Fidelity Speaker System consisting of a 12" Auditorium speaker plus a new type 10" high frequency speaker to span the entire audible range exactly as broadcast by the new high-fidelity stations.
- (5) Power output stage Class AB triodes to deliver reserve power up to 50 watts.
- (6) Dual power rectifiers.
- (7) 64 mfd. capacity in filter system.
- (8) Separate fixed bias rectifier for maximum peak power output without distortion.
- (9) Metal tubes used throughout the receiver chassis.
- (10) Dual oversize power transformers for long life and high safety factor.
- (11) Five taps on each power transformer for 115, 135, 150, 230 and 250 volts.
- (12) Special high voltage electrolytic condensers.
- (13) High inductance oversize filter chokes to insure hum-free operation at bass note frequencies.
- (14) Low "mu" triode operation throughout to insure harmonic-free reproduction.
- (15) Dual chassis construction permits installation in any type console and also permits proper electrical design so that best results may be obtained without crowding of component parts.
- (16) Chassis fully plated and outer surface protected by durable "telephone-black" lacquer.
- (17) Shields buffed and lacquered in contrasting cadmium.
- (18) Triple-sealed for protection against moisture, heat and cold.
- (19) Radio frequency unit completely shielded from man-made static and interfering local broadcasters.
- (20) All coils doubly impregnated and waxed to prevent entrance of moisture and corrosion of coils in tropical countries.
- (21) Easy reading sector dial in which only the band in use is illuminated in distinctive coloring.
- (22) Two-speed planetary drive with split knob control for accurate tuning on the short waves.
- (23) Automatic tone control (ATC) reduces noise between stations to a negligible minimum and clarifies reception on weak stations. Automatically disconnected when receiver is turned to high-fidelity position.
- (24) Manual continuously variable tone control supplements the automatic control to permit full range of tonal effects at will.
- (25) Beat oscillator permits easy detection of weak foreign stations which might otherwise be passed by unnoticed; makes audible continuous wave code signals.
- (26) Phonograph jack for reproduction of recordings.
- (27) Triple rubber mounting to eliminate completely all microphonic and acoustic howls.
- (28) Nineteen tuned circuits.
- (29) New bar type low minimum condenser.
- (30) Triple amplified automatic volume control system.
- (31) Signal channel separate from AVC system.
- (32) Dual IF amplifier stage using three large IF transformers with sectional type Iltz inductors for maximum efficiency and selectivity.
- (33) Linear diode detection gives crystal clear reception at any volume.
- (34) Separate diode rectifier to provide AVC voltage.
- (35) Ultra-sensitivity on all bands to insure best reception under all conditions.
- (36) Radio frequency pre-amplifier stage on all bands eliminates repeat points, whistles and tweets and provides maximum signal to noise ratio.
- (37) Five distinct bands covering a range of 140 kc. to 30 megacycles (8 to 2,050 meters) as follows: 8-16, 16-57.5, 57-187, 187-555 and 850-2,050 meters.

Lafayette Presents THE FINEST

CONSOLE CABINET MODEL

24

TUBES

ONLY the world's finest console is worthy of the world's finest radio. Therefore Lafayette obtained the services of the finest cabinet designer available to design a cabinet that would do full justice to the Lafayette "24" High-Fidelity All Wave Superheterodyne. This console not only had to be beautiful in appearance, but what is far more important it must be so constructed that every advantage is taken to conserve and enhance the faithfulness of reproduction possible with this excellent receiver.

The result is a cabinet that embraces the foremost acoustical principles — yet is entrancingly beautiful in appearance. To see it is to immediately desire to possess it for your very own. Its graceful flowing lines and its handsomely grained hardwoods give it an air of distinction that will add a note all its own yet blend unobtrusively into the finest decorative scheme. Neither the photograph nor mere words can do justice to this example of the cabinet maker's art — it must be seen to be appreciated.

All of the beauty of tone possible with the Lafayette "24" is brought to full perfection by the careful design of the speaker baffling area. Barrel-like tones, cabinet resonance and other objectionable features of improperly designed cabinets are conspicuous by their absence. Only the purest, most lifelike reproduction is possible

with this Lafayette "24" Console Receiver. It is a receiver that you will be proud to call your own and one that will give you many, many hours of purest radio enjoyment. And it is a receiver that Lafayette offers with pride for your approval — and with full confidence. Try it on our 30 day free trial offer.

PHONO RADIO COMBINATION

THE NE-PLUS-ULTRA in phonograph reproduction and radio reception for the home. No finer instrument, combining the two, to our knowledge has ever been previously offered. Besides employing the sensational 24 tube All-Wave Receiver, described on the previous pages, the phono-radio combination illustrated below includes the famous Capehart Automatic Record Changer. The model used is designed to play up to ten 10 or 12 inch records, automatically changing each record as it is completed. The last record repeats until the master switch is turned "off". It will play either 33 $\frac{1}{3}$ or 78 R.P.M. recordings. In addition, a rejecting device permits quick rejection of any record not desired. So complete and elaborate, yet simple to operate, is this mechanism that over one solid hour of consistent record entertainment of any type or variety is possible with it. Concerning the reproduction — Lafayette engineers have left nothing to chance to insure the finest and most faithful quality. The use of a High-Fidelity Amplifier with reserve power up to 50 watts and Dual High-Fidelity Speaker System is a guarantee that the reproduction will please the most critical, besides making this instrument suitable for any occasion — whether it be at times when a soft whisper is desired or for large gatherings when tremendous volume may be required. In harmony with the splendid engineering that has gone into this combination — is the fine sturdy aristocratic console cabinet which houses this instrument. Built by craftsmen of choice selected grain walnut woods and finished so that its addition to any home lends distinction and grace. For finest radio reception, complete phonograph record entertainment, with the highest quality of reproduction and power — all in a most attractive cabinet, Lafayette offers you — with complete assurance — this instrument!

24 TUBES

THE MONARCH

Lafayette QUALITY Especially For Use In

5 TUBE AC-DC EUROPEAN MODEL

190-550 AND 850-2000 METERS

Value plus! That's what you get in this 5 tube AC-DC superhet, designed exclusively for use in Europe. Not a compact model but a full size mantel job embodying refinements never before found in such a low priced receiver: illuminated airplane dial, 3-gang condenser, dynamic speaker. These are the features you've come to expect only in more expensive receivers.

Latest type tubes have been utilized in an extremely efficient superhet circuit: 1-77, 1-6A7, 1-78, 1-43, 1-25Z5. In addition, a pre-selector stage is included which is tuned by one section of the 3-gang condenser, greatly increasing the image ratio. This makes the receiver extremely selective.

The extended wavelength range covers two bands from 190-550

meters and 850-2000 meters, thus assuring reception from stations on both sides of the Atlantic.

Model A-77L — European Model Lafayette 5 tube AC-DC Superhet complete with tubes, for 110 volts. Dimensions: 12" wide x 6" deep x 14½" high. Shpg. wt. 13 lbs. Code Decur. List price \$33.90.

Your Cost.....

Adapter for 220 volts \$1.00

\$16⁹⁵

IMPORTANT NOTE!

Radio receivers for use in Europe must tune between 850 and 2000 meters, in addition to the regular 200-550 meter band. Suitable sets for this purpose are described on these two pages and also on pages 7, 8, 9 and 28.

5 TUBE AC Long & Short Wave SUPERHET

18-50-200-550
850-2000 METERS

Another achievement by Lafayette Engineers. This special European Model AC Superhet is packed with power. It girdles the globe with ease! It brings in stations with lifelike realism so that you almost imagine the performer to be in the same room!

Its three bands cover the wavelengths from 850 to 2000 meters, 200-550 meters and the short wave band from 18-50 meters. Thus it is emphatically a European model in every sense of the word.

Like other Lafayette receivers, all latest features have been incorporated, including automatic volume control effective on all bands; large 8" electro-dynamic speaker; continuously variable tone control; 3-gang condenser; large full size chassis; airplane dial. FIVE latest type tubes are used in an entirely new 1936 superhet circuit as follows: 1-78, 1-75, 1-42, 1-80 and 1-6A7. **Model A-81L**—Lafayette 5 tube Long and Short wave Superhet complete with tubes. For 110 volt, 60 cycle AC operation. Dimensions: 13½" wide x 8" deep x 16½" high. Shpg. wt. 24 lbs. Code Fetus.

List price \$43.00. Your Cost.....

Available for 220 volt AC operation at \$1.50 additional.

RECEIVERS Designed *European Countries*

10 TUBE *Super Deluxe* All Wave SUPERHET

- NEW CUSTOM BUILT ARMOR-CLAD NERVE CENTER
- 5 Bands: 850-2000, 200-550, 75-200, 30-75, 14-30 Meters

FOR the buyer of radio who wants the ultimate in radio for European use, we are proud to present this brilliant creation by Lafayette engineers. After months of research a super-efficient tuning unit has been developed and made the heart of this DeLuxe custom built receiver. Armor-clad battleship construction throughout affords efficient shielding which results in smooth, interference-free reception on all wave bands without the slightest interaction effect.

FIVE RECEIVERS IN ONE

Although you pay only for one receiver you actually get five sets for the price of one because the 5 distinct bands bring All-Wave reception from all over the world. This Lafayette DeLuxe receiver incorporates a newly designed and improved superhet circuit utilizing ten tubes for maximum results; 3-6D6's, 2-76's, 1-75, 3-42's, 1-5Z3.

This superb receiver is marked by many features that are at once apparent to the eye and ear. For example, you will be astonished at the extremely low background noise. This is due to the use of a highly efficient radio frequency pre-amplifier stage by the thorough shielding of each individual circuit. You'll marvel at its ability to handle great power without distortion, its selectivity and its sensitivity and at its faithful realistic reproduction over the entire audio frequency range.

10 TUBE MANTEL COMBINATION

The beautiful MANTEL PHONO COMBINATION illustrated at the left houses the 10 tube All Wave receiver together with a powerful dual speed phonograph motor and electric pickup. Thus phonograph recordings (either 78 or 33 1/3 r.p.m.) as well as world-wide broadcasts are at your command.

The High-Fidelity audio system of the Lafayette 10 tube All Wave receiver together with the full electro-dynamic speaker brings new life to your favorite recordings. Full control is had over both volume and tone on records as well as radio. The cabinet is unusually compact for a phono-radio combination yet is handsome in appearance and provides full baffling for the speaker.

Model F50—10 tube Armored Nerve Center All Wave 5 Band Mantel Combination complete with tubes. For 110-220-240 volts, 25-60 cycle A.C. Dimensions: 26 1/4" high, 16 3/4" wide, 16" deep. Shpg. wt. 80 lbs. Code Peras. List price \$170.00. **\$85.00**

USING THE
New
**METAL
 TUBES**

You'll reach new heights of radio enjoyment as you listen to the whole world marching into your home. So amazingly selective that it brings in distant stations through the locals! So powerful that it brings you colorful and fascinating foreign broadcasts with an absolute minimum of background noise and interference.

Such power that you always have tremendous reserve necessary to exert the maximum output of the new tubes. Words cannot convey the thrill of pleasure and excitement that you'll enjoy! You have to hear it to appreciate it.

Every modern improvement in circuit design has been incorporated in this receiver to actually give you better, more enjoyable performance. Under reasonably favorable weather conditions we guarantee that this receiver will provide enjoyable European reception.

Fourteen newest tubes—including the new all-metal types have been utilized in an improved superheterodyne circuit to insure maximum results on the short waves: 1-6K7 as R.F. Amplifier; 1-6A7 as 1st Detector and Oscillator; 2-6K7's as I.F. Amplifiers; 1-6H6 as Diode Detector, AVC; 1-6C5 as 1st A.F. Amplifier; 1-6K7 as Automatic Tone Control; 4-43's as Class "A" power output, 2-25Z5's as full wave rectifiers, and 1-6E5 Shadowgraph Control Tube.

It is THE FIRST HIGH-FIDELITY AC-DC RECEIVER WITH SHADOWGRAPH TUNING. Another feature is its Automatic Tone Control which reduces the noise level between stations to a minimum.

Other features are: Illuminated sector type Airplane dial on which only the band in use lights up; 10" High-Fidelity Electro Dynamic Speaker. The modern "streamlined" mantel cabinet illustrated above houses the chassis. Made of the finest selected straight grained American walnut veneers and hardwoods.

AMAZING INVENTION

Perfect reception without

LAFAYETTE 6 TUBE, 6 VOLT SUPERHETERODYNE

- Foreign and American Reception
- 3 Bands — 15 to 550 Meters

Now the advantages of full efficiency superheterodyne performance are available even when using six volt power! This matchless receiver sets a new standard of excellence. It is ideal for farm, country home, summer resort or any other location where house electric current is unavailable.

Utilizing the latest dual purpose super-efficient tubes, you are enabled to get world-wide reception as well as American broadcasts, amateurs, police calls, ships at sea, etc.

Among its features are: Low battery drain—only 1½ amperes total drain; automatic volume control, illuminated airplane dial, 6½ inch electro-dynamic speaker, 3 gang tuning condenser, etc. Tubes used are 1-1C6, 1-34, 3-30's, 1-33. "B" supply built-in—no extra B or C batteries required.

Model J50—Lafayette 6 tube, 6 volt receiver complete with tubes but less battery. Mounted in Mantel cabinet illustrated. Dimensions: 14¾" by 11" by 8¼". Shpg. wt. 15 lbs. Code Ketna. List price, \$49.00

LAFAYETTE 8 TUBE, 6 VOLT, ALL WAVE BATTERY SET

- Three Distinct Wave Bands: 18-50, 75-200, 200-550 Meters
- May be Used With or Without the Air-O-Charger

Lafayette engineers have designed this truly marvelous 8 tube, All Wave receiver to bring you the best in radio entertainment. Not only can you tune in American broadcasting stations on the 200-550 meter band, but police calls, amateur and aircraft stations on the 75-200 meter band and foreign short wave broadcasts on the 18-50 meter band.

8 latest type tubes in a super-het circuit assure reception to satisfy the most critical. Four type 34 tubes are used; one as first detector, another as oscillator and two as intermediate frequency amplifiers, one type 30 as second detector AVC, another as first audio amplifier, one 33 as power output tube and one 84 as rectifier.

9 tuned circuits, 3 gang condenser, tone control, automatic volume control, airplane dial and 8" motor magnetic speaker make this the most outstanding battery receiver.

Model A54—Lafayette 8 tube, All Wave 6 V. battery receiver complete with tubes in Mantel cabinet. Less battery. 15¾" wide, 11½" deep, 20¾" high. Shpg. wt. 34 lbs. Code Wecca. List Price \$73.90.

Lafayette BATTERY RECEIVER

Especially Designed for Economy of Operation

4 TUBE SUPERHET gives PERFORMANCE at a PRICE!

For economy of operation, clear tone and ample power to bring in stations clearly and enjoyably, this Lafayette 4 tube Superhet will meet your requirements. Here is a receiver that is compact and entirely self-contained. No need for unsightly batteries, connecting wires, etc., for all batteries fit inside the cabinet itself.

IMPROVED CIRCUIT

The improved and highly sensitive superhet circuit utilizes 4 latest type tubes: 1-34 as int. frequency amplifier; 1-34 as 2nd detector; 1-1A6 as oscillator and 1st detector; and 1-33 as power output. Other features include: three gang condenser; 5 tuned circuits; airplane reduction dial. The wave band extends from 175 to 550 meters, which enables you to tune in all American broadcast stations as well as police calls.

Model A-31—Lafayette 4 tube battery receiver complete with tubes but less batteries. Dimensions: 14" wide x 10" deep x 17" high. Shpg. wt. 17 lbs. Code Welba. List price, \$31.50.

Illustrating interior construction of the 4 Tube Superhet, and self-contained battery feature.

7 TUBE ALL WAVE SUPERHET

As you listen to this remarkable All-Wave Superhet it is difficult to believe that it is a battery receiver. It has power to spare and is highly selective and sensitive; its tone is smooth and mellow. On ranches, farms, camps and other places remote from power lines, you can be assured of quality world-wide reception. The 3 bands cover wavelengths from 200-560 meters, 66-187 meters and 16-50 meters—so that you can tune American broadcast, foreign stations, weather reports, police calls, etc.

Economical to operate. Seven latest type tubes are used in an improved circuit as follows: 1-1C6, 2-34's, 1-25S, 1-30, 1-19 and 1-6-1 voltage regulator tube. This Lafayette receiver will bring a new measure of enjoyment to radio reception.

Model C-17—Lafayette 7 tube Battery Superhet Complete with tubes and 3 conductor cable with 8 prong plug supplied for battery connections, but less batteries. Dimensions: 12" wide x 8½" deep x 15¾" high. Shpg. wt. 68 lbs. Code Wengq. List price, \$49.90.

6 TUBE 32 VOLT RECEIVER

Here is an improved receiver especially designed for use with 32 volt Delco systems or similar power plants. With this highly selective and very sensitive superheterodyne you can enjoy radio just as well as the city dweller who uses 110 volt supply.

Covering the wavelengths from 171 to 565 meters, you have all American broadcast stations, weather reports and police calls at your fingertips. An ultra-refined superhet circuit has been designed utilizing 6 latest type tubes as follows: 1-6A6, 1-6A7, 2-6D6's, 1-43, and 1-85 audio and automatic volume control which assures steady volume of reception, ease of tuning and eliminates blasting effect when tuning from weak to strong signals. Other features are full range tone control; electro-dynamic speaker; 3 gang condenser; rubber cushioned, vibrationless chassis; illuminated airplane dial, etc. Housed in a handsome mantel cabinet, it blends harmoniously with the furnishings of any home.

Model B-12—Lafayette 32 volt, 6 tube superhet complete with tubes. 32 volts DC only. Dimensions: 16¼" wide x 10½" deep x 19" high. Shpg. wt. 35 lbs. Code Bacha. List price, \$54.00.

Money Cannot Buy Better Battery Sets

- Automatic Vol. Control
- Class B Power Stage
- Permanent Dynamic Speaker

IN THE creation of this superlative All-Wave Receiver, Lafayette engineers were inspired by a single ideal—to design the world's finest All-Wave Superhet Battery operated receiver. That they have fulfilled their purpose is immediately apparent when you flip the switch and, listening, find the entire world at your command! Money cannot buy more perfect reproduction, greater selectivity, easier tuning, more mellow tone, or greater beauty of cabinet design in a battery operated receiver!

With this Lafayette DeLuxe 9 tube Battery Receiver, you can tune in not only American broadcast stations on the 173-560 meter band, but also foreign short wave, intermediate short wave and police broadcasts on the 64-175 meter band and foreign broadcasts on the 18.8-53.6 meter band. What a vast field for you to explore! And you can accurately log short-wave stations easily because of its 5½" micrometer airplane dial, which is as precise in its construction as a watch! Steady volume of reception without blasting is assured by means of the diode automatic volume control. Personal tone control enables you to bring out mellow low or brilliant high notes—the way you like them, while a large full 8" permanent magnet speaker enhances the tonal quality of the receiver.

The advanced superhet circuit utilizes the latest type super-efficient tubes: 1-19, 4-30's and 4-34's. No wonder it gets distance! An automatic bleeder circuit equalizes "B" and "C" battery voltages maintaining the "C" battery voltage at proper potential as the "B" batteries deteriorate

through use. All of these special features are here, in addition to 3-gang rubber cushioned condenser, manual volume control in addition to the AVC.

Not content to merely build the finest battery receiver, Lafayette has housed the chassis in two strikingly beautiful cabinet models made of the finest selected woods. Here is battery operated radio at its zenith... to satisfy the most critical of discriminate radio listeners.

6
TUBE
SUPERHET

THERE'S only one word to describe this Lafayette SUPPRESSORLESS Auto Radio - "Marvelous"! You have to see and hear it to appreciate it! It has everything: airplane type dial; automatic volume control; single unit quick service construction; latest tubes—at a price so low that it seems incredible!

"Quick Service"
Construction

Simply loosening 4 wing nuts will remove the entire chassis from the housing, for servicing.

No more headaches trying to service a radio in a "2 by 4 corner". This saves time, money and labor. The automatic volume control system is quick acting and positive, eliminating the need for constant manual adjustment to overcome fading when passing under bridges, etc. Having a 3 watt output, it is more than enough to override car and road noises. The remote control is of the airplane type and is indirectly illuminated and equipped with lock type switch to prevent unauthorized use. Six tubes including new high gain types are used as follows: 2-78's, 1-77, 1-75, 1-41 and 1-84. The housing is modern, attractively finished in black and silver.

Model A-60—Lafayette 6 tube superhet SUPPRESSORLESS, single unit construction Auto Radio. Complete with tubes, 18" remote control cables and airplane type remote control. Dimensions: 10½" long x 7½" deep x 6¾" high. Shpg. wt. 25 lbs. Code Wawer.

List price \$43.90. Your cost..... **\$21.95**

5 *tube* **AUTO RADIO**
SUPERHET

HERE'S a 5 tube radio produced to sell at a price! But despite this no sacrifice has been made in quality, as may be seen by its unusual features. These include: Single unit construction which makes it easy to install and service; automatic volume control to help eliminate fading while passing through places shielded by high buildings and to hold signals steady up hill or down dale; dynamic speaker; airplane illuminated dial calibrated in kilocycles; sealed vibrator power unit. This remarkable receiver is thoroughly filtered and comes completely equipped with motor generator condenser and distributor suppressor. The following latest type tubes are used: 1-75, 1-6D6, 1-6A7, 1-41 and 1-84. Current consumption from battery is only 4.55 amperes.

Model J-37—Lafayette 5 tube Auto Radio complete with tubes, motor generator condenser and distributor suppressor. Dimensions: 6½" wide x 11½" deep x 5" high. Shpg. wt. 18 lbs. Code Kasus. List price, \$33.90. Your Cost..... **\$16.95**

KING OF THE HIGHWAY

Lafayette DELUXE 6 TUBE SUPERHET

HOME-LIKE Reception on the Road

Truly the King of the Highway! As you glide along slowly or hurry over the road you are assured of sweet, mellow music just as if you were at home in your easy chair!

EASE OF INSTALLATION is the outstanding characteristic of this Auto Radio. It is easily mounted to the fire-wall by only 4 bolts. Two flexible drive shafts for tuning and volume controls are equipped with special spade connections for quick attachment. The battery lead cable is attached to the chassis by a bayonet connection; antenna and pilot light leads are attached by screw and pin type connection; the battery lead has an outside fuse and is arranged for connection to the ammeter. Installation is a "one-two-three" operation.

Next in importance is the manner in which the receiver has been designed to filter or shield out practically all interference. Cables are shielded and grounded to chassis container by lock-screw bushings. Spark plug suppressors are unnecessary in most cars. The only items needed to eliminate antenna pick up are distributor suppressor and generator condenser, which are supplied.

OTHER OUTSTANDING FEATURES include advanced design of 6" dynamic speaker, hermetically sealed to preclude impairment of operation due to dust particles in the air gap. Diode automatic volume control insures maximum stability in volume and eliminates fading and blasting. Full range tone control enables you to hear ALL the notes from low bass to brilliant highs. An advanced type of vibrator unit is used which may be removed as easily as any of the tubes. The speaker is attached to the cover, and when removed, exposes all tubes and the vibrator unit. A remote control of the non-glare airplane type is arranged for installation in either of 3 positions: on steering column; on under edge of instrument panel; or through instrument panel.

An advanced superhet circuit of extreme sensitivity and selectivity utilizes 6 latest type tubes: 1-84, 1-75, 1-41, 2-6D6, 1-6C6.

Model B-90—Lafayette 6 tube Superhet Single Unit Auto Radio with Remote Control (state type control wanted). Dimensions: 7" wide x 7" deep x 10" high. Shpg. wt. 28 lbs. Code Badda.

5 tube AC SUPERHET 3 BANDS

A FINE AUXILIARY RADIO FOR THE DEN

Here's an ideal, low priced receiver that has plenty of pep and power. It's just the thing to take on your vacation or for use in that upstairs room or den. Its three tuning ranges cover the wavelengths from 200-560 meters, 66-187 meters and 16-50 meters, so you can reach out and get foreign broadcasts and police calls as well as American broadcast stations. Five latest type tubes are used in a tried and proven circuit of unusual attainments. The tube complement: 1-6A7, 1-6D6, 1-75, 1-42, 1-80. A two gang condenser is used, while a 6" dynamic speaker assures an unusually high degree of tone quality. A handsome cabinet of selected hard woods houses the chassis.

Model C-25—Lafayette 5 tube 3 Band receiver complete with tubes. For 110 volts, 60 cycles AC. Dimensions: 12" wide x 8 3/4" deep x 15" high. Shpg. wt. 21 lbs. Code Wafar. List price, \$33.90.

\$16.95

Your cost

Also available for 220 volts at \$2.00 additional.

AUTO ACCESSORIES

Wire Wound Ignition Suppressors

Offer a high resistance to noise frequencies, yet permit ample flow of current for ignition purposes because of their low D.C. resistance (500 ohms). Will not cut down the speed of any car. Housed in bakelite casings. Two types available: for spark plug and for distributor. Shpg. wt. 8 oz.

YE5296—Spark Plug Type.
YE5297—Distributor Type.
Your Cost Each, Either Type

28¢

Distributor Silencer

A new and improved type which eliminates high frequency kick-backs and noise pick-up from the ignition coil. Has choke unit mounted inside the metal case, thus eliminating possibility of shorts to car frame. Equipped with three lugs conveniently arranged for mounting. Shpg. wt. 3 lbs.

YP14237—Your Cost

49¢

FORD V8 Distributor Suppressor

This unit makes it now possible to insert a distributor suppressor in FORD V8 auto installations. Resistor brush replacing regular distributor brush.

YE5293—Your Cost

18¢

New! Ignition Noise Filter Eliminates Individual Suppressors

This filter is designed to replace all resistors, suppressors or filters as used in connection with auto radio installations. The Master Filter is placed in the distributor head only, thus eliminating the necessity for using any type of suppression on the spark plugs. Consists of eight individual coils wound into a master coil, having an A.C. resistance of 420 ohms at 3400 R.P.M. Constructed with solid bakelite housing that will resist heat of 400° and is moisture proof. Will stand up under continuous excessive vibration. Shpg. wt. 8 oz.

YN14135—Filter.
Your Cost

\$1.50

Special Compact Suppressor Kits

These "Trutest" kits employ a new and simplified type of suppressor that will make the work of the auto radio installer much easier. These suppressors will fit any make car without the necessity for cutting any wires. Just unscrew spark plug cap, screw suppressor in its place and clip connecting wire to terminal provided on top of unit. Kits contain one spark plug suppressor for each cylinder and one distributor suppressor.

Your Cost Each

Ford V8 Condenser

With special bracket for installation on generator in Ford V8, or other types, of cars. Fits precisely and saves considerable time in installation. Bypasses generator noise.

YN14219—Your Cost

28¢

"Sash Cord" Auto Antenna Wire

Consists of 42 strands of No. 27 copper wire wound on a base of heavy cotton. Is flexible. Provides greater pick-up. **1 1/2¢**
YY20908—Your Cost Per Foot
25 ft. Coil **30¢**

Generator Silencer

Both the generator commutator and cut-out are sources of noise. This noise can be eliminated by using our generator silencer.

YP14215—5 mfd. **19¢**
Your Cost Each
YP14216—1 mfd. **25¢**
Your Cost Each

Ammeter Condenser

A condenser especially designed to eliminate the noise originating in wiring running from the ammeter—such as the horn wiring, head-light wiring, dashlight wiring, etc. Mounted in metal can equipped with mounting lug that automatically grounds one side of the condenser and with a flexible lead and lug for attaching to the ammeter.

YN14211—Your Cost **20¢**

Dome Light Filter

For eliminating noise originating in the wiring running to the dome light. Has self contained choke and condenser.

YN14208—Your Cost **35¢**

Special "Low Resistance" Auto Radio Fuses

Approx. 25% to 30% lower resistance than standard radio fuses.

YL12320—5 Amps. **Your Cost**
YL12321—10 Amps. **Ea. Any Type**
YL12322—15 Amps. **3¢**
YL12323—20 Amps.

AUTO "B" SUPPLY UNITS

Ford-Majestic "B" Power Supply

The genuine "Majestic." Built for Ford model 40-18805B receiver. Complete pack; contains transformer, vibrator, filter condensers and buffer condensers. Uses 2-6E7's, 1-6A7, 1-6C7, 1-6Y5, and 1-42. Six prong plug connects to chassis. Buffer condensers in metal container mounted on side of casing. All parts rubber cushioned. Quantity limited. Shpg. wt. 8 lbs.

YP15691—Your Cost **\$2.95**

RCA Vibrator

The genuine factory Part No. 7604. Full wave type. Double shielded, noiseless operation. All leads similarly color coded to original. Save time and money, avoid complications by using this exact replacement when removing defective or worn out M-34 vibrators. Other vibrators listed are also genuine exact replacement units.

YC2596—Your Cost Each **\$3.60**
Vibrator base only with filter condensers, for above. Part No. 6577.
YN14154—Your Cost **47¢**
Vibrators For M-105
Part No. 7689.
YN14155—Your Cost **\$4.70**
Vibrators For M-107
Part No. 7780.
YN14156—Your Cost **\$2.98**

PHILCO Replacement Vibrator

Used in Transitone models—6F, 9F, 5T, 10. In sponge rubber padded cylinder to eliminate noise pick-up. Full wave vibrator with pure silver points. Plug-in four-prong type. Shpg. wt. 2 lbs.

YN14274—Your Cost **\$2.79** Each

UTAH "B" Eliminator

For Majestic Model 66. Exact duplicate. Contains transformer, vibrator, filter condenser and 84 rectifier. Heavy metal container.

Complete instructions included. Shpg. wt. 8 lbs.
YN14232—Unit, with tubes. **\$5.25**
Your Cost

Auto ANTENNAS

Double V Auto Antenna Kit

Designed especially for the new all-steel top auto, although this type is also recommended for other type cars. Increases signal pick-up, and tends to minimize ignition and other noise interference. Installation simplified by spliced shielded wires. Shpg. wt. 4 lbs.

YR16473—Your Cost **\$1.35**

Triangle Auto Antenna

The ideal antenna for use in the new "Turret-Top" automobiles. Is sufficiently long for all cars. All mounting supports have Bakelite insulation. Tension spring and threaded eye-bolt provide the proper tension. Furnished with 7 feet of laquered lead-in wire. Full instructions included. Shpg. wt. 4 lbs.

YQ16481—Your Cost **75¢**

Same as above, but with shielded lead-in consisting of No. 16 primary wire with a tightly woven tinned copper shield. **98¢**
YQ16482—Your Cost

Same as above, but with special 7 milliammeter shielded cable for lead-in.

YQ16483—Your Cost, Each **\$1.10**

RCA Di-Pole Antenna

The new RCA Noise-Reducer Auto Antenna, in operation, acts as a counterpoise with the car acting as an antenna. The length and height are adjustable as illustrated. Shpg. wt. 3 lbs.

YY22818—List Price **\$2.60**
Your Cost **\$1.55** Each

Metal Car Antenna

Two-piece all metal adjustable antenna. 8" wide. Length variable from 3 to 4 feet. Equipped with 2 springs. Rainproof insulation. Shpg. wt. 5 lbs.

YY22843—Your Cost **\$1.05**

MALLORY REPLACEMENT VIBRATORS

ELKON *for all Standard Auto Radio Sets*

The popular Auto Radio, as we know it today, has been made possible only by the fact that Mallory Engineers originated and manufactured the first vibrator type power supply. Of the two million sets in use today, including those powered by "B" batteries and motor generators, over half are equipped with Mallory Elkonode vibrator "B" power supplies. It is apparent, therefore, that Mallory is and always will be the leader in the vibrator field. There is a Mallory vibrator for every make and type of Auto Radio. Most important, Mallory Vibrators are now priced so low that the use of substitutes will be false economy.

Replacement Part Headquarters for Dealers and Service Men

Cunningham Radiotron

at These Economy Prices

SIX MONTHS GUARANTEE

RCA Radiotron Tubes are the standard of excellence the world over and we back them up with as broad a guarantee as has ever been placed on a radio tube. We guarantee that they will give efficient service for six months and should any tubes purchased from us fail to do so we will replace them cheerfully and promptly. Burnouts and broken glass are exceptions.

Additional DISCOUNT

Servicemen and dealers will find it profitable to make their tube purchases at Wholesale Radio Service. An additional discount of 10%, deducted from "Dealer's Cost" prices, is available with each purchase of 25 tubes or more. Take advantage of this offer to increase your tube profits by purchasing a sufficient number of tubes to avail yourself of this discount.

STORE HELPS

Free!

Dummy Cartons

Same as shown above. Ideal for bulk display in windows or store interiors. In lots of 25— to servicemen and dealers who make their RCA-Radiotron tube purchases from us. Absolutely Free.

Price Tags

Free!

A convenient tag for pricing radio sets. Will aid salesman in

describing set, etc. Absolutely free to servicemen and dealers who purchase their RCA-Radiotron tubes from us.

Decalcomania

Free!

A 2 color identification marker for the store windows.

Great aid in making RCA tube sales. To servicemen and dealers — free!

RCA Tube Manuals

Contains 154 pages full of glass tube data and characteristics, tube theory, applications and circuit design. Latest revision.

FOUR PILLAR CONSTRUCTION

RAYTHEON

6 MONTHS GUARANTEE *Tubes* 10% ADDITIONAL DISCOUNT

Raytheon tubes are guaranteed for a period of 6 months from the date of purchase. We will gladly exchange any tube that does not give efficient service within that period—without red tape. Burnouts and broken glass are exceptions.

An additional discount of 10%, deducted from "Your Cost" prices, is available with each purchase of 25 glass tubes or more. Take advantage of this offer to increase your profits by purchasing tubes in quantity, to obtain this discount.

TUBE DEALS

All-Wave Oscillator

A modern electron-coupled all-wave oscillator, range 100 KC to 36 Megacycles—all fundamentals. Additional band permits extending range to 70 mc. Accuracy 1% average. Either complete battery or A.C. operation. Free with purchase of 656 tubes in 24 months. Write for complete details.

R. C. MULTITESTER

A Volt-Ohm-Milliammeter employing a D'Arsonval moving coil type meter with sensitivity of 2,000 ohms per volt. Any range is individually available by means of switch. May be obtained by contracting for 279 Raytheon tubes. Write for details.

DE LUXE MULTITESTER

Has two instruments, A.C. and D.C., in molded case. Extremely accurate and well constructed meters. Will permit volts (both A.C. and D.C.), ohms and milliamps measurements. Can be obtained free by purchasing 588 Raytheon tubes. Write for complete details.

FREE!

Tube Deals Circular

All-Metal Tubes

Raytheon offers a complete line of all-metal tubes to the trade. They employ the octal special pin base, and are identical, in all other respects, to those manufactured by other standard tube manufacturers. All Raytheon tubes are licensed by RCA, and the same sturdy construction which has typified the glass tubes—will be found in these types. Orders filled only when tubes are available.

6L7	2.00	1.10

Metal-Glass Types

To complete the line of tubes offered to the radio trade, tubes of metal-glass construction are also available. The structure of these tubes is such that the same benefits and advantages are obtained, as may be expected, from all-metal types. They conform, in characteristics and prong bases, to the all-metal tubes.

RADIO TUBES

*Sealed and
Tested for
Your Protection*

**6 MONTHS
GUARANTEE
ON ALL TUBES**

FIRST, we guarantee every receiving tube sold for a period of 6 months—not 90 days, but a full six months. IF ANY TUBE SOLD BY US SHOULD FAIL DURING SIX MONTHS IT WILL BE CHEERFULLY REPLACED WITHOUT CHARGE—burn-outs and breakages are the ONLY exception. To the best of our knowledge, this is the most liberal tube guarantee in the country.

Second, we make this guarantee possible by testing every tube before it is shipped out. We maintain an elaborate testing laboratory, equipped with every modern testing device available. SHOULD TUBE PRICES DECREASE OR INCREASE AFTER THIS CATALOG IS PUBLISHED OUR PRICES WILL CHANGE ACCORDINGLY. It pays to buy from Wholesale Radio Service!

An Ounce of Testimony Is Worth a Ton of Praise

April 6, 1934

Wholesale Radio Service Co., Inc.
100 Sixth Avenue
New York City

I have had such splendid service from you over the past three years that I have come to believe your word is Gospel and your catalog the Bible. I wish to thank you for the several occasions in which you sent goods G.O.D. on my wired request, and in every particular your service, goods and prices have been more than satisfactory.

Very truly yours,
R.O. Sellinger
Port Arthur News
Port Arthur, Texas

February 16, 1935

Wholesale Radio Service Co., Inc.
100 Sixth Avenue
New York City

I received, on February 6th, the radio I ordered from you recently. It is much better than I expected, and I am very pleased with it. Everyone who has seen it has immediately decided to buy one too. Wholesale has always given me good merchandise and quick service and I'll certainly recommend Wholesale to anyone. Thanking you for your quick service, I am

G.O. Price, Jr.
279 Newman Avenue
Harrisonburg, Va.

March 30, 1935

Wholesale Radio Service Co., Inc.
100 Sixth Avenue
New York City

Recently I ordered from your Atlanta branch, while at the University of Va., a Model A M-44 Lafayette 10 tube All-Wave receiver. The receiver lives up to all my expectations, and even surpasses them. It can receive the Daventry stations anytime that they are broadcasting. Moscow and Russia also come in very good.

I believe that you have without doubt the best mail order house in the East and therefore I give you permission to print all or portions of this letter as you desire.

Very truly yours,
Maurice L. Wheeler
304 Caldwell Ave.
Elmira, New York

ARCTURUS "G" LINE—Glass Equivalent to All-Metal Tubes

ARCTURUS has developed a glass counterpart of the metal tube which is identical in electrical characteristics and pin connections to the all-metal types. This line is designated as the "G" series, and possesses all of the advantages of the new tubes. They are positively interchangeable with the all-metal tubes, and type numbers correspond, excepting the 5Y3 which is a counterpart of the 5Z4.

TRIAD Metal Shielded Tubes

THESE tubes comprise a new line known as the "MG" series. The tubes in this series are non-breakable, fully shielded by metal, and in which a newly developed glass is used for maintaining the vacuum. The new standard octal bases are employed throughout. They are fully interchangeable with existing all-metal types. In addition, four more types, in metal-glass, are offered for AC-DC use.

EXCITER LAMPS

TRIAD-6B5—POWER AMPLIFIER TUBE

A recently developed power amplifier tube, somewhat similar to the 2B6, but for 6.3 volt filament operation. Combines the advantages of Class A and Class B operation in one tube. Will deliver 10 watts power in push-pull, when operated with specified plate voltages and zero grid bias. With 400 V. on plate, in P.P., 20 W. of power with only 5% distortion is obtainable.

YOUR COST. SPECIAL **\$1.05**

TRIAD-2B6—POWER AMPLIFIER TUBE

Popularly used in many small amplifiers. Novel construction permits the attainment of as high as 6 watts output from a single tube. With 400 volts, plate, on a pair of these tubes in push-pull, as high as 18 watts is obtainable. 2.5 V. filament is used in this tube. Circuit use for this tube and complete characteristics has been described in many magazines.

YOUR COST **\$1.22**

AUBURN for QUALITY at Low Cost

AUBURN'S reputation for quality merchandise at exceptionally low prices has never been equaled. Now Auburn enters the public address field with three new sensational amplifier values. Each of these new amplifiers fills a definite need in this field and for the first time makes possible the purchase of reliable equipment at ridiculously low prices.

RELIABLE Economical SOUND-SYSTEMS

AUBURN AMPLIFIERS

AUBURN MASTER!
AN INCOMPARABLE VALUE!

High and Low
Impedance Inputs
Mike and Field
Current Supply

Never before such an amazing value as this! The new Auburn MASTER incorporates many features found only in the highest priced amplifiers. Both high and low impedance inputs available. Symmetrically wound double button mike transformer. Mike current supply built-in. Volume and Tone controls. Field supply for one 1000 ohm 10 watt or two 2000 ohm 5 watt fields. Gain 74 db. Peak output 14 watts.

PUSH-PULL PENTODE OUTPUT

Tubes used include: one 2A6 as voltage amplifier, one 2A6 as phase inverter, two 2A5's in push-pull and one 83 as rectifier. Output load impedance required, 14,000 ohms plate-to-plate. Frequency response exceptionally good. Dimensions: 15x8 1/2 x 8" deep. Shpg. wt. 19 lbs.

YP15861—Auburn 10 watt Amplifier less tubes.
Code AMRET. **\$12.50**

AUBURN PHONO-P.A. PORTABLE

A Combined Electric Phonograph and P.A. System

Completely self-contained in a compact leatherette covered carrying case. Extremely light in weight. Will play both 10" and 12" records. Excellent tone and volume—a mighty midget for general P.A. work.

Complete
with
Tubes **\$34.50**

Incorporates the Auburn 3 1/2 watt Amplifier described above. Includes changeover switch for phono-to-mike, volume and tone controls, mike current supply, and a large 8" dynamic speaker. Constant speed, felt covered turntable and pickup for record reproduction mounted in top of cabinet. Removable cover. Strong plywood case, leatherette covered. Leather handle. Nickered hardware. Case dimensions 12 1/2" by 8 1/2" by 12" high. Microphone jack on amplifier permits quick, easy connection and disconnection of microphone. Speaker protected by attractive steel screen. This powerful little unit can be set up ready for operation in a few minutes. Shpg. wt. 22 lbs. Net wt. 15 lbs.

YP15862—Auburn Phono-P.A. Portable complete with tubes, ready for operation, less mike. Code AMLOB.

Six .1 Sections Paper Condenser Block

Ideal for the set builder or for replacement purposes. Contains six .1 sections with common negative. In cardboard carton with mounting flanges. Size 2 1/2 x 1 1/2"; mounting centers, 2 1/8". YB497—Your Cost ... **19c**

.5 Mfd., 1000 Volt Condenser in Metal Can

A high voltage section ideal for use in receivers and low power transmitters. Accurately rated. Best grade foil and paper. Has leads for direct connections. Sealed to moisture proof. Size 4 1/2 x 2 1/4". Shpg. wt. 1 lb. YB498—Your Cost ... **29c**

POLYMET Uncased "Hi-Volt" Sections

A line of uncased filter and by-pass units for use in low power transmitters as well as in receivers. Constructed using the finest grade of foil and paper. Sealed so as to be moisture repellent. Outside wrapping of empare cloth precludes possibility of shorts to metal chassis. End seal of hard, high temperature wax. Leads coded to show outside foil.

★ Audio Transformer Selection ★

Inputs, Outputs and Plain Audios

In this instance, only a "lucky" buy of these standard audio components enables us to offer them at these exceptionally low prices. All are of high quality, affording fine results. Units listed are of the popular strap mounting type, approximately $3\frac{1}{2} \times 2\frac{1}{2}$ ". Quantities limited, get yours now. Shpg. wt. 2 lbs.

YC1843—P.P. Input Transformer. Ratio 3:1.

Your Cost **45¢**

YE5500—Plain Audio. Ratio 3:1.

YE5502—Output Transformer. To match single 45 or 71A to a 5-15 ohm voice coil.

YE5503—Output Transformer. To match P.P. 45's or 71A's to a 5-15

ohm voice coil.

YE5504—Output Transformer. To match single 47 or 2A5 to a 5-15 ohm voice coil.

YE5505—Output Transformer. To match P.P. 47's or 2A5's to a 5-15 ohm voice coil.

Your Cost Each, **39¢**
Any Type.

Audio and P.P. Input Trans.

Well made, fully shielded transformers with excellent frequency response. Especially suited for use as

replacement transformers or for amplifier construction. Laminations are high-grade, and windings ample and wax impregnated to resist detrimental moisture effects. Primaries and secondaries are wound on heavy high grade material. Shpg. wt. 2 lbs.

YC1512—Push-Pull Input. Your Cost **65¢**

YC1914—Straight Audio. Your Cost **29¢**

SANGAMO Audio Transformers

All, with the exception of the Type F plate impedance, are full cased in metal containers with solder lug side terminals. Core material is high permeability silicon steel. Average size $3\frac{1}{2} \times 2\frac{1}{2}$ ".

TYPE H171
Push-pull output transformer to match a pair of 71A's, 45's, or 50's to a 5-15 ohm voice coil of a dynamic speaker. Solder lug terminals. Shpg. wt. 3 lbs.

YA373—List \$6.50 **29¢**
Your Cost

TYPE G210
Output transformer designed to match push-pull 10's to a 5-15 ohm voice coil of a dynamic speaker. Shpg. wt. 3 lbs.

YA371—List \$10.00 **29¢**
Your Cost

TYPE D210
Push-pull output transformer to match single or push-pull type 10 tubes to a magnetic speaker. Secondary impedance 4000 ohms. plate to plate. Shpg. wt. 3 lbs.

YA369—List \$12.00 **29¢**
Your Cost

TYPE F
Plate impedance. Un-cased type. Also used for impedance coupled amplification. Tap provided for auto-transformer coupling. Shpg. wt. 3 lbs.

YA366—List \$5.00 **19¢**
Your Cost

Phono Matching Transformer

To match a low impedance pick-up to any type input. Single winding, tapped at 150, 300 and 1100 ohms D.C. resistance. Size $2\frac{1}{2} \times 1\frac{1}{2} \times 2\frac{1}{4}$ ". Shpg. wt. 2 lbs.

YC2237—Your Cost **29¢**

Upright Shield Transformers

Accurately rated. The 6 tube transformer has long color coded leads for all connections; the 9 and 11 tube transformers have solder lug terminals. All furnished with hook-up diagrams. Mounting area on all units $3\frac{1}{2} \times 3\frac{1}{2}$ ". mounting centers $3\frac{1}{2}$ ".

All Primaries 115 Volts, 50-60 Cycles

For 6 Tube Receivers
Secondaries: (1) 750 volts C.T.—at 70 M.A. (2) 2.5 volts C.T. at 5.25 amps. (for 3 heater tubes). (3) 2.5 volts C.T. at 3.5 amps. (for 2 power tubes). (4) 5 volts at 2 amps. (for 80). Shpg. wt. 7 lbs.

YC1956—Your Cost **\$2.35**

For 9 Tube Receivers
Secondaries: (1) 750 volts C.T. at 90 M.A. (2) 2.5 volts C.T. at 10.5 amps. (for 6 heater tubes). (3) 2.5 volts C.T. at 3.5 amps. (for 2 power tubes). (4) 5 volts at 2 amps. (for 80). Shpg. wt. 8 lbs.

YC1961—Your Cost **\$2.35**

For 11 Tube Receivers
Secondaries: (1) 800 volts C.T. at 110 M.A. (2) 2.5 volts C.T. at 14 amps. (for 8 heater tubes). (3) 2.5 volts C.T. at 3.5 amps. (for 2 power tubes). (4) 5 volts at 2 amps. (for 80). Shpg. wt. 8 lbs.

YC1963—Your Cost **\$2.35**

FADA Audio Transformer

Used in early model Fada receivers. Ratio 3:1. Primary 3500 ohms, secondary 8000 ohms. Open type with long insulated leads. Size $3\frac{1}{2} \times 2\frac{1}{2}$ ". Shpg. wt. 2 lbs.

YC1838—Your Cost Each **29¢**

General Purpose Power Transformer

Can be used in Balket A3, A5, A7; Fada 16, 17, 20, 32, 50, 70, 71, 72; Crosley 804; Eveready 30 Series, and Steinite 40-A, 45-A. $2\frac{1}{2}$ -volt winding for 5-227a, 5-volt winding for 2-171As, 5-volt winding for 280 tube; 285/285 volt at 60 MA. 120-volt primary. Size $4\frac{1}{2} \times 3\frac{1}{2} \times 3\frac{1}{2}$ ". Mounting centers $2\frac{1}{2} \times 2\frac{1}{2}$ ". Soldering lugs terminate on an insulated strip. Shpg. wt. 7 lbs.

YC1515—Your Cost **\$1.95**

SPECIAL! 2.5 Volt Filament Transformer

Semi-open type. Delivers 2.5 volts at 3.5 amperes (for 2 type 24, 27, 35, etc., or 3 type 56, 57, 58, etc.). Primary for 110 volts, 60 cycles A.C. Shpg. wt. 2 lbs.

YC1636—Your Cost Each **39¢**

6.3 V., 4 and 5 Tube Power Transformers

Flush type mounting. 4 tube transformer contains 1—C.T. 650 V. at 40 ma., 1—6.3 V. secondary at 1.6 A., and 1—5 V. at 2 A.

Dim.— $3\frac{1}{2} \times 2\frac{1}{2}$ ". 5 tube transformer has 1—C.T. 650 V. secondary at 45 ma., 1—6.3 V. at 2 A. **75¢**

Your Cost, Special

CROSLLEY Field Exciter

Uses two type 25Z5 rectifier tubes, and will supply field current for any 500 to 1,000 ohm field (12 watts), or two 2,500 ohm fields (6 watts each). Operates on 110 volts, 60 cycles A.C. Has line switch and pilot light indicator. Furnished with standard phone plug and leads. Top removable, held in place by two wing nuts. Overall size 10" long, 5" wide and $2\frac{3}{4}$ " deep. Shpg. wt. 7 lbs.

YW19110—Exciter, less tubes. Your Cost **\$3.45**
Special
Two Lafayette 25Z5 Rectifiers. Your Cost **99¢**
for 2.

BARGAINS!—In Oversize Audios

High-Quality audio transformers, for public address amplifiers, receivers, etc. All large and oversize units, with ample core laminations. When properly used they will provide excellent frequency response.

Type A is available in straight oversize audio transformer, measuring $2\frac{3}{4} \times 2\frac{3}{4} \times 3\frac{1}{2}$ ". P.P. input transformer, or in a high impedance audio choke—physically similar. With bottom lugs. Type B is similar to "A", except that terminals are provided on the sides. Type C input transformer, ratio 2.5 to 1, $3\frac{1}{2} \times 2\frac{1}{2} \times 2\frac{1}{2}$ ins.

YC1932—Push-Pull Input. Type A. Shpg. wt. 2 lbs. **83¢**
Your Cost, Special

YC1913—Straight Audio. Type A. Ratio 3:1. Shpg. wt. 2 lbs. Your Cost **49¢**

YE5637—Audio Choke. 30H. 280 ohms D.C. Shpg. wt. 2 lbs. Your Cost **59¢**

YC1840—P.P. Input. Type B. Your Cost **85¢**

YC1841—Plain Audio. Type B. Your Cost **69¢**

YC1807—P.P. Input. Type C. Cased. Shpg. wt. 4 lbs. Your Cost **75¢**

YAC1808—Same, but uncased. Your Cost **69¢**

Filter Choke 30 Henry- 50 Ma.

Inductance 30 henries. Current carrying capacity 50 milliamperes. D.C. resistance 450 ohms. 6" leads. Size $2\frac{1}{2} \times 1\frac{1}{2} \times 2\frac{1}{4}$ ". Shpg. wt. 3 lbs.

YA246—Your Cost **39¢**

Heavy Duty P.A. Choke

Admirably suited for impedance coupling for P.A. amplifiers up to 20 W. 30 Henries. 200 ohms D.C. 125 ma. max. Dim.— $3\frac{1}{2} \times 3\frac{1}{2}$ " high. **89¢**
YE5638—Shpg. wt. 3 lbs.

YY20912—Per 250 ft. \$1.30

Genuine RCA-VICTOR Double Faced Records

This is a real opportunity to obtain genuine RCA-Victor double-faced phonograph records at an extremely low price. Two assortments of 25 records each, at prices that you paid for only one record a short time ago. Ideal for public address men for demonstrating amplifiers and to fill-in when using a P.A. Good for dealers for encouraging radio-radio combination sales by giving away a half-dozen with purchase of an instrument. They cost only 9c. each.

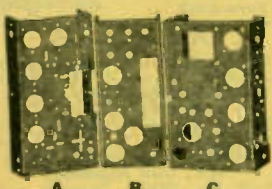

AMERICAN RECORDS

25 assorted records to a carton, includes many well-known artists, in Vocals, Waltzes, Fox-trots, Tangoes, Bands, Marches, etc. Shpg. wt. 13 lbs.
YA346—
Carton of 25 Assorted. **\$2.25**
Your Cost Special.

SPANISH Records

Assortment of 25 Spanish records, double-faced, by well-known and popular artists. All late numbers, and includes Tangoes, Cancions, Fox-trots, Paso Doble, Boleros, etc. Shpg. wt. 13 lbs.
YA347—
Carton of 25 Assorted. **\$3.50**
Your Cost Special.

Midget Chassis

A B C
Cadmium plated, drilled, steel chassis, for building small receivers. Types A and B are ideal for constructing A.C.-D.C. sets, and include a cut-out for speaker mounting. With 5 and 4 tube socket cut-outs respectively. Type C is a 5 tube chassis with transformer cut-out. Avge. shpg. wt. 4 lbs. each.
YM12957—A, 9 1/2 x 6 x 1 1/2"
YM12958—B, 9 x 3 1/2 x 1 1/2"
YM12959—C, 9 x 6 1/2 x 2 1/2"
Your Cost, 15¢
Each.

200,000-Ohm BRADLEY Volume Control

Genuine Allen Bradley control. Resistance 200,000 ohms with tap at 100,000 ohms. Can be used as a general replacement tone or phono-volume control. Shaft extends 1/4" and is milled flat on one side.
YM0575—
Your Cost Each 15¢

YAXLEY 2000 ohm Jr. Pot.

An excellent wire-wound control for replacement or construction purposes. Spring tension slider insures good contact and permits future adjustments when necessary. Dia. 1 1/4", shank 3/8" threaded, shaft 1/4" dia., center lug (slider) connects to frame of control. Less knob.
YF6353—Your Cost 14¢

RCA Intermediates Radiolas 60, 62, 64 and 66

Here is the genuine "I.F." Transformer for the Radiola Models, each has been peaked at its correct frequency at the RCA factory. Shpg. wt. 8 oz.

For Model 66
1st and 2nd "I.F." Transformer (RCA No. 8481.)
YC2165—Your Cost Ea. 95¢
3rd "I.F." Transformer. (RCA No. 8482.)
YC2166—Your Cost 95¢
For Model 67
1st Intermediate Stage. (RCA 8481.)

3rd Intermediate Stage. (RCA 8500.)
YC2162—Your Cost 95¢

Special Kit of 10 Assorted General Replacement Controls

A splendid opportunity for service men and constructors. Ten assorted, each different, volume controls at the list price of only one. All standard sizes and types, no "flukes". Includes such makes as Centralab, RCA-Victor, Bradley, etc. Some with switch, some without, but all are useful and will definitely come in handy sooner or later. They are designed for various types of circuit use, i.e., screen voltage, antenna shunt, "C" bias control, voltage divider, tone control, and others. Some are exact replacement controls for certain receivers. Shpg. wt. 2 lbs.
YF6354—Kit of 10 Assorted Controls. \$1.25
Your Cost, Special.

175 Kc. Midget I.F. Transformer

Midget double tuned I.F. transformer. Compact type used in latest receivers. Dimensions 1 1/2" diameter, 2 3/4" high. Trimmer condensers have genuine Isolantite bases, and are tuned from top of assembly. Due to precision winding, these units provide exceptionally high gain. **Quantity limited.**
YM10036—175 Kc. 45¢
Your Cost.

465 Kc. I.F. Transformers

Very efficient I.F. transformers at unheard of prices. Two sizes available, both 4" long, but one is 1 1/2" in dia., the other 2" dia. Both are 465 Kc., double tuned, padders mounted on ceramic bases to minimize losses. With spade lugs.
YM10051—1 1/2" dia. I.F.T. 35¢
YM10052—2" dia. I.F.T. 35¢
Your Cost, Either Type.

Special R.F. Choke

For replacement purposes, receiver construction, and experimental uses. Has a rated inductance of 12 millihenries. Wound on a wood spool and sealed with pitch.
YM10132—Your Cost Each 9¢

Majestic 175 Kc. I.F. Coil

Can be used in Majestic or any receiver employing 175 Kc. I.F. transformers. Each section accurately wound and perfectly insulated. On genuine isolantite form. Inductance of each section approximately 40-mh.
YM10048—Your Cost Each 15¢

6 and 7 Prong Wafer Sockets

Dual bakelite laminations, with sturdy prong contacts. Mounting hole centers—1 1/4". Only 6 or small 7 prong types available.

Universal "Fitzall" Power Transformers For 1.5, 2.5, 5 and 6.3 Volt Tubes

For Class "B" Sets

- Part No. 9552. Mounting centers 1 1/4" to 2 1/4", 4 1/4" high, 3 3/4" wide. Primary: 115 volts, 50-60 cycles A.C. Secondaries: High Voltage 165-310-165-310 volts at 115 M.A.
 (1) 2.5 volts C.T. at 3 amps.
 (2) 2.5 volts at 3.5 amps.
 (3) 5 volts tapped at 1.25/1.25/2.5 volts at 5 amps.
 (4) 2.5 volts tapped at 1/1.5 volts at 7.25 amps. Shpg. wt. 9 lbs.
YE5630—Your Cost \$3.90

This line of transformers is universal both physically and electrically. Four types cover practically every requirement.

For 10-12 Tube Sets

- Part No. 9551. Mounting centers 1 1/4" to 2 1/4", 4 1/4" high, 3 3/4" wide. Primary: 115 volts, 50-60 cycles A.C. Secondaries: High Voltage 750 volts C.T. at 110 M.A.
 (1) 5 volts C.T. at 3 amps.
 (2) 2.5 volts at 3.5 amps.
 (3) 5 volts tapped at 2.5/1.25/1.25 volts at 5 amps.
 (4) 2.5 volts tapped at 1/1.5 volts at 10.5 amps. Shpg. wt. 8 lbs.
YE5625—Your Cost \$3.60

For 5-9 Tube Sets

- Part No. 9553. Mounting centers 1 1/4" to 2", 4 1/4" high, 3 3/4" wide. Primary: 115 volts, 50-60 cycles A.C. Secondaries: High Voltage 750 volts C.T. at 80 M.A.
 (1) 5 volts C.T. at 3 amps.
 (2) 5 volts tapped at 2.5/1.25/1.25 volts at 5 amps.
 (3) 2.5 volts tapped at 1/1.5 volts at 7.5 amps. Shpg. wt. 7 lbs.
YE5631—Your Cost \$2.85

For 4 Tube Sets

- Open frame type. For use in mid-range sets only where universal features are unnecessary. Primary 115 volts, 50-60 cycles. High voltage 600 volts C.T. at 84 M.A.; 5 volts C.T. at 2 amps.; 6.3 volts tapped at 1.25/1.25/3.8 volts at 2 amps. Shpg. wt. 5 lbs.
YE5632—Your Cost \$1.24

RCA Universal Output Transformer

A single transformer for matching all existing types of output tubes, either single or P.P., to all dynamic speakers. Covers voice coil impedances from 1 ohm to 15 ohms. Primary load impedances 1000 to 20,000 ohms. High fidelity response characteristics make this unit especially attractive; frequency range from 30 to 10,000 c.p.s. Maximum working voltage potential 500 volts. Angle brackets with slots allow mounting in any position. Has tinned solder lug terminals. Baked varnish impregnation. Size 2 1/4 x 2 1/4 x 2". Shpg. wt. 3 lbs. Part No. 7852.
YE5536—Your Cost Each \$1.17

Shielded Output

Has same specifications as above, but is fully shielded in a cadmium plated metal case. Bakelite terminal board. Shpg. wt. 3 lbs.
YE5537—Your Cost \$1.45

MODEL M-34 PARTS

Power Transformer

The genuine RCA Part No. 9430 for the M-34 auto set. Delivers the necessary high voltages for the receiver. Takes only a few minutes to install. Has color coded leads. Shpg. wt. 3 lbs.
YC2013—List \$3.60
Your Cost \$2.16

Filter Block

Genuine RCA Part No. 7600. Contains one reactor, one choke coil, one .5 mfd., two 4.0 mfd. and one .875 mfd. capacitors. In metal container with crimping lugs. Color coded leads. Ready to install. Shpg. wt. 3 lbs.
YB1024—List \$4.06
Your Cost \$2.44

Antenna Coil

Part No. 6489. Complete assembly. List 86c
YM10225—Your Cost \$52c
Oscillator Coil
 Part No. 6471. Complete assembly. List 74c
YM10226—Your Cost \$44c
R.F. Coil Assembly
 Part No. 6540. Detector coil. List price 94c
YM10227—Your Cost \$56c
Audio Transformer
 Part No. 6488—Interstage audio transformer. List \$1.30
YE5633—Your Cost \$78c

Output Transformer
 Part No. 3688—List price \$1.50. Shpg. wt. 1 lb.
YE5634—Your Cost \$90c
Speaker Cone Assembly
 Part No. 9023. Cone and voice coil. List price \$1.00
YW19776—Your Cost \$60c

RCA-VICTOR Dial Drive Assembly

RCA Part No. 2999. Used in models R-7A, R-9, R-43, R-10, R11, R-8, RE-18, RE-26, RE-16A, R-4 and R-6. Comes complete with friction rubber, screws and lock-washers.
YH9744—Your Cost Each \$24c

Drive Clutch Assembly

The complete turning condenser drive clutch assembly used in the following RCA-Victor receivers: 118, 211, 128, 224, 322, 135B, 235B, 143, 242, 262, 281 and 381. Comprises drive shaft, bearings, ring, spool, spring and washers completely assembled. Simple to install. Part No. 4422. Shpg. wt. 1 lb.
YP15268—List \$1.00
Your Cost Each \$60c

NOTE: As authorized distributors for the RCA-Victor Company, we can supply any genuine RCA Factory Replacement Part at a discount of 40% from the list price. Write us your requirements, and allow us to serve you speedily.

Sole Distributors for

Clarion Radio REPLACEMENT PARTS

As sole distributors for all Clarion products we are prepared to supply practically any replacement part required. We carry complete stock of all the most used parts, including coils, transformers, condensers, etc. All Clarion parts are maintained in the New York Warehouse only, but may be ordered through Atlanta or Newark if more convenient.

A special department has been created for the handling of Clarion replacement parts and should any new products be developed from time to time by Clarion engineers these will also be available to authorized dealers at exceptionally attractive prices and discounts. If you are a Clarion dealer it will pay you to get in touch with us so that we can keep you informed of all new developments as they are completed by Clarion engineers.

Models S-14, S-21, S-31; Bremer Tully S-81, S-82 Genuine Part No. X-756. Shpg. wt. 8 lbs.

BR262—Your Cost **48¢**

Models 15, 22, 32 and 42 Genuine Part No. 3029. Shpg. wt. 4 lbs.

BR265—Your Cost **\$2.25**

Models 11, 12, 16 and 33 Genuine Part No. 6023. Shpg. wt. 2 lbs.

BR274—Your Cost **95¢**

Models 17, 24 and 25 Genuine Part No. 6022. Shpg. wt. 2 lbs.

BR276—Your Cost **95¢**

Electrolytics

Models 11, 12, 16 and 33 Part No. 928. 7 Mfd.

BR290—Your Cost **95¢**

Models 17, 24 and 25 Part No. 929. 6 Mfd.

BR292—Your Cost **95¢**

Volume Controls

For Models 15, 22, 32 and 42 Part No. 8028.

BR401—Your Cost **\$1.95**

For Models 14, 21 and 31; Bremer Tully Models 81, 82 Part No. X-626. With switch.

BR295—Your Cost **29¢**

For Models 11, 12, 16 and 33 Genuine Part No. 6647.

BR308—Your Cost **49¢**

For Models 17, 24 and 25 Part No. 6649. Genuine Bradley control with switch.

BR739—Your Cost **\$1.60**

For Models P-3, P-10, P-11, PR-28C, PR-38C and PR-48C Genuine Part No. P-190.

BR415—Your Cost **55¢**

Filter Chokes

For Models 15, 22, 32 and 42 Part No. 3013. Shpg. wt. 3 lbs.

BR173—Your Cost Each **59¢**

For Models 14, 21 and 31 Part No. X-647. Shpg. wt. 4 lbs.

BR164—Your Cost Each **\$1.45**

Similar to above, but for 25 cycle receivers. Part No. X-705. Shpg. wt. 4 lbs.

BR165—Your Cost **69¢**

For Models S-14, S-21, S-31 Part No. X-757. Shpg. wt. 4 lbs.

BR169—Your Cost Each **49¢**

Oscillator Coil Assemblies

Contain all padding, plate and grid by-pass condensers. In shields. Shpg. wt. 1 lb.

For Models 11, 12, 16 and 33 Part No. 6044

BR154—Your Cost **\$1.95**

For Models 17, 24 and 25 Part No. 6054.

BR153—Your Cost **69¢**

I. F. Transformers

Furnished complete in aluminum cans. Have grid lead, trimmer condensers and mounting bracket. Shpg. wt. 1 lb.

For Models 11, 12, 16 and 33 First I. F. Transformer Part No. 6031.

BR133—Your Cost **\$1.35**

Similar to above, but for sets using AVC. Part No. 6085.

BR226—Your Cost **\$1.35**

Second I. F. Transformer Part No. 6032.

BR132—Your Cost **90¢**

For Models 17, 24 and 25 First I. F. Transformer Part No. 6033.

BR315—Your Cost **90¢**

Second I. F. Transformer Part No. 6032.

BR132—Your Cost **90¢**

Antenna Loading Coils

S-14, S-21, S-31 Part No. X-741. Also used in Bremer-Tully models S-81 and S-82. Ideal general replacement.

BR161—Your Cost Each **25¢**

Isolantite Bushing

Part No. 6409. Used in all models employing turret condensers. Low loss; ideal for use in high frequency receivers, etc.

BR109—Your Cost Each **19¢**

Four Gang Condenser

Models 15, 22, 32, 42 Part No. 3004. Complete with trimmers. Shpg. wt. 7 lbs.

BR252—Your Cost Each **79¢**

NOTE

Space limitations prevent a complete listing of all Brunswick phono and radio replacement parts. Practically any part can be supplied on order; prices on request. We can supply technical service manuals for all models made during and after the year 1930. Price 25c each.

By-Pass Assemblies

MODEL 220

Genuine Majestic replacement Part No. 6577 R.F. Unit Shpg. wt. 2 lbs.

YB723—Your Cost Each 25¢
Similar to the above, but A.F. by-pass block. Genuine Majestic replacement Part No. 6576. Shpg. wt. 2 lbs.
YB726—Your Cost Each 39¢

MODEL 35
Part No. 5792. Shpg. wt. 2 lbs.
YB724—Your Cost Each 25¢

MODEL 45
Part No. 5926. Shpg. wt. 2 lbs.
YB725—Your Cost Each 30¢

FADA Tuning Bracket Casting

Used on all of the older model Fada sets. Genuine part, will fit chassis exactly. Part No. stamped on casting. Shpg. wt. 1 lb. Part No. 858MP
YF6154—Your Cost **75¢**
Part No. 872MP
YF6155—Your Cost **75¢**

FADA Dial Scale and Drum

Genuine Fada Part No. 871MP. Used in all early models. Scale riveted to drum. Shpg. wt. 2 lbs.
YF6160—Your Cost **\$1.05**

FADA Cone Bracket

Genuine Part No. 878MP. Used with early model dynamic speakers. Iron casting, will not break. Shpg. wt. 3 lbs.
YF6159—Your Cost **73¢**

FADA Friction Drive Shaft

Genuine Fada Part No. 1724X. Used with drum illustrated at right. Comes complete with all washers, spring, etc. Assembled ready for use. Shpg. wt. 1 lb.
YF6152—Your Cost **48¢**

FADA Tuning Drum

Genuine Fada Part No. 1716X. Used with early models. 4 1/2" diameter, 1/2" track. Shpg. wt. 1 lb.
YF6153—Your Cost **82¢**

YF6156—No. 888MP
YF6157—No. 885MP
YF6158—No. 901MP
Your Cost Each, Any Type. **1.35**

FADA 3-Legged Cone Brackets

Used in early Fada receivers. Improved type, cast iron construction. Three types. Shpg. wt. 3 lbs.

YF6156—No. 888MP
YF6157—No. 885MP
YF6158—No. 901MP
Your Cost Each, Any Type. **1.35**

FREED-EISEMANN Volume and Tuning Dial Castings

Exact duplicate of the original Freed-Eisemann Part Nos. 2445 (tuning dial) and 2446 (volume control) castings. Will fit chassis exactly; no changes necessary to install. Of cast iron, finished in gilt. Will not break or crack. Shpg. wt. 2 lbs. each.
YF6150—Volume Control Casting. Your Cost Each **82¢**
YF6151—Tuning Dial Casting. Your Cost Each **87¢**

Free!-REFRIGERATION MANUAL-Free!

Wholesale Radio Service Company will shortly publish a comprehensive Refrigeration Catalog. It will be mailed, free of charge, to all Refrigeration Dealers and Servicemen. In addition to a listing of a quality line of refrigerators at new low prices, it will contain a listing of replacement parts for the majority of the standard refrigerators manufactured. Materials for such makes as Kelvinator, Norge, Copeland, Zerzone, Buckeye, etc., will be illustrated and described to facilitate quick selection—and all at Lowest Wholesale Prices.

Write NOW, to

WHOLESALE RADIO SERVICE COMPANY

100—6th Avenue
New York, N. Y.

A copy can be mailed to you as soon as it comes off the press. (Mailed from New York office only.)

TERMS

Wholesale Radio Service Company buys for cash and sells for cash. That is the secret of our low price policy. We cannot afford to give credit as we ask none ourselves.

We ship C. O. D. if desired, providing a deposit of 20% accompanies your order. We cannot ship C. O. D. without a deposit. C. O. D. packages can be shipped to all parts of the United States, Porto Rico, Hawaii, Alaska and Mexico. We CANNOT ship C. O. D. to any country outside of the United States, excepting those mentioned. Orders generally, cannot be sent Parcel Post, C. O. D. care of banks, as most banks refuse to handle such shipments.

The safest and best way to send money is by postal, express, or telegraph money order, bank draft or firm checks. Do not send cash. If absolutely necessary to send cash, register the letter.

ON ALL ORDERS FOR FIFTY (\$50.00) DOLLARS OR MORE DEDUCT 2% FROM THE TOTAL AS A TRANSPORTATION ALLOWANCE EXCEPT ON READRITE, TRIPLETT AND NATIONAL PRODUCTS.

IMPORTANT. Indicate catalog number and stock number on order blank. The number of this catalog shown on front cover is 59.

When ordering, specify method of shipment you prefer. In the upper right hand corner of the order blank you will find a series of squares marked "Express," "Parcel Post," "Freight," "Boat," and "Best Way" arranged for your instructions. All merchandise shipped by express subject to inspection if you specify this in your order blank.

IF YOU FIND IT NECESSARY TO RETURN ANY MERCHANDISE FOR ADJUSTMENT PLEASE WRITE, STATING FULL DETAILS, BEFORE RETURNING PACKAGE. We will IMMEDIATELY forward necessary shipping instructions. Your cooperation in this respect will be appreciated—and it will help us to give you better service. When returning merchandise pack carefully and insure.

FOREIGN ORDERS

Orders from foreign countries receive careful attention. They are packed and shipped to ensure very prompt and satisfactory delivery.

Our terms on ALL foreign sales are as follows: Payment in New York by letter of credit against documents, or 50% deposit WITH ORDER, balance sight draft against Bill of Lading. These conditions will not apply to certain countries where rigid exchange control conditions exist. In countries where rigid exchange control exists, merchandise plus transportation charges must be paid for in full in New York before shipment can be made. All quotations F. O. B. 100 Sixth Avenue, New York, with slight additional charge for export packing. ORDERS UP TO \$25.00 PAYABLE IN FULL IN ADVANCE, PLUS SHIPPING CHARGES. Remittance by draft on New York bank in U. S. Currency. We do not recommend that you send us foreign checks, as shipment will be delayed until cleared.

The average Parcel Post rate on foreign shipments is 14c per pound. Insurance rate averages 1¼ per cent of the order's value, with a minimum rate of 25 cents.

Our catalog prices are F.O.B. warehouse, packed for domestic shipment. For Special export packing and delivery to pier, there is a slight additional charge covering our extra costs. There is no extra charge for shipments to points outside the United States, which can be forwarded packed as for domestic shipment.

PARCEL POST

Freight and Express shipments are sent transportation collect. Orders shipped by parcel post must be prepaid, and we therefore request that you INCLUDE POSTAGE FOR PARCEL POST SHIPMENTS. Estimate the cost of postage to your town by finding the weight of the articles you are purchasing (weight of each item is given in catalog) determine the zone in which your town is located, and then from the above chart you can find the cost of sending the package to your town.

Example: Mr. John Jones lives in Edwight, West Virginia. He orders a condenser, which according to the catalog weighs 3 pounds. The nearest big city to Edwight is Charlestown, which he finds from the above chart is in the 4th zone. The cost of sending 3 pounds to the 4th zone is 17c and he adds this amount to his remittance plus cost of insurance.

INSURANCE

All parcel post packages are covered against damage or loss. Insurance costs and postage should be added to the amount sent. Charges are as follows:—

When value of parcel is up to	Charge is
\$5.00	3 cents
between 5.00 & \$25.00	10 "
25.00 & 50.00	15 "
50.00 & 100.00	25 "

After \$100.00 value the charge for each \$50.00 additional is 5 " extra

C. O. D. SHIPMENTS

Transportation charges on C. O. D. parcels are slightly higher than those fully prepaid. C. O. D. charges in addition to the regular postage costs outlined are as follows including insurance:—

When value of parcel is up to	the extra charge is
\$5.00	12c (Incl. Ins.)
between 5. & \$25. "	17c (" ")
25. & 50. "	22c (" ")
50. & 100. "	32c (" ")
100. & 150. "	40c (" ")
150. & 200. "	45c (" ")

For each \$50.00 value above \$200.00 the charge is 5c more (including insurance). The Post Office also charges an extra small money order fee on each C.O.D. parcel.

If you are doubtful as to the correct amount do not hesitate to send us sufficient postage. We GUARANTEE to refund any excess remittance.

Parcel post shipments to all zones must not exceed 70 pounds. The limit of size on all parcel post packages is one hundred inches in length and girth combined. Example: a package 35 inches long, 10 inches wide and 5 inches high, measures 65 inches in length and girth combined. (Length 35 inches, plus 2 x 10 inches width, plus 2 x 5 inches height, equals 65 inches).

OUR SERVICE

We endeavor at all times to give you the finest possible service. According to figures prepared by our Traffic Department, 96% of all orders are shipped within 24 hours of receipt. Very often orders go forward within a few hours after their arrival. All packages are inspected before shipment to avoid errors and delays.

SPECIAL NOTICE

Customers located nearer our Southern headquarters should send orders to 430 West Peachtree St., Atlanta, Ga. Customers located nearer our Chicago branch should send orders to 901-911 W. Jackson Boulevard, Chicago, Ill. Others, including foreign customers, should send orders to 100-6th Ave., New York City.

When corresponding about any shipment or articles received please write to the address from which merchandise was shipped.

TO INSURE PROMPT DELIVERY

To insure prompt delivery of your orders or correspondence to us and to avoid possible error by the Post Office please make certain that you write (preferably print) or type our FULL name:

Wholesale Radio SERVICE Company, Inc.

Lafayette Contributions to

PUBLIC ADDRESS

Progress

LAFAYETTE INTRODUCED TO THE POPULAR PRICE FIELD FOR THE FIRST TIME THE FOLLOWING:

- 1931 — 1st Successful direct coupled amplifier
- 1932 — 1st High-Quality Class "B" amplifier
- 1933 — 1st Self contained amplifier for 6 V. operation
- 1933 — 1st Low priced dual-speaker portable
- 1934 — 1st Complete single unit photo-cell amplifier
- 1934 — 1st High power 60 watt amplifier developed using receiving type tubes
- 1934 — 1st Successful AC operated pre-amplifier
- 1935 — 1st Amplifier with a frequency response flat within 1 db from 20 to 17,000 c.p.s.
- 1935 — 1st Low-loss output transformers—insertion loss less than 1 db.
- 1935 — 1st Amplifier to use duo-triode power tubes
- 1935 — 1st To obtain 100 watts output from receiving type tubes
- 1935 — 1st Amplifier for direct operation with crystal microphones
- 1935 — 1st Amplifier with built-in electronic mixer
- 1935 — 1st Amplifier employing 6B5 tube
- 1935 — 1st To adopt standard 500 ohm line power rating
- 1935 — 1st Practical 6V. amplifier having an output greater than 20 watts
- 1935 — 1st High fidelity portable system with built-in three position mixer
- 1935 — 1st Combined "high-fidelity"—amplifier, tuner, mixer and pre-amplifier on a single chassis.

AND NOW FOR 1936 LAFAYETTE PRESENTS:

- 1st 5 watt amplifier using only 2 tubes having sufficient gain for use with crystal microphones!
- 1st Low priced single-unit amplifier for operation with velocity microphones!
- 1st AC operated amplifier with over 120 db gain on a single chassis!
- 1st To offer a single amplifier with two high-gain channels independently controlled!
- 1st Single case "high-gain" "high-power" portable amplifier for 6 V. DC or 110 V. AC operation!

THE March of Time has left in its wake no more distinguished achievements than those to the credit of Lafayette engineering. At the left, we have attempted to list a few of the more important ones that have helped to make Lafayette the leader in the field.

However, it is not only in engineering design that Lafayette leads, but also in sales policies and marketing methods. For example: Lafayette was the first to offer to submit any Lafayette amplifier to accredited research laboratories and colleges, for measurement purposes, so that they could substantiate the accuracy of Lafayette ratings.

Lafayette was also the first to set up each individual system under actual working conditions, before it is shipped to the customer, in order to be certain that each item selected by the customer was suitable. Should this test indicate that an error had been made, the customer is notified in advance before shipment goes forward.

And last, but by no means least, is the fact that Lafayette was the first to offer fine quality amplifiers at typically low prices—for nowhere else, search as you will, can you find amplifiers of equal quality at anywhere near the prices of Lafayette amplifiers. THE FOLLOWING PAGES PROVE THIS STATEMENT CONCLUSIVELY.

Lafayette

AGAIN Lafayette has done the seemingly impossible - a compact three tube amplifier having an output of 5 watts and a gain of 95 db! This exceptionally high gain makes it possible to use crystal microphones and other input devices having levels of -66 db and be able to operate the amplifier to its maximum output.

4 STAGES WITH 2 TUBES!

A very unique circuit developed in our own laboratories makes it possible to obtain four stages of amplification with only two tubes. One type 79 and one 6B5 are used as amplifiers and a type 83 as rectifier. A completely filtered power supply assures absolutely hum-free operation. No output transformer is furnished, since most speakers are equipped with them.

RUGGEDLY BUILT

CONSTRUCTION throughout is exceptionally rugged and all components are considerably oversized so as to withstand continuous usage even under the most trying conditions.

Crystal MIKE

1ST TIME at this PRICE!

AMPLIFIER

Lab Tested & Certified

TWO models are available; one with provision for field supply for two speakers with 2500 ohm fields, the other without field supply connections. Model 232 - A Lafayette 5 watt High Gain Amplifier - less tubes and less field supply connections. Dimens.: 9 1/4" wide, 7 1/2" deep and 7 1/4" high. Shpg. wt. 12 lbs. Code Amfs. List price \$21.90.

Your Cost **\$10.95**

Model 233-A - Same as above but with field supply for two 2500 ohm fields. Code Amgos. List price \$23.00.

Your Cost **\$11.95**

Kit of Tubes.....\$2.75
System No. 500-P - Consists of the Model 232, A 5 Watt

Amplifier with tubes, one No. 13363 crystal microphone and XM13526 desk stand, 12 ft. cable, and one 10-inch dynamic speaker which obtains its field current from the amplifier. Shpg. wt. 25 lbs. Code Sobas. List \$65.00. Your Cost **\$32.50**

TECHNICAL CHARACTERISTICS

Peak output..... 8 watts
Max. output at 7000 ohms..... 5 watts
Harmonic content..... .6%
Gain..... 95 db Hum level..... -48 db
Power consumption from line..... 55 watts

Stock No. YW19111 - Additional speaker for above amplifier.
Your Cost.....\$4.75

INTER-OFFICE COMMUNICATION

System

WHERE constant communication must be maintained, or where privacy is desired between two offices, this system will be found to be ideally suited. It is attractive and compact yet highly efficient.

2 COMPLETE AMPLIFYING UNITS in this Outfit!

Up to 500 feet between Stations

THE complete system consists of TWO microphones and TWO receivers which can be quickly and easily installed. Unlike many of the intercommunicating systems on the market today this one includes a special amplifier at each receiver and is equipped with both a gain or volume control and a tone control. Reproduction is always life-like and clear. 25 ft. of connecting cable is furnished with the system. Additional cable can be added if desired.

Model 506-P - Lafayette Intercommunicating System complete with tubes and two 25 ft. connecting cables.

Shpg. wt. 50 lbs.
Code Senik. List price \$99.00.

Your Cost **\$49.50**

YQ16145 - Additional connecting cable. Per foot..... **5c**
(One required for each unit.)

Crystal MIKE

Announcing SYSTEM

THIS announcing system will be found to be of great value in many industries.

LESS THAN 5 MINUTES INSTALLATION

IN Bus stations for announcing the arrival and departure of buses, in restaurants for calling counter orders to the chef in the kitchen, in department stores for lectures and demonstrations and for many other similar purposes has this unit been designed. It is a complete system within itself.

EMPLOYS CRYSTAL MICROPHONE

THE microphone used is of the crystal type and therefore does not require any battery current and is absolutely free from hiss. The amplifier used is the Lafayette 5 Watt Ultra High Gain Amplifier described at the top of this page. The complete unit is mounted with the speaker in an attractive hardwood case and installation is so simple that it can be installed in less than 5 minutes.

System No. 509-P - Complete with tubes but less microphone equipment. Shpg. wt. 25 lbs. Code Salpo. List price \$47.50. Your Cost **\$23.50**

YM13575 - Crystal Hand Microphone. Shpg. wt. 5 lbs. Your Cost.....\$14.70

Lafayette

MAXIMUM POWER-LOWEST COST

HIGH-GAIN AMPLIFIER

INEXPENSIVE P.A. AMPLIFIER

- ★ Two High Gain Channels
- ★ Uses Crystal Mikes without Pre-Amplification

A TRULY fine amplifier of a price that defies competition! Its conservatively rated output makes it suitable for the greatest majority of public address installations, and its many outstanding features greatly simplify the complete installation.

The two high impedance-high gain inputs provide an electronically controlled mixer that permits the mixing and fading of two microphones, microphone and phonograph, microphone and radio, or any two inputs desired. These controls are absolutely quiet in operation.

OVERALL GAIN OF 97 db

Another unusual feature is the exceptionally high gain available which makes unnecessary the use of a pre-amplifier, when a crystal microphone or other equally low level input device is employed. When a velocity or ribbon microphone is to be used only a simple Lafayette "Velocity Adapter" is required.

AVAILABLE WITH METAL TUBES

THIS amplifier is also available with metal tubes in place of several of the glass types. When supplied with these tubes the amplifier tube line-up consists of two 53's, one 6J7, two 6F6's and one 83V. It will be noted that only four of the six tubes used are metal types, this is because no metal tubes are at present available to replace the other two types. Performance is identical in every respect regardless of which type of tube is used, but amplifiers designed for the metal tube cannot be used with the glass tube and vice versa.

EXCELLENT FREQUENCY RESPONSE

THE low price of the Model 125A Amplifier does not preclude "wide range" frequency response as the accompanying curve will show. Down only 1 db at 50 cycles and 3.5 db at 10,000 cycles its response is much better than required for ordinary public address installations. Note that this response is obtained with the output transformer.

- ★ Available with Metal or Glass Tubes
- ★ Built-in Mixer at no extra cost

The four stage circuit makes use of a type 53 tube as mixer followed by a 57 voltage amplifier working into a 53 driving a pair of 2A5's in class "A" Prime. The rectifier is a type 83V. The overall gain of 97 db is obtained with an harmonic content of only 4%! The plate to plate load impedance required is 8000 ohms. When supplied with the output transformer, the output impedances available are 7 to 15 ohms for voice calls and 250 or 500 ohms for lines.

FLEXIBILITY OF INPUT

THIS new Lafayette 12 watt amplifier will operate from practically any input impedance, without a matching transformer provided a minimum of .014 volts is available from the driving source. It is particularly suited for use with extremely high impedance devices, such as crystal microphones and pickups, and will give excellent reproduction at all frequencies with these units. Very low impedance devices require a matching transformer.

FULL OUTPUT WITH CRYSTAL MICROPHONES

Technical Characteristics

OUTPUT

Peak	10 watts
Max. Into tube load	15 watts
Max. Into 500 ohm line	12 watts
Harmonic Content (at rated outputs)	4%
Gain	97 db
Hum level	-47 db
Power consumption from line	18 watts

A Lafayette Laboratory-Tested Product

Model 126-A (Glass tubes); Model 126-B (Metal tubes)—Lafayette 12 W. Amplifier without output transformer and less tubes. Dimensions: 7" deep, 16" wide, 8 1/4" high. Shpg. wt. 32 lbs. Code: 126-A Ampean, 126-B Ambe. List price \$35.90.
Your Cost, Either Type..... **\$17.95**

Model 127-A (Glass tubes); Model 127-B (Metal tubes)—Lafayette 12 W. Amplifier less tubes but with output transformer. Shpg. wt. 35 lbs. Code: 127-A Ambul; 127-B Amnet. List price \$42.00.
Your Cost, Either Type..... **\$21.50**

Kit of Glass Tubes. Your Cost..... **\$3.60**

Kit of Metal Tubes. Your Cost..... **\$5.18**

Model 240-A—Lafayette "Velocity Adapter" to adapt above amplifiers for use with high impedance ribbon mikes. Shpg. wt. 7 lbs. **\$6.95**
Code Ambeb. Your Cost.....

System No. 505-P—Consists of one 126-A Amplifier with tubes, one XM13363 crystal microphone, with floor stand and 12 ft. of cable, two AC P.A. Speakers XW19375, two demountable flare baffles YM19838. Shpg. wt. 115 lbs. Code Semil. List price \$149.00.
Your Cost..... **\$75.50**

System No. 504-P—Same as above but with Model 127-B metal tube amplifier. Code Sapot.
Your Cost..... **\$77.50**

A New Lafayette Development!

- SUFFICIENT GAIN FOR HIGH IMPEDANCE VELOCITY MIKES
- FULL 15 WATTS INTO 500 OHM LINE

Built-in 2 Channel Mixer

Velocity Mike Operation *Without* Pre-Amplifier

ONE of the most efficient amplifiers ever developed - has sufficient gain to use high impedance velocity microphones and crystal microphones without additional pre-amplification. Has a gain of 112 db, yet uses only a total of six tubes. Two 6C6's are used as electronic mixers, 79 as phase inverter and two 6B5's in the output stage. A 5Z3 tube is used as rectifier.

TWO CHANNEL MIXER

Two input signals can be mixed under perfect control in the electronic mixer stage. This mixer is absolutely noiseless in operation. A voice announcement can be superimposed on a musical background or one microphone pickup can be emphasized over the other in order to bring up the weaker instruments in an orchestra, etc.

FULL 15 WATTS INTO 500 OHM LINE

The output of the Model 173-A is 15 watts into a 500 ohm line, not merely into the plate impedance. At this output the harmonic content - the real indication of amplifier quality - is only 5 1/2%.

This amplifier is supplied with or without an output transformer. Without the transformer the load impedance required is 10,000 ohms plate-to-plate. With the transformer the output impedances available are 7 to 15 ohms for speaker voice coils and 250-500 ohms for lines.

Construction throughout is typically Lafayette. No detail has been overlooked that would add to finer performance or longer trouble-free service. Every component has a wide safety factor.

The above curve illustrates the remarkable frequency response of this amplifier as measured into the 500 ohm line.

Model 172-A-Lafayette Velocity Model 15 watt Amplifier with mixer less tubes and output transformer. Dimensions: 13 1/4" wide, 12" deep, 10" high. Shpg. wt. 42 lbs. Code Amion. List price \$49.50. Your Cost **\$24.75**

Model 173-A-Lafayette Velocity Model 15 watt Amplifier with output transformer but less tubes. Shpg. wt. 46 lbs. Code Ampra. Your Cost **\$27.95**
Kit of tubes for above amplifiers. Your Cost **\$4.75**

COMPLETE INEXPENSIVE SYSTEMS

System No. 526-P-Consists of the Model 173-A Amplifier, one Amperite Model 13565 high impedance Velocity Mike with 25 ft. cable, one XM13528 floor stand, two XW19375 Rola PA Special AC speakers, two XY19838 flare baffles and all tubes. Shpg. wt. 195 lbs. Code Semin. List price \$195.00. Your Cost **\$97.50**

System No. 527-P is essentially the same as the above but with Model XM13473 Crystal Microphone and the XM13528 floor stand with 25 ft. of cable in place of the velocity mike. Shpg. wt. 190 lbs. Code Salva. List price \$171.50. Your Cost **\$85.75**

Additional speakers are listed on page 82; baffles on page 81.

TECHNICAL CHARACTERISTICS	
Peak output	24 watts
Max. into 10,000 ohm plate load	18 watts
Max. into 500 ohm line	15 watts
Harmonic content of rated output	5 1/2%
Gain	112 db
Hum level	-45 db
Power consumption from line	105 watts

A LABORATORY TESTED *Lafayette* PRODUCT

Lafayette's Proudest Achievement

- EXCEPTIONALLY HIGH GAIN OF 124 DB.
- LOW HUM LEVEL—FULL 15 WATTS OUTPUT
- BUILT-IN TWO POSITION MIXER
- METAL TUBE MODEL AVAILABLE

Designed for
**Dual
Velocity**

**MIKE
OPERATION**

**Highest Gain
LOW-PRICED
AMPLIFIER
Ever Developed**

Unquestionably the most sensational amplifier developed to date. For extreme compactness—wide range frequency response—and exceptionally high gain it has no equal anywhere at this low price. A tremendous gain of 124 db. is obtained with an extremely low hum level. This high gain permits the use of any type velocity microphone or low level "sound-cell" crystal microphone without any pre-amplification whatsoever.

TWO-CHANNEL MIXER BUILT-IN

A two-position electronic mixer, providing two high gain channels, is incorporated in the amplifier. Any two inputs can be fed into these channels and can be faded and mixed as desired. The inputs are at high impedance and can be used with any high impedance input device or with low impedance devices by using suitable matching transformers.

An entirely new circuit was developed for this amplifier. It consists of two type 75 tubes as voltage amplifiers, one 6A6 as mixer, a 76 voltage amplifier, followed by a 42 driving two 42's in an entirely new application of pentode Class A Prime operation. 83 used as rectifier. Tone control provided for altering high frequency response to suit individual preferences.

METAL TUBE MODEL AVAILABLE

A model is available incorporating some of the new metal tubes. This model makes use of 2 6F5's as voltage amplifiers, one 6A6 as mixer, one 6CS as voltage amplifier, one 6F6 as driver driving two 6F6 in the pentode "A" prime output stage. An 83 rectifier tube is used.

The output of 15 watts into the 500 ohm line is the actual usable output and not merely the output into the tube load impedance. Output impedances available: 7 up to 15 ohms for voice coils and 250-500 ohms for lines.

Model 247-A—Lafayette Dual-Velocity Amplifier as described with output transformer, less tubes. Dimensions: 7" x 6½" x 3½" high. Shpg. wt., 36 lbs. Code Amnin. List price \$69.00.

Your Cost **\$34.50**

Kit of Matched Tubes. Your Cost \$4.40

Model 251-A—Same as Model 247-A but for use with metal tubes. Code Amtil. List \$69.00. Your Cost \$34.50

Kit of Metal Tubes: 2-6F5's, 3-6F6's, 1-6CS, 1-6A6, 1-83. Your Cost \$7.25

System Model No. 550-P—Consists of Model 247-A amplifier complete with tubes, one Amperite RBH YM13565 velocity mike with floor stand and 25 feet of cable, two special P.A. speakers YM19375 with two YM19838 flare baffles. Shpg. wt., 124 lbs. Code Sabin. List \$209.00.

Your Cost **\$104.50**

551-P as above but with two velocity mikes and stands. Code Sesme.

Your Cost \$157.00

552-P as above but with one Sound-Cell mike and stand. Code Seran.

Your Cost \$118.00

Any of the above systems with Model 251-A omalifier add \$2.85

The above curve shows the excellent frequency response obtained from this amplifier.

- Extremely High Gain
- Two Position Mixer
- 30 Watts Field Supply

NEW LAFAYETTE 4-FUNCTIONAL AMPLIFIER

AGAIN LAFAYETTE proves its leadership in the popularly priced public address field. Always striving for higher efficiency, and greater simplification, Lafayette engineers now present a new amplifier that does more, and does it better, than any amplifier available today at anywhere near its price.

FOUR FUNCTIONS IN ONE

This amazing new amplifier actually takes the place of four separate units!

FIRST: It has an extremely high gain. This makes unnecessary the use of a pre-amplifier. High impedance velocity microphones, crystal microphones and sound-cell microphones can be connected directly.

SECOND: Two high-gain input circuits eliminate the need for a separate mixer. Any two inputs can be faded and mixed as desired.

THIRD: It is a highly efficient power amplifier having an output of 25 watts into a 500 ohm line. More than ample for the average installation.

FOURTH: Thirty watts of field supply, entirely independent of the filter system, makes unnecessary the use of a separate field exciter and saves from ten to twenty dollars on every installation.

TEN TUBE CIRCUIT

A unique circuit providing the exceptionally high gain of 124 db uses ten tubes as follows: two 75's as voltage amplifiers, one 6A6 as mixer, one 76 as voltage amplifier, one 59 driver and four 2A3's in a push-pull-parallel semi-class "AB" stabilized-bias output stage. One 83 as rectifier. Extreme precautions were taken in the design of this unit to eliminate hum. Only after considerable research was this accomplished by an entirely new method that permits such high gain in so compact a unit.

EXCELLENT FREQUENCY RESPONSE

DESPITE the high gain of this unusual amplifier the frequency response is excellent as can readily be seen by referring to the response curve shown herewith. This feature is of extreme importance when high quality microphones are to be used.

OUTPUT TRANSFORMER INCLUDED

NOTE that the response curve shown was taken with the output transformer. A high quality output transformer having voice coil impedances of 7 to 15 ohms and line impedances of 250 and 500 ohms is built into the amplifier.

Model 260-A—Lafayette 4-Functional Amplifier complete with output transformer, less tubes. Dimensions: 9½" by 16½" by 9½" high. Shpg. wt. 90 lbs. Code Amak. List price \$85.00.
Your Cost **\$42.50**

Kit of Matched Tubes.....\$6.40
System No. 523-P—Consists of Model 260-A Amplifier, tubes, two YW19374 P.A. special speakers (DC), and two Y19838 demountable flare baffles. No mike equipment. Shpg. wt. 175 lbs. Code Sfrn.
List price \$145.00.
Your Cost **\$72.50**

System No. 524-P is exactly the same as the above but with two ROLA High-Fidelity DC speakers and two Y220053 directional baffles instead of those listed. No mike equipment. Code Sdede.
List price \$159.00.
Your Cost **\$79.50**

Mike Combination No. 575-P consists of a model RBH Amperite microphone YN13565, one YM13528 floor stand and 25 ft. of mike cable. Shpg. wt. 14 lbs. Code Scafa.
Your Cost **\$32.65**

Mike Combination No. 576-P consists of one YM13419 Shure "Sound-Cell" microphone, one YM13528 floor stand and 25 ft. of cable. Shpg. wt. 16 lbs. Code Sbaka.
Your Cost **\$46.00**

Mike Combination No. 577-P consists of one YM13473 Shure crystal microphone, one YM13428 floor stand and 25 ft. of cable. Shpg. wt. 14 lbs. Code Spara.

DeLuxe Full Range - High Gain AMPLIFIER

POWER, overload handling capacity, true tone fidelity, etc., are features that characterize this new Lafayette Model 115-A Amplifier. Employing a total of nine tubes, this new amplifier provides a performance that is truly startling in its lifelike reproduction and tremendous power output. For installations in theatres, school auditoriums, dance halls and similar places, no finer amplifier could be desired. Its output rating is very conservative, as can readily be realized when its peak or overload wattage of 48 watts is compared with its actual rating of 30 watts into a 500 ohm line - a difference of over 50%! The harmonic content at its rated output is only 5%.

CLASS "A PRIME" CIRCUIT

The circuit employed is of the type known as Class AB or "A Prime" and uses the following tube combination: one type 79 as electronic mixer, another 53 as voltage amplifier, followed by a 2A3 driving four 45's in push-pull-parallel. Two complete power supply systems are incorporated, each with its own rectifying tube and brute force filter. One supplies plate voltage, and the other furnishes constant, unvarying bias voltage for the driver and output stages.

BUILT-IN TWO POSITION MIXER

An extremely valuable feature, that in most cases eliminates an extra piece of equipment, is the built-in two position mixer. This feature permits the gradual fading in and out or the mixing of two separate inputs. The two channels available are both high gain channels and either one can therefore be used with crystal microphones and similar low level devices.

INPUT AND OUTPUT IMPEDANCES

Input circuits are both of the high impedance type and can therefore be used directly with crystal microphones, high impedance phono-pickups, etc., without the use of matching transformers. An extremely efficient output transformer is built into the amplifier and provides the following output impedances: 7 to 15 ohms for voice coils and line impedances of 250 and 500 ohms. Thus it is possible to use the amplifier with practically any type of speaker.

WIDE RANGE QUALITY

The accompanying frequency response curve shows that the Model 115-A 30 Watt Amplifier is a wide range unit. The response is down only .4 db at 50 cycles and 3 db at 10,000

cycles. Reproduction of radio, microphone and pick-up signals is clean and crisp at all volumes.

Model 117-A - Lafayette 30 Watt Amplifier complete with mixer but less tubes. Dimensions: 12" deep, 13" wide, 10" high. Shpg. wt. 57 lbs. Code Amcor. **\$39.50**
List price \$79.00. Your Cost

Kit of Tubes for the above: 2-53, 1-2A3, 5-45 and 1-83. Your Cost.....**\$4.85**

Model 243-A - Lafayette "Velocity Adapter" for adapting the Model 117-A amplifier for use with high impedance velocity mikes. Code Amdan. Your Cost.....**\$6.95**

System No. 515-P - Consists of Model 117-A Lafayette 30 Watt Amplifier as described complete with two position mixer and all tubes, one model YMI3473 crystal microphone, floor stand and 12 ft. of cable, four ROLA high-fidelity AC speakers with four flare type baffles. Shpg. wt. 162 lbs. Code Sempil. List price \$285.00.

Your Cost.....**\$137.50**

System No. 516-P - Same as above but with XN13565 Amperite RBH Velocity Mike and Lafayette "Velocity Adapter" instead of crystal mike. Shpg. wt. 162 lbs. Code Sefir. List price \$325.00. Your Cost....**\$157.50**

TECHNICAL CHARACTERISTICS

Peak Output 48 watts
Max. into tube load 36 watts
Max. into 500w line 30 watts
Harmonic content 5%
Gain 101 db Hum level -58 db
Power Consumption 180 watts

VELOCITY MIKE ADAPTER

This simple adapter, requiring no other power source than that furnished by the amplifier, permits using low level velocity microphones with the 115-A amplifier.

4 IN Lafayette's

- ① Mixer
- ② Pre-Amplifier
- ③ Power Amplifier
- ④ Field Supply

35 Watt

ULTRA HIGH GAIN WIDE RANGE AMPLIFIER

Completely SELF-CONTAINED on a SINGLE Chassis

● 50 Watts Peak

RIISING to the greatest heights ever achieved in amplifier efficiency, this new Lafayette 4 in 1 Amplifier is without doubt the most astounding amplifier ever developed. It incorporates within itself the capability of functioning as a two channel mixer, a high-gain pre-amplifier, an extremely efficient power amplifier and also serves as a 40 watt field supply. Never before has an amplifier been available having all of these features in so compact a form.

Measuring 9½" by 16½" by 9½" high it has the extraordinarily high gain of 122 db from input to output and a very conservatively rated power output of 35 watts into a 500 ohm line. At this output it has a harmonic content of only 6%.

● 122 db GAIN

Its peak output of 50 watts gives some indication of the conservativeness with which this amplifier is rated. The two positian mixer provides two high gain channels for use with high impedance velocity microphones, crystal microphones, or sound cell microphones. Either input can be faded in or out or the two mixed together as desired.

The frequency response of the amplifier is excellent which of course is necessary if justice is to be done to the full capabilities of the velocity microphone. A tone control is also provided so that the high frequency response can be adjusted to suit individual preferences. All controls are at the front of the amplifier.

The response curve shown at the left was taken with the output transformer.

TECHNICAL CHARACTERISTICS

- Peak output 50 watts
- Max. into 3000 ohm load 43 watts
- Max. into 500 ohm line 35 watts
- Harmonic content at rated output . 6%
- Gain 122 db
- Hum level 42 db
- Average drain from line 190 watts

Ten tubes are used in the new Lafayette 4 in 1 Amplifier as follows: two 2A6's as voltage amplifiers, one 53 as mixer, one 56 as voltage amplifier, a 59 as driver and four 46's in push-pull-parallel in the Class "B" output stage, 83 Rectifier. Field supply for four 1250 ohm fields at 10 watts each (total 40 watts at 5000 ohms) is available from the amplifier. This is not part of the filter system and makes possible a considerable saving in field exciter cost alone.

Model 254-A - Lafayette 4 in 1 Ultra High Gain "Wide Range" 35 Watt Amplifier as described above, less tubes but including output transformer with 7 to 15 ohms voice coil and 250-500 ohms line impedances. Overall dimensions: 9½" by 16½" by 9½" high. Shpg. wt. 90 lbs. Code Amphi. List price \$95.00.

Your Cost **\$47.50**
 Kit of Matched Tubes Including 2 - 2A6's, 1 - 53, 1 - 56, 1 - 59, 4 - 46's, 1 - 83.
 Your Cost \$5.75

System No. 564-P—Consists of the Model 254-A Amplifier with tubes, one Amperite RBH Velocity Mike No. YN13565, floor stand No. YM13528 with 25 ft. of cable, two ROLA High-Fidelity DC Speakers YW19302 and two directional baffles No. YY20053. Shpg. wt. 140 lbs. Code Sakul. List price \$230.00.

Your Cost **\$115.00**

System No. 565-P—Same as the above but with four Lafayette P.A. Special speakers and directional baffles. Shpg. wt. 140 lbs. Code Samen. List price \$290.00.

Your Cost **\$145.00**

Either of the above systems with Sound Cell Mike YM13419. Add \$18.50

System No. 569-P—Consists of the Model 254-A Amplifier with tubes, two Amperite RBH Velocity Mikes No. YN13565, two floor stands No. YM13528 with 25 ft. cable, four ROLA High-Fidelity DC speakers YW19302 and four directional baffles No. YY20053. Shpg. wt. 190 lbs. Code Savin. List price \$355.00.

Your Cost **\$177.50**

System No. 570-P—Same as the above but with two Shure Sound Cell Microphones No. YM13419 complete with floor stands and 25 ft. of cable instead of the velocity mikes. Shpg. wt. 190 lbs. Code Sates. List price \$409.00.

Your Cost **\$204.50**

Remote Control 6 volt 110 volt AMPLIFIER

Instant Conversion from 6 V. to 110 V. Operation

THE MODEL 143-A amplifier is a compact remote-controlled unit that can be mounted in the same manner that an auto radio is mounted and can be controlled from the steering column. Line switch and pilot light are on the case—volume control and stand-by switch, to shut off the generator, is mounted on the remote control. Case dimensions are 12" by 7 1/4" by 7 1/2".

CRYSTAL MIKES USED

The tremendous gain of 104 db permits the use of crystal mikes without pre-amplification. Technical specifications are as follows: Gain 104 db—Peak Output, 18 watts—Max. output into plate impedance, 15 watts—Max. into 500 ohm line, 12 watts—Harmonic content at rated outputs, 6%—Power consumption, 14 amperes at 6 volts. Tubes used are 1-6C6 voltage amplifier, 6A6 phase inverter, 2-6B5's in the output. Output transformer included has 7 to 15 ohm and 250 to 500 ohm output impedances.

Model 143-A - Lafayette Auto Amplifier with remote control unit. Less tubes. Shpg. wt. 25 lbs. Code Amlor. List price \$79.00. **\$39.50**
Your Cost

Kit of Tubes for above amplifier. Your Cost \$3.77
Model 1050-PP - Special AC Power Pack for above amplifier. With 83 tube. Dimensions: 8 1/4" wide, 6 1/2" deep, 6 3/8" high. Shpg. wt. 23 lbs. Code Plema. List price \$16.50. Your Cost \$8.25

Sound System No. 586-P—Consists of Model 143-A amplifier complete with tubes, one model XM13575 crystal hand microphone with 12 ft. cable, one ROLA high-fidelity 6 volt speaker and one YY20044 Dome baffle with flexible fixture mounting. Shpg. wt. 60 lbs. Code Spacc. List price \$163.00. **\$81.50**
Your Cost

Note the excellent frequency response obtained from this amplifier.

An interesting application of a six volt system is that used by an Eastern City's police department cars. Stationed at strategic points, or cruising on the streets, these cars permit the instant warning of traffic violators without impeding traffic.

Lafayette Multi-Duty Portable

HERE it is—the system you have been looking for. A powerful, clear-toned public address system for your car that will operate from the car battery without any extra attachments, or power packs, of any kind. Use it for outdoor advertising, speeches, etc., and then fold it up... carry it into the house... and use it for any indoor P.A. work by operating it on any 110 V. 60 cycle AC line! No fuss—no bother, merely by changing two simple plugs, it is instantly convertible from 6 volt to 110 V. operation.

It incorporates within a single case, the Model 270-A amplifier illustrated and described on page 66, a Rola high-fidelity speaker, an AC pack for the amplifier and an AC pack for the speaker. The speaker is equipped with 30 ft. of cable. The output wattage of the system is exactly the same regardless of which power source (6V or 110V) it is operated from.

CRYSTAL OR VELOCITY MIKES CAN BE USED

Either crystal or high-impedance velocity microphones can be used. Two input circuits are provided, and the built-in electronic mixer permits the fading, or mixing, of any two inputs. The input circuits are at high impedance and high impedance pickups can be connected directly, without resorting to matching transformers.

SPECIAL PORTABLE 6V-110V. PHONOGRAPH AVAILABLE

A special portable phono-record reproducing unit is available for the reproduction of phonograph recordings. This unit is equipped with a 6 volt two speed motor and a 110 V. AC pack so that it is an ideal companion unit for this system. It is furnished in a leatherette covered carrying case to match the Multi-Duty Portable.

System No. 588-P - Lafayette Multi-Duty Portable as described including amplifier, speaker, AC pack for amplifier and AC pack for speaker. Less tubes and microphone equipment. Dimensions: 17 1/4" x 13 1/2" x 8" high. Shpg. wt. 35 lbs. **\$96.50**
Code Shote. List price \$194.00. Your Cost

System No. 589-P—Same as above but for 6 Volt operation only. Shpg. wt. 25 lbs. Code Sikil. List price \$149.00. **\$74.50**
Your Cost

Kit of Tubes for either system. Your Cost \$3.75
Microphone Combination No. 512-P—Consisting of No. YM13473 crystal microphone, No. YM13428 floor stand, 25 ft. of mike cable. **\$19.95**
Shpg. wt. 14 lbs. Code Skife. Your Cost

Microphone Combination No. 513-P—Consisting of No. YW13565 Amperite RBM Velocity Mike, No. YM13528 floor stand and 25 ft. of cable. Shpg. wt. 14 lbs. Code Sjordf. Your Cost \$32.50

Lafayette 15 Watt CONVERTIBLE AMPLIFIER

6 VOLT D.C. OR 110 VOLT A.C. Operation

USE CRYSTAL OR VELOCITY MIKES WITHOUT PRE-AMPLIFICATION

DESIGNED particularly for the sound man, who makes a specialty of renting public address systems and therefor requires a unit that is universal in application, and for the user of public address equipment, who desires an amplifier that he can use on his truck for outdoor advertising as well as indoors for general P.A. work, this new Lafayette 15 watt convertible amplifier fulfills a definite need.

It is powerful—more than ample for average work. It is sensitive—and therefor does not require pre-amplification for use with crystal microphones or high impedance velocity microphones. It is clear toned—frequency response flat within 2 db from 50 to 10,000 cycles. It is rugged—heavy spot welded steel chassis and oversize components assure long and trouble-free service.

HIGH GAIN CIRCUIT ELIMINATES PRE-AMPLIFIER

Due to extremely careful design an exceptionally high gain of 115 db has been obtained. This feature eliminates the need for a separate pre-amplifier and permits the direct connection and full output from crystal and high impedance velocity microphones.

TWO POSITION MIXER

An electronic two channel mixer provides two high gain channels each of which has exactly the same gain. Either of the channels can be faded in or out or mixed together as desired. Both input circuits are at high impedance and can therefore be used with any high impedance input device without resorting to matching transformers. Controls are quiet in operation.

EXCELLENT FREQUENCY RESPONSE

AN entirely new circuit employing two 6C6's as mixers, one 79 as voltage amplifier, a 59 as driver and two 6A6's in a class "B" output stage makes possible an exceptionally fine frequency response with an output of 15 watts into a 500 ohm line. Note that this output is actually into the line and is therefore the usable output.

A glance at the frequency curve shown on this page will verify the excellent response of this unusual amplifier. This faithful reproduction is of great importance if the full advantages of velocity and crystal microphones are to be realized.

RUGGED CONSTRUCTION

Construction throughout is extremely rugged to withstand the vibration incident to mobile operation. All components have wide safety factors.

TECHNICAL CHARACTERISTICS

- Peak output 24 watts
- Max. output into plate impedance 18 watts
- Max. output into 500-ohm line 15 watts
- Harmonic content 6% Gain 115 db

Power consumption 96 watts. 16 amp. from 6-v. battery
Model 270-A—Lafayette 15 watt Convertible Amplifier complete with output transformer and built-in mixer but less tubes. Dimensions overall: 14 1/2" wide, 10 1/4" deep and 8 1/4" high. Shpg. wt. 35 lbs. Code Amgon. List price \$79.00. Your Cost \$39.50

Model 281—Same as above but less mixer and for crystal mike operation only. Gain 97 db. Less tubes. Code Amfor. List price \$59.00. Your Cost **\$29.50**

Kit of Matched Tubes: 2-6C6's, 1-79, 1-59, 2-6A6. Your Cost \$4.05
Model 1052-PP—Special AC Power Pack for operating the Model 270-A amplifier from 110 V. 60 cycle AC line. 12" wide, 7 1/4" deep and 6 3/4" high. With 83 rectifier tube. Shpg. wt. 27 lbs. Code Plire. List price \$17.90. Your Cost \$8.95

System No. 510-P—Consists of the Model 270-A amplifier complete with tubes, two vari-acoustic trumpets No. YY20041, and two Lafayette cone speaker units No. Y19830. Microphone equipment not included. Shpg. wt. 160 lbs. Code Slona. List price \$185.00. Your Cost **\$92.50**

Microphone Combination No. 594-P—Consists of the Model YM13565 Amperite high-impedance velocity mike mounted on a Model YM13528 floor stand and equipped with 25 ft. of cable. Shpg. wt. 15 lbs. Code Smina. Your Cost **\$32.50**

Microphone Combination No. 595-P—Consists of the No. YM13363 Shure crystals mike mounted on a No. YM13473 floor stand and equipped with 25 ft. of cable. Shpg. wt. 14 lbs. Code Sneka. Your Cost **\$19.95**

Microphone Combination No. 596-P—Consists of the Astatic crystal hand mike No. YN13597 equipped with 25 ft. of cable. Shpg. wt. 115 lbs. Code Sorof. Your Cost **\$15.50**

Instant conversion from 6 v. to 110 v. Operation

30 WATT CONVERTIBLE AMPLIFIER

6 VOLT D.C. 110 VOLT A.C. Operation

HIGH POWER FROM A SIX VOLT BATTERY

UNDOUBTEDLY the most powerful practical six volt amplifier ever designed. Its conservatively rated output of 30 watts into a 500 ohm line represents about the maximum available in six volt operated units. In order to obtain higher outputs than this it is necessary to use a gasoline engine driven generator to operate an AC amplifier.

BATTERY FLOATS ON LINE

During normal operation of this amplifier, it is necessary to keep the engine of the car running, so that the battery floats across the generator output and is not called upon to supply much current.

EXCELLENT FREQUENCY RESPONSE

The frequency response of this powerful amplifier is exceptionally fine as can readily be seen by referring to the response curve shown herewith. Note that this response curve was taken with the output transformer.

HIGH GAIN CIRCUIT

Crystal microphones can be used directly without resorting to pre-amplification because of the unusual gain of 100 db. A carefully designed circuit employing a type 79 tube as electronic mixer, a 53 as voltage amplifier, a 59 as driver and four 79's in the output stage makes this possible.

6 VOLT OR 110 V. OPERATION

FOR use in large halls, auditoriums and dance floors this unit can readily be converted for operation on 110 V. 60 cycle alternating current. A simple AC pack, which plugs into the amplifier, instantly converts the Model 265-A amplifier into a standard AC type. The special generator, that is used for operation on six volts, is entirely disconnected from the circuit when the amplifier is operated on AC.

VELOCITY ADAPTER AVAILABLE

Velocity microphones of the high impedance type can easily be used on this amplifier merely by using a simple Lafayette Velocity adapter. This compact little unit can be used regardless of the type of current supply the amplifier is being operated from. Can be connected or disconnected in a moment.

TECHNICAL CHARACTERISTICS

Peak output 45 watts
 Max. power output into plate impedance 35 watts
 Maximum power into 500-ohm line 30 watts
 Gain 100 db Harmonic content 7%
 Power consumption 120 wts., or 20 amp. from 6-v. bat.

Model 265-A-Lafayette 30 watt Convertible Amplifier complete with output transformer but less tubes. Dimensions: 18" wide, 9 1/4" deep and 10 1/4" high overall. Shpg. wt. 63 lbs. Code Amfeg. List price \$139.00. Your Cost **\$69.50**
 Kit of Tubes: 1-79, 1-53, 1-59, 4-79. Your Cost \$5.00

Model 1045-PP-Special AC Power Pack for operating the Model 265-A Amplifier from 110 V. 60 cycle AC line. Dimensions: 12" wide, 7 1/4" deep and 6 1/4" high. With 83 rectifier tube. Shpg. wt. 29 lbs. Code Plute. List price \$25.00. Your Cost \$12.50

Model 1055-PP-Special Field Exciter for operating up to three six volt speaker fields from 110 V. 60 cycle AC. Dimensions: 4 1/2" high, 6" wide, 12" long. Shpg. wt. 10 lbs. Code Plavo. Your Cost \$14.50

System No. 532-P-Consists of the Model 265-A amplifier complete with tubes, 2 Lafayette 6 ft. trumpets YX420047, 2 Lafayette Super-giant driving units YX20046. Mike equipment not included. Shpg. wt. 190 lbs. Code Sqate. List price \$339.00. Your Cost **\$169.50**

System No. 533-P-Same as the above but with four trumpets and four driving units. Code Srete. List price \$530.00. Your Cost. \$265.00

Mike Combination No. 595-P-Consists of the Shure crystal microphone YM13473 mounted on a floor stand YM13428 and equipped with 25 ft. of cable. Shpg. wt. 14 lbs. Code Steke. Your Cost **\$19.95**

Mike Combination No. 596-P-Consists of the Astatic YM13597 crystal hand microphone equipped with 25 ft. of cable. Shpg. wt. 15 lbs. Code Suvus. Your Cost **\$15.50**

Mike Combination No. 597-P-Consists of the Amperite RBH Velocity Microphone YM13565 mounted on floor stand YM13528 and equipped with 25 ft. of cable. It also includes a Lafayette Velocity Mike Adapter 240-A. Shpg. wt. 20 lbs. Code Svake. Your Cost **\$39.50**

Most Powerful Practical 6 V. Amplifier Available

Lafayette ECONOMY CRYSTAL PORTABLE

Inexpensive "Wide-Range" PORTABLES

AN ENTIRELY new amplifier developed by Lafayette engineers now makes it possible to use a crystal microphone with an extremely compact portable such as is illustrated at the left. The clarity of reproduction and the freedom from carbon hiss that the crystal microphone provides can now also be enjoyed by the user of small systems. Despite this tremendous advantage this new portable sells for only..... **\$29.50**

TWO new wide range Portables at sensationally low prices. Housed completely within a single case, these two new Lafayette systems are the latest developments in wide range units designed particularly for small orchestras, singers and those desiring an inexpensive sound system capable of excellent sound reproduction of musical numbers. One model is designed particularly for use with a crystal microphone and the other for use with velocity

MODEL 540-P PORTABLE SYSTEM

- For Operation with Crystal Mike
- Dual or Single Speaker Available
- Extremely Light and Compact

MODEL 545-P AND 547-P SYSTEMS

- Complete in One Case
- Two Position Mixer
- Crystal or Velocity Mike Models

THE new Lafayette Model 540-P Portable System is an extremely light and compact unit designed particularly for use by window demonstrators, lecturers, side show barkers, small orchestras and others requiring voice or musical amplification in order to cover a larger audience. Previously, due to the limited amplification available in a small amplifier, only carbon microphones could be used. Now, however, due to the development of a new high gain compact amplifier Model 233-A, which is fully described on page 58, it is possible to use a crystal microphone which definitely banishes the annoying characteristic hiss of carbon microphones.

SINGLE OR DUAL SPEAKERS

It also eliminates the need for button current and the extreme care necessary in handling the carbon microphone. Not only is the crystal microphone far clearer and crisper in its reproduction but it is also far more rugged and will stand considerably more abuse.

The complete system is housed within a single case. The front and back covers each hold an 8" dynamic speaker. Each speaker is equipped with a 25 ft. connecting cable. The system can be had with either one or two speakers. The outside dimensions of the case are 15 by 15 by 10 inches.

The complete unit is AC operated and no batteries of any kind are employed. It can be set up for operation in five minutes.

Model 540-P—Lafayette Portable with one speaker, less tubes. Dimensions: 15"x15"x10". Shpg. wt. 50 lbs. Net wt. 30 lbs. Code Sardas. List price \$59.00. Your Cost **\$29.50**

Model 541-P—Lafayette Portable with two speakers, less tubes. Shpg. wt. 55 lbs. Net wt. 35 lbs. Code Sedat. List price \$67.00. Your Cost **\$33.50**

Complete Kit of Tubes..... **\$2.50**

Model YM13575—Crystal Hand Mike. List price \$25.00

Your Cost..... **\$14.70**

Model XM13563—Crystal Mike mounted on XM13428 floor stand and equipped with 25 ft. of cable. Your Cost **\$19.75**

Model 545-P is a 12 watt portable system especially designed for use with a crystal microphone. It is compact, light in weight and has an exceptionally fine frequency response. A two position mixer permits the mixing of two microphones or a microphone and phono-pickup, as desired. The amplifier Model 127-A is described on page 59. A special P.A. speaker of the AC type is used and additional speakers may be added if desired. The flap covering the speaker can be removed entirely and a demountable flare baffle easily attached. Overall case dimensions: 23"x17 3/4"x9" deep. Shpg. wt. 56 lbs. Net. wt. 49 lbs.

Model 545-P—12 watt Portable less tubes and microphone. Code Sevas. List price \$99.50. Your Cost **\$47.50**
Complete Kit of Tubes..... **\$3.60**

Model XM13475—Crystal Microphone mounted on XM13528 floor stand and equipped with 25 ft. of cable. List price \$39.90. Your Cost **\$19.95**

Model 547-P is a 15 watt portable in the same case as the model listed above but incorporates the Model 247-A amplifier described on page 60. This model is especially designed for use with a high impedance velocity microphone and is particularly recommended for the amplification of music.

It employs the same P.A. AC speaker as the above model and can of course be used with additional speakers. The speaker is equipped with a connecting cable 50 ft. long and can be extended if desired. Overall dimensions: 23"x17 3/4"x9" deep. Shpg. wt. 61 lbs. Net wt. 54 lbs.

Model 547-P—15 watt Velocity Portable less mike and tubes. Code Salma. List price \$119.00. Your Cost **\$59.50**

Complete Kit of Tubes..... **\$4.50**

Model XM13565—High Impedance Velocity Microphone mounted on XM13528 floor stand and equipped with 25 ft cable. List price \$65.00. Your Cost **\$32.50**

NEW Lafayette COMBINATION PORTABLES

DeLuxe High Fidelity PORTABLE SYSTEMS

COMBINING a phono-turnstile and crystal pickup together with either a "wide range" crystal or velocity microphone amplifying system, these new portables, illustrated at the left, find great favor with lecturers and others requiring a musical interlude between speeches. They are available with either standard P.A. or special "High-Fidelity" speakers mounted in portable carrying cases. As many speakers as desired may be used.

The new Lafayette portables illustrated at the right offer a choice of three different output wattages and incorporate such outstanding features as: pre-amplification on each channel, three channel mixer, crystal, velocity, or sound-cell microphone operation, High-Fidelity speakers and High-Fidelity amplifier response. Where power output and tone are of prime importance these excellent units cannot be excelled.

MODEL 530-P AND 531-P SYSTEMS

- Wide Range Record Reproduction
- Dual 12" Dynamic Speakers
- Crystal and Velocity Mike Models

Model 530-P consists of a dual-speed motor and 12" turntable with crystal pickup mounted in a fibroid covered carrying case together with the model 127-A amplifier described on page 59. This system is for use with a crystal microphone and incorporates a two position mixer for fading and mixing both the phono and mike inputs. Either the P.A. or High-Fidelity speakers may be used with this system.

Model 530-P-A 12 watt Combination Portable less speakers, tubes and mike. Dimensions: 23" x 17 1/2" x 9" deep. Shpg. wt. 57 lbs. Net wt. 49 lbs. Code Safas. List \$125.00.
Your Cost \$57.50

Complete Kit of Tubes. Your Cost \$3.60
Model XM-13473-Crystal Mike mounted on XM13428 floor stand and equipped with 25 ft. cable. Shpg. wt. 14 lbs.
Your Cost \$19.95

Model 531-P-System is essentially the same as the above except that it includes the 15 watt Model 247-A Amplifier described on page 60 and is therefore for use with the high impedance velocity microphone. This system is particularly well suited for musical reproduction because of the excellent frequency response of the velocity microphone. We particularly recommend the use of the High-Fidelity speakers on this model though either type can be used.

Model 531-P-15 watt Combination Portable less speaker, tubes and mike. Dimensions: 23" x 17 1/2" x 9" deep. Shpg. wt. 61 lbs. Net wt. 53 lbs. Code Saque. List \$139.00.
Your Cost \$69.50

Complete Kit of Tubes \$4.40
Model YM13565-High Impedance Velocity Microphone mounted on YM13528 floor stand and equipped with 25 ft. cable. Your Cost
\$32.50

Model 1040-PP-Pair of P.A. special AC Speakers mounted in portable carrying case as illustrated and equipped with 50 ft. cables. Dimensions: 19 1/2" x 18 1/2" x 11 1/2" deep. Shpg. wt. 53 lbs. Net wt. 45 lbs. List \$
Your Cost \$35.70

Model 1041-PP-Pair of ROLA High-Fidelity Speakers in same case as above. For AC operation. Shpg. wt. 63 lbs. Net wt. 55 lbs. List \$88.00. Your Cost
\$44.00

MODEL 590-P, 591-P AND 592-P DE LUXE PORTABLES

- Three High Gain Channels
- Dual High Fidelity Speakers
- Three High Power Models

The 15 watt Lafayette High-Fidelity DeLuxe Portable incorporates an amplifier similar to the model 247-A described on page 60 and a special Lafayette Electronic Mixer, that provides a stage of pre-amplification on each channel, within one case and a pair of Rola High-Fidelity speakers in another. An exceptionally high gain of 124 db. permits the use of high impedance velocity, crystal or sound-cell microphones. Cases are of heavy plywood 19 1/2" x 18 1/2" x 19".

Model 590-P-Lafayette 15 watt High-Fidelity System as described above complete with tubes but less mike. Shpg. wt. 170 lbs. Code Sorti. List \$229.00. Your Cost
\$114.50

The 25 watt Lafayette High-Fidelity DeLuxe Portable is identically the same as the above but incorporates an amplifier similar to the Model 260-A described on page 62. It also has a gain of 124 db. and is mounted in the same size cases. Shpg. wt., 175 lbs.

Model 591-P-Lafayette 25 watt portable with tubes but less mike. Code Sloff. List price, \$249.00
Your Cost \$124.50

The 35 watt Lafayette High-Fidelity DeLuxe Portable is also the same as the above but incorporates an amplifier similar to the model 254-A described on page 64. The overall gain is also 124 db. and is mounted in the same size cases. Shpg. wt., 180 lbs.

Model 592-P-Lafayette 35 watt portable with tubes but less mike. Code Seqid. List price \$265.00.
Your Cost \$132.50

Mike combination 580-P consists of the Amperite RBH velocity microphone YN13565, mounted on a floor stand YN13528 and equipped with 25 ft. of cable. Shpg. wt. 22 lbs.
Your Cost \$32.50

Mike Combination 581-P consists of the Shure Sound-Cell mike YM13419, mounted on a floor stand YN13528 and equipped with 25 feet of cable. Shpg. wt., 16 lbs. Code Slite.
Your Cost \$46.00

Mike combination 582-P consists of the Shure crystal mike YM13473, mounted on a floor stand YM13528 and equipped with 25 feet of cable. Shpg. wt., 14 lbs. Code State.
Your Cost \$19.95

Lafayette Semi-Portable HIGH FIDELITY 20 WATT TUNER-AMPLIFIER COMBINATION

**Complete High Fidelity System
Self-Contained 3 Position Mixer**

**Direct Crystal or
Velocity Mike Operation**

FOR versatility and all-round usefulness there is nothing to compare with the new Lafayette High-Fidelity Radio-Audio Combination Unit. A single steel case contains a complete portable sound system, pre-amplifier, three channel mixer, and High-Fidelity radio tuner, yet measures only 19" x 8 3/4" x 12" overall. The Tuner is a true "high-fidelity" type responding to a band width 7,000 cycles wide and providing real "studio quality" reproduction. The Amplifier characteristics are as follows:

TWELVE tubes are used including two 58's as RF amplifiers and a 56 as diode detector in the tuner. The amplifier uses 2-53's as voltage amplifier-mixers, 1-53 as voltage amplifier, 1-59 driver and 4-2A5's in class "A" Prime push-pull parallel. A 5Z3 is used as rectifier. The output impedances are .7 to 15 ohms for voice coils, 250 and 500 ohms for lines. Either crystal or high impedance velocity mikes can be used without pre-amplification.

TECHNICAL CHARACTERISTICS

Peak output	35 watts
Maximum output into plate impedance	25 watts
Maximum output into 500 ohm line	20 watts
Harmonic content at rated maximum outputs	5%
Gain	110 db
Hum level	-50 db
Power consumption from line ..	175 watts

Model 159-A-Lafayette High-Fidelity Tuner-Amplifier Combination less tubes. Dimensions: 19" wide, 8 3/4" high, 12" deep. Shpg. wt. 85 lbs. Code Amaza. **\$79.50**
List price \$159.00. Your Cost

System No. 555-P-Consists of Model 159-A Tuner-Amplifier Combination with tubes, YM13473 crystal mike, floor stand with 25 ft. cable, two ROLA "high-fidelity" speakers in carrying case measuring 19 1/2" x 13 1/2" x 19" high with their own field supplies and 50 ft. cables. Shpg. wt. 180 lbs. Code Sabres. List price \$299.00. **\$149.50**
Your Cost

System No. 556-P-Same as above but with high impedance Velocity Mike Model RBH YM13565 instead of crystal mike. Code Sabot. List price \$327.00. **\$163.50**
Your Cost

Club Model CONSOLE TYPE **SOUND** High Fidelity **SYSTEM**

A DE LUXE P.A. SYSTEM FOR CLUBS, RESTAURANTS, CAFES, ETC.

NO longer need a moderate sized P.A. System be an unwieldy cumbersome conglomeration of individual units. Nor need it be an unattractive piece of equipment that must be hidden in some out-of-the-way corner. Here is a powerful, beautifully toned Sound System complete with a three position mixer, radio tuner, crystal phono-record reproducer, high-fidelity speaker and high frequency crystal tweeter mounted in a handsome hardwood console cabinet designed for use in the most tastefully furnished surroundings. As many additional speakers as required may be added up to the full capacity of the system.

The tuner and amplifier are essentially the same as the unit described at the top of this page. In addition there is a dual speed turntable and a crystal pickup for the reproduction of any type of record—either 10" or 12". The tone quality both on radio and phono-records is of exceptionally fine quality. A channel for microphone connection permits the use of either a crystal or high impedance velocity mike directly without pre-amplification.

System No. 560-P-Lafayette High-Fidelity Console type Sound System as described above complete with tubes, less microphone. Dimensions: 42" by 27 1/2" by 19" high. Shpg. wt. 65 lbs. Code Sachus. List price \$385.00. **\$192.50**
Your Cost

System No. 561-P-Same as above but with Capehart Automatic Record Changes. This will play ten records (either 10" or 12") automatically. (Note this changer equipped with a magnetic type pickup). Shpg. wt. 182 lbs. Code Sagar. List price \$465.00. **\$232.50**
Your Cost

Mike Combination No. YN13570-Consisting of Model YM13473 Crystal Mike, Model YM13428 floor stand and 25 ft. of mike cable. Shpg. wt. 22 lbs. Your Cost **\$19.95**

Mike Combination No. YN13591-Consisting of Model YN13565 Amperite RBH Velocity Mike, Model YM13528 floor stand with 25 ft. of mike cable. Shpg. wt. 22 lbs. **\$32.50**
Your Cost

NEW

High-Fidelity Amplifier

by Lafayette

AN IDEAL AMPLIFYING UNIT FOR LABORATORY WORK

Designed by the same engineers who designed the original Lafayette High Fidelity Amplifier, which caused such a sensation in the engineering fraternity about a year ago (see "Radio Engineering" for Jan. 1935) this new model is destined to play an even greater part in influencing amplifier design practice.

It is also an excellent amplifier for use in high-fidelity P.A. systems and phono-recard reproducers.

The advantages of push-pull amplification throughout the three stages are obtained by the use of a type 53 tube as phase inverter. This is followed by a pair of 56's driving a pair of 6B5's. An 83 rectifier is used.

A gain of 85.7 db is realized with a power output into a 500 ohm load of 15 watts.

OUTPUT TRANSFORMERS

Two types of output transformers are available. The difference between the two being in the frequency response obtained. A glance of the curves shown here-with will make this clear. Output impedances are 7 to 15 and 250-500 ohms.

PRACTICALLY PERFECT RESPONSE

In engineering circles the commonly accepted limits of high fidelity reproduction is from 30 to 15,000 cycles. This new amplifier greatly exceeds these specifications and covers a frequency range from 20 to 17,000 cycles. This makes it ideal for use in laboratory measuring instruments for which purpose many of the previous models are in use today.

amplifier greatly exceeds these specifications and covers a frequency range from 20 to 17,000 cycles. This makes it ideal for use in laboratory measuring instruments for which purpose many of the previous models are in use today.

Lafayette Model 108-A - High-Fidelity Amplifier, less tubes and output transformer. Dimensions: 7" deep x 16" wide x 8 1/4" high. Shpg. wt. 45 lbs. Code Ambec. List price \$69.00. **Your Cost \$34.50**

XP15930 - Type A output transformer. Shpg. wt. 10 lbs. List price \$25.00. **Your Cost \$12.50**

XP15931 - Type B output transformer. Shpg. wt. 7 lbs. List price \$7.90. **Your Cost \$3.95**

Kit of Tubes for above. **Your Cost \$4.80**

DC High-Fidelity Amplifier Also Available - A special model Lafayette High-Fidelity Amplifier for DC operation is also available. It has an output of 15 watts and uses one 77, one 37 and

four 48's. It is similar in size and appearance to the AC model. Write for further details if you are in a DC district.

Model 109-A - Lafayette DC High-Fidelity Amplifier, less tubes and output transformer. Shpg. wt. 32 lbs. Code Amete. List price \$55.00. **Your Cost \$27.50**

(Choice of same output transformers listed for the AC model.)

Kit of tubes for above amplifier. **Your Cost \$6.75**

four 48's. It is similar in size and appearance to the AC model. Write for further details if you are in a DC district.

Model 109-A - Lafayette DC High-Fidelity Amplifier, less tubes and output transformer. Shpg. wt. 32 lbs. Code Amete. List price \$55.00. **Your Cost \$27.50**

(Choice of same output transformers listed for the AC model.)

TECHNICAL CHARACTERISTICS

- Peak output 34 watts
- Max. output into 10,000 ohm load 15 watts
- Max. output into 500 ohm load. 15 watts
- Harmonic content at max. rated outputs 4%
- Gain 85.7 db Mum level. -45 db
- Power consumption from line. 105 watts

Lafayette 60 WATT CLASS 'B' POWER STAGE

INCREASE THE OUTPUT OF YOUR PRESENT EQUIPMENT WITH THIS POWERFUL UNIT!

THIS new Lafayette Power Stage offers an inexpensive method of increasing the power output of your present equipment. Merely by adding this simple unit to your present amplifier you can immediately increase the output to a maximum of 60 watts - more than sufficient for the largest indoor stadium and ample for the greatest majority of outdoor installations.

ECONOMY IN OPERATION

The Lafayette policy of using receiving type tubes instead of the expensive transmitting types means that both the initial cost and the upkeep of this amplifier are low. The tubes employed are obtainable anywhere - four type 46's and two type 83's.

SPECIAL INPUT TRANSFORMER

A special input transformer is provided, so that the amplifier may be driven either from a 500 ohm line or directly from the plates of a pair of 2A3 tubes. The latter tubes are used in the Lafayette Model 139-A Driver-Amplifier, which is recommended for use with this 60 watt unit. See page 72 for data on this driver.

EXCELLENT FOR MODULATOR SERVICE

The Lafayette Model 105-A 60 watt amplifier makes an efficient, high quality modulator for amateur or small broadcast transmitters. It contains its own power supply and can therefore be added to any existing CW outfit quickly and easily. The regular output transformer supplied is only for 250 or 500 ohm lines but a special transformer has been designed for modulator use. Write for prices and further details and describe the transmitter you have in mind.

Lafayette Model 105-A 60 watt amplifier, less tubes but with 500-5000-ohm primary impedance input transformer and 250-250-500-ohm secondary output transformer. Dimensions: 11 3/4" deep, 19 1/4" wide, 12" high. Shpg. wt. 95 lbs. Code Amafe. **\$54.50**
List price \$109.00. **Your Cost \$3.90**
Kit of tubes for above amplifier. **Your Cost \$3.90**

TECHNICAL SPECIFICATIONS

- Peak output 100 watts
- Max. output into 1000 ohm load. 75 watts
- Max. output into 500 ohm line. 64 watts
- Harmonic content at rated outputs 4%
- Gain. 14 db Mum level. -40 db
- Power consumption from line, average. 210 watts
- Gain with rec. driver. 75 db

A high power amplifier with an equalized characteristic. Actual response of amplifier and driver.

100WATT Amplifier

FOR VELOCITY OR CRYSTAL MIKES

133 db GAIN

Entirely A.C. OPERATED

NO GRID BIAS BATTERIES
LOWEST TUBE COST OF ANY 100WATT AMPLIFIER

TECHNICAL CHARACTERISTICS

100 Watt Amplifier

Peak output 160 watts
Max. output into plate load 125 watts
Max. output into 500 ohm line 100 watts
Harmonic content 3%
Gain 14.3 db Hum -60 db
Power consumption from line 350 watts

AMPLIFIER PLUS DRIVER

Harmonic content 5%
Gain 95 db Hum -50 db
Power consumption from line 440 watts

AIRPORTS, athletic stadiums, and multi-speaker hotel installations require an amplifier having a much higher power output than is normally available from a single unit.

For installations of this character Lafayette engineers have designed a power stage having a conservatively rated output of 100 watts. In designing this unit Lafayette engineers decided that their 100 watt amplifier must deliver 100 watts of usable energy into a 500 ohm line with less than the allowable 8% harmonic content. Cost was to be secondary, since there could be no compromise with quality and dependability in an amplifier of such high power.

Fortunately for the purchaser, Lafayette engineers devised a unique method of using receiving type tubes to deliver the necessary 100 watts. Eight ordinary type 46 tubes are used - the same type used in many present day receiving sets, and consequent quantity production of these tubes makes their cost extremely low when compared to the large transmitting types used in many high-powered amplifiers.

Because of this large saving in tube cost, and despite the fact that only the finest components, including the largest and most efficient output transformer ever designed for a unit of this type, are employed, this new amplifier sells complete with tubes for less than competitive makes in which the quality of the components is sacrificed to compensate for the expensiveness of the tubes.

12 WATT DRIVER

THIS unit is especially recommended for driving the Model 138-A 100 watt amplifier. It employs three 53's and two 2A3's and actually delivers 12 watts with an harmonic content of only 3%. At the average level required to drive the 100 watt amplifier its harmonic content is less than 2% which means that the total content of the whole system is less than 6% when the full 100 watt output is delivered into the 500 ohm line.

The frequency characteristic of this ultra high power amplifier and its driver is the result of accurate design.

THE harmonic content of the output of this amplifier when actually delivering 100 watts into a 500 ohm line is only 3%! Truly a phenomenal achievement. Its frequency response is excellent, as can readily be seen by a glance at the response curve shown herewith.

8 WATT DRIVER REQUIRED

Only 8 watts are required to drive this amplifier, but for co-ordinated results the special Lafayette 12 watt Driver Amplifier described above is recommended.

Model 138-A-Lafayette 100-Watt Amplifier, complete with tubes, less metal cabinet. Dimensions: 19" wide x 12" deep x 10 1/2" high overall. Shpg. wt. 122 lbs. Code Amhll. List price \$163.00.

Your Cost **\$81.50**

All Metal semi-portable carrying case for 138-A amplifier. List price \$17.50. Your Cost **\$8.50**

Model 139-A-Lafayette 12-Watt High-Fidelity Driver for 100-Watt Amplifier, less tubes. For rack mounting. Dimensions: 7" deep, 19" wide, 8 3/4" high overall. Shpg. wt. 45 lbs. Code Amjal. List price \$55.00. Your Cost **\$29.50**

Kit of tubes for above amplifier: 3-53, 2-2A3, 1-5Z3. Your Cost **\$4.05**

All Metal semi-portable carrying case for Model 139-A. List \$9.00. Your Cost **\$4.50**

COMPLETE RACK MOUNTED 100 WATT P.A. SYSTEM

ILLUSTRATED at the bottom of the page is a complete 100 watt public address amplifying system. It contains within a single steel cabinet a three channel electronic mixer and pre-amplifier, a 12 watt driver amplifier and the 100 watt output stage. Totally enclosed, it is particularly attractive in appearance, the only items visible on the face of the front panel being the mixer with its three individual channel controls, tone control and overall gain control. The output stage plate ammeter and fuse are also on the front panel. Access to the tubes, etc., is through the door in the rear of the cabinet.

This system has sufficient gain for use with high impedance velocity and crystal microphones without requiring any additional pre-amplification. Total gain 133 db. It is complete within itself and can be readily moved from location to location as required.

Since the installation of a 100 watt system is invariably a special job no speakers or microphones are included.

System No. 528-P-Lafayette 100 Watt Enclosed Rack P.A. System complete with tubes as described above. Overall dimensions: 28 1/4" high, 19 1/4" wide, 13" deep. Shpg. wt. 185 lbs. Code Sequo. List price \$350.00.

Your Cost **\$175**

A Laboratory Tested Lafayette Product

Two HIGH-FIDELITY Theatre AMPLIFIERS

30 WATT MODEL
for the LARGER THEATRE

TECHNICAL CHARACTERISTICS
Peak output 48 watts
Max. into 500 ohm
line 30 watts
Harmonic content 5 1/2 %
Gain 106 db
Hum level -50 db

NO pre-amplification is required with this powerful high gain amplifier. Gain is 106 db. Its low frequency response has been altered to compensate for sound film characteristics. Employs a 57 coupled to a 56, which in turn works into a 59 driving a pair of 46's. An 83 rectifier supplies plate current.

Two polarized receptacles and 6-ft. low capacity cables supplied for photo-cell connections. Cell polarizing and exciter lamp current supplied by the amplifier. Supplies exciter lamp current for either 8 V. 4 A. or 10 V. 7.5 A. lamps with switch and connections for two lamps. Primary circuit is fuse protected and both gain and volume controls are provided, as well as cell current controls.

Lafayette Model 125-A—30 Watt Theatre Amplifier, less tubes. Dimensions: 11 1/4" deep, 19 1/4" wide and 1 1/4" high. Shpg. wt. 95 lbs. Code Amkas. **\$69.50**
List price \$139.00. Your Cost.....

Kit of Matched Tubes.
Your Cost... \$5.65

An **ULTRA-COMPACT MODEL**
for the SMALLER THEATRE

TECHNICAL CHARACTERISTICS
Peak output 23 watts
Max. into 500 ohm
line 15 watts
Harmonic content 5 1/2 %
Gain 103 db
Hum level -45 db

THE compactness of this amplifier makes it suitable for the smaller theatre and also for portable movie-sound systems. High gain and special compensated frequency response. Circuit employed uses 1-57, 1-53, 2-6B5's and 1-83. Low frequency response has deliberately been altered to compensate for sound-on-film characteristics.

Supplies photo-cell current, exciter lamp current and field supply for one 1000 ohm or two 2000 ohm fields. Either 8 V. 4 A. or 10 V. 7.5 A. lamps may be used. Gain and tone controls included. Two 6-ft. high-capacity cables furnished. All controls and connections on front panel. This model is designed for 35 mm. systems. A special model for 16 mm. is also available. Primary circuit fuse protected on front panel.

Lafayette Model 122-A—15 Watt Theatre Amplifier less tubes. Dimensions: 15" wide, 8 3/4" deep and 9 1/4" high. Shpg. wt. 45 lbs. Code Amlie. List price \$105.00. Your Cost..... **\$52.50**

Kit of Matched Tubes.

SOUND-ON-FILM

CONVERTS
ANY AMPLIFIER FOR SOUND-ON-FILM

THIS amazingly simple yet powerful unit will convert any ordinary public address amplifier into a highly efficient photo-cell amplifier for use with sound-on-film. Will add an additional gain of approximately 56 db and supplies the necessary polarizing voltages for the photo-cells. A special variable equalizer control permits varying the frequency response over a wide range. Maximum attenuation of low frequencies 54 db. See response curves below. Excellent for use with 16 mm film - gives high-fidelity reproduction of this type of film. All controls - gain, equalizer, photo-cell voltage, and input and output terminals on face of converter. Chassis suspended on sponge rubber in heavy steel case eliminates effects of machine vibration, tube microphonics, etc. Special power supply has all windings static shielded and is triple filtered. Two models available - high impedance output and low impedance (far lines) output. Converter dimensions: 10 1/4" x 7 1/4" x 5 1/2" high. Power supply 8 1/4" x 6 1/2" x 6 1/2" high.

Model 258-A - Lafayette Sound-on-Film Converter with high impedance output and complete with tubes and power supply. Shpg. wt. 35 lbs. Code Amlem. **\$34.50**
List price \$69.00. Your Cost....

Model 259-A - Lafayette Sound-on-Film Converter with 200-500 ohm output impedance complete with tubes and power supply. Shpg. wt. 37 lbs. Code Amdld. **\$43.50**
List price \$97.00. Your Cost....

Note the low frequency suppression with equalizer

Lafayette MIXERS and PRE-AMPLIFIERS

"ELECTRONIC MIXER"

A Radically New Development

- Affords Gain Instead of Loss
- Smooth Control by Electronic Means
- Mixes and Fades Three Channels

Unlike most of the mixers in use today, this one has no frequency discrimination and no loss. In fact, this new Electronic Mixer will provide an average gain of approximately 10 db. Its frequency response is flat from 20 to 10,000 cycles and it will mix any of three inputs—mike, radio and phonograph—or any combination of these desired. Five controls are provided—three individual channel controls, one overall gain control and a tone control.

The Electronic Mixer can be used with any amplifier having up to 95 db. gain. Operation is extremely quiet and smooth due to the unique electronic method employed. The design is an exclusive Lafayette development on which patents are pending. Lafayette is the first to present it to the trade—and of course at a price that is typically Lafayette.

A Model for Every Purpose

Several models are available. The high impedance model has both high impedance inputs and output. Any device can be connected to the input terminals providing it will develop .01 volts when connected to an amplifier having a gain of 95 db. With lower gain amplifiers the voltage required increases. The output can be connected directly to the grid of the first tube in the main amplifier. This model is particularly recommended for its excellent frequency response.

The low impedance model is made in two types. Both have two low impedance (200-500 ohms) channels and one high impedance channel and a low impedance (200 ohms) output. The low impedance channels are for use with mike lines or low impedance pickups—the high impedance channel for the usual high impedance pickup or other high impedance devices. The only difference between the two models is that the P.A. model is equipped with transformers having a frequency response suitable for P.A. work, whereas the "High Fidelity" model has an excellent frequency response suited for the finest installations.

High impedance and low impedance models are available for either 2½ volt or 6 volt operation. The 2½ volt models require 2½ volts at 8 amperes and the 6 volt models 6 volts at .9 ampere.

Plate supply can be anything from 100 to 400 volts. If desired these mixers can be operated from an external power supply instead of the supply being obtained from the amplifier. In this even any power supply may be used and if desired the 6 volt models may be operated from batteries.

All models are mounted in a rubber black finished steel case with an etched metal front panel. Dimensions: 10x7x5½". Shpg. wt. 10 lbs.

HIGH IMPEDANCE MODELS

Model 200A—Code AMNAR. 2½ volt type.

Model 201A—Code AMISE. 6 volt type.

Your Cost, Either Type, with Tubes

Lafayette "High-Fidelity" and "P.A." Pre-Amplifiers

The most unusual high-gain A.C. operated pre-amplifier ever developed. Has a gain of 56 db. from a 200 ohm input to a 200 ohm output. Output level +5 db. Particularly designed for use with ribbon microphones and other low level input devices when used with amplifiers having a gain of over 60 db. Special output and input transformers provide a frequency response that is down only -2 db. at 30 c.p.s. flat within ½ db. from 80 to 6000 c.p.s. and down only -1.5 db. at 10,000 c.p.s. and only -3 db. at 17,000 c.p.s.

SPECIAL "P. A." MODEL

A special "P.A." model for use where extreme high-fidelity is not required is available having a frequency response essentially flat from 70 to 8,000 c.p.s. Negligible hum level. Chassis, tubes, transformers, etc., mounted in sponge rubber to prevent microphonics.

Two type 6C6 tubes are used in a special circuit. Standard input impedances 50,200 and 500 ohms. When output transformer is supplied output impedances are 50, 200 and 500 ohms. Without output transformer output is at high impedance.

The Power Supply is a separate unit and extreme precautions have been taken to guard against hum. Power Transformer has each winding interleaved with a static shield. For 110 volts 60 cycle A.C. Case of ½" steel. Amplifier 10¼x7¼x5½". Power Supply 8¼x6¼x6". All models with Power Supply. Shpg. wt. 38 lbs.

Lafayette Pre-Amplifier & Control Box for Crystal or Ribbon Microphones

Now a new Lafayette Pre-Amplifier that is suitable for use with mikes having a -65

db. level when used with an amplifier having a gain of over 80 db. Also, with mikes having a level of -70 db. when used with amplifiers having a gain of over 90 db. Thus it is possible to use this pre-amplifier to provide the necessary pre-amplification required for crystal and ribbon microphones.

It can be operated either from A.C. or from a six volt storage battery. Plate supply can be obtained from the amplifier or from batteries if necessary. Both gain and tone controls are provided as well as a changeover switch for changing from mike to phono-pickup. Available with or without input transformer having input impedances of 50, 200 and 500 ohms. Without transformer input is at high impedance directly to grid of tube. Transformer is symmetrically wound, wide range and has permalloy core. Amplifier dimensions: 10x7¼x5½". Steel case black crystallized finish. Shpg. wt. 10 lbs.

Model 228A—Without input-transformer, but complete with tube. Code AMBOS. Your Cost

Model 229A—With input transformer and tube. **\$10.95**

Code AMICE. Your Cost **\$18.50**

P.A. TUNERS and RECORDING EQUIPMENT

DUALL Super Recorder

Some of the many features of the new Duall Recorder are: a positive feed for the recording head that provides uniform spacing of lines and prevents overlapping. Choice of either aluminum or celluloid recording heads (celluloid recommended). Audak high quality pick-up for reproduction, (state impedance desired). Cutter head, 15 or 500 ohms impedance. Specially designed 1-20 H.P. motor. Rim drive assuring constant 78 R.P.M. speed. Vibration proof mounting. Standard Assembly consists of 80-line recordings on 12" records. Feed inside-out. Cutting head for celluloid (if aluminum is preferred, specify). Cutting head, 15 to 500 ohms. Driving pins for celluloid are provided — which can easily be removed when recording on aluminum. Motor is 115 volt, 50 to 60-cycle. All metal parts above, base chrome plated. Shpg. wt. 30 lbs.

YY19889—List \$275.00
Your Cost
 Same equipment as above, but with two-speed motor for both 78 and 33 1/2 R.P.M. recording. Complete. Shpg. wt. 34 lbs.
YY19890—List \$330.00
Your Cost **\$147.50**
\$180.00

Overhead Feed Mechanism

Overhead feed mechanism only for attaching to your present turntable. Motor should be of constant speed and have a rating of 1/20th horsepower for best results. Cutter head impedance 15 ohms. Shpg. wt. 12 lbs.

YY19891—List \$85.00. **Your Cost** **\$48.00**

"High Fidelity" Recorder

Essentially the same as the model listed above but with high fidelity cutter head. Flat within 2 db. from 100 to 5500 cycles.

YY22000—Single speed "High Fidelity."
Your Cost **\$159.50**
YY22001—Two speed "High Fidelity."
Your Cost **\$192.50**

UNIVERSAL Professional Recorder

Not a revamped phonograph—nor a suitcase model—but a heavy, "rock-solid" piece of machinery for long and continued use. It will make professional quality recordings on either aluminum, silveroid, acetate or nitrate discs.

The recorder assembly is mainly of cast iron and weighs 125 lbs. The turntable disc is 16" in diameter and weighs 69 lbs. and is mounted on a 1" steel shaft. It is rim driven by an endless linen gum-dipped round belt running in grooves around the outside of the table. This method of drive eliminates "waver" and "wow" and is absolutely dependable. The motor is 100% synchronous, reversible and not self-starting. It is absolutely constant in speed regardless of load. Develops 1/12th horsepower—more than ample to cut any recording material up to 16" in diameter. Motor is mounted on a separate base with a countershaft that permits operation at 78 or 33 1/2 R.P.M. on either 50 or 60 cycle current.

The cutter is a special Universal power cutter with four pole pieces and four adjustment screws for damping—one in each pole piece. The magnet is cobalt steel. This cutting head has been designed from the beginning as and is not merely a revamped pickup or reproducing head. By means of the adjustment screws any type of frequency response can be obtained—either high or low predominance or equal response over an exceptionally wide frequency range. It will cut any type of material in common use to-day for recording purposes. A 10 power magnifying glass permits constant observation of the recording being made. Workmanship throughout is of extreme precision and all iron parts are finished in black lacquer, with small parts in contrasting chrome and cadmium. Cutter, slide and track are "watch mill" finished. Entire unit is for bench mounting similar to the method used for bench lathes.

YN17701—UNIVERSAL Professional Recording Machine for operation on 110 V. 50-60 cycle A.C. with motor, motor mounting, three belts, depth gauge and shoe, magnifying glass, etc. but without recording head or cutter. Shpg. wt. 35 lbs. **\$250.00**

YM13586—Special Power Cutter fitted to above. 15, 50, 200 or 500 ohms. Specify which impedance is desired. Shpg. wt. 8 lbs. **\$35.00**

T.R.F.
 "High-Fidelity"
 P.A.
 Tuner

Where tone quality is far more important than extreme selectivity (such as furnished by the Lafayette Super-Het Tuner) we recommend the use of this Lafayette T.R.F. "High Fidelity" Tuner. It provides the maximum fidelity possible from broadcast transmissions. Four tuned circuits are used, including a pre-selector, two tuned radio frequency stages using type 58 tubes, and a tuned detector stage using a type 56 as a diode.

SPECIAL MODEL AVAILABLE

Another model is available using a 56 as a linear triode detector. This model is recommended where extreme fidelity is not required and transformer coupling must be used to the amplifier or line.

Filament supply for the tuner is self-contained and the "B" supply required (180 to 250 V.) may be obtained from the amplifier or from any B eliminator. Size: 8" wide, 7 1/4" high, 10" deep. Shpg. wt. 12 lbs.

Model 1000-TP—Lafayette TRF High-Fidelity Tuner with "Diode" detector, less tubes. Code TOTEM. List \$36.90 **\$18.95**

Model 1001-TP—H-F TRF Tuner with "linear" detector, less tubes. Code TASON. List \$35.90 **\$17.95**

Lafayette P.A. TUNER

"Remote Control" Tuner

No longer is it necessary to be at the P.A. rack to tune the radio tuner from station to station or to control the volume. All tuner operations—tuning—volume adjustment—turning it on or off—can be done at a remote point, quickly, at the touch of a fingertip, with this new Lafayette Remote Control Tuner.

T.R.F. CIRCUIT

The tuner employed is essentially the same as the standard T.R.F. Tuner described at the left. Both triode and diode models also being available. State which is desired. The complete Tuner is designed for rack mounting and is equipped with a standard 19" rack panel. Overall dimensions: 19" long, 8 1/2" deep and 8 3/4" high. Shpg. wt. 30 lbs.

Model 1015-TP—Lafayette Remote Control Tuner, less tubes. Code TENOR. List \$65.00 **\$32.50**

Kit of Tubes **\$1.44**
Your Cost

Super-Het P.A. Tuner

A highly selective and sensitive superheterodyne tuner. 10 kc. selectivity—3 1/2 microvolt per meter sensitivity. Automatic volume control, diode detection and pre-selection. Pre-selector stage is followed by a tuned R.F. stage using a 58, a converter stage using a 2A7 and a 2B7 as I.F. amplifier and diode detector—A.V.C. tube. Special model available for low gain amplifiers has an additional 56 as A.F. tube. Four tube model is recommended for use with amplifiers having gain of less than 60 db. Finest quality components. Compact—7 1/4" high, 10 1/2" deep and 9 1/4" wide. Comes complete with instructions. "B" supply required may be obtained either from the amplifier or from any well filtered B eliminator. For temporary installations it can be operated for short periods with heavy duty B batteries. Built-in filament supply. Shpg. wt. 14 lbs.

MODEL 69 SHORT WAVE CONVERTER RANGE 1430 to 25,000 Kc. 210-12 METERS

CONTAINS the frequency changer circuits at a superheterodyne system which, connected to the input of any good standard broadcast receiver, gives an extension of the tuning range from 1500 to 25,000 Kc. Thus, all frequencies between 550 and 25,000 Kc. (12 to 550 meters) can be readily tuned.

Circuit employs a 6D6 R.F. amplifier, effective on all bands, a 6A7 modulator, a 76 oscillator and an 84 rectifier in the self-contained power supply. Tuning range in three bands: 1430 to 4200 Kc., 3700 to 10,500 Kc., and 9,000 to 25,000 Kc.

Circuit features include: R.F. Amplification on all bands; "touch tuning" afforded by the exceptionally large dial; individually calibrated bands; a pilot light system whereby only the band in use is lighted; only two connections to the receiver; high ratio selector tuning control.

Housed in beautiful two-toned hardwood Montel cabinet with hand rubbed finish. Shpg. wt. 18 lbs.

No. 1 HIGH FIDELITY SPEAKER SYSTEM No. 2 HIGH FIDELITY SPEAKER SYSTEM

FREQUENCY range covers from 40 to 12,000 C.P.S. Designed to handle 30 watts on peaks, 25 watts continuous. Due to its high efficiency, the system is as loud as an ordinary speaker working at a 6 db higher level.

The system is made up of an auditorium sized bass speaker with a 13 1/4" overall diameter, a treble or "tweeter" speaker with a 5 1/4" diameter, a diffusing vane assembly and a divider network. The divider network shunts all low frequencies to the bass speaker and the highs to the "tweeter". Bass speaker has its own field supply mounted on frame; exciter unit for the treble speaker is mounted on a 17x12" walnut shelf (uses 80 tube; bass speaker uses a 523). Input impedance 8 ohms.

For best results a large flat baffle is recommended, with both speakers mounted close together. For cabinet installations on Acoustic Labyrinth is recommended to load up and confine the bass speaker for best low frequency response. Space required by labyrinth: 21" deep, 39" wide and 22" high.

YW19277-No. 1 High-Fidelity Speaker System as described above, with all RCA tubes, and all connectors. Shpg. wt. 75 lbs. Your Cost..... **\$79.50**

YW19284-Special Acoustic Labyrinth for above. Shpg. wt. 45 lbs. Your Cost..... **\$42.50**

SIMILAR to the No. 1 system, except that the exciter units for both speakers are mounted on the shelf. Response from below 50 to 10,000 C.P.S. Will handle up to 20 watts peak power.

Consists of a 10 1/4" bass speaker, 5 1/4" treble speaker, divider network, diffusing vane assembly and exciter units for both speakers. Input impedance 24 ohms. For cabinet installations, an Acoustic Labyrinth is recommended. Shpg. wt. 50 lbs. YW19285-No. 2 High-Fidelity Speaker System complete with all tubes, cables, connectors and instructions. **\$65.00**

YW19286-Acoustic Labyrinth for above. Shpg. wt. 27 lbs. Your Cost..... **\$28.50**

DESIGNED for matching or mixing dynamic and magnetic type speakers. For maximum efficiency, unit is designed as an "out-transformer", and will not isolate speaker lines from high voltage. Impedance taps of 2, 4, 8, 16, 25, 75, 150 and 300 ohms. Will take from 1 to 200 magnetic (1500 ohm) speakers. For receivers of audio amplifiers not exceeding 20 watts. Shpg. wt. 5 lbs. **\$9.50**

YD5640-Your Cost. Each.....

Single Unit High Fidelity Speaker - Wall Mounting Type D-2845

THIS SPEAKER was designed to fulfill the requirements for a truly High-Fidelity unit to be used in conjunction with any broadcast receiver designed to cover the 7500 cycle High-Fidelity range. If properly baffled and loaded (by means of an acoustic labyrinth), and used with an amplifier having a flat frequency curve, it will provide a practically flat response to 7500 C.P.S. and a low frequency response extending down to between 50 and 60 cycles (depending on type of baffle).

RESPONSE CURVE EXCEPTIONALLY UNIFORM A heretofore unattainable dynamic speaker response curve (as shown by comparative tests with all popular types of so-called high-fidelity speakers) has been provided in this speaker. There is a total variation of approximately 4 db between 1000 and 3000 cycles, the curve having a gradual change rather than the usual "hill and valley" type. Since most speakers show variations of from 18 to 20

db in the range between 1500 and 3000 C.P.S., the above feature is of extreme importance if real High-Fidelity results are to be expected.

CONSTRUCTION FEATURES

Excellent results are achieved by use of a tremendous field pot wound with the finest copper wire obtainable; a 1 3/4" voice coil, special acoustic cane material and a newly developed "high-fidelity" leather cone suspension also contribute greatly to the overall uniformly excellent results.

Unit furnished complete with specially designed field exciter using an 80 rectifier, a diffusing vane assembly and hardwood mounting shelf and supports. Shipped knocked-down, with complete assembly instructions. Shpg. wt. 60 lbs.

YW19276-D2845 High-Fidelity Speaker, with field exciter, tube and mounting supports. Your Cost..... **\$31.95**

Lafayette MICROPHONES AMPERITE

Model "Twelve" Carbon Mike

Excellent for use in the amateur station, either portable or fixed. Two-button carbon type with dural diaphragm having pure gold spot centers. Highest grade carbon granules used. Buttons are standard 200 ohms each. Scientifically damped for high quality voice reproduction. Bright nickel finish. Extremely rugged construction. 2 1/4" in diameter. Shpg. wt. 2 lbs. List \$11.50
YM13392—Your Cost \$4.75

"Professional" Model "Fifty" Carbon Mike

Wide Range Frequency Response

One of the finest and most popular types of carbon microphones. Broadcast type, has stretched dural diaphragm only .002" in thickness. Frequency response is from 50 to 5700 cycles. Buttons are standard 200 ohms each. The model 50 microphones have proven their worth in many types of work under various conditions and this new model is bound to be even more popular due to the many refinements in its construction. Extremely rugged construction, with many added features in design which will result in long life and service under ordinary conditions of operation and care. Finished in highly polished nickel. 2 1/4" in diameter, 1 1/4" in thickness. Shpg. wt. 2 1/2 lbs. List Price \$50.00
YM13421—Your Cost \$19.95

Lafayette "Professional" VELOCITY MICROPHONES

The Studio Type Microphone, shown at right, has an unusually high fidelity characteristic and high output level. Its construction and design warrants its use in the highest types of P.A., sound, recording, and broadcast installations. Designed for a minimum of inductive pick-up from stray magnetic fields. Output level -69 db. with 200 ohm line. Available in either high or low (200 ohms) impedance. Employs heavy bronze case and screen, and extra large magnets to insure permanent high output. Uniform response characteristic in all incident angles of sound. No pick-up from 2 sides, giving greater freedom from acoustic feedback. Response 25 to 12,000 cycles, less than ± 1 db. to 10,000 cycles. Shpg. wt. 8 lbs.
YM13570—Specify high or low impedance. Your Cost \$39.20

Public Address Microphones

Designed for public address where high quality speech or music is desired. Each is supplied with a shock absorber to minimize shock or vibration from being transmitted to the unit. Output ratings are measured at impedance indicated. Each unit has a wide-range response.
YM13571—Available in either 200 or 50 ohms output. Response is ±2 db. 40 to 10,000 c.p.s. Output -64 db. open line. Specify impedance desired. Shpg. wt. 8 lbs. **Your Cost \$19.95**
YM13572—Similar to above type but available in high impedance only. Output -65 db. (open line). Shpg. wt. 8 lbs. **Your Cost \$19.95**
YM13573—For small or average public address jobs. Although an excellent quality mike, the characteristics do not quite approach the above. Output -68 db. open line. Available in 200 or 50 ohms. Impedance or high impedance. Shpg. wt. 8 lbs. **Your Cost (Specify Type) \$14.95**

Model "Twenty-Five" Carbon Mike

A very efficient two-button carbon microphone which will give entirely satisfactory service in less critical public address installations. Frequency response 70 to 4000 cycles. Resistance 200 ohms per button. Heavy chromium plated brass frame. Special alloy diaphragm with 24K gold contact points. Size 3" diameter, 2" thick. For four point suspension. Shpg. wt. 4 lbs. List Price \$25.00
YM13420—Your Cost \$7.50

"Push Button" Adjusting Studio Stand

Outstanding features in design and appearance make this studio type mike stand highly desirable. Extremely heavily weighted—will not tip over. Push button arrangement (illustrated) permits quick adjustment of mike level. Thumb screw allows locking of adjustment. Finished in deep bronze. Height variable from 4 ft. to over 6 ft. Standard threading permits use of ribbon, crystal or carbon mike ring connector. Shpg. wt. 42 lbs.

YM13574 Your Cost \$17.95

Lafayette Floor Stands

Both stands, illustrated, are well built and finished. They are designed primarily for carbon microphones—and should not be confused with cheaply built and less attractive stands.
Stand No. 1: A large 20 lb. stand, all chromium plated. Professional type. Has standard set screw adjustment. Ring diameter 6 1/4"; base diameter 10 1/4". Extends from 45" to 72". Ring will take any standard microphone. Base drilled for insertion of microphone cable. Shpg. wt. 30 lbs. **YM13431—Your Cost \$9.25**
Stand No. 2: A really phenomenal value. Entire stand finished in satin silver. Very neat appearance. Extends from 42" to 72". Ring diameter 6 1/4", base diameter 7 1/4". Shpg. wt. 17 lbs. **YM13422—Your Cost \$4.85**

AMPERITE Velocity Microphones Models RB-H, RB-M, and RB-S

A full line of velocity microphones for every purpose; thoroughly shielded—not affected by moisture. Helps eliminate acoustic feedback, peaks that tire the listener, mechanical reproduction and background noise. Complete instructions and diagrams packed with each.
Model RB-H (High Impedance Type). Operates directly into grid of tube, eliminates input transformer and inductive hum. Output -68 db., frequency response ±2 db. 40 to 10,000 cycles. Supplied with shock absorber. Shpg. wt. 8 lbs.
YM13565—List Price \$42.00 Your Cost \$24.70
Model RB-M. 200 ohm or 50 ohm line. Specify which. Output -64 db. open line. Frequency response ±2 db. 40 to 10,000 cycles. Excellent for speech or music. Shpg. wt. 8 lbs.
YM13476—List Price \$42.00 Your Cost \$24.70
Model RB-S. Available for 200 or 50 ohm line. Output -68 db. open line. Response ±2 db. 40 to 10,000 cycles. Shpg. wt. 8 lbs.
YM13478—Specify Impedance. List \$32.00 Your Cost \$18.82
YM13598—Same as above, high impedance. Your Cost \$18.82
NOTE—Special Beam Type Microphone available. Write for details and special price.

Professional Model SR80-H

Electrically and mechanically accepted by many as being the best in microphones. Frequency response uniform within ±1 db. over the entire audio range. Output -88 db. at 200 ohms. Used by leading broadcast and recording studios. Absolutely free from background noises. No frequency discrimination with angle from center. Fully shielded 1/8" thick rugged bronze and steel case. Low impedance type available in 25, 50, 200, and 500 ohms. Specify output impedance required. Output -64 db. open line. Shpg. wt. 10 lbs.
YM13468—Low Impedance Your Cost \$58.80
YM13463—Hi-Impedance Your Cost \$58.80

AMPERITE Junior Velocity Microphones

Approximately the size of a match box. Sensitivity equal to a large velocity. Frequency range 60-7500 cycles. Transformer included in case. Excellent for public address, lecturers, etc. Output -68 db. open line. Equal response for any position of speaker's head. Shpg. wt. 3 lbs.
YM13568—200 Ohms, List \$30.00 Your Cost \$17.64
YM13569—Hi-Impedance List \$30.00 Your Cost \$17.64

Ribbon Microphone Transformers

YM13509—Match ribbon to line. YM13511—Match line to grid.
YM13510—Match ribbon to grid. YM13354—Match plate to line.
List \$5.00 Your Cost, Any Type \$2.94

Replacement Ribbons for Velocity Microphones
 Sold in packages of 2 ribbons in each. Available in two types.
YM13566—Standard Ribbons, Your Cost \$0.74
YM13567—Supersensitive Ribbons, Your Cost 1.03

We Will Not Knowingly Be Undersold

UNIVERSAL MICROPHONES

New Model "X" Mike

A low priced mike that will give excellent performance. Available in either single or two-button types; standard 200 ohms per button.

Duraluminum diaphragm, pure gold contacts. Response 100 to over 4000 cycles. Chrome plate finish. Shpg. wt. 3 lbs.
YM13412—Single Button
 List \$7.50
Your Cost \$4.41
YM13413—Double Button
 List \$10.00
Your Cost \$5.88
 Model X desk stand for above mikes. 5" ring. Polished nickel plated bar, ebony rubber base cover. Comes with 8 mounting springs. Shpg. wt. 3 lbs.
YM13547—Your Cost \$2.05

UNIVERSAL Model "BB" Mike

An especially rugged unit designed for P. A. and amateur broadcast work. Has 24K pure gold spot centers. Frequency response from 50 to 5000 cycles. Finished in polished chrome plate. 3" diameter, 2" thick. Standard 200 ohm buttons. Shpg. wt. 3 lbs.
YM13405—List \$25.00
Your Cost \$14.50

UNIVERSAL Model "KK" Mike
 Similar to the above, but with more extensive frequency range. Entire unit finished in 24K polished gold. Range 40 to over 6000 cycles. 2 1/2" diameter, 1 1/2" thick. Shpg. wt. 2 1/2 lbs. List \$40.00
YM13404—Your Cost \$23.52

UNIVERSAL Model "LL" Mike
 One of the finest carbon mikes available. Of high carbon steel ground to within 1/1000 inch accuracy. Pure gold contacts. Frequency range from 30 to 7000 cycles. 3 1/2" diameter, 1 1/4" thick. Shpg. wt. 3 1/2 lbs. List \$60.00
YM13403—Your Cost \$35.28

UNIVERSAL Model "A"

A highly developed single (24K gold faced) button mike; available also, special, for hearing-aid use. 200 ohms resist. Dia. 3", 1 1/4" thick. Shpg. wt. 3 lbs.
YM13406—Model "A", List \$15.00
Your Cost \$8.82
YM13407—Special for hearing-aid.
Your Cost \$8.82

UNIVERSAL Condenser Microphone Model E-30—A.C. Operated

Newly developed condenser microphone with built-in two stage amplifier employing 30 tubes. Power supply plugs into any 110 volt, 50-60 cycle line; no complicated connections. Absolutely no hum or ripple. Frequency response flat from 35 to 1,000 c. p. s.; output greater than that of a standard two-button carbon mike. Twenty-five feet of rubber covered, shielded cable furnished. Finished in black crackle. Shpg. wt. 11 lbs.
YM13549—Microphone, less tubes and power supply. List \$60.00
Your Cost \$35.28

Specially designed power supply for use with above microphone. Has binding post terminals and receptacle for microphone plug. In metal case with carrying handle. Shpg. wt. 10 lbs.
YM13550—List \$40.00. Your Cost \$23.52
 Floor Stand chrome plated. Shpg. wt. 30 lbs.
YM13373—List \$16.00. Your Cost \$9.41

UNIVERSAL Midget Lapel Microphone

Compact, lightweight 2-button mike. Sensitive and natural tone. With cord. Dia. 2 1/2".
YM13438—2-button, 200 ohms each
Your Cost \$14.70

Desk Stands

Type A: Low priced, yet high quality. Has 5" octagon shaped ring. Provided with 8 springs. Ring removable. Height 9". Finished in wrinkle black enamel. 7 1/2" pipe thread. Shpg. wt. 10 lbs.
YM13540—Your Cost, Special \$1.18
 Ring only, with adapter for suspension mounting. Complete with 8 springs. 88¢
YM13541—Your Cost \$88¢

Type B: De Luxe Stand. Height 13"; 6" removable ring. Complete with 8 springs. Finished in black wrinkle enamel. 1/2" pipe extension. Shpg. wt. 15 lbs.
YM13542—Your Cost, Special \$1.76
 Ring only for above. With 8 springs and suspension adapter. Shpg. wt. 3 lbs.
YM13543—Your Cost Each \$1.18
 Suspension Adapter only. For above Microphone Rings.
YM13544—For Type A Ring—Your Cost Each 20¢
YM13545—For Type B Ring—Your Cost Each 25¢

Truest Carbon Microphone

An outstanding value in a 2-button carbon microphone. Frequency response exceptionally good; 60 to over 4000 cycles. Uses standard 200 ohm buttons. Duraluminum diaphragm, pure gold (24K) contacts. Bridge is a separate casting. Solidly constructed to resist ordinary wear and to give satisfaction in average types of public address installations. 3 1/2" diameter, 2 1/4" thick. Shpg. wt. 4 lbs.
YM13384—Your Cost, Special \$3.95

"Handi-Mike"

Designed for use with Transceivers and portable P. A. systems. Has a gold contact faces. On-Off switch in handle. 6" long, 2 1/2" diameter head. Shpg. wt. 2 lbs.
YM13409—Single Button
Your Cost \$5.88
YM13410—Double Button
Your Cost \$8.82

Phone Box

Microphone Control box 3 1/2"x5x2". Engraved panel, provided with press button "to talk", green "OK" signal, and red "in-use". Two types, for single, and 2-button mikes. Shpg. wt. 5 lbs.

YM13451—Single
Your Cost \$5.88
YM13452—Double
Your Cost \$7.05

Aero Type Handi-Mike

For close talking, suitable for airplane transmitters, inter-communication systems, etc. Ventilated rubber mouth cushion. Equipped with 6 ft. rubber cord and switch. Press button switch. Shpg. wt. 3 lbs.

YM13453—Single
Your Cost \$8.82
YM13454—Double
Your Cost \$11.76

Studio Stand with Copy Holder

A microphone stand worthy of the finest studios. Will not tip easily. Operates smoothly. Positive clamp lock. Frosted silver crackle base. Chrome plated call letter plate. Copy holder holds prepared scripts, manuscripts, etc. 6 1/2" ring, 12" at base. 5 1/2 ft. high. 8 Springs included. Shpg. wt. 20 lbs.
YM13455—Your Cost \$8.82

Model "W" Watch Mike

Protected single button. 200 ohms. Gold spot diaphragm. 1 1/2" diam. Shpg. wt. 3 lbs.

YM13443—Your Cost \$1.76
Model "Y"
 Similar to above, but without protective cover. Shpg. wt. 1 lb.
YM13444—Your Cost \$1.18

Floor Stand with Copy Holder

An artistic and efficient stand at a low price. Telescoping, three piece. Polished nickel plated. Adjustable light copy holder—is easily applied and adjusted on stand. Facilitates the reading of scripts, notes, or sheet music when broadcasting. Does not interfere with broadcaster; aids in minimizing "mike fright". The stand includes 6 springs. Shpg. wt 12 lbs.
YM13480—Your Cost \$5.88

Collapsible Floor Stand For Microphones

Light, compact, adjustable floor stand that can easily be carried from place to place. Triple tube assembly made of brass, chromium plated. Extension range 36" to 78". Furnished with 6" microphone ring to take full sized microphone. Springs included with stand. Shpg. wt. 6 lbs. List \$12.50
YM13551—Your Cost \$7.35

Lafayette Input Stages

Double Button
 Black crystallized finished metal case containing the mike transformer, the battery and the volume control. "On-Off" switch, gauged with volume control, turns "mike" current off. Complete shielding, everything necessary—all self-contained within box. 6 ft. shielded lead furnished. 6 1/2"x5 1/2"x4 1/2" deep. Shpg. wt. 6 lbs.
YM13437—List \$12.50 \$5.25
Your Cost \$5.25

CRYSTAL MICROPHONES

PIEZO ASTATIC CRYSTAL MICROPHONES

Contact Type

A super-sensitive direct contact microphone, not dependant upon air as the transmitting medium, and capable of detecting sounds through solids. Small, compact and rugged. Excellent for detection work, etc. Opens new and unexplored fields to the sound man which will prove lucrative. Output Level 50 db. Dim. 2 1/4" diameter, approx. 3/4" thick. Finished in chromium and supplied with connecting cord. Shpg. wt. 1 lb.

YM13416—List \$22.50
Your Cost **\$13.23**

Model D-104

It requires no field or button current—has no hiss—cannot "pack"—may be used in any position and has a high output making unnecessary any great amount of pre-amplification. High impedance. No matching transformer necessary. Case is 3" in dia. and 1" thick. Finished in chromium. Output Level—64 db. Diaphragm is screen protected. Complete with 6 ft. shielded cable. Shpg. wt. 2 lbs.

YM13363—**Your Cost** **\$13.23**
Model D-104 H.S. Same as above except that it is provided with a handle and "Push to Talk" switch which may be locked in position. Supplied with 8 ft. cord. Shpg. wt. 2 lbs. **\$15.58**
YM13578—List Price \$26.50—**Your Cost** **\$14.70**
Model D-104 H. Same as above except without switch. **\$14.70**
YM13575—List \$25.—**Your Cost**

Cardlaphone Type

A precision instrument of wide frequency response for determining heart and lung conditions. Tremendous improvement over old-fashioned stethoscope—and will facilitate more rapid and accurate diagnosis. The case is 3" in dia. and 1" thick. Chrome finish. High impedance, no input transformer required. (Output Level 65 db. With 8 ft. shielded cable, and "push to listen" switch. Shpg. wt. 2 lbs.)

YM13417—List \$25.00
Your Cost **\$14.70**

Multi-Cell Type

Latest in crystal mike design. Arranged so that the forces of two opposed diaphragms are applied to one crystal, simultaneous with appropriate damping. Increases efficiency and fidelity characteristics—substantially flat from 20 to 6,000 cps., with a rise of approx. 10db. at 10,000 cycles. Output—75 db., with non-directional characteristics. Excellent for broadcast stations, High Fidelity P.A. Systems, etc. Shpg. wt. 2 lbs.

YM13418—**Your Cost** **\$22.05**

Midget Mike

The characteristics of this midget crystal microphone is substantially the same as the D-104. It is considerably smaller—measuring only 2 1/4" outside dia., and 1/2" thick. Output—68 db. Finish is bright chrome. Shpg. wt. 2 lbs.

YM13423—Model D105. List \$22.50
Your Cost **\$13.23**
Model D-105 RS. Same as above, but equipped with handle and compound switch. Supplied with 8 ft. shielded cable. Shpg. wt. 2 lbs.
YM13424—**Your Cost** **\$15.58**

Lapel Mike

Operates on similar principles as Multi-Cell Type. Extremely sensitive and high quality microphone with high-fidelity characteristics. Output Level—75 db. Response is practically flat to 6,000 cycles. Dimensions—1 3/4" in dia., and 1/2" thick at center. Finish dull black. Equipped with 25 ft. shielded cable. Shpg. wt. 2 lbs.

YM13425—List \$30.00
Your Cost **\$17.64**
Ideal for use by public speakers, auditorium lecturers, actors, announcers, etc.

SHURE BROS. CRYSTAL MICROPHONES

Hand Mike—Model 71AS

Excellent for all types of P.A. work. No polarity, no button current. Non-microphonic—and can be used in any position. Because of its high impedance no input transformer is required. Has chrome case with ring for suspension. Also "push to talk" switch built-in in handle. Response characteristics are excellent. Output Level—60 db. With 7 ft. of cable. Shpg. wt. 8 lbs.

YM13476—List Price \$26.50
Your Cost **\$15.58**

MODEL 71A

Same as above, but without the switch. Shpg. wt. 6 lbs.
YM13477—List Price \$25.00
Your Cost **\$14.70**

Model 70H

This is an improved diaphragm type crystal head with close fitting rings and 4 removable "quickway" hooks. Response from 30-10,000 c.p.s. Output Level—60 db. High impedance unit. Supplied complete with 7 ft. of rubber cable, rings and hooks. Shpg. wt. 5 lbs.

YM13473—**Your Cost** **\$13.23**
YM13426—Same as above but for push-pull input. Comprises double unit, both of high impedance. **\$13.23**

FLOOR STAND

YM13579—For either of above crystal mikes. Regular Shure Model 58RC. Can be raised or lowered at will. No wing nuts or thumb screws. Chrome finish. Shpg. wt. 22 lbs. **\$7.94**
Your Cost

New Lapel Mike

Small and unobtrusive, this Lapel mike is ideal for speakers, lecturers, stage presentations, etc. Output Level—65 db. Inherently free from internal or background noise. Weighs only 1 1/2 oz., Dimensions—2" dia., and 3/4" thick.

YM13458—List Price \$25.00
Your Cost **\$14.70**

Model 78H Sound Cell

Wide range characteristic—response from 30 to 12,000 cycles. Compact construction. Ideal for recording, high-grade P.A. systems, etc. 120° pick-up minimizes feedback. Output Level—74 db. Supplied with jack for stand m't'g.

YM13419—**Your Cost** **\$38.22**

Shielded Plug and Extension Receptacle

Provides completely shielded extensions for any shielded single conductor cable. Brass shells—nickle finish. Provides cable "strain relief." Dia. 1 1/4", overall length when connected 5 1/2".

YM13580—Plug
Your Cost **\$1.32**
YM13581—Receptacle
Your Cost **\$1.47**

Stands for Crystal or Ribbon Mikes

Stand on left is an 8" desk stand equipped with a universal ball and socket joint. The joint permits tilting the microphone to any angle. Bright chrome finish. Base 5 1/4". Shpg. wt. 5 lbs.

YM13528—**Your Cost** **\$3.25**
YM13526—Stand on right is similar to above, but floor type. Can be extended from 37" to 67". Base 9" in diameter. Highly polished chrome plated. Rigid thumbscrew height adjustment and swivel joint lock nut. Shpg. wt. 14 lbs.
Your Cost **\$6.95**

Demountable Adapter

A convenient fully shielded connector for "plugging-in" and "demounting" SHURE crystal microphones. Plug and receptacle provide for 2 conductors, one of which is grounded. Uses phosphor bronze springs. Brass shell—Finished in chrome.

YM13582—**Your Cost** **\$2.94**

Carbon Mike Desk-Stand

Solidly casted ring—6" dia. Base is spunmetal—5 1/2" dia. and filled with casted metal. Overall height—11". Ring is removable. Chromium finish. Knurled grommet in base. Shpg. wt. 3 lbs.

YM13331
Your Cost **\$2.40**

YM13576—Similar to stand on right but with 7 1/2" base. Adjustable from 42" to 74". Polished chrome. Top threaded for standard fitting. Shpg. wt. 10 lbs. **Your Cost** **\$4.95**
YM13577—Same as above, but with very heavy 10" dia. base. Adjustable from 46" to 77". Heavy chrome plated. Shpg. wt. 20 lbs. **Your Cost** **\$9.25**

Telescope Stand. Designed for use where extreme portability is desired. Can be varied from 32" to 66". Base dia. 7 1/4". Chromium finish. Shpg. wt. 10 lbs. **\$5.25**
YM13608—**Your Cost**

Banquet Stand

Solidly casted ring—removable for suspension m't'g; dia. 6". Overall Ht. 13 1/2". Base 5 1/4" dia. Satin nickel finish. Shpg. wt. 5 lbs.

YM13427
Your Cost **\$3.25**

Replacement Part Headquarters for Dealers and Service Men

Microphone Cables & Accessories

Heavy Duty Plugs and Sockets

A series of heavy duty multiple contact plugs and sockets made of genuine moulded bakelite with heavily armored metal caps. Very sturdily made and are excellent for use with portable public address systems. Finished in black crackle lacquer. Shpg. wt. 1 lb.

For quickly connecting double button mikes or any three wire cord. Has a moulded bakelite handle. Contacts are solid brass tinned for easy soldering. Shpg. wt. 1 lb. **YM13521—Your Cost 40¢**

3 Way Jack

For use with above plug. **YM13522—Your Cost 26¢**

3 Way Mike Connector

For use with above plug. **YM13523—Your Cost 39¢**

Thutest Carbon Granules

Extra fine quality, same as used in better grade microphones—not adulterated. Contains sufficient granules to refill one two-button microphone. Care must be used in measuring amount for each button. Must not be touched with fingers. Shpg. wt. 1 lb. **YM13481—Your Cost 40¢**

Microphone Springs

These microphone springs are made of fine grade tempered steel, with formed loop ends. **YM13402—Set of 8 for 15¢**

Armored Microphone Connectors

Dia. 1 1/4". Shpg. wt. 1 lb. **YM13401—Plug Your Cost Each 44¢**
YM13400—Socket Your Cost Each 58¢
YM13415—3 Wire Flush Receptacle, of a hard Composition. Will fit above Female Socket No. YM13400. Your Cost Each 59¢

Mike Connectors

Plug has metal cover for protection. Shpg. wt. 1 lb. **YM13390—Plug Your Cost Each 17¢**
YM13398—Socket Your Cost Each 19¢

Thutest Shielded Microphone Cable with Armored Connectors

Stock No.	Size	Shipping Weight	Your Cost
YQ16080	6 ft.	1 lb.	\$1.75
YQ16081	12 ft.	2 lbs.	1.98
YQ16082	25 ft.	3 lbs.	2.75

Special Value! Mike Cable

Light duty cable similar to the above. **YQ16145—Your Cost per Ft. 5¢**
 12 Ft. for. . . . \$0.55 50 Ft. for. . . . \$2.00
 25 Ft. for. . . . 1.05 100 Ft. for. . . . 3.90

Crystal Microphone Cable

Flexible Single Conductor
 Conductor consists of a flexible stranded tinned copper wire covered with a cotton wrap and lacquered braid shielded with a fine tinned copper braid. Overall 1/2" covering of vulcanized rubber. Absolutely moisture proof and will withstand considerable abuse. Ideal for use with crystal microphones. Shpg. wt. 10 lbs. per 100 ft. **YV20842—Per Ft. 3¢**
YQ16333—50 Ft. \$1.30
YQ16334—100 Ft. 2.40

Rubber Covered 4-Wire Speaker Cable

Heavily rubber covered four wire cable for use in connecting extension speakers outdoors or in portable equipment. Will withstand rough usage; heavy rubber cover plus the hemp wrapper over the conductors makes this wire practically indestructible. Shpg. wt., per 50 ft., 8 lbs. **YQ16184—Your Cost per Ft. 5¢**
 Per 100 Ft. \$4.75
YY20948—Three wire rubber covered cable, similar to the above. Suitable for P. A., theater, and other special installations. 4¢ Your Cost per Ft.
 Per 100 Ft. \$3.75

5 Wire Rubber Covered Shielded "Mike" Cable

Reinforced with cord, rubber covered, stranded color coded microphone cable. Heavy cotton braid outer layer, tinned shield. Excellent for Condenser Mikes. For all outdoor temporary or permanent jobs. Shpg. wt. 10 lbs., 100 ft. **YQ16190—Your Cost per Ft. 8¢**
 Per 100 Ft. \$7.50

Public Address Units and Trumpets

Lafayette Introduces a New Vari-Acoustic Trumpet

With the new Lafayette Vari-Acoustic Trumpet you can adjust the low frequency response to suit yourself. A unique method of adjusting the back-pressure increases or decreases the low notes at will. The streamline shape eliminates the losses that occur when the contour of the trumpet is broken. Built throughout of weatherproof material. Finished in bright aluminum. Dimensions: 4 ft. long, bell 30" square. Weatherproof cover included.

YY20041—Lafayette Vari-Acoustic Trumpet. Shpg. wt. 20 lbs. **\$14.50**
Your Cost.....

A new Lafayette Cone Unit, especially designed for use with this and similar type trumpets, employs a cone made of a semi-weatherproof material that will stand great extremes of temperature and humidity. Unit is capable of handling 15 watts and has an unusually powerful field. Field current consumption 1 to 1½ amps., at 6 V. Voice coil diam., 1¼", impedance 8 to 12 ohms.

YY19830—Lafayette 6 V. Cone Unit. Shpg. wt. 10 lbs. **\$10.25**
Your Cost.....

Lafayette Trumpets

A new 100% weatherproof Trumpet that is guaranteed for a period of two years except where they are subjected to gross misuse or abuse. Constructed of a special all-weather material and securely bound at the edges with a solid brass wetting. Detachable aluminum tone arm threaded for reproducer unit. Square bells 30x30". Finished in bright aluminum. Model L-72—6 ft. long. Shpg. wt. 25 lbs. List \$42.50

YY20047—Your Cost..... **\$24.99**
Model L-54—54" long. Shpg. wt. 19 lbs. List \$35.00
YY20048—Your Cost..... **\$20.58**
Model L-43—43" long. Shpg. wt. 16 lbs. List \$30.00
YY20049—Your Cost..... **\$17.64**

Special Lafayette Field Supply for 6 Volt Units

Designed and developed to meet an insistent demand for a unit of this type. Input 110 volts A.C., output 6 volts D.C. at 3.5 amperes. Will supply field current for three six ohm speaker units. May also be used to operate 6 volt D.C. phonograph motors on 110 volts A.C. Well filtered so as to be hum free. Size 12" wide, 6" deep, 4½" high. Steel chassis with screen cover. Binding post output terminals. Shpg. wt. 11 lbs.

YW19309—Your Cost..... **\$14.50**

Lafayette "Super Giant" Electro-Dynamic Driver Unit

A new Lafayette product that again proves Lafayette's ability to offer a finer—better product at a very low price. The diaphragm in this unit is spun from sheets of the finest grade of duraluminum. It is then given various heat treatments and annealing processes so as to provide a diaphragm that will respond to every change in electrical input yet remain rigid enough to assure an accurately centered voice coil at all times. The sound output of this unit is exceptionally high in relation to the electrical input—the result of careful placement of the voice coil in the magnetic field and a powerful field flux. Voice coil impedance 15 ohms. 6-8 V. field. Shpg. wt. 15 lbs.

YY20046—Your Cost..... **\$23.52**

Circular Bell Trumpets

Produced by an entirely new method these horns have no parallel for true reproduction over a wide range of frequencies.

Solidcast aluminum throat. Finished in bright aluminum. 1" metal bead edge.

Model C-6—6 ft. long. Shpg. wt. 27 lbs. List \$42.50
YY20054—Your Cost..... **\$25.00**
Model C-3—42" long. Shpg. wt. 15 lbs. List \$25.00
YY20055—Your Cost..... **\$14.70**

"DEMOUNTABLE" Directional Baffle

A demountable directional speaker baffle that can be quickly and easily assembled or taken apart in a few minutes with a socket wrench or a pair of pliers. Weatherproof material—aluminum finished. Bell opening 22x23"; length 25". Can be stored in

space 27x26x3". Shpg. wt. 15 lbs.

YY20052—7" opening
YY20063—10" opening
Your Cost Either Type..... **\$5.40**

"DEMOUNTABLE" Flared Baffle

Can be assembled or disassembled in a few minutes with a socket wrench or small pair of pliers. Fastened together with offset spade bolts. Dimensions assembled 13" deep, 30x18" bell. Unassembled 30x16x2½" aluminum finish. Weatherproof material. Shpg. wt. 10 lbs.

YY19837—7" opening
YY19838—10" opening
Your Cost Either Type..... **\$3.95**

"Demountable" Speaker Housing
For use with either flared or directional baffle. Inside dim., 16x18x1½".
YY20051—Your Cost..... **\$2.85**

All-Aluminum "Dome" Baffle

A new development in directive baffles. All-aluminum construction. Equipped with suspension rings. For 12" speakers. Comes with weather proof Snap-on Cover. Overall length 20" Diameter of bell 17", length of bell 10". Shpg. wt. 4 lbs.

YY20044—Your Cost..... **\$8.82**
ADAPTER RINGS. For reducing size of opening. State size when ordering.
YY20045—Your Cost Each..... 44c

Wall Surface Speaker Housing

Of heavy gauge aluminum with weather-resistant natural finish. Metal screen and grill cloth cover opening. Cone diam. 5½", inside depth 4½". Shpg. wt. 2 lbs. SH-5.

YY20061—Your Cost..... **\$2.94**
Same but with 7" opening, LH-7. **\$3.53**
YY20062—Your Cost.....

Lafayette Aluminum Baffles

Floor Stand and Sound Truck Models

The floor stand has a three point heavily weighted base (22 lbs.) which offers ample support for the heaviest cone units. Wing nut arrangement permits directing of baffle in any desired position and then locking in place. Stand is 5 ft. high. Stand finished in black crystalline. Mounting Fixtures, is available as a separate unit. For mounting baffle on any sturdy pipe standard.

YY20059—Floor Stand only. **\$14.70**
Shpg. wt. 25 lbs. Your Cost.....
YY20060—Mounting Fixture only. **\$5.30**
Shpg. wt. 4 lbs. Your Cost.....

Baffle with Built-In ROLA High-Fidelity Speaker

The All-Aluminum "Dome" baffle is available with a built-in ROLA high fidelity speaker. This speaker is supplied for either A.C. or D.C. operation. Comes completely mounted, with cord and plug for ease of connection. Full description of speaker on page 82. Transformer furnished for P.P. 45 type tubes or for 500 ohm line tapped at 250 ohms. Specify type desired.

YY20057—D.C. Model. 640 ohm field. Shpg. wt. 30 lbs. **\$19.50**
Your Cost.....
YY20058—A.C. Model with built-in field supply using two 2525 tubes. Shpg. wt. 34 lbs. **\$24.50**
Your Cost, with Tubes.....

PUBLIC ADDRESS *and* HIGH-FIDELITY SPEAKERS

Wright de Coster Speakers

Stadium Model 5800

A full range speaker capable of handling great amount of

power. Unusually rugged construction; will stand up under severe conditions of operation. Supplied with tapped input transformer providing the following impedances: 10 (voice coil), 500, 1000, 1500 and 4000 ohms. Field resistance 1800 ohms (operates on 220 to 275 volts at 125 to 150 milliamperes). Field dissipation 18 to 40 watts. Size 12" wide, 9" deep and 12 1/4" high. Shpg. wt. 35 lbs.

YW19354—Your Cost \$28.42

No. P.A. 2760—Single tube field exciter. For use with one model 5800 speaker. 110 volts, 50-60 cycles A.C. With tube. Shpg. wt. 7 lbs.

YW19185—Your Cost \$13.52

No. P.A. 3980—Double tube field exciter. For one to three model 5800 speakers. With tubes. 110 volts, 50-60 cycles A.C. Shpg. wt. 9 lbs.

YW19186—Your Cost \$19.25

Model 4500

Similar to Model 5800, but only 12-25 watts dissipation. Dimensions: 12 1/2" wide, 8 1/4" deep, 12 1/4" high. Shpg. wt. 32 lbs.

YW19383—Model 4500 Your Cost \$22.05

Model 319

Special Sound-on-film speaker, to be used with Model 4500.

YW19373—Model 319 Your Cost \$22.05

Wright de Coster Trumpets

Model 5000. Designed especially for the "Stadium" model speakers. Guaranteed weatherproof. Edges reinforced and striped with metal. Has metal box for housing unit. Screen across opening excludes foreign substances. Dimensions: Length, overall, 48"; bell at opening, 30x21 1/2". Shpg. wt. 91 lbs. YY20056

Your Cost \$24.50

Model 2050

Utility Combination

Constructed of wood and insulate, with silver finish. Exterior is weatherproofed. Has screen across opening. Special 6" speaker furnished with 2500 ohm field. Voice coil impedance 5.2 ohms. Handles 6 watts (max.) continuously. Size: overall length 27 1/4", bell at opening 22 1/4"x-14". Furnished less output transformer. Shpg. wt. 20 lbs.

YW19187—Model 2050 Your Cost \$10.05

ROLA "High Fidelity" Speakers

Two speakers, designed to meet the demand for efficient and high fidelity reproduction. Both units use a full 12" cone. D.C. model essentially flat response, 50-8000 cycles with less than 10 db. variation. Field resistance 640 ohms for 110 volts D.C., 1000 ohms for 140

volts D.C. and 2500 ohms for 225 volts D.C. Voice coil, 8 ohms. Output transformer (for both D.C. and A.C. Speakers) 250-500 ohms. Other transformers supplied on request. Dimensions: 12 1/4" wide, 12 1/4" high, 7 1/2" deep. Shpg. wt. 26 lbs.

YW19300—D.C. Model. Your Cost \$9.95

A.C. Model

Same as above speaker, but with special exciter unit designed by Lafayette engineers. Uses 5Z3 tube. Delivers ample current for full field excitation of this speaker, in an absolutely humless form. Shpg. wt. 30 lbs.

YW19301—A.C. Model, less tube. Your Cost \$14.95

P. A. Speaker "Specials"

Particularly designed for P.A. Systems. Handles 8 Watts continuously. Over-size cone made of special acoustic paper. Line matching transformer has impedance of 250-500 ohms. Field resistance 1000 ohms. A.C. speaker uses 5Z3 tube as a rectifier, and comes complete with tube. Overall dimensions 12 1/4" high, 11 1/4" wide, 7" deep. Shpg. wt., A.C. 18 lbs., D.C. 10 lbs.

YW19374—D.C. Model. Your Cost \$7.95

YW19375—A.C. Model. Your Cost \$12.50

Special 12" A.C. Dynamic

Similar to the above "specials", but will handle quite as much power. Ideal for small P.A. systems or for inter-office call systems. Transformer supplied for 500 ohm line tapped at 250 ohms. Uses 25Z5 rectifier. Well filtered. Will handle 5 watts of audio power continuously. Shpg. wt. 10 lbs.

YW19249—Less Tube. Your Cost \$7.45

OXFORD CHROMAVOX

14" Photophone Type

Will handle great power with exceptionally fine tone quality. Extremely heavy wound field. Voice coil diameter 1 1/4", impedance 8 ohms; suspended by a 3 point spider flexible enough to ensure good response. Speaker will safely carry 15 watts continuously and 25 watts peak power. Finished in satin black and constructed so that it can be mounted on a base or a baffle. Overall height 14 1/4". Field dissipation 15 watts. Shpg. wt. 24 lbs.

YW19153—1000 ohm field.

YW19155—2500 ohm field.

YW19154—6 ohm field.

Your Cost, Any Type \$9.94

14" A.C. Model

The A.C. model is exactly the same in every detail, except that it is equipped with a field supply. Requires a 5Z3 tube. For 110 volts A.C. operation (60 cycles). Shpg. wt. 29 lbs.

YW19137—Less tube. Your Cost \$14.94

Lafayette "Humless" Field Supply

Interchangeable for 1000 or 2500 ohm fields. For 110 volts A.C. Model for 220 volts available at slight additional cost. Single field uses one 25Z5. Dual field two 25Z5s. Black steel case. 7" long, 8 3/4" wide, 6 3/4" high. Shpg. wt. 6 lbs.

YW19294—Single, less tube. Your Cost \$2.90

YW19295—Dual, less tubes. Your Cost \$3.95

JENSEN Auditorium Models

In sound output these new Auditorium Speakers are 400% more efficient than the conventional type. They are fully capable of handling continuously 20 watts of energy, but the sound output from 20 watts electrical input is at least three times greater than that from other cone speakers of equivalent cone area. Construction and performance are beyond comparison. Dimensions: Overall width, 18 1/2"; height, 18 3/4"; depth, 8 1/2". Baffle opening, 12". Shpg. wt. D.C. 48 lbs.; A.C. 56 lbs.

YW19248—110 volts A.C. List \$76.50

Your Cost \$52.47

(A.C. Models are priced with tube.)

YW19248—110 volts D.C. List \$51.50

Your Cost \$35.33

Ortho-Dynamic Models

These models will handle 12 watts continuously with a peak input of 18 watts. Frequency response is unusually uniform from 30 to 5500 cycles. Finished in black and aluminum. A.C. models rectifier tube and cone complete with tube. Shpg. wt. D.C. models 25 lbs.; A.C. 35 lbs.

YW19256—110 volts D.C. List \$36.50

Your Cost \$25.03

YW19260—110 volts A.C. List \$53.50

Your Cost \$36.70

All Models are available with either of two types of input transformers.

Regular is center tapped and has an impedance 4000 to 6000 ohms suitable for most tubes. Line is for 500 ohm lines. When ordering state type desired.

JENSEN "High Fidelity" Speakers

30 to

8000

C.P.S.

Cone 12". Range 30-8000 cycles. Voice coil 8 ohms. Field 860 ohms, wattage 18. Will handle 10 watts safely. Transformer 4200 ohms, matches 4000-4500 ohm line. 500 ohm transformer available. Finish black and chrome. A.C. model includes tube. 12" wide, 12 1/4" high, 8" deep. Shpg. wt. 35 lbs.

YW19304—D.C. Model A12 Your Cost \$18.18

YW19305—A.C. Model A12 Your Cost \$29.15

Quality SPEAKERS for Every Requirement

W.D. Wright De Coster SPEAKERS

New! Paracurve 12" Speaker Model 1750

A new wide-range speaker which has better response than all previous models made by this company. New and novel cone construction eliminates sub-harmonics, assists in elimination of H.F. cancellation, and extends the H.F. range to over 8,000 cycles. Voice coil impedance—2.6 ohms. Field resistance—2500 ohms, dissipation 9 W. min., and 16 W. max. Recommended for use with Model 520 Field Supply. Universal output Transformer. Shpg. wt. 0 lbs.

YW19395
Your Cost..... **\$8.58**

Model 790

Large 10-inch D.C. speaker. Employs a universal output transformer. Field coil resistance 2,500 ohms. Cadmium plated finish. Voice coil impedance 5.05 ohms at 400 cycles. Field coil dissipation 12 watts maximum, 6 watts minimum. Cone tends to maintain adjustment. Concentric ridging provides better frequency response. Includes hum bucking or neutralizing coil to minimize A.C. hum in output (which is included in models 530 and 630).

YW19158 Shpg. wt. 6 lbs. **\$3.87**
Your Cost.....

Model 530

Diameter 6 inches. Output transformer of universal type. Field coil resistance—2,500 ohms. Voice coil impedance 3.58 ohms at 400 cycles. Field coil dissipation: max. 9 watts, min. 5 watts. Cadmium finish. Shpg. wt. 4 lbs.

YW19159
Your Cost..... **\$2.59**

Model 390

Diameter 5 inches, output transformer to match a single 43. Field resistance 3,000 ohms. Voice coil impedance 4.2 ohms at 400 cycles. Field

diss. 6 watts max. Shpg. wt. 2 lbs.
YW19161
Your Cost..... **\$1.91**

Model 630

Diameter 8 inches. Universal output transformer. Field coil resistance 2,500 ohms. Voice coil impedance 3.58 ohms at 400 cps. Field dissipation: 9 watts max., 5 watts min. Cadmium plated finish. Shpg. wt. 5 lbs.

YW19160
Your Cost..... **\$3.09**

A.C. Field Supply

Operates from any 110 volt A.C. supply. Will deliver 10 watts to any 2,500 ohms speaker. Uses single 2525 tube. 8 3/4 x 2 1/2 x 1 1/2". Shpg. wt. 4 lbs. Less tube.

YW19162
Your Cost..... **\$2.30**

Permanent Magnet Dynamic

A high grade scientifically constructed dynamic speaker. Requires no field excitation. Designed for use in battery sets, auto sets, or where no A.C. or D.C. is available. Comparable with large regularly field excited dynamics. Uses special cobalt steel magnet. Cone 8" dia. Shpg. wt. 12 lbs.

YW19135—Your Cost..... **\$6.65**
YW19134—Same as above, but with 6" cone. Will handle large output. Shpg. wt. 5 lbs. **\$3.70**
Your Cost.....

ROLA Speakers

F4—5" Dynamic

For use in mid-gate receivers. Frequency response exceptionally fine. Has standard 3,000 ohm field. Shpg. wt. 3 lbs.

YW19115 For Single 45, 71A.
YW19116 For Single 43.
YW19117 For Single 47, 2A5.

Your Cost, Any Type..... **\$2.45**

Type F5B 6" Dynamic

Similar to above, but 6" diam. 2,500 ohm field. Shpg. wt. 4 lbs.

YW19118 For Single 45, 50.
YW19313 For P.P. 45, 50.
YW19314 For Single 47, 2A5.
YW19315 For P.P. 47, 42.

Your Cost, Any Type..... **\$2.95**

K10—10" Dynamic

Will handle 6 watts. Has 2,500 ohm field. Shpg. wt. 12 lbs.

YW19338 For Single 45, 50.
YW19339 For P.P. 45 or 50.
YW19340 For Single 47, 2A5, 46.
YW19341 For P.P. 47, 2A5, 46.

Your Cost Each, Any Type..... **\$4.45**

Type K12 12"

Handle 10 watts. Shpg. wt. 13 lbs.

YW19343 For P.P. 45, 50.
YW19344 For Single 47, 2A5.
YW19345 For P.P. 47, 2A5.

Your Cost Each, Any Type..... **\$5.45**

Type F8 8" Dynamic

Similar to the F5 in construction and appearance, but 8" in dia. Will handle more power, has better response. Shpg. wt. 6 lbs.

YW19316 For Single 45, 50.

YW19317 For P.P. 45 or 50.
YW19318 For Single 47, 2A5.
YW19319 For P.P. 47, 42.

Your Cost Each, Any Type..... **\$3.45**

Permanent Magnetic Speaker

Type PM-5, Equal to the finest electro-magnet energized type. Employs dome center shield. Corrugated cone. Outside diameter 8 1/2". Shpg. wt. 9 lbs.

YW19346 P.P. 45, 50.
YW19347 P.P. 46, 47, 2A5.

Your Cost Each, Any Type..... **\$6.70**
YW19348 Type PM-6. Same as above, but 6" outside dia. P.P. 45's. **\$5.75**
Your Cost.....

RACON Cone Units and Trumpets

RACON High Quality Dynamic Speaker Units

Giant Unit

A powerful Dynamic Unit especially designed for use with trumpet type horns. Handles 20 watts continuously or 50 watts peak. Has 15 ohm voice coil and requires 6-8 volts at 1.1 amps. for field excitation. Has threaded collar for attaching horn or the triple connector described below. Shpg. wt. 26 lbs.

Less transformer.
YW19265—Your Cost Each..... **\$32.34**

RACON Master Unit

Similar in appearance to the above unit. Continuous operating capacity 20 watts, peak 50 watts. 15 ohm voice coil; 6-8 volts at 1.1 amps. field current. Shpg. wt. 18 lbs. Less coupling transformer.

YW19266—Your Cost..... **\$25.87**

RACON Baby

Continuous operating capacity 5 to 7 1/2 watts; peak capacity 20 watts. Voice coil 15 ohms. Field current, 6 volts at 1 1/2 amps. Shpg. wt. 9 lbs. Complete, less Coupling Transformer.

YW19258 List \$27.50
Your Cost Each..... **\$16.17**

RACON Super Giant

Particularly adapted for theatre and auditorium. 6 to 8-volt field excitation. 1.1 ampere consumption at 6 volts 15-ohm voice coil impedance. Continuous operating capacity 25 watts. Peak load capacity 50 watts.

Shpg. wt. 20 lbs.
YY19754—Your Cost..... **\$38.80**

RACON Trumpets

Made of fabric, impregnated and hardened.

3 1/2 Ft. Trumpets Bell 22" Round

De Luxe Model. Equipped with metal beaded edge, cast aluminum ferrule and suspension ring. For indoor or temporary outdoor use. Shpg. wt. 17 lbs. List \$27.50

Quality Speakers FOR EVERY REQUIREMENT

UTAH Orthovox Speakers

Orthovox speakers employ a permanent magnetic field, and in reproducing qualities compare with the best speakers in use. They are especially adaptable where field current is difficult to provide, such as a battery operated and portable receiver. Employs a three point anchorage of motor unit to frame, and will give reliable service even under extreme atmospheric conditions. No matching transformer required, present types available are designed to operate with tubes listed. Available in 5", 6½" and 8" overall sizes.

High Impedance Speakers

Designed to work into any single or push-pull output stage having a total primary load impedance of from 12,000 to 18,000 ohms, i.e.: push-pull stages using following tubes: 10, 12A, 18, 19, 20, 31, 33, 38, 41, 42, 46, 47, 79, 59, 89, 2A5, 6A4, LA, 5A6. Single tube power stage using 38, 49 and 12A7.

Stock No.	Dia.	Power Cap.	Shpg. Wt.	Your Cost
YW19326	5"	1½ w. 6		\$1.95
YW19327	6½"	2 w. 7		2.05
YW19328	8"	3½ w. 9		2.35
YW19329	12"	6 w. 11		3.50

Medium Impedance Speakers

For tubes of the following types—in push-pull: 43, 46, 71A. Single tube output stages using the following tubes—10, 12, 18, 19, 20, 31, 33, 38, 41, 42, 43, 46, 47, 49, 59, 89, 2A5, LA, GA, and PZ. Or, for any type of output tube in single or push-pull operation, having a total primary load impedance of from 7000 to 12000 ohms.

Stock No.	Dia.	Power Cap.	Shpg. Wt.	Your Cost
YW19334	5"	1½ w. 6		\$1.95
YW19335	6½"	2 w. 7		2.05
YW19336	8"	3½ w. 9		2.35
YW19337	12"	6 w. 11		3.50

Balanced Armature Magnetic Speakers

Employ unusually powerful magnets, and balanced armatures. Highly sensitive and will handle considerable volume without rattling. Wide frequency range. Available in chassis form or in walnut finished cabinets having scroll grill front and back, and provided with 6 foot two conductor flexible cord.

Speaker Chassis Only

Special 9½" Dynamic

A fine quality speaker that will afford excellent tone quality and frequency response. Supplied with either 1000, 1800 or 2500 ohm field. Transformer supplied for single or P.P. 45, 46, 47, 48, 2A5, 2A3, 59, 79, or 50 output tubes. Specify Type Transformer and Field Coil when ordering. Shpg. wt. 6 lbs.

YW19120—9½" Dynamic Speaker
Your Cost, Special **\$2.45**

A.C.-D.C. Compact

Dynamic Speaker 5 Inch Model

Especially designed for use in Universal midgets. Has standard 3000 ohm field and is furnished with transformer for single 38 or 43 tube. Size 5x4¼x2½". Shpg. wt. 5 lbs.
YW19293—Your Cost **\$1.35**

Special 6" Dynamic Speaker

A real bargain in speakers. This midget dynamic is exceptionally well constructed and shows a fine frequency response. Tone quality is full and natural, with both highs and lows faithfully reproduced. Has a standard 1800 ohm field coil. Employs ridged pressed paper cone with scientifically designed spider. All metal parts finished in bright cadmium plate. Shpg. wt. 4 lbs.

YW19131—Less Output Transformer **95¢**
Your Cost, Special **\$1.39**
YW19124—With Output Transformer for Single 47 or 2A5. Your Cost, Special **\$1.39**

11" Class "B" Dynamic Speaker

Designed for use with P.A. and other high power installations. Finest materials used in its construction. Oversized field coil has standard 2500 ohms resistance. Output transformer of Universal type, to match any power tube, or any push-pull arrangement of power tubes. Size 11" wide, 6¾" deep, 11½" high. A really large speaker that will carry considerable power. Black crystalline finish on all metal parts prevents rust. Shpg. wt. 17 lbs.

YW19288—Your Cost **\$4.70**

8½" A.C.-D.C. Dynamic Speakers

These speakers will handle a continuous output of 6 watts. Finished in bright cadmium plate. A.C. model has built in field supply using a type 80 tube. D.C. model has a standard 2500 ohm field. Universal output transformer for any type power tube, whether single or in push-pull. Shpg. wt. 15 lbs.

YW19291—A.C. model, less tube **\$5.35**
Your Cost **\$5.35**
YW19292—D.C. model. Your Cost **\$2.75**

11" Junior Model

For use in large consoles, and small or medium-sized amplifiers. Has excellent frequency response. Will handle large outputs without distortion. Field resistance 2,500 ohms. Furnished with Universal Output Transformer for any power tube. All metal parts cadmium plated. Shpg. wt. 13 lbs.

YW19230—Your Cost **\$3.40**

Special 6" Midget Model—Dynamic

Furnished with universal output transformer to match any existing types of output tubes. Specify type desired when ordering. Finished in cadmium plate. Shpg. wt. 8 lbs.

YW19166—2500 ohms.
YW19122—6-volt field for Auto sets.
YW19109—1800 ohms, tapped at 300.
Your Cost, Either Type **\$1.75**

Gloritone 6½" Speaker

Replacement speaker for the Gloritone receiver. Has 11,500 ohm field tapped at 9,040 ohms. Equipped with transformer for single 45 tube. 6½" diameter. Shpg. wt. 8 lbs.

YW19123—Your Cost, Special **\$2.95**
YW19112—Same 6½" diameter **\$3.75**
Your Cost, Special **\$3.75**

BBL Magnetic Speaker

One of the finest magnetic speakers available. Will handle large output without rattling or distorting. Reproduces the entire tonal range with remarkable fidelity. Has impedance of 7000 ohms at 1000 cycles. D.C. resistance 1000 ohms. Cone dia. 9¼". Shpg. wt. 7 lbs.

YW19133—Your Cost **\$2.38**
The above speaker is available in the handsome walnut cabinet shown above. Cabinet has paneled front with dull gold grille cloth. Excellent as an extension speaker or in hotels, etc. Size 13x11x7½". Shpg. wt. 9 lbs.
YW19177—Your Cost **\$3.98**

ELECTROPHONE H. F. "Crystal" Speaker

A highly efficient high frequency speaker that requires no field current—no filter system—and can be connected directly to the voice coil terminals of any dynamic speaker. The diaphragm of this speaker consists of four crystals that will respond to frequencies over 1600 cycles. A coupling transformer to couple the speaker to any existing voice coil leads is included. Short flare horn is of moulded bakelite 5" long with bell 3½" dia. Length of speaker overall 7¼". Shpg. wt. 5 lbs.

YW19278—Electrophone Crystal Speaker **\$27.50**
Your Cost **\$27.50**

Celotex Speaker Baffles

Any size hole can be had, to your specifications at no additional cost. When ordering specify size hole desired. Shpg. wt. 2¼ lbs. per sq. ft.

We can supply any RCA-Victor part at a discount of 40% from the list price.

Midget Phono-Motor and Pick-up Assembly

The motor is for operation on 110 volts, 60 cycles A.C., and measures only 7" in diameter and 2 1/4" deep. Synchronous type, 78 R.P.M., but not self-starting. The pick-up unit measures only 6 3/4" from needle screw to tip of arm. Fully as efficient as larger pick-ups. Impedance of coil is 2500 ohms. Comes complete with head, arm and connecting cable.

YA355—Motor. Shpg. wt. 7 lbs. **\$4.80**

YA356—Midget Pick-Up. Shpg. wt. 2 lbs.

Your Cost... **\$3.00**

Phonograph Modernization Kit

Includes: 7 ohm pick-up, arm, 20,000 ohm volume control, input transformer. Transformer and volume control include compensation for improv-

ing quality on low volume. Pick-up counter-balanced type. RCA No. 11080.

YA134—List **\$13.10**

Your Cost... **\$7.86**

Home Recording Blanks Double Faced Type

Designed primarily for experimental use, these records will afford fine recordings. Of flexible composition, double faced. To be played back with RCA-Victor Home Recording Needles or similar types.

YA381—5" Blanks. Package of Four. **67¢**

YA382—10" Blanks. Package of Two. **67¢**

YA383—12" Blanks. **67¢**

Your Cost Each

Orthophonic Sound Box

Will improve the tone and volume of any Victrolas now in use. Has a ribbed aluminum diaphragm that provides a more extensive frequency response than the old types. Universal fitting; replaces units on all Victrolas with the exception of the model 2-35 which requires a special adapter. Genuine RCA Part No. 6927, dull bronze finish. Shpg. wt. 1 lb.

YA350—Your Cost... **\$2.70**

Drive Spring for Victor

Victrolas

Two types available. Part No. 8656 will fit Victor Portable and Table Models 2-65, 2-30, 1-90, 2-55, 2-60, T-90, 2-25, and 7-11 and V-30. Part No. 10148 is used in the Victor Models 4-40, 4-20, 7-10, 7-25, 7-30, 8-9, 8-36 and 8-8. Shpg. wt. 2 lbs.

YA393—Part No. 8656. **69¢**

YA394—Part No. 10148. **69¢**

Your Cost Each

Phono-Matching Transformers

Part No. 6058—Used in RCA Model 67. Matches 48.5 ohm pick-up to grid of tube. Shpg. wt. 2 lbs.

YC1630—Your Cost **\$3.51**

Part No. 6226—Used in Models RE-20 and CE-29. Matches 20 ohm pick-up to grid. Shpg. wt. 2 lbs.

YC1631—Your Cost **\$1.65**

Part No. 6238—For models RE-18 and RE-18A. Matches 20 ohm pick-up to grid of tube. Shpg. wt. 2 lbs.

YC1632—Your Cost **\$1.44**

Part No. 7445—For Models PT-33 and RE-19. Matches a 12.7 ohm pick-up to grid of tube. Shpg. wt. 2 lbs.

YC1634—Your Cost **\$1.68**

Part No. 7083—For Models T-5, RE-57, RE-16, RE-16A, R-86,

RAE-68, and R-73. Matches 20 ohm pick-up to grid. Shpg. wt. 2 lbs.

YC1633—Your Cost **\$3.00**

Part No. 7632—For Model 331. Also contains one reactor, two capacitors and two resistors in the container. Matches 28 ohm pick-up to grid. Shpg. wt. 3 lbs.

YC1635—Your Cost **\$3.27**

Part No. 5948—For Model R-47. Matches a 200 ohm pick-up. Shpg. wt. 3 lbs.

YC1641—Your Cost **\$3.24**

Phonograph Oscillator

This unit, the Model EK-24 is a small broadcast band oscillator. It may be used with any standard receiver. Solves most difficult problems in phonograph modernization work. No chassis wiring changes are necessary. One tube is used; a 2A7 with sets using 2.5 volt tubes; a 6A7 with sets using 6.3 volt tubes. All parts mounted on a cadmium plated metal chassis. Shpg. wt. 6 lbs.

YK10599—RK-24 Phonograph Oscillator, less tube **\$4.65**

Your Cost

RCA Phono Needles

STEEL

Available in Half Tone, Full Tone and Extra Large Tone. Half Tone needles packed 75 to envelope; others 100 to envelope. Specify type desired.

YA154—Your Cost per Envelope **10¢**

CHROMIUM

Semi-permanent needles. Available for use with 78 R.P.M. recordings (green shank) and for 33 1/3 R.P.M. recordings (orange shank).

YA155—Orange (33 1/3 R.P.M.)

YA357—Green (78 R.P.M.)

Package of Six **1.08**

TUNGSTONE

Also semi-permanent type. Available in Full Tone and Extra Loud Tone sizes. Packed 8 to a container.

YA157—Extra Loud Tone

YA158—Full Tone

Your Cost, Either Type **18¢**

Container of 8 **1.44**

Record Player Model R-93

A small electric motor and magnetic pick-up assembly housed in an attractive walnut finished cabinet measuring 10 1/2" long, 8" wide and 5" high. May be used in conjunction with any radio receiver (A.C.). Plays either 10" or 12" standard records. Motor is induction type, hand starting. Volume control is built in. Phono-radio Switch included. Shpg. wt. 10 lbs.

YA104—Your Cost **\$9.90**

Two Speed Turntable

Used with models RE-81, RE-80, RE-40, 310 and 330. Part No. 8948. For other phono-motors. Ball race speed reducer. Felt top cover. Shpg. wt. 5 lbs.

YA116—Your Cost Each... **\$3.30**

Shift Lever for above.

YA115—Your Cost Each... **59¢**

Victor Technical Purpose Records

An aid to all service engineers. Many types available in frequencies from 30 to 10,000 cycles. Also constant volume and aural test discs. If interested, write for detailed information.

Y123—12" Single face. Variable from 30 to 10,000 cycles. RCA Part No. XL101. **\$1.25**

Your Cost

We Will Not Knowingly Be Undersold

PHONO-MOTORS • Record Changers & ACCESSORIES

PACKARD Record Changer

Sturdy construction, simple to operate. Uses powerful two speed motor that plays either 78 or 33 1/2 R.P.M. records. Plays eight 10" records automatically, repeating or rejecting any record at will. Plays 12" records manually. Last record repeats until switch is turned off. Uses new Piezo Crystal high impedance pick-up. Entire unit built of copper plated steel, with all exposed parts finished in stately bronze. Requires space 17 1/2" long, 5 1/2" high and 13 1/2" wide. For 110 volts, 60 cycles A.C. Shpg. wt. 30 lbs.

YY19820
Your Cost **\$27.81**

YY21050—For 110 V., A.C. or D.C. Your Cost \$32.75

MODEL L

Same as above, but plays both 10 and 12-inch records automatically. Available for all types of current. Shpg. wt. 32 lbs.

Y S17754—110 V., 60 cycles, A.C. \$32.45

Y S17764—For 6 V., D.C. 37.70

Y Y21053—Universal Type, 110 V., A.C. or D.C. 33.39

Y S17768—Portable Case for all types—Your Cost 4.75

CAPEHART Dual Speed Automatic Record Changer

Latest Model
19-12C-2

Equipped with the new balanced electrical pick-up. Excellent device for the home, public address systems, etc. Using ten long playing Victor records you can listen to four hours of music without a stop. Completely automatic, last record repeats until re-stacked or when master switch is turned off. An encore may be had of any record. Additional equipment includes a reject device and unloading lever. Can be mounted in your own cabinet, or in our Deluxe Cabinet, made expressly for the accommodation of this mechanism. Base, 14 1/2 x 14 1/2". Height above mounting board, 7 1/4"; depth below 3 1/4". Shpg. wt. 30 lbs.

Y S17750—Mechanism complete, less cabinet. **\$59.50**
Your Cost

Thutest Scratch Filter

Eliminates needle scratch. Filters out the noise frequencies. Has tip jacks on input side, binding posts on output side. Can be used with any phono-radio. Shpg. wt. 3 lbs.

YA118—Your Cost... **\$1.75**

Dual Speed Adapter

Can be attached to any phono-motor, in place of turntable. Lever selects either 78 or 33 1/2 R.P.M. speeds. Disc is 12" in diameter; will accommodate all records. Shpg. wt. 7 lbs.

YY19893—Your Cost **\$3.53**

Stroboscope

Calibrated for 33 1/2 and 78 R. P. M. and for 25-50 and 60 cycles. Dia. 6". With full instructions.

YA137—Your Cost... **15¢**

GREEN FLYER Governor Controlled

Two Speed Motor
33 1/2 or 78
R. P. M.
for A.C. or D.C.
Operation

May be adjusted for either 78 or 33 1/2 R.P.M. records. Gears are completely enclosed and run in oil. Silent laminated bakelite spiral cut gears. Overized, self-lubricated bearings. Will not overheat in closed cabinet. 10" turntable. Has dial and pointer. Hardware bronze finished. Automatic stop available at slight extra cost. Shpg. wt. 15 lbs.

YA100—Two Speed 110 Volt, 50-60 cycle A.C. **\$9.41**

YA102—Single Speed 78 R.P.M. Motor. **\$7.35**

YA101—Single Speed. For 110 Volt, D.C. Your Cost \$7.35

Special 6 Volt Motors

Same quality as above, but for 6 Volt operation. Especially designed for sound truck installations. Will stand hard usage without giving trouble. Complete with 10" turntable. Shpg. wt. 15 lbs.

YA127—Two Speed. **\$13.82**

YA128—Single Speed, 78 R.P.M., 6 Volt operation. **\$12.35**

Your Cost

Special Recording Motor, Dual Speed

Similar specifications to Model YA100 but field and rotor are 1/2" longer and motor is much more powerful. Special Green Flyer governor keeps speed constant under varying load conditions. Complete with 12" turntable. Shpg. wt. 15 lbs.

YA120—For 105-120 Volts, 50-60 Cycle A.C. **\$10.44**

Your Cost

Universal A.C.-D.C. Motor

Operates equally well on 110 Volts A.C. or D.C. Silent in operation, with unvarying speed. Complete with 10" turntable and automatic stop. All metal parts rust proofed. For 78 R.P.M. records only. Shpg. wt. 11 lbs.

YA126—Your Cost. **\$11.47**

Add 30c to any of above prices if a 12" turntable is desired.

Motors for other voltages supplied at an additional 95c.

New Lightweight 110 V. 60 Cycle Phono Motor

Extremely light and compact induction type phonograph motor. Self-starting, employing repulsion principle with centrifugal switch for start. Gear housing and brackets made from cast aluminum. Oil cup mounted on main bearing and easily accessible. Ruggedly made and exceptionally powerful motor. Supplied complete with 12" turntable. Shpg. wt. 6 lbs.

YA166—Motor & Turntable

Your Cost **\$5.95**

Automatic Stop

Fully adjustable. Mounts under any turntable. Heavy duty type, will last indefinitely.

YA138—Your Cost. **60¢**

Needle Cups

For phono or phono-radio combinations. Also good for replacing old tarnished cups. Bronze finish. Dia. 1 1/4".

A130—Open Type **5¢**

Lafayette

2-Speed Electric Portable

Finest portable outfit obtainable. Uses genuine 2-speed Green Flyer motor. Either 78 or 33 1/2 R.P.M. speeds selected by a shift lever. Includes New Webster High-Fidelity (hi-impedance) pick-up, with built-in volume control. Sturdily built Fabricoid case. Size 17 1/2 x 13 1/2 x 8". Shpg. wt. 25 lbs.

Y Y22031—110 V., 60 cycles, A.C. **\$23.95**

Y Y22013—Same as above, but with Piezo Crystal Pick-Up. Provides exceptionally fine reproduction. **\$25.95**

Your Cost

Y Y21057—With 2-speed 6 V. D.C. motor and crystal Pick-up. **\$28.95**

Your Cost

Smallest and most efficient compact portable yet devised. Contains a genuine RCA synchronous phono motor, for 110 V., 60 cycles, A.C. operation, which will maintain a constant speed of 78 R.P.M. Also includes the new RCA lightweight pick-up which affords good quality reproduction, and volume control conveniently located. Mounted in an attractive brown leatherette finish case measuring 10 1/2 x 8 x 4 1/4". Will play records as large as 12". Weighs slightly less than 7 lbs. Ideal for attaching to radio receivers for phono reproduction, and for portable and mobile P.A. installations. Shpg. wt. 10 lbs.

YY21054—Your Cost **\$9.45**

Hey Fellers!!

MEET THE GANG AT WHOLESALE TWO DOZEN LADS TRUE AND STRONG

THE quality of an organization's personnel is indicative of the quality of its service. At Wholesale Radio Service Company, 24 experienced amateur radio operators comprise that section of our organization known as the Amateur Radio Division. It is a body of men such as this which, standing behind the scenes, enables amateurs everywhere to obtain real service—guaranteed material—and helpful advice whenever they call upon us.

*Chief Engineer Transmitting Division—Lafayette Mfg. Co., Inventor of the "Les-Tet" harmonic oscillator. Author of many technical articles for amateur radio magazines.

WRITE FOR FREE COPY OF COMPLETE "HAM" CATALOG

Lafayette 30 Watt C.W. and PHONE TRANSMITTER

A "Professional" Rig for the "Ham"

For the amateur demanding a moderate powered transmitter at a reasonable price, Lafayette engineers have developed this new 30 watt PB46A Transmitter. This unit incorporates the well known "Les-Tet" harmonic oscillator as the exciter; it uses a circuit employing a type 56 and a 53, and has proven entirely satisfactory with regard to cost of operation, power output, etc. Exhaustive laboratory tests, covering voltage and current measurements, air tests and life tests have more than justified every claim made.

Conservatively Rated Output

The Lafayette PB46A Transmitter has a conservatively rated output of 30 watts. The laboratory has actually put 45 watts into a 100 ohm non-inductive dummy antenna on the 160, 80 and 40 meter bands. On the 20 meter band the output dropped to 37 watts. These measurements were taken with an input of 60 watts into the 46's. For phone use a modulator consisting of a four stage amplifier is employed, and is designed to be used with a crystal microphone requiring no additional pre-amplifier. It has a frequency response plus or minus 1 1/2 db. from 60 to 17,000 cycles.

Separate Self-Contained Power Supplies

Separate self-contained power supplies are contained in each unit. The power supply for the R.F. unit uses an 83 tube and a single choke—dual condenser filter and furnishes a maximum of 600 volts. The modulator built-in power supply is especially designed for good regulation under varying load prevailing in Class "B" circuits. It also uses a 83 mercury vapor rectifier.

Antenna Coupling Unit

The PB46A Transmitter includes an antenna coupling or tuning unit with two variable condensers, a series-parallel change-over switch, with a neutral position, and a Triplett thermo-couple ammeter having an accuracy of 2%. The series-parallel switch connects each condenser in series with a feeder or one condenser in parallel with the antenna coupling coil. Neutral position permits tuning of final amplifier for minimum plate current with antenna load disconnected.

Can Be Purchased One Unit at a Time

Each unit comprising the Model PB46A Transmitter may be purchased separately. In this manner, the amateur is enabled to "go on the air" immediately by purchasing the R.F. unit alone (it contains its own power supply). Naturally, he can only transmit C.W. signals with this equipment, but it is a simple matter, at some later date, to add the modulator unit to form a highly efficient C.W. and Phone transmitter. For still better results, the antenna coupling unit may then be added.

New Cabinet Racks

All units are mounted on standard 19" rack panels in black crystalline lacquer. Chassis are of bright cadmium plated steel. Standard racks for floor or table mounting are available. A special enclosed type cabinet rack has been developed which is equipped with a rear door for access to the tubes, coils, etc. Louvres are provided for ventilation. The amateur will find these cabinet racks very satisfactory; "professional" in appearance. They are available in one, two and three unit size.

Finest Quality Components

While it is true that appearance was considered to be of importance in the design of this transmitter, the most important consideration, namely the inherent quality of the components, was kept foremost. That is why you will find such fine quality parts as Hammarlund variable condensers, Cornell Dubilier fixed condensers, Triplett bakelite cased meters, etc., in this new Transmitter. The workmanship is of the finest and each individual transmitter is carefully checked for output on both dummy and regular antennas, for modulation on an oscillograph and an audio oscillator, and for performance by actually putting it on the air.

There is no guess work when you purchase a Lafayette Transmitter—every bug has been taken out of it. Full instructions are supplied with each unit so that within only a few minutes after uncrating it and making a few tuning adjustments you are on the air with a sharp, crystal-controlled C.W. signal that cuts through QRM like a knife, or a phone signal modulated 100% with tone quality that would do justice to the finest broadcast transmitter. Each of the three units comprising the Lafayette PB46A Transmitter are described below.

Model PB46A Phone Transmitter

Illustrated to the left is the complete Lafayette PB46A Transmitter consisting of the 46A Antenna Coupling Unit (1), the P46 R.F. Transmitter Unit (2), and the B46 Speech Amplifier Modulator Unit (3). Housed in a three deck Metal Cabinet Rack, with one set of coils for 160, 80, 40 or 20 meter bands. (Specify band desired). Crystal, tubes, microphone and key extra. 19x26 1/4 x 13". Shpg. wt. 125 lbs.

Model PB46A—Radiophone Transmitter as described above.
Your Cost **\$116.50**
YN13969—Extra set of coils for 160, 80, 40 or 20 meter bands.
Your Cost, Per Set \$3.50
Complete Kit of tubes 6.00

Model PB46 Radiophone

Consists of the P46 R.F. Unit (2) and B46 Modulator Unit (3) in two deck Cabinet Rack. Same as PB46A but without the antenna coupling unit (1). With one set of coils for 160, 80, 40 or 20 meter bands. Specify band desired. Crystal, tubes, microphone and key extra. Dimensions 19x17 1/4 x 13". Shpg. wt. 105 lbs.

Model PB46—30 Watt Lafayette Radiophone as described above.
Your Cost **\$94.50**
YN13969—Extra set of coils for 160, 80, 40 or 20 meter bands.
Your Cost, Per Set \$3.50
Complete Kit of tubes 6.00

Lafayette P46 C. W. Transmitter

The model P46 30 Watt Crystal-Controlled C.W. Transmitter uses the "Les-Tet" harmonic oscillator (using a 56 as oscillator and a 53 as a doubler or neutralized buffer stage) to excite a Class "C" stage with two 46's in parallel. These 46's are entirely isolated (by efficient shielding) from the buffer stage. The oscillator, buffer and amplifier tuning condensers, 0-25 Mil. amplifier grid or oscillator plate current meter and 0-150 Mil. buffer or amplifier plate current meter are mounted on the panel. The P46 is supplied less cabinet but with a complete set of coils for either 160, 80, 40, or 20 meter bands. State band when ordering. Panel dimensions 19x8 3/4" high. Dimensions of chassis: 17x11".

Model P46—Lafayette C.W. 30 Watt Transmitter complete with one set of coils, less cabinet, tubes and crystal. Shpg. wt. 38 lbs.
Your Cost **\$49.50**
YY22194—Single Unit Cabinet for above \$4.50
YN13969—
Extra coils for 160, 80, 40, or 20 meter bands per set **\$3.50**
Kit of tubes for the above \$2.80
YY13988—Mounted 160 or 80 Meter, X-cut Crystal. \$3.50
YN13563—Mounted 160 or 80 Meter, AT-cut Crystal. \$5.50
YN13989—Mounted 40 Meter, X-cut Crystal. \$4.50
YN13564—Mounted 40 Meter, AT-cut Crystal. \$9.25

Lafayette B46 Modulator

Designed especially for use with the P46 transmitter described above. Modulator uses four stages consisting of: a 57 pentode resistance coupled to a 56 triode followed by a 46 in Class "A" driving a pair of 46's in Class "B". Power output is 30 watts. Frequency response within plus or minus 1 1/2 db. from 60 to 17,000 c.p.s. Overall gain of 110 db.; ample for crystal microphone. Has special modulation transformer with output impedances of 4000, 6000, 8000 and 10,000 ohms and is designed to carry Class "C" plate current. The power supply is built into the unit; has excellent regulation characteristics—uses an 83 rectifier. A gain control and the 0-200 mil. meter (modulation indicator) are mounted on the front panel. Panel, of steel with bright cadmium plated finish, is standard 19" wide and is 8 3/4" high. Chassis measures 17x11x2 1/4". Shpg. wt. 40 lbs.

Model B46—Modulator, less tubes and cabinet.
Your Cost **\$39.50**
Complete Kit of tubes for above \$3.15
YY22194—Steel Cabinet for above Single Deck \$4.50
YY22193—Steel Cabinet Two Decks \$7.90
YY22192—Steel Cabinet Three Decks \$8.25

Lafayette 46A Antenna Coupler

Same as used with Complete PB46A, permits accurate tuning of antenna feeders. Natural position of series—parallel switch, tunes final amplifier for minimum plate current with antenna load disconnected. Standard rack panel—no cabinet. Shpg. wt. 10 lbs. **Your Cost** **\$19.95**

Lafayette HAM EQUIPMENT

"Les-tet" Junior X'mitter Kit

An efficient low power X-mitter which makes use of a 56 and a 59 in a specially designed circuit. It is crystal controlled, yet it is possible to use a 160 meter crystal on 40 meters with an output of from 2 to 3 watts (5 to 7 watts with same crystal on 80 meters; 7 to 10 watts on crystal frequency). Neutralization required only on crystal frequency. Jacks provided for connecting meter in oscillator plate or buffer cathode. Power supply is required which will deliver 600 volts at approximately 75 M.A. Full instructions furnished.

- YY22073**—"Les-tet" Junior X'mitter Kit with one set of coils (specify 160, 80, 40 or 20 meters), less tubes and less crystal. **\$9.95**
 Shpg. wt. 8 lbs.
Your Cost
- Kit of Tubes for above 1-56, 1-59. **Your Cost** \$1.13
YY22074—Extra Set of Coils. Specify crystal and output frequencies 160, 80, 40 or 20 meters. **Your Cost per Set** \$1.75
YY22072—Metal Cabinet for above. **Your Cost** 1.25
YY21941—Power Supply Kit. Output 600 volts at 75 M.A. Less tube. Shpg. wt. 15 lbs. **Your Cost** \$7.95
 Type 83 Tube for above Power Supply52

The "TROPHY WINNER" 3 S.W. KIT 3 Tube—A.C. For the D. X. Fan

A complete, easy to assemble kit for operation on 110 volts, 60 cycles, A.C. Uses 3 tubes (not including rectifier): a 58 in a stage of R.F. amplification; a 57 regenerative super-sensitive pentode detector; a 2A6 pentode power amplifier. Output approximately 3 watts. Panel and chassis of heavy gauge steel with black crackle lacquer finish. Special 3-winding coil used to couple R.F. and Detector stages. Regeneration is smooth, and tuning is accomplished by vernier dial having a fairly high reduction ratio. Circuit permits use of "hand spread" or standard circuit. Power Supply Kit includes all necessary parts—transformers, filter condensers—chokes—cables, etc. Shpg. wt. of Receiver Kit 5 lbs.; Power Pack Kit 8 lbs.

- YN13905**—"TROPHY 3" 3-tube A.C. kit of parts, with wiring diagram and complete instructions for assembly. **\$9.75**
Your Cost for kit, less coils, tubes and power supply
- YN13906**—Power supply kit less tube. **Your Cost** \$4.95
YN13907—Special coils covering from 6 to 200 meters. **Your Cost per Set** \$1.75
 Kit of matched tubes for receiver and power supply. **Your Cost** \$1.97
YN13985—Complete kit of parts with coils, power supply kit and tubes. **Your Cost** \$17.25
 Set wired in our laboratory. **\$2.50 additional**

The "Band Spread" Portable

A combined short wave receiver and monitor. Everything—receiver, batteries and coils housed inside the steel case. Two type 30 tubes are used as detector and audio amplifier. Regeneration is smooth and noiseless. Special "band spread" coils used are for the following amateur bands: 20, 40, 80 and 160 meters; for the following broadcast bands: 19, 25, 31 and 49 meters. In portable steel carrying case, size 8 3/4 x 6 1/2 x 5 1/4". Shpg. wt. 12 lbs. Complete Kit of parts, less tubes, coils and batteries.

YN13960—Your Cost **\$7.95**

- YN13962**—One Burgess 5308 "B" and one 2370 "A" batteries. **Your Cost** \$1.18
YN13961—Set of tubes (2-30's). **Your Cost** 80c
YN13963—Four Special Coils, Broadcast Bands.
YN13964—Four Special Coils, Ham Bands. **Your Cost, per Set of Four (Either Type)** **\$2.10**
 Set wired in our laboratory. **\$1.95 additional.**

Lafayette

100 Watt Transmitter

Uses "Les-Tet" Exciter Unit
 Uses "Suppressor Grid" Modulation

In addition to being the greatest dollar value in initial cost, this transmitter is also extremely economical to operate. It features 100% modulation with minimum of modulator equipment—it uses the new "Les-Tet" exciter or harmonic oscillator, employs a universal antenna impedance matching unit.

The entire unit is contained in a single rack; just plug into any 110 volt, 60 cycle source, connect key, mike and antenna, and a powerful transmitter is on the air. "Broadcast" quality, **140 Watts on C.W. and 35 Watts on "Phone"**. Complete control permitted by liberal use of meters which are permanently connected in required circuits. Comes complete with one set of coils (specify 80, 40 or 20 meter bands). Extra coils available. Crystal not included. Rack 16 1/4" deep, 19 1/4" wide and 72" high. Shpg. wt. 375 lbs.

- YN13992**—Lafayette 100 Watt Transmitter complete with one set of coils, but less, crystal, key, mike and tubes. **\$195.00**
Your Cost
- Kit of Tubes: 2—RK20, 1—56, 1—53, 1—57, 1—6B5, 4—83's, 1—5Z3. **Your Cost** \$35.25
YN13993—Extra Coils. Specify 80, 40 or 20 meter. **Your Cost** \$4.25
Coils for 160 Meter Operation on Special Order Only
YN13989—40 meter X-Cut Mounted Crystal. **Your Cost** \$4.50
YN13999—40 meter X-Cut Mounted Crystal. **Your Cost** \$5.50
YN13363—Crystal Microphone. Shpg. wt. 2 lbs. **Your Cost** \$13.23

(A) Antenna Coupling Unit

Permits accurate impedance match so that maximum transfer of power is realized. Rack panel, 19x8 3/4". Shpg. wt. 10 lbs.

YQ15990—**\$29.75**
Your Cost

(B) P.P. RK20 Amplifier
 Change-over switch for C.W. or 'Phone. Meters accurate to within 2% provided for grid, plate and screen measurements. Isolantite sockets and Cardwell condensers. Panel 19x14". Shpg. wt. 25 lbs.

YP15921—Amplifier with 1 Set of Coils (80, 40 or 20 meters). Specify band desired.

Your Cost **\$39.50**
 Extra Set of Coils. Specify band desired.

Your Cost \$3.00

(C) Exciter Unit

New "Les-Tet" unit using a 56-53 combination that serves both as crystal oscillator and buffer or doubler. Between 7 and 10 Watts output. Plug-in coils for 80, 40 or 20 meter bands. Rack panel 19x8 3/4". Shpg. wt. 20 lbs.

YN13994—Exciter Unit with one set of Coils (specify band desired), less crystal.

Your Cost **\$29.75**

Extra coils, per set.

YN13850—Your Cost **\$1.75**

(D) Modulator Unit

Provides 100% modulation. Excellent frequency response. Particularly designed for use with crystal mike. Uses a 57, 6B5 and 5Z3 rectifier. Output transformer for use with RK20 suppressors. Meter for modulation indicator. Rack panel 19x8 3/4". Shpg. wt. 25 lbs.

YN13995—Modulator, less tubes.

Your Cost **\$24.75**

(E) Power Supply

Uses 4 type 83 rectifiers in a bridge circuit. Separate filament transformer. Separate switch and pilot light for plate and filament transformer primaries. No electrolytic condensers used. Bleeders provided. Rack panel 19x8 3/4". Shpg. wt. 60 lbs.

YN13996—Power Supply, less tubes.

Your Cost **\$54.50**

All panel units in a sturdy metal rack make up the Lafayette 100 Watt Transmitter.

Lafayette HIGH FREQUENCY Apparatus

A 2½ or 5 Meter Super-Regenerative Receiver

- * Highly Sensitive—Low Hiss
- * Electron-Coupled Detector
- * A.C. or Battery Operation

tuning coil. For five meter work the coil consists of 7 turns of No. 12 bare copper wire (tinned bus bar is excellent) wound around a ¼" form, and slipped off. Spacing between turns should be about ¼". The cathode tap is two to four turns from the grounded end depending upon the particular tube used. The antenna tap is a matter of experiment, but as a starter it should be made to the cathode connection of the coil. For two and a half meters the coil consists of four turns of No. 12 wire wound in the same manner as the larger coil.

CHOICE OF TUBES

The detector may be either a 56 or 76, the audio amplifier a 2A5 or a 42. The 76-42 combination is recommended since the heaters work on 6.3 volts and the finished receiver may be used with only a slight change on either A.C. or on batteries for mobile operation. It is a good idea to try

more than one detector tube of the same number. Some tubes are noticeably better super-regenerators than others and give much better results. Different leaks should also be tried.

In operation, this receiver will produce a strong hiss which will drop in intensity considerably or disappear entirely when a station is tuned in. The .005 mf. fixed condenser between the plate of the output tube and ground will help to reduce the noise. Because of the complete shielding, this receiver lends itself nicely to duplex operation. Almost any kind of antenna will work, although the best results will be obtained with a half-wave vertical antenna as high and clear as possible.

Parts for this receiver are supplied in Kit form, which includes black lacquered cabinet, 8¼x6½x6½", with handle.

YY21946—Complete Kit of Parts including Case and Chassis, less Power Supply, Tubes and Speaker. Detailed instructions included. Shpg. wt. 20 lbs.

Your Cost..... **\$7.95**

Completely wired for 5 meter operation (extra)..... \$1.25

YY21947—Power Supply Kit (for use with 6.3 volt tubes) less tube. Measures 6x10¼x1¼". Shpg. wt. 10 lbs.

Your Cost..... **\$5.25**

Completely wired for use (extra)..... \$1.25

A "Mobile" 5 Meter Transmitter

- * 100% Modulation
- * 5 to 7 Watts Output
- * Class "A" Amplification
- * Can be Operated on 110 Volts A.C.
- * Uses New 6E6 Twin Triode as P.P. Oscillator

Designed to meet the demand for a fairly powerful high frequency transmitter that will operate from a 6 volt automobile battery, this new Lafayette "Mobile" 5 meter transmitter incorporates many new and desirable features.

The circuit has been designed using the new type 6E6 Twin Triode as a unity coupled Push-Pull oscillator

modulated by a single 42 tube; a type 76 is used as the speech amplifier. Due to the use of the 6E6, "drifting" has been reduced to a minimum and the plate efficiency greatly increased. Thus, a high percentage of modulation has been made possible using only one 42 as a modulator. The power output that can be obtained from this transmitter depends upon the power supply with which it is used. In the laboratory, using a standard Gen-E-Motor 300 volt, 100 milliamper generator (6 volt input), a full 7 watts was realized into a 500 ohm load. This amount of power is more than ample for the average "portable" high frequency station.

Low Current Drain

Due to the use of Class "A" amplification, the current drain is practically constant at all times, so that any converter will operate with 100% efficiency. This feature also eliminates the need for any special and expensive equipment (such as that necessary when class "B" amplification is employed).

Plug-in Type Tank Coil

Other circuit features include the use of a Mycalex socket for the 6E6 tube as well as for the base of the tank coil. Provisions for single or double button carbon microphone (200 ohms per button); jack for mike on rear of chassis. Tank coil is of the plug-in type so that changes for any future developments (possible 2½ or 10 meter operation) may be easily made.

Simple to Operate

Operation consists of tuning by means of the large indicator knob and calibrated scale on front panel, and adjusting volume with the noiseless gain control which is also operated by an indicator knob and calibrated scale. A jeweled pilot light is used to show when transmitter is turned on.

Entire unit is mounted on a steel chassis and housed in a completely closed cabinet. Finished in black crystalline lacquer. Overall size 8¼x8¼x7". Instructions included. Shpg. wt. 15 lbs.

YY21940—Lafayette "Mobile" 5 Meter Transmitter, complete in cabinet, less tubes and power supply **\$18.50**

Your Cost.....

Set of matched tubes: 1-6E6, 1-42, 1-76..... \$1.98

Don't fail to write for a FREE copy of the new 1936 "Ham" catalog to be released shortly. It will contain a complete listing of Amateur equipment at lowest prices.

2½ and 5 Meter Resonant Line Transmitters

- * Highly Efficient
- * Simple to Construct
- * Easy to Tune

The mechanical dimensions of tuning coils of conventional shape become so small on 5 and 2½ meters that it has been found advantageous in many cases to dispense with "coils" altogether, and to depend on the distributed capacity and inductance of rigid metal conductors. Oscillators of this type are commonly called "long lines" or "linear" and actually should be called

Resonant Line. A transmitter of this type is especially well suited for use on 2½ meters. The tube may be practically any triode; 45, 10, 801, etc. The rods connected to the grid and plate are approximately a half wave length long (46 to 48" for 2½ meters).

The actual wave length of oscillation depends on the length of the rods and the internal capacity of the tube. The grid and plate returns are connected through small R.F. chokes at the nodal points on the conductors which are each a half wave length long on 2.5 meters. The single tube circuit is not recommended on 5 meters because of the length of the rods which would have to be approximately 8 feet at this frequency.

It is necessary with a system of this kind to isolate the filament of the tube as far as the R.F. is concerned. This requires the use of series chokes in the filament circuit. Since the chokes must carry the full filament current they must be of heavy wire. Twenty-five turns of No. 14 wire space wound on a ½-inch diameter form should be sufficient. These chokes should be kept at right angles to the rods.

The antenna feeders are connected through a pair of fixed mica condensers to the plate rod, one each side of the nodal point. The clips are moved up and down until the desired degree of coupling is obtained. Untuned feeder lines may be connected in the same way by adjusting for the required impedance match.

A plate milliammeter is absolutely necessary if correct tuning is to be accomplished. It will indicate minimum current (with antenna feeders disconnected) when grid and plate shorting bars are correctly adjusted for oscillation. With the circuit oscillating properly, the feeders are then connected and gradually slid down the plate bars toward the plate end of the rods until correct current is being drawn from the tubes. A simple push-pull version of the Resonant Line oscillator is also available. The tubes, here again, may be triodes.

2.5 Meter Oscillator Kit

YY21948—Complete Kit of Parts for single tube oscillator including: 2 copper rods; 2 stand-off insulators; 1 ceramic socket; 2 R.F. chokes; 1 adjustable leak; 1 C.T. filament resistor; 2 fixed condensers; 5 Fahnestock clips; 10 feet No. 14 enameled wire. Shpg. wt. 10 lbs.

Your Cost..... **\$3.69**

5 Meter P.P. Oscillator Kit

YY21949—Complete Kit including: 1 special "LDS" Mycalex twin socket; 4 copper rods; 2 R.F. chokes; 1 adjustable leak; 6 sliders; 2 fixed condensers; 5 Fahnestock clips. Shpg. wt. 14 lbs. **\$6.95**

Lafayette 5 METER SUPERHETERODYNE RECEIVERS

A 5 Meter Superheterodyne Receiver Kit

Cabinet and Rack Panel Models

- ★ No Super-regenerative Rush
- ★ Increased Sensitivity
- ★ Improved Selectivity

A superheterodyne for 5 meter reception which the "ham" can build without much difficulty, and which will give superior results as far as sensitivity, selectivity and noise level are concerned. The absence of "rush", that noise characteristic of super-regenerative receivers, will especially appeal to amateurs accustomed to sets of the latter type.

Six tubes, exclusive of the power rectifier, are used in a circuit which comprises: a stage of tuned R.F., a tuned autodyne detector, two stages of resistance-capacity coupled I. F., second detector and semi-AVC tube, and a power pentode output stage capable of working a dynamic loud speaker. The entire unit can be built onto a compact, copperplated chassis measuring only 11x7½x2¼".

Circuit Data

To simplify the arrangement of the parts and to eliminate trimming and aligning difficulties, separate controls are provided for the R. F. and Detector stages. While the R. F. stage admittedly does not provide a great deal of amplification, it does improve the signal to noise ratio and, more important, it eliminates receiver re-radiation and dead spots in the detector tuning due to antenna absorption.

The first detector works on the autodyne principle, the grid circuit being detuned slightly from the signal frequency so that a comparatively low frequency beat develops. This simple method of obtaining heterodyne action is quite practicable on the ultra-high frequencies.

Feed back between the grid and plate of the first detector is obtained by the use of a small R. F. choke in the cathode circuit—a form of electron coupling. This choke is common to both the grid and the plate, therefore oscillation is maintained at a steady rate. The grid condenser-leak combination and the screen and plate voltages are adjusted to give smooth feed-back but not super-regeneration.

The use of resistance-capacity coupled I. F. greatly simplifies the construction of the receiver. There are no magnetic fields or interaction effects and shielding is therefore minimized. The grid coupling condensers are of such low value, comparatively, that the I. F. system does not amplify stray audio impulses. The I. F. circuit responds to frequencies from about 15 kilocycles to about 100 kilocycles.

Unique Second Detector

A type 41 tube, with screen and grid tied together to form a high Mu triode, is used as the second detector. Part of the rectified grid current is taken off the grid leak and returned to the grids of the I. F. tubes to give

AVC action and to prevent overloading on extremely strong signals. The second detector is resistance capacity coupled to a 42 pentode with the grid leak potentiometer of the latter acting as the volume control.

Coil Data

The coils for five meter operation consist of eight turns of No. 14 wire, ¼ inch diameter form, spaced about ¼ inch, and are self-supporting. Plug-in coils are supplied with the Kit. Various methods of coupling the antenna to the receiver can be tried. If a two-wire feeder system is used, it can be connected directly to the antenna coupling coil, or one feeder can be grounded and the other run up a turn or two on the R. F. grid coil. Single wire lines should be connected to the grid of the R. F. tube through a 10 to 30 mmfd. trimmer condenser.

A. C. or 6 Volt D. C. Operation

If the 6.3 volt tubes are used, (6D6 for R.F., 6C6 first detector, 6D6 for I. F., 41 second detector, 42 output) the receiver can be used interchangeably on A. C. or storage battery. The 2.5 volt series will also serve well for fixed service if the amateur owns a suitable power supply. The power supply should be well filtered.

Credit for the original design of this receiver belongs to Frank C. Jones of "Radio". Lafayette engineers have made several changes in design to greatly simplify construction.

YY2192—Complete Kit of Parts for the Receiver, including Cabinet and special copper-plated Chassis, but less power supply, tubes and speaker. Shpg. wt. 25 lbs. **\$18.25**

The Above Receiver Available Using The New Pentode 954 Acorn Tubes in The R. F. and Autodyne Detector Stages

★ Reduced Thermal Noises—Low Noise Level—Increased Sensitivity ★

Lafayette engineers have made available a 5 meter superheterodyne essentially the same as the one described above, but employing the newly released Acorn Pentode type 954 tubes in the R.F. and autodyne detector stages. Since the type 954 tubes were especially designed for use on ultra-high frequencies, they make possible several advantages not attainable with any other type of receiving tube.

Circuit Data

The circuit consists of a 954 Acorn Pentode in a tuned R.F. stage followed by a 954 Acorn Pentode as a tuned autodyne detector. Two 6D6 I.F., a 41 second detector and semi-AVC tube and a 42 output tube (same as in receiver above) complete the circuit. Due to the internal construction of the tubes, the 954's cause very little noise due to Thermal agitation. This feature results in an overall noise level which is practically negligible. In addition, both gain and sensitivity characteristics are superior to those afforded by other high frequency circuits.

Loud Speaker Reception

Ample gain is provided for the reception of all but the weakest signals on loud speaker. An output choke and condenser are included in the chassis so that high impedance phones or magnetic speaker can be directly connected. Any dynamic speaker furnishing its own field supply and which is equipped with the proper input transformer can also be used with excellent results.

Construction Details

The entire receiver is housed in a black crystalline finished metal cabinet

which presents a "professional" appearance. All component parts are mounted on a special copper plated chassis. The Acorn tube sockets are of genuine Mycalex (has lowest dielectric constant obtainable). The tank coil is of the plug-in type and has base of Mycalex (the coil is of the plug-in type so that future developments in the 10 and possibly 2½ meter bands will require a minimum of circuit changes). The dials employed are of a new type which are absolutely noiseless in operation; high reduction ratio is also provided. Complete tuning control obtained by means of the detector and oscillator dials, a noiseless A.F. gain control and a sensitivity control. Models for standard 19" rack panel mounting available. A completely assembled power supply, using an 80 rectifier tube, is also available in either standard or rack panel form. Overall size of Receiver 12x8x8"; Shpg. wt. 16 lbs.

Specially Designed Power Supply

A special power supply, designed for this particular receiver, is available in rack panel mounting style. Parts used in its construction are of the highest quality, insuring long and trouble free life. Heavy duty chokes and high voltage filter condensers (a wet electrolytic in the first filter section) provide absolutely humless output. Voltage regulation, due to the use of a well designed power transformer, is excellent. Power transformer is static shielded between primary and secondary windings. An 80 rectifier tube is employed. Switches on the front panel for primary and secondary control, so that tube filament can be warmed up before high voltage is applied to the plates. Jeweled pilot light indicators also on front panel show instantly when power supply is in "ON" position. Available in either standard, open type mounting or with rack panel for standard 19" rack. Size 10x7x6¾". Shpg. wt. 16 lbs.

Rack Panel Receiver

- YY21934**—Lafayette 5 meter "Acorn" Superhet Receiver as described above. Complete in cabinet, less tubes and power supply **\$26.50**

Lafayette TRANSCEIVERS and ACCESSORIES

KELLOGG Transceiver Set

100 ohm Mike requiring .025 amps. at 3 volts. Gold plated diaphragm. Carbon button thoroughly insulated from case with moulded bakelite. Super-sensitive 2000 ohm receiver with bi-polar cobalt steel magnets and bakelite cap. Receiver cap 2 1/4" diameter. Length of handset overall 9". Handle of cast aluminum. Equipped with 6 foot four-conductor moisture proof cord. Shpg. wt. 5 lbs.
YN13562
Your Cost \$6.47

Automatic Transceiver Set

High quality single button carbon mike (200 ohms), and a high impedance head phone in a bakelite hand set. French phone construction. Microphone extremely rugged to withstand hard usage. Has high power output resulting in a sensitivity which is unusual for this type of instrument. Four wire connector cord with phone tips. Ideal for transceivers and portable transmitters. Shpg. wt. 4 lbs.
YM13480
Your Cost \$9.75

Single Button Utility Microphone

Especially designed for use where a utility microphone of single button construction is desired. Intended for voice only. Best quality material and workmanship throughout. Finished in beautiful polished plate. Equipped with an off and on switch and 12 ft. of silk-covered cable. Shpg. wt. 3 lbs.
YM13482
List Price \$8.50
Your Cost \$3.95

KELLOGG Hand Microphone

Designed for use with portable P.A. systems, transceivers and amateur broadcast stations. Single button, 200 ohms, diaphragm is gold plated for perfect contact. Conveniently shaped handle permits holding microphone for long periods without tiring. Equipped with two-conductor 18 strand tinsel cord, 6 ft. long. Size 6 1/2" in height, 2 1/4" in diameter. Shpg. wt. 4 lbs.
YM13435
Your Cost \$1.95

UNIVERSAL 5-Meter Hand Sets

Highly polished molded bakelite, especially engineered for 5-meter transceivers. Weighs only 15 oz. Employs special high output microphones made extra rugged. Includes a 6 ft. 4 connector cord with each set. Available in single or double button types, in various degrees of sensitivity. Shpg. wt. 3 lbs.

Stock No.	Output	List Price	Your Cost
YN14043 , single with 200 ohm—38 uni-polar rec. DB		\$6.00	\$3.53
YN13592 , double with 2000 ohm—55 uni-polar rec. DB		8.00	4.70
YN13593 , single with hi-quality—38 receiver. DB		12.50	7.35
YN13594 , double with hi-quality—55 receiver. DB		15.00	8.82

Lafayette 5 Meter Antennas Tunable to Any Frequency

Consists of two adjustable quarter wave rods with 12" insulating bracket. Length variable from 52 inches to 9 feet. Of aluminum, each half in three sections. Binding posts for feed.
YR17080—Your Cost Each \$3.00

Matched Impedance Type

The matched impedance type of antenna is composed of one aluminum half-wave rod which is adjustable up to 110 inches. A brass collar is used to hold the feeders in place. This antenna is similar in appearance to the doublett type antenna, except the two arms are not insulated from each other. Complete with mounting base. Shpg. wt. 2 lbs.
YR17079—Your Cost Each \$2.25

"Half-Wave" Type

The half-wave type antenna may easily be mounted on an automobile, boat, etc. Composed of an adjustable half-wave rod of aluminum. Threaded at bottom and equipped with insulated mounting. Adjustable from 38 inches to 9 feet. Binding post for feeder. Shpg. wt. 2 lbs.
YR17081—Your Cost \$1.60

STROMBERG "Ham" Mikes

DESK TYPE

Employs single carbon type button that is extremely sensitive and has a very good frequency response. Hi-output enables reduction of amplifier gain for an equivalent degree of modulation or output. Shpg. wt. 8 lbs.
YN13595—Your Cost \$12.25

HAND TYPE

The same single button unit, as described above, is used in this mike. The net result is a hand mike that has unusually high sensitivity for a mike of this construction. Supplied complete with cord. Shpg. wt. 5 lbs.
YN13596—Your Cost \$7.50

New! Lafayette Transceivers

Types 19 and 30 for 56 to 60 Megacycles

Announced only a few short months ago the new Lafayette Transceivers are acknowledged leaders in the field today. The fine quality of the materials and workmanship used in their construction and their outstandingly fine performance have won for them this enviable position.

Model "19"

The model "19" provides an exceptionally high output—approximately 2 watts—which is almost ten times that of the ordinary transceiver using the type 30 tube as oscillator.

The circuit consists of a type 19 tube used as a unity-coupled push-pull oscillator which is modulated by another type 19 as a class "B" audio amplifier which is driven by a type 30. As a receiver one type 19 is used as a push-pull super-regenerative detector with the type 30 and the other type 19 as the first and second stage audio amplifiers respectively. More than enough output is obtained for speaker operation. Hiss level on reception is especially low and the frequency stability on transmission of a particularly high order.

The transceiver is equipped with two aerial terminals so that a transmission line can be used. Jacks for both mike and headphones are provided on the face of the front panel.

The case is of steel finished in black crystallized lacquer and is equipped with a leather carrying handle. Dimensions: 15" high, 7 3/4" wide and 6 1/2" deep. Batteries required are 135 volt "B", 7.5 volt "C", one 4.5 volt battery and two No. 6 dry cells.

YN13997—Lafayette Type "19" Transceiver less tubes, batteries and accessories. Shpg. wt. 18 lbs. \$15.95
Your Cost

Complete set of Burgess Batteries 3-5308, 1-2370, 1-5540, 2-6A.
Your Cost \$3.77

Kit of matched Tubes. 1-30, 2-19's. **Your Cost \$1.73**

YX14043—Hand Set \$3.53
Your Cost

Model "30"

The model 30 Lafayette Transceiver has same external appearance as the model 19 shown at side. It is extremely economical to operate and will provide exceptionally long battery life. It uses the popular 30-33 tube combination in a circuit that is an exclusive Lafayette development. For transmission the 30 is used as an oscillator and the 33 as modulator—for reception the 30 becomes a very sensitive super-regenerative detector and the 33 is used as a high gain audio amplifier. Sufficient volume is available for loudspeaker operation. Inductances are wound with hard drawn copper and are rigidly mounted in place. Jacks for mike and headphones are provided. The entire back of the case is removable. Case is 15" high, 7 3/4" wide and 6 1/2" deep. Finished in black crystallized lacquer. Batteries required are 135 volt "B", 13 1/2 volt "C" and two 1 1/2 volt dry cells. The only accessories required outside of the case are the antenna, mike and headphones. Complete instructions furnished.

YN13986—Lafayette Type "30" Transceiver, less tubes, batteries and accessories. Shpg. wt. 15 lbs. \$9.95
Your Cost

Complete set of Batteries (Burgess) 1-5156, 3-5308, 2-6A.
Your Cost \$3.72

Kit of matched tubes, 1-30, 1-33. **Your Cost \$1.19**

YM13435—Kellogg Single Button Hand Mike \$1.95
Your Cost

Despite the low power used in Transceivers a license is required for their operation.

Lafayette "Professional 9" AMATEUR SUPER-HET

Why be satisfied with the type of receiver that the ordinary broadcast listener has long since discarded? Ham requirements are by far more stringent than those of the broadcast fan, yet many hams are using this type of receiver. Ever increasing interest in the amateur field, and the consequent ever increasing congestion of the amateur bands, demands of the ham that he use a highly selective and extremely sensitive receiver. Lafayette engineers have, therefore, designed a receiver that is up-to-the-minute in every detail. This receiver, THE PROFESSIONAL "9", has every modern feature that would contribute to better performance, yet is so carefully designed that it is extremely simple to assemble. To assist the builder of this receiver, Lafayette engineers have designed the coil-switch assembly so that it is completely wired and tracked at the factory, thereby eliminating the most difficult part of the construction.

10 Meter Band

Four separate wave bands are provided: 9.7 to 30 meters (includes 10 meter ham band); 30 to 75 meters (includes 40 meter hams and part of 80 meter band); 75 to 200 meters (including balance of 80 meter ham band, and also 160 meter ham band); and 200 to 560 meters, covering the American broadcasting. Quite naturally, the continuous wave coverage will include all short-wave stations, and other intermediary frequencies. Greater band-spread for amateur communication purposes can not be found on any set on the market today. The complete receiver measures 22 1/2" long, 10" high, and 11 1/2" deep.

A crystalline finished metal front panel, drilled with all necessary holes, is supplied with the Kit. The electro-dynamic speaker, the carefully filtered power supply, and the powerful audio output stage are mounted on a separate demountable chassis unit. If desired, it may be mounted externally, a short distance from the tuner.

Band Spread Dial

A unique dial is employed in this receiver that permits the spreading of any part of the range of the receiver. This is accomplished by means of a "second hand" pointer that makes a complete turn around the dial for approximately every three degrees of the pointer. For quick tuning a ratio of 25:1 is used. For more accurate band spread tuning another drive mechanism giving a ratio of 125:1 is thrown into use.

Model YY22069—Lafayette "Professional" 9 Tube Amateur Super-hetrodyne Kit. Complete parts including Speaker, but less all tubes and Cabinet. For 50-60 cycles, 110-125 volts. Diagram and instructions furnished. Shpg. wt. 35 lbs. Code Labros.

Amateur, Net Price \$4.54
Kit of Matched Tubes \$7.50
YY22070—Metal Cabinet as pictured \$7.50
Kit wired in Laboratory \$7.50 extra

PRE-SELECTION ON ALL BANDS

Radio frequency on all bands assures maximum sensitivity and selectivity, and minimizes image frequency. This stage employs a 6D6, and is followed by a 6C6 mixer, 41 oscillator, 6D6 first I.F., 6B7 second I.F. diode detector, and automatic volume control tube, 6C6 A.F., 42 power output tube, 76 beat oscillator for code reception, and an 80 rectifier. Sensitivity is less than one microvolt, and selectivity is 7.5 K.C. For the convenience of the operator, a special three position switch cuts in the automatic volume control for phone reception in the first position; cuts it out and throws in the manual control in second position; and cuts in manual volume control and the beat oscillator in the third position for C.W. reception. The 41 tube assures smooth oscillation at all frequencies. This makes for operating convenience and gives the operator any desired degree of control at any time.

NEW POWER OSCILLATOR

It will be noticed that a power pentode tube (a 41) is used as the oscillator. This tube provides a much higher conversion gain and assures powerful oscillation at the highest frequencies.

New HALLICRAFTER

"Super-Seven"

- Iron Core I.F. Transformers
- Extreme Gain Pre-Selection

Designed expressly for use by transmitting amateurs and advanced short-wave listeners, the Hallicrafter's "Super-Seven" includes all of the latest features. It covers all the short-wave, broadcast, amateur and code bands with the highest efficiency. The regular broadcast band has been added to appeal to the wide field that includes amateurs and experienced short-wave hobbyists. All the features and special controls so desirable to the critical operator make it easy to get the last degree of usable sensitivity and selectivity.

MANY UNUSUAL FEATURES

Covers all popular ranges from 540 to 18,000 K.C. (555 to 16 meters) in three bands: Super-gain iron core I.F. amplification; seven latest type tubes with 10 tube performance; swift, smooth A.V.C. action; 4 watts undistorted power output; extreme gain pre-selection on all bands; square proportion high Q coil design; full continuous band spread with airplane dial; manual tone control for individual pitch, shading and noise suppression; Jensen dynamic speaker; thorough shielding; two stage high gain audio system; perfected band switching; front panel pitch control; A.V.C. switch; beat frequency oscillator; send-recv (stand-by switch); sensitivity control; customized construction throughout. The three band selector switch is positive in action due to silvered, self-wiping contacts and no-loss leads.

TREMENDOUS SENSITIVITY—LOW NOISE

Tremendous sensitivity and remarkably favorable signal-to-noise ratio is obtained by means of the iron core I.F. stage using a type 78 tube. Actual sensitivity of the receiver being less than 1 microvolt. The tubes used include: One type 78 R.F., one 6A7 first detector, one 78 I.F., one 75 second detector, A.V.C. and audio amplifier, one 42 output tube, one 78 electron coupled beat oscillator with pitch control, and one type 80 rectifier. Oversize transformers and filters provide hum-free reception even on head phones. Receiver dimensions overall: 21 1/2" by 9 3/4" by 10 1/4" high.

YN13763—Hallicrafter "Super Seven" complete with tubes. For 110 volts, 60 cycle A.C. operation. Shpg. wt. 43 lbs. List Price \$83.00.
Your Cost \$49.50

New HALLICRAFTER

Super "SKYRIDER" With the New Metal Tubes

Now with the new metal tubes comes a new "Skyrider." The instant elimination of noisy tube shields, the reduced inter-electrode capacities and the advantage of much shorter leads, makes possible greater gain and fewer circuit complications. The 6L7 tube used in this new receiver has no parallel in the glass tubes.

IRON CORE I.F. TRANSFORMERS

Crowded amateur bands demanded a new order of selectivity. Iron core I.F.'s are the answer. The special system used in the NEW Super SKYRIDER also insures greater sensitivity and a signal-to-noise ratio that is unattainable with any air core system.

An efficient five band coverage of all wave bands from 7.4 to 550 meters is made possible through an antenna circuit that is in each case tuned to the low frequency end of the band. It is both inductively and capacitively coupled to the grid and therefor uniform gain is obtained.

NINE METAL TUBES

Nine metal tubes are used as follows: 1 6K7 as R.F. pre-selector, 6L7 as first detector-mixer, 6C5 as oscillator, 6K7 as I.F. stage, 6H6 as second detector and A.V.C. tube, 6K7, as electron coupled beat oscillator, 6F5 as first audio, 6F6 second audio and a 5Z4 rectifier. The I.F. system uses six tuned circuits with or without the crystal filter. Complete and absolute control is had over the receiver due to a new Duo-Micro-Vernier band spread system, a panel controlled beat oscillator switch and pitch control, R.F. and audio gain controls, send-recv switch, crystal filter control and a phone jack. A new and valuable feature for the "phone man" is the low boost control that adds "body" to phone signals. Overall dimensions: 10" high, 10" deep, 19 1/4" long. Shpg. wt. 48 lbs.

YN13768—Super SKYRIDER with tubes, less crystal. List Price \$135.00
Your Cost \$79.50
YN13767—Super SKYRIDER with tubes and factory installed crystal. List Price \$135.00

NATIONAL Amateur Receivers and Accessories

The New NATIONAL "H R O" 9 Tube Superhet Receiver

- ★ Two Stage Pre-Selector Built-in
- ★ Lamb Single Signal Crystal Filter
- ★ Ganged Plug-in Coils
- ★ Four Gang Tuning Condenser
- ★ Air Tuned I. F. Transformers
- ★ Carrier Intensity Meter

The new National HRO Receiver is truly the achievement of an ideal! It has been especially designed to meet the requirements of the most critical amateur.

Two models are available, one using the 2.5 volt series of tubes, the other the 6.3 volt series. The 2 1/2 volt model uses 4-56's, 3-57's, 1-2B7 and 1-2A5. The 6 volt model uses 4-6D6's, 3-6C6's, 1-6B7 and 1-42. Both of the foregoing models require separate power supply, but a third model is available having a built-in power supply and is known as the model HRO-S.

Circuit features includes, in addition to features mentioned above; **Automatic or Manual Volume Control** selected by means of a switch on front panel. **A Neon Trigger Lamp** wired across the input circuit automatically shunts the terminals whenever excessive voltages are picked up by the antenna. This device also eliminates blocking and permits quick come-back when operating break-in or duplex. **A Phone Jack** is provided on the front panel as well as a send-receive switch for cutting "B" voltages during transmission. **An Entirely New Deal** is incorporated in this receiver. It is self-indicating and direct reading to one part in 500! **Beat Frequency Oscillator** for the reception of CW signals is included.

Due to the use of two stages of pre-selection the selectivity is excep-

tionally good and the signal-to-noise ratio is 1000 to 1 at 14 MC. A complete set of coils is supplied with each receiver to cover the range from 1.7 MC to 30 MC. Each coil gang is equipped with an accurate calibration curve.

Entire receiver mounted in metal cabinet finished in black crystalline lacquer. Size 8 3/4 x 17 1/4 x 10". Panel for Relay Rack mounting is available. Shpg. wt. 30 lbs.

YN13770—HRO-2 Receiver, complete with coils, matched RCA tubes, less speaker and power supply. List \$279.50

YN13771—HRO-6 Receiver, complete with coils, tubes, less speaker and power supply. List \$279.50

"FB-7A", "FBX-A", Receivers

- High Selectivity and Sensitivity
- Uniform Gain over Entire Frequency Range
- Two I. F. Hi-Gain Stages
- Band Spread and Full Range Coils
- Full Range, 34 M.C. to 1500 K.C.

These efficient S. W. supers are well known to the trade. Employ 7 tubes (not including rectifier) in a high gain circuit. Feature high selectivity and sensitivity, uniform gain over entire range, band spread tuning, beat oscillator, etc. FBX-A is same as FB-7A except that it includes a crystal filter. Tubes used are: 1-56, 1-57, 2-58's, 1-59 and 2-24's.

Full vision dial, calibration chart, plug-in coils and all controls mounted directly on front panel. In black crystalline finished metal cabinets. Shpg. wt. 29 lbs. each. Range 34 M.C. to 1500 K.C.

YN13867—FB-7A Receiver complete, less tubes, coils and power supply. List \$62.50 **\$37.50**

Your Cost \$51.90

YN13871—FBX-A Receiver complete, less tubes, coils and power supply. List \$86.50

Your Cost \$15.90

YN13877—5897AB Power Supply for use with either receiver. 115 volts, 60 cycles, less tube. List \$26.50 **Your Cost** \$15.90

SW-3 AC-DC, Battery Models

Three tube S. W. receiver. Cabinet dimensions are 9 3/4 x 9 x 7". Circuit consists of one R.F.

stage transformer coupled to a regenerative detector, and one stage of impedance coupled audio. Uses XR-39 plug-in coils. A. C. model uses 2-58's and 1-27; D. C. 6 volt model uses 2-36's and 1-37; D. C. 2 volt model uses 2-32's and 1-30. Shpg. wt. 20 lbs. All prices less tubes, coils and power supply.

YN13817—A. C. Model. **YN13819**—6 Volt D. C. Model. **YN13821**—2 Volt D. C. Model.

Your Cost **\$19.50**

Any Type **\$15.90**

YN13807—5880AB Power Supply for A. C. Model. List \$26.50

Your Cost **\$15.90**

Cathode Ray Oscilloscope

This unit offers a means of checking both phone and C.W. transmitters by providing an instantaneous graphic picture of the actual operating conditions in transmitter circuits. Percentage Modulation, Signal Distortion, and Peak Voltages, for instance, are indicated directly, and results are more easily interpreted. A type 80 tube is used for rectification. No linear sweep is provided, it having been found more desirable to use an audio signal from the transmitter for this purpose. However, the linear sweep may be added at any time if it is found necessary for special work. The unit is entirely self-contained. The dimensions of the cabinet are 12x8x6", finished in black crackle. Shpg. wt. 15 lbs.

YN13832—Cathode Ray Oscilloscope, less tubes List \$29.50. **Your Cost** **\$17.70**

RCA Type 906 Cathode Ray Tube with 3" screen. Amateur's Net Price **\$18.00**

Plug-in Type Coils

Made of new "low-loss" R39. The "10" series are used for the early SW3 A.C. and D.C. and the new SW3 D.C.; the "60" series are used with the latest SW3 A.C. Band spread coils are designed to permit 50 dial division spread. All coils space wound with turns permanently fastened by means of an overall coating of liquid Victrol.

MIDGET CONDENSERS

All have insulated front bearings, resulting in the elimination of possibility of shorted turns. The exclusive constant impedance pig-tail assures a perfect electrical connection. All insulating material of Isolan-
tite—dielectric losses reduced to a minimum. Plates are of polished aluminum. Types ST, STD and SE have plates with 026" air gap; type SEU has .055" air gap. All two bearings. ST-150, STD-50 and SE-150 extend 2 1/4" behind panel; others 2 1/4". Types not shown in the listing below can be supplied quickly.

Stock No.	Mfrs. No.	Cap'y Mmfd.	Plate Shape	Rotor	Plates Stator	Your Cost \$1.08

TRANSMITTING CONDENSERS TYPE TMA

A new line of improved transmitting condensers designed for maximum obtainable efficiency. The frames are extremely rigid and are arranged for mounting on panel, chassis or stand-offs. The plates are of heavy aluminum with rounded and buffed edges. Front bearing is conical, rear bearing radial with single-ball thrust. Insulation is Isolan-
tite, located outside of the concentrated field. Heavy duty construction with high peak voltage rating make them particularly attractive for use by the "Ham."

Precision Condenser with Micrometer Dial

Meets every requirement for use in H. F. receivers. Feature extremely low loss electrical characteristics, plus mechanical rigidity and accuracy of control. The drive is of the worm-gear type with a 20:1 ratio, and is heavily preloaded to insure absolute freedom from back lash. Sections are mounted directly on gear housing; do not touch chassis. Rotor plates 180° S. L. F. type. Rotor shaft 1/4" diameter.

The micrometer dial mounts directly on a support projecting from the rear housing and does not touch the panel at any point. It has 500 divisions, and makes 10 revolutions in covering the tuning range. The dial is numbered every 10 divisions. Numbers rotate in the conventional manner but are automatically changed every revolution by a mechanism within the dial.

TOBE Amateur Receiver

Browning 35 all wave Set

Close-Up of Amateur Dial Showing The B. S.

Close-Up of "All-Wave" Dial Showing Individual Calibration

TOBE Amateur Communication Receiver

BROWNING 35 "All-Wave" with TOBE Tuner

A seven tube superhet receiver designed exclusively for amateur band operation and incorporating the latest principles of advanced circuit design.

FEATURES

- Designed solely for the 20, 40, 80, and 160 meter "ham" bands (and adjacent channels).
- Extreme selectivity afforded by the sharply tuned antenna circuit, R.F. pre-selection, and triple tuned double band pass link circuit L.F. amplification.
- Extremely low background noise allows speaker reception of weak C.W. signals. (ON-OFF.)
- Adjustable beat frequency oscillator.
- Single tuning control.
- No plug-in coils.
- Stand-by switch and phone jack on front panel.
- Regenerative I.F., manually controlled. For single signal C.W. reception or extreme selectivity when desired.
- Additional interchangeable dials for logging.
- Sensational mechanical and electrical band-spread, as shown in table below. (Tuning rate means number of K.C. covered by one complete revolution of the tuning knob.)

Band	160	80	40	20
Tuning Rate (in K.C.)	26.5	30	18	17
Calibration Spread(K.C.) per dial div.	2	3.4	2	3

- Special embossed chromium and black escutcheon plate. (Illus.) **YH9900—Your Cost... \$1.88**
- Complete set of matched 2.5 volt tubes. 2-58's, 1-2A7, 1-2A6, 1-2A5, 1-66 and 1-80. **\$3.65 Your Cost.**
- Complete set of matched 6 volt tubes. 2-6D6's, 1-6A7, 1-75, 1-76, 1-42 and 1-80. **\$3.65 Your Cost.**
- YY22191—Extra set of blueprints for ToBE Amateur set \$1.00**
- YY22186—Extra set of blueprints for Browning 35... \$1.00**

Similar in most respects to the ToBE Amateur receiver, the Browning 35 All-Wave set was designed for the broadcast listener who is interested in short-wave reception.

Four Bands

The receiver has a tuning range covering from 13.3 to 22.6 M.C.; (2) 3.4 to 9.1 M.C.; (3) 1.42 to 3.92 M.C.; (4) .54 to 1.52 M.C. Bands are clearly marked on the full-vision dial, and extra scales are provided for logging or special calibration.

Sensitive and Selective

Sensitivity rated less than 1 microvolt per meter. Selectivity of 10 K.C. on all bands.

Excellent Band Spread

Unique method of band-spreading makes use of an auxiliary dial that revolves over a 360° arc and provides 40:1 ratio.

Tuned R.F. Stage

Set incorporates a stage of R.F. amplification ahead of the first detector and a sharply tuned ant. circuit.

"Band-Pass" I.F. Transformers I.F. transformers have link coil which gives "band-pass" effect, with nose of curve approximately 5 K.C. wide, 6 tuned I.F. high "Q" circuits.

Simplified Construction

The receiver is exceptionally easy to build due to the comprehensive instructions furnished and because of the factory assembled TOBE tuner. Seven connections between tuner and rest of circuit.

Amateur Communications Receiver ACR-136

- ★ 540 to 18,000 K.C. ★ No Plug-in Coils ★ 1 Stage of R.F.
- ★ Complete Band Spread ★ Beat Frequency Oscillator

Amateurs, "hams" and short-wave enthusiasts will welcome the addition of this new receiver to the RCA line. A superheterodyne circuit is employed with one stage of tuned R.F., which assures low image frequency response and high signal to noise ratio. There is sufficient sensitivity to go well below the noise level in almost any location.

Seven high gain tubes are used as follows: 1-6D6 as R.F. Amplifier; 1-6A7 as Oscillator and Mixer; 1-6D6 as I.F. Amplifier; 1-6B7 as combined Second Detector, AVC and Audio Amplifier; 1-6D6 Beat Frequency Oscillator; 1-41 Output Tube and 1-80 rectifier.

Tuning range covers the spectrum from 540 to 18,000 K.C. (550-16.5 meters), taking in the entire short-wave band and the American broadcast band. Desired band is selected by means of a switch on the front panel. Each band has separate coils.

Circuit features include: an efficient AVC circuit with provisions for cutting out its action; a beat note oscillator; a full range tone control; a phone jack (when phones are plugged in speaker is muted); a "stand-by" switch which removes plate voltages from tubes during periods of transmission; a two-speed Vernier dial with 10 to 1 and 50 to 1 ratios; a built-in electro-dynamic speaker.

Eight control knobs for all operations on front panel of the metal cabinet. Size 22x10½x11½". Shpg. wt. 17 lbs.

YN13814—Model ACR-136 Receiver, complete with tubes, power supply, speaker, etc.

NOTHING ELSE TO BUY. Your Cost.....

\$69.50

Hammarlund SHORT WAVE RECEIVERS

HAMMARLUND "Super-Pro" Receiver

This receiver was designed primarily for amateur, experimental and broadcast reception, and to operate from 110 volts, 50-60 cycles A.C. It consists of two major units—the receiver proper and the power unit. A total of 16 tubes is employed in a circuit that incorporates every modern feature. The highest and lowest frequencies, from 20 megacycles to 540 K.C., are all covered equally well, and this range is covered in 5 bands. A specially designed switch with silver plated multiple contacts automatically short-circuits all coils not in use. The main dial is directly calibrated in megacycles from 2.5 M.C. to 20 M.C., and in kilocycles from 540 to 2500 K.C. Only the scale in actual use is visible. This is accomplished automatically when the band switch is set.

The following general features are also incorporated in the Standard "Super Pro" receiver: **Superheterodyne Circuit**, the 16 tubes being used as follows: 2-6D6, as tuned radio frequency stages on all bands. 1-6C6, as high frequency oscillator electron coupled to first detector. 1-6C6, as low frequency beat oscillator. 1-6A7, as first detector. 3-6D6, as three stages of I.F. amplification—at 465 K.C. (coupling of stages variable by means of a single front panel control). 1-6B7, combination fourth I.F. stage and double diode second detector. 1-6B7 separate amplified A.V.C. 1-76 resistance coupled first audio. 1-4Z as class "A" driver stage. 2-4Z, as class "AB" push-pull audio output stage. 1-5Z3, plate voltage rectifier. 1-V, grid-voltage rectifier. **Electrostatically Shielded Input Circuit** for use with balanced antenna systems. **Automatic Gain Control** action independent of beat oscillator permitting the use of A.V.C. for high speed C. W. reception. **"Send-Receive" Switch** to "kill" receiver during transmission. **Panel Control** to vary frequency of beat oscillator. **Visible Tuning Meter**. **Band Spread Tuning** on 3 frequency bands. **R.F. Gain Control**. **Audio Volume Control**, and many other features. The "Super-Pro" is available with Single Signal Crystal Filter which provides greater selectivity.

YN13804—Standard "Super-Pro", in black wrinkle finish metal cabinet, complete with power supply, tubes and electro dynamic speaker. Shpg. wt. 65 lbs. List \$330.00

HAMMARLUND Comet "Pro" S. W. Superheterodyne

This exceptional short wave superheterodyne has not been named the "PRO" without reason. It was designed for communications, airport, broadcasting, police and other equally important services, yet, despite this rigid adherence to professional standards, it is simple to tune and can be successfully operated by the veriest novice. With only four sets of coils it covers a band of frequencies from 1,500 to 20,000 K.C. (additional coils covering from 20,000 to 37,500 K.C. and from 550 to 1500 K.C. also available), and, due to its unique design, bandsreading can be obtained at ANY frequency within the range of the receiver. The following are just a few of the features of these remarkable receivers:

1. Sensitivity of better than 1/4 microvolt per meter.
2. Intermediate oscillator for C. W. code reception, also valuable as a "station finder" in searching for weak phone stations.
3. Litz wound intermediates.
4. Complete shielding.
5. Air-tuned I.F. transformers.

A.C. models use the following tubes: 4-58's, 2-57's, 1-2A5 and 1-80 Receiver comes mounted in an attractive black crystalline finished metal cabinet. All prices are without tubes. Shpg. wt. 61 lbs.

PEAK PRODUCTS

ULTRA-HI-FREQ. Super Het.

A hi-gain high efficiency ultra high frequency 5 tube receiver for the ham or short-wave enthusiast. Gives real super-heterodyne performance yet lacks the "hiss" so objectionable in this type of set. Bands covered 2 1/2, 5 and 10 meters using plug-in coils supplied with receiver. Either 6.3 or 2.5 volt tubes may be used, and the following are the types employed:

6.3 volt series—one 6C6, two 6D6's, one 85, one 41 or 42. 2.5 volt series—one 57, two 58's, one 55, one 2A5. Power output to loudspeaker—3 watts. Additional features are as follows: Automatic Volume Control, Illuminated Airplane Dial, High Selectivity, All Metal Chassis and Cabinet, Two I.F. Stages, Phone Jack—disconnects speaker when in use, Copper Plated Chassis for low R.F. resistance, Variable Coupling Antenna Coil, Full A.C. or Battery operation, sturdily constructed, Stable operation, may be used with doublet or single wire antenna. The power requirements are as follows: for filaments—6.3 or 2.5 volts A.C. or D.C. according to tubes used. For plates—250 volts D.C. (approximate) at 50 M.A., obtained from A.C. power pack or batteries. When headphones are used the 41 or 2A5 final audio tube may be removed from socket. The current drain is then reduced to 15 M.A. Dimensions—10" deep, 7" wide, 8" high. Metal cabinet crystalline finished. Shpg. wt. 22 lbs.

YN13759—List Price \$36.00. **Your Cost** **\$21.60**

Pre-Selector

Just what the "ham" and the short-wave listener have been waiting for; a consistently efficient "signal booster." This unit, using two stages of high gain '58 tubes, increases the signal input to any short wave receiver, be it TRF, superhet, or auto-dyne, and invariably boosts weak signals to R9 or R9 plus. The first stage is electron coupled regenerative, lending greatly to stability in operation. The regenerative control is variable to obtain maximum overall gain. Five major results are obtained from the use of the Pre-Selector. These are: first, **tremendous increase in signal gain**; second, **consequent increase in sensitivity**; third, **absolute rejection of image or repeat spots**; fourth, **considerable increase in selectivity**; fifth, **reduction of noise to signal ratio**. Pre-Selector uses built-in coils covering from 14 to 200 meters. Ranges are selected by means of a selector switch. The tuning dial is of the popular airplane type, with black background and white figures and pointer. Escutcheon is oxidized silver. Unit contains its own filament supply; installation consists of connecting output to "Ant" and "Gnd" of receiver, and connecting to B plus and ground for necessary plate supply. All connections made to terminal strip on rear of chassis. Entire unit housed in heavy gauge steel cabinet finished in black crackle. Size 7 1/4 x 9 1/4 x 10". Shpg. wt. 15 lbs.

New KENCO Speed Key

Has all of the features of the previous Model A key, but finished in black baked enamel. Also, now available at a considerable reduction in price. Ten adjustments provided for fine keying. Three adjustments for regulating from 5 words per minute to any desired speed. Can be suited to any style or "fist." Contacts are of tungsten and individually adjustable. Metal base not used for any circuit connections—permitting indiscriminate placement of key, or connection into any desired portion of the transmitter circuit. Overall dimensions 8 3/4" long, 4" wide and 2 3/4" high. A really great value in speed keys. Packed in wooden container to eliminate transportation breakage. Shpg. wt. 3 1/2 lbs.

Trutest Oscillating Transmitting Crystals

Fundamental frequency-control is now possible with these Trutest quartz crystals. Carefully ground from the finest quartz obtainable to precision thickness. Approximately 1" square with rounded corners. X or Y cut and accurate to within one tenth of 1% or better. Specify

Cut from Virgin Quartz

frequency and cut desired and we will supply nearest **STOCK** crystal calibrated.

Stock No.	Freq. K.C.	Your Cost	Stock No.	Freq. K.C.	Your Cost
YM13501	7000-7300	\$3.75	YM13503	1700-2000	\$2.65
YM13502	3500-4000	2.65	YM13504	500-1700	3.95

A-T Cut Crystals

The new Trutest A-T cut crystals have approximately two to three times the power output of the X-cut crystals. Two types are available; one having a drift of less than 10 cycles per degree per megacycle. The other, slightly higher in cost, has a drift of less than 4 cycles per degree per megacycle. It will thus be readily seen that for all ordinary purposes no oven is required for accurate frequency control. Both types are guaranteed calibrated to any accuracy of one-tenth of 1%.

YM13535—80 and 160 meter bands. Drift less than 10 cycles per degree per megacycle. **\$3.25**
Your Cost Each

YM13536—80 and 160 meter bands. Drift less than 4 cycles per degree per megacycle. **\$4.75**
Your Cost Each

Oscillating Quartz Blanks

High quality quartz blanks about 1" square with rounded corners. These crystals are practically finished but have not been calibrated. Furnished X or Y cut for 80 meter band. Specify cut. **\$1.75**
YM13461—**Your Cost**

New RCA V-Cut Crystal and Ceramic Holder

Entirely new cut. Plates are 27% thicker than Y-cut, and only slightly thinner than X-cut plates. Finest Brazilian quartz used. Power output in excess of both X and Y cut plates. Temperature coefficient 2 cycles or less per million per degree Centigrade (between 10 and 60°). Accuracy of calibration .005%. Frequencies available from 3.5 to 4.0 M.C. Will be supplied within plus or minus 5 K.C. of frequency specified in this band, or your choice from stock. The ceramic holder uses the pressure-airgap principle. Pressure contact on sides allows free oscillation in center. Electrodes of nickel silver. Standard spring contact pins, 3/4" spacing. Springs may be removed. Size 1 1/2 x 3".

YM13583—RCA V-Cut Crystal and Ceramic Holder **\$12.00**
Your Cost
YM13584—Ceramic Holder Only. **Your Cost \$2.00**

BLILEY Mounted Crystals

A new mounted crystal of the X-cut power type having a calibration accurate to .03%. It is a more powerful special size crystal and has less frequency drift while warming up. Supplied to your specified frequency as listed below. Shpg. wt. 1 lb.

Stock No.	Freq. Meters	+ -10 K.C.	+ Within -5 K.C.	+ -1 K.C.	Exact

Compact Junior Condensers for S. W. and Broadcast

Exceptionally compact yet highly efficient. Ball bearings rotors. Shaft $\frac{1}{4}$ " diameter, $1\frac{1}{2}$ " long. Aluminum plates, brass supports. One gang units $1\frac{1}{2} \times 2\frac{1}{4} \times 1\frac{1}{2}$ "; special three gang condenser for either TRF or super-

het short wave sets $3\frac{3}{4} \times 2\frac{1}{4} \times 1\frac{1}{2}$ "

Air Padding Condensers

Isolantite mounted air padding condensers that will fit $1\frac{1}{4}$ " diameter cans. Have .015" air gap. Screwdriver adjustment. Sizes are available from 25 to 100 mmfds. providing suitable values for any purpose.

Midget Condensers

Light weight, strong and compact. Low loss construction. Non-corrosive aluminum plates with bakelite insulation. For single hole mounting, $\frac{1}{4}$ " shaft Bakelite knob with each. Shpg. wt. 1 lb.

Star Midget Condensers

A popular low priced midget for short wave transmitters, receivers, etc. Light in weight, strong, compact in construction and smooth in operation. Low loss bakelite insulation and non-corrosive aluminum plates.

Single hole mounting, $\frac{1}{4}$ " shaft. $1\frac{1}{4}$ " wide, $1\frac{1}{2}$ " high. Depth behind panel from $1\frac{1}{4}$ " to $1\frac{1}{2}$ " depending on capacity. 1" bakelite knob supplied with each condenser ordered. Wiping spring contact to rotor plates doubly insures perfect electrical contact so essential when used on short and ultra-short waves. Available in sizes that permit its use in any type of S. W. receiver. Shpg. wt. 1 lb.

* X'mt'g types for neutralizing and tuning.

CARDWELL CONDENSERS

New "Trim-Air Midgets"

An entirely new and unique design in midget condensers. Regularly supplied with a detachable shaft, rotor locking nut, and panel mounting nut. The shaft extension may be removed, leaving the screwdriver slot for permanent adjustment and locking of the rotor if desired. Two or more condensers can easily be ganged together. Shpg. wt. 2 lbs.

Special Cardwell transmitting condensers made to your specifications. Send in your plans—we shall be glad to quote prices.

Transmitting Condensers

These condensers are finely made, mostly by hand, and with extreme precision. They are individually

tested, aligned and checked. Accurately rated and extremely rugged. The details of construction of a single and double condenser are identical. However, the double condensers have 1.6 to 2.1 times the flashover rating of the single condenser. Also, due to consideration given to their applications the higher maximum capacities were designed as high as practicable to permit smaller inductances in tank circuits operating at 2,000 K.C. Both units employ **Mycalex insulation**, heavy construction, and liberal plate spacing. "P" or "R" after number of plates specified for each, indicates "plain" or "rounded" plates.

Midway Featherweight

Especially suited for aircraft equipment, portable sets, receivers, transmitters and oscillator-amplifiers where weight and space are a factor. Very finely constructed—no swaged rivets or eyelet heads to become slack. Aluminum is used throughout with the exception of bearings. A Real Condenser—not a midget. Shpg. wt. 2 lbs. Receiving types, listed below, have .031 air gap and are also suitable for low-powered transmitters.

CORNELL-DUBILIER OIL-FILLED CONDENSERS

Type "TA" Condensers

The use of Dykanol, a new impregnator having high dielectric strength and high dielectric constant is responsible for the compactness and high efficiency of these condensers. Specially designed for amateur transmitters. The impregnator used is non-inflammable and eliminates the fire hazard. Height 4", length 3 3/4", width of 1 mfd. unit 1 1/2", of 2 and 4 mfd. units 2 1/4". Insulator 1 1/2" high. Shpg. wt. 5 lbs.

SPRAGUE

Oil Immersed Condensers

These condensers are oil impregnated, oil filled and sealed so that there can be no leakage. Besides capacity and voltage ratings, all units are clearly marked as to type of filter circuit and output voltage with which they may be used, making it unnecessary to use higher voltage ratings than needed. Employ cylindrical wound foil such as that formerly used in only the most expensive condensers. Provided with isolantite insulator connections and come with mounting clamp. Average shpg. wt. 3 lbs.

THORDARSON Transmitting Transformers

Type A

Type B

Type C

Thordarson Engineers present these power transformers and associated filter chokes as the essential units of complete power supplies for operation of every amateur transmitter. Within the range of voltage and current outputs provided by these power supplies are covered needs of practically every amateur transmitter from those using 46's to 851's. Thordarson again takes the lead by rating all high voltage transformers at the actual D.C. watts output, when used with a recommended filter system. No longer must the amateur be guided by A.C. secondary voltage-current ratings that are meaningless in terms of performance.

Chokes

Smoothing Chokes Filter

YA420—150-M.A. filter choke, for use with XA415—or similar input choke. 19.7 henries at rated current. 2000-volt insulation. D.C. resistance, 275 ohms. Type H mtg. Shpg. wt. 8 lbs.

Your Cost **\$3.53**

YA423—500-M.A. filter choke for use with XA419—or similar input choke. 16.5 henries at rated current. 5000-volt insulation. D.C. resistance, 110 ohms. Type D mtg. Shpg. wt. 29 lbs.

Your Cost **\$10.00**

YA421—A 250-M.A. choke for use with XA417—or similar input choke. 23.6 henries at rated current. 5000-volt insulation. D.C. resistance, 190 ohms. Type D mtg. Shpg. wt. 15 lbs.

Your Cost **\$5.88**

YA422—380-M.A. filter choke for use with XA418—or similar input chokes. 20 henries at rated current. 5000-volt insulation. D.C. resistance, 160 ohms. Type D mtg. Shpg. wt. 30 lbs.

Your Cost **\$9.40**

Swinging Chokes (Input)

YA415—150 M.A. choke, to be used with the XA414 plate transformer. 30.3 henries dry—9.85 henries at 150 M.A., 2000-volt insulation. D.C. resistance, 200 ohms. Type H mounting. Shpg. wt. 7 lbs.

Your Cost **\$2.94**

YA259—A 200-M.A. choke. Inductance 5 henries at 200 M.A., 1600-volt insulation. D.C. resistance 80 ohms. Has screw terminals. Type H mounting. Shpg. wt. 4 lbs.

Your Cost **\$2.94**

YA416—400 M.A., for use in class "B" 03A supply. 40 henries dry—25.6 henries at 400 M.A., 3000-volt insulation. D.C. resistance, 118 ohms. Type D mtg. Shpg. wt. 35 lbs.

Your Cost **\$10.58**

YA417—A 250-M.A. choke, to be used with XA410—or similar plate transformers. 19 henries dry—12.35 henries at 250 M.A., 5000-volt insulation. D.C. resistance, 95.3 ohms. Type D mtg. Shpg. wt. 13 lbs.

Your Cost **\$5.00**

YA418—A 380-M.A. choke for use with XA407—or similar plate transformers. 19 henries dry—10.4 henries at 380 M.A., 5000-volt insulation. D.C. resistance, 93 ohms. Type D mtg. Shpg. wt. 20 lbs.

Your Cost **\$7.06**

YA419—A 500-M.A. choke. 17 henries dry—8.23 henries at 500 M.A., 5000-volt insulation. D.C. resistance, 70 ohms. Type D mtg. Shpg. wt. 24 lbs.

Your Cost **\$8.24**

Type D

Type F

Type H

Plate Transformers

YA407—Provides 1-K.W. input. Actual D.C. rating—3000 volts at 380 M.A. Sec. A.C.—3630 volts. A husky, air-cooled transformer, weighing 70 lbs. Type A mtg. Shpg. wt. 85 lbs.

Your Cost **\$38.22**

YA408—Similar to the above, but with a D.C. rating of—2000 volts at 500 M.A. Sec. A.C.—2420 volts. Type A mtg. Shpg. wt. 65 lbs.

Your Cost **\$32.92**

YA409—D.C. rating of 2000 volts at 250 M.A. Type B mtg. Shpg. wt. 65 lbs.

Your Cost **\$21.16**

YA410—Especially designed for the 800 tubes. D.C. rating—1000 or 1250 volts at 280 M.A. Sec. A.C.—1290 and 1660 volts. Type B mtg. Shpg. wt. 43 lbs.

Your Cost **\$13.52**

YA360—Especially designed for the 801 tubes. D.C. rating—600 volts at 250 M.A. Sec. A.C.—800 volts each side. C mtg. Shpg. wt. 16 lbs.

Your Cost **\$7.06**

YA407, 408 and 409 have double primaries for 110 and 220 volts so that power may be reduced.

YA362—For 203A, 211, 845, 800, etc. tubes. D.C. rating 1000 or 1250 volts at 500 M.A. Sec. A.C. 1333 and 1610 volts each side. Type B mtg. Shpg. wt. 44 lbs.

Your Cost **\$23.52**

YA411—Provides 1000 volts. D.C. at 500 M.A. with choke input. Sec. A.C.—1335 volts. B mtg. Shpg. wt. 43 lbs.

Your Cost **\$20.58**

YA412—Designed for the new 750-volt tubes. D.C. rating—750 volts at 350 M.A. Sec. A.C.—980 volts. Type B mtg. Shpg. wt. 31 lbs.

Your Cost **\$10.58**

YA413—Provides 1000 volts at 400 M.A., through suitable filter. Sec. A.C.—1270 volts. B mtg. Shpg. wt. 34 lbs.

Your Cost **\$12.94**

YA361—Designed for 210, 801, 865, etc. tubes. D.C. rating 525 volts at 250 M.A. Sec. A.C. 725 volts each side. C mtg. Shpg. wt. 17 lbs.

Your Cost **\$5.88**

YA414—Supplies through a filter, 525 volts D.C. at 150 M.A. Sec. A.C.—725 volts. Type C mtg. Shpg. wt. 12 lbs.

Your Cost **\$5.29**

Filament Transformers

All secondaries have center taps.

The transformers listed in the column below have primaries tapped for 105-110-115 volts, 60 cycles A.C.

YA441—7½ volts at 2½ amps. Type H mtg. Shpg. wt. 7 lbs.

Your Cost **\$2.06**

YA442—10 volts at 6½ amps. Type H mtg. Shpg. wt. 7 lbs.

Your Cost **\$3.24**

YA443—11 volts at 10 amps. Type H mtg. Shpg. wt. 9 lbs.

Your Cost **\$4.12**

YA444—Four secondaries: 10 volts at 3½ amps., 10 volts at 6½ amps., 7½ volts at 1½ amps., 2½ volts at 5 amps. Type F mtg. Shpg. wt. 10 lbs.

Your Cost **\$6.76**

YA445—Three secondaries: 7½ volts at 4½ amps., 7½ volts at 6½ amps., and 2½ volts at 4 amps. Type F mtg. Shpg. wt. 10 lbs.

Your Cost **\$5.30**

The transformers listed in the column below have 115 volt, 60 cycle A.C. primaries.

YA446—11 volts at 15½ amps. Type C mtg. Shpg. wt. 7 lbs.

Your Cost **\$5.30**

YA447—5 volts at 25 amps., 10,000-volt insulation. Type B mtg. Shpg. wt. 7 lbs.

Your Cost **\$10.58**

YA448—Two secondaries. 2½ volts at 10½ amps., 4 volts at 3 amps. 3000-volt insulation. Type F mtg. Shpg. wt. 7 lbs.

Your Cost **\$3.53**

YA449—2½ volts at 10 amps. 1600-volt insulation. Type H mtg. Shpg. wt. 7 lbs.

Your Cost **\$2.65**

YA450—2½ volts at 10 amps. 7500-volt insulation. Type H mtg. Shpg. wt. 7 lbs.

Your Cost **\$3.53**

YA451—7½ volts at 6½ amps. Type H mtg. Shpg. wt. 7 lbs.

Your Cost **\$2.94**

YA452—5 volts at 3 amps. Type H mtg. Shpg. wt. 7 lbs.

Your Cost **\$2.06**

THORDARSON Transceiver Transformers

YA363—Output Transformer—To couple a single Pentode tube (47, 42, etc.) to low or high impedance phones. Open type with leads. Compact enough to fit practically any type of transceiver; size only 2x1½x1½". Shpg. wt. 1 lb.

YA377—Audio Transformer—Combined audio and single button microphone transformer. For 200 ohm carbon mike. Open type mounting with insulated leads for direct connections. Size: 2x1½x1½".

Shpg. wt. 1 lb.
Your Cost Each,
Either Type

97¢

THORDARSON High Power Transformer

Upright mounting type with long color coded leads. Fully shielded. Supplies all plate and filament voltages. Ideal for use in low power transmitters. Has the following windings: High voltage delivers 1200 volts e.t. at 2.00 M.A.; 2.5 volts e.t. at 10 amps.; 7.5 volts e.t. at 3 amps.; 5 volts at 3 amps. (for rectifier). Primary for 115 volts, 50-60 cycles A.C. Size 5x4x4½". Mtg. centers 3x3½". Shpg. wt. 12 lbs.

YA226—Your Cost **\$2.45**

UTC

Transmitting TRANSFORMERS

TYPE
P.A.
MTG.

Originally developed for and used by commercial telephone and telegraph communication and broadcast systems U.T.C. transmitting transformers and chokes are now available to the amateur at prices he can afford to pay. Using the finest of materials, the units listed below have been developed and tested in operating circuits. Maximum efficiency is realized.

Type PA-1 overall dimensions are: 2½x3x3"; PA-2: 3¼x4½x3". PA-3: 3½x4½x4¼"; PA-4: 6x4½x4¼"; PA-5: 7x5½x5½".

Trap Resonant Smoothing Chokes

All have off-center tap for hum bucking arrangements.

YE5340—10 henries at 150 M.A. D.C. resistance 115 ohms. Type P.A.-2. Shpg. wt. 5 lbs. **Your Cost \$3.00**

YE5341—12 henries at 200 M.A. D.C. resistance 110 ohms. Type P.A.-3. Shpg. wt. 10 lbs. **Your Cost \$4.80**

YE5342—15 henries at 250 M.A. D.C. resistance 90 ohms. Type P.A.-4. Shpg. wt. 15 lbs. **Your Cost \$7.20**

YE5343—40 henries at 250 M.A. D.C. resistance 240 ohms. Type P.A.-5. Shpg. wt. 25 lbs. **Your Cost \$12.00**

YE5344—10 henries at 500 M.A. D.C. resistance 60 ohms. Type P.A.-5. Shpg. wt. 25 lbs. **Your Cost \$12.00**

Swinging Input Chokes

YE5345—6 to 30 henries at 15 to 150 M.A. D.C. resistance 115 ohms. Max. D.C. volts 450. Type P.A.-2. Shpg. wt. 5 lbs. **Your Cost \$3.00**

YE5346—6 to 30 henries at 20 to 200 M.A. D.C. resistance 110 ohms. Max. D.C. volts 600. Type P.A.-3. Shpg. wt. 10 lbs. **Your Cost \$4.80**

YE5347—6 to 30 henries at 25 to 250 M.A. D.C. resistance 90 ohms. Max. D.C. volts 1300. Type P.A.-4. Shpg. wt. 15 lbs. **Your Cost \$7.20**

YE5348—20 to 100 henries at 25 to 250 M.A. D.C. resistance 240 ohms. Max. D.C. volts 2600. Type P.A.-5. Shpg. wt. 25 lbs. **Your Cost \$12.00**

YE5349—6 to 30 henries at 75 to 500 M.A. D.C. resistance 60 ohms. Max. D.C. volts 1300. Type P.A.-5. Shpg. wt. 25 lbs. **Your Cost \$12.00**

Plate Transformers

Primary 50/60 cycle tapped at 105, 115, 220, 230 volts.

YE5559—900-750-0-750-900 V. at 250 M.A. P.A.-4 mtg. Shpg. wt. 25 lbs. **Your Cost \$10.80**

YE5560—1400-1250-0-1250-1400 V. at 400 M.A. P.A.-5 mtg. Shpg. wt. 45 lbs. **Your Cost \$21.00**

YE5561—2000-1600-0-1600-2000 V. at 400 M.A. P.A.-6 mtg. Shpg. wt. 70 lbs. **Your Cost \$34.50**

YE5562—8000-2500-0-2500-3000 V. at 500 M.A. UTS mtg. Shpg. wt. 90 lbs. **Your Cost \$45.60**

YE5563—1400-1250-0-1250-1400 V. at 200 M.A. P.A.-5 mtg. Shpg. wt. 80 lbs. **Your Cost \$15.00**

NOTE: The plate transformers listed above are particularly suited for use by broadcasting stations and for export markets, for the following reasons: when 220 volt primary is plugged into a 110 volt source, the transformers will operate on 25 to 42 cycles. Too, rated secondary voltages will be exactly half those specified above.

Universal Output Modulation Chokes

All are equipped with a variety of impedance matching taps.

YE5554—20 watt. For Class B 46, 59, 53, 6A6, 79, etc., or class A 2A3, 250, 210; class A Prime 42, 45's, etc. P.A.-2 mtg. Shpg. wt. 5 lbs. **Your Cost \$4.20**

YE5555—50 watt. For Class B 210, 801, 830, 841, P.P.P., 46, 59, 6A6, P.P.P., A Prime 45, P.P.P., 250, 2A3, etc. P.A.-3 mtg. Shpg. wt. 8 lbs. **Your Cost \$7.50**

YE5556—100 watt. For Class B 800, 211E, A Prime 845, 284A, etc. P.A.-4 mtg. Shpg. wt. 10 lbs. **Your Cost \$12.00**

YE5557—200 watts. For Class B 203, 830B, HK354, single Eimac 150T, P.P.P. A Prime 845, 284A, P.P.P. 800, etc. P.A.-5 mtg. Shpg. wt. 15 lbs. **Your Cost \$19.50**

YE5558—500 watt. For Class B 204, A Prime 849, Eimac 150T, P.P. 212 D in A Prime, etc. UTS case. Shpg. wt. 20 lbs. **Your Cost \$48.00**

Filament Transformers

50/60 cycle primaries tapped at 105-115, 220, 230 volts.

YE5543—2.5 V. C.T. at 10 amps. P.A.-2 mtg. 5000 V. insulation. Shpg. wt. 5 lbs. **Your Cost \$4.50**

YE5544—5 V. C.T. at 20 amps. 10,000 V. insulation. P.A.-3 mtg. Shpg. wt. 8 lbs. **Your Cost \$8.40**

YE5545—7.5 V. C.T. at 6.5 amps. 5000 V. insulation. P.A.-3 mtg. Shpg. wt. 6 lbs. **Your Cost \$6.60**

YE5546—7.5 V. C.T. at 6.5 amps.; 7.5 V. C.T. at 6.5 amps. 5000 V. insulation. P.A.-3 mtg. Shpg. wt. 8 lbs. **Your Cost \$8.70**

YE5547—10 V. C.T. at 7 amps. 10,000 V. insulation. P.A.-3 mtg. Shpg. wt. 8 lbs. **Your Cost \$7.20**

YE5548—Two 14 V. C.T. windings tapped at 11 or 10 V. 5000 V. insulation. P.A.-3 mtg. Shpg. wt. 10 lbs. **Your Cost \$12.00**

YE5549—2.5 V. C.T. at 10 amps., 10,000 V. insulation; two 10 V. C.T. at 3.5 amps., 5000 V. insulation. P.A.-3 mtg. Shpg. wt. 9 lbs. **Your Cost \$9.00**

The following have 115 V. primaries, 2000 volt insulation.

YE5550—2.5 V. C.T. at 5 amps.; two 7.5 V. at 2.5 amps. P.A.-2 mtg. Shpg. wt. 5 lbs. **Your Cost \$4.05**

YE5551—2.5 V. C.T. at 5 amps.; 5 V. C.T. at 3 amps.; 7.5 V. C.T. at 2.5 amps. P.A.-2 mtg. Shpg. wt. 5 lbs. **Your Cost \$4.05**

YE5552—Three 5 V. C.T. at 3 amps. P.A.-2 mtg. Shpg. wt. 5 lbs. **Your Cost \$4.05**

YE5553—5 V. C.T. at 3 amps.; 7.5 V. C.T. at 2.5 amps.; 7.5 V. C.T. at 2.5 amps. P.A.-2 mtg. Shpg. wt. 5 lbs. **Your Cost \$4.05**

FREE! Upon request we will gladly include with your order a copy of the new UTC Catalog which contains many diagrams on mixers and amplifiers decibel charts, reactance charts, etc.

Output Transformers Class "B"

YE5333—Primary: 10,000 ohms (suitable for 49, 53, 79 or 89) and 6000 ohms (46's, 59's) plate to plate. Secondary: 5000, 3500 ohms. Type P.A.-2. Shpg. wt. 4 lbs. **Your Cost \$4.20**

YE5336—Primary: 6000 ohms plate to plate (suitable for 46's or 59's). Secondary: 14,000, 3500 ohms. Type P.A.-2. Shpg. wt. 4 lbs. **Your Cost \$4.20**

YE5335—Primary: 8000 ohms plate to plate (suitable for "A Prime" 2A5 or 42's). Secondary: 5000, 3500 ohms. Type P.A.-2. Shpg. wt. 4 lbs. **Your Cost \$4.20**

YE5337—Primary: 12,500 ohms plate to plate (suitable for 800's, R.K. 18's, 825's). Secondary: 5000, 3000 ohms. Type P.A.-4. Shpg. wt. 10 lbs. **Your Cost \$12.00**

YE5339—Primary: 8000 ohms plate to plate (suitable for 210's, 830's, 841's). Secondary: 18,000, 4500 ohms. Type P.A.-3. Shpg. wt. 9 lbs. **Your Cost \$7.50**

YE5596—Primary arranged to match P.P. 838's or 203A's in Class "B". Secondary will match 6500, 5000 or 3000 ohm R.F. load. Will handle 260 watts of A.F. Sec. will pass D.C. P.A.-601. Shpg. wt. 40 lbs. **Your Cost \$19.50**

Input Transformers Class "B"

YE5350—Driver plate to 59, 53, 79 or 89 grids. Type P.A.-1. Shpg. wt. 3 lbs. **Your Cost \$3.30**

YE5351—Driver 46 or 59 plate to 46 or 59 grids. Type P.A.-1. Shpg. wt. 3 lbs. **Your Cost \$3.30**

YE5352—P.P. 45 or 59 plates to 2-46 or 59 grids; or P.P. 2A3 plates to 2-841 grids. Type P.A.-2. Shpg. wt. 3 lbs. **Your Cost \$3.90**

YE5353—P.P. 42, 45, 50 or 59 plates to 2-242A's, 800's, 830's, R.K. 18's, or 10 grids. Type P.A.-2. Shpg. wt. 3 lbs. **Your Cost \$4.50**

YE5354—P.P. 2A3 plates to 2-203A grids. Type P.A.-2. Shpg. wt. 4 lbs. **Your Cost \$5.10**

YE5357—P.P. 2A3 plates to 2-803, B 800, R.K. 18 or 10 grids. Type P.A.-2. Shpg. wt. 4 lbs. **Your Cost \$4.50**

YE5358—Driver 2A5, 45 or 42 triode plate to 2—"A Prime" 2A5, 45 or 42 grids. Type P.A.-1. Shpg. wt. 3 lbs. **Your Cost \$3.30**

YE5359—500, 200 or 50 ohm line to 2-830B, 800, R.K. 18 or 10 grids. Type P.A.-2. Shpg. wt. 5 lbs. **Your Cost \$4.50**

YE5564—P.P. 45 or 59 plates to P.P. 845A Prime grids. P.A.-2 mtg. Shpg. wt. 4 lbs. **Your Cost \$4.50**

New UTC Variactors for Transmitters and Audio Amplifiers

UTC has developed a new system of controlled carrier transmission employing a reactor-auto transformer combination. Applicable to amateur transmitters and class "B" audio amplifiers and will provide perfect power supply regulation. Variactors for use in audio amplifiers, as listed below, do not require separate auto-transformers. Write for your copy of the UTC bulletin describing this system in detail.

CV Variactors for Controlled Carrier Class C

YE5568—For 25 to 50 watts maximum input controlled Class C. Shpg. wt. 9 lbs. **Your Cost \$4.50**

YE5569—For 50 to 100 watts. Shpg. wt. 12 lbs. **Your Cost \$6.00**

YE5570—For 100 to 170 watts. Shpg. wt. 18 lbs. **Your Cost \$9.00**

YE5571—For 170 to 300 watts. Shpg. wt. 25 lbs. **Your Cost \$12.00**

YE5572—For 300 to 500 watts. Shpg. wt. 33 lbs. **Your Cost \$15.00**

YE5573—For 500 to 800 watts. Shpg. wt. 48 lbs. **Your Cost \$19.80**

AV Auto-Transformers for CV Reactors—115/170 V.A.C.

YE5574—For use with **YE5568**. Shpg. wt. 5 lbs. **Your Cost \$3.00**

YE5575—For use with **YE5569**. Shpg. wt. 7 lbs. **Your Cost \$3.60**

YE5576—For use with **YE5570**. Shpg. wt. 9 lbs. **Your Cost \$4.20**

YE5577—For use with **YE5571**. Shpg. wt. 12 lbs. **Your Cost \$5.40**

YE5578—For use with **YE5572**. Shpg. wt. 17 lbs. **Your Cost \$7.20**

YE5579—For use with **YE5573**. Shpg. wt. 22 lbs. **Your Cost \$9.00**

BV Variactors for Use With Class B Audio (Auto-transformer self-contained)

YE5580—For 46's, 59's or four 6A6's, 53's, 79's. Shpg. wt. 9 lbs. **Your Cost \$4.50**

YE5581—For four 46's, or 210's, 801's, 800's. Shpg. wt. 15 lbs. **Your Cost \$6.60**

YE5582—For 211's, 242A's, 830B's, 203A's. Shpg. wt. 20 lbs. **Your Cost \$9.60**

Trutest TRANSMITTING TRANSFORMERS and CHOKES

The Trutest line of transmitting transformers and chokes has built for itself an enviable reputation based on a foundation of quality and dependability. Each unit has been correctly designed by qualified engineers for the purpose intended. Individual testing of components on each production run has resulted in a uniformity of perfection that is an outstanding feature of these transformers. Core materials, wire, insulation, impregnation, castings, etc., have been selected with the

utmost care to permit highest quality. The listing below covers practically all popular types in demand, with various desirable types of mounting. In the event that you may require a unit with different electrical or physical characteristics than those listed, we will be glad to quote on your specifications. All Trutest Transmitting components are fully guaranteed under R.M.A. standards.

Filament Transformers

- Primaries 105-115 V. 60 cycle.
- YC2542**—2½ V. C.T.—10 A. 10,000 V. insulation. B mounting. Shpg. wt. 6 lbs. **Your Cost \$3.40**
- YC2543**—5 V. C.T.—20 A. 10,000 V. insulation. B mounting. Shpg. wt. 12 lbs. **Your Cost \$5.25**
- YC2544**—7½ V.—5 A.; 7½ V.—5 A. 5,000 V. insulation. B mounting. Shpg. wt. 6 lbs. **Your Cost \$3.25**
- YC2545**—7½ V. C.T.—8 A. B mounting. 5,000 V. insulation. Shpg. wt. 10 lbs. **Your Cost \$3.75**
- YC2546**—10 V. C.T.—8 A. 5,000 V. insulation. B mounting. Shpg. wt. 8 lbs. **Your Cost \$3.75**
- YC2547**—10 V. C.T.—4½ A. E mounting. Shpg. wt. 6 lbs. **Your Cost \$1.75**
- YC2549**—2½ V. C.T.—5 A.; 2½ V. C.T.—5 A.; 5 V. C.T.—3 A. E mounting. Shpg. wt. 8 lbs. **Your Cost \$1.75**
- YC2031**—2½ V.—5 A.; 5 V.—3 A.; 7½ V.—3 A. E mounting. Shpg. wt. 8 lbs. **Your Cost \$1.75**
- YC2032**—2½ V.—5 A.; 7½ V.—3 A.; 7½ V.—3 A. E mounting. Shpg. wt. 8 lbs. **Your Cost \$1.75**
- YC2033**—7½ V.—8 A.; 7½ V.—3 A.; 7½ V.—3 A. E mounting. Shpg. wt. 8 lbs. **Your Cost \$1.75**
- YC2034**—5 V.—3 A.; 7½ V.—3 A.; 7½ V.—3 A. E mounting. Shpg. wt. 8 lbs. **Your Cost \$1.75**
- YC5508**—2½ V. C.T.—20 A. 2,500 V. insulation. E mounting. Shpg. wt. 3 lbs. **Your Cost \$1.50**
- YE5509**—7½ V. C.T.—6½ A. 2,500 V. insulation. E mounting. Shpg. wt. 3 lbs. **Your Cost \$1.75**
- YE5510**—10 V. C.T.—6½ A. 2,500 V. insulation. E mounting. Shpg. wt. 3 lbs. **Your Cost \$2.00**
- YE5511**—6.3 V. C.T.—5 A.; 5 V. C.T.—6 A. 2,500 V. insulation. E mounting. Shpg. wt. 3 lbs. **Your Cost \$2.00**
- YE5512**—2½ V. C.T.—12 A. 5,000 V. insulation. E mounting. Shpg. wt. 3 lbs. **Your Cost \$1.75**
- YE5513**—5 V. C.T.—3 A.; 5 V. C.T.—3 A.; 5 V. C.T.—6 A. 2,500 V. insulation. E mounting. Shpg. wt. 3 lbs. **Your Cost \$2.00**

Class "B" Input

- YC2555**—Driver 46 or 59 plate to 46 or 59 grids. D mounting. **Your Cost \$3.45**
- YC2556**—P.P. 45 or 59 plates to 2-46 or 2-59 grids. D mounting. Shpg. wt. 3 lbs. **Your Cost \$4.75**
- YC2557**—P.P. 45 or 59 plates to 2-210, 2-800, 2-830 or 2-RK18 grids. D mounting. Shpg. wt. 3 lbs. **Your Cost \$4.75**
- YC2558**—P.P. 250 or 2A3 plates to 2-203 grids. D mounting. Shpg. wt. 3 lbs. **Your Cost \$5.25**
- YE5538**—Driver 45, 42 or 2A5 plate to 2A5, 42 or 45A Prime grids. D mounting. Shpg. wt. 3½ lbs. **Your Cost \$2.75**

Plate Transformers

- Primaries 115 V. 60 cycle.
- YC5117**—400-0-400 at 150 M.A. 2½ V.—5 A.; 2½ V.—12 A.; 5 V.—3 A. C mounting. Shpg. wt. 10 lbs. **Your Cost \$3.75**
- YE5539**—500-0-500 at 200 M.A. 2½ V. C.T.—14 A.; 5 V. C.T.—3 A. G mounting. Shpg. wt. 10 lbs. **Your Cost \$4.00**
- YC5116**—580-0-580 at 175 M.A. 2½ V.—10 A.; 2½ V.—3 A.; 5 V.—3 A. All C.T. C mounting. Shpg. wt. 10 lbs. **Your Cost \$4.45**
- YE5540**—600-0-600 at 200 M.A. 2½ V.—10 A.; 7½ V.—3 A.; 5 V.—3 A. G mounting. Shpg. wt. 10 lbs. **Your Cost \$5.00**
- YE5521**—800-0-800 at 150 M.A. G mounting. Shpg. wt. 10 lbs. **Your Cost \$3.75**
- YC5551**—550-0-550 at 200 M.A. B mounting. Shpg. wt. 14 lbs. **Your Cost \$5.75**

Outputs

- YC2559**—Pri.: 10,000 ohms with C.T. for Class "A" P.P. 59 triodes, 71A, 2B6, Single 210, 41, 268A, 2A3, Class "B" P.P. 49, 53, 79, 89. Also 6000 ohms for Class "A" P.P. 52A, Single 31, 46, 59 pentode. Class "B" P.P. 46, 59. Sec.: 8500-5000 ohms. D mounting. Shpg. wt. 3 lbs. **Your Cost \$3.50**
- YE5541**—Pri.: 8000 ohms with C.T. for Class "B" graphite plate 210's, 830, 841. Sec.: 18,000—4500 ohms. D mounting. Shpg. wt. 3 lbs. **Your Cost \$6.25**
- YC2560**—Pri.: 5200 ohms with C.T. for P.P. 203 A's in Class "B" Sec.: 10,000—2500 ohms. A mounting. Shpg. wt. 3 lbs. **Your Cost \$17.95**

Suppressor Grid Modulation X'formers

- YE5498**—P.P. 45 plates to suppressor-grid of one or two RK20 or similar type tubes. D mounting. Shpg. wt. 6 lbs. **Your Cost \$3.75**
- YE5499**—Single 2B6 or 6B6 plate to 1 or 2 RK20 or similar type tube grids. D mounting. Shpg. wt. 6 lbs. **Your Cost \$3.75**

Type D Mounting—Fully shielded. Can be mounted with terminals on top or under chassis.

Type E Mounting—Open type with terminal strip at top.

Type F Mounting—Fully shielded with bolt and nut terminals.

Type G Mounting—Fully shielded with bolt and nut terminals.

Filter Chokes Input (Swinging)

- YE5618**—5/25 henry. 200 M.A. D.C. resistance 140 ohms. F mounting. Shpg. wt. 5 lbs. **Your Cost \$2.50**
- YE5519**—5/25 henry. 300 M.A. D.C. resistance 105 ohms. G mounting. Shpg. wt. 5 lbs. **Your Cost \$3.75**
- YE5520**—5/25 henry. 500 M.A. D.C. resistance 70 ohms. G mounting. Shpg. wt. 8 lbs. **Your Cost \$6.50**
- YC2535**—5/25 henry. 750 M.A. D.C. resistance 40 ohms. B mounting. Shpg. wt. 15 lbs. **Your Cost \$11.25**

New Class "B" Output

- YE5628**—Primary designed to match P.P. 838's or 203A's in Class B into 6000, 5000 or 8500 ohm R.F. load. Will handle 260 watts at A.F. Sec. will pass D.C. H mounting. Shpg. wt. 39 lbs. **Your Cost \$19.50**

Type A Mounting—Totally enclosed. Heavy die-cast frame with metal end covers. Ceramic stand-off type terminals.

Type B Mounting—Open type with bakelite terminal plate. Die-cast frame.

Type C Mounting—Flush type in combination models only.

Type H Mounting—Similar to type D but with ceramic standoffs for terminal insulation.

Smoothing Chokes

- YE5515**—12 henry. 200 M.A. D.C. resistance 140 ohms. F mounting. Shpg. wt. 5 lbs. **Your Cost \$2.50**
- YE5516**—12 henry. 300 M.A. D.C. resistance 105 ohms. G mounting. Shpg. wt. 5 lbs. **Your Cost \$3.75**
- YE5517**—12 henry. 500 M.A. D.C. resistance 70 ohms. G mounting. Shpg. wt. 8 lbs. **Your Cost \$6.50**
- YC2536**—15 henry. 150 M.A. D.C. resistance 110 ohms. D mounting. Shpg. wt. 5 lbs. **Your Cost \$2.40**
- YC2537**—15 henry. 250 M.A. D.C. resistance 100 ohms. D mounting. Shpg. wt. 7½ lbs. **Your Cost \$3.95**
- YC2538**—30 henry. 150 M.A. D.C. resistance 130 ohms. D mounting. Shpg. wt. 7½ lbs. **Your Cost \$3.95**
- YC2539**—30 henry. 250 M.A. D.C. resistance 100 ohms. B mounting. Shpg. wt. 14 lbs. **Your Cost \$6.75**

RACKS · PANELS · CABINETS

Sectional P.A. Rack

Will improve the appearance of any existing installation. Entire assembly constructed of steel with black crystalline lacquer finish. Adaptable to almost any apparatus. Comes furnished with three shelves in addition to the bottom shelf. Rack stands 5 feet high, 19 1/4" wide and 12 3/4" deep. Channel type of construction allows hiding of all unsightly wiring. All corners reinforced with steel braces. Shipped in knockdown form with all necessary nuts, bolts and washers. Shpg. wt. 60 lbs.

Y Y22152—\$9.50
Your Cost Additional steel shelves. Shpg. wt. 7 lbs.

Y Y22159—Your Cost 30c

Standard Relay Racks

Just the thing for your "Ham" station. These sturdy steel racks are constructed of 1/2" steel, with spot welded corners. Finished in black crystalline lacquer. Racks are for use with standard 19" long panels, and are accurately drilled for mounting holes every 1 1/4". Holes tapped for 10-32 thread. Substantially braced base to prevent wobble and to keep units in correct alignment. Ideal for use with all types of Transmitters or for Public Address Systems. These Racks are the same as those used in our own transmitters—they are NOT cheap flimsy units built down to a price. It pays to buy a good rack for your transmitter.

Stock No.	Dimensions Hgt. W.	Shpg. D	Your Wt. lbs.	Cost
Y Y22150	6 ft. 19 1/4 in.	16 in.	60	\$10.75
Y Y22151	3 ft. 19 1/4 in.	16 in.	30	8.75

Enclosed Relay Racks

For the "Professional" type "Ham" station. Constructed of heavy steel finished in black crystallized lacquer. Holes drilled for standard 19" panels every 1 1/4". Holes have 10-32 thread. Sides have louvers to provide ample ventilation. Back panel in form of a door with heavy latch; has two screen sections for additional ventilation. Comes knocked down, with all necessary nuts, bolts and washers. Easy to assemble.

Stock No.	Dimensions H. W. D.	Shpg. Wt. lbs.	Your Cost
Y Y22153	6 ft. 20 1/2 in. 15 in.	120	\$22.50
Y Y22154	3 ft. 20 1/2 in. 15 in.	75	17.75

Steel Cabinets for Rack Panels

Designed to house receivers, transmitters, P.A. systems, etc. Afford neat, professional appearance. All take standard 19" panels. Constructed of 1/2" steel with black crystallized lacquer finish. Have doors with heavy latch for access to chassis. Sides and back have louvers for ventilation. Comes complete with panel mounting screws and washers. Bases have "mounting feet." All joints spot welded; units are rigid. Suitable steel and aluminum rack panels for use with the cabinets listed here are described elsewhere on this page. Blank chassis listed on this page are designed to fit these cabinets. Larger cabinets have opening in rear for cables, etc.

Y Y22194—Cabinet for single panel. Has door in top. 8 3/4" high and 12" deep. Shpg. wt. 20 lbs. **\$4.50**
Your Cost Each

Y Y22002—Cabinet for single panel. Door in top. Handles on side. 10 1/4" high, 12" deep. Shpg. wt. 22 lbs. **\$8.50**
Your Cost Each

Y Y22193—Cabinet for two panels. Has door in top and door on rear panel. 17 1/2" high and 13" deep. Shpg. wt. 34 lbs. **\$7.90**
Your Cost Each

Y Y22192—Cabinet for three panels. Has door on rear panel. 26 1/4" high and 13" deep. Shpg. wt. 42 lbs. **\$8.25**
Your Cost Each

Steel Rack Panels—19" Long

These standard panels are 19" long, and will fit the relay racks described above. Constructed of 1/2" steel with black crystallized lacquer finish. Available in twelve standard sizes to fill practically every requirement.

Steel Brackets

Used to re-enforce racks and panels. Of 1/2" steel with black crystallized lacquer finish. Panels must be at least 7" high. Mounting holes drilled. Shpg. wt. 3 lbs.

YP15271—For 8" base
Your Cost, per Pair **\$9c**

YP15272—For 11" base
Your Cost, per Pair **\$9c**

Portable Cabinet

Ideal for monitors, portable receivers, pre-amplifiers, etc. Constructed of steel with black crystallized lacquer finish. Has sturdy leather carrying handle. Top and right side, in one piece, removable. Sliding panel in top allows for tube insertion or inspection without the need for removing mounting screws. Front panel drilled for usual controls, dial, volume control, switch, etc. Side has slot for mounting antenna post or other binding post terminal. Furnished with mounting screws. Overall size 8 3/4" deep, 6 1/2" high and 5 1/2" wide. Shpg. wt. 6 lbs.

Y Y22077—Your Cost **\$1.98**

General Utility Steel Cabinets

Prepared especially for use with transmitting units, input stages, mixers, etc. Constructed of steel, finished in black crystallized lacquer. Have spot welded corners. Top and bottom fit snugly and are held in place by self-tapping screws furnished with each unit. Available in four standard sizes to fit almost every requirement.

Y Y22177	11 x 12 x 8"	9	1.69

NOTE

We can supply your needs for any special sized panels, in steel or aluminum. Write giving all necessary information and we will quote lowest prices.

Transmitting AERIALS & EQUIPMENT

New LYNCH "Ham" Kits

Due to the increasing number of amateurs who are desirous of obtaining kits which include all fundamental requisites for particular band coverage, without frills, the following kits have been made available. They are designed for both receiving and transmitting, to cover all of the popular amateur short-wave bands and are priced extremely low.

- YR17033—20 Meter Antenna Kit.** Includes 50 ft. cable, 50 ft. HI-MHO (heavy weight) antenna wire, 7 commercial type insulators, 1 lead-in tube, 3 porcelain lined screw eyes. Shpg. wt. 5 lbs. **\$2.94**
Your Cost
- YR17034—40 Meter Antenna Kit.** Includes 50 ft. Giant Killer cable, 75 ft. HI-MHO (heavyweight) antenna wire, and all other accessories mentioned in 20 Meter Kit. Shpg. wt. 5 lbs. **\$3.09**
Your Cost
- YR17035—80 Meter Antenna Kit.** Includes 50 ft. Giant Killer cable, 2-75 ft. coils of HI-MHO (heavyweight) antenna wire, and all other accessories described in the 20 Meter Kit. Shpg. wt. 5 lbs. **\$3.82**
Your Cost
- YR17036—160 Meter Antenna Kit.** Includes 50 ft. Giant Killer cable, 2-150 ft. coils HI-MHO (heavyweight) antenna wire, and all other accessories in 20 Meter Antenna Kit. Shpg. wt. 5 lbs. **\$5.00**
Your Cost

LYNCH "Giant Killer" Cable

A new type of transmission cable for use with doublet aeriels. Heavy rubber outer covering. High voltage insulation. Shpg. wt., 50 ft., 2 lbs.

- YR17177—50 ft. coil** \$1.76
YR17178—100 ft. coil 3.53
Your Cost **4¢**
Per Foot

LYNCH Super-Giant Killer Cable

Designed to cut down transmission line losses. Will carry up to 1000 watts when used with a current-fed antenna. Highly flexible, has surge impedance of 65 ohms. Break-down voltage more than 2500 volts. Shpg. wt., 100 ft., 3 lbs.

Stock No.	Foot Rolls	List Price	Your Cost

JOHNSON "Q" Antennas

An accurate impedance match is obtained through the use of a (90%) quarter-wave line made of half-inch aluminum tubing. Spacers of glazed porcelain are equipped with adjustable clamps. Enameled copper-clad steel wire for antenna and feeders prevents stretching.

Kits include: suspension insulator assembly, copper-clad steel antenna wire, two lengths of ½" diameter aluminum tubing, a supply of spacing bars, a template for lining up tubing and full instructions. Antenna insulators are not included. Shpg. wt. 5 lbs.

- YR17162—10 Meter Kit** **\$3.67**

Trutest and ALL-STAR KITS

6-TUBE AC LONG AND SHORT WAVE SUPERHET

Short-Wave "DX" fans will especially appreciate the new Trutest 6-Tube "Skip Band" receiver kit, for it takes in not only the entire domestic broadcast band from 200 to 550 meters, but the important foreign channel from 17.6 to 50 meters as well. It is so easy to assemble and wire that even a novice can do the job and have the set work the first time he turns it on. The diagrams and instructions are very explicit and the parts fit perfectly on chassis.

This is an all A.C. receiver, using the sturdy 6.3 volt series of tubes. The 6A7 is the first detector-oscillator, working into two I.F. stages employing 6D6's. A type 7E tube performs the multiple functions of second detector, automatic volume control tube and first audio amplifier, and feeds a type 42 output tube. The rectifier is an 80. With two I.F. stages and automatic volume control, the "Skip Band" receiver is a set that you will be proud to demonstrate as a product of your mechanical skill. A 6 inch dynamic speaker, whose field coil is part of the receiver's filter system, is supplied separately. Chassis measures 10 1/4" x 6 1/2" x 7" high overall.

YY22012—Trutest 6-tube "Skip Band" kit of parts, less tubes and speaker. Shpg. wt. 17 lbs. Code Leram
Your Cost **\$16.50**

Special 6 inch dynamic speaker \$3.45
 Matched kit of Lafayette tubes \$3.25

8-TUBE T.R.F. RECEIVER KIT

The Trutest **ADVANCED ECONOMY 8** is without doubt one of the best broadcast receiver kits available on the market today. It is a real, man-sized outfit, the formed metal chassis measuring 12" deep, 16 1/2" wide and 7 1/4" high. The neat appearance and logical arrangement of the parts never fail to arouse favorable comment. Each component has been carefully designed to provide an ample safety factor, resulting in a finished unit that will give trouble-free service.

For the service man or custom-set builder the **ADVANCED ECONOMY 8** is a sure-fire money maker. It can be assembled in a short period of time, the only tools necessary being pliers, screwdriver and soldering iron. Installed in a console cabinet, along with a dynamic speaker, it attracts attention from people interested in high quality radio apparatus—people who have money to spend.

The reliable, time-tried T.R.F. circuit makes the **ADVANCED ECONOMY 8** a real performer, with sensitivity, selectivity and power much in excess of normal requirements. Three stages of R.F. using type 6D6 pentodes work into a type 6C6 detector; a 76 first audio and two 42's in the output stage and type 80 rectifier. The audio output is 7 watts. For general smoothness of operation this combination is unbeatable.

Model YY22037—Trutest Economy 8-Tube Kit, less tubes and speaker. Shpg. wt., 28 lbs. Code Trute. List price \$35.00
Your Cost **\$14.95**

Model YY22038—Matched 10" Dynamic Speaker. Shpg. wt., 10 lbs. Code Trute. List price \$3.95
Your Cost \$3.95
 Kit of 8 matched tubes. Shpg. wt., 7 lbs. **Your Cost** \$4.00
 The Kit is shipped complete with all necessary instructions and diagrams for easy, quick assembly.

BUILD YOUR OWN ALL-STAR JUNIOR ALL-WAVE Superheterodyne

All-Wave Receiver Kit

- ★ All Wave Reception
- ★ 5 Latest Type Tubes
- ★ Beat Frequency Oscillator
- ★ Pre-adjusted Coils

Encouraged by the remarkable success of the original ALL-STAR SENIOR Receiver and realizing that a much greater need exists for an all-wave super—capable of dependable foreign reception at a still lower price, the eight sponsor manufacturers of the ALL-STAR SENIOR, aided by three additional firms, have now developed a smaller set, the ALL-STAR JUNIOR.

While not possessing quite the power and range of the original ALL-STAR SENIOR, this new JUNIOR set gives practically equivalent performance at only about two thirds the cost. Here is a set that is ideally suited for the amateur or the short wave fan—a set that anyone can afford and anyone can build.

Important Features

It has all of the important features of the Senior model such as: continuous band spread, pre-adjusted coils, beat frequency oscillator, etc. Only a total of 5 tubes are used—yet all of the important features are retained and the beat oscillator is included without the need of additional parts or tubes.

Simple Construction

It is easy to build. The instructions furnished are thorough and clear—practically anyone can build this receiver in a few hours time. All the holes are already punched in the chassis and panel, no drilling is necessary. Only a screwdriver, a soldering iron and a pair of pliers are needed.

YY22198—Complete Kit of ALL parts required to complete the receiver with the exception of tubes, speaker, cabinet and aerial. Shpg. wt. 20 lbs.
Your Cost **\$26.19**

YW19287—Special Matched Speaker. Shpg. wt. 10 lbs. **Your Cost** \$2.97
YY22178—Special Metal Cabinet. Crackle finish. Shpg. wt. 10 lbs. **Your Cost** \$3.95
YY22179—Special Etched Metal Panel. Shpg. wt. 10 lbs. **Your Cost** **\$2.06**

CONTINUOUS BAND-SPREAD ALL-STAR ALL-WAVE Superheterodyne

SENIOR ALL-WAVE Receiver

- ★ Continuous "Band Spread"
- ★ 10 to 500 Meters
- ★ 6 Tube Superheterodyne
- ★ Simple Construction

This excellent all-wave receiver has now become famous amongst short wave enthusiasts for its amazingly fine performance. Sponsored by eight of the leading parts manufacturers it includes in its construction only the finest of components. Transformers by Thordarson, Coils by Meissner, Condensers (variable) by Hammarlund, Condensers (fixed) by Cornell-Dubilier, Volume Controls by Electrad, Dials by Crowe, Resistors by Ohmite, and Wire by Belden. All of the latest ideas in short-wave receiver design from the laboratories of these eight manufacturers were gathered together and incorporated in the design of this receiver—a set that assures unequalled **WORLD-WIDE RECEPTION**.

Continuous Band Spread, Suited for Amateur Use

True "band spreading" is accomplished by the use of separate "tank" and tuning condensers. Band spread tuning is possible at any frequency in any band covered by the receiver.

Seven Tube Superheterodyne Circuit

Seven of the latest type tubes are used in the highly efficient circuit. A 2A7 tube is used as the combined mixer and oscillator, two type 6B's as intermediate frequency amplifiers, a type 56 as second detector, a type 2A5 pentode power tube and a type 80 rectifier in the power supply. Another type 58 as a beat frequency oscillator is optional and is not included in the essential kit.

YY22199—Complete Essential Kit of Parts. Shpg. wt. 20 lbs. **Your Cost** **\$31.54**
YM12866—Chassis with all cut-outs. Shpg. wt. 10 lbs. **Your Cost** \$2.50
YY22181—Miscellaneous Parts (sockets, shields, etc.), required to complete receiver. Shpg. wt. 10 lbs. **Your Cost** \$2.75
YY19292—Special Matched Speaker. Shpg. wt. 10 lbs. **Your Cost** \$2.06

TRANSMITTING TUBES

Lafayette

**X'Mitting Tubes Quality at a Low Price
Guaranteed 1000 Hours**

All Lafayette transmitting tubes, with the exception of the 210, have pure carbon plates. This feature provides high plate dissipation without overheating, and also insures constant tube operating characteristics. Lafayette transmitting tubes are guaranteed for 1,000 hours against defects in material or workmanship, on a pro-rata basis. Burn-outs and broken glass are the only exceptions to the guarantee.

Type	Purpose	Your Cost
210	R.F. or A.F. Amplifier or Mod. 15 watts.	51.95
841	Volt. Amp., R.F. Power Amp. or Osc. 12 watts.	2.50
865	R.F. Power Amp. or Osc. 15 watts.	9.95
801	R.F. and A.F. Power Amp. or Osc. 20 watts.	3.75
800	Osc., R.F. Power Amp. or "B" Mod. 35 watts.	7.50
830	R.F. Amplifier. 17 watts.	7.25
830B	Class "B" R.F. and A.F. Amp.	7.25
211	Osc., R.F. Power Amp. or Mod. 100 watts.	9.95
211C	60-130 Watt Hi-Freq. R.F. Amp. 120 watts.	10.95
203A	Osc., R.F. Amp. or Class "B" Mod. 100 watts.	9.95
203D	50-160 Watt Hi-Freq. R.F. Amp. 120 watts.	10.95
852	Oscillator or R.F. Amplifier. 100 watts.	16.95
860	R.F. Amplifier or Oscillator. 100 watts.	29.75
212E	225-350 Watt Hi-Freq. R.F. Amp. 275 watts.	67.50
204A	Oscillator or R.F. Power Amp. 250 watts.	75.00
849	R.F. or A.F. Amp. or Oscillator. 400 watts.	125.00
851	R.F. or A.F. Amp. or Oscillator. 750 watts.	300.00
864	Voltage Amp. for Use in Pre-amplifiers.	1.40
842	3 Watt Class "A" Audio Amplifier.	9.95
845	30 Watt Class "A" Audio Amplifier.	9.95
866	H.W. Mercury Vapor Rect. .6 amps. 2.5 V.	3.85
866A	Shielded Fil. H.W. Merc. Vap. Rec. 1 amp.	8.25
872	H.W. Mercury Vapor Rect. 2.5 Amp. 5 V.	10.95
872A	Shielded Fil. H.W. Merc. Vap. Rec. 2.5 amps.	12.50
869A	Shielded Fil. H.W. Merc. Vap. Rec. 10 amps. 5 V.	139.00

**Xmitting
Tubes**

A complete new line of Transmitting Tubes especially designed for amateur use. Their high efficiency permits maximum output with a minimum input. All have Isolantite bases and are ruggedly constructed. The new RK20 R.F. Pentode is particularly interesting since it is the first amateur tube permitting efficient suppressor grid modulation.

Type	Purpose	Your Cost
RK10	R.F. Amplifier, Class "A" or "B" A.F. Amplifier and Modulator.	53.50
RK15	R.F. Amplifier or Class "B" Modulator.	4.50
RK16	Oscillator, R.F. Amplifier or Class "B" Modulator Driver.	4.50
RK18	Class "A", "B" or "C" Amplifier or Triode Oscillator	10.00
RK19	Full Wave High Voltage Vacuum Rectifier.	7.50
RK20	High Output Pentode R.F. Amplifier.	15.00
RK21	Half Wave High Voltage Vacuum Rectifier.	5.00
RK22	Full Wave High Voltage Vacuum Rectifier.	7.50
RK23	High Frequency R.F. Pentode.	4.50
RK24	Battery Operated R.F. Triode.	2.25
RK25	High Frequency R.F. Pentode.	4.50
VG27	Grid Controlled Mercury Vapor Rectifier	5.00
RK28	R.F. Power Amplifier Pentode. Jumbo 6 prong.	38.50
RK29	Same as RK28 except with UV5 prong base	38.50
RK30	Triode Oscillator, R.F. Amplifier, Class "B" Modulator. For Ultra-High Frequencies. 65 watts.	10.00
RK31	Class "B" Modulator.	10.00
RK32	High Frequency Triode. Max. 1250 volts plate	12.00
RK34	Twin Triode H.F. Oscillator or Amplifier.	3.50
RK100	110-120 volt D.C. Gas. Dis. Amp.	7.00
854	Low current tube for Microphone Pre-Amplifiers	1.60
866A	Half Wave Mercury Vapor Rectifier.	5.00
872A	Heavy Duty Half Wave Mercury Vapor Rectifier.	16.50
841	Voltage Amplifier, R.F. Power Amplifier, Oscillator	3.25
842	Class "A" Audio Amplifier.	3.25
203A	Oscillator, R.F. Amplifier, Class "B" Modulator.	17.50

EIMAC Transmitting Tubes

Have hard Nonex glass envelopes and are free from gas. All elements widely separated. Have Tantalum plate and grid. Guaranteed for two years against breakdowns, burn-outs and broken glass excepted.

Type	Purpose	Your Cost
50T	Gen. Purpose Triode. 50 watt plate dissipation.	\$13.50
150T	Gen. Purpose Triode. 150 watt plate dissipation.	24.50
150P	High Freq. Pentode. 150 watt plate dissipation.	34.50
1Z75	H.W. Rectifier. 2.5 V. at 12.5 amps. 7500 V. Peak.	7.50
1Z150	H.W. Rectifier. 2.5 V. at 12.5 amps. 15,000 V. Peak.	12.50

Lafayette

Type 868 Photo-Electric Tube

Gas filled type. For use with photo-electric equipment or sound-on-film. Anode supply 90 volts max.; anode current 20 microamperes max. Static sensitivity 45 microamperes per lumen. Dynamic sensitivity (at 1000 cycles) 40 microamperes per lumen.

Your Cost Each. **\$4.50**

RCA de Forest

GAMMATRON

The Type 354 Gammatron is a 100 watt triode amplifier suitable for A.F. or R.F. circuits. Aircooled. Standard 50 W. ceramic base. Top plate contact. High vacuum. Tantalum plate and grid. Thoriated Tungsten filament. Type 354 Gammatron. **\$24.50**
Your Cost.

AMPEREX HF 200

A new high frequency "Low C" tube for the Amateur. Employs a planar thoriated tungsten filament. Large area plate is of graphite. Maximum allowable plate dissipation 150 watts—plate color at this dissipation BLACK. Maximum allowable plate voltage Class "C" operation 3000 V. at 15 M.C.—2000 V. at 60 M.C. Average characteristics (at 1500 V. plate, 85 V. grid, 10 V. filament); Plate current 100 M.A., amplification constant 12, grid to plate transconductance 4200 micromhos, plate resistance 2860 ohms. Fits standard 50 watt socket. **\$24.50**
Your Cost.

Tubes for Radio-Therapy
Ultra-short wave tubes designed for Radio-Therapy equipment.

Type	Your Cost
211C	\$17.50
211D	17.50
211G	22.50
211H	17.50
203H	17.50

Note: These tubes employ carbon anodes. Complete characteristic sheet sent on request.

Clough-Brengle-TEST INSTRUMENTS

Model 82 Test Oscillator

Contains features seldom found in other types of battery driven oscillators. Range continuously variable from 85 K.C. to 21 MC. through the use of a 6-band selector switch. All frequencies are fundamentals, and are read directly on a 8 1/2" open-face dial. Signal modulated or unmodulated, as desired; modulation 30%, 400 cycles—which is available separately at a panel jack when desired for audio tests. Employs "ladder-type" attenuator. Complete battery operation from 1—22 1/2 volt unit for "B" supply, and 1—4 1/2 volt unit for filaments,—permits portability and operation in places where power is not available. Uses 2 type 37 tubes, one as R.F. oscillator, and one as A.F. oscillator. Double shielded R.F. radiating circuits reduce stray fields, so that extreme accuracy is obtainable when aligning. When used with either Models CRA or CRB instruments, it will provide complete facilities for visual plotting of radio frequency amplifier selectivity or frequency response curves. Accuracy 3%, battery consumption is almost negligible. Supplied complete with tubes and instructions, but less batteries.

YJ10440—Model 82 Oscillator. Shpg. wt. 14 lbs. **\$19.50**
Your Cost

CLOUGH-BRENGLE Oscillator 50 K.C. to 30 M.C. Signal Generator

Has six bands each working on the fundamental and covered by a dial 25 inches long, divided into 400 divisions, each division 1/16" wide. Readings to 1/10% accuracy. Hand calibrated with crystal oscillators. Supplied with an 11x17" hand drawn calibration chart. Continuously variable in frequency 50 kilocycles to 30 megacycles (6000 to 10 meters). Continuously variable in output 1/2 microvolt to 2 volts. 400 cycle audio test note. A.C. or D.C. operation. Black crackle finished case. Shpg. wt. 15 lbs.

YJ10883—List \$54.85
Your Cost **\$32.24**

Model 81 Fixed Sweep Frequency Modulator

By connecting any R.F. oscillator to input posts of this unit, and then connecting output cable to a receiver's I.F. or R.F. which it is desired to test, then a suitable signal will be supplied to the receiver under test which will vary ± 15 K.C. from resonance frequency at a rate of 50 times a second. The combination can then be connected to any standard Cathode Ray Oscilloscope for analysis. Direct plug-in connections permit convenient and rapid connection to Models CRA and CRB described. The Model 81 is essentially a 670 K.C. fixed oscillator having a motor driven condenser to wobble its frequency ± 15 K.C. at 50 times a second. The output is then fed to a mixer tube into which is also fed the output of the variable oscillator whose carrier it is desired to modulate. The mixed output may then be attenuated by a "ladder type" attenuator which is contained within the Model 81. Supplied complete with tubes and instructions, and book on "Cathode Ray Testing and Analysis."

YJ10551—Model 81. Shpg. wt. 22 lbs. **\$33.57**
Your Cost

Model 79 Beat Frequency Audio Oscillator

An excellent instrument for the service man, P.A. man, or laboratory. Direct heading 50 to 10,000 cycles, with good wave form output. Less than 5% distortion at all frequencies above 100 cycles, under full load and at maximum output. Includes vacuum tube voltmeter, which permits zero-beat adjustment—indicated by no output in the V.T. voltmeter. Delivers 150 milliwatts into a 5,000 ohm load, or approximately 27 volts. Output impedance—5,000 ohms. Power supply self-contained, for operation from 110 V., 60 cycles, A.C. dimensions—8 1/2 x 12 3/4 x 9 1/2". Supplied complete with 5—76 and 1—80 tubes and full instructions. Shpg. wt. 20 lbs.

YJ10441—List \$90.00
Your Cost **\$50.88**

Model CRA Oscillograph

Combines Oscilloscope, Amplifier, and Linear Sweep

Combines in one instrument all the facilities necessary for complete cathode ray analysis. Includes linear sweep and synchronizing circuits. All important controls are located on the front panel and arranged for easy operation. Semi-variable adjustments are removed to the side where they are conveniently accessible. Input amplifier permits a sensitivity of .4 RMS volt per inch. A compensated and amplified linear sweep circuit with phasing control provides a sweep rate of 15 to 16,000 cycles per second for use with potentials of frequencies as high as 100,000 cycles per second. Specially designed mounting permits the cathode ray tube to be rotated to compensate for variations in manufacture. This instrument when used with the Model 81 Oscillator, or

any other frequency modulated oscillator, provides complete facilities for visual plotting of radio frequency amplifier selectivity or frequency response curves. When used with a calibrated audio oscillator, such as Model 79, audio amplifier response characteristics may be observed. Other extensive uses of this instrument are: Voltage and Current measurements, Phase measurements, Distortion in the A.F. Amplifier, Hum analysis, Measurement, Modulation Analysis, etc.

The tubes used are: 1 Type 906 or 908 Cathode Ray, 1—57, 1—2A5, 1—885, 1—80, and 1—81. Dimensions are 13 1/2" H. by 8 3/4" W. by 18" deep. Sturdy mechanical construction is employed throughout. With complete instructions, in book form—shown at left. Shpg. wt. 32 lbs.

YJ10552—Oscillograph, with tubes.
Your Cost **\$77.90**

Model CRB Oscilloscope and Amplifier

- Visually pictures the:
- ✓ Percentage of Modulation
 - ✓ Amount of R. F. Distortion
 - ✓ Class "C" Amp. Excitation

The Model CRB Oscilloscope incorporates an input amplifier, the response of which is virtually flat from 15 cycles to 100,000 cycles per second. By the addition of this amplifier to the oscilloscope the sensitivity is increased to .4 RMS volt per inch. Complete variation from maximum amplification to zero gain is afforded by an attenuator on the control panel. This instrument may be used with a frequency modulated oscillator, such as the Model 81—described below, for visual plotting of radio frequency selectivity curves. When used

with a calibrated audio frequency oscillator, such as the Model 79, it is possible to make audio frequency circuit analysis, i.e., measure distortion in an A.F. amplifier, measure output, analysis of radiophone modulation, etc. Adjustments are provided for beam centering, horizontal and vertical excursion (amplitude), brilliance and focus. A 60 cycle harmonic sweep is controlled by a panel switch. This unit supplies complete power, from 110 volt, 60 cycle line, for the types 906 or 908 Cathode Ray tubes. A type 57 tube is used for amplitude amplification. Dimensions of the baked enamel finished steel case, which houses all of the components, are 11 1/2 x 8 3/4 x 18". Supplied complete with calibration screen holder, amplifier tube, rectifier tube, and Cathode Ray tube. Also,—booklet shown above which clearly explains the procedure for tests and measurements possible with this and above types of instrument. Shpg. wt. 42 lbs.

SUPREME *Testing* EQUIPMENT

Model 339 DELUXE Analyzer

An easy to operate all-purpose analyzer which, in addition to the cable and plug method of analysis, provides a number of jacks on the panel which permit point-to-measurements of all types.

This unit is a combination point-to-point tester and analyzer, providing complete resistance, voltage and current analysis and tube testing direct from the radio socket. Incorporates self-contained power supply. Tests all new tubes, including all new all-metal types with as many as 8 pins. Uses 5" fan-type easy reading meter. All meter ranges, including resistance and output measurements, are applied through the analyzer cable, making it unnecessary to remove the chassis from the cabinet. All voltage and current tests are fundamental and will not become obsolete. The Reference Point System is used, in which the chassis or any tube element may be used as a reference point for all meter tests. A plug and cable are provided, with adapters, for plugging into any tube socket for test. Six output ranges: D.C.M.A. ranges of 0/5/25/125/250/500/1250 M.A.; A.C. and D.C. ranges of 0/5/25/125/250/500/1250 volts; capacity ranges of 0/0.05/0.25/1.25/2.5/5.0/12.5 mfd. Resistance ranges of 0/2,000/20,000/200,000 ohms and 0/2/20 megohms. In handsome oak case with removable lid. Supplied complete with all test leads, cable, and plug with adapters. Complete instruction booklet for operation of this instrument. Shpg. wt. 15 lbs.

Your
Cost.....

\$39.15

Model "385" AUTOMATIC Analyzer

Most up-to-date and complete analyzer of the Supreme line. All tests are considerably simplified, thereby facilitating speed when servicing. Prepossessing in appearance—it will enhance the reputation and prestige of the service man as one who keeps modern equipment for servicing, and at the same time enables him to make a more thorough and accurate analysis of trouble. Includes the following features: three ohmmeters 2-200 ohms, 0-2,000/20,000/200,000 ohms, and a high range of 0-2,000,000/20,000,000 ohms. A complete free reference point analyzer with ranges of 0/5/25/125/250/500/1250 A.C. or D.C. volts with all ranges available externally for point-to-point tests. Three capacity testers, one with 6 ranges directly read on the meter scale of 0/0.05/0.25/1.25/2.5/5.0/12.5 mfd. accommodating both paper and electrolytic types; another for non-electrolytics indicating leakages, opens, and shorts; and the third for electrolytic types showing "good" or "bad" on a direct English reading scale. An A.C. English reading tube tester which tests all tubes including the new metal 8 prong types, with greater accuracy since they are tested at approximately their rated loads. Includes neon leakage test for indicating shorts or leakage between all elements of all tubes. Dimensions 4 7/8 x 13 3/4 x 16 3/4". Furnished complete with instruction manual. Shpg. wt. 28 lbs.

YJ10977—
Your Cost.....

\$76.39

STANDARD Analyzer Model 339

A great value in the low price analyzer field. For the average service man who cannot afford the more complete and expensive analyzers, this unit will be found most suitable. Permits all point-to-point tests in addition to socket voltage analysis. A 12 point rotary switch permits selection of the following meter ranges: 0/5/125/500/1250 volts A.C. or D.C.; 0/5/125 M.A., D.C., and 0/2,000/200,000 ohms. Large figures are used on the "ohms" scale for easy readability—the lowest reading being 1 ohm, with 35 ohms in the center of the scale. This calibration will permit checking of inductances or windings in chokes and transformers suspected of having shorted turns. Approximate tests of electrolytics may be made by employing the 200,000 ohms scale—a sharp return of the needle to zero, when test leads are connected to proper poles of the condenser, indicating "charge" and "discharge." Includes complete accessories, instruction manual, new tube base selector, and Free Reference Point System of Analysis Chart. Shpg. wt. 11 lbs.

YJ10875—
Your Cost.....

\$29.35

Model 89—DELUXE Tube Tester

An improved quality tester of all tubes, without adapters, including all the new all-metal tubes and 8 prong types. Assures greater accuracy by testing all tubes under their approximate rated loads. Employs English reading scale and neon leakage test for indicating leakages between all elements of all tubes. Neon condenser tester for indicating leakages and short-circuited conditions. Condenser tester with English reading calibration classifying all electrolytics directly on the scale in terms of "bad" or "good". D.C. voltmeter with external ranges of 0/5/125/500/1250 volts. Point-to-point resistance tester with ranges of 0/2,000/20,000/200,000 ohms, and megohmmeter with ranges of 0/2/20 megohms. All ohms and megohms ranges operate from self-contained power supply. This tester will suffice for most service men for locating average receiver troubles, since it will check with positive accuracy all resistors, condensers, tubes, voltages, and continuity tests. Supplied complete with test leads and instruction manual in handsome oak carrying case with tube chart mounted in the cover for quick reference. Shpg. wt. 11 lbs.

YJ10976—Your Cost.....

\$45.03

Public Address Analyzer Model 391

Specifically designed for the P.A. man, it may also be used for radio set trouble-shooting. Features include the following: measurement of direct currents, from the extremely low current in the P.E. cell circuit to the high exciter lamp currents, measurement of D.C. and A.C. voltages from tube biases to high-voltage rectifier windings; determining effective resistance from speaker voice coils to grid leaks; measurement of small to large capacities of both electrolytic and non-electrolytic types. Direct reading of the level of audio currents and voltages in their decibel relations to the accepted reference level. Six A.C. and D.C. volts ranges to 1250 volts. Direct currents of 0/250 microamps. 6 M.A. ranges to 500 mils., 3 ampere ranges to 12.5 amps. 10 capacity ranges to 50 mfd. 6 resistance ranges to 50 megs. with self-contained power supply. DB ranges (0 level 6 milliwatts in 500 ohm line) —10 to 20 db. and 5 to 35 db. Complete with instructions. Shpg. wt. 15 lbs.

TEST INSTRUMENTS AND PHOTO-ELECTRIC EQUIPMENT

SUPREME 89 Standard Tube Tester

A completely new tube tester at a new low price for servicemen and dealers. Affords most all advantages of other more expensive tube testers and includes every possible modern feature. Includes the new 5" full vision, easy-to-read meter. Calibrated so that it will indicate in terms of "good" or "bad" the efficiency of all types of tubes—including the new all-metal type. Incorporates neon tube leakage test will indicate a short or leakage between any two or all elements of tubes. Tests all tubes at their rated load, which results in more accurate indication of tube condition. All tests simplified and performed quickly.

No adapters—sockets provided for all present and future types. Will detect faulty tubes testing O.K. on old testers and soon pay for itself in extra tube sales. Attractive oak case with cover. Complete, with full instructions and quick reference chart in cover. For operation on 98 to 125 volts, 60 cycles, A.C. only. Shpg. wt. 15 lbs.

YJ10877—

\$34.25

SUPREME 189 Signal Generator

An All-Wave Oscillator that every serviceman dreams of having. Thorough and accurate, besides being attractive in appearance. Range: 90 kilocycles to 30 megacycles, with self-contained 400 cycle audio oscillator. Uses an electron-coupled circuit, which affords excellent dynamic stability. Four controls; range selector, 4" airplane dial-direct reading—with 10 to 1 ratio, and ladder attenuator consisting of one multiplier switch and a variable control approximately calibrated in microvolts. 50% modulation of radio frequency carrier. All ranges individually calibrated with guaranteed accuracy of one-half of one percent. Completely shielded and supply line adequately filtered. Uses 3 tubes; one—type 36, and two—type 37s. For 110 volt, 60 cycle, A.C. operation only. Complete with instruction manual tubes, shielded output leads, etc. Shpg. wt. 15 lbs.

YJ10880—
Your Cost

\$36.20

Condenser Analyzer

Every service man and service shop should have one of these instruments.

Tests paper, mica, oil dielectric and all electrolytic condensers. Checks by means of D.C. resistance method under an applied voltage. Resultant minute leakage current indicated by means of special Neon Glow Tube

Indicator. Three controls adjust circuit for the allowable electrical characteristics of the condenser under test. Checks opens, shorts, leakages and intermittent condensers. Built-in power supply, for operation on 110 volts, 60 cycles A.C. Voltages up to 700 volts available at terminals. An '01A is used for a rectifier. In metal case 3 3/4 x 4 1/2 x 7 1/2". Finished in durable black lacquer. All binding posts, switches, etc., clearly marked on panel. Shpg. wt. 8 lbs.

YJ10465—Tobe Condenser Analyzer, with Neon Tube but less '01A. **\$11.40**
Your Cost

New Lafayette Universal Bridge

Contains five resistance and three capacity standards. With these internal standards it is possible to measure resistance from .01 to 1,000,000 ohms and capacities from .0001 to 100 mfd., providing the proper voltage supply and indicating instrument are used. By using an inductance standard it is possible to use the bridge for inductance measurements. For A.C. measurements the 60-cycle line, a telephone buzzer or a vacuum tube oscillator may be used as a voltage source. For D.C. a battery of from 1.5 to 9 volts is used in conjunction with a galvanometer or a volt-milliammeter. The resistance and capacity scales are calibrated directly on aluminum panel. Unit housed in steel case, size 9x4 1/2 x 3 1/4". Shpg. wt. 5 lbs.

YP15969—Completely wired and tested. **\$13.45**
Same as above, in kit form. All parts and full instructions included. **\$10.95**
Shpg. wt. 5 lbs.
YP15970—Your Cost

JACKSON All-Wave Oscillator

Frequency range—100 kilocycles to 70 megacycles, fundamental frequencies to 26 megacycles. All ranges directly read on large modern scale with calibration in large legible figures. All controls are clearly marked and conveniently located. Output either modulated or unmodulated, as desired—by simply manipulating proper switch. Modulation 30%—400 cycles. Also, the A.F. bridge is separately available for A.F. tests, bridge measurements, etc. Accuracy—.05% to 2,000 kilocycles, 1% to 15 megacycles. This instrument is completely modern in every detail, highly accurate, and will provide a suitable signal with any desired degree of attenuation for all types of all-wave or standard supers and T.R.F. sets. Complete with tubes, instructions, etc. Shpg. wt. 19 lbs.

YN13909—
Your Cost **\$32.34**

RCA 868 Photo-Cell

Caesium type. Excellent sensitivity with high output. Operates on 90 volts. Length 4 1/2" and 1 1/4" diameter. Used in sound heads of RCA Photophone equipment. Standard UX base. Shpg. wt. 1 lb.

YV19132—
Your Cost **\$6.00**

CETRON Photo-Electric Cells

Caesium type. Has great sensitivity and long life. Used by many manufacturers of talking equipment. Made in two sizes for replacement in standard theatre equipment. May also be used for other industrial purposes.

Type CE1—Caesium cell used in RCA Photophone, QRS DeVry, Sonofilm, Guthrie Sound Equipment, etc., 3 1/2 x 1 1/2" d. **\$7.50**
Your Cost

Type CE7—Caesium cell used in General Electric and other types of Theater Equipment, Electric Eye, etc., 4x1 1/4" d. **\$7.50**

WESTON Photronic Cell

Delivers an electric current when exposed to light. Current varies with light intensity from 1 microampere on 1

foot candle to approximately 5 mills. in daylight. Bakelite case 2 1/4" dia., 1" thick. Shpg. wt. 1 lb.

YN14139—
Your Cost Each **\$7.35**

RHAMSTINE "Electric Eye" & Light Source

When used in conjunction with suitable "Light Source," the "Eye" may be used as counter, sorter, checker, in alarm systems, window displays, and for many other industrial and experimental applications. Consists of caesium cell, relay with heavy contacts, and amplifying stage. Shpg. wt. 6 lbs.

YN14140—
Your Cost **\$15.35**

Light Source

Built to match the above. Consists of a light bulb, transformer, and magnifying lens—all housed in a metal cabinet. Light bulb is adjustable for focusing. For use on 110 volts A.C. Shpg. wt. 6 lbs.

YN14141—Complete with line cord and plug. **\$7.00**
Your Cost

PESE Cell and Supersensitive Relay

A photo-conductive type cell that varies its resistance from dark to bright light at a ratio of approximately 18 to 1. Will pass 150 microamperes at 90 volts. This is sufficient current to operate moving coil type relays without amplification. Better results are obtained when used with a single stage

of amplification. Although suitable for many small industrial applications, these units are designed expressly for experimental use. Relay is sensitive enough to operate with as little as 1 milliamperes. Secondary contacts will handle up to 1 ampere, 3000 ohms D.C. resistance. Valuable booklet giving complete instructions for using this cell is included with each unit. Shpg. wt. 2 lbs. each.

YN14187—Pese Photo-Electric Cell **\$1.50**

TRIPLETT "STANDARD" SERVICE EQUIPMENT

Model 1310 Emission Tube Tester

This tube tester uses an improved circuit which enables emission tube tests to be made, similarly to the Model 1210A. Employs large meter, calibrated in terms of "Good" and "Bad," and enables the operator to accept or reject tubes with certainty. Only four controls to manipulate: Load, Tube selection and Shorts, Line and Filament voltages. Permits separate diode tests to be made. All tube checking performed quickly and accurately. Will test any of the all-metal or glass type tubes, whether 4, 5, 6, 7 or 8 prongs. Mounted within an attractive, modernistic two-tone walnut case, with removable cover. May be used for portable work or counter testing. Sloping panel with handy metal charts which furnish all instructions for testing. For operation from 110 volts, 60 cycles, A.C. Shpg. wt. 22 lbs.

YJ10804—List \$45.00
Your Cost.....\$29.40

Model 1501 Multi-Purpose Tester

Incorporates, in one instrument, the equivalent of ten separate instruments. **1—Tests All Tubes**, both glass and all metal types, under actual operating conditions, and in terms of "Good" or "Bad," speedily and accurately. **2—Neon Short Test**, accurately checks all tubes for leakages or shorts between elements. **3—Separate Diode Tests.** **4—Neon Tests for Paper Condensers**, shows shorted, leaking or open condensers. **5—Electrolytic Condenser Leakage Test**, indicates on "Good" or "Bad" scale if condenser is still efficient. **6—D.C. Voltmeter and Milliammeter**, has scale reading 0-10, 50, 250, 500, 1000 volts at 1,000 ohms per volt. D.C. Milliammeter, 0-10, 50, 250. **7—Ohmmeter**, reads resistance directly on 1000-10,000-100,000-1 meg., and 10 megs. scale. **8—A.C. Voltmeter**, 0-10, 50, 250, 500, 1,000 volts at 500 ohms per volt. **9—Decible Meter**, scale reads -100 +15 db. **10—Impedance Meter**, for 60 cycle use, with charts. All supplied in attractive modernistic case, for portable or counter use. With instructions. Shpg. wt. 28 lbs.

YJ10805—List \$70.00
Your Cost.....\$45.74

Power Output Tube Tester. Model 1500

An improved type of tube tester which employs the "gain method" of analyzing a tube's efficiency. Because of this method, all tubes are tested under receiving set operating conditions. Tests all tubes, including all glass and the new all metal 8-prong types. In testing, an A.C. signal is applied to the control grid and amplification is measured on a sensitive voltmeter. Includes neon short test for discerning slightest leakage, or shorts, between all tube elements. Uses A.C. test for rectifier tubes, and makes separate diode A.C. test. All indications are extremely accurate, and tests are made speedily. Employs an outstanding circuit and method for tube analysis. In attractive walnut case of modern design, for portable or counter use. Complete with instructions. Shpg. wt. 22 lbs.

Power Level Indicator Kits

Power level indicators are used for measuring sound or noise levels in amplifiers for public address, theatres, broadcasting, recording, etc. The DB meter permits the operator to make instant adjustments to prevent sound blasting or distortion. Supplied only in Standard model, range -10-0 +6 db., zero decible at 1.73 volts, 500 ohm lines, 6 millivolts. Available in constant or non-constant impedance. Meter Cases of moulded bakelite.

No. 150 Decible Meter Kit

Non-constant impedance. Includes multipliers for increasing range from +6 db. to +42 db., employing a total of nine multipliers with a 2 deck range selector switch. Ranges from +6 db. are as follows: +10, +14, +18, +22, +26, +30, +34, +38 and +42 db. Besides multipliers mounted on bakelite board and range switch, this kit contains: 1-TRIPLETT 3" meter (non-constant impedance), hook-up wire and complete instructions and blueprints for construction. Shpg. wt. 16 lbs.

YJ10807—Complete Kit, Including Meter.

MASTER SERVICE EQUIPMENT

Model 1220A Tester

Can be used with Model 1200 or any other similar unit for making voltage tests between tube elements including chassis; or current tests in series with tube elements or socket contacts including chassis. The jacks are so arranged that the source of external voltage may be applied to any tube element. This permits testing of the characteristics of the latest tubes. Complete with 6 prong plug and cable, 4, 5, 6, small and large 7, and 8 prong metal tube adapters. Also, full operating instructions. Shpg. wt. 14 lbs.

YJ10478—Your Cost Complete \$8.16

Model 1210A Tube Tester

This model is supplied in a separate wood case with a bakelite panel. It is an emission type tester, having a 3 1/2" D'Arsonval meter whose scale is directly calibrated in terms of "Good" or "Bad." It will test any type of tube that is made at the present time—including the new all-metal Octal tubes. Will also make short and leakage tests between all elements of all types of tubes. Permits quick and accurate tube testing. Furnished with complete instructions. Shpg. wt. 18 lbs.

YJ10448—Model 1210A Tube Tester. \$19.60

Your Cost

Model 1211A Case

Quartered Oak case for above tube tester for counter display. Tube charts are fastened to sloping panel. Size: length 12", width 11 1/4", height, front 3 3/4", back 6 3/4". Shpg. wt. 5 lbs.

YJ10444—Your Cost \$3.92

Model 1230 Signal Generator

The Model 1230 is a stabilized, all-wave, continuously variable signal generator, furnishing frequencies from 100 K.C. to 18,000 K.C., either modulated or unmodulated. A clear 400 cycle note is generated by a type 30 tube which modulates a second type 30 tube generating the radio frequency carrier. A 22 1/2 volt and three flashlight batteries supply the very small amount of power required to operate the tubes. Through the use of three output jacks and the attenuator the variation of output is obtained. Furnished complete with output leads and full instruction data. Shpg. wt. 15 lbs.

YJ10469—Model 1230 Signal Generator \$15.02

Your Cost

Model 1200 Dual-Meter Universal Tester

A new Dual-Meter Universal Test Instrument providing separate meters for both A.C. and D.C. measurements. The D.C. meter has a 500 microampere movement having an accuracy of 2%. D.C. scales: 0-10-100-250-500 and 1000 volts, 0-1-10, 100, 250, mills. 0-1500 ohms—1 1/4 meg., and 3 megohms. A.C. scales: 0-10-100-250-500 and 1000 volts. Only three jacks are used. Two for measuring all D.C. voltages, D.C. milliamperes, D.C. resistances, A.C. voltages and capacity. Third jack used when measuring output voltages, contains a blocking condenser. Shpg. wt. 14 lbs.

YJ10468—Your Cost \$21.24

YJ10494—Complete Kit of parts to build this instrument, with full instructions and blueprints but less case which may be purchased separately. Shpg. wt. 11 lbs.

Your Cost \$16.34

Model 1206 Complete Master Test Set

A complete portable laboratory for the radio service engineer. Contains the finest, most up-to-date instruments in unit form and in one case. These units are the Model 1220A Tester, the Model 1210A Tube Tester which will even test the new all-metal Octal type tubes, the Model 1200 Dual-Meter Universal Tester, and the Model 1231 All-Wave Oscillator. These units are completely described on this page, and the combination of all of them in one case permits the serviceman to make any type of test or analysis in sets that range from the oldest and most simplest construction to the present all-wave all-metal tube types. Supplied complete with all adapters in handsome case, with full instructions. Shpg. wt. 28 lbs.

YJ10463—Your Cost \$81.02

Model 1205A Complete Master Test Set

This unit is identical to the 1206 Master Test Set except that in place of the 1231 All-Wave Oscillator, the Model 1230 Signal Generator is employed. All other units are the same as described for the 1206. While the 1230 is also an all-wave oscillator of modern design, the characteristics are not quite as comprehensive and complete as that of the Model 1231. The features of extended frequency range (up to 30,000 K.C.), extra long 12" scale, etc., are sometimes more desirable to the serviceman and will permit the servicing of extremely low-wave sets. However, for average all-wave sets the 1230 will be found more than satisfactory. Supplied with full instructions. Shpg. wt. 28 lbs.

YJ10461—Your Cost \$69.90

Models 1231 and 1232 Direct Reading Oscillators

The most modern and complete oscillator made by Triplett at the present time. Frequency range—100 to 30,000 K.C., all fundamentals. Employs frequency stabilization, extra long 12" scale of the vernier type, with direct reading calibration. Specially low-loss switching system that permits quick and efficient changing from any of the 6 bands that cover the entire range of the oscillator. Modulated note is 400 cycles, and jacks are provided for obtaining this audio signal externally. Models 1231 and 1232 have the same features except that 1231 is completely battery

operated (batteries self-contained) and therefore portable, whereas 1232 is built for 110 volts, 60 cycle, A.C. operation. Furnished in regular black Master unit case, with tubes (both models). Supplied complete with full instructions. Shpg. wt. 14 lbs.

YJ10442—Model 1231, with self-contained batteries. \$26.14

YJ10443—Model 1232, 110 volts. A.C. Oscillator \$26.14

Readrite TEST INSTRUMENTS

Readrite instruments are very popular with service men because of their accuracy, dependability, and very low prices. They permit quick tests, and are designed, within the scope of each, to do their job completely and thoroughly. The Testers are available in two types—one employing Readrite instruments throughout—and the other using a Triplett 1,000 ohm per volt voltmeter. The former will permit all tests to be made with average accuracy, whereas the latter is precise, and therefore more desirable when the slight additional expense can be overlooked.

READRITE No. 430 Tube Tester

Tests All Metal Tubes

An up-to-the-minute tube tester, priced to fit the pocket of any service man or dealer. **Tests all tubes—including the new 8-prong glass and all-metal types.** Test tubes with actual load values applied—resulting in accurate indication of tube's efficiency.

Indicates slightest leakage and all shorts between tube elements. Uses Triplett Model 221 meter with "Good-Bad" scale. Meter is protected against damage. Shadow type meter for (A.C.) for line voltage adjustment. Has double grid cap for metal and glass tubes. Sloping all-metal lithographed panel. Quartered oak portable case, with cover; may be used for counter display or on service trips. For use only on 110 volts, 60 cycles, A.C. Supplied complete with line cord and plug and complete instructions for testing all tubes—glass, glass-metal and all-metal types. Shpg. wt. 10 lbs.

YK11000—Your Cost.....\$17.64

MODEL 431

Same as above, but equipped with READRITE Meters instead.

YK11001—Your Cost.....\$14.12

New!! Model 720A Tester

This point-to-point tester is designed for fast and efficient service work. Requires minimum manipulation and is extremely flexible. So arranged that voltage and current can be measured in any tube circuit. Resistance, capacitances are also quickly measured. Point-to-point tests are

made through an 8-wire cable and plug connected to the test socket. Tester socket terminals are arranged according to R.M.A. standards. With this method it is unnecessary to remove set chassis to localize defects. All ranges available by connecting through the single pair of jacks. New, Up-to-the-Minute, in design. Made to make tests on chassis employing metal tubes—with the same ease as may be performed on those employing glass types. It contains one A.C. and one D.C. meter. The D.C. scales are 0, 15, 150, 300 and 600 volts, 0-15 and 150 milliamperes. The A.C. scale are 0, 10, 25, 150 and 750 volts. Scales are clearly lithographed on all metal dials. No mental arithmetic required. Overloading of meter is prevented as far as possible by the single selector switch and single pair of jacks for all ranges. Shpg. wt. 11 lbs.

Your Cost \$17.05

YK11034—Model 556

Your Cost \$18.82

New! Model 554A All-Wave Oscillator

A thoroughly stabilized oscillator employing fundamental frequencies only. Range, 100 K.C. to 21,000 K.C.—by means of 5 plug-in coils. For additional ranges it is only necessary to add new coils. Employs 2 type-30 tubes, one as oscillator—other as modulator. Calibration curves for each band. Furnished in black portable leatherette case with self-contained batteries; complete with coils and tubes. Shpg. wt. 12 lbs. List \$24.00

YK11002—Your Cost \$14.12

HOYT Hot Wire Ammeters

For measuring the output of small transmitters. Not affected by variations in frequency. 3" overall diameter; mounts in 2½" hole Shpg. wt. 1 lb. List \$5.50

YJ10445—Range 0.1-5 amps. YJ10446—Range 0-3 amps.

YJ10447—Range 0-5 amps. \$3.24

Your Cost, Either Type.....

Output Meters

A practical instrument for measuring output of a radio set when used in conjunction with an oscillator for aligning R.F. and I.F. circuits. Contains copper oxide rectifier. Two ranges available: 0-5 volts for connection to voice coil, 0-50 volts for connection to plate of tube. Model 555 mounted on metal panel with jacks and test leads. Shpg. wt. 4 lbs.

YK11038—Your Cost \$4.27

Model 575, similar to above except in a round steel case. Shpg. wt. 4 lbs.

YK11039—Your Cost \$4.85

Air Cell Tester

Model 777

This new tester is a scientifically designed Readrite instrument. It is made for the checking of air-cell type or 2 volt batteries. It gives a true picture of the condition of the batteries. A very simple meter to operate as there are but only two leads in making connections. The meter is furnished complete with full instructions and mounted in an attractive Model 85 black case with a pair of 36" spade terminal leads. Shpg. wt. 3 lbs.

**YK11040—Model 777 Tester.
Your Cost \$1.62**

Mail Your Orders to NEW YORK, CHICAGO or ATLANTA

TRIPOLET

PANEL TYPE Precision METERS

In the design of these moving coil instruments possessing the finest precision qualities, nothing has been spared to make them the leaders in the field. The finest material; case of 3" meters are of bakelite with all terminals moulded in and the bearings of genuine sapphire jewels mounted in adjustable screws. The 2" case meters are similarly constructed—but are mounted in metal cases. Accuracy within 2%. A.C. meters are of the movable iron repulsion type giving a steady and accurate reading. Shipping weight of 2 and 3 inch meters are 3 lbs.

RCA and DAYRAD TEST INSTRUMENTS

RCA Cathode Ray Oscillograph

Designed to permit the service engineer to analyze receivers, amplifiers, etc. more thoroughly, this new oscillograph makes use of the type 906 cathode ray tube. The instrument is indispensable for such purposes as: measuring frequency and magnitude of hum; checking percentage of modulation; examining wave forms; aligning the multitude of circuits used in the newer types of receivers. This oscillograph incorporates many new features. A single stage amplifier with uniform frequency characteristics from 20 cycles to 90 kilocycles is used to increase sensitivity in the vertical direction. A similar amplifier is also used to increase sensitivity in the horizontal direction. A

switching arrangement is provided so that the amplifiers may be thrown in or out of the circuit. The timing axis has a frequency range from 20 cycles to 15,000 cycles, and is controlled from the front panel. The amplifier feeding the horizontal axis may also be used to amplify the timing oscillator. Provision is made for both internal and external synchronization and both vertical and horizontal beam shift, so as to obtain a standing image with proper framing. Unit is housed in a metal cabinet finished in black crackle and provided with a carrying handle. Amplifiers use 1-879, 1-885, 1-80, 2-57's. Operates on 110 volts A. C. power consumption 85 watts. Size 10½x6x16". Shpg. wt. 25 lbs.

YNI3943—RCA Cathode Ray Oscillograph, type TMV-122B. Complete with all tubes and 906 Cathode Ray Tube **\$84.50**

Your Cost.....

RCA Frequency Modulator

For aligning receivers with the RCA Oscillograph. Provides the necessary frequency variation and the A. C. synchronizing voltage. Combined motor-driven A. C. generator and variable capacitor. Two ranges 15 and 30 mmfd. 25 sweeps per second. 14" low capacity cable supplied. The generator frequency is two cycles per revolution permitting positive synchronizing for double sweep alignment. The generator voltage is 1.5 volts minimum. Current consumption is 25 watts. 8½x9½x4½" deep. Shpg. wt. 8 lbs.

YJ10482—Your Cost.....

\$27.50

"Glow Tube" Output Indicator

A small, compact visual output indicator designed for use with an oscillator when aligning radio receivers. Consists of a tapped step-up transformer, a potentiometer, a glow tube and three binding posts for connecting the output of the set to the transformer. Output impedances: 0.6, 1.5 and 4 ohms. Glow tube is extremely sensitive. Bakelite case. Size 5½x2½x2½". Shpg. wt. 2 lbs.

YJ10595—Your Cost.....

\$4.00

RCA Test Oscillator TMV-97-C (can be used with Oscillograph)

A compactly constructed, self-contained R.F. oscillator designed for use in conjunction with all types of radio receivers. Similar to the type TMV-97-B which preceded it, this model has been improved so that all necessary equipment for use with the oscillograph and frequency modulator listed at left have been incorporated. These parts include a jack for the frequency modulator, a "Hi-Lo" switch, a modulation switch, a new range switch and dial, etc. The range covers from 90 K.C. to 25,000 K.C. (3300 to 12 meters) in eight steps. Uses

individual coils for each band. The dial scale is calibrated directly in frequency and is accurate to within plus or minus 3%. Circuit employs two 30 tubes and requires one 22½ volt "B" battery and one 4½ volt "C" battery. Attenuator efficient over entire range. Variable Vernier control adjustable from 6:1 to 20:1 ratio. Signal modulated or unmodulated. Exceptionally well shielded. Enclosed in black wrinkle finished aluminum case with carrying handle. Size 8½x9½x4½". Shpg. wt. 3½ lbs., less batteries.

YJ10561—TMV-97-C Test Oscillator, with tubes **\$34.50**

but less batteries

Your Cost.....

The Model TMV-97-C Test Oscillator may be procured with accuracy of plus or minus 1% at an additional cost of \$5.00.

Oscillator Modernization Kit

Contains all parts necessary to convert TMV-97-B units for use with the oscillograph and frequency modulator. Includes the shielded coil assembly, sweep circuit jack, "Hi-Lo" switch, modulation switch, dial scale, escutcheon plates and all necessary resistors. Instruction book and drilling template included.

Shpg. wt. 2 lbs.

YJ10562—Your Cost **\$4.75**

Beat Frequency Oscillator

For use with any short wave superhet having intermediate frequency between 415 and 700 K.C. Receiver must also be able to supply power for additional tube filament. Just three wires to connect. For 2.5 volt sets, use 58 tube; a 6D6 with 6.3 volt sets. Unit is of the electron coupled type. Control rod varies pitch of note. Entire assembly on metal chassis 7x2½x7". Shpg. wt. 7 lbs.

YJ10563—Oscillator, **\$7.50**

LessTube, Your Cost

DAYRAD SERVICE EQUIPMENT

Model 36

Model 25 "Index" Locater Tube Checker

Something new and radically different. It is simple to operate, and will sell tubes quickly.

The new Dayrad "Index" quickly selects setting of tube to be tested. No charts or instructions to follow—just turn index wheel until type number appears and all settings are immediately indicated.

Tests all present type tubes, including the new metal types. Tests leakages up to 2,000,000 ohms; tests noisy tubes; English reading dial indicates "Poor" and "Good" tubes; wide range line voltage control—100 to 130 volts. Shorts and leakages indicated by "Micro-Leak" Neon test lamp. Meter of the full-vision switch-board type.

Metal control case, two-toned finish. Grid cap fits metal or standard tubes. Shpg. wt. 30 lbs.

YJ10564 **\$36.75**

Your Cost.....

Signal Generator v60-60,000 K.C. V.A.C. Operated vBull-In Output Indicator

All-wave coverage; range from 60 to 60,000 K.C. (5000 to 5 meters). Six separate bands using fundamental frequencies only. Individual coils for each band. Each band individually calibrated. Vernier control with high reduction ratio. Absolute attenuation from lowest to highest frequency.

Circuit uses one 6C6 R.F. Electron Coupled Oscillator, one 37 Audio Oscillator and 1-37 Rectifier. A 400 cycle note is available. Signals modulated or unmodulated as desired. Low and high output connections. Built-in neon tube output indicator with variable adjustment. All circuits individually shielded. In metal case with black crystalline finish. Size 10x7x4½". Shpg. wt. 14 lbs.

YJ10872—All-Wave Signal Generator, for 110 Volts, 50-60 cycles A.C. Complete with tubes.

Your Cost.....

\$31.75

BATTERY OPERATED MODEL Similar in appearance to above. Uses two 30 tubes. Range from 60 to 20,000 K.C. (5000-15 meters). Batteries included in case. Shpg. wt. 14 lbs.

YJ10873—Your Cost, with Batteries. **\$31.75**

Closeup of New "INDEX" Locater

Model 692 Oscillator

The servicing scope of this instrument is greater than that of any other similar unit ever offered by this company. Includes such attractive features as: All frequencies—from 100 K.C. to 22 megacycles. Low minimum signal—special attenuator system—attenuates below 1 microvolt, permitting alignment of AVC receivers below the AVC point. Presents constant 200 ohms impedance to receiver allowing set to function normally while being aligned. High maximum signal, approximately .2 volt, necessary to drive an I.F. signal through a receiver from ANT. and GND. posts. Battery operation—permitting complete portability and usefulness under all conditions. 50% modulation at all frequencies. Hand calibrated curves. External modulation, permitting use of phonograph or A.F. characteristics of receivers, RCA constant frequency records for studying. Shpg. wt. 14 lbs.

YJ10546—Your Cost, Complete

\$62.47

Model 770 Tube Checker

A de-luxe up-to-date unit which will permit fast and accurate tube checking. The instrument proper is completely enclosed in a cast aluminum case of very attractive and modern design. A total of eight sockets permit testing of any type tube, including the new 8 prong all metal types. A line voltage adjuster is available on the center panel operated in conjunction with an instrument line voltage reading, and is so arranged that the line voltage can be read, at any time that tests are being made, by manipulating a toggle switch. Includes a complete inter-element Neon short test. Besides checking all 4, 5, 6, 7 and 8 prong type tubes, an additional combined 6 and small 7 pin socket is provided

for 3 special tubes having combined electrode combinations. Only these 3 special tubes may be tested in it. For 110 volts A.C., 60 cycle use. Shpg. wt. 14 lbs.

Model 698 Selective Set Servicer

The Selective Set Servicer has included in it a Weston Universal Volt-Ohm-Milliammeter, equipped with a Model 301 instrument, a complete Model 666, Type 1B Socket Selector Set (includes 8 prong adapter for new Octal sockets for metal tubes); all necessary leads and a substantial leatherette carrying case. The meter ranges are: 750, 150, 15 and 7.5 volts A.C. and D.C. 500,000-5,000 ohms full scale, 3,500-35 ohms center scale (which may be increased, per instructions enclosed with tester, to 5 megohms). 75-7.5 milliamperes D.C. only. Permits voltage, current, resistance, and continuity measurements to be made in any receiver. Ideal for replacing obsolete test equipment at a moderate cost. Insures rapid and satisfactory servicing. Complete with instructions and tube base chart. Shpg. wt. 11 lbs.

Selective Analyzer

Models 665-1 665-2

Model 665 Selective Analyzer is available in two types. No. 1 is a "Pin Jack Model" and is illustrated. No. 2 employs a Rotary Switch for a more rapid selection of ranges. Both models have the following selection of A.C.-D.C. voltage ranges: 1,000, 500, 250, 100, 50, 25, 10, 5, 2.5, and 1, all with a sensitivity of 1,000 ohms per volt. The current ranges of the Type 1 Analyzer are: 500, 250, 100, 50, 25, 10, 5, 2.5, and 1 M.A., D.C. only. The current ranges of the Type 2 Analyzer are the same except that measurements may be taken up to 1,000 M.A., D.C. only. Resistance measurements may be made from 1 ohm to 1 megohm. Ordinary A.C. measurements, and output readings, are made possible by the use of a copper oxide full-wave bridge rectifier. The entire assembly is mounted in an attractive black finished metal case. With complete sections. Shpg. wt. 7 lbs.

NEW *all purpose* TEST INSTRUMENTS

DEPENDABLE Tube Tester—Model 305C

An attractive, efficient and quick testing tube checker for dealer or serviceman. Tests all tubes, including the new metal 8 prong types. Incorporates a new 5" bakelite fan type meter with English reading scale. Employs separate line-voltage meter with controls. No adapters to use. Makes individual tests of diode, triode, pentode, etc., sections of composite tubes. **Includes Ohmmeter and Continuity Tester**—will measure from 10 ohms to 1 megohm. No batteries required. Also, checks for open, shorted and leaky condensers of all types. Tests for shorts and leakages between all elements of tubes. Etched panel. Available complete or in kit form. Shpg. wt. 10 lbs.

YJ10505—Complete ready for use. **Your Cost**..... **\$21.95**

YJ10507—Kit—complete with instructions. **Your Cost**.....

\$17.65

PORTABLE MODEL

Combination portable—counter type, with removable hinged cover and compartment for tubes and tools. Size 14x11½x7½". Features identical with above. Weight of case with tester 9 lbs. Shpg. wt. 14 lbs.

YJ10529—Portable—Counter Type **\$24.55**

HICKOK ALL-WAVE R.F. and A.F. Oscillator

Most complete meter-equipped oscillator. Permits frequency modulation for oscilloscope use. Direct calibrated dial—simplifies use and permits quick alignment. Frequency range: 85 K.C. to 40 megacycles, in 8 bands. All fundamentals to 25 megacycles. R.F. modulated 50% by 400 cycles, and available either modulated or unmodulated. Also, 400 cycles separately available. Combines Variable A.F. Signal Generator, besides R.F. Oscillator. Employs double range output meter—output continuously variable in two ranges, from less than .1 microvolt to over .1 of a volt. Calibrated A.F. output continuously variable from 0 to 10,000 cycles—this will permit testing of fidelity of audio systems and speakers at all audio frequencies. R.F. Oscillator uses a frequency corrector which assures extreme precision of calibration and makes possible accurate selectivity measurements. Under actual lengthy tests this oscillator has shown a frequency stability of .05%. The 8 direct frequency reading ranges are as follows: "A" Dial—85 to 300 K.C.; "B"—Dial 300 to 600 K.C.; "C"—Dial 550 to 1500 K.C.; "D" Dial—1500 to 3200 K.C.; "E" Dial—3000 to 7000 K.C.; "F" Dial—6000 to 12000 K.C.; "G" Dial—1100 to 25000 K.C. and "H" Dial—22000 to 40000 K.C. Unit is triple shielded. Furnished complete with instructions and output leads. Shpg. wt. 22 lbs.

YJ10951—List Price \$80.00 **Your Cost**.....

\$47.04

The "Million" Tester

Test-Tubes, Resistors, Condensers, Measures Leakage and Resistance

A multi-purpose instrument for the serviceman who cannot afford expensive test equipment. Will give a visual indication on all tests—as a result of a Neon tube being employed in place of meters. Combines the usefulness of several test instruments in this one unit. Will test for emission of all types of tubes—including the new 8 prong all-metal. Tests for all inter-element shorts in tubes. Checks electrolytics for shorts and leakage. Measures resistance up to 10,000 ohms—and up to 6 megs. by comparison with standard. Can be used as a Neon resonance indicator for alignment. Supplied complete with instructions. Shpg. wt. 10 lbs. **YJ10950**—Your Cost..... **\$8.45**

MULTITESTER Model 403A

Ohmmeter—Voltmeter—Microammeter—Milliammeter

A compact multi-range tester of exceptional sensitivity (2000 ohms per volt) at a truly phenomenal price. **Voltmeter** ranges are: 0-50-250-750 D.C. volts. **Milliammeter** range: 0-50 M.A. **Microammeter** range: 0-500. **Ohmmeter** ranges: 0-2000-20000-2,000,000 ohms. D'Arsonval movement 3½" meter guaranteed accuracy 2%. Selector switch for selecting circuits and tapered compensator for battery voltage on ohmmeter. 5x8x3". Shpg. wt. 6 lbs.

YJ10466—Complete with batteries **\$13.95**

YJ10467—Knock Down Kit Model 403AK, complete with instructions for assembling. Less batteries and case. **\$10.65**

Your Cost.....

MULTITESTER Model 406

A highly accurate instrument for portable service or laboratory use. May be used as a voltmeter (2000 ohms per volt sensitivity) ohmmeter and milliammeter. Employs copper-oxide rectifier which allows both A.C. and D.C. voltage readings. An automatic selector switch permits instant connection to desired circuit and range. Ohmmeter is in 3 ranges: 0-2000-20000-2000000 ohms. A tapered rheostat permits smooth zero adjustment on all ohmmeter ranges. Milliammeter has 3 individual ranges: 0-5, 50 and 250 mils. 4-range Voltmeter scale, at 2000 ohms per volt, 0-5, 50, 250, 750, and for A.C.; 0-5, 750 D.C. multipliers and shunts are hand calibrated for accuracy of 1%. All ohmmeter batteries are self-contained. Dimensions 6x8½x3½". Housed in attractive leatherette case. Carrying case type extra. Shpg. wt. 6 lbs.

YJ10542—Model 406 **\$18.95**

YJ10543—Same with hinged cover... **\$19.95**

ICA Vacuum Tube Voltmeter Kit

This kit contains the complete assortment of material required to build the Vacuum Tube Voltmeter recently announced by RCA. Uses the new Acorn type No. 954 pentode tube. This instrument is an ideal unit for servicemen and laboratories, for measuring output (when aligning receivers), A.C. measurements, audio measurements, etc. The small size of the tube permits its placement so as to avoid long leads and high input capacitances and consequently insure greater accuracy. Measurements can then be made at radio frequencies with the assurance that the Voltmeter will have a minimum effect on the constants of the circuit under measurement. Easily calibrated, effective by-passing insures maintenance of accuracy at high R.F. when calibrated at 60 cycles. Kit is complete, except for microammeter and tube. Parts included are: resistors, condensers, potentiometers, switches, dials, knobs, socket, terminal strips, hardware, and Shielded case crackle finish. Dimensions 6x5x1½". Also includes a 4 wire shielded cable, 5 prong plug, and shield for socket. Case is completely drilled and ready for assembly of all components supplied with it. Furnished complete with instructions and diagrams. Shpg. wt. 15 lbs.

YJ10541—Kit only **\$5.88**

YJ10542—1 RCA No. 954 Acorn Tube..... **\$5.80**

YJ10702—Model 301 Weston, 0-500, Microammeter..... **\$10.48**

MUTER Resistance Bridge

This is a simple and convenient instrument for measuring resistance with accuracy. Operates on Wheatstone Bridge principle, but is considerably less expensive than instruments of this type. The component resistors of the ratio arm are adjusted to an accuracy of one-fourth of one per cent, and the resistors of the rheostat are adjusted to one-half of one per cent; providing an accuracy in measurements of approximately one per cent in the intermediate steps of the multiplier—decreasing to 5 per cent at the extremes. The power supply consists of a standard 4.5 volt (3 cell) "C" battery and is recommended for all measurements. The range of this instrument is from .01 to 11 megohms. Special heavily silver plated wiping contact snap switches assure minimum contact resistance losses. Provision is made by suitable binding posts for the use of an external battery, or the use of the rheostat as a decade box. The unit combines all the features of appearance, ruggedness, simplicity of operation, wide range, accuracy and portability. The case which houses the instrument is of solid walnut. Face of instrument satin finished black bakelite with white numerals. Leather carrying handle. Polished nickel plated hardware. Supplied complete with instructions for operation. No serviceman can consider his equipment complete without an instrument of this type. It will pay for itself in time saved. Shpg. wt. 15 lbs.

YJ10952—List Price \$49.50 **Your Cost**.....

Pencil Type Test Prods

Spring prongs at the end of prods allow changing from spade lugs to phone tips or to spring clips. Handles 6" long, $\frac{1}{4}$ " in diam. Needle point phone tips for piercing through insulated wire. Five foot black and red flexible wire. Complete with two Alligator Clips, two needle point Phone Tips, and two tapered lugs. **YM12971—Your Cost, Per Pr., Complete... 75¢**

Similar to the above prods but without the interchangeable feature. Two Types—with permanently fastened Alligator Clips—and with permanently fastened Phone Tips. **YM12882—Alligator Clips, Your Cost... 49¢**
YM12883—Phone Tips, Your Cost... 40¢

Laboratory Test Prods

Improved type. Has bronze tip with needle point and heavy body. Answers two-fold purpose of needle prod and phone tip prod. Handles 5" long and are extra heavy. Red and black leads 5 ft. long. Shpg. wt. 8 oz. **YM12978—With Spade Tips, Your Cost (either type)... 42¢**
YM12980—With Spring Clips, Your Cost... 53¢

BRACH NEON Test-O-Lite

With this new Test-O-Lite you can find blowout fuses immediately! Will check any voltage between 110 and 550 volts—either A.C. or D.C. Will also check spark plugs, radio sets, household appliances, etc. Neon lamp protected by moulded bakelite case. Pocket size. $\frac{3}{4}$ " insulated leads. **YM12983—Your Cost... \$1.10**

Flexible Shaft Socket Wrench

This tool has an especially flexible socket end, particularly desirable when adjusting Victor model R 32, 35, etc., receivers. Also good for getting to nuts in close corners. Shpg. wt. 2 lbs. **YP15070—Your Cost Ea... \$1.18**

Offset Screwdrivers

For tightening screws in hard-to-get-at places. Hardened high carbon steel, cadmium plated.

Stock No.	Length	Your Cost
YP15146	2 $\frac{3}{4}$ "	12c
YP15147	4 $\frac{1}{2}$ "	9c

Insulated Hex Neutralizing Wrench

The entire length of the inside of the tube is hexed, so that as one part wears out or breaks it may be easily sawed off, thus saving the expense of a new wrench. Made of sturdy unbreakable Fenoline, will outlive 6 other wrenches.

Stock No.	Length	Your Cost Each
YP15148	6"	12c
YP15149	8"	15c

Short-o-Tester

Contains 2 $\frac{1}{2}$ volt lamp and small flashlight battery. Indicates closed or open circuits when its flexible lead and pin terminal are introduced into the circuit. May also be used as trouble flashlight. Complete with battery and bulb. Shpg. wt. 1 lb. **YM12984—Your Cost... 88¢**

Four-in-One Neutralizer Compensator and "Tool-Kit"

Combines in a fountain pen size compact tool $\frac{1}{4}$ " and $\frac{1}{8}$ " nut wrenches, miniature blade screwdriver for neutralizing and a full size insulated handle screwdriver. Fine quality extra strength fiber. **YP15082—Your Cost... 65¢**

Neutralizing Tool Set With Metal Nibs

Polished black bakelite handles. Two tools. One consists of a $\frac{3}{8}$ " diameter 6" long tube on each end of which are heavy brass nickel plated socket wrenches for $\frac{3}{8}$ " and $\frac{1}{4}$ " hex nuts. The other tool fits inside the first tool and consists of a $\frac{1}{4}$ " solid rod, one end of which has a strong screwdriver blade, the other end is of special magnetic steel. **YP15083—Your Cost... 72¢**

NA-ALD ADAPTERS

New! 9 Wire Octal Analyzer Plug and Adapters

New compact locking adapters with silver plated clips for positive contact. Analyzer plug has special octal locking base. The adapters are of the quick release type. Dual grid stud on analyzer plug.

Adapters for All-Metal and Octal Base Tubes

These adapters are recommended for checking the complete series of ten New All-Metal tubes. In addition, a series of adapters are offered for checking All Metal Tubes in tube checkers of the earlier types within which no provision was made for testing 6.3 volt glass tubes that have similar characteristics to the metal types.

YK11752—Adapter with octal top and small 7 prong base for checking the new metal tubes as follows: 6A8, 6K7 and 6L7 in the 78 socket; 6J7 in the 77 socket; 6C5 in the 41 socket, and the 6D5 and 6F6 in the 42 socket of any tube checker.	59¢
YK11737—Adapter with octal top and UX base for checking all-metal full wave rectifier 5Z4 in 80 socket of any tube checker.	59¢
YK11747—Adapter with octal top and 7 prong base for checking the new all-metal class B Twin Amplifier tube in the 6A6 socket of any tube checker.	59¢
YK11755—Adapter with octal top and 5 prong base for individually checking each diode section of the 6H6 metal tube. This adapter has a specially designed resistance network for supplying the diode plates with the proper diode test voltage and current. A switch on the adapter provides for checking each section for matching purposes, etc. Used in 36 tube socket of any tube checker.	\$1.47
Adapters for Checking Metal Tubes in Earlier Model Tube Checkers	
YK11756—Adapter with octal top and 6 prong base for checking the new 6H6 metal tube in the 85 diode socket of any tube checker.	59¢
YK11757—Adapter with octal top and 5 prong base having a lead with a new metal miniature cap and regular control grid stud attached. Checks the new all-metal 6A8, 6C5, 6D5, 6F6, 6J7, 6K7 and 6L7 tubes in the 36 socket of any tube checker. Also, permits checking the new class B twin amplifier metal tube in the 37 socket of any tube checker.	88¢

Universal Tube Checker Adapter for Metal Tubes

For those who prefer a universal adapter this unit will check all New Metal Tubes in any tube checker. Bring the old tube checker up-to-date because of this feature. The instrument has three octal sockets with a neat etched direction plate. Every one of the ten new all-metal tubes may be tested in the 36 socket of any tube checker. It will check all

octal base tubes, glass as well as metal, including the 5Y3, 5Z4, 6A8, 6A8-G, 6B6, 6C5, 6C5-G, 6D5, 6D5-G, 6F5, 6F5-G, 6F6, 6F6-G, 6H6, 6H6-G, 6J7, 6J7-G, 6K7, 6K7-G, 6L7, 6L7-G, 6N7, and 6N7-G. Two toggle switches are provided for a thorough and complete test on all metal tubes, including both plates of the 6H6 and 5Z4, and both sections of the twin class B tube. Supplied with metal tube type screen cap and full instructions for making tests. Shipping wt. 4 lbs.

YK11760—List \$6.50
Your Cost **\$3.82**

Small-7 Analyzer Plug with All Adapters

Analyzer plug is 7 pr. with dual grid cap for glass and metal tubes, and 5 ft. 8 wire cable. Plug has small base for entering closely shielded sockets. Shpg. wt. 2 lbs.

Octal Grid Lug for Analyzer Plugs

Modernizes old analyzer plugs having two grid studs. Replaces one of two regular studs for accommodating new small grid clips used on metal tubes.

YK11749—List 10¢
Your Cost **6¢**

Octal Base Speaker Plug

One-piece construction. Molded locator pin simplifies plugging into any octal socket. Each conductor protected with molded insulation to prevent short from pushed-back braid. List price 15¢.

YK11751—
Your Cost **9¢**

Dual Grid Stud for Analyzer Plugs

Modernizes old analyzer plugs to accommodate both regular glass and new small metal tube caps. Solders to grid wire of any analyzer cable. Nickel plated brass construction.

YK11750—List 10¢
Your Cost **6¢**

Electron Ray Tuning Indicator Adapters

Enables any set using 6 volt tubes and automatic volume control to use the new Electron Ray tube, type 6E5, and thus add visual tuning to the set. This tube operates similarly to a cathode ray tube, the narrowest band width of the shadow on the fluorescent screen indicating resonance. This tube also provides service men with a resonance indicator or substitute for cathode-ray for alignment work. The molded socket base with tube housing takes the 6E5 Indicator Tube. The adapter which connects to this housing is plugged into the power tube socket, and the power tube is placed into the adapter. Red lead connects to A.V.C. diode plate and black lead to chassis. Shpg. wt. 1 lb. complete.

YK11758—Complete Adapter, for 41 or 42 Tubes.
YK11759—Complete Adapter, for 6A4 or LA tubes.
Your Cost Each **\$2.06**

Adapters for Modernizing

YK11763—For small 7 latch-lock plug, in all Octal sockets except 5Z4.
Your Cost **73¢**

YK11764—Same as above, but without latch-lock.
Your Cost **59¢**

YK11765—For small 7 latch-lock plug for use in 5Z4 socket.
Your Cost **73¢**

YK11766—Same as above, but without latch-lock.
Your Cost **59¢**

YK11767—For use on all Octal Tubes, except 5Z4, in small 7 prong panel socket.
Your Cost **59¢**

YK11737—For 5Z4 tube, in UX socket.
Your Cost **59¢**

9 Prong Cable Plug and Socket

For analyzer, test, power cables, etc. Connects up to 9 wires to socket for easy insertion and removal. Elongated central prong makes quick locator. Socket uses dependable contacts. Shpg. wt. 1 lb.

YK11761—Plug only.
YK11762—Socket to match.
Your Cost **44¢ Each**

LITTELFUSE Products

Neon TATTELITE Tester

Ideal for servicemen and electricians for testing for blown fuses, live lines, open circuits, polarity, continuity tests, checking resistors, shorted condensers, and a multitude of other tests. Made in pocket size, it employs a tiny neon lamp which consumes negligible current, will glow on as little as .5 M.A., and may be used for indicating voltages of 90 volts D.C. and 60 volts D.C. and upwards. Varnished cambric insulation on leads made to withstand 5,000 volts. Glows pink on R.F., orange on D.C. and therefore most handy for servicing. A 50,000 ohm protective resistance is in series with the lamp, minimizing replacement of this unit. Full instructions of its many uses included. Shpg. wt. 1 lb.

YK11310—Your Cost... **59¢**

High Voltage Littlefuses

Efficient, renewable type fuses. Multi-break fuse wire blows each 1/2" of its length. Rated to blow at 50% above rating.

Selected TECHNICAL BOOKS for the SERVICEMAN

REFRIGERATION BOOKS

Official Refrigeration Service Manual

In this refrigeration manual every part is carefully explained; diagrams are furnished of every known machine; special care given to the service end. Tools needed are illustrated and explained; There are trouble shooting charts and other service data. Over 1200 diagrams; 840 pages; size 9x12"; flexible loose leaf cover. Makes electric refrigeration servicing easy. Shpg. wt. 4 lbs.

YR19904—**\$3.70**
Your Cost.....

Principles of Refrigeration

The work is in everyday language. With this book the practitioner is enabled to intelligently design or operate refrigerated machinery. The theoretical and fundamental operating principles are given attention first. This is followed by numerous practical considerations and the application of the fundamental principles to the economic production of ice and refrigeration for various purposes. Over 1,000 pages. Profusely illustrated in a cloth binding.

YY20009—**\$7.50**
Your Cost.....

Household Refrigeration

An enlarged fourth edition of the only book published on Domestic Refrigeration. Covers in detail the principles, types, construction and operation of domestic refrigerators and refrigeration. Contents include chapters on—Refrigeration Units and Theory—History and Principles of Refrigerating Systems: Domestic Ice Refrigerators—Refrigerants—Air Conditioning Commercial Systems—Miscellaneous Tables. This book is particularly suitable for students, engineers, and service men. Over 700 pages 6 1/2 x 9 1/4" in size, profusely illustrated.

YY20010—**\$4.00**
Your Cost.....

Radio and Television

A complete treatise on both radio and television. Was especially written for the theatre projectionist but will be found to be of value by anyone interested in these subjects.

Shpg. wt. 2 lbs.
YY19980—Your Cost. **\$3.50**

Practical Electricity and House Wiring

Covers just enough theory of electricity to make the subject interesting. An unusually good book on practical electricity and house wiring. Especially useful in the wiring of homes and farm buildings. Covers in understandable language, all about volts, amperes, watts; how to read your meter; difference between A.C. and D.C.; transformers, etc. Over 180 pages. Shpg. wt. 4 lbs.

YY20011—**\$1.35**
Your Cost.....

Your Invention

By E. B. Lyford

An up to date book on patents, trademarks and copyrights that takes all the mystery away from these subjects. No legal technicalities; just plain facts written in everyday language. Explains every step necessary to protect your ideas, how to select a

patent attorney, patent law, foreign patents, and other features down to the final stage of merchandising the equipment. Handsomely bound in rich gold lettered cloth. Shpg. wt. 1 lb.
YY22147—**\$1.50**
Your Cost.....

Lightning Radio Calculator

Solves in a moment, radio problems of frequency, wave-length inductance, capacity, coil size, and wire size. Saves

hours of time, and prevents errors. For radio amateur, engineer, and experimenter.
YY20012—**\$1.00**
Your Cost.....

Radio Noises and Their Cure

This valuable book describes how radio interference originates, is distributed, and how to cure its interference with radio programs. Written for both expert and listener. Shpg. wt. 1 lb.

YL12695—**\$3.50**
Your Cost.....

Practical Radio Communication

An excellent text for the student commercial operator, by Nilson and Hornung.

Deals with the latest in broadcast and commercial engineering. Covers fundamentals and all transmitting and receiving theory, besides practical design data. 754 pages, 434 illustrations. Great aid in getting a commercial license. Shpg. wt. 4 lbs.
YY20020—**\$5.00**
Your Cost.....

Electrical Communication

A complete history of electrical communications which includes detailed information on: Sound, Speech, Transmitters, Receivers

and Loudspeakers, Exchange and Toll Service systems, Telegraph and Telephone systems, Transmission Theory, Electron Tube Theory, Wireless Communications, etc., etc. 448 pages of useful information. By A. L. Albert, M.S. Shpg. wt. 6 lbs.
YY20019—**\$4.50**
Your Cost.....

Short-Wave Time Calculator

Expressly for the fan who is interested in local time of the DX stations heard. Set the chart

at your time, and read directly, the time in any other part of the world. Back lists stations and operating schedule.
YY20015—**\$10.00**
Your Cost.....

Practical Everyday Chemistry

A "How to make what you use" publication. No theory—practical working formulae for making hundreds of products. A "speaking acquaintance" with the products with which you are in constant contact. A book to which many publications, laboratories, manufacturing companies and trained individuals have contributed their knowledge and experience. For people who like the mysteries of the chemical world. 335 pages. Shpg. wt. 4 lbs.

on Radio transmitting and receiving, Sound Pictures, Public Address, Television, Photo-electric cells, etc. 1048 pages, 500 complete articles, 1100 additional definitions and references. 130 tables and graphs. Thoroughly covers new Superheterodynes, Short Wave Receivers and Converters and Aviation Radio. Self indexed to make every fact easy to find. Size 9x6 1/2 x 2 1/4. Shpg. wt. 10 lbs. **YY19938—**
Your Cost Each **\$3.92**

Radio Service

Questions and Answers
A compilation of many service problems and their answers. This book has been compiled by John F. Rider and consists of many questions received by him. Shpg. wt. 2 lbs. **YY19931—Vol. 1**
Your Cost **95¢**

A.R.R.L. Publications

Radio Amateur's Handbook

The most popular Handbook for Amateurs ever written. It is the most comprehensive book published, covering every phase of the subject. Includes: The Story of Amateur Radio; Getting Started; Electrical Fundamentals; Planning and Building Transmitters; and a host of other information. New twelfth edition contains new chapters on high frequency work, etc. 246 pages. Shpg. wt. 1 lb. **YY19949—12th Edition**
Your Cost **\$1.00**

How to Become a Radio Amateur

Second edition in 32 pages outlines the entire field of amateur radio. Makes learning the code easy, tells how to build a station, get a license, etc. Shpg. wt. 21 lbs. **YY19935—**
Your Cost **25¢**

Radio Amateur's License Manual

Covers every phase of Amateur License procedure in a clear and concise manner. Prepared in response to an uninterrupted demand for information on how to pass examinations and apply for licenses. Complete question and answer section covers every type of question you will be asked for any type license. You can save yourself a lot of worry by studying this helpful book. Shpg. wt. 2 lbs. **YY19940—**
Your Cost **25¢**

Hints and Kinks for the Amateur

Information—ideas—suggestions. Practical tips, brainstorming that worked, money saving dodges, time saving thoughts. A whole book full of them. A compilation of the best ideas in one cover. Shpg. wt. 2 lbs. **YY19981—**
Your Cost **50¢**

BOOKS for the AMATEUR

Radio Amateur Call Book

The only publication listing all Radio Amateur Stations throughout the entire world. Each issue contains a complete and accurate list of high frequency commercial stations, International abbreviations, "Q" readability system, "R" audibility system, "T" tone system, International prefixes, high frequency press and weather schedules, 320 pages. Shpg. wt. 2 lbs. **YY19936—Latest Edition**
Your Cost **\$1.25**

Short Wave Beginner's Book

Presents all the information needed to get the most out of short wave reception. Covers the actual building of a set, making of a short wave aerial, winding of coils and kinks in operating a receiver. Shpg. wt. 2 lbs. **YY19921—**
Your Cost **25¢**

10 Most Popular S. W. Receivers

How to Make and Work Them
Every set described has actually been built and tested by the editors of Short Wave Craft. Shpg. wt. 2 lbs. **YY19922—**
Your Cost **25¢**

Kruse's Radiophone Guide

Especially written for the phone man. A great deal of valuable information to assist you in getting the most out of your station. Batcher's Radiographs included. **YY22141—**
Your Cost **50¢**

The Radio Handbook

Just released and therefore right up to the minute. 292 pages of real information on newest developments. New metal tubes, new H.F. amateur receivers, transmitters—from a 1 tube beginners' job to a 1 KW for old-timers. Antennas, charts, and 5 meter data. 64 pages on New Electron Theory of electricity and radio. All in simple language. 296 pages overall. Shpg. wt. 4 lbs. **YY19999—**
Your Cost **\$1.00**

How to Design and Build 5 Meter Sets

How to design and build 5-meter transceivers, transmitters, etc., by Frank Jones with supplementary information by Kruse, Haigis, Hawkins, Hart. **YY22132—**
Your Cost **25¢**

Ultra Short Wave Amateur Band Communication

Practical data for using 3 1/2-meter and 5-meter bands. Reception and transmission below 10 meters is fully covered. Shpg. wt. 2 lbs. **YY19937—**
Your Cost **25¢**

Short Wave Listener

Contains the largest list of Short Wave Stations ever published. A distance chart showing the approximate distances between the principal cities of the world, also a map of the world. Shpg. wt. 2 lbs. **YY19920—**
Your Cost **25¢**

RCA Tube Manual

All the technical information on all the new tubes. Shpg. wt. 1 lb. **YY22142—**
Your Cost **20¢**

Actual Trouble in Radio Receivers

Several hundred different commercial receivers and their troubles in a pocket sized book. 64 pages. Free supplement included in price. **YY19979—**
Your Cost **\$1.00**

Short Wave Coil Book

Every possible bit of information on coil winding that you could need. Gives dimensions, sizes of wire to use, methods of computing turns needed, spacing, etc. No duplication. **YY22133—**
Your Cost **25¢**

Official Short Wave Radio Manual

A complete manual on short wave equipment and practice. An excellent book for use by Amateur and Radio Serviceman. Covers the construction, servicing and operation of both home built and commercially built receivers and converters. Also includes information on the construction and operation of amateur Transmitters. Everything pertaining to short wave is included. 240 pages. Shpg. wt. 4 lbs. **YY19952—**
Your Cost **\$2.00**

How to Pass U. S. Government Radio License Exams.

Complete information for passing government license tests for commercial license. Flexible covers. 9 1/2 x 7". 170 pages—92 illustrations. Shpg. wt. 2 lbs. **YY19956—**
Your Cost **\$1.80**

Books for the SERVICEMAN

Servicing Superheterodynes

Do you know all that you should to enable you to service superhets at a profit? . . . Are you familiar with various kinds of superheterodyne circuits? . . . Do you know the function of individual parts of a superheterodyne receiver—of an autodyne superhet? . . . Do you know what is meant by "image frequency"? . . . Can you adjust the Atwater-Kent "double spot" interference-eliminating system? Servicing Superheterodynes answers all these questions. Gives all the information you need about superhet receivers. 163 pages, type set, profusely illustrated, cloth bound. Shpg. wt. 2 lbs. **YY19927—**
Your Cost **95¢**

Servicing Receivers by Means of Resistance Measurement

By means of resistance measurement or what is more commonly known as point to point testing it is possible to service any type of set. This book describes this method in detail and furnishes all data necessary to service practically all sets made today. Like all other publications by John F. Rider it is very complete and all the information given is in clear, easily understandable form. With its help many a service problem is easily solved. Bound in strong serviceable hard cloth covers. This book together with the one listed above should be owned by every serviceman. Shpg. wt. 2 lbs. **YY19928—**
Your Cost **95¢**

DATA and TECHNICAL BOOKS

**BOOKS BY
GHIRARDI AND FREED**

Modern Radio Servicing

Contains innumerable facts on the most up-to-date methods of servicing. Auto Radio, Cathode Ray Applications, All-Wave, High Fidelity, etc., etc., completely described. 2nd Edition. Profusely illustrated with diagrams and schematics. 1300 pages.

YY22143—Your Cost \$4.00

Field Service Data and Answer Book

A handy reference book with a flexible binding. Contains comprehensive tube charts, wire tables, I.F.'s of all standard superhets, Symptoms and Remedies for troubles in over 500 models of standard receivers, Ignition troubles in car radios, etc.

YY22144—Your Cost \$1.50

Above two books, purchased together—Your Cost \$5.00

Radio Physics Course

A complete up-to-date Radio and Electrical Course which answers every question pertaining to Radio, Electricity, Photo-Electric Cells, Television and Talks. Second edition. 992 pages, 500 illustrations. A book the Technical Student, Set Builder or Service Man can not afford to be without. Written by an acknowledged leader in the field. 2nd Revised Edition.

YY19897—Your Cost \$4.00

Radio Engineering Handbook

Written by Keith Henney. Authoritative. Every section written by a specialist. A book every technical radio man should have. 583 pages. Shpg. wt. 2 lbs.

YY22140—Your Cost \$4.90

RADIO SERVICE *Manuals*

RIDER'S Perpetual Trouble Shooters Manual No. 5

John F. Rider's latest Manual—No. 5—contains circuit diagrams of receivers made as late as October, 1934. It contains more detailed information than any other Manual offered. 92.1% complete in I.F. specifications! 543 different Superheterodyne chassis made by 112 manufacturers are fully illustrated and described. Special attention has been paid to trimmer locations, voltage data, etc. 1200 pages in loose leaf binder.

YY19957—Vol. No. 5 Postpaid East of Mississippi. \$7.35

Your Cost \$7.35

VOLUME No. 4—Contains many diagrams of receivers that you are now receiving for service. These diagrams do not appear in previous or subsequent issues.

Service over 90% of all Standard Receivers with Trutest Power Transformers

NO EQUAL IN QUALITY AT THESE LOW PRICES!

Trutest Power Transformers, engineered by experts and constructed of the finest materials, truly deserve the popularity accorded them in the service field. Each unit is designed to provide ample safety factor under any normal conditions of use. As a result, Trutest Power Transformers are fully guaranteed, under R. M. A. standards, for a period of 90 days, against mechanical or electrical defects. This is your assurance that Trutest Transformers will live up to the claims made of them. To simplify installation, and to preclude possibility of error in wiring, each unit is furnished with a schematic diagram showing each terminal connection.

Furnished in both flush and horizontal mountings in the large variety of sizes given below, these transformers should prove applicable to most any receiver on the market. The flush type of mounting is recommended as furnishing the more finished appearance. For replacement work the horizontal type of mounting will be found to be more practical. Experimenters and set builders will find in Trutest Power Transformers

a solution to their long-felt wants. Compactness, ease of wiring and general appearance will go far to eliminate that "home made" look. On Flush Mounting Types, soldering lugs terminate on an insulated strip and protrude through the sub-panel. The Upright Horizontal Types have wire lead terminals and feet are provided on bases; the slight elevation permitting air circulation under cores.

For the New 6.3 Volt Tubes

5 and 6 Tube Sets
Up to Four Heater Type Tubes, One Power Tube and One 80 Rectifier

MOUNTING AREA: $3 \times 2\frac{1}{2}$ "
MOUNTING DIMENSIONS: $2\frac{1}{2} \times 2$ "
PRIMARY: 115 volts, 50-60 cycles.
SECONDARIES: 300/300 volts—50 M.A.
6.3 volts C.T., 2 amps. (for two or three heaters and one power tube).
5 volts, 2 amps. (80 filament).
Flush mounting type.
YC1518—Shpg. wt. 3 lbs.
Your Cost, Special **\$1.25**

7 and 8 Tube Receivers

Four or Five Heaters and Two Power Tubes (6.3) or Seven Heaters (6.3) and Two Power Tubes (2.5), One 80 or 5Z3 Rectifier

MOUNTING AREA: $3\frac{1}{4} \times 3\frac{1}{4}$ "
MOUNTING DIMENSIONS: $2\frac{1}{2} \times 3\frac{1}{4}$ "
PRIMARY: 115 volts, 50-60 cycles.
SECONDARIES: 350/350 volts—90 M.A.
6.3 volts C.T., 3 amps. (for three or four heaters and two power tubes).
2.5 volts C.T., 4 amps. (for two power tubes).
5 volts, 3 amps. (for 80 or 5Z3 rectifier).
Flush mounting type.
YC1519—Shpg. wt. 8 lbs.
Your Cost, Special **\$2.20**

9 and 10 Tube Receivers

Up to Seven Heater Type Tubes and Two Power Tubes (all 6.3) to Ten Heaters (6.3) and Two Power Tubes (2.5), One 80 or 5Z3 Rectifier

MOUNTING AREA: $3\frac{1}{4} \times 3\frac{1}{4}$ "
MOUNTING DIMENSIONS: $3\frac{1}{4} \times 2\frac{1}{2}$ "
PRIMARY: 115 volts, 50-60 cycles.
SECONDARIES: 350/350 volts—100 M.A.
6.3 volts C.T., 4 amps. (for seven heaters and two power tubes).
2.5 volts C.T., 4 amps. (for two power tubes).
5 volts, 3 amps. (for 80 or 5Z3 rectifier).
Flush mounting type.
YC1520—Shpg. wt. 9 lbs.
Your Cost, Special **\$2.65**

For use with the New Type Tubes

Up to 8 Heater Type Tubes
2 of the New 2A3 Power Tubes
1-83 Rectifier

Suitable both for Class A and Class A1 (a modified Class B amplification).
MOUNTING AREA: $4\frac{1}{2} \times 3\frac{1}{4}$ "
MOUNTING DIMENSIONS: $3 \times 3\frac{3}{4}$ "
PRIMARY: 115 volt, 50-60 cycles.
SECONDARIES: 400/400 at 150 M.A.
2 $\frac{1}{2}$ volts C.T. 5 amp.
2 $\frac{1}{2}$ volts C.T. 12 amp.
5 volts 3 amp.
Flush mounting type.
YC1517—Shpg. wt. 10 lbs.
Your Cost, Special **\$3.48**

Additional TRUTEST Power Transformer Specifications

As a further aid to the serviceman in selecting proper parts to fill his requirements, Trutest engineers offer the following information: Average temperature rise on all transformers listed below is 51° C.; Insulation between windings tested at 1500 volts; Primary tested at double the rated voltage.

5 and 6 Tube Receivers

For Three or Four 2 $\frac{1}{2}$ Volt Heater Tubes, One 2 $\frac{1}{2}$ Volt Power Tube and One 280 or 282 Rectifier

MOUNTING AREA: $3\frac{1}{4} \times 3\frac{3}{4}$ "
MOUNTING DIMENSIONS: $3\frac{1}{2} \times 2\frac{1}{2}$ "
PRIMARY: 115 volts, 50-60 cycles.
SECONDARIES: (1) 700 volts C.T.—70 M.A.
(2) 5 volts, 2 amps. (one 280 filament), or 2.5 volts, 3 amps. (one 282 filament).
(3) 2.5 volts, 8.75 amps. (3 or 4 heaters and 1 power tube).
Shipping weight 6 lbs.

RCA-Victor R28, RE-40, 110, 111, 115, 210, 310, G.E. K-50, K-54
Genuine Part No. 8985. Shpg. wt. 6 lbs.
YC2008—Your Cost \$2.56

RCA-Victor R-7 "Superette" G.E. S-22; Graybar 8 Midget
Genuine Part No. 8679. Shpg. wt. 7 lbs.
YC2187—Your Cost \$1.65

RCA-Victor Model 100
Genuine RCA Part No. 9045. Also used in GE Model K-43 and in Westinghouse WR-32. Shpg. wt. 4 lbs.
YC2018—List \$4.84 Your Cost \$2.90

GENERAL MOTORS Power Transformers Model S1A

For chassis numbers: 216, 217, 219 and 250. Original Part No. 1204245. For 3-'35s, 1-'24, 2-'27s, 1-'47 and 1-'80. Shpg. wt. 8 lbs.
YC2521—Your Cost \$2.45

For Model S3A
Chassis No. 252, 253, 254, 255, 256, 257 and 258. Original Part No. 1204179. For 3-'35s, 1-'24, 3-'27s, 2-'45s and 1-'80. Shpg. wt. 10 lbs.
YC2520—Your Cost \$2.45

Columbia Model S.G. 8
An exact duplicate of the original power transformer for the Screen Grid 8 model of Columbia Radio Corp. Utilizing 3-'24s; 2-'27s; 2-'45s and 1-'80 tubes. Shpg. wt. 15 lbs.
YC2305—Your Cost \$3.40

SPARTON Models 589, 591, 593, and 931 Sparton No. B2339
Replacement for the above models utilizing 7-C-484s, or 485s; 2-C, 182s or C-183s, and 1-C-280 tubes. Shpg. wt. 10 lbs.
YA234—Your Cost \$3.53

Exciter Lamp Transformer

For supplying exciter lamp current for either 8-volt lamps at 4 amps., or 10 volt lamps at 7.5 amps. Tapped secondary permits change from one type to the other. Ruggedly built with ample overload and safety margin. Dimensions, 3 1/4 x 3 1/4 x 3". Available with mounting brackets for either horizontal or vertical mounting. Specify type desired. Shpg. wt. 5 lbs.
YC2019—Your Cost \$2.45

MAJESTIC, Model 380

Exact duplicate replacement power transformer. No difficulty in installing—fits same installation mounting holes; and all leads similarly color coded. Has greater safety margin due to all faults in design of original being eliminated in this replacement. Comprises four windings: 1-105-120 volts primary; high voltage secondary; 1-6 volt fil. sec.; and 1-2.5 volts for rect. filament. Shpg. wt. 4 lbs.
YC2016—Your Cost \$1.70

Stewart-Warner

Model R-119 Part No. 83442
The genuine Stewart-Warner power transformer for the above model set. Set uses 2-78's, 1-6A7, 1-85, 1-42 and 1-80. Has one 6.3 volt winding at 2 amps.; one 5 volt winding at 2 amps. High voltage 350-350 at 80 M.A. Primary for 110 volts, 50-60 cycles. Upright mounting. Shpg. wt. 5 lbs.
YC1804—Your Cost \$1.59

Models 102A, B, E
Exact duplicate of Part No. 67556. Set uses 2-24A's, 1-35, 1-27, 1-47 and 1-80. Color coded leads. Open type. Shpg. wt. 9 lbs.
YC2214—Your Cost \$2.95

Atwater Kent POWER UNITS

These units have been built to the original manufacturers' specifications, and are guaranteed to give lasting and satisfactory service. All are color coded exactly like the original. Complete diagrams supplied with each unit.

For Models 40, 56 and 57
Shpg. wt. 17 lbs.
YB1376—Your Cost \$4.95

For Model 41 D.C.
Comes complete with resistors. Shpg. wt. 17 lbs.
YB1383—Your Cost \$1.95

For Models 42, 44, 45 and 52
Shpg. wt. 17 lbs.
YB1376—Your Cost \$4.95

For Models 43, 46, 47 and 53
Shpg. wt. 19 lbs.
YB1375—Your Cost \$6.90

Atwater-Kent Power Transformer Models 70, 72, 75, L-1, L-2, H-1, H-2

An exact duplicate of the original Atwater-Kent Power transformer used in the above models. Has the special high voltage secondary winding as used on the original. Extra heavy duty filament winding. No changes necessary to install this unit. Shpg. wt. 6 lbs.
YC2440—Your Cost \$3.15

Mail Your Orders to NEW YORK, CHICAGO or ATLANTA

Trutest "Bottom Shell" Power Transformers

A completely shielded transformer approved by the Underwriters.

For 5 to 6 Tubes

Secondaries: 5 volts at 3 amps., 2.5 volts at 5 1/2 amps., 2.5 volts C.T. at 1 1/2 amps., 650 volts C.T. at 50 M.A. Dimensions: 2 3/4 x 3 1/4 x 3 3/4". Shpg. wt. 5 lbs.

M.A.; primary 115 volts 50-60 cycles. Dimensions: 2 3/4 x 3 1/4 x 3 3/4". Shpg. wt. 5 lbs.
YC1450
Your Cost

\$1.40

For 6 and 7 Tubes

Secondaries: 2.5 volts at 7 amps., 2.5 volts C.T. at 3 amps., 5 volts at 3 amps., 700 volts C.T. at 70 M.A. Dimensions: 3 1/4 x 3 1/4 x 3 3/4". Primaries 115 volts 50-60 cycles. Shpg. wt. 6 lbs.

YC1451
Your Cost

\$1.60

For 8 and 9 Tubes

Secondaries: 2.5 volts at 10.5 amps., 2.5 volts C.T. at 3 amps., 5 volts at 3 amps., 700 volts C.T. at 90 M.A. Primary 115 volts 50-60 cycles. Dimensions: 3 3/4 x 4 1/4 x 3 3/4" high. Shpg. wt. 7 lbs.

YC1452—Your Cost

\$1.95

For 6.3 Volt Tubes For 4 and 5 Tubes

Secondaries: 6.3 volts C.T. at 1.6 amps., 5 volts at 2 amps., 650 volts C.T. at 50 M.A. Dimensions: 2 1/4 x 3 1/4 x 3 3/4" high. Primary: 115 volts 50-60 cycles. Shpg. wt. 4 lbs.

YE5492
Your Cost

\$1.10

For 6 and 7 Tubes

Secondaries: 6.3 volts C.T. at 2.8 amps., 5 volts at 3 amps., 650 volts C.T. at 70 M.A. Dimensions: 2 1/4 x 3 1/4 x 3 3/4" high. Primary: 115 volts 50-60 cycles. Shpg. wt. 8 lbs.

YE5493—Your Cost

\$1.45

Step-Down Transformer 220 Volt to 110 Volt

Fully shielded with 6 foot heavy lamp cord for 220 volt line, and flush receptacle for 110 volt side. Size 3 1/4 x 4 1/2 x 5 1/2" high, mounting centers 2 1/2 x 3 1/4". For Receivers and Appliances drawing up to 160 watts. Shpg. wt. 9 lbs.

YC1968
Your Cost

\$2.80

Same as above, but for appliances drawing up to 80 watts. Shpg. wt. 6 lbs.

YC1969—Your Cost

\$2.05

RADIART 160 Watt

Variable Step-Down Transformer 200-250 V. to 110-120 V.

This transformer has a variable primary. Will handle 160 watts continuously. Comes with 16" of lamp cord with female receptacle for 110-120 volt outlet, and 5 ft. lamp cord with male plug for 200-250 volt input. Size 3 3/4 x 3 1/2 x 4". Mounting centers 1 1/2 x 3 1/2". Shpg. wt. 9 lbs.

YC1970—List \$7.50
Your Cost

\$4.40

NOTE

We carry in stock at all times, a most complete line of every type and style of power transformers. Special power transformers, requiring different type windings, can be supplied at a most reasonable cost, to your own specifications. We will be pleased to quote on large quantities to jobbers and set manufacturers.

Truest Universal Mounting Transformers

YC1463—YC1476—YC1477
—Dimensions: 4 1/2 x 3 3/4 x 3 1/2"
Mounting: 1 1/4" to 2 1/4 x 1 1/4" to 2 1/4", or 1 1/4" or 1 1/2" to 2 1/4 x 1 1/4" to 3 1/4".
YC1475—Dimensions: 4 1/2 x 3 3/4 x 3 3/4". Mounting: 1 1/4" to 2 1/4 x 1 1/4" to 2 1/4", or 1 1/4" to 2 1/4 x 1 1/4" to 3 3/4". All 25 cycle transformers are slightly larger in size.

For New Type Sets

8 to 10 Tubes
For 5-227's or 224's; 2-245's or 247's, 1-280. Primary: 110 volts 50-60 cycles.
Secondaries: (1) 700 volts C.T. 110 M.A. (plate). (2) 5 volts C.T. 2 amps. (1-280 filament). (3) 2.5 volts C.T. 3.5 amps. (2-245 or 247 filament). (4) 2.5 volts C.T. 8.75 amps. (5-227's or 224's filament). Shpg. wt. 6 lbs.

YC1477—Your Cost... \$2.10

For 110 volts 25 cycles. Shpg. wt. 10 lbs.
YC1467—Your Cost... \$3.45

10 to 12 Tubes

For 7-277's, or 224's, 2-245's or 247's, 1-280. Primary: 110 volts 50-60 cycles.
Secondaries: (1) 700 volts C.T. 110 M.A. (plate). (2) 5 volts. 2 amps. (1-280 filament). (3) 2.5 volts C.T. 3.5 amps. (2-245's or 247's filament). (4) 2.5 volts C.T. 12.25 amps. (7-277's or 224's filament). Shpg. wt. 10 lbs.
110 volts 50-60 cycles. **\$2.55**
YC1475—Your Cost
For 110 volts 25 cycles. Shpg. wt. 15 lbs.
YC1465—Your Cost... \$3.95

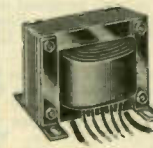

For Old Type Sets

8 to 10 Tubes
For 6-226's, 1-227, 2-171A's, 1-280. Primary: 110 volts 50-60 cycles.
Secondaries: (1) 600 volts C.T. 80 M.A. (plate). (2) 5 volts, 2 amps. (1-280 filament). (3) 2.5 volts C.T. 1.75 amps. (1-227 filament). (4) 5 volts C.T. 1/2 amp. (2-171A's filament). (5) 1.5 volts 6.3 amps. (6-226's filament). Shpg. wt. 6 lbs.
110 volts 50-60 cycles. **\$2.30**
YC1476—Your Cost
For 110 volts 25 cycles. Shpg. wt. 10 lbs.
YC1466—Your Cost... \$3.75

7 to 9 Tubes

For 6-227's, or 224's, 2-171A's, 1-280. Primary: 110 volts 50-60 cycles.
Secondaries: (1) 600 volts C.T. 70 M.A. (plate). (2) 5 volts, 2 amps. (1-280 filament). (3) 5 volts C.T. 1/2 amp. (2-171A's filament). (4) 2 1/2 volts C.T. 10.5 amps. (6-227's or 224's filament). Shpg. wt. 6 lbs.
110 volts 50-60 cycles. **\$2.30**
YC1463—Your Cost
For 110 volts 25 cycles. Shpg. wt. 10 lbs.
YC1464—Your Cost... \$3.75

Field Exciter Transformers

Open type with long color coded leads. Have primary, high voltage and rectifier filament windings. Deliver full rated voltages and current. Primaries for 105-120 volts, 50-60 cycles A.C. Average size 3x2 1/2 x 2". Shpg. wt. 4 lbs.

YC2291—Delivers 250 volts at 50 M.A. with 80 rectifier. **Your Cost Each... \$1.45**

YE5506—Delivers 100 volts at 110 M.A. with 80 rectifier. **Your Cost Each... \$1.95**

YE5507—Delivers 160 volts at 160 M.A. with 83 rectifier. **Your Cost Each... \$2.25**

Mail Your Orders to NEW YORK, CHICAGO or ATLANTA

THORDARSON POWER TRANSFORMERS

Fully Shielded Types

Upright mounting transformers, with long color coded leads at the bottom. Knockouts in sides of shield allow bringing leads through for wiring on top of chassis. All voltage and current ratings are accurate.

2.5 Volt (7 to 11 Tubes)

T-5602—Secondaries: 700 volts C.T. at 70 M.A.; 2.5 V.C.T. at 9 amps.; 2.5 volts C.T. at 1.5 amps.; 5 volts at 2 amps. Dimensions: $4\frac{1}{2} \times 3\frac{1}{2} \times 3\frac{1}{2}$ "; mounting holes $2\frac{1}{2} \times 3$ ". Shpg. wt. $7\frac{1}{2}$ lbs. **Your Cost**..... **\$2.50**

2.5 Volt (8 to 12 Tubes)

T-5604—Secondaries: 700 volts C.T. at 105 M.A.; 2.5 volts C.T. at 12 amps.; 5 volts at 2 amps. Dimensions: $5 \times 3\frac{1}{2} \times 3\frac{1}{2}$ "; mounting holes $3 \times 3\frac{1}{2}$ ". Shpg. wt. 9 lbs. **Your Cost**..... **\$3.09**

2.5 Volt (10 to 14 Tubes)

T-5605—Secondaries: 700 volts C.T. at 110 M.A.; 2.5 volts C.T. at 9 amps.; 2.5 volts C.T. at 3 amps.; 2.5 volts C.T. at 3 amps.; 5 volts at 2 amps. Dimensions: $5 \times 3\frac{1}{2} \times 3\frac{1}{2}$ "; mounting holes $3 \times 3\frac{1}{2}$ ". Shpg. wt. 11 lbs. **Your Cost**..... **\$3.38**

6.3 Volt (7 to 8 Tubes)

T-7061—Secondaries: 770 volts C.T. at 70 M.A.; 6.3 volts C.T. at 2.5 amps.; 5 volts at 2 amps. Dimensions: $4\frac{1}{2} \times 3\frac{1}{2} \times 3\frac{1}{2}$ "; mounting holes $2\frac{1}{2} \times 2\frac{1}{2}$ ". Shpg. wt. 7 lbs. **Your Cost**..... **\$2.35**

For Class "B" Receivers

T-6793—Secondaries: 700 volts C.T. at 200 M.A.; 2.5 volts C.T. at 15 amps.; 5 volts at 3 amps.; 5 volts C.T. at 2 amps. Dimensions: $5 \times 3\frac{1}{2} \times 4\frac{1}{2}$ "; mounting holes $3\frac{1}{2} \times 3\frac{1}{2}$ ". Shpg. wt. 12 lbs. **Your Cost**..... **\$4.70**

T-6935—Secondaries: 775 volts C.T. at 200 M.A.; 6.3 C.T. at 3 amps.; 5 amps. at 3 amps. Dimensions: $5 \times 3\frac{1}{2} \times 4\frac{1}{2}$ "; mounting holes $3 \times 2\frac{1}{2}$ ". Shpg. wt. 12 lbs. **Your Cost**..... **\$4.12**

HALF-SHELL TYPES

Designed for general replacement purposes and for use in new equipment. Flush mounting type with solder lug terminals mounted

on fibre supports. All terminals coded for easy identification.

2.5 Volt (4 to 6 Tubes)

T-5002—Secondaries: 4 volts at 2 amps.; 2.5 volts C.T. at 5 amps. and 620 volts C.T. at 40 M.A. Dimensions: $3 \times 3\frac{1}{2} \times 3$ "; mounting centers $2\frac{1}{2}$ ". Shpg. wt. 5 lbs. **Your Cost**..... **\$1.62**

2.5 Volt (5 to 9 Tubes)

T-4900—Secondaries: 5 volts at 2 amps.; 2.5 volts C.T. at $8\frac{1}{2}$ amps. and 700 volts C.T. at 70 M.A. Dimensions: $3\frac{1}{2} \times 3$ ". Hole required in chassis $1\frac{1}{2} \times 2\frac{1}{2}$ ". Shpg. wt. 8 lbs. **Your Cost**..... **\$1.90**

2.5 Volt (8 to 12 Tubes)

T-6363—Secondaries: 5 volts at 2 amps., 2.5 volts C.T. at 3 amps., 2.5 volts C.T. at 9 amps. and 700 volts C.T. at 80 M.A. Dimensions: $3\frac{1}{2} \times 3\frac{1}{2}$ ". Chassis hole $1\frac{1}{2} \times 2\frac{1}{2}$ ". Shpg. wt. 8 lbs. **Your Cost**..... **\$2.35**

2.5 Volt (8 to 14 Tubes)

T-5003—Secondaries: 5 volts at 2 amps.; 2.5 volts C.T. at 12 amps. and 700 volts C.T. at 80 M.A. Dimensions: $3\frac{1}{2} \times 3\frac{1}{2} \times 3\frac{1}{2}$ "; mounting holes $3\frac{1}{2} \times 2\frac{1}{2}$ ". Shpg. wt. 8 lbs. **Your Cost**..... **\$2.20**

6.3 Volt

T-7021—Secondaries: 6.3 volts C.T. at 3 amps.; 2.5 volts at 4 amps.; 5 volts at 2 amps. and 700 volts C.T. at 70 M.A. Dimensions: $3\frac{1}{2} \times 3\frac{1}{2}$ ". Chassis hole $1\frac{1}{2} \times 2\frac{1}{2}$ ". Shpg. wt. 8 lbs. **Your Cost**..... **\$2.05**

All Primaries designed for 110-115 volts, 50-60 cycles A.C. All terminal connections coded (color or number).

Transformers For Sets Using Type '26 Tubes Fully Shielded

T-5601—Secondaries: 650 volts C.T. at 70 M.A.; 1.5 volts C.T. at 4 amps.; 1.5 volts C.T. at 1 amp.; 2.5 volts C.T. at 3 amps.; 5 volts C.T. at 5 amps.; 5 volts at 2 amps. Dimensions: $4\frac{1}{2} \times 3\frac{1}{2} \times 3\frac{1}{2}$ "; mounting holes $2\frac{1}{2} \times 3$ ". Shpg. wt. 8 lbs. **Your Cost**..... **\$2.65**

T-5603—Secondaries: 700 volts C.T. at 105 M.A.; 1.5 volts C.T. at 5 amps.; 1.5 volts C.T. at 1 amp.; 2.5 volts C.T. at 3 amps.; 2.5 volts C.T. at 1.75 amps.; 5 volts at 2 amps. Dimensions: $5 \times 3\frac{1}{2} \times 3\frac{1}{2}$ "; mounting holes $3 \times 2\frac{1}{2}$ ". Shpg. wt. 9 lbs. **Your Cost**..... **\$3.23**

Special Values in High Power Transformers

Fully shielded type as illustrated above with the exception of T-6541, which is half snail type with lugs at bottom (illustrated at left). Are suitable for receivers and low power transmitters. Prices are unusually low.

T-6912—Secondaries: 800 volts C.T. at 100 M.A.; 2.5 volts C.T. at 5 amps.; 2.5 volts C.T. at 5 amps.; 5 volts at 3 amps. Dimensions: $4\frac{1}{2} \times 3\frac{1}{2} \times 3\frac{1}{2}$ ". Shpg. wt. 7 lbs. **Your Cost**..... **\$2.25**

T-3773—Secondaries: 870 volts C.T. at 150 M.A.; 2.5 volts C.T. at 5 amps.; 7.5 volts C.T. at 2.5 amps.; 5 volts at 3 amps. Dimensions: $5 \times 3\frac{1}{2} \times 3\frac{1}{2}$ ". Shpg. wt. 10 lbs. **Your Cost**..... **\$2.95**

T-6541—Secondaries: 1000 volts C.T. at 150 M.A.; 2.5 volts C.T. at 8 amps.; 7.5 volts C.T. at 2.5 amps.; 5 volts at 3 amps. Dimensions: $5 \times 3\frac{1}{2} \times 4\frac{1}{2}$ ". Shpg. wt. 14 lbs. **Your Cost**..... **\$3.25**

NOTE—Information on the new Thordarson 6 watt and 30 watt amplifier kits is available. Write for prices and discounts.

New! THORDARSON 18 Watt High-Gain Power Amplifier Kit

"Build-It-Yourself"

This excellent amplifier will operate with either crystal, ribbon, dynamic or carbon mikes and can be used with any type input without changing the circuit. Supplies field current for one to four speakers. Supplies mike current for carbon mikes. Gain of 114.9 db. Both gain and tone controls. Output impedances 4, 8, 15 and 500 ohms. Excellent frequency response. Two units—amplifier and power supply. **Foundation Unit**

contains: power supply base with three sockets mounted, amplifier base with nine sockets mounted, sub-assembly base and four resistance strips, one each, input and output terminal strips and complete instructions and diagrams for assembling. Shpg. wt. 7 lbs. **YM12865**—Foundation Unit as described. List \$6.00 **Your Cost**..... **\$3.53**

One each of the following required: Average shpg. wt. 6 lbs.
YA300—T-7428 Power Transformer. **Your Cost**..... **\$3.82**
YR336—T-7429 Power Choke. **Your Cost**..... **2.79**
YA332—T-7430 Filter Choke. **Your Cost**..... **.88**

YA328—T-6594 Output Transformer. **Your Cost**..... **2.94**

NOTE—For complete list of additional parts required, write for free technical bulletin describing this amplifier in detail. Full technical specifications and diagrams included.

New! THORDARSON Capacity and Leakage Tester. Sold in Kit Form

A combined condenser capacity and leakage tester which will prove an invaluable aid to the serviceman. Sold in kit form, it is inexpensive to build. It checks capacities from 001 to 50 mfd. in five ranges. In addition, any unknown resistor, condenser or iron core choke may be compared with any similar known standard by use of a bridge ratio comparison circuit. Leakage is indicated by a neon bulb. Voltage for leakage test derived from D.C. power supply of the receiver under check or from an external B supply. Voltage through neon bulb automatically polarizes the condenser.

FOUNDATION KIT—Consists of a portable walnut instrument case; an etched and drilled metal panel and scale, mounting screws and complete instructions. Shpg. wt. 8 lbs. **YJ10540**—**Your Cost**..... **\$2.64**

THORDARSON

Replacement

AUDIO

TRANSFORMERS

Straight Audio Transformers

Thordarson Audio Transformers are universally acknowledged to be the standard of excellence with regard to quality and dependability. They are ruggedly built to withstand any normal condition of use, and the fine quality of the materials used assures perfect satisfaction. Units are available in all popular types of mounting. Type R-300 is specially designed for P. A. work.

Stock No.	Type No.	Mount.	Turn Fig.	Turn Ratio	Dimensions H. W. D.	List Price	Your Cost

Average shipping weight 3 lbs.

Output Coupling Transformers

The listing below has been chosen so that it would cover practically all tube and speaker combinations in general use. Types R107 and T5701 are Universal Transformers. They will match the impedance of any single or P.P. output tubes to voice coils of from .1 to 29 ohms impedance (provided with five secondary taps). Average shipping weight 3 lbs.

Stock No.	Type No.	Mount.	To Match	Sec. Imp. Ohms	Your Cost

P.P. Input Transformers

The units listed below are designed to couple a 10,000 ohm plate to P.P. grids. The 10,000 ohm plate includes type 56, 76, 37, 27, 01A, 30, 55, 85, 57, 77 and 6C6 tubes as triodes. To grids of any tubes operating in Class A and delivering under 15 watts. The power detector transformers are designed for highly selective sets to compensate for the loss of high notes due to side band cutting.

* May carry grid current in Class AB; not for use in Class B stages.

Filter Chokes

All Thordarson Filter Chokes are designed to secure maximum inductance possible for the specified operating conditions. Careful insulation and rugged construction make them the ideal audio components. The inductance ratings shown below are taken with full rated current flowing through the choke. Average shipping weight 3 lbs.

Stock No.	Type No.	Mount.	Unductance	Cap'y M.A.	Res. Ohms	Your Cost

THORDARSON

ELECTRIC MFG. CO.

Type T-4252 P. P. Input

A fully shielded transformer attractively finished in black enamel. Extra heavy core. For use with 27 into 45, 47, 42, 71A, etc., tubes. Used in Philco models 65, 95, 96, 111, 112. Shpg. wt. 3 lbs.
YC1755
Your Cost... **\$1.70**

Type T-3855 P.P. Input

Similar in appearance to the above. Ratio 1:4. For use with 27 into a 26 tube (by omitting the center tap) or 26 into P.P. 45, 71A, 31, 50, etc. Used in Philco 86 and 87. Shpg. wt. 3 lbs.
YC1756
Your Cost... **\$1.34**

THORDARSON

ELECTRIC MFG. CO.

T-2927 Screen Grid Coupler

For coupling a screen grid tube to an audio stage. Will provide approximately 3 times the gain of resistance coupling. Inductance 1080 henries at 8 M.A. maximum D.C. Has leads. Size: 1 1/4 x 2 1/2 x 2" high. Shpg. wt. 3 lbs.
YE5497—Screen Grid Coupler
Your Cost... **73¢**

NOTE

Due to limited space it is impossible to list the complete Thordarson line. We can supply any Thordarson product at 40 and 2% from List.

THORDARSON

ELECTRIC MFG. CO.

Type T-1700B Filter Choke

Fully cased filter choke rated 8.75 henries, 130 M.A. (inductance measured under full load). Has D.C. resistance of 231 ohms. 1600 volt insulation. Size: 3 1/4 x 2 1/4 x 3" mtg. centers 3 1/4". Shpg. wt. 4 lbs.
List price \$3.25
YA269
Your Cost... **\$1.90**

Type R-196 Choke

Fully shielded with binding post terminals on side. Rated inductance 15 henries at 85 M.A. (inductance at full rated load). Size 3 x 2 1/4 x 2 1/4". Shpg. wt. 4 lbs.
YA242—Your Cost... **\$1.76**

Every Day is BARGAIN DAY at Wholesale Radio Service Co., Inc.

STANDARD AUDIO Transformers

Lafayette "P.A." Transformers

Employ the finest grade of high permeability core material. Each unit individually checked for frequency characteristics and overall performance. Uniform response, low wave-form distortion, high efficiency, thorough shielding and dependability are assured. Only more popular numbers are listed below; for complete line refer to page 116 in Catalog 56.

CLASS B OUTPUTS

P.P. 49, 53, 79, 89 plates to 500, 200, 16, 8, 5, 3 and 1.5 ohms. Type A mounting.

YD5430—Your Cost \$3.95

P.P. 46 or 59 plates to 500, 200, 16, 8, 5, 3, and 1.5 ohms. Type A mounting.

YE5431—Your Cost \$3.95

Tube to Line Transformers

From a low level triode plate to 500, 200 or 50 ohms. Type A mounting.

YC2576—Your Cost \$3.75

Class A Output Transformers

All secondary impedances of the units listed below are tapped for 500, 250, 15, 8, 5, 3 and 1.5 ohms.

Primary 5000 ohms plate to plate or 3000 ohms plate to plate. For 5000 ohms will match P.P. self bias 2A3's. Single 59 triode, 71A, or 2B6. For 3000 ohms will match P.P. 2A3's fixed bias. Type B mounting.

YC2563—Your Cost \$3.95

Primary 2500 ohms plate to plate or 1500 ohms plate to plate. For 2500 ohms will match four self biased 2A3's in push-pull parallel circuit. For 1500 ohms will match four 2A3's in push-pull parallel circuit fixed bias. Type C mounting.

YC2564—Your Cost \$5.75

Primary 8000 ohms plate to plate. Will match P.P. 50's, 45's, 43's. Single 211, 843, 842, 205D, 48. Type B mounting.

YC2562—Your Cost \$3.95

Primary 4000 ohms plate to plate. Will match four 50's in push-pull parallel. Type C mtg.

YC2579—Your Cost \$5.75

Primary 10000 ohms or 6000 ohms plate to plate. For 10000 ohms will match P.P. 69 triodes, 71A's, 2B6's, Single 10, 41, 268A, 2A3. For 6000 ohms will match P.P. 62A's, or single 31, 46, 59 pentode. Type B mtg.

YC2592—Your Cost \$3.95

New UTC Varitone

A revolutionary audio device which permits full control of audio response. Enables tone correction or emphasis of high or low notes or both. Makes phono and radio reception more pleasurable and more life-like. Suited for adaptation to theatre sound equipment. Will help attenuate "lows" that cause reverberation. Type VT-1 and VT-2 used in conjunction with a 50,000 ohm potentiometer. Technical details, including all possible tone variations (curves) sent on request. Shpg. wt. each, 2 lbs.

Type VT-1: Designed to work from a single plate or low impedance line or mike to one or two grids.

YE5531—List \$8.50

Your Cost \$5.10

Type VT-2: For insertion across a 200 or 500 ohm line or across a 5000 to 20,000 ohm plate.

YE5532—List \$6.00

Your Cost \$3.60

Type VT-3: Connects directly from plate to B plus of first audio triode. No external control used.

YE5533—List \$5.00

Your Cost \$3.00

CLASS A INPUTS

From one plate to one grid. Ratio 3:1. Type A mtg.

YC2569—Your Cost \$2.50

From one plate to two grids. Ratio 2:1 each side. Split secondaries. Type A mounting.

YC2570—Your Cost \$2.75

From 2 plates to 2 grids. 1:75 ratio each side. Both primary and secondary in two sections. Type A mounting.

YC2571—Your Cost \$3.45

500, 200 or 50 ohm line to single grid. Type A mounting.

YC2572—Your Cost \$3.75

500, 200 or 50 ohm line to push-pull grids. Type A mounting.

YC2578—Your Cost \$4.25

Mixing and Matching Transformers

Mixing 500, 200 or 50 ohm line to 500, 200 or 50 ohm line. Type A mounting.

YC2594—Your Cost \$3.25

SPECIAL AUDIO Transformer

This compact audio unit can be used in any set, either A.C. or D.C., using straight audio amplification. Its low height makes it especially suited for sub-base installations. Two sets of brackets are provided for horizontal or vertical mounting. Turn ratio 3:1. Core of high grade silicon steel. Units afford exceptionally fine frequency response. Supplied with long insulated leads for direct connections in chassis. Size 1 3/4" high, 2 3/4" wide and 2 3/4" deep. Shpg. wt. 2 lbs.

YE5461—Your Cost, Special \$73.00

"STAR" SEALED AUDIO

This transformer is fully sealed in a sheet metal case that prevents opens due to moisture. Coil machine wound to insure accuracy. Core of silicon steel. Turn ratio 3:1. Size 2 3/4" x 2 3/4" x 2 3/4". Binding post terminals. An excellent transformer for use in practically any type of receiving set or amplifier. Unusually fine response. Shpg. wt. 2 lbs.

YE5462—Type 467-113. Your Cost Each \$1.18

NOTE

We can supply any Jefferson product, not shown here, at 40 and 2% off list price.

P.P. Input Transformer

With soldering lug terminals on each side. High grade core material assures excellent frequency response. Turn ratio

3:1. Size 2 3/4" x 2" x 2". Shpg. wt. 2 lbs. **YE5485—Your Cost** \$95.00

Speaker Field Transformer

Designed to deliver high voltage D.C. to dynamic speaker fields. Pri. 115 V. 60 cycles. Secondary, — fil. — 5 V. at 3A. H.V. 240 V. D.C. at 150 M.A. For type 80, 5Z3 or 83 rectifier tube. Dim.—3 1/4" x 3 1/2". D.C. output capacity—36 watts. Shpg. wt. 3 lbs. **YE5599—Your Cost** \$2.05

Velocity Mike Trans.

Small size ribbon mike transformer with excellent characteristics. Matches ribbon to either 50 or 200 ohm line. Especially suitable for medium priced velocity microphones. Dimensions 2 1/4" x 2 1/4" x 2 3/8". Cased and suitable for all ordinary requirements. Shpg. wt. 1 lb. **YE5598—Your Cost** \$1.47

Mike Transformer—2-Button

Has a turn ratio of 1:45. Impedance ratio 1: 2000. Has flat response curve from 30-7000 cycles. 3 1/4" x 2 1/4" x 3 1/4". Shpg. wt. 2 1/2 lbs. **YC1929—Your Cost** \$95.00

JEFFERSON Transformers

UNIVERSAL OUTPUTS

Primary and secondary tapped to match the output of any existing output tube to any voice coil. Full instructions for connections for various types of tubes and voice coils included. Size 1 3/4" x 2 3/4" x 2". Shpg. wt. 2 lbs.

YE5432—Type 467-170. Your Cost Each \$94.00

Identical with the above, but with oversized core. Size 2 x 2 3/4" x 2". Type 467-176.

YE5433—Your Cost Each \$1.18

UNIVERSAL INPUTS

Can be used as straight radio, P.P. input, or double P.P. input transformer. Leads and lugs. Size 1 3/4" x 2 3/4" x 2". Shpg. wt. 2 lbs.

YE5434—Type 467-168. Your Cost Each \$94.00

Type 467-175 Similar to the above, but with oversized core. Size 2 x 2 3/4" x 2".

YE5435—Your Cost Each \$1.18

Filter Chokes

Type 466-135—Inductance 8 Henries, max. D.C. 80 M.A. Resistance 255 ohms. Size 1 3/4" x 2 3/4" x 2". Shpg. wt. 2 lbs.

YE5436—Your Cost Each \$73.00

Type 466-125—Inductance 10 Henries, max. D.C. 100 M.A. Resistance 275 ohms. Size 2 x 2 3/4" x 2". Shpg. wt. 3 lbs.

YE5437—Your Cost Each \$88.00

Trutest De Luxe AUDIOS

The Most Comprehensive Line of DELUXE AUDIO EQUIPMENT AVAILABLE

The excellent performance of Trutest De Luxe Audio Equipment is due to intelligent design, unusual care in manufacture and selection of high quality material. Special high quality steel is used in the core laminations and a coil structure is employed which provides low distributed capacity, low capacity coupling and a high coupling factor. In all cases where a tap is brought out, it is done between sections and never from within the winding. Coils are layer wound and carefully tested. Failure due to coil defects are almost unheard of.

Core steel is treated for maximum magnetic value. Dimensional accuracy of laminations and assembly insures complete freedom from the perplexing hum caused by even a slight irregularity in these respects. Maintenance of such high standards of material and workmanship is possible through our policy of laboratory controlled production. Our engineers are responsible for factory production as well as design. Shielded in a heavy gauge steel case, with a pleasing black shrivel finish. Size $2\frac{1}{4} \times 2\frac{1}{2} \times 3\frac{1}{2}$ ". Average shpg. wt. 3 lbs.

Inter-Stage Audios

- YC1580**—1st Stage Audio, DeLuxe, ratio $3\frac{1}{2}:1$.
Your Cost **\$2.40**
- YC1579**—Push-pull Input, DeLuxe, ratio $2\frac{1}{2}:1$.
Your Cost **\$2.50**
- YC1582**—Push-pull Plates to push-pull grids, ratio 1.75:1.
Your Cost **\$2.45**
- YC1577**—Push-pull Input, split secondaries, isolated, ratio 1.75:1.
Your Cost **\$2.75**

Tube-to-Line Transformers

- YC1591**—Two 43, 171A, 250 or 245 type tubes to 500 ohm line, 15 ohm winding for voice coil or monitor.
Your Cost **\$2.75**
- YC1592**—Two 18, 20, 33, 41, 42, 47, 59, 2A5 type tubes to 500 ohm line, 15 ohm winding for voice coil or monitor.
Your Cost **\$2.75**
- YC1593**—Operating out of General purpose to 500 and 200 ohm lines.
Your Cost **\$2.75**
- YC1943**—Two 2A3 type tubes to a 250, 500, 1000 ohm line.
Your Cost **\$2.75**

Mixer Transformers

- YC1587**—Input, two button microphone, 200 ohm to grid of tube.
Your Cost **\$2.25**
- YC1590**—Input, two button microphone, 200 ohm to 500 ohm line.
Your Cost **\$2.45**
- YC1598**—Input, two button microphone, 200 ohms to a 50 ohm output. For using four microphones with four of these transformers; with secondaries in series feeding into a 200 ohm line.
Your Cost **\$2.45**
- YC1944**—Velocity ribbon microphone to a 200 and 500 ohm line.
Your Cost **\$2.75**
- YC1936**—50, 200, 500 ohm line to 50, 200, 500 ohm line.
Your Cost **\$2.75**
- YC1937**—Universal line to grid of a tube.
Your Cost **\$2.75**

DeLuxe Screen Grid Audio Coupler

Used to couple a screen grid detector to an audio tube. Gives three times the amplification of resistance coupling. Size $3\frac{1}{2} \times 2\frac{1}{4} \times 2\frac{1}{4}$ ". Shpg. wt. 3 lbs.
YC1594—Your Cost **\$2.45**

Output Coupling Transformers

- YC1930**—Single 171A-245-43-50-6F6 metal Triode output to a 2-8-15 ohm voice coil.
Your Cost **\$2.40**
- YC1584**—Push-pull 45-71A-43-50-6F6 metal Triodes output to a dynamic speaker 2-8-15 ohm voice coil.
Your Cost **\$2.50**
- YC1931**—Single 18-20-33-41-42-47-59-2A5 output to a high impedance magnetic speaker.
Your Cost **\$2.40**
- YC1933**—Single 18-20-33-41-42-47-59-2A5 output to a dynamic speaker 2-8-15 ohm voice coil.
Your Cost **\$2.95**
- YC1585**—Push-pull 10-18-20-33-41-42-46-47 2A5-59 (Class B) output to a 2-8-15 ohm voice coil of a dynamic speaker.
Your Cost **\$2.45**
- YC1934**—Push-pull 2A3-48 output to a dynamic speaker 2-8-15 ohm voice coil.
Your Cost **\$2.45**
- YC1947**—Push-pull Class B 49s (53-79-89) (Class A 38s) to a dynamic speaker 2-8-15 ohm V. C.
Your Cost **\$2.25**

Trutest Standard Replacement Audios and Chokes

This line of Trutest audio components is exceptionally complete. They are not to be confused with inferior types which are built to a price rather than a quality standard. All Trutest audio transformers are constructed using the finest grade of silicon steel for core material. Coils are wound with brand new copper wire of the proper gauge for each particular application. Insulation is tested at 1250 volts A.C. Average size of units is $3\frac{1}{4} \times 2\frac{1}{4} \times 1\frac{1}{4}$ "; mounting centers $2\frac{1}{2}$ ". Average shpg. wt. 3 lbs.

Outputs

- YC1553**—Output, Single '45 or 6F6 metal Triode type tube to 5-15 ohm voice coil.
Your Cost **75c**
- YC1554**—Output Push-pull '45s or 6F6 metal Triodes type tubes to 5-15 ohm voice coil.
Your Cost **75c**
- YC1555**—Output, Single Pentode '47 or 6F6 metal Pentode to a 5-15 ohm voice coil.
Your Cost **75c**
- YC1556**—Output, P.P. Pentodes, 47's, 6F6 metal Pentodes to a 5-15 ohm voice coil.
Your Cost **75c**
- YC1564**—Output, Push-pull, 49's Class B, to a 5-15 ohm voice coil of dynamic speaker.
Your Cost **\$1.15**
- YC1566**—Output, Push-pull 2A3's, to a 5-15 ohm voice coil of dynamic speaker. ($2\frac{1}{2} \times 3 \times 2\frac{1}{2}$ ".)
Your Cost **\$1.89**

Filter Chokes

- YC1557**—Choke, 25 henry, 25 M.A. maximum D.C. Resistance of 830 ohms.
Your Cost **69c**
- YC1558**—Choke, 11 henry, 60 M.A. maximum D.C. Resistance of 300 ohms.
Your Cost **69c**
- YC1570**—Choke, Heavy Duty, 30 henry, 125 M.A. maximum D.C. Resistance of 200 ohms.
Your Cost **89c**

Audios

- YC1550**—Audio, either stage of straight audio amplification. Ratio 3:1.
Your Cost **75c**
- YC1551**—Push-pull Input, from single plate to 2 grids. Ratio 2.5:1.
Your Cost **78c**
- YC1552**—Push-pull Inter-stage, between 2 plates and 2 grids. Ratio 1.75:1.
Your Cost **98c**
- YC1562**—Push-pull Input, Split Secondaries (isolated), between 1 plate and 2 grids. Ratio 1.75:1.
Your Cost **\$1.08**

Special Line Transformer

A special transformer with coil wound on a $1\frac{1}{4}$ " core of special high permeability iron. Frequency characteristics exceptionally fine. Low loss factor.
YC1565—500 to 250 ohm line to $\frac{1}{2}$ - $\frac{3}{4}$ -1.5-2-2.5-4-6-8-10-15 ohm voice coil.
Your Cost, Special **\$2.45**

Double Button Mike Transformers

- YE5448**—Double Button Microphone transformer, 200 ohms each side of center-tap.
Your Cost **82c**

Trutest

Midget Transformers and Chokes

An extremely compact, yet highly efficient series of transformers and chokes particularly suited for use in auto radio receivers and A.C.-D.C. compact radios. They can, however, be used in any type of receiver or amplifier. Unshielded strap mounting type with rust resisting frame. Dimensions $1\frac{1}{4} \times 1\frac{1}{4}$ ". Mounting centers $2\frac{1}{2}$ " apart.

Transformers

- YC1619**—Interstate audio, ratio $3\frac{1}{2}:1$.
- YC1620**—Push-pull Input, ratio $1\frac{1}{2}:1$.
- YC1607**—Single Output: 45, 48, 71A, 43, etc. to 5-15 ohm voice coil.
- YC1609**—Single Output: 47, 59, 33, 2A5, 89, 31, 27, 42, 18, etc., to 5-15 ohm voice coil.
- YC1614**—Push-pull Output: 45, 48, 71A, 43, etc., to 5-15 ohm voice coil.
- YC1615**—Push-pull Output: 47, 59, 33, 2A5, 89, 31, 20, 42, 18, etc., to 5-15 ohm voice coil.
Your Cost, Any Type **49c**

Chokes

- YC1601**—10 Henry Choke. Resistance 200 ohms, 50 M.A. maximum D.C.
Your Cost **29c**
- YC1602**—11 Henry Choke. Resistance 250 ohms, 65 M.A. maximum D.C.
Your Cost **29c**
- YC1603**—13 Henry Choke. Resistance 350 ohms, 50 M.A. maximum D.C.
Your Cost **29c**
- YC1604**—20 Henry Choke. Resistance 500 ohms, 35 M.A. maximum D.C.
Your Cost **35c**

REPLACEMENT AUDIO TRANSFORMERS

RCA Coupling Reactor 44-46 and 47

Exact duplicate of RCA Part No. 6004. Couples Screen Grid Detector to power output tube. Approximate inductance D.C. resistance wt. 2 lbs.

700 h. at 3 M.A.
6000 ohms. Shpg.
YC2000—Your Cost \$1.75

FADA 42, 44, 46; KA P.P. Input Transformer

An exact duplicate of the original Fada part for the above model receivers. Constructed with high permeability core to provide equal or superior than original quality. No changes necessary to install. Shpg. wt. 4 lbs.

YC1642—Your Cost \$1.38

P.P. Output Transformer

For above model sets. Similar in appearance to input transformer. Shpg. wt. 4 lbs.

YC1643—Your Cost \$1.10

Trutest Transceiver Audio Transformer

Combination audio and microphone transformer for use in the new five meter transceivers. For matching a single and double button microphone to one grid. In receiving position it is used as an ordinary audio transformer. Shpg. wt. 2 lbs.

YC1627—Your Cost \$89¢

Trutest Tube Tester Filament Transformer

Voltagers for all type tubes including battery tubes and new auto tubes. Very compact in size. Color-coded flexible leads. Primary tapped at 105, 115 and 125 volt, 50-60 cycle. Secondary is single winding with the following taps: 1½, 2, 2½, 3, 3.5, 6, 7½, 15, 25, and 30 volts. Shpg. wt. 3 lbs.

YC1967—Your Cost \$1.20

Trutest High Impedance Primary P.P. Input

Designed to couple screen grid or pentode detector such as the 24 and 57 to a pair of 45's or 47's, 2A5's, etc. In push-pull. Extra fine core. Strap mounting. Long insulated leads. 1000 volt insulation. Real quality transformer. 3¼", 2¼", 1¾". Shpg. wt. 3 lbs.

YE5491—Your Cost \$1.75

Trutest Special Line to Voice Coil Transformer

Use this line to voice coil transformer on one or more speakers to obtain maximum output and tone. Matches 2, 4, 8, or 15 ohm V.C. to 250 or 500 ohm line. The correct way to add an extra speaker to your set. Shpg. wt. 2 lbs.

YE5494—Your Cost \$1.55

Trutest Filament Trans- formers

2½ volts at 10½ Amperes. Guaranteed to deliver rated voltages and load without heating. 110 volts primary. 1000 volts insulation. Size 3x2x2¼". Shpg. wt. 3 lbs.

YC2383—Your Cost \$1.25

Same as above but uncased. 2½ volts at 10½ amps. Semi-open type-strap mounting. **YC2387—Your Cost \$1.10**

Same as above except 2½ volts at 5½ amps. Uncased. **YC2388—Your Cost \$95¢**

Two separate windings of 2½ volts at 5½ amps., each. Uncased. **YC2443—Your Cost \$1.29**

5 volts, 4 amps. Uncased type, strap mounting with leads. **YC2441—Your Cost \$95¢**

6.3 volts at 3 amps. Uncased type, strap mounting with leads. **YE5495—Your Cost \$0.89**

7.5 volts at 3½ amps. Uncased type, strap mounting with leads. **YE5496—Your Cost \$1.10**

Exact Duplicate Replacements

Shipping weight 3 lbs.

UNIVERSAL Output Transformer

Combination of taps to feed from single or P.P. output stage to any voice coil from 2 to 30 ohms, in 2 ohm steps. Unit may be mounted on end or sides. Some of the more popular output tubes with which unit can be used are, single or P.P.: 112A, 71A, 45, 50, 47, 10, 41, 42, 43, 46, 48, 59, 31, 33, 38, 79, 89, 2A5. Diagrams for all tubes included. Size 2x2½x1¼". Shpg. wt. 3 lbs.

YC1708—Your Cost \$78¢

Universal Input

Same physical specifications as above. Used with single, P.P. or double P.P. audio tubes. Shpg. wt. 4 lbs.

YC1707—Your Cost \$78¢

UTC "Linear Standard" AUDIO TRANSFORMERS

United Transformer Company "Linear Standard" Components represent the closest approach to the ideal transformer from the standpoint of uniform response, low wave form distortion, high efficiency, thorough shielding and dependability. The curve shown below illustrates the linear frequency response of a typical UTC audio output transformer. As shown, this series

of audio units are linear over a frequency spectrum of 9 octaves, i.e., from 20 to 20,000 cycles. No effort has been spared to assure uniform characteristics on all audio units. A special grade of high permeability iron is used to house them, and as a result, hum pickup has been overcome. Each transformer is individually tested for frequency response.

Frequency in Cycles Per Second

Dimensions		
L	W	D
D. 2 1/2"	3"	3 1/4"
E. 3 1/2"	4 1/4"	4 3/4"
F. 5 1/4"	4 3/4"	5 1/4"
G. 6 1/4"	6 1/4"	5 1/4"

Input Transformers

YE5401—Primary will match 500, 333, 250, 200, 125 or 50 ohm line, as required for carbon dynamic microphones, low impedance pick-ups, etc. Secondary in two sections for series or parallel connection. Overall impedance of windings in series 100,000 ohms; impedance of each winding 25,000 ohms. Type D mtg. **\$9.00**
Your Cost Each

YE5402—Primary same as above. Secondary same as above except that overall impedance of windings in series is 200,000 ohms; impedance of each winding 50,000 ohms. Type D mtg. **\$12.00**
Your Cost Each

YE5403—Primary will match a velocity ribbon microphone. Secondary in two sections for series or parallel connection. Overall impedance of windings in series 130,000 ohms; impedance of each winding 32,500 ohms. Type D mtg. **\$12.00**
Your Cost Each

YE5404—Primary designed for 500, 333, 250, 200, 125 or 50 ohm line to 2-50 watt grids at a plus 25 level. Type E mtg. **\$13.20**
Your Cost Each

MIXING AND MATCHING TRANSFORMERS

YE5405—Mixing, carbon or dynamic mike or low impedance pick-up to a variable impedance line. Primary and secondary windings will match 500, 333, 250, 200, 125 or 50 ohm lines. Type D mtg. **\$9.00**
Your Cost Each

YE5406—Mixing, velocity ribbon mike to a 500, 333, 250, 200, 125 or 50 ohm line. Type D mtg. **\$9.00**
Your Cost Each

YE5407—30 watt audio line matching transformer. Input designed for 3500, 2700, 2000, 1350, 875, 500, 200, 50 ohms. Output tapped for 30, 20, 15, 10, 7.5, 5, and 1.2 ohms. Type F mtg. **\$12.00**
Your Cost Each

YE5408—Crystal mike to 500, 333, 250, 200, 125 or 50 ohm line. Type D mtg. **\$9.00**
Your Cost Each

Output Transformers

*—Secondary tapped at 500, 333, 250, 200, 125, 50, 30, 20, 10, 7.5, 5, 2.5 and 1.2 ohms.
†—Secondary tapped at 6000, 5000, 4000, 1800, 1500, 1000, 30, 20, 15, 10, 7.5, 5, 2.5 and 1.2 ohms.

**—Secondary tapped at 30, 20, 15, 10, 7.5, 5, 2.5 and 1.2 ohms.
YE5409—Primary impedance 8000 ohms plate to plate. Will match p.p. 50's, 45's; 6F6 metal Triodes; single 211, 843, 842, 205D, 48. Secondary*. Type E mtg. **\$12.00**
Your Cost Each

YE5410—Same primary and will match same tubes as above. Secondary†. Type E mtg. **\$12.00**
Your Cost Each

YE5411—Same primary and will match same tubes as above. Secondary**. Type E mtg. **\$8.40**
Your Cost Each

YE5412—Primary impedance 5000 ohms and 3000 ohms plate to plate. For 500 ohms will match self bias p.p. 2A3's; single 71A, 2B6, 59 triode, 6F6 metal triode. For 3000 ohms will match fixed bias p.p. 2A3's Secondary*. Type E mtg. **\$12.00**
Your Cost Each

YE5413—Same primary and will match same tubes as above. Secondary†. Type E mtg. **\$12.00**
Your Cost Each

YE5414—Same primary and will match same tubes as above. Secondary**. Type E mtg. **\$8.40**
Your Cost Each

YE5415—Primary impedance 2500 ohms and 1500 ohms plate to plate. For 2500 ohms will match four 2A3's in p.p.-Parallel self bias circuit. For 1500 ohms will match four 2A3's in p.p.-Parallel fixed bias circuit. Secondary*. Type F mtg. **\$18.00**
Your Cost Each

YE5416—Same primary and will match same tubes as above. Secondary†. Type F mtg. **\$18.00**
Your Cost Each

YE5417—Same primary and will match same tubes as above. Secondary**. Type F mtg. **\$12.00**
Your Cost Each

YE5418—Primary impedance 10,000 ohms or 6000 ohms plate to plate. For 100,000 ohms will match p.p. 59 triodes, 2B6's, 71A's, 6F6 metal triodes; single 10, 41, 268A, 2A3. For 6000 ohms will match single 31, 46, 59 pentode. Secondary*. Type E mtg.

YE5419—Same primary and will match same tubes as above. Secondary†. Type E mtg. **\$12.00**
Your Cost, Either Type

YE5420—Same primary and will match same tubes as above. Secondary**. Type E mtg. **\$8.40**
Your Cost Each

YE5421—Primary impedance 18,000 ohms plate to plate. Will match p.p. 845's. Secondary*. Type G mtg. **\$21.00**
Your Cost Each

COUPLING TRANSFORMERS

YE5422—Cascade, single plate to single grid Turn ratio 2:1 overall. Type D mtg. **\$6.00**
Your Cost Each

YE5423—Input, one plate to 2-grids. Turn ratio 1 1/2:1 each side of center. Primary and sec. in two sections. Type D mtg. **\$7.80**
Your Cost Each

YE5424—Input, 2-plates to 2-grids. Turn ratio 1.6:1 each side of center. Primary and secondary each in two sections. Type E mtg.

YE5425—Input, 2-screen grid plates to 2-grids. Effective ratio 1:1. Type E mtg. **\$13.20**
Your Cost, Either Type

YE5426—Single plate or line to one or 2-grids. One side of primary will match single plate of tubes like the 01A, 12A, 30, 31, 26, 27, 37, 55, 56, or 85. Another primary designed for a carbon or dynamic mike or a low impedance pick-up. Secondary in two sections. Total secondary impedance 100,000 ohms. Type D mtg. **\$12.00**
Your Cost Each

TUBE TO LINE TRANSFORMERS

YE5427—From a single plate like the 6C5 metal triode, 01A, 12A, 30, 31, 26, 27, 55, 56, or 85 to 500, 333, 250, 200, 125 or 50 ohm line. Type D mtg. **\$9.00**
Your Cost Each

YE5428—From p.p. plates (same tubes as above) to 500, 333, 250, 200, 125 or 50 ohm line. Type D mtg. **\$9.00**
Your Cost Each

Special "HIPERM ALLOY" Portable Audio Units

These new transformers, designed for portable use, are extremely compact and light in weight. Their high fidelity measures up to broadcast standards, being uniform in response from 40 to 12,000 cycles. This degree of fidelity is made possible only by the use of a new core material known as Hiperm Alloy, a nickel alloy

having high initial permeability. This alloy is used both for the core and for the case. Have threaded metal inserts for mounting. Size of H1 case 1 1/2 x 2 1/2 x 2 3/4". Size of H2 case 1 1/2 x 3 1/2 x 2 3/4".

COUPLING TRANSFORMERS

YE5456—Cascade, single plate like the 6C5 metal triode, 26, 27, 30, 31, 37, 55, 56, 85, 864.

57 or 77 triode to single grid. Ratio 2:1 overall. H1 mtg. **\$5.40**
Your Cost Each

YE5457—Input, single plate (same tubes as above) to p.p. grids. Ratio 1 1/2:1 each side of center. H1 mtg. **\$6.60**
Your Cost Each

YE5458—Input, two p.p. plates (same tubes as above) to p.p. grids. Ratio 1 1/2:1 overall. H2 mtg. **\$9.00**
Your Cost Each

INPUT TRANSFORMERS

YE5459—Variable impedance line to single grid. Primary will match 500, 333, 250, 200, 125 or 50 ohm line. Secondary impedance 90,000 ohms. H1 mtg. **\$7.50**
Your Cost Each

YE5460—Velocity mike to a single grid. Secondary impedance 90,000 ohms. H1 mtg. **\$7.50**
Your Cost Each

MIXING, MATCHING AND OUTPUT TRANSFORMERS

All tapped to match 500, 333, 250, 200, 125 or 50 ohm lines.

YE5451—Variable impedance line to a variable impedance line. Both primary and secondary tapped as above. H1 mtg. **\$7.50**
Your Cost Each

YE5452—Matching, velocity ribbon mike to tapped line. H1 mtg. **\$7.50**
Your Cost Each

YE5453—Matching, crystal mike or pick-up to tapped line. H1 mtg. **\$7.50**
Your Cost Each

YE5454—Output, from a single plate like the 6C5 metal triode, 26, 27, 30, 31, 37, 55, 56, 85, 864, 57 or 77 triode to tapped line. H1 mtg. **\$7.50**
Your Cost Each

YE5455—Output, p.p. plates (same tubes as above) to tapped line. H1 mtg. **\$7.50**
Your Cost Each

STANDARD REPLACEMENT CONDENSER BLOCKS

MAJESTIC Power Unit

Condenser Blocks
For Early Model Receivers
 These blocks are built to the original Majestic specifications from brand new, first quality merchandise, guaranteed as to quality. Constructed with new high voltage paper condensers to insure long and satisfactory service. These units are equal to or superior to the original blocks. Tinned solder lug terminals are securely riveted to a bakelite panel on top of unit. Fit chassis exactly; no changes necessary to install.

For Majestic 7BP6, 7P6
 (Sets with 171 Type Tubes)
 Size 8 1/2 x 2 1/2 x 4 1/2". Shpg. wt. 6 lbs.
YB1071—7P6 Early Model Sets
YB1070—7BP6 Late Model Sets
Your Cost **\$1.80**
 Either Type

For Majestic 8P6
 (Sets with 250 Type Tubes)
 1000 volt test Condensers. Size
 8 1/2 x 2 1/2 x 4 1/2". Shpg. wt. 6 lbs.
YB1069—
Your Cost Each **\$3.50**

For Majestic 9P6
 (Sets with 245 Type Tubes)
 Size 8 1/2 x 2 1/2 x 4 1/2". Shpg. wt. 4 lbs.
YB1067—
Your Cost Each **\$1.90**

For Majestic "A" Eliminators
 Size 3 1/2 x 3 3/4 x 7 1/4". Shpg. wt. 4 lbs.
YB849—
Your Cost Each **\$2.35**

Condenser Blocks

Models 90B-100B Chassis; 90, 91, 92, 93, 102 and 103. Majestic Replacement Part No. 1664. Contains three 2 mfd. and one 1 mfd. condensers. Shpg. wt. 6 lbs.
YB1065—**Your Cost** **\$1.75**

Majestic 60, 160

Original Majestic Part No. 3858. Shpg. wt. 9 lbs.
YB1072—
Your Cost **\$1.95**

Majestic 30 Choke and Condenser

Genuine Majestic Part No. 3622. Shpg. wt. 10 lbs.
YB1073—**Your Cost** **\$1.95**

FADA Model 43 Condenser Block

Built according to the standards of the original Fada condenser bank No. 1866-X. Contains: 2 mfd. at 600 volts, 2 mfd. at 400 volts and 2-1.0 mfd. at 400 volts. Shpg. wt. 4 lbs.
YB1206—
Your Cost **\$2.98**

Models 42, 44, 46, 47, No. 1830X

Similar in appearance to the above. Contains 7.1 m crofarads of condenser.
YB1199—**Your Cost** **\$2.98**

GENERAL MOTORS Model "A"

Chassis: 120, 130, 140, 150, 160 Filter Block

Genuine G. M. Part No. 1200123-1202645. Has total capacity of 10 mfd. Can be used by the new set builder or for general replacement purposes. Six leads. Shpg. wt. 7 lbs.
YB693—List \$16.50. **Your Cost** **\$1.69**

A.K. Models 37 and 38

Contain the filter condenser block and three chokes; two high voltage filter chokes and one speaker choke. Constructed of highest grade materials. Leads color coded; diagrams furnished. Shpg. wt. 7 lbs.
YB1378—**Your Cost** **\$1.65**

POWER TRANSFORMER for models 36, 37 and 38. Exact duplicate. Shpg. wt. 9 lbs.
YC2255—
Your Cost **\$2.15**

SPARTON Condenser Blocks

Model 930

Comprises five sections totalling 6.1 mfd. Color code is: red lead is 2 mfd., 1000 volts; three blue leads are 1 mfd., 400 volt sections; brown lead is 1.1 mfd., 600 volt section. In metal container 5 1/4 x 3 1/2 x 2 1/4". Shpg. wt. 5 lbs.
YB973—**Your Cost** **90¢**

Models 69, 79, 89

Brand new condenser blocks made especially for replacement in Sparton models. Original specifications have been strictly adhered to. Shpg. wt. 5 lbs.
YB975—
Your Cost **\$1.95**

STROMBERG-CARLSON Filter

Models 641, 642, 652, 654

An exact duplicate Stromberg-Carlson filter condenser. Total capacity 9 mfd. Shpg. wt. 11 lbs.
YB916—
Your Cost **\$3.50**

Condenser Blocks for U. S. Radio & Television Co. Gloritone and Apex Receivers

Made in accordance with the original condenser blocks.

Apex Model 28

Set uses 3-24's, 2-27's, 2-45's and 1-80. Contains following capacities: 1-.3-1-1. mfd. Has five leads. Shpg. wt. 4 lbs.
YB1410—**Your Cost** **\$2.20**

Apex Models 48 and 48A

Same capacities as in above; different physical construction. Shpg. wt. 4 lbs.
YB1404—**Your Cost** **\$2.20**

Apex Model 36

Set uses 4-26's, 1-27, 1-71A, and 1-80. Contains four 1 mfd. and two .5 mfd. sections. Has six terminals. Shpg. wt. 4 lbs.
YB1409—**Your Cost** **\$3.10**

Apex Model 41

5-27's, 2-45's, 1-80. 1-1.5-1-1. mfd. 4 leads. Shpg. wt. 4 lbs.
YB1407—**Your Cost** **\$1.85**

Apex Models 46, 46A, 47 and 47A

2-24's, 2-27's, 2-45's and 1-80. 1-2.1-5-5-1 mfd. 5 leads. Shpg. wt. 4 lbs.
YB1405—**Your Cost** **\$1.70**

RCA-VICTOR REPLACEMENT BLOCKS

CONDENSER BLOCKS

For Models R-32, RE-45, R-52, RE-75

Contains: One 5 mfd., one 3 mfd., one 2.5 mfd. and .5 mfd. sections at 600 working voltage. All brand new blocks, never been used or installed before. Housed in a metal

container, 5 1/4 x 5 x 4". Shpg. wt. 8 lbs.
YB890—**Your Cost, Special** **49¢**

For Late Models R-32, RE-45, R-52, RE-75

Contains: One 5 mfd., one 3 mfd. and one 2.5 mfd., 600 working voltage. This is for the late Victor models, equipped with 4 taps, but can be used for the early models by using a .5 mfd. condenser in place of the No. 5 tap.
YB893—**Your Cost** **\$1.10**

Capacitor Pack Models R-8, R-10 R-12 and RE-19

Genuine Replacement Part No. 7342, for the above model sets. Shpg. wt. 3 lbs. List \$6.75.
YB534—
Your Cost **\$4.05**

Radiola 64 Victor 9-18 and 9-54

No. 8368 Filter Capacitor
 Genuine Radiola Filter Condenser. Contains: Four 4 mfd., one 2 mfd. and two 1 mfd. All brand new, using 1000 volt foil and paper.

condensers of the very best Shpg. wt. 13 lbs.
YB1011—List Price \$30.00

CAPACITY INDICATOR

"It Chirps on Overloads"

The new patented Sprague Surge Arrestor built into this new Capacity Indicator chirps when voltages over 475 volts are applied. Indicator checks capacities from .00025 to 16 mfd., in two ranges; from .00025 to .5 and from 1 to 16 mfd. Capacities selected by means of two rotary switches of the self-cleaning wiping contact type. Entire unit housed in fine bakelite case 7 7/8 x 3 3/4 x 3 1/4". Terminals marked for easy connections. Complete with test leads and instructions. Shpg. wt. 7 lbs.

SPRACO 450 Volt Condensers with "Extra Safety Factor"

GUARANTEED FIRST GRADE

These condensers have a special filter which makes it possible to get higher capacity in smaller space. Have extra safety factor voltage rating, low power factor, extremely low leakage, and are absolutely impervious to moisture. Extremely small size allows them to be mounted anywhere. Light weight, and self-supporting. Provided with insulated leads, push-pack wire.

SOLAR Condensers QUALITY ABOVE ALL!

Guaranteed—Reliable in Every Climate

All SOLAR condensers are subject to the guarantee bond shown on the left. They are made of the best of materials and workmanship and have been tested under trying conditions of temperature and humidity. They are noted, amongst Service Men and Construc-

tors, for their long-life, efficiency, and, of great importance when replacing defective units, for their extreme small size. All condensers are carefully checked and rated.

Standard Size Cardboard Electrolytics

High quality units—with lugs and mounting flanges. Available in single or multiple sections. Separate "common" for each section in multiple units. Cardboard containers, waxed and moisture proofed. Avge. shpg. wt. 0 lbs. Peak 500 volts D.C.

Single Sections—2 Lug Terminals			
Stock No.	Cap. Mfd.	Dimensions, Inches	Your Cost
YD2843	2	2 1/2 x 1 1/2 x 1 1/2	\$0.39

YD2734	4+8	500	.87
YD2842	8+8	500	.96

Wet Electrolytic Condensers

Self heating units, capable of withstanding voltage overloads of moderate duration without harm. Low-leakage, full and well maintained capacity, excellent power factor,—all resulting in long service life. Supplied in round inverted metal cans (negative terminal) 1 1/2" diameter and 4 3/8" high. Excellent for replacement and construction; used extensively as the first filter section because temporary high voltage peaks (before tubes heat up) have no injurious effect upon these units.

Stock No.	Cap. Mfd.	D.C. Peak Voltage	Your Cost
YD2725	8	600	\$0.90

Precision Capacitor Analyzer

A scientific, accurate and reliable instrument for serviceman or laboratory. Employs Wien Bridge method of capacity measurement which results in high accuracy independent of line-voltage variations. Has the following numerous features:

Measures Capacity: Will accurately measure capacity of all types of electrolytics, paper and mica condensers. Capacity range—.00002 to 70.0 mfd.

Measures Leakage, Etc.: Directly indicates leaky, shorted, open, intermittent and power factor of all types of condensers.

Indicates Dielectric Resistance: Directly indicates the dielectric resistance of all types of insulation and insulators, between cable wires, coil windings, etc. This test is made at a D.C. potential from 25 to over 400 volts (supplied by a built-in power supply).

Direct Reading: All measurements made simply and directly, and require no complicated calculations or reference to charts or curves.

Easy to Use: All indications are visual. Two dial control provides complete condenser analyses quickly and easily.

Compact, Portable: In attractive cabinet with removable top. Weights only 7 lbs. Dimensions 9 1/2 x 7 1/4 x 6 1/4". Supplied complete with instructions, but less 58 and 80 tubes. Shpg. wt. 10 lbs.

YJ10462—Your Cost **\$17.34**

MICA Receiving Condensers

Type MH

Bakelite moulded mica fixed condenser, with lugs. Dimensions 1 1/2 x 1 1/2 x 1/4". Accurately rated, impervious to moisture or heat. Capacity rating deeply imprinted in bakelite.

2% OFF For Cash On SOLAR Condensers

CORNELL DUBILIER

The **PIONEER** Condenser --

the **QUALITY STANDARD** since 1910

Cardboard Cased Filter and By-Pass

Capacity is constant over a wide-frequency range, with low power factor under ordinary conditions of use. Solder lug terminals securely riveted and will not pull out. Condenser is heavily waxed and thoroughly moisture-proofed.

525 Volts Peak

High Quality Paper Dielectric Condensers, Type PE Cardboard Type

Dimensions identical to electrolytic units; capacity 1/3 to 1/2 of electrolytics. Cardboard type. Leakage and power factor negligible, no polarity, safe high voltage ratings and reliable operation. Preferred by most servicemen for bypass or filter replacement purposes. Available in two types,—450 W.V. and 600 W.V. All with leads.

CORNELL-DUBILIER BY-PASS CONDENSERS

"Dwarf Tiger" Units

Developed to meet the demand for an extremely low cost condenser especially suited for use in small midget sets where space is limited. They are light in weight, and can easily be connected between points.

"Cub" Cartridge Condensers

Cornell "Cub" condensers have become the most universally used condensers in radio set design. Used extensively by over 135 radio set manufacturers. Units are wound on a wooden core, thoroughly impregnated, and cased in cardboard containers. Stiff wire leads are fastened to metal caps.

TRUTEST DRY ELECTROLYTIC FILTER & BY-PASS CONDENSERS

For best results, and for definite assurance of maximum Filter and By-pass action, use TRUTEST Dry Electrolytic Condensers. They are manufactured to the highest standards, and easily conform with RMA standards. All TRUTEST Dry Electrolytics are GUARANTEED

to have a power factor of from 4% to 8% leakage less than .1 M.A. per mfd.; all capacity ratings within a tolerance of +20% and -10%; not affected by humidity. Specify TruTest Condensers—Accept no Substitutes!

TRUTEST "Pee-Wee" Cardboard Electrolytics

Smallest used condenser. Absolutely dependable and efficient. Available 525 P. V., and 250 P. V. for A.C.-D.C. sets.

"Wet" Electrolytics

A new line of condensers using a wet electrolyte that possesses many advantages such as: self-healing, ability to withstand voltage overloads without harm, "self-regulating" characteristics, etc. Full and well maintained capacity, excellent power factor and long life. All in tubular metal containers—can is negative.

Dimensions, under 500 volts, 3 1/2 x 1 1/2; 500 volts, 4 3/8 x 1 3/8; 600 volts, 4 3/8 x 1 1/2.

Low Priced Single Sections

Single 8 Mfd. Can

This TruTest 8 mfd., 500 volt, peak condenser is used in new installations and replacements. In round aluminum can, of standard size, fits hole for 3/4" studs. Can is insulated from the condenser sections and is grounded. Shpg. wt. 1 lb.

YD3324 — Your Cost Each 42¢

Single 8 Mfd. Cardboard

The most popular size in this very popular line of condensers at an exceptionally LOW PRICE. This 8 mfd. condenser has a heavily waxed cardboard container and a peak voltage size of 500 volts. Rate 4 1/2 x 1 1/2 x 3/8". Shpg. wt. 1 lb.

YD3348 — Your Cost 40¢

Compact Dry Electrolytic Filter Units 525 Volts Peak

Extremely compact filter condenser conservatively rated at 525 volt peak and 450 volt working voltage. All are in cardboard cases 1 1/2" wide, but vary in length and thickness.

Stock No.	Cap'y Mfd.	Size T. x L.	Your Cost

Multiple Sections Cardboard Container

These multiple section condensers are used for sub-base and sub-panel mounting. The sections are insulated from each other and separate terminals are brought out from each section. Capacity is practically constant over a wide frequency range. Overall height 4 3/8". Conservatively rated at 500 volts D.C. peak. Idea for A.C.-D.C. sets.

Stock No.	Cap'y Mfd.	Work. Volt.	Your Cost Each
YD3361	4-4	200	48¢
YD3362	5-5	35	44¢

* Rectangular aluminum can.

Multiple Sections Can Type Dry Electrolytics

Each section is a separate electrolytic, of the genuine self-healing type. These condensers have been scientifically designed. The excellent power factor characteristic of these units, under normal temperature conditions, means that electrostatic and effective capacities are practically the same, resulting in efficient filtering. All 500 volt peak.

AC-DC ELECTROLYTICS

for all standard receivers

Wholesale - Radio - Service Company offers the most comprehensive line of exact duplicate electrolytics for popular A.C.-D.C. sets. Every one of the units listed below conforms in every way to the specifications of the original manufacturer. At the exceptionally low prices at which they are being offered, it will pay the servicemen to use them rather than makeshift replacements.

CROSLY "Fiver" 167

Part number W-27488, used in early models. Contains 1-6 mfd. 300 volt and 1-8 mfd. 25 volt sections.
YD2804 - Your Cost Each 42¢
 Same as above, for late models. Part No. W-27488-A has 6 mfd. 400 volt and 8 mfd. 25 volt sections.
YD2805 - Your Cost Each 47¢

Majestic "Pirate Chest" 380, 381 Condenser

Genuine Part No. 8755. Contains one 8 mfd. and one 4 mfd. 450 volt sections. Solder lug terminals. Shpg. wt. 1 lb.
YD2823 - Your Cost Each 55¢

RCA-Victor Condenser Models R-17M, R-18-W, R-27, 330 and 331

Part No. 3536; 66140-2. Contains two 5 mfd. 35 volt sections. Tubular type with long wire leads for direct connections in chassis. Shpg. wt. 1 lb.
YD2866 - Your Cost 27¢

Special Condenser in Cardboard Container

Used in many midjet sets. Contains 1-14 mfd. 200 V. peak, 1-8 mfd. 200 V. peak, and 2-10 mfd. 35 V. peak sections. Cardboard container for inverted mounting. 4" high, 1½" diameter. Color coded leads.
YD2719 - Your Cost 75¢

New! I R C Metallized Insulated Resistors—Type "B"

A radically new resistor development that makes use of all the advantages offered by the famous Metallized resistor, and in addition embodies many new features. Small, light and with high voltage insulation, these units may be used anywhere without fear of shorting. Metallized element is sealed in a moisture-proof insulating material which provides extreme ruggedness. These new resistors are noise free, trouble free and crack-proof. Provided with highly tinned metal leads which are bonded directly to the resistance element. All are both R.M.A. color coded and individually marked with resistance value and wattage rating.

ELECTRAD *Truvolt* RESISTORS

TRUVOLT Adjustable Resistors

Now, beside the incorporation of a new 10-watt line, many new improvements and still greater advantages are to be gained through the use of this time-tested product. The adjustable clip has been redesigned to afford more effective resistance and unique end brackets are supplied with each B, C, and D type resistor. A new protective insulating sleeve is supplied with each resistor. There is now greater insulation (1000-volt insulation) to heat conducting copper core. Self-tapping screws are supplied to fit inside diameter of tube.

ELECTRAD Precision Wire Wound 1 Watt Resistors

One watt precision wire wound resistors accurate to within plus or minus 1%. Each resistor individually bridge tested. Particularly suited for use as multipliers with voltmeters and other laboratory test instruments. Highest quality enameled wire insures against shorted turns and contributes to lower distributed capacity because of heavier insulation between turns. Non-inductive winding impregnated with moisture proof compound. Resistors supplied less ferrules for pigtail mounting, ferrules, extra, as priced below.

Ferrule Type

Convert the above to screw terminals. Ferrules only. **YES001—Your Cost, Per Pair \$15c**

Trutest Carbon Resistors

GENERAL REPLACE- MENT RESISTORS

All absolutely moisture proof and will stay permanent regardless of atmospheric conditions.

TRUTEST RESISTORS are R.M.A. Color Coded for easy identification and are made of the finest material and workmanship. **Guaranteed accuracy, 10% plus or minus.** The average are within 5%. Resistance values read approximately the same at any normal voltage—most important for resistance service work. No moisture can possibly penetrate, so age cannot change the resistance value. Great mechanical strength eliminates any chance of accidental breakage.

PRECISION MANUFACTURING—Carefully calibrated resistance material is moulded in a solid form and fired at a high temperature so that no ordinary service or overload temperature can damage the resistor wire. Tinned leads are forced onto the metal sprayed ends under great pressure.

Handy Resistance Kits With R.M.A. Color Coded Resistors

These kits are just the thing for shop or tool kit. They consist of a selection of TRUTEST R.M.A. Color Coded Resistors, neatly mounted on a pair of strips. Have hole at one end for hanging on a nail or hook. By refilling them from our regular Trutest stock as they are used, you are equipped with a complete range of resistances at all times. R.M.A. COLOR CODE CHART SENT WITH EACH STRIP.

1/2-Watt Kits

Two Strips (20 Resistors to a kit)

YE4435—One each of the following (20 in all), 200, 400, 500, 600, 700, 800, 1250, 1500, 2000, 2500, 3000, 3500, 4000, 5000, 6000, 7500, 8000, 10000, 12500 and 15000 ohms.

Trutest Ohm Indicator

Handy—Reliable

Range 0-100,000 Ohms

Unit is wire wound on a vitreous enameled Isolantite tube, and is calibrated from 0 to 100,000 ohms. Comes with test prod and test clips. May also be used as a temporary voltage divider, volume control, etc. In use, test clips are fastened on the ends of the defective resistor, and prod is run up the scale until the best reception is obtained, resistor of same value is then substituted. Shpg. wt. 2 lbs.

Trutest Vitreous Enamel RESISTORS

Trutest FIXED RESISTORS

Guaranteed to be within plus or minus 10% of their rated value, most are within 5%. All are non-porous, dissipate heat rapidly, have positive lug contacts and do not change in resistance value. Contact lugs are of Monel Metal. Each resistor is individually marked.

Trutest SEMI-VARIABLE RESISTORS

The most practical replacement voltage dividers obtainable. Just set the sliders to the desired point and you have a made-to-order voltage divider. Adjustable lugs have small contact buttons so that several taps may be used without shorting out much resistance. Each unit equipped with one sliding contact.

MUTER Candohmeter Resistance Indicators

Has two scales, upper to determine approximate value, lower to permit more accurate reading within that range. May be used as a calibrated resistor for experimental work, as well as for determining value of proper resistance to replace in a circuit. Supplied with insulated test prods. Available in two sizes.
YE4896—0-10,000 and 0-100,000 ohms. Shpg. wt. 2 lbs. \$1.18

Trutest Filament and C.T. Resistances

Center Tap Resistances Wire-wound elements; dependable and extremely durable construction. Elements accurately rated in all cases. Tapped at the electrical center. Center tap has lug to facilitate making connections. Small convenient mounting lugs. Available in 10, 20, 30, 40, 50, 60, 100, 200 ohms. State size desired.
YD3999—Your Cost Each 7c
Resistance values of 100, 200, 300, 400, 500, 600, 700, 800, 900, 1,000 and 1,500 ohms.
YD3998—Your Cost Each 8c

POWER CONTROLS & RESISTORS

ELECTRAD Power Rheostats

Fully protected by a vitreous enamel coating. Ruggedly designed and constructed for long life at rated current loads. Shaft and bushing insulated from the contact arm. Contact shoe, of special metal graphite composition, contacts wire-wound element on the outside diameter. This insures smooth, noiseless action. Applicable for speed controls, and as general voltage controls. Shpg. wt. 3 lbs.

Super T Pad Attenuator

A brand new line of constant impedance attenuators of the tap switch variety, utilizing self-cleaning contacts that are noiseless in operation over long periods of time. The resistor elements are wire-wound and maintain their calibration; are non-inductive, low capacitive and absolutely quiet. Even attenuations are obtained up to 44 db in 4 db steps. Will carry 8 watts of signal energy safely. Shpg. wt. 3 lbs. YG7710—200 ohms impedance. YG7711—500 ohms impedance. Your Cost, Either Type **\$7.35**

ELECTRAD T Pad Attenuator

A network of three resistances housed in a large moisture-proof case. Two sections offer constant resistance to the input and output circuits while a tapered section provides smooth attenuation of the volume level.

OHMITE WIRE WOUND "RED DEVIL" RESISTORS

The standard radio replacement resistors. They are the only units capable of withstanding the Heat Test in which a ten watt unit dissipates FIFTY watts. Red Devils are wire wound, over a porcelain core, and covered with a special high temperature refractory cement which protects the wire from injury even though a red heat is reached. All have lugs and 1 1/2" tinned leads.

Red Devils are made in two sizes—ten watt, from 1 ohm, through to 25,000 ohms, and twenty watt, from 30,000 through to 100,000 ohms. Ten watt dimensions are 1 3/4" x 3/8". Twenty watt dimensions are 2 x 1/2".

20 Watts—2" x 1 1/2"

FREE — FREE ELECTRAD 1935 Volume Control Guide—100 Pages of Time-Saving Information

Contains a complete list, in alphabetical order, of receiver models for which Electrad standard or special replacement controls are made. Gives name of manufacturer, model number, resistance value and list price.

There is no charge for this 100 page book (size 6 1/4 x 9 1/4"), but because of the great expense involved it is limited to professional servicemen only. To obtain a copy, simply tear off the flap on the carton of any Electrad control and mail it to Electrad, Inc., 175 Varick St., New York, N. Y. A Guide will be sent by return mail.

YAXLEY UNIVERSAL

APPROVED RADIO PRODUCTS

161 CONTROLS SERVICE

The new line of Yaxley Universal Controls can be used to service over 90% of all the electric radio receivers in use at present, regardless of physical, mechanical or electrical characteristics. With comparatively few units, the serviceman is now enabled to meet all service requirements demanding volume control repairs or replacements. The exclusive use of Yaxley Controls will save time and money.

Universal Volume Controls

These Universal controls may be used to service the great majority of the sets in use at present time. They are furnished with a 3" shaft (milled) of special aluminum alloy, standard bushing, special cover plate which may be removed for attaching switch, and adjustable bias plates on those controls which require them.

Universal "Tapped" Controls

This important series of tapped controls has been added to the Universal line so that the serviceman can correctly replace practically any tapped control. Chosen after thorough research, it will be found that only thirteen controls are necessary to service the entire field of tapped units.

For 1/4" panels.

Y6386—Your Cost Each **9¢**

YAXLEY Volume Control Tapers

The graphs shown below illustrate the various tapers used on Yaxley wire wound and carbon element volume controls. A clarifying explanation of these curves is given on the opposite page.

VOLUME CONTROLS

4610 DIFFERENT RECEIVERS

- Features: (A) Minimum bias adjustment on all C Bias controls. (B) 4-inch shaft of special nickel alloy. To shorten, just notch with cutters and break off. (C) Power Switch, approved by Underwriters, easily attached. (D) Knob adapter. No filing of shaft. (E) Extension bushing. Extends through $\frac{3}{8}$ " panel.

Special "Dual" Controls

This line of dual units consists of controls which are special in their electrical or mechanical features, or both. They are designed for use in groups of one or more receivers which cannot otherwise be serviced.

 Special control for RCA-Victor model RC3, R14, R15, RE17, R42 and R48; G.E. model T41, Westinghouse model WR4. Yaxley Part No. DRP-116. **\$1.76**
 YF6694—Your Cost

NOTE

The P. R. Mallory Co., manufacturers of Yaxley Volume Controls, has compiled what is without doubt the most accurate and most complete volume control manual ever published. This book is being offered FREE of charge to every accredited dealer and serviceman who writes the factory at Indianapolis, Ind. You cannot afford to pass up this unparalleled offer.

Explanation of YAXLEY Tapers

- No. I—A true logarithmic taper in the carbon element controls and a semi-logarithmic taper in the wire wound units. Left hand taper. Designed for use in shunt circuits such as the usual antenna and audio circuits.
- No. II—A right hand logarithmic taper in the carbon element controls; semi-logarithmic in the wire wound units. This taper is used for series circuits such as cathode voltage controls.
- No. III—A combination of both left and right hand tapers. Used in circuits to perform both as a shunt and as a series circuit control. Standard "antenna" and "C" bias control.
- No. IV—Has a linear taper (although not really a tapered control, it is commonly referred to as such). Used wherever a control should be such that the voltage is proportional to the degree of rotation.
- No. VII—A form of left hand taper made only in the wire wound type of control. Very desirable for use in combined "Antenna and Bias" circuits wherein the greater attenuation is obtained by increasing the bias voltage, the light left hand taper then sufficing to gradually reduce the signal to zero by the shunting action in the antenna circuit.

Universal "Dual" Controls

This line of Dual controls retains all the features of the "Universals." They consist of two volume controls strapped together and driven by a common shaft. The nine units listed below will service practically any receiver requiring this type of control.

WIRE WOUND RHEOSTATS & POTENTIOMETERS

Type C—2 Watts

An extremely compact series of controls ideal for use where space is limited. Contact arm is grounded to the shaft. Diameter $1\frac{1}{4}$ ", $\frac{1}{4}$ " shaft.

Type M—4 Watts

A complete line of variable wire wound rheostats and potentiometers conservatively rated at 4 watts. Their compact construction makes them suitable for practically any purpose. Units are only $1\frac{1}{2}$ " in diameter and mount in a single $\frac{1}{4}$ " panel hole. Fully enclosed, with metal dust cover. Type M rheostats and potentiometers are available only in the sizes shown below.

NOTE

The listing on this page, when used in conjunction with the listings of Yaxley Universal Controls on pages 154 and 155, permit the serviceman to service any electric receiver in use today.

A new and up-to-date volume control manual, the most comprehensive yet published, is offered FREE of charge by the P. R. Mallory Company, manufacturers of Yaxley controls. No serviceman or dealer can afford to pass up this opportunity. Technical data, curves, hints, etc., are only a few examples of the information it contains.

Write today to the P. R. Mallory Co. at Indianapolis, Indiana, for your copy.

STANDARD TYPE VOLUME CONTROLS

Trutest

TRU-TAPER POTENTIOMETERS

With Switch Your Cost **40¢** Without Switch Your Cost **28¢**

An entirely new line of fine quality volume controls at prices that are truly phenomenal. Extra hard carbon composition elements used in conjunction with a new multi-point wiping contact arm assure long and satisfactory service. Each and every unit, as the name "Tru-Taper" implies, is correctly tapered for the circuit for which it was designed. Shafts extend 1 1/4" from control. Provided with 3/8" bushings. Frames are of bakelite with metal dust covers. One of the eleven types shown in the listing will take care of any volume or tone control requirement.

ELECTRAD UNIVERSAL Volume Controls

Employ newly perfected graphite element which is baked at high temperature to the flat outer surface of a molded bake-litening. Element cannot flex or warp, and is highly resistant to

humidity. All controls housed in moulded bakelite cases, with metal end covers and aluminum shafts. Extend only 1/4" inside panel. Approved type switch may be easily added in a few moments to any control. Letters following resistance indicate taper, as follows: **U**—Uniform; **A**—Antenna Shunt or **C** Bias; **C**—C Bias; **P**—Audio Plate Control; **GT**—Audio Grid or Tone Control. Resistances from 10 to 5000 ohms employ wire wound elements.

RADIO FREQUENCY CHOKES

Hammarlund

R. F. CHOKES Midget "CHX"

Small and lightweight supported by leads in compact receivers, or where space is at a premium. Excellent for grid return leads, B + plate returns, etc. Length 1 1/2". Ind. 2.1-m.h., 125 ma., 35 ohms.

YH10002
Your Price Each **44¢**

Genuine helical winding in a moulded form. Large inductance with minimum of distributed capacity. For plate circuits and grid returns. Will pass 60 M.A. 85 M.H.

a capacity of 3 mmf. D.C. res. of 215 ohms.
YH8525—Your Cost **\$1.17**
250 M.H. cap. of 2 mmf. D.C. res. 420 ohms.
YH8526—Your Cost **\$1.32**

Isolantite Radio Frequency Choke

Low loss choke designed chiefly for short wave receivers and transmitters. Size 1 1/2 x 1/4". Inductance 8 millihenries. D.C. resistance 70 ohms. Distributed capacity 3 mmf. Max. current 125 mils.

YH8524—Your Cost Each **65¢**

Improved Shielded R. F. Choke

This choke is completely shielded in an aluminum shell. Size 1 1/2 x 1 1/4" diameter. Connections on the side of the can. Inductance 10 M.H. D.C. resistance 65 ohms. Max. current 100 mils. Code CH-10-S.

YH8523—Your Cost **59¢**

Mica Trimmers

Have Isolantite bases. Type A is 1 x 1 1/4"; mtg. centers 1 1/2". Type B has lug with hole for direct connections.

NATIONAL Chokes

Short Wave R. F. Choke

An excellent choke for use in receivers or in low powered transmitters. Equal in size to the standard one watt resistor. Wound in 4 sections on Isolantite. Inductance 2 1/2 m.h., D.C. resistance 50 ohms, distributed cap., 1 mmfd., rating 125 milliamperes.

YH14429—List 75c **45¢**
Your Cost

90 Ma. R. F. Choke

90 millihenries choke suitable for short-wave or broadcast work.

YH14422—Your Cost **75¢**
Short-wave choke, National No. 92. Rated inductance 5.2 millihenries. Fully shielded. Mounts with single screw. Solder lug terminals.
YH14423—Your Cost **42¢**

Transmitting Chokes

Isolantite mounted choke for medium and high power transmitters. Two types, one for 160 and one for 40 meters. Insulated for 10,000 volts. Inductance 4 millihenries; distributed cap., 1 mmfd.; D.C. resistance 10 ohms; cont. current rating 6 amp.; intermittent .8 amp.

YH14399—For 160 Meters
YH14394—For 40 Meters
Your Cost, Any Type **\$1.35**

H. F. Receiver Choke

Completely encased two-section honeycomb wound R.F. choke. Excellent for output circuits of detector stages, especially 2nd det. In superhets. Induct., approx. 12 m.h., D.C. resistance approximately 120 ohms.
YH14393—Your Cost **75¢**

ULTRA S. W. Tuning Coil

Designed for extremely short wave use, down to about 1 1/4 meters. Maximum wave-length possible approx. 10 meters. Employs a low-loss variable form which permits two interchangeable coils to be compressed or extended for tuning, asynchronously varying an air-dielectric condenser. Constant "Q" factor, and constant L to C ratio at all frequencies covered. Supplied with 2 coils, one of which covers a range of 1 1/4 to 6 meters, the other—5 to 10 meters. Easily adaptable to any ultra S.W. receiver, 4 mounting brackets making installation simple. New in design and features, it will improve the overall efficiency of any ultra H.F. set. Shpg. wt. 2 lbs.
YH14008—Your Cost **\$2.75**

5 Meter Interruption Frequency Coil

For use as low frequency oscillator in 5 meter super-regenerative sets.
YH14321—Your Cost **49¢**

NATIONAL 5 Meter Coil

Heavy copper air spaced winding. Steatite base. For 6 meter transmitters and receivers.

COLUMBIA RF Choke

Especially designed replacement for the Columbia Screen Grid 8 receiver. Fibre form with lug terminals.

YH10145—Your Cost **35¢**

Midget Trimmers

Extremely compact trimmers mounted on bakelite strips. Ideal for use in short wave sets. Have solder lug terminals. Capacity range from 8 to 30 mmfd.
YH9775—Each **6¢**

Dual Trimmers

Similar to the above, but two trimmers mounted on single bakelite strip. Range 3-30 mmfd. each trimmer.
YH9776—Your Cost Each **14¢**

Variable Condensers and Knobs

Shaft Coupling and Shaft Extenders

For mounting two or more condensers, rheostats, switches, etc. in tandem. Extenders for lengthening shafts of same. All accurately machined to the exact size as specified. 6-32 machine screws used on all couplers and extenders. Shafting, both fibre and brass, are full length and are straight.

Truest Variable Compact S. W. and Broadcast Condensers

With trimmers on 2 and 3 gang. Heavy aluminum plates. Ball bearing rotor. All units have low end plates and measure 1 1/2 x 3 1/4". Mounting holes provided on front, rear and bottom. Single section units have 1/4" shafts; multiple units have 3/8" shafts. Mounting centers spaced 1 1/4". Bakelite insulation. Capacities increase with clockwise rotation. Average shpg. wt. 2 lbs.

"Precision" Condensers

Latest type, for use in Superheterodyne and T. R. F. receivers. All empty rigid construction, have ball-bearing shafts and have high shields between sections. Mountings for trimmers on right side (now located on left) permits transferring them. Mounting holes either end and at bottom. Aluminum end plates are slotted. Superhet condensers have specially cut oscillator section which eliminates the need for any "padder" circuits. T. R. F. condensers have all sections of identical capacity. All units listed below, both Superhet and T. R. F., have capacity of .00036 mid., and have standard 3/8" shafts. All are 4 1/2" wide and 3 1/2" high.

DIALS

CROWE Precision Tuning Dial

A new 3" dial designed for use with short-wave receivers, laboratory instruments, etc. Dial can be accurately read to .1 of one division. Open vision pointer permits addition of other bands in the center of the scale. Provides a spread of 270° for 180° condenser rotation. Dial ratio 14½:1, free from backlash. Plated scale and pointer serves as electrostatic shield to prevent body capacity effects. Shpg. wt. 2 lbs.

YH9883—
Your Cost Each..... **\$2.64**

Lafayette 4-Band Airplane Dial

A highly decorative dial calibrated in 4 wave bands. American broadcast band is etched in large figures on large ring which makes an ideal escutcheon. Continuous coverage from 11 mc. to 1.5 mc., and 550 to 150 kc. Shpg. wt. 1 lb.

YH9817—
Your Cost..... **\$1.49**

New "Band Spread" Airplane Dial

No finer dial could be desired for short wave receivers—has both a dual pointer and "second hand". The "second hand" or "band spread" ratio is 36:1, making critical or "fine" tuning simple. In addition to this band spread feature it has 2-speed tuning control so that the dial to condenser ratio is: normal 24:1, slow speed 125:1. Diameter 3 15/16". For 3/8" shaft. Includes 2 pilot light sockets, bronze escutcheon plate, and double knob. Shpg. wt. 2 lbs.

YN14221—
Your Cost..... **\$2.25**

Modern 3-Band Airplane Dial

This attractive modernistic dial will dress up any receiver. Scale supplied is calibrated for 3 bands, 550 to 1700 kc, 1.75 to 5 mc., 5 to 20 mc. Bands clearly marked and all scales easily and directly read. Ratio 12:1 in 180°, diameter 3 1/4". Obtainable for 3/8" or 1/2" condenser shafts. No necessity for special cabinet cut-out—will fit standard 3 3/4" round opening. Bronze escutcheon only. Shpg. wt. 1 lb.

YH9908— 3/8" shaft. **97¢**
Your Cost.....
YH9909— 1/2" shaft. **97¢**
Your Cost.....

Airplane Dials

Positive friction drive—no backlash. Has 2 pilot bulb sockets. Bronze finished escutcheon. For 3/8" or 1/2" shaft, please specify which is desired. Brown figures on buff colored dial. Black double ended pointer. Very neat and attractive. Shpg. wt. 2 lbs.

Stock No.	Diam.	Ratio	Your Cost

Your Cost, Any Type **\$2.65**

Mica Tuned

Specially designed for experimental and replacement purposes. 465 K.C. is Litz wound. The twin coils are of 10-41 Litz with a power factor of .01 or a Q of 100. Coupling is very slightly below optimum. Tuned by adjustable condensers with mica dielectric and Isolantite base. Wax impregnation and sturdy construction provide excellent stability. The shield can is 1 1/4" square by 2 3/4" high.

- YH8539**—Peaked at 175 K.C.
- YH8540**—Peaked at 465 K.C.

Your Cost, Either Type **97¢**

Variable Coupling I.F. Transformers

Latest in I.F. transformer design. Employed in modern types of high-fidelity receivers. Designed to offer the maximum in selectivity or fidelity, as desired, by simply varying coupling between two windings. Uses triple pie-wound Litz coils. Air-tuned condensers.

- YH8537**—465 K.C. List \$5.50 **\$3.24**

GEN-RAL Multi-Wave Units

YH9875—Four-Band Unit, range 540 to 22,000 K.C.; for use with 3 gang .00037 mfd. variable condenser with 2-I.F.T.'s, and complete specifications for building a multi-wave receiver of modern design. Shpg. wt. 5 lbs. **\$9.35**
Your Cost

Completely assembled and aligned multi-wave coil units that simplify construction and wiring for even the most inexperienced layman. Consists of Antenna, R.F. and Oscillator coils, completely shielded, on metal superstructure with range changing switch, trimmers and padding condensers. These components are all wired and pre-aligned at the factory—so that the greatest of difficulties in superheterodyne receiver construction, of the multi-wave type, are automatically eliminated. Units include hi-gain I.F. transformers, 465 K.C., schematic and pictorial wiring diagrams, layout plans and all necessary instructions.

YH9876—Four-Band Unit for short-waves only. Covers range from 1.5 to 18 megacycles with .00014 mfd. variable condenser (3-gang). Supplied with 3-507 K.C. I.F.T.'s, 1-Beat Oscillator Coil, diagrams and instructions. Shpg. wt. 5 lbs. **\$11.67**
Your Cost

TOBE

Triple-Tuned, Link Circuit I.F. Transformer

Identical to those employed in the famous Browning 35 receiver, Pi-windings, the middle winding being the "link" circuit. Extreme selectivity, yet gives full band width amplification. Type Range 440-470 K.C. only. Shpg. wt. 1 lb. each. Stock No. Connection Your Cost

- YH9901** Inter Stage **\$1.62**
- YH9902** Diode Stage **1.62**

Litz Wound Air-Tuned Hi-Gain I.F.T.'s

For those who demand the finest in fixed coupling I.F. transformers. "Pi" wound with hi-quality Litz wire. Double tuned precision air condensers. Available for 456 K.C. only, range 440-470 K.C. Available for inter-stage or diode connection. Shpg. wt. 2 lbs.

- YH9993**—Inter Stage, Hi-"Q". Your Cost **\$2.20**
- YH9994**—Diode Stage, Hi-"Q". Your Cost
- YH9995**—Inter Stage, Med. "Q". Your Cost **\$2.06**
- YH9996**—Diode Stage, Med. "Q". Your Cost

Variable Coupling I.F. Transformers Air-Tuned

Designed with panel control that permits ganging of units. Continuously variable selectivity without affecting tuning. Improved rugged construction—with air-tuned condensers. Supplied mounted

with variable control shaft and knob. 456 K.C. units adjustable from 440-470 K.C. Shpg. wt. 2 lbs. each.

Stock No.	Freq. No. Pk.	K.C. Connec- tion	Your Cost
YH10209	175	Interstage	\$2.94
YH10210	175	Diode	
YH10211	466	Interstage	Any Type
YH10212	466	Diode	

Beat Frequency Oscillator Coil—Air-Tuned

This beat frequency oscillator assembly consists of an efficient coil winding and a hi-quality air dielectric variable condenser. The pitch of the beat note is adjustable. Unit includes grid-leak and condenser. Frequency is adjustable from 440-470 K.C. Shpg. wt. 2 lbs. **\$2.06**
YH10213—Your Cost

Air-Tuned Padders and Trimmers

Miniature variable condensers, mounted on Isolantite bases. Possess low power factor and maximum stability of capacity under varying temperature and humidity conditions. Ruggedly made.

Stock No.	Cap. Range	Circuit Use	Your Cost
YH10214	2-7 mmf.	Trimmer	\$0.44
YH10215	3-17 "	Trimmer	.50
YH10216	34-67 "	Padder	.76
YH10217	75-110 "	Padder	.88

Super-Het & T.R.F. COILS

Super Het. Oscillator and Antenna Coils

These are lateral wound matched coils that may be used together or separately, if desired; or for replacement purposes. Broadcast coils range: 550 to 1500 K.C. Short-wave and broadcast combination coils range includes above range and 1500 to 4000 K.C. Oscillator coils for both 175 and 465 K.C. I.F. Very efficient coils—accurately matched, designed for use with a .00035 mfd. variable condenser.

Antenna Coils

Stock No.	Range	Your Cost
YH10079	S.W.-B.C.	\$0.57
YH10080	B.C.	.42

Oscillator Coils

Stock No.	Range	I.F. K.C.	Your Cost
YH10081	B.C.	175	\$0.45
YH10082	B.C.	465	.45

YH10084	S.W.-B.C.	465	.65

Composite Oscillator and I.F.—175 K.C.

High grade composite coil used as the first detector, oscillator and first I.F. transformer. Eliminates the use of one tube. Top tuning. Factory peaked at 175 K.C. No padding necessary as it is made for the special tracking oscillator section of variable condensers of .00036 mfd. in square aluminum can 3x2" square. Shpg. wt. 3 lbs. YH9997—**Your Cost Each \$1.25**

Truest High Gain I.F. Transformers

Midget Coils

175 K.C. units single silk enameled wire wound; 456 K.C. units Litz wire wound. Employs 2-in-1 Isolantite base trimmer. Two bronze springs hold entire unit in the shell. Can size 1 1/2 x 2 3/4" high. Shpg. wt. 8 oz.

YH10021—175 K.C.

YH10022—456 K.C.

Your Cost, Either Type

Similar to the above, but with tapped secondary for Wunderlich 55, 75, 6B7, 2B7, etc. tubes.

YH10023—175 K.C.

YH10024—456 K.C.

Shielded R.F. Coils

These coils are used by many set manufacturers. Exceptionally high gain is provided. For use with .00035 condenser. All coils are matched to each other. Types available: R.F. and Antenna Coils, both shielded. Mounted in shield cans 2 1/2 x 2 3/4" high. Shpg. wt. 8 oz. YH10087—Set of 2 R.F. and 1 Ant. Your Cost **75¢**
YH10088—Set of 3 R.F. and 1 Ant. Your Cost **\$1.00**
YH10019—Ant. Coil only
YH10020—R.F. Coil only
Your Cost, Either Type **27¢**

Truest T.R.F. Coil Kits Litz Wire Bank Wound

Litz wire coils on 1 1/2" diameter forms 2 1/4" long. Mounted in shields 1" in diameter, 2 1/2" long. Have mounting lugs. Designed for use with .00036 mfd. condenser. Blue print furnished with each kit.

2 Coils: 1 Antenna, 1 R.F. YH10045—Your Cost **98¢**
3 Coils: 1 Antenna, 2 R.F. YH10046—Your Cost **\$1.48**
4 Coils: 1 Antenna, 3 R.F. YH10047—Your Cost **\$1.95**
YH10089—Antenna Coil only
YH10090—R.F. Coil only
Your Cost Each, Either Type **34¢**

Shielded Litz R.F. and Antenna Coils

175 to 550 Meters

For T.R.F. or Super heterodyne receivers when used with proper oscillator coil. Precisely matched. Completely shielded in can whose dimensions are 1 1/2" diameter, 2 1/4" high with two 3/4" spade lugs. Available with high or low impedance primaries. When used with screen-grid tubes high impedance primaries are desirable in order to secure proper gain. Windings are of solenoid type—which results in a coil of maximum inductance (for given amount of wire) and least R.F. resistance. Designed for use with .00035 mfd. variable condenser. Covers complete B.C. band—175 to 550 K.C. Each coil supplied complete with instructions and diagram for connecting.

Stock No.	Type Coil	Pri. Imp.	Your Cost
YH10076	Ant.	Low	\$0.34
YH10077	Ant.	High	.34
YH10078	R.F.	Low	.40
YH10085	R.F.	High	.40

Oscillator Coil for 2A7 or 6A7 Tubes

A precision wound oscillator coil, thoroughly impregnated and housed in a metal shield. For 175 K.C. I.F. Made to track with a 1000 mmfd. padding condenser and .000365 variable condenser. Size 1 1/2 x 1 1/2". Shpg. wt. 8 oz. YH10029—Your Cost Each **59¢**
Similar to the above, but for 456 K.C. I.F. Made to track with a 500 mmfd. padding condenser and .000365 variable condenser. Shpg. wt. 8 oz. YH10031—Your Cost Each **59¢**

Matched Antenna and R.F. Coils

75 to 550 Meters

Dual-wave coils, with high impedance primaries—for screen grid tubes. Range: 75 to 200 meters, and 200 to 550 meters. For use with 360 mmfd. variable condenser, although standard .00035 mfd. variable may be used with slight reduction of top end of each range. Coil dimensions are 1 1/2 x 2 1/4" long. Supplied with mounting bracket, dowl and hardware so that the coils may be mounted in any position. Wiring diagram and instructions showing coil connections.

YH10003—Antenna Coil

YH10004—R.F. Coil

Your Cost Each

33¢

Short-Wave and Broadcast Hi-Gain Litz Coils

120 to 200 Meters

200 to 545 Meters

Completely shielded 2-band coils. Comprises hi-impedance primary with Litz wound secondary tapped for low wavelengths. For use with .00085 mfd. variable condenser. Can 1 1/2" diameter and 2 1/4" high, with spade bolts for mounting. Also diagram.

YH10005—Antenna Coil

YH10006—R.F. Coil

Your Cost Each

47¢

Poly-Iron

A NEW line of R.F. and I.F. inductances. Employs cores made of Poly-Iron, a finely divided iron material, which increases the inductance of a coil without a proportionate increase in losses. Requires less turns of wire. The use of these coils will increase the gain per stage as well as selectivity. I.F. transformers for 456 or 175 K.C. Specify type desired.

YH10218—Double air-tuned I.F. T. (See Fig. A.) List \$5.50 **\$3.24**

New! YAXLEY Gang Switches

These new gang switches are far superior to any other on the market now. Contact members are heavily silver plated, and given a smooth hard finish. Contact shoe, of the self-cleaning type is of pure silver. All switches are provided with one permanent stop and one adjustable stop, thus a single switch may be used as a 2, 3, 4, 5, 6 (up to 11), point switch by simply adjusting the stop on front of switch to number of points required. Bushings 3/8" and extend 3/8". Bakelite knob supplied. These switches are suitable for use either in radio receivers or test instruments.

YM12851—D.P.D.T.	Your Cost \$1.65
YM12852—D.P.S.T.	Your Cost \$1.65

NOTE—TECHNICAL BOOKS ARE NOT RETURNABLE

SET BUILDERS ACCESSORIES

Special Shield
Two-piece shield made of heavy gauge LaSalle metal that will not vibrate. Fits all small "ST" type tubes. Perforated for ventilation. Mounting centers 1 1/4" apart. Highly polished finish. Shpg. wt. 1 lb.

YM13255—Your Cost, Each **9c**
Per Dozen **\$1.00**

"ST" Type Tube Shields

For 56, 57, 58, etc., type tubes. Three pieces. Both long (covering tube) and short (cap projects) types. Barrel diameter 1 1/4". Natural bright aluminum.

Shpg. wt. 1 lb.
YM13265—4 3/4" high. **11c**
Your Cost Each
Lots of 10 Each **10c**
YM13266—3 3/4" high. **10c**
Your Cost Each
Lots of 10 Each **9c**

Jacket Shields

Fit all dome type tubes. Bases for wafer sockets with mounting holes 1 1/2 to 1 3/4" apart. Bodies consist of two identical shells which fit snugly. Caps fit snugly.
YM13263—Type A: For long tubes with grid caps, such as 6C6, 6D6, 57, 58, 24, 35, etc.
YM13264—Type B: For short tubes with grid caps, such as 36, 38, 6A7, 39, 55, 75, 6C7, 6D7, 85, 89, etc.
YM13262—Type C: (not shown) Similar to type A, but for short tubes without grid cap, such as 27, 37, 56, 76, 41, 84, 12Z3, 6Z4, etc.

Your Cost Each, Any Type **6c**

Liquid Victron

The famous Victron H. F. insulation in liquid form for coating R.F. coils. Dries quickly. 2 ounce can.

YP15260—Your Cost **21c**
1 pint can **\$1.47**
YP15275—

Black Crystallizing Lacquer

For touching up and for completely finishing panels, chassis, etc., in the attractive crystallized black professional finish. Same size as above.

YP15289—Your Cost **21c**
1 pint can **\$1.30**
YP15274—

Color Coding Enamel

For color coding coils, terminals, etc. Green, blue, yellow, red and thinner. Brushes included.

YP15258—Your Cost **30c**

Adjustable Drilling Template

Indicates the exact location for drilling of holes on panels or baseboards. The adjustable template fits perfectly on any part and is then locked in position by the thumb nut. Instruction included. Shpg. wt. 1 lb.

YP14935—List 50c **15c**
Your Cost

NATIONAL Coil Dope

For use as a cement for holding windings in position. Does not affect low loss features of coil form. Provides a tough protective film. In can. Shpg. wt. 1 lb.

YP15237—Your Cost Each **90c**

Radio Alloy Shield Cans

Shipped knocked down. Corner posts drilled for 1/2" screws. 1/4" stock.

Stock No.	Size	Each

HARDWARE *for Every Purpose*

Alligator Test Clips

Head of clip is long thin design. Round barrel made

to fit plug-in prongs. Has firm spring grip. Ideal for meters, test boxes, etc. Size $\frac{1}{4}$ " wide, 2" long. **YM12955—Per Doz. 40c**
Your Cost Each..... 4c
 YM12956—Same style as above but $2\frac{3}{4}$ " long. $\frac{1}{4}$ " wide.
Your Cost Each..... 5c
 Per Dozen..... \$0.55

Jacks and Plugs

For use with all types of transmitting equipment. All milled of solid brass, nickel plated and furnished with lugs. Plugs have alloy contact springs secured over a pin, making them non-collapsible. Giant plugs and jacks have capacity of 25 amps., others have capacity of 8 amps. The design and construction of these jacks and plugs insure perfect electrical contact, and consequently makes them also ideal for use with test equipment.

YM12990—Giant Plug with 10-32 $\frac{1}{2}$ " screw.
YM12991—Giant Plug with $\frac{1}{4}$ - $\frac{3}{4}$ " screw.
YM12992—Giant Plug with $\frac{1}{4}$ -28 Threaded Shank.
Your Cost Each, Any Type..... 30c

KESTER Paste Flux

Entirely new, different, and far more efficient soldering paste designed for the serviceman, constructor, and for speeding-up production. Made by a new viscosiforming process which makes possible a uniform non-varying paste. All fluxing ingredients are finely divided and evenly distributed. Results in better soldering. Packed in handy sized tins. Contains 2 oz. of flux. Only small quantity necessary for joints.

YP15278—Your Cost 14c

Insulating Pitch

Specially treated. Has low melting point which makes it easy to use. For sealing transformers and chokes to protect them against moisture.

YP14864—14 oz. Can Shpg. wt. 3 lbs. Your Cost 29c

YP14865—1 gal. Can Shpg. wt. 12 lbs. Your Cost \$1.25

ALUMAWELD Solder

Makes possible the successful soldering at low temperatures of Aluminum-Pot Metal-Cast Iron and all other metals. Kits contain special solder, flux, wire brush, illustrated instructions. Shpg. wt. 1 lb.

YP15200—Small Kit Your Cost 58c
YP15201—Medium Kit Your Cost \$1.10
YP15202—Large Kit Your Cost \$3.15

Solderall

An amazing preparation which solders all metals, except aluminum. Consists of a mixture of paste and powdered solder. Put up in small metal tubes, ready for instant use. Makes a clean, strong joint; easy to apply.

YP18460—Single tubes. Your Cost 8c
YP14861—Display box of 24 tubes. Shpg. wt. 4 lbs. Your Cost \$1.75

ICA Soldering Iron Holder and Stand

All metal construction, lined with asbestos. Also acts as stand for iron. Iron nests in holder. Shpg. wt. 3 lbs.

YP15231—Your Cost 70c

Snap-On Iron Holder

Iron snaps into place and cannot roll. May be left on constantly. Raises iron 2 inches from bench and grips firmly; no possibility of burned furniture. Fits all makes and sizes and takes up very little space.

YP15276—Your Cost 20c

Handy Stand

Concave metal stand made of rust resisting metal. Curved so as to prevent iron from rolling—and will consequently save the user considerable annoyance and expense caused by burned table tops, etc. Ruggedly built—will last approximately as long as more expensive stands. Shpg. wt. 1 lb.

YP15219—Your Cost 10c

Iron Repair Kit

Contains all necessary miscellaneous parts for repairing such popular makes as: Westinghouse, Hot Point, American Beauty, Simplex, etc. The assortment consists of such essential items as: mica washers, terminals, insulators, asbestos sleeving, screws and nuts, and other useful necessities. While used chiefly in flatirons a good many of the items may be utilized for repairing of toasters, soldering irons, heaters, etc. Shpg. wt. 1 lb. **YP15277—Your Cost \$2.98**

MAGIC Embossing and Engraving Pencils

The engraving pencil will burn lettering, designs, etc. in wood, leather, rubber and other similar materials. Easily used. Heat adjusts itself. Absolutely no danger. The embossing pencil will emboss lettering, etc., in beautiful colors: gold, silver, blue, green, purple, copper, etc., on leather, cloth, silk, paper, wood, celluloid, bakelite, etc. When the foil is removed the lettering or design is left on the material. Each furnished with complete instructions and foil. Book of designs and lettering of all types furnished with engraving kit. Shpg. wt. 2 lbs. **YP15158—110 V. Engraving Kit Your Cost 95c**
YP15157—110 V. Embossing Kit Your Cost 78c

Truest Soldering Irons

Such outstanding features as—gun-metal tube—nichrome element wound on steel core—mica insulation both on core and between element and barrel—spring cord protector—rubber plug. Shpg. wt. 3 lbs.

YP15180—75 Watt, 110 Volt \$1.95 Your Cost

BATTERIES & BATTERY CHARGERS

MALLORY Charger

No installation necessary—simply attach clamp-on receptacle to dash and attach wires to ammeter and ground. Output tapers 5½ to 3½ amps. Two fuses offer complete protection. Polarized plug prevents discharging or ruining battery. Furnished complete with cables, plugs, and full instructions for operation. For 110-120 volt use only. Shpg. wt. 7 lbs.
YP15698—List \$11.50
Your Cost..... \$6.75

Tru-test Automobile Battery Charger

Attach the clamp on receptacle to the dashboard of your car and the two leads from the receptacle to your ammeter. At night simply plug your charger into the receptacle and it will give your battery the necessary boost to keep it up to its full capacity. Charging rate 3 amperes tapering off as battery becomes charged. Shpg. wt. 7 lbs.
YN14200—Your Cost..... \$4.95

Tungar 5 Amp. Charger

For charging any 6-volt battery at home. Delivers full 5 ampere rate and tapers off as battery becomes charged, thus preventing overcharging. Complete with receptacle for attaching to car and ammeter so that battery can be charged without removing it from the car. Complete with tube and all attachments. For 110 volt, 60 cycle A.C. Shpg. wt. 12 lbs.
YP15699—Your Cost..... \$9.48

EVEREADY "Air Cell"

Latest type—retains all features of previous model but is considerably smaller in size. No recharging—simply add ordinary drinking water once a month. Will give 1,000 hrs. of service with modern 2 volt tube receivers. Shpg. wt. 10 lbs.
YY19973—Your Cost..... \$4.17

300 Watt Gas Engine Driven Generator

Ideal for use with P. A. systems, "ham" stations, electrical appliances, for lighting systems, etc. Engine is a four cycle motor which develops 3/4 H. P. and which runs 4 hours on one quart of gas. Air cooled engine has built-in magneto, full lift carburetor, mechanical governor and foot pedal starter. The pioneer generator delivers 110 to 120 volts 60 cycles A. C. at 300 watts. Also delivers 6 volts D. C. at 3 to 5 amps, for charging storage batteries. Generator coupled to engine by V-pulleys and belt. Entire assembly mounted on steel frame 12x26". Comes complete, ready to operate. Shpg. wt. 98 lbs.

YY19899—Your Cost **\$79.95**

GEN-E-MOTOR Auto "B" Eliminators

Combined motor and generator operating from a 6-volt storage battery. Can mount in exceptionally small space—3 3/4 x 5 3/4 x 5 3/4". Each complete with latest type filter. Will carry up to 25% overload. Shpg. wt. 17 lbs.

Wind-Driven Charger

A complete unit operated by wind to provide 6 volts at 5 amperes, direct current, to keep charged the storage battery of a radio set or 6 volt lighting system. Generator is completely weatherproof and includes an automatic cutout device which operates when the battery is fully charged. The propeller is scientifically curved to operate at maximum r.p.m. at any wind velocity and to operate at extremely low wind pressures. May be mounted directly on the barn or house roof, or may be supported by the tower unit shown in illustration. Furnished complete with ammeter, cutout relay, pipe fittings, clamps, and all other parts needed to make a complete installation. Shpg. wt. 35 lbs.

YS17225—Wind Gear—**\$15.95**
Your Cost

YS17226—Tower. Made of angle steel, well braced and stayed. Brackets will fit flat or gabled roofs. Raise charger approximately 5 feet from support. Shpg. wt. 12 lbs. **\$3.95**
Your Cost

Dual Unit for Transmitters

Developed especially to suit where reliability, small size, and light-weight are requirements. Ideal for two-way ultra S.W. police radio equipment. Quick starting motor, builds up to full voltage almost instantly. Employs special ball bearings which eliminates the need for oiling. One of the Genemotors delivers 250 V.D.C. at 50 MA. for operating the receiver. The other unit delivers 350 volts at 100 MA for the transmitter. It runs only when transmitting. DC voltage input required to motors—6.3 V. Current drain of receiving unit (input) 4.5 amps.; transmitting unit 11 amps. Designed for continuous use; well balanced with vibration reduced to a negligible point. Size—approx. 5 1/2" high, x 4" wide, x 7" long. Shpg. wt. 20 lbs. List Price \$40.00.

YN14181

Short Wave D.C. to A.C. Inverter

A specially filtered mechanical inverter suitable for radio receivers of the all-wave type. Will function as quietly on short-wave bands as well as on the broadcast band. Also, ideal for amplifiers and public address work where the consumption does not exceed the maximum capacity of the unit. Operates from 110 to 120 volts D.C.—produces 110 to 120 volts A.C., 150 watts maximum. Completely fused. Well designed and ruggedly made. Vibrator easily serviced or replaced, when necessary. Attractive appearance—finished in cracked black. Supplied complete with flexible rubber covered line cord and switch. Output receptacle on side. Full operating instructions. Shpg. wt. 18 lbs. **\$27.50**
Your Cost

GENERAL "B" Supply

Delivers A.C. from a 6 volt battery. Taps at 90, 135, 180 and 250 volts. Battery drain only 4.0 amperes. Uses type 84 rectifier. 6 3/4 x 6 1/2 x 2 1/4". Shpg. wt. 15 lbs.
YN14252—Power Supply, with rectifier tube. **\$8.82**

Trutest

Automatic Battery Charge Rate Regulator

The Trutest Regulator advances the charging rate of the generator by approximately 5 amperes when the set or appliance is turned on, but automatically returns generator to the original charging rate when the equipment is not operating. Thus, generator and battery are saved from being overtaxed. Easily installed, without the need for any tools. Full instructions included. Shpg. wt. 2 lbs.

YV14258—Trutest Automatic Charge Rate Regulator.
Your Cost **\$2.25**

I. C. A. Conversion Resistovolt

For dry cell battery receivers. Facilitates change-over to Air Cell operation, resulting in advantages of long-life, economy, and constant voltage. Also, for replacement of ordinary ballast tubes in battery receivers, either of dry cell or Air Cell type. Does not wear out like ordinary ballast tubes, consequently eliminates necessity for frequent replacement, is very inexpensive, and simple to install. Plugs into socket of the receiver in place of the ballast. Insures long tube life and full 1,000 hours, minimum, of long and trouble-free Air Cell battery service. Requires no tubes, no soldering. Average shpg. wt., 1 lb. each unit.

NOISE FILTERS

SPRAGUE Interference Analyzer

A truly professional instrument which is of great aid in solving and eliminating interference. Simply connect to the electrical appliance suspected, turn on the customer's receiver—or a portable (if one is employed) and manipulate the Analyzer switching device. This switch automatically connects various filter banks into the interference circuit until a combination is found that effectively reduces or eliminates the noise.

(Output meter in speaker circuit will now readily indicate any change.) Then, by noting the position of the switch and referring to the instruction card, substitution is made of the values employed in the Analyzer at that particular position of the switch. **Thorough, effective, and a big time saver!** Compact in construction, measures 4 1/2" wide, 7" high, and 3" deep. Rugged and attractive in appearance, case is made of moulded Bakelite in mottled walnut finish. Parts employed have more than a sufficient safety margin and are designed to easily withstand 110 volts A.C. or D.C. and 220 volts A.C. or D.C. Flexible leads with plug and rubber covered clip connectors permit quick and safe connection to "input" and "output" sides of Analyzer. Ground terminal on unit connects to external ground and removes inconsistencies from tests. Furnished complete — nothing else to buy! Shpg. wt. 10 lbs. **\$8.90**
YL12697—Your Cost.

SPRAGUE Interference Elimination

Condensers and Chokes

Designed to meet all requirements in the field of interference elimination, and to permit construction of any type filter arrangement. "A" is a dual-condenser, suitable for large motors. In obstinate cases choke "D" may also be required. "B" is an oil impregnated-oil filled condenser—for small motors requiring high-capacity units. "C" is available in 2 sizes, both tubular 2 lead condensers—for connecting to fractional H.P. motors. "D" is a completely shielded choke, maximum 10 ampere rating, for large motors—up to 1 H.P.

Stock No.	Type	Shpg. Wt.	List Price	Your Cost
YL12438	A	1 lb.	\$2.50	\$1.47
YL12439	B	1 lb.	1.75	1.03

YL12442	D	1 lb.	1.35	1.35

KNOCKOUT BOX

Solid heavy gauge steel with three 7/8" knockouts on each side. Ideal for mounting all of above components used in interference filtering. 6 1/2 x 6 1/2 x 3". Shpg. wt. 2 lbs.
YL12672—Your Cost. **88¢**

ELIM-O-STATS Radio-Noise Eliminators

Small, compact, inexpensive, and easy-to-apply units for dispensing with man-made static. Each is for different requirements, depending on noise, type receiver, etc.

For Use Directly at the Receiver

Designed for application to radio sets which are receiving a low intensity of noise through power lines. Inserted in plug of line cord or set, then in power receptacle. Rating 110 volts, 5 amps. max. Shpg. wt. 1 lb.
YL12432—Your Cost. **24¢**

Similar to above, but more effective with certain types of receivers or in cases where more severe noise is encountered. Plug end fits directly into power receptacle, and set plug fits into unit. Shpg. wt. 1 lb.
YL12433—Your Cost. **44¢**

Especially suitable for All-Wave receivers. Most effective when used with noise-reducing antenna system. Sectional band-suppression construction. Rating 110 volts A.C. or D.C., 3 amps. max. Shpg. wt. 5 lbs.
YL12434—Your Cost. **\$2.94**

For Use with Disturbing Electrical Devices

Designed exclusively for dial tele-phones which create interference. Satisfactorily reduces noise over a wide range. Simple and convenient to install. Full instructions supplied with each. Shpg. wt. 1 lb.
YL12435—Your Cost. **73¢**

For application to small appliances which create interference. Plugs directly into the line and requires a short return wire to the frame of the appliance. Rated at 110 volts A.C. or D.C., 5 amps. max. Shpg. wt. 1 lb.
YL12436—Your Cost. **73¢**

Employs sectional band-suppression construction which permits wider application. Supplied with plug and convenience outlet which means quick connection to any appliance. Rated at 110 volts A.C. or D.C., 3 amps. Shpg. wt. 5 lbs.
YL12437—Your Cost. **\$2.94**

NOISE FILTERETTES

The TOBE products listed below were developed after years of research and pioneering in the noise elimination field. They are designed for application in any type of noise interference problem. Oversize parts used in each.

Line Filterette RF-2

To eliminate noise reaching the receiver through the power line. Connects between the line and the receiver. Not suitable for application to electrical appliances. We recommend the use of the Model 33

Filterizer Kit in conjunction with this unit. Shpg. wt. 3 lbs.
YL12608—Your Cost. **\$2.90**

Filterette 110-PO

For suppressing radio noise caused by electric refrigerators, heating pads, fruit juice extractors, adding machines, etc. Contained in a metal case 5 1/2 x 4 1/2 x 3 1/2". Receptacle and attachment plug fit all standard wiring outlets. Maximum potential 110 volts A.C. or D.C. Maximum current 5 amperes. Shpg. wt. 13 lbs.
YL12683—List \$10.50
Your Cost. **\$6.18**

Filterette Junior

For household appliances. Vacuum cleaners, small hair dryers, fans and cash registers are easily made interference free by use of a Filterette, Jr. Bakelite case 1 1/2" in diameter and 2 1/2" long. For binding post for connecting return wire from Filterette to frame of appliance. 110 volts A.C. or D.C. Shpg. wt. 1 lb.
YL12601—Your Cost. **\$1.32**

Filterette Senior

For interference problems requiring a larger condenser than the "Junior." Shpg. wt. 4 lbs.
YL12600—Your Cost. **\$3.24**

Inductive Capacitive Filterettes

Designed for application to motors, generators farm lighting equipment, refrigerators, etc. Contained in metal cutout cabinets and are fused for protection against overload. Models listed below are for 110 volts, A.C. or D.C. operation but can be furnished for 220 volts at higher prices.

YL12680—5 Ampere Size. 10x6 1/2 x 3 1/2". Shpg. wt. 10 lbs. List \$12.50 **\$7.15**
YL12681—10 Ampere Size. 13x9 3/8 x 3 1/2". Shpg. wt. 15 lbs. List \$20.00 **\$11.76**
YL12682—20 Ampere Size. 16x10 3/4 x 4 1/2". Shpg. wt. 45 lbs. List \$30.00 **\$17.64**

Capacitive Filterettes

A pure capacity type that does not use chokes. To be used with motors, generators, rectifiers and other electrical apparatus. Due to the fact that no current flows through this model it therefore has no current or wattage rating. These filters are connected across the line, that is, in parallel with the appliance. Contained in metal cutout boxes approved by the board of fire underwriters, 7x6 3/4 x 3 1/2". Has fuse block. Shpg. wt. 6 lbs.

YL12670—110 volts D.C. Model 10. List \$10.00

NOISE REDUCING ANTENNAS & EQUIPMENT

Trustest 'Low Ohm' Wire For Aerials and Transposed Lead-ins

Especially designed to have a low resistance at high frequencies. Hard enough to prevent undue stretching yet soft enough to be easily worked. Intended for the aerial proper and transmission lines. Shpg. wt. 3 lbs.

YQ16264—Heavy Bare, #7/20. Your Cost **69¢**
Per 100 Ft. Coil

YQ16265—Heavy Enameled, #7/20. Your Cost **81¢**
100 Ft. Coil

YQ16266—Light Enameled, #7/25. Your Cost **28¢**
100 Ft. Coil

Transmission Cable

Especially designed for use with doublet antenna systems. Consists of two rubber covered conductors covered by a weather-proof cotton outer braid. Shpg. wt. (100 ft.), 4 lbs.

YR17152—100 ft. coil. Your Cost **80¢**

YR17184—500 ft. coil. Your Cost **\$3.45**

Shielded Transmission Line

A ten-strand wire covered with live rubber, a lacquered cotton braid and a woven-tinned shield. This wire is the same type as used in many filtered aerial systems such as Tobe, Lynch, etc.

YQ16240—50 Ft. 100 Ft. 500 Ft. Your Cost **55c \$1.05 \$4.95**

Shielded Transmission Cable

Special two-wire shielded cable for use as transmission line with doublet antennas. Cable is built-up to a fairly large diameter so as to provide space between conductors and shield; this reduces losses to a minimum.

YQ20860—Your Cost per foot **9¢**
50 Ft. \$4.25 100 Ft. \$7.95

1 Wire Transmission Cable Similar in construction to the above, but with one conductor. Tightly woven shield. $\frac{1}{4}$ " diameter.

YQ20861—Your Cost per ft. **7¢**
50 Ft. \$3.25 100 Ft. \$6.25

New Type Antenna Cross-over Insulator

Glazed Porcelain

For use with double-doublet aerials. Has great tensile strength. Size 6x10".

YR16953—Your Cost Each **40¢**
10 for **\$3.75**

Lafayette All Wave Antenna Kit

Designed for use with all-wave receivers. A special receiver transformer supplied with the kit allows the use of a transposed lead-in without the necessity for making any changes in the input circuit of the receiver. The kit contains the following parts: two 40 foot lengths of heavy enameled wire for the doublets; 50 feet of special weather-proof transmission line; one special receiver matching transformer; one aerial spreader; two antenna insulators; one 6" porcelain screw eye; two nail-knobs; two lead-in strips and one ground clamp. Full instructions furnished. Shpg. wt. 5 lbs.

YQ16474—Your Cost **\$1.30**

I.C.A. Variable All-Wave Antenna Coupler

A new departure in impedance matching devices. By means of two slider rods, the inductance of both primary and secondary windings may be varied. This allows the transmission line to be adjusted to the point of minimum noise pick-up and maximum signal strength. Full instructions.

YL12676—Your Cost **58¢**

TACO No. 20 All-Wave Antenna

The development of the high fidelity receiver has made necessary the use of a scientifically designed antenna system. The new TACO No. 20 system fulfills every requirement for noiseless and efficient reception on all usable frequencies. The kit contains the following equipment: one receiver coupling transformer; one antenna transformer; 60 feet of antenna wire (two 30 foot doublets); 75 feet of special transmission line. Full instructions included. Installation is a simple matter due to the fact that all parts are completely assembled and all solder joints factory made. Nail-it-knobs and antenna insulators are also supplied. Shpg. wt. 6 lbs.

YR16488—List \$6.75 Your Cost Each **\$3.97**

Universal Set Coupler

This fixed type receiver coupler is especially designed to permit the use of an ungrounded transmission line with any receiver, without sacrificing stability. A unit of this type is necessary if full efficiency of a doublet antenna is desired. Easy to attach and mounts near set. Shpg. wt. 1 lb.

YR17082—Your Cost **35¢**

RCA-VICTOR All-Wave Antenna Systems

"Double-Doublet"

Perhaps the greatest step forward in antenna design since the introduction of all-wave receivers. The complete installation consists of an interconnected pair of doublet antennas—one tuned to 16 meters—the other to 49 meters. A special transmission line, an improved type switchless receiver transformer, and all necessary wire, insulators, ground clamp and necessary parts to complete the installation, are included. Full instructions included. Shpg. wt. 6 lbs.

YR17090—Your Cost **\$3.60**

RCA DeLux "Double-Doublet"

Identical with the above, but includes a special Antenna Matching Transformer. This kit is especially designed for use where bad noise fields are encountered. Shpg. wt. 6 lbs.

YR17083—Your Cost **\$4.65**

Essential Parts Kit

For dealers, servicemen and experimenters who may prefer to buy standard parts locally. Kit contains: 1 receiver coupling transformer; 1 crossover insulator; 80 feet of transmission line. Full instructions included. Shpg. wt. 4 lbs.

YR16489—List \$5.00 Your Cost **\$3.00**

Loading Coils

For use with the "double-doublet" antennas when full doublet span cannot be used.

YR17085—Your Cost, per Pair **36¢**

Transmission Line

Put up in 80 ft. coils. Must be added when original length of 80 feet is insufficient.

YR16490—Your Cost **\$2.09**

Airplane Insulator

A $1\frac{1}{2}$ " strain insulator especially designed for use where space and weight is a factor of importance.

YR17175—Your Cost Each **2¢**
Per Dozen **22c**

Ceramite Transposition Blocks

A standard design ceramite transposition block at an heretofore unheard of price $2\frac{1}{4} \times 2\frac{1}{4}$ ". Shpg. wt. of 10—1 lb.

YR17089—12 for 42c Your Cost Each **4¢**

JOHNSON Transposition Blocks

Unique shape prevents twisting of line. Skeleton construction provides high leakage path. Glazed $1\frac{1}{2} \times 2\frac{1}{2}$ ". Shpg. wt. of 10—2 lbs.

YR17171—Your Cost Each **5¢**
10 for **44c**

All-Wave Coupler

This coupler provides a correct match at all wave-lengths. A doublet Antenna using a twisted pair of transposed lead in must be correctly matched to the receiver. Comes complete with instructions. Shpg. wt. 1 lb.

YR17172—Your Cost **59¢**

Crossover Insulator

For use with doublet antennas. Made of glazed white porcelain. Non-hygroscopic. Size 3" long, $2\frac{1}{4}$ " wide and $\frac{3}{4}$ " thick. Will take #10 wire.

YR16951—Your Cost Each **6¢**

Doublet Lead-in Strip

Consists of two strips covered by heavy cotton weather-proof braid Bakelite strip, riveted in place, holds strips parallel and avoids shorting.

YR16952—Your Cost **9¢**

All-Wave Filtervolt

For all types of electric radios, including short wave, all-wave

and broadcast receivers. Contains two condensers and four chokes in a capacity-inductance circuit. Rated conservatively at 300 watts. For 32, 110, or 220 volts A.C. or D.C. Size $4\frac{1}{2} \times 6 \times 3\frac{3}{4}$ ". Shpg. wt. 9 lbs.

Your Cost
YR17021—Same Kit with 100 ft. cable.
Your Cost

Antenna Kit

An inexpensive yet highly efficient all-wave antenna kit. Uses 35 ft. of the new Giant Killer "lead-in" cable. Better than "twisted pair." Shpg. wt. 4 lbs.

\$2.06
\$2.59
\$4.35

LYNCH Hi-Fi All-Wave

"Duplex" Coupling System

Especially suited for use where the area covered by the antenna is limited. It will improve the efficiency of any doublet antenna now in use; is efficient from 3 to 600 meters. Kit contains: one Hi-Fi Duplex Antenna Coupler made of polished molded bakelite; one 50 foot length of Lynch Giant Killer Cable. Shpg. wt. 4 lbs.
YR17160—Your Cost **\$3.97**
YR17019—Similar to above but with 100 ft. of Cable. Shpg. wt. 5 lbs. **\$5.73**
Your Cost

LYNCH Filterradio

A new line filter for eliminating line noises. When used in conjunction with a good noise-reducing antenna system, such as the adjacent "HI-FI" All-Wave

kit, very satisfactory noise free reception results. May be used with any type of receiver, A.C. or D.C., or generator or inverter fed, maximum voltage 250. Maximum current rating 10 amps. Shpg. wt. 4 lbs. **\$2.94**
YR12679—Your Cost

HI-FI All-Wave Antenna Systems

Completely assembled all-wave antenna systems ready for immediate installation. Available in two types, the Standard, and the Junior, differences between the two are in the lead-in wire which is 50 feet of Giant Killer Cable for the Standard Kit, and 50 feet of high grade twisted pair for the Junior as described below.

YR17017—Junior System. Consists of 1 HI-FI Coupling System, 50 Feet Twisted Pair Transmission Line, 41 feet Doublet 7/22 Copper Wire, 2 Commercial Type Insulators, 1-3" Screw Eye, 2 Nail-It

Knobs, 1-4" Porcelain Lead-In Tube. Shpg. wt. 4 lbs. **\$3.97**
Your Cost
YR17018—Standard System. Consists of 1 HI-FI Coupling System with 50 feet of Giant Killer Cable, 41 feet Doublet, made of heavy HI-MHO wire, and all other miscellaneous parts listed for Junior Kit. Shpg. wt. 5 lbs. **\$5.00**
Your Cost

"Noise-Free" Auto Antenna Systems

KIT A-1

Contains 25 feet Lynch "Hi-Mho" Antenna Wire, two rear axle insulator assemblies, one flywheel housing insulator assembly, all necessary connectors and 10 feet of lead-in wire. Instructions enclosed. Shpg. wt. 4 lbs. **YR14191**—List \$3.50. **Your Cost** **\$2.05**
Each

KIT A-2

Contains 1-Lynch auto antenna impedance matching transformer, 1 receiver impedance matching transformer and 10 feet of Lynch Nostat shielded transmission line. Instructions included. Shpg. wt. 2 lbs. **YR14192**—List \$5.00. **Your Cost** **\$2.94**

KIT A-3

Complete system. Contains all parts in both kits listed above. Full instructions included. Shpg. wt. 4 lbs. **YR14193**—List \$8.00. **Your Cost** **\$4.70**

HI-FI Receiver Vario Coupler

For improving any existing noise reducing antenna, by substituting this unit for coupling device employed. By adjusting knob on the vario coupler signal may be regulated for

maximum intensity, with a minimum of interference. Shpg. wt. 2 lbs. **YR17015**—List \$2.50 **\$1.47**
Your Cost
YR17016—Ant. Coupler to match **\$2.05**
Your Cost

LYNCH "Giant Killer" Cable

An excellent transmission cable for use with doublet antennas. Heavy rubber outer covering; high voltage insulation. May be used with transmitters up to 100 watts. Shpg. wt., 50 foot coil, 2 lbs.

YR17177—50 foot coil. **Your Cost** ... **\$1.76**
YR17178—100 foot coil. **Your Cost** ... **3.53**
Your Cost **4c**
 Super Giant Killer Cable, for transmitters up to 1 K W. 50 foot coil.
YR17030—Your Cost **\$3.53**

Pigtail Lightning Arresters

The Lynch Pigtail Lightning Arresters provide suitable protection for any receiver. Double type for doublet antennas.

YL12659—Double Arrester with mount **73c**
Your Cost
YL12666—Single Arrester with mount **45c**
Your Cost
YL12658—Single Arrester less mount **30c**
Your Cost

"MARCONI-Type" All-Wave Antenna System

This system is a combination of the popular No-Stat and HI-FI Antenna Systems. It includes all of the necessary equipment for making a quarter-wave antenna with a noise reducing lead-in and suitable impedance matching. Kit includes: Antenna Coupler, Receiver Coupler, 60 feet HI-MHO antenna wire, Insulators, Arrestor, etc., and instructions. Shpg. wt. 5 lbs.

YR17009—Kit with 35 feet Giant Killer Cable and above parts **\$4.65**
Your Cost
YR17010—Same with 50 feet of Giant Killer Cable **\$5.17**
Your Cost

Booster Coupler

Increases the signal when used with any type of doublet system in which an antenna transformer is not used. Especially recommended for use with the "Giant Killer" All-Wave antenna system. With complete instructions. Shpg. wt. 2 lbs.

YR17014—List \$1.50 **88c**
Your Cost

Commercial Antenna Insulators

Patterned after U. S. Navy Standard. "A" is of high grade moulded Lynchite, "B" of

Insulantite. Extremely low loss. **YR17012**—Type A, Kit of 8. Shpg. wt. 3 lbs. **73c**
Your Cost
YR17013—Type B, Kit of 8. Shpg. wt. 3 lbs. **\$1.18**
Your Cost

Transposition Blocks

The genuine Lynchite Transposition Blocks. For Receiving or Transmitting aeriels. Extremely durable yet light in weight. High resistance—minimum electrical losses. Shpg. wt. 1 lb.

YR17110—Your Cost, **\$1.62**
Kit of Ten

Cage Aerial Spreaders

Made of Lynchite. Rugged yet light in weight. A cage aerial is preferred by many for both receiving and transmitting. Shpg. wt. 2 lbs. **YR17108**—List \$2.75 **\$1.62**
Your Cost
 for 10

3-Hole Insulators

Designed to U. S. Navy Standards. Made of high grade ceramic material for minimum electrical loss or leakage. Resists accumulation and absorption of moisture, and therefore aids in reducing antenna losses to a minimum. Used for any doublet antenna—outside holes for antenna wires and center hole for lead-in. 3" (long) x 1/2 x 1/2". All holes approximately 1" apart. Glazed finish.

YR17011—Your Cost Each **6c**

AERIAL ACCESSORIES

Lead-in Strips

Copper Core with waterproof lacquered webbing. Length 12". Has new screw type terminals which make better connections and a neater appearance than most other strips. Quickly installed.

LIGHTNING ARRESTORS

'Doublet' Arrester

A new approved lightning arrester for the doublet type of antenna. This kind of lightning arrester must be of the air gap type and be carefully insulated from ground. A well designed protector; throughout dependable in its operation. Made of fine quality porcelain smoothly glazed. Shpg. wt. 1 lb.
YR16950—Your Cost... 25c

I. C. A. Champion Arrester

Black glazed porcelain for outdoor and indoor use. Absolutely weatherproof and non-grounding. Carbon type, positive protection. Individually tested to meet Underwriters' requirements. Shpg. wt. 2 lbs.
YR16710—Your Cost..... 27c

A Special Value!

Dealers especially will appreciate this item. A thoroughly reliable protector that can be retailed at a low figure without sacrificing their margin of profit. Porcelain body. Shpg. wt. per doz. 3 1/2 lbs.
YR16753—Your Cost Ea. 7c
 12 for... 70c 100 for... \$6.50

BRACH Vis-O-Glow Lightning Arrester

Same high degree of protection as that used in fire and police signal service. Entirely different from ordinary arresters. Instead of using resistance or an air-gap it makes use of a NEON TUBE. By far the most sensitive arrester made, the slightest induction is readily shunted to ground. When in operation you can see it work. Shpg. wt. 2 lbs.
YR16700—Your Cost... 59c

S. H. Arrester Air Gap

All bakelite, air gap type. Especially suitable for doublet type antennas, because it does not ground the aerial through a high resistance.
YR16756—Your Cost Each..... 19c

PARKSON Arrester

All bakelite. Non-airgap type. Approved by the Underwriters. Shpg. wt. 1 lb.
YR16705—Your Cost Each..... 9c

— ANTENNAS —

Aerial Spring Tension Adjusters

The aerial spring adjuster corrects excessive sag of doublet antennas. Consists of two hooks with porcelain rings interconnected with a powerful compression spring. Shpg. wt. 1 lb.
YR16487—Your Cost . . . 29¢

Aerial Eliminators Insultenna

Replaces outdoor antennas. Not connected to light socket. Gives capacity of 75 ft. aerial. In bakelite case 5 x 5 1/2 x 1 1/2. Mounts anywhere.
YR16166—Your Cost . . . \$1.18

TOBE No-Tenna

Connects instantly. Eliminates fire and lightning hazards. Reduces distortion. Shpg. wt. 1 lb.
YL12696—Your Cost . . . 59¢

Dynatrol

A line filter and aerial eliminator in one unit. Filter of the capacity type. Shpg. wt. 1 lb.
YL12633—Your Cost . . . 88¢

Ground Rods

Clip makes positive and permanent connection. Heavy steel yoke for driving head 3/4" drawn steel, cadmium plated. Use wherever a pipe ground is not available. For receivers or transmitters. Shpg. wt. 2 lbs.

Stock No.	Length Feet	Your Cost Each	Per Doz.

Lafayette Aerial Kits

Everything necessary for an efficient aerial installation. All items are of the very best quality. Ideal for the dealer furnishing a standard antenna kit with radio set sales. Shpg. wt. 4 lbs. Contains the following: 100 ft. 7-24 Copper Wire, 50 ft. No. 17 Rubber Covered Lead-in Wire, 25 ft. Rubber Covered Ground Wire, 1 Approved Arrester, 1 Copper Ground Clamp, 1 Lead-in Strip, 2 Porcelain Insulators, 2 Nail Knobs.
YQ16476—Your Cost . . . 73¢

Standard Aerial Kit

A low price kit containing all essentials for a dependable and efficient aerial system. A very good dealer item. Shpg. wt. 2 lbs. Contains: 90 ft. 7/25 Copper Wire, 25 ft. Lead-in, 25 ft. Ground Wire, 2 Porcelain Insulators, 1 Copper Ground Clamp, 1 Lead-in Strip, 2 Nail Knobs.
YQ16477—List 90c Your Cost . . . 49¢

Economy Aerial Kit

Especially designed for Midget Sets. The lowest price kit on the market made up of first quality merchandise. Shpg. wt. 2 lbs. Contains: 90 ft. 7/27 Copper Wire, 25 ft. Rubber Covered Lead-in, 1 Lead-in Strip, 1 Ground Clamp, 2 Nail Knobs, 2 Porcelain Insulators.
YQ16478—List 75c Your Cost . . . 39¢

"AMERICAN" All Directional Antenna

Equal signal strength from all directions. This antenna is particularly suitable for all-wave receivers. It consists of a pure copper drum 14" in diameter and is equipped with a collar for mounting to a wood or metal pole. This antenna is especially suitable for use in apartment houses where space is limited. The only wire necessary being the lead-in which is quickly and easily attached. Shpg. wt. 6 lbs.

YR17119—All Directional Aerial. List \$4.00 Your Cost Each . . . 95¢
YR17118—8 ft. Metal Extension Mast for above aerial. Your Cost Each . . . 95¢

RCA Shielded Antenna System

For standard broadcast reception only. Designed to vastly improve reception, and to minimize electrical noise pick-up. Uses an antenna transformer to match the antenna impedance of the shielded transmission line, and a receiver coupling transformer to match the receiver input impedance. Because of the possible low impedance of the transmission line—very little or no noise pick-up is insured. Kit includes all coupling transformers, 100 ft. shielded transmission wire, lightning arrester, instructions, etc. Shpg. wt. 6 lbs.
YR17087—Complete Antenna Kit Your Cost . . . \$3.00

Long and Short Wave Aerial Systems

A completely assembled aerial system that can be installed in 3 minutes. Designed for present-day all-wave or dual-wave receivers, but will also improve reception on standard broadcast band sets. Available in 2 types—one uses 2-5 ft. cages with 25 ft. of doublet lead-in wire; the other uses same material, but with 50 ft. of wire.
YR17022—With 25 ft. lead-in wire. Shpg. wt. 4 lbs. Your Cost . . . \$1.46
YR17023—With 50 ft. lead-in wire. Shpg. wt. 8 lbs. Your Cost . . . \$1.76

"DX" Aerials for T.R.F. Sets

Guaranteed greater volume and sharper tuning; non-directional. Fully assembled cages, ready to string up. Ideal for short roofs. 5 heavy zinc spacer rings. Length 20 ft. Contains 100 ft. enameled copper wire, 25 ft. rubber covered lead-in. Shpg. wt. 5 lbs. **Your Cost . . . \$1.35**
YR17122—Your Cost . . . \$1.35
 No. 30—Produces great volume; ideal for all sets. 5 spacer rings; length 30 ft. Contains 150 ft. enameled copper wire and has 25 ft. rubber-covered lead-in. Shpg. wt. 6 lbs. **Your Cost . . . \$1.85**
YR17121—Your Cost . . . \$1.85
 No. 60—An exceptionally powerful aerial. 8 spacer rings; length 50 ft. Contains 250 ft. wire, 25 ft. rubber-covered lead-in. Shpg. wt. 8 lbs. **Your Cost Each . . . \$2.35**

Aero Aerial Wire

Many strands of very fine wire of high conductivity over which is laid a special covering of neutral buff color. An indoor aerial of unusual efficiency. This wire is used as standard equipment on many A.C.-D.C. receivers. 100 ft. spools. Shpg. wt. 8 oz.
YR16167—Your Cost Each . . . 15¢
Per Dozen . . . \$1.50

Ribbon Aerial

Consists of a gold colored metallic braid woven into a strip of fabric about 3/4" wide. A neat and efficient aerial for stringing above moulding or baseboard. Held in place by thumb tacks. 65 ft. to roll. Shpg. wt. 8 ozs.
YR16163—Your Cost . . . 27¢

Flexible A.C.-D.C. Set Wire

Consists of 20 strands of flexible copper wire covered by a mercerized cotton outer braid. Hard to kink and will resist wear. Ideal for compact or A.C.-D.C. sets for antenna use.
YQ16155—25 ft. on spool. Your Cost . . . 18¢

Galvanized Guy Wire

A special grade tough, non-stretching and annealed steel galvanized wire which is excellent for guying antenna masts. Will resist rust and last a long time. Available in 50 ft. rolls. Shpg. wt. 2 lbs.
YR16156—Your Cost . . . 15¢

ICA ANTENNATROL

A device for connecting to any type of receiver to improve reception. Helps eliminate interfering stations, reduce noises from outdoor antenna and act as a substitute or indoor aerial. In general, it improves selectivity and sensitivity. Can be installed in a few minutes. Consumes no current. Shpg. wt. 2 lbs.
YL12678—With instructions. Your Cost . . . 59¢

Polarized Aerial and Ground Connector

A convenient device for connecting the aerial and ground wires from the set to the lead-ins. Consists of a male and female connector plug, with the metal tabs on the male polarized so that the plug cannot be incorrectly inserted. Eliminates loose wires.
YQ16157—Complete. Your Cost . . . 24¢

NOTE

We carry a tremendous stock of wire at all times and are prepared to make large quantity shipments at special prices. We can supply special wire to order.

APPROVED Fixture and Appliance Wire

ALL APPROVED wire for resale purposes is marked with a special label every 5 feet. The wire listed here has these labels and is fresh stock of the finest quality. The use of UNAPPROVED wire may mean a delay in insurance settlement in case of fire. We therefore recommend that for your own protection you use only approved wire. This recommendation is made in keeping with WHOLESALE RADIO'S policy of telling the TRUTH about the merchandise it sells.

Parallel Silk Cord

Insulated lamp cord. Consists of two conductors laid parallel and covered with braided silk. Has inner braid. The neatest cord for portable lamps, extension lights, etc., available in the following popular colors: White, Brown, Maroon, Old Gold, Black. Specify color when ordering. Your Cost

Screw Extractors

Used for removing broken screws, bolts, and studs. A hole is drilled in broken screw, size of drill is indicated on extractor, then by turning extractor to left screw is removed. 5 assorted sizes in kit. Shpg. wt. 2 lbs. **Y P15279—Your Cost... 95¢**

LENK Automatic Alcohol Torches

These alcohol torches are a big favorite with the radio man because of their neatness, efficiency and ease of operation. Made of brass, nickel plated, highly polished. Entirely automatic. **Type A:** Double burner, one for needle point flame, add the attachment for heavy flame. Pressure release valve eliminates sputtering, evaporation and leaks. Cleaning pin in handle. Size $7 \times 4\frac{1}{2} \times 3$ ". Shpg. wt. 4 lbs. **Y P14866—List \$5.00 \$2.94**
Your Cost

Type C: A very handy little torch for the tool box. Solid base makes it mechanically leak proof. Screw cap makes loading easy. Nozzle cap prevents evaporation. Copper heat conductor generates quickly. Size $6\frac{1}{2} \times 2\frac{1}{2} \times 1\frac{1}{2}$ ". Shpg. wt. 2 lbs. **Y P14868—List \$1.50 95¢**
Your Cost

LENK Blowtorch Gasoline Type

Heavy duty blow torch for service men (for melting pitch, etc.) and mechanics. Has flame control, shut-off valve, and many other features. Height $7\frac{1}{2}$ " base dia. 3". Polished brass finish. Capacity $\frac{1}{2}$ pint. Shpg. wt. 4 lbs. **Y P14855—Your Cost \$1.03**
Y P14856—Same, but for alcohol. Your Cost \$1.18

TURNER Handitorch

A miniature automatic pressure torch with a standard type flame control and shut-off valve, having a needle point which automatically clears the gas orifice each time the valve is closed. Develops a hot blue flame. $\frac{1}{2}$ pint cap, polished brass tank, bottom filler. Excellent for servicing radio power packs. For melting pitch, etc., and for handy-man or work shop. **RF3952—Your Cost... \$1.25**

RCA Riveting Punch Set

When used with anvil listed below will permit replacing broken rivets and making a factory type repair. $\frac{5}{8}$ " dia.—5 $\frac{1}{2}$ " long. **Y P15280—Your Cost... 50¢**

Off-Set Riveting Anvil

Permits riveting in places ordinarily inaccessible. Makes a complete unit to replace broken rivets when used with above punch. **Y P15281—Your Cost... 70¢**

GOODELL PRATT Small Screw Drivers

Two attractive and useful small screw drivers. Good for small screws, such as found in radio knobs, etc. One has a $1\frac{1}{2}$ " blade, and the other is $2\frac{1}{2}$ ". Both are in white nickel finish, have nickle ferrules, and hardwood handles. **Y P15282—Your Cost... 9¢**

GOODELL PRATT Automatic Drill

A very efficient tool for the home or mechanic. Drills are contained within cap of tool. Special cap lock ejects size drill desired. Four jawed chuck securely grips drill. Rotary motion is imparted to drill by pushing handle up and down. Bakelite handle. With 8 drills $\frac{1}{8}$ " to $\frac{1}{4}$ " dia. Shpg. wt. 2 lbs. **Y P15283—Your Cost... \$1.25**

GOODELL PRATT Scriber

Body is made of fine knurled hollow steel tubing and fitted with chuck which holds the finely drawn and tempered point. Point can be removed and reversed so that tool may be carried in pocket. **Y P15284—Your Cost... 23¢**

Socket Hole Punches

Consists of 2 units, punch proper and anvil, for knocking out socket holes. Ideal for constructor or experimenter. Available in following sizes: $\frac{3}{8}$ ", $\frac{7}{8}$ ", $1\frac{1}{2}$ " and $1\frac{3}{4}$ ". Specify sizes desired. Avge. shpg. wt. 11lb. each punch. **Y P15288—Your Cost Each... \$1.70**
Y P15289—Set of 4 Punches. \$6.50

Aluminum Pocket Level

Small and lightweight. Very handy for serviceman and mechanic. Has two indicators, for vertical and horizontal adjustments. Measures only $5\frac{3}{4}$ " long and $1\frac{1}{4}$ " high. Attractive and accurate. **Y P15285—Your Cost... 33¢**

Off-Set End Bicycle Wrench

Very handy for "hard-to-get-at" nuts and bolts. Adjustable opening to $\frac{1}{4}$ " operated by knurled thumb nut. Handle and fixed jaw made of double thickness of .093 steel. Movable jaw .183 steel. Length 6". Bright cadmium finish. Makes an attractive and serviceable tool. Shpg. wt. 2lbs. **Y P15286—Your Cost... 15¢**

Plain Bicycle Wrench

Ruggedly built and attractively finished in bright cadmium. Opens to $\frac{3}{8}$ ". Overall length $5\frac{1}{2}$ ". Can be carried conveniently in pocket. Shpg. wt. 2 lbs. **Y P15287—Your Cost... 12¢**

Electrical KITCHEN & COOKING Aids

Famous names—standard brands—electrical kitchen utensils that are guaranteed. Modern housekeeping requires demand selected units. All quality products at lowest **WHOLE-SALE PRICES.**

NATIONAL COFFEE-VAC

Makes coffee without that metallic taste. Temperature controlled brew brings out the rich, full flavor. Consists of 6-cup Coffee-Vac with stove and cord set and chrome plated tray. Shpg. wt. 7 lbs.

YV18337— Your Cost... **\$3.95**

YV18338—10-Cup Your Cost.....**\$4.95**

YV18289—6-Cup, with stove, less tray. Your Cost.....**\$2.85**

MARION WAFFLE IRON

Astonishing economy for this lovely, chrome plated waffle iron. Produces rich, golden-brown waffles of crunchy crispness. Quick and uniform heating unit. Insulated, wide-spread handles. Has cast aluminum grids; easy to clean. Hot and cold indicator eliminates "guess work." For 110 to 120 volts A.C. or D.C. Less cord set. Shpg. wt. 7 lbs.

YV18349— Your Cost..... **\$2.25**

HAMILTON BEACH Iceless Freezer

Makes old fashioned ice creams, sherbets, frozen ices, etc., in any mechanical refrigerator. This new motor driven freezer stirs the mixture as it freezes. Just place it in the ice cube compartment, plug-in, and a delicious dessert will result. Of cast aluminum, easy to clean. Wooden paddles. Capacity 1½ quarts. For 115-120 volts A.C. only (50-60 cycles). Complete with 7 feet of flat cord and unbreakable plug. Shpg. wt. 9 lbs.

YV18372— Your Cost..... **\$7.50**

UTAH ELECTRIC RANGE

A home sized stove that can be carried from place to place. Has two surface units—one 400 and one 500 watts. Oven size 10 x

10 x 15 ins. Total wattage 1650. Equipped with rack, baffle plate, broiler and pan. Has calibrated heat indicator on door. Three switches govern operation. Black crackle finish with polished chrome fittings. Approved by Underwriters. For A.C. only. Size 12 x 17 x 17 ins. Shpg. wt. 45 lbs.

YV18368— Your Cost..... **\$19.75**

MARION Hot Plates

This twin hot plate is equipped with two 6" heater units using the finest resistance wire, and controlled by toggle switches. Green body, polished black top. Complete with approved cord set. Shpg. wt. 9 lbs.

YV18370— Your Cost..... **\$1.89**

YV18371— Same as above, with single burner. Your Cost...**.95c**

Modern "Flip-Flop" Toaster

Designed in the modern manner and finished in bright chrome plate. Black base, top and "non-burn" handles enhance the appearance. It toasts evenly and quickly. Cord concealed in base. For 110 volts. Cord set included. Shpg. wt. 5 lbs.

YV18840— Your Cost..... **\$1.35**

TOYS

at **WHOLESALE** prices
POPEYE the sailor

MINIATURE TYPEWRITER

For the junior "business executive." Has both small and CAPITAL letters and uses a real ribbon. Heavy gauge steel with two-colored enamel finish. Nickel plated trimmings. Shpg. wt. 4 lbs. **\$1.95**
YS17388—Your Cost...

Popeye has eaten all his spinach, so he is strong enough to raise and lower the oars, sending the boat through the water. Runs about 3 minutes with each winding. Finished in bright and contrasting colors—the kiddies will "eat-it-up." It's sturdily constructed, too. Shpg. wt. 3 lbs. **\$1.85**
YS17400—
Your Cost

ELECTRIC Streamlined TRAIN

A scale reproduction of the new streamlined New York Central "Commodore Vanderbilt." Train consists of engine, tender and two cars. 14 track sections make a 63" circle. Reversible 6-wheel drive motor with 40-watt transformer and variable speed control. Is 29 1/2" long. Shpg. wt. 10 lbs. **\$9.45**
YS17604—Your Cost....

G MAN'S "TOMMY" GUN

Is not dangerous.
No ammunition used.

Rat-a-tat-s-tat. Yes—it's the new type "Tommy" gun just like Uncle Sam's G-Men use. Sounds like a machine gun (actuated by batteries). Sturdily built. Red light flashes when trigger is pressed. Gun metal finish. Shpg. wt. 3 lbs. **75c**
YS17401—
Less Batteries. Your Cost.....
Batteries 13

CIRCUS TRAIN

Barnum's "Three Ring Circus" portrayed on the sides of this streamlined circus train. Train consists of a streamlined locomotive, tender, and 3 circus cars with movable animals and finished off with a "caboose." Complete with a 110 volt, 60 cycle A.C. transformer with three step speed control. 8 curved and 4 straight tracks make a 120" oval. Will stand up under the excessive use it will undoubtedly get. **\$4.95**
Shpg. wt. 4 lbs.
YS17602—Your Cost.....

MICKEY MOUSE CIRCUS TRAIN OUTFIT

Mickey Mouse and his pals take to the sawdust and tanbark. Mickey himself "runs the show." Outfit includes heavy cardboard "Big-Top," steel locomotive and Band, Dining and Animal cars. 32" long. Shpg. wt. 2 lbs. **\$1.48**
YS17403—Heavy spring motor.

National Radio
Institute*

Free Book Tells How Mail Coupon!

**HERE ARE A FEW EXAMPLES
OF THE KIND OF MONEY
I TRAIN MY MEN TO MAKE**

Now Has Fine Business

"I have a fine business servicing sets. I am making a good living—seldom have a week under \$40. If it wasn't for N. R. I. I would probably be tramping the streets."

Glenn C. King,
46 Division Ave., S.,
Grand Rapids, Mich.

\$15 A Week in Spare Time

"My spare time earnings average \$15 a week. Since studying with you I have earned about \$7,000 to \$8,000 in Radio. I owe my success to the good method of the N. R. I."

C. N. Heffelfinger,
R. F. D. No. 1,
Temple, Penna.

Best Equipped Shop in Town

"In the last year, we have moved our Radio shop and we now have the best equipped Radio Repair Shop in East Toledo. We also have a shop at 624 Milton Street. We have three fellows working for us."

W. R. Brown,
309 Main St.,
Toledo, Ohio.

You Get PRACTICAL EXPERIENCE with Radio Equipment I Give You

I'll show you how to use my special Radio equipment for conducting experiments and building circuits which illustrate important principles used in such well-known sets as Westinghouse, General Electric, Philco, R.C.A., Victor, Atwater-Kent, and others. You work out with your own hands many of the things you read in our lesson books. This 50-50 method of training makes learning at home easy, interesting, fascinating, intensely practical. You learn how sets work, why they work, how to make them work.

The world-wide use of Radio sets for home entertainment has made many opportunities for you to have a spare time or full time Radio service business of your own. The day you enroll I start sending you Extra Money Job Sheets which quickly show you how to do Radio repair jobs common in most every neighborhood. Many N. R. I. men make \$5, \$10, \$15 a week extra in spare time while learning. I show you how to install and service all types of receiving sets. I give you Radio equipment and instructions for conducting experiments, for building circuits and testing equipment, and for making tests that will give you broad, practical Radio experience. Clip the coupon below and get my free 64-page book, "Rich Rewards in Radio"—it gives you a full story of the success of N. R. I. students and graduates, and tells how to start a spare time or full time Radio service business on money made in spare time while learning.

Many N. R. I. Men Make \$5, \$10, \$15 a Week Extra in Spare Time While Learning

Many of the twenty million sets now in use are less than 50% efficient. I will show you how to cash in on this condition. I will show you the plans and ideas that have enabled many others to make \$5, \$10, \$15 a week in spare time while learning. George W. Honert, 248 Water St., Ligonier, Ind., made over \$500 from the start of the Course to its completion.

Get Ready Now for a Radio Business of Your Own and for Jobs Like These

Broadcasting stations use engineers, operators, station managers, and pay up to \$5,000 a year. Radio manufacturers use testers, inspectors, foremen, engineers, servicemen and buyers, and pay up to \$6,000 a year. Radio dealers and jobbers employ hundreds of servicemen, salesmen, managers, and pay up to \$75 a week. Television promises many good jobs soon. Television is leaving the laboratory in an impressive way. One million

Get my FREE LESSON on Rodio Servicing Tips

Full proof that my Training gives practical, money-making information, that it is easy to understand—that it is just what you need to master Radio. My sample lesson text, "Radio Receiving Troubles—The Cause and Remedy" covers a long list of Radio receiver troubles in A.C., D.C., battery, universal, auto, T. R. F., super-heterodyne, all-wave, and other types of sets. And a cross reference system gives you the probable cause and a quick way to locate and remedy these set troubles. A special section is devoted to receiver check-up, alignment, balancing, neutralizing and testing. Get this lesson Free. No obligation. Just mail coupon.

MAIL COUPON NOW

dollars is being spent on two stations. Receiving sets are being designed and built. New opportunities—many of them—are right ahead. My book tells you of the opportunities in these fields, also in Aviation Radio, Police Radio, Short Wave Radio, Automobile Radio and other new branches of this fast growing industry. Get it.

I Train You at Home in Your Spare Time

Hold your job until you're ready for another. Give me only part of your spare time. You do not need a high school or college education. Hundreds with only a common school education have won bigger pay through N. R. I. Graduate J. A. Vaughn jumped from \$35 to \$100 a week. Fred Dubuque doubled his earnings in one year. The National Radio Institute is the Pioneer and World's Largest organization devoted exclusively to training men by Home Study for good jobs in the Radio industry.

You Must Be Satisfied

I will give you an agreement to refund every penny of your money if you are not satisfied with my Lesson and Instruction Service when you complete my Training. And I'll not only give you thorough training in Radio principles, practical experience in building and servicing sets, but also Advanced Specialized Training in the type of Radio work you choose.

Get My Free Book of Facts

Mail the coupon for "Rich Rewards in Radio." It's free to any ambitious fellow over 15 years old. It tells you about Radio's spare time and full time opportunities; about my training; what others who have taken it are doing and making. Mail coupon now in an envelope, or paste it on a 1c post card.
