- Frequency Response 40-16,000 cps
- Especially Designed Vented, Tuned Duct Type Enclosures
- Unique Mechanical 2-Way Speaker with Heavy Magnet

Ultra-Compliance 2-Way Systems featuring a unique dual cone speaker with heavy magnet structure employed in a specially designed tuned ducted port enclosure. Both tweeter and woofer "float" on flexible, corrugated edges, with the outer edge of the tweeter cone attached to the mid-section of the woofer. This results in a mechanical crossover so that both cones operate in phase at low frequencies, but only the tweeter cone radiates high frequencies. The same type of wide-range frequency response, as found in true coaxial or multiple speaker systems is achieved in these unique "Ultra-Compliance" Speaker Systems. Frequency response is 40-16,000 cps—Impedance: 8-16 ohms. Available in mahogany or oiled walnut. Finished on four sides. Dimensions 10 3/8Hx13 7/8Lx8 7/8"D. Imported. Shpg. wt., 15 lbs.

- Powerful 10" Woofer with 1 lb. Magnet Plus 4" Tweeter
- "Tuned" Enclosed with Tube-Type Ducted Port
- High Frequency Brilliance Control
- Overall Response 30-19,000 Cycles

No Money Down

An unusually compact speaker system that delivers really "big" sound. Enclosure is a bass-reflex design using a ducted port of the tube type to provide proper acoustic "tuning." The tube provides a special path for the low frequency sound waves radiated from the rear of the woofer so that they emerge "in-step" with those radiated from the front and thus provides substantially greater bass sound power from the system. Solid wood construction, plus the use of sound absorbent material ensures an extremely rigid enclosure, free of undesirable resonances. A powerful 10-inch woofer provides reproduction of the low frequencies. A 4-inch cone-type tweeter provides reproduction of the mid-range and high frequencies (to beyond audibility) and is of the closed back type to prevent interaction with the 10-inch woofer. Smooth transition is achieved by means of electrical crossover at 2800 cycles. Features high frequency brilliance, control at rear of cabinet. Dimensions are 21 1/2Wx11 3/4Hx 10 1/2"D. Overall frequency response: 30-19,000 cycles; nominal impedance: 8 ohms; power handling capacity: 30 watts program material. Shpg. wt., 30 lbs. Imported. Slide Rules — Drafting Equipment

(A) LAFAYETTE VECTØRLOG • 12" SLIDE RULE

- Laminated Bamboo Construction
- P, P', and Q Scales—For Direct Vector Addition
- Hyperbolic Sine and Tangent Scales
- Two Sine Scales
- 5 Log Log Scales Plus a Voltage DB Scale

The Lafayette VECTØRLOG Slide Rule provides a new concept in scientific calculation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums—these scales work in the same manner as the C and D for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the voltage db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. Several of these features are: C and D scales on both the front and back of the rule; Sine scales in both degrees and radians, removing the necessity of both—some conversion of units: A problem-tested location of scales; and adjustment screws to allow variable tension on the slide. Scales include: (FRONT) TR-1, TR-2, P', P. Q. ST, S-1, S-0, C, D, LL01, LL02, LL03, LL1'; (REAR) Sh-1, Sh-2, DF, A, B, C, CF, Th, C, D, LL3, LL2, db. With instruction book, leather carrying case, and belt carrying loop. Imported. Shpg. wt., 1½ lbs.
