Deluxe Criterion “5XA” 75 Watt 12 Inch 3-Way System

- Lafayette's Finest Bookshelf Speaker System
- 12" Woofer Features Special Ribbon Type Copper Voice Coil Edgewound on Aluminum Form
- 12" Woofer has 6 lb. 2 oz. Magnet Structure

Now, Lafayette brings you our all new Criterion 5XA... a 3-way bookshelf speaker system that provides a higher level of musical performance than any current shelf speaker system we have produced before. It provides astonishing range and clarity, with a deep, solid bass response that makes a stunning impact on the listener. Employs the acoustic suspension principle, the 5XA uses three outstanding speakers to cover the full spectrum of sound. Each was carefully designed for optimum response. The 12-inch acoustic suspension woofer with 6 lb. 2 oz. magnet structure has an exceptionally compliant, long-throw suspension. Its uniquely constructed voice coil consists of heavy ribbon-shaped copper wire edge-wound on an aluminum form. Remarkably low bass response—undistorted even at high power levels. An acoustically isolated 6½-inch midrange speaker with 12 oz. magnet structure provides flawless reproduction—free of annoying peaks, yet adding true "presence" to the system. Extending response to beyond audiibility is a 4-inch super tweeter with a specially designed aluminum cone for brilliant reproduction of the high frequencies to 25,000 Hz and without any shrillness to mar listening enjoyment. Low loss 12 db/octave LC network. Crossover frequencies: midrange at 800 Hz, treble at 4500 Hz. Separate, continuously variable mid and treble range controls provide full adjustment of the system to suit the acoustics of your listening area. The ¾" enclosure has a fine furniture finish in oiled walnut on all four sides. Impedance: 8 ohms. Size: 23½" x 14½" x 11½" D. Shpg. wt.: 47 lbs. 99 H 02160WX No Money Down* Net 129.95

A no-compromise 6-speaker system created for just one purpose—the authentic reproduction of a massive symphony orchestra. Brings the spectacular realism of a living performance right into your home. This major accomplishment was achieved by careful selection and design of speaker units and enclosure. - Hyperbolic Sine and Tangent Scales. Two Sine Scales—One Marked in Degrees, One Marked in Radians  
- 5 Log Log Scales Plus a Voltage DB Scale  
- Complete with Belt Carrying Loop and Leather Case  
- With 10° Scale

The Lafayette VECTORLOG Slide Rule provides a new concept in scientific calculation, incorporating scales and arrangement designed for quick-easy-manipulation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums—their scales are exactly proportioned in such a manner as the C and D scale for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the voltage db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. VECTORLOG is the result of extensive tests for ease of manipulation. Several of these features are: C and D scales on both the front and back of the rule; Sine scales in both degrees and radians, removing the necessity of bothersome conversion of units; a problem-tested location of scales; and adjusted screws to allow variable tension on the slide. Scales include: (FRONT) Tr', Tr-2, P', P, Q, ST, S-1, S-2, C, D, LLO, LLO2, LL03, LL1'; (REAR) Sh-1, Sh-2, DF, A, B, C, CI, GF, Th, C, D, LL3, LL2, db. A 5-foot parabolic antenna which utilizes a single drive broadband driver unit. The high front-to-back ratio eliminates the necessity of reflectors which shadow the center of the field. Signals reaching any part of the parabola are concentrated on the driver mounted at the exact focal point. This design provides up to 18.6 db gain. Back of reflector acts as a shield to reduce unwanted and reflected signals. Preassembled for easy installation. Small diameter, rugged elements with vibration dampers limit ice loading.
