

RIDIO - TV PARTS AND EQUIPMENT

UNITED CATALOG PUBLISHERS, INC.

## 106-110 LAFAYETTE STREET

NEW YORK 13, N. Y., U.S. A.

## PRICES <br> Prices in this MASTER should not be considered as final. Inquire about latest prices and delivery

## DISCOUNTS <br> Trade discounts apply in most cases where list prices are shown

Since old copies of The MASTER are seldom discarded, it is important when ordering or quoting to mention specifically the edition and page number, also the catalog, code or stock number of each item. This will avoid possible confusion and delay

## PRICES

All prices listed in The MASTER are subject to change without notice they should not be considered final.

Get quick on-the-spot quotations from your distributor who subscribes to the up-to-the-minute UNITED PRICING SERVICE.

For complete details and subscription rates write to:
UNITED PRICING SERVICE
106-110 LAFAYETTE STREET
NEW YORK 13, N. Y.

## DELIVERY

Delivery is often dependent on availability of raw materials. Check with your distributor for delivery information at the time you place your order.

## FOREWORD

The $\mathcal{R}$ udio- $E l_{\text {estronia }}$ MASTER (formerly RADIO'S MASTER(B) is the official buying guide and reference book of radio parts and clectronic equipment for the industry.

While most distributors maintain a large and varied stock, the person or firm distributing this buying guide does not represent that all of the lines and all of the products contained herein are necessarily carried by such person or firm.

Prices are furnished only for information-they are not offered as quotations.
-
WIIERE LIST PRICES ARE SHOWN, TRADE DISCOUNTS APPLY IN
MOST CASES. . . . PIIONE OR WRITE FOR PRICES AND DELINERY.
-
Enrolled manufacturers reserve the right to make mechanical changes in specifications necessitated by emergencies over which they have no control, and to change prices or withdraw items without notice.

Every precaution is taken to insure accuracy in the preparation of display pages and indexes. but the publishers cannot guarantee against the possibility of error or omission, nor can they be held responsible for price changes or withdrawal of items during or after publication.

## IMPORTANT

When ordering, please mention The MASTER, 20th EDITION, also page number on which the item appears and specific catalog or code number, if any. This will help to expedite the filling of your order and lessen the chance of error.

## United Catalog Publishers, Inc.

# The Radio-Electronic MASTER TWENTIETH EDITION OUTLINE INDEX OF DISPLAY PAGES <br> By Section and Folio 

NOTE: This is a bare outline of the eighteen sections of The MASTER. It will serve for speedy reference and for the purpose of familiarizing yourself quickly with its general contents. Regular use of The Master will reveal aciational items 100 numerous to list here-you may also discover on item in a section to which it does not directly relate. For more camplete and precise information, consult the detailed General Index which precedes (Index pages 6 through 21).

## GERMANIUM PRODUCTS

[^2]

# RCA ELECTRON tubes REPLACEMENT DIRECTORY <br> for INDUSTRY and COMMUNICATIONS 

## Direcł Replacement Types

RCA types shown below are direct replacements under all circumstances for corresponding types to be re－ placed．Tube types covered include：Vacuum Power

Tubes，Rectifier Tubes，Thyratrons，Ignitrons，Voltage Regulators，Phototubes，Cathode－Ray Tubes，and Special Types．

\begin{tabular}{|c|c|c|c|c|c|c|c|}

## TRANSISTORS MILIONS ORH:

## RAYTHEON IS FIRST AND FOREMOST IN

- mass production, Raytheon is long past the experiment and development stage in Germanium PNP Junction Transistors - for over 2 years has had the quantity production and quality control techniques and resources
- proved reliability in commercial opplication, based on billions of hours of actual field performance and a record of success exceeding that of many reliable vacuum tubes
- range of characterisflcs. Look at the tors that meet your specific requirements, how.

## Diodes

## GERMANIUM DIODES

These xetmanium diocles are the result of extensive research to provide high quality components. The athility of our semi-conductor division to produce exceptionally. fine germanium crystals has assured a maximum uniformity of characteristics. Morenver, the resistance of INTERNATIONAL diodes to humidity. stock and temperature-cycling has been rignousty demonstrated. You ate thus doulbly: alssured of an excellent rectifying unit having long lite and dependable operation.

## SELENIUM DIODES

These subminiature selenium diodes have been developed for use in electronic equipment where space is at a premium and ambient temperature is high They are designed for stable operation in ambient temperatures from minus 50 C to plus 100 C. Small and compact in size each unit is proviled with pigtail leads of facilitate wiring into a crowded chassis. Potting within a thermosetting com pound affords protection against corrosive atmosphere moisture

Computer Transistors: RR83, RR87, RR117, RR122 Photo Transistors: RR66, RR66A
Hearing Aid Transistors: RR14Z, RR20Z, RR342, RR38 Push-Pull Audio Pair: RR106
High Frequency Iransistors: RR160, RR161, RR162
Sub-Miniature Transistors in all the above types to meet special requirements.

New types and numbers are added constantly to Radio Receptor's expanding line of transistors. See your local distributor for information and prices on the latest units available.

In Radio and Electronics
Since 1922

[^9]Copsinht by U., C. I'.,Inc.

Redio Receptor's line of diodes is constantly expanding and
new numbers are odded all the time. See your local distributor for information on the latest units available and current prices.

## WESTINGHOUSE RELIATRON® TUBES WESTINGHOUSE TUBE FACILITIES

Westinghouse RELIATRON 19 ceiving tubes, picture tubes, and power tubes are manufactured in these two giant modern plants which comprise the Electronit Tube Division of Westinghouse Electric Corporation. The Division offers manufacturers and distributors of electronic equipment the complete lines of tubes listed on the following pages. All are produced under rigid Westinghouse quality control stantards. In addition Westinghouse is conducting long-range deveopment programs on receiving and picture tubes for color television. For information concerning Westinghouse Electronic Tubes. contact one of the sales offices listed below:

Detailed engineering specifications on all tubes are available upon request. The extensive engineering and manufacturing facilities which we have, make possible the development and production of many types of special tubes to your specifications. If you have a problem involving the use of any CETRON tubes you are invited to consult us.

## WARRANTY

We guarantee all products manufactured by us to be free from all material and manufacturing defects and to give satisfactory service when operated in accordance with instructions indicated for their use.

## Electronic Tubes and Equipment

Tubes listed on this page can usually be supplied direct from stock. Many other types are available for immediate delivery - write for catalog. CHATHAM also designs, develops and manufactures special tubes to exact customer specifications - inquiries are invited.

- Chatham ruggedized 2d21w thyratrdn

A ruggedized Xenon filled shield grid thyratron for grid controlled rectifier service. Permits use of high resistance in the grid circuit. Heater 6.3 volts, 6 amp. . . inverse peak plate voltage 1300 volts, average plate current 100 ma .

## - ChATHAM RUGGEDIZED 5RAWGY RECTIFIER

A ruggedized full wave high vacuum rectifier designed for high altitude operation. Heater voltage 5 volts, heater current 2 amps. Peak inverse voltage 2800 volts, peak plate current 650 ma .

- chatham bastg twin power triode Features plate current and GM characteristics held to within $\pm 10 \%$. Recommended for voltage regulation circuits. No grid current; greatly reduced plate current draft. Plate current 125 ma at 40 volts D.C. Amplification factor 2 .

## - Chatham 6336 TWIN triode

Specially suitable for voltage regulating applications. As a series tube will pass 150 ma per section at 40 volts D.C. Plate dissipation 30 watts; Amplification factor 2.7. Features hard glass envelope.

## - Chatham $1 z 2$ RECTIFIER

A small bulb high voltage vacuum rectifier. Low cathode heating power and low dielectric losses make tube suitable for radio frequency supply circuits. Filament 1.25 volts. . 275 amps. . . Inverse peak anode voltage 15,000 , average plate current 1.5 ma . peak anode plate current 8.5 ma .

- CHATHAM 3 B28 RECTIFIER

This rugged half wave Xenon filled rectifier will operate in any position and throughout an ambient temperature range of $-75^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$ Fil. 2.5 volts, 5.0 amp. . . . Inverse peak anode voltage 10,000 volts, 25 amp . average anode current.

## - Chatham 4 B32 Rectifier

A rugged half wave Xenon filled rectifier. Operates in any position throughout an ambient temperature range of $-75^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$ Fil. 5 volts, 7.5 amp . . . Inverse peak anode voltage 10,000 volts, 1.25 amp . average anode current.

## - Chatham 394a thyratron

A Mercury vapor and Argon filled thyratron for grid controlled rectifier service. Operates over a wide ambient temperature range. Heater 2.5 volts, 3.2 amps. . . . Inverse peak anode voltage 1250 , average anode current 640 ma .

- CHATHAM 395A CDLD CATHODE GAS TRIODE

Requires no filament supply and is used in many grid controlled rectifier and relay applications. Maximum DC anode current, 10 ma . Maximum DC anode voltage, 150 volts.

## Eustom-Buith <br> Equipment

CHATHAM specializes in the
development, design, and construction of custom-built electronic equipment to exactly meet customers' requirements. Our capable staff of engineers will furnish prompt estimates or, if desired, will call to discuss your problem personally. Call or write today for complete information.

Write today for the informative CHATHAM catalog. For free copy address requests on company lefterhead - no obligation.

- 5 Megawatts radar modu. lator built by CHATHAM to rigid government standards.

The MASTER - 20th Edition

## Smes <br> The Mark of Excellence <br> Since 1934 Eimac electron-power tubes have been specified by leading engineers for all

 types of military and commercial application. Incomparable performance, reliability and quality of Eimac tubes have made Eitel-McCullough, Inc., the world's largest manufacturer of transmitting tubes.

TELEVISION PICTURE TUBES

Du Mont television picture tubes, for either replacement purposes or initial equipment, travel side by side throughout the entire assembly process and stringent testing procedures. As a result, every Du Mont picture tube has the same fine quality regardless of its intended end use. Since 1939 Du Mont picture tubes have consistently led the field in new developments for better viewing. Life-like pictures along with unsurpassed dependability and uniformity have made our tubes the choice of the most discriminating receiver manufacturers for original equipment, and the choice of the most conscientious TV servicemen for replacement.

TUBE TYPES OFFERED BY DU MONT AT TIME OF PRINTING

[^11] © Denotes aluminized tube.

Additional information and specifications on tubes or original television parts can be had upon request; or, we will be glad to supply the name of the Du Mont representative in your area.

## DIFFUSED P-N-P JUNCTION TRANSISTORS

*All types are available with Maximum Noise Figure of 12 db . for use in first stage of multistage amplifier. Measurement is made @ 1000 cps . with a 100 cps . bandwidth and is compared with the noise of a 1500 ohm input resistor.
$\dagger$ All types are available with 150 mw Max. Dissipation@ $50^{\circ} \mathrm{C}$ for special applications.
Standard size is $344^{\prime \prime}$ wide x $.204^{\prime \prime}$ thick x $328^{\prime \prime}$ high and has standardized lead arrangement. Subminiature sizes are available for special applications.

Phono Tops: Stamlard thb can be easily replaced with single or three speed tumbible phono tops. Mandels 2196 or 2197.

## A COMPLETE IINE OF SOCND EQUIPMENT

The public address amplifiers shown alowe and the mobile amplitiers below are typicat of the more popular motels from bell: complete line of sound equipment. Made in a wide range of si\%s and power mitputs, these amplifiers answer the needs of notaly
every commereial l'A application. from the smallest to the largest. lell als, has a comolote line of somnd accessories. such as portable tabe and lisu requders. sweakers, mierophones, transcribtion Havers. and wher "duipment for any sound installation

P'ower Output: 15 watts at less than $\mathrm{J}^{\prime} ;$. Peak mower: 20 watis. Frequency Response: $\mathbf{5 0}$ to 15,000 eycles plus or minus ? dh. ( Gain: Mierophone channel, 115 db : phono rhannel, so dh.
Ilum Level: (f0 dib below rated outuut.
Inputs: 1 microphone, 1 phonograph (built in).
Input Impedance: Miero chanmel, 3.3 megs: phomo ch:mmel. tig meg.
Controls: Micor volunce, phono volume, tone with AC switel. standiby switch, phono motor "offon switnh.
Output Impedance: ?.5. 4, 8, 16, 250,500 ohms and 70 V eonstant oltage tab
Phono Motor: Sinele speed, rim drive, ix rim,
Power Consumption: 110 watts, 117 volts, 60 eycles AC; 15 amperes (max.), ${ }^{6}$ volts DC

## Model 3717-.M1B:

Has all the attractive features of Moded $3717-$ M13, phas a threw records.

Power Output: watts at less than 5', Peak power: 38 watts Frequency IResponse: 30 to 15.000 cycles plus or minus 2 db . Gain: Miern (hatmols. 120 db ; phomo channels, 76 db . Hum Level: fif di helow rated ontumt.
Inputs: Two micoonhone, one phonograph (built in).
Input Impedance: Micro channels, 3.3 megs; phono channel. c.

Controls: "Iwo miovo volume eontrols, phono volume, tone with bower switch. staml-by switch, bhono motor "off-on" switeh.
Output Impedance: ?.5. $4,8,16,250,500$ ohms and $70 \mathrm{~V}^{\mathrm{V}}$ eonstant voltage tal.
lhono Motor: Siugle speed, rim drive, 78 rpm .
I'ower Consumption: 115 watts, 117 volts, 60 cycles AC ; 24 amperes, if vults D("

Size \& Weight: $1^{1} \underline{z}^{\prime \prime}$ deep, $16^{1} z^{\prime \prime}$ wide, $10^{\prime \prime}$ high, 40 lbs.

## Model 372:3-M183

Offers all the fatures of Model 3i23-M13, wlus a three speed mutor-driven turntable. I'ickup has reramic. turnover-type cartridge for playing $33^{\prime}$ : 45 , and 7 N rpm reeords.

Mfg. by THE BELL SOLND SYSTEMS. Inc.<br>- Columbus 7, Ohio<br>A Subsidiary of Thompsom Products, Inc., Cildreland, Ohia

# Amplifiers and Portable Sound Systems 

Here are a few of the most popular sellers from the famous webster electric Amplifier line. Each one represents top dollar-for-dollar value-each one delivers excellent fidelity, fine performance and virtual frecdom from maintenance and service problems throughout its long life. Competitively priced for fast turn-over.

## Ekotape "Symphotone" High-Fidelity Components

Discriminating music lovers who desire the ultimate in listening pleasure will truly appreciate the sympotove high-fidelity units. No other "trio" offers finer performance. The three components may be purchased separately to add to existing music systems or as a "package" to form a basic system.

## Model 212 Recorder

Represents the final word in tape recorders. Designed for custom installation, the mit consists of a twospeed, record/playback mechanism and has provision for comerting to an external amplifier, necessary for playing hack recordings. The 212 has a frequency response of 40 to 13,000 at $7 \frac{1}{2} \mathrm{ips}$. This superb recording qual. ity, partly a result of pre-selected, pretesteil recording heads, encompasses not only "highs" and "lows", but the whole. brilliant range of somud, giving an astonishing illusion of "presence". Finished in antique copper and brushed chrome plate. Consumer price \$225.00.

## Audio Amplifier

Designed for use in highfidelity sound systems, the Model 90.10 furiishes more-than-ample power for the average home installation. Can be used with the Model 97-0 Preamplifier-Lipualizer or other quality control unit. Prequency resporise at full, lotwatl ont. put, is flat within $(1.5 \mathrm{dt}, 20$ (1) 22,000 cyeles It one wall, oulput is flat within $0.3 \mathrm{dl}, 20$ 1040,000 eyeles. May be monnted in any ronvenient location, since afier presetting the volume control. no further adjustment is necessary. Finished in anlitue copper. Comsumer price 589.50

A control unit which enables one to "custom-build" the somul of his music system. Has inputs for a radio tuner, TV set, tape recorder, record changer or microphone. Offers a total of 25 combinations of equalization to compensate for variations in the recording characteristics of phonograph records, and in the listeners tastes. Call emphasize or deemphasize treble or bass tones, amplify the low level signal of a magnetic pichup or microphone, and compensate for ear deficiencies at low volume. Front panel in cold and black. Consumer price $\$ 129.50$.

Com-ette Intercommunication (wired and "Wireless")

## Com-ette Wired

Set consists of one Master and one Speaker (not illus.) station, with 50 ft . of interstation wire. Either station can originate or receive calls. Cabincts are in ebony only, with silver-gray grille. List price, complete (Master and Speaker) set \$49.50.

Com-ette "Wireless"'This low-cost pluy-in imtercommunication system is ideal for use in homes, stores, offices and farms-literally everywhere. The two smart units (both master stations) simply plug into nearest power outlet. No wiring. Operates on 115-volt ac or de current. Can be moved about as desired. Three color combinations: Ebony, Cardinal or Sand Dune cabinets with contrasting grille colors. List price, complete 2 -unit set $\$ 99.50$.

## President Series

## DE-LUXE 12 and 24 STATION AC POWERED INTERMIX INTERCOM SYSTEMS

The above is an inter-mixed system using both Masters and Remotes.
Masters may call selectively or to all masters and remotes in the circuit. Master stations can originate calls to any remote at will. Remotes can answer any master from a disance but cannot originate calls nor talk to other remotes. Remotes can originate calls to any master in the circuit, but cannot talk with other remotes. Model JS Remote may originate a call to only one master. Model JS-6 Remote may originate a call to as many as six masters.
Remotes with switch can br installed for private or non-private use.

Each master can have his own private hookup of remotes. The remotes may or may not originate calls to the individual master. Masters can call each other regardless of whether master being called has its power on or off.
llustration shows less than the maximim number of units possible in installation.
A JMP-6 Master may be connected to a tota! of six other units and a JMP-12 Master to a total of twelve other units. These units may be other masters or the JL, JS, and JS-6 Remotes. or a Masco Paging Amplifier and'or Paging Horns. All of these units may be mixed.

This is a De Luxe Intermixed System performing all the services of any of the Masco Intermixing Systems described on these pages and also featuring a busy signal on Masters, incoming and outgoing volume controls; rugged, lifetime Station selector lever switches and talk-listen switches and sockets on all Masters permitting a telephone type handset to be readily plugged in: AC powered for extremely quiet operation and with an audio power output of $3: \frac{2}{2}$ vatts, these units an drive up to 3 parallelled MIL- 45 horns connected to any one Station position or a booster amplifie: and horns for combining paging and intercom.

All Masco President Series Master Stations are supplied complete with 6 .foot cable and Junction Box, factory connected. PRICES List Price

E-50: A distortion-free, conservatively rated 50 watts using pushpull parallel 6L6 tubes and multistage inverse feedback arcur Has inputs for 2 mikes, 1 phono, separate bass and treble controls, phono follows: POWER OUTPUT: 50 watts at less than $5 \%$ Mike acin 120 db phono 79. OUTPUT IMPEDANCES: 4,8 and 250 ohms. TUBES: (9) 4, 8,16 and 250 ohms. TUBES: ${ }^{(9)}$ 2-5V4G. POWFR CONSUMPTION: 170 watts at 117 volts, 60 cycles A. STres cover) $\$ 196.50$. Plug Kit $\$ 3.24$

E-504: A 4 channel 50 watt amplifier featuring: high gain, inputs for 3 mikes and 1 phono, separate bass and treble tone controls, phono bass boost, multi-stage inverse feedback, push pull parallel output system tor lowest distortion at all power levels. POWER OUTPUT: 50 watts at less than 5\% distortion. FREQUENCY RE SPONSE: $\pm 2 \mathrm{db}$, 40 to 15,000 cycles. THREE MIKE INPUTS: 2 meg., gain 126 db . PHONO INPUT: $1 / 2$ meg. gain 86 db . OUTPUT IMPEDANCES: 4, 8, 16 and 250 ohms. TUBES (11. 3-6SF5 l-6SI7 l-6SN7 4-6L6G, 2-5V4G. FINISH: Silvergrey hammertone báked enamel. PANEL: Etched metal illuminated CONTROLS. 3 mike, 1 phono, 1 bass, 1 treble and power nated. CONTROLS: 3 mSUMPTION: 180 watts, 117 volts, 60 cycles A.C. SIZE: $1114^{\prime \prime} \times 143 / 4^{\prime \prime} \times 81 / 2^{\prime \prime}$. WT.: 30 lbs . LIST: (with tubes and cover) $\$ 239.50$. Plug Kit $\$ 3.90$.

## America's Finest High Fidelity Amplifiers for the home . . . <br> NEWCOMB COMPACT SERIES <br> NEWCOMB CLASSIC SERIES <br> NEWCOMB "D" SERIES

Figh fidelity is for everybody with the Newcomb Compact. Small, fully enclosed cabinets contain amplifier and preamp Eeautiful finish 10 match any furniture. No need to build in your amplifier. The Compact may be placed on chairside table for ronvenience of control. Available in 10,12 and 20 watt output models. Write for .omplete details.

Laboratory Standard amplifier with remote control-preamp unit (also available as ingle chassis amplifier) The Newcomb Classic Series 2500 is the finest home ampliier money can buy. It is ultra fidelity Beautifuley can buy. It is ufra chairside peration of entire system is only nine inches wide and less than four inches high and deep. Exclusive distortion control gives ifetime freedom from distortion

Consisting of two models, the D-12 and Cons this series is the finest low-priced arplitier line available. Competitive in amplith wany bargain-type amplifie:s年 are which has characterized New come produres include built-in rumbler filter input selector built-in aremplifier bass and treble controls and loudness control.

LOS ANGELES 38．CALIFORNIA

The National Catenoid Speaker System is the first basic im. provement in loud speaker design in more than ten years. A true corner horn, (not a back loaded or semi-horn) the Catenoid is the only practical means of reproducing the power and dynamic quality of rich bass tones.
The Catenoid System consists of a full catenoidal horn from the 30 cycle region to 300 cy . cles: a direct radiator from 300 to 6500 cycles, and a high frequency tweeter unit from 6500 to beyond 17000 cycles per

Bass response extends smoothly to very lowest fundamentals high frequencies are free from harshness, directional effects and the mid range gives a feeling of presence little short of miraculous!

Impedance: 8 ohms. Capacily: 30 watls. Size: $36^{\prime \prime}$ high, $401 /$ wide, $271 / 2^{\prime \prime}$ deep. Available in hand-rubbed walnut or ma hogany or with Formica wood grain finishes in blonde mahog. any, walnut or natural mahog. any to resist scratches, scuffs. burns or liquids.

HORIZON Criterion, AM-FM TUNER
$F M$ rensitivity -5 macrovalts for 20 db quieting: Exelun ve EM mutamatic tuning. Full band AM. Binaural prevision.

HORIZON 20, 20.wott amplifier
Ctilizes revolulmary new "unity-coupled" output stace. Frequenty response is $\pm 1 \mathrm{db}$ so cps to 20 kc at fall rated oulput.

MORIZON 10, 10 watt amplifier
Built-in preampaontrol unit 3 inputs, 3 record qualizationt curves, loudness control, separate put blage.

## HORIZON 5, preamp-control

4 inpuls. 7 recond equalizalion eurves, loudrest onlume control, suparace bati and treble controls. Plugs into tuner or 20 -watl smplifier.

Exclusive coffee or end table design featuring Isboratory-developed dual clustere of distributed ports and internal vents with dual beavy-duty drivers for exreptional pesk.free bass in mini mum size. 6 finishes - blonde. natural mehogany oo

 density iweeter for silky highs. New porting ystem. Impedance 8 ohms. In Formica wood crain finioher in blonde. walnut or mahogany.

PREAMPLIFIERS AND REMOTE CONTROL UNITS

## 10 finerchoricict than ElectroVoics

## NEW HIGH FIDELITY CIRCLOTRON AMPLIFIERS

## Critical Damping－Extended Response－Unity Coupling

Incorporating the first significant advance in amplifier design in 8 years ．．．the Wisgins Cir clotron Circuit．．．these EV hish fidelity amplifiers offer many new fearures essential to complete listening satisfaction．
The Circlotron Circuit eliminates DC in the output transformer；switching transients are completely absent through unity coupling between tubes．Very low leakage reactance；high tube efficiency with lons component life provides trouble－free operation．
Newly developed critical dampins control perfectly matches amplifier to speaker system eliminating bass losses rom over－damping，prevents under－damped hangover．Four output ing brackets provided；simplifies mounting in vertical position and in hard－toreach areas．

Model A20C 20－WATT CIRCLOTRON AMPLIFIER．Compact，high－quality，conserva－ tively rated amplifier with all necessary controls for handling a complete high fidelity system． Power output 20 watts rated， 40 watts on peaks．Frequency response $\pm 1 \mathrm{db} 20-20.000 \mathrm{cps}$ at 20 watts；line amplifier section $\pm 0.1 \mathrm{db} 20.70,000 \mathrm{cps}$ at 20 watts．Less than $0.5 \%$ harmonic distortion at rated output；IM distortion，less than $0.3 \%$ at 5 watts，less than $1.5 \%$ at 20 watts Hum and noise 70 db below rated output，magnetic phono -55 db ．Feedback total － 33 db ．Inputs－Ultra－linear phono，masnetic phono，tuner or TV，tape or TV．Hi－Z micro－ phone．Speaker outputs－4，8， 16 ohms unbalanced and 600 －ohm balanced．Controls－ Function selector，record compensation（7 positions）．！evel，loudness，bass（power switch on bass control），treble，damping factor（ 0.1 to 15），and two hum adjustments for preamplifier stases．Tubes－3－12AX7，－12BH7，2－6V6GT，2－5Y3GT．For 117 V .60 cycle AC a 1.15 amps max．Warm gray finish with rich gold and dark green escutcheon．Size $103 / 4^{\prime \prime}$ wide． $1114^{n}$ deep， $73 / 8^{\prime \prime}$ high．Shipping weight 23 lbs ．
List Price．
．$\$ 183.33$
Model A30 30－WATT CIRCLOTRON LINE AMPLIFIER．Establishes a new standard in high fidelity reproduction．A precision product to complement the finest audio system．Power 70.000 cps watts conservatively rated， 60 watts on peaks．Frequency response $\pm 0.25 \mathrm{db} 20$ 30 watts．Hum and noise 90 db benic distortion less than $0.5 \%$ at 30 watts；IM less than $1 \%$ at 30 watts．Hum and noise 90 db below rated output．Total feedback -31 db ．Jnput impedance tivity 1.25 V for rated ourpur Controls－ 16 ohms unbalanced and 600 －ohm balanced．Sensi－ power switch．Tubes－ $1 \cdot|2 \mathrm{AX7}| .12 \mathrm{BH} 7,,2.6 \mathrm{BG6G}$ factor（ 0.1 to 15 ），hum adiustment． power switch．Tubes－ $1.12 \mathrm{AX} 7,1,12 \mathrm{BH} 7,2-6 \mathrm{BG} 6 \mathrm{G}, 2-5 \mathrm{Y} 3 \mathrm{GT}$ ．Built－in power supply black trim：can be rack mounted．Size $133 / 4^{\prime \prime}$ wide． $81 / 2^{\prime \prime}$ deep． $7^{\prime \prime}$ high．Shipping weight $25^{\mathrm{lbs}}$ ． List Price
．$\$ 241.67$

## BEAUTIFUL VERSATILE PREAMPLIFIER AND REMOTE CONTROL SETS

## Individual Matched Units－Vitol＂Presence＂Control－Low Harmonic Distortion

Model PRCI PREAMPLIFIER AND REMOTE CONTROL．Smartly styled，matching units，
the Model PRCI is designed for use with Model A30 Circlotron Amplifier．Offers both ultra． linear ceramic and magnetic phono－cartridge inputs．Preamplifier unit is used near amplifier and associated equipment：remore control unit is separate to allow convenient，remote opera． tion of system up to $75^{\prime}$ from other equipment with single cable connection．
When PRCI is used with Model A 30，frequency response is $\pm 0.5 \mathrm{db} 20-20,000 \mathrm{cps}$ ．Less than $0.5 \%$ harmonic distortion at rated output：IM less than $1.5 \%$ at 30 warts．Hum and noise 80 db below rated output．Model MI masnetic pheno -60 db ．Inputs（preamplifier unit）－ Ultra－linear phono，magnetic phono（cheice of hish－level or low－level jack in M！assembly）， tuner，tape．TV，auxiliary．Controls（preamplifier）－Master on－off switch，function selector， 4 individual input－level controls，one input－level control on MI masnetic preamplifier assembly： （remote control）－Record compensation（9 positions），level，valume－loudness switch mbly； filter，presence，bass，treble．Tubes（preamplifier）－I．6C4；（MI assembly）－1．12AY7－ （remote control）－1，12AY7，I，12AX7．Power required（drawn from Medel A30） 63 V AC at 1.05 amps， $18 \mathrm{~V} D C$ at $015 \mathrm{amps}, 250 \mathrm{~V}$ DC at 10 ma ．Beautiful cold and dark green escutch． eons in mahogany or blonde Korina cabinets．Size of each unit $1034^{\prime \prime}$ wide， $71 / 2^{\prime \prime}$ deep， $43^{\prime \prime}$ high． Shipping weight（total both units） 12 lbs ．
List Price． $\qquad$ .$\$ 200.00$
Model PRC2 PREAMPLIFIER AND REMOTE CONTROL．Similar to Model PRCI but withour M1 magnetic preamplifier assembly．Includes plug－in resistor assembly to replace load of MI．Shipping weight 12 lbs
List Price．
.$\$ 175.00$
Model MI MAGNETIC PREAMPLIFIER A55EMBLY．Plugs into Model PRC2 preampli fier unit．Shipping weight 2 lbs．
List Price．．
．$\$ 25.00$
Note：Models PRCI and PRC2 are supplied with 5＇cables．Extensions are available for remote contro！unit．Preamplifier and remote control units may be purchased without cabinets．Sub－ tract $\$ 8.33$ from list price for each cabinet．

# Fleetwood Custom Jelevision fULL ELECTRONIC REMOTE CONTROL 

Fleetwood is a 2-chassis television system designed for custom installation. Picture fidelity is the same as that usually seen only on TV station monitors-also built by Fleetwood.

Set employs 27 tubes in addition to picture tube and provides audio power for a speaker, as well as a detector output to connect to high fidelity sound systems. The picture chassis is relay operated by the on-off switch on the separate tuner chassis for full remote control. Both units are attractively finished. An eye-catching, gold finished, hinged escutcheon plate is furnished for easy access to secondary controls.

The separate tuner unit, with edgelit dial and individual channel pilot lamps includes the off-on/volume, contrast, brightness, definition, channel selector/fine tuning controls. The tuner is of the Super Cascode type and is completely adaptable for Ultra High Frequency reception, by a simple interchange of tuning strips and insertion of the correct channel identification number. The illuminated channel numbers are readily replaceable and a full set of numerals, from 2 to 82 , is provided. (The tuner also can be used with a color picture chassis. Model 400. Write factory for details.) The four video I.F. stages provide full four megacycle band-pass, and there are separate cathode followers for audio and video circuits. Three audio outputs are provided: (a) low level high impedance, and (b) low level cathode follower, both for connection to existing high fidelity music systems, and (c) power amplifier to operate a loud speaker.

## CHASSIS DIMENSIONS

| Units | Height | Width | Depth |
| :---: | :---: | :---: | :---: |

FLEETWOOD 800: Full Remote Control Receiver for $21^{\prime \prime}, 24^{\prime \prime}$ and $27^{\prime \prime}$ rectangular $90^{\circ}$ picture tubes. Includes tuner chassis and picture chassis. Supplied with 27 tubes, 14 pilot lamps, 40 fee: of cable, ion trap, all knobs, and matching hinged cover for secondary controls. (Shipping Weight: 65 lbs .)

Users Net $\$ 299.50$
FLEETWOOD 810: Complete Television Chassis for $21^{\prime \prime}, 24^{\prime \prime}$ and $27^{\prime \prime}$ rectangular 90 picture tubes. Non-remste control. Supplied with 24 tubes, ion trap, all knobs and matching hinged cover for secondary controls. (Shipping Weight: 50 lbs .)

Users Net $\$ 229.50$
FLEETWOOD 610: Complete Television Chassis for $21^{\prime \prime}$ rectangular $70^{\circ}$ picture tubes. Non-remote control. Surplied with 22 tubes, ion trap, all knobs, and matching hinged cover for secondary controls. (Shipping Weight: 50 lbs .) Users Net $\mathbf{\$ 1 9 9 . 5 0}$
All chassis less picture tube, speaker and mounting brackets.
Accessory Kits: Contains mounting frame, laminated safety glass, and royalite picture tube mask
821 B for $21^{\prime \prime}$ spherical tace $90^{\circ}$ glass picture tubes, as 21 AMP4. ( $19^{\prime \prime} \times 24^{\prime \prime}$ ) (Shippinc Weight: 12 lbs.$)$

Users Net $\$ 15.0^{\circ}$
824 B for $24^{\prime \prime}$ rectangular glass $90^{\circ}$ picture tubes, as $24 \mathrm{CP} 4 \AA$ or 24 TP 4 . ( $201 / 2^{\prime \prime} \times 25^{\prime \prime}$ )
(Shipping Weight: 15 l bs .) Users Net $\$ 25.00$
827B for $27^{\prime \prime}$ glass $90^{\circ}$ picture tubes as 27EP4. (24" $\times 30^{\prime \prime}$ ) (Shipping Weight: 22 lbs )
Users Net $\$ 25.06$
Kit for 610 only
621C for $21^{\prime \prime}$ spherical face $70^{\circ}$ glass picture tubes, as 212 P 4 B . ( $18^{\prime \prime} \times 24^{\prime \prime}$ ) (Shipping Weight: 12 lbs.$)$

Users Net $\$ 15.00$

Mounting Kits: Includes tube supports, the down straps, and all hardware for mount ing picture tube on chassis.
801B mounts 21", $90^{\circ}$ glass tubes, as 21AMP4 on Models 800 or 810. (Shipping Weight: 3 lbs .)

Users Net 56.00
804 B mounts $24^{\prime \prime}, 90^{\circ}$ glass tubes, as 24 CP 4 A or 24 TP 4 on Models 800 or 810. (Shippinas Weight: 3 lbs.)

Users Net $\$ 6.00$
807B mounts $27^{\prime \prime}, 90^{\circ}$ glass tubes, as 27 EP4 on Models 800 or 810 . (Shipping Weight: 5 lbs.$)$

Users Net $\$ 6.00$
Kit for 610 only
601 B mounts $21^{\prime \prime}, 70^{\circ}$ glass tube, as 21ZP4B on Model 610. (Shipping Weight: 2 lbs.)

# PILOTUNERS <br> Matched Companion to the World-Famous Pilotone Amplifiers <br> AF-860 AM-FM PILOTUNER $\$ 179.50$ 

The Ultimate in engineering skill and sensitivity created by PILOT. Armstrong Dual Cascade Limiter -Discriminator circuit an FM. FM Sensitivity better than 1.5 microvolts for 20 db . of quieling. $A M$ Sensitivity better than 2 microvalts. Exclusive Miero-Meter for Laboratery Precision Tuning on FM and $A M$. Cantinuausly variable amplified $A F C$. Two-stage If amplifier for broad or sharp AM bandwidth with IOKC whistle filter. Complete professional Preamplifier and Equalizer with 3 inpuls and 2 Cathode Follower Outputs. Dual Equaliza tion Switches provide five pasitions of Treble Roll-off and five positions of Bass Turnover.

## AA-420 PILOTONE AMPLIFIER \$99.50

Unsurpassed Williamson type high fidelity audio amplifier with push-pull 5881 's for full 15 watl out. put combined with prafessional preamplifier far maximum efficiency and flexibility in mast convenient space saving format. Six tubes plus Rec. tifier.
Frequency Response: $\pm 1.0 \mathrm{db} .15 \mathrm{cps}$. to 20,000 cps. at rated output. Total Harmonic Distortion: Less than $1 \%$. Intermodulation Distortion: Less than $2 \%$ at rated output. Hum and Noise Level: 80 db . belaw rated autput.
Dual equalizatian switches provide five pasitians of treble roll-off and five pasitions af bass turnaver. laudness contral with individual level setting can. trals for three inputs.

PILOTROL PA-913 \$119.50
Professional Preamplifier-Equalizer with push buttan controls. This master audio contral contains six tubes including rectifier with the exclusive Decibel Meter for directly reading output level of either recording channel or manitoring channel. Features include Master Loudness control in addition to a dual Compensated Volume control. Dual Cathode Follower outputs. Recording autput independent of Volume, Lqudness and Tone cantrols. Microphone channel which may be mixed with any of the ather four channels. Brushed brass escutcheon may be used as a sloping panel in attractive mahogany cabinet supplied ar vertical for custam installation. Twenty-five positian pushbutton Phono-Equalizer. Separate tone cantral for Treble and Bass. Individual level setting control for all inputs.

AA-410 PILOTONE AMPLIFIER \$49.50
Unexcelled Williamsan-lype High Fidelity Amplifier for cansistent, dependable performance employing rugged full power 5881's for full 15 watl output. Faur tubes and Rectifier.
Frequency Respanse: $\pm 0.1 \mathrm{db} .15$ cps. to 20,000 cps. al rated autput. Tatal Harmonic Distartian: Less than $1 \%$. Intermodulation Distartian: Less than $2 \%$. Hum and Noise level: 90 db . belaw rated autput. Patted output transformer canstructed with interleaved winding for reduced leakage inductance.

相

Williamson type 10 watt Amplifier, with built-in Preamplifier. Seven lubes including Rectifier and push-pull output tubes. On.Of Valume, separale Bass and Treble Cantrols and Equalizer selectar switch for LP, NAB, AES and Fareign recardings, Frequency Response $\pm 1 \mathrm{db} .15$ ta 40,000 cycles. Distartion less than $1 \%$ at 10 watts. Hum level 70 db belaw 1 volt. Three inputs far Radia and Auxiliary equipment and one variable impedance input. RIAA Equalizer positian included.

## The World's Most Powerful, Most Dependable TV Receivers

Model 630-5T - The "Audiophile . . . "for oll $90^{\circ}$ picture tubes, from $21^{\prime \prime}$ to $27^{\prime \prime}$

Dimensions: $19^{\prime \prime} \mathrm{W} . \times 173 / 8^{\prime \prime} \mathrm{D}$.
Shipping Weight: 58 Ibs..........Net Price $\mathbf{\$ 2 4 9 . 5 0}$

## The "AUDIOPHILE"

## HIGH FIDELITY TV TUNER FOR HIGH FIDELITY AUDIO SYSTEMS

The ultimate in TV receivers, for owners of home music systems who want to enjoy the sound quality of their own high fidelity systens plus equivalent picture quality, not provided by mass-produced TV sets.
The picture fidelity of the "Audiophile's", nowerful 28-tube chassis matches the audio quality of the finest sound installations. Noise-free sound take-off for feeding into external Hi-F'i a udio system. Undistorted FM signal at ratio detector stage is fed through eathode follower for matching any amplifier circuit.

## FEATURES

AFC Horizontal Hold-using syn- - Accommodates both magnetic-and chro-lock discriminator transformer.

- Stabilized Vertical Hold.
- 3-Stage Sync. Chain - with hiyh transconductance noise-limiting sync. amplifier.
- Antiblooming circuit.
- Full Horizontal and Vertical Blanking.
electrostatic-focus kinescopes.
- Supersensitive - 5 mierovolt sensitivity. Cascode tuner.
- AGC Level and Area Control - for adjusting reception to any signal area.
- Video IF Carrier Freduency 45.75 mc
- 4-Stage Video IF and 2-Stage Video Amplifier.

## The "SOUND THEATRE"

The 'theatre-in-the-home,' with an incomparable combination of fidelity in Audio and Video reproduction!

Leng acknowledged as the leader in the field of quality eustom television, TechMaster now brings you the 'Sound Theatre' with outstanding performance provided by means of a multi-network. basic "630." 31 -tube circuit. There are no short cuts in the design, engineering or construction of the 'Sound theatre. Hy every advanced engineering method and with the use of the finest available components, Tech-Master is able to offer at a realistic price the finest in sisht combined with the finest in sound.

## COMPARE THESE OUTSTANDING FEATURES:

- 31 tube, 630-type chassis
- Push-Pull, 6-Watt Output - with inverse feedback.
- Wide-Range Tone Control.
- Input - for phonograph, radio tuner or microphone.
- 2-Stace Audio Amplifier.
- Sound 1F Carrier Frequency -. 41.25 me.
- PLUS - all the exceptional viden features of the "Audiophile" described above.

Model 630-5 - The 'Sound Theotre,' for oll $90^{\circ}$ picture tubes from $21^{\prime \prime}$ to $27^{\prime \prime}$.

Dimensions: $19^{\prime \prime}$ W. $\times 173 / \mathbf{g}^{\prime \prime} \mathrm{D}$.
Shipping Weight: 65 lbs.......Net Price $\$ \mathbf{2 5 4 . 5 0}$
Model 630-5s _ Includes speciol wide ronge speoker

Nef Price $\$ \mathbf{2 6 9 . 5 0}$

## The Gold Medal

The new rugged Gold Medal TV chassis combines the time proven RCA 630 Type circuitry with the most advanced engineering. Designed for long life and dependability. Flawless video plus versatility in audio. By means of simple external switching arrangement. you may use either the completely self contained high quality amplifier and $12^{\prime \prime}$ loud speaker of the Gold Medal receiver, or feed the sound thru your own hi-fi system.

- New systen of picture-sound-synchronization.
- Latest 630 tyre circuit uses only finest a a vailable components.
- Advanced cascode turret tuner
- Quick-action, keyed AGC circuit for stabilized control
- New Hi-sweep auto transformer system
- $5 \mu v$ sensitivity for good fringe area reception.
- Full horizontal and vertical blanking.
- Local-distance area control switch on front panel.
- Picture-Expander control for low line voltage conditions.
- Chassis beautifully plated in sleaming nickel.
- Audio Takeoff for feeding to hi-fi system.
- Phono input.

Model 2430 - For $70^{\circ}$ picture tubes, with quolity $12^{\prime \prime}$ PM speoker ond universal kine mounting brockets.
Dimensions: $21 \frac{1}{4^{\prime \prime}} \mathrm{W} . \times 16 \frac{1}{4^{\prime \prime}} \mathrm{D}$.
With kine brockets removed, chossis is $19^{\prime \prime}$ wide for rock ponel mounting. Shipping Weight: 65 lbs .

Net Price $\$ \mathbf{1 8 9 . 5 0}$

##  AND FM TUNER

## $V_{i d e o l a l a ~ s a n ~ s t r u s ~}^{s}$

A pair of star performers for consentional cabinet or "built-in" custom installation. Both AC and $\mathrm{AC} / \mathrm{DC}$ models, not commercially mass-produced, but crafted with the same care as the higher priced models.
Designed for use where economy is a major consideration. Supersensitive for fringe or troublesome areas. Videola Star TV receivers operate efficiently with any standard indoor antenna in normal signal areas. 16 -tube, powerpacked circuit delivers bright, sharp, rock-steady picture and clean, undistorted static-free sound.

## OUTSTANDING FEATURES OF BOTH VIDEOLA TV RECEIVERS

- 16 tubes plus rectifier - Automatic Gain Cuntrol - Threc-point front-panel, dual controls - 3-Stage, stagger-tuned IF - Sync. Guide Horizontal AFC control Auto-transformer high voltage systent Wired for low-voltage, clectrostatic focus, kinescopes

## The CONSTELLATION

- Sensitivity 6 microvolis at 20 V peak-to-peak.
- Standard mentode tuner.
- 2-Stage video amplifier sween circuit.
- For $90^{\circ}$ picture tubes from $21^{\prime \prime}$ to $27^{\prime \prime}$
- Tube complement: 6J6. 6ВС万, 2 6СBf, 6AUG, GT8, 6 к̌6, 2/12AU7, 6SN7, 6VG, 6HQG, 5U4GA, $1 \times 2 \mathrm{~K}, 6 \mathrm{~W} 4,6 \mathrm{C} 4,6 \mathrm{GM} 8$.
- Dimensions: $17^{\prime \prime} \times 17^{\prime \prime}$
- Shipping Weight: 35 tbs .
- Complete with mounting hardware speaker, and knob kit.
- For 115 volt AC operation.
$\$ 129.50$ Net

## The GALAXY

- Sensitivity - 7 microvolts at 20 V peik-to-peak.
- Pentode tuner.
- High-transductance 12RY7 video amplifier circuit.
- For $70^{\circ}$ pieture tuhes from $17^{\prime \prime}$ to $21^{\prime \prime}$.
- Tube complement: 5J6, 3HC5, 2/3CB6, 5AM8, 3AU6. 5T8, 121.6, 12BY7, 2,7AU7, 6SN7, 12W6, 12AX4, 25CD6, 1X2B, selenium rectifier.
- Shipping Weight: 28 lbs.
- Complete with mounting hardware, speaker, and knob kit.
- For 115 volt AC or DC operation.

## 7he Cantata: HIGH FIDELITY FM TUNER

A complete high fidelity FM tuner with self-contained AC power supply. Compactly constructed for versatile installation, yet a veritable giant in performance.

- Cathode follower and high impedance outuuts.
- Covers the full FM band (88-10s Mc.)
- Limiter and AFC circuit for casy pin-point tuning.
- Manually controlled AFC cutoff to pick up weak signal st:-tions adjacent to strong signal stations.
- Sensitivity is 4 microvolts for 20 db quieting.
- Uses balanced ratio detector and grounded-grid RF amplifier.
- Full power transformer operation for line isolation.
- Standard de-emphasis network automatically regulates high-frefuency response.
- Micro-Vernier tuning.

The CANTATA complete with mounting instructions, tubes - 6AU6, 6C4, 6AL5, 6BA6, 2/12AT7, and selenium rectifier
$\$ 49.50$ Net
Dimensions: $4 \frac{1}{2^{\prime \prime}}$ H. $\times 8^{\prime \prime} \mathrm{W} . \times 6 \frac{1}{4} 4^{\prime \prime} \mathrm{D}$.
Shipping Weight: 7 lbs.

# (MIIEHH-WISIER QUALITY KITS 

## Model 630-9 America's Finest TV Kit

The world famous RCA-6.30 tyje circuit modified and imburoved by Tech-Mastel Components used are the best available. Special Tech-Master s.hematic and puctorial dingrams gunde evers mose for ease in wiring and assembly, Monel thos-9 is used by leadmg schools: Ideal for eomprehensive television tanining beatuse it uses established multiple tube circuits, which are more easils understuod, rathec than combrumise monlified rircuits.

No Other TV Kit Offers All Of These Imporfant Features

- ADVAぶCHD ('AS(OODE TURREN TUNEK - adantable to UHF" without tuals: Iligh signal-to-hoise ratio results in a sharper picture, with minimum of "snow" even in weal signal areas.
- AFC horizontal sunchroni\%ation em-
 Reactance tube and synchro-lork Mart oy Hartley Oscilator cireuit assures optimum noist immunity and horizontal stability
- B-Stage Sync, Amblifier. Clippor and sebarmior circuit provides unexcelled interlace
- 4-Sitage stagger tumed Viden IF sss tem produces full \& MC band widtl and complete nicture lefinition,
- Adjacent Chanmed 'Trap.
- 2-Stager Viderr Amblifier
- Direct Complingr Used fur Keyed ACB C"ireut.
- J mieromolt sonsitivits
- Complete frout banel controls allow simple individual adjustments
brightness, horizontal and vertical hold, volume, contrast-On Off, chamnel seleptor amd fine tuning.

CHASSIS DIMENSIONS: $213 / 4^{\prime \prime}$ wide $\times 153 / 4^{\prime \prime}$ deep.
SHIPPING WEIGHT: Approximotely 65 lbs.
DE LUXE KIT: MODEL 630.9 - Supplied complete with oll components, mounting brockets, speoker, ond all tubes (less kine, wire and solder),
$\$ 159,50 \mathrm{Ne}$

## New tech-master tv craft kit

FOR PICTURE TUBES
UP TO 21" $7 \mathbf{7 0}^{\circ}$ )
The must up-to-date TV kit, with the latest immovements in tubes and circuitry. Ideal for student work of home project. This kit not only provides excellent training in television. hut builds into a first class, modern receiver that sanvone wonld he arefully seleeted and packed by nersonnel experiened in the TV-kit fiedrl, insure satisfaction. Step-by-step instruetjons with pioturial and schematic diagrams are easy to follow - leave nothing to the inmgination. Somkets, terminal strips and connertors riveterl on chassis.

- Advanced and improved, super-selectiver 12-chanmed tureet tuner,
- New. finf milliampere mageed low-drain tules.
- Onerates new law-voltage electrostatic-ficus kincscones $15^{\circ \prime \prime}$ and $21^{\prime \prime}$.
- High-efleioncy eireuit-sensitivity of a microvolts at 20 V prak-to-peak.
- Threa-stage stagyer-tuned 1 F , using high-gain bil-filar eoils.
- Automatic gain control.
- Synchio-quide horizontal hold with AFCC
- Ceramic core horizontal output transformer with heam power ammpifer.
- Si\%e: $17^{\prime \prime} \times 17^{\prime \prime} \times 9^{\prime \prime}$ Weight: 261! llis

Model 5516R - Complete with tubes, hardware, mounting brockets, detailed instructions (less kine, wire, solder).
$\$ 89.50 \mathrm{Ne}$ t

Model 5516 W - Same as obove but with IF section fully wired and aligned Uses Standard tuner (sensitivity $7 \mu v$ ).

Model 5516 C - Some as 5516R but uses continuous type tuner.

# GENERAL (3) ELECTRIC 

## SPEAKERS

These speakers are engineered and manufactured solely for the replacement field for use in home receivers. auto sets. television sets and intercommunication systems. RETMA standard dimensions. Fully dust-proofed. Baked aluminum enamel finish. RETMA service guarantee. QUAM UNIVERSAL MOUNTING BRACKET comes with all $3^{1 / 2^{\prime \prime}}$ to $6^{1 / 22^{\prime \prime}}$ speakers and may be ottached to any two of the fOUR threaded mounting holes in the $U$ shaped pot. Voice coil impedance of speakers listed below is 3.2 ohms $\pm 10 \%$.

FINE HIGH-FIDELITY SPEAKER SYSTEMS AND SPEAKER ENCLOSURES

## RADO PRODUCTS CO•r INC。

HUNTINGTON, INDIANA

## CHORDETTE

The Chordette is a fine piece of functional furniture. Use as a chair side or end table, bookshelf, or without legs-mount vertically.
SPEAKER SYSTEM: Utah two-way, two speaker high-fidelity speaker and enclosure system. One Utah $8^{\prime \prime}$ high-fidelity speaker-one, $31 / 2^{\prime \prime \prime}$ high frequency unit. Speaker system designed so full
compensation is made for deficiency in human ear, as shown by Fletcher-Munsen curves. Enclosure volume 1.4 cubic feet. Air gap flux density averages 9,500 gauss. Rated at 8 watts of program material.
OVERALL DIMENSIONS: Height (with legs) $22^{\prime \prime}-$ Cabinet only $11^{\prime \prime}$-Width $22^{\prime \prime}$ - Depth $131 / 4^{\prime \prime}$

## CONCERTO

The fine woods and construction features of the new Concerto are a master achievement in the art of sound engineering and woodworking. Accoustically correct, the Concerto is modified labyrinth type. dampened with $1^{\prime \prime}$ of fibre glass with a volume of 4.5 cubic feet.

SPEAKER SYSTEM: A Utah high-fidelity speaker system - with the unique Trio high irequency unit a two-way, four speaker system. One Utah $12^{\prime \prime}$ high.
fidelity speaker, plus three, $31 / 2^{\prime \prime}$ high frequency units, gives full coverage of the audio spectrum with a deep, rich bass. The two outer tweeters are angle mounted to assure in excess of 90 degrees dispersion of high frequencies. Frequency response of plus or minus 6 db from 30 to 15,000 cps. Usable range 20 to $20,000 \mathrm{cps}$. Air gap density- 11,000 gauss. Rated at 16 watts of program material. OVERALL DIMENSIONS: Height $30^{\prime \prime}-$ Width $21^{\prime \prime}$ - Depth $171 / 2^{\prime \prime}$

## TRIO

A finely designed and executed small cabinet with three high frequency units, the Trio can be connected with any radio, phonograph, tele. vision or audio amplifier - extending response beyond 15,000 cps. Reaches greatest effectiveness above 5,000 cycles - but the better the audio source - the better the Trio will sound. 8egins functioning at 3,000 cps.

SPEAKER SYSTEM: Three Utah, $31 / 2^{\prime \prime}$ high fre quency units, facing directly forward, the two outer units angle mounted to assure 90 degree dispersion of high frequencies. The Trio will match any voice coil impedance. It is complete with resistance, allowing user to match sensitivity to his present audio system. Rated at 16 watts of program material.
OVERALL DIMENSIONS: Height $5^{\prime \prime}-$ Width 12" - Depth $5 / 16^{\prime \prime}$

RE－ENTRANT TRUMPETS<br>RADIAL HORNS and SPEAKERS PM DRIVER UNITS

## Re－Entrant Trumpets，Radial Horns and Speakers

RE． 35 RE． 50 RE． 60

RACON re－entrant horns and speakers are designed to deliver highly concentrated sound with great efficiency over long dis－ tances．This is due to true ex－ ponential design throughout and the climination of all vibratory members and sound dissipating devices．The base and inside tone arms are husky aluminum castings and bell is a heary gauge aluminum spinning．The TR：－－8．R，RE－50 and RE－60 incorporate reflectors made of patented RICON ACOLSTIC MATERIAL to pre－ rent resonant effects．All models are supplied with ＂L＂－bracket mounting（ratchet swivel type on re－ quest．Finish is in weatherpronf hard baked gray hammertone．RE－f0 \＆RE－50 recommended for maximum low frequency music reproduction．RE－35 and IRE－25 best suited for incidental music and high speech intelligibility．
The SR－35R and SR－60R are weatherproof radial re－ entrant horns designed to project sound over an area of 360 degrees．The centre reflectors are of patented R．ICON ．ICOUSTIC MATERIAL and the deflectors are aluminum spinnings covered with this same non－ vibratory material．Standard＂C＂＂bracket supplied． Thread size is $13 / s^{\prime \prime}-18$ ，permitting the use of any Wriver unit listed below． $\mathbf{1}_{10}{ }^{\circ}$＂ 16 thread on request． The SR－60R is ideal for church tower sound installa－ tions and the SR－35R for incidental music and speech．

SR－こ5F SR－60R

SR．15R SR－12R

The SR－15R and SR－12R are rated at 20 and 10 watts respectively and are supplied complete with built－in 15 ohm＊diver units．These models are intended primarily for speech in paging and＂talk back＂ systems and are completely weatherproof．Supplied with cast swivel ratchet and wall bracket．

## Waterproof Permanent Magnet Driver Units

Thr．Hriver unit is the most important single element in a successful public address system．In these four new driver units，primary emphasis is on：high con－ timuous power handling capacity with ample reserve

for overload peaks up to $100 \%$ ，maximum conversion efficiency，response ranges suitable for every type sound system．and waterproof construction．

These four units employ Alnico V magnets and Armeo magnetic iron throughout．All soft steel parts are doubly plated to prevent corrosion．An automatic electromagnctic cut－out switch is used in the mag－ netizing process．assuring maximum flux density in the gap and high uniformity．Units are individually measured fo：flux density．Fach unit is tested with special equipment for power handling capacity as well as a 350 －volt ground test．

Long life plastic diaphragms and formers are sup－ plied．Voice coil leads are non－fatiguing beryllium copper，insuring lifetime performance．All units are completely waterpoof，yet permit ready replacement of diaphragm where needed．

DOUBLE RE-ENTRANT MARINE SPEAKERS<br>RE-ENTRANT PAGING SPEAKERS<br>CONE SPEAKER ENCLOSURES

## DOUBLE RE-ENTRANT MARINE SPEAKERS

The Models MR-30M, MG-21J, MG-21B and MN-15B marine speakers are designed mimarily to meet the vigorous sound systems requirements aboard ship.

The driver unit and connecting leads are all enclosed, resulting in a completely waterproof speaker. Heavy aluminum spinnings are used throughout and back base is a husky, non-corrosive aluminum casting. A baked chromatic undercoat plus an outside lacquer finish is assurance of lasting service under severe conditions of humidity and temperature. Designed for three legged flush rear momnting. All models provided with cast aluminum transformer housing, Model MN-15B supplied with "U" bracket; "U" bracket for other models on request at slight additional cost.

| DW-9R | 750-10,000 | $70^{\circ}$ | 8 watts | *15 ohms |

These weatherproof re-entrant paging speakers are capable of high intelligibility in locations where high noise levels prevail. Construction is non-vibratory througbout and consists of heavy aluminum spinnings and castings. Voice coils are designed to provide a high degree of efficiency when these speakers are also used as microphones in "talk-back" systems. Ideal for replacing conventional cone speakers. RE-12 and RE-15 provided with heavy cast aluminum ratchet bracket. DW-9R is supplied with flange for flush mounting.

## NEW PAGING AND TALK-BACK SPEAKERS

RE-20 - Molel RE-? 0 has a nominal rating of 25 watts and incorporates a varnish vacuum inpregnated transformer provided with a renovable weatherproof aluminumi spinning. Primary impedances are 625, 1250,2500 and 5000 ohms and the secondary is tapped at $4, x$, and 16 ohms. By conrecting directly to and between these terminals, the resulting impedances of $310,625,1250,2500,3650,5000,7300,10000,14,500$ and 29,000 ohms are equivalent to $16,8,4,2,1.3,1.0,0.7,0.5,0.34$ and 0.17 watts respectively when connected aeross a 70 volt line. Weatherproof construction throughout.

RE-11 - Similar to the RE-20, but has a higher cutoff and a nominal rating of 12 watts. The huilt-in 10 watt transformer has primary impedances of $500,1000,1500 \mathrm{and}$ 2000 ohms and a secondary tapped at 8 and 15 ohms.

RE-18 - This is the economical answer to all paring and "talk-back" applications where low to medium power levels are necessary and where "specs" do not call for line transformers. Hell and back cover are intearally spun of aluminum to assure weatherproof performance of the 12 watt driver unit. Complete with adjustable "U" bracket.

## STRAIGHT EXPONENTIAL TRUMPETS

Output from any straight trumpet is approximately 2 DB higher than corresponding re-entrant type because it lacks the attenuation inherent in all re-entrant horns. "Stormproof" Trumpets are made of non-vibratory RACON ACOUS'lIC CLOTH. Weather-treated for indoor or outdoor use. "All Aluminum" Trumpets are made of

heavy gauge aluminum spinnings with rolled beaded edge and cast aluminum throat sections. "Unbreakable" Trumpets are made of heavy gauge aluminum spinnings reinforced and damped with Patented RACON ACOITSTIC MATERIAL. Large sizes are useful for church chime systems, C-D systems, airports and stadiums, parks, playgrounds, music festivals, for both speech and music. Smaller sizes for railroad and bus terminals, waiting rooms, factories.

NOTE: Models with 2, 4 and 8 unit throats available. Prices on request.

## CAST ALUMINUM HORN TWEETERS

Response is essentially flat to 12,000 cycles, with excellent usable output to 15,000 cycles. Horn design permits wide angle distribution. Designed for a 1000 and 1500 cycle crossover to assure optimum cone response. These
No'TE: Instructions are packed with each tweeter, providing an easy method of home buikding a professional type 1000 -cycle crossover network.

models must be used with a cross-over. network. The networks listed below are recommended and when employed, the CHU-5 and CHU-2 may be used with amplifiers having an output rating to 25-30 watts.

## COBRA TYPE HORN

The RACON COD-11 "cobra" type horn is designed for public address systems requiring high clarity reproduction with maximum concentration of sound in a horizontal plane. It is of "straight" horn design and exponentially flared for maximum transfer of energy. The low cutoff of 250 cycles results in crisp, highly articulate quality without a trace of boominess. The holn consists of a heavy two-piece non-vibratory aluminum casting and is provided with a two-section serrated mounting bracket. Finish is baked gray hammertone over a zinc chromate primer.

## THE CITADEL DIRECT DRIVE AMPLIFIER

- Frequency response $\pm 1 / 4 \mathrm{db} 20-70,000$ c.p.s.
- Full 20 watts of audio.
- Distortion is less than $1 / 2$ of one per cent.
- Phase shift—less than $15^{\circ}$ at 20 c.p.s.
(Above figures are a true picture at full output of 20 watts.)
Here's the first amplifier to successfully eliminate the output transformer. All distortion introduced by transformers is eliminated. Great clarity of tone is noticeable at once. Hum and noise are at a minimum. Frequency response is $\pm 1 / 4 \mathrm{db} 20.70,000$ c.p.s., achieved with far less phase shift than can be obtained with a transformer... especially on the low end. Matching Stephens Tru-Sonic speakers with 500 ohm v.c. impedance designed as companion units for the Citadel Amplifier are shown on adjoining page.

Model S-8 "ctassic" 3-Way Deiuxe
Console speaker system

The CLASSIC enclosure is available sepa rate'y as Model EN.C in Mahogany or Blond.
Model S-8 "CLASSIC" 3-Way Deluxe Console Speaker System $\$ 395.00$ net

Mode, EN.C
Enclosure Only
$\$ 231.50$ net

Consisting of the incomparable C15W 15 , woofer, Cobreflex-2 with T-30 driver for rich, full-bodied middles, the new HF-206 Super Tweeter and the $\mathrm{N}-3$ network complete with "Brilliance" and "Presence" controls, the CLASSIC incorporates some of the finest University engineering achievements. The enclosure is the versatile, newly designed folded front-loaded horn which operates the C15W wooter as a compression driver for maximum efficiency. Due to this design, the acoustic performance of the CLASSIC is independent of the walls and floor of the room, and may be used either as a "lowboy": console or "highboy". Base is adjustable for this purpose.
Dimensions: $341 / 2 \times 401 / 2 \times 243 / 4$ " Available in Mahogany or Blond at no extra cost. Impedance 8 ohms, Power Capacity 50 watts

## Model S-7"DEAN" Cornerless-Corner Deluxe

The DEAN enclosure is available separately as Model EN.D in Mahogany or Blond.
Model S-7 "DEAN" Cornerless-Corner Deluxe 3-Way stem $\$ 395.00$ net
Model EN-D
Enclosure Only
$\$ 231.50$ net

3-Way Speaker System

For use with equal efficiency in a corner or against a wall. Amazing results are derived from the C15W 15" woofer, Cobreflex-2 with T-30 driver for the mid-range and the HF-206 for the highs. The N-3 network is used to cross over at 350 and 5000 cycles. The enclosure is a newly designed compression type, folded, front-loaded horn, so completely independent of the walls and floor of a room that it is truly the one and only "cornerless corner" cabinet. By unique internal design, wasted space has been ellminated so that the overall dimensions of this sensational system are only $361^{\prime \prime}$ high, $36^{\prime \prime}$ wide, $22^{\prime \prime}$ deep. Avallable in Mahogany or Blond at no extra cost. Impedance 8 ohms, Power Capacity 50 watts.

Madel EN-15 Enclosure
The EN-15 is a highly efficient enclosure capable of unusual power handling capacity and excellent transient response. It is designed for use with $12^{\prime \prime}$ or $15^{\prime \prime}$ single or multi - speaker

## Model EN. 15

 systems, having provision for mountıng tweeter, mid-range and woofer speakers. Adaptor boards (supplied) provide extreme flexibility. The EN-15 may be used in a corner or against a wall. Avarlable in Mahogany or Blond, Dimensions: $37^{\prime \prime} \times 28^{\prime \prime} \times 19^{1 \%}, \quad \$ 150.00$ netThe Bozak Loudspeakers and Speaker Sys－ tems are recognized as being the most suitable of any available today for use in wide－range，low－distortion music systems． The line includes only three basic units－ Treble，Mid－Range and Bass－all of which are of equal quality and compatible de－ sign．Each is designed solely for optimum performance in its range，and for use in multiples with other Bozak Speakers to form various two－way and three－way sys－ tems of power－handling capacities from 15 Watts up．Existing Bozak Speaker Sys－ tems may easily be expanded at any time by the addition of more Bozak units and without problems of balancing and level－ ing．Each Bozak Speaker System，properly mounted and powered，affers the finest transient respanse，lawest distartians，wid－ est usable frequency and dynamic ranges， that can be had at anywhere near its price． Experienced listeners agree that Bozaks are unrivalled for realism and listening ease． All Bozak Speakers，being of the direct－ rodiating type with gradual rolloff，are
completely compatible with each other No leveling controls or pads are required for use in multiples．The＂slow＂crossover rate of 6 db per octave is achieved through non－resonant networks that cannot cause the＂ringing＂（transient distortion）com． monly associated with sharp－cutoff networks． Mounting should be in on infinite baffe （large wall），or a true horn，or in a rugged， acoustically－lined，completely－enclosed box． Under no circumstances should a＂tuned＂ or resonant chamber be used for Bozak Speakers，becouse this type of enclosure destroys the perfect transient response in－ herent in the drivers，and introduces spur－ ious peaks that distort the smoath，rabust， true－pitch bass．
Associated Equipment must be af uni－ formly high quality throughout，because even a Bozak Speaker cannot compensate for deficiencies in the signal fed to it．Turn－
range of the bozaks extends well down into the 30 －cyc．e region．tine amplifier must have low disicr on uicer speaker load，as well as in sleau，．．．．．－esis，and should have a powe $a$ ar sast 20 Watts for a B－207A Cua；．．a and pro，sortionately higher for the ：arger iy－，em．
Efficiency is not a measure of quality，but ＂high efficiency is an indication of unbal－ anced response（specifically，too－heavy a mid－range）．Because of the uniformity and realism of their response throughout the entire audible range，Bozak Speaker Sys－ tems will not sound as toud as other sys． ems of similar size with equal inpuls of power．Therefare，in A－B Tests the amplifier gain should be adjusted sa that all speak－ ers sound equally loud；this will put＂effi－ ciency＂and quality in their proper relationship，and emphasize the realism and freedom from listening fatigue that distinguish the Bazaks．

# ATLAS 'DR' WEATHERPROOF DOUBLE-REENTRANT PROJECTORS 

## Non-Resonant * Uniform Response - Sturdy - Stormproof Compact - Demountable

The modified exponential taper developed in Allas projectors has proved most efficient for werall performance. Ali accustical paths are clean and uniform. Reilex turns are smooth ana flowing. These important features eliminaie turbulence, frequency cancellenon and iesultant signal distortion. Ruggedly constructed of leavy casting:, precisior slampings, accurate die castings and uniform metal sp nnings. All metal-to-metal surfaces insulated with non-
vibratory material. Bell nm dampened and mechanically protected with formed rubber rim. All metals sperally processed by chemical and electro-chemical rubber rim. All metals sperially processed by chemical and electro-chenica.
means to impart complete weathe:-protection. Heavy " $U$ " braciset mountings, means to impart complete weathe:-protection. Heavy "U" bracket mountings,
securely fastened to man pedy casing of each model, do not fail even under extreme stress, strcin or vibration. $1=8, 夕^{\prime \prime}-13$ thread. For greatest efficiency and low frequency response, the larger Eze horns are recommended. The smaller
horns are excellent where space and zost limitations pertain.

These speakers irclude the newly developed, unbreakable, hermetically sealed driver units using the Alnico V-Plus magnetic circuit. As reproduzers, and as microphones in talk-back circuits, they provide $a$ maximum of eff:ciency. The new ball swivel mounting brackel oermits quick and simple directional adju:t ment in every position, horizontal and vertical. All-aluminum construction, fanish in high lustre gray enamel over electro chemically treatel surfaces.

NEW WEATHERPROOF LINE MATCHING TRANSFORMER

Specifically designed for high efficiency and ease of installation, these new trans formers enable the mutching of the popu lar Atlas "TP" and "HU" paging and talk-back speakers to either constant voltage (70-volt line) or constant imped ance systems. The transformer taps elimi nate the need for complex computations. Protective housings are heavy steel. Double rubber grommsts and gaskets protect cable connecticus entering the hous ing. Convenient transformer bracket is easily integrated with speaker mounting bracket-no extra fastenings needed. Ere quency response assrares efficiency over entire range required, with a minimum insertion loss. Powe-handling capacity
of both models is $1:$ watts. Finish is in of both models is watts. Finish is in Model T-Il-Primary: 500, 1000, 1500, 2000 ohme Secondary: 4 and Model T-12-כrimary: 45 ohms. Secondary: 4 amel Ehist Price $\$ 8.50$ List Price $\$ 8.00$

## TWO UNIT TO ONE PROJECTOR

When it is necessary to obtain the greatest fcossible power output from a single projector, the H-2U is recommended. It permits the use of 2 driver units with any type of projector. Cast aluminum construction. Threads 13/8"-18.

List $\$ 11.00$

## FUIL-RANGE REPRODUCERS - DRIVERS

TRIAXIAL SPEAKERS
Exclusive features include concentric mounting of all elements for smooth room coverage; augmented bass response in conjunction with extended "silly" HF reproduction; tailored mid-ranse provides realism and "presence" at usual sound levels.

Adjustable AT37 brilliance control matches room acoustics. Includes crossover network. Edgewise wound voice coil design affords $18 \%$ more portion; heavy magnet structures.

Model 12TRXB. Integrated 3-way assembly completely wired with brilliance controt. Overall diameter $12 \frac{1}{}{ }^{\prime \prime}$. Resonance 45 cps . 20 watts. Magnet weight I bb . 2 oz. Response $35-15.000$ cps in recommended ARISTOCRAT enclosure. Mechanical crossover 2010 cps; builtin electrical crossover 3500 cps. Depth be 13 lbs. List price ( $\times 36$ not required) . . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 99.50$

Model 12TRX. Overall diarieter $121 /{ }^{\prime \prime}$. Resonance 40 cps .25 watts. Magnet weight 31/2 lbs Response $30-15,000 \mathrm{cps}$ in recommended Aristocrat enclosure. Mechanical cressover 2500 cps ; electrical crossover 3500 cps . Depth behind mounting panel $8^{\prime \prime}$. Impedance 16 ohms. Sens. rig. 49 db . Shpg. wt. 32 lbs .

Model 15 TRXB. Integrated 3 -way assembly completely wired with brilliance control. Overall diameter $151^{\prime \prime}$. Resonance 38 cps. 20 watts. Magnet weight I lb. 2 oz. Response $30-15,000 \mathrm{cps}$ in recommended Regency enclosure. Mechanical crossover 2000 cps. Ale trical crossover 3500 cps . Depth behind mounting panel $75 / x^{\prime \prime}$. Impedance 16 ohrns. Sens. reg. 47 db . Ships. wt. 15 lbs .

## RADIX COAXIAL SPEAKERS

Discovery of the E.V RADAX Principle provides an economical and super efficient method of ut lizing two disparate coaxially mount while both operate from scrum while both operate from only single voice coil.
Built-in mechanical crossover from the low-frequency cone to the hist frequency propagator permits design of each cone for optimum response: This provides a true coaxial two-way speaker system that assures clean sparkling wide-range reproduction Frames are extra sturdy. Bot speaker cones are moisture inhibit:
Model SP8B Radax Super-Eight. 8 -inch coaxial speaker. Resonance fo cps. 15 -20 watts. Response $35 \cdot 13,000 \mathrm{cps}$. 16 ohms impedance. Sens, 1 th opening. $43 / 4$ " depth behind mtg. panel. Shpt. wit. 8 lbs. List Price $\$ 47.50$ Model SP12B Radix Twelve. 12 -inch coaxial speaker. Resonance 45 cps. $15-20$ watts. Response $30 \cdot 13,000 \mathrm{cps} .16$ ohms impedance. Sens. ry. th db . Crossover, 4500 cps . I lb. Alnico V magnet. $121 / 4^{\prime \prime}$ diam., $11^{\prime \prime \prime}$ hatil. opening. $\mathbf{F}^{3 / 40}$ depth behind mtg. panel. Shpg.wt. 11 lbs. List Price $\$ 49.50$ Model SP 12 Radax Super-Twelve. 12 -inch coaxial speaker. Resonance 40 cps . 25 watts. Response $30.13 .000 \mathrm{cps}, 16$ ohms impedance. Sens, rt opening, $71 / 2^{\prime \prime}$ depth behind mtg. panel. Shpt. wt. 25 lbs. List Price $\$ 95.00$ Model SPI5B. 15 -inch coaxial speaker. Resonance 38 cps. $15-20$ watts. Response $30-13,000$ cps. 16 ohms impedance. Sens. rig. 47 db . Crossover,
 Model SPI5 Radax Super-Fiffeen. 15 -inch coaxial speaker. Resonate 40 cps . 30 watts. Response 30.13 .000 cps . 16 ohms impedance. Sens. rte, 30 db . Crossover, 3000 cps . $51 / 4 \mathrm{lb}$. Alnico V magnet. $151 / \mathrm{g}^{\prime \prime}$ diann., 131 " baffle opening. $9^{\prime \prime}$ depth behind mtg. panel. Shag, wit. 41 lbs.
List Price.
$\$ 130.00$
COAXIAL MID-RANGE DRIVER

848 HF

Model $8 \mathbf{8 4 8 1 F}$. Coaxial compression type mid-bass and treble assembly 25 watts from $300 \cdot 10,000$ cps. Acous tical crossover 1000 cps . $1 / 2 \mathrm{jb}$. mag. net in close tolerance gap of high flux density; impedance 16 ohms Sens. rig. $51^{\prime} \mathrm{db}$. Size $201 / 2^{\prime \prime} \mathrm{w}, 10^{1}$, h., $20^{\prime \prime}$ depth overall. With mount in hardware. Shpg. wt. 15 lbs. Lis! Price ................ $\$ 80.00$

## HIGH FREQUENCY DRIVERS

Model T10A. HF driver. 20 watts. Response $400 \cdot 1$. .lull ens, db . $1 / 2 \mathrm{lb}$. Alnico $V$ magnet $33 / 4^{\prime \prime}$ diam. $31 / 4^{\prime \prime}$ dep. That diam. $7 / 8^{\prime \prime}$. Shag. wt. F Ihs. 87.50
Model T25A. HF driver. $20-30$ watts. Response $400 \cdot 13,000 \mathrm{cps}$. Impedak 16 ohms. Sens. rtg. 53 db . I Ib. Alnico V magnet. $38 / 4^{\prime \prime}$ diam., 4 Kin deep. Threat
diam. $7 / \mathrm{B}^{\prime \prime}$. Shag. wt. 8 lbs . List Price .................................... $\$ 95.00$

## SUPER SONAX VHF DRIVERS

At least one more octave of silk V highs is afforded by super-sothax VHF drivers. Response 3500 cps to be version audible range. Wis.

Model T35B. For systems with speakers using smaller magnet size. Sens. reg. 53 db . X 3 o crossover required. Horn $41 / 2^{\prime \prime} 1,11 /{ }^{\prime \prime}$ w; pot size $13 / 4$ " diam..
List Price.
$\$ 35.00$
Model T35. For high efficiency systems. Higher sensitivity rating 56 dh.

Model 117 Package. Driver components only, as used in Centurion. Inclucies complete instructions for constructing exclusive Electro-Voice "W" single-path bass section. Consists of 15 BWK LF driver, 847 HF coaxial mid-range assemb; $y$ T35B VHF driver, X 336 crossover network, two AT37 level controls , cable
harness. AVAILABLE SOON.

Basic "W"' LF Driver Horn only as used in Centurion. For 15EWK driver unit; painted fiat matte black. Size approximately $34^{\prime \prime} \mathrm{h}, 27^{\prime \prime} \mathrm{w}, 20^{\prime \prime} \mathrm{d}$.
AVAILABLE SOON.

Model 105 Pockage. Driver components only, as used in Georgian. Includes complete instructions for constructing "K" bass section anc suter furniture housing for Georgian. Consists of 15 WK LF driver, 848 HF coaxial mid-range assembly. T35 VHF driver. X336 crossover network, two AT37 level controls cable harness. Shpg. wt. 97 lb . List Price. . . . . . . . . . . . . . . . . . . . . . . . $\$ 342.00$

Model 106. Klipsch "K" bass horn only as used in Georgian. For I5WK LF driver; painted flat matte black. Size $38 \frac{1}{2 \prime \prime} \mathrm{~h}, 321 / /^{\prime \prime} \mathrm{w}, 22 \frac{3}{4 / 4} \mathrm{~d}$. Shpg. wt. 97 lb

Model 103C Package. Driver components only, as used in P.strician. Includes complete instructions for constructing "K' bass section. Consists of 18 WK VLF driver, two 828 HF drivers with two A8419 LF horn sections, T25A HF driver with 6HD horn, T35 VHF driver, X2635 crossover network, three AT37 level controls, cable harness. Shpg. wt. 106 lb.

Model 115. Klipsch "K" basic VLF driver horn only, as used n Patrician. For 18WK VLF driver; includes mid-bass horn bell for LF iora sectoons. Painted flat matte black. Size $573 / 4^{\prime \prime}$ h. $371 / 2^{\prime \prime}$ w, 271/4" d. Shpg. wt. 150 lb .

## CROSSOVERS

All EV crossovers use high- $Q$ air core coils. Low insertion loss, phase rotation $270^{\circ}$ $\left(135^{\circ}\right.$ in X825) attenuation 12 db per octave in $1 / 2$ section, 6 db per octave in $1 / 4$ sectioh crossovers.

Model Xa25 Crossover as used in EV 108 system. $1 / 4$ section. Crossever pointe 800 cps . Impedances 16 ohms in and out. Size $5^{\prime \prime} \times 7^{\prime \prime} \times 2^{\prime \prime}$. Shps. wt. 3 lb .

Model X8 Crossover. $1 / 2$ section. Cressover point, 800 cps . Impedances 16 ohms in and out. Size $4 \frac{5}{8^{\prime \prime}} \times 8 \frac{1}{4^{\prime \prime}} \times 5 \frac{1}{2} 2^{\prime \prime}$. Shpg. wt. 5 lb . List Price . . . $\$ 50.00$

Mode! X6 Crossover. $1 / 2$ section. Crossover point, 600 cps . Impedances 16 ohms in and out. Non-metallic container measures $4111_{6}{ }^{\prime \prime} \times 91^{\prime \prime} \times 6^{\prime \prime}$. Shps. wt. 7 lb . Model X336 Crossover desisned for GEORGIAN systems. Crossover points at 300 and 3500 cps . 1 mpedances 16 ohms in and out; non-metallic container Size $4411_{10} \times 914^{\prime \prime} \times 6^{\prime \prime}$. Shpg. wt. 9 lb . List Price...................... . $\$ 65.00$
Model $X 2635$ 4-Way Crossover. $1 / 4$ and $1 / 2$ sections. Crossover points. 200, 600, and 3500 cps . lmpedances 16 ohms in and out. Non-metallic container; size
$43 / 4=10^{\prime \prime} \times 8^{\prime \prime}$. Shpg. wt. 11 lb . List Price............................ $\$ \mathbf{1 2 0 . 0 0}$

Model X36 Crossover. Recommended for use with T35 and T35B. $1 / 2$ section. Cressover peint. 3500 cps . Impedances 16 ohms in and out. Metal case. Size
 List Price...........................

## DIFFRACTION HORNS

Model 8HD Diffraction Horn. New principle provides perfect dispersion of hish frequencies through a $120^{\circ}$ solid angle. Actual cutoff 600 cps , crossover 800 cps , eliminating cutoff disturbances. Made of fiberglass. For T10A and T25A drivers. $33 / 8^{\prime \prime} \mathrm{h}, 141 / 4^{\prime \prime} \mathrm{w}, 71 / 2^{\prime \prime} \mathrm{d}$. Mounting hardware included. Shpg. wt. 4 lb. List Price.
. . . $\$ 27.00$
Model 6HD Diffraction Horn. For systems utilizing 600 cps crossover. Horn designed with actual 400 cps cutoff; prevents response disturbances associated with operation too near actual cutoff point. Diffraction principle effects $120^{\circ}$ dispersion. $31 / 2^{n} \mathrm{~h}, 1984^{\prime \prime} \mathrm{w}, 12^{\prime \prime}$ d. For T10A and T25A drivers. Mounting
hardware included. Shpg. wt. 6 lb . List Price............................... $\$ 35.00$
$\$ 35.00$

## NEW CONCEPTS IN HIGH-FIDELITY LOUDSPEAKER ENCLOSURES AND SYSTEMS

The Centurion. Complete 4 -way system incorporating all design features of the magnificient Electro-Voice Georgian, but on a smaller scale. Uses exclusive E-V "W" single path indirect radiator folded horn with 15 BWK LF driver from $30-300 \mathrm{cps}$. X 336 crossover feeds 847 HF coaxial mid-bass and treble assembly with acoustical crossover at 1500 cps . $3500 \cdot \mathrm{cps}$ section of X 336 feeds T35B VHF driver to beyond audibility. Two AT37 level controls for presence and brilliance. Sensitivity rating 48. Power handling, 15 watts programı material, 30 watts peak. Size $40^{\prime \prime}$ h. $30^{\prime \prime} \mathrm{w}, 22^{\prime} \mathrm{a}^{\prime \prime}$ d. AVAILABLE SOON.

The Georgion. A complete t-way system of exceptional cleanliness in handsomely styled cabinet of medium proportions. Uses Klipsch "K" indirect radiator folded corner horn with I5WK LF driver from $30-300 \mathrm{cps}$. X336 crossover feeds 848HF coaxial middbass and treble assembly with acoustic crossover at 1000 cps. 3500 -cps section of X 336 feeds T35 VHF driver to beyond audible range. Two AT37 level controls adjust presence and brilliance to balance room acoustics. Sens. rts. 51 db . Power handling: 35 watts program material, 70 watts peaks. Size $53^{\prime \prime}$ h. $34^{\prime \prime}$ w. $26^{\prime \prime}$ d. Shpg. w. 290 lbs .

Model AK3 Georgion Accessory Kit. Consists of Ceorgian srille and two decorative handles.
$\qquad$

The Potricion IV. Complete 4 -way speaker system in custom-crafted corner cabinet for very finest in reproduction. Divides audio spectrum between four drivers, each specifically designed for distortion-free fidelity. Includes EV 18 WK $18^{\prime \prime}$ LF driver; two E-V 828 HF drivers for mid bass, each with an A8419 LF phenolic horn section, T25A treble driver with 6HD horn, T35 super twevter, three AT37 level controls, X2635 4-way crossover. Crossover frequencies 200. 600 and 3500 cps . Entire system wired and installed in elegant cabinet of selected woods and beautiful inlays. Heirloom finish in exquisite hand-rubbed mahogany or Korina. Size $62^{\prime \prime} \mathrm{h}, 39^{\prime \prime}$ w, $29^{\prime \prime} \mathrm{d}$. Shpg. wt. 390 lb .

MATCHED ACCESSORIES

## Public Address Loudspeaker System for perfect

## VOICE PENETRATION AND FULL RANGE MUSICASTING

The COMPOUND DIFFRACTION PROJECTOR* provides a loudspeaker system so advanced in concept-so efficient in performance that there is no basis for comparison with conventional P.A. reentrant horns. The "CDP" works in the same manner as an optical slit. When the slit width is of a shorter dimension than the wave length of the sound it passes, the sound energy is highly dispersed in the direction of this short dimension. Polar response of the "CDP" is phenomenal.
An increase in efficiency of three db over multi-cellular horns is achieved with better dispersion. There is no pinpointing effect since there are no cells to beam the sound path. Eliminafion of multiple throats at the driver mouth permits sreater hich-frequency efficiency as compared to multi-cellular horns. The direct path and optimum throat dimension of the "CDP" also has these advantages over the reentrant horn resulting in a greater transfer efficiency and smooth extended hishofrequency response.
The Model 848 "CDP" provides peak-free response $\pm 5 \mathrm{db}$ to $10,000 \mathrm{cps}$-delivers 21 octaves more musical range than usual P.A. units of even larger size. Speech arriculation index is substantially increased. Polar distribution pattern exceeds $120^{\circ}$. The Model 848 utilizes two coaxially mounted horns working from opposite sides of a single diaphragm. Each horn is designed for taper. which insures at least one-half octave added bass over that possible from larger contaper. Whith insures
ventional P.A. horns.
The "CDP" bell and diaphragm are fabricated of molded fiberglass. Other parts are die-cast zine and steel treated against corrosion. Edgewise-wound copper ribbon voice coil puts $30 \%$ more conductor in the gap, raising the efficiency $200 \%$. In EV tests the "CDP" driver has been subjected to months of continuous cperation under 30 watts of power at 60 cycles $A C$ without failure for any reason wharsoever. Should it become necessary, the diaphragm is easily replaced in a moment. Silver contacts eliminate the need for soldering operations.
The "CDP." with its hisher sensitivity and power handling on a basis of distributed signal, provides superior coverage of the listening area with fewer unuts and at far lower cost. The CDP", unit is weather-proof, snlash and blast proof, and virtually indestructible. It represents something so entirely new in public address efficiency and fidelity that it is indecd hard to believe such reproduction is possible.

## MODEL 848 COMPOUND DIFFRACTION PROJECTOR

Conservatively rated at 25 watts. Nominal impedance is 16 ohms. The attractive neutral sray color is molded right into the bell material, which is impervious to acids. alkalies and most solvents. Hans up bracket has two mountins positions. Prosector may be installed horizontally, or vertically for ausmented dispersion. Dimensions at mouth: $10^{\prime}$, $2^{\prime \prime}$ wide, $20^{\prime}$. $2^{\prime \prime}$ high. Overall
depth $20^{\prime \prime}$. Shipping weight 17 Ibs , List Price. . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 69.50$

## ACCESSORIES

Model 87625 Waff Line Matching Transformer. In protective case for mount ng on rear of Model 848 System. Primary aps for 2000 ohms. Transformer bypasses frequencies below Model 848 Horn cutoff. Casc extends $31.2^{\prime \prime}$ behind Projector when mounted. 51, maximum diameter. Shipping weisht 3 lb . ## HIGHEST QUALITY ALUMINUM VOICE COIL CONSTRUCTION

# Clution the Choice for Vocice 

## HI-Fidelity speakers

Model PMI2NR

$15^{\prime \prime}$ COAXIAL 50 to 18,500 Cycles
In kempine with the ewor inersasing standards for highest puality sombl reprodnetion,
 conil forms for lons, trouble-freq oneration. In addition to himh jowor capacity, this suraker has a hailt-in remssover netwark and a high frequency rentrol to turn off the tweeter when desired
Power llamdlimg daparity 25 to 35 watts. Voic* (wil Impordance: 8 ohms. Frequancy

 lunhind Mountius l'ankl. Model PM15NCR: List Price: $\$ 69.95$
AL5O 15" WOOFER 30 to 12,500 Cycles
This spather is speritioally designeal to deliver olear undishommb hass ranges with rioh ruat flualits.

 how hammertone bakel whamel finish. Model PM15NR: List Price: \$59.95

## 12" DYNAMIC 30 to 16,000 Cycles

Hore is the answer for a rich, fullobodied reproducer that will deliver the exceptiomal richness of the antire andios suretrum.
 30 to 16,000 eycles. Aluminnm Voice ('oil Form: ?". Alnico V Magnet: 1 ll ).

Model PM12NR: List Price: $\$ 44.50$

## $8^{\prime \prime}$ EXTENDED RANGE 50 to 16,500 Cycles

The (letron 8-inch extonded rampe sumaker will surprise you with its rathe and edarity. Hear this speaker perform and you will agree.
Power Handling C'apacity: 8 watts. Voice ('oil impedance: 3.2
 Aluminum Voice (onil Formı. Alnico ov Marnet. Mechanical cross-
 Model PM8FW ( 8 ohm )
Model PM8FW3 ( 3.2 ohm ) : List Price $\$ 19.95$

## 5" TWEETER 1200 to 18,500 Cycles

Model PMoFR, ideal for use with any standard 12 " speaker to add real "presence." Easy to install, brackets and complete instruetions furnished. Voice Coil Impedanee: $\delta$ ohms. Aluminum Voice Coil Form. Alnico I Marnet: 3.16 o\%. Mounting Holes Centers: $31 / /^{\prime \prime} \times{ }^{\frac{8}{8} 6^{\prime \prime}}$. Depth 3 behind Sountine Panel: $212^{\prime \prime}$.

Model PM5FR: List Price: $\$ 6.95$
AL5O Model PM5CR 1200 to 14,000 Cycles
Voice Coil Impedance: 3.2 ohms. Ahminum Voice Coil Form. Alnice V

HIGHEST QUALITY ALUMINUM VOICE COIL CONSTRUCTION

# Densen Hypex Projectors 

Because of the mypex ormula (Patent 2,338,262) giving wider sound distribution and greatly mproved acoustical perormanee, JENESEN Mypex profectors are superior ybe horns. The Alnico 5 unit is entirely enelosed within the one-picee ribid horn yet easily removed and replaced. Stainless resistant othaterials and resistant arcated anc
 parts insure against weather e:nosure. Modejs VH-24, VH-20 and VH-15 have mountirg brackets with clutch-ty.ine heavy .' With elutch-tyle heavy y trunmons when aliord ockine into dealred position. Weatherproof termtna! boxes providic casy, sulderiess connections with no exposed terininals. Model VH-91 has a universal inounting bracket which permits pointing in any direction and secure locking by a single wing nut.

## Jensen Hi-Fi Sound Reproducers

## THE GREATER TRi-PLEX 3-WAY SPEAKER SYSTEM

#### Abstract

Jensen's new greater TRi-PLEX ts offered to you with the conviction that in quality of reproduction, it will outperform any comparable speaker system. Bass response has been enhanced with the new Bass-Ultrafiex enelosure. The design objeetive has been the attalnment of the full high-fidelity frequency range with extreme smoothness, preelsely adjusted intra-range balance, and complete climination of all false coloration effeets. The result is a reproducer which in its outstanding listening qualitles will deltght the discriminating listener who seeks completely faithful music reproduction without harshness or exaggeration. Technically, the TP- 200 represents a high point in the development of the true 3 -way system. Three completely independent reproducers divide the frequeney range as indicated in the specifications, the combined total result being blended into a superb unity which cannot be approached with short-eut designs whieh simulate, but do not afford comfortable, livable listening quality. For example, both mld-fregueney and high-frequeney ehannels employ horn-loaded compression-driver units with plastle diaphragm moving systems in preelsion sound ehambers for utmost smoothnessthere are no metalle elements to introduce harsh or irritating effects. Individual controls are provided at the side of the eabinet for exact adjustment of response balance, presence and brightness to fit your surroundings and preelse taste. New cabinet styling is a natural blend of slmplielty and elegance which will merge gracefully with traditional or modern decor. Woods are offered in a chofce of tine selected Mahogany or satin Blonde Korina veneers with genuine solid matching ardrood trim, all finely crafted in the best furniture-matigg inditions Each TRi-PLEX is individually tested and is aecompanied by a certificate and guarantec of performance meeting the high engineering standards established for the design.

## densen Hi-Fi Sound Reproducers

# Imperial 

## The Ultimate in High Fidelity

In the search for pure high fidelity, completely authentic, with smooth coverage of the complete frequency range from lowest bass to upper limits of audibility, Jensen designed the RS-100 Laboratory Reference Standard Reproducer (see below) for use as a standard of comparison in high fidelity. For those who pursue the ultimate, the very same reproducer is offered here as the Imperial PR-100 in eabinetry that bespeaks a place of honor in the distinguished home. There's a totally new, smooth sound, utterly real-undoubtedly the finest sound you've ever heard. Voices come to life and there's a new almost geometrical separation of instruments. A three-way system (we'd have used six channels if necessary, but three were far and away the best), with l-f unit loaded by a new-design reactance-annuling trilateralmouth horn for hass; selected compression-driver horn-loaded midehannel with intrarange equalizer for a final touch to precise balance and coloration elimination; and superlatively smooth, space-blended supertweeter top. Expensive to be sure . . . but priceless in performance. Place it on a sidewall or in a corner as you choose. Individually serially numbered, laboratory tested with signed certificate and guarantee of performance, accompanied by handsome descriptive presentation brochure. Impedance 16 ohms , power rating 35 watts. $5314^{\prime \prime} 11 . ; 3258^{\prime \prime}$ W.; $243 / 8^{\prime \prime}$ D. Shipping Weight 222 lbs.

## Laboratory Standard RS-100

## Designed Especially for Ultra-Critical Applications

Iutended especially for ultra-critical applieations. Designed by the Junsen engineering staff as a reference standard for comparison of high fidelity reproduction, the RSS-100 is a new and inportant tool for sound engineers and psrcho-acoustic laboratory specialists. It also will find extremcly wide application in broadcast and TV station monitoring, recording studios and other installations requiring exacting sound reproduction. Music lovers and audiophiles, too, will find ready usage for the RS-100 in experimental or permanent home tuner-amplifierrecord player and tape-resorder set-ups. It embodies the same electrical and acoustical characteristics as the PR-100.
The cabinet is made of plywood-modern-artistically styled and finished in two-tone, blue gray. Each RS-100 is individually, laboratory tested and aceompanied by a signed certificate and guarantee of performance, and a descriptive brochure. $523 / 8^{\prime \prime} \mathrm{H}$. x $327 / 8^{\prime \prime} \mathrm{W}$. x $24^{11 / 16^{\prime \prime}}$ D. ## ADJUSTABLE MOUNTING BRACKET

The adjustable mounting bracket can be used with any of the universal type enclosures. This makes possible an adjustable feature by which the speaker housing can be adjusted in any angle in a horizontal plane. There is a hole in the bracket which will pass a half inch conduit, permitting the speaker housing to be suspended from the ceiling.

| Catalog Number | Description | Actual Wt. lhs. | Dealer Cost |
| :---: | :---: | :---: | :---: |
| AB-2250 | Adjustable tracket for CS-2240 | 3/4 | \$1.14 |
| AB-2251 | Adjustable hracket for CS-2241 | 1 | 1.14 |
| AB-2252 | Adjustable bracket for CS-2242 | $11 / 4$ | 1.41 |
| A H-2253 | Adjustable bracket for CS-2243 | $23 / 4$ | 1.65 |
| CP-2255 | Outlet Hax Cover Plate. $41 / 4{ }^{\prime \prime} \times 21 / 4$ " | 1/2 | . 75 |

## OUTLET BOX COVER PLATE

This unit is a cover plate for electrical outlet box enabling the adjustable bracket to be mounted directly to the outlet box. When used in conjunction with the adjustable bracket, movement in all horizontal and vertical directions is possible.

## REAR SEAT SPEAKER ASSEMBLY

This unit is available in two types, as shown in the table below. The rear seat speaker grill assembly consists of the rear seat speaker grill, together with mounting screws, switch, bracket for holding switch and sufficient wire for installation. The switch permits selection of either speaker or use of both speakers simultaneously.
The rear seat speaker grill is a finely louvered unit made from heavy gauge steel, which assures you of having a grill that will "take a beating." The finish is a beautiful silver grey hammertone, which is a fine enough finish to lee attractive and yet dull enough to assure you that no glaring sun reflection will be picked up by a rear vision mirror and be a potential blinding flash to the driver.

| Catalog Number | Plate Size | Actual wt. lbs. | Dlr. <br> Cost |

| CS-2261 | 1 Consistine of Cs-2260 nlus switch. lracket and wire) | $11 / 4$ | 3.00 |

## WALL TYPE SPEAKEIR CASES

This is a distinctive line of
 speaker cabinets, for wall or table use. Since these units are made of steel, all troubles with wood warping and splitting are eliminated. Keyway holes are provided for wall mounting and four embossed feet on the bottom are provided to prevent damaging table surfaces. Finished in brown wrinkle enamel only.

## SILVER SONANCE LINE

The Silver Sonance Line is divided into three parts. The first is the Universal Speaker Enclosure. There are many advantages of the Universal type of speaker housing that makes it the most outstanding unit of its type. It can be used in hospitals, schools, factories, auditoriums, stores, airports, railroad stations, stadiums and any other place where a speaker is used.

A prominent feature of this housing is the adjustability that is achieved by mounting our speaker case with an accessory known as the Bud Adjustable Mounting Bracket. Full information on this bracket is given on page C-46. When the adjustable feature is not desired, the speaker housing may be attached directly to the wall. There are two holes in the sides of the speaker housing enabling installation in this manner. The holes in the cabinet are so spaced that the housing may be mounted either to an outlet box or screwed directly to the wall.

The new BUD UNIVERSAL speaker enclosures have a bi-lateral feature which permits sound to come from both the front and the back of the speaker housing. This is an ideal feature when speakers are used for paging purposes, or when speakers are used in corridors, hallways, or other places where the intention is to have the sound travel in two directions.

There is no danger of cracking, warping, splitting, or any of the other disadvantages found when a wood speaker baffle is used. Since our speaker enclosure is made of heavy gauge steel, none of these disadvantages are present. Changes in temperature and weather conditions have absolutely no effect on this speaker case. The finish is a beautiful silver grey hammertone. The hammertone finish assures ease of cleaning, as the housing may be cleaned by wiping with a damp cloth.

A special sound-deadening compound is used to eliminate the metallic resonant sound that is present in other metal speaker cases. All screws and nuts are furnished for mounting the speaker in the enclosure. There are no holes to drill and no time will be wasted in the installation.

## LOWELL STL SERIES

## New Low Ceiling Type Baffles

| Model No. | Speaker Size | Will Mount to |
| :--- | :---: | :--- |
| STL-6 | $6^{\circ}$ | STP6. XSTPS, STPR6 |
| STL-7 | $7{ }^{\circ}$ | STP8, XSTP8, STPR8 |
| STL.8 | $8^{\circ}$ | STP8, XSTP8, STPR8 |
| STL.10 | $10^{\circ}$ | STP10, XSTP10, STPR10 |
| STL-12 | $12^{\prime \prime}$ | STP12. XSTP12, STPR12 |

These new, unusual additions to the Lowell line of speaker baffles are top quality heavy 18 gauge spun aluminum in a buffed satin finish. Designing assures controlled $360^{\circ}$ dispersion of undistorted sound. Echo and feedback are at the minimum. Louvres and conical diffuser "float" on very small soft rubber
grommets. Baffles are coated with clear lacquer which also serves as prime coat for on-the-job painting. Wide choice of colored lacquer finishes available on request.

Shipped complete with hardware and instructions for mounting to Lowell Protective Speaker Enclosures illustrated.

From architecture to acoustics, Lowell STL series meets every requirement - in ultra-modern design . . . for even, undistorted low-level sound distribution throughout $360^{\circ}$. Recommended baffle placement is usually $25^{\prime}$ from center to axis. Where straight line placement is impossible, triangulating the baffles in the ceiling is highly effective.

GENERAL INFORMATION: Designed for surface mounting comstructed of heavy gauge aluminum. Accuratels engineered for normal ceiling sound reinforcement. Perfect speaker cone loading holds feed-hack to minimum. Exclusive "Floating Conical Action" assures controlled $360^{\circ}$ sound coverage. High frequency diffuser supported to housing hy four $1 / 4$ " aluminum studs and threaded on one end mounted to housing. Press fit to diffuser through soft rubber grommets prevents metallic resonance. Recommended placement of baffics under normal ceiling heights is $25^{\circ}$ off center of axis in straight line placement. All models finished in brushed satin and coated with colorless lacquer. Acts as excelleat base coat or primer for on-the-joh paincing. All models available in colored lacquers at slighty higher price. Complete information on request.

## TYPE RS recessed wall type directional speaker baffles

TYPE RS RECESSED WALL TYPE DIRECTIONAL SPEAKER BAFFLES:
Excellem speaker erim for modert installations. Fipecially recommended for Dress Shops. Department Stores. Night Clabs. Provides concealment of spaker. Easily installed.

DESCRIPTION: 18 gauge spus aluminum. $1 / 2^{\prime \prime}$ mounting flange. Mounts to I.ow'tl Model CP or XCP enclosures or to wall with 4 togele bols. Furnished with plastic grille cloth. Grille cloth and speaker mount on trin ring with 4 round hand screws. Standard finish-sarin aluminum.

## UNI-DIRECTIONAL RIBBON MICROPHONE

Model "333"
Concert-Line

Here is the Concert-Line " 333 ," a truly fine and rugged microphone created for discriminating users with the most exacting professional requirements. Here, indeed, is a major advance in microphone development and design! This small, ultra-cardioid " 333 " is highly recommended for motion-picture studios, TV studios, radio stations, professionol recording, and all other uses where quality requirements are of the highest. Here is performance never before achieved in such a small and slender microphone! Here is ruggedness and reliability! Here is motchless beauty and striking design to appeal to users who demond the finest! The " 333 " is ultra-cardioid, uni-directional--reduces the pickup of random noise energy by $73 \%$--prevents the pickup of maving props, scuffling feet and moving "dollies," so common when conventional broadcast microphones are used. Following are the features that make the " 333 " Concert-Line so outstanding in perfarmance, sa dependable in operation: (1) patented, world-famous "Uniphase" system; (2) a true ultro-cardioid pickup pattern; (3) horn-loaded
 "lifetime" swivel; (8) high output; (9) sturdy, one-piece metal case; (10) vibration-isolation unit mounted in live rubber; (11) Cannon XL connector. All these important features, plus the striking design af the Cancert-Line "333," make it ideal for criticol studio applications that call for the highest possible broadcast quality, small size and matchless beauty--plus the obility to withstand the rough work. a-day handling by the sound crew. The " 333 " has two-tone "Baked Bronze" non-reflecting finish. Head dimensions: Width, 1 1/8"; height, $39 / 16^{\prime \prime}$; depth, $13 / 4^{\prime \prime}$.

| IMPEDANCE TABLE | OUTPUT LEVEL |
| :---: | :---: |
| 50 ohms | 60.0̃ db below I Milliwatt per 10 microbar signal |

## OMNI-DIRECTIONAL DYNAMIC MICROPHONE

Model "525" Concert-Line

The new Concert-Line " 525 " is an exceptionally fine probe microphone of broadcast quality. It features: (1) frequency response $40-15,000$ c.p.s., praduction uniformity guaranteed to plus or minus $21 / 2 \mathrm{db}$; (2) a moving-coil mounted in a highly efficient magnetic structure; "Alnico V" magnet; (3) multiimpedance switch; (4) high output; (5) long life "Duracaustic" diaphragm--specially designed to withstand moisture, heat, cald and physical shock. The " 525 " is furnished with a 20 ft ., two-canductar, rubber-covered, shielded cable with Cannon XL-3-11 connector attoched; swivel adapter; adjustable lavolier assembly (cord and clip), and a belt clip assembly. The " 525 " Concert-Line has a non-reflecting "Baked Bronze" finish--which makes it blend into the backgraund, giving the spatlight to the performer. Body diameter, $1^{\prime \prime}$; length, 8 17/32".

## BI-DIRECTIONAL GRADIENT MICROPHONE

Model "300"
Concert-Line

This rugged, high fidelity, multi-impedance microphone is widely used for television, radio broadcasting, prafessianal recording and high-fidelity uses. The " 300 " reduces reverberation ond the pickup of random naise by $66 \%$. The " 300 " combines the best features of canventional velocity microphones with advanced acaustic design-including an anti-"PFF," anti-blast filter screen. Its bi-directional polar pattern is effective aver a broad frequency range. It provides sound pickup at the front and rear of the microphone, but greatly reduces pickup at the sides. One of the outstanding features of the " 300 " is the fact that the microphane can be placed at a $73 \%$ greater distance from the perfarmer than is possible with amnidirectional microphanes! The " 300 " has a non-reflecting "Baked Bronze" finish, so it blends inta the backgraund, gives the spotlight to the performer. The " 300 " has a readily accessible Voice-Music switch, vibration-isolation unit mounted in live rubber, and a multi-impedance switch, providing low medium and high impedance. Response plus or minus $21 / 2 \mathrm{db}, 40-15,000 \mathrm{c} . \mathrm{p} . \mathrm{s}$. Dims: Ht., $6^{\prime \prime}$; Wth.,
$17 / 16^{\prime \prime}$; Depth., $13 / 32$.

# SHIUR GRADIENT' AND DYNAMIC MICROPHONES 

Madel "530" Slendyne

Model "315" Gradient

Model 5565
" 5 mall Broadcast" "Small

## OMNI-DIRECTIONAL DYNAMIC MICROPHONE

The Slendyne "530" is the most versatile of all public-address probe microphones because it can be held in the hand; used on a desk stand; placed on a floor stand; or hung around the neck to provide complete freedom of the performer's hands. The Slendyne features: (1) frequency response 60-15,000 c.p.s. (2) a moving coil mounted in a highly efficient magnetic structure, with "Alnico.V" magnet (3) dual-impedance switch for high or low impedance (4) high output (5) "Duracoustic" diaphragm-specially-designed to withstand moisture, heat, cold and physical shock. The "530" is furnished with an on-off switch plate assembly which requires no wiring; $s$ wivel adapter; lavalier and belt clip assembly, and a 20', 2-conductor, rubber-covered shielded cable with Cannon XL-3-11 connector attached. The Slendyne is a striking-looking microphone with a beautiful black and gold finish. It imparts glamour to any sound system with which it is used. Dimensions: body diameter, $l^{\prime \prime}$; length, 7 11/32"

## BI-DIRECTIONAL GRADIENT' MICROPHONES

This rugged, high-fidelity, multi-impedance microphone is recommended for highest-quality general purpose uses! The Gradient provides a bi-directional pickup pattern-permitting greater performer freedom (performers can stand at a $73 \%$ greater distance from the microphone!) The " $315^{\prime \prime}$ pieks up voice and music from front and back-is "dead" at the sides. Reduces reverberation and the pickup af distracting random noises by $66^{\prime}$; ! Has a Multi-Impedance switch. Response is 50 to 12,000 c.p.s. Permits the sound system to operate at a level almost $6 d b$ higher than is possible with omni-directional microphones! Finished in rich, soft chrome. The " 315 " is "PFF"-proof-can be used in outdoor drafts and moderate breexes! Dims: Hi., 6"; Wth., 1 7/16"; Dpth., 1 3/32".

## UNIDIRECTIONAL DYNAMIC MICROPHONES

The "Small Unidynes" are the largest selling microphones throughout the world. A sturdy construction provides immunity of the moving coil system to abnormal atmospheric conditions and severe mechanical shock. "Mode! " $555^{\prime \prime}$ is highly recommended for fine-quality public address; theater-stage sound systems; recording and remote broadcasting. Is widely used for fixed station use in the police, fire, and transportation services. Model "5565" is recommended for studio broadcasting, television use, and professional recording. Has Cannon XL connector and vibration-isolation unit. Both models reduce the pickup of random noise by $67 \%$; have smooth response from 40 to 15,000 c.p.s.; are supplied with a 20 - ft ., high quality cable and plug assembly. Both models have the world-famous, patented "Uniphase" system.

| IMPĖDANCE TABLE | OUTPUT LEVEL |

## MULTI-IMPEDANCE HIGH OUTPUT DYNAMIC

The "Sonodyne" is ideal for all general purposes, including public address, wire and tape recording, and similar applications. It is widely used by bands, instrumentalists, and professional recording artists because of its outstanding reproduction of both voice and music. Widespread usage by home users of tape recorders indicates that the "Sonodyne" is the ideal high-quality, moderately-priced replacement for the conventional microphone supplied with tape recorders. Has built-in receptacle and a 15-ft., two-conductor shielded cable with microphone plug attached. Satin chrome finish. Model " 51 "

List Price: \$47.50

## CRYSTAL MICROPHONES

## THE NEW "SLIM-X" ALL-PURPOSE MICROPHONE

## FOR:

- Low Cost P.A. Systems
- Home Recording
- Hams
- General Purpose

The now "777" Slim-X Mierophones are rugged little microphones weighing only 6 ouncesl They are designed for good-quality voice and music reproduction. Their versatility and "hand-ability" make them ideal for use by lecturers, announcers, instructors, and Hams; for audience participation shows; carnivals; panel and quiz shows; and use with homerecorders. When mounted on either cradle or swivel, the '777"' can be removed in o flash (no tools
necessary)-simply by lifting it out of the holder. This makes it an ideal "walk-oround" hand-held microphone.
TECHNICAL INFORMATION: Smooth frequency response- 50 to 10,000 c.p.s.; special-sealed crystal element-for long operating life; high impedance; 7' single-conductor cable, disconnect type. Dimen-

In the Hand sions: (Microphone only) Length, $4 \frac{1}{2 \prime \prime}$; Diameter, $1^{\prime \prime}$. Finish: Rich satin chrome overall.

## "SLIM-X" ASSEMBLIES

MODEL 777A includes 777 Microphone; A-25 Swivel Adaptor; S-38 Desk Stand; Lavalier Cord. Model: 777A List Price: \$29.00
MODEL 777SA includes 777S Microphone; A-25 Swivel Adaptor; S. 38 Desk Stand; Lavalier Cord.
Model: 777SA

## ACCESSORIES FOR "777"

MODEL S38 STAND is a heavy die-cast base. Includes metal screw machine stud for connecting microphone adaptor to stand base.
Model: S38
List Price: $\mathbf{\$ 3 . 3 0}$
MODEL A25 SWIVEL ADAPTOR features a long-life, high-quality swivel connector. Is lined with a long-life nylon sleeve-for noise-free and scratch-free insertion and removal of microphone.

## CONTROLLED RELUCTANCE MICROPHONES

## THE "HERCULES"

The Hercules is a hand-held unit, ideal for general purpose use in tropical countries and in all coastal areas where heat and humidity are a problem. The " 510 " provides the ruggedness, clear reproduction and high output for public address, communications and recording where high speech intelligibility is vital. It is recommended for Announcing; Mobile Public Address Systems; Communications; Home Recording, and High Quality Intercommunication. The Hercules can be used either Indoors or Outdoors, fits snugly in the hand, sits firmly on a desk. High impedance. Frequency responce 100 to 7000 c.p.s. Furnished with 5 ft . shielded cable. Green metallic finish. Diecast case. Furnished with stand adapter. Dimensions: 2 2/3" wide, 3 1/4" high, 1 1/2" thick.

## "I-INCH" MICROPHONES

The MC Series of small microphones are specially designed for use in vacuumtube devices, such as small, compact amplifiers, transmitters, dictating equip-ment-wherever size and weight are important factors. They also are highly recommended for use in small transistortype devises. The MC Series Microphones are furnished with an impedance of 1000 ohms. They are rugged units immune to mechanical shock and to varying conditions of heat and humidity. Both the $1^{\prime \prime}$ circular unit, Model MC11, and the rectangular unit, Model MC20, are metal-cased for hum protection. They are highly recommended to engineers, technicians and "build-it-yourself" enthusiasts, because their small size and shape make them ideal for various types of custom-made devices. Model MC11 (Circular) List Price $\$ 12.50$. Model MC20 (Rectangular) List Price $\$ 12.50$.

## THE "RANGER"

The new Shure "Ranger" is a new development of a similar magnetic unit originally housed in microphones used by the Armed Forces. The "Ranger" is especially recommended for those applications where long lines are used, and a rugged hand-held microphone is needed. It is ideal for outdoor public address (sports arenas, athletic fields), mobile communications, ham, audience participation shows, etc. The "Ranger" is designed for high speech intelligibility. Easy to use, fits snugly in the palm of the hand. Has heavy-duty single-throw, double-pole leaf-type switch for push-to-talk operation. Phosphor-bronze blades and silver contacts for maximum operating life. Model 505B is furnished with $5^{\prime}$ four-conductor shielded cable. Model 505C is furnished with $5^{\prime \prime}$ three-conductor shielded cable. Frequency response is 100 to 9,000 c.p.s.

| MODEL | Output level | IMPEDANCE | SHPG. WT. | CODE | LIST PRICE |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 5058 | 47.0 db below 1 milliwatt per 10 microbar signal | $\begin{gathered} 150-250 \\ \text { ohms } \end{gathered}$ | $15 / 8 \mathrm{lbs}$. | RUDAY | \$29.50 |
| 505C | 50.5 db below <br> 1 volt per microbar | High | $15 / 8 \mathrm{lbs}$. | RUDAX | \$29.50 |

This new Controlled Reluetance unit is designed to handle the most severe field requirements of paging and dispatching systems. The unit is supplied with 7 feet of 2 -conductor shielded cable, and is wired to operate both microphone and relay circuits. The "Dispatcher" is ideal for police, taxi-cab, railroad, airport, bus, truck, and all emergency communications work where dependability is vital. Large grip-bar assures positive contact.

| MODEL | OUTPUT | IMPEDANCE | LIST PRICE |
| :---: | :---: | :---: | :---: |
| 5205L | 52.5 db below <br> volt per <br> microbar | High | $\$ 38.50$ |

## THE "GREEN BULLET"

The "Green Bullet" is designed to provide quality music and speech reproduction at moderate cost. It is practically immune to the effects of high temperatures and humidity. It features: high oufput, good response, high impedance without the need of a transformer. The "Green Bullet" has a beautiful modern metallic green finish with a plated grille. Frequency response is 100 to 7000 e.p.s. Furnished with 7 ft. sin-gle-conductor shielded cable. High Impedance. The "Green Bullet" is highly recommended for those public address systems where low cost is a must, good reproduction is essential, and ruggedness is a necessity. Model 520 series designed to be used with Shure Model S34B and S36A Desk Stands (see page 5.)

| MODEI | OUTPUT LEVEL | IMPEDANCE | LIST PRICE |
| :---: | :---: | :---: | :---: |
| 520 | 52.5 db below <br> 1 valt per microbar | HIGH | \$19.50 |
| 520B | 51 db below 1 milliwat per 10 microbars | 150-250 ohms | \$19.50 |

## THE "DISPATCHER"

MODEL 520SL

## COMMUNICATIONS MICROPHONES AND ACCESSORIES

## COILED CORD SETS

Sandard Copper Cailed Cord with trimmed and tinned leads. Used
"CB'" and ' 100 ', Series Microphanes.
Madel: C15C
Code: RUCOR

Tinsel Cailed Cord with Amphenal MC4M Connector far use with Gen. eral Electric equipment.

Model: C16C Code: RUCAG List Price: $\$ 8.75$
Tinsel Cailed Card with spade lugs for use in Matarala equipment. Model: CI7C Code: RUCAJ List Price: $\$ 7.25$

Standard Cailed Card with Amphenal MC4M Cannectar far use with Moporolo equipment.

Model: C18C
List Price: $\$ 7.25$
Tinsel Cailed Cord with Amphenal MC4M Cannector for use with Motorola equipment.

Madel: C19C
List Price: $\$ 8.75$

## CARBON MICROPHONE CARTRIDGE

Madel 110

Rugged micraphone cartridge replacement far "CB'", " 100 ", and "'120' Series Carbon Micraphanes. Furnished with necessary maunfing hardware and complete instaltation instructians. Direct replacement for the car. tridge used in the Madeis $101 \mathrm{~A}, 101 \mathrm{~B}, 101 \mathrm{C}, 102 \mathrm{~A}$, 102B, 102C, 120, CB10, CB10B, CB10C, SB10E, CB11, CB118, CB12, CB12A, CB12B, CB12C, CB12D, CB12E, CB14. C814A, CB15, CB15B, CB15C, CB15D, CB15F,
CB20, CB162, 91A27 carban micraphanes. Madel: R10

List Price: $\$ 8.00$

## MICROPHONE ASSEMBLY

A Contralled Reluctonce Micraphone and Desk Stand Assembly-ideal far fixed.station used in all lypes of Assembly-ideal far fixed station used in all lypes of
communicatians wark. Has a built-in switch for cantralting both the microphone circuit and on external reloy or contral circuit. Replacement for Mirs. Madel
Na, CR84. Model 510MD

List Price $\$ 38.50$

## MODEL "100" SERIES CARBON MICROPHONES

Used around the world for police, taxi, bus, truck, and commorcial applications - more than all other makes combined! Rugged unit with clear, crisp voice respanse and high output. Heavy duty switch for push-tatalk performance. Furnished with bracket far wall maunting, plus coiled-cord cable. Adopted as standard misraphone by G.E., Link, Matorola, R.C.A. and athers for 2 -way radio cammunications equipment. Output level: 5 db belaw 1 volt far 100 micrabar speech signal.

REPLACEMENT CHART

| MANUFACTURERS MODELS | REPLACEMENT MODEL |
| :---: | :---: |
| $\begin{aligned} & \text { CB10, CB10B, } \\ & \text { CB10C, CB10D, } \\ & \text { CB15, CB15D, } \end{aligned}$ | 1010 |
| CBIOE | $101 E$ |
| $\begin{aligned} & C B 12, C B 12 A \\ & C B 12 C, C B 12 D \end{aligned}$ | 102C |
| CBI2E | 102 E |
| CBI5F | 103 |

| Madel | Cable | Switch Arrangement | List Price |
| :---: | :---: | :---: | :---: |
| 101C | Standard Cailed Card $11^{\circ}$ retrocted; $5^{\prime}$ extended | Two Wire Relay Sw itch narmally apen. (Na micraphane switeh) | \$27.50 |
| 101E | Tinsel Cailed Card $11^{\text { }}$ retratted; $5^{\prime}$ extended with Amphenal MC4M Connectar |  | \$32.50 |
| 102C | Standard Cailed Card 11 * retracted; 5' extended | Relay narmally apen. Microphone switch narmally open. | \$27.50 |
| 102 E | Tinsel Cailed Cord 11 'retrocted; 5 ' extended with spade lugs |  | \$30.00 |
| 103 | Standard Coiled Cord $11^{\prime \prime}$ retrocted; 5' expended with Amphenal MC4M Connectar | Iwo Wire Relay Switch nar mally open. (Na micraphane switch) | \$29.00 |

## CARBON "PACK" MICROPHONE

Designed for use with mall partoble ond moble transmitsers. Only $2^{\prime \prime}$ in diamater and $11 / 2^{\prime \prime}$ thick. How 3-canductar coiled card, motal-spring strain reliti, and Fush-ta-Talk switch. Has same aperating characteristics cs "'100 Series" Carbon Micraphanes. Replacement for Mfri. Madel Nas. C820, CB21.
Madel 115
List Price: $\$ \mathbf{2 0 . 5 0}$

## SWITCHES AND

MICROPHONE REPLACEMENT CARTRIDGES

CONTROLLED RELUCTANCE Model R5

Contralled Reluctance. Ideal for the replocement of Crystol Cortridges in Shure coses of the Model 707A and 7084 Serles, where heat and humi. dity are a problem. Alsa replaces cortridges in other mers. madels of imilar denign, where space permits. Supplied with rubber mounting ring and installation instruetions in English ond Spanish.
Madel: R5 List Price: $\$ 10.00$

Madel 87
Madel R7 Crystal Micraphane. Available far service installation as a replacement for the cartridges in the Shure Crystal Micraphenes of the 707A and 708A Series, and ather mieraphanes of similar design. High output-48db below 1 valt per microbor. Cartridge supplied with rubber maunting rings and with rubber maunting rings and
installation instructions. Madel: R7 List
Madel: R7 List Price: $\$ 7.75$

## CABLE-TYPE TRANSFORMER

Madel A86A
Madel A86A is a high qualify, coble-fype transformer, ideal for motching law-impedance micraphane lines to high-impedance amplifier inputs \{matches 35.50 and $150-250$ ahm microphanes of high impedance). 2 2.foot coble.
List Price: $\$ 17.50$

## TAKE-APART STAND

Model S34B. Handy law-cass sfand far desk or hand use. One twist of handle lacks it securely In base for use as a table stond, or roleases handle for use in hand. Motal base, waod handle. Madel: \$348 List Price: $\$ 3.30$

## ACCESSORIES

## "GRIP-TO-TALK SEIDE-TO-LOCK" SWITCH

Heovy. Duty Switch withstands the masf severe field requirements of paging and dispotching syitems. requirements of paging and dispotching systems. Teal far Palice, Taxi-Cab, Roilraod, Airpart, Bus, Can be used with Shure connectar-type erystal, dynomic and when dynomic and carban micraphones af any impedance. Fits handily an Shure S36A Desk Stond. Medel: Assa
Medel: A8AA List Price: 11.75 Madel A88A

Madel A838, Ratary-type "On-Off' switch. Quickly astached to any cabiecannectar pype Shure micraphane. Model: A83B

List Price: $\$ 8.50$
Maciel A84B: A83B
Llat Price: $\$ 8.50$
Madel: A84B List Price
Mocel A85C. Mamentory Press-to-Tolk Reloy-Type Switch.
Madel: AB5C
List Price: $\$ 10.75$

## MODERN DESK STAND

Model S36A. Streem!lined Desk Maunt Ais all Shure cen-nector-type mleraphonet. Adapter provided for mounting ather type microphones. Ideal for ute with A88A switch. Madel: S36A

List Price: $\$ 6.00$

## World's Foremost Manufacturer

## Largest Selection of Genuine

## Original Equipment Replacements

ASTATIC designs and manufactures the world's most complete selection of phonograph cartridges and pickups for both manufacturer and distributor. A pioneer in the industry, Astatic was first to recognize the tremendous potential of Rochelle Salt Crystals in voice and music reproduction, and is largely responsible for the development and introduction of these and similar products to the communications world. With its extensive research facilities and modern three-acre plant, Astatic continues to pioneer in the search for still better products at lower prices.

ASTATIC supplies to distributors everywhere a highly diversified line of attractively-packaged crystal, ceramic and magnetic products, together with catalogs, brochures and numerous other sales aids.

ASTATIC is the largest single supplier of cartridges and pickups to original equipment manufacturers. Our leadership in this field is your guarantee of unsurpassed quality and value.

## "DYNABAR" Dynamic, "SYNABAR" Crystal <br>  <br> - Famous professional-dass microphones for broadcasting, recording, etc. Special sintered metal cancels out 15 db front to back, making them, for practical purposes, dead to sound from rear. Both models satin chrome, with 18-ft. 2-cond. shielded cable. "Dynabar" dynamic: Has multi-impedance tran former. Selector switch provides impedances of $50,200,500$ and HZ . Frequency range 40 so $10,000 \mathrm{cps}$. Oupput level -54 db . Dynamic unit floated in pubber. "Synabar" crystal: Has frequency range of 50 to $10,000 \mathrm{cps}$; output level -54 db . High impedance. Response selettor switch for crisp voice or general voice and music. <br> Model <br> List <br> DR-10- "Synabar" Crystcl ........ 537.25 <br> DR-10-S* <br> DR-11- "Dynabar" Dynamic <br> DR-11-S* <br> *With Off-On Switch

## "DN" DYNAMICS

- Widely used all-purpose semi-directional microphone available in 500 ohm, high impedance or multi-impedance models. Unitary moving coil system. Response characteristically flat from 50 to 7000 eps. Swivel tilting head permits semi- or non-directional posiions. Opalescent gray and bright chrome finish 10 ft shielded cable. DN-HZ output -55 db . Multi-impedance model DN-MZ has selector switch providing choice of $50,200,500$ or high impedances. DN-HZ and $M Z$ models only are available witt Off.On Switch shown, at $\$ 2.75$ extra. All models available with Grip Stand, $\$ 13.00$ extra.

## TELEVISION-BROADCAST DYNAMIC MICROPHONES

E-V engineering brings you new, versatile highoutput designs in keeping with current requirements for better television-broadcast fexibility and quality. Unique Variable "D" cardioid principle delivers greater front-to-back discrimination, ultra-wide range with rusged single dynamic element. Slim-Trim omnidirectional units set new style standards. Close tolerances and individual laboratory control guarantee uniformity. Ideal for recording, high-quality public address and audience participation,

## CARDIOID UNIDIRECTIONAL MICROPHONES

Model 666 Super Cardioid Microphone. Totally new concept in directional microphone design uses Variable D principle (variable acoustical distance between front and back openings). High discrimination shock. Model 666 affords another octave of uniform HF response over that found in conventional broadcast cardioids. Permits close talking with no bass accentuation. Increases working distance over pressure microphones by factor of 1.7:I due to reverberation reduction. Designed for operation on boom, stand or in hand. Uses only one moving element with exclusive, rusced Acoustalloy dia phragm. Response ranse, typical 40.15 .000 cps ; output -55 db impedance chansed on interna! terminal board. Wired for 50 ohms taps at 150 and 250 ohms. Aluminum cast case finished in TV sray. Built in Cannon UA-3 connector. Clamp-on stand mount included with " " " $" 27$ thread and ' 2 " pipe thread adapter. $20^{\prime}$ cable. Size ${ }^{2}$. long, 1 , ${ }^{\prime \prime}$ maximum diameter. Net wt. 11 oz.
List Price
. . $\mathbf{2 4 5 . 0 0}$

Model 665 Cardioid. Simular in desugn and functuon to the Model 666. but for less exacting applacations. Uniform response $50-14.000 \mathrm{cps}$. Impedance 50 to 2511 ohms. Recessed switch in stud permits quick selection of "ether impedance. 'resure"
cast zinc cabc. Nun-rflecting pray finish. Dia. 1\%/8", length $7 \mathrm{y}^{3}$ ". 18' cathle.

## OMNIDIRECTIONAL MICROPHONES

654

#### Abstract

Model 655C Slim. Trim TV Dynamic. Frequency response $40.20,000 \mathrm{cps}$. Output level -55 db . Has widest ranse response of any microphone comtest standard. Excellent in many laboratories as test standard. Excellent ievel affords high signal to-thermal noise ratic. Pop-proof grille stops blasts. can be used on stand, in hand or on boom. Easily Impedance 50 , 150 , and 250 ohms. Imphasm. easily changed at internal terminal board. Cannon UA. 3 connector. Clamp.on stand mount included with $5 / \mathrm{sm}^{\prime \prime}-27$ thread and ${ }^{2} 2^{\prime \prime}$ pipe thread adapter. Size, $101 /{ }^{\prime \prime}$ long without connector, $1^{\prime \prime}$ diameter. $18^{\prime}$ cable. Net wt. 11 oz .

List Price. $\qquad$ $\$ 200.00$

Model 654 Slim-Trim Broadeast Dynamic. Frequency response $50-16.000 \mathrm{cps}$. Output level 655 : microphone is an excellent utility unit for all commercial uses. Recessed selector provides all commercial uses. Recessed selector provides
50 or 250 ohms impedance. Pop-proof head. Acoustalloy diaphrasm. TV sray enameled finish. Built-in Cannon XL-3 connector in "-27 thread. $1^{\prime}$ cable. Size: $10^{\prime \prime}$ long with stud, $1^{\prime \prime}$ diameter. Net wt. $151 / 2 \mathrm{cz}$.
$\qquad$

Model 646 New Lavalier Dynamic. Remarkably small, versatile. For chest, desk or hand use. Neck cord and support clips supplied. Response uniform from 40 to $10,000 \mathrm{cps}$ in flat position. Recessed screw in srille permits adiustment of high-frequency response to suit application. Output level -57 db . Choice of either $50,150,250$ ohms impedance. Flat or rising response adiustment. Acoustalloy diaphrasm. Omnidirectional pattern. Built-in cable connector, Gray enamel finish. $30^{\prime}$ cable. Size $6 \frac{1}{\prime \prime}$ long. I $\mathrm{s}^{\prime \prime}$ diameter. Net wi. less cable 7 oz .

List Price.
.$\$ 140.00$

## CARTRIDGES FOR 78 R.P.M.

Model 12 Crystal. The most versatile 78 r.p.m.cartridge. 1.5 volt outpur is ideal
 for most phono combinations. Weighs 1,5 ounce "racks perfectly with less needle force. Ideal for ilied with Snap.ln Holder and mountins hardware plied with Snap-in Holder and mounting hardware. For standard $1 / 2$ hole centers. RCA $1 / 10$ mountins or Webster-Electric side mounting cartridses. Model 12, with 0.3 Osmium needle. Lis1.... $\$ 7.50$

Model 32 Crystol. Provides the longest record life, lowest needle talk and greatest stylus life. Ideal for record enthusiasts with valuresponse to $10,000 \mathrm{cps}$. Output 1.8 volts, usable in most radio-phono combinations. Standard 1/2" mounting. Uses $\mathrm{E}-\mathrm{V}$ whisker-type needle Model 32, with 0.3 Osmium needie. Lisf.... $\$ 6.50$

Model 42 Ceramic*. The model 42 cartridge utilizes a ceramic senerating element for complete moisture protection. Lons-lasting in extremely hot, humid climates. Output is 1 volt. Mounting bracket of Model 42 for mounting in tone arms with $1 / 2^{\prime \prime}$ hole centers.
Model 42, with O. 3 Osmium needle. List. . . . \$6.50

## CARTRIDGES FOR 45 and $331 / 3$ R.P.M.

Model 14 Crystal. The Model 14 cartridge gets all the music from the extended range fine groove records. Response follows professional standards... free from peaks and distortion that mar wide range response. Response. 30 to 10 kc . A truly high fidelity phono-car\&ridge Output, I volt. Uses E-V I-mil, whisker-type needle. Model 14, with O.1 Osmium needle. Lis1.... $\$ 7.50$ Model 14-S, with S-1 Sapphire needle. List... $\$ 8.50$

Modal 34 Crystol. The high compliance voltage product of this cartridse makes
 it a superb replacement for 45 and 331 s r.p.m. players. Reproduction is fuller yet needle tracks with whisker touch. Records sound better and last
longer. 1.25 volts output is slightly higher than averase fine sroove cartridge. Mounting bracket has $1 / 2^{\prime \prime}$ and 5 " ${ }^{\prime \prime}$ hole centers. Ideal replacement in players. Uses E-V whisker-type 1-mil needle. Model 34, with O.I Osmium needle. List. . . . $\$ 6.50$ Model 34-S, with S-I Sapphire ncedle. List . . . $\$ 7.50$

Model 44 Ceromic*. Model 44 utilizes a ceramic generating element for complete

PREFERRED* moisture protection. Makes an ideal or complete replacement in hot, humid climates. Output is .8 volt. Model 44 mounts in tone arms with either $1 / 3^{\prime \prime}$ or $5 / 8^{\prime \prime}$ hole centers.
Model 44, with 0.1 Osmium needle. List. . . . $\$ 6: 50$ Model 44-S, with S.I Sapphire needle. List. . . $\$ 7.50$
*Electro-Voice ceramic phono-cartridges are directly interchangeoble with silent-needle-type crystol cortridges those that do not use the thumb screwh. E.V ceramic cartridges hove equivalent output to the manufacturers" original crystal types they replace.

[^20]
## ELECTRICAL SPECIFICATIONS:

PROFESSIONAL MODEL "P." Has the smoothest response, lowest intermodulation distortion and highest compliance. Constant velocity response when loaded with 120 K ohms and requires no equalization. Designed to feed any magnetic level input amplifier. Stylus pressure 3 grams.
HIGH FIDELITY MODEL "OV." For converting small and medium sized amplifiers for better reproduction. Low IM distortion and high compliance. Will drive most amplifiers through high level input. Stylus pressure 5 grams.
HIGH OUTPUT MODEL "Tr" Designed for worn and older types of records. Produces a high order of brilliance with a minimum of needle scratch. Will drive most small amplifiers. Stylus pressure 6 grams.
ULTRA high output models "us" and "v." Similar to Model "T," but have highest output of all models. Stylus pressure 7 grams.

## MECHANICAL SPECIFICATIONS:

All RONETTE cortridges are sumplied with verious types of brackets for veplacement in most popular phono arms. Sperirl brackets supplied on quantity orders to mamufactureis specificutions.
TYPE TO-284: Turnover Type with built-in turnover mechanism. Will mount in most standard record player arms. 2 non-interacting sapphire styli*.
TYPE RA-284: Single Needle Type designed for original and replacement equipment in most single speed microgroove players and RCA units. Available with $1^{*}$-or 2 -mil sapphire stylus.
TYPE DT-60; Turnover Type without built-in turnover mechanism. Designed for tone arms such as Shure W22, Astatic ACD-J or Webster A-1. 2 non-interacting sapphire styli ${ }^{\text {a }}$.

## WORLD-FAMOUS "B-110" REPORTER MICROPHONE

For Amateur Radio, Public Address and Communications Service

Most popular and widely used microphone among amateurs the world-over. Semi-directional, shielded against strong RF fields. Use of 220 K ohms output resistance, instead of the usual 5 magohms recommended, reduces bass response and gives that "DX" quality wanted by amateur radio operators. Case is of high quality Polopas, finished in polished ivory. Fits any regular 5/3"-27 threaded microphone stand.

TECHNICALSPECIFICATIONS:
Frequency Response: 30 to 13,000 cps
Effective Oufput Level:
$1.1 \mathrm{mv} / \mu$ 8ar at 1000 cps and 5 megohms
Output Impedonce: Equal to $2200 \mu \mu$ f
Dimensians: Diamefer $21 / 2^{\prime \prime}$; Height $33 / \mathrm{m}^{\prime \prime}$; Depth $31 / 4^{\prime \prime}$
Madel B-110: With $5 / \mathbf{s}^{\prime \prime}-27$ threaded cannector..... $\$ 13.25$ List

## TABLE MODEL MICROPHONE TYPE "44"

Especially appealing to tape recording enthusiasts, as it matches today's modern recorders. Housed in a plastic case which is virtually unbreakable, with beautiful modern lines and finished in polished ivory. Has a metal loaded base, suitable as a hand microphone. Semi-directional in characteristic.

## TECHNICALSPECIFICATIONS

Frequency Response: 30 to $13,000 \mathrm{cps}$ at 5 megohms
Effective Oułput Level: $1.3 \mathrm{mv} / \mu \mathrm{Bar}$ at 1000 cps and 5 megahms
Output Impedance: Equal to $2200 \mu \mu \mathrm{f}$
Overall Dim.: Height $378^{\prime \prime}$; Width 2.15/16"; Depth 1.7/16" Madel "44": Complete with 6-ft. shielded cable...... \$10.50 List

## STREAMLINED HIGH FIDELITY MICROPHONE MODEL G2IO

Can be custom-tailored to fit yocr exact electrical requirements. Chromium-plated, die-cast alloy housing swivels 100 for semi- or omni-directional use. Available with or without an ON-OFF switch. Choice of filter cells with different response curves available . . . types are listed below. Fits any standard desk, banquet or floor-stand . . . comes complete with shielded $5 / 8$ " -27 threaded connector.

TECHNICALSPECIFICATIONS:
Effective output level at 1000 cps : with Filtercel: $2.6 \mathrm{mV} / \mu \mathrm{Bar}$ at 5 megohms.
Frequency Response: 30.7500 cps . . . with DX-12: $1.3 \mathrm{mV} / \mu$ Bar of 5 megohms

## Gronette CRYSTAL TWEETER

Adds Brilliant, Shimmering, Upper and Middle Frequency Range to your present audio system at
 amazingly low cost !
An entirely new concept in HIGH FIDELITY - the crystal "tweeter." The diaphragm of corrosive resistant rigid aluminum is light and small, making it most effective in the upper register where larger and heavier speakers fall down. Designed to respond to the rapidly changing elusive high notes with surprising efficiency. It is easily installed in minutes with a simple RC filter.
Can handle 5 watts at 1,000 cycles with ease. Designed to operate between $1 / 2$ to two watts from 2,000 to 16,000 cycles
Oely $1-11 / 16^{\prime \prime}$ diameter, but $1 / 2^{\prime \prime}$ thick. This small unit is easily mounted anywhere

All Ronette Plezo-electric Products are Guaranteed for Tropical Climate.
All Prices 5ubject To Change Without Notice.

## MICROPHONES

## BRUSH MODEL BA-106 MICROPHONE

The Brush Model BA-106 is a high quality microphone incorporating the hermetically sealed "Acousticel"* with Sintered bronze damping. "Metalseal"* crystal is used for protection against conditions of high humidity. This microphone offers unexcelled response in microphones of this type and price range.
Vibration, shock or low frequency wina' noise do nof affect the performance of this microphone.
Output level 50 db . below $1 \mathrm{vclt} / \mathrm{dyne} \mathrm{cm}$.
Flat from 40 to $6,000 \mathrm{cps}$. Unexcelled for home
recording, public address. systems, ham shacks,
monitoring and institutional and industrial applications.

## ? HUSHATONE*

## Model BA-303

A miniature, molded plastic extension speaker for under pillow use. Disc shaped ( 4 i"" dia. by $1{ }_{3}{ }^{\prime \prime}$ " shaped thick). Makes no uncomfortable lump beneath the pillow. Tone quality comparable to cone type speaker because of specially engineered response. Speaker gives ample output with low power consumption (.001 watt). Hermetically sealed, can be dipped into disinfecting solution (temperature not above $120^{\circ} \mathrm{F}$ ). Light weight BIMORPH* crystal drive element insures uniform response and high sensitivity. No parts to wear, loosen, or become detached. Furnished in maroon with satin chrome trim. HUSHATONE* with $10^{\circ}$ cord.
Net. Wt. 8 oz., Ship. Wt. 2 los. BA-303 . . . . $\$ 13.00$ list

Brush crystal phones possess the following outstanding features:

1. BIMORPH * crystal drive element of such high imper ence that line or circuit characteristics are not affected when monitored by Brush ohones.
2. Wider range response with more uniform output.
3. Compensation for ear coupling.
4. Light-weight, rugged. shock-proof construction.

## HEADPHONES

## Brush Model <br> BA-206

Designed for use where High Fidelity and smooth frequency response are of paramount importance. They are especially applicable to broadcast montoring to laboratory use in the study of sound masurements, audiometry and similar exacting headphone app!ıcations. Features exceptionally fat frequency resyonse. Impedance of 50,000 ohms at 1000 cps; no transformer re quired. Ideal for multiple installation. Sensitivity is approx. 6.3 dynes, $\mathrm{cm}^{2} /$ volt at 1000 cps . Low
 provides an wachant buss re.iponse. The Metalseal Crystal drive, ament is of such high impedance that in as cuit charis thristers are not affected wher monitored by these phones. Available in double, single and lorgnotte models:

All-new, low priced Gray 108 CHi Hi Tone Arm
Like all Gray Tone Arms, the 108 C gives true reproduction of concert quality High Fidelity music. The Gray 108C is the product of advanced engineering technique, unusual application of new materials ond unique production facilities. It guarantees the ultimate in performance for new ond old recordings.

Illustrated above .. . the Groy Viscous-Domped arm in action. Gray's viscous-domped (fluid control) suspension principle regulates vertical and horizontal movement of lone arm. Minimizes groove iumping and skidding. Prevents damage to record if tone arm is suddenly dropped. Verlical motion of arm descending on record is automatically controlled so that even a child can handle the Gray All-NEW 108C Viscous-Damped Tone Arm.

Gray 602C Equalizer, for the MOST ACCURATE Response Curves

MOST ADVANCED DESIGN . . The Gray 602C Equalizer is the most advanced precision design for broadcast use of the famous Gray 602 series. INSTANT SWITCHING ... a convenient control permits instantansous inpul switching from conventional records to Micro-Groove. Used with G-E cartridge... the 602C equalizer is designed for use with the G-E professional type RPX-046 cartridge.

Gray 106 SP Transeriplion Arm Chosen by professionals for superb tone reproducfion . . . for every speed record.

Gray 103 s Transeription Arm Loading audio engineers recognize the true tone reproduction. Specifically designed for 78 RPM records.

and Development Co., Inc, Hilliard St., Manchester, Conn.

Gray, as a special service to its many TV customers, now has available a custom. made test pattern with individual call letters for TV stations.
 Division of the GRAY Mfg. Co. Originators of the Gray Telephone Pay Station, Gray Audograph ond the Gray PhonAudograph.

Presto 64-A Transcription Turntable (Type 153 Reproducer extral

## PRESTO 64-A TRANSCRIPTION TURNTABLE

#### Abstract

The Presto 64-I trmserintion turntable offers the following features which are of najor importance to the nwner and operator: lonusual mochanical simplicity  for boner comtimusus operation . . . instantaneous nelection of desired speed and no renuiremants for mechanical adjustments.

This transeription turntable is directly coar driven and employs two separate motors, ane for $3: 3-1 / 3$. and the of hor for 78.26 rym. There is no friction device of any kind in tho merlanism and to mechanical shift is required to change speeds. To select 3 3-1/3  changer may he mado as rabidly as desirod while the turmable is in motion with mo damape to the mechanism. Only one notor at at tine is in oneralion, The transmission 

 rotation although the stationary motor is never disengaged from the mechanism.
## SPECIFICATIONS

Standard Equipment: The $64-A$ transcription tumathe includen the electro-mechan-
 Reproducer :and network not includul. Speed Accuracy: No deviation from $33.1 / \mathrm{B}$ and $7 \times .26 \mathrm{rpm}$.

Noise Level: Mechanical noise orisinating

Power Requirements: Approximately 75 walts from a 115 volt, 60 cycle line. Motors are of the 1800 rpm synchromons the and are available for other voltames and frequencies at adiditional cost.
Mounting: Turntable and gear drive mombent in havy word calrimet $24 x \quad 24$

1.ist Prict. $\$ 585.00$

## PRESTO 6-N RECORDER

T'be PRESTO ei-N Rorordar and Goll Imalifire is the jdeal recordine ernipment for fortable or stationary operation.
 fiations becanso it offers all the qualifitatims fur foom recordiners, includintr masior rocorls, at the most courontical price. It is ideal for the station requiring delaved broadcast of network promrams, and for refornere recordintes.
 spiratiniz feed screw, vertical damper, time sealo and pick-up. It. is avalabla for microsroove recordiner at adhifinnal enst.

The lresto $\quad$ bolil recorliny amplifier contains all the facilities nerensary for omeration on remote assimments, but with an overal burformance formil only in high-fidelity station equipment.

It consists of three preampliffers with inlividual gain controls, a mixer pircuit, a mastor wain control and power amplitier. Provision is matle for conneterner the leresto $1 \cdot 1 \cdot 1$ antomatic equaliser sion is mathe for comt
(radjus rompt nsator).

A fibmposition selmetor switel provilfas the following character-

## AND 90-B AMPLIFIER

5-antomatic equalization. The flat response can be modified by variable lass and truble controls. giviner emphasis np to a maximum of on (l) at 1110 and - .inot cucles per second or 20 flb de-emphasis at -. 2 on cueles jer second.
Noise is 55 db below recording level and distortion at maximum output is less than $1.5 \%$

The ner of input and outpust selector switches makes the $00-13$ amplifier mrusually flexible. It permits combining the signals of thren microplunes or of two microplones and either one of two pick"1hs. By nsing the "lime" position. resoriliners can be made from an incoming propram line. The output selector has three positions: playback (pulijic abdress), continuous recording and simnltaneons rerording. While recorling, the line jack provides a monitoring outlet or permits feeling a prowram line at the correct level.

The correct level is monitored by means of a Weston Type 30 vit indicator with illuminated scale and its closely controlled electrical and tymamic characteristics make it an infeal volume indicator for recording.

## PRESTO T-18 RECORD TURNTABLE

The PRESTO T-18 is a three-speed, $12^{\prime \prime}$ diamuter record player especially designed for hish tidelity use. It combines dependable speed accuracy with simplieity of operation and attractive appearance. Exceptionally well-lesigned, it contains only one noving part in the entire shift mechanism to engage each of the three interchangeable drive idlers.

The professinnal-type turntable is heavy cast aluminum with a retractable adaptor dise for $45-\mathrm{rym}$ records. Two types of motors are a ailable: a heavy-duty, four-polv motor or a hystcresis synehronous motor for those who want the ultimate in gueed accuracy and quiet, rumble-free operation. A single control lever, operating in a horizontal plane, selects $331 / 3,45$, or 78.26 r pm speeds or shuts off the mechanism. The panel, tinished in attractive telephone black, is small and unobtrusive and requires only a simple rectangular cufont for monnting.

## PRESTO SR-27 TAPERECORDER

This PliESTO unit fills the need for a portable tape recorder of professional quality at a price an amateur can afford. It consists of the new $18-27$ tape transport mechanism and the PRESTO A.920 amplitier, each furnished in its own carrying case.

The rype R-27 embodies many design ieatures oi PRES'lO's best professional models. It utilizes $7^{\prime \prime}$ dianteter reels at tape speeds of $71 / 2$ and 15 inches per second and has a fast forward and rewind speed. Three separate magnetic heads provide record, erase, and playback. A three-motor drive is employed, and the supply and takeun brakes are selt-adjusting and self-aligning. Microphone and playback preampliers. a power supply. and two small speakers are inchuded in the $\mathrm{A}-920$ amplifier.

## R-1 1 TAPERECORDER

The R-11 Recorder is an unusually fine mechanism which can be mounted in a relay rack, in the CS-10 carrying case or in the CC-2 console. The main panel is a heavy aluminum casting to which all other components are attached, including the Presto CIOR-200 self-contained capstan drive assembly.
The three heads of the R-11 are mounted as a group and are contained in a completely closed housing. Tape is threaded by simply dropping it into the opening made by pulling forward the front cover. This also holds the tape oft the heads for running the tape at fast speeds.

## PERFORMANCE DATA

 Signal-to Noise Ratio: in all at 3 \%e distortion.
Fumter: $0.15 \%$ at $15 \mathrm{in} / \mathrm{src} . ; 0.2 \% \%$ at $51 / 2 \mathrm{in} / \mathrm{sec}$

## PB-17A TAPE REPRODUCER CONSOLE

The PB-17. Tape Reproducer Console has been developed to provide automatic. continuous reproduction of taped program material in industrial plants, amusement parks. and other areas where a constant source ot background music is required.

The console consists of the PRESTO PR-17A tape transport mechanism interconnected with the A-904 amplifier in a handsome plexiglass-topped console cabinet. It plays back from $14^{\prime \prime}$ diameter reels oi pre-recorded dual-track tape traveling at a speed of $: 3 / 3$ inches per second. After four hours of playing time on one track. the mechanism automatically reverses itself to provide an additional four hous on the second track. At the end of this time, the machine either recycles or shuts itself oft. The Pb-17A mechanism is also available with the A-904 amplifier in the new vertical console. or it may be furnished separately for rack mounting.

## 4/PRECISION turntables

## The NEW

SERIES

For more than 5 years we have devoted our best engineering efforts to developing the perfect turntable. While this is practically unattainable, we do believe that we have achieved the closest approach to that ideal. The rondine Series are certainly the finest Turntables ever made available for home music systems.
One of the most important advances embodied in these turntables is the flouting idler which achieves virtually complete isolation between motor and turntable. Other new features include: a built-in retractable hub for 45 rpm records, and a permanently affixed strobe dise for instantancous speed checking.
The Rondine Turntables retain most of the other proven features of Rek-O-Kut turntable construction: non-magnetic, cast aluminum turntables, precisely lathe-turned and dynamically balanced - with extra heavy rims for effective flywheel action . . . internally rimdriven, employing neoprene idlers
case hardened intermoving parts, ground to a micro finish single-ball thrust bearing suspension . . . effective shock-mounting and mechanical filtering to assure quict operation . . . drive pulleys of special lamitex ground directly onto notor shafts.

## Model LP-743

## 3 Speeds

A lons-time popalar fisorite with discrimhating husers serking 3 -speed, quality per. formance at a moderate price. Motor diment sions, appearance and other specifications are the same as for the liondine Jr. However the L.l'- 73 is furnished with a detaelahle 45 , the allapter, and is not provided with a built-in strulte. It differs also from the lemolin Jr., as follows:
NOISE LEVEL: 30 dh below averake recording level.
SPEEDS: $331 / 3,45$ and 78 rpm .

> NET PRICE \$59.50*

## RONDINE Deluxe Model B-1 2H <br> 3 Speeds

The aristmat of the boximite Serins. As decord reproducing device, it represtuts the clusest apprach to pertertion ever attained. It has less rumble, wow and thater than ans 12 -inch turntalle on the market torlay.

*All prices slightly higher West of Rockies.

## The MODEL B-16H

## 3 Speeds

Offers the broadcaster and recording studio the finest professional performance at the lowest cost. The turntable itself is precision lathe-turned, non-magnetic, cast aluminum - dynamically balanced - and with an extra-heary rim for effective flywheel action. Turntable diameter is standardized at $153 / 4$ inches to allow a $1 / 8$-inch overhang for cueing. It is internally rim-driven by means of neoprene compound idlers. All inter-moving parts are case-hardened and ground to a micro finish. Rotates on a single-hall pivot which takes the entire thrust of the turntable shaft.
Extremely low distortion has been achieved through effective acoustical damping - through special attention to motor bearings, motor suspension, idler design, concentricity of pulleys and all the other elements essential to smonthness, quiet and overall quality of performance. Rumble, wow and flutter and speed regulation are well within NARTB standards. Requiring no more than routine maintenance, all parts are readily and easily accessible.

## SPECIFICATIONS:

SPEEDS: $331 / 3,45$ and 78 rim.
SPEED SELECTION: Mastermatir. Es.lflowking, instantaneous shift. Fingrares either idler without stopping curntable or removing disc.

## WIDE RANGE RV PICKUP

MODEL 201 - Clarkstan RV wide range variable reluctance cartridge for best reproduction of LP microgroove and standard records. Instantaneously replaceable and interchangeable needles. Frequency velocity responsive to above $12,000 \mathrm{cps}$. Needle force $5-7$ grams for LP microgroove, as low as 10 grams for conventional records. Output 60 millivolts. High impedance $-5,50,250$ and 500 ohm models available. $1 / 2^{\prime \prime}$ mounting centers. Supplied with sapphire
 needle. Specify . 0012" for LP microgroove or $.0030^{\prime \prime}$ tip radius for standard records. Tip radii of . $0015^{\prime \prime}, .0022^{\prime \prime}, .0025^{\prime \prime}$ also available. (Can also be supplied with diamond needle of any of above tip radii.) Net Price \$15.00

## CLARKSTAN MAGNETIC PICKUP

MODEL 204 "RV-Jr." variable reluctance pickup has a removable and replaceable stylus. It weighs only one-half ounce and fits all popular makes of record changers having standard mounting holes $1 / 2^{\prime \prime}$ between centers. It is $11 / 2^{\prime \prime}$ overall length. This magnetic pickup with balanced armature is velocity responsive (flat $\pm 2 \mathrm{db}$ ) from 50 cps to $10,000 \mathrm{cps}$. It delivers .030 volt from the average record.

> \#204 "RV-Jr." Cartridge only (with 1 sapphire needle) Net Price $\$ 5.40$ \#204D "RV-Jr." Cartridge only (with 1 diamond needle) Net Price $\$ 21.00$ (Specify whether . 0012 " or . 0030 " radius needle desired.)

## CLARKSTAN KNOBS Madel Knob Dia. Height

Attractive one-piece knobs accurately machined from DURAL add the professional appearance to control 275-0B 275-1B 275-12B panels. All knobs have fluted sides and have screwtype mounting for round or flat shafts to fit standard $1 / 4^{\prime \prime}$ shafts. Back of all knobs recessed $3 / 4^{\prime \prime}$ dia. by 5/64" deep to accommodate panel bushing nut. Supplied with or without pointer.

## telectrG.tape

 Custom tape recorders and PlayersE specially designed for installation in Custom High Fidelity Units, the Custom 220 offers professional full-frequency performance at a price within the reach of every high fidelity enthusiast. Consists of tape transport, with recording amplifier, playback pre-amplifier and erase-oscillator. Simplified controls permit rapid switching from "record" to "play," and the exclusive Telectrosonic-designed Wind-Rewind Interlock Switch provides instantaneous rapid wind and rewind without the possibility of "spilling" or breaking your tape. Sensitive magic-eye indicator accurately indicates the recording level for broadcast-studio results. Frequency range of 50 to 12,000 cycles (at $71 / 2^{\prime \prime}$ per second speed) matches the finest professional eqiupment. Custom 220 is a beautifully styled unit that will enhance the most luxurious of installations, and may be mounted horizontally or vertically freel holders are available for vertical mounting).

## telectro-tape CUSTOM 220 P

## for Monaural recordings only

Offers the high fidelity enthusiost the opportunity to instoll o professionol full-frequency tope ploy-back in his hi-fi cobinet in either horizontal or vertical position. Instolls like o record ployer, by merely plugging into the "phono" jock of ony amplifier, rodio or TV.
Tape Player Mechanism Only

Motching pre-omplifiers are availoble for models 220 P ond 22CBMP

## PICKERING CARTRIDGES <br> Single Play <br> (Single and Dual Stylus)

## The Most Nearly Perfect Shone <br> Pickups Ever Produced

MODEL 260
—turnover cartridge for 78 or $331 / 3$ and 45 rpm records (the 220 and 240 back-to-back)

PICKERING MODEL 260 TURNOVER PICKUP is acclaimed by thousands of owners as the finest phonograph pickup ever produced. Engineered and manufactured with the care and craftsmanship traditional with all Pickering equipment, Model 260 plays microgroove and standard groove recordings with wide dynamic range and distortion-free quality. The Model 260 actually consists of two miniature cartridges, a Series 240 for microgroove and a Series 220 for standard recordings. They are mounted back to back in a gold-plated lightweight aluminum turnover mechanism which permats either cartridge to be brought into playing position with a simple flip of the handy lever that is clearly marked to show which cartridge is in use.

## .. for the professional and the audiophile

PICKERING MODEL 220 and 240 INDIVIDUAL MINIATURE CARTRIDGES are the identical individual reproducers which make up the famous 260 Turnover Pickup . . . they have the same broad frequency response. wide dynamic range and distortion-free quality that characterizes the superiority of the Model 260.
The gold 220 series cartridge is for use with standard 78 rpm records and is available with either diamond or sapphire stylus. The silver 240 series cartridge is for use with microgroove records, both $331 / 3$ and 45 rpm The silver 240 series is available with diamond stylus only for maximum protection of the fine grooves of LP records. Diamond styli wear many times longer than sapphire and are less susceptible to damage, thus assuring preservation of expensive records.
When purchased separately as 220 or 240 cartridges, a simple clip type universal adapter is packaged with each cartridge. This universal adapter permits easy installation of the cartridges in all standard makes of changers and tone arms.

SPECIFICATIONS FOR 220,240 and 260 CARTRIDGES

The 260, 220 and 240 Cartridges are velocity. sensitive devices and are inherently "flat" on a velacity basis. When measured with on equalized preamplifier having 6 db per octave bass bast and a standard test record, their performance characteristics are in accordance with the curve shown.

MODEL 240
-for $331 / 3$ and 45 rPm fetors: diamond stylus

ADAPTER CLIP
to permit easy installation of 220 or 240 cartridges in all standard changers and tone

Recommended Lad Resistance 27,000 ohms for flat response.
Output - 30 millivalts at 1000 cycles with a stylus velocity of $9 \mathrm{~cm} / \mathrm{sec}$.
DC Resistance - 800 ohms.
Inductance - 125 millihenries.
Tracking Pressure - 4 grams up to 8 grams if required by changer mechanism. Weight

The

Models D-120M, S-120M, D-140S and 5-1405, with diamond or sapph. ire stylus, are without equal; they produce the finest quality reproduction of lateral recordings.

MODELS D-120M AND S-120M are for playing standard records and transcric-D-143S AND S-140S are for long playing. microgroove records; $331 / 3$ and 45 RPM .

## THE PICKERING CARTRIDGE

## PICKERING CARTRIDGES . . .

are the choice of audio engineers throughout the world. They are universally acclaimed because of their high output, wide range performance and low distortion. They have an output of 50 milivolts at 10 cm per second and are used wherever a fine cartridge is required in radio stations, recording studios and for purposes of quality control by leading record manufacturers.

Model S-120M with .0027" Sapphire stylus
Model D-120M with .0025" Diamond stylus

Model S-1405 with .001" Sapphire stylus for long-playing MICRO. GROOVE recordings

Model D-1405 with .001" Diamond stylus for long-playing MICRO GROOVE recordings

Series 140 and 120 frequency response characare shown in the accompanying curves.

## THE PIGKERING 410 AUDIO INPUT SYSTEM

. . . is designed to provide a complete audio control center. Model 410 may be used in any high quality playback system. Three input channels are provided-one for magnetic cartridges and 2 "flat" channels for other audio circuits. A 3-position equalizer network is built into the magnetic cartridge channel and provides accurate equalization for LP, AES and 78 rpm recording characteristics. Separate bass and treble controls are also provided. These are of the step-type and permit bass and treble adjustments in 2 db increments. The tone control circuits are intended to compensate for record characteristics and for listener-environment acoustical conditions. They are not intended to compensate for amplifier and/or loudspeaker deficiencies. Model 410 is intended for use with the highest quality professional type playback equipment. The output of the Model 410 is fed from a cathodefollower circuit and will work into any high quality audio or line amplifier having a high impedance input. It may also be used with a transformer for the purpose of feeding a 500 ohm line. Because of its flexibility, low noise and low distortion level, it is ideally suited for bridging and monitoring purposes and for critical listening applications.

Playback and Tone Control Characteristics

PREAMPLIFIER model 230H

EQUALIZES THE BASS RESPONSE OF RECORDS AND TRANSCRIPTIONS AND PROVIDES THE NECESSARY GAIN FOR HIGH-QUALITY MAGNETIC PICKUPS.
The Pickering 230 H Preamplifier is designed to operate with any high-quality amplifier having a high impedance input. It is selfpowered, operates from the 115 volt AC line, and is installed by simply plugging in.
Model 230 H is unique in its accuracy of equalization, being superior to most broadcast station equipment in this respect Further, the intermodulation and harmonic distortion is lower than good engineering piactice requires in professional equipment.

The 230 H Preamplifier represents the most advanced design ever ochieved in phonograph preamplifiers, and like all Pickering Audio Equipment, symbolizes maximum performance.

## TECHNICAL SPECIFICATIONS

ГREQUENCY RESPONSE: Within 2 db from $40-20,000 \mathrm{cps}$. Compensates for 6 db per octave loss below 500 cps . . . . OUTPUT: pensates far High impedance, 2 volts average from phonograph records. (For $500 / 600 \mathrm{ohm}$ output at - 10 dbm use Pickering 600 G transformer, available as accossory equipment.). . . DISTORTION: Not more available as accessory equipment.) at normal output level. Not than 0.2 percent intermodulation at normal output level. Not
more than 0.4 percent intermodulation at -10 db over normat level. Not more than 1.7 percent intermodulation $\mathrm{ct}+20 \mathrm{db}$ over
normal level. HTJM LEVEL: -56 db below maximum signal. normal INSTALLATION: Un-t Eurnished with 6 ft . approved cord which can be conneatet to wall socket or amplitier. Input socket - standard type: matching plug furnished with unit. Output - termanai strio. Rubber shock mounts provided. DIMENSIONS, WEIGFTS AND TUBES: Size of preamplifier: 7l/2 inches long, 31,2 mes deep and $45 / 8$ inches high. Weight: ithes 6 ong, Tubes: EC4, Ext 6AU6 (any good, standard brand).

SWITCH POSITIONS

## RECORD GOMPENSATOR model $132 E$

PROVIDES THE FLEXIBILITY REQUIEED TO PROPERLY EQUALIZE FOR THE DIFFERENT RECORDING CHARACTERISTICS USED BY VARIOUS RECORD MANUFACTURERS.
The Pickering Record Compensctor permits proper equalization of the amplifier system to produce optimum reproduction of individual records; because all linear circuit elements are used it has no inherent distortion. This Compensator permits each individual record to offer all of its quality without compromise... permits getting the maximum use out of scratched and worn records. Its six positions correctly equalize for all of the established recording characteristics including microgroove and standard records, domestic and foreign.
The Pickering Record Compensator is a most important addition to any record player equipped with ar amplifier system having a high gain preamplifier, such as the Pickering 230 H . It is easily installed, and like all Pickering Audio Equipment, symbolizes maximum performance.

## TECHNICAL SPECIFICATIONS

INPUT: High impedance magnetic cartridge . . . OUTPUT: To feed into high-gain amplifier which has 6 db per octave rise below 500 cycles per second, and which has an input resistance of $; 7,000$ ohms . . . INSTALLATION: Unit can be mounted in any position (on panels up to $3 / 8$ inch thick) by means of threaded bushing. Since no power is required to operate the Record Compensator only a single connection has to be rade to a suitable preamplifier. Input connection - standard socket. Matching plug furnished with unit. Maximum distance between record compensator and preamplifier input 20 inches, cable supplied ... DIMENSIONS AND WEIGHT: Size of unit: 19/8" square by $3^{1^{1}}{ }^{\prime \prime}$ overall. less switch shaft. Weight: $6^{1 / 2}$ oz.

1 - European 78 - This group covers HMV, English Decca, FFRR 78's and American pressings of European recordings. 2 - London 33. Old LP - For London FFRR $331 / 3$, old Columbia LP's and most makes of $331 / 3$ microgroove recordings made before June 1953. 3 - Old Capitol, AES - For all Capitol recordings and most domestic 78's made before June 1953. Original AES playback characteristic. 4 - A.E.S., Victor Orthophonic, Columbia. Capitol 78, 45, 33 - The new AES characteristic for all of the latest RCA Victor, Columbia. Capitol and Decca recordings 78 , 45, 33. 5 - Maximum Highs, Mcximum Lass - No high frequency roll off - 500 cycle bass turnover. 6 - Noisy Pecords . - This position permits playing of olc noisy recoras with object hiss removed.

## PICKERING PROFESSIONAL AUDIO COMPONENTS

MAXIMIZE PLAYBACK PERFORMANCE.

PICKERING PROFESSIONAL AUDIO COMPONENTS FOR RECORD PLAYBACK

## PICKUP ARM model 190 D

## THE ONLY ARM CAPABLE OF OPTIMUM PERFORMANCE

 ON BOTH MICROGROOVE AND STANDARD RECORDS.Much distortion in playing records can be caused by an inadequate pickup arm, regardless of how good the cartridge. The most common causes of distortion inherent in the operation of conventional arms are poor tracking and excessive record and stylus wear. These undesirable quadities are a result of improper lateral and vertical moments of intertia and an incorrect relationship between the two. Further, many arms cause tracking error which creates needless distortion.

The Pickering 190-D Pickup Arm is designed to overcome the dis. aavantage of all conventional arms, the shortcomings of which have been severely accentuated by the advent of LP microgroove records. Extensive investigation by Pickering engineers disclosed that reproducer arms which perform well on 78 RPM phonograph records and standard transcriptions will not necessarily produce good results on LP microgroove records. In fact no commercially available arm was found which would meet all of the requirements for this type of service.
The 190-D Pickup Arm embodies all the features determined as significant and important to enable a high quality cartridge to meet the stringent requirements for playing LP records without distortion and free of record and stylus wear: l-The ratio of vertical-to-lateral moment of inertia is as low as posstble 2 -The vertical mass has been minimized in order to track any record without imposing extra vertical load on grooves. It plays
badly warped records just as wel as flat ones . . . 3There is no spurious arm resonance a any frequency. 4-Pivol friction is lower than 3 gram centimeters and the bearings are rugged and trouble-free. -The arm is static ally balanced about he vertical axis to he vertical axis to to jump grooves when subjected to bumping or tarin .. 6-Offset head

reduces tracking error to less than plus or minus $21 / 2^{\circ}$. . . 7 Stylus point is protected against contact with anything but the record grooves. It cannot strike the turntable mat or cener-pin. It plays all size records up to $171 / 4^{\prime \prime}$ O.D. In addition to these important design considerations, the $190 \cdot \mathrm{D}$ Pickup Arm features: Smportiant design considerations, the 190-D Pickup Arm features: turntables from $1 / 2^{\prime \prime}$ to 2 ," high . . . one-hole mounting and selfturntables from $1 / 2$ to 2 high .. one-hole mounting and selfcontained levelling screws id plug-in cartridge holder magnetic arm rest . . Model 190D, the new and smaller arm 41/4" long, when combined with a high quality manually operated turntable, requires a $17^{\prime \prime} \times 17^{\prime \prime}$ motor board.
Piekering Cartridges used with the Model 190
than is required when arm require $50 \%$ less vertical tracking force
than is required when using conventional arms.

## EQUALIzER model 163A

A loss-type equalizing network for use with the Model 161 M Pickup. It is designed to compensate for most of the commonly encountered record characteristics. Position 1flat high frequency response to over $15,000 \mathrm{cps}$. Low frequency rise to give full compensation from 500 to 40 cycles. Position 2 -flat high frequency response. Low frequency response approximately 5 db . below position 1. Position 3 -for NAB or Orthacoustic transcriptions. Position 4-Low frequencies same as position 2. High frequencies sharply attenuated to reduce surface noise. Attenuation starts at 4000 cycles. Position 5-low frequencies same as position 1. High frequencies same as position 4. 250/600 ohms output, 60 lb . Size $31 / 2 \times 33 / 4 \times 5$ inches. Shipping weight 2 lbs .

## EACH PICKERING PICKUP AND CARTRIDGE IS UNCONDITIONALLY GUARANTEED

With the exception of the stylus point, all models of the Pickering Cartridge Reproducer and Pickering reproducing equipment, are covered by an unconditional guarantee provided that the unit has not been tampered with nor subjected to extraordinary abuse. Replacement diamond and sapphire styli can be installed in cartridge reproducers for the following net charges:

## The Sonotone 2T Tin

A new and revolutionary cartridge designed to provide unequalled listening enjoyment of all records, regardless of speed or groove size.
Essentially two cartridges in one, the Sonotone $2 T$ represents the ultimate refinement of the needle change principle-only the tiny jewel tip itself is changed - thus permitting the design of a reproducer in which no unused but moving part can "eat up" the energy being transmitted by the needle.

Foremost among the many outstanding features of the new Turnover are:

Adaptability-Because of its small size and its standard half-inch mounting centers. the new Turnover will replace and modernize most three-speed cartridge installations.
Simplicity of replacement - Since only the needle rotates, the entire needle assembly may be readily removed or replaced.
Proper groove fit-Each jewel tip is accurately polished to insure an exact fit in the appropriate groove. thereby providing perfect coupling to the record.
Superior tracking ability-The high lateral compliance not only helps reduce record wear, but permits the stylus to track even the lowest frequencies at all speeds, and at a single low needle force.

High sensitivity - The new, improved ceramic element of the Turnover provides the unusually high output of 0.95 volts on the RCA 12-5-51 microgroove test record. eliminating the need for any preamplification.
Outstanding response - The wide frequency range of the new Turnover is unprecedented in piezoelectric pickups.
The curves below show the average response, without equalizers of any type, of the Turnover cartridge to the two most widely used recording characteristics. This outstanding response is pointed up in striking fashion by the dotted curve, showing the response of a typical competitive turnover type cartridge.

[^22]
# CERAMIC-the wonder element that reproduces electrically the exact tones recorded on the disc, yet is impervious to moisture and unaffected by temperature. 

## The Sonotone 1P

## IP CARTRIDGE PRICES

Response to other modern characteristics (LP, NARTB. AES. Response to other modern characteristics (LP, NARTB. AES.
etc.) is equally fine. The high compliance of this cartridge ( 1.0 microcentimeter per dynel enables the cartridge to track large
amplitude signals. It also reduces the wear of the needle and of micro-centimeter per dynel enables the cartridge to track large
amplitude signals. It also reduces the wear of the needle and of the record itself.

Replacement needles shap in easily and are available in both sapphire and diamond. The $1 P$ with 1 -mil sapphire or diamond needle ( $1 \mathrm{P}-1 \mathrm{~S}$ or $1 \mathrm{P}-1 \mathrm{D})$ is especially recommended for use on all 45 rpm record changers and all 3313 rpm record players.

Response of the $1 P-15$ to the new industry-wide (RIAA) characteristic.

The two major factors contributing to its superb fidelity are its extended frequency response and its high compliance. The wide range of this cartridge is shown in the graph below. This is the response, without equalization, to the recording characteristic now adopted ats standard by the record industry (RIAA curve).

Here is the sensational crystal pickup that provides positive protection to record and needle, even when it is dropped or slid across the record surface. Retract. O-Matic is priced to make it a practical replacement for installation on any manual record player.

The unique spring-mounted construction gives insurance against damage to cartridge, needle, or record. A slight pressure on the arm automatically lifts needle from record surface, and lets the romided "dome" absorb the shock.

List price, complete, (tone arm, cartridge, arm rest and all parts needed for installation) $\$ 6.95$.

## TAPE-DISC RECORDING ASSEMBLY

## MODEL 250

## 115 volts a.c., 60 cycles <br> List Price $\$ 77.50$

When connected with the proper amplifier, the Model 250 performs the following functions:

- RECORDS TAPE FROM RECORDS
- RECORDS DISCS FROM TAPE
- RECORDS MICROPHONE

ON TAPE

- RECORDS RADIO ON DISC
- RECORDS micRophone ON DISCS
- records radio on tape
- plays back both tape AND discs

## TAPE RECORDING FEATURES:

One hour recording time. Dual track.
Fast forward and reverse.
Fermanent magnet erase head. Turntable acts as flywheel, giving constant tape speed. Cesigned for use with $5^{\prime \prime}$ reels. Tape speed $33 / 4$ " per second. Cesigned for use with either Plastic or paper base tape. Paper base tape. ing head electrical interlock Automatically shuts off at end of tape playback.
DISC RECORDER AND PLAYBACK FEATURES:
Cuts records up to $10^{\prime \prime}$ in diamater at 78 R.P.M.

Plays 78 R.P.M. recorded dises and all 78 R.P.M. commercial records. When pivot of arm is lifted it snaps into recording position, engages lead screw, and insures proper angle for cutting stylus.
Merely push arm down for playback.
Simple to interchange cutting stylus and playback needle.
Dimensions: Width $121 / 2^{\prime \prime}$, Length $171 / 2^{* \prime}$. Depth below mounting
plate $4^{\prime \prime}$. Equipped with G.I. amooth power, dynamically bal anced four-pole motor. Net weight $10 \frac{1 / 2}{}$ lbs. Shipping weight 14

## DUAL-SPEED PHONOGRAPH MOTORS

MODEL DS - 45, 33-1/3 R. P. M.
115 volts o. c., 60 cycles
A novel $45-331 / 3$ R.P.M. rim drive, 2 -pole motor. Very compact. Employs a Neoprene belt for the $331 / 3$ R.P.M. speed. 45 R.P.M. speed is obtained cirect from rotor shaft. Speed is changed by a simple external lever movement. Specially designed and manufactured to hold wow and rumble to a minimum for excellent reproduction of the new records. Turntable shaft revolves with turntable, and is grooved for turntable clip. Available with $8^{\prime \prime}$ or $9^{\prime \prime}$ turntable, using same mounting plate. List Price, \$10.40
 complete with lurnable and monnting plate reaty for installatior. shipqine weitht-4 lus.

## MODEL DM - 33-1/3, 78.R. P. M. - MODEL DE — 45, 78 R.P.M.

115 valts a. C., 60 cycles
Novel and ingenious rim drive, 2-pole motors. Very compact. Employs a Neoprene belt for slow speeds. 78 R.P.M. speed is obtained direct from rotor shaft. Speed is changed by a simple external Icver movement. Specially designed and manufactured to hold wow and rumble to a mininum for excellent reproduction of new records. Turntable shaft revolves with turntable, and is grooved for turntable clip. Available with $9^{\prime \prime}$ turntable.

List Price, $\$ 10.40$
Dimensions: length-3 $18^{\prime \prime}$ : Width—2 $1_{4}^{\prime \prime}$ : Depth—2 $3 / 8^{\prime \prime}$ below mounting plate. Furnished conplete with $9^{\prime \prime}$ turntalile amb mouming plate ready for installation. Shipping weight- 4 lhe

## THREE-SPEED PHONOGRAPH MOTORS

## DELUXE THREE-SPEED RIM DRIVE FOUR POLE MOTOR

MODEL DSS—78, 45, $331 / 3$ R. P. M.

115 volts a.c., 60 cycles

Model DSS

Simple speed change is accomplished by shifting the idler wheel vertically to the appropriate diameter on the motor shaft for desired turntable speed. When shifting speed selector to off position, a switch turns the motor off and the idler whecl is disengaged from the motor shaft. The driving motor is of the four-pole, shaded-pole type resulting in absolute minimum of stray ficld radiation-ideally suited for use with all types of pickups including magnetic. Motor uses oilless bearings and motor is dynamically balanced to a fine degree.
Precision construction throughout-low friction oilless turntable bearing-radially operated shift lever-10 inch turntable.

List Price, $\mathbf{\$ 2 4 . 5 0}$
 complete with 10 inch turntithle, speed indicator dial, 4 , RPM record adapter, off-on switch, and monting phate rody for installation. Packed in individual cartons. ship. ping Weight (ix/2 lbs.

## THREE SPEED TWO POLE PHONOGRAPH MOTORS

MODEL SS — 78, 45, $331 / 3$ R. P. M.

115 voits a.c., 60 cycies
Very compact, threc-speed, phonograph motor using the vertical idler shifting principle. Idler wheel drives the turntable dircetly from the appropriate step on the motor shaft. Idler wheel is disengaged from motor shaft during non-operating periods. Precision construction throughout. Uses a ribbed main mounting plate to assure stability and proper relationship of all components. Rumble and wow are held to a minimum. Motor uses oilless bearing and dynamically balanced rotor. Turntable shaft revolves with turntable and is grooved for turntable clip. Available with 8 inch turn table. A 45 RPM record adapter and a speed indicator dial are furnished with each motor.

Model SS
 complete with turntahle and monting phate ready for installation. lacked in individual cartons. Shipuing Weight \& lbs.

MODEL TR - 45, 78, $331 / 3$ R. P. M.
Deluxe three-speed rim drive, 2 -pole motor. Turntable speeds of $331 / 3,45$ and 78 R.P.M. are secured through three separate pulleys running on oil-impregnated bearings and mounted on a turret plate. By means of a simple lever, the desired pulley is brought into contact with the idler wheel. The two pulleys not in contact with the idler wheel remain stationary. Symmetrical electrical and mechanical design results in minimum stray field and maximum performance. Ingenious locking device holds turret plate firmly in driving position at any of the three speeds. Available with $8^{\prime \prime}$ or $9^{\prime \prime}$ turntable. A 45 R.P.M. record adapter and speed indicator dial are furnished with each motor.

List Price, \$12.10
Model TR
 complete with turntable and mounting plate ready for installation. Shipping weight-4 lbs.

## DUAL-SPEED PHONOGRAPH MOTORS... (continued)

## MODEL DR - 78, 33-1/3 R. P. M. - MODEL DZ - 78, 45 R. P. M. MODEL DV - 45, 33-1/3 R. P. M. 115 volts a. c., 60 cycles

Deluxe rin drive, 4 -pole motors with a simple and positive mechanism for shifting from one speed to the other. Speed change is accomplished by means of an external push-pull lever. An ingenious mechanism raises and lowers the entire iciler assembly, disengages the idler wheel from the two-diameter motor shaft and moves the idler wheel from one diameter to the other. At the slow speed the idler wheel engages the small diameter of the motor shaft; at the fast speed it engages the large diameter. List Price, \$21.75

 plete with $10^{\prime \prime}$ turntable and mounting plate ready for installation. shipping weight-is $1 / 2$ lhs

## TAPE, WIRE AND DISC RECORDING MOTORS

## MODEL D-10

Heavy duty 4-pole, shadel pole induction motors. $1 / 20$ H.P. Free speed: 1740 R.P.M. Maximum running torque: 11 ounce-inches.
Features include: A locating and locking arrangement for both top and bottom ccevers which assures high accuracy in alignment of rotor within the stator bore; new air iatake; dual cooling fans and self-aligning, oil-impregnated sleeve bearings.
These high torque motors are used in practically all tape, wire and disc recorders now being manufactured.

List Prite, \$16.75

115 volts a. c., 60 cycles

## HOME RECORDING AND PHONOGRAPH ASSEMBLIES

MODEL GI-R85L - LP, 78 and 33-1/3 R. P. M. with conversion spring for changing the 33-1/3 R. P. M. speed to 45 R. P. M.

## 

Model GI-R90L is the standard model which has been in the GI line for several years. It cuts 120 lines per inch, and plays back records with the standard needle pressure.
The Model GI-R8sL incorporates a dual purpose pickup cartridge and an excellent and simple adjustment for playing the LP records and standard records. It cuts 160 lines per inch. In a separate envelope is furnished a conversion spring fo: changing the $331 / 3$ R.P.M. speed to 45 R.P.M. with mounting instructions printed thereon.
Both models cut records up to $10^{\prime \prime}$ diameter . . . play records up to $12^{\prime \prime}$ diameter. To shift motor from one speed to the other, merely turn the speed change dial. Beautiful walnut wood grain on steel base plate. Streamline plastic trim on pickup and cutter arm attractively engraved with legends "Reproducer" and "Recorder". Turntable recessed into we"l in base plate. Merely lower cutting arm over record disc to start recording. Convenient, depth-of-cut adjustment. Dynam-ically-balanced, rim drive, 4-pole motor. Compensating switch operated by speed change dial.

Assembly includes dual speed motor; $10^{\prime \prime}$ weighted turntable; crystal cutter; crystal pickup; compensation switch; pickup and cutter arm rests; drawn steel base plate with formed down edges.

Above prices include erystal cutter.
For (M41-10) mognetic cutter odd $\$ \mathbf{2 . 0 0}$ each.
Dimensions: Base plate- $15^{\prime \prime}$ wide; $111 / 2^{\prime \prime}$ front to back; height above lower edge of hase plate- $23 / /^{\prime \prime}$; depth below lower edge of base plate- $37 / \mathbf{s}^{\prime \prime}$. Packed in individual cartons. Shipping weicht- 17 lbs.

## ALLIANCE PHONOMOTORS

## Phonomotors

New three-speed phonomotors for record players $331 / 3,45$ and 78 RPM records New single speed 78 RPM phonomotors

## General Purpose Motors

Alliance makes a variety of fractional horse-power, shaded pole induction motors to service many specific small load applications. One of the most popular is Model B. Others are used not only in the radio-phonograph and recording industry, but in a wide range of product classifications. The motors illustrated in this catalogue are standard models designed for practical utility and to meet the maximum number of mechanical and electrical requirements for motors in this class.
(Typical uses are electranic, mechanical, electric cantrals - radia tuning and turn-table drives - dise tape and wire recarderrs - fans - heating cantrals - cain aperated mechanisms - miscellaneaus uses.)

This deluxe 78 RPM phonomotor assembly is quiet and extremely smooth in operation. It embodies all of the superior features which made the original Model 80 famous, with a new, more powerful motor.

## ALLIANCE <br> 78 RPM PHONOMOTOR MODEL JT <br> Low Cost -Ideal for Hi-Fi

Model JT is available with 8 inch and 9 inch turn-table diameters and has the same basic motor as used on Model JPT with turn-tables available in color choice. Also available for motor winding for use in series with 25L6 vacuum tube filament. Rotating spindle revolves with turntable. Features shockproof vibration mounting - a truly fine performing unit made to highest precision standards.

## ALLIANCE PHONOMOTORS

MODEL JPT - A campletely new design. Relains all af the features af ariginal madel, which became the standard of the industry, with many added impravements. Adequate reserve pawer in matar, Eliminatian af stepped pulley reduces passibility of waw and rumble. Added neutral pasitian an shifter lever remaves drive shaft fram cantact with rubber tire when instrument is nat in use. Attractive plastic knab an shifter lever available in calar. TURNTABLES AVAILABLE IN CHOICE OF COLORS. Furnished with plastic 45 RPM center disc. Can be furnished with winding far aperatian in series with 25 L6 fube
filament if desired.. Furni:hed with sperd indicatar escutchean plate. Same maunting plate cut-aut as single speed 78 RPM unit illustrated, thus praviding greater versatility far manufac. turers af phanagraph equipment.

The madel JPT pravides unimpaired perfarmance at all speeds. Siagle lever shifts and indexes speeds with freer mavement. Electranic dynamically balanced ratar. Vibratian-praaf mauntings. Minimum rumble and hum. Unexcelled sseed regulatian. Designed ta meet U. L. requirmments. Oicupies minimum space. Millians have been sald.

MODEL JP - The mast econamical player mator an the market. Available with $61 / 2^{\prime \prime}, 8^{\prime \prime}$ and $9^{\prime \prime}$ turntable diameters. Same basic matar as used an JPT madel. Same maunting cutout as three speed unit illustrated. Turntables available in calor chaice. Alsa available with matar winding far use in series with 2516 vacuum pube flament. Scintered metal tip an turntable spindle revalves with recard.

## Alliance SINGLE-SPEED PHONOMOTOR MODEL JP

List Price
$\$ 6.05$

Deluxe unit alsa available. Uses raiating turntable spindle. Shock praaf vibratian maunt ng. Same raunting cut-aut requirements as ather units shawn. A truly fine perfarming unit. Highest quality - lawest price.

## ALLIANCE MOTORS

## MODELJS MOTOR-

This new model is an extremely versatile motor of high efficiency and compact design. In realtiy JS is a "big brother" power-wise to our famous, popular MS illustrated below.

## MODEL MS MOTOR

## A LEADER FOR MANY YEARS

The Alliance Model MS motor is ideal for driving fans, fimers, or rotisseries, and other applications. It is an adaptation of the quiet, smooth running motor which is used to power the Models MP8, MP9, and MP10 Phonomotors. It measures $31 / 8^{\prime \prime} \times 2^{\prime \prime} \times 13 / 4$ " not including the $7 / 16^{\prime \prime}$ long shaft extension which has a $3 / 16^{\prime \prime}$ diameter. Rotation is clockwise facing the shaft extension. Its self aligning bearings are of the porous bronze oilless type. Operating over a wide range of $A C$ voltages from 24 to 250 and frequency of 40,50 , or 60 cycles, this compact lightweight motor can be incorporated as the vital power source in all kinds of electrical and mechanical devices. Large oil wicks provide lifetime lubrication.

# ALLIANCE MOTORS GENERAL TYPES FOR SMALL LOADS 

## MODEL B Shaded Pole Induction Motor

## FOR HI FIDELITY PLAYERS FANS - RECORDERS - HEATERS and OTHER DEVICES

Model B is a 4-pole shaded pole induction motor, especially adapted for such devices as fans, unit heaters, blowers, air circulators, disc, tape and wire recorders. Comes in three standard lamination stack thicknesses. The range of power is from $1 / 100$ h.p. up to $1 / 25$ h.p. Where necessary the motor can be supplied completely enclosed.

Important advantages for Model B are economy of operation, low induced hum, low magnetic field, cool running, flexible power range and compactness. A real Hi-Fi power plant.

SPECIFICATIONS

## MECHANICAL

$33 / 8^{\prime \prime}$ square, with length of $21 / 8^{\prime \prime}$ over the end bracket for the $11 / 4^{\prime \prime}$ stack. $5 / 16^{\text {th }}$ diometer shaft.
Porous bronze, oillness type, self aligning bearings - amply proportioned, with large oil reserves.

Semi-open or fully enclosed construction. Can be supplied with oil lubes if required.

Four No. 10-32 bolts equally spaced for end mounting or motor can be supplied with mounting bushings on end covers.
$3 / 4^{\prime \prime}, 11 / 4^{\prime \prime}$ and $13 / 4^{\prime \prime}$ lamination stacks depending on rating required.

Max. weight - approx. 5.6 lbs. for largest stack thickness.
Single Phase, 4-pole, shaded pole nduction motor with squirrel cage rotor.
Approx. $1 / 25$ h.p. for fons - approx. $1 / 40 \mathrm{~h} p$. for mechoniral loads without external cooling. Entire power range runs from 1/100 h.p. to 1/:5 h.p. for seni-enclased construcion.
Starting torque opprax. $40 \%$ of torque al full load rating. 1550 r.p.m. full load speed
A. C. only - 115 valts, 60 cycles. Clockwise or counter clockwise rotation - rol reversible. Can be weund for 50 cycles ond aiher voltages.
Internal cooling fans on each end.

## FERRO-SHEEN irish SHAMROCK \#300

The ultimate in professional magnetic recording tapes for broadcast and studio use. A premium quality, wax-free, pre-selected tape, manufactured by the exclusive irish "FERRO-SHEEN" process which results in recuced read wear, extended frrquency range and reduced "dropouts." Has a 5 -foot Mylar leader and comes in a dust-prooi polyethylene bag. I. 5 mil plastic base.

| Size | Reel | Hi-Fi Net |
| :---: | :---: | :---: |
| $600^{\circ}$ | plastic | 2.40 |
| $1200{ }^{\prime}$ | plastic | 3.80 |
| 2400 | hut only, NART8 | 6.90 |
| $2400{ }^{\prime}$ | metal or fiberglass. | 8.60 |
| 4800 | hut only, NARTB. | 13.80 |
| $4800{ }^{\prime}$ | meral or fiberglass | 17.40 |

irish GREEN BAND
PROFESSIONAL \#211
Professional quality tape for the broadcast sta tion, recording studio and for all applications where professional standards are required. Every reel inniformly manufactured to the exact standards of the NARTB 1.5 mil plastic base
Size Reel Hi-Fi Net

${ }_{2400^{\prime}}$ Pastic NARTB hub only $\quad 3.30$

2400 NARTB nuw only
$2400^{\prime}$ NARTB $101 / 2^{\prime \prime}$ metal $\quad 7.71$
4800 NARTB hub only
$4800^{\circ}$

FERRO-SHEEN irish LONG-PLAYING TAPE \#600
This new FERRO-SHEEN tape, on I-mil Mylar has the same superior featuies of Shamrock $\# 300$. Extends the playing time $50 \%$ over conventional type, on the same size reel.

| Size | Reel |  | Mi-Fi Net |
| :---: | :---: | :---: | :---: |
| 225' | plastic |  | \$ 1.16 |
| ${ }^{450}$ | plastic |  | 1.85 |
| 900' | plastic |  | 3.05 |
| $1800^{\prime}$ | plastic |  | 5.50 |
| ${ }^{3600}{ }^{\prime}$ | NART8 | hut only | 11.00 |
| $3600{ }^{\prime}$ | Tiberglas |  | 12.90 |
| $3600^{\circ}$ | NARTB | 10\%: metal... | 12.90 |
| $7200{ }^{\prime}$ | NARTB | hut only | 21.97 |
| 7200 | NARTB | 14" metal | 26.23 | NAR B adaptor needed. irish Long Play tape also available on acetate kase.

irish
BROWN BAND \#195

Quality, plastic-base tape, ecenomically priced, specifically designed to reproduce the frequency range between 100 and 8000 cps . Recommended. for all non-hi-fi applications in homes, offices, schools and churchtis.
Size
Reel
Hi-Fi Net
plastic $\$ 1.50$
1200' plastlc

FERRO-SHEEN irish SOUND PLATE \#220

The super-tough recording tape pioneered by Orradio, now on 1.5 mil Mylar base, made by the FERRO-SHEEN process. For all applications requiring abnormal physical strength, such as safeguarding tape-master, etc. Recommended for electronic photography, telemetering, etc.
Size Reel Mi-Fi Met

$1200^{\circ}$ plastic ................. 5.50
1400 NARTB hub only 9.00
2400 fiberglass 10.75
2400 年 $101 / 2^{\prime \prime}$ retal 10.75

irish
COLLECTOR'S CABINET
Solves the problems of reel storage and identification. Incluces three $600^{\prime}$ reels of irish GREEN BAND tape, one roll splicing tape, 150 roll of le.sder stock, 20 irish reel tabs and one each empty $600^{\circ}$ and $150^{\circ}$ reel.
Hi-Fi Net

Musicians, engineers, and music lovers are replacing their old-fashioned phonograph pickups with the sensational new ESLelectrodynamic cartridge - because only ESL reproduces the full realism and naturalness of the original sound.

## ESL CONCERT SERIES CARTRIDGE • For the andio coииоisseur

Never before-a magnificent cartridge designed for all fine arms only, with no sacrifices for record changer operation. Built around the same coil as the Professional Series, which it closely approaches in performance, the Concert Series is so superb that it is used for quality control by leading record manufacturers. Not recommended for record changers.
Diamond: ESL-CI (.001") or ESL-C3 (.00;") \$35.95

Breathtaking perfection of reproduction for the most critical broadcast, recording, and laboratory use is now made possible by this superlative reproducer. Utilizing the same principles as the other ESL cartridges, the Professional Series is the ultimate in compromise-free design, plus matchless Danish hand craftsmanship. This arm and cartridge must be used together.
ESL-310 arm ( $15 \frac{3}{4}$ ") with dianond cartridge $\$ 106.50$
ESL-310 arm ( $15 \frac{3}{4}$ ") with diamond cartridge
Additional cartridges, any stylus radius $\$ 49.50$
年

## ESL STANDARD SERIES CARTRIDGE For high guality iustallatious

This eartridge is revolutionizing home music reproduction with its brilliant performance, its rugged suitability for any arm or record changer, and its extraordinary compliance which prolongs record and stylus life. Like all ESL cartridges, the Standard Series has the exclusive, patented D'Arsonval movement which ensures clean, faithful reproduction unapproached by other pickups.
Dinnond: ESL-121 (.001") or ESL-131 (.003") \$29.95 Sapphire: ESL-ı11 (.001") or ESL-101 (.003") \$14.95

## -ESL MATCHING TRANSFORMERS • For flexibility of application

A high quality ESL step-up transformer is recommended for use with each ESL cartridge: the 201 Series for preamplifiers having low level inputs, and the 211 with insensitive amplifiers.
ESL-201 7.5 mvoutpuat 50 ohms, or 15 wvat 200 ohms $\$ 7.50$ ESL-201M An ESL-201 mounted; wired for 200 ohm ontput and instant plug-in conисction $\$ 11$
ESL-20IF Same as 201 M , plus supersonic filter and switch $\$ 15$
ESL-2 11 . 2 volts output at 90,000 ohms $\$ 6,25$

## CINCH BATTERY PLUGS

## EQUIFLEX ALL METAL VIBRATION ISOLATORS

Equiflex Vibration Isolators consist of a double array of springs arranged to form two opposed cones, the springs serving to join the outer plate member resiliently to the inner tubular member. Within the two cones of multiple springs there is a damper consisting of two floating metal stampings held apart by an internal compression spring. The damper serves to keep the amplitude at resonance within sate limits. The mounting incorporates safety rebound washers attached to each end of the inner tubular member, thus taking care of overlcad and shock conditions and keeping the equipment within proper limits.
With this type of construction, vibration is controlled both verically and horizontally at the rated load the mounting deflects $1^{1} 0^{\prime \prime}$ (within a tolerance of zero to $10 \%$ ), whether the load is placed in the apial or the radial direction-vertical.y (either up or down), laterally (sideways. fore and aft. or diagonally). with the spring rate linear up to $1 / \mathrm{B}^{\prime \prime}$ deflection. The spring rate then stiffens slightly up to the maximum movement. The safety washers are designed to provide additional spring deflections when the mounted equipment is subjected to shock loads.
These units are made of steel finished in cadmium with a dichromote dip and will withstand a 100 hour salt spray test. Mountings will withstand 15 G shocks without damage and will keep equipment captive up to 30G's. Two types of mounting are available. Square Plate Mounting and Circular Cap Mounting as illustrated.

## SERIES 101 PLUGS

The entire No. 101 Series of Plugs are identical with the exception of the cable ferrule which is furnished in four sizes as listed below. All metal parts are of brass. These Plugs fit all of the No. 101 Series Sockets. A low loss Plug and Socket ideal for high frequency connections.

## SERIES 101 SOCKETS

The No. 101 Series Sockets are furnished in three types as shown below. Base is of Brass with Bright Nickel Plated finish. Brass contact is Silver Plated. Insulation of low loss natural color XXX Bakelite. Meets Navy Specifications. The S.101-D is similar to the S-101 except that the Bakelite is recessed in the base. S-101-D Mod. is the same as S-101-D except that two sides of the base are milled as shown. Mounting Holes No. 101--No. 41 drill on $1 \mathrm{~h}^{\prime \prime}$ centers. Mounting holes No. 101-D and 101-D Mod. Nc. 30 drill on $13^{\prime \prime}$ centers.

SERIES 201

PLUGS
The No. 201 Series Plugs are of the same design as the No. 101 but are of heavier stock and larger. Made in one size only with $3 / 8^{\prime \prime}$ ferrule. All metal parts are of Brass, same finish as No. 101 Series and Wax Impregnated Ceramic insulation. Overall length $1 \frac{9}{15^{\prime \prime}}$. Prong diameter $\frac{5}{32}{ }^{\prime \prime}$. Fits only the 201 Socket.

3/4"-27 thread.

## SOCKETS

The 201 Socket is similar to the S-101-D except larger. Brass base is Bright Nickel Plated. Brass contact is Silver Plated. Insulation is of low loss natural color XXX Bakelite. Both Plug and Socket meet Navy Specifications.
Mounting holes - No. 30 drill on $1^{\prime \prime}$ centers.

List Price $\stackrel{E}{\mathrm{Ea} .}$

## SERIES 202

## PLUGS

## SOCKETS

The 202 Series Plugs and Sockets are made in two contacts only: Metal parts are of Brass with Bright Nickel Plate. Instalation is of Molded Bakelite. Phosphor Bronze "Knife Switch" type Socket Contacts engage both sides of flat Plug Contacts-double contact area. Formed Fibre linings in caps. Polarized. Knurled nut has $3 / 4^{\prime \prime}-27$ thread. Socket Mounting Holes. No, 30 drill on l" centers.
The S-202-CCT-THR has been added to this series and when used with the P-202-CCT will make an ideal microphone

S-202-CCT-\$0.91 (Socket instead of Plug)
P-202-FHT- $\$ 0.72$
(Same as above less Cable Clamps)
S-202-FHT-\$0.74

S-202-B-S1.05
(Socket for Base
Mig.)
P-202-B- $\$ 1.02$
(Same as above except with Plug)

S-202.CCT-THR-\$1.21 (as shown above)
Used with P-202-CCT as an extension connection

## "300" SERIES PLUGS AND SOCKETS <br> General Specifications

Small in size with good separation between contacts. Made in sizes of 2 to 33 contacts. All Plugs and Sockets are polarized so that Plugs of one size cannot fit into Sockets of another size. Body of Molded Bakelite. Phosphor bronze "knife-switch" type Socket contacts engage both sides of flat Plug contacts-double contact area. Plug prongs are $5 / 32^{2 "}$ wide by $3 / 6_{4}{ }^{\prime \prime}$ thick. Formed metal caps are finished in Black Crystal. Fibre linings for caps
are also formed. Plugs and Sockets arranged for either cap or panel mounting. Two contact Plugs and Sockets are round as shown at the right, all others are rectangular. Illustrated are the P-302CCT and S-302-AB. Standard 24 to 33 contact Plugs have a special long polarizing pin in approximate center position to assist in correct insertion and removal.

## "400" SERIES PLUGS AND SOCKETS <br> (Formerly "Heavy Duty")

General Specifications

Made in 2, 4, 6, 8, 10 and 12 contacts. All Plugs and Sockets are polarized. Body of molded Bakelite. Phospher bronze "knife-switch" type Sockel contacts engage both sides of flat Plug Contacts-double contact area. Plug prongs are $1 / 4 "$ wide by $\frac{1}{6 \prime \prime}$ thick. Caps are finished in Black Crystal. and equipped with fibre lining. Plugs and Sockets arranged for cap or panel mounting.

Note: Standard angle brackets cannct be attached to S.402.AB due to narrow block and insufficient material for screw threads. A special bracket is supplied (Type 46) See illustration. The Socket fits into this bracke' which is attached tc panel.

Check the No. 2 inj Serizs Plugs and Sccke's ias:ed on. pages F-42 and F-43 which are simtiar to the 400 Series except their design increases the arespaq distances and theroto: = $=00$ g't higher voltages.

## CINCH-JONES SALES • DIVISION OF CINCH MANUFACTURING CORPORATION

## "2400" SERIES PLUGS AND SOCKETS

The 2400 Series Plugs and Sockets are designed for highest electrical and mechanical efficiency, and although they carry the same rating as the 400 Series, they will actually handle considerably higher currents due to their improved construction.
An entirely new type of socket contact has been designed. Four individual flexing surfaces make positive contact over practically their entire length. Note in the illustration how they exert maximum pressure at every point. Also note unique method of anchoring terminals in the block--they cannot be moved up or down.
This design provides greater contact surface, increased pressure, with smoother action.
Socket contacts are of phosphor bronze, cadmium plated. Male contacts are of heavy brass $1 / 4^{\prime \prime} \times 1^{\frac{1}{6}}{ }^{\prime \prime}$, cadmium plated.

Solder connecting side of Plug Body showing Recessed Pockets with Barriers around conacts. Plua contacts are also in Recessed Pockets on opposite side.

Solder connecting side of Socket Body showing Recessed Pockets with Barriers around contacts. Socket contacts are also in Recessed Pockets on
opposite side.

The contact to contact, and contact to ground distance has been considerably increased by mounting the contacts into recessed pockets with a Bakelite barrier surrounding and extending above. This method is used on both the top and bottom sides of both plugs and sockets, greatly increasing the leakage path.
The outside dimensions of corresponding plug and socket bodies are the same and can. therefore, be changed from brackets to caps, or vice versa
Two styles of brackets are furnished "SB" (shallow bracket) for flush mounting and "DB" (deep bracket) for recessed mounting. Caps are furnished with flared hole in top or end or with cable clamps in top or end. Unless otherwise specified the following size cable entrance holes will be supplied:

As noted above, the 2400 Series is furnished in $2,4,6,8,10$. and 12 contacts. All plugs and sockets are polarized.
Plug and socket bcdies are of molded Bakelite. The fibre 'inings in the caps are the same for both plugs and sockets. A shoulder extends around the face side of plug and socket presenting a finished appearance when mounted in bracket or cap.
On account of this shoulder extending around the entire face of the body blocks, angle brackets cannot be used with the 2400 Series Plugs or Sockets.
The entire 2400 Series is interchangeable with the 400 Series as 2400 Plugs fit corresponding 400 Sockets, and 400 Plugs fit corresponding 2400 Sockets.

SOCKET-With Cable Clamp in End

## acrech-ones sales.

## "500" series plugs and sockets

Designed for 3,000 volts and 25 amperes per contact. Circuit characteristics, however, may alter this rating one way or the other.
Long leakage path from terminal to terminal, and terminal to ground. Contacts are brass and phosphor bronze, silver plated. Metal parts of caps and brackets are steel, parkerized (rust-proofed). Plug and socket blocks are interchangeable in caps and brackets.
All sizes are polarized in a manner 10 prevent a smaller plug being inserted in a larger socket. Thus different sizes may be used on one installation without danger of making wrong connections.
Extreme care has been taken to make terminal connections under cap very accessible both for original wiring and subsequent inspection. The cap is insulated with canvas bakelite. Plug prong cross section $\frac{5}{1}{ }^{\prime \prime} \mathrm{x} \frac{3}{32^{\prime}}$
IMPORTANT: For safety with high voltages DEEP BRACKETS should always be used on one plug or socket, when the other plug or socket has a CAP. SHALLOW BRACKETS are for use only in connecting two units, each unit having plug or socket with SHALLOW BRACKET.

## LOCKS FOR 500 SERIES pLUGS AND SOCKETS

No. 500-L Locks
Locks shown above are used in connection with any DEEP BRACKET and cap combination

The locks securely hold the units together, but they can be released instantly.
The mounting plates are made to fit all DEEP BRACKETS, and are fastened by the same screws or rivets that hold the deep brackets to the panel. Can not be used on shallow brackets. Sold in pairs only.

Cable entrance: Because of the great variation in type and size of cables, we have considered it best not to supply cable clamps of any kind. The cap end is made to accommodate standard $B X$ clamps which may be obtained at any electrical jobbing house. The cap end will be furnished with round hole from $1 / 2^{\prime \prime}$ diameter and $11 / 4^{\prime \prime}$ diameter in steps of $1 / 8^{\prime \prime}$. if the size required is qiven on order. If no size is given, plain cap end with center punch locating center will be shipped.

## BARRIER TYPE TERMINAL STRIPS

Increased insulation is provided by having Barriers placed between each Terminal. These Barriers follow arcund the edge of the Strips and terminate at the base. They not only make a long leakage path but prevent direct shorts from frayed wires at the terminals. Mcunting holes are at the ends as illustrated. The base is molded Bakelite. The Eyelets and Binder Screws are of brass, nickel plated. The $3 / 4 \mathrm{~W}$ or Y terminals are of brass, hat tin finish.

## FANNING STRIPS FOR CONNECTING TO BARRIER TERMINAL STRIPS

Jones Fanning Strip Terminals are of $0.032^{\prime \prime}$ Brass, Cadmium Plated. The Bakelite strips are furnished with a hole in either the right or left end for fastening the cable with a cable clamp or lacing twine. Simplifies cable or harness wiring, assuring positive connections. Makes replacement of units an easy matter and assures correct connections after servicing.

No. 6-160-L

## THE 160 SERIES

The following Fanning Strips fit the 140 Series Barrier Strips. Terminals are mounted on $3 / 32$
Bakelite, $1 / 2$ " wide and on $3 / 8$ Bakenters.

On small sizes Lacing Twine can be used for anchoring cable to the Fanning Strip instead of Cable Clamp.

## for Power, Signal and Control Circuits in Electronic Equipment

"AN" stands for Army-Navy and these services have provided the official definition of the AN connector: to provide a detachable connection in one or more electrical circuits; a complete AN connector consists of two mating units-a plug assembly and receptacle assembly.

Amphenol AN connectors, although designed and approved under government specifications for use by the armed forces, are ideal for commercial and industrial use where the same dependability is mandatory. These modern, efficient connectors are being used by practically every part of the giant electronics industry.

features of AMPHENOL AN CONNECTORS

Contacts

Dielectric

Finish

All contacts are gold-over-silver plated for improved appearance and better electrical and mechanical sarface. Gold assures indefinite, like-new shelf life. Gold-plated conticts make soldering eatsier and faster - no pre-tinning of solder cups is :equired.

Inserts are molded of Amphevol high-strength 1-501 Blue dielectric material. This material has ligh impact strength, exceptionally low loss and low shrinkage.

Chromate conversion finish over cadium. Extremely high corrosion resistance as well as excellent corductivity.

ORDERING AN CONNECTORS
The AN series of connectors includes thousands of combinations, but the functional numbering system permits easy and accurate ordering. To illustrate the system employed a typical part number, AN $3100 \mathrm{~A}-16-11 \mathrm{P}$, is exploded and analyzed.
\%)_Standard "AN" indicates Army-Navy part number has O__SHELL TYPE AN specifications or exclusive Amphenol design 3100 wall receptacle, 3101 cable receptacle, 3102
box recentacle. 3106 straight plug. 3107 quick

- ${ }^{\text {D SHELL DESIGN }}$
$\overrightarrow{\text { a) — S }} 12 \mathrm{E}$

 O- INSERT STYLE $P$ for pin contacts, $S$ for socket contacts.

AN CONNECTOR AVAILABILITY
The latest issue of the Distributor AN Connector Price List is the authoritative source for connector availability.

## AN CONNECTORS FOR POTTING

Potting, injecting a synthetic rubber sealant in a mold on the back of a connector, is a superior method of waterproofing.

## QUICK REFERENCE INSERT SPECIFICATIONS

CABLE CLAMP

Sturdy amphenol AN3057 Cable Clamp supports cable or wire at the plug or receptacle, prevents twisting or pulling at soldered connections.

These unique spring-ribbon contact connectors are finding increasing popularity throughout every part of the electronics industry. As a result of continuing AMPHENOL development work the Blue Ribbon line has been expanded to include keyed shells and lateh-lock type cans-the complete line now offers the following outstanding features:

- Visual aligmment is not required; ideal for multi-circuit connection, switching or re-routing;
- Spring contacts provide quick disconnect with low insertion and withdrawal force requirements.
- Insert material is famous amphenol diallyl phthalate blue which meets government specifications MIL-P-4389 and MIL-P-14D. - Contacts are finished with gold over a silver base plate, will not corrode, are easy to solder.
- Molded-in mounting plates are corrosion resistant passivated stainless steel.
- Available in latch-lock cans for cable-tochassis applications.

26.4201-85 $\quad 26.4101$ - BP

Other shell key combinations analidble require set up charge.

MINIATURE HEXAGON CONNECTORS

| Contacts | With <br> Hex. Nut | With <br> Locking Clip | With <br> Hood \& Clamp |
| :--- | :---: | :---: | :---: |
| 4 pin | -- | $26-214$ | -- |
| 4 socket | -- | -- | $26-215$ |
| 5 pin | 26.010 | $26-216$ | $26-217$ |
| 5 socket | 26.011 | $26-218$ | $26-223$ |
| 7 pin | 26.191 | $26-197$ | 26.195 |

| 9 pin | 26.012 | $26-219$ | 26.220 |
| 9 socket | 26.013 | $26-221$ | $26-222$ |

For interconnection of miniature electronic equipment; interchangeable hardware and contacts. 1-501 dielectric, goldplated contacts; all hardware is solid brass, nickel-plated.

AMPhe： R ． RF connectors are avail－ able in every popular series desig－ nation－the most complete line ever offered for military and commercial use．There are literally thousands of applications existing for these versatile connectors and more are being discovered every day．Any company engaged in electronics will concur．
Finest materials，craftsmanship as－ sembly，strict quality－control are the reasons for the outstanding rep－ utation of AMPHENOL RF connectors plus a complete engineering serv－ ice that is always available to our customers．

"Building to the future of Electronics"

© MODERN DESIGN QWIKS
Newest, most efficient, most attractive connectors ever offfered for microphone use. Gold-plated contacts, 1-501 Blue dielectric, satin-nickel finish contribute to the beauty, the efficient performance of the new QWIKs. Instant connect, disconnect-just click them in!

CCSERIES 80 One and two contact connectors designed for microphone applications; assure positive connections free from noise, leaks or shorts.

| One Contact <br> AMPHENOL Number | Description | Two Contact <br> AMPHENOL Number |
| :---: | :--- | :--- |
| $80-\mathrm{M}$ | Male plug | $80-\mathrm{MC2M}$ |

(A) SINGLE PRONG PLUGS

Bakelite plugs, black or red; for use with Tip Jacks.

| AMPHENOL | Description |
| :---: | :---: |
| 71-1S | For $3 / y^{\prime \prime}$ socket |
| 71.1M | For $1 / 1 /{ }^{\prime \prime}$ socket |
| 71-11 | For $s^{\prime \prime} \mathbf{z}^{\prime \prime}$ socket |

(B) TIP JACKS

Bakelite, black or red. Mount in $3 / 8^{\prime \prime}$ hole. AMPHENOL

| AMPHENOL Number | Description |
| :---: | :---: |
| 78.15 | For $3 / g^{\prime \prime}$ plug |
| 78.11 | For $3 / z^{\prime \prime}$ plug |
| 78.14 | For $1 / 9^{\prime \prime}$ plu 3 |
| 78-1P | For . $080^{\prime}$ phone tip |

(C)MAGIC EYE ASSEMBLIES
(B) $;$

Completely wired with escutcheon and hardware. Tube not included with either.

(D)UNIVERSAL GRID CAP

For use with tube grid caps from $1 / 4^{\prime \prime}$ to 3/8" diameter.

(E) TAP CHANGE SWITCH

8 -position single pole continuous switch with white markings clearly visible in window cap. Side set-screw for locking switch arm.

© CRYSTAL HOLDER SOCKET
Mica-filled "bakelite; for crystal holders having $21 / 8^{\prime \prime}$ prongs on $3 / 4^{\prime \prime}$ centers.

(G)COIL FORMS

Molded of amphenol 912-A polystyrene for use in receivers and low-powered transmitters.

| AMPHENOL <br> Number | Description |

## TEFLON DIELECTRIC

RG-/U coaxial cables with teffon dielectric operate without difficulty at temperatures from $-73^{\circ} \mathrm{C}$. to $-260^{\circ} \mathrm{C}$. Teflon is outstanding not only because of its efficiency at high temperatures but also because of its extreniely low loss and high voltage breakdown.

CANNON "TYYE XK" PLUGS , NND IRECEPINCLIAK-A quality line of Comnectors, sanue inserts and similar in design to the "Type X" Series, but equipped with the fast-acting, sturdy Acme threaded coup)ling ring and therefore, ideal for use on equipnent which is subjected to consid erabte vibration and tension on cables, sueh as on sound trucks and other portable units.

EXPLODED VIEW XK-4-11

The Cannon Electric Type "XL" Connec tor combines various features found in other Cannon types into a small fitting comparable only in size to the Type "X" for low level sound transmission circuits. Among the leading features are the following: (1) convenient latchlock device to hold connertor tight; (2) lightweight; (3) polarizins tor tight; (2) lightweight; (3) polarizins means; (4) compression gland with relief
spring or integral clanıp, if desired; (5) spring or integral clamp. if desireri; (6)
streamlined design; ( 6 ) tapped nietal for streamlined design; (6) tapped netal for insert retaining screw; (7) provision for special grounding contact and grounding to shell. Contacts are 15 -amp. for No. 14 ISKS stranded wire in 3 contact insert; 10-anmp. in 4 contact insert, Various finishes are available, bright nickel being standard Steel shell types are available with satin chrome finish. Flashover Voltage 1400-160()v.

## TYPE CONNECTOR SERIES

CANNON "IY'IE P" FITYINGS. Universally used in sound and allied applications. "Type I"' Fittings include a sice and type for every requirement, with a high stiandard of quality. All $90^{\circ}$ Plugs have split-shell construction for quick, easy access for wiring or inspection. Splash-proof but not weather-proof. Plug and receptacle dust caps are available. I aiboratory tents show an average voltage-drop of not more than 10 millivolts, with current flowing a the rated capacity. Insulating material is black phenolic which has a $0.7 \%$ absorption in 24 hours of immersion in water and a dielectric strength of 550 volts per mil at 60 cycles. Two to 6 contact incerts accommodate No. 10 B\&S stranded wire; 8 contact insert No. 14 wire. Shell designs of the P-CG-11S and ${ }^{2}$-CG-12S, cord plugs have such improvements as shorter length, new rubber bushing, improved latch and spring, integral clamp. Shell of plug material is steel, integral clamp zinc.

NEW TYPES WILL MATE WITH SAME CORRESPONDING FITTINGS AS OLD DESIGN

# CANHON PLUGS 3 CANNON ELECTRIC CO. 

3209 Humboldt Street, Los Angeles, Calif. - Telephone CApitol 5-1251
(Continued from previous page)

APPLICATION

$X$ connectors used on 60 -cycle servo amplifier for laboratory and general use, manufactured by Servo Corp. of America.

The UA Series of audio connectors, designed in co-operation with the RLE'MA Comnittee, has all the features of Type $P$. O, and XI, plus the following: (1) goldplated contacts for long life and "no noise" (2) double protection rubber relief collar and rubber bushings (3) flat-top polarization for finger-touch action (4) stronger and better latch lock (5) steel plug shells and insert barrel (6) spring-action insert removal - no screws.

Insulators are high dielectric, molded general-purpose phenolic, 15 a . contacts with 2400 v minimun flashover; for No. 14 stranded wire. Max. cable entry is $1 / 2^{\prime \prime}$. Shown in Audio Bulletin.

## SEMI-EXPLODED VIEW UA-3-11

showing rubber cushion that fits over pin contacts to avoid shocks, provide protection from moisture, improve insulation factors.
(UA Series continued next page)

TYPE "X-14" WALL RECEPTACLE (With Pin Insert)
Body fits in $3 / 4^{\prime \prime}$ hole and extends $23 / 32^{\prime \prime}$ behind the flange, which is $1-3 / 8^{\prime \prime}$ in diameter and drilled for three No. 4-40 machine screws. $120^{\circ}$ apart. Shell is zinc, nickel plated finish. Mates with X-11. Solder pots extend 1/4" leyond rear skirt.

| Contacts | Capacity | W. Lbs. | Cat. No. | List Pr |

## ERIE RESISTOR CORPORATION-ERIE, PA.

ERIE TEFLON*STAND-OFF INSULATORS
te-400 SERIES

These Insulators are designed for low-loss, high frequency service in radar, television and other electronic equipment, as completely insulated tie-points in circuit wiring - unaffected by a wide range in ambient temperatures, pressure, altitudes, humidity, and mechanical shock and vibration.
*duPont Tradermark

TE-405 SERIES

These Miniature Stand-Off Insulators are compressed into mounting holes, are self-fastening, requiring no additional hardware. Hand tool for mounting available.
High heat resistance permits soldering without damage to insulators.
Excellent electrical characteristics adapt them to miniaturization and high frequency, high temperature, high voltage circuits.

# ERIE TEFLON FEED-THRU INSULATORS <br> CF-405 SERIES <br> CF. 408 SERIES 

CF-407

Series CF-405 Feed-Thru Insulators have a hollow threaded metal body which fits through the bed plate and is secured by a hex nut.
The terminal, which passes through the hollow body, is spaced by a force-fitted Teflon plug.
These Feed-Thru Insulators combine the unsurpassed insulating properties of Teflon for high frequency, high temperature, high properties of teflon tor high irequency, high temperature, high
vollage service with mechanical ruggedness unusual in miniature insulator design.

Teflon Miniature Feed-Thru Insulators, compression type, are force.fitted into mounting holes, are self-fastening and selfare force.fitted into mounting holes, are selitas assembly. The resiliency of the Teflon bodies insures against breakage in assembly and transit, and offers shock-proof and vibration-proof assembly and transit, and ond tool for mounting available. durability in service. Hand tool hor mounling available. high temperature and high voltage use, unaffected by a wide range in ambient femperatures, pressure, altitudes and humidity,
recommend them for critical circuits.

## ERIE RESISTOR CORPORATION-ERIE, PA.

## ERIE TEFLON TUBE SOCKETS

ADVANTAGES. Teflon tube sockets offer ultra superior electrical advantages. Its extremely low dielectric constant and dissipation factor result in a capacity, between pins, only twice that of air, and a circuit $Q$ better than 5,000 . Contributing to circuit

## ENGINEERING DATA.

Surface Resistance.......................... $10^{13}$ OHMS
Dielectric Strength, 60 cps., ............... 6500 V , RMS
Flashaver Voltage, between exposed metal
surfaces, $60 \mathrm{cps} . . . . . . .$. ...at Sea level 2500 V , RMS at $60,000 \mathrm{ft}$. 650 V , RMS
stability is the fact that the capacity and $Q$ remain constant; the actual change is negligible, over a irequency range of 60 cps to 30,000 Megacycles and a temperature range of minus $110^{\circ} \mathrm{F}$ to plus $500^{\circ} \mathrm{F}$. Sockets meet all RMA and JAN Specifications.

## ERIE TEFLON CONNECTORS

## 9-PIN CONNECTOR

CN-409M

USE. Teflon 9-Pin Connectors are designed to mate with 9 -Pin Miniature Tube Sockets, to mate with 9-Pin Mi
Catalog No. SO-429-3.
ADVANTAGES. Teflon 9-Pin Connectors provide exceptionally low loss between pins and between pins and ground. The Teflon insulation offers a loss factor of less than 0.0002 ; surface resistivity of $3.5 \times 10^{13} \mathrm{hms}$; dielectric constant of 2.0 ( 60 cycies to 30,000 megacycles). It will not DC plate or carbonize under arcing.
Pins are silver-plated brass and insulating body is designed with "windows" for making easy solder connections.
HOW TO ORDER. Specify Teflon 9-Pin Connector No. CN-409.M for mating with Miniature Tube Socket No. SO-429-3.

15- and 18.PIN CONNECTORS
CN-4 15 M

USES. Erie Teflon Connectors are designed for low-loss, high frequency service in interconnection of radio, radar and other electronic equipment - where connectors must be unaffected by wide range in ambient tempera. tures, pressure altitudes, humidity, and mechanical shock and vibration.
ADVANTAGES. The principal characterstics of these Teflon connectors are outlined in the tabulation below.
Material of terminals in male connectors is Brass, silver-plated, gold-flashed; female connectors, Beryllium Copper, silver-plated, goldflashed.
HOW TO ORDER. Specify Erie Teflon Connector Type CN-415 or CN-418 for 15 or lopin connectors, with subscript $M$ or $F$ for
male or female types, or both for mating pairs.

CRYSTAL SOCKETS

USES. Teflon Crystal Sockets are designed for use wherever low loss and frequency stability are desired and mechanical shock and vibration are problems.
ADVANTAGES. Made of Teflon, these Crystal Sockets are unusually sturdy and due to the inherent resiliency of the plastic they aid in absorbing shock and vibration in severe service. Teflon Crystal Sockets have a loss factor of less than 00002 and a dielectric constant of only 2.0 from 60 cycles to 30,000 megacycles.
Teflon Crystal Sockets mount by means of a ingle hole and can be either screw or rive mounted. Assembly is facilitated as there is no danger of breakage as with ceramics.
HOW TO ORDER.
Specify Teflon CS-441 Crystal Sockets for 0.050 pins spaced 0.486 inches.

Specify Teflon CS-442 Crystal Sockets for 0.095 pins spaced 0.486 inches.

## TEST SOCKET ADAPTERS

MODEL TVS-7 For seven pin miniafure tubes.... \$1.65 net

MODEL TVS-B
For eight pin octal tubes ............ $\$ 1.55$ nep

Peco Test Socket Adapters are ideal for making measurements of voltage, resistance, audio and video without tracing complicated circuits from the botfom of the chassis. They Feature: Extended test tabs for easy use with either alligator

MODEL TVS-9
For nine pin miniature fubes ........... 51.85 net

MODEL TVS-I DUO-DECAL TEST SOCKET ADAPTER
For television picture fubes $\$ 1.95$ net

MODEL TVS-14 DIHEPTAL TEST SOCKET ADAPTER
For radar, cathode ray and industrial oscilloscope...... $\$ 14.90$ net
clips or test prods; Low R.F. loss with a power factor less than 0.010 at 10 Mc ; Mica-filled sturdy phenolic construction; High insulation resistance, the I.R. exceeds 500,000 megohms at $40 \%$ R.H., at $24^{\circ} \mathrm{C}$; Distributed capacity, low inter-
element capacity, approximately 1 micromicro farad; High voltage operation, voltage breakdown between elements exceeds 1700 volts $A C$ or $D C$; On model TVS-14 voltage breakdown exceeds 7500 volts.

SPECIAL ADAPTERS DESIGNED TO YOUR SPECIFICATIONS. INQUIRIES INVITED.

## BREADBOARD SOCKETS

MODEL XS-7
Seven pin miniature $\$ .49$ net

MODEL XS-9
Nine pin miniafure $\$ .57$ net

Write for prices on Model X5-8, eight pin octal Breadboard Socket.
Breadboard Sockets are designed to be used for elec. tronic experimental and development work in laboratories, schools and by electronic technicians in industry. Mounting of the Breadboard Sockets is a simplified installation requiring only a 3/32" diameter hole for mounting on the surface of the breadboard chassis, thus the chassis can be used over and over again. Circuits are wired on top of the chassis culting the cost considerably on experimental projects. Each socket is equipped with a ground lug and features silver plated phosphor bronze contacts numbered for easy identification.

METER REVERSING POLARITY SWITCH

MODEL MS-1
For use with Simpson 260 Tester .................... 55.75 net

The MS-1 is designed to reverse polarify when making circuit lest without removing lest leads to meter. It is instantly attached by plugging into test lead holes on Simpson Tester Model 260. Saves valuable time in circuit

testing, is of compact durable phenolic construction, reduces shock hazard, and may be left on meter for all measurements. The loggle switch position indicates the polarity of circuit under test.

PECO CR ADAPTER

The CR Adapters are designed for easy connection of Cathode Ray Tubes to Tube Checkers without removing the Cathode Ray Tubes from the cabinel and chassis. it checks them for shorts, relative emission, slow heater, and filament continuity. This time saving compact piece of equipment is easy to use and prevents guesswork. thus readily convincing set owner when tube is faulty.

# 10 eram TURRETS 

## BACKGROUND FOR CIRCUITRY

Vector Socket-Turrets and Plug-In units provide a unique method for mounting electronic circuit components, saving space and increasing efficiency. Catalog numbers shown in bold face type are the most popular types.

## OCTAL, MINIATURE and NOVAL SOCKET-TURRETS

Sockets are standard bottor mounting with steel saddles carrying 4 ground lugs. Body is mica-filled phenolic carrying wrap-around brass contacts, cadmium plated. Terminal posts are $1 / 2^{\prime \prime}$ O.D. with $1 / 16^{\prime \prime}$ wall. made of Crade XXXP laminated tan phenolic joined to socket. Six plated brass terminals at far end of turret plus three. six or none near socket. Mounting holes required are: for Octal 1"ctr. hole, side holes spaced 1-5/16" for 0.134" saddle holes (a larger type is also available-See A' below) : for 7 pin miniature, $5 / 8^{\prime \prime} \mathrm{ctr}$. hole, side holes spaced $7 / 8^{\prime \prime}$ for $1 / 8^{\prime \prime}$ saddle holes; for 9 Pin Noval, $3 / 4^{\prime \prime}$ ctr. holes, side holes spaced $11 / 8^{\prime \prime}$ for $1 / 8^{\prime \prime}$ saddle holes.

Hi.................. from chassis to far end of Burret
For variations not always available from distributors but obtainable at the factory:

Add 'A' to No. for large octal socket ( $1 / 2$ Mtg. Ctrs., $11 / 8$ " hole)
Add 'J' to No. for 'MFE' socket casting, beryllium contacts, silver plated, hot tin dipped.
Add 'U' to No. for 4.40 U nuts which slip on saddle for easy mount. ing.
Add ' C ' to No. for impregnation of turret for moisture and fungus protection.
Substitute ' $L$ ' for ' $O$ ' in No. if loctal socket required, (1.1/16' hole. 1-5/16" mtg, ctrs.).
Note: Letters are printed on all above turrets to indicate terminal positions. A-F inclusive appear on remote end. G-L inclusive on row near socket (H, J. L for 3 terminal rows). " $A$ " and " $C$ " over "l" of socket.

Socket-Turrets are covered by Patent Nos. 2.604.584 \& 2,624.775.
SADDLE NUTS: A 'U' rype nut which slips over standard socket saddles has been especially designed to promote easy mounting on the chassis. For \#4-40 machine screws. Order as \#440-U nut or simply add ' $U$ ' to number of socket ordered.

## TEST ADAPTERS

Vector Test Adapters are ideal for making measurements from the tube side of electronic equipment, where it is inconvenient to reach into the wiring compartment. The adapter is simply inserted between tube and socket completing the circuit and providing test tabs connecting with tube elements.

The T-789 set combines the 7 -pin and 9-pin miniatures and octal in a plastic case. Or adapters may be obtained separately as follows:

|  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

## FOR UNITIZED CIRCUITS

Amplifiers, counters, oscillators and the like can be readily assembled completely on Plug-Ins, permitting quick changes of circuits. Naking a Plug-In unit involves little more than soldering in a few capacitors and resistors.

## ECONOMICAL AND CONVENIENT

Pluss are standard mica-filled, ring mounted octal style with 8 prongs as standard. ( 9 or 11 prong plugs also available-see below). Sockets are standard mica-filled phenolic in octal, 7 Pin miniature or 9 Pin noval as ordered. Contacts are cadmium plated brass. Terminal turrets are Grade XXXP phenolic tubing $1 / 2^{\prime \prime}$ O.D. with $1 / 16^{\prime \prime}$ wall, carrying 12 plated brass terminals. Alumiaum covers may be quickly detached by removing screws at base, making in ide completely accessible. Miniature and noval types carry military type tube shield base. Main tube shield not furnished. Types in bold face are most widely used and generally preferred for distributor stock.

| 8.10 | 1.3/8: | $2.1 / 2^{\prime \prime}$ | C. 12 | 2 | $2 \cdot 1 / 2^{\prime \prime}$ |
| B.12 | 1.3\% ${ }^{\text {\% }}$ " | 3.. | C-12 | $2 \cdot$ | 3 " |

SPECIAL FEATURES. Variations obtainable at the factory:
Add "H" to No. for 9 prong octal type plug.
Add "K" to No. for 11 prong octal style plug.
Add "J" to No. for "MFE" socket casting, beryllium contacks, silver plated, tin dipped.
Add "G" to No. for impregnation of turret for moisture and fungus protection.
Add " P " to No. for perforation of covers for ventilation.
Anodized finishos, notural or in color to order.
Studs to lock 2" sq. units firmly in sockets ase available.
NOTE: Letters are printed on turrets to indicate terminal positions. A-F inclusive appear on 6 terminols of plug end, $G-L$ inclusive on socket end. " $A$ " \& " $G$ " in line wit', " $f$ " of sozket and "1" of plug. Key of 8 prona plug points toward corner of can but key of 7 \& 11 prong plug points to side of can.

## OTHER TYPES

Special round can Plug-Ins are available as follows: Type C2, $11 / 4^{\prime \prime}$ O.D. with Octal 8 or 11 pin plug; Type G2.1, $3 / 4^{\prime \prime}$ O.D. with 9 pin min. plug; Type C2.2, 5/8" O.D. with 7 pin min. plug, Larger rectangular units are also available with following cross-sectional dimensions: Type $D$, $2^{\prime \prime} \times 3^{\prime \prime}$; Type E, $11 / 2^{\prime \prime} \times 33 / 4^{\prime \prime}$; Type F, $2-5 / 16^{\prime \prime} \times 43 / 8^{\prime \prime}$. Height of all units, $3^{\prime \prime}$ or less. Terminal strip mountings can be supplied instead of turrets if preferred.

## REPRESENTATIVES

Representatives in all principal cities. For name and address of representa. tive in your locality, write Dept. 12.

Quality etched and printed circuits require specially trained personnel. USECO's Staff offers you unsurpassed experience, creative imagination and technical skill. Circuit samples of your design are supplied at cost or less. Your prototype inquiries are invited. Furnished in standard copper or any plated finish as specified.

(Above) An enlarged view showing how circuit "wraps around" the edge.

## "WRAP-AROUND" CIRCUITS

Made by an exclusive USECO process, our new "WRAP-AROUND" or "PLATED-THRU" circuits provide improved performance, better contact and easier unplugging. They eliminate the possibility of peeling, resulting in circuits with longer service life.

Write for catalog which tells how to prepare master drawings and gives complete information on how to order. Please address Dept. 12.

## TERMINAL BOARDS

USECO manufactures Terminal Boards to customer specificafions. In addition we maintain a large stock of Standard Terminal Boards. See catalog for complete line. Made to meet all approved MIL and JAN specs.

## AMERICA'S QUALITY LINE • RADIO, TELEVISION, ELECTRONIC COMPONENTS

Elco Varicon Miniature-Connectors provide the simplest, quickest, most positive means for connecting electronic or electric circuits. Varicons introduce "Keying Control", making it impossible to connect unmatched parts. Contact combinations in any number demanded by your specific needs are possible with Varicons; and any connector may be assembled by you or us from stock parts.

Prices below are for Varicons in General Purpose Phenolic. Varicons are also available in Low-Loss Mica Phenolic, Alkyd, and General Purpose Phenolic in assorted colors, prices for which will be furnished upon request. For general specifications of All Varicons, refer to description beneath Connector Kit at lower right hand corner of this page. For any other information regarding these "Miniature Connectors that work like Giants", your inquiry will meet with our immediate reply.

## KITS

VARICON MINIATURECONNECTOR KITS now make it possible to ossemble your own con. nectors when you want them! In General Purpose Phenolic, Low-Loss Mico Phenolic, Alkyd, Mica Phenolic, Alkyd,
Colors. Wpite for prices. GENERAL SPECIFICATIONS

Current Roting 15 Amps, 115 voirs (in cover); 30 Amps (in free air) (withstanding valtage between closest terminals 4000 valis); Contac Resistance .0001 ohm. Low Capacitance. All Male \& Female components are identical. 300 ohm line spocing. Contacts in use ore olwoys under pressure, cannot be overstressed or overstrained.

## RCA RCA TEST EQUIPMENT

for SERVICE INDUSTRY SCHOOLS•LABORATORIES

COLOR-BAR GENERATOR WR-6IA

The RC. ${ }^{2}$ WR-61A Color-liar Gencrator is a compact. lightweight instrument designeci for the in checking the overall operation of color television receivers, and for adjusting colur phasing and matrixing circuits in color receivers and monitors. The WR-61A generates the signals for producing 10 bars of different colors simultaneously (without mathal switching), including the bars corresponding the R-Y, li-Y. G-Y, I, and $Q$ signals. The bars are accurately spaced at .30-degree phase intervals.

The output signal from the WR-61.1. fixed at channel 3 , consists of an umodulated sound carricr, and a picture carrier modulated by a color sibb-carrier, and horizontal synchronizing pulses at $15,750 \mathrm{cps}$. The picture carrier, color subcarrier, sound carrier, bar frequency, and horizontal sync pulses are crystal controlled for accuracy and stability.
Separate vileo output, with reversible polarity, is available for checking studio monitors. Viden output at the HI terminal is approximately 8 volts peak-to-peak across 4700 ohms.
Luminance signals are provided at the edges of the color hars to check the "fit" or registration of the luminance and chrominance signals. Amp'itude of the color subcarrier and the bar signals is adjustable to facilitate checking color-sync lock action in the receiver.
The WR-61A is supplied with a shielded rf-output cable for connection to balanced 300 -ohes inputs, and a shielded video cable for comection to 75 -ohm video circuits.
\$247.50 (Suggested User I'rice).
Supplied with rf-output cable, video output cable, ground lead, TV-input adapter, instruction booklet.

The RCA WR-36. 1 Dot-Har Generator is designed for shop. field, or production-line use in making de- and dynamic convergence adjustments on color-TV receivers and monitors, and vertical and horizontal deflection linearity adjnstments on botl color and black-and-white TV receivers. The WR-36.A will provide a pattern of approximately 150 evenly spaced small-size dots on a 21 -incli color kinescope. The number of dots and bars is adjustable.
Lightweight and compact, the WR-36A is readily portable. making it especially useful for installation of both color and black-and-white receivers. The generator provides modulated ontput on any vhf TV channel from 2 through 6 , as well as vicleo output of either positive or negative polarity. A patternselector control is provided ta select the required type of modulation.

Amplitude of the rf-output signal is continuously adjustable. The output signal may be fed directly into the antenna terminals of the receiver. An important feature of the VR-36A Dot-Bar Generator is a "Standby" position on the selector switch to permit removal of all $1 \mathrm{~B}+$ voltages from the tubes.
The WR-36.1 is supplied with a shielded, rf-output cable terminated to work directly into $300-\mathrm{olmm}$ loads.
NOW - The latest production models of the WR-36A will produce small size dots on large-screen color kinescopes.

TELEVISION SWEEP GENERATOR WR-59C

Featuring preset sweep positions from chancl 2 through channel 13, the WR-59C also provides a continuously adjustable video sweep signal from 50 Kc to 50 Mc . The WR.59C combines all the essential features required in a sweep generator for trouble-shooting and aligning both black-and-white and color receivers.
The WR-5C provides that output on all channels. The push-pull oscillator provides output on fundamental frequencies and output is free of harmonics and spurious components. Output voltage is more than adequate for all service and manufacturing applications.
An outstanding feature of the generator is the dual-piston attennator which provides smooth, even attenuation over a wide voltage range. Energy is capacitively coupled from the osciltator, and the attenuator may be set to sive Hat output from as low as 5 microvolts to as high as 109,000 microvolts.
Other features of this fine instrument include a blanking circtit. phasing control for use with ath oscilloscope sweep, and a separate attentutor control for adjusting the output level of the video-irequency ontput signal.

Featuring continnous tuning, the RCA WR-89A Crystal-Calibrated Marker Generator furmishes you with an if carrier of crystal accuracy for use in aligning and trouble shooting of TV and commanications receivers, transmitters, and other duipment in such services as fm , aeronatical, and marine, operating in the frequency range of 19-260 Mc. Calibration of the generator may be checked at 2.5 Mc intervals throughont its tuning range by means of a built-in harmonic crysta! oscillator of high accuracy.
In this one versatile instrument you not only get a nultiple-marker generator but alwo a very useful bar-pattern generator for checking both vertical and horizon!al deflection linearity of a TV receiver. When video and sync information from an operating TV receiver is fed into the WR-89.A, yout can use the generato as a rebroadcast transmiter to produce a TV picture on any channel of another

And when an external rf signal is fed into the WR-89A, you may also usc the generator as a hetcrodyne frequency meter for measuring the frequency of the external signal.
These and other important advantages retiect the expert engineering and functional design of the WR-89A-assuring you the dependability so essential for torlay's critical testing requirements.

## VIDEO MULTIMARKER WG-295A

The RCA WG-295A Video MultiMarker provides five simultancons absorption-type markers accuratel preset at the following frequencies required in marking the video response curves in enlor receiver 0.5 Mc (for O filter) ; 1.5 Mc (for I filter) ; 2.5 Mc (for band-pass filter) ; 3.58 Mc (color sublicarfier frequency 4.5 Mc (sound-trap frequency).

Each of the marker frequencies in the $11 G-295$ A is definitely and quickly identified simply by touchin the corresponding contact on the MultiMarker; this has the effect of reducing the amplitude of particular marker notch. The $W \mathrm{G}-295 \mathrm{~A}$ is connected betwecn the $1 \mathrm{~F} / \mathrm{VF}$ output on the sucep gencrat and the regalar video output cable.

RF SIGNAL GENERATOR WR-49A

You don't have to bother with the nuisance job of connecting ale blocking capacitors to the probe tip of the RCA IVR-49A RF Signal Generator, because it has built-in dc blocking capacitors. With it, you can inject rf signals into plate circuits and other points where de is present without placing a de load on the circuit under test-and with protection from burn-out in both the equipment and signal generator
The functional-clesign dial facilitates accurate and easy readings. And full-length shielding of the output cable minimizes radiation and hum pickup in the receiver under test or adjacent test equipment. And that's not all! The extremely stable cathode-follower output stage isolates the oscillator from effects of load reactance and resistance, thereby maintaining good output waveform, voltage regulation, and frequency stability.
Compact and lightweight, the WR-49A can be depended upon in such applications as alignment and signal tracing of ann and fin radio receivers, alignment of low-frequency if amplifiers in TV receivers, and signal tracing and trouble-shooting in TV reccivers.

## AUDIO SIGNAL GENERATOR WA-44A

You'll find the W'A-44A excellent for: amplifier frequencyresponse checks; nse in measuring intermodulation distortion in amplifiers; frequency response checks of tone controls; ruming frequency response curves on phonograpll equalizers; checking input and output impedances of amplifiers; use in measuring resonance frequency of loudspeakers and speed of recorder/reproducer mechanisms.

And this compact, lightweight instrument is equally useful in: tming bass-reflex enclosures; determining unknown audio frequencies; determining inductance and capacitance; autio signal tracing; determining the resonance frequency of I.C circuits; and locating cabinet resonance and rattles. The RC. W W-44.A features a new RC-type oscillator having a wide freduency range, which facilitates checking response of high-fidelity amplifiers, and an age control circuit which insures stable performance. The output is flat within $\pm 1 \mathrm{~d})$ over the entire frequency range.

Especially useful as a television signal tracer, the WV-97A features a high-impedance, high-frequency, full-wave rectifier for direct readings of peak-to-peak voltages up to 4,200 volts. With this instrument, you can readily obtain quantitative measurements of practically all of the important complex-waveform voltages found in video, sync, and deflection circuits.

The WV-97A is a deluxe instrument having such refinements as seven nonskip ranges on all functions, uniform "3 to 1" ratio between scates, wide frequency range, and extended voltage range.

Like all RCA VoltOhmysts, it has high input resistance, electronic protection against burn-out, zero-center scale, molded plastic meter case, rugged 200 microampere meter movement, $\pm 1 \%$ multiplier resistors, and other outstanding VoltOhmyst extras.

Featuring a $71 / 2^{\prime \prime}$ meter, the new WV-87A Master VoltOhmyst is the deluxe member of the RCA VoltOhmyst family. Its peak-to-peak scales are particularly useful for television, radar, and other types of pulse work.
The WV-87. A measures de voltages accurately in highimpedance circuits, even with ac present. It also reads rms values of sine waves and the peak-to-peak values of complex waves or recurrent pulses, even in the presence of dc.
Like all RCA VoltOhmysts, the WV-87A features $\pm 1 \%$ multiplier and shunt resistors, a $\pm 2 \%$ meter movement, ligh-input resistance, zero-center scale adjustment for discriminator aligmment, de polarityreversing switch. and a sturdy metal case for good rf shielding.
The RCA WV-87A Master VoltOhmyst has the accuracy and stability necessary for many laboratory applications. Its large, easy-to-read meter also makes it especially desirable as a permanently mounted instrument in the factory and repair shop.

[^30]
## ULTRA-SENSITIVE DC MICROAMMETER WV-84A

Ranges and Input Resistance:
9 to 1-lolt Range.
0) to 10 -Volt Range

1) to lon. Volt Range
(1). olt Kange......... 1000 megolnnis

A battery operated microammeter, the RCA WV-84A is capable of reading from 0.002 to 1000 microamperes in six ranges. The WV-84A can be used with an external battery to measure resistance values as high as 90,000 megolms or may be used with an external resistor as a voltmeter with an input resistance of at least 100 megolms per volt.
Circuit features of tife WV-84i in include negligible loading of the circuit under test, meter movement electronically protected against burn-out, and a self-contained battery power supply which makes the instrument completely portable
The WV-84A is finding increased use by research laboratories in many fields-chemistry, medicine, electro-mechanics, electronics, mucleonics-for conducting experiments involving feeble currents. Industrial users find it an excellent instrument for making current and voltage measurements in electrolysis and corrosion investigations. The WV-84A may also be used for checking currents in light meters. in ultra-violet and infra-red detectors, and in spectrophotometric devices.

## TV ISOTAP WP-25A

## Specd Up Your Servicing

use the RCA TV Isotap to avoid wasted time and uncertainty in TV trouble-shooting. Use the 500 voltampere antotransformer winding for testing power ransformer types of TV receivers. Usc the 275 VA solated secondary winding for testing transformerless types of TV and ac•de radio receivers.
Service sets at normal line voltage for quick check of ircuit voltages-break down intermittent components by operating set at extra-high line voltage-make sure set finctions satisfactorily at low-line voltage.
Prevent Damage to Four Test Equipment
. . use the RCA TV Isotap to avoid expensive damage o your valuable test equipment. Eliminate possibility of rossed line plugs on transformerless receivers and test equipment and prevent costly short circuits.

Minimize Shock Hazard
use the RC. TV Isotap to aveid the shock hazard in servicing transformerless types of radio and TV' re. ceivers. WP-25A provides complete isolation and greatly ntinimizes shock hazards.

Cut Down Costly Rcturns
by using the RCA TV Isotap to avoid service recalls which are often cansed hy a ditierence of line voltage in the customer's home. With the WH.25A you can check the set in the slom at high. medinm. and low-line voltages.

## RADIO BATTERY TESTER WV-37A

Now sou can test portable-radio hatterics under actual load or "turned-on" conditions withnt the ncecesity of placing batteries in the sect. The RCA $10 \backslash-37.1$ s built-in load circuits eliminate the time-consuming methur remirell to test batteries with the conventional voltmeter. And the RC. $\$ W' ${ }^{\prime}-37.1$ also gives you a mure accurate indication of true hattery voltage than does the conventimal voltmeter allane.
The sclector swith on the front panel has nine pretixed pusitions to accommodate popular portable-radio batteries ranging from 1.5 volts to on volts. Fight hlank te'st pusitions are provided to enable ymi to set 113 testing conditions uf your own choosing for testing alditional hattery types.
Red and black plastic test prods joined to 36 -inch fest eads are permanently attached to the tester. Weighing less than $31 / 2$ lbs. the WV:.37A measures a full $9 t$ long, ly $6^{\prime \prime}$ wide, hy $11 / 2^{\prime \prime}$ deep.
You'll find the new RCA W゙V-37A Radion Battery Tester a worthy addition to your service shop. 1 se it on the sales chmenter for checking used batterics or assuring the cnstomer that replacement stock is fresh . . . on the service beneh for accurate battery volage indication under normal laad conditions-on shelf stock to keep a "rumning-cheek" on the condition of your she lf hattery stock.
\$24.95 (Suggested U'ser Price)

Nine prefixed switch positions for testing popular portable-radio-type batteries

Rugged, easy-to-read,
$41 / 2^{\prime \prime}$ meter, all metal case, $\pm 2 \%$ meter movement

Built-in load circuits provide "in-use" testing conditions

Double meter-scale simultaneously indicates percentage of rated battery voltage and relative
"good" . . . "useable" . . . or "replace" condition

Extra positions for adaption of tester to new or different battery types prevents obsolescence

## DELUXE RACK WS-I7A

The WS-17A is a deluxe three position test equipment rack. Add beatity and convenience to gour test set-up with this streamlined rack. Sturdy all-stecl construction with attractive satin-aluminum and blue-gray hammeroid finish.
$\$ 59.50$ (Surgested User Price)

RCA High Voltage Probes WG-289 and WG-290 are identical except for their connectors. The WG-289 is provided with microphone-type connector for use with the VoltOhmysts and other voltmeters having microphone-type connectors. The WG-290 is equipped with phone-tip connectors for use with voltmeters having phone-tip jacks.

These High Voltage Probes are capable of extending the de voltage range of your meter to 50,000 volts. When used with a VoltOhmyst the input resistance is increased to 1000 megohms, an important feature when working in high-impedance circuits where loading seriously affects the stability of the circuit under test.

A choice of five multiplier resistors is available enabling these probes to be used with practically all popular electronic and non-electronic voltohmmeters.

## SPECIAL PURPOSE PROBES

LOW-CAPACITANCE PROBE WG-2168

The WG-216B is a "slip-on" type probe, designed for use with either the $W(9.218$ or WG-220 Direct Probe in conjunction with an oscilloscope. When the WG-216B is used with either the RCA WO-56A or Wo-88A oscilluscopes, the total input resistance is 10 megolums shunted by a capac ity of less than $10 \mu \mu$. $\$ 7.00$

DC/DIRECT PROBE WG-222

The WO-222 is a "slip-on" type probe with a built-in 1 -ncerohm jollating resistor and unique switching facilite: fis virtue of the switch arrangement, it is possible to musare de voltare or resistane, without changeing probes. The W(i-2ge slips on the front of aither the WC-218 or WG-220 and maly be used with Foltohnysts or other varum-tube voltmeters recuiring a $1 \cdot \mathrm{meg}$ olim isolating resistor. $\$ 3.50$ *
*(Suygested User Price)

DC PROBE WG-217

The WG-217 is a "slip-on" type probe designed for use with cither the W6-2lS or W(i-220 as a 1)C Prole for VoltOhmests or other types of wiltohmmeters. The W゙(i-217 contains a 1 -megohm isclating resiator, and has a shunt capacitance of 1 ess than $2 \mu \mu f$.
\$2.75*
DIRECT PROBE AND CABLE
WG-218, WG-220

The Wri-218 is a shielded imput cable for use with volt-ohmmeters and oseilloscopes. It is fitted with a probe tip at one end and a mierophone-type connector at the other end for connection to instruments having microphone-tyne cable conneetors. The Wi( $;$ ${ }_{220}$ is the same electrically as the WG-218 but is fitted with pin-plug tips for eonneetion to instruments having tip jacks or binding posts. Either Probe $\$ 3.75^{*}$

OEMODULATOR PROBE WG-291

The WG-291 Demodulator Probe has an input range of 500 Kic to 250 Mc with an input capacitance of only $2.25 \mu \mu f$. It separates the modulation from the RF carrier in an amplitude-modulated wave by means uf a rectifier and a filter having a short time constant and an output frequency range of 30 to 5.000 cps . The W(i-291 has a naximum input voltage of 20 rms volt and a maxinmum de voltage rating of 250 volts. maxam de $\$ 7.95$

## CRYSTAL-DIODE PROBE WG-264

The WG-264 Crystal-Diode Probe consists of a germanium rectifier and $R C$ network in a plastic housing ... which conveniently slips on the Direct Probe of Voltohmysts. such as the $W V^{-97 A}$. RF voltages at frequencies up to 250 Mc may be accurately measured with the W(i-264. The ac voltage range extends from 20 millivolts to 20 volt rms; de voltages up to 250 volts ean be present.
can $7.75^{*}$

## RACK-ADAPTER PANEL WS-18A

The WS-18A Rack Adapter Panel may be used for mounting any of the matched RCA Test Instruments in standard $19^{\prime \prime}$ relay racks Add convenience, standardization and the professional touch to your test bench set-up. Umber-gray finish, all steel construction.

WORLDFAMOUS<br>MODEL 260 Set Tester

World's Most Popular High Sensitivity Set Tester For RADIO and TELEVISION

There are more Simpson 260 high sensitivity volt-ohm-milliammeters in use today than all others combined. No other instrument of its kind has approached the world-wide popularity of the Simpson 260. In no other tester of its kind will you find the combination of useful ranges, accuracy, ruggedness, beauty and sensitivity developed to such a high degree of perfection.

Removal of the Model 260 from its heavy, handsome case of molded bakelite, will disclose how it differs from most set testers. You will see a sub-panel with a score of small recesses each holding a separate resistor or other component. You will notice complete absence of cable wiring. All connections are short and direct, thus offering a strength and firmness of assembly and the finest of insulation to reduce chances of shorts. All components are readily accessible. The front panel is a thing of beauty and long life. Pin jacks are recessed so no metal parts are exposed. All figures and symbols are molded into a heavy Bakelite panel and filled with durable white for long wear and legibility.

At 20,000 ohms per volt the 260 is highly dependable, rugged and accurate. Its practically negligible current consumption assures remarkably accurate voltage readings. It provides DC current readings as low as 2 microamperes and up to 10 amperes. Dependable resistance readings can be made up to 20 megohms and as low as $1 / 5$ ohm. With the 260 you can measure automatic frequency control, diode balancing circuits, grid currents of oscillator tubes and power tubes, bias of power detectors, automatic volume control diode currents, high-mu triode plate voltage, as well as a wide range of other measurements which cannot be checked with ordinary servicing instruments.
 weight: 807.

25,000 VOLT DC PROBE FOR TELEVISION TESTING Complete, nothing to add, for use with Model 260. Weight: 6 oz. Shipping

## THE NEW MODEL 269

THE WORLD'S FIRST
COMMERCIALLY AVAILABLE 100,000 OHMS PER VOLT VOLT.OHM MICROAMMETER
big 7 INCH METER 33 RANGES COMPACT 7 INCH CASE
The Simpson Model 269 AC.DC ultra sensitive volt-ohm MICROammeter is ideal for voltage measurements in high resistance circuits . . . TV receivers - laboratory research work other electronic equipment!

Use it in place of VTVM's for many voltage and resistance measurements in TV and other service work.

Eliminates line cord . . . drift . . tube replacement.

The new Simpson Model 269 Volt-Ohm-MICROammeter is the most compact ultra high sensitivity instrument you can buy.

Every one of its 33 ranges has been customized to meet the needs of the electronic and electrical industries.

33 ranges through one control - saves time and assures accuracy.

Big seven-inch meter features an extra long scale for reading ease.

Rugged construction . . . designed for actual service use.
Measurement accuracy is $3 \%$ DC and $5 \% \mathrm{AC}$ of full scale deflection.

Simpson Adjust-A.Vue handle may be used to instantly support the instrument at a convenient viewing angle on a bench top.

The 269 offers dependable accuracy in a lightweight completely portable and compact case.

## MODEL 355

MIDGETESTER AC-DCVOLT-OHMMETER

Fits in Your<br>Shirt Pocket!<br>10,000 Ohms per Volt AC and DC!

World's smallest! Ideal for appliance repair, radio-TV service, etc. Utilizes the rugged Core Magnet Meter Movement.
On your next trouble-shooting call, slip the Simpson MIDGETESTER into your pocket and you're ready for alnost any job. The Model 355 will do practically anything larger units will do.
The compactness and sensitivity of this tester are made possible by the new Simpson 100 nicroamp self-shielded core meter movement. This movement permits the MIDGETESTER to be used any place without adverse interference from magnetic metals or strong magnetic fields. All contacts are recessed slightly below the face of the instrument . . automatic circuit and range selection by inserting leads into desired contacts.
Leads are partially threaded . . . a slight turn and they simply can't fall out! Sharp contact tips help you reach the exact test location . . . easily . . . even in crowded areas.
Probes are provided with shoulders for convenience in attaching alligator clips.
A handy ohms zero-adjust thumb wheel is cradled out of the way . . . on the right side of the instrument.
ACCURACY - $3 \%$ DC : 5\% AC
The accuracy of this instrument is $3 \% \mathrm{DC}$ and $5 \% \mathrm{AC}$ of full scale voltages, and is within $3^{\circ}$ of arc from absolute value of resistance being measured.
10,000 Ohms per volt . . . AC and DC! The Simpson MIDGETESTER Model 355, therefore, offers less loading in high impedance circuits, resulting in more accurate $A C$ voltage measurements.
$1 \%$ Carbofilm resistors of the most stable type assure long life and rugged dependability.
The use of a full bridge rectifier completely eliminates all pointer vibrations.
DC VOLTAGE: 3, 12, 60, 300, 1200.
AC VOLTAGE: 3, 12, 60, 300, 1200,
DC RESISTANCES: $0-10 \mathrm{~K}$ ohms ( 120 ohms center); $0-100 \mathrm{~K}$ ohms ( 1200 ohms center); $0-1$ megohm ( 12 K ohms center) ; 0.10 megohms ( 120 K ohms center).
SIZE: $234^{\prime \prime}$ wide, $4 \frac{1}{2}^{\prime \prime}$ high, and $1^{\prime \prime}$ thick.
WEIGHT: 7 oz .
MODEL 355 with Leads, Operator's Manual.

## INSTRUMENTSTHAT STAY ACCURATE

## MODEL 303 VACUUM TUBE VOLT-OHMMETER

The Simpson 303 really is a versatile instrument. It can be used as an electronic DC volimeter, an ohmmeter, an AC volimeter, an AF volmeter, an RF voltmeter (with accessory probe), an output-meter, and an FM indicator.

The 303 truly is a worthy companion of the world famous Simpson Model 260 Volt-Ohm-Milliammeter. Simpson engineers spent months of painstaking位 the laboratory, working in clod buit insirunient bas volume facturers to produce the 303 . This ruggediy built insirmment has a volume of only 120 cubic inches, and is 60 to $70 \%$ more compact than any simila instrument. In achieving this compactness for greater portability Simpson did not sacrifice accuracy or functional value. Its large $41 / 2$-inch meter is easy to read

Features such as low current consumption and wide voltage and resistance ranges make the 303 an extremely versatile instrument.

Like all other instruments bearing the Simpson name, the 303 is of the highest quality construction throughout, but sells at an amazingly low price.

## SPECIFICATIONS

DC VOLTAGE: Ranges-1.2, 12, 60, 300, 1200 (30,000 with Accessory High Voltage Probe)

R. F. VOTAGE: (Signal tracing with Accessory High Frequency Crystal Probe)
Range- 20 volts maximum
Frequency-Flat 20 KC to 100 M.C

Twenty-five separate meters at the turn of a switch. That is what you get in the Simpson Model 221 Roto Ranger. The necessity of reading numerous scales, so common in ordinary volt-ohm-milliammeters, is forever eliminated when you own a Roto Ranger. The chances for errors in making readings are reduced to a minimum. The Model 221 provides a separate direct reading scale for each range and does it automatically. Calibrations are not cramped. Each scale is full size, the same as it would be for a separate instrument. As the selector switch on the panel is moved to the range desired, an ingenious mechanism rotates the proper range into position behind the meter window.

# INSTRUMENTSTHATSTAYACCURATE 

## SIMPSON MODEL 1000 PLATE CONDUCTANCE TUBE TESTER

The Simpson Model 1000 will test any receiving tube including 9 pin miniatures and subminiatures with base arrangements in a line or circle. The Model 1000 tests an extremely important factor in the tube which is plate conductance. The dial indicates percentage of rated plate conductance which is closely related to mutual conductance since amplification factor remains constant throughout the life of the tube. Testing by the Simpson plate conductance method makes testing methods simpler . . . more positive ... more accurate. These tests are made under conditions simulating actual use in radio, television, hearing aids and other electronic circuits.

Now, you can have reliable short tests because the Simp. son 1000 quickly and conveniently shows you exact ohms values for interelement leakage and tube shorts.

Handy multi-position toggle switches help you make quick adjustments to proper voltages for bias. screen and plate supply. Each tube element is individually connected to the proper potential . . . insures against ube damage during testing.

Practical Simpson Snap-Out-Snap-In transparent plastic windows are provided over the fast action roll chart. They're instantly removed. You may add information on new tubes at any time. You'll like the easy-to-read type on the roll chart . . . eliminates squinting.

Simpson's roll chart service makes a new roll chart available each year and complimentary roll chart supplements are provided at regular intervals.

Every detail-no matter how small-has been engineered to meet your satisfaction. The fuse socket is on the front panel . . . dial cover is one piece unbreakable clear plastic.
The panel of the Model 1000 is finished in non-glare grey hammerloid and youll like the rich burgundy carrying case, too. It looks like loggage. This is the tube tester you will be proud to own. See it at your parts jobber today.

## MODEL 276 OSCILLOSCOPE CALIBRATOR

The Simpson Model 276 Oscilloscope Calibrator adapts your oscilloscope for quick and accurate voltage measurements by comparative methods.
A twelve position switch provides six ranges each of RMS, peak and Peak to Peak voltage with six alternate neutral positions for viewing the signal under observation.

Continuously variable calibrating voltage of power line frequency is supplied by the Model 276 and is indicated on a large $41 / 2$ inch meter which indicates RMS values from 0.06 volt to 90 volts, peak values from 0.1 volt to 125 volts and peak to peak values from 0.2 volt to 250 volts.

When the Model 276 Oscilloscope Calibrator is connected in series between a signal source and the Oscilloscope input, a convenient switching arrangement makes it possible to make quick comparative checks between the relative amplitude of the signal and of the measured voltage source, This system is most convenient because leads do not have to be shifted around in order to calibrate the signal on the oscilloscope.

Housed in a rich black molded bakelite case identical to Models 260 and 303 , this instrument will prove a worthy addition to the service dealer's equipment.

## MODEL 488 FIELD STRENGTH METER ...

## Essential For Both VHF and UHF

## IV Receiver Installations

The Simpson Model 488 Television Field Strength Meter provides means for the measurement of Television signals in any locality. IT WILL WORK EQUALLY WELL FOR VHF AND UHF!

Although special consideration was given to fringe area applications in the design of this instrument it will be found of extreme value in all types of installations.
Location of maximum signal areas, antenna orientation and location, comparison of antenna systems, adjustment of boosters and checking antenna and lead-in installations are only a few of the many functions available.
Full scale sensitivity of the lowest range is approximately 50 microvolts and is an outstanding feature for those concerned with fringe area installations where maximum efficiency must be attained. Three additional ranges of approximately 500 , 5000 and 50000 microvolts extends the usefulness of the Model 488 into areas of higher signal strength. Antenna installation for UHF reception requires exacting positioning and orientation and this requirement is completely satisfied with the Simpson 488.
The large $41 / 2$ inch modernistic meter is easily read from a considerable distance and all controls and connections arranged for greatest accessibility.
Model 488 is housed in a beautiful gray hammerloid finished case with sturdy leather handle for complete portability and ease of use.
Equipped for reception on all 12 VHF channels.

SIZE: $8^{\prime \prime} \times 11^{\prime \prime} \times 8^{\prime}{ }^{\prime \prime}$.
WEIGHT: $11 \frac{1}{2}$ lbs. Shipping wt. 15 lbs. LINE VOLTAGE: 105.125 volts, $50-60$ cycles, 45 watts.

DEALER'S NET PRICE, including operating instructions and shoulder strap $\quad \$ 115.00$

## NEW SIMPSON MODEL 498 FIELD STRENGTH METER GOES ANYWHERE!

This practical Simpson field strength meter answers the long-felt need of service technicians for a combination power line or battery operated field strength meter.
Simpson Model 498 operates from any one of four sources:

1. Simpson 498 operates from 117 V AC line OR
2. Simpson 498 operates from self-contained storage battery OR
3. Simpson 498 operates from your automobile battery* OR
4. Simpson 498 operates from your external battery.

Models housed in beautiful grey hammerloid finished case with heavy leather handle for greater portability.

COLOR BAR GENERATOR

Everything You Need in a Color-Bar Generafor . . . Including Independent Saturation and Hue Controls!

MODEL 430 Color-Bar Generator is a lightweight, portable instrument which provides a total of 18 output signals. True saturated primaries and complementaries are available, as well as the NTSC color-difference signals, and black-and-white. Single or multiple presentation of bars is provided. The signals are: Red, blue, green, yellow, magenta, cyan, black, white; plus-or-minus (R.Y), plus-orminus (B-Y), plus-or-minus (G-Y) $/ 90^{\circ}$, plus-or-minus Q ; white, and black.

Horizontal sync and burst (variable burst voltage).
Sound carrier, overload check, and signal monitor output are provided. Independent hue and saturation controls are provided. Positive or negative video output is available. Video output: for signal injection directly into video system. Ample attenuation.

VARIDOT

WHITE
DOTGENERATOR
VARIABLE DOT SIZE
VARIABLE DOT NUMBER
Lets You Adjust the Number and Size of Dots to Your Own Liking

The NEW Simpson Model 434 provides white dot patterns with variable dot size (from 1 to 8 scanning lines. with corresponding dot widths), and variable dot number, from 8 to 20 horizontal dots, and 6 to 15 vertical dots.
With the Model 434 White Dot Generator . . . you make linearity adjustment of black and white TV and linearity and convergence adjustments on color TV receivers with confidence. Adjustable dot size provides a check of receiver transient response.
Horizontal and vertical sync pulses are provided, with adjustable vertical sync which can be operated at line frequency or of line frequency. This also operates as a hum-check control for both color and black and white receivers. This feature is rarely found in test equipment offered at this price. Vertical and horizontal synchronization assures you of correct aspect ratio . . . ample attenuation . . . 300 ohm RF output.

Positive or negative video output . . . excellent for accurate and fast checking transient response of video amplifiers is available.

Housed in attractive Simpson grey hammerloid case.
Modulated RF output is available, operating on fundamentals from Channel 2 to Channel 6. Line Voltage: 117 Volts, $50-60$ cycles, 45 watts. Weight is approximately $111 / 2 \mathrm{lbs}$.

## MODELS 240 and 230 VOLT-OHM-MILLIAMETERS

These two "Micro-Tester" portables are famous throughout the world for their ruggedness and built-in accuracy. They exemplify the construction features and utility that distinguish the entire Simpson line shown in this section.

Both are shock-proof and incorporate the special D'Arsonoval Simpson movement which is known for its extreme accuracy. Resistors are in matched pairs to provide the greatest possible accuracy for all ranges.

Model 240 - the "Hammeter" - was designed for the additional voltage and sensitivity demanded in radio testing. With its maximum voltage range of 3000 AC or DC, it was the first self-contained pocket portable instrument built expressly to check high voltage and all the component parts of transmitters and receivers.
Model 230, with a maximum voltage of 1000 volts AC or DC, is ideal for most industrial testing. Its ranges are adequate for most line voltages, for telephone, teletype, and general purpose testing.
Both models are housed in heavily molded bakelite cases, with all numbers and symbols recessed in the panel and filled with white enamel for greatest legibility and ease of reading. Both have full size $3^{\prime \prime}$ meters.

## RANGES

MODEL 240

## MODEL 390 VOLT-AMP-WATTMETER

Ruggedly constructed for full load. continuous operation, the Simpson Model 390 is the first tester of its size ever made to give you volt. ampere and wattage readings in one compact instrument. It embraces two ranges each of voltage and current, providing four wattage ranges which cover practically all types and makes of appliances. The panel has volt-ampere combinations clearly indexed to the proper wattage range on the scale, which makes the instrument easy to use. All readings are shown on one meter. In normal position, the meter indicates volts. Ampere and watt readings are obtained by depressing button on the panel. The widely separated binding posts make it possible for the Model 390 to be used as an individual voltmeter or as an ammeter. The Model 390 has a molded bakelite case with all figures recessed in the panel, which are filled with white enamel for better legibility. Special sets of leads and plug furnished to simplify connections.

RANGES
AC Current. 60 wales
Volts $=0.150,0-300$
Amperes: 0.3, 0-15 Watts: 0.300 , (2000) (1)-1500. 0.30010

## MODELS 391 and 392 <br> AC-DC VOLT-WATTMETERS

Designed for simultancous reading of volts and watts, each of these handy little testers has two separate $3^{\prime \prime}$ square meters, one for volts and one for watts. Each has a built-in cord and plug for connection to the line outlet. and a receptacle for connecting the appliance under test. The ranges for each meter are selected by separate toggle switches recessed in the molded bakelite case. The low power consumption combined with the high efficiency of these instruments results in negligible loss and error in reading.

Model $391(3000$ watts max.)
Ranges: AC or DC
Volts: $0.130,0.260$
Watts: $0.1500,0.3000$

## MODEL 385 TEMPERATURE INDICATOR

This is the newest addition to the Simpson Appliance Tester line. You will find this a compact instrument which is ideal for measuring temperatures from $+70^{\circ} \mathrm{F}$ to as low as $-50^{\circ} \mathrm{F}$, where fast accurate temperature readings are important. The scale is designed so that the center portion is expanded, making the most widely used temperatures easy to read.
The Model 385 is ideal for use in the refrigeration service field and wherever temperature readings are important. such as deep freeze units, home refrigerators. walk-in coolers and air conditioning units.

The temperature readings can be taken at the end of the 15 ' lead which is supplied with the unit. The lead cord is small in diameter, making it possible to close the door of the equipment, thus obtaining temperature indications tunder actual conditions.
The probe can also be immersed in liquids where critical temperatures must be maintained.

Range: - $50^{\circ} \mathrm{F} .1 \mathrm{C}-0^{\circ} \mathrm{F}$. Battery, self-contained Size: $3^{\prime \prime} \times 57 / 8^{\prime \prime} \times 21 / 2^{\prime \prime}$. 127, 137, 147, 157
2' $2 \prime \prime$ RECTANGULAR CASE. Width
 hole. Body diameter, 2 3/16". Scale length $1 / \mathrm{s}^{\prime \prime}$. Bakelite case.

MODEL 27.37-57
ILLUMINATED
$3^{12} 2^{\prime \prime}$ RECTANGULAR CASE. Width $3^{\prime \prime}$; height $31 / 8^{\prime \prime}$. Mounts in round hole. Body diameter $23 / 4^{\prime \prime}$. Scale length $15 / 16^{\prime \prime}$. Bake. lite case.

NOTE: The $21 / 2^{\prime \prime}$ and $31 / 2^{\prime \prime}$ rectangular instruments indicated (*) are also carried in stock with lucite illuminated dials. Supplied complete with socket and 6 volt bulb for an additional cost of $\$ 1.50$ dealer's net. R.F. ammeters lucite illuminated must be supplied with external thermoconple. Add $\$ 4.95$ for couple. All instruments are calibrated for use on non-magnetic panels.

AC.DC ammeters are self-contained for ranges up to and including 50 amperes. Higher range DC ammeters (50MU) listed above CAN be supplied with external shunts and inciude 6 foot leads. Higher range AC ammeters can be supplied with external current transformers and include 2 foot leads. Prices of external shunts or current and transformers should be added to meter prices shown.

## 0－1 DC MILLIAMPERES

Sensitive－type meters such as Stock No． $9300 \%$ ， $0-1 \mathrm{llC}$ Ma．with approximately 1000 ohms internal resistance，and Stock No． $9332 Z, 0-3$ 1）C Ma．， 500 ohms internal resis－ tance，open new design possibilities．Where the necessarily more costly l＇Arsonval per－ manent magnet meter was formerly thought to be the only choice，these Shurite variations are now used in many circuits．Substantial quantity production makes moderate prices possible．

Shurite banel meters are attractive．rugged，de－ pendable instruments with accuracs well within $5 \%$ ．All models have metal cases．telephone－black front；all require $2{ }^{6}{ }^{6} 2$ hole．DC meters are polar－ ized－vane solenoid type，or moving－magnet con－ struction when indicated．AC meters are double－ vane repulsion type with jeweled bearing．Althongh the jewel construction costs more to build，it pays ofi by providing continuing accuracy during a longer useful life．All are guaranteed．
－GUARANTEE：Meters are guaranteed to users against defective workmanship and material，and will be repaired or replaced if sent to the factory postpaid with 40 handling charge within one year after purchase．
－ALL－METAL DIALS－－age and moisture resis－ tant．lithographed in black on white for high visibility．
－STURDY DESIGN—with lusky new coil frames designed to prevent breakage，rigidly mounted in cases with anti－turning hex head studs．Inter－ changeable in other respects with a popular brand formerly available．
－MODERN APPEARANCE－with concealed coils and new raised dial design，enhancing appearance and greatly increasing readability．
－WIDE SELECTION－Shurite offers the broadest line of standard meters in the economy－priced field． Distributor stocks are backed by an extensive factory inventory．
TYPICAL USES：Shmrite products，with their rugsed design，and ability to duplicate readings， enjoy wide acceptance in the electronic and elec－ trical fields for transmitters，receivers，$\Gamma$ V antenna rotator controls，battery indicators，appliances， power sources，battery eliminators，electric fence controllers，and the very popular basic meters in radio test kits，battely voltage indicators on emer－ gency lighting，burglar and fire alarm systems， output meters on rectifiers，rate－of－charge indica－ tors，testers for hearing aid batteries and their chargers．ammeters for plating sets．and polarity indicators for metals analysis，automotive test equipment to pin－ball circuit testers，and well－ depth indicators．Shurite has long been the favor－ ite brand for lohbies and experiments．

## marion RUGGEDIZED meters

The original, glass-to-metal hermetically sealed ruggedized meter. Performs under extreme shock, vibration, mechanical stress and strain. Standard JAN $21 / 2^{\prime \prime}$ and $31 / 2^{\prime \prime}$ sizes. ua, ma, amp, mv, volt, kv, AC rectifier types for voltage, decibel and VU measurement, manufactured to MIL-M-10304. Standard ranges from stock.

Twelve page booklet on request.

Marion Medalist Meters represent an entirely new approach to the design of panel instrument housings. Longer dial arc, larger numerals and longer pointer greatly increase readability, provide up to $50 \%$ more scale length. Particularly useful where minimum panel space and attractive styling are requirements.
One piece plexiglass cover construction. Interchangeable with ASA/JAN 11/2"', $2^{1 / 2^{\prime \prime}}$ and $31 / 2^{\prime \prime}$ sizes. Various colors available. Write for specifications and data.

HS 1-1/2"

## ELECTRICAL INDICATING INSTRUMENTS

HM 3-31/"

# marion hermetically sealed meters 

## "Sealed like a vacuum tube"

For applications involving severe climatic and atmospheric conditions. Dustproof, moisture-proof, unaffected by heat, cold and humidity. Magnetically shielded. High torqueweight ratio. exceptional linearity, sustained accuracy and long life. Dimensionally interchangeable with standard JAN $21 / 2^{\prime \prime}, 31 / 2^{\prime \prime}$ to $41 / 2^{\prime \prime}$ types.

RANGES - See Table under Ruggedized Types

## NTERCHANGEABLE ROUND AND SQUARE COLORED FLANGES

One instrument thus may be used four ways:

Round. non-magnetic panel

Rectangular-nan-magnetic panel

Round-magnelic pane!

Rectangular. magnetic panel

## marion PMI portable bench type induction soldering unit

Simplifies, improves, speeds up component production Safe, compact, economical

Marion Model PMl generates heat within work itself, permits soldering otherwise inaccessible parts. Reduces oxidation, scaling and surface damage. Improves quality, eliminates
need for highly skilled operators. Ideal for quantity production, glass-to-metal soldering. Permits hermetic sealing in your own plant.
Widely used in radio, electronics, jewelry, electrical component, toy, automotive fields.

PMI SPECIFICATIONS
Power Supply: 115 volts, 60 cycles. Size: $153 / 4^{\prime \prime} \times 211 / 2^{\prime \prime} \times 15^{\prime \prime}$. Maunting: Standard relay rack cobinet.
Weight: 150 pounds.

POWER
775 watts at full pawer output, 100 wotts standby.

## OPERATION

Simple, twa-switch cantral: one can trals the filaments, the other, the high valtoge to ascillatar tubes.

## marion meters

SERIES 52

Accurate, dependable, small size. Four case forms: $21 / 2^{\prime \prime}$ round phenolic (52N) (JAN MR24, MR25): $21 / 2^{\prime \prime}$ rectangular phenolic (52S); narrow flange brass (52RM): brass without flange (52RMS). Well-aged Alnico magnets. higher performance at moderate cost. Widely used for pocket test equipment, portable communication, medical equipment.

marion "regular" meters

SERIES 55
$45 / 8^{\prime \prime} \times 41 / 8^{\prime \prime}$. Most popular case style in the test equip. ment field. Model 55 includes the best Marion standard features plus long $100^{\circ}$ scales for maximum readability. It is the accepted standard for many of America's finest vacuum tube voltmeters, tube testers, multime. ters, densitom. eters, and many other test equip. ment applications.

## SERIES 56

$61 / 2^{\prime \prime} \times 51 / 4^{\prime \prime}$ heavy case construction. $51 / 2^{\prime \prime}$ scale. High accuracy, great readability, ideal for combining several scales. For laboratory test equipment and production testing equipment.

SERIES 57
Model 57 is large $81 / 2^{\prime \prime} \times 7{ }^{\prime \prime}$ instrument providing a 67\% long scale in a $100^{\circ}$ arc. It has an Alnico $V$ magnet with highest torque moving system to assure dependable performance in an instrument of this size. Ideal for multi-purpose test equipment, class room use and wherever a great many scales and exceptional read. ability arere. quired.

SERIES 53

Standard $3^{\prime \prime}$ rectangular type meter (Model 53SN). Also available in $31 / 2^{\prime \prime}$ round phenolic case (53RN). (JAN MR34, MR35). All Alnico construction. Excellent scale distribution characteristics. Ideal for portable test equipment and general electronic equipment application.

RANGES-

MCI
Switchboard type fanshaped steel case. Black baked enamel finish. Rugged Alnico construction. Shat. terproof window Terminals permit surface mounting on panels up to 3/4" thick. Recom mended for pre cise laboratory switchboard ap* plications.

## ELAPSED TIME

 INDICATORS - for mainte. nance programming, productivity studies.Compact, low cost tamper. proof. Standard ASA-MIL dimensions, $21 / 2^{\prime \prime}$ and $31 / 2^{\prime \prime}$ sizes. Easy to read standard size counter registers $1 / 10$ hour steps to 9999.9 or hour steps to 99999. Her metically sealed. Shielded. Starts, operates continuously from - $55^{\circ}$ C. $10+85^{\circ} \mathrm{C}$. For 110.125 or 220.250 volt 50 or 60 cycle A.C

## marion meters

# marion multi-range meter tester 

-Power Supply and Limit Bridge
The only instrument of its type available today. Precise, versatile, self-contained unit for laboratory and production use. For DC instrument calibration from 25 ua full scale to 10 ma full scale, and 0-100 V $D C$; sensitivity and resistance measurement; DC current-voltage source; limit or Wheatstone bridge measurements from 0-5000 ohms. Regulated power supply. Stepless vacuum tube voltage control. Accuracy exceeds $1 / 4 \%$ (current), $1 / 2$ ohm or $1 / 2 \%$ (resistance). For 115 V , 60 cycle AC. Complete - needs no accessories.

ruggedized null indicators

## build your own test equipment with marion multi-range meters

Two models, HS2 (2 $1 / 2^{\prime \prime}$ ) and HS3 ( $31 / 2^{\prime \prime}$ ), devised to permit application of the basic D'Arsonval mechanism to the field of sensitive null detection in applications not per. mitting use of suspension Galvanometers. The unique core and magnet structure of Marion's null indicators allow precise null determination with high sensitivity over a wide range of unbalance. They permit the observation of large amounts of unbalance in bridge or other detection circuits without physical or electrical overload of the instrument. Manufactured in many different current sensitivities and in various internal resistances.
STANDARD TYPES

## PANEL INSTRUMENTS

These panel instruments reflect half a century of instrument skill, and the Weston tradition of building instruments to the highest standards of dependability and service.
Models 301, 425 and 476 are available in round flush bakelite cases $31 / 2^{\prime \prime}$ or $33 / 8^{\prime \prime}$, and $31 / 4^{\prime \prime}$ metal cases with black finish; also in round surface metal and rectangular flush bakelite cases. Models 301 and 425 supplied in round surface bakelite cases. Models 506, 507, 517 regularly sup plied in round flush $21 / 2^{\prime \prime}$ bakelite and black finished metal cases; flush narrow flange metal and reciangular flush bake lite cases with a clamp for panel mounting. Model 506 available in surface metal case. All are calibrated normally or use on non-magnetic panels. For mognetic panel use, instruments will be adiusted for steel panel thickness of $.09^{\prime \prime}$. Order instruments in bakelite cases for use on circuits above 300 volis when is is not possible to connect in grounded side of line. For other insirument prices, write to Weston Electrical Instrument Corparation. Newark 5, New Jersey.

# WESTON INSTRUMENTIS 

## MODEL 983 OSCILLOSCOPE

he Weston Model 983 is a high gain, wide band oscilloscope designed or the TV technician. The band width of 4 megacycles allows accurate display of video frequencies, including pulse wave forms and color synchronizing bursts. High sensitivity of 17 millivolts per inch make this oscilloscope ideal for setting resonant traps, as a general null indicator, and for signal tracing in low level stages, as well as for weep frequency visucil alignment of TV receivers. The unit has pro visions for internal calibration, internal phased sine wave, and Z-axis intensity modulation. Reversal of polarity of both horizontal and vertical signals is easily accomplished by means of toggle switching

8y internal adjustment with gain contrals at maximum, 00 phase shift is possible on any specific frequency ta 6 mc

A fast, retrace, linear sweep circuit with cathede follower output prevents pattern distortion. Preset sweep rates of 30 and 7875 cycles are available. In addition, if provides contiriuous coverage from 10 cps to 500,000 cps. 8oth vertical and morizontal trequency amplifiers have compensated step attenuators and cathode follower input. A.C or D.C coupling can be made without affecting sensitivity or band width.

## SPECIFICATIONS

WIDE BAND FREQUENCY RESPONSE: Flat within 1.5 db from $0-3.58 \mathrm{mc}$ and within -3 db to 4.5 mc on both vertical and horizontal am olifiers. Transient response: overshoot 2 to 5\% Rise time: 0.1 microsecond.
HIGH DEFLECTION SENSITIITY: 15.0 millivolts per inch, RMS, on both vertical and horizontal amplifiers
PHASE SHIFT: Between Horizontal-Vertica Amplifiers, 0 to $100 \mathrm{kc}-00$; to 1 mc within $20^{\circ}$. by internal adjustment with gain controls a max. 00 phase shift possible on any specific ${ }^{\text {r }}$ requency to 6 mc .
CALIBRATING VOLTAGES: 500 millivolts, 5 volts, 50 volts, 500 volts, peak to peak
Z-AXIS MODULATION: Input terminal mounted on front panel
SWEEP FREQUENCIES; $10.500,000$ cps. vari able. Preset TV/V Position-30 cps. Preset TV/H Position-7875 cps. Retrace Time-better than $2 \%$ to 100 kc ; at 500 kc less than $10 \%$.

INTERNALLY PHASED SINE WAVE.
VERTICAL ANO HORIZONTAL POLARITY: Reversible.
INPUT IMPEDANCE: Vertical Amplifier (with. out Shielded Cable). I meg shunted by $60 \mu \mu f$. Vertical Amplifier (with Shielded Cable), ; meg shunted by $120 \mu \mu f$. Vertical Amplifier (with Low Capacitance Probe), 10 meg shunted by $12 \mu / \mu$. Horizontal Amplifier (without Shielded Cable), I meg shunted by $60 \mu \mu$ f. POWER SUPPLY: $105 / 125$ volts, $50 / 60$ cycles.
TUBE COMPLEMENT: (I)-IV2, (1)-5U4-GA $\begin{array}{llll}\text { (6) }-6807 A, & \text { (4)-12BY7A, } & \text { (4) }-6 A H 6, & \text { (1).6U8, }\end{array}$ (1)-5UP1, (1)-OD3.

CASE: Grey hammertone finished steel.
PANEL: Aluminum finish with etched, black markings.
SIZE: $10^{\prime \prime} \times 13.5^{\prime \prime} \times 18^{\prime \prime} .(254 \times 342.9 \times 457.2 \mathrm{~mm})$ APPROX. WEIGHT: 40 lbs. (18.2 kgs.)

Net Price $\$ 329.50$

Model 983

A light weight, packet size instrument of special design ta insure extreme ruggedness and sustained accuracy in every day service. The care-magnet mechanism has spring backed jewels, and is effectively shock-maunted in the sturdy Bakelite case. Scale windaw is af $s$ hatter-praaf Plexiglas, wrap-araund design. Has anly ane easily read scale far all ranges and functians which are selected thraugh canvenient thumb selectar switch. Jaws take up ta $1^{\prime \prime}$ raund, ar $13 / 4^{\prime \prime}$ rectangular canductars. Supplied in sturdy scuffipraof case, with campartment far $5^{\prime}$ valtage test leads which have insulated clips and remavable test prabes.
Rated Accuracy: $\pm 3 \%$ fuil scale deflection. Weight: 14 az . Size: $71 / 2^{\prime \prime} \times 3^{\prime \prime} \times 11 / 4^{\prime \prime}$.

Ranges: Current-300/150/60/30/15/6 amperes a.c.

## MODEL 980 LINE - WESTON TEST EQUIPMENT

A New Simplified Approach to TV Alignment

The Weston Model 980 line provides servicemen with the most odvanced, and by for the most simple ond occurote method of TV receiver olignment. It comprises oll of the instruments necessory for oll-purpose observotion of complex wove forms by the electronic industry.

With the Weston method, the output of the sweep generotor is fed into the colibrotor moking it unnecessory to connect the colibrotor to the IV set. Only two connections ore necessory. This eliminotes receiver oscillotions ordinorily encountered with the conventionol method of receiver test hook-up. Further, there is no disoppeoronce of morkers of trop resonont frequencies. Response curve is not disturbed. Annoying trimmer touch-up on trop circuits is minimized.

## WESTON MODEL 985 CALIBRATOR

The Weston Model 985 Colibrotor is o highly functional in. strument for TV shop, engineering, loborotory, ond industrial olignment applicotions. Morkers ore provided for woveform potterns, locol tuner oscillotor frequencies, ond trop circuit olignment. The instrument is extremely useful for moking lineority odjustments, colibroting signol generotors, and determining signols of unknown frequencies.

## FEATURES

SCALE CALIBRATION: The frequency calibration of each frequency setting can be checked and adiusted with crystal accuracy. Crystal calibrating points are available at 1.5 and 4.5 megacycles throughout the entire scale. A scale shift knob is provided to align properly the scale with the crystal calibrating dots. A neon type bulb is utilized to indicate visibly the erystal frequency points.

SCALE PRESENTATION: Slide rule type in which one scale is visible at a time. Ten scale range bands available. . . total scale length of $81 / 4 \mathrm{ft}$.

DUAL MARKERS: 4.5 mc side band markers permit simultaneous ob. servation of video and sound carrier.

INTERNAL MARKERS: Special circuitry provides an internal marker of either a positive or negative pulse suitable for $\mathbf{Z}$-axis intensity modulation of the scope pattern. This eliminates the necessity of feeding an RF calibrator signal directly into the TV receiver which can cause overload and oscillation in the TV set. The marker is visible even at the sound trap frequencies.

HETERODYNE DETECTION: With an input sensitivity of 500 microvolts, the local TV receiver-tuner channel oscillator frequency can be determined without tuner disassembly.

BAR PATTERN GENERATOR: Amplitude modulated signals of the band oscillator at 400 cycles for the horizontal linearity check and 300 KC for the vertical linearity check can be readily fed to TV antenna terminals to produce horizontal and vertical bars.

This simplified technique is only possible when the componion instruments - Weston Colibrotor ond Sweep Generotor - ore used with o scope hoving provisions for Z-oxis intensity modulotion. However, individual instruments in the Model 980 line con be used with ovoiloble test equipment in the conventional method of olignment.
SEND FOR COMPLETE DATA ON THE NEW WESTON MODEL 983 OSCILLOSCOPE. IWide band, Z-axis intensity modulated ideal for color. 1 Accessories for all instruments described are available.

## SPECIFICATIONS

FREQUENCY RANGE (with Variable Frequency Oscillator):

- 4-110 megacycles in 7 bands.
- $770-260$ megacycles in 3 bands.
- Use of second harmonic is suitable for UHF 340-520 megacycles in 3 bands.
OUTPUT ATTENUATOR RANGE: $100 \%$ to $1 \%$.
CRYSTAL MARKER ACCURACY: 1.5 mc position $\pm 0.01 \%$
4.5 mc position $\pm 0.01 \%$

INTERNAL MODULATION FREQUENCIES: $400 \mathrm{eps}, 300 \mathrm{KC} .4 .5 \mathrm{mc}$ HETERODYNE INPUT SENSITIVITY: 500 microvolts (VFO)
LINEARITY ADJUSTMENT: Horizontal - 400 cycles
DUAL MARKERS: Video and sourd ... available for either Z-axis
intensity modulation of scope or conventional marker pip display. TUBE COMPLEMENT: 68A7, 12AT7, 6CL6, 6AL5, 6X4, 6T4. POWER SUPPLY: $105 / 125$ volts, $50 / 60$ eycles per second. SCALE LENGTH: $81 / 4 \mathrm{ft}$.
CASE: Grey hammertone finished steel.
PANEL: Aluminum finish with etched black markings.
SIZE: $13.5^{\prime 4} \times 10^{\circ 4} \times 6.75^{\prime \prime}$
APPROX. WEIGHT: $183 / 4$ lbs.
Model 985

## WESTON MODEL 984 SWEEP GENERATOR

The Weston Model 984 is o top performonce instrument, precision built for effective trouble shooting of sound ond video If circuits, ossociated trap circuits, TV tuners, video omplifiers and all-purpose visual olignment. It hos o high flot output voltoge.

## FEATURES

BLANKING: Special circuitry produces a zero output reference base which is essential for relative gain measurements.
RF OUTPUT: Frequency modulated signal, TV Channels 2 to 13 in clusive, complete FM coverage available by means of two preset selector positions. FREQUENCIES ARE FUNDAMENTALS OF THE OSCILLATOR FREQUENCY.
IF/VIDEO OUTPUT: Frequency modulated signals ranging to 50 megacycles, continuous tuning, signals free from harmonics.
SWEEP WIDTH: Fulf 10 megacycles on all channels
Z-AXIS TERMINAL: For use with the Model 985 Calibrator.

## SPECIFICATIONS

SWEEP WIDIH: $0-10$ Megacycles (continuously variable for both IF and RF ranges).
OUTPUT VOLTAGE (RMS): 0.1 Volt . . . sweep is linear.
RF OUTPUT: TV channels 2 to 13 preset. Complete FM coverage available by means of two additional preset selector positions. IF/VIDEO OUTPUT: 50 Megacycles (continuous tuning). HORIZONTAL SWEEP FOR OSCILLOSCOPE: Phase adjustment range - $165^{\circ}$. Frequency - Power Line 60 cycles per second.

CABLE TERMINATION: RF output - $\mathbf{3 0 0}$ ohms balanced. IF output 100 ohms.
POWER: $105 / 125$ volts, 60 cycles.

## WESTON MODEL 981 PROPORTIONAL MUTUAL CONDUCTANCE TUBECHECKER

## FEATURES

METER MEASUREMENT OF HIGH LEAKAGE RESISTANCE: Provides an accurate meter measurement of leakage resistance as high as 5 megohms between tube elements, thus being particularly useful for TV servicing and TV tine production assembly.
MULTIPLE SWITCHING FACILITIES: Protection against obsolescence is assured through the use of nine single circuit, twelve position, selector switches. These multiple switching facilities make possible many more combinations of tube connections.
TWIN SECTION TUBES: Three toggle switches make it possible to rapidly check and compare the respective sections of twin section tubes at only one setting of the selector switches.
SINGLE SOCKET FOR EACH TUBE BASE REGARDLESS OF TUBE CONNECTION: Eliminates the possibility of plugging a tube into the wrong socket. Sockets are provided for conventional type tube bases as well as acorn, and 7 and 8 pin subminiatures.
Gm MEASUREMENTS: Gm measurements are made more accurately by using filtered d-c plate, screen grid and control grid potentials. A precision voltage divider network and selector switch allows a proportionate value of signal voltage to be chosen for testing tubes having transconductances up to 30,000 micromhos. fignal voltages of $5.2,2.6,1.3$, and 0.65 volts peak-to-peak having a frequency of 5000 cycles are provided.
ROLL INDEX CHART: Provides comprehensive, up-to-date test data on commonly encountered tubes, as well as those infrequently used.
FILTERED D-C VOLTAGES: Filfered d-c potentials of 90,130 , and 220 volts are available for plate and screen potentials. A variable to obtain better resolution of Grid Bias settings. Far greater accuracy is obtainable with filtered d-c potentials than previously possible in portable tubecheckers.
VOLTAGE REGULATOR TUBES: A selenium rectifier supply furnishes 200 volts $\mathrm{d}-\mathrm{c}$ for testing of voltage regulator tubes.
SUBMINIATURE TYPE TU8ES: A 45 volt potential source facilisates testing of subminiałure tubes.

TUBE COMPLEMENT: 6J6, 6U8, 12AT7. 6X4.
CASE: Grey hammertone finished steel; leather carrying handle. PANEL: Etched aluminum satin finish.
SIZE: $13.50^{\prime \prime} \times 10^{\prime \prime} \times 6.75^{\prime \prime}$
APPROX. WEIGHT: 14 las. 4 oz.
Model 984
Net Price $\$ 199.50$

## SPECIFICATIONS

FILAMENT VOLTAGES: .65, ,1, $1.5,2,2.5,3.3,5,6.3,7.5,10,13$, 20, 27.5, 35, 47, 70, 85, 115.
PLATE VOLTAGES: 90, 130,220 volts d-c; $22,44,160$ volts a-c.
SIGNAL VOLTAGES: $5.2,2.6,1.3$. 0.65 volts peak-to-peak.
Gm RANGE: $U_{p}$ to 30,000 micromhos.
POWER REQUIREMENTS: 100 to 125 volts, 60 cycles single phase d-c, 30 watts.
CASE: Grey hammertone finished steel
SIZE: $17.50^{\prime \prime} \times 13.25^{\prime \prime} \times 6.00^{\prime \prime}$.

Model 981
Net Price \$199.50

# 980 LINE WESTON TEST EQUIPMENT 

## WESTON MODEL 982 VACUUM TUBE VOLTMETER

The Weston Madel 982 is a self-contained, battery operated Vacuum Tube Voltmeter. It is particularly adaptable to the Radio-TV Servicing industry where the requirements of peak to peak measurement of a-c voltages exclude the use of con ventional meters. This instrument makes possible quantitative measurement of all complex wave form voltoges utilized in video, sync and deflection circuits with no a-c line interference in critical meosurements.

## FEATURES

8ATTERY OPERATED: Unit affords complete isolation from spurious response due to stray a-c fields and circulating ground currents. Extremely low drain for long battery life. Power Consumption: Less than 25 milliwatts.
DIRECT PEAK TO PEAK MEASUREMENTS.
NO SWITCHING OF LEADS IS REQUIRED: One shielded lead is used for all measurements, a-c, d-c, ohms, and peak to peak. RANGE FUNCTION SWITCH: Makes negative and positive d-c potentials measurable DIRECTLY
HIGH INPUT IMPEDANCE: 10 megohms on d-c for accurate measurements - 2.8 megs. a-c, RMS - 1 meg. a-c, peak to peak. NO ZERO SCALE DRIFT: Instrument can be used immediately without waiting for warm up. resetting of zero corrector when switching from range to range is entirely eliminated
DC ISOLATION ADAPTOR: Makes d-c measurements possible in the presence of a-c voltages.
FREQUENCY RESPONSE: Suitable for measurement of TV wave forms, such as sync pulses, saw tooth, drive voltages, and other complex wave form voltages.
DISCRIMINATOR ALIGNMENT: Zero corrector knob has sufficient latitude to center scale, so that discriminator measurements can be made.
RF PRO8E is available as an accessory.

## SPECIFICATIONS

ACCURACY: $\pm 3 \%$ d-c - $\pm 5 \%$ a-c, RMS. Sinusoidal wave form. IMPEDANCE: 10 megs. d-e - 2.8 megs., a-c, RMS -1 meg. a-c, peak to peak.

RANGES:

BATTERY LIFE: Battery $A^{*}$ - Approx. 90 days . . . is easily replaceable (Standard 1.5 volt Size D Cell) Battery $B^{*}$ - Shelf life approx. 1 year
SCALE LENGTH: 4.63".
CASE: Grey hammertone finished steel with carrying strap.
PANEL: Aluminum finish with markings etched in black.
SIZE: $10^{\prime \prime} \times 7.38^{\prime \prime} \times 3.625^{\prime \prime}$
APPROX. WEIGHT: 6 lbs. (complete with batteries and accessories). 4 lbs. (without batteries).

* 8 ased on maximum use -8 hours per day.

Model 982 ... .................................................................. Price \$69.50

## WESTON MODEL 980 ANALYZER (VOLT-OHM-MILLAMMETERI

The Weston Model 980 Volt-Ohm-Milliammeter is o highly sensitive, occurate and rugged instrument with o combination of functional ronges which provide o wide ronge of test meosurement applicotions in the electronic field. The instrument has o d-c sensitivity of 20,000 ohms/volt, ond on o-c sensitivity of 1000 ohms/volt. Accurocy is $2 \%$ d.c. $3 \%$ o.c.
Ronge ond functional switching is greatly simplified by use of o single diol for oll ronges ond functions.

## SPECIFICATIONS

ACCURACY: 2\%, d-c; 3\%, a-c.
SCALE LENGTH: 4.63'

## YOU CANNOT BUY BETTER

The dependable time proven movements of the famous Phaostron RUGGEDIZED and SEALED Instruments (which conform to U.S. Military Specification MIL-M-10304) have been incorporated in these CUSTOM Instruments. ONLY those elements required for the extreme high shock combat conditions of Military Instruments have been eliminated.
PHAOSTRON Metal-Cased CUSTOM Instruments overcome the undesirable characteristics of unshielded, plastic-cased meters,
 which have been known to deviate up to $35 \%$ from their initial calibration when exposed to magnetic fields. Phaostron Anti-Magnetic shielding is accomplished by the drawn steel case which shields the magnetic assembly of the instrument against stray magnetic fields insuring continued instrument accuracy. CUSTOM Instruments are calibrated to within $1 \%$ of full scale deflection, with controlled, certified standards assuring $2 \%$ reading accuracy. All models have large, easy to use, insulated front zero adjustments. CUSTOM Instruments are available in $2 \frac{1}{2}{ }^{\prime \prime}$ and $31 / 2^{\prime \prime}$ sizes with either round or square bezels, AC or DC models, and Null Indicators. We leave it to you . . . would you buy a plastic-cased wrist watch if you could buy the finest movement in a magnetically shielded metal case?

## PROVIDE ENVIRONMENT FREE OPERATION anywhere IN THE WORLD

$21 / 2^{\prime \prime}, \quad 31 / 2^{\prime \prime} \& 41 / 2^{\prime \prime}$
SIZES

These panel instruments are the product of engineering skill and facilities that have produced ruggedized precision instruments and test equipment for The Military and are now available to industry.
Built to meet U.S. Military specifications MIL-M-6A and MIL-M10304, these instruments will withstand extreme shock, vibration, fumbling, humidity, complete immersion and extremes of temperature. They will provide ENVIRONMENT FREE operation anywhere in the world.
These instruments feature RUGGEDIZED movements, Sealed
 Construction, Anti-Magnetic Shielding, Self Contained Rubber Shock Mounts, Shock Mounted Jewels and Pivots, aged Alnico Magnets, Miniaturized Hairsprings, Pointers locked to the balance cross of the moving coil system, and $2 \%$ Accuracy.
A Fhaostron RUGGEDIZED \& SEALED Panel Instrument is leakproof, breakproof, shockproof, shielded from stray external magnetic fields and impervious to temperature changes. Available in A.C and D.C. models, also Null Indicators.

## RUGGEDIZED NULL INDICATORS

Three deflections of arc are available in $21 / 2^{\prime \prime}, 3 \frac{1}{2}{ }^{\prime \prime}$ and $41 / 2^{\prime \prime}$ sizes. Principal applications are bridge and potentiometer balance indicators-or where instru. ments of extreme sensitivity near the zero or balance point are required. These RUGGEDIZED indicators make possible the application of Null systems for precise measurement under previously prohibitive conditions.

RUGGEDIZED NULL INDICATORS $21 / 2^{\prime \prime}, 31 / 2^{\prime \prime}, 41 / 2^{\prime \prime}$ Sizes

## WE LEAVE IT TO YOU

 WOULD YOU BUY A PLASTIC.CASED WRIST WATCH . . .if you could buy the finest movement in a magnetically shielded metal case?

Phaostron, world famous manufacturer of ENVIRONMENT FREE PRECISION AIRCRAFT EQUIPMENT for Military and Industrial uses introduces a new concept in Multimeters, This magnetically shielded, metal-cased " $555^{\prime \prime}$ compares with plastic-cased multimeters as a fine watch in a precious metal case would compare with a plastic wrist watch.

The shielded, shatterproof and anti-magnetic case insures continued accuracy and integrity of this instrument for years to come.

Phaostron " 555 " Multimeter incorporates more ranges, including AC current, greater visibility, simplified and functional controls and the greatest value offered to date.

See the Phaostron " 555 ", note its many outstanding features, its beautiful satin chrome case, its compactness and light weight, and you will know why
"YOU CANNOT BUY BETTER"

MODEL Nos. 636 and 598

HOYT A.C. Meters for indicatiag 60 cycle Voltage and Current are of the repulsion type with pneumatic damping. Furnished in the same case styles and sizes as HOYT D.C. Meters, they match the D.C. meter where both types are used on the same panel.

Accaracy is $2 \%$. A choice of pointers is available, and special shields can be supulied if needed.

MODEL No. 593
$21 / 2^{\prime \prime}$ Rect. Case

## MAGNETIC VANE MOVEMENTS

HOYT magnetic Vanetype Indicators have been used for many years by the leading manufacturers of electrical devices.

Attractive appearance is combined with a
sturdy movement. Furnished in round or square cases at low cost. Standard finish on metal cases is black. Chrome Plate is available at slight additional cost.

MODEL No. 566
$21 / 4{ }^{\prime \prime}$ Round Case

Model 532

## COMPLETE PORTABLE SERVICE UNIT

- COMPOSITE PLATE CONDUCTANCE TUBE TESTER - ACCURATE VOLT-OHMMETER - CONDENSER LEAKAGE TESTER
- DRY BATTERY TESTER

All In One Attractive Luggage Type Case
The Chicago Model $\quad$ nit contains all the instruments you would normally ever need to movide on-the-job service. The tube checker is of the very latest design using a patented quick set-up key arrangement that tests diodes as diodes. triodes as triodes and pentodes as pentodes. Illuminated roll chait lists all receiving tube types including some just coming on the market. Dimensions: $16^{\prime \prime} \times 13^{\prime \prime} \times 71 / 2^{\prime \prime}$.

VOLT-OHMMETER HAS ALL USEFUL RANGES:
A.C. Volts
D.C. Volts

Ohms

## CHICAGO INDUSTRIAL INSTRUMENT CO.

Since 1933 we have been manufacturing a quality line of test equipment. For high accuracy and rugged dependability, Chicago Instruments are without compare in the service field. They represent the greatest test equipment values on the market!

## CHICAGO MINIATURE VOLT-OHM-MILLIAMMETERS

Chicago Industrial Instrmment Company is the poneer maker of miniature service instruments. The accuracy of bench type equipment in a pocket size unit makes these handy instrments most popular for home service calls. A choice of sereral models is a a ailable at extremely attactive prices.

## DYNAMIC MUTUAL CONDUCTANCE TUBE TESTER

## Most Accurate Engineers＇Laboratory Model Tests Tubes Per Tube Handbooks and JAN Specifications

Model 700：For precise laboratory measurements of the most in－ portant vacuum tube characteristics，Transconductance（Mutual） Conductance）．With this Tube Tester it is possible to duplicate the results found in tube manuals．This instrument places a separate voltage on each clement of the tube．These voltages can be varied and measure by means of separate variable rheostats and meters in each circuit．A．C．ripple has been completely filtered out of the plate．screen and grid circuits，
In addition to providing accurate measurements of Mutual Con－ ductance，it is possible to study the behavior of various tubes when used in non－conventional and special types of circuits．Amplification Factor and Plate Resistance may be obtained from the test results The HICKOK Model 700 may be operated in either of two ways． First．by making use of alternating current null methods of measure－ went in which capacitance and resistance errors have been eliminated： and second，by direct reading on a meter．The Null Method of making measurements on the tube is the most accurate and is the one which is recommended where sufficient time for the test is available．
Complete with all leads and accessories．Attractive and sturdy case．
Model 700

TECHNICAL
1．Micromho rates are arailabie as follows：600，1500．3000． 6000 15．（00I， $30,0 \mathrm{~h}$ at hd bl l，（000 micromho．
2．Four separate signal voltages ire available， 1.0 volts． 0.5 volts 0.1 volt and 0.05 volts
3．Plate voltage supply is conimaously variable from zero to 300 volts．An impividual B．C．whtmeter in the plate circuit read plate voltage at all times．
 This is metered $1, y$ means of a separate D．Voltmeter it The serena control gif voltage is continuously variable from 0 to The control aril voltage is continuously variable firm on D．Voltmeter in the gride circuit．Provision is made to make bias either incentive or positive．Suppressor can be used as control grid if alestred．
6．Ap extra negative circuit is provided for holding umber mule elements negative whale test is being made on other bidets．
－Provision is made for testing tabes under seli－bias conditions when requite d by that partienkior tube or when such informa lion is desired．
8．Fitment voltage may be applied to the tube up 1011 vols A．F．The separate A．C Voltmeter in this circuit measures the voltage abe lied to the filament at all times．This voltage
 to amperes

FEATURES
screen current．or cathode current．This reads from 0 to 150 ma．and may he switched into the three circuits for this ma．and
purpose．
10．A separate（1）．C．Microammeter is mounted in the control grid circuit to read grid current，if and when it exists．
11．Amplification factor can be easily calculated from values obtained from the meter readings．Other factors may be obtained from the meter readings．Other factors may be
similarly calculated．
12．Provision is made for testing tapped filaments either in series or in parallel． series or in parallel for adjusting to the electrical center of filament type tulies． Twin tube section may be tested either singularly or in parallel．
Screen grid tubes can be connected ats triodes or tetrodes． etc．，as mat be desired．Switching arrangement is provided for this purpose．
A builtin power supply is included with the instrument providing thoroughly filtered 1）．$\left(\begin{array}{c}\text { on plate．screen，and con }\end{array}\right.$ trot grid．
A voltage adjustment with an accurate A．C．meter in the circuit is provided to insure exact signal voltage and correct phasing． ion． 150 watts．Calibration for other frequencies and voltages ton． 150 watts．Calibration for other frequencies and voltages
available．
19．Approximate size－ $\left.8^{\prime \prime} 1\right) \times 20^{\prime \prime} W^{*} \times 29^{\prime \prime}$ L．Approximate TO Hos．net．© I hes shipping．

Model 7001：Null Ruarling Apparatus is self－contaned in a shall case placed alongside the Model 700 tester．It consists oi a voltage supply（source from the Model 700 to assure correct phasing），a sensitise A．C．Galvanometer，a calibrated resimbr，and an accurate $\therefore$ C．Voltmeter．It is connected directly into the plate circuit of the tube under test by binding posts on the panel of the Model 700．The grid－signal－produced－component of plate current is balanced by an dual and opposite current applied to the plate from the power supply through the calibrated resistor．The reading of the Micromho Meter at the top of the panel is proportional to the＇lransconductance of the tube，and is therefore calibrated in Micrombor．The effect of the Null Reading Method is to reduce resistance in serins with the plate to zero，thereby assuring the highest accuracies obtanteble．
Model 7001 ：for obtaining bridge type null readings of $1 / 2 \%$ accuracy． $8^{\prime \prime}$ D．，8＂W．， $1.31 / 2 " L$

## DYNAMIC MUTUAL CONDUCTANCE IN A SMALLER COUNTER MODEL

Model 533AC, a lower cost dealer's comoter model. Attractively designed to set on the counter and increase vour tube sales. Highly accurate Dsnamic Mutual Conductance circuits. Encourages customers to bring their tubes in where they can see the actual test. If customers' tubes check "()K" you have an excellent opportunity to invite hin to bring his receiver in for a thorough check of all its circuits. With the 53.3 -AC you will build customer confidence, increase tube sales and promote your complete radio and $T V$ service.

Model $533 A C$, illustrated at the left. Satin finish almmitum panel. Beautifully styled, blue enameled steel case. $171 / 2^{\prime \prime}$ WV., $18 \frac{1}{2 \prime \prime}$ L., $6^{\prime \prime} \mathrm{H}$. 23 lis. net, 30 Hb s. shipping weight. $105-125$ V...... 40 watts.

## Model 533AC

## SPECIFICATIONS:

Dual-scale metcr provides readings in micromhos for the technician.
A.C. Signal 2.5 volt: : $0-3000,6000,15.000$ micromhos. Quick, impressive, accurate, and dependable.
Detects more weak, ordinarily passable tubes.
Contains the IIICKOK lube Gas lest and a circuit
for accurate forecast of future tube life.
Simple to operate.

Contains all necessary tube information on a handy built-in roll chart.
Tests tubes under simmlated operating conditions.
T"ests all the latest tubes including television.
Large 5" easy-to-read meter scale and calibrated GM circuit provide increased accuracy in testing tolay's newer tubes.
Contains the new HICKOK improved "Short Test."

## PROFESSIONAL RADIO-TV TECHNICIANS PORTABLE MODEL

#### Abstract

Model 533AP: Radio, television and communication techncians' portable model with true Dynamic Mutual Conductance circuits pionecred by HICKOK. Acclaimed by the experts as the only true test of a tube.

Model 533AP. illustrated at the left. Strong. portable carrying case with detachable cover. Designed for on-location or shop-bench servicing. Case is attractively covered with durable black leatherette. 163/4" W.. $183 / 8^{\prime \prime}$ L.. $71 / 2$ " D. 23 11ss. net, 30 lls s. shipping weight. $110-130$ V.A.C. 40 watts.

Model 533 AP

## SPECIFICATIONS:

New liats Fine prewents accidental damage to bias potentiometer. New lucite meter window has staticfrec coating.
Tube realings in micromhos- $33-3000$, 6000, 15.000 Tests tubes under simulated operating conditions.
Contains the H1CKOK Tube Gas Test and Tube Noise test.
Incorporates the new test feature that forecasts future life of a tube.

Larger: s" easy-to-read meter seale and calibrated GMI circuit provide increased accuracy in testing tolay's newer tubes.
Tests all the latest tubes including miniature and subminiature types.
An improved "Short Test" is incorporated into the design of this tester.
Completely built of highest quality components for lasting accuracy and dependability.

Most valuable for accurate matching of tubes in television servicing.

## VHF-UHF MARKER GENERATOR

Model 690: Cixatat controlled. Hixh . 25 rolt RF output. I'rovides dual markers with any TV sweep gemerator. Features amother HICKOK First - a Non-Parallax shadow type dial. Consentional dials unless viewed at exact, right-angle interduce error, since hairline indicator is always a slight distance from the scale. The HICKOK Non-Parallax dial can be viewed from any angle without introlucing error. The 45 inches of dial can be self-calibrated to within $05 \%$ accuracy with selfcontained crystal calibrator. Complete RF coverage channets 2 thru 8.3. Also, 3.57 me erestal (color burst frequency) is available. Leading TV manufacturer"s engineers have tested this mit and comment highly on its frequency, stability and time saving features. You need the 690 for VHF or CHF black and white aligument right now.

## Model 690

OUTSTANDING FEATURES

- Exceptionally rapil and thme saving method is comployed in calibrating the dial. Non comenting of beate -no interpolation-no remembering of frequencier.
- Calibrates other signal gemerators to erystal accuracy
- Complete IF-RF coverage thru channel 8.3. Picture and sonnd settings marked for all channels.
- Marker can be modulated by seli-contaned 400 cyele Especially valuable in stage-hy-stage alignment Eliminate:- nse of amother instrument.
- I'rovision for two wher ery-ats, in addition to 2.5 me crystal supplied. (3.57 the crystal. frequency of the onlor burst. available for colno work.)
- \iew two markers at once on response curve main marker and marker of crystal selected. Greatly spereds alignment.
- Both electroniceye and headphone jack provide visual or autlible zero-beat.
- Attenuation is controlled by both step attenuator and vernier for completely regulated output.
- Unit is completely double-shielded.
- All VHF frefuencies on fundamentals. No spurious or confusing heats.
- Strong. attractive steel portable cate. $16 \frac{1}{2 \prime \prime}$ W. i31ヶ" Н.. 8" 1). 26 lbs. Net; 34 lbs. Ship.

## Model 691

## OUTSTANDING FEATURES

- Lamut Rİ voltage required: 50.000 microvolts.
- Ontput marker voltage: maximum 3 volts.
- Ittennation of matker: variable (0) to go dlo.
- Attenuation of remponse curve: variable 0 to 20 db .
- Input impedance: 90 ohms.
- L'ower supply required: $105-125$ volts. A.C. 50-60 cycles, 25 watt.
- Attractive steel portable case. $111 / 4 " \mathrm{IV} ., 81 / 4^{\prime \prime} \mathrm{H}$. $7^{\prime \prime}$ D. 10 lbs . Net; 15 llis . Ship.

THE ACCEPTED TV ALIGNMENT GENERATOR

Model 610A

Powet Supply: $115-125$ V.. $50-60$ cycles, A.C.
lube Compliments: 6J6—Variatlr oscillator; 6J6-Fixed oscillator: 6J6-Mixer; 6SN7-Crystal oscillator \& rarker oscillator: 6J5-Audio oscillator: 6X5Re:tifier.
Net 28 lbs. Shipping Weight: 36 Ibs
 steel portable case.

Model 610A: Popularly priced TV sweep gencrator Harmonic entput useable for LHF. Marker Range: 19 to 48 m.c. - Covers all I.F. frequencies in TV receivers. Comains linear swed with unmsual accuracy to 2 er. Hickok ferrous modulater furnishes symmetrical pattern response curve for casier and more accurate realings.

## THIS ONE INSTRUMENT DOES THIS

## VHF SWEEP-ALIGNMENT GENERATOR <br> All Electronic Sweep

Model 695: Here is a completely new generator with M.I.ELEC'IRONIC sweep. It will exactingly fill top requirements. of the professional " TV serviemman or lab. engineer. There art no mowing parts to wear ont. Though moderately priced. thi mint features a sweep signal that is absolutely linear and without amplitude modulations. Features a high .3 volt output. Triple shielded - no leakage problem here. Signal can be attenuated from 3 to 300,000 microvolts. $0-12$ volts variable hias voltage with continums tuning allows set alignment to more sensitive for "frituge areas." or less semsitive for "prime areas" tu prevent overloading. Continuous tuning and detailed. easy-to-read scales provide foolproof method of alignment. Three RF oscillators provicle complete VHF coverage m fundamentals and heterodyned output IF () to 50 me. This assures the strong signal necessary for aligning front ends.

## Model 695

OUTSTANDING FEATURES

- Metered. variable IDC bias voltage (0-12 volts. Eliminates use of hatteries for fixed bias.
- $170^{\circ}$ of phasing
- Siweep width ai 0-15 me., $\pm 3 \mathrm{mc}$. depending on freguency.
- Linear sweep.
- Amplatude variation of less than 0.1 db , per mo
- Output imfedance is و) ohms.
- Fanking of oscillator, provides reference base line
- Attractive steel portalile case. $161 / 4^{\prime \prime}$ W.. $1.314^{\prime \prime}$ II.. $\mathrm{S}^{\prime \prime}$ )
- Priple shieldal. very lon leahage. I'rovides attenuation down (3) Ilse met: is 1hs. Shipping

## H ICKOK <br> CHOICE <br> OF THE EXPERTS

## NEW UNIVERSAL VIDEO GENERATOR COMPATIBLE FOR COLOR OR BLACK AND WHITE RECEIVERS

his fine new i rapidly and accurately solve your service problems．Does in minutes many TV servicing jobs that would require hours by other methods． The 650C has a new timer circuit which delivers ride o pulses of 60 cycles． 900 cycles． 15.750 cycles and 315 kc ．，singularly or in locked together and crystal controlled for greater accuracy．
Pulses can he used directly，metered in peak－to－peak volts or to modulate the self－contained RF oscillator．
RF oscillator covers all＇I＇channels in two bands（ $2-6$ and 7.13 ）， all on fundamentals． RF output is metered at all times from 1 to 10.000 microvolt with calibrated attenuation and variable percentage modulation．RF can he externally modulated with video frequencies from cycles to 4 MC with variable percentage modulation on all channels．
Self－contained．substitute external video amplifier， 5 cycles to 4 MC with a variable gain from 0 to 10 ，with high input impedance， low output impedance and metered peak－to－peak voltage output．
Includes horizontal and vertical sawtooth voltages which can he directly substituted for vertical and horizontal oscillator in a TV receiver．Both the vertical and horizontal sawtooth amplitude is sufficient to give full raster deflection and in the case of flyback type high voltage power supplies the horizontal sawtooth can be used to light up the picture tube．
The 650 C also contains an AC line voltage scale for instantaneous check on line voltage fluctuation，a common source of TV trouble．
This tester is an absolute must for accurate registration adjust． mint of the three color guns of color TV receivers，as well as accurate adjustment of focus，convergence．centering of individual ratio．A real time saver．you need the 650 C for TV servicing now．

## OUTSTANDING FEATURES

Quickly localizes and denties trouble in any section of a TV receiver
Provides electronically accurate bar or dot pattern on the screen of any TV
receiver－independent of station operation
$\mathbf{1 0 0 \%}$ FULLY SATURATED NSC＊STANDARD TV COLOR BAR GENERATOR

Model 655XC
Model 655XC：Matched to the other HICKOK instruments，housed in a handy portable detachable cover carrying case attractively covered with I）． 34 I．bs．net； 42 Lbs．shipping．
＊National Television System：Committee as ap－ proved by Federal Communications Commission． Absolutely sti．he．Entirely independent of changes in tine voltage．Compare the wave form information find sharpness of detail of the 655 XC with any other TV cola bar generator．．．Yowl pick the IIICKOF：immediately．

Model 655XC：Produces a standard $100 \%$ finally saturated NTSC color bar pattern on color TV sets．This is a must for non－obsolescence．Regardless of future color television receiver design this HICKOK color bar generator will be compatible．This is the type of signal that is transmitted over the air．All literature and alignment data are punished around this standard．ITS signal．The Node 655．provides signal for complete color alignment．When alignment is made with this type of signal the operator is sure when a color transmission is received that moper colors win be order from left to right preen，yellow ed mars on white sean，blue ind black Phase of colors probed is accurately sum with precision delay lines．The amplitude of sub ．carrier and the amplitude of the brightness component are accurately set with of subbearrier and the amplitude of the brightness component are accurately set with precision resistive cutworks．This result in the high stabifty required for proper alignment．Proper colors ate generated within so sends after warmup．To produce proper colors，a luminescent component of proper amplitude for each color is necessary． principle．as they lack the ability to purdue the hrightues component of a color．

## DESIGN FEATURES：

Precisely crystal controllent：Sub carrier and horizontal framing．
produces clearly defined wat fums to provide ease of alignment and assure minimum
possible error． designing all color TV receivers and is mow used by TV manufacturers． signal at all times． this equipment is that white is produced by adding the 3 primaries．） ． The Model 655 X （ is preferred for its accuracy，stability and long trouble free operation．
 Generator is self contained
are necessary
Output is either R．F．or Video．Widen：11－2 volts peak－to－peak open circuit． $0-1$ volt peak－to－peak across 100 ohm with positive or negative output．R．F．：modulated output modulated through color bar pattern is available through channels 4,5 and 6. A sound carrier is also provider for accurate setting of local oscillator in TV receivers． In addition to color bars this instrument generates the necessary signals for I（In Phase delayed $57^{\circ}$ from color burst）$Q$（Quadrature 1＇lhase．delayed $147^{\circ}$ from burst）， R－Y（delayed 9$)^{\circ}$ from burst）and R － $\mathrm{Y}^{\circ}$（delayed $180^{\circ}$ from hurst）for demodulator alignment．These bars appear at black level with equal amplitudes．
Provision for switching I，Q．R－Y．B．Y or Chroma（H－or－Of．
The 3.58 MC sub－carrier output of one volt peak－to－peak is also available for trouble－ shooting and alignment of color synchronizing circuits．

## 憵

NEW . . . ALL-BAND MICROVOLT SIGNAL GENERATOR

Model 295X

- 125 KC to 175 megacycle continuous coverage on fundamentals.
- Attenuation ban to . 1 microvolt. - No external attenuator pall required.
- Output 0.1 microvolt to 100.000 microvolt on all ranges.

Model 295X: Designers and built to exacting specifications, this generator is in at class by itself. The 295X is the only signal generator available today covering wide bands with these outstanding characteristics and at a moderate price. Advanced HICKOK engineering has provided this high quality instrument, which will find wide use in nearly every phase on the electronic industry
An ideal generator for mobile radio applications such as police. taxicabs. airlines. or wherever critical alignment and a low microvolt signal essential. Many other applications are possible since it covers AM radio hands :s well at many of the identification marker frequencies for TV alignment. All in all, it is a very versatile signal generator.

Model 295X: Multipurpose cave design with attractive etched aluminum panel, 19" W". 121/2" ). . $9^{\prime \prime}$ H.

125 KC io 175 MC continuous on fundamental-
Output 0.1 microegh to 100,000 mierowolts when teramated at sur ohms.
Outstandingly lowe leakage-encased in a copper cage. sliver plated.
Constant metered output.
120 (b) non frequency discriminating attenuator.
$400)$ cycle modulation - approximately 30 ct .
rental Oscillator - 1 M( crystal provided. Oscillator functions ,in any crustal from 500 KC to 20 MC limier control allows time hairline accuracy frequency settings Xi) Wading - Frequency does not change when the attenuator changed.
Rigid quality control in manufacturing insures that this instrument "ill conturni exactly with the outlined specifications even in the (critical (below I microvolt) region.

## LATEST DESIGN VOLT-OHM.MILLIAMMETER

 YOU CAN'T BURN IT OUT!

Model 455: I mew pertable multimeter incorpurating the very lates enginerring adrancemente inchuling a new terhnique that protects both the meter and the entire internal circuit against aceidental burnouts. In fact, any high voltage or current may be applicel directly across any function including ohtms without any danger to the meter monement or asociated components.
This instrument is available in two monkes: Industrial Model 455--has a sensitivity of 20,000 whme per volt both $A C$ and DC. Audio Model 456-has a semsitivity of 20,000 ohmes per voli 1) C
 vision for futput mu:a

## Technical Features

- Exclusive overlatad cut-nat and fuse seram prowides complete protection, not only for the Aeter. hut for all Resistors, Shunts and wther componeme.
- Now streamlined ultra-modern case design with curved face and slanted meter dial permits casy reading while instrument is lying flat. Wide vision nom-hreakable lucite face permits extra light to facilitate meter reading.
- Buit with a single Function-and-Range selector switch.
- Batteries housed in special compartment accessible without remowag case. Xo solforing required - just stap batteries in or out.
- Incorporater full-wave bridgetype reetifier circhit.

## TECHNICALSPECIFICATIONS

## HICKOK

CHOICE OF the EXPERTS

# WIDE BAND . . . HIGH SENSITIVITY 

Model 675

# Technicians' <br> 5" OSCILLOSCOPE <br> WITH ILLUMINATED, CALIBRATED SCREEN 

Model 675: Here is a new 5 -inch scope that provides all the late design features to permit unnsual accuracy in servicing present-lay electronic equipment . . including color TV receivers. This instrument features practical enginecring adrantages heretofore found only in much higher priced equipment.

The illuminated, calibrated screen with astigmatic focus provides a new standard in undistorted trace detail. The stability of this equipment plus the many definitely new circuit imovations provides a technician's scope that will rival the features of many high-priced engineer's models. The unusually wille range of the Model 675 is not achieved at the expense of sensitivity. Check the specifications listed below, and then see your Radio-Electronic Parts Jobber for an actual demonstration of this high quality though moderately priced scope.

## SPECIFICATIONS

VERTICAL AMPLIFIER: Frequency Response: 1 CPS to 4.5 MC (within 3db). Flat through the Color Burst Freduency ( 3.58 .3 C ). pulse Responsc: Excellent pulse response with a Rise Time of os Microseconds. Sensitivity: 20 MV RMS per inch. Vertical Attemuator: Frequency compensated decade steps of 1 to 1.10 to k . I (M) (1) I and tofo to 1. Gaim Control: Non-frequency discriminating 10) to 1 gain control. Trace Reversal: A switch is provided for reversing the polarity of the vertical trace. Deflection: Full sereen rertical deffection without low or high frequency distortion. Shock Mounted Arplifiers. Self-contained Voltagr Calihrator.
HORIZONTAL AMPLIFIER: Freguency Response: 1 CPS to 450 KC (within 3fb). Sensitivity: 250 MV RMS per inch. Horizontal Attenuator: Frequency compensated decate steps of 1 to $t$ and 10 to 1 . I.ine Sweep: Phaseable ( $180^{\circ}$ ) line frequency signal available. Cain Control: Non-frqquency diserminatinz 10 to 1 gain control. Deflection; Full screcn horizontal deflection without low or high irequeney distortion.
TIME BASE GENERATOR: Frequeney: Frequency coverage from 10 CPS to 100 KC . in four calibrated decade ranges. with vernier comtrol of $[0]$ to $t$, as follows:

$$
\begin{array}{lr}
10 \mathrm{CI} \text { S to } 100 \mathrm{CPS} & 1 \mathrm{KC} \text { to } 10 \mathrm{KC} \\
10 \mathrm{CPS} \text { to } 1 \mathrm{KC} & 10 \mathrm{KC} \text { to } 100 \mathrm{KC}
\end{array}
$$

Time Base Expansion: Time base expansion of ten times full screen (4) inches) with complete positioning of expanded trace. Writing

Speed: The wide frequency coverage ogether with expansion will produce writing speeds variable from 25.000 . Microseconds per inch (hased on 4 inches) or $10,000 \mathrm{Microsec}$ mids per (Cll (based on 10CM) to 0.1 Mieroseconds per CM based on lonCMI).

DISPLAY INFORMATION: The Trace is displayed on a type 50'P1 Cathode Ray tube with a high accelerating potential providing sharp trace detail. Intersity Modulation: Input provided for Intensity (\%-axis) Molulation.

DUAL FUSED: Hoth $13+$ and Line are fused for extra protection:
ILLUMINATED, CALIBRATED SCREEN: The Illuminated. Calibrated Screen is backed with a green filter - reducing rellections caused ing incidental illumination, thereby permitting accurate qualitative and quantitative measurements. Astigmatic foens comtrol provides a new standard in undistorted trace harpmess.
FOR SPECIAL APPLICATIONS: Sume engineers mily prefer a SG\}ll tube for shurt persistence or 5 STh tube for long persistence observations. Either is available in the Models 675 H .1 (with High Actinic Tube) or figh, (with long Persistence Tube') at at slightly higher cost.
DIMENSIONS: $1,3^{\prime \prime} H . .10^{\prime \prime} W$.. $16^{\prime \prime}$ D., $35 \mathrm{Hms.Ne}$, 4.3 ths. shipping. POWER SUPPLY REQUIRED: $105-125$ Volts, $50-40$, CI'S.
POWER CONSUMPTION: 125 Watts it 115 Volts. Furnished complete with test leads.

## PROFESSIONAL ENGINEERS'

Model 770

## Laboratory OSCILLOSCOPE

Model 770: A new 5 -inch uscillosonde designed for wutstanding versatility in general purpose, industrial lathoratory and television applications. This equip. ment provides unnsually wide range without sacrifice to sonsitivity, and is completely built to the highest specifications for accuracy and dependability. The 770 has been thoroughly fied tested and proven to prowile exceptionally nseful sorvice features in the obecration wi transiont or resular recurring phenomentat.

The DC 10 S MC remponse with a 10 M .V. RMS per juch semativity quickly identifies this seope as musual value in at class loy itself.

 Ths. shipping, 105.125 Volts. 54.50 Cycles. 150 Watts. Combination light shield athe camera base porieled. Furnished complete with hads.

## TEST INSTRUMENTS

## LIGHT WEIGHT 3" PORTABLE OSCILLOSCOPE

## Model 385

Also available with shock - mounted, moisture-proof case.

## MODEL 385R for RACK MOUNT

The popular rack mount model permits a functional laboratory installation with the same circuit specifications and design features of the portable model excepting that the circuitry is encaser. in a standard rack mount type case.

Model 385R

#### Abstract

Model 385: A new light weight field engineer's portable that incorporates all the latest quality features. Ease of use and dependable design is similar to a model used by the Armed Services. Contains DC Amplifiers. both horizontal and vertical. Frequency coverage to $4 \mathrm{MC}, 3 \mathrm{db}$ down. Both vertical and horizontal sensitivity is .075 RMS volts per inch. Both vertical and horizontal attenuators are fully compensated.

Features unitized construction for quick accessibility to circuitry as well as replaceable circuit sections. Case is shock mounted. Built-in retractable light shield. with CR tube mounted at a $20^{\circ}$ angle, facilitates use of the portable model. Terminal board at rear provides direct connection to CR tube elements. This equipment has provision for Z -axis modulation.

## SPECIFICATIONS

CATHODE RAY TUBE: $3^{\prime \prime}$ Screen. Type 3RP-1.
FREQUENCY RANGE: Vertical Amplifier: DC to 4 MC 3db down, with Pand Width Switch in Wide position for color burst observation. D.C. to 2 MC , 3 db down. with Band Width Switch in 2 MC position for pulse observation. This 2 MC response is in accordance with the I.R.E. Standard Roll-off Specification for television level setting. Horizontal Amplifier: DC to 500 KC . 3ib down. Sweep Circuit Oscillator: 3 cycles to 50 KC .

INPUT IMPEDANCE: Vertical Amplifier: 2.2 megohms shunted by 25 mmf. Horizontal Amplifier: 2.2 megohms shunted by 25 mmf .

DEFLECTION SENSITIVITY: Vertical Amplifier: . 075 RMIS Volts/Inch. Horizontal Amplifier: . 075 RMS Volts/Inch. Vertical Direct Connection: 17 RMS volts per inch. Horizontal Direct Connection: 25 RMS volts per inch.
POWER SUPPLY REQUIREMENTS: $105-125$ volts, $50-1000$ cicles. Power consumption is 60 watts at 115 volts.

ACCESSORIES INCLUDED: 4 foot Coaxial Test Cable and 4 foot Ground Lead. Telescopic light shield and ruled plastic screen

DIMENSIONS: Including carrying case: $6^{\prime \prime} \mathrm{W}, 9^{\prime \prime} \mathrm{H}$. $131 / 2^{\prime \prime}$ D. 151 lhs . net. # NEW MODEL 670 OSCILLOSCOPE 

Accurate, Stable, High Sensitivity with<br>AC and DC AMPLIFIERS

Model 670: The more exacting requirements of today's television maintenance have made it necessary for the service technician to have a good 'Scope. The HICKOK Model 670 is designed with DC amplifiers to provide excellent square wave response - even down to DC.

Many TV receivers are so far out of alignment that extreme Scope sensitivity is necessary to properly show the response curve. The 670 provides this extra sensitivity - to 15 MV per inch.
To properly view all TV frequencies a wide band vertical amplifier is necessary. The 670 provides for this need by having a band width useable to beyond 2 MC . Push-pull amplifiers and polarity reversing switches are also new features you will find most useful in the 670 .

## TECHNICAL FEATURES:

Highest practical sensitivity: 0.015 ( 15 millivolts) RMS per inch.
Demodulator sircuit for viewing modulation on RF signal.
Recurrent linear sweep; 3 cycles io 50,000 cycles.
Reversing switches for boih horizontal and vertical deflection.
Fixed sweep frequency for horizontal and vertical wave forms ta TV receivers.
8oth negative and positive synchronizing.
Line phasing conifol (opproximately $180^{\circ}$ ).
Wide band vertical amplifier, useable beyond 2 MC.
Direct coupled, balanced (push-pull) amplifiers for both vertical and harizontal deflection. Provision for Z-axis modulation.
Permits the sfudy and analysis of wave forms, and other electric and magnetic phenomeno. Excellent square wove response.
Provides for the visual testing and alignment of amplitude and frequency modulated receivers, as well os relevision equipment when used with o frequency modulated RF oscillator or sweep generotor.

## RACK MOUNT 'SCOPE with AC-DC AMPLIFIERS and

 llluminated, Calibrated ScreenHere is a high quality Oscilloscope that is engineered to meet the more exacting reguirements of today's electronic equipment maintenance as well as provide a modern tool for the electronic engineer in design work. Identified as the Model 670R, this scope has D.C. amplifiers for excellent square wave response - even down to D.C Push-pull vertical amplifiers, polarity reversing switches, horizontal attenustor and Z-axis (intensity modulation post) on front panel for ar intensity voltages, are additionl time saving features that make this scope a most practical instrument. Attrictive dark gray pinel with white lettering providen a pre rapidly type case that has in popularity.
High Sensitivity: 0.015 ( 15 millivolts) RMS per inch. Demodulator circuit for wiewing modulation on RF signal... Recurrent linear sweep. 3 cycles to $50,(000$ cycles. Reversing switches for both horizontal and vertical deflection. Fixed sweep frequency for horizontal and vertical wave forms of TV receivers. Buth negative and positive synchionizing. Line phasing control (approximately $180^{\circ}$ ). Vertical amplifer useathe beyont 2 MC . Direct coupled. Balanced (push-pult) amplitiers for both vertical and horizontal deflection. Provision for \%-axis modulation. A 3-step attenuator in the horizomal amplifiers circuit operates in conjunction with the remier attenuator control permits a more accurate. adjustment of gain in cases where voltages minder question are cond paratively high. Permits the study and analysis of wave torms.and other electric and magnetic phenomena. Excellent square wase response: Provides for the visual testing and athigment of ampitude and re-
quency modulated receivers. as well as television equipment when used quency modulated receivers, as well as television equipment
with a frequency modulated oscillator or sweep generator.

## H ICKOK

CHOICE
OF
THE EXPERTS
Model 670R: In sturdy stcel, rack mount design! in attractive dark gray finish panel with white lettering. Case size: $83 / 4^{\prime \prime} \mathrm{H}$., $19^{\prime \prime}$ W., $18^{\prime \prime}$ D., 27 Lbs, net, 35 Lbs. s! 1 ping. Test leads are included.

MODEL 19 AC-DC ASTATIC MILLAMMETERS, AMMETERS, VOLTMETERS, WATTMETERS, WATTLESS COMPONENT INDICATORS

Astatic Electrodynamometer movements. Accuracy within $1 / 2$ of $1 / ;$ ar AC $C$ : 1)C. Not affected hi external magnetic fields. Scale length: $5 / / 2$ inches. Wi.:.: meter scales are uniform, others uniformly squared. Mirror scales.

Model 19 portable instruments designed for precision AC and l) meataremente They are of astatic dynamometer type with a greater accuracy than most other: portable AC and DC instruments. Owing tu the astatic design the indication are the same on either AC or B (

Dimensions: $4^{\prime \prime} \times 61 / 4^{\prime \prime} \times 71 / 8^{\prime \prime}$. Weight : $41 / 2$ hs. Case material: Molded plencijz.

## MODEL 13 AC DYNAMOMETER INSTRUMENT

Accuracy $1 / 2$ of $1 / \pi / 4$. Shielded from effect of External Magnetic fields. Amatefs. Milliammeters, Voltmeters. Watmeters - single phase. Mirror scales. Knife Fidge Pointers. Scale length: $51 / 2$ inches.

These instruments are correct on $\Lambda \mathrm{C}$ of any frequency up to 125 cycles. Built: for use on higher frequencies. Deviations from the sinusoidal wave form me: in ordinary testing have no noticeable effect on the calibration of these instr:mints, Voltmeters and wattmeter are self-contained up to 750 volts, designed to perform continuous service.
Dimensions: $31 / 4^{\prime \prime} \times 61 / 4^{\prime \prime} \times 71 / 8^{\prime \prime}$. Weight: $31 / 2 \mathrm{lbs}$. Case material: Phenolic.

## MODEL 14 DC AMMETERS, MILLIAMMETERS, MICROAMMETERS, VOLTMETERS, MILLIVOLTMETERS, VOLT-AMMETERS, THERMO-COUPLE METERS

D'Arsmenal movements, Accuracy within $1 / 2$ of $\mathrm{t}^{\prime \prime}$. Shicherl from effect of ex formal magnetic fichte, [biform scales provided in [ meter with anti-parablas mirrors. Scale length: $5 \%$ inches.
Voltmeters in this morel have a resistance of approximately 1 foot ohms per vol the exact resistance being marked on data card furnished with the instrument-: Model it millivoltiturers are supplied with leads for emnection to external shames, Anuteters are self-contained up to 150 amperes, having negligible tomperature coefficient builtin shunts. The drop across the ammeters is 50 millivolts perature coefficient maters are of the high torque, hive excellent damping, and other rugged characteristics not usually found in high sensitivity instruments.
Dimensions: $71 / 8^{\prime \prime} \times 61 / 4^{\prime \prime} \times 4^{\prime \prime}$. Weight: $61 / 2 \mathrm{lh}$ s. Case material: Polished phenolic. Excellent magnetic damping.

## MODEL 18 DC INSTRUMENTS FOR ALL CLASSES OF

 DIRECT CURRENT TESTING10.Arsmpal movements. Accuracy within $\frac{1 / 2}{}$ of $1 \%$. Shielded from extemad
magnetic fields. Voltmeters, millivoltmeters, ammeters. millimeters. microammeters, and volt-ammeters. L'niform mirror scales engraved on moisture. proof stock. Scale Length: $51 / 2$ inches.
Excellent damping characteristics. This model is so designed that there is only a small overawing to the needle which results in quick and accurate readings. Voltmeters have a resistance of 1000 ohms per volt. Voltmeters are self -contained up to 1000 volts and are designed for continuous use at 1000 volts without demperature error. The Volt -ammeters in this model are especially adoptable for making tests where consecutive volt and ampere readings are desired, such as motor test and battery test. Mendel 18 instruments, except in the higher voltage ranges. will withstand an instantinems overload of double the full scale value without damage or change in calibration.
Dimensions: $7 / 8^{\prime \prime \prime} \times 6 / 4^{\prime \prime} \times 3 . / 3^{\prime \prime}$. Weight: $31 / 411 \mathrm{~s}$. Case material: Molded phenolic.

## HICKOK...Electrical Indicating Instruments

3½" ROUND-250 DEGREE METER
dill DC meters can be supplied with accuracy either 1 or $2 c$ of full scale comper-axide rectifier-type movements, have accuracy within $5^{\circ}$, of fall scale deflection under all comblions. These instruments are as accurate as panel mounting instrimutents of equal size and have the advantage of two and tines longer scale. They are dammed in accordance with American Standards .Association Specification* and their re-somace time is also in acbows reading to be taken quickly and
 how se reacharately

## 2½" 250 DEGREE AIRCRAFT METER

This instrmanot is tho stated in a reginlation aircraft case per Xrus-Xivy dimensional requirements. Has scale approximately 438" long. Quick rearhinity makes them desirable as flight instruments. Aircraft-type dial is an: ill. able. Mechanism specially designed for aircraft service and will meet vibrationresistant requirements, etc.

Meters
For Accuracy and Dependability

3¹/2" SQUARE 250 DEGREE METER SAME AS THE ROUND 250 DEGREE METER

All J)C meters can be supplied with accuracy cither $1 \%$ or $2 \%$ of full scale Juthection. 'The AC: meters, which use copper-oxide rectifier-type movements lave accuracy within $5 \%$ of full scale reflection under all conditions. These instruments are as accurate as panel mounting instruments of equal size and have the advantage of two and one half times longer scale. They ar damped in accordance with American Standards Association Specifications and their resinate time is also in ate cordate with these specifications. N
 mote acentitely

## TELEVISION SIGNAL GENERATOR VHF - IF - COLOR

Complete sweep and marker generator plus crystal calibrator for All TV Servicing

Sweep Oscillator-Three convenient ranges 30 KC thru 38 MC : 38 MC thru 108 MC 174 MC thru 216 MC are all fundamentals Large, accurately calibrated dial with the TV channels clearly indicated. Reversible direction of sweep.
Video Sweep-extends down to 30 KC at the low end for adjustment of color tele vision circuits.
Sweep Width-Provided by rugged electro mechanical sweep unit. Adjustable from 0 thru 18 MC in 7 steps for fast resetability. The full 18 MC sweep is essential to cover IF frequencies in color receivers and for sweeping badly detuned tuners.

Marker Oscillator - Accurately calibrated dial ( $1 / 4$ of $1 \%$ ) gives complete marker cov erage from 4 MC thru 216 MC with all the television IF frequencies on highly stable fundamentals. Facilities for using 3 marker pips simultaneously.
Crystal Oscillator-Separate crystal oscilla tor for use either as a marker or as a cali-
brator. Stable circuit oscillates with any crystal fundamental from 3 MC to 20 MC More than adequate for color receivers. Output is controlled by selector switch to provide variable marker, crystal marker or both for calibration purposes. A BE.AT DETECTOR is also incorporated for audible or visual checking of beat between vari able marker oscillator and crystal.

400 Cycle Modulation - Provided for use with either the variable or crystal marker so traps can be adjusted by either audible or ineter method.

Oscilloscope Timing - A phased 60 cycle sine wave timing voltage is provided with PHASE CONTROL to provide adjusiment of double pattern. BLANKING is also available for single pattern trace with ref. erence base line for measurement.

Vidco Modulation-Provision made for in sertion of video signal to modulate the ex. ternal marker output making possible "re broadcasting" of television signals on any

## Model TVG-2

channel, Also an audio signal may be used to produce horizontal or vertical lines for linearity checks.

RF Output-Completely controllable with output control and step attenuator. Output impedance 90 ohms with last tap variable from 0 to 500 ohms. Complete flexibility right at your finger tips.
Size-Same height as other Jackson TV in. struments. Dimensions $13^{\prime \prime}$ high, $81 / 2^{\prime \prime}$ deep. 191/8" wide.

Finish and Weight-An all steel, gray "Jack. sonite" cabinet. Shipping weight 35 lbs .
Dealer Net Price..................... $\$ 259.95$

## DYNAMIC ${ }^{\circledR}$ TUBE TESTER

## Model 648

Simplified Operation - Only three control units to be set-Heater Voltage, Plate Control, and sequence Switch. Only other adjustments are line voltage and shorts test.

Metered Plate Current - four-inch meter shows only the current flowing in the plate circuit. Meter calibrated in Good-Bad, as well as Percent Transconductance.

Husky Filament Transformer - The right voltage for every receiving type from .75 volts to 117 volts including new series string tubes. Ample current capacity for testing even the newest types of high filament. current rectifiers.
Fast, Accurate Shorts Test-Each element completely tested for possible shorts. Easily visible shorts lamp remains lighted only on actual short. No hard-to-understand meter readings. Shorts test made under heated cathode conditions.

Noise Test-Plug in a set of headphones, and you have an audible indication of noisy lubes. Makes it easy to catch those tough ones that give trouble in audio and video circuits.

Correct Test Voltages and Load Settings protects tube under test against overioads. Even low voltage battery types are provided with suitably low operating potentials. Meter is sufficiently sensitive that special "Low-Scale" readings are not required.
Rotary Settings Chart - Quickly provides the correct test settings for every receiving type. Chart is revised frequently. You get one-year free replacement chart service. Information on new types is rushed to your distributor as soon as information is avail able, by super-speed Bullet-In Service.
Life.Line Indicator-an ingenious test that indicates when tube is approaching the end of its life. You can tell when to replace a tube, even before it actually goes bad.
Automatic Line Voltage Indicator-You adjust the line voltage by watching the meter. Control then show's you the actual line voltage. Saves carrying a separate volt meter on house calls.

Rugged Construction - Service-Engineered "Jacksonite" finish. Use the 648 on the bench. Carry it in your truck. Use it on

home calls. It's made to "take a beating" for it's "Service-Engineered" for your kind of work.

# Five-Inch WIDE-BAND OSCILLOSCOPE VHF - UHF - COLOR Model CRO-2 

Wide Band Amplifier-Flat within 1 db from 20 cycles thru 4.5 MC . This feature is absolutely essential for evaluating color burst signal and the Level of the Color Chrominance signal.
Vertical Deflection Sensitivity-Two ranges with threc positions for each range. Has fully compensated attenuators. Excellent transient response. Each unit completely tested for "tilt" and "overshoot".

Sensitivity Ranges-With a band width of 20 cycles thru 100 KC , the sensitivity ranges are $018, .18,1.8$ R.MS volts per inch. The wide band position 20 cycles thru 4.5 MC has sensitivity ranges of $.25,2.5,25$ RMS volts per inch.
Internal Horizontal Sync.-Positive or negative signal is available to provide excellent stability due to using the best available component of the waveform, such as the leading edge of the horizontal sync. pulse of the standard TV signal. Reversing the pattern vertically will not interfere with the sync.

Horizontal Swecp Expansion - Four times screen width-up to 20 inches of equivalent width. This feature is excellent for enlarg. ing any small portion of the total waseform. For example. the color TV sync. pulse can be spread to easily obserse the 3.58 MC color burst signal so that the individual cyeles can be clearly viewed.
Horizontal Deflection Sensitivity-Push-pull horizontal amplifiers have a sensitivity for all applications of 0.40 R.MS volts per inch.

Vertical Input Impedance-1.5 megohms, shunted by 20 micromicrofarads. Direct to plates balanced 6 megohms, shunted by 11 micromicrofarads.
Horizontal Input Impedance-1.1 megohins.
Linear Sweep Oscillator - Saw tooth wave 20 cycles thru 50 KC per second in 5 steps. Sine wave sweep of 60 cycles also available. Provision for external sweep sync.
Input Calibration - A standard voltage is provided for use in determining unknown voltages. Permits peak-to-peak measurement of all waveforms.

Vertical Polarity Reversal-By merely flipping a switch you can reverse the polarity of the voltage being supplied to the vertical deflection plates.
Return Trace Blanking - A new amplifiertimer combination for blanking return traces, providing a clearer, sharper image at all times. Prevents confusion in waveform analysis.
Synchronizing Input Control-Four input control positions. Internal Positive-Internal Negative-External-60 cycle.
Deflection Plate Connections-Direct connections thru capacitors for AC only to deflection plates of CR tube by means of terminal block at back of instrument.

Intensity Modulation-Either 60 cycle ithternal intensity modulation or external intensity modulation through bituling posts on front panel.

## AUDIO OSCILLATOR Model 655

Provides an audio frequency voltage developed by Resistance-Capacity tuned circuit at fundamental frequency, Permanently locked calibration and highly stable circuit eliminates the necessity for constant internal adjustments.
Freguency Range-20 cycles to 200,000 cycles in 4 ranges: $20-200$ cycles $/ 200-2,000$ cycles $/ 2,000$ to 20,000 cycles $/ 20,000$ cycles to 200,000 cycles.

Calibration-Logarithmic variation of frequency over the scale provides constant percentage accuracy at all frequencies.
Scale Length-Over 33 inches.
Output Loading-Five values of output loading: 10 ohms $/ 250$ ohms $/ 500$ ohms $/ 5,000$
ohms/RESISTIVE. Controlled by selector switch.

Output Power-500 Milliwatts (20 to 20,000 cycles transformer (oupled).
Output Control - Continuously variable from dero to maximum.
Waveform-I.css than $5 \%$ distortion at all frequencies between 30 and 15,000 cycles.
Frequency Characteristics-Plus or minus 1 DB $30-15.000$ cycles using transformer coupled output.
Hun Level-Down more than 60 DB of maximum.

Accuracy- $3 \%$ or 1 cycle whichever is greater.

Accessories - Demodulation Probe, Model DE.M-T atailable for using scope as signal tracing instrument. Low Capacity Cathode Follower Probe, Model LC2-1P with 2 to 1 attenuation ratio and not more than 8 mumf effective input capacitance for use up 1025 volts. High Voltage Low Capacity Probe Model LCl0.IP with 10 to 1 attenuation matio for checking up to 1,000 volts.

# "SERVICE-ENGINEERED" TEST INSTRUMENTS 

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON I, OHIO

## Specifications-Model 700

Signal Outputs

1. Composite video of either polarity, adjustable amplitude to $1 \cdot$ volt across 90 ohms. Either luminance or chrominance can be eliminated from the composite signal.
2. Modulated R.F., channels 3, 4, or 5 of 1 volt across 300 chms .
3. Horizontal sync., positive polarity. I volt across 200 ohms.
4. Crystal controlled color subcarrier ( 3.5795 MC ), 40 Millivolts across 200 ohins at burst phase.

## Synchronixing Signals

1. Color burst, crystal controlled (NTSC standards).
2. Standard horizontal sync. and blank. ing signals.

## Color Bar Signals

I. Simultancous bar display with luminance and chrominance levels held to plus or ininus 10 percent, phase angles to plus or minus 5 degrees as follows:

| Color | Relative <br> Luminance | Chrominance |
| :--- | :---: | :---: |
| White | 1.0 | 0 |
| Yellow | 0.89 | 0.44 |
| Cyan | 0.70 | 0.63 |
| Green | 0.59 | 0.59 |
| Magenta | 0.41 | 0.59 |
| Red | 0.30 | 0.63 |
| Blue | 0.11 | 0.44 |
| Black | 0 | 0 |

2. Color Difterence Displays. Bars of zero luminance selectively arailable as follows:
(Phase angles within plus or minus 2 degrees)

| - Signal | Type of Display | Relative <br> Chrominance |
| :--- | :--- | :---: |
| I | single bar | 0.25 |
| Q | single bar | 0.25 |
| I\& Q | simultaneously | 0.25 |
| R-I | single bar | 0.25 |
| B-Z \& B-Y | single bar | simultaneously |
| R-I \& | 0.25 |  |
| (Background for all color difference bars in |  |  |
| black-relative chrominance zero) |  |  |

3. Single Bars - Primary colors - red, green and blue-selectively available. Each bar is approximately $60 \%$ of screen width. Luminance 0.3 , chrominance 0.5 .
Crystal Controlled Sound Carrier-approx. imately $25 \%$ of peak picture carrier, placed 4.5 megacycles from picture carrier. Sound carrier may be turned off or on by panel control switch.

## Panel Controls

1. R.F.Carricr Tuning-channels 3,4 or 5.
2. Video Output Amplitude.
3. Horizontal Lock.
4. Sound On-Sound Off Switch.
5. Video Output Polarity Switch.
6. Power Switch.
7. Color Bar Selector Switch.
8. Horizontal Centering Control.
9. R.F. Attenuator.
10. Luminance-Chrominance Selector.

## Internal Adjustments

1. Burst amplitude.
2. Color Sub-Carrier.
3. Modulation percentage.

## Circuit Operation

I. Color sub-carrier and sound frequen. cies are determined by crystal oscillators. 2. All six color bars-yellow, cyan, green. magenta, red, blue, plus black and white are independently generated. No color mixing or matrixing is required.
3. Color phase angles are determined by an accurate. low impedance delay line. 4. Direce gating of proper chrominance phase is employed for each color bar to attain maximum stability and reliability rather than the usual methods which wilize quadrature encoders.
5. Luminance and Chrominance levels are reliable and stable. No multi-vibrators are employed in generating any bars. 6. No internal or external adjustments are required for proper phase angles, bar widths, luminance, or chrominance levels.

## Specifications—Model 712

Provides similar signal outputs and Color Selection to model 700. Also includes crosshatch and white dot generators for convergence checks on 3.gun tubes. Cross. hatch pattern may also be used for liner. ity and tilt adjustments. Small dot sizeabout $1 /^{\prime \prime}$ on a $19^{\prime \prime}$ tube permits more positive convergence adjustment.

## Accessories

Model 7SC-Attractive Leatherette Cov. ered Carrying Case with Velvet interior lining. For either Model 700 or 712 .
Physical Characteristics Models 700 and 712 Dimensions: $61 / 2^{\prime \prime}$ wide $x 91 / 2^{\prime \prime}$ high $x$ 10V/"' deep. Designed to match other Jackson Equipment both in styling and exterior size. All steel case finished in tough "Jacksonite". For use on 105-12; volts, 60 cycle AC. Complete with alt tubes, crystals and connectors.

## JACKSON <br> ธ

# Dynamic ${ }^{\text {® }}$ Cathode Ray 

## Tube Analyzer

Tests completely and accurately, all TV picture tubes, including both magnetic and electrostatically deflected and focused types. Also tests scope, radar and special purpose CR tubes. Beam current test is made to final anode. Grid test determines the ability of the grid to cut off. Test voltage is ample for every tube type. Gas Test is made by measuring gas current to the final anode, with sensitive VTVM circuit. All elements are isolated for individual inter-element shorts and leakage tests. Roll chart is provided for rapid selection of test settings. Entire analyzer is built around a highly sensitive balanced bridge VTVM circuit. A continuously variable line voltage is provided to insure accurate readings. Comes complete in portable case. Shipping weight 26 lbs .

## EICO RF Signal Generators

Model 320: For AM-FM precision alignment and TV marker frequencies. Vernier Tuning Condenser. Highly stable RF oscillator, range: $150 \mathrm{KC}-102 \mathrm{MC}$ with fundamentals to 34 MC Separate audio oscillator supplies 400 -cycle pure sine wave voltage. Pure RF, modulated RF or pure $A F$ for external testing. 3 -color etched panel; rugged steel case. Ship wh. 10 lbs.
$\$ 19.95$ Factory wired
$\$ 29.95$
Model 322: In addition to all the outstanding laboratory-precision qualities of the famous EICO Model 320 , the brand new Model 322 features the individual calibration of each of its 5 bands.
Model 322-K, KIT, only
$\$ 23.95$
$\$ 34.95$

## EICO Deluxe RF Signal Generator

Laboratory-precision generator EICO Service-Engineered with $1 \%$ accuracy. Frequency range $75 \mathrm{kc}-150 \mathrm{mc}$ in 7 calibrated ranges. Extremely stable. Illuminated hairline VERNIER TUNING VR stabilized line supply. 400 -cycle pure sine wave with less than $5 \%$ distortion. Tube com plement: $6 \times 5,6 \$ 27,6 C 4$, $V R-150$. 3-color etched panel; rugged steel case. $115 \mathrm{v} ., 60$ cycles AC Size: $12^{\prime \prime} \times 13^{\prime \prime} \times 7^{\prime \prime}$. Ship wt. 21 lbs .

$\$ 34.95$

## EICO Resistance-Capacitance Bridge <br> and R-C-L Comparator

This brand new professional resistance-capacitance bridge-type instrument is specially EICO Service-Engineered for extremely wide usefulness. It directly reads 0.5 ohms to 500 megs resistance (4 ranges). 10 mmfd to 5000 mfd capacifance ( 4 panges), and power factor. (Kit includes precision calibrating resistor.) Unique PRECISION COMPARATOR RANGE for pesistance, capacitance and inductance comparison measurement against external standard. Leakage testing of all capaci tors at rated DC working voltage with internal $0-500$ VDC source. Electron-ray tube as both bridge balance and capacitor leakage indicator. 110 v. 60 cps transformer and rectifier. All ranges calibrated on front panel. 3-color etched rubproof panel; pugged steel case. Size: $10^{\prime \prime} \times 8^{\prime \prime} \times 43 / 4^{\prime \prime}$. Ship. wt. 10 lbs.
Model 9508-K.
$\$ 19.95$

## EICO NEW Deluxe Multi-Signal Tracer

Entirely new 5-łube instrument provides high gain RF and low gain audio channels with both visual and aural monitors (electron-ray tube and s'" speaker). Permits RF, IF and audio signal tracing in TV, FM and AM sets. Highly useful noise localizer circuit that applies DC test voltage thru probe to suspected component and simultaneously picks up and amplifies effect. May be connected as test and simultaneously picks up and amplines, amplifier, or output transformer, and has output for VTVM or scope. Excellent for gain-per-stage estimation, null detector, scope preamplifier, utility amplifier, small P.A. system. New satin finish etched panel; grey wrinkle steel case. TO5-125 VAC, $50 / 60 \mathrm{cps}$. Size: $8^{11} \times 10^{11} \times 43 / 4^{\prime \prime}$. 5hip. wt. 10 lbs.
Model 147-K, \$24.95
\$39.95

## EICO Multi-Signal Tracer

Audibly traces al! IF, RF, video and audio from ANT to SPKR or CRT without switching. Response well over 200 mc . $5^{\prime \prime}$ test speaker. Provision for visual tracing with VTVM. Complete with 65.j7, 6K6, $6 \times 5$. Germanium crystal diode probe. 3-color etched panel; rugged stéel case. $105-125 \mathrm{VAC}, 50 / 60 \mathrm{cps}$. Size: $10^{\prime \prime} \times 8^{\prime \prime} \times 43 / 4^{\prime \prime}$. Ship wh. 9 lbs.

## Model 534-DC MIDGETSCOPE

This fine little iob is packed with the latest circuit designs to giva an excellent frequency response over d wide range with fine sensitivity. D.C. Amplifiers make it ideal for color television circuits and all industrial applications and service nceds.

## OUTSTANDING FEATURES:

1. Top Performance assured by use of the "circuits of the future" - D.C. Ampliers for industria use - Undistorted response and elimination of parallax by push-pull deflection - Full Vertica and Horizontal expansion of trace - Automatic Astigmatism control circuit - Linear time base
and sweep - Returned trace automatically blanked.
2. True Portability compact and streamlined for use - Set it up vertically or horizontally - All use frols on front panel for coavenience - Tilted CR Tube for best viewing angle.

## PERFORMANCE AND TECHNICAL SPECIFICATIONS:

## Model 780__INCRA_COLOR__SWEEP GENERATOR

- RCP "Compatible" All Electronic Sweep Generator

For Black and White and Color Television - Plus FM and AM Radio
Years ahead in design - Unexcelled in performance and versatility, the RCP Model 780 is engineered as a completely electronic sweep circuit without any motors or moving parts. Unique electronic unidirectional coupling provides for sweep in one direction only, at a uniform output level (AGC).

## FEATURES:

- 180060 cycle phasing voltage for use on - Anti-parallax, illuminated dial scales on all all oscilloscopes. ranges, with anti-backlash dial mechanism.
Minimum 150,000 microvolts output, terminated with multiple shielded pushbutton attenuator with minimum leakage.
- Detector/Comparitor output to permit comparison of the sweep output on any oscillograph.

Size: $91 / 4^{\prime \prime}$ wide $\times 91 / 4^{\prime \prime}$ high $\times 121 / 2^{\prime \prime}$ deep.
Complete with output, scope, detector/comparitor cables

## Model 740A TV "DO-ALL" GENERATOR

HERE-AT LAST! One compact, efficient instrument-which gives the performance of several combined instruments-Each of whict is higher priced and all of which are needed for properly servicing iV and FM Receivers.
Signal Generator
Generates a modulated or unmodulated carrier signal covering every channel (VHF) and Receiver - ALL ON FUNDA MENTALS. It will supply a 360 vale audio signal the audio cycle aut
DATA: RANGE: 9 megacycles to 220 megacycles ALL ON FUNDAMENTALS - bands $9-11$ MODULATION: Internal modulation has been provided. Both 360 cycles and 141.75 kilocycles are available.
TUNING: Dial continuously calibrated thru $340^{\circ}$, giving extremely long calibration scale; enables easy reading and tuning. Each TY channel is precisely spotted on the dial. Accuracy for alignment, achieved by use of fine anti-backlash reducing mechanism. The only single easily partable instrument that provides for testing and checking alignment of: Front Ends, IF's, Horizontal and vertical linearity, syncs, sweeps, size, position, focus coil, deflection coil, ion trap. Unusually fine eircuit design extreme stability, rugged mechanical construction. Smart looking unit with new brushed aluminum etched panel and dial. Size $10^{\prime \prime} \times 6^{\prime \prime} \times 6^{\prime \prime}$. Weight B lbs.
MODEL 740A-COMPLETE WITH OUTPUT CABLE. READY TO OPERATE.
ON 50-60 CYCLE 105-125 V AC

Pattern Generator<br>Produces either horizontal or vertical bars or cross hatch.

MODEL 324P-Combination portable-coun. ter model. Smart looking, hand-rubbed carrying case with slip-hinge cover-in-

Model 706A - "Wide Range" Signal Generator This new signal generator is the finest performer in its class. For equivalent performance the model 706 A should be compared only with other signal generators selling from $\$ 90$ to $\$ 125$. It provides continuous coverage from 150 KC to 220 MC in 8 ranges. Six FUNDAMENTAL ranges cover up through 55 Megacycles.

ACCURACY: within $1 \%$ of calibration adjustment.
STABILITY: and constancy of calibration is assured by special electron-coupled circuit design, permability adiusted coils and air trimmer capacitators.
MODULATION: 400 cycle sine wave audio oscillator with modulation continuously variable from $0 \%$ to $80 \%$. Above $80 \%$ has no eractical application. At this point tremendous distortion occurs in all signal generators. Un. modulated signal is available if desired.
SHIELDING: Thorough shielding of all critical circuits and components either individually or in compartment or both.

This includes oscillator tube, coil assembly. attenuator, switching circuit. Transformer is electrostatically shielded.
ATTENUATION: Ladder type step attenuator consisting of a multiplier and fine attenuator control.
AUDIO OSCILLATOR: 400 eycles at 50 ohms output impedance is available for external use - terminals on panel. Eight scales are clearly calibrated - continuous reading from 150 kilocycles to 220 megacycles. Planetary drive gives vernier tuning with no backlash. Tube complement-6BA6, 6SJ7, 6X4.

## Model 808AA

## Improved

'DO-ALL'’ TUBE AND SET TESTER
REVOLUTIONARY DESIGN includes all the features of the famous RCP Dynoptimum Tube Tester plus a cathode ray tube tester and reactivator plus a vacuum tube voltmeter with ohmmeter.

- AN OHMMETER: Reads all Resistance 0.2 ohms to 1000 megohms on 5 ranges. Use this instrument also to check condensors for leakage and shorts. - A REACTIVATOR: Revives and Reactivates many otherwise Dim or gad Television Picture fubes. Can also be used on other tubes.
- A CATHODE RAY TUBE TESTER: Will check all mag
nefic deflection type Television Picture tubes. Locates and isolates all shorts or leaks.
- A VT VOLTMETER (AC.DC) This really outstanding 17 Range instrument is a VT Voltmete for AC as well as DC. Balanced bridge type push-pull circuit. Oraws negligible current due O high impedance of 25 meg ohms. Accuracy $\pm 3 \%$ DC. $\pm 5 \%$ AC. Discriminator alignment
scale with zero center. AC \& $30-6$ to 42 . 14 to 5026 to 62
- A TUBE TESTER: All the teatures of the famous Dynoptimum free point tube tester protected against obsolescence - tests all modern standard, miniature, noval base and subminiature tubes. Easily read on 4 $1 / 2^{\prime \prime}$ meter

Equipped with a double slipproof roll index and enlarged, easy to read letters and numbers, the new RCP gO8AA is so designed as to simplify each operation. Truly a professional instrument for the professional technician

## Model 123 "FLYBACKER"

The answer to fast, reliable testing of flyback transformers ard yokes. Quickly, accurately, check the horizontal output circuit of all TV receivers.

Extremely sensitive, the Model 123 Flybacker immediately shows up a single shorted furn in a flyback transformer or yoke. up a single shorted furn in a flyback transtormer or yoke. in the home.

All tests can be carried out with the components in place in the TV receiver, and call-backs can be prevented by checking all flyback transformers and yokes in stock for opens, shorts, etc, Flybacker tests are also applicable to inductive windings on any transformer, choke, solenoid, relays, etc. where the impedance is not relatively low. In fact the instrument may be used as a proportional AC Ohmmeter

Three "GOOD 8AD" scales.

- One scale for vokes
- Tests low and high impedance yokes.
- Direct reading numbered scale
- Tests while components are in TV receiver.
- Tests high impedance sections of all fransformers.

Complete with test leads with alligator clips and tube and instructicns ready to use. Operates
on $105-125$ volts 60 cycle AC -size $6^{\prime \prime} \times 93 / 8 \times 43 / 4^{\prime \prime}$ —weight $61 / 2$ Ibs.- shipping weight 8 ibs.

## Model 463 - NEW 20,000 PER VOLT MULTITESTER

- Low Enough in Cost so that No One Should Be Without a 463!

Small in size and with the utmost sensitivity, this compact, efficient unit assures dependable measurement for TV. FM, AM and industry. Designed for direct metering. the Model 463 eliminates warm-up time.
DC voltage multipliers are kept within one percent tolerance and are of the deposit type. Meter tolerance is well within two percent.
Light in weight Shipping weight.......................... 32 ounces Small in size $\quad 7^{\prime \prime} \times 43 / 8^{\circ \prime} \times 25^{\frac{5}{5} 0^{\prime \prime}}$

## Model 327P - PORTABLE TUBE TESTER

- Meets All of Today's Tube Testing Neєds. Plus Tomorrow's Color Television Types
Here is a completely new approach in the developnent of a twe te:* Seramlined to meet all possible physical limitations, and yet witt more testine Eerformiares built-in than any related type. Tests all tubes in current radic and televisicy receivert, és well as fest tubes in color TV receivers; will check transmitting hearing aic talles, éseous rectifiers, and tuning indicator types.
A new approach to the tube testing data permits easy and rapid iesertic, ef new information when available. Data is also given on current color TV tutes
It will check CR Picture Tubes both black and white and celer $t$, ute $c$ : CR edapter cable (available at slight additional cosi). Black and white picture tuet: cer: : cecify te reactivated with this tester.

A fine instrument designed for ease of operation and portability. In solid oak carrying case with slip-hinge cover.

## Model 480 - AC-DC MULTITESTER

- Exceptional Performance Achieved with Latest RCP Design Based upon the world-famous RCP 44 Multitester, the Model 480 sets an all-time high in value for an economical, rugged, universal tester that is a must for every laboratory, shop and serviceman's kit.
3' square meter with 800 microampere D'Arsonval movement, gives 1000 ohms per volt sensitivity on DC and AC. 8attery for ohmmeter circuit is readily removable and replaceable without soldering or unsoldering. Special spring contact clips make replacement immediately and easily.
Excellent rectifier characteristics and quality control of components in a very 'arge production result in an unusually low price. Here is a better, vet more inexpensive

Housed in a compact, smart looking custom-molded case and panel, the Model 480 equals in appearance its quality and performance

## Series 120 High Sensitivity, Mult-Range Test Set 20,000 OHMS PER VOLT DC - 5,000 OHMS PER VOLT AC 44 Self-Contained Ranges from 1.2 volts to 6,000 volts, 60 microamperes to 12 amperes, $-\mathbf{2 0}$ to $+\mathbf{7 7} \mathrm{db}, \mathbf{2 0 0}$ ohms to 20 megohms

The Model 120 provides a combination of features, ranges and functions that hove been most wanted in a portable, high sensitivity, multi-range test set.

MORE RANGES ... the ' 120 ' has 44 . . . which start lower and go higher than is usually associated with instruments of its size and type.
AN EXTRA-LOW RESISTANCE RANGE . . . a 2 -ohm center scale range, powered by long-lived, internal 1.5 battery source.
AN EXTRA-LOW VOLTAGE RANGE . . . 1.2 volts full scale, AC and DC.
AN EXTENDED LOW CURRENT RANGE . . . a 60 microampere first DC current range. A LARGER and EASIER READING SCALE FACE . . . on a new, extra-large $51 / 4^{\prime \prime}$ meter. SIMPLE, POSITIVE RANGE SELECTION ...an 18 -position, positive-detenting, master range selector with low resistance, dependable silver-plated contacts.
FUGGGED, POSITIVE CONTACT JACKS and PLUGS . . . the ' $120^{\circ}$ incorporates specially designed, low resistance, solid brass, banana type plugs and jacks.

## RANGES and SPECIFICATIONS

* 8 DC Voltage Ranges: 20,000 ohms/rolt 0-1.2-3-12-60-300-600-1200-6000 volts.
- 8 AC Voltage Ranges: 5,000 ohms/volt. -1.2-3-12-60-300-600-1200-6000 volts.
- 8 AC Output Ranges: same as AC volt ranges. Built-in 600 V . blocking capacitor. 7 DC Current Ranges: 0-60-300 Microamperes. 0-1.2-12-120-600 Ma. 0-12 Armps. - 5 Resistance Ranges: self-contained 0-200-2000-200,000 ohms. 0-2-20 megohms. 8 Decibel Ranges: from -20 to +77 DB. $0 \mathrm{DB}=1$ Milliwatt, 600 ohms
- Extra Large 51/4" Rugged 'Pace' Meter: 40 microamp sensitivity. $2 \%$ accuracy.
* $1 \%$ Multipliers and Shunts: wire-wound and high stability deposited-film types.
* Only 2 Plug-Jacks Serve All Standard Ranges: separately identified and isolated jacks provide for extra-high ranges.
* "Transit" Salety Position on master range selector, protects meter during transportation and storage.
- Custom-Molded Phenolic Case and Panel set a new standard for compact, efficient, laboratory instrument styling. Deeply engraved panel characters afford maximum legibility throughout the life of the instrument.

## MODEL 88 VTVM ond ELECTRONIC OHMMETER <br> Complete with 3-Way Universal Test Probe PEAK TO PEAK VOLTAGE RANGES 103200 VOLTS Plus True Zero-Center and Lefi-Hand Zero VTVM Ranges

A compact, wide range instrument for modern electronic circuit checking in the laboratory, on the production line and for general service-maintenance. Many advanced features include specially engineered Peak-to-Peak voltage ranges which afford a new high in P.P reading accuracy of pulsed waveforms encountered in Color or Monochrome TV and similar applications. 7 DISTINCTLY SEPARATE FUNCTIONS with 40 SELECTED, WIDE-SPREAD RANGES

- TRUE-ZERO.CENTER DC VOLTAGE RANGES. Eliminates need for test lead reversal or polarity switching: Constant 262/3 Megohms input resistance. $0 \pm 1.2 \pm 6 \pm 12 \pm 60 \pm 300 \pm 1200 \mathrm{~V}$.
- 5 ELECTRONIC OHMMETER RANGES. Covers wide range of resistance values encountered in modern electronic circuits. AM-FM-TV: $0-1000-10,000 \mathrm{ohms}$.

1. 6 (-)MINUS DC VOLTAGE RANGES: (lett-Hand-Zero) constant 131/3 Megs. input resistance.
$0-12-6-12-60-300-1200$ volts.
16 ( + ) PLUS DC VOLTAGE RANGES: (Lett-Hand-Zero) constant $131 / 3$ Megs. input tesistance.
$0-12-6-12-60-300-1200$ volts.

- 6 High Impedance RMS AC VOLTAGE RANGES:
0-1.2-6-12-60-300-1200 volts.
Input Characteristics:
Up to 60 V Range: 3 Megohms, 90 mmfd. 1200V Range: $4 \mathrm{Megohms}, 67 \mathrm{mmld}$.
- 6 High Impedance PEAK-TO-PEAK AC VOLTAGE RANGES:
0-3.2-16-32-160-800-3200 volts
Input Characteristics:
Up to 160 V Range: $6 \mathrm{Megohms}, 90 \mathrm{mmtd}$. 800 V Range: 1 Megohm, 70 mmid . 3200 V Range: 4 Megohms, 67 mmid .
-5 SPECIAL HF PROBE RANGES: Extends AC RMS reading facility to 300 Mc $0-1.2-6-12-60-300$ volts RMS.
(Requires PRECISION RF-IOA HF Probe.) Probe input capacity:-approx. 5 mm dd. $\star$ ONE UNIVERSAL, COAXIAL AC-DC VTVM PROBE serves all functions other than high frequency probe ranges.
$\star$ PEAR-TO-PEAK "RE-SET" PUSH. BUTTON for rapid "zero" return of electronically damped test circuit
* LARGE 51/4" RUGGED PACE METER: 200 microamperes sensitivity, $\pm 2 \%$ accuracy. Manufactured in PRECISION'S own modern meter plant.
$\star 1 \%$ MULTIPLIERS and SHUNTS: wirewound and deposited-film types
$\star$ CUSTOM-MOLDED PHENOLIC CASE and PANEL: Compact, eflicient, laboratory instrument styling

## The New Deluxe Line of PRECISION Test Equipment...

(VTVM's, Signal Generators, Oscilloscopes, Tube Testers, etc.)
. . . is now available at all leading electronic parts distributors. Models were not yet ready for photography and presentation in this edition of Radio's Master. When it went to press last spring.

The Deluxe line represemts a new concept in electronic instrument design. with brilliamt, functional styling . . satin-bruslied. aluminum pamels with hiyh-contrasting. deep-etched blue and red eharaters . . and cnstom molded, mateled blue control hnobs. Open metal-cased portable models are housed in blue-gray, ripple-tone-finished, heary gauge. hooded steel cahinets with integrated 'snap-flat' saddlestitched carrying handles. Closed portable models are encased in natural, rubbed-finish hardwood cabinets.

The PRECISION line also continues to be available in the popular Standard black models, with matching black panels. Electrically, identical to their Deluxe counterparts.

## 

## Testers

## APPLIANCE TEMPERATURE TESTERS

A NEW IDEA IN TESTERS - The need for scientilic but sturdy portable test equipment in the appliance service field is met by this exclusive line. Here the user profits from J-B-T's wide experience in building field test sets for many well-known manufacturers of ranges, irons, refrigerators, deep freeze units, and similar equipment. All J-B-T testors include the principle of remote reading of temperature, -and temperature measures the real usefulness of the appliance. Although called appliance testers, these handy portable testers have found a multitude of uses for trouble-shooting,
experimenting and research in industry and in laboratories.
 ware. Characteristic of more expensive pyrometers, the $23-\mathrm{JP}-1$ is outomatically compensated for ambient temperature. Thus the tester eliminates calculations, avoids likelihood of serious error os temperatures change inside the instrument itself serious error as proof direct readings. Supplied writh attached SA-116 $51 / 2^{\prime}$ cali brated thermocouple, clip, and convection shield....-

MODEL 32-JP-3. This sturdy, fast reading portable is by far the most widely used oven tester in the country. The rigid outer carrying case $6^{\prime \prime} \times 37 / 8^{\prime \prime} \times 33 / 4^{\prime \prime}$ is covered in black leatherette; the glass-covered indicator fits in a $31 / 4^{\prime \prime}$ flanged metal case. The dial shows $0-650^{\circ} \mathrm{F}$. in $10^{\circ}$
divisions readable to $21 / 2^{\circ}$. Excep-

tionally fast, continuous response. Automatic compensation for ambient temperature is valuable feature whether the tester is used for service work.
sales demonstrations, or inspection. More details on the 32-JP-3 are available in Bulletin JP-103. Price includes attached SA-116 51/2 calibrated thermocouple, clip for attaching to grill, and convection shield for steady read-

## VERSATILE OVEN TESTER

MODEL 32-JP-4. Companion tester to the 32-JP-3 with all the features of that tester, plus a leather carrying strap, and binding posts for quick attachment and interchanging of various thermocouples listed on this page, to check irons, washers, waflle-bakers, toasters, roasters, clothes dryers, etc. Range, $0-650^{\circ} \mathrm{F}$; black leatherette case $6^{\prime \prime} \times 37 / 8^{\prime \prime} \times 33 / 4^{\prime \prime}$. More details on the 32-JP-4 are available in Bulletin JP-104. Price includes SA-116 $51 / 2^{\prime}$ calibrated thermocouple, clip and convection shield.

## IRON TESTER

MODEL 32-J1T. Self-contamed bench type tester; checks all makes of irons; measures thermostat temperatuses; and shows open or short cucuits. Automatically compens ated for room temperature. Also indicates operating temperature of the sole plate (working suiface) on non-electric or cordless :rons. Black metal base; overall size $10^{\prime \prime} \times 12^{\prime \prime} \times 51 / 2^{\prime \prime}$ ' scale $0-650^{\circ} \mathrm{F}, 15 \mathrm{amp}$ fuse, $6^{\prime}$
cord, 110 -volt, $50-60$ cycles......... $\$ 31.65$

## OVEN TESTERS

MODEL 23-JP-1. Latest addition to the widely-known family of J-B-T oven temperature testers is this modern and compact unit. Like the Models 32 -JP-3 and 32-JP-4 described below, this indicating portable pyrometer is designed to save time and furnish reliable information in testing and setting thermostats on electric or gas ranges and other appliances by showing oven temperatures as they change. The same size of dial, $0-650^{\circ} \mathrm{F}$., with $23 / 8^{\circ \prime}$ scale arc reading, is used but covered by an all-plastic instrument front. The indicator is mounted on a black metal panel affixed inside a pocket-sized, black top-grain leather case $41 / 2^{\prime \prime} \times 27 / 8^{\prime \prime} \times 41 / 4^{\prime \prime}$ over hard-

MODEL 61-JRT. This 9-in-1 tester speeds accurate temperature adjustment and current analysis of ranges, reIrigerators, etc. Rapidly reads four cold zones, $-100^{\circ} \mathrm{F}$. to $+80^{\circ} \mathrm{F}$. up to $14^{\prime}$ distant; two heat zones $0-600^{\circ} \mathrm{F}$. up to $51 / 2$ distant; one voltage range $0-300$ AC; and with transformer, two current ranges, $0-30$ and $0-60$ amps, AC. Sturdy, polished walnut case $151 / 2^{\prime \prime} \times 10{ }^{\circ}{ }^{\prime \prime} \times 43 / 4^{\prime \prime}$ with handle and slip hinges. Two-color etched metal panel.
 Separate switches protect
bulb and ammeter circuits. bulb and ammeter circuits. Requires one standard flash-light cell, replaceable in the field. Temperature scale accuracy $\pm 2 \%$ of full scale. Rectified $A C$ readings $\pm 5 \%$. Accessories listed below may be added for testing irons, grills, roasters, washers, eic. Includes two SA-iE? resistance bulbs, two SA-116 thermocouples, necessary electrical leads, and AS-TR-2 built-in transformer.............................................. $\mathbf{\$ 1 0 7 . 2 5}$

For more details, see Bulletin JRT-349.
MODEL 61-JRT (LESS TRANSFORMER). Same unit, same scales, except does not read in amperes; AS-TR-2 transformer assembly omitted

## THERMOCOUPLES

(See next paqe for Resistance Bulbs and Transformers)
SA-116 with SHIELD and CLIP. Standard flexible No. 22 gauge iron constantan, asbestos insulated, $51 / 2^{\prime \prime}$, with attachment clip and convection shield as normaliy supplied with 23-IP-1, 32-IP-1, 32-IP-2 $32-\mathrm{IP}-3$ 32-JP-4; $60-\mathrm{JRT}$ and 61-JR'T Testers. (See SA-199 for extra quality, glass
insulated type). SA-116

SA-170 (REPLACEMENT THERMOCOUPLE for IRON TESTERS 32-JIT and IT-1). Thermocouple and lead, including aluminurn plate and special tip, quickly installed in the field - $\$ 2.10$

SA-175 (PLAIN TIP). For roasters, waffle irons, etc., $51 / 2^{\prime}$ iron constantan tlexible No. 22 gauge, asbestos insulated, with small ball ip; used where clip und shield of SA-116 not suitable; for Models

SA-176 (for TOASTERS, te) 51/' asbestos insulated, with special disc to collect hecti easily asbestos insulated, with special disc to collect heat, easily
attached to $32-\mathrm{JP}-2$ and 32 -JP-4 oven testers, also 60-JRT and attached to $32-\mathrm{JP}-2$ and $32-\mathrm{JP}-4$ oven testers, also $60-\mathrm{JRT}$ and
$61-\mathrm{JRT}$

SA-188 (for AUTOMATIC WASHER TEMPERATURES, otc.)
${ }^{\prime \prime}$ diameter copper tube, $4^{\prime \prime}$ long, encloses thermocouple for nsertion in pipe or sample of water. Has $6^{\prime}$ leads for attachment to 32-JP-2 and 32-JP-4 oven testers, also 60-JRT and 61-JRT...... $\$ 3.85$

SA-199 with SHIELD and CLIP. Same as SA-116 above, except duplex, non-fraying glass braid construction; diameter $115^{\prime \prime}$; recommended for frequent use with these testers at temperatures
above $400^{\circ} \mathrm{F}$. ...

SA-300 (for SURFACE READINGS). Spring-lype iron constantan in Transite tip with handle and 5' No. 22 gauge lead for extremely rapid heat readings: for attachment to 32-JP-2 32-JP-4, $60-\mathrm{JRT}$ and $61-\mathrm{JRT}$ appliance -

SA. 301 (REPLACEMENT TIP FOR SA-300). Transite tip and thermal element only

ACCESSORY IRON TESTER, MODEL IT-1. This attachment it identical with the 32-JIT, except there is no meter. It is easily connected to Models 32-JP-2, 32-JP-4, 60-JRT and 61-JRT. Shows open circuits and shorts, checks sole plate tempera. tures and thermostats on all typet
of trons

# Instruments Testers 

## TEMPERATURE INDICATORS

WHERE TO USE: To determine heat rise of motors, transformers and coils; for laboratory rurnaces, inspection set-ups, for remote indication of infra-red and other oven temperatures; and to check temperatures in indus-
trial processes such as heat treating and annealing. When used with selector switch, permits centralized reading of one to ten thermocouples, as in Diesel exharist manifold applications.

MODEL 32-J
MODEL 32-J PYROMETER IN SN- 7 STAND. Mounted in sloping front black metal sloping front black, metal stand, $41 / 4^{\prime \prime}$ high x $43 /{ }^{\prime \prime}$ deep $x 41 / 8$ Wide. Compensated for ambient temperature. Medium resistance system, dampe, for quick reading on 23/6 scale, assures ruggedness and pointer stability. To reinstallation: accuracy of the installation: use only the mocouple and lead whicher mocouple and lead which are provided; do not cut extra eadcoil it-change in length changes calibration. A protection tubs is not generally required. Many users find at convenient to keep
an extra couple and lead on hand.

MODEL 32-I IN SN-7 STAND (Supersedes SV-3 Stand)
$0^{\circ}-650^{\circ} \mathrm{F}-350^{\circ} \mathrm{C}$, includes SA-91 thermocouple, SA-84
$0^{\circ}$ lead, and CB-1 connector block $1200^{\circ} \mathrm{F}-650^{\circ} \mathrm{C}$ includes SA- 87 SA-82 and CB-1 $\begin{array}{ll}0^{\circ}-1200^{\circ} \mathrm{F}-650^{\circ} \mathrm{C} \text {, includes } \mathrm{SA}-87, \mathrm{SA}-82 \text { and } \mathrm{CB}-1-30.25 \\ 0^{\circ}-2000^{\circ} \mathrm{F}-1100^{\circ} \mathrm{C} \text { includes SA-87, SA-82, and } \mathrm{CB}-1 & 30.25\end{array}$

MODEL. 32-J IN SN-8 STAND (not illustrated). With 3 b nding posts to accommodate flexible extra lead and thermocouple for hard-to-reach locations. (Stand Supersedes SN-5)
$0^{\circ}-650^{\circ} \mathrm{F}$ with SA-91 thermocouple, SA-84 lead, CB-1 comector block, and SA-86 flexible lead and thermorouple............... $\$ 34.10$

## MODEL 60-JPS

MODEL 60-JPS. This partable makes it easy to know temperatures at one to ten locations. Excellent for study of heat in various parts of the same equipment, or in a battery of units. Knife-edge pointer, $5.6^{\prime \prime}$ scale. Heavyduty thermocouple switch has average contact resistance of .002 ohms or less. Automatically compensated for ambient temperature, indoors or outdoors. To retain accuracy of $1 \%$ full scale, use leads and thermocouples equal to resistance and e.m. couples equal to resistance and e.m. which instrument is calibrated Medi um resistance system assures portability. Housed in natural-finish wood ability Housed in natural-finish wood
 enance, and engineering $60-\mathrm{JPS}-0^{\circ}-600^{\circ} \mathrm{F}$ with SA-86, $7^{\prime}$ thermocouple and lead 60 for small apertures $\qquad$ 101.85

 $60-\mathrm{JP}-0^{\circ}-1200^{\circ} \mathrm{F}$, with SA-88, SA-82, and CB-1 $\qquad$ Note: When ordering additional thermocoubles, specify couples and leads as above. Centigrade equivalent scales available on order.

## MODEL 70.J

MODEL 70-J PYROMETER, for accurate, reading at a distance, has full 6' scale and spade pointer, with accuracy of $1 \%$ of total scale deflection. Automatically compensated tor ambient temperature. Molded case mounted in metal protecting shell $73 / 8^{\prime \prime} \times 81 / 8^{\prime \prime} \times 11 / 2^{\prime \prime}$. Connections through bottom of case for wall or front-of-board mounting. When ordering, specify which standard scale range: $0^{\circ}-600^{\circ} F$ for 1938 std. I-C; $0^{\circ}-1200^{\circ} \mathrm{F}$ for $\mathrm{C} \cdot \mathrm{A}$

[^36]

## RESISTANCE BULBS (FOR COLD TESTING)

SA-142. Bulb with $14^{\prime}$ polyethylene ribbon type lead, for use only with Model 60-IRT; calibration is not in terchangeable with SA-162; has no embossed number .......................... $\mathbf{\$ 5} 50$
SA-162. Bulb with $14^{\prime}$ polyethylene ribbon type lead, for use only with Models $50-50$ and $61-\mathrm{JRT}$; has em bossed part number.......................... $\$ 5.50$
CL-90 CLAMP. Metal clamp for holding SA-142 and SA-162 resistance bulbs in contact with surfaces up to $1 / 4^{\prime \prime}$, $\$ 0.28$

## TRANSFORMERS

AS-TR-2. Attachment for compartment of 61-JRT all-purpose tester, completely housed, with jumper lead and panel; reads 30 and 60 AC amp. scales on tester-...._ $\$ 16.50$ AS.TR-3. Attachment for increasing usefulness of 60-JRT all-purpose tester. Includes side rails for attaching inside compartment; fully housed. Reads 30 and 60 AC amp. by dividing volt scale by 10 or 5

## TEMPERATURE ACCESSORIES

LEAD WIRES. To bring the reference junction within the pyrometer, compensating or extension lead wires should always be used. See the instrument dial for (1) the kind of lead and (2) combined resistance of lead and thermocouple. Standard leads include:
SA-82 6' compensating lead for chromel-alumel couples; duplex, stranded; asbestos-insulated, cotton-braid impregnated with moisture-proof and flame-proof compound; terminals a instrument end; other end tinned for connector block..... $\$ 1.55$ SA-83 $26^{\prime}$ compensating lead for chromel-alumel as above SA-84 6' extension lead for iron-constantan, 1938 calibration; duplex; moisture-proof and flame-proof; prepared as above

SA-85 26' extension lead for iron-constantan, 1938 calibration similor to above. SA-86 ${ }^{7}$ iron-constantan thermocouple and lead combined; twisted pair No. 20 Ga., asbestos-insulated-for intermitten use oa $650^{\circ} \mathrm{F}$ scales; terminals at meter end; other end welded. (Resistance not interchangeable with SA-84 or SA-85)

THERMOCOUPLES, For pyrometers and leads above, J-B-T thermocouples are carefully selected, standardized, and tested. SA-87 12" No. 14 Ga. chromel-alumel, 2-hole ceramic beads. fits $5 / 16^{\prime \prime}$ hole; welded tip__ $\$ 3.10$ SA-88 same except $24^{\prime \prime}$ No. 14 Ga. \$3.85 SA-89 12' No. 8 Ga. chromel-alumel, 2-hole ceramic beads fits 7/16" hole; welded tip__ $\mathbf{\$ 3 . 1 0}$ SA-90 same except $24^{\prime \prime}$ No, 8 Ga._._._._._._ $\$ 3.85$ SA-91 12' No. 14 Ga. iron-constantan, 1938 calibration; 2-hole ceramic beads, fits $5 / 16^{\prime \prime}$, hole; welded tip $\$ 2.60$ Flexible Thermocouple, 7 ' length, see SA-86 lead wire.

CONNECTOR BLOCK Model CB-1. Lava connector block, withstands high terrperatures, accommodates all thermocouples up to No. 6 Ga. Heavy brass connectors keep contazt resistance low. Can be | used independent of connector |
| :--- |
| head. |

PROTECTION TUBES. To support, enclose, and protect thermocouples like the above, especially at higher temperature or in damazing atmospheres, various wrought iron or alloy protection tubes are recommended. Please request separate catalog sheet on them, also covering CH-6 connector head.

## Instruments JBI <br> Testers

 (Patented)
## VIBRATING REED FREQUENCY METERS

J-B-T Vibrating Reed Frequency Meters are used extensively in radio, telephone, and television service, on engine generator sets, in laboratories, in many types of electronic equipment, on panel and control boards, in inspection set-ups - wherever constant or known frequency is important to efficient operation of equipment. More than 13 years of continuous experience covering many thousands of these instruments are your assurance of quality for both commercial and defense applications.
The patented, smplified desian used in the J-B-T netel ope: ites on AC or inter:upted DC. Each reed is adjusted to respond by resonance to but one hequency. As the curient excites the driving cosl, the reed "in tune" with the frequency in the coll will :espond by v.brating igpidly because of permanent magne: polarization and induced magnetism fiom the conl. The instrument is adapted to specified operating voltage by a sesies resistor. To determine fiequency, simply read the reed.

The response patterns differ with the increments of frequency between reeds. For example, at 60 cycles, half-cycle steps give the broad response shown below at left, whereas full cycle steps bring the sharp response at right.

CAUTION: lit 60 cycles, trust the meterl Power supne may momentarily be off-frequency due to changing load cond tions. All J-B-T Frequency Meters are accurately cahbrated at the factory, entirely independent of frequency of power supply.
Production and inspection equipment are checked regularly Production and inspection equipment are checked reg
against National Burean of Standards frequency signals.

(Meter operating at 60 cycles)

10 REEDS
Range: $48-52$ and $58-62$ cycles. Double window for ease of reading either range. Often
specified for export. $100-130$ volts; 130 ohms per volt; l watt power consumption. Accuracy
$\pm 0.3 \%$ at reference tempera$\pm 0.3 \%$ at reference tempera-
ture. Flush panel mounting. ture. Flush panel mounting.
See Table of Dimensions, lines See Table of Dimensions, lines 4 and 5.
30-F (illustrated). $48-52$ and 58 ase.
$\mathbf{S 2 7 . 5 0}$ $\begin{array}{ccc}\text { 30-FX. } 48-52 \text { and } 58-\mathrm{b} 2 \mathrm{cy} & 312^{\prime \prime} \\ \text { Molded Case, MIL-M-6A. } & \text { mia. }\end{array}$ $\$ 27.50$

ADVANTAGES: Guaranteed accuracy at reference temperature of $77^{\circ} \mathrm{F}$ is $\pm 0.3 \%$ or better of the AC frequency being measurea, unless otherwise stated. Accuracy on interrupted DC may be somewhat less. High fatique safety factor for continuous opera: :on. Temperature compensations are not required as temperature coefficient of reeds is only approximately 75 parts per million :2er degree F., negative.
All meters are permanently calibrated at the factory and do not . equire subsequent adjustment. J-B-T reeds have relatively high $Q$ characteristics, an especially desirable factor in electronic circuits. Wave form or external magnetic fields do not ordinarily hav an adverse effect. Built with no pivoted parts and with lock washers at every crimal pornt, these rugged meters can toke iougher treatment than many instiuments.

## RUGGEDIZED FREQUENCY METERS

The inherently sturdy construction of vibrating reed meters usually does not need further ruggedization. Sealed meters can be supplied, on special order, to meet extra severe shock and vibration requirements. Such reed meters carry the suffix RUG.

## NOTE ON METER VOLTAGE

J-B-T Vibrating Reed Frequency Meters of all sizes ncrmally are made with two studs and are designed to be cornected across one phase of a multi-phase line. The single phase voltage where the meter will be used thus becortes the voltage to be specified for the meter. Special meters with extra studs are made only for the purpose of reading two or more voltages, not additional phases.

## 31/2" SEALED METERS

FHXX TYPE sealed meters, glass-to-metal construction with solder terminals and detachable flange, supersede the former FHX sealed meters (Frint SK-24). While JAN-I-6 and MIL-M-6A (Type MR36) do not refer to frequency in-
dicators, the FHXX series dicators, the FHXX series uses the front mounting dimensions, and meets or exceeds the sealing and electrical requirements including Mounting dimensions are Mounting dimensions are shown below. Slamard volt age is 100-130. Electrical are the same as for corresponding models without the HXXX designation. Every meter tested in water where the absolute pressure of the air above the water is reduced to 2.5 inches of mercury (cpprox. $57,000 \mathrm{ft}$ altitude) and is maintaned for one rinute While not regularly stocked, these meters are in production. If the Uranium's there YOUCAN'T MISS IT
NGA MULTIPLIER TUBE

## A Revolutionary Improvement Over Scintillation Counters <br> because- <br> - Greatest response to lower energy gamma rays from the more deeply buried uranium ores.

- It increases geiger counter sensitivity 50 to 500 times, at considerably lower cost than scintillalion counters.
- More rugged than scintillation detector - no fragite components such as crystals or photomultiplier tubes.
- More reliable - not affected by voltage changes (over a range of $150-200 \mathrm{~V}$ ) or temperature changes ( $-40^{\circ}$ to $+100^{\circ} \mathrm{C}$ ).
- Can be attached to any commercial geiger counter. We recommend NCA Model RM2NA which has an extra fast meter response essential for automobile and airplane surveys.
- More sensitive - over $500,000 \mathrm{cpm} / \mathrm{mr} / \mathrm{hr}$.
- Can be used for airplane and automobile surveys as well as in drill holes.
- Provides directional detection - acts as radiation compass.

Ore-Lokator
One of the most popular tap-quality geiger counters. Used for many years by professionals and serious amateurs.

- Exclusive llevice for shecking meter accuracy.
- Constant geiger tube voltage, largely independent of
battery voltage.
- Low drair circuit - approximately 400 hrs. useful battery lifs.
- Sensitivity is $2000 \mathrm{cpm} / \mathrm{mr} / \mathrm{hr}$. Detects both hard beta and ganmis radiation - sersitive to as little as $.003 \%$ uranium.

## SPECIFICATIONS

RANGES-500-5000-50,000 counts per minute; reads radiation dossge from 0 -.25-2.5-25 mr/hr.
HEADPHONE-plug-in type, reacts to radiation with audible click.
SWITCH-ON-OFF, meter range and geiger tube check. RUGGED CASE-non-caroding, custom-drawn watertight aluminum finished in hammertone blue. Probe and carrying handie heavily chrome plated. Tropicafized electrical circuit.
BATTERIES REQUIRED-2-67.5V and 3-1.5V flashlight cells.
OVERALL CASE DIMEWSIORIS-7\%/8" $\times 4^{\prime \prime} \times 41 / 2^{\prime \prime}$.
WEIGHT LESS BATTERIES-approximately 5 lbs.
MODEL AMZN-Cormpete with magnetic earphone, carrying strap, sacioactive calibrating source, sample pans (planchets), and instrutition manual. MODEL RM2iNA - Identical to Model RM2N but with extra FAST-SL\&W response neter circuit for use in airplane and automobile surveys.

GUARANTEED FOR ONE YEAR

Lightweight, Rugged
NCA
URANIUM FINDER
(pat. pend.)
Sensitivity equal to high priced instruments . . . perfect for prospecting, industrial, scientific, and civil defense applications.

## SPECIFICATIONS

SENSITIVITY: 2,000 cpm/ $\mathrm{mr} / \mathrm{hr}$. Detects and measures the intensity of hard beta and/or gamma radiation. Highly sensitive response to as little as $.003 \%$ uranium in rock samples.
GEIGER TUBE: NCA Model M5 mounted inside of instrument.
INDICATION: Flashing of neon panel light: clicks in earphone plugged into phone jack.

CONTROL: $0 n$-off switch conveniently located in front of carrying handle.
CASE: Rugged, watertight cast aluminum finished in hammertone blue. Tropicalized circuits.
BATTERIES REQUIRED: $2-67.5 \mathrm{~V}$, and 2.1 .5 V flashlight cells.
URANIUM FINDER Model RDN: Complete with earphone, carrying strap, and instruction manual.

GUARANTEED FOR ONE YEAR

## SPECIFICATIONS

SENSITIVITY: [betects and measures as little as $.01 \%$ measures as little as . $01 \%$ uranium. $2000 \mathrm{cpm} / \mathrm{mr} / \mathrm{hr}$. GEIGER TUBE: NCA M3. mounted insile of case. CASE: Corrosion resistant aluminum tuse poith attrac. aluminum tuse with attrac
tive finish.

The only geiger counter with real professional sensitivity real professional sensitivity $\$ 50.00$. Held like a flashlight, $\$ 50.00$. Held like a flashighe.: the Geiger Flasher is excelcivil for amateur prospectors. civil defense and educational use. Unexcesled as a spare oeiger counter for the professional prospector.

BATTERIES RECQUIRED: $2-67.5 \%$, and $1-1.5 \mathrm{~V}$.
GEIGER FLASHER Model RFN: Complete with shoulder strap equipped, battery case and instruction manual. Accessory Magnetic Earphone optional.

## SUPERIOR <br> The New Model TV-11 <br> SPECIFICATIONS

The model TV-11 operates on 105.130 Volt 80 Cycles A.C. Comes housed in a beautiful handrubbed oak cabinet complete with portable cover.

* Tests all tubes including 4, 5, 6, 7, Octal, Lock-in, Peanut, Bantam, Hearing Aid, Thyratron, Miniatures, Sub-miniafures, Novals, Sub-Minars, Proximity fuse types, etc.
* Uses the new self-cleaning Lever Action Switches for individual element testing. Because all elements are numbered according to pin-number in the RMA base number ing system, the user can instantly identify which element is under test Jubes having tapped filaments and tubes with filaments terminating in more than one pin are truly tested with the Model TV-11 as any of the pins may be placed in the neutral position when necessary.
- The Model TV. 11 does not use any combination type sockefs. Instead individual sockets are used for each type of tube. Thus it is impossible to damage a tube by inserting it in the wrong socket
* Free-moving built-in roll chart provides complete data for all tubes
* Newly designed Line Voltage Control compensates for variation of any line voltage between 105 Volis and 130 Volis.
* NOISE TEST: Phono-iack on front panel for plugging in either phones or external amplifier will detect microphonic tubes or noise due to faulty elements and loose

## EXTRA SERVICE

The Model TV-11 may be used as an extremely sensitive Condenser Leakage Checker. A relaxation type oscillator incorporated in this model will detect leakage even when the frequency is one per minute.

FOR ELECTRICAL CONTRACTORS AND MAINTENANCE MEN The New Model 640

The new Model 640 provides all the measuring services required for electrical maintenance, development, testing and repair work Model 640 operates an a self-contained standard battery and is therefore always ready for use. No external source of current is required.

## Feafures

Precision Calibrated External Shunt for High Currents. An accurately calibrated external shunt enables exact HIGH CURRENT measurements up to 75 amperes.
Automatic Current Measurements. The Model 640 wilt measure the actual current consumption of any electrical device while the unit is in operation and without breaking any connections. 5 pecificasions

## SUPREME

I.eading manufacturers select Supreme meters and meter movements as components of their products because they are fuality built and dependable. Supreme meters for initial eduipment uses are made in a variety of sizes and designs with or without special dials and cases. Send a sketch or clrawing of the meter you need and Supreme will promptly advise prices and delivery schedules.

MULTI-RANGE MINIMETERS

These handy, high quality multi-range. single-function instruments are small enough to lit in a man's dress shirt or vest pocket. About the size of a cigarette pack, they have the same quality construction found in the larger multi-meters. Two popular types are listed below. Other functions available for special applications. Let Supreme know the type you need in your work.

- NEW PRECISE MODEL UPA-IN AND UPA.IP ULTRA PREAMPLIFIER

The PRECISE Model UPA-I preanmplifier is an ultra-modern presentation of true high fidelity, set off in a heautiful rach brushed brass colored panel, designed to enhance a living area. - It embodies the most modern circuitry with separate controls for Bass Boost. Treble Boost and Roll-off, Volume. Record Compensation which also includes the latest AES curves (this year), a main Selector switch which connects to Phono. Microphone, Radio Television and an auxiliary position (4 separate innout jacks are mounted on the rear chassis), a separate On-0ff switch also operates the Convenience outiet at the rear of the instrument. - The instrument is designed so that it is completely self-contained or, if desired it may lie mounted directly into a console panel. In the latter case, no addditional hardware is required because of a unique cabinet and chassis design. The cabinet dimensions are $12 \times 4 \times 4$ and it weighs approximately six pounds. - The input gain and amplifier latitude is more than ample for Reluctance or crystal inputs Long lines may be used with the cathode-follower output.

The UPA-I is ovoiloble in two eircuits:
UPA-IP has its own transformer supply and

UPA-IN does not include a power supply. Power is taken directly from the main amplifier. It does. however. have its own filtering circuits.

PRECISE makes it possible to build your own experiments with the most remarkable kit you've ever seen ... the new PRECISE TI TRANSISTOR KIT. Components include transformer, chassis. TRANS!STORS, germanium diode, wire, etc. - everything you need for experimental construction PLUS the finest step-by-step instruction book.

## PRECISE DEVELOPMENT CORP. OCEANSIDE, N. Y.

Weight........................ . 24 Ibs.
Size...............14" $\times 16^{\prime \prime} \times 6^{\prime \prime}$

ENGINEERING DESIGN CONSIDERATION: To understand the Model 111 Mutual Conductance and Emission Tube Tester, it is perhaps best to spend a moment with the original design considerations. Basically we recognize the fact that

1. A GM or Emission type tube tester actuaily reads a goodly percentage of tube troubles-BUT each alone missed a great many. We could not say with any degree of assurance which type of tube test was the best. Certain applications required GM. while others required Emission. PRECISE Solution: The Model 111 checks Gm and Emission separately. It indicates on the roll chart the most important single test for normal applications. It is, of course, desirable to make both tests.
2. In AC.DC equipment: or series filaments arrangements, which are daily enjoying greater popularity, the "Voltage Sapper" (a tube which developed too much filament voltage as compared to the other tubes) was a constant trouble. PRECISE Solution: The Model 111 allows the filament current to be measured directly on the meter.
3. A whole series of different test voltages (sweeping from zero voltage up) was required. PRECISE Solution: The Model 111 sweeps from 0 through the normal testing range when making measurements. This nives an average evaluation for the tube over an extended range of operation,
4. Short tests usually require elaborate switch manipulation. PRECISE Solution: The Model 111 uses a single rotary switch which checks each element against every other element. No conversion chart is required to ascertain which pins are shorted. This test may be made at any time hot or cold without changing any other switches.
5. The instrument would have to be rugged to stand the "trunk of a car" type of abuse. PRECISE Solution: In the Model 111 a heary steel cabinet houses the entire unit. The panel is deeply etched aluminum.
6. Tube Bias, being an important consideration, should actually be measured on the meter. PRECISE Solution: The Model 111 measures tube bias directly on the indicating meter.
7. The instrument should be simple to operate. PRECISE Solution: The Model 111 uses different type knobs, a no-backlash roll chart, and a sectionalized design setting off each section.
8. There should be a provision for new tubes. PRECISE Solution: The Model 111 is one of the simples type tube testers to set up for new tubes. The pin connections and function positions may be taker directly from the tube manual. The instrument already includes provisions for testing many color tubes.
9. It should check all modern tubes. PRECISE Solution: The Model 111 is provided with sockets for testing the following type bases. Large 4 prong, large 5 prong, large 6 prong, large 7 prong, medium 7 prong, miniature 7 prong, in-line 7 prong (sub-miniature), Octal, Noval, sub-miniature 8 prong CRT and Loctals,
10. The instrument should check Cathode Ray Tubes. PRECISE Solution: The Model 111 also checks cathode ray tubes with CRT adaptor. Model PTA-K $\$ 2.95$. PTA-W $\$ 4.25$.

- PRECISE MODEL 760

## Volłage Regulaled Power Supply

The Model 760 is an extremely versatile electronically regulated power supply capable of delivering an assortment of different viltages. It is invaluable in general repair and laboratory use.
REGULATED VOLTAGE
Range- 75 volts te over 450 volt.
$\%$ Regulation-Withim I ${ }^{\text {cr}} \mathrm{c}$ at specified current duration
$\%$ Ripple- 01 or at ipecified :urrents.
Max. Current- $1 \mathbf{C O}$ ma depending on voltages.
Metering-Voltage and current are both metered by switches.
High Voltage-Uncegulated variable to 1000 volts DC positive or negative. Voltage is metered. Maximum current of 1 ma
Low AC Voltage-Unresulated 6.3 volts $A C, 4$ amperes capacity.
High AC Voltane- 375 volts AC, 50 ma, DC Capacity, Unregulated
V.R. Tube Referente DC Veltage- DC reference voltage. low current, available for reference or screen operation.
All voltages ae capable of being used simultaneously except for the plus or minus 1000 volts. Either plus or minus may te usec hut not simultaneosly.

## GENERAL

The instrument is housted in a sturdy steel cabinet with a deeply etched aluminum panel. A rugged $41 / 2^{\prime \prime}$ meter movement is used for all metering. Shunt and multiolier resistors are within $1 \%$ accuracy. A leathre carrying handis is porided. 5 Way binding posts are used for the regulated outputs. All other veltages are svailable by pin jacks. The high and low voltage supplies each have a standby position ard the roltage reeered is indicated by a jeweled pilot light for the HV and LV. Basically the PRECISE 760 is a geseral purpose source of regulated voltages for substitution and experimental work No returss are mace to the cabinet allowing the instrument to be used for $\mathrm{AC} \cdot \mathrm{DC}$ applications.

## PRECISE MODEL 999

High Voltage Probe
The PRECISE MODEL 999 High Voltage Prolie was desinned for high voltage mieasurements with special emplaasis on SAFETY, OPERATIONAL SIMPLICITY AND RUGGED CONSTRUCTION. First in the industry to include any one or more of the following features:

- MULTIPLE INSULATION: The only probe with at least three individual media must be menetrated before voltage breakdown can occur.
- MECHANICALLY SHOCKPROOF CONSTRUCTION: The only probe to utilize a double spring suspension system in order to protect the Ceramic high wattage multiplier resistor.
- INTERCHANGEABLE TIPS: The only probe where two tips are suppliedone. the comentional type for probing; the other, att alligator clip for connecting permanently to the circuit.
- SWIVEL LEAD CONSTRUCTION: A special-fixed slip-ring arrangement is provided which prevents the test lead cable from snagging or developing high straius at the junction of the cable and probe handle.
- INTERCHANGEABLE RESISTORS: To match your instrument.

## PRECISE DEVELOPMENT CORP. - OCEANSIDE, N. Y.

## FREED Test Instruments

## TYPE 1030-A LOW FREQUEVCY'"Q" INDICATOR <br> USES

The rype 1000-A bow Frequency "(Q" Indicator measures directly the " $Q$ " factor of coils. The instrument arn also be used to measure the indurtance of coils, distributed capacity, impedances. and dielectric losses. The "Q" Indicator can be used to study the magnetic properties of iron, such as stability of iron cores in function of applied voltages, and iron losses as a function of the frequency.

## FEATURES

The main and essential feature of the instrument is that the " $Q^{\prime \prime}$ factor is read directly without any complicated computations. The possibility of measuring " $Q$ " through the whole audio and supersonic frequency range is provided. The setting up and the measuring of the " $Q$ " of coils is practically instantaneous. The instrument is unaffected by line voltage variations, is entirely self-contained and A.C. operated. Both meters ("multiply-by" and " $Q$ ") are protected against overloads and cannot be burned out. The frequency range for " $Q$ " measurements is 20 to 200,000 cycles. The terminals of the variable decade condensers are available directly on the front panel of the instrument. The condensers. therefore, can be used as high quality precision variable condensers To reduce the residual capacitance a link is providod on the front panel of the instrument which disconnects all but the 100 mmfd variable air condenser. When the link is closed five decade capacitors and the air variable are connected across the condensar ferminals. The total capacitance range is from 10 mmfd to 11.11 mfd so that an extremely wide range of inductors may be tested at any desired frequency without adding external caparitors which introduces

large errors. The $R$. $C$. Oscillator and variable impedance amplifier can be used as a separate low fremuency genelator with an output power of five watts into a bit ohm load. The " $Q$ " scale is calibrited from "to 101. A high accuracy of measurement is obtained, since " $Q^{\prime}$ " variations from 0 to 100 are read on a 4 inch metrer. "(?" factors of coils can be measured with ap to 100 vols across the coil. and theretore maines it possible to cetermine the stability and the variations of the " $Q$ " factor" of coils in function of the applied voltage. The voltage fed into the series circhit is variable from 10 volts to . 11 volt.

Range of "Q" Measurements: The ramer. of "d!" fartars is fiom 1.1
 ant A-ruracy of is \% .

Osciflator Frequency Range: Nimtimmully bali.llily liom 20 to $\because 111.010$ rgelts in foms rituses.

## FREED Test Instruments

TYPE 1560 DIfferential VOLTMETER

## USES

The Freed Type lisin Differential Voltmeter monares differemee in voltage leweds as low as $0.01 \%$ regardless of their phake relation. It is extremely usetill when checking response and atternation of filters, transformers, amplifiers and other aprliations where a small differeme in two whtages is to be measuren. Reatase of its exellent stability and high sunsitivity the differemtial voltmeter may also bu used to ohserse drift in amplifiers, meters, and filters.

## DESCRIPTION

The A.C. ingut fiamals are amplified then rectitide athl momparme so that accurate come parison mas he obtainct remaraless of the blase of the input siganls. Foltage differences as low as $.01 \%$ can he observed throurh the use of a hirb pan amplifier and are indicated un a four inch \%orn center meters.

## SPECIFICATIONS

Difference Voltage Range: - $10 \%$ to plus $5 \%$ in $.01 \%$ increments.
Input Voltage Levels: From , 1 vilts to 100 wits.
Frequency Range: 30 cps to 20 kc .

Input Impedance: 500 k olims.
Power Supply: The instrument is ritirely self containel and merates from a 115 volt, $50 / 40$ eycle line.

## TYPE 1660 PHASE SENSITIVE NULL INDIATOR USES

This instrument is userul as a visual null indicator in equal arms bridze measurements. Through the use of a zero meter this mull indicator simplities bridge balancing procedures since the direction of null is directly imbicated. If any bridge is to be used as a production instrument this null detector may be set up as a so indicator and the bridge set up as a limit bridse.

## DESCRIPTION

The instrument consists of a hirh fain stable amplifier, a phase encitive detection circuit and a phase refernee network. Thre filter frequencies are availahe, $60,400,1000$ eycle selecterl ly a front banel switch. lis use of extemal capacitors the filter can be adjusted to other selective frectuencios.

## SPECIFICATIONS

Sensitivity: lun micro-molts mer division of ibffection
Reference Voltage: $1 \cdot 6$ volts.
Input Impedance: 250 k ohms
Maximum Input Voltage: 100 volts.

Power Supply: 11.5 volts, 5o/i0) celes.

## TYPE 1670 DC NULL DETECTOR

USES
This instrument is desipned to pive rurped performance while still maintaining the exect-
 lent sensitivity of a galsanometer. It is extremely useful as a mull indicator givinge instantaneous polarity indication in any tyue of D.C. bridge measurements. It will find barticular application in stran measurement, ferometre, conductivity and insulation westing. flow measurement and null detection.

## DESCRIPTION

The instrument consists of a filter in the innut cireuit, a chopper and a high gain ad amplifier.
The sensitivity of the instrument when not using the fitter is greater than 10 microvolte per divisiun with an input impedance of 1 merolm. The filter when used supreses ang in evele piekup ley mor, than 50 db . The sensitivity when using the filter is rellowell to 100 mieruvolts per division.

## SPECIFICATIONS

Input Impedance: 1 merohm
Null Detector Sensitivity: 10 microvolts per .livision without filter. l00 microvolts throush filter.
Scale: t' $^{\prime \prime}$ zero center.
Power Supply: 115 volté, $50-60$ cycles.
Dimensions: $8 \frac{1}{2} \mathbf{" 1}^{\prime \prime} \times 10^{\prime \prime} \times 11^{\prime \prime}$.

## FREED Test Instruments

## TYPE 1940 INTERSTAGE FILTER

## USES

This filter may be used with the Freed Type $1140-1$ Null Deteetor and Type 1210.1 Sull betector VTVM or similar amplifiers. It can be set to any one of $\bar{i}$ fixed frequencier to reduce noise and harmonics when making bridge measuremems.

## DESCRIPTION

The filters are paraliel resonant circuits. and are desioned in he ued in the plate circuit of the amplitier. 1.C. current through the inductor is limited to 3 ma. Terminals are provided for

## FEATURES

1. Each of it tuned frequencies is quickly availathe
2. Any resonant frepuenes between 50 eps and 20 he faln the obl fained with external capacitors.
3. Sharp anti resonant tuning
4. Can be used directly in plate cirmit

## FREED DECADE CAPACITORS

Freed decade capacitors are high quality capacitors designed for use in wave filters, tuned circuits and equalizers for andio and supersonic frequencies where a rather large variable capacitance is desired. Their stability, accuracy and low dissipation factor make then especially useful during the preliminary design period when capacitance values are determined experimentally.

Each decade is variable from 0 to 10 by use of 11 position selector switch. The losses in the switches and mountings are kept low by the use of special low loss, impregnated switch wafers. A positive detent mechanism allows the switch to be set accurately The accuracy is $\pm 1 \%$ at irequency of 1 kc .

No. 1415 is a $1 \mathrm{mfd} /$ step mylar capacitor. Total capacitance 10 mfd .
No. 1416 is a $0.1 \mathrm{mfd} / \mathrm{step}$ polystyrene capacitor. Total capacitance is 1 mfd .

No. 1417 is a $.01 \mathrm{mfd} /$ step polystyrene capacitor. Total capacitance is 0.1 mfd .

No. 1418 is a . $001 \mathrm{mfd} /$ step polystyrene capacitor. Total capacitance is .01 mfd .

No. 1419 is a $100 \mathrm{mmfd} / \mathrm{step}$ mica capacitor. Total capacitance is .001 mfd .

No. 1250 is a three section decade capacitor. The type 1416,1417 and 1418 are assembled together in a single wooden cabinet to give a total capacity of 1.110 mfd in .001 mfd steps.

No. 1350 is a five section decade capacitor. The type 1415,1416 , 1417 and 1418 are mounted on one panel with a 1000 mmfd precision air variable condenser.

No. 1351 is a six section lecade capacitor. The type 1415, 1416, 1417. 1418 and 1419 are mounted on one panel with a 100 mmfd precision variable condenser. The 100 mmfl may be used singly in which case the stray capacity is less than 10 mmfil or it may be used in conjunction with the other decades by siuply closing a shorting link.

The capacity is continuously variable from 10 mmfd to 11.11 mfd in 100 mmfd steps with $\pm 1 \%$ accuracy.

The maximum voltage that may be applied to these decades is 500 D.C. working volts.

The dissipation factor of the polystyrene units when measured at 1 kc . is less than .0002 . The dissipation factor of the $1 \mathrm{mfd} / \mathrm{step}$ decade (nyylar) is less than . 005.

INDUSTRIAL INSTRUMENTS, INC.

The Model 82 provides extremely wide frequency coverage designed for audio frequency ond rodio-frequency measurements of $A M, F M$ and TV receivers, and for many other ofp'ications.

## STANDARD SIGNAL GENERATOR Model 82 <br> 20 Cycles - 50 Mc .

FREQUENCY RANGE: 20 cycles ta 200 kilacycles in faur ranges. 80 kilacycles ta 50 megacycles in seven ranges, plus ane blank range.
FREQUENCY ACCURACY: Each range is individually calibrated. 20 cycles ta 200 kilacycles, accurate to $\pm 5 \% .80$ kilacycles to 50 megacycles, accurate to $\pm 1 \%$.
OUTPUT VOLTAGE AND IMPEDANCE: 0.50 volts across 7500 ohms from 20 cycles to 200 kilocycles. (The output voltage and impedance in this range can be reduced by an externol ottenuator). 0.1 microvalt to 1 volt across 50 ohms over most of the range fram 80 kilocycles to 50 megocycles.
MODULATION: Continuously voriable $0.50 \%$ from 20 cycles to 20 kilocycles from internal varioble ascillotor or external source.
HARMONIC OUTPUT: Less thon $1 \%$ from 20 cycles to 20 kilocycles; $3 \%$ or less from 20 kilocycles to 50 megacycles. LEAKAGE AND STRAY FIELD: Less thon 1 microvolt from 80 kilocycles to 50 megacycles.
POWER SUPPLY: 117 volts, 60 cycles. 75 watts. DIMENSIONS: $15^{\prime \prime}$ high $\times 19^{\prime \prime}$ wide $\times 12^{\prime \prime}$ deep averall. WEIGHT: 50 paunds.

## STANDARD SIGNAL GENERATORS Model 80 $2 \mathrm{Mc}, 400 \mathrm{Mc}$. $5 \mathrm{Mc},-475 \mathrm{Mc}$.

FREQUENCY RANGE: (Model 80) 2 to 400 megocycles in 6 bands. (Madel $80-R$ ) 5 to 475 megocycles in 6 bands.
FREQUENCY ACCURACY: $\pm 0.5 \%$
OUTPUT ACCURACY: At 0.1 volt, $\pm 10 \%$ from 2 Mc to 200 Mc. From 200 Mc to $400 \mathrm{Mc}(200$ to 475 Mc for Madel $80-\mathrm{R}$ ) at 0.1 volt, $\pm 15 \%$.
OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvalts.
OUTPUT IMPEDANCE: 50 ohms.
MODULATION: Amplitude modulotion is continuously variable from 0 to $30 \%$. Madulation depth is indicoted by a meter on the panel. Internal modulation of 400 or 1000 cycles is ovailoble. Modulation moy also be opplied from an external source. Pulse modulotion moy be opplied to the oscillotor from on externol source through a special connector. LEAKAGE AND STRAY FIELD: Attenuotor leokoge less thon 0.1 microvalt. Power line leokage less than 0.5 microvolt. Stray fields less thon two microvalts.

## PULSE GENERATOR • Model 79B

The Model $79-$ B generotes voltage pulses of variable width and frequency for use with ossocioted equipment such os the Model 80 Standard Signal Generator. FREQUENCY RANGE: 60 to 100,000 pulses per second.
PULSE WIDTH: Continuausly voriable from 0.5 to 40 microseconds.
OUTPUT VOLTAGE: Approximately 150 to 200 volts peok positive with respect to ground.
"SYNC" OUTPUT: 35 valts positive with respect to ground. Disploced by $1 / 2$ seriod from pulse output.
"SYNC" INPUT: MOy be synchronized with os little os 2 valts peok from an externol source.
POWER SUPPLY: 117 volts, 60 cycles. 115 watts.
DIMENSIONS: $10-13 / 16^{\prime \prime}$ high $\times 14 \frac{1}{2 \prime}$ " wide $\times 11-9 / 16^{\prime \prime}$ deep, overall.
WEIGHT: Approximately 31 pounds.

## MEASUREMENTS CORPORATION

BOONTON • NEW JERSEY

STANDARD SIGNAL GENERATOR • Model 84 - 300 Mc. $=1000$ Mc.

FREQUENCY RANGE: 300 to 1000 megacycles in ane band;
 individually calibrated direct reading dial.
FREQUENCY ACCURACY: $\pm 0.5 \%$.
OUTPUT VOLTAGE: Continuously variable from 0.1 ta 100,000 microvalts.
OUTPUT IMPEDANCE: 50 ohms.
MODULATION: 0 to $30 \%$ within $\pm 20 \%$ as determined by DC meter. Internal sine-wave ascillatar; chaice of 400, 1000 , or 2500 cycles is pravided. External modulation up ta 30 kilocycles may be applied.
PULSE FREQUENCY: 60 to 100 Kc in three ranges, 60.1000 , $600-10,000$ and $6000-100,000$ pulses per secand.
POWER SUPPLY: 117 volls, 50 to 60 cycles.
DIMENSIONS: $13^{\prime \prime}$ high $\times 26^{\prime \prime}$ wide $\times 12 \frac{1 / g^{\prime \prime}}{}$ deep, overall. WEIGHT: Approximately 135 pounds, including external line voltage regulator.

## U.H.F.-TV STANDARD SIGNAL GENERATOR • Model 84-TV • 300 Mc. - 1000 Mc.

leakage: Negligible.
DIMENS:ONS: $115 \%^{\prime \prime}$ high $\times 19 \frac{8^{\prime \prime}}{}$ wide $\times 103 / 4^{\prime \prime}$ deep, overall.
WEIGHT: Approxirately 40 pounds.

Mocel 84-TV Standard Signal Generatar has been developed to meet the need far a reliable signcl saurce for the UHF Television band. Research requirement: as well as production lesting needs are met with accuracy, stability and ease of aperation.
FREQUENCY DATA: 300 ta 1000 megacycles, in one band. The individually calibrated dial reads directly in megacycles, and is accurate to $\pm 0.5 \%$.
MOJULAFION: Cantinuously varioble from zera to $30 \%$ from an internal 1000-cycle oscillator. Provision is made far applying external modulation from 50 to 20,000 cycles. Approximately 5 volts r.m.s. across 100,000 ohms are recuirea for $30 \%$ modulation.
OUPPUT VOLTAGE AND IMPEDANCE: The corrier output voltage is continu. ously variable from 0.1 microvolt to 1.0 volt across 50 ahms. The full 1 valt outfut, however, may not be possible above 900 megacycles. Output imped. ance, as seen at the panel connector, is approximately 53 ohms resistive.
POWER SUPPLY: Optimum performarice is obtained from a 117 volts, 60 cycle pawer supply. The power consumption is 120 watts. An external step-dawn transfarmer for 220 volt, 50 cycle operation is available on special order.

## STANDARD SIGNAL GENERATDR • Model 65-B • 75 Kc. - 30 Mc.

FREQUENCY RANGE: 75 kilocycles to 30 megacycles in 6 push button
 ranges.
FREQUENCY CALIBRATION: Individually calibraled direct reading dial, ior each range. Accurate to $\pm 0.5 \%$.
OUTPUT VOLTAGE: Continuously variable from 0.1 microvolt to 2.2 volts. OL'TPUT IMPEDANCE: 5 ohms to 0.2 volt, rising to 15 ohms at 2.2 volts. MODULATION: Continuously variable fram 0 to $100 \%$; indicated directly by a meter on the panel. Modulation may be obtained either from an internal source of 400 or 1000 cycles ar from an external source.
EN•ELOPE DISTORTION: $4 \%$ at $100 \%$ modulation at 1 megacycle; $8 \%$ at $100 \%$ modulation at 15 Mc ; $1 \%$ at $30 \%$ modulation.
LEAKAGE: Less than 0.1 micravalt leakage with attenuator set for 0 cutput.
POWER SUPPLY: 117 volts, 60 cycles. 115 watts.
DIMENSIONS: $117^{\prime \prime}$ high $\times 20-5 / 16^{\prime \prime}$ long $\times 101 / 2^{\prime \prime}$ deep, overall. WEIGHT: Approximately 55 pounds.

The Madel $65-8$ provides accurate test signals for the measurement of the sensitivity, selectivity, overload, distortion, noise and
stage gain charazteristics. In design and operatian, it mests the exacting requirements for laboratory use and production testing.

## MEASUREMENTS CORPORATION

BOONTON . NEW JERSEY

## SQUARE WAVE GENERATOR • Model 71

POWER SUPPLY: 117 volts, $50-60$ eycles. 100 watts. DIMENSIONS: $73 / \mathrm{B}^{\prime \prime}$ high $\times 15^{\prime \prime}$ wide $\times 878^{\prime \prime}$ deep, overall. WEIGHT: Approximately 20 pounds.

Recommended for television testing and many different applications in developing AM, FM and TV equipment where square-wave analysis is of great importance.

FREQUENCY RANGE: Continuously variable from 6 to 100,000 cycles per second.
WAVE SHAPE: Rise time less than 0.2 microseconds with opproximotely $5 \%$ overshoot of 75 peak volts autpul. At 5 volts or less rise time is less thon 0.1 microsecond.
OUTPUT VOLTAGE: Step ottenuotor giving 75, 50, 25, $15,10,5$ peak volts fixed and 0 to 2.5 volts continuously varioble.
SYNCHRONIZING OUTPUT: 25 volts peok.
R. F. MODULATOR: 5 volts maximum carrier input. Translation gain is approximately 0.1 . Oufput impedance is 600 ohms.

FM STANDARD SIGNAL GENERATOR • Model 78-FM • 86 Mc. - 108 Mc.

FREQUENCY RANGE: 86 to 108 megocycles, individually colibrated dial. Accurote tc $\pm 0.5 \%$.
OUTPUT VOLTAGE: Continuously variable from 1 to 100,000 microvalis. LEAKAGE: Less than 1 microvolt.
MODULATION: 400 and 8200 cycle internol audio oscillator. Can be modulated from an external source providing 7 volts across 5000 ohms. FIDELITY: Flat within two db from DC to 15,000 cycles. Distortion is less than $1 \%$ at 75 kilocycles deviation. Transient response is excellent. POWER SUPPLY: 117 volts, 50 to 60 cycles. 36 woths.
DIMENSIONS: $103 / 4^{\prime \prime}$ high $\times 14 \frac{1}{4}$ " wide $\times 75 / 8^{\prime \prime}$ deep, overall.
WEIGHT: Approximotely 25 pounds.

## I.F. CONVERTER • Model M-275

For use with the Model 78-FM Standard Signal Generator to provide carrier output at the IF frequencies used in FM and Television receivers.

FREQUENCIES: 4.5, 10.7, 21.7 Mc. Provision for one extro frequency. FREQUENCY ACCURACY: $\pm 0.5 \%$

OUTPUT VOLTAGE: 10 microvolts to 1.0 v . when used with Model 78-FM. BAND WIDTH: $\pm 250 \mathrm{Kc}$. from center frequency.

AMPLITUDE MODULATION: Up to opproximotely $80 \%$, combined with or exclusive of FM. There is negligible spurious FM due to $A M$. The envelope distortion is less than $10 \%$ at $80 \%$ modulation.
POWER SUPPLY: 117 volts, 50 to 60 cycles, 45 wotts.
DIMENSIONS: $10^{\prime \prime}$ high $\times 13^{\prime \prime}$ wide $\times 7^{\prime \prime}$ deep, overall.
WEIGHT: 15 pounds.

V.H.F. RADIO NOISE and FIELE STRENGTH METER • Model 58

POWER SUPPLY: Built-in regulated dual power supply for operation from either 117 valts $A C$ ( 55 watts) ar 6 valts DC.

This versatile, portable instrument is useful in measuring signal-to-noise ratios, noise levels and for field strength surveys on TV, FM and AM transmitfers.
FREQUENCY RANGE: 15 ta 150 megacycles in five bands -dials directly calibrated in megacycles ta an accuracy af $\pm 2 \%$.
INPUT VOLTAGE RANGE: 1 ta 100,000 micravalts induced in antenna. 1 ta 100 micravalts an semi-lagarithmic autput meter, balanced resistance aftenuatar with ratias of 10,100 and 1000 ahead of all fubes.
GAIN STANDARDIZATION: Internal "shat naise" diade pravides calibratian standard. Special dial eliminates need far charts.
CIRCUIT: Superheteradyne circuit with funed RF amplifier reduces image respanse.
BAND WIDTH: 150 kilacycles @ 2X dawn.
DIMENSIONS: $9^{\prime \prime}$ high $\times 16^{\prime \prime}$ wide $\times 11^{\prime \prime}$ deep. averall WEIGHT: 35 paunds.

VACUUM TUBE YOLTMETER • Model 62

RANGE: Push bultan selectian of 5 ranges-1, 3, 10,30 and 100 volts full scale $A C$ or DC.
ACCURACY: $\pm 2 \%$ of fulf scale an each range, bath $D C$ and sine-wave $A C$ of line valfage af 117 v .

INDICATION: Linear far DC and calibrated ta indicate RMS values of a sine-wave or $70.7 \%$ af the peak value of a complex wave an AC.
FREQUENCY ERROR: Less than $10 \%$ fram 30 cycles to aver 150 megacycles. Resonant frequency af the probe with input terminals sharted is 300 megacycles.
INPUT IMPEDANCE: The input capacitance is appraximately 7 mmf . The input resistance is a function of freavetcy.
POWER SUPPLY: 117 valts, 60 cycles. 24 watts.
DIMENSIONS: $7-3 / 16^{\prime \prime}$ high $\times 43 / 4^{\prime \prime}$ wide $\times 9-3 / 16^{\prime \prime}$ deep, overall.
WEIGHT: Approximately $\&$ pounds.

## PEAK-TO-PEAK VOLTMETER • Model 67

Cesigned for audio and vides level measurements and the measurement of audio electrical interference. The Model 67 is ideally suited for uses where the indication of true peak values is required.
VOLTAGE RANGE: 5 ranges; .0005 to 300 valts peak-fa-peak. (Approximately . 0002 to 100 r.m.s. volts).

SEMI-LOGARITHMIC SCALES: Hard calibrated: 0 ta 30 peak-to-peak and 0 to 10 i.m.s. volts.
FREQUENCY RANGE: 5 ia 100,0CO sine-wave cycles per secand.
INPUT IMPEDANCE: 1 megohm stented by 30 mmfd.
ACCURACY: Far sine waves $\pm 5 \%$ from 5 to 100,000 cps.

STABILITY: Less than $2 \%$ error with line varia. tions from 110 volts to 120 volts.

RECORDER TERMINALS: Self-shorting type for external ane milliampere graphic recorder or milliammeter.
POWER SUPPLY: 117 volts; 50.60 sycles, 35 watts.
DIMENSIONS: $71 / 2^{\prime \prime}$ high $\times 7^{\prime \prime}$ wide $\times 93 / 8^{\prime \prime}$ deep, overall.
WEIGHT: 10 lbs .

TELEVISION SIGNAL GENERATOR • Model 90

The first commercial wide-band, wide-range Signal Generator to be developed to meet the exacting standards of high definition television use.

## CARRIER FREQUENCY:

RANGE: 20 to 250 megacycles, in eight ranges.
ACCURACY: Built-in Crystal Frequency Standard permits setting to $.01 \%$ Dial scale may be set to $0.1 \%$.
STABILITY: Warm-up drift less than $.05 \%$. Less than $.01 \%$ after warm-up LEAKAGE: Less than 10 microvolts.

MODULATION: Continuously variable from zero to $100 \%$
ENVELOPE: Sinusoidal, or composite television. Bandwidth to 3 db is 4 Mc . Rise time from $10 \%$ to $90 \%$ modulation 0.15 microsecond. Overshoot less than $5 \%$. Slope less than $5 \%$ on 60 -cycle square wave
INPUT IMPEDANCE: 75 ohms $\pm 10 \%$ (RMA Standard).
INPUT LEVEL: 1.5 volts peak-to-peak minimum level for $100 \%$ modulation. Black negative polarity.
MODULATION PERCENTAGE: $15 \%$ to $110 \%$; within $\pm 2 \%$.

## OUTPUT:

LEVEL: Continuously variable from 0.3 microvalt to 0.1 volt balanced to ground (measured at $100 \%$ modulation level).
IMPEDANCE: (a) 107 ohms line-to-line (balanced).
(b) 53.5 ohms line to ground (unbalanced).
(c) Suitable pads may be employed to alter these impedances.

## DIMENSIONS:

OVERALL: Height- $60^{\prime \prime}$; Width— $273 / 4^{\prime \prime}$; Depth— $25^{\prime \prime}$
WEIGHT: Model 90-302 pounds. External Voltage Regulator: 92 pounds. POWER SUPPLY: With regulator, 117 volts, 60 cycles. 825 V.A.; without regulator, 117 volts, 60 cycles. 600 V.A.

## INTERMODULATION METER • Model 3I

FEATURES:

- Compact, completely self-contained unit withTest Signal Generator, Analyzer, Volimeter, Power Supply
- Direct-reading meter indicates percentage of intermodulation.
- Accurate metering of input voltage to analyzer.
- Easy to operate.
- Quick, accurate measurements.
- May be mounted in standard 19" relay rack. (7" relay rack panel space).
- Connection for oscilloscope.

USES:

- Insuring peak performance from all audio systems.
- Correct adjustment and maintenance of $A M$ and FM receivers and tronsmitters.
- Checking linearity of film and dise recordings and reproduc tions.
- Checking phonograph pick-ups and recording styli.
- Checking record matrices.
- Adjusting bias in tape recordings.
- for quality control of all oudio components and equipment.

ANALYZER:
INPUT VOLTAGE: Full scale ranges of 3,10 and 30 volts RMS. less than one volt of mixed signal is sufficient for operation, INPUT IMPEDANCE: Greater than 400 K ohms.
INTERMODULATION: Full sca'e ranges of 3,10 and $30 \%$. ACCURACY: $\pm 10 \%$ of full scale.
POWER SUPPLY: 117 volts, 60 cycles. 30 watts. DIMENSIONS: $71_{4}^{\prime \prime}$ high $\times 19^{\prime \prime}$ wide $\times 31 / 2^{\prime \prime}$ deep.
bE:GHT: 16 pounds.

## SPECIFICATIONS:

## GENERATOR:

LOW FREQUENCY: 60 cycles.
HIGH FREQUENCY: 3000 cycles.
LF/HF VOLTAGE RATIO: Fixed 4/1.
OUTPUT VOLTAGE: 10 v . max. into high impedance or +5 DBM matched to 600 ohms.
OUTPUT IMPEDANCE: 2000 ohms.
RESIDUAL INTERMODULATION: $0.2 \%$.

## MEGACYCLE METER • Model 59

This versatile instrument consists of a compact oscillator unit, calibrated for direct reading from 2.2 Mc. to 400 Mc ., connected by a small flexible cord to the power supply.

As a "grid-dip" meter the Model 59 has many uses such as for resonating all the tuned circuits of a transmitter or receiver, including oscillator and antenno, with the power off, and many other applications.

The Megacycle Meter will prove an indispensable instrument for anyone engaged in electronic work-engineer, serviceman, amateur or experimenter.

FREQUENCY RANGE: 2.2 megacycles to 400 megacycles with seven plug-in cails.
FREQUENCY ACCURACY: Individually calibrated dial, direct reading ta an accuracy of $\pm 2 \%$.

OUTPUT: CW ar MCW. Madulation fixed at appraximately $30 \%, 120$ cycles.
DIMENSIONS: Pawer unit: $55 / 8^{\prime \prime}$ wide $\times 7-13 / 16^{\prime \prime}$ high $\times 83 / 8^{\prime \prime}$ deep, averall.
Weight: appraximately $61 / 2$ paunds.
Osciliatar unit: $33 / 4^{\prime \prime}$ diameter, $2^{\prime \prime}$ deep.
Weight: appraximately 1 paund.
POWER SUPPLY: 117 valts, 60 cycles, 20 watts.

## U.H.F. MEGAGYCLE METER • Model 59 UHF

The Modei 59 UHF Megacycle Meter is speciolly designed to cover the UHF television band plus the many mobile and fixed communication services through its wide frequency coverage of 430 to 940 megacycles in a single range. It incorporates all of the quality features and the excellent performance of the popular Model 59 plus a unique design resulting in a maximum of convenience in use. It is on indispensable instrument for electronic engineers, researchers, experimenters and radio servicemen. FREQUENCY RANGE: 430-940 Mc. in a single band. FREQUENCY ACCURACY: $\pm 2 \%$ (individually calibrated). OUTPUT: CW ar 120 -cycle madulatian. POWER SUPPLY: 117 valts, 60 cycles. 30 watts.
DIMENSIONS: Oscillatar Unit: $4 \frac{5}{6} 8^{\prime \prime} \times 21 / 2^{\prime \prime}$.
Pawer Unit: $5 \frac{5}{8} 8^{\prime \prime}$ wide $\times 7-13 / 16^{\prime \prime}$ high $\times 83 / 8^{\prime \prime}$ deep, averall.

GRYSTALS CALIBRATORS

## - Model III .25 to 1000 Mc .

and Model III-B . 1 to 1000 Mc .

These instruments have been designed as dualpurpase calibratars. They nat anly pravide a test signal of crystal-cantralled frequency, but alsa have a self-cantained receiver af 2 microwalts sensitivity. A new circuit arrangement with quartz

FREQUENCY ACCURACY: $0.002 \%$.
POWER SUPPLY: 117 valts, 60 cycles. 18 watts.
crystal cantral ultilizes the crass-madulation praducts af three separate oscillatars. The fundamental frequencies of Madel 111 are .25, 1.0 and 10 megacycles, while thase of the Model 111-B are .1. 1 and 10 megacycles.

DIMENSIONS: $6^{\prime \prime}$ wide, $95 / 8^{\prime \prime}$ kigh, $51 / 8^{\prime \prime}$ deep, overall.
WEIGHT: 4 paunds.

> Featuring small sixe, light woight and austanding performance the HIGH, WIDE and TWIN POCKETSCOPES have become the "triple threof" of the ascillascope field. Their incomporable versatility, raliability and occuracy have skyrocketed this team of truly portable insiruments inta unparalleled demand. Each ascilloscope feotures DC coupled ampliflers in both verlical ond harizontal channels.

The S-14-A HI.GAIN POCKET SCOPE provides the optimum in oscilloscope flexibility for analysis of low-level electrical impulses. Extremely light weight ( $123 / 4 \mathrm{lbs}$.), compact in size ( $12 \times 53 / 1 \times 7$ in.). dependable and accurate in performance. Vertical and horizontal channels: 10 mv rms/inch with response within $2 D B$ from $D C$ to 200 KC and pulse rise of $1.8 \mu \mathrm{~s}$ non-frequency discriminating attenuators and gain controls with internal calibration of trace amplitude...repetitive or trigger time base with linearization from $1 / 2$ cycle to 50 KC with $\pm$ sync or trigger.

## RAYONIC CATHODE RAY TUBES BY WATERMAN

*Deffection of wolts per inch. **Light output of an element of a raster line (one mm long and not exceeding . 65 mm in uridth) in microhsmeas.

Write for your complimentary copy of "POCKETSCOOP" - Official Waterman publicatian.

The PULSESCOPES are calhode ray tube oscillascopts that portray the atiributes of The pulse: shape, amplitude, dueation and time displacement. All PULSESCOPES have Internally generated markers with the basic difference thaf in the SAR PULSESCOPE the markers initiote the sweep while in the others the sweep starts the markers.

BROAD The S-6.A BROAD BAND Scope is a in performance, POCKETSCOPE in size. The instrument measures DC as well as AC signals. Unique DC calibration methods permit rapid measurements of either positive or negative, AC or DC signals. Vertical amplifier sensitivity of $0.2 v \mathrm{rms} / \mathrm{inch}$, and response to 5 mc within $3 \mathrm{DB} .$. pulse rise time of $0.1 \mu \mathrm{~s}$. . . internal markers from 1 to $1000 \mu \mathrm{~s}$. . . repetitive or trigger sweep from 5 cycles to 500 KC with A. sweep expansion . . . sweep, marker and DC *alibrating voltage a a ailable externally. Size $81 / 2 \times 63$ $\because 1: 3^{3} \mathrm{in}$. Weight 22 lbs. Operates from 50 to 400 cycles at 115 volts AC.

The S-5-A LAB PULSESCOPE is a JANized (Gov't Model No. OS-26) portable, AC, wide band-pass, laboratory o:scilloscope ideal for pulse as well as gensral purpose measurements. Internal delay of 0.55 . s permits observation of pulse leading edge. Intludes precision amplitude calibration, 19 X sweep expansion, ers, internal tigger generators and many other fratures. Video amplifier 0.1v p to p/inch . . . pulse rise time of $.035 \mu \mathrm{~s}$ or response to 11 mc . 1.25 to $125,100 \mu_{\mathrm{s}}$ triggered or repetitive swe p . . . internally generated markers from 0.2 to $500 \mu \mathrm{~S} \ldots$ trigger generator from 50 to 5000 gering. Operates from 50 to 400 cycles at 115 volts AC.

The S-4-C SAR PULSESCOPE is a JANized (Gov't Model No. OS-4) portable instrument ( 31.5 lbs .) for precision pulse measurements for radar, TV and all electronic measurements. Portrays all attributes of the pulse... internad crystal controlled markers of 10 and $50 \mu \mathrm{~s}$ available for self-calibration... in R operation a small segment of the A sweep is expandable for detailed observation with a direct-reading calibrated dial accu:ate to $0.1 \%$. Video amplifier band-pass up to 11 mc . . . optional video delay 0.55 $\mu \mathrm{s}$. . . pulse rise and fall time better than $0.07 \mu \mathrm{~s}$. . . R pedestal (sweep) 2.4 to $24 \mu \mathrm{~s}$. . vider sensitivity of 0.5 v . p to p/inch. Easily convertible from $\mu \mathrm{s}$ to yards. Operates from 50 to 400 cycles at 115 volts AC.

Because the panel is only $7^{\prime \prime}$ high and fits any standard rack, the S-12-B RAKSCOPE admirably fills the need for a small oscilloscope of wide versatility. With all the features of the S-11.A POCKETSCOPE, the RAKSCOPE is JANized (Gov't Model No. OS-11), and has many additional advantages; the sweep, from 5 cycles to 50 KC , is either reperitive or trig. gered..vertical and horizental amplifiers are 50 mv rms/inch with bandpass from 0 to 200 KC ... sf ecial phasing circuitry for frequency comparison.

## SPECIALISTS in Sub-Miniature Panel Meters

FIRST in U.S. to manufacture $1^{\prime \prime}$ diameter meter. FIRST to produce $l^{\prime \prime}$ and $11 / 2^{\prime \prime}$ illuminated meters.

F|RST to produce $1 \frac{1}{2^{\prime \prime}}$ self-contained DB and VU meters.
F|RST to produce Miniature Side Indicators.

## SIDEINDICATORS

MODEL 1145 single horizontal mounting

- Greoter readability - Smaller Panel Space
- Horizontal or vertical mounting, singly or with scales together.
TWO SIZES AVAILABLE:
Model 1120 Scole length $1.3^{\prime \prime}$ Anodized aluminum cose.
Model 1145 Scale length $2.75^{\prime \prime}$
Plastic case. Front external zero adjuster.

## MINIATURE MULTITESTER

Tests resistances and voltages. Sensitivity: 8000 ohms per volt on a.e ranges; 10,000 ohms per volt on de ranges. Accurate to $\pm 2 \%$ of full scale deflection on d.c, $\pm 5 \%$ on a.c.

ENGINEERING DATA SHEETS COMPLETELY DESCRIBING THESE INSTRUMENTS ARE AVAILABLE. WRITE FOR YOUR COPIES TODAY.

## The Dual Marker Injector SAVES TIME

... in alignment jobs
. . . in adjusting broad-band amplifiers
. . . in critical marking in color and monochrome TV
... does not disturb circuits being adjusted
. . . offers more accuracy

SCALA DUAL MARKER INJECTOR (SMI-53X) (patent applied for)Nothing else io buy-if works with your fresent marker generator. sweep generator, and oscilloscope.
Made by Scala, developers of the original bypass marker injector system.
The simplest, most legible, and most economical marker injectorand it requires less than 2,000 microvolts of signal!

THE SECOND MARKER MAKES EVERYTHING SIMPLER-
Wioh two marks on the response curve, you don't have to re-set the marker or the sweep-generator frequericy or attenuator.
Now you can realign with accuracy, simplecity, and speed that dual mark techniques make possible on manufacturers assembly lines.
Receiver characteristics don't affect the marker size, so there no stage-by-stage reconnecting.

The marker generator can be calibrated against the Scala Dual Marker Injector's crystal oscillator without interrupting alignmerit procedure.
FOR LABORATORIES, COLOR TV, AND RADAR, TOO-
The extremely critical frequencies used in color $T V$ chassis and radar equipment are no problem for the man with a Dual Marker Iniector. You simply replace the easily accessible crystal on the front panel with one of another trequency ( 1 to 4.5 MC ) and you are thoroughly equipped for the iob. No worries about accuracy, marker size, or disturbing bAG5 circuit being tested.
SPECIFICATIONS-
Two 6AG5 high-frequency isclating mixers; selecłed diode detector: one 6SL7 xtal osc-amp.; one GSN7 video and marker mixer; one $5 Y 3$ rectifier: one 4.5 MC crystal ( $\pm .02 \%$ ). Useful to 250 megacycles. Shipping weight: 13 lbs. At leading jobbers, $\$ 79.50$.

Your scope sees only what your probe buy probes look at the construction
feeds it-so, when you cations. Then you will select Scala probes.

BZ-I: SIGNAL TRACING PROBE for individual check of IF stages, calibrating marker generatcr, checking output of sweep generator, etc. Low C . Hi-Z demodulator range, non-resonant to 225 mc usefut to 1000 mc . Dealer net. less cable. $\$ 8.75$; with cable, $\$ 9.75$.

8Z-2: LOW CAPACITY PROAE permits tacing waveforms through Hi-Z circuits without excessive distortion from circuit loading. Cuts effective input capacity of scopt, attenuation 10 to 1. Dealer net, less cable, $\$ 8.75$; with cable, $\$ 9.75$.
8Z-3: 100:1 VOLTAGE DIVIDER PROBE for checking horizontal sweep waveforms and voltages at plates of horizontal output on damper tubes. Does not distort waveform up to 10,000 volts feak to peak. 100.1 capacitance divider. Dealer net, less cable, $\$ 8.75$ with cable, \$9.75.
BZ.4: VOLTAGE DOUBLER PROBE provijes virtually double deflection on scope screen compared to half-wave probes. Dual low C. Hi-Z demodulators useful to 150 mc . Dealer net, less cable, \$9.75; with cable. $\$ 10.75$.
8Z-5: 2-IN-ONE-PROBE. (ILLUSTRATED) As a direct probe, provides
a convenient test facility in general troubte-shooting work. By mereh, flipping a switch you have an alignment probe that provides the primum isolation and titial haracteristics so ent work Calibrated removable low lass coaxial cable: tumbler actions slide switch; non. inductive isolating ress tor: removable self-holding Klipzon tip. Dealer net less cable \$5.90; with cable, \$6.90.
8Z-123: Consists of SCALA $B Z-1, \quad B Z-2$, and $B Z-3$ probes complete with one coaxial cable, instructions, and removable Klipzon tip which can be fastened to any Scala probe to make a lirm connection to test point. Dealer net, \$27.45.
8Z-1235: The equivalent of five probes: $B Z-1, B Z-2, B Z-3$, and BZ.5. This kit includes cable, instructions, and Klipzon tip adaptable to make firm connection text point for any Scala probe. Dealer net, \$32.B5.
82.C: Spare cable for Scala probes. Dealer net. \$1.00.

## HIGH POWER DUMMY LOADS

## I watt to 5000 watts - Coaxial \& Wave Guide

The waveguide loads use walls that are poor conductors which means a more efficient removal of the heat generated in the load. and less tendency toward pulsepower breakdown (arcingl as may occur in design which use filling material in the waveguide.
New construction shortens path hetween inmer surface of lossy guide to heat conducting material. Hot spots have been eliminated.

The material used in these dummy loads is extremely durable, provides a strong adhesive bond to the metal walls and handles the thermal shock efliciently

## RF POWER AND , .inme £QUIPMENT

MICROMATCH is the registered trade name which identifies a complete line of M. C. Jones Electronics Co., Inc. R. F. Power and VSWR measuring instruments.

These instruments contain a patented circuit designed to produce an output essentially independent of frequency. They cover the frequency range of 0.5 to 4000 mcs. and power levels of 10 milliwatts to 120 kilowatts.

The R. F. Power and VSWR instruments are rugged field and laboratory type complete measuring equipment, consisting of both coupler and indicating units.

The DC and RF output coupler units only are sold principally to manufacturers who incorporate these units directly into government or commercial type transmitters.

Because they are made in quantity to the highest government and commercial standards, MICROMATCH instruments combine the highest quality with extremely low cost.

## WHITE-DOT and LINEARITY GENERATOR

 -COLOR CONVERGENCE A must on every color service coll gives lorge and small white dots.BLACK \& WHITE - Lineority \& pieture size adjustments. Model $160 \$ 7995$

## SWEEP CIRCUIT ANALYZER

NEW! The complete sweop circuif tester-takes the guesswork out of sweep circuit troebleshooting.

- TWO INSTRUMENTS IN ONE

1. Horizontal and vertical sawtooth for signal substitution. $\ 15 \mathrm{KC}$ and 60 CP5.)
2. Complete flyback and yoke iesters.

## COMPATIBLE FIELD STRENGTH METER

## VHF and UHF

NEW! Here is the FSM that wan't be made obsolete by color TV I

For good antenna installations (color or b. wh.) YOU NEED:

1. Mierovalt tosting
2. Eandwidth testing

## FEATURES:

- Tests for colar performance on antenna installations.
- Tests for bandwidth for better bl. \& wh. pictures.
- Reads microvalts directly an 5 scales.
- Channels 2-13; extre coils available for UHF channels.

Model $150 \quad \$ 4995$ PATENT PENDING

## RAINBOW GENERATOR

This Color Pattern Generator produces New Linear Phase Sweep for faster color TV servicing.

## - APPLICATIONS:

- All chroma circuit tests.
- Color demod. phase alignment.
- Color gain adjustments.
- Matrix test and alignment.
- 3.58 me traps and coils.

## FLYBACK and YOKE TESTER

NEW! Sensitive circuit checks one furn shorts in yokes as well as xfmrs.

- Oscillating nean indicater more sen* silive thon a meter.
- Advanced design also tests color yokes and xfmrs.
- Saves fime with fast test of -
- Flyback transformers
- Deflection yokes
- Bypass and electrolytic condensarz

Continuity of coils, ximrs

Model 810

## COMPATIBLE CRYSTAL CALIBRATOR

NEW! Crystal controlled generator and crystal tester
FOR:
$\rightarrow$ Color and bl. wh. servicing

- Labs and factories
- Amateurs and experimenters

FEATURES:

- Accurate 3.579545 MC color sub. carrier standard, factory colibrafed (erystal supplied).
- Three external crystals* and a crys. tol switch permit quick selection of precise frequencies.
APPLICATIONS:
- 3.579545MC color oscillator alignment.
- Crystal tester.
- RF and IF marker and calibrator.*
- Color TV-3.58MC generator.
- Microsecond time marker for scopes.*

Model 120

## TRANSPARENT SYMBOL STAMPS

 You Can Stamp Symbols in Jwo Seconds!

Makes your blueprints and drawings neater and more uniforn. Simply ink the stamp and make your impression. Stamps are crystal clear and easily lined up by looking right through them. Built in "CROSS HAIRS" allow pin point positioning. Not to be confused with immitations as these are made on expensive master dies which are very deeply sunk in and result in stamps with razor sharp impressions and anti-clogging qualities. Outlasts rubber stamps many times because Vinylite resists abrasion and is more resilient. Unaffected by gasoline, benzine and many acids and alklies. Stamps may be purchased separately at one dollar each or in complete sets.
each stamp is made like a fine gem. all edges are polished and unit is crystal clear.

GOVERNMENT SE.
RIES SET. Widely used by both government and industry. Consists of 32 selecied symbols as shown. All are strietly in accordance with standard apecifications.
l'rice $\$ 25.00$ Set of se symbols

STAMP PADS AND INK. The above stamps will work fine on most pads. We have available a special metal element pad that results in rery sharp impressions. The metal element is pourous bronze. Ink never dries out in the pad, yet dries instantly on paper suriaces. Available in RED or BLACK.
$\$ 2.50 \mathrm{EACH}$

# BERKSHIRE 2 <br>  NEW HAMPSHIRE 

These transformers are available at consid. erable savings in a sample package containing one of each type, at only $\$ 18.7 .5$ f.o.b. Greenville, N. H. Postage prepaid if remittance accompanies order. Additional details and specifications on request.

## BERKSHIRE LABMARKER

This compact, self-contained unit converts the sinusoidal output of an oscillator into sharp pulses which may be used as vertical markers on a crt display. or as blanking or intensifying pulses. Pulse frequency is the same as that of the primary oscillator, with a lower limit of 25 cycles per second and an upper limit of one megacycle per second. Input terminals are banana plugs, for quick insertion into standard oscillator jacks. Output binding posts accept banana plugs, spade lugs, or plain wire leads. Overall length is $51 / 2^{\prime \prime}$ dia. $11 / 2^{\prime \prime}\left(13 / 4^{\prime \prime}\right.$ for Models l-U and l-Ul).

## BERKSHIRELABTRANS PULSETRANSFORMERS

These miniature pulse transformers combine compactness, convenience, and versatility. Designed for use in the microsecond and fractional-microsecond range, in equipment where space must be saved at no sacrifice in quality, they are provided with standard octal bases, for quick interchangeability in electronic assemblies. Height is only l.l inch above chassis, diameter 1.37 inch.

Your own three- or four-terminal networks can be made into convenient plug-in units by using Berkshire LABCASES. Useful for housing wave filters, wave-shaping circuits, and other standard or special circuits, the resulting plug.in units can easily be added to or removed from experimental set-ups for comparison purposes. The input terminals of one unit may be plugged into the output terminals of another, for cascade or tandem circuit arrangements. The cylindrical aluminum housing is $51 / 2$ inches long including terminals, and $11 / 2$ inches in diameter. Input terminals are banana-type, with standard $3 / 4$ inch spacing. Output binding posts accept banana plugs, spade lugs, or plain wire leads.
Model 19-S for four-terminal networks $\$ 4.00$
Model 19-G for three-treminal networks $\$ 3.50$

## BERKSHIRE LABSTROBE

The Model 18 LABSTROBE gives you a convenient means for strohoscopic observation of moving objects, such as motors, cyclic machinery, or phonograph turntables. The instrument plugs into any 60 -cycle 115 -volt outlet. and delivers 100 -microsecond flashes at a repetition rate of 60 per second. The aluminized reflector produces maximum light output from a standard long-life neon bulb. Six-foot cord and chromed metal case the size of an ordinary flashlight. Price $\$ 9.95$ f.o.b. Greenville, N.II. Phonostrobe disks, for use with the LABSTROBE in checking speed of turntables at 73,45 , and $33-1 / 3 \mathrm{RPM}$, are also available at 75 c each.

Order all Berkshire products from your distributor, who hos them in stock, ar con get them.

Tests all types receiving tubes, low power transmitting fube ectifiers, thyratrons. voltage regulator tubes. eve tubes, sub miniature aeorn, ballast tubers and wilot lambs. Alsu cheres the new series filament tubes.

## NEW MUTUAL CONDUCTANCE TUBE TESTER

Here is Proportional Mutual Conductance tube testing by a new patented circuit-offering advantages hitherto unavailable to the service trade. The right Tube Tester for TV to the Gurve for measuring in Micromhos the tube characteristics. Diodes transistors and low power thyratrons are tested on the GOOD.?-13AD scale.

This new tester handles the most perplexing tube testing problems in many fields-Radio Servicing, Industrial Production, Laboratory Testing, Theatre and P.A. Eguipment, Communications, etc. Patented circuit for Proportional Mutual Conductance tube testinf employs acturl simnal oscillator (4KC) for rid simmal. Thms, hum and ripple, and tubes with open grids present no problem, and cannot give fase readings. Signal component of coutput is picked off and measured by the specially designed instrument circuit. Tests all types of receiving tubes. low power transmitting tubes, rectifiers, thyratrons, voltage regulator tuhes, eye tubes, subminiature, acorn, ballast tubes and pilot lamps. Continuity test circuit also may be used to check electrical appliances for shorts or open circuita. Flexhle threc-nosition lever switches for complete coverage of both present and future tube connections. Only three positions mean no guess work on settings. Speed and ease of operation marks use of the tester. $0-10 \mathrm{ACV}$ (variable) available for testing low voltage tubes Also five other voltages available (10, 30, 70 . 100 and 250). Full range filament voltare settinge provides complete and accurate filament or heater voltage at tube base connections 63 $1.4,2.0,2.35,2.5,3.15,4.2,4)^{\circ}$ 6, 19.6, 25,3250 70, and 117 volt Instrument is Model 420 " long seale knife edge minter for eas readrhility adiusted to 100 microamperes at 250 millivolts for good temperature compensation. ## MODEL 3441 TV-FM OSCILLOSCOPE

A mopular 5" Oscilloscope for Radio. TV $1 \mathrm{~B} / \mathrm{W}$ and Color) and Indu.trial Testing. embodying among other advance features the following:

- Ideal for Color TV-10 M.V. sensitivity . . Wide frequency response for color TV servicing . . . 4.5 M.C. band width . . . Peak-to-Peak Valtmeter.
- Provision for changing polarity-wave form shows in ecnventional manner.
- Calibration Meter is incluhled-to measure voltage of complex wave forms in IV receivers.
VERTICAL AMPLIFIER-Response usable to 9 M.C. Two frequency response ranges with four-range compensated attenuator. $20 \mathrm{c} j$ s to $4.5 \mathrm{M} . \mathrm{C} .$, usable to $9 \mathrm{M} . \mathrm{C}$. Maxinum sensitivity $10 \mathrm{M} . \mathrm{V}$
HORIZONTAL AMPLIFIER-Frequency Rarge: Flat within $20^{\circ}$ in from 20 eycles to 150 K.C. Deflection Sensi"ivity-. 15 R.M.S. Volts/Ineh. D'ush-Pull Vertical and horizontal output amplifiers.
INPUT IMPEDANCE-Vertical Amplifier: 2 Megohms in parallel with 45 M.M.F. at nput terminals.
CALIBRATING METER is inclıded-Reads 0-1000 Peak to Peak Volts in 8 ranges. This makes it possible to view percentage of posimive and negatire; plns reading Peak to Peak Voltuge direct. No External calibrator is needd. Where reading peak to peak voltare on a V.T.V.M. only peat to peak voltage is known. Return trace line if desired. Provisions for external blankines.
Saw tooth output supplies a saw tooth form frem 10 to 60.0 ord eycles. Output variable 0-70 volts peak to peak.
PHONE JACK connects to outrut of vertical amplifier. Hear as you see. Familiarize the visual pattern with audio soinds. A high gain amplifier sstitem is ideal for tracing audio circuits. etr.
Has RED - DOT Lifetime Guarantee.
SWEEP FREQUFNCY RANGE-10 C.P.S. to 60 K.C. Second. Phased 60 C.P.S. horizontal sweep and return trace eliminator. Synchoni\%ing and horizontal Swepp Seleetor in same control simplifies uaeration.
ATTENUATION-Coarse and fine control over Vertical Input. Fine control over Horizontal Input. ESCUTCHEON-Telescoping to provide shaded Cathode Ray tube. SHIELDING Copper plated steel construetion throughout. Cathode Ray tube adequately shielded from stray fieks. CASE-Metal, with black suede enamel finish, $15!^{\prime \prime \prime} \times 113^{1} "^{\prime \prime} \times 16^{\prime \prime}$. Leather handle. PANEL-Black, red and white characters etched on aluminum. ACCESSORIES-One co-axial lead for Vertical Input. POWER-105-115 Volts, 50-60 Cycles. 80 Watts Weight 38 lbs.

## COLOR BAR GENERATOR

This new tester is indispensable for cherking the overall performance of color TV receivers, including color phasing adjustments, color synchronizing and color matrixing.
In operation it produces with crystal controlled accuracy the standard bars of colors corresponding to R-Y. B-Y, I and $Q$ axis. These 10 color bars are accurately spaced at $30^{\circ}$ phase intervals.
Outstanding features of this tester include:
1-Crystal controllel R.F. output.
2-A built-in V.T.V.M. circuit with meter on the panel provides for quick and easy checking of sync, subcarrier and modulation amplitudes.
3--Unit completely self-contained-no extra accessories or equipment are needed. Easy to set up, with R.F. output direct.
4-Sound carrier (unmodulated) insures precise tuning of the receiver; and permits checking sound rejection and presence of beat interference between the color subcarrier and the sound carrier.
5 -Briphtness modulation is available to check for possible shift of hue in the bright areas or highlizhts.
6-The amplitude of the color subearrier is adjustable; for checking the color sync lock action in the receiver.
7-Video signals of positive or nerrative polarity are provided for low impedance ( 75 ohms ) and high impedance ( 5000 ohms) video circuits.
FREQUENCY-R.F. Output-Channel 3 ( 61.25 M.C. picture, 65.75 M.C. sound) supplied regular, channels 2 or 4 supplied on special order. Crystal controlled frequency.
COLORS: Crystal controlled accuracy, 10 bars of colors corresponding to $\mathrm{R}-\mathrm{Y}, \mathrm{B}-\mathrm{Y}, \mathrm{I}$ and Q axis.
VIDEO OUTPUT-Video signals of positive or negative polarity are provided for low impedance ( 75 ohms) and high impedance jacks ( 5000 ohms).
METER-Built in V.T.V.M. provides for measurements of sync, subcarrier and modulation amplitudes.
R.F. OUTPUT IMPEDANCE-Approximately 300 ohms (at end of R.F'. Output cable).
COMPOSITE PICTURE SIGNAL-61.25 M.C. picture carrier; 15.750 c.p.s. horizontal sync pulses; 3563.795 K.C. color subcarrier keyed at 189 K.C.
CONTROLS-Video and Horizontal hold, Subcarrier modulation, Meter Zero, Power on-off and metering selector. Modulation and sound carrier push buttons.

## GENERAL DESCRIPTION

OUTPUT CONNECTORS-R.F. output; low video; high video and pround. OUTPUT LEADS-R.F. 300 ohm matching shielded cable, low video lead (shielded co-axial cable), high video test leads.
METER-Large $420-\mathrm{PL}$ plastic full view meter with $4.14^{\prime \prime}$ scale,
CASE-Metal with black baked enamel suede finish, $15: 1 \prime \times 11$ " 61/4". Leather handle.
PANEL-Silver, black and red etched aluminum.
KNOBS-Black bar (rectangular with skirt) streamlined design.
POWER SUPPLY: 115 Volt, $50-60$ cycles A.C. 55 watts.
WEIGHT-Approx. 16 lbs.
MODEL 3439.
U.S.A. DEALER NET.

MODEL 3436

- Iarce dal whth uniform frequenes graduations-no rrowding at ent of dial. $13^{\prime \prime}$
- RF output maximum . 5 volt. Variations in ontput over the range of freduencies is minitmzed.
- Output imperdance 150 to 300 ohms.
- leances: ['HE all fundamentals on channels 14-83 (470-900 MC). No harmonics or emfusion.
- Triple shielding and excelient stability through srectal construction.
- Audio outnut avallable at panel, 0-20 solts,
- Voltage regulated power supply-115 molt. 50-60 eycle A.C. Control tube supplites RF osclilator with sultage independent of line fluctuations.

## UHF MARKER GENERATOR AND ALL-PURPOSE SIGNAL GENERATOR

## UHF Continuously Variable Through Channels $\mathbf{1 4 - 8 3}$ on

 Linear Scale $13^{\prime \prime}$ Long-All Fundamental Readings $1470-900 \mathrm{MC}$ Accuracy - $1 / 2 \%$ to $1 \%$An easy-to-use invaluable test aid as a Signal Generator An easy-to front ends and UHF converters. (2) Setting the end limits front ends and UHF converters. (2) Setting the end limits of onnel converters, and receivers. procedure especially needed in fringe channel converters, a procedure especially needed areas where the station signal niay be too weak for surfished with the Triplett 3436 , (4) A relialle signal source lished ware the The recivers and converters, also to compare the gain of UHF receivers and converters, als especially needed in fringe areas. Bad crystals in the as an section can be detected by this method. (5) Used as an alignment generator for UHF converters and ends. (6) Used as a UHF Horizontal Bar Generator, the tester generates approximately 12 lines by using the moau lation and feeding into the front end of the receiver. T makes possible linearity adjustment of the TV picture.
Variable-link type attenuator. Adjustable modulation of RF signal at approximately 1000 cycles. Can be used as horizontal har generator. ON-OFF switch. Also ON-OFF hotas switch for pre-heating oscillator tube filament before applying plate voltage.
Heavy steel case, handsomely finished and professional in appearance, $151^{\prime \prime} \times 11$ x $\times 8 / 4$. Black baked-on suede enamel finish. Sturdy leather strap handle for ease in carrying; makes the generator adaptable for portable as well as test bench use. Weight : 24 lbs. net.
Panel etched heavy aluminum with red and black characters. Tubes, 6 AF4, $6 \mathrm{~J} 5,6 \mathrm{~K} 6$, VR105 and $6 \times 5$. Complete with instruction books and test leads.

# Radio RIPLET Testers 

 RADIO \& TV SERVICING WITH LOAD-CHEK - Model 660

Model 660

RANGES
WATTS-A.C. or D.C.: $0-500$ ( 50 division scale) ; $0-1000$ ( 50 division scale) VOL.TS-A.C. or D.C. : 0-150 ( 65 division seale)
The LOAD-CHEK for the first time makes it possible for every technician to utilize what is nerhats the simplest and quickest of all service nethorls--servicing by Power Consumption Measurements, long proven by auto-radio servicemen as a rapid method of localizing troubles in auto radios. Triplett Morlef 660 is the first Watmeter to be produced at moderate cost, and with the proper ranses, to bring this short-cut method within the reach of every radio and TV serviceman. Following are only two of many time-saving uses of this new instrument: LOCATING A SHOIET-The chassis tag may show a normal consumption of 225 Watts. Simply plug a power cord of the chassis into LOAD-CHEK (no loose ends to connect or be in the way). Note the reading-which should be which side of the tube the short is on. With a soldering iron and which side of the tube the short is on. With a soldering iron and long-nosed phers you can check through the chassis. locate and correct the trouble without check with lead wires
REPLACING BURNED-OUT RESISTORS With the chassis to be repaired plugged into a LOAD CHEK MOIDEL 660, note the wattage reading with the burned out resistor circuit open. Now replace the resistor. Should the increase in watts be greater than the resistor rating, it indicates an extra load has caused the trouble which has not been cleared. LOAD-CHEK is made-to-order for the busy serviceman because it's a Time Saver; and at its moderate cost RED he standard equipment on every service bench.
RED - DO'T Lifetime Guaranteed Meter.
Black, molded, insulated case, $2 \frac{116^{\prime \prime}}{} \times 5{ }^{1 / 2 \prime \prime} \times 6^{\prime \prime}$, with removable black leather strap handle. Black molded panel with white markings. Weight: 2 lbs,

## APPLIANCE TESTERS - Model 2002

RANGES: 0-1500-3000 Watts A.C.-D.C. at 10 Amp . normal, 20 Amp . Max., 40 Amp . momentars; 0-130-260 Volts A.C.-D.C.
Model $20(5)$ shows proner consumption uf industrial equipment. radios, electric range., refrigerators, washers, etc.. under actual operating conditions, on either D.C. (r A.C. between 25 and 133 cycles. Wattmeter on the left and Voltmeter on the right pernit Watts and Volts to be read simultaneously or independently. Shows if coltage remains within limits under operating loads. Shows faulty power lines. Heavy inntr construction. Heavy leather case, with snap cover and leather handle, $6^{1} 2^{\prime \prime} \times 42^{2} \times 311^{\prime \prime}$. Storage space for coril and plug furnished. Weight: 2 lbs. MODEL $2002 . . . . . . . . . . . . . . . . . . .$. U.S.A. LEALER NET

Model 2006
H. $\mathrm{NGGES}: ~ D-25$ A.C.-D.C. Amperes: 0-120-:60 A.C.-D.C. Volts,

Mudel $\boldsymbol{y} 00 \mathrm{i}$ is designed for those who prefes the Voltmeter-Ammeter method of testing eledric ranges, refrigerators, washers aud other household appliances, plus many industrial uses. Simultaneous readings of line voltage and current drain. Compact
 MODEI, 2006.

## VU METER

Volume Unit and Decibel Meters are used to measure sound or noise levels in amplifiers for Public Address, Theatres. Broadcasting Studios, Broadcasting Static Equipment, etc.
VU meters are used for volume level measurementsincluding lroadeast monitoring. Ballistic characteristics comply with standardization recommendations of NBC and CBS and Bell Telephone Laboratories Internal impedance 3900 Ohms . Steady state reference 1 Milliwatt. For 600 Ohm line. Dynamic characteristics provide for $99 \%$ full scale deflection in .3 seconds. Specify scale type when ordering:
Type "A": 0-100 (black) -20 to +3 VU on top are (red).
Type "B": 0-100 (black) $-20+3 \mathrm{VU}$ on bottom are (red).

## WATTMETERS ELECTRODYNAMOMETER

These instruments can be used on sinele phase A.C. or D.C. as Wattmeters. On special order they can be made up as voltmeters or ammeters. Instruments are self-contained to 300 Volts- 10 Amperes. Over that external connection can be made. For use on frequencies up to $18: 3$ eycles per second. Avail-
 able in three-inch model 361. Case dimensions same as $321-\mathrm{T}$, except for depth, $2^{\prime \prime}$ back of the tlange ( $2 弓^{\prime \prime}$ "over studs). Also available in $3^{\prime \prime}$ rectangular Model $367-\mathrm{A}$. Case diameter same as 327 -T. except for depth, 2 "/is", back of flange ( $25 / 8^{\prime \prime}$ over studs). Other characteristics of the 367 -A, such as Range, Voltage, Amps., etc., same as 361. Wattmeters can be combined in the Triplett Twin case with a voltmeter or Ammeter. Accuracy within $\pm 2^{\prime} /$ Standard range as follows:

## DECIBEL METER

DB Meters permit the operator of public address systems, etc., to make instant adjustments to prevent sound blasting or distortion. General purpose type reads up 6 and down 10 decibels. Zero decibel $=1.73$ Volts. Calibrated for use on a 5000 Om line. Reference level 6 Milliwatts, Resistance: 5000 Ohms. They consist of a sensitive D.C. instrument coupled to a copperoxide rectifier. Standard damping is provided unless highly damped instruments are specified. Quotation on request.

## D.C. AMMETER SWITCHBOARD SHUNTS

External shunts are available in the Ampere ratings listed and are to be used with instruments which operate at 50 M.V. full scale. The Ammeters will be supplied with dial reading in Amperes corresponding to rating of the shunt ordered. To determine price of the complete Anmeter. add shunt price to price of $0-50$ Millivoltmeter in Model clesired.
Shunts are furnished with 5 ft . Wire leads. Quotation upon request for replacement, or special $24^{\prime \prime}$ or $30^{\prime \prime}$ leads.
Switchboard shunts have molded bases through 200 Amp. rating.
Curve Type Shunts (mount on meter studs)- 50 M.V. (Specify on order.) 30 D.C. Amp. \$3.40; 75 D.C. Amp., \$4.10; 100 D.C. Amp.. 34. 11 net each.

## IDIALIGIITCDIEIDIRATION Foremost Manufacturer of Pilot Lights

# IPILOT LIGIT ISSEMIBLIES T-3¼ NEDN L.MMP • NE-5I <br> 11/16" MOUNTING HOLE <br> IBUILT-IN IRESISTOIE 

(Patent No. 2,421,321)

all of these assemblies are listed by Under. weitro: Laboratories Inr.

For 110 and 220 volts
The new NE-5l lamp is esperially useful for pilot lights to be operated on commercial voltages. It has a distinetive
NE-T1 orange-red glow and eonsmmes very litale enrrent.

## MULTI-VUE CAP

In addition to the adantages given ley the provision of the built-in resistor, these ansmbles of for another feature that is especially important in obtaining effertive indieation with the NE-5I lamp. The" Mnlti-var" cap shown at the right gives a high degree of visibility log directing ant increased amount of light toward the eye when the indicator is viewed from any angle. When it is desirable to view the clectrodes directly, the clear caps shown below are very effective. For concentrating the light into a beam the metal lens holders are equipped with convex lenses as shown.

#  <br> Foremost Manufacturer of Pilot Lights вияоюा, 

# CONNECIORS FOR SINGIE CONDUCTOR CABLE <br> FOR MICROPHONLS - SPEAKERS - PICK-UPS - JACKS <br> (using cable shield for second conductor) 

The fittings shown here are designed for use with standard metal shielded single condutor calle up to $1 / 4^{\prime \prime}$ diameter. These connectors are heavily constructed from solid brass and all exposed parts are chrome plated and highly polished.

No. 101

## MALE CONNECTOR FOR CABLE

With spring protector to prevent sharp bending of cable. Solders to cable sheath - sccured by set screw.

No. 102
PLUG WITH MALE CONNECTOR
Fits standard jacks

## No. 103 <br> CAP AND CHAIN

To protect unused male connectors. Chain secured by screw prevents loss when removed to make connection.

The cable end connectors are provided with rugged wire spring protectors which prevent sharp hends at the comnection. The protector is soldered to the cable sheath and secured in the connector by a set screw so that all strain is relipved from the conductor.

No. 100

## FEMALE CONNECTOR FOR CABLE

With spring protector to prevent sharp bending of cable. Solders to cable sheath - secured by set screw.

## MALE CONNECTOR FOR CHASSIS

Has sprung center contact which grounds before cable connection is broken preventing open circuit howls.

$$
\text { No. } 50
$$

## MALE CONNEC'IOR FOR CHASSIS

Shell grounds to panel - or may be insulated by washurs. Fit "s" - 24 threaded hole or may be secured ly mut.

$$
\text { No. } 50 \mathrm{P}
$$

## MALE CONNECTOR FOR CHASSIS (Similar to No. 50 above)

Designed fir force fit in hole in panel. Requires no nut to secure in place.

## Dual Section Electrolytics - Type "IL"

Hermetically sealed in aluminum tubes with completely flexible leads. U/L Approved, plastic coated leads are rivetted directly to the condenser end disc, eliminating the use of rigid terminal risers, allowing capacitor to fit into smaller space and eliminating lead breakage. IL capacitors have wrap around mounting strap and are common negative, guaranteed for one year.

## All Purpose Paper Capacitors <br> "ROCKETTES"

Planet ROCKETTES are impregnated and jacketed with a HARD-as-ROCK plastic which will not dry out, shrink away from the leads nor develop fissures nor cracks, thus guaranteeing against the entrance of moisture and guaranteeing good shelf life and long service life. The coiled heads of the leads are securely soldered to the foil, which is imbedded in the same plastic used as an impregnant, making it impossible for them to work loose or pull out. ROCKETTES have exceptionally high insulation resistance which is maintained proportionately over the entire temperature range of $-30^{\circ}$ to $+85^{\circ} \mathrm{C}$.

## TYPE E

## Metal Screw-Base Electrolytics

'SM'** Safefy Margin Construction

- Popular aluminum can type with threaded neck and patmut for easy, conrenient mounting.
- Recommended as original units or replacement for other can-type wet or dry electrolytics using chassis hole mounting
- Capacitor sections insulated from can. Separate positive and negative color-coded lead for each section. Section in high-voltage units ( 600 wvde) are series-connected to assure long service life
- Plastic insulated leads. $6^{\prime \prime}$ long. Stripped and timned ends.
- As'raronramproved terminal construction. Excellent mrotection against moisture. Suitable for use in tropical, hot, humid and otller severe elinates.

# METEOR＊SUBMINIATURE PAPER CAPACITORS 

for $125^{\circ} \mathrm{C}$ ．Operation without voltage derating

－Amazingly small sizes，compact and light－weight units．
－Highly dependable operation at temperatures up to $125^{\circ} \mathrm{C}$ ． withouf voltage derating．
－Exceptional capacitance stability，less than $5 \%$ change，over entire temperature range of $-65^{\circ} \mathrm{C}$ ．to $+125^{\circ} \mathrm{C}$ ．due to use of ASTRON－developed high－iemperature impregnant X－250＊．
－High insulation resistance，low power factor，unusually low resonance loss．High test voltage indicates extra margin af safety in operation．
－Built to exceed stringent requirements of Specification MIL－C． 25A for styles CPO4－05－08－09－10－11 （ASTRON Types AQ． TQF，and variations）；and styles CP53－54－55，Characteristic K（ASTRON Type ADZ，bathtub）．
－Positive hermetic closure of the metal cases is assured by glass－to－metal solder seal terminals．
－Tubulars supplied in a variety of construction and mounting styles to meet your specific needs：extended foil ar inserted tab；capacitar section grounded ta case ar insulated from case；plastic auter sleeve；with soldered－an tangential ar L － lype bracket；screw neck maunting style；or stud－base maunt－ ing style．

METALITE ${ }^{\text {® }}$<br>Metallized Paper Capacitors for $65^{\circ} \mathrm{C}$ ．and $85^{\circ} \mathrm{C}$ ．Operation METALITE CAPACITORS<br>\section*{Feature：}

－Ultra－compact sizes．Light weight．Ideal for miniaturization applications，and portable，mobile and airborne equipment．
－As much as $75 \%$ reduction in size over conventional paper－ foil capacitors．
－Self－healing－the ability to withstand high dielectric stresses．METALITE capacitors can be subjected to momentary overvaltages and surges over and over again without danger of permanent failure．
－Temperature Range（Metal cased units）$-65^{\circ} \mathrm{C}$ ．to $+85^{\circ} \mathrm{C}$ ．； leardboard cased Type MLI $-55^{\circ} \mathrm{C} .10+65^{\circ} \mathrm{C}$ ．
－Excellent RF characteristics．Low RF impedance due to small sizes and short current path．Low power factor．
－Wide variety of applications：RF and audio bypass circuits， noise suppression filters and systems，instruments，and various types of communication equipment where small size， light weight and the self－healing feature are especial＇y desirable characteristics to meet specific circuit requirements．
－Interchangeability with standard paper－foil capacitor de－ signs when operated within published ratings and circuit requirements．

## NEW COMET* TYPE MBP

Molded Plastic Metallized Paper Tubulars
$125^{\circ} \mathrm{C}$. Operation

- First. molded plastic metallized paper tubulal capacitor . . ever:
- Tough. metallized paper capacitor sections for miniature size, self-healing characteristics. light weight and dependable operation.
- Impervious immersion-proof shell is uneffected by amy heat and/or moisture condition.
- Exclusive bonded seal locks ont environmental effects . . . locks in performance.
- Solid thermosetting impregnant for reliable operit tion over temperature range of $-6 \overline{5}^{\circ} \mathrm{C}$, to $\pm 125^{\circ}\left({ }^{\circ}\right.$ vacuum impreqnation guarantees uniformity of umits
- Firmly implanted leads won't pull or melt out makes soldering in tight places easy!

CAPACITOR SECTION GROUNDED TO CASE (Glass-to-metal terminal at one end) MQL: Basie untr. I'ninsulated brefy. Nizes an ars briers as simmo.
MQLP: Rasie Mol, unit with plastic ourer sleeve (I) for finsulated motw, Ald a" to dianmer and lengeth of $\lambda$

MQL-A: Basie MQI. unit wim soldereer-on tian gontial mounting hatkel "A" on minsulatel

MQL-B: Histic Mefl, unit with malderemton L. type butket "K" on whimsuated houls. Cas
 prictes
MQLS: srrew neek mounting type. Vninsulated
 lint nriees.
MQLV: Stul base mounting iype. I'ninsulated bmiy: suthe ratingounting and rase sizes as Mat.

*TRADF, MARK

CAPACITOR SECTION INSULATED FROM CASE (Glass-to-metal terminal each end): MQLF: $\mathrm{B}_{1}$, unit in "floating" constructinn.
 MQLFP: Rasic MQLIF unit With plastic outer

MQLF.A: Jusic MoloF unit with solderell-m hathential mountinp bracket "A" minninsu

MQLF-B: Basic Mors unit with soldered on Letyper litarky "Pr" on uninsulated haly, Ablil (0) M(1) list piles.

MQLFS: Sem nerk mounting type. I'ninsulated brols. Same ratings as MopL. Minimum case
 brices.

## METALITE HY－MET＊TYPE MDL Bathtub Capacitors

## $125^{\circ} \mathrm{C}$ ．Operation

－Higher capacitance ratings than ever before offered in same size MIL Style CP53－55 cases in conventional paper－foil types．
－Solid thermosetting plastic impregnant enables operation to $125^{\circ} \mathbf{C}$ ． ＇I＇emperature Range：$-6.5^{\circ} \mathrm{C}$ ．to $+125^{\circ}{ }^{\circ}$ ．
－Hermetically sealed．Lag type glass－tometal sealed terminals．
－Standard position of terminals is on side．Can be supplied with top terminals（Tyue MDL＇T）or bottom terminals（Type MJ）I」l）．
－Standard capacitance tolerance：$\pm 20 \%$

Tに．いいた いいにだ
－Jigher capacitance than ever betore achieved in Mila Style Cloto cases．due to use of metallized paper sections．
－Temperature range $-65^{\circ} \mathrm{C} .10+125^{\circ} \mathrm{C}$ ．due to use of solid thermo－ setting impregnant．
－Hermetically sealed．Glass－to－metal sealed lug terminals
－Exceptionally small sizes for the given ratings．Size reductions of $50 \%$ to $75 \%$ over equal ratings in conventional paper－foil units．
－Spade bolt＂J＂brackets supplied with each unit for convenient，rigid mommting．
－Standard capacitance folerance：$\pm 20 \%$

## Presenting the PYRAM|D Model GRA CAPACITOR • RESISTOR • ANALYZER

## Performs 11 functions Speedily and Accurately QUANTITATIVE MEASUREMENTS <br> I. capacitance <br> 2. power factor <br> 3. resistance <br> 4. insulation resisfance <br> 5. leakage current <br> 6. continuity <br> "QUICK CHECK" QUANTITATIVE TESTS

7. open circuits
8. short circuits
9. intermitfents
10. high rf impedance
11. high power factor

The most versatile instrumert of its kind. Containing all the latest up-to-date features, this one convenient, compact unit replaces several cumbersome, old-fashioned single-purpose testers. And moderately priced too! It's the perfect multi-purpose analyzer for the

$\$ 82.95$ dealer net
techn:cian, serviceman and engineer in industrial and military electronies, black and white and color television, and all related ficleds.
Accurate enough for the laboratory; portable enough for the field; economically priced for all applications.

## LOW-COST LINE FILTER

Model F-1 1
Suitable where suppression of radio interference can be achievod with the insertion of a single L-C Pi-type network. This is generally the case where the interference is due to cash registers, dictating machines, floor poiishers, hair dryers, heating pads, portable electric tools, and similar applianes.
Assembled in a steel case, 3 " $x: 33^{1} 4^{\prime \prime} \times 35 s^{\prime \prime}$. Attractive durable brown wrinkle finish. Muants with two holes on 4 "centers. Equipped with binding post for connection to ground. Rated 5 amperes at 125 volts $A C / D C$.

## SUPERIOR LINE FILTER

Model F-22
Ideal for use witl: all factory, office. and home appliances which generate severe radio interference. Utilizes two L-C Pi-type filtor sections, one in each side of the power line. Effective both on standard-broadcast or short-wave frequencies.
Assembled in a steel case, $31 / 2^{\prime \prime} \times 31 / 4^{\prime \prime} \times 41^{\prime \prime}{ }^{\prime \prime}$. Attractive durable brown wrinkle finish. Mounts with two holes on 4 lir" centcr:. Equipped with binding post for connection to ground. Rated is amperes at 125 volts AC/DC.

[^42]
## TYNEE－DRY ELECTROLYTIC CAPACITORS

## Type TD

Tynce－Dry singte－rapacitor units with ：3－inch bate－ wite leads．Desipned for 85 C．operation．Fach unit scaled in metal tubular case．Supplied with insulating （ardboard sleove．Low leakage．Longr shelf life．Top guality in minimum space．

## METL－CAN ELECTROLYTIC CAPACITORS

## Type MC

DC dry electrolytic capacitors．Assembled in screw－ base metal containers for maximum protection against humidity．6－inch flexible－wise insulated leads at one end．Supplied with palnut for mounting．

## Type TDL

Tynee－Dry dual－and triple－capacitor units with 6 －inch Hexible－wire insulated leads．Designed for $85^{\circ} \mathrm{C}$ ．oper－ ation．Each unit sealed in metal tubular case．Supplied with riveted radial mounting bracket over insulating cardboard sleeve．Low leakage．Long shelf life．Top quality in minimum space．

## TWIST－MOUNT ELECTROLYTIC CAPACITORS

## Type TM

Designed for $85^{\circ} \mathrm{C}$ ．operation．（Fur $100^{\circ} \mathrm{C}$ ．operation， see following Type TMH．）Type TM available in single－，dual－，triple－，and quadruple－capacitor units． Assembled in aluminum containers providing maxi－ mum protection against moisture．Easy to mount： supplied complete with metal and bakelite mounting plates．Low leakage．Long shelf life．Extremely com－ pact．Highly dependable．For use in applications where high temperatures，voltage surges，and ripple currents are encountered；as in radio and television receivers，amplifiers，and similar equipment．For mounting hardware，see Page P－157．

HI－TEMP TWIST－MOUNT ELECTROLYTIC CAPACITORS

## Type TMH

Designed for $100^{\circ} \mathrm{C}$ ．operation．Aluminum containers provide maximum protection against moisture．Fasy to mount：supplied complete with metal and Bakelite mounting plates．Low leakage．Long shelf life．Ex－ tremely compact．Highly dependable．For information on values other than those listed，write to Pyramid Sales Engineering Dept．

## PLUG－IN ELECTROLYTIC CAPACITORS

## Type DO

Designed for $85^{\circ}$ C．operation．Hermetically sealed in round aluminum containers．Provided with four pins （Nos．1，3，5，7）on standard octal base．Plugs into standard 8 －pin octal socket．Ideally suited for any application where guick capacitor changes are re－ quired．Grounding lug supplied for grounding case to chassis．（In accordance with military standards， a low variable resistance exists between pin 1 ｜nega－ tive］and the case；to ground pin 1 ，a direct ground connection must be made from the corresponding lug on the socket．）For mounting rings，see Page P－151．

## BATHTUB－TYPE OIL－PAPER CAPACITORS

## Types PDM，PDMT，PDMB

Section assembled in hermeticall：sealed tin－coated drawn－shell container．Mineral－oil impregnated and filled．Lug－type terminal seals．Meets electrical re－ quirements of MIL－C－25A．

$$
\text { Temperature Rating: - } 50 \text { to }+85 \mathrm{C} \text {. }
$$

$$
\text { Standard Tolerance: }-10^{\prime} \text {; to }+20^{\prime \prime} \text {; }
$$

IPD：Terminals on side；similar to MIL Type ClיB． Order by Catalog Number from I＇loll Tables． PDMT：Terminals on top；similar to MIL Type（CDI． To order：Select desired unit fiom PDM Tables；in unit Catalog Number，insert Letter T after l＇IM．
IPDAB：Terminals on bottom；similar to MIL Type Cl：5．
To order：Select desired unit from IPDM Tables；in unit Catalog Number，insert letter 13 after I＇DM．

## PDM SINGLE－CAPACITOR UNITS

＊Add $\stackrel{1}{4 \prime \prime}^{\prime \prime}$ to Height when ordering these units with top or bottom terminals．

## METAL TUBULAR OIL－PAPER CAPACITORS <br> Types PTIM，PTIMV， 4PTIM，4PTIMV，7PTIM

Non－inductively wound section assembled in hermeti－ cally sealed metal tubular case．Mineral－oil impreg－ nated and filled．Neoprene－Bakelite end－discs．Meets electrical requirements of MIL－C－25A．

$$
\text { Temperature Rating: }-55^{\circ} \text { to }+85^{\circ} \mathrm{C} \text {. }
$$

Standard Tolerance：$-10 \%$ to $+20 \%$
PTIM ：Basic type：similar to MIL Type CP25．Order by Catalog Number from PTIM Tables．
I＇TIMV：With insulating outer plastic sleeve；similar to MIL Type CP＇26．To order：Select desired unit from PTIM Tables；in unit Catalog Number，insert letter V after ITIM；to List Price，add $\$ .20$ ；to Diameter， add ${ }^{1 / 6}$＂；to Length，add $1 / s^{\prime \prime}$ ．
4PTIM：With riveted radial bracket（Pyramid Mount－ ing Style $4^{*}$ ）；similar to MIL Type CP＇27．To order： Select desired unit from PTIM Tables；in front of unit Catalog Number，place number 4；to List Price，add \＄． 10 ．
HPTIMV：With riveted radial bracket and insulating outer plastic sleeve（Pyramid Mounting Style 4V＊）； similar to MIL Type CP＇28．To order：Select desired unit from PTIM Tables；to unit Catalog Number，add prefix 4，and insert letter $V$ after PTIM ；to List Price， add \＄．30．
7PTIM：With soldered tangential bracket（Pyramid Mounting Style 7＊）；similar to MIL type CP29．To order：Sclect desired unit from PTIM Tables；in front of unit Catalog Number，place number 7；to List Price，add \＄．40．
Illustrations of Pyramid Mounting Styles shown at right．

# MPGK-MPGM CAPACITORS 

## METAL-TUBE METALLIZED PAPER CAPACITORS Types MPTIK, MPTIM and Variations

Extended-foil section assembled in hermetically sealed metal tubular case. Spun-over synthetic rubber enddises. Basic Type MPTIK impregnated in microcrystalline mineral wax. Basic Type MIPTIM impregnated in mineral oil. 1 whinch minimum lead length, Selfhealing. Low r-f imperlance. Excellent power factor over a wide temperature range.

MDPIK, MIPTM: Basic trpes, with floating case. Order by Catalog Number from Mprik-illotil Table.
MPTK, MITM: With grounded case. To order: Solect desired unit from Mrlili-MPTISM Table; from unit Catalog Number, delete letter I; from Ioength, deduct

MDTIVV, MPTMV: With insulating outer plastic sheeve To order: Scleet desired unit from MillikMP'TIM Table; in unit Catalog Number, insert letter
 to Diameter, add in "; to Iength, add ${ }^{1}$ s".
AMPTIK, 4MPTM: With riveted radial bracket (I'yramid Mounting Style for $^{*}$. To order: Select desired unit from MPTli-MITNM Table; in front of unit

Temperature Rating: $-55^{\circ}$ to $+85^{\circ} \mathrm{C}$. Derating: (0): at $+55^{\circ} \mathrm{C}$. 30 : at $+85^{\circ} \mathrm{C}$. Standard Tolerance: - $20^{\prime \prime}$; to +30'f
Catalog Number. pace number i; to List Price, add $\$ .10$.
AMPTIVV, MMPLMV: With riveted radial bracket and insulating outer plastic slece (l'yamid hounting style 4 V ). To order: Seleet desired unit from MPTK-MPTIM Table; to unit Catalog Number, add prefix 4, and insert letter Vafter Marlis or Mirom; to List Pricé, ad! $\$ .30$.
TMPTIK, TMDTIN: With soldered tangential bracket I'ramid Mounting Style 7 \%). To order: Select desired unit from MPTli-MPTIN Table; in front of unit Catalog Number, place number 7; to List lrice, add $\$ .40$.

For illustrations of Pyrannid Mounting Styles. see Page

## METAL－CAN HI－TEMP METALLIZED PAPER CAPACITORS Type MPGR and Variations

Extended－foil construction assembled in hermetically sealed metal tubular case．Impregnated in solid ther－ mosetting resin．Glass－to－metal end－seals． $15 / 8$－inch minimum lead length．Self－healing．Low r－f impe－ dance．Excellent power factor over a very wide temperature range．

> Temperature Rating: $-55^{\circ}$ to $+125^{\circ} \mathrm{C}$. Ierating: $0 \%$ at $+100^{\circ} \mathrm{C} .25^{\circ}$ at $+125^{\circ} \mathrm{C}$. Standard Tolerance: $+20^{\circ} \%$

## MPGR CAPACITORS

MPGR: Basic type, with grounded case. Order by Catalog Number from MPGR Table.
MPGIR: With floating case. To order: Select desired unit from MPGR Table; in unit Catalog Number, insert letter I after MP'( $\mathbf{1}$; to List Price, add $\$ .75$; to Length, add
MPGRV: With insulating outer plastic sleeve. To order: Select desired unit from MP'GR Table; in unit Catalog Number, insert letter V after MPCR; to List Price, add \$.20; to Diameter, add ${ }^{1}{ }^{\prime \prime}$ "; to Length, add 1/8"
3MIPGR: With threaded end bushing (Pyramid Mounting Style $3^{*}$ ), To order: Select desired unit

MPGR CAPACITORS, GROUNDED CASE

## KRAFT-TUBE HI-TEMP METALLIZED PAPER CAPACITORS Type MTR

Extended-foil section assembled in a special kraft tube. Impregnated in solid thermosetting resin. Plastic end-seals. Overall coating of highly moistureresistant wax. $15 / 8$-inch minimum lead length. Selfhealing. Low r-f impedance. Excollent power factor over a very wide temperature range.

$$

& \text { Temperature Rating: }-40^{\circ} \text { to }+100^{\circ} \mathrm{C} \text {. } \\
& \text { Standard Tolerance: }-20 \% \text { to }+30 \%
\end{aligned}
$$

from MPGR Table; in front of unit Catalog Number. place number 3 ; to list Price, add $\$ 80$.
6MPGR: With soldered transverse bracket (Pyramid Mounting Style 6*). To order: Select desired unit from MPGR Table; in front of unit Catalog Number. place number 6; to List Price, add $\$ .40$.
7MPGR: With soldered tangential bracket (Pyramid Mounting Style 7*). To order: Select desired unit from MP(iR Table; in front of unit Catalog Number, place number 7; to List Price, add $\$ .40$.

```
*For illustrations of Pyramid Mounting Styles, see Page
    P.162.
```

Pyramid＂GIASSEAL＂capacitors are subminiature metal cased tubular units which have been designed to meet severe and rigid operating requirements， especially where an important design consideration is limited space．
＂GLASSEALS＂have proven themselves to be unsur－ passed in reliability over the entire operating temper－ ature range from $-55^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$ ．Rigid inspection throughout the manufacturing processes assure their continued excellence．

# HERMETICALLY SEALED 

subminiature
TUBULAR PAPER CAPACITORS

for $125^{\circ} \mathrm{C}$ operation at full rating

Pyramid＂GLASSEAL．S＂are available in a variety of impregnants，and internal constructions hermeti－ cally sealed with glass－to－metal end scals in non－ magnetic metal tubular cases．They are available in many mounting styles．See Engineering Catalog P（i－3 for full details．Pyramid＂GLASSEALS＂are manu－ factured in accordance with MIL－C－25／1B and may be secured with MIL designations CP04，05，08，09， 10 and 11 whenever required．

Order by wattage and resistance. For example: $\mathbf{A}$ 25-watt 100 ohm unit is indicaled by 25K100P. A 100-watt 12 ohm unit is 100K12P. Or, a 50-walt . 5 ohm unit is 50K.5P . . . etc.

Mercury "A" Batteries

I'rovide up to 4 times enorgv-volnmer rat io of other tybes of bat teries. Ideal for use in portable electronic equipmont, etc. Ferform under wide range of adverse weather and humidity conditions. No need for rotation or rest periods. Uniform and optimam discharge voltage throughout long service life. 1.34 volts. Button height . $0.58^{\prime \prime}$

## Mallory Fixed and Adjustable Vitreous Enamel Resistors

Wirc-wound, covered with a special, vitreous. non-alkaline, non-hygroseopic enamel coating which assures exceptional sealing and permanence of electrical characteristics. Adjust-

able types equipped with slider. 5 and 10 watt sizes have tinned-copper leads. All others supplied with mounting feet.

## DEPOSITED CARBON RESISTORS

Types HS and DC Deposited Carbon Resisfors

(Resistors illustrated are approximately $\eta_{3}$ actual size)

## Type DC $\pm 1 \%$ Deposited Carbon Presision Resisfors

Mallory Deposited Carbon Prucision Resistors are designed primarily as low-cost replacements for expensive wire-wound resistors in high-quality laboratory instruments. Their unique operating characteristics also make them ideal for replacement or substitution in all radio, television, electronic, or clectric circuitry where stability. chose olerance, low-noise and bow inductance are desired. Average shelf life change will mot exceed '4"; per year. One thousand lomer load life test indjeates a maxinum thenge not excerding $\pm 1 \%$
These resistors are formed of pure. cristalline-carton particles deposited on specially compounded ceramic. Fach Mallory Deposited Carbon Resistor is equiped with $1 \cdot z^{\prime \prime}$ tinned eoppor, axially-placed Jeads ripidly attached to silver plated hrase ond-atas. Raked mois-turn-resistant insulation is incorporated in construction for protection against humidity. Wach resistor is calibrated at a nominal temperature of $25^{\circ} \mathrm{C}$. and each has a negative temperature condficient range
 resistances exdeding 1 megohm.

Each unit is insperted aceording to requirements of accepted government specifications. and each is marked with resistance value, type and tolerance. except the smaller types which have a separate label.

All DC Types are packaged in this dust-free plastic tube, assuring adequate physical protection

## SPECIAL ORDERS <br> - Made to Your Specifications

Mallory Deposited Carbon Precision Resistors are also available in DC types made to exact customer specifications requiring a wider range of resistance values from 2 ohms to 50 megohms. DC type resistors are also available in hermetically sealed types and with special coatings or sleeves.

Figure 1
Dimensions

TYPE BW INSULATED WIRE WOUND RESISTORS

Type BW's are exceptionally stable, inexpensive wire wound resistors for low range requirements. These small, completely insulated units are similar in appearance to insulated composition resistors but are readily identifed by the double width of the first color code band.

The wire element is uniformly and tightly wound on an in sulated core. Tinned, solid wire leads are keyed to the element by a apecially desizned terminal. Leads are anchored inside the insulation and cannot turn or pull lonse.

T－Taper M－Megohms Plain Controls－List $\$ 1.25$

New parts added since Catalog Data Bulletin DC1D．
Tapped Controls－List $\$ 1.85$
7 STANDARD TAPERS FOR $\boldsymbol{Q}$ CONTROLS

A－For potentiometer or rheostat where uniform re－ sistance change is required．
B－Semi－logarithmic curve for tone control or audio circuit control．
$\mathbf{P}$－Semi－logarithmic curve－reverse taper for use in contrast and picture control circuits in telebision． C－Logarithmic curve for audio circuit control or antenna shunt control．
Q－Semi－logarithmic curve－reverse taper for use in contrast and picture control circuits in television．
D－Tapered at both ends to provide control of grid
bias and antenna circuit．Used where contrel of grit bias is important in controlling volume．
H－Tapped logarithmic curve for audio level control for automatic bass compensation．

## ASSEMBLE YOUR OWN STANDARD OR SPECIAL IRC 9 CONTROLS

For those who would like to use their IRC Base-Fiement stock for assemhly of standard controls, the component parts are available. Plain Q Control assemblies With 1 -Base-blement, 1-Interehangeable Fixed Shaft, 1-QCl3 Bushint and 1-QCC Cover Switch type Q control assemblies with l-hase-lidement, 1-Interchangeable Fixed Shaft, 1-QCB lSushing and 1 of either 76-1 or 76-2 Switch.
QCB-BUSHING- $3 / 8-32$ thread. $1,{ }^{\prime \prime}$ long. Pk ${ }^{\circ}$. of 5.
List Price $\$ 0.30$
QCC-COVER-F'or plain or tamed controls. Pkg, of Fist Price $\$ 0.45$
IRC VOLUME CONTROL GROUND-
ING LUG-same as supplied with
IRC Twive () Controls. Fits $3 / 8{ }^{\prime \prime}$ bush-
ing. Laly liugth from hole center-
$1_{\mathrm{ic}}^{3}$. TVpe QCI, Grounting Lures.
lkg. of 5 . List Price $\$ 0.17$
STANDARD Q CONTROL LOCKNUT-
Hex mat for ${ }^{3,}-32$ thread. $2^{\circ "}$ "acrows
flats. 'lype QCN. Pkge of 10 .
List Price $\$ 0.25$
New QPK Kit assembles above standard $Q$ control parts with lirC base elements. Contents: iQ Knob Master Shaft, QCB Ground Plate/Bushing, QCC E-niyersal Cover, li-1 liesilient lietainer Ring, QCN Mount ing N゙ut

## 16 INTERCHANGEABLE FIXED SHAFTS FOR Q CONTROLS

AQ
Knob Master Shaft. Same as surplied in Type Q Controls. Flatted, grooved and knurlet. $3^{\prime \prime}$ long. List Price $\$ 0.50$

Slotted or tongued, For remote control eables. Includes $7^{7} 6^{\prime \prime}$ and $15 / 8^{\prime \prime}$ guide funpola and tonruc. Approximately $31 / 2$ " long from mounting face. $1 / 4^{\prime \prime}$ diameter.

List Price $\$ 0.45$

Specially slotted with hole in bottom. For Philco sets. Slot $1 /{ }^{\prime \prime}{ }^{\prime \prime} \times 3_{6}^{\prime \prime \prime}$ deep. Approximately $1_{2}{ }^{1}$," long from mounting face when installed in control. $1 / 4$ " diameter.

List Price $\$ 0.30$
$x=0$

Flatted, with groove for dial plate. For Delco, RCA, Sears-Roebuck and Westinirhouse sets. s? " deep flat. 64 deep sroove. Approximately lif" long from notonting face. $1 /{ }^{\prime \prime}$ diameter. List Price $\$ 0.30$

I/s" diameter with $.105^{\prime \prime}$ flat. For Zenith models where shaft must operate inside another shaft. Approximately $41 /{ }^{\prime \prime}$ " loner from mounting face. List Price $\$ 0.45$

## 5

## Kด

Sperial $1 / s^{\prime \prime}$ round with two concentric holes in end. For Motorola sets. Approximately $13 / 8$ " long from mounting face.

List Price $\$ 0.30$

Short flat with groove and threaled hole in end, For Brlinont and Montgomery-Ward
 $1 / 4^{\prime \prime}$ diameter. List Price $\$ 0.35$

## 

MQ

Special doulde-flat, threaded for $3 / 8$ " on whd. For Helmont, Montsomery Ward and Wells-Gardner sets. Has two concentric holes in end, the smaller being threaded. Approximately $1!/ 2$ long from mounting face. List Price $\$ 0.45$
$+\mathrm{NQ}$
Lniversal ${ }^{3} 6^{\prime \prime}$ flatted and slotted shaft. Slot milled entire length of shaft except for thin web. Approximately $\mathrm{s}^{\prime \prime}$ long from mounting face. List Price $\$ 0.45$

 mately "3" long from mounting face. For

List Price $\$ 0.35$

## 5

R 9

Very short screw-driver slot shaft. Slot,
 mourtint face. ${ }^{3 / 2}$ "fiameter.

List Price $\$ 0.35$

Insulated shaft fo: use in television. Drive arm and shaft of :nsulating material. I'sed without retainer rome. 3 cone from monnting face. Easily cut to retuired len' th. 1/" diameter. CANNOT BE C:SED W.TH SWITCH. List Price $\$ 0.60$

Infontical with BG Shaft except for aldition of iriction clatch-drive arn. Used for remote control as in auto radios.

List Price $\$ \mathbf{0} .60$

Special tongued shaft-1" long from mounting face tongue $1^{3}$ " wide, " " lons. $050^{\prime \prime}$ thick. For Magnavox TV' Receimers.

List Price \$C. 35

Wo

Special tongued shaft-l' long from mounting facn, torghe $1 / 4$ " wide, $1 / 6$ " long, $0152^{\prime \prime}$ thick. For Lenith TV Receivers.

List Price $\$ \mathbf{C .} 35$

## FOR QUICK, EASY CONVERSION TO "SPECIALS" WITH FIXED SHAFT SECURITY

This feature adapts the $Q$ Control to a "special" in 6 easy steps. (1) Remove control cover by bending up tabs. (2) Remove Resilient Retainer Ring with knife or poirted tool. (3) Remove standard shaft from control base. (4) Insert special shaft in base. (5) Roll new Ring into shaft groove. (6) Replace cover (or add switch).

IRC INTERCHANGEABLE FIXED SHAFTS ARE INDIVIDUALLY PACKAGED with complete instructions and extra Resilient Retainer Ring.

## (10® <br> Q CONTROL ACCESSORIES

## TAB MOUNT CONTROLS

Many recent TV sets use Tab Mount Controls. These are single controls without switch. They differ from standard controls in that bushing is omitted and mounting to chassis is made with two heavy twist-tye mounting tabs.

## IRC TAB-MOUNT KITS

Since assembly of Tab-Mount Controls is so simple, IRC supplies three 3-Part 'lab-Mount Kits which will assemble with any standard plain or tapped IRC Base-Element to provide satistactory "labMonnt Controls. Each TM Kit includes a Tab-type Ground Plate, a control cover and a finger-knurled and screw-diver slotted shaft of appropriate length for universal replacement. Packaged with instruction sheet but without necessary Base-Element.
 lonr. List Price $\$ 0.60$
 lons. List Price $\$ 0.60$
 Joniz. List Price $\$ 0.60$

## EXTENSION SHAFTS

These atfach to rengular shafts, thus (extending lerneth th ans needed size. They frepuntly thatan it posible to ust standard controls for "spucial" johs.

## WIRE WOUND and HV CONTROLS

2 WATT

## WIRE WOUNDS

## (1)

## TELEVISIOS and AUTO SET COHIROLS

For those who prefer factory-assembled special controls, 1 RC provides an exceptionally broad line of over 800 Fxact Duplicate Controls. Fach control is specified closely to manufacturers' original control specifications -both mechanically and electricalls. No modifications required. Carbon and wirewound elements itre used for panel and rear sections as required.
The IRC Exact Duplicate Line now includes over $10 n$ concentric dual controls for atuto radios. Modern in

Exact Duplicate Controlls for TV and Auto Radios

## IRC CONCENTRIKIT ASSEMBLES EXACT DUPLICATE CONTROLS features quick assembly-no modification of parts.

## 9 Basic CONCENTRIKITS

IRC Concentrikits are the common parts to various types of Exact Duplicate Controls. When assembied with parts shown in IRC Parts Number Manua! (Form S-012) or Auto Radio Replacement (Form S-031), they will produce any IRC Exact Duplicate TV or Auto ladio Controls. No cutting or filing of shafts or bush-ings-one minute assembly.

## IRC Printed-Silver Tone Switch Elements

Sensationa! new development in concentric tone switch permits assembly of special Exact Duplicate Auto Ratio Controls in field. Assembles like standard IRC Base flements-no loose parts. Packed with detenttspe banel cover. Consult Auto Radio Replacement (Form S-031) for other parts.

IRC Base－Elements are a revolutionary advance in concentric dual replacement．A relatively small stock at low investment provides wide coverage of electrical requirements of many concentric duals． Each unit is a complete molded control base with element，terminals and collector ring installed． There are no loose parts．

Two types of l3ase－Elements are available：Type I3 for pamel or rear carbon sections and Type W for wire－wound panel sections．

Two Base－Elements are required for each concen－ tric dual．

For use with CONCENTRIKITS in place of Exact Duplicate Shafts．Requires shaft modification to desired specification．KS－2 Shaft Kit is for controls in which both sections are carbon．Use with K－2， K－4 or K－5 CONCENTRIKIT．
Ks－3 Shaft Kit is for controls in which panel sec－ tion is wire－wound and rear section is carbon．Use with K－3 CONCENTRIKIT．

## DIMENSIONS

Overall body dimensious approximately $300^{\prime \prime}$ diameter br．． $133^{\prime \prime}$ long．Axial leads 1 ！${ }^{\prime \prime}$ ．Hhastrations abose ara actual size．

## MICROSTAK SELENIUM DIODES

Type GA Microstak Diodes for use in low current circuits where very high back resistance and low forward resistance are required．Miniature sele－ nium cells with outstanding performance charac－ teristics，they are ideal for such applications as A．V．C．，switching，blocking and bias supplies． Design and small size give high frequency per－ formance not found in conventional cells－tests prove their successful performance in circuit appli－ cations up to 1 megacycle．Hermetically sealed to assure stable operation under high humidity，dust， fumes and clanging pressures．

Dimensions：（Type 6GA1）Length of leads－ $11 / 2^{\prime \prime}$ ． Body length－． $450^{\prime \prime}$ ．Diameter－ $145^{\prime \prime}$ ．（Type 9GA1）Length of leads－ $11 / 2^{\prime \prime}$ ．Body length－． $500^{\prime \prime}$ ． Diameter－． $210^{\prime \prime}$ ．

## TYPE GGAI

Stock No．6GA1－2B．Minimum forward current（at 2 V．D．C．）is 0.5 M．A．and corresponding resistance． 4000 ohms．Maximum inverse current（at 20 V．D．C．） is 20 microamperes and corresponding resistance， 1 megohm．Peak inverse volts－36．Continuous inverse volts－22．Maximum A．C．input（RMS volts with resistive load only）－ 26 ．Temperature range is -55 C to $+90^{\circ} \mathrm{C}$ ．Shunt capacitance－approxi－ mately 25 mmf（measured with two plates back． to－back on 1000 cycle bridge）．

List $\$ 1.67$

Stock No．6GA1－3C．Minimum forward current（at 2 V．D．C．）is 1 M．A．and corresponding resistance， 2000 ohms．Maximum inverse current（at 20 V．D．C．） is 10 microamperes and corresponding resistance， 2 megohms

List $\$ 2.25$

## TYPE 9GAI

Stock No．9GA1－2B．Characteristics are the same as the 6GAl－2B

List \＄1．50
Stock No．9GA1－3C．Characteristics are the same as the 6GA1－3C．

List $\$ 2.04$

## SINGLE CONTROLS

IRC Distributor Controls for Indusiry ofier com－ merrial users a wide selection uf resistance values and two industrial shaft types．Shafts are fixed． This combination of wide selection of values and speedy Distributor delivery holds many advantages for industrial purchasers．These lndustrial Controls are adaptations of the new．compart $\quad$＂＇Q Control Power rating is ${ }^{1} 2$ watt， 500 volts maximum．Elec－ trical rotation is the same with or without switch． $3 / 8^{\prime \prime}$ bushing is brass and held to rlose tolepance for snuer shaft fit

Terminals are heavily timned for easy soldering． and may be bent without becoming noisy．Two locating lugs are provided．either or both of which may he bent down if not needed．Molded hase．Both Types P（）and $I R(2$ are supplied in standard tapers．

TYPE PQ．Full round $3_{4}$ shaft．approximately $z^{\prime \prime}$ from mounting face．with $3 / 8{ }^{\prime \prime}$ long bushing．Avail－ able in 33 stock values as shown．Regular IRC stock numbers are used with prefix PQ

LIST \＄1．25
TYPE RQ．Very short screw－driver slot shaft， $1_{4}^{\prime \prime}$ diameter and approximately ${ }^{1} 2^{\prime \prime}$ long from mount－ ing face with $3 / s^{\prime \prime}$ long bushing．Available in $3{ }^{\circ}$ values as shown．Regular JRC stork numbers are used with prefix RQ．

## （10） PRECISION WIRE WOUND RESSTORS

Improved ceramic winding forms have high insu－ lating qualities，high mechanical strength and low coefficient of expansion．Special winding tech－ nique，developed by IRC，eliminates shorted turns or strains in the winding．
Improved insulation provides greater humidity protection and contributes to longer troublefree service．Improved lug and lead terminals assure perfect electrical connections without strain on the windings，and are easily solderen

IRC offers a complete line of redesigned Precision Wire Wound Resistors. These improved units are fully interchangeable with earlier types, while providing higher standards of performance plus new sizes and terminals.
All IRC Precisions, except Type WW10J, are fur nished with rugged lug terminals for soldered connections. Type WW10J has wire lead terminals 2" long.
All Types except WW8J and WW10J are wound with adjacent sections in opposite directions. This provides windings of low residual inductance. and windings that have little coupling effect from other parts of the circuit. Type WW8J. with single section, is wound non-inductively. Type WW10J has a single section winding, but inductance is minimized by the comparatively small size of this unit.

# MOLDED <br> BORON－CARBON PRECISTORS <br> $1 \%$ ACCURACY <br> $1 / 2$ WATT 

## 1 Mc CLOSE TOLERANCE PRECISTORS

## TYPE MBC

IRC＇s Molded Boron－Carbon Precistor is a precision film type resistor that incorporates the added ad－ vantages of a fully insulated unit．The molded plastic housing provides complete mechanical pro－ tection．and minimizes the effect of moisture． llecause of its greater heat dissipating capacity， load life characteristics for the Type MBC are improved over those of either boron or deposited carbon unmolded units．

## APPLICATIONS

Type MBC Molded Boron－Carbons are particularly suited for applications where unmolded boron or deposited carbon units cannot be used due to the risk of mechanical damage to their coating．insula－ tion breakdown，or high moisture change．

## SPECIFICATIONS

WATTAGE RATING： $1 / 2$ watt at $40^{\circ} \mathrm{C}$ ．ambient （per MLLR－10509A），derated to 0 at $120^{\circ} \mathrm{C}$ ．

RESISTANCE VALUES： 10 ohms to 510 K ohms． TOLERANCE：Standard tolerance is $1 \%$

IDENTIFICATION：Housing is distinctive green plastic．Type designation，resistance value and tolerance are stamped on each unit．

## CONTROLS

BLUE SHAFT RADIOHMS
The most widely accepled line of 15/16" diameter carbon-type con trols, constructed to meet exacting radio, television, and industrial standards. Switch types are tested to assure instant, smooth, positive operation. Blue, anodized aluminum shafts, $3^{\prime \prime}$ long with universal mill. Rating $1 / 2$ watt. Type BSK units have $21 / \mathrm{s}^{\prime \prime}$ brass split-knurl shafts. Switches are universal DPST, easily wired for SPST or 3 -wire use.

## TYPE "AB" ADASHAFT RADIOHMS <br> SELECT THE CONTRO ADD-A-SHAFT TO MEET YOUR NEEDS

Adashaft Controls are now built in the popular Model "B"$15 / 16^{\prime \prime}$ construction. The basic control unit is constructed with a patented stub shaft . . . usable just this way in many cases as a short, screwdriver slotted unis. A selection of nine basis shaft types are available, ranging from $3 / 8^{\prime \prime}$ to $10^{\prime \prime}$ in length, including auto types, insulating nylon and many others. This original, patented Centralab construction permits instant locking . . . resulting in a solid, integral, well aligned unit. There is no price premium on Adashaft . . . you pay for exactly what you need. After odding the required shaft, the units moy be converted to switch type with the new
 porch Aype KB line swiches. All AB chorocteristics same as Model B. Pockogedsingly including all dato.

## CONTROLS (Cont'd)

MODEL "A" 1 WATT PATENTED NON-RUEBING CONTACT CONTROLS

Wall type resistor element provides onethird longer effective resistor length assuring low noise level, closer taper tolerance, double load carrying ability. Patented non-rubbing contact eliminates all friction between resistance element and contacting member assuring accuracy . . . the resistance strip CAN'T wear out.
Ohms Max. Resistance

MODEL 'V" AND "VK' WIREWOUND RADIOHMS 3 WATT LINEAR TAPER
Model " $V$ " smooth action wirewound controls are regularly furnished without switches. Attachable switches are available, as listed above 1-7/16" diameter, $9 / 16^{\prime \prime}$ " depth behind mounting surface. Shafts: "V"${ }^{3}$ " fluted mill: "VK' $-3 / \mathbf{D}^{"}$ fingertip knurl and slot. "VK" series not adaptable to switch type.

STANDARD RESISTANCE TAPERS

SNAF-TITF* REPLACEMENT CONTROL
For speed-servicing of "hidden" volume controls
The revolutionary new Centralab control with are: ing time-saving features:

- SNAP-TITE is installed by just pushing it into the chassis mouritiing hole. It holds itself in place.
- No tools needed for mounting; no nuts, lockwashers, or any other hardware. A clean, fast replacement.
- Six spring clips grip the panel for positive, non-twist mounting. Replaces any standard control type. (One or two locating lugs.)
- Shaft is molded, high-strength polystyrene, fingertip knurled and slotted for screwdriver adjustment. Extends $1 / 2^{\prime \prime}$ from face of mounting surface.
The ten values below will replace $75 \%$ of current rear-end or "hidden" television controls:

FASTATCH WIREWOUND FRONT UNITS
The latest addition to the Centralab control line. These wirewound units are constructed just like Centralab's carbon units and may be units are constructed just the carbon fronts. All linear taper. Replace snapped in place behind the carbon fronts. All inear taper. Replace
any unit rated from 2 to 5 watts, $11 / 8^{\circ}$ diameter. All $\$ 2.25$ ea. List.

## FASTATCH ${ }^{1}$ CONTROL SHOP KITS

FR-22A KIT-Contains the II most popular fronts and the 11 most popular rears. Used in $80 \%$ of dual-concentric controls by major TV manufacturers. Complete with Fastatch switches and adapter bushings. No extra charge for metal cabinet $\$ 39.17$ List FR-228 KIT-Cabinet of Fastatch controls selected by you to meet your own particular needs. Ask your distributor.

CENTRALAB POCKET-EDITION CONTROL GUIDE
Handy size $33 / 4^{\prime \prime} \times 81 / 2^{\prime \prime}$. Gives replacements by TV manufacturers' part numbers. Up-to-date-revised quarterly. From your distributor or direct from Centralab.

# DALE PRODUGRS, INC. NHIT <br> COLUMBUS, NEBRASKA. U.S.A. 

Dalohm deposited carbon resistors are manufactured under a licensed agreement with Western Electric. The matchless stability and accuracy of these precision resistors are the result of years of intensive research and development. Dalohm deposited carbon resistors are manufactured by depositing pure carbon in crystalline form which is bonded to a selected ceramic core. They are iniended for circuits calling for the accuracy and stability of wire wound resistors such as instrumentation, advanced electronics and critical television circuits but with the marked economy of carbon resistors.

Dalohm deposited carbon resistors are sealed from moisture by special silicone coating material having a high dielectric strength, excellent thermal conductivity, and offer high resistance to abrasion.

## DIMENSIONS OF DEPOSITED CARBON RESISTORS

Individually Packed In Plastic Tubes For Your Protection.

## DALE PRODUCTS, INC. NALT COLUMBUS, NEBRASKA U.S.A.

- Completely sealed. - Thermal Shock Proof.
- Fully insulated.
- Non-Hydroscopic.
- Ultra-high-frequency.
- Ruggedized construction.

DALOHM hermetic sealed ruggedized precision resistors are produced under most exacting methods of quality control. They are completely solder sealed in a newly developed envelope of non-hydroscopic ceramic. Ideally suited for use in U.H.F. equipment where only the optimum of quality may be tolerated. Ruggedized for incorporation into "snap-in" component clips. Production tested for resistance to thermal shock, salt-water immersion and humidity.

## LECTROHM IS CREATING NEW DESIGNS AND MATERIALS IN WIRE WOUND RESISTORS FOR NEW ASSEMBLY METHODS

In addition to supplying the electronics industry with a superior vitreous enameled wire-wound power resistors in the familiar sizes and ratings, LECTROHM is producing whole new groups of types, each designed to solve a special problem. Miniaturization and printed circuit restrictions in space and ventilation no longer are complicated by conventional power re-
sistor size standards. New coating materials and winding methods developed by LECTROHM permit an infinite variety of configurations yet retain operating and life characteristics expected of the finest grade vitreous enameled types. LECTROHM engineers will fit the resistor size and shape to your design.

TYPICAL LECTROHMS FOR PRINTED CIRCUITS

Other styles quickly designed for your individual space limitations.

3 to 25 watts. 10 to 25,000 Ohms.

## NEW LECTROHMS FOR UTMOST ECONOMY

Competing in price with sand coated types, but offering a new standard of moisture resistance and long life performance.
; to 20 watts. 10 to 15,000 Olims.

RIB-ON-EDGE LECTROHM (STANDARD SIZES AND VALUES)
155 to 420 watts. .06 to 22 Ohms.

VITREOUS ENAMELED LECTROHM-FERRULE TYPE (STANDARD SIZES AND VALUES)

13 to 190 watts.
To 100.0000 hms ,

## VITREOUS ENAMELED RHEOSTATS Insulated shafts and mounting bushings

Type A-25 - Will withstand rugged treatment under the most odverse conditions. It has unusually smooth mechanical operation. The terminals, made of strong corrosion resistant alloy, ore permanently weided to the winding form. The wound ring is mode on integral port of the refractory base by vitreous enamel. The phosphor bronze actuating arm, with its graphite brush, gives smoothest action and excellent electrical control. Shafts ore insulated. Three terminols permit either potentiometer or rheostot use; ond our new high lempe oture gray enomel gives an added sofety factor.

Types H-50, H-100, H-150 - These ore our newest rheostats and they will give longer service and greater profection. They are designed for use under extremes of humidity and abnormal otmospheric conditions. The unique "buss bar" type brush automatically adjusts tension for complete, continuous contact. It eliminates backlash and prevents binding. It assures
 entire winding surface. Our new high-temperature gray enamel bonding gives you on increo:ed safety foctor and better overall service. These improved rheostats are designed to comply with current stondards of: (o) Military Specificotions JAN-R-22. (b) R.T. M.A. (c) N.E.M.A. (d) "listed by Underwriters Laboratories, Inc." perfect contact with the

RAIING-current ratings shown for oll Rheostats are for use in free air. When units are enclosed values should be reduced about $50 \%$.
Data on non-stock Rheostats-speciol shafts and bushings; values intermediate to those listed; tapered windings; tandem assemblies, etc., furnished upon request.

## FIXED VITREOUS ENAMELED RESISTORS WITH MOUNTING BRACKETS

Five stock sizes fill a greal variety of applications.
Ratings are in occordance with NEMA standards, being based on a temperature rise of $300^{\circ} \mathrm{C}$. in free air.
Data on types, sizes and values not listed herein, and for resistors with intermediate taps, special mountings, etc., furnished upon request.

## ADJUSTABLE VITREOUS ENAMELED RESISTORS

## WITH MOUNTING BRACKETS

Embodying features originated by Hardwick, Hindle, Ine., resulting in a Resistor possessing the many advantages of Virreous Enamel Construction, plus an adiustable feature.

The winding is closely and evenly spaced, assuring ample insulation between turns. Where the winding appears exposed in the track, its underside is tightly embedded in the enamel, the upper surface only being exposed for contact with the adjustable band.
All sizes of Adjustable Resistors listed herein ore furnished complete with mounting brackets and with one adjustable contoct band

TABLE OF RATINGS

## BLUE RIBBON RESISTORS

## TABLE OF RATINGS

Blue Riobon resistors differ from tubular resistors in that they are wound on an ellip tical core. An aluminum bar through the center insures more even distribution of hewt avoiding hot spots
Our gray enamel eliminates crazing which results in failure of the resistive element due to moisture penetration from humidity, sal and other severe atmospheric conditions

Mounting studs-corrosion and rust resistant -peened to the ends of the thru-bar conduct heat to the mounting surface. You can stack two or more units. Our method of fastening the tube to the thru-bar prevents loosening
In comparison with tubular units of equiva lent wattage rating these resistors offer out standing advantages: Higher wattage rating per unit space requirement. - Reduction in space requirement. - Simple sturdy mounting, single or stacked. •Light weight. Lowef inductance.
Designed for and manufactured in accordance with JAN-R-26A specifications.

## METAL FILM RESISTORS

NOBLETTE TYPE NA

## DESIGNAND CONSTRUCTION

A metallic resistance element is deposited on a low loss ceramic carrier using a pyrochemic process developed and patented by Continental. A layer of vitreous enamel protects metal film against unusual atmospheric conditions. They are calibrated to value by means of spiralled grooves cut into the film to increase the resistance path. The NOBLETTE with its axial leads and the NOBLEOY with radial leads permits the use of metal film resistors in a wider range of application.

Notable quantities of these metal film resistors are low intuc-tance-initial accuracy and excellent resistance stability under adverse operating conditions.

## SUPPRESSORS

## AUTO RADIO AND OIL BURNER

CONTINEN゙TAL SLPPRESSORS have been subjected to years of laboratory development and actual road service. They effectively remove noise interference from spark discharge at the plugs and high-tension distributor-yet do not in any way affect the motor car ignition system.

They have mechanical strength to stand the most severe service. The resistance value of 10,000 ohms has been scientifically determined. Sparking across the terminals is eliminated by careful shaping of the clectrodes and cases.

The S-19. S-21 and S-23 Suppressors are equipped with a removable terminal nut for spade type monntings.

## BE RIGHT WITH OHMITE

## VITREOUS ENAMELED RHEOSTATS

## CLOSE CONTROL RHEOSTATS

## Underwriters' Laboratories Reexamination Service Listed

For many years the Ohmite line of ten wirewound, vitreous enameled rheostats, ranging from 25 to 1000 watts in size, has been the most extensive available to industry. Six of the most popular sizes have been carried in stock by Ohmite Distributors and at our factory. Now, the other four sizes, the Model G, 75 watts; Model P, 225 watts; Model T, 750 watts; and the Model U, 1000 watts are available from stock, thus making the entire line of ten sizes quickly obtainable for design and production needs and for emergencies.
FEATURES OF CONSTRUCTION: Ohmite rheostats are designed to produce permanently smooth, close control. The construction is all ceramic and metal; there is nothing to smoke, char, shrink, or shift. All models have insulated shafts with provision to keep the rheostat from turning on the panel. The resistance wire is wound over a solid ceramic core. Each turn is a separate resistance step and is locked against shifting by vitreous enamel. The core and base are also bonded by vitreous enamel. The pivoted universal-action-mounted contact brush is of copper-graphite or silver-graphite on the heavier current rheostats. It rides upon a large flat surface and assures perfect contact without wear on the wire. Pressure

| 0320 | 125 | . 630 | 7.03 |  |  |  |  |

at the contact and at the center lead are independent. The construction is patented under U. S. Patent No. 1,942,495 and Re-issue 19607; other patents pending. Ohmite Rheostat Models H. J. K. L, and N, all marked Series A, are listed under the Underwriters' Laboratories Reexamination Service.

RATING: The current carrying capacities shown in the tables are for use in free air; when units are enclosed, these currents should be reduced possibly as much as $30 \%$ to $50 \%$, depending upon the degree of ventilation. The rated current will cause the rheostat to dissipate its rated wattage when the full resistance is in the circuit.
