# BE RIGHT HMITE 

OHMITE＂LITTLE DEVIL＂® RESISTORS

Ohmite＂Little Devils＂are full $1 / 2$ Watt， 1 Watt and 2 Watt Insulated Composition Resistors and can be used at their full wattage ratings at $70^{\circ}$ C．（ $158^{\circ} \mathrm{F}$ ．）ambient tempera－ ture．They meet requirements of spec－ ification JAN－R－11．
＂LITTLE DEVILS＂are available from stock in $1 / 2,1$ and 2 watt sizes with $\pm 5 \%$ or $\pm 10 \%$ rolerance．The standard RMA values， 10 ohms to 22 megohms can be furnished．In the 1 watt size，$\pm 10 \%$ tolerance values as low as 2.7 ohms are available from stock．

## Stocked in RETMA Values $\pm 5 \%$ or $\pm 10 \%$ Tolerance

## WITH WELDED TERMINALS

High quality，small size，wire－wound resistors ideal for voltage dropping． bias units，bleeders，etc．They＇re extra－ sturdy，all－ceramic，vitreous enameled． These all－welded construction units have welded high－strength alloy termi－ nals．For perfect electrical connection． the resistance wire is welded to the terminal．They give time－proved pro－ tection against shock，vibration，heat and humidity．Their long record of continuous trouble－free service－their wide use in all climates of the world －prove their complete reliability and economy．All units can be convenient－ ly mounted by means of their $1 / 2^{\prime \prime}$ tinned wire leads．

These all-welded construction resistors have welded high-strength alloy terminals. For perfect electrical connection, the resistance wire is welded to the terminal. Units are wire-wound on ceramic cores and protected by Ohmite Vitreous Enamel. Furnished with mounting brackets and on DIVIDOHM with one adjustable lug.

## OHMITE R.F. PLATE CHOKES

This series of seven Ohmite single layer wound solenoid radio frequency plate chokes covers the entire frequency range of 3 to 520 megacycles. The four highest frequency chokes are wound on low power factor plastic cores while the other three units are wound on steatite tubes. Windings are insulated and protected by a moisture-proof coating. The single layer winding is designed to avoid adverse harmonic effects within the recommended operating range and also prevents breakdown from high r.f. potentials.

## 2 WATT MOLDED COMPOSITION POTENTIOMETER - TYPE AB

LITTLE DEVIL® RESISTOR ASSORTMENTS FOR SERVICE USE

Serviceman's assortments of 150 Ohmite "Little Devil," $1 / 2$-watt, or 125. 1-watt or 2 -watt insulated composition resistors, in the 40 values ( 10 ohms to 10 megohms) most frequently used by servicemen. The assortment is offered at the price of the resistors alone-the cabinet is furnished without extra cost! Cabinet is only $9^{\prime \prime}$ long, $43 / 4^{\prime \prime}$ high, and $5 \frac{1}{4} 4^{\prime \prime}$ deep.

## NEW OHM'S LAW CALCULATOR

Redesigned! This new: improved version of the famous Ohmite Ohm's Law Calculator - popular the world over with servicemen, engineers and students - now has scales for solving parallel resistance problems, AND a standard slide rule. More useful than ever! With
 one setting of the slide the calculator gives the answer to any Ohm's Law problem-reading directly in ohms, volts, amperes, and watts. Three of the new scales on the back provide a quick, one-setting means of solving parallel resistance problems. The slide rule scales will multiply, divide, find squares, and square roots.

Ohm's Law Calculator (Cardboard) .........Net Price $\mathbf{\$ 0 . 2 5}$
Ohm's Law Calculator (Plastic)
Net Price 1.50

The Type AB Potentiometer is an exceptionally high quality unit designed especially for industrial, laboratory, radio service and other uses where reliability is particularly important. Because the resistor element is molded, the unit has an exceptionally large safety factor. The power rating of 2 watts is unusual for a unit of such small size. The unit has a very low noise level and low voltage coefficient. It will pass the ArmyNavy 200 hour salt spray test, specification AN-QQ-S-91. The single unit is $1-1 / 16^{\prime \prime}$ diameter and extends $9 / 16^{\prime \prime}$ behind the panel. The dual unit extends $1-3 / 16^{\prime \prime}$ behind the panel. The $2^{\prime \prime}$ long round shaft (including the $3 / 8{ }^{\prime \prime}$ long mounting bushing) is available from stock on potentiometers with all three resistance tapers and on the dual unit. The screwdriver shaft with locking-nut is available from stock on the linear taper units only. A SPST switch, to be attached to the back of the control. can be supplied extra.

## - 6 <br> WARD LEONARD

## 25-Watt - 50-Watt

The Ward leonard 25 -watt (Type $25 R$ ) and 50 -watt (Type 50R) Type Rheostats are especially suited or use in electronic and electrical circuits where gradual and positive resistance change is essential Balanced contact arms, self.lubricating metal araphite contact shoes, and no backlash in the drive shaft combine to assure uniform contact pressure and smooth operation.

Standard shaft length for back-of-board mounting on $1 / 4$ "panel.

Types 5F, 10F, and 20 F. Furnished with wire terminal leads. Brackets supplied on request.

Type 10A, 25A, 50A, 80A, 100A, 160A, 200A. Furnished with mounting brackets and one adjustable band.

Order by Type Number and Resistance Value.

Asterisks (*) in Tables indicate that Resistors are not Stock Items.

## © WARD LEONARD

## AXIOHM

 RESISTORS5 WATTS - TYPE 5X
$\mathbf{1 0}$ WATT5-TYPE $10 X$
Vitreous enameled wire-
wound resistors with $1 / / 2^{\prime \prime}$
tinned copper leads for self.
mounting.
The same fine materials
used in the manufacture of
Ward Leonard Vitrohm Re-
sistors are used in making
Axiohms.
Order by Type Number and Resistance Value.

## OTHER STOCK RESISTORS

Plaque Type - Available in three sizes, 25 -watt, 50 -watt, and 150-watt.
Dise Type - Available in 24. watt size
Non-Inductive Type - Avail able in three sizes, 35 -watt 80 watt, and 160 -watt.

For complete information on all our stoak resistors ask for our Catalog D-130.

40 WATTS - TYPE 405

Vitreous enameled wire-wound resistors built on a strong refractory core, and provided with low mount

Order by Type Number and Resistance Value

# SPRAGUE RESISTORS 

## KOOLOHM ${ }^{\circledR}$ WIRE-WOUND RESISTORS

Wound with wire which is insulated before winding with a flexible ceramic coating. This coating is impervious to heat as high as $1000^{\circ} \mathrm{C}$.

Each resistor is "tropicalized" by a glazed ceramic outer coating and new type end seals which offer complete protection against moisture or any other climatic conditions

- May be mounted anywhere - even flat against chassis or grounded parts
- Extremely high insulation resistance-10,000 volts from surface of ceramic jacket to inner resistance elements

Insulated wire permits winding higher values in layers, which means much smaller physical sizes for each wattage rating

Insulated wire permits true "non-inductive" wound designs

NOTE: ALL NIT TYPES ARE NON-INDUCTIVE

# SPRAGUE RESISTORS 

## BLUE JACKET WIREWOUND RESISTORS

- A NEW Resistar That Can Be Used Almast AnywhereDependable in Critical Equipment, Yet Priced Law Enaugh far Radia.TV Service Wark.
- Ideal far Paint-ta-paint, Terminal Baard, and Printed Chassis Wiring. Axial Lead Design Pravides Secure Maunting, Even Under Severe Vibration.
- Will Satisfy MIL Specificatian Perfarmance Requirements with $35 \%$ to $50 \%$ Reduction in Size.
- Crazepraaf Vitreaus Enamel Caating Guards Against Humidity and Prevents Failure fram Electralysis. Resists Carrasive Industrial Fumes.
- Thermal Expansian Characteristics af the Ceramic Winding Care and Caating Enamel Are Clasely Matched ta Withstand Rapid Thermal Changes.
- Hat Spat Rating af $300^{\circ} \mathrm{C}$ Rise abave $40^{\circ} \mathrm{C}$ Ambient temperature.
- Standard Resistance Talerance: ta 50 ahms, $\pm 10 \%$-aver 50 ahms, $\pm 5 \%$.

## CONSTRUCTION

The TRU-OHM power rheostat will provide smooth variation of resistance under the most severe operating conditions. The all ceramic-metal construction ing conditions. The all ceramic-metal construction ing temperatures. An extra deep core, on which the ing temperatures. An extra deep core, on which the
resistance wire is toroidally wound, means a more conservative power rating.
Types R-50, 75, 100 and 154 have an exclusive torsion spring assembly which provides aniform pressure of the contact brush against the winding at all times. Current flows from the brush through a flexible shunt wire to a large size slip ring. Positive, low-wear contact is maintained against the center terminal by an adequate compression spring. lack lash in the rotating assembly is reduced to a minimum by means of ing assembly is reduced to a minimum by means of tremes of rotation entirely independent at the contact arm assembly.

## SPECIAL FEATURES <br> SPECIAL FEATURES

TRU-OHM rheostats are available with many extras such as off positions. screw driver control, shaft assemblies for special mounting conditions, etc. Prompt engineering service is available for all special requirements. Knobs furnished upon request.

Resistance Max. Amps. Contact brush against the winding at all times. tact is maintained against the center terminal by an

## 5\% AND 10\% TOLERANCE-1/2-1-2 WATT RATINGS

G-H fixed composition resistors are of the highest quality and combine the desirable features of great mechanical strength, permanent electrical characteristics and minimum physical size for a given wattage rating. Leads are differentially tempered to prevent sharp bends near the resistor body while still permitting ready forming to fit a particular arrangement.

G-H resistors are supplied in convenient packages having a perforated top section which permits the tops to hinge, (as shown in the illustration) or to be removed entirely. Since each resistor is held in an upright position by a honeycomb section within the lower portion of the box, the leads of all resistors remaining within a given container are exposed to view. Resistance value and tolerance indication are clearly marked on sides and top cover of the container. These features greatly facilitate stock location and stock control checking.
G-H maintains a complete stock of $5 \%$ and $10 \%$ tolerance resistors in all wattage ratings to insure rapid delivery on all orders.

## PAPER DIELECTRIC CAPACITORS

Custom manufactured to customers specifications. Can be supplied in any practical capacity, working voltage and tolerance. Containers and terminal arrangements may be in accordance with customers drawings.

Capacitors can be manufactured for AC or DC operation . . . . impregnated with Wax, Tensoil, or in the stable, highly superior oil impregnant, G-H PERMANOL. Your inquiries are invited.

## GIRARD-HOPKINS

Small, -oiseless, vitration-proof. Crack-Frool molded casing around molded carbon resistance element. Timed copper pig-tail leads 2 in. long. Resists humidity effects. Ideal for AVC circuits, highgain amplifiers. RTMA color-coded; stamped with resistance value. Precision tested. Standard tcler. ance $\pm 10 \%$.

Made under licensed agreement with Western Electric, these precision resistors are the result of years of intensive research in developing components with extreme accuracy and stability. Carbofilm resistors are intended for circuits calling for the accuracy and stability of wire-wound recuracy aldisthers economy of sistors rith tie marked economy of carbon resistors. Tey serveratory need in test equipment and laboratory instruments. All in all, Carbofilm resistors mect the requirements of ac curacy, stability and economy.

The Carbofilm resistors are a carbon deposit type and are available in the following standard or jobber stock sizes with the resistance value shown in the listing.
packed and sealed in plastic tubes

T9 BULB

AUTOMATIC REGULATION
WHAT IT IS！AMPERITE is an outomotic＂rheariat＂ designed to keep the current in a circuit of o definite value，e．g．， 0.5 amps．Should the supply voltage increase，the AMPERITE will automatically increase in resistance to take up the increase in supply volt－ age．Since AMPERITE is a constant current device，

it con only be used on a fixed load．

## SIZES：

T－51／8 la．Miniature．U．I． ated height．：2 38

 seated thight． $31 / 8 \mathrm{~s}$ ．

## CHARACTERISTIC CURVE

Characteristic curve of a typical Amperite．Approximate curve of any other Amperite con be obtained by multiplying or dividing the current or voltage scale by ony number．
We strangly recommend that you send us your specifications on special problems，and let us recommend the BALLAST TUBE yau need．

## AMPERITE NUMBERING SYSTEM

In general，the AMPERITE number approximately denotes the current－voltage theshold value．For example：

| A MHELATE：NPMEER | 3－4 | 3 H 4 | 10.7 | 1：－11 | 121111 |
| :---: | :---: | :---: | :---: | :---: | :---: |

Base Wiring：Octal， 6 and 9 pin miniature－prongs $2-7$

## ADVANTAGES

Light ．．．Compact ．．．No Moving Parts（Will withstand vibrations of 10 G min．）．．．Her－ metically Sealed（Not affected by altitude or humidity changes）．．．Can Be Changed as Easily as a Radio Tube ．．．Operates Equally Well on AC or DC ．．Inexpensive．

## CAPACITIES AVAILABLE

Current values of 60 ma ，to 5 amps ；threshold voltage 0.4 to 40 V ．Maxinum dissipation per AMPERITE 50 w per tube（ST19 bulb）．Any number of AMPERITES with the same voltage range can be operated in parallel．AMPERITES should not be used in series．

## AMBIENT EFFECTS

Variations of $-50^{\circ}$ to $+70^{\circ} \mathrm{C}$ ．will change the current of an AMPERITE approximately $\pm 2 \%$ on the regulating portion of the curve．

## LIFE EXPECTANCY

Average life 2000 hours prox．；if AMPERITE filament is operated at black temperature－ average life 5000 hours prox．，depending on use．

## AGEING

AMPERITE Ballast Tubes may change ap－ proximately up to $3 \%$ in current if aged for 4 to 8 hours，at maximum voltage．They will change very little thereafter．

## POWER SUPPLIES

We strongly recommend，for any particular application，to fill and return one of our special problem sheets（ASP 343）and permit us to recommend the most suitable AMPERITE．

| Power |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Supply | Dry Cells | 6 Volts | 12 Volts | 26 Volts | 115－Volts |
| Supply |  |  |  |  |  |
| Variation | 2．2－3．0V | 5．5－6．54 | 10．0－14．0V | 22．0－30．0V | 105.125 V |
| Iresires |  |  |  |  |  |
| on load | 1．8－2．0V | 3．4－4．15 | 6．1－6．4V | 17．5－18．5V | 90－95V |
| licquited an |  |  |  |  |  |
| AMPERITE | 0．4－1．0V | 1．6－3．4V | 3．9－7．6V | 4．5－11．5V | 15－30V |
| C＇urrent |  |  |  |  |  |
| Variation | ．29－．32a | ．20－．314 | ．29－．31a | ．29－．32a | ．29－．32a |

The above chart shows the maximum load voltage for the given supply to obtain $\pm 2 \%$ regulation on load．Better regulation is ob－ tainable by increasing the voltage across the AMPERITE．In general，the higher the percent of the supply voltage taken by the AMPERITE， the better the regulation．

## DESCRIPTION:

Each conductor 22 AWG tinned copper, plastic insulation, conductors color coded, twisted into pairs, gray vinyl plastic jacket overall. Suitable for outdoor instaliations.

COLOR CODE
of Paired conductors: Pair Color No. Combination 1-8lack paired with Red 2-Black paired with white 3-Black palred with Green ${ }_{5}^{4}$-Black paired with Blue 5-Black paired with Brown 6-Black palred with Yellow 7-8lack paired with Orang 9—Red paired with White 10-Red palred with Blue 11-Red paired with Yellow 12-Red palred with Brown 13-Red paired with Orange 14 -Green paired with Blue 15-Green paired with Whlte 16-Green paired with Brown 17-Green paired with Orange 19-Green parred with Yelue 20-white palred with Brown 21-white palred with Orange 22-White paired with Yellow 23-White paired with Yellow 24-Blue palred with Orange 25-Ble paired with Yellow
26 - Brown paired with Orange 27-Brown paired with Yellow 28-Purple paired with Red 29-Purple paired with white 30-Purple paired with Green 31-Purple palred with Blue 32-Purple palred with Brown 33-Purple palred with Yellow
34-Purple paired with Orange 34-Purple paired with Orange $36-$ Purple paired with Black 37-Slate paired with Red 38-slate paired with white 39-Slate paired with Green 40-Slate paired with Blue 41-Slate paired with Brown 42-Slate paired with Yellow 43-Slate paired with Orange 44-Slate paired with Black 45-White/Black paired with Red 46-White/Black paired with Green 47-White/Black paired with Blue 48-White/Black paired with Brown
49-White/Black paired with Yellow 49-Whie/Black paired with Yellow
50-White/Black paired with Orang 51-White/Black paired with Purple

## DESCRIPTIDN:

Each conductor 22 AWG solid tinned copper, two reverse serves paraffined, color coded, conductors twisted into pairs, covered with an impregnated double paper wrap, lead sheath overall. Use where $100 \%$ shièlding is required for underground or waterproof require. ments.

| 1243 | 3 | 22 | $7 / 30$ | $.016^{\prime \prime}$ | $.020^{\prime \prime}$ | $.215^{\prime \prime}$ |

## DESCRIPTION:

No. 1267-Two conductors 20 AWG solid tinned enameled cop. per, cotton insulation, color coded, conductors twisted. close copper shield overall.
No. 1267V-Two conductors 20 AWG solid tinned copper, plastic insulation, color coded, conductors twisted, close tinned copper shield overall.
No. 1268_Same as No. 1267 plus waxed cotton braid over shield.
No. 1268V-Same as No. 1267 V plus waxed cotton braid over shield.
No. 1775-Two conductors 22 AWG solid tinned copper, plastic insulation, color coded, conductors twisted, 22 AWG solid tinned copper ground wire under braided copper shield. gray vinyl plastic jacket overall.
COLOR CODE OF CONOUCTORS:
1-8LACK
2-RED

## DESCRIPTION:

No. 1243/4-Four conductors 22 AWG stranded tinned copper, vinyl plastic insulation, color coded. tinned copper shield over two conductors (paired), two conductors (paired) unshielded, gray vinyl plastic jacket overall.
COLOR CODE OF CONDUCTORS: SHIELDED PAIR-BLACK \& WHITE, UNSHIELDED PAIR-BLACK \& RED

No. 1243-Same as No. 1243 /4 except three conductors, tinned copper shield over only one conductor, two conductors unshielded, gray vinyl plastic jacket overall.

COLOR CODE OF CONOUCTORS:
UNSHIELDED-BLACK, RED.
SHIELDED-WHITE

OESCRIPTION:
Two conductors parallel, 18 AWG stranded tinned copper. rubber insulation, color coded, lacquered cotton braid, galvanized steel armor overall.

## KINKLESS TEST LEAD WIRE

STANDARD SPOOL PUT UP: 25 FT., 50 FT., 100 FT., 250 FT., 500 FT., 1000 fT.
APPLICATIONS: As test leads in analyzers, oscillators, multi-meters, and all other types of testing apparatus or wherever an Extra Flexible insulated wire is required. Heavy Duty type designed for television, therapeutic equipment, analyzers, oscillators, etc.

## HIIVOLTAGE \& CATHODE RAY WIRE

STANDARD SPOOL PUT.UP: 25 fT., 50 FT., 100 FT., 250 fT., 500 FT., 1000 FT.
APPLICATIONS: Designed for high-voltage leads for all applications, especially for cathode ray tubes in television receivers and oscilloscopes. Shielded type used to minimize RF radiation in transmitters, X-ray and diathermy equipment. CHARACTERISTICS: High dielectric strength. Resistant to heat, flame and moisture.

## ALPHLEX PVC-105 (Plastic Tubing):

Made of especially compounded resins to offer an extraordinary combination of excellent qualities including high dielectric strength, flexibility, non-flammability, abrasion resistance, oil and chemical resistance, heat stability and resistance to aging. It is specifically recommended for applications involving higer than normal operating temperatures and is approved by the Underwriters' Laboratories for $105^{\circ} \mathrm{C}$ applications. It is compounded with non-migratory resinous type plasticizers and exhibits exceptional oil resistance characteristics. Conforms to the performance requirements of specifications MIL-1-631B. ASTM. D876, ASTM-D922.

## ALPHLEX PIF- 130 (Plastic Impregnated Fiberglass Tubing):

Class $B$ insulation combining the advantages of an inorganic fiberglass base sleeving with the most desirable characteristics of a heat-resistant, very flexible plastic insulation. The plastic compound is formulated to provide the maximum in electrical characteristics, heat stability ( $130^{\circ} \mathrm{C}$ ) flexibility and toughness. This tubing and sleeving conforms to the performance requirements of Specifications MIL-I-3190, NEMA VS1, ASTM D372.

OTHER TYPES OF AVAILABLE ALPHLEX TUBING \& SLEEVING SRF-200 - Silicone Rubber Coated Fiberglass Tubing. SFS-400 - Silicone Impreg. nated fiberglass Sleeving. HTF. 1200 - High Temperature Fiberglass Sleeving. PVC-60 - Low Temperature Plastic Tubing. PLE. 70 - Polyethylene Tubing. VTS. 135 - Varnish Impreg. nated Tubing and Sleeving.

For Full Specifications of Complete Insulating Tubing \& Sleeving Items Write for ALPhlex catalog.

> High-roltage leads to ratbude-raly tabes in anision pertireps, "scilloseroms and in power smpplies and other ajplicatic where a high-raltage cable is reguired. Iligh dinlectric strength, torome eablance and minimm surfare leakage are rery important features of the calle

## BELDEN ELECTRONIC WIRES \& CABLES

 aircraft, marine and auto radio wires

Belden supplies a complete line of auto radio wires and sltielding to haude trery wire requirement in installation and serricing. In installations of this type. the use of the correct urire is baricularly important. Applieations are indicated in the listings ahore.
shielding and bonding cable braided tinned copper

## magnet wire

Nyelad magnet wire cumbines the must desirathe features of Formvar with the well-known toughness and sulvent resistance of Nylon enamel.
For difficult and exacting windings, these plus ralues may represent the difference hetween low and hight rejections.
Syelad will out-perform all other A.I.E.E... Class A.
film-coated wires with respect tu: (1) allility tu
withstand winding abotse and forming meratoms (2) resistance to the solvent artion of insulatink rarmishes and all types of thimmers: (3) resistance to softening at flerated temperatures: (t) solromt crazing: (5) indability.
other trues of Delden Matgnet Wires atrallahle are Beldenamel, simgle cotenamel, and Single Notexenamel.

## SHIELDED PHONO WIRE

ked where small diameter. limymess and extreme flexibility is Hetestiry as for jhono jickup arms and frid wire DESCRIPTION:
\#1822-Single Conductor \#22-7/30 Tinned
Copper Strands, Vinyl plastic insulation, close
inned copper shield hraided owerall.
\#1824 Single Conductor \#24-16/36 Extremely Flexible Tinned Copper Strands, *preial plastio insulation, close timned copper shield hraided overall.
$\# 1825--a \eta t-$.

## TINNED COPPER SHIELD OVERALL

## SHIELDED GRID LEAD WIRE

Thed to renluce loss in crid load use. also to reduce interference cansent DESCRIPTION
\#820-Single Conductor \#20-10/30, \#818-
16/30 Stranded Tinned Copper, low luss rulhwr Mx. $\longrightarrow$ mendation, enton braid lacquered, closely woven
inned copper shiolfl owerall

## TINNED COPPER SHIELDING

Used for shielding and bonding on aireraft, marine and atuto riadio wires and cables. shielus spuaker leads, lead-ing, amplifier wires. DESCRIPTION:
No. 853 to 856 (ompusend af ixtremely flexibly fine soft annealed conber tinned Flat.
No. 860 Composed of extremely flexilule fine soft annealed conpler wires closely vowen, liraided and Rolled Flat

For longer lencths and alternate put-ups-Specify

## SHIELDED HOOK-UP \& LEAD-IN WIRE

Esed to prevent and remluce interference caused by motors, hittension cables, X-ray machines and various units radiating alectrical impulses. seful in prid circuits.

## TINNED COPPER SHIELD OVER RUBBER INSULATION

## MULTI PAIRED INTERCOM CABLES

For use in Intercom Systems as station to station wiring, the cables listed below will handle most installations. Each conductor is 22 ga.
solid soft drawn copper and has an solid soft drawn copper and has an .010 wall of durable color coded plastic. Each pair is individually all with an adequate plastic jacket.

## PLASTIC INTERCOM CABLE

COLUMBIA TELEVISION TRANSMISSION LINES

## PERMALINE INTERCOM AND TELEPHONE WIRE FOR OUTSIDE USE

For applications requiring a durable wire on outside ductors eliminate voltage drop and iong life High Molecular Weight Polvothylene insulation will give many extra years of useful life. Wire will not stretch. Twisted conductors are black but one conductor has a colored marker thread for easy identification.

## / PERMALINE <br> TELEVISION TRANSMISSION LINE

A new type of Transmission line, inPulated with High Molecular Weight Polyethylene for extremely long life. Accelerated aging tests have shown this insulation to have a life of from 20 to 50 years n outside use. Contains Carbon Black for maximum resistance to sunlight. Will withstand severe below-zero temperafures, in addition to salt air, moisture, dirt, acids and other factors hat cause deterioration in ordinary types of television lines. 5pecify COLUMBIA "'PERMALINE' for the best in long life Television Transmission Line.

POLYETHYLENE BAG.

## PERMALINE ROTOR CABLES

An entire new line of Rotor Cables jacketed with the same High Mole cular Weight Polyethylene described above. Will provide exceptionally long life under all conditions.

New, convenient, handy package that is sure to be appreciated by the service man and others handing television installations. Small size the at sealed, clear Polyethylene package protects the wire until it is to be used. Cable is insulated with genuine High Molecular Weight cable. cable
20 Ga. Str. 7/28 4 Conductor Flot Rotor Cable
Outside conductor is tinned copper for easy identification.

TELEVISION
SERVICE LITE

This newly designed service lite is one of the finest items in our entire line of television service accessories. Has a $21 / 4$ inch highly polished aluminum reflector and wide opening spring clamp that will permit this lite to be attached almost anywhere inside the television cabinet leaving both hands free to work. Lower part of clamp has rubber covering that will hold firmly wherever it is placed. Comes complete with $71 / 2$ watt 110 Volt bulb and six foot parallel plastic cord with unbreakable male plug for attaching to baseboard or into service block on our all purpose Tele. vision Service Cord. Display card furnished with orders for $\mathbf{2 5}$ or more lites.

Cat. No. 185
deluxe television service lite

## microphone cables

Cornish Microphone Cables are available in plastic and rubber insulations. Plastic cables utilize polyethylene insulation on the conductor with outer viny plastic jacket. They are designed for low capacitance, high insulation resistance, low attenuation; and withstand severe service under all operating con. ditions.

| RUBBER MICROPHONE CABLE |  |  |  |  |  |  |  |  |

## antenna control cables

Cornish TV Lead-in Cables are furnished oniy in pure virgin polyethylene insulation to insure long life under severe operating conditions and are designed so that only exceptionally low losses at high frequencies are experienced. They are available with pure copper or copperweld conductors. Copperweld 300 Ohm lead in cable has $11 / 2$ times the tensile strength of copper and has approximately $21 / 2$ times greater flexing life. It insures long service life in IV deria! installations requiring long runs.

## "JAN-spec" WIRES

WIRES TO GOVERNMENT SPECIFICATION
ARMY • NAVY • AIR FORCE JAN-C-76 - MIL - ANJ-C-48A

## TYPE SRIR HOOK-UP WIRE

Canstructian: Tinned copper-stranded or solid. Nominal insulation thickness, . $015^{\prime \prime}$ Thermoplastic. Rating 1000 VOLTS (working). Temperatures -40 C to +60 C .
Sizes: 28 to 6. Colors: all NEMA standard colors. Tracers on solid colors also available. Catalog No. 100.

## TYPE SRIR GLASS BRAID

Construction: Tinned copper with thermoplastic insulation and braided glass and flame resisting lacquer finish over all. Temperature rating, -40 C to +60 C .
Sizes: 28 to 6. All standard NEMA color coding and also available with tracers on solid colors. Catalog No. 101.

## TYPE WL - NYLON - HOOK-UP WIRE

Construction: Tinned copper stranded or solid. Nominal insulation thickness . $010^{\prime \prime}$ Thermoplastic with . 005" extruded nylan. Rating 600 VOLTS (warking). Temperature rating -40C $10+60 C$.
Sizes: 28 to 6. Colors: bright standard NEMA colors, also tracers an solid calors. Catalog No. 102.

## TYPE SRHV HOOK-UP WIRE

Construction: Tinned copper, stranded or solid. Nominal insulation . 031 " Thermoplastic. Rating 2500 VOLTS (working). Temperature rating, -40 C to +60 C .
Sizes: 28 to 6. Colors: all slandard NEMA colors, also available tracers on solid colors. Catalag No. 103.

|  | TYPE MIL-W-16878-A |
| :---: | :---: |
|  | Construction: Tinned copper, stranded. Nominal insulation Thermoplastic, with or without nylon jacket. Types 8 and $C$. Temperature rating -54 C to +105 C . |
|  | Sizes and Colors: all sizes and standard NEMA colors. Catalog No. 120. |

## TYPE SRRF HOOK-UP WIRE R. F. INSULATED

Construction: Tinned copper stranded, polyethylene insulated with or without glass braid. Rating 1000 VOLTS (working).

Sizes: 24 to 6. Colors: all NEMA standard colors. For use in radio frequency circuils. Catalog No. 105.

## AIRCRAFT WIRE

## TYPE ANJC - 48-A - Aircraft power and lighting cable

Canstructian: Flexible tinned copper, vinyl insulction with cotton braid with fungicidal treatment. Flame resisting lacquer finish. Low Tension: 800 VOLTS (working).

## 

Sizes: 22 to 4/0. Colors: White.
Cotolog No. 200.

## TYPE AN-C-168

Canstruction: Flexible tinned copper, vinyl insulation with cotton braid with fungicidol treotment. Flome resisting locquer finish. Tinned copper broid shield. Low Tension: 600 VOLTS (working).

Sizes: 22 to 4/0. Colors: White.
Cotalog No. 201.

## TYPE MIL-W 5086 \& MIL-W 5274 A AIRCRAFT,

 power and lighting cables. TYPE 1Construction: Tinned copper stranded, synthetic resin insulation with nylon jocket. Roting 600 VOLTS (working).

Sizes: all standard gauges. Color: White.
Catalag No. 202.

## TYPE MIL-C-7078

Construction: Tinned copper stranded, synthetic resin insulation with nylan jacket and tinned copper shield, Rating 600 VOLTS (warking).

Sizes: all standard gauges. Color: White.
Catolog No. 203.

## TYPE 2

Construction: Tinned copper stranded, synthetic resin insulation plus glass braid, plus synthetic insulation with overall nylon jacket. Rating 600 VOITS (working).

Sizes: all standard gauges. Colars: White.
Catalag No. 204.

## TYPE MIL-C-7078

Canstruction: Tinned copper stranded, synthetic resin insulation plus glass braid, plus synthetic insulation with overall nylon jacket and tinned capper shield. Rating 600 VOLTS (working). Sizes: all standard gauges. Colors: White.
Catalog No. 205.

## microphone cable and intercom cable

PLASTIC JACKETED MICROPHONE CABLE - fwo conductor
Construction: General purpose, low loss, poly insulated, tinned copper shield. Stranded,
twisted two conductor with filler. Nominal capacitance per foot between conductors 18 mmf .
Size: Outside diameter $.225^{\prime \prime}$.
Catalog No. $601 / 2$.

## RUBBER JACKETED MICROPHONE CABLE

Construction: Extra flexible stranded tinned copper conductors, cotton serve between conductor and insulation and between shield and outer jacket. Braided tinned copper shield, covered with tough rubber outer jacket. For use indoor and outdoor.

Sizes: 20 gauge stranded tinned copper, available from one conductor to eight conductors. Catalog No. 603/1-8.

## SHIELDED AUDIO TRANSMISSION LINE

Construction: Solid two conductor thermoplastic insulated twisted pair, color coded with braided shield with thermoplastic jacket overall.
Catalog No. 604.

INTERCOM CABLE

Construction: Twisted pairs, one to fifty-one pairs, twenty-two gauge solid copper, thermoplastic insulation, overall thermoplastic jacket or overall treated cotton braid.
Catalog No. 605.

IMMEDIATE DELIVERY FROM WAREHOUSE STOCKS

Sizes 24 thru $3 / 8$ on spools completely enclosed in plastic wrapping. Sizes $7 / 16^{\prime \prime}$ thru $21 / 2^{\prime \prime}$ in coils. GP--general purpose Insulite qualified under spec. MIL-i-631B, Type F, form U, Grade A, Classes 1 and II, Categories 1 and 2.

## ABOUT INSULITE

Insulite, commercial and specification grade Vinyl tubing is manufactured from only the highest quality materials. Extreme care in preparing the compound formulations assures product uniformity. The most modern of plants, complete with compounding facilities and controlled extrusion techniques, together with modern inspection equipment, provides rigid physical and visual inspection on each length of lubing, assuring a finished product fully guaranteed against defective workmanship and materials. A product development laboratory is engaged in constant research to provide you with the finest in tubing.

## PROVED DEPENDABILITY

Copperweld Ground Rods and Clamps provide the reliable grounding protection necessary for successful performance, elimination of interference and safe operation of radio and television equipment. The rugged steel core gives the stifness you need for easy driving. High conductance and lasting protection against corrosion are provided by the heavy molten-welded copper covering.
Millions of Copperweld Ground Rods are rendering permanent grounding protection. You're SAFE when you use Copperweld - the only Molten-Welded Ground Rods. They give you PROVED dependability - PROVED economy - PROVED longer servico.

"Copperweld Radio and Television Economy Ground Rods With Copperweld Annealed 60" Pigtail (No Clamp Needed).

## COPPERWELD GUY STRAND

Ideal for guying radio and television antenna masts and towers. It provides greater safety, permanent high strength and rust proof construction for the life of the antenna. Furnished in 2 sizes, 3 No. 18 (breaking strength 550 Lbs.) available in 100', 200', 500' and $1,000^{\prime}$ coil lengths; and 3 No. 14 (breaking strength 1,000 Lbs.) put up in $250^{\circ}$ and $500^{\circ}$ coil lengths. Mast popular size is 3 No. 18 put up in $500^{\prime}$ lengths in an octagon-shaped box, which is illustrated.

## COPPERWELD ANTENNA WIRE

Preferred for many years by professionals and amateurs. Because of its high strength, it maintains a fixed length. Furnished bare in 4 sizes. No. 10 Awg. No. 12 Awg, and No. 14 Awg are available in $100^{\prime}, 150^{\circ}, 250^{\prime}, 500^{\prime}$ and $1,000^{\prime}$ coil lengths. No. 14 is also coiled in 2,500' lengths. Size No. 18 Awg is put up in 3,000.ft. spools. Sizes 10,12 and 14 are also made with Polyvinyl. chloride (PVC) Insulation.

## COPPERWELD GROUNDING WIRE

Used to connect antenna mast to ground rod. Annealed for easy handling. Available in two sizes, No. 8 Awg and No. 10 Awg. Coils are furnished in various lengths ranging from 50 to 500 ft .

Copperweld is also used for television twin-lead wire, coaxial cable, resistor and condenser pigtails, radio fube parts and various allied components manufactured and sold by other companies.
Additional information available upon request.

## COPPERWELD STEEL COMPANY

SINGLE BAY MODEL ALSO AVAILABLE
MODEL TV－ 355
For the＇intermediate areas＇or in between fringe and primary areas The single bay unit gives outstanding performance．Individual shipping weight： 7 lbs．

## FOR THE HARD TO REACH AREAS IT＇S THE 4 BAY INVADER

（2 Bays of Model TVS－ 356 with Stacking Harness）Proved reliable reception up to 200 miles in the deep fringe．No bulkier than other super fringe antennas and less mast is required．
Stacking Kit for 4 bay model is Model TV．357．Shipping weight： 4 lbs．

## NEW SNAP LOCK DESIGN

with positive locking action that improves with age． All aluminum－completely pre－assembled－cuts in－ stallation time and costs．
The powerful WARD INVADER is designed for the high gain，flat response needed for good black and white and Color reception．Gain variation across any VHF channel less than I db ．
High front to rear ratio to eliminate ghosts and co－ channel interference．Close stacking（29＇）makes the Invader a neat compact installation and is particularly adapted for a rotator．
The Invader is designed to bring in reliable TV reception to areas otherwise inaccessible．
Standard package is TVS－356（2 single bays with stack－ ing harness）．
Shipping weight： 13 lbs．
Model TVS－356
（

## WARD＇S TROMBONE VHF．UHF Designed for high gain on all channels－UHF and VHF．8－elements properly spaced and streamline in design．Engineered for sharp di－

 rectivity， 300 ohm impedance match and low VSWR．Completely preassembled．Model TV－132－Single Bay ．．．individually packed ．．．shipping weight $53 / 4$ lbs．ea．．．． 6 units standard quantity．
Model TVS－142－Double Bay ．．．individually packed ．．．shipping weight II lbs．ea．．． 3 units standard quantity．
Model TV－132
Pat．No． 2538915.

## WARD＇S UHF CORNER REFLECTOR

A new UHF antenna designed for weather resistant service．Fan dipole rigidly mounted to prevent antenna flutter．Uses air gap as insulation to prevent icing， and short circuiting－a rigid rear mast mount．A new fold－up design all aluminum construction to prevent rusting and giving lasting performance．

Litlle Chief Model TV－260．
Model TV－260－Individually packed ．．． 6 units standard quantity ．．．shipping weight $31 / 4 \mathrm{lbs}$ ．ea．

Pat．No． 2538915

## AUTO AERIALS

# Featuring Revolutionary NEW Dura－ramics made of Durable，corrosion proof Fiberglass 

DURA－RAMIC

FIBERGLAS＊aerials made of the same miracle material that has revolutionized fishing rods and is being widely used in the new experimental automobile bodies．Made from millions of fibers of glass，woven together and impregnated with resin under terrific pressures，the FIBERGLAS completely protects the imbedded electronic wires from all bad effects of weather．Will bend almost double without damage．Thoroughly tested under the most rugged field conditions，Dura－ramic aerials have been proved electronically satisfactory by famous electronic testing organizations．Available in 6 colors to match or contrast car colorings．Available in yellow，brown，red，green， blue and white．

Model TGF－1＿Front Mount－Master of 6 － 6 lbs ．
Model TGR－1－Rear Mount－Master of 6 － 9 lbs ．

## PA－1 ASSORTMENT PACKAGE

Holds 12 TSF－I（Front Mount）Aerials 2 each of the 6 colors Ind．packed in a master carton Shipping $W+12$ lbs．

## PA－2 ASSORTMENT PACKAGE

Holds 12 TGR－1（Rear Mount）Aerials 2 each of the 6 colors Ind．packed in a master carton Shipping $W$ t． $17 \mathrm{~s} / 8 \mathrm{lbs}$ ．

## PA－3 ASSORTMENT PACKAGE

Holds 6 TGF．I（Front Mount）Aerials 1 each of the 6 colors Ind．packed in a master carton Shipping Wt． 6 lbs．

## PA－4 ASSORTMENT PACKAGE

Holds 6 TGR－I（Rear Mount）Aerials 1 each of the 6 colors Ind．packed in a master carton Shipping $W 4.81 / 2 \mathrm{lbs}$ ．

## DURA－RAMIC SELF SELLING DISPLAY

Dura－ramic aerials are available in handsome display cartons which tell the whole Dura－ramic story and show an assortment of the six complementary Dura－ramic colors．The package WDD－4 is a salesman you add to your staff．Enclosed with each Display is a colorful Window Streamer．

WDD－4 Display Box of $6\left(1\right.$ each color）．Shipping wt． $6 \frac{1}{4}$ lbs．
＊TM－Reg．OCF－Corp．

## EACH WARD AERIAL MODEL COMPLETE WITH A WARD ELEKTRAN LEAD CABLE

Made of the finest insulating materials－Polyethylene，wire shield braid， oil and abrasion－proof vinylite．WARD＇S exclusive lead connector fitting provides an easy coaxial fonnection， $100 \%$ shielded．Bayonet adapter for pin plug included so lead will fit every car radio．

## LEAD EXTENSIONS

Provides additional lead length required for fender installation．Covered by one or more of the following Patent Numbers：104968， 119160. 2152316，2251889，2252671，2269947， 2366634.

## AUTO AERIALS CHROME MODELS

World Famous WARD Exclusive Patented

## EIGHT－BALL <br> Non－Disappearing

TOP COWL OR FENDER MOUNTS

Completely installed from the outside in 5 minutes ．．．at any desired angle．Fits any car． Rugged construction．Completely rattle－proof． Smart appearance．The universal，most popular auto aerial．
Three sections：adjustable from $56^{\prime \prime}$ to $22^{\prime \prime}$ ． $36^{\prime \prime}$ Elektran Cable．

Model TCF－3B－Individually packed， 12 to master carton， 12 lbs ．Individual weight I lb ．

Model TCF－3C－Same as Model TCF－3B with $54^{\prime \prime}$ lead．

MAJORETTE

A new，top－quality aerial priced to meet the keenest competition． 3 Sections extend to 56＇．Triple chromed on brass．Ward＇s exclusive 8－Ball top cowl or fender mount． Genuine Elektran lead cable．Quickly and easily installed from outside．
Individually packed 12 to master carton－ 121／4 lbs．

Model TA－3－36＂lead
Model TB－3－54＂lead

## SIDE COWL MOUNTS

Two stanchions for sturdy installation．Smartly designed in－ sulators with chrome caps．Conversion kit for torpedo bodies included．
LONG RANGER
Special sensitivity for low signal strength areas．Two stanchion，triple chrome plated，rattle－proof．

Four sections，extends to $100^{\prime \prime}$
Model 5C－8 36＂Elektran Cable
EZ－on installation
Individually packed， 12 to a master carton， 21 lbs．Indi－ vidual weight，I lb． 10 oz．
SKY QUEEN
Smartly styled for side mounting．Rugged construction． Finest quality heavy duty brass tubing，with corrosion－fres triple chrome plate．Rattle－proof．

Three sections，extends to $66^{\prime \prime}$
Model SC－6 36＂Elektran Cable
EZ－on installation
Individually packed 12 to a master car－ ton， $123 / 4$ lbs．Indi－ vidual weight．I lb．

## «世世 JOBBER DISPLAY RACK

Here＇s the modern way to store，as well as display，the Ward Auto Aerial line．This beautiful permanent black wrought iron and expanded metal rack with yellow，white and black trimmings will attract every eye ．．．and will sell more aerials for you．
Model WJD－1－Contains 24 TCF－3B and 12 TCF－3C assort－ ment．Shipping weight 53 lbs．
Model WJD－2－Contains 36 TCF－3C assortment．
Model WJD．3－Contains 36 TCF－3B assortment．
DEALER DISPLAY RACK $\rightarrow$
Colorful and compact in black wrought iron with yellow， white and black sign．Ward＇s new permanent display rack will＂dress－up＂any show room．For practical＂see－it＂demon－ strations，an aerial can be mounted on the side of the rack． Model WDD－1－Contains 3 TCF－3B and 3 TCF．3C assort． ment．
Model WDD－2－Contains 6 TCF－3C assortment．
Model WDD－3－Contains 6 TCF－3B assortment． Shipping weight 9 lbs．

## BUILT FOR RIGOROUS SERVICE

## UNIVERSAL SWIVEL MOUNTS

Antennas built for the hardest mobile use. Separate components may be combined to meet any requirements. These rear-mounting Transmitting Antennas are designed for the $\mathbf{2 5 - 4 5} \mathrm{mc}$. services. Base mounts in such a way as to allow the whip rod to be held vertically regardless of contour of vehicle body.
$\leftarrow$ WCA-3B SINGLE ROD

Special Alloy Whip Rod of maximum resilience and durability. $84^{" ~ S i n g l e ~ r o d ~ f o r ~}$ use in the range of $\mathbf{3 0}$ to 45 mcs . NonCorroding, stainless steel tapared for proper stress distribution. Base Adapter threaded $3 / 8-24$ to permit mounting on WCA-3 Base or WCA-3A Spring.

Individually packed. Approx. wt. $11 / 2 \mathrm{lbs}$.

## SWIVEL BASE

Swivel base for mounting at any desired point. Half balls of cast aluminum tapped $3 / 8-24$ to accept whip rods and shock springs. Insulator of black bakelite - rubber gaskets - steel backup plate. All screws are Allen Head type with wrenches supplied.
Individually packed. Approx, wt.: 1 lb .10 oz.

WCA-3

## SHOCK MOUNTING SPRING $\rightarrow$

This sturdy spring is used to lessen damage to the whip rod. A flexible lead through the center of the spring maintains constant electrical impedance through the spring assembly. $3 / 8-24$ stud on one end - $3 / 8 \cdot 24$ tapped hole on opposite end - approximately $6^{\prime \prime}$ in height made of oil tempered wire.
Individually packed. Approx. weight: $21 / 2 \mathrm{lbs}$.

WCA-3A

## ROOFTOPANTENNA <br> 

This model is designed for taxicabs, police services, and others using the 140 to 165 Megacycles frequencies. Installed entirely from the outside of vehicle - 12 ft . length of RG-58/U coaxial cable attached permanently to antenna. Whip rod is replaceable.
Individually packed. Approximate weight: I lb. MODEL WCA. 18

When your order is shipped, a Postage Paid Return Card is enclosed in the shipping package. Purchaser returns card to Davis Electronics, giving MODEL and YEAR of car and number of Bumper Mount Bracket purchased. An INSERT to fit the bumper will be sent WITHIN FIVE DAYS without charge.

## VAARO BASE SECTIONS

Made of Solid Hex Stock. Heavy chrome plated. $3 / 3^{\prime \prime}$ SAE $\quad 12^{\prime \prime} \mathrm{V}-104 \ldots \ldots . . . . . . . . .$. threaded studs at each end fit all standard antennas. $\quad \begin{array}{ll}24^{\prime \prime} & \mathrm{V}-104 \\ 36^{\prime \prime} & \mathrm{V}-104\end{array}$

VAARO FIBREGLAS ANTENNA WHIPS
Fibreglas has been selected as the most nearly perfect material for Vaaro ANTENNA WHIPS as it ideally takes the road shocks and constant whipping to which antenna whips are subjected. VAARO ANTENNA WHIPS possess remarkable resilience. In fact, while they can be bent into an almost complete circle, they spring immediately back into a straight position with no danger of taking a permanent bend. They are light in weight and so impose less strain on mounts.

## VAARO <br> "WHIP CLAMP"'

ANOTHER VAARO FIRST! The Vaaro "Whip Clamp' securely fastens to the roof water drain of any make car without damage to the paint or metal. Allows the whip to be fastened down to car roof level for garage storage, heavy low wooded areas, etc., etc. Brass construction, cadmium plated. Installed in 30 seconds. V-109 Price: $\$ 1.79$

## VAARO "WHIP FLEXOR'"

All products are avallable at your distributors, or write
VAARO ELECTRONICS DIVISION since 75 meters and other low frequencies began a new problem has arisen. Any change of antenna (voltage portion) in relation to car body, changes loading and therefore changes output 'tremendously. This problem has been overcome by the "WHIP FLEXOR" which serves a dual purpose . It is designed to keep the whip perpendicular at extremely high speeds while allowing the whip to be brought down in a horizontal plane for garage storage, etc. This elimination of base section spring prevents bad "QSB" action on the receiver end.

Behind every TRIO antenna is the RESEARCH - ENGINEER. ING - EXPERIENCE and CRAFTSMANSHIP that has made TRIO the leader in antenna development.

## TRIO - THE COMPLETE LINE

yagis conicals "Vari-cons" radar screen types colinear arrays UHF \& REFLECTOR TYPES CONICAL-YAGIS

## AMERICA'S NO. 1 CHOICE THE TRIO " 88 "

More DB gain per dollar cost! Uses famous TRIO "VARI-CON" head and "INSTA-LOK" clamps. Completely preassembled, ready to unfold and install. Ruggedly constructed. Extra husky boom and sturdy elements of highest grade oluminum. Mycastyrene insulators for superior performance. The best buy on the market today! Available in single or two. bay models.

## THE TRIO "99"

Channels 2-13
A well-known broadband Yagi type featuring sturdier construction, higher quality materials and faster assembly resulting from the use of TRIO'S famous. "InstaLok" clamp. Higher gain and reduced side and rear pickup are enginecred into the " 99 " as a result of TRIO research and "know-how

## THE TRIO "77"

## Channels 2-13

High gain, broadband type now greatly improved by TRIO research and engineering "know-how". Exclusive "Insto-Lok" clamps. Sturdier boom and elements. Low wind resistance and bolanced for rotator opcration.

## (2) <br> CHANNEL MASTER CORP.

America's most complete line of TV antennas - more than 200 models to answer all reception needs in every signal area!

## for strong signal areas!

The

## MAVERICK

A complete line of conicals at sensational low prices!

Here's the lowest-priced, fullest conicol line you've ever seen - a complete series of 22 different models. "Movericks" provide outstanding reception wherever conical ontennas find application. Available "Super-Sembled" and non-assembled.

The "mavericks" con be atocked for greater sersifivily

## "MAVERICK 300"

(12 different models)
The first and only full line of conicals campletely "SuperSembled"! No hardware, no toals, no tightening!
"'MAVERICK 340"
(10 different models)
Feotures "Notch-Lock" clamp plate - elements can't furn or twist loose! Non-assembled - installs in minutes. Straight bar reflector elements completely preassembled.

## for weak signal areas!

## The CHAMPION

## RAINBOW

The fabulous yagi that features TriplePicture Power.

Best for black-and-whife!
No other antenna provides such outstanding long-distance reception in black-and-white. Gives brilliant performance on every channel.

## Ready for color!

No othe; antenna is so well-prepared for the exacting requirements of color TV: unique high gain, flat frequency response, extremely narrow polar pattern, highest front-toback ratios.

## Features Channel Master's famous Tri-Pole

This amazing triple-powered dipole gives excellent Low Band gain, and acts as three separate dipoles, in phase, an the High Band.

COMPLETELY PREASSEMBLED, INSTALLS INSTANTLY. ALL-ALUMINUM - SEAMLESS TUBING THROUGHOUT.
three Great models avallable
Champian RAINBOW
madel no. 330 - for suburban and fringe areas.
Challenger RAINBOW
madel na. 332-eronomy model, featuring butted tubing.
Champion SUPER RAINBOW
model no. 331-for weak signal and remate TV areas.

Write for complete catalog.

## WORLD'S LARGEST MANUFACTURER OF TV ANTENNAS AND ACCESSORIES

CRYSTAL HOLDER SOCKETS AND ADAPTERS

SINGLE CRYSTAL HOLDER SOCKET takes . $095^{\prime \prime}$ dia. pins spaced $1 / 2^{\prime \prime}$. Molded hightemperature polystyrene with phosphor bronze one plece contacts and solder lugs. Mounts behind chassis or panel up to $1 / 8^{\prime \prime}$ thick. Punching templet and mounting brass screws supplled. Cat. 50u CRYSTAL HOLDER SOCKET Amateur Net $\$ .21$ Cat. 53 3-GANG SOCKET for $1 / 2^{\prime \prime}$ spaced small pin crystal holders. Acrylic plastic.

Amateur Net 8.65 Cat. 56 6-GANG SOCKET for $1 / 2^{\prime \prime}$ spaced small pin crystal holders. Acrylic plastic.

Amateur Net $\$ 1.25$

Cat. 5-75 CRYSTAL HOLDER ADAPTER takes small pin $1 / 2^{\prime \prime}$ spaced holder and plugs into $1 / 4$ " spaced sockets or in any 5 or 6 prong sockets.

Amateur Net $\$ .35$
Cat. 75-5 CRYSTAL HOLDER ADAPTER recieves pinspaced $3 /{ }^{\prime \prime}$, and plugs into standard $1 / 2^{\prime \prime}$ spaced sockets or octal sockets.

Amateur Net 8.35

## "vest POCKET" beams Other HAM Equipment

## DIPOLE ANTENNA CONNECTORS

Solderless, strain relief type center connector for constructing your awn dipole antenna. Sturdy, low loss acrylic plastic. For standard 300 ohm line. Cat. 261 DIPOLE ANTENNA CONNECTOR

Amateur Net 8.35
Cat. 262 HEAVY DUTY DIPOLE ANTENNA CONNECTOR for use with heavier copperweld 300 ohm line. Similar to above

Amateur Net $\$ .50$

## DIPOLE END INSULATORS

Antenna end insulator for use with dipole type antenna made with standard 300 ohm transmission line. Sturdy low loss acrylic plastic. $43 / 8^{\prime \prime}$ long.
Cat. 251 DIPOLE END INSULATOR
Amateur Net \$ 30 Cat. 252 HEAVY DUTY END INSULATOR for use with heavier copperweld type 300 ohm line. Similar to above 4 5/8' long

Amateur Net $\$ .40$

# MOSLEY "VEST POCKET" <br> <br> ROTARY BEAM ANTENNAS 

 <br> <br> ROTARY BEAM ANTENNAS}

Mos.ley "Vest Pocket" beam design provides rotary arrays approximately one half the size of standard types. Sturdy, precision made loading coils in each element permit much shorter element lengths yet provide performonce often equal to many full size beams.

## 3 ELEMENT, 20 METER "VEST POCKET" ROTARY BEAM ANTENNA

Model VPA20-3, MOSLEY "Vest Pocket" 3 element 20 meter Rotary Beam is complete-ready to assemble. A TV rotor will support and turn the MOSLEY 20 meter beam under normal conditions. The driven element coil is designed to match 52 ohm co-ax line and will easily handle full KW. Pre-drilled and pre-tuned to 3 frequencies, $14 ., 14.1,14.2 \mathrm{mc} .7 .5 \mathrm{Db}$ forward gain over dipole. 28 Db Front-to-Back ratio. 1.05/1 SWR at resonant frequency. Less co-ax, rotor \& mast.---
----Amateur Net. $\$ 79.95$

## 2 ELEMENT, 20 METER " VEST POCKET"' ROTARY BEAM ANTENNA

Model VPA 20-2, MOSLEY "Vest Pocket" 2 element 20 meter Rotary Beam has the same sturdy construction as VPA20-3, above. The 2 elements are correctly proportioned to practically eliminate end-fire. Pre-tuned to 3 frequencies, $14 ., 14.1,14.2 \mathrm{mc}$. S Db forward gain over dipole. 20 Db Front-to-Back ratio. 1.2/1 SWR at resonant frequency. Less co-ax, rotor \& mast. ------ Amateur Net. 855.95

## 2 ELEMENT, 40 METER " VEST POCKET"' ROTARY BEAM ANTENNA

Model VPA40-2, MOSLEY "Vest Pocket' 2 element 40 meter Rotary Beam provides outstanding 40 meter beam performance. Heavy duty construction assures years of reliable operation. Steel element supports are factory welded to steel boom. Loading colls are precision wound and driven element coll matches 52 ohm co-ax line. Pre-tuned to 3 frequencies, $7 ., 7.1,7.2 \mathrm{mc}$. 5 Db forward gain over dipole. 19 Db Front-to-Back ratlo. 1.1/1 SWR at resonant frequency. Less co-ax, rotor \& masi. - - - - - - - - - - - - Amateur Net. $\$ 74.95$

## 3 ELEMENT, 10.15 METER "VEST POCKET" ROTARY BEAM ANTENNA

Model VPA1015-3, MOSLEY "'Vest Pocke:" 3 element 10, 11, 15 meter Rotary Beam is tuned to one band at a time. The VPA1015-3 Rotary Beam is pre-tuned to 7 frequencies, $28,28.5,29 \mathrm{mc}$.; 27 mc .; 21, 21.15 , 21.3 mc . Driven element coil matches 52 ohm co-ax line. $71 / 2 \mathrm{Db}$ forward gain over dipole. 20 Db Front-toBack ratio. 1.2/1 SWR at resonant frequency. Less coax, rotor \& mast.- $-\cdots \cdots-A^{-}$Amateur Net. $\$ 69.95$

## 2 ELEMENT, 10.15 METER " VEST POCKET" ROTARY BEAM ANTENNA

Model VPA1015-2, MOSLEY "Vest Pocket" 2 element 10, 11, 15 meter Rotary Beam has similar construction as VPAl015-3, above. 5 Db forward gain over dipole. 15 Db Front-to-Back ratio. 1.2/1 SWR at resonant frequency. Less co-ax, rotor $\&$ mast. -----

-     -         - Amateur Net. $\$ 49.95$

Here's a TV Multi-Outlet System that really digs profit out of those smaller master ontenno instollations! Complete with all omplifiers, preamplifiers, distribution equipment, top-offs, and test equipment, the Jerrold Multi-Outlet system is a motched system that gives clean, snow-free reception on every set.

Color distributes as easily as black and white.
Designed as a solid packoge, the Jerrold Multi-Outlet system has its roots in more than 8000 larger building systems. Jerrold equipment is delivering pictures to over 5000 teievision receivers connected through hundreds of miles of cable from a single antenno.

This Jerrold experience mokes possible the outstanding
IV Multi-Outlet System-and profit for the installer.

## MODEL ABD-1

High goin, low noise distribution omplifier covering chonnels 2.13. Provides the key so superior television distribution for smoll, economicol systems. Combining lotest coscode circuitry ond new mechonicol design, the ABD-1 delivers strong. snow-free pictures ond keeps instollotion costs to o minimum.

PRICES SLIGHIIY HIGHER IN FAR WEST AND SOUTHWEST

## MODEL U2V, UHF CONVERTER

Pulling UHF pictures out of the snow where other converters haven't a chance, the U2V top mounted mixer head converts right at the ontenna. The UHF oscillotor is mounted at the amplifier locotion (or of the TV receiver for individual home instollations) and feeds signals for conversion up to the mixer (a technique developed in radar installotions). Signals leove the mixer as VHF so coaxial cable may be used. The U2V will convert any UHF channel to any VHF channel. Order by specifying UHF channel to be converted to a specific VHF shannel.

| MIXER HEAD | OSCILLATOR |
| :---: | :---: |
| UHF INPUT: Double covīy tuned, 10 mc bandwidth, 72 chms. | TUBE COMPLEMENT: 1.6AF4, 1-OB2 |

| WEIGHT: $1 \mathrm{lb} ., 13 \mathrm{oz}$. | WEIGHT: $31 / 2 \mathrm{lbs}$. |
| MOUNTING: MOSt mounted, brockets ond strops supplied. | MOUNTING: May be mounted either horizontolly on a shelf or vertically on a wall. |

OSCILIATOR

## TEST EQUIPMENT

## VHF FIELD STRENGTH METER MODEL 704 A

 A Calibrated Direct Reading Instrument For TV and FM Signal Measurements - A Must For Color!The JERROLD Model 704A Field Strength Meter is a portable, inexpensive service instrument designed and built to precision stand. ards normally found only in laboratory equipment at three to four times the price.

SENSITIVE: Reads down to 5 microvolts and up to 3 volts.
SELECTIVE: 0.6 MC band width. Seporotes color subcarrier from audio carrier - audio from adjacent video.
ACCURATE: Precise readings in db or microvalts $\pm 0.6 \mathrm{dt}$ aver entire range. VERSATILE: Reods \% modulotion of FM corriers, \% AM distartion of FM omplifiers, \% AM of RF generotors. Output jock to phones or scope. PORTABLE: Only 19 pounds. Operates from either AC or $6 V$ battery.

Model 704-A — VHF Field Strength Meter (with AC power supply)
Model 704-A - 6V Vibrator Pack (including all cables) \$47.50 Net

## APPLICATIONS

1. Field intensity surveys
2. Boloncing Television Distribution Systems.
3. Testing color response of antenno systems.
4. Determining overlood layme clippingl in RF amplifiers.
5. Checking \% AM distortion of FM omplifiers
6. Checking \% modulation of FM corrier:
7. Checking \% AM of RF signol generotors.
-. Shudying ontenno potterns
8. Measuring radiotion.
9. Measuring aftenuation of cooxial cobles.
10. Chesking random moise levels.
11. Lacaling ond prienting ontennas.
12. Meosuring and locoting interference
13. Measuring indiviaval video and oudio corrier levels.
14. Checking output of signol generotors.
15. Comparotive lesting of ontennos ar boosiers.
16. Adiusting traps or filters.

## SPECIFICATIONS

FREQUENCY RANGE: SA to $220 \mathrm{mc} / \mathrm{sec}$ covered in one band.
ACCURACY: $\pm 0.8$ db over entire range

## SENSITIVITY: 5 microvalt

RANGES: 6 fundomentol conges -0.100 uv, 0.300 uv. $0-1000$ uv, 0.3000 uv, $0.10,000 \mathrm{uv}$.

4 additional ranges through the use of the built-in precision oltenuotar-0.100,000 uv. $0.300 .000 \mathrm{uv}, 0-1$ voll, $0-3.0$ volt
SELECTIVITY: Bond width of 3 db down is 0.6 mc .

IMAGE REJECTION: AMinimem of 60 db .
POWER REOUIREMEMT: AC: 55 wolls. 105.125 volts, $50 / 60$ cycles.
DC 30 woths 15 ampa + 5.5.6.5 olts (with $704 . \mathrm{A} .4 \mathrm{~V}$ power supplyl.
TUAE COMPLEMENT: $2-5854$, 1-6AB4, 1-6T8, I-OD3IVR 501, 3-5749, i-5V4, 2au7
HYSICAL SPECIFICATIOMS: Height $12^{\prime \prime}$. Widm- $12 \%{ }^{\circ}$ Depth-8". Shapping weiqh -24 lbs. Finish-grey crockle finish on sturdy oluminom case.

## PRECISION-BUILT VARIABLE RF ATTENUATORS

The A-72 provides precise attenuation from $U$ to 82 db by simple "IN" and "OUT" switches. Designed for use with a 72 ohm coaxial cable, the attenuator is linear over a range of frequencies from 0 to 250 MC . It has a V.S.W.R. less than 1.05 when properly terminated. Accuracy is $\pm 1.0 \mathrm{db}$ at maximum ( 32 db ) attenuation. The insertion loss is less than 0.5 db at 200 MC It is copable of handling 500 milliwatts CW.
$\$ 54.50 \mathrm{Nel}$

## AX-524 fRINGE AREA 2.BAY SUPER-DIRECTRONIC

- All channels for FRINGE AREAS
- 24 hi-tensil $3 / \mathbf{2}^{\prime \prime}$ Aluminum Elements
- I sel of tie rods; 6.Position DIRECTRONIC BEAM SELECTOR; 100' of TRI-TUBE TRANSMISSION LINE; Universal U-Clamp
COMPLETE PACKAGE 20 LBS.

AX-548 ULIRA FRINGE AREA 4.BAY SUPER-DIRECTRONIC

- All channels for ULTRA. FRINGE AREAS
- 48 hi-tensil $3 / 9$ "Aluminum Elements
- 2 sets of tie rods with Specially

Engineered Harness; B. Position

DIRECTRONIC BEAM SELECTOR; 150' of TRI-TUBE TRANSMISSION LINE; Universal U-Clamps
COMPLETE PACKAGE 30 LBS.

## GNYDAR rado/TV products

## FM TV ANTENNAS

A simple but effective antenna for FM in metropalitan areas. No orientation necessary. The " $S$ " shape makes the antenna omni-directional for signal pick-up from all directions. Low-loss Hi-Paq insulatian \& rigid mechanical construction.
INDIVIDUALLY PACKED... . 1 3/4 LBS.

## THE "DIRECTRONIC"

A high gain FM antenna for suburban \& fringe orea, utilizing the well known Directronic principle. No orientation necessary, with peak gain for any direction selected by a six position switch. Well balanced 8 rigid construction using low. loss materials. Equipped with high gain reflector design.
INDIVIDUALLY PACKED.... $21 / 2$ LBS.
 crossed folded dipoles for FM in metropoliton and suburban areas. No orienlation necessary. Has a good all-direclional pattern. Low-loss Hi-Paq insulation \& rigid mechonical construction.
INDIVIDUALLY PACKED.
4 LBS.

the "Ultimate"
The ultimate in fringe area $F M$ antennas. This antenna uses the Yagi principle for exceptional gain \& flat screen for very high front to back ratio. Minimizes interference from local FM stations when receiving fringe area $F M$ stations. Equipped with low-loss insulation, Has rigid mounting design.
INDIVIDUALLY PACKED.... $61 / 2$ LBS

## UHF TV ANTENNAS

## UHF-6 BOW-TIE

W/CORNER REFLECTOR CHANNELS 14 TO 83
factory preassembled; fold-up spacesaver design; diamond embossed aluminum elements; dual $U$-bolt installation; all welded heavy duty reflector screens. INDIVIDUALLY PACKED...
12 TO MASTER CARTON . . 45 LBS.
CAN BE STACKED IN ULTRAFRINGE AREAS. TIE-RODS ARE AYAILABEE.

## UHF-5 BOW-TIE W/REFLECTOR CHANNELS 14 TO 83

Factory preassembled; collapsible spacesaver design; diamond embossed aluminum elements; single $U$-bolt installation; all welded heavy duty reflector screen.
INDIVIDUALLY PACKED...
12 TO MASTER CARTON . 26 LBS.
CAN BE STACKED IN ULTRAFRINGE AREAS. TIE-RODS ARE AVAILABLE.

THE ALL NEW

## BASEBal/

Automobile Antenna

Yes. it's a HIT: A NEW and IM. PROVID automobile antenna with more on the hall than anything you' c ever handied designed by the same team that produces orig. inal equipment antemas for such fine manut. tacturers as Bendix. Crosley, DuMone. G.E., I.ear, Motorola, RCA, W'esting. house and \%enith

The "Baseball" is londed with new sales bunch . . . an extra rugked, quality built antennat with positive grounding action ... no danger of wet-weather shorts. . . finest triple. chrome plating ... and a price that means casy sitles and profits.

Best of all, the Baseball Antenna is made by a teann that specializes in the aum. mobile antenna field ...concentrates its merchandising and adsercising support on this one product

Yes. the "Basehall" gives you a bet. ler play for your money all the way around. sh step up to the hig leaguers - join the all. star names who use A $\$$ products - write today for complete information, catalogs and prices on the NFW' "haseball Auromohile Anremma!

Exclusive New Design

- Insures Positive Grounding
- Eliminates Wef Weafher Shorts
- Meefs or Exceeds Car Manufacturers' Specificałions
for COWL . . . for FENDER

FEATURES:

- Simple one-hole, one-man installation
- Swivel base permits mounting on any curved surface with a slant up to $35^{\circ}$
- Full spring-action pin plug on lead
- Supplied completely assembled
- $56^{\prime \prime}$ telescopic whip made of triplechrome shatterproof heavy-wall brass tubing
- Precision-made anti-rattle telescopic qube assembly
- Lead is replaceable without loosening or removing antenna mount

## ALSO AVAILABLE IN SIX STRIKING AUTOMOTIVE COLORS

Here's Why The "Baseball" Is Your Best Antenna Buy!

POSITIVE GROUNDING - Special taper makes Rocker Suppors (A) bite firmly into edge of mounting hole when assembly is drawn tight, insuring positive 4 -point grounding. TRIPLE-CHROME PLATING - Important extra protection. Gleaming chrome over nickel over conner over high quality hrovy wall brass.

WATER SHORTS ELIMINATED - Mounting tube (B) is full-length ontenna support, eliminating corrosion problems and water shorts at mounting. Polyethylene coaxial lead (C) coated with heavy weatherproof vinylite. Rubber washer (D) prevents whip shorts.

## GROUND RODS

For All Radio and Television Installations

Practical and efficient Ground Rods, costing so little that it doesn't pay to fuss with makeshifts. Of smooth, hard-drawn steel, chisel pointed for easy driving and heavily copper-plated for rust prevention and to insure clean electrical contact. $4^{\prime}$ to $8^{\prime}$ lengths in $3 / 8^{\prime \prime}, 1 / 2^{\prime \prime}$ and $5 / 8^{\prime \prime}$ with screw clamp (illustrated) or in 6 ' and $8^{\prime}$ lengths in pigtail wire, drilled hole or plain style, $1 / 2^{\prime \prime}$ and $5 / 8^{\prime \prime}$ only.

## PREMAX MOUNTINGS

## BASE MOUNTINGS

Type 1-Galvanized malleable iron or chrome plated brass hardware with heary-duty porcelafn cones. 1 to height to post basc. Wt. 8 lbs. Available for all Premax Vertical Antennas. Spec ify antenna number or post dameter This is also availahle in hinge post type. Type 2-LLight design with brown glazed porcelain and removable top pist. In steel only. Height to post base 6", For Premax Antennas up to $24^{\prime}$. Specify
 Antenna number or post diameter.

## DECK OR ROOF MOUNTING

Type 6-6" flange in galvanized malleable iron with studs and bolts for $1 / 2^{\prime \prime}$ to $6^{\prime \prime}$ deck. Lead-thru contruction permits connections below roof or deck avaito post base $3^{\prime \prime}$ to $5^{\prime \prime}$ Weigh $1 i^{2}$ vailable for all Premax Antennas. Specily An enna number or post diameter.

## TYPE 10-C MOUNTING CLAMP

Type $10-\mathrm{C}$ Mounting Clamp has porcelain split bush ing in stamped steel frame. Height to center 2" Wt. $3 / 4 \mathrm{lb}$. Sizes to fit $5 / \mathrm{s}^{\prime \prime}, 3 / 4,7 / 8^{\prime \prime}$ and $1^{\prime \prime}$ only.

TYPE IO-S STANDOFF INSULATOR
Type $10-\mathrm{S}$ is a heary-duty insulator in chrome-plated bronze with brown slazed porcelain. Solid or hinged clamp. Height to center about $4 \frac{1}{\prime \prime \prime}$ ". Wi. 3 lbs. Available in sizes to fit $7 / s^{\prime \prime}$ to $1 / / /^{\prime \prime}$ tube diameter.

TYPE 13-S STANDOFF INSULATOR
Type 13-S-In heavy cast aluminm or brass. plain or chrone-plated. with brown glazed porcelain. $3^{\prime \prime}$ diameter, Height to center $4 \%$."Wt. 2 lbs. In sizes to fit "," to $11 /{ }^{\prime \prime}$. Specify size and material; also whether solid or hinge cap.

PREMAX PRODUCTS Div. Chisholm-Ryder Co. Inc., Niagara Falls, N. Y.

## SERIES B LOW-COST CENTER-LOADED ANTENNAS FOR MOBILE AND MARINE

Center-Laded Whip-Type Antennas consist of at standald base section or spring-type on which is mounted a special Premux coil. The top is a taperfround stainless steel whip 6 ft . in length, giving a total orerall height of 9 ft . Various coils are vaitable or the standard 75 -meter coil can he adapted ly shorting out turns on the coil. Antennas ev:l lue used with any of the Standard Premax "onntings shown below, or will fit any 3/8"x24thread mounting.

## CIVIL DEFENSE, PUBLIC SERVICE, FIRE, POLICE ANTENNAS 100 TO 162 MEGACYCLES

FCDA is insisting on adequate communications in Civil Defense and cities everywhere are installing RACES equipment that calls for outstanding ground plane and UHF Antennas. Premax meets this meed with several profitable numbers to cover this new market.

CP31:

## GROUND PLANE ANTENNAS

For point-to-point installations, Premax has two VHF Antennas: The Style GI'-3 which has elements of heavily-plated spring steel with skirt wires that can be bent down to any ansle to match coas cable Mountto match coax cable, Mounthousing that fits standard 1/2" pipe. Cable carries down thru pipe. Style (iP-312 for 10 s to 120 Me. For aireraft and CAP. Style GP-315 for 152 to 162 Mc . For police and taxi.

## ADJUSTABLE GROUND PLANE ANTENNAS

Another low-cost type Ground Plane Antenna is adjustable from 20 to 40 mc . or 40 to 60 mc . Standing wave ratio matching to 52 -ohm line is 1.07 to 1.13 and to 72 -ohm line is 1.27 to 1.23 depending on type of transformer cable. All-alumnum construction employing adjustable tubular elements. Style GP-430-Adjustable 20 to 40 Mc .
Style GP-450-Adjustable 40 to
60 Mc. 60 Mc.

## CAR-TOP OR MOBILE ANTENNAS

Premax Mobile or Car-Top Antennas are made of heavily-plated, highlytempered spring steel wire in elements of precise diameters and precise diameters and
lengths. Mountings are well insulated and so designed that one man can signed that one man can single small hole in a car roof.

STYLE CD-114 for 144 me. For 2-meter amateur and CD. Porcelain insulator. One nian installation thru $1 / 2$ rooftop hole. STYLE CD-112 for 108 to 120 mc . For aireraft and CAP. Similar to CD-114.

CD. 114

STYLE CD-214 for 144 mc mergency type with rubber uction cup base. No hole reauired. Can be installed in matter of seconds. lqeal for CD.

STYLE CD-215 for 152 to 162 mc. For pulice and taxi. Simiar to CD-214.
STYLE CD-212 for 108 to 120 me. For aircraft and CAP Similar to CD-214.

MOBILE
SERIESC For $1 /$ P " Diam. Whips $^{\text {D }}$

TYPE R.t

TYPE RS. 2

TYPE S. 1

TYPE R-2 - Universal Mounting. Solid aluminum split-ball can be adjusted to any angle. Has shielded coax connection.

TIPE RS-2-Similar to spring as shown under Type SA-1.

TYPE S-1 - Spring Mounting, heavy - duty spring, phenolic insulation with rubber gasket and steel back-plate with shielded co-ax fitting. Ht. $5^{\prime \prime}$.

TYPE SA-1 - Spring Adaptor (similar to Type S-1 and RS-2 which can be attached to Type Mounting. Ht. $43 / 4$ ". Dia. 1\%".

TYPE F- $30^{\circ}$ Adjustable Mounting for fender, cowl or gravel pan, Chrome - plated brass with phenolic insulation

IYPE 5

TYPE XLX - Panel mounting similar to L-1 less bumper bracket and mounting tube. Recommended for

## E-Z WAY <br> TOWERS, INC.

## BUILDING ATTACHED OR GROUND POST MOUNTED

## DESIGN AND SPECIFICATIONS

E-Z Way Tawers give a combination of the greatest strength possible with the least wind resistance, no guy wires are necessary in most cases. All Steel Construction . . Round steel, made to our specifications ( $10: 38$, tensile strength). "A" SECTION $71 / 2^{"}$ triangle ... 20 ft . long with $1 / 2$ " solid rod legs, continuous diagonal bracing of $1 / 4^{\prime \prime}$ rod on two sides ... 12" spaced ladder bracing of $3 / 8$ " rod on face side ... "B" SECTION . . . $91 / 2$ " triangle ff. long with legs of $1 / 2^{\prime \prime}$ structural pipe; continuous
diagonal bracing of $1 / 4$ " rod on two sides . . . $12^{\prime \prime}$ spaced ladder bracing $3 / 8$ " rod on face side ... "C" SECTION ;. $111 / 2^{\prime \prime}$ triangle ... 21 ft . long with legs of $3 / 4$ " structural pipe ...continuous diagonal bracing of $5 / 16^{\prime \prime}$ rod on two sides ... $12^{\prime \prime}$ spaced ladder bracing of $3 / 8^{\prime \prime}$ rod on face side.
 RORTAELE WINCH
NOT INCLUDED WITM CTMPE TOWERS ustico as accessory
$-30$

> E $30-40$--Supports ${ }^{3}$ VHF antenna at $30^{\prime}$ and a UHF antenna at $40^{\prime}$. No guy wires necessary. $71 / 2^{\prime \prime}$ A. Section.
> E $40-50$ - Same as the E 30 with a $21^{\prime}$ mast section plus guy wire ring and collar. Will support a rotor and VHF ant. at $40^{\prime}$ and a UHF ant. at $50^{\prime}$ Must be guyed at rotor. $71 / 2^{\prime \prime}$ A section.
> E $20-$ The do-it. yourselt tower. A $20^{\prime}$ triangular tower sec. tion only. $71 / 2 " A ~ A$ Section.

U 35-40 -- Designed for the close-in UHF fringe area to support a VHF ant. at $35^{\prime}$ and a UHF ant. at $40^{\circ}$. No guy wires. $71 / 2^{\prime \prime} \quad A$ section, crank up winch, safety rest and tri cage.
$\checkmark$ 40-50 - Will sup port a VHF ant. at $40^{\prime}$ and a UHF ant. at $50^{\circ}$. No guy wires. When rotor is used, tower should be guyed at rotor. $71 / 2^{\prime \prime}$ A section, crank up winch safety rest and tri cage
$\checkmark 50-60$-This is the $\checkmark 40-50$ tower plus $10^{\circ}$ ant. mast and guy ring. Must be guyed.

Portable Winch-Pins on $E$ Tower to crank mast section up or down. Makes for easy installation or service.

GP One Hole Ground Posts vary in size, diameter and wall thickness, according to the tower used. Requires a small hole $41 / 2$ to 5 ft . deep into which the underground portion of the ground post is placed, plumbed, return earth (tamping and watering as earth is returned) and immediately the tower can be bolted to a hinge on the ground post, the tilt-over cable connected to the tower and the tower cranked to a perpendicular position. No concrete or special tools required. Occupies only one square toot of space.

## TV-FM LEAD-IN TUBES

Provide essential insulation and neatness of appearance for lead-ins going through walls, partitions, etc.
Type $=890$ Tubes -
Handles the conventional $3 / 8$ " wide $\mathbf{3 0 0}$ Ohm common fist lead-ins. Outside diameter $\frac{1}{1}$ : use a $3 / 4^{\prime \prime}$ drill.
Type 8891 Tubers
UHF Tubes with the round holes, two slots or key-wayn, for Amphenol Cable \#14-271 or equivalent. Outside diameter tit: use a $3 / 4^{\prime \prime}$ drill.
Type $=895$ Tubes -
For the round (but hollow) UHF cable equivalent to Feceral's Rand Tubular UHF. Outside diameter th: use a $3 / 4^{\text {" }}$ drill.
Tyue 2896 Tubex -
For oval UHF cable made under many trade names a ad numbers. Examples: Belden $\# 8235$. The wide oval hole requires a larger outside diameter. Outsice diameter $3 / \mathbf{4}^{\prime \prime}$ : use H" drill.

| Length | Wt. per M | Length | Wt. per M |
| :---: | :---: | :---: | :---: |
| 4" | 143 Lbs. | $8^{\prime \prime}$ | 275 Lbs. |
| 5" | 175 Lbs. | $10^{\prime \prime}$ | 330 Lbs. |
| $6{ }^{\prime \prime}$ | 210 Lbs. |  |  |

## TV-IM LEAD-IN SUPPORTS

Tbe perfect insulator. Easy to install, Holds leao-in positively and rigidly. Size - 2" high, 1-1/4" wide, 3/4" wide. Supports lead in 1-7/16" from surface. Weight 170 lbs. per M
$\qquad$

## ANTENMA INSULATORS

Made of highest quality electrical Poxcelain. Presare molded to assure dense strong body. Glazed.

No. 811:- Round, White glaze. Size 2-1/2" long, $\mathbf{1}^{\prime \prime}$ diameter $1,4^{\prime \prime}$ holes. Weight 146 Lbs. per M.

No. 8118 - Same as No. 8117 but brown glaze. Weight 146 Lbs. per M.

No. 8119 - Oval, White glaze. Size 2-1/2" long, $I^{\prime \prime}$ diameter 1,4" holes. Weigbt 130 Lbs. per M.

No. 8120 - Sgme as No. 8119 but brown glaze. Weigit 130 Lbs. per M.
No. 8130 - Small airplane type, ovsl, white glaze. Size 1-1/2" long. $3 / 4^{\prime \prime}$ diameter, $2 / 32^{\prime \prime}$ holes. Weight 60 Lbs. per M.
No. 8131 - Large airplane type, "vali, white, glaze. Size $2^{\prime \prime}$ long. 7/8" diameter, $9 / 32^{\prime \prime}$ boies. Weight 90 Lbs. per M.
No. 500D - Strain type, brown glaze Size $2.1 / 8^{\prime \prime}$ Jong, $1-9 / 16^{\prime \prime}$ diameter, $3 / 8$ holes. Weinh 235 Lbs. pe: M.

## INSULATED SCREW EYES

No. 1925 - Seven and one-quartar inches long over-all. White glaze insulator with $3 / 8^{\prime \prime}$ hole. Weight 110 Lbs. per M.

No. 1926 - Same as No. 1925 but 3" long over-all. Weicht 90 Lbs. per M.

No. 1961 - Split bridle-ring type. Jasulator has diagonal alot 1/4" wide to facilitate quick threading of conductor. Over-all length $3-7 / 16^{\prime \prime}$. White glare irrsulator has $5 / 8^{\prime \prime}$ hole. Weight 1 CO Lbs. per M.

No. 1962 - Same as No. 1961 but 2-7/8" long cver all. Weight 90 Lbs. per M.

## NEW "THUNDER BIRD" "BEAMED POWER" ARRAYS FOR ALL-CHANNEL TV

"THUNDER BIRD" Antennas are loop phased, multi-element. "Beamed Power" Arrays for fringe and "sub-fringe" area TV recepticn. Element functions are duplexed by means of variable impedance phasing loops to produce effective high gain Yagis for Hi and Lo channel VHF Bands in an all-in-line array which actually produces superior gain and directivity - element for ele-ment-- than equivalent separate units.

# POLYSTYRENE ROD - TUBING - SHEET 

For radio and electronic applications, because of its very low loss factor at ultra high frequencies. Polystyrene is the ideal material for insulators, coil forms, shields, etc. It has excellent arc resistance, is non-tracking and has splendid insulating properties. Because its water absorption is practically zero it has excellent dimensional stability.

## POLYSTYRENE ROD - Transparent

Available in $12^{\prime \prime}$ or $48^{\prime \prime}$ lengths

# Bang prolucts for BETTER TELEVISION <br> by BLONDER-TONGUE LABORATORIES, INC., Westfield, N. J. 

Model MLA-Extremely powerful broad band line or antenna amplifier. Cascode circuit with more than 37 db (70x) amplification on all VHF channels. Separate LC-band and HI-band sain controls. Output flat within $2 d b$. Self-powered.
Lilt Price ....................................................... $\$ 119.50$

AUTOMATIC GAIN CONTROL
Model MAGC-Designed for MLA amplifier. Maintains constant output level over 20 db range flat within 1.5 db . Also compensates for AC line variation. Draws power from MuA.
Li t Price
$\$ 59.50$

## MIXER SEPARATOR

Mudel MMS-Combines separate VHF signals into one common line or separates VHF chanrels from a common line. Plugin 0 to 24 db attenuators permit single channel equalization. Non-powered and pre-tuned. Low mixing loss ( 1 to 3db). Built into weather-proof case with mount ing bracket.
ing brack $\qquad$ $\$ 59.50$

CHANNEL AMPLIFIER STRIP
Model MCS-Provides $32-36$ db single channel gain. Cascode circuit with builtin automatic and manual gain controls. Can be cascaded or inter-connected to mix channels. Specify VHF channels.
crannels. Specify VHF channels.

## VAF CONVERTER STRIP

Model MVC-Changes any high VHF channel to any low VHF channel. Crystal controlled. Self-powered. 30 db gain. Availalile on special order only. Specify VHF channels.
List Price

## UHF CONVERTER STRIP

Model MUC-Changes any UHF channel to any VHF channel. Crystal controlled. Self-powered, 20db gain. Available on suecial order. Specify UHF and VHF channels.
List Price $\qquad$ $\$ 177.50$

## B-T Masterline TV SYSTEMS

Designed for larger Master TV System Installations requiring more powerful units and utilizing coax connectors. Easy to install. Versatile.

## RADIATION-PROOF HOUSING

Model MRH-Completely weather-proof and radiation-proof outdoor enclosure. Maximum veritiation. Has front openins. cealed door aind hasp. P'erforsted mounting surface facilitates installation of units. Universal mounting bracket and straps.
List Price ............................................................

CABLE CONNECTORS FOR MASTERLINE UNITS

COAX COLPLER MC-1-Correct 75 -ohm match for spliscing, adapting or terminating RG-11/U and RG-59/U. Also feed through connextor for model MRH housing.
List Price $\longrightarrow \longrightarrow \quad$ — $\quad$ 2.50

TERMINATING PLUG MTP-7S

Correctly terminates RG-11/U or RG-59/U Fits MC-1. Can be used with MP-11 or MP-59 in conjunction with MC-1. List Price $\qquad$ $\$ 2.50$
RG-11/U CONNECTOR MP-11-Matched 75-ohm UHF male fitting. List Price $\qquad$ $\$ 1.15$
RG-59/U CONNECTOR MP-59-Matched 75-ohm UHF male fittink. List Price $\qquad$ $\$ 1.30$
MINIATURE RG-59/C MK-59A-Matched $7 \overline{0}$-ohm male fitting.
List Price
MASTE日 TV CABLE TAPOFFS

OLTDOOR TAPOFF MTO-11-Spliceless weather-proof tap from RG-11/U cable. Uniform 17 db isolation. Lowest shunt capacity. Less than . 5 db insertion loss. List Price
INDOOR TAPOFF MTO-59--Spliceless tap from RG-59/U cable. Has wall mounting face plate. Uniform 17 db isolation with less than . 5 db insertion loss.
List Price

## "EXACT-MATCH" ACCESSORIES

 BAEUN

Model MB-Precision impedance match between 7.5 -ohm unbalanced and 3411 -ohm balanced lines. Weather protected. 7 i -ohm coax fitting. List Price ..................... $\$ 7.50$

## ALL-CHANNEL EQUALIZER

Model ME-1-Compensates for less on hirh VHF channels through 1,0101 feet of RG-11/U or 500 feet of RG-59/U cable. Attenuate from 17 db on channel $\because$ to 1db on channel 13. Weather motected. List Price ....................................................... $\$ 14.50$

## LOW-BAND EQUALIZER

Model ME-2-Attenuates from 9db on channel $\because$ to less than 1 db on channel 6 . Compensates for 2,000 feet of $\mathrm{Rr}-11 / \mathrm{U}$ or 1,000 feet of RG-59/U. Weather 1 motected. List Price....

## OIRECTIONAL COUPLER

Model MDC-2-Two outlets for TV sets or branch coax lines. 14 db to 30 db interisolation with only
Weather protected. List Price.......$~$ 12.50

## TUNABLE FM TRAP

Model MWT-1-More than ?odb attenuation on any FM channel. Coax fittings. Weather protected. List Price ......... $\$ 19.50$

## TUNABLE LO-BAND VAF TRAP

Model MWT-2-Attenuates any VHF low band channel. Coax fittings. Weather protected. List Price $\quad \$ 19.50$

## DUPLEXERS

Remote control of TV amplifiers, 2-way audio or AM transmission, One line carries VHF signal plus any other frefuency from $0-2 \mathrm{mc}$.
Model MDX-300-for 300 -ohm line.
List Price - $\$ 17.00$ Model MDX-75-for 75 -ohm cable. List Price

## POWER LINE FILTER

Model MLF-Effective RF isolation between amplifier and power line. Mounts in MRH housing. List Price $\quad \$ 14.50$

Model MAT-Uniform, all-channel attenMation. Provides 0 db to 45 db attenuation of VHF signals in 3 db steps.
List Price

## ALLIANCE TV PRODUCTS

## ALLIANCE TENNA-ROTORS • UHF CONVERTERS • BOOSTERS

## ALLIANCE TENNA-ROTOR

The Alliance Tenna-Rotor, available in three models illustrated below, is a TV or FM antenna rotator. Designed to rotate all conventional type antennas. It consists of a fully enclosed electrically driven rotor into which the antenna center-post is clamped. Four-conductor "zip" cable connects rotator with plastic control case placed near receiver, which plugs into any 60 cycle 110 -volt $A C$ house circuit. A selector switch controls rotation clockwise or counter-clockwise to point antenna in any direction for optimum reception.
Alliance Tenna-Rotor reduces interference, improves quality of picture, eliminates ghosts, aids fringe reception. It is especially useful in multi-station areas and wherever there are signals from the more critical UHF stations. Will add distance to your reception.

Most Widely Advertised Rotator on the Market

## FULLY AUTOMATIC MODEL U-83

"SET IT AND FORGET IT"
This deluxe Model U-83 is fully automatic rotator on the market.
BEAUTIFUL NEW STYLING
Simply set the pointer - antenna automatically turns by itself and stops at the direction shown on the indicator dial. New styling plus the exclusive automatic feature makes Model U. 83 the ultimate in rotators!

## MODEL T-10

This finger-tip electrically controlled Alliance Tenna-Rotor is noted for extreme accuracy, compactness and smart styling. Pressing attractive tilt bar controls rotator and a pointer on the control case dial shows compass direction to which antenna is pointed.
Both new Model Alliance Tenna-Rotors, the U-83 automatic, and the $\mathrm{T} \cdot 10$, have increased speed of rotation and incorporate features that make for faster installation, trouble-free operation and unsurpassed performance. The new rotator unit has doubleaction magnetic anti-drift brake plus smoother synchronization with control units. Alliance Tenna-Rotors are pre-sold through TV advertising!

## MODEL K22

New, lowest-priced rotator in the field, Alliance Model K-22 Tenna-Rotor features a fingertip control bar. When pressed on one end the antenna rotates in one direction, reverses when other end is depressed. Center disc signal light indicates when limit of travel is reached. Neat, compact, modern design; product of Alliance high-standard precision manufacturing. Fully guaranteed.

Model K-22
List Price ..................... $\mathbf{\$ 2 4 . 9 5}$

## ALLIANCE MANUFACTURING COMPANY• Alliance, Ohio

## ALLIANCE TV AND ELEGTRONIC PRODUCTS ALLIANCE TENNA-ROTORS - UHF CONVERTERS - BOOSTERS ALLIANCE LIFT-A=DOR

Model BY-90
Lisi Price ...... ........... $\mathbf{\$ 2 9 . 9 5}$

Model UC-2
Lisi Price

## ALLIANCE BY-90 UHF CONVERTER

Adds all the new UHF channels to VHF sets. The recognized quality converter built for top performance, long trouble-free service. Selector dial covers Channels 14 to 82 . Handsome, durable case, harmonizes with any setting.

## ALLIANCE "HIDE-A-WAY" CONVERTER

The "Hide-A-Way" mounts out of sight on back of set. Only slide rule tuning dial shows slightly over cabinet top. Quickly, easily installed. Alliance quality, "economy" model UHF converter.

Model UC-1 List Paice ...... $\$ 18.95$

## ALLIANCE UC-2 UHF CONVERTER

Modern, graceful styling features this UC-2 Alliance UHF Converter. One simple control provides continuous tuning. Uniform reception is obtained on all channels. Unusual value.

## ALLIANCE LIFT-A-DOR automatic garage door operators

The first quality low-cost, automatic garage door operator! Opens, doses, locks garage door, turns on and off automatically! Now available in three styles: Radic Control, Hydraulic Control, Key-Switch Control. Featuring: New Lifl Mechanism, with exclusive Wobulator, for longer motor life, instant safety stop; automatic reversible motor, permanently lubricated, with built-in thermal circuit breaker; pressure reliet clamp, to permit manual operation, no need to disassemble mechanism; lightweight, sturdy construction, fewer moving parts; work on overhead

Available in seven Genie Models
List Prices.....from $\mathbf{\$ 6 9 . 9 6}$ to $\mathbf{\$ 2 1 9 . 9 5}$ plus installation
doors up to $16^{\circ}$ wide, $8^{\circ}$ high, curved and straight track types; assembled, thoroughly tested at factory.

Madel TBB
List Frice $\$ \mathbf{\$ 4 . 9 5}$

## AILIANCE THRUST BEARING BRACKET

The Alliance Thrust Beariag Brackel, accessory to Allicnce Tenno-Rator, is mace to provide arlded support for all heovier conventional type antennas. Used with mlliance Tenna.Rotor, it makes an ideal irsiullation. Especially suited for mulibay and stacked array an-
tenno types. The Thrust Bearing takes the weight off the rator unit and transfers it to the ground. It assures extra rigid support and maximum esistance to high winds.

For catalogue sheets, folders and more detailed information of Alliance Converters, Boosters and Tenaa-Rotors, write the factory.

## ALLIANCE MANUFACTURING COMPANY•Alliance, Ohio

TV PICTURE TUBE BRIGHTENER - Restores brightness to dim TV pic. tubes, including electro.
static. A convenient slide switch permits instontone Ous use for either series or parallel wired sets.
MODEL UB ............................25 LIST

PICBOOST DELUXE TELEVISION PICTURE TUBE BRIGHTENER - Restores brightness to all tubes in. cluding electrostatic types. Variable valrage cantral permits gradual increose of valtage as needed. stretching picture tube life to on obsalute maxi. mum.
MODEL 1P - Brightener for parallel wired sets. MODEL 2P - Brightener far series wired sets.

## HI-FI INTER-CONNECTING CABLES

CBC offers you a fine qualivy interconnecting cab:e for every high fidelity installatian requirement Cables have such fea. tures as an exclusive hexaganal gripper, shielding grounded without saldering io protect insulation, and or extremely cable is fully tested elect-ically and mechanically before leaving the foctory.

## Oars HIGH-FIDELITY SOUND RECORDING TAPE

## PLASTIC BASE MAGNETIC TAPE

Superior in quality and performance. Sound-Engineered by Specialists.

Brings forth the best tone quality from your tape recorder.

Quality is uniform from reel to reel. No magnetic weak spots.
Outstanding high frequency response and permanent micro-polished red oxide coating to really insure high fidelity.

Maintains a constant high output with extremely low background noise.

Look for the attractive black and gold box with the Oak Leaf emblem for assurance of sound quality.

0 OKSPEAKER SWITCH

For Use in Autos, with Remote TV or Jukebox Speakers, And Many Other Purposes.
Does all that the old style 3 Way Speaker Switch could do ... PLUS: Sound Distribution as you want it.
EITHER SPEAKER CAN BE MADE THE LOUDER, WHILE BOTH CONTINUE TO PLAY TOGETHER. Either speaker can be played alone, of course. Additional advantage of the BEST IMPEDANCE MATCH BETWEEN SPEAKERS AND RADIO at any volume setting used.

## 1 SWITCH POSITIONS

- Front Speaker
- Rear Speaker
- Both Speakers In Parallel
- Both Speakers In Series

## TV ANTENNA SWITCHES

chenIdeal UHF/VHF antenna selector switch. Low loss rotary type making silver-to-silver contacts. In ivory or brown polystyrene case. Solderless, easy to install. Exiension knob supplied for easy access when mounted behind set.
Cat. F-20 3-HAY TV ANTENNA SWITCH--List Price $\$ 3.75$ Cat. F-40 2-WAY TV ANTENNA SWITCH-List Price $\$ 1.95$ Cat. F-10 Socket Switch $\ldots \ldots$.......... List Price $\$ 3.75$ Cat. F-10PK Above, with mating plug and mounting brackets

-     -         - List Price $\$ 4.40$

## INPUT ADAPTER

ideal plug-in connection for TV and FM sets, boosters, etc. Attaches to screws on antenna terminal strip of set. Mates with Cat. 311 Line Socke:. Solderless.
Cat. 304 INPUT ADAPTER - - - List Price $\$ .30$

## TRANSMISSION LINE PLUG

Solderless constant impedance 300 hm transmission line plug. Mates with all MOSLEY Transmission Line Sockets. Precision molded polystyrene. Plated brass pins, set screws. Phosphor bronze contact strips.
Cat. 301 TRANSMISSION LINE PLUG --.--
----List Price $\$ .30$

## TRANSMISSION LINE SOCKET

Constant impedance 300 ohm transmssionline socket for use where mounted socket not feasible. Made of same low loss materials as Plug, above. Mates with Cat. 301 Plug, Cat. 304 Input Adapter, first page, and with Cat. 344 TV Receptacle. Solderless.
Cat. 3 Il TRANSMISSION LINE SOCKET--List Price $\$ .30$

## UNIVERSAL TV SOCKET

Compact molded polystyrene terminal socket or line ap for single TV lead-1n. Mounts on wall, baseboard, metal chassis or direct on Wall-Thru. Constant Impedance, low loss. In brown or Ivory. With wood screws.

Cat. 343 UNIVERSAL TV SOCKET----Lisi Price $\$ .80$ Cat. 343-PK Above, with mating Plug---List Price $\$ 1.05$ Cat. 344 Similar to No. 343 , above, but with male pins-.. --- List Price $\$ .80$
Cat. 344-PK Above, with mating Line Socket-------- - - List Price \$1.05

UNIVERSAL TRANSMISSION

## LINE CONNECTORS

Maintains impedance and polarity when used to connect 300 ohm transmission line. Made of low loss materials. Solderless.
 Use ir pairs
Cat. 321 POLARIZED TRANSMISSION LINE CONNECTORS
List Price (per pair) \$ . 60

## TUBJLAR TO FLAT TRANS_ MISSION LINE SPLICER

Solderiess, constant impedance splicer for comnecting round or oval 300 ohm line to standard fiat line. Slot in splicer wall
 permits molsture to escape ellminating drip loop in tubular line. Molded polyatyrene with non-ferrous set screws. Cat. 29-S TUBULAR TO FLAT LINE SPLICER-----
— - - Liat Price \$. 20

## FLAT LINE SPLICER

Low loss, constantimpedance splicerfor join Ing sections of standard 300 ohm flat transmission line. Molded polyatyrene with nonferroue set screws. Solderless.

Cat. 27-S FLAT LINE SPLICER------Liat Price $\$ .18$

## OPEN-WIRE SPACER BARS

Acrylic Plastic spacer bars assure proper spacing of open-wire lines. Sturdy. Low Loss.
Cat. 450-3 1" OPEN-WIRE SPACER----List Price \$ . 10 Cat. 450-32 $2^{\prime \prime}$ OPEN-WIRE SPACER----List Price $\$ .28$ Cat. 450-34 4" OPEN-WIRE SPACER---Liat Price $\$ .37$ Cat. 450-3 $6^{\prime \prime}$ OPEN-WIRE SPACER----List Price $\$ .42$

## OPEN-WIRE SPLICER

Ideal l' splicer for joining 450 ohm open-wite line sectlons. Also 300 ohm flat line to openwire line. Low loss Polystyrene.
Cat. 450-1 OPEN - WIRE SPLICER-----List Price 8.16

## MULTI-WIRE LINE PLUGS

Compact, polarszed molded polystyrene plugs for many low voltage uses. Mates with appropriate Flush, Line or Base Socket. No Individual set screws. Solderless. Plated brass pins. For flat or round cable. In brown or ivory.
Cat. 374 4-WIRE PLUG -------------List Price \$ . 75 Cat. 375 5-WIRE PLUG --------------List Price \$. 81 Cat. 378 8-WIRE PLUG------------List Price $\$ 1.00$

## MULTI-WIRE LINE SOCKETS

Polarized line sockets to mate with above Plugs. Solderless. No Indivdual set screws. Phosphor bronze contact strips. In brown or ivory.
Cat. 364 4-WIRE LINE SOCKET------List Price $\$ .96$ Cat. 364-PK Above, with mating Plug----List Price $\$ 1.71$ Cat. 365 5-WIRE LINE SOCKET -------List Price $\$ 1.03$ Cat. 365-PK Above, with mating Plug---List Price $\$ 1.84$ Cat. 368 8-WIRE LINE SOCKET ------List Price $\$ 1.25$ Cat. 368-PK Above, with mating Plug---List Price $\mathbf{8 2 . 2 5}$

## MULTI-WIRE BASE SOCKETS

Compact, sturdy polarized sockets for mouniling on wall, baseboard or metal chassis. Highest quallity construction. Molded polystyrene with phosphor bronze contacts. In brown or Ivory. Wood screws supplied.

Cat. 354 4-WIRE BASE SOCKET--- - - List Price $\$ 1.37$ Cat, 354-PK Above, with mating Plug -- - List Price $\mathbf{\$ 2 . 1 2}$ Cat. 355 5-WIRE BASE SOCKET $-\cdots-$ L $^{-}$Liat Price $\$ 1.50$ Cat. 355-PK Above, with mating Plug - - - List Price \$2.31 Cat. 358 8-WIRE BASE SOCKET - - - - - List Price $\$ 1.75$ Cat. 358-PK Above, with mating Plug--- List Price $\$ 2.75$

## MOSLEY "'Y-TY'"

Unlque strain rellef connector ellminates leadin breakage where line connects to TV antenna elements. Sturdy clomplng member grips line insulation securely.
Cat. 263-S "Y-TY" for all antennes with 4 " or lesa distance between terminals--.-. - - - -- - - List Price $\$ .80$

Cat. 263-L "Y-TY" for all antennas with 4 " to $6^{\circ "}$ between

## MOSLEY ORIENTOR

The MOSLEY "Orientor" is an isolation device that enables the installer on the roof to utilize the television transmasion line to bring the video
 signal back up to him where it can be read in relaitive value by means of an ordinary volt-ohmeter. When using the Orientor, It is not necessary that an extra man be stationed at the TV set to relay information to the installer adfusting the antenna. Cat. 903 "Orientor" complete with set of leads, less meter - - - - Net. Price $\$ 7.50$

Efficient, compact bridging-pad coupler permits $2-s e t$ operation from one TV antenna without interaction. Mary be installed outside in semi-protected area. Solderless connections to 300 ohm line. In sturdy polyatyrene case.
Cat. 902 DUAL-MATCH 2-SET COUPLER-List Price $\$ 3.95$ Cat. 912 "TINY-MITE" Coupler \& Socket-List Price $\$ 1.75$

## CHIMNEY MOUNTS*

## THRIFT CHIMNEY MOUNT

Heavy gauge " $Y$ " type chimney mount in an everlasting, rustproof, Hot-Dip galvanized finish. Snap-in type mast holder with rounded wide-flared lips facilitates antenna mounting. Two $12^{\prime}$ lengths of $3 / 4$ " galvanized, or stainless steel straps. Four eyebolts provide a ready means for tightening the banding evenly. Will accommodate masts to $15 \mathrm{~s}^{\prime \prime}$ O.D. Furnished complete with installation hardware. Individually packaged.

Steel.Banding)
Model T-15 ST (Stainless Steel Banding)

A mounting of embossed, heavy sauge, steel, Hot-lip galvanized for everlasting rust resistance. Two 12 lengths of $3 /{ }^{\prime \prime}$ galvanized, or stainless sterl strapping are provided to encircle the largest chimneys. Will accommodate masts to $11 / /^{\prime \prime}$ O.D. Furnished complete with installation hardware. Two to a set. Individually packaged.

Two to a set

## Model Tam (Galvanized <br> Steel Banding) <br> Model ZM ST (Stainless

Steel Banding)
The Challenger Chimney Mount is an embossed, heavygauge, steel mount in a golden irridite finish. Two serrated " $U$ " boits provide a ready means of attaching the mast to the mounting bracket. Will accommodate all sizes of masts up to $11 / 2^{\prime \prime}$ O.D. Two $10^{\prime}$ lengths of \%" galvanized, or stainless steel strapping are sufflcient to encircle most chimneys. Furnished complete with installation hardware. Two to a set. Individually packaged.

## SOUTH RIVER METAL PRODUCTS CO., INC., South River, New Jersey PIONEER MANUFACTURER AND OUTSITANDING PRCDUCER OF THE FINEST LINE OF ANTENNA MOUNTING ACCESSORIES

# South Diver WALL Brackets <br> (With "U" bolt type mast sockets) 

## 3" WALL BRACKET

(Factory Assembled)
Model WB-3-Made of non-rusting. non-staining aluminum, extruded and embossed for extra strength. Designed especially for use on new homes being constructed with very small or no eave overhang. Furnished with special serrated " 0 " bolts to accommodate masts up to $142^{\prime \prime}$ O.D. The gripping teeth in the bolt, together with the serrated surfaces on the bracket, insure a positive, nonsllp grip that prevents the mast from turning in high winds. Complete with installation hardware. Individ. ually packeged.

## 6" WALL BRACKET

(Factory Assembled)
Model WB-6 - Destgned for the average wall Installation on homes with small eave overhang. Is made of heavy gauge steel, rlveted for extra strength. Everlasting, Hot-Dlp galvanized finish prevents rusting and the stainling of walls. special serrated "U" bolt designed to fit all stae masts up to $11 / 2^{\prime \prime}$ O.D. The gripping teeth In the bolt tasure a positive non-slip grip that prevents the mast from turning in high winds. Complete with installation hardware. Individually packaged.

## $9^{\prime \prime}, 12^{\prime \prime}, 15^{\prime \prime}$ \& 18" WALL BRACKETS

## 24" WALL BRACKET

(Factory Asserabled)
Models WB-9, WB-12, WB-15 \& WB-18 - Constructed of heary gauge, embossed steel and iurnlehed with a tubular, alumalnuas. tripod leg. The steel is HotDipped la an everlasting, nustproo? galvanized fintih. The unlque, preassembled one-plece constructioa tions quick and easy. Takes masts to $1 / 2$, $0 . \mathrm{D}$. Complete mlth intallation hardware. Individualliz packaged.

- A heavy gauge steel leg. emborsed and galvanized, substituted when aluminum is unavallable. Extra legt are avallablo for tae with unurualls high and heavy manta.

(Factory Assembled)
Model WB-24 - Made of heavg gauge stee with two aluminums tripod legs. The steed nides of thls wail bracket feature a relnYorced emborsed construction for extra stirdiness. 3teel sections are Hor-Dip galvanizod in an everiatiog, rustyroor rimish coastruction und lis. nne-pleca coske it east to lastill spreac vide a simple mears of fastion ing to wail studs of homes Takes masts to 1 ith 0 D. Com plete with instaliation hardware. Individually packaged.
- Heavy gauge ateel leet, emborsed and ramenired ars mbettuted and galvanired. art absituted when alumioum fo dospallable.

# Sonto Diver <br> COMBINATION PEAK \& FLAT ROOF MOUNTS 

| Model PFM-1 <br> (fits Mosts ap to $\left.1 / 2^{\prime \prime}\right)$ | Model PFM-1 LM <br> (Fits Morts up to 2") |
| :---: | :---: |

A low priced walk-up type rool mounting for feak, flat or pitehed roois. Constructed of steel, plated in a golden irr:dite finish for rust protection. Factory assembled.

Model PFM-2<br>(Fits Mosts up to $1 / 2^{\prime \prime}$ )

This all aluminum roof mounting can be used on any type of peak, pitched or flat roof. Ingeniously designed of alrcraft type extruded aluminum. Features the exclusive South River "DropLock" mast socket for bringing the mast from a horizontal to vertical position. The flaps can be adjusted to conform to the pitch of the roos. Flaps lock securely to the body by means of serrated teeth extruded the length of both locking members Comes completely assembled. Individually packaged.

## Model PFM-90

(Fits Masts up to $1 \frac{1}{2}$ ")
Model PFM-90 LM
(Fits Masts up to 2")
Economically priced swivel roof mounting. Of steel. finlshed in golden irridite. Factory assembled.
$\underset{\text { (Fits Mosts up to 21/4") }}{\substack{\text { Model } \\ \text { (Fin }}}$

This roof mount is ruggedy constructed to accommodate large and heavy mast installations. One plece body and oversize adjusting flaps are of heavy gauge steel. Hot-Dip galvanized for everlasting rust protection. The tube socket is of heavy walled plpe and will accommodate masts up to $2 \%{ }^{\prime \prime}$ O.D. Furnished completely factory assembled.

COMBINATION PEAK \& FLAT ROOF MOUNTS

## SOUTH RIVER METAL PRODUCTS CO., INC., South River, New Jersey pIonetr manufacturer and outstanding producer of the finest line of antenna mounting accessories

Featuring Reverse "C" Bolt and Clamp Mast Holder

Models NT-3, NT-4 - These $3^{\prime \prime}$ and $4^{\prime \prime}$ wall brackets are fabricated of heavy gauge $11 / 4^{\prime \prime}$ width steel. Embossed for extra strength and rigldity. Hot-Dip galvanized to provide an everlasting, non-staining. rustprool $\operatorname{tin} 18 \mathrm{~h}$. Reverse " U " boit and clamp, mast holder, provides simplified conventent means of securing mast. Complete with installation hardware. Individually packaged.

Featuring Reverse "U" Bolt and Clamp Mast Holder

Model BR-3 - Model BR-3 is a low priced $3^{\prime \prime}$ wall bracket designed for light duty installations. It is constructed of $1^{\prime \prime}$ width steel stock, plated for rust protecthon. The reverse "U" bolt and clamp. mast holder, facliftates installation of antenna mast. Individually packaged.

Designed to provide a mounting on buildings utilizing the eaves where a roof installation is undesirable and the walls are of brick.

Model EM-1 (Unassembled Model) Constructed of heavy gauge steel, embossed for extra strength. Hot-Dip galvanized for an everlasting, rustproof, non-staining fin. 1sh. The 4" upper bracket provides ample clearance from eave, insuring no mast contact with the roof overhang. Lower bracket has a bridge type truss construction for extra strength and rigldity. The generou $48^{\prime \prime}$ spread of lower bracket provides ample spacing petween brackets insuring good mechanical support. Complete with installation hardware. Note: Model EM-1 to packaged unassembled and is quickity and eastly assembled in a few minutes. Indi. vidually packaged.

Models EM- 48 and EM-60 - The EM-48 and EM.60 Eave Mounts are one plece assermbles. Upper bracket extends $3^{\prime \prime}$ from eave on EM-48, and $4^{\prime \prime}$ on EM-60. Lower bracket is constructed of heavy gauge steel, formed into an angle and embossed for extra strength. Hot-Dlp galvanlzed finish provides an everiasting rustproof protective coating. Upper and lower brackets are furnlshed with reverse " $U$ " bolt and clump, mast holder for qutck, simple installation. Complete with necessary mounting hardware. Individually pačeged.

$\begin{array}{ll}\text { EM-48 } & \text { 48" Eave Mount } \\ \text { EM-60 } & 60^{\prime \prime} \text { Eave Mount }\end{array}$

Model EM-30 - One plece assembly of heavy gauge angle Lron. Upper bracket extends $3^{\prime \prime}$ from roof provialing anple clearance for mast. Finished in a fot Dip galvanked coating for enduring ruis protection. Both brackets feature reverso "U" bolt and clamp, mast holder for quick, simple installation. Complete with necessary mounting hardware. Individ. ually packaged.

## WIRBLEESE PHONO OSCILLATOR WG-GA

This compact unit is designed to enable any standard record player to be easily converted
 to wireless operation. Record reproduction is then possible through a regular radio raceiver without the necessity of cumbersome inter-collnecting wires. Installation is simple accordins to the complete instractions furnished with each unit.

The circuit incorporated in the Wireless Oscillator is of such design that faithful reproduction is assured. The unit comes eompletels wired and tested inchading thbes and is fin ished in black enamel. Operates from 115 volts AC or DC. Fraquency range is approximately $1100-2150$ K.C. Actual weight 1 lb ,

## COMHINATION ANTENNA MOUNT

This now Combination Mount is the latest addition to Bud's eompleti line of television antenna mounts for eondition.

Made of two shecten of extia heavy gauge, tough sted. the upright portion is welded togrther for a perme. nent bond, Spread portion is aceurately formed for peak or wall installation. Sturdy construction guarantees per. manent, trouble-frew mast installat. tion.
The Combination Mount has a Lalked. blicelk enanmol finish to frevernt rust.

## HR-600 IHCOH PASS FILTER

The Illo-fol high laiss filter is designed to have in eut off frogumary at 42 megucycles, thus this
filter rejects signals froni o to 42 megacycles. It is within this range that the majority of signals is within this range that the majority of signals
causing interference would be received. Since cansing interference would be received. Since
there is no attenuation above 42 megacycles. there is no attentation above 42 megacycles bicture strencth or gutity is not nffected
This unit is easily installed and complete installation instructions are included. The filter is housed in an uttractive uluminum case $31 /{ }^{\prime \prime}$ $\begin{array}{ccc}x & 21=x \\ \text { HF-600...... }\end{array}$

Tealer Cost \$3.57

## ADJUSTABLE CHIMNEY MOUNTS

Very easy to install on any size chimney without usu of spccial tools. The NFIV BUD S'lisAP CiLAMI simplifes and speceds up installation. A rugged an temon instangation is assured. A Wide Range of
TEMPERATURE CONTROL OVENS

- Custom Oscillators, Crystal Filter Networks.
- Suppliers of Quartz for Ulire Sonic Transducers.
- Complete customer ensineer. ing service provided for quarts crystal applications.

SANDWICH, ILLINOIS

## TYPE XL100

Exact 100 Kc ., used
extensively in frequency standards. Mounts in $3 / 4$ " crystal socket or standard 5-prong socket.

## TYPE CM5

Frequency range 1,500 to $30,000 \mathrm{Kc}$. Fixed air gap, standard . $486^{\prime \prime} \times .093^{\prime}$ or standard octal socket.

## TYPE DFS

Features separate 100 and $1,000 \mathrm{Kc}$. crystals in one mounting, with accuracy $\pm .005 \%$ over
range of $-10^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}$ when used in recommended circuits.

## TYPE VC0-1

Temperature controlled oven, mounts two VR6. CM1. CM5 crystats. 18 W . heater $6,10,28$, or 115 V fits standard octal socket. Pilot lamp connection to thermostat

## TYPE VCO-2

Temperature controlied oven mounts two JAN HC 6/U or $13 / \mathrm{U}$ or VR6 crystals. 4 W . or 6 W . heater $6,12.6$, or 28 V. Fits standard octal socket. Pilot lamp connection to thermostat.

Hermetically sealed in compact metal case, 1500 Kc to $75: 0 \mathrm{Mc}$ frequency range. (Jan type $\mathrm{HC} \cdot 6 / \mathrm{u}$ ) Pin is $.050^{\circ \prime}$ diameter spaced .486*.

## TYPE CM1

Fixed air gap, 850 to $20,000 \mathrm{Kc}$ frequency range. Ava lable in standard $3 / 4^{\prime \prime}$ and G.R. $3 / 4^{\prime \prime}$, 5/8" $7 / \mathrm{a}^{\prime \prime}$ or $.850^{\prime \prime}$ spaced pins

## TYPE CBC-O

Frequency range 60 to $10,000 \mathrm{Kc}$. Available with 6. 8, or 10 volts $\pm 1 / 2$ degree C. temperature stability. Standard 5 prong socket.

## the dependable source for AMATEUR CRYSTALS

Now available for your amateur rig, a completely packaged oscillator unit designed and engineered to utilize the many advantages of crystal control on two and six meters. Output is obtained directly on six meters; operation on

TYpE cco-2L CODE No. E16 A two meters requires only a tripler stage.
The CCO-2L is the ideal oscillator for an efficient two band transmitter, or as a basic unit in new construction. Features include: adequate drive for V. H. F. medium power beam tubes, no self-oscillation under any operating conditions.
The CCO-2L is semi-enclosed in a metal case with power input and r.f. output terminals in the back for short direct external connections. The oscillator tube specified is a 12 BH 7 .

## OVENS FOR TEMPERATURE CONTROLLED CRYSTAL UNITS

MONITOR manufactures a wide variety of ovens for temperature-controlled crystal units. Two typical examples are illustrated abeve. Units are available which will accommodate one or more of a large number of holder types. Heaters are normally furnished for either 6, 12 or 24 volt operation, but special values can be furnished.

MONITOR ovens feature an hermetically-sealed thermostat and will maintain very close temperature control over a wide range of ambient temperatures.

## ESICO

This small pot is used largely for in-
dividuol dipping of small parts ond
reaches on temperature of oppraximately $\xrightarrow{\text { No. } 12}$ reaches a temperature of oppraximately
$750^{\circ}$. For higher temperatures, it is possible to use aither a higher temperatures, it is possible to use for details.

No. $70 T$
This is a thermostatically controlled pot, maintaining a temperature of $400 / 600^{\circ}$ control permits the pot to be used any where between these two temperatures. See table below for details.

This pot is used for dip soldering of No. 36
bundles of lead wires and where a No.
slightly hotter pot is required than the
$\# 12$. It operates ot approximately $750^{\circ}$. If o higher
temperature is required, a \#\# $\$ 0$ element moy be used.
See table below for details.

No. 75 T This pot is similar in operation to the \#7or, but is intended for the dipping $\longleftarrow$ commodated in of smoll panels which cannot be ac. $400 / 6000^{\circ}$ plus or minus 4 . The pot is oiso orvilobis without a thermostot but is then catalogued os $\# 75$. Without a thermostat, the pot reaches a temperature of $850^{\circ}$. See table below for details.

This pot is used for volume tinning and operates at a temperature of $800^{\circ}$. On oc

No. 60 casion where production requires greater $\longrightarrow$ heat drain capacity, elements of a higher wattage than the standard 325 watt hove been supplied. However, we recommend the use of the 70600 W Pot for this greater heat requirement and higher tem.
perature. See table below for defails.

No. 80
This pot is intended for printed circuit ponels and is thermostatically controlled. Temperature range is $400 / 600$. The por stands on 4 comperature range is $400 / 000$. The por screws for leveling. See table below for details.

This is a high heat pot reaching a tem. No. 70
perature of approximately 900 , and has No considerable heat drain capacity. Where
$\longrightarrow$ pots are required for 220 V operation, longer elemen life will be secured than in the case of the $=60$. See table below for details.

No. 90 this is a high temperature pot intended . for silver soldering, and will maintain below for details.

This sand tray will occommodate all
of the round base solder pots shown
No. 1270 froy is fisted with
$\xrightarrow{270}$ leveling screws. See toble below for details.

## FOR MANUFACTURING AND SERVICE OF RADIO AND ELECTRONIC EQUIPMENT

*Registered trade-mark of General Electric 1 "
ASK YOUR G-E DISTRIBUTOR FOR A COPY OF BULLETIN GEA-4519.

- HIGH-SPEED SOLDERING. You can solder as fast and continuously as the nature of the work will allow,
- UNIFORM PERFORMANCE. Operating characteristics remain constant day after day. No appreciable decrease in efficiency, even after months of service.
- EASY, LOW-COST REPAIR. Assembling and disassembling are easy.
- LONG LIFE AND LOW MAINTENANCE. Life is lengthened, and over-all costs are kept low because sturdy construction obviates need of frequent repairs.
- THEY NEED NOT BE RETURNEDTOTHE FAC. TORY FOR REPAIR. Irons can be repaired on the job without special tools or skill.

## SOLDERING IRONS

## Equipped with Long-life Calrod* Heaters

FOR MANUFACTURING AND SERVICE OF RADIO AND ELECTRONIC EQUIPMENT

## MIDGET SOLDERING IRONS

## APPLICATION

This 8 -inch, $13 / 4$-ounce featherweight iron for close-quarter soldering with pin-point precision is used where conventional irons might cause damage . . . be clumsy to handle . . . be more expensive to operate. The Midget literally goes places with greater efficiency and less power with no sacrifice in heat or speed. With its fingertip operation, this iron will help make an expert out of any solderer in a short time.

The Midget has Ironclad copper tips either $1 / 4-, 3 / 16^{\circ}$ or $1 / 8$-inch diameter, as desired.

THIS MIDGET DOES A BIG JOB IN

- Boosting Production Rates
- Increasing Operator Efficiency
- Cutting Down Employee Fatigue
- Saving on Repair and Maintenance
- Reducing Rejects
- Manufacturing and Repairing:

Radios and other electronic equipment
Meters
Instruments
Jewelry
Appliances
... and many other products
requiring precision soldering
RATING: 6 VOLTS, 25 WATTS

| Soldering Iron, Including Tip and Heater Assembly | Cat. No. | Price $\dagger$ |
| :---: | :---: | :---: |

## SPECIAL TRANSFORMERS (OPTIONAL) for G-E MIDGET SOLDERING IRONS

Single-tap, Cat. No. 6A362

Four-tap, Cat. No. 6A364

Specially designed 115 -volt transformers are available as optional equipment in two types:

1. Single-tap $115 / 6$ volts-for use where only one soldering heat is required
2. Four-tap $115 / 6.3 / 6 / 5.7 / 5.4$ volts - gives wide range of heats (from 25 to 35 watts) for close temperature control of tips
Transformers are small, lightweight, but sturdy. Their 6 -foot extension cords can be plugged in any 115 -volt a-c circuit.

| Description | Cat. No. | Price $\dagger$ |
| :---: | :---: | :---: |
| Single-tap | 6 A362 | \$5.70 |
| Four-tap | 6A364 | 7.60 |

Pulblication Reference
GE.A-4519

## THE MIDGET OFFERS MAJOR ADVANTAGES

Low-cost soldering--Solders more efficiently, using only approximately one-fourth wattage normally used.

Fingertip operation-Only 8 inches long, weighs but $13 / 4$ ounces. Styled for fingertip grip.

Quick, continuous heat-Famous G-E Calrod heater built into Ironclad copper tip for rapid heat transfer.

Easy renewal-lronclad tip and heater assembly can be replaced as a unit merely by unscrewing from handle.
Long life, low maintenance-Low voltage permits use of heavy, long-lasting nickei-chromium resistance wire. Less maintenance is required with long-lasting Ironclad copper tip.

+ Manufacturers' suggested retail price.

 quality at a mactical price. Greatest sanding area, most power and lowest design in its price class. 25 Sq. Inch Sand- ing Area - Hqual to largest vibrator type. Straight-Line Action-No bucking, goes in corners. 2-15/16" High-Gets into low places. Quiet Operating-Special insulation minimizes vibration and noise. Powerful Motor-Cool, reciprocating type $110 / 120$ volts. 60 cycle. AC. 8 foot power cord. Guaranteed-UL approved and guaranteed for 90 days. Individually Packaged-Unit weight in display carton with 6 assorted sheets of sandpaper and 1 polishing cloth $51 / 4$ lbs. Master carton of 3 weighs 17 llss. LOW PRICE............. $\$ 14.95$ each, list

## VULCAN ELECTRIC SOLDERING TOOLS

High-plaered Soldering Tools, designed for fast solder ing, with low operating cost.
Tips are of finest forged copper.
The "Hang" or balance good mechanics appreciate, plus light weight.
Cool handles of selected birch, shoped to fit the hand.
6 ft . heater cord, with unbreakable rubber plug.
Fireproof serminals.
Heating elements easily replaced.
Operate equally well on $A C$ or $O C$.
 fine soldering of instruments, meters, gouges, small radios, etc. or any spots where spoce is cramped or there is liftle clearance. The cool, tapering wood handle permits "writing grip." Flexible coil also assures coolness. Equipped with approved cord and unbreakable rubber plug. Standard tip is $1 / 4^{\prime \prime}$ but $3 / 16^{\prime \prime}$ or $1 / 0^{\prime \prime}$ tips are available, as well as special tips, bent to any angle or in various shapes.

## WELLER SOLDERING KIT

8250AK KIT in. cludes: 250 Watt Soldering Gun 8250A - Heary duty, instant heat. Famous Kester Solder - Ample supply, generalpurpose. LongLife Soldering Tip —For heat sealing and mending plastics, etc.

Cutting Tip - For cut-
ting plastic tile, removing hard putty, etc. Tip Inter-
 change Wrench. Sturdy Metal Case-For storage aud carry-
ing. Two instruction Booklets. Individually Pack-aged- $61 / 2$ lbs. Master carton of 3 weighs 21 lhs . ( $\$ 17.00$ value) PRICE
\$14.95 each, list

## POWER SANDER and Polisher

MODEL 700 'TOp quality at a practical price. Greatest sanding area. most power and lowest design in its price class. 25 Sq. Inch Sand-
 ing Area - Equal
to largest vibrator type. Straight-Line Action-No bucking, goes in corners. 2-15/16" High-Gets into low places. Quiet Operating-Special insulation minimizes vibration and noise. Powerfu Motor-Cool. reciprocating type $110 / 120$ volts, 60 crcle, AC. 8 foot power cord. Guaranteed-UL approved and guaranteed for 90 days. Individually Packaged-['nit weiglit in display carton with 6 assorted sheets of sandpaper and 1 polishing cloth $51 / 4 \mathrm{lbs}$. Master carton of 3 weiglis 17 lbs. LOW PRICE............ $\$ 14.95$ each, list

## VULCAN ELECTRIC SOLDERING TOOLS

High.pc wered Soldering Tools, designed for fost solder ing, with low operating cost.
rips are of finest forged copper.
The "Hang" or balance good mechanics appreciate, plus light weight.
Cool handles of selected bireh, shaped to fit the hand 6 fl . heater cord, with unbreakable rubber plug. Fireproof terminals.
Heating elements easily replaced.
Operate equally well on $A C$ or $D C$
 fine soldering of instru ments, meters, gauges, small radios, etc. or any spols where space is cramped or there is little clearance. The cool lapering wood handle permits "writing grip." Flexible coil also assures coolness. Equipped with approved cord and unbreakable rubber plug. Standard tip is $1 / 4^{\prime \prime}$ but $3 / 16^{\prime \prime}$ or $1 / 0^{\prime \prime}$ tips are available, as well as special tips, bent to any angle or in various shapes.
Cat. No. Wotts Tip Weight Length List $\begin{array}{lllllll}\text { Pygmy } & 25 & 1 / 4^{\prime \prime} & 702 . & B 1 / 4^{\prime \prime} & \$ 4.50\end{array}$

SOLDERING TOOL HOLDER

Holds and guards the Soldering Tool and keeps the tip at soldering temperature as long as it remains in the holder. Has a cord and attached plug cap for connection to current and a receptocle for plugging in the Tool. A convenient adjusting screw sets the Holder thermastat to maintain proper temperature. $A C$ only
No. 2100 without thermostat $\qquad$ $\$ 4.00$ list No. 2100 t with thermostal $\qquad$ $\$ 6.50$ list

PLUG TIP - All parts replaceable

## Beryllium Copper Drivers

Non-Metallic Radio and TV Aligners

ZBX 51

Z5X 61

ZA 70

## ZBX 51 Screw Driver Kit

A fine, all-purpose kit of interchangeable regular and Phillips blades that fit same handic. $6^{\prime \prime}$ extension makes 10 combinations possible. In durable leatherette bag.

## ZSX 61 Nut Driver Kif

A most versatile and complete hexagon wrench kit for radio, television or any other work requiring speedy nut setting. All sockets are super hard for maximum utility and long life. $6^{\prime \prime}$ extension makes 10 blade lengths possible. In handy leatherette tool roll.

## ZA 70 Allen Driver Kit

This useful kit consists of 6 hexagon driv. ers, handle and bag. Will service hexagon recessed opening screws Nos. 4, 5, 6, 8, 10 , $1 / 4^{\prime \prime}, 5 / 16^{\prime \prime}$ and $3 / 8^{\prime \prime}$. Each bit is extra long and may ground back as wear occurs.

## ZU 75 Universal Driver Kit

Here is a kit that is universal in its applica. tions since it will serve all three types of the most popular screws in use today-regular slotted, Phillips, and clutch head. All popular size blades are included-3/16" and $1 / 4^{\prime \prime}$ for regular slotted screws; No. 1 and No. 2 Phillips; 5/32" x 3/16" clutch head.

## 27-Piece TV and Radio Kip

NO. TV 27 K1T-Contains practically every hand tool necessary for television and radio work, plus exira pockers for pliers and other personal tools according to individual preferences. Contains one each of the fol. lowing: ZH 1 medium duty handle; ZH 2 heavy ducy handle: 7X 56 extension; A 132 $1 / 4^{\prime \prime}$ stub; 1/4", 3/16", 1/8" regular bits; No. 1 Phillips and No. 2 Phillips bits; 3/16", $1 / 4^{\prime \prime}, 5 / 16^{\prime \prime}, 11 / 32^{\prime \prime}, 3 / 8^{\prime \prime}$, $7 / 16^{\prime \prime}$ and $1 / 2^{\prime \prime}$ hex. wrenches; AT 45 metal ip aligner; A $116.23 / 32^{\prime \prime}$ pocket clip; P01 \#0 Phillips thin blade; OK $24 \quad 1 / 8^{\prime \prime}$ screw holding; VR 261 1/8" insulated blade; OK $383 / 16^{\prime \prime}$ screw holding; VR $3813 / 16^{\prime \prime}$ insulated blade; VB 210 1/8" $\times 10^{\prime \prime}$ non-mag. netic adjuster; AT $510 \quad 5 / 32^{\prime \prime}$ fiber aligner; VO 2 medium offset; VO 1 small offset.

## 14-Piece TV and Radio Kif

NO. RT 14 KIT-Here's a handy, convenient kit for radio and TV service men. Contains nut drivers, Phillips and regular drivers, plus ZH 2 heavy duty handle and fa. mous Vaco $6^{\prime \prime}$ extension which dou. bles the usefulness of each driver. In durable leatherette tool roll.

This plier is intended for general use where a short nose is desired for getting into difficult places.

Long Needle Nose Plier with Cutter

No. 8103 7"
An exceptional handy and useful plier, well proportioned with long thin nose, designed for reaching into tight places.

Curved Needle Nose Plier

No. 8104 6"
A long, bent, thin nose plier. The angle is arranged to give full clearance and prevent skinning of knuckles.

No. $81056^{\prime \prime}$
Newly designed long nose plier suitable for working in confined places.

Has long, thin, sure-grip jaws to reach into places where fingers and ordinary pliers will not go.

Diagonal Cutting Plier
 No. $820141 / 2^{\prime \prime} \quad$ No. 8203 6" No. 8202 5" No. 8204 71/2" Specially designed for electricians, radio and TV service men and automotive mechanics. Powerful jaws cut close and quickly.

One of the most powerful diagonal pliers made. Long handles give a 20 to 1 ratio of leverage to cut with minimum effort.

Heavy Duty Linemen's

No. 8302 71/2" No. $830383 / 4^{\prime \prime}$
One of the most popular pliers in use today. Has extra powerful leverage and reinforced cutting knives.

A top quality slip joint combination plier. Has all the quality features of higher priced cutting pliers at modest cost.

This plier incorporates the best features of a regular side cutter with the versatility of a slip joint combination plier.

Long Flat Nose
Plier with Cutter

Extra long, wide, flat nose makes this an especially useful tool. Plier is tempered so jaw will not spring under pressure.
Long flat Nose
Plier

No. $85026^{\prime \prime}$
Same as No. 8501 except supplied with. out cutter.
Long Reach
Flat Nose Plier

## No. 8503 71/2"

Fitted with duckbill type jaws wider and heavier than those of the ordinary flat nose for firmer gripping service.
VACGRUV Adjustable Ignition Plier Plated

Especially designed 3-position jaws accommodate small to medium large nuts, bolts, etc. Fine for delicate radio and TV work.

## VACGRUV Adjustable

Plier Wrench, Chrome Plated

Built to provide an especially secure grip on medium to large bolts, nuts, pipes, etc. 3-position jaws open to $-5 / 8^{\prime \prime}$. $3 / 4$ ", respectively.

## vacgruv adjustable

Plier Wrench,
Chrome

A general purpose, heavy duty tool with 5 -position jaws that open to $11 / 8^{\prime \prime}$. Doubles as pipe wrench, gripping plier and hand vise.

## LrNN Lig Terminals Solderless Vico by VACO <br> LYNN Ligfting

No. 2195 Service Kit
A GENERAL PURPOSE ELECTRICAL, RADIO AND TV KIT containing everything needed for making clean, fast, trouble-free electrical connections. No soldering! No fuss or muss! Kit includes ... No. 1900 Crimping Tool and Terminals Nos. 2300, 2301, 2302, 2400, 2401,2402 , $2600,2601,2602$, and $3300 \ldots$ all in a clear plastic box with tight-fitting lid. Individual bins marked with terminal stock number cards.

No. 1900 Crimping Tool

No solder. . . no iron. . . no heating .... a perfect connection every time with this tool and Lynn Lightning Solderless Terminals by Vaco! Crimping tool has wire cutters, indenting die, wire-stripping dic. shock-proof, slip.proof plastic handle. sleeves. For No. 22 to No. 10 gauge wire.

Only 3 SIMPLE STEPS and Terminal Is On

1. Cut Wire. Use the wire cutter built into the crimping tool length.

Wide Assortment of Solderless Terminals for General Use, Radio and TV
to cut wire proper
Then pull insulation off wire. tooth and close tool like pliers.

Extra long barrel on terminal provides easy crimp and perfect contaci. Only ONE crimp necessary. Barrel always remains round.

## 

CHASEMANUFACTURING COMPANY Manufacturers of Pioneer Punches • Ham-R-Presses • Knurl-Tite Wrenches

## PIONEER CHASSIS PUNCHES

PIONEER CHASSIS PUNCHES are made of high grade tool steets, precision machined, carefully heat treated and finish ground to close tolerances. They come to you individually wrapped and packaged in oil proof containers and are fully guaranteed.
OPERATING INSTRUCTIONS: Drill or punch hole $1 / 16^{\prime \prime}$ larger than drive screw or bolt. Insert screw thru die with die opening towards threads. Put screw thru hole in work and screw on punch until punch contacts work. Turn drive screw with wrench until hole is punched. For easier operation, lubricate working parts.
'SQUARE.' Tedious hand filing and sawing of holes to mount angular parts on sheet metal is now eliminated with PIONEER SQUARE CHASSIS PUNCHES. Several full cuts or shorter "Nibbles" will enlarge the first basic square hole to any larger angular hole or slot desired.

COMPLETE INFORMATION COVERING ABOVE PRODUCTS ON REQUEST.
T. .

WRITE TO WALSCO ELECTRONICS, 3602 CRENSHAW BLVD., LOS ANGELES 16, CALIF.

Designed primarily for the electrical trade to permit fast． casy enlarging of knockouts and cutting of looles for conduit in metal boxes and cabinets．Also excellent for automobile work where holes are needed ior heater pipes and other accessories．Simply insert the tool in a knockout or small drilled tole and give the screw a few turns with an ordinary wrench．No． 735 set las fonr punches for cutting $7 / 8,1 \frac{3}{3}, 1 \frac{1}{2}, 114$－inch holes for $1 / 2,3 / 4,1.11 / 4$－inch conduit．Set is neatly packed in leather case illustrated． The $1 / 2$－inch punch will cut a $7 / 8$－inch hole for $1 / 2$－inch condnit where no standard knockout is provided when a $\mathrm{T}^{7} \overline{6}$＂liole is drilled．

## Heavy Duty Drive for $1 / 2^{" 1}$ Punch

To increase length of service of the $1 / 2$－ incll Knockout Punch in cutting $7 / 8$－inch holes in heavier－gange sheet metals．the No．KR5 Drive Screw with No．Klit I）rive Xut illustrated is recommended．

## NO． 737 KNOCKOUT PUNCH SET

Similar to the No． 73 set，but consists ai mily two punches for cutting holes to accommoriate $1 / 22^{\prime \prime}$ and $2^{\prime \prime}$ comduit．I＇acked in leather case．

## NOS． 738 AND 739 KNOCKOUT PUNCHES

For cutting holes to accommodate $21 / 2^{\prime \prime}$ and $3^{\prime \prime}$ conduit．Design is sim－ ilar to that of smaller GRELN I．EE．Kinockout Punches：insert in a knockout or drilled hole and turn drive nut with an ordinary wrench．Packed and sold indiviclually．

## NOS． 741 AND 742 KNOCKOUT PUNCHES

For quickly making smooth openings for $31 / 2^{\prime \prime}$ and $4^{\prime \prime}$ conduit．Hole is clean， no filing of burrs necessary，Operation is similar to that of other GREEN－ LEE Knockont Punches．Simply in－ sert in hole for $1^{\prime \prime}$ conduit and turn Irive nut with an ordinary wrench．

## No． 740 Knockout Cutter

Companion tool to GREENLEE Knockout Punches．Enlarges knock－ outs to take $11 / 2,2,21 / 2$ and 3 －inch conduit．Operation is simple since an ordinary wrench drives the tool． Cutting is done by the drive action of two wheel cutters．Special discs can be furnished for cutting odd sizes of holes from $1+\frac{5}{6}$ to $31 / 2$－inch diameter．Packed in leather case．

NO． 7646 HYDRAULIC KNOCKOUT PUNCH DRIVER

A powerful portable hydrau－ lic unit for driving all GREENLEE Knockout Punches．Also drives GREENLEE Radio Chassis Punches using $3 / 8^{\prime \prime}$ or larger drive screws．Quickly，easily cuts holes in 10－gauge metal． Excellent for use in tight places．Packed in metal case． List price complete，$\$ 96.00$ ．Weight， 20 lbs ．

## SNAP-ON DRAWRR CO. Norrow, Ono

## YOU make up your own small parts cabinet to exactly fit YOUR NEEDS with ...

- MDDERN Light weight, functional in design.
- EFF|CIENT Parts are quickly, easily
- PRACTICAL ocated.
- SELECTIVE

You have a choice of three

- ECONOMICAL
- CONVENIENT

You bur only what you actually need.
When vou need mare room.
Just snap on another SNAP. ON DRAWER

- The sturdy, steel shells of the SNAP-ON DRAWER snap together on sides, top and bottom, with duplicate shells to form a strong metal cabinet. No tools required. Just place the metal buttons of one shell directly over the holes in the adjacent shell and snap the buttons into place, one at a time.

If you wish to change the position of a drawer. the shells can be readily pried apart with a knife blade and rearranged. Finished in GUN-METAL GRAY.

## (1) vinyl color tape

Our newest. Vinyl plastic tapes in eight colors and three widths... $1 / 2^{\prime \prime}, 3 / 4^{\prime \prime}, 11 / 2^{\prime \prime}$ ... 108" long. For use wherever color can help in wiring, indexing, coding, etc. Conforms to irregular surfaces. High dielectric resistance . . . up to 1000 V . per mil of thick. ness. UL listed. Packed in colorful self-service cartons.
Also available in large size rolls in four widths, $3 / 3$ " $, 1 / 2^{\prime \prime}, 3 / 4^{\prime \prime}, 1^{\prime \prime} . . .36 \mathrm{yds}$. long. Ideal for the industrial user.

## (2) PLASTIC ELECTRICAL TAPE

Plastic Electrical Tape Master Shop Package. This tape is thin and is used in places where space is limited. It has $150 \%$ stretch, high dielectric resistance, resists weather, water, oils, acids and corrosive chemicals. It conforms readily to irregular surfaces. Package contains 5 rolls $3 / 4$ inch by 44 feet each.
(3). 010 PLASTIC has the general charateristics of regular Plasfic except it is heavier for heavy duty work such as winding heavy cables, heavy electrical harness and for use in tape winding machines.
(4) Plastic Electrical Tape Counter Display Carton. DUTCH BRAND plastic is also available in an attractive point-of-sale display carton containing two dozen consumer size rolls $1 / 2$ inch by 150 inches. A convenient size for small repair jobs.
(5) Plastic Tape "Tool Kit" Rolls. Convenient size roll for the home workshop or repair trade. DUTCH BRAND Plastic Tape has many uses around the home and is widely used for professional work. Rolls are $3 / 4$ inch by 20 feet long. Packaged both in Counter Display Carton of 12 rolls and Junior Shop Package of 5 rolls.

## (6) FRICTION TAPE

DUTCH BRAND Friction Tape-This tape has long life, extra strength for easy use. One layer resists up to 2000 volts. Combined
with DUTCH BRAND Rubber Insulating Tape it produces highest dielectric resistance. Individually boxed and packed in attractive display carton. Each No. 8 rell contains 68 ft. of tape.
(7) Narrow Width Friction Tape. The handy size for radio and electrical appliance repair shops, electrical contractors, industrial users. The tape comes in a convenient $3 / 8$ inch width roll, handy for small work.
Special Widsh Friction Tape - Available in special widths for special uses ... comes in widths $1 / 2,1,11 / 4,11 / 2,2,3,4$ inches and wider.

## (8) RUbBER TAPE

For perfect insulation it fuses instantly with. out heat. Has extra high dielestric strength - resists up to 18000 volts through a single thickness. Strong, durable and non-corrosive to electrical conductors. Assures positive in. sulation for high tension lines where highest dielectric resistance is needed.

## (9) "DB" WIRE CONNECTORS

Solderless. Vibration Proof. Weather Proof. Long Skirt. "DB" Wire Connectors are now available for the convenience of the many customers who buy and use the well known DUTCH BRAND Electrical Tapes. Those who use wire connectors for many installations will find that "DB's" are a quality product. Available in four standard sizes to meet all needs. They resist pull-out and vibration. are weatherprool and are molded with the necessary length to give full insulation protection. U.L. listed.

## (10) CAULKING \& SEALING COMPOUND

Here is a light colored, non-staining plastic material that will not crack or dry out. It comes in $3 / 16^{\prime \prime}$ cords, easy ta press in place by hand. It is used ta caulk antenna lead-ins .. stops leaks and keeps out dust and cold drafts. It adheres to any dry surface.

## WALL LEAD-IN I-742

This Lead-In is used to facilitate bringing in antennas or feeders through a wall or window casing with ease and safety. Unit consists of a $12^{\prime \prime}$ threaded brass rod insulated with heavy plastic tubing, and two heavy ceramic insulators. Rod and insulator may be readily cut to any length.
I-742
Dealer Cost \$1.18

## SHAFT COUPLINGS, REDUCERS and EXTENSIONS

As indicaterl in the heading. these items are intended for connecting two sharts changing diameter of shafts, or for increasin. shaft lengths. Units made of brass.

## CONTROLLED TORQUE KNOBS with the built-in SAFETY FACTOR

Madel K1375

Madel K1376

JAN CONTROLLED TORQUE KNOBS are designed to safeguard delicate and castly instruments against careless or inadvertent cranking beyand their narmal stap:., Designed for multi-furn devices such as varioble copacitors, inductars, patentiameters, etc., the knobs wark on the principle af the slip clutch, outamatically disengaging and slipping when o predetermined tarque is exceeded. The knobs which are fluted ta aid in sensitive adjustment also have spinners far fost furning. Featuring distinctive styling, the knabs measure $17 \mathrm{~s}^{\prime \prime}$ O.D. \& $15 / 16^{\prime \prime}$ thick. They fit standard $1 / 4^{\prime \prime}$ diameter shoffs.
Model KI376 is the same as the model K1375 with the additional feafure of a retractable spinner. The retractable feature is useful when equipment must fit into small storage spaces or where there is danger of inadvertent movement af protruding controls. It has a positive toggle type action, being spring loaced either open or closed.

## "JOLTA" SHOCK TESTER

Madel No. 1001
This new shack tester for meters and small mechanisms provides for rapid and precise testing af the ability of campanents to withstand shack stresses. Designed for lobaratory testing of instruments such as relays, electric meters, clacks and ather electrical and electranic devices, if is accurately calibrated for direct readings in accord with specifications naw required in mast military and commercial cantracts. Known as "JOLTA," the tester is a sturdily built bench madel machine capable af accommadating all shapes and sizes of specimens up to a weight of 4 pounds and measuring up ta $5^{\prime \prime} \times 5^{\prime \prime} \times 5^{\prime \prime}$. Mechanisms may be fested while in actual aperation and under electrical laod. Camputation charts are supplied.
Designed to comply with specifications JAN-S-44 and MIL-STD-202; Method 202.

## PANEL BEARING \& SHAFT ASSY.

The versatile Panel Bearing and Shaft Assembly is used for contral of a remote component. Passivated stainless steel shaft is $1 / 4^{\prime \prime}$ dia. with one end flatted for attaching to control knob by set screws. Supplied completely assembled with two retaining rings, jam nut with lock washer, and brass panel bearing, nickel plated. Fits all panels up to ${ }^{3}$.' thick; mounts in ${ }_{13}^{2}$ " dia. hole. Cat. No. 'L'" Shaft Length AP15350 Panel bearing assy. API5350-1 API5350-2 API5350-3

## JACK COVER

These sturdy Jack Covers are used to keep out dust and moisture and to prevent inadvertent disturbance of control settings. They are made of steel and firished in enamel, affer bonderizing for rust prevention. Supplied assembled with stainless steel spring, hinge pin and neoprene pad. Fits or jack or panel bushings. For black wrinkle finish, specify ( -11 , smooth gray (-2) and olive diab (-3).

Fig. 1..................
Fig. 2
fig. 3

J1303 ()

## SHAFT LOCK

This shaft lack securely halds in position the shaft af valume cantrals, copacitors, switches, etc., which are $1 / 4^{\prime \prime}$ in diameter. Bady and lack nul af nickel plated brass. Supplied with nickel ploted steel lack washer. Bady and lack nut are available in stainless steel an special order.

Cat. No. AK5100

## BUSHING EXTENDER

This special bushing extender permits staggered mounting of components (having $1 / 4^{\prime \prime}$ dia. shafts) behind a pane. Pola tomelers or a premponity can be located in close proximity cn a pane wincel plated brass supplied in nickel plated brass in eight sizes.

HIGH VOLTAGE INSULATED COUPLING WITHSTANDS GREATER THAN 15 KV!

INSULATED UNIVERSAL COUPLINGS
$\pm 30^{\circ}$

This coupling permits chossis or panel adjustment of high valtage controls withaut danger of electrical shock to aperating persannel. Stainless steel shaft and precision screwdriver tip are molded into a single unit, melamime-ta-metal, campletely vibra tion and shack praaf. Operates with ease aver an ambient temperofure range of $-75^{\circ} \mathrm{C}$ to $+175^{\circ} \mathrm{C}$. Supplied cam plete with nickel plated hordware. Shaft mates slat af al standard patentiameter shafts WITHOUT FURTHER MACHINING. U.S. Pat. No. 2,681,378

## ELIMINATES BACKLASH AND COSTLY FLEXIBLE SHAFTS!

This varsatile and extremely durable nylan caupling mokes it passible to jain twa parallel drive shafts offsel fram each other plus or minus 30 degrees in any direction and separatians greater than 3 inches.

- Secures firmly to the drive shaft thru a nickel plated brass insert and 2 set screws.
- Used with $1 / 4^{\prime \prime}$ caupling shaft of any length (nal furnished).
- Shaft is keyed ta the coupler by zinc plated steel pins supplied by JAN.
- Eliminates backlash and replaces castly flexible shafts.
- Provides far insulatian and caupling from frant panel to remate cantral such as patentiometer, selector switch and other devices (ratoting).

Cat. Na. API 5299

## BEZEL ASSEMBLIES

JAN BEZEL ASSEMBLIES cansisl of cast aluminum alloy bezels finished in smaath dull ar wrinkle black enamel paint. Buno.S rubber shock mounts scole calibrated light filters and maunting hardware. JAN EDGE-LIT BEZELS hove engraved calibration scales on the windaw and accammodate pilot bulbs for edge lighting. All JAN BEZELS are designed for universal application and are specifically adaptable to JAN'S MAGNETIC SHIELOS.

## ran HARDWARE MANUFACTURING CO., INC. BROOKLYN 11, N. Y. <br> MAGNETIC SHIELDS FOR CATHODE RAY TUBES

JAN MAGNETIC SHIELDS are made of the highest grade of magnetic metals and are carefully annealed by a special process to assure optimum orientation of the specific grain structure of the alloy. JAN SHIELDS prevent distortion and intensity modulation of the electron beam due to stray magnetic fields and protect personnel against the dangers of accidental tube breakage. Mount ing holes are tapped for \#6.32 screw.
All cathode ray tubes with curved faces are underlined. Bezels with designations ( -1 ) are used with these tubes only. All of hers not under lined are flat faced fubes which are used with beaels designated as $(-2)$. See inside page for specifications or JAN EEZEL ASSEMBLIES. * Opening for anode provided when required.

for Television, Radio, Electronic Use

- prevents corona in high voltage sections
- keeps lead-in connections tight
- prevents rusting and pitting of antennas

Just spray it on - that's all: No special equipment needed. Krylon dries in a few minntes to form a hard. Waterproof coating that seals and lasts. Resists climatic conditions, salt spray, ete. . . . doesn't dry out or crack. Krylon, due to its high dielectric strength. prevents many of the causes of picture fading and high-voltage section losses.
"KRYLON-izing" is standard procedure in TV゙ installations: And for one good reason: it pays oft in dollars and cents:
Cut Down Contract ServicecallsIt's Very Simple with KRYLON!

. . . and so many important uses in industry, too!

 sintortar, assures stable calihration as it

The orisinal most reliable
LUBRICANT CLEANER "QUIETROLE" the preferred, standard product of the inclustry!
Your guarantee for quieting noisy television and radio controls, switches and other moving parts is QUIETROLE. Here is the original, noninflammable, most reliable lubricant-cleaner on the market today . . . developed through years of factual and authentic research.

## TEKNI-LABELS Electromic Equipment Decals

These simple, easy to apply decals provide the electronics technician with unlimited possibilities for titling equipment in the laboratory, shop or plant. Ideal for design and experimental phases of equipment development, to provide for quick title changes. Useful for placement of parts and testing and labeling auxiliary equipment Perfect labeling is easy.

| $\begin{aligned} & \text { STOCK } \\ & \text { NUMBER } \end{aligned}$ | COLOR | TITLE | DESCRIPTION | $\begin{aligned} & \text { NET PRICE } \\ & \text { EACH } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| 100 | WHITE | TRANSMITTER | For transmitting equipment. Set contains over 1200 titles, including large, $1 / 4$ " high labels for titling stages or separate major components of transmitter equipment. | \$1.35 |
| 108 | BLACK |  |  |  |
| 101 | WHITE | INSTRUMENT | For the experimenter and builder. Set includes all labels necessary for an Oscilloscope, Variable Frequency Oscillator, Grid Dip Meter, Standing Wave Meter, Null Detector, AC-DC Voltmeter, Audio Signal Generator, Modulation Monitor, Distortion Meter and Tube Tester and others. | \$1.35 |
| 109 | BLACK |  |  |  |
| 102 | WHITE | RECEIVER | For the engineer, designer or builder of receivers or receiving type equipment Ovei 1300 titles, dials, miscellaneous letters, alphabets and marks. | \$1.35 |
| 112 | BLACK |  |  |  |
| 103 | WHITE | TELEVISION | For the Television experimenter, engineer or designer of Television equipment and custom installer Includes special color experimental Television titles of great usefulness in Television work. | \$1.35 |
| 113 | BLACK |  |  |  |
| 104 | WHITE | DIAL. | For general use to match titles in other decal sets of our manufacture. Dials impart a wholly professional look to front panels and add greatly to the usefulness and ease of operation of any equipment. | \$1.35 |
| 110 | BLACK |  |  |  |
| 105 | WHITE | AUDIO | For use in the Audio and Sound field by engineers, designers Custom Builders and installers of sound systems. Set contains all necessary titles as well as recent new HI.FI tities | \$1.35 |
| 107 | BLACK |  |  |  |
| 106 | WHITE | RECEIVING TUBES | For identification of all tube sockets. More than 320 different tubes listed including most commonly used types Tubes not listed can be made up by combining portions of titles. | \$1.35 |
| 111 | GOLD | PANEL TITLE | For Custom builders and service men in titling front panels of finished wood cabinets, especially broadcast receivers, Television sets, HI-FI amplifiers, tape recorders and similar equipment. | \$1.35 |
| 115 | WHITE | ALPHABET | Seven complete alphabets in each package ranging from $3 / 4$ " high letters down to $1 / 10^{\prime \prime}$ high. Set includes large block letters as well as Greek and Old English. This assortment is ideal to make individualized titles and de. signs on all equipment. Arresting results are easily obtainable by combining these letters with markings in the "Trademarks" set, especially if two or more colors are combined. | \$1.35 |
| 125 | BLACK |  |  |  |
| 135 | GOLD |  |  |  |
| 145 | RED |  |  |  |
| 116 | WHITE | TRADEMARK | Hundreds of electrical and efectronic markings are included in this assortment, among them are circles, ovals, triangles, squares, arrows, dots, music notes, lighting flash, multi-orbit "Atomic" designs, name plates, corner designs, borders and many others which are extremely useful in decorating all electronic equipment. | \$1.35 |
| 126 | BLACK |  |  |  |
| 136 | GOLD |  |  |  |
| 146 | RED |  |  |  |
|  | GOLD | CALL LETTERS | Replacement letters for Call Letter Kits, $1 \frac{1}{2}{ }^{\prime \prime}$ high, modern style letters for amateur calls, windshields, equipment, titles, etc | \$ 05 |

## For Starting

HOLOS and DRIVES IN CNE CPERATION Matidellin HOLDS NUT OF HEX SCREN NOT DROP!

No more fussing or fumbling with small nuts or hex screws. The IRC Tension-Grip Nut Driver is ideal for close work in televisicn or radio servicing. The Tension-Grip nut holding device is a tempered steel band that grips the rut or hexagon head screw as it enters the socket; it will not drop it! The Tension-Grip has a sprine action and is non-magnetic; handles brass and stainless steel nuts as well as all regular types. Nut Driver shaft is drilled to a depth of $11 / 4^{\prime \prime}$, and securely set in a shock-proof plastic handle.

    Model 605A
    Contains all features of the Model gith A listed above. including the IIICKOK standard built-in roll chart and new HICKOK improved "Shert Test.
    New, large 5 " meter scale is easier to read more accurately. Attractive lucite window has static-proof coating.
    Accurate. built-in multimeter panel measures: Volts: (1-1000 A.C. - I).C. in four ranges each. Olmes: 20.0010 per volt D.C.
    1.000 per volt A.C.

    Model 605A: New, lighter weight portable. Radio and television technicians' popularly priced, all-purpose tube and set tester with built-in 20,000 ohm per volt D.C. Multimeter pancl. Designed for speedy, highly accurate radio and TV servicing.
    Built to the high HICKOK quality standard througlout. Provides Denamic Mutual Conductance circuits with tube readings in micrombos. A popular technicians model for on-location servicing. Smaller. lighter, but built entirely with highest quality components for accuracy and dependability.
    Excellent for leakage tests of electrolytics, and checks for hum in any stage of receivers. Puilt with a minimum number of jacks. Ranges are zelecterl with a rotary master switch. Test leads supplied.
    Model 605A, illustrated at the left. Same case as Model 600.A, above 17 thas. net. ?2 1bs. shipping weight 110-120 V..i.C. fo watts.

    SPECIFICATIONS:

    Resistance: 0.1 to 100 megohmes. (Center scale 25,2500 . 500.0000 ohlus. $)$

    Inductance: to 70 hemries. (By use of conversion chart furnished).
    Capacitance: 50 microfarads. 5 microfarads, as low as .101 microfarads.
    Current: 1).C.; 10, 100, 500 MA.
    Decibels: -10 to +50 .
    Xew bias fuse provents atcidental damage to bias potentiometer.

    ## BUSS FUSE CLIPS for $1 / 4$ inch Fuses

    (SFE 4, 6, 9, 14, 20, AGX, AGC, ABC,
    MDL, MDX, MJB, MJW, MTH fuses)
    

    Spring bronze clips are made of Herculoy a lironze of distinctly superior quality for spring clips. This metal gives clips great gripping strength and ability to retain spring under adverse conditions.
    Beryllium copper clips combine low electrical resistance with great gripping strength. This means maximum electrical conductivity and results in cooler operation of clips and fuse.

    Size of mounting hole; . 130 to 135 inch.
    Center of hole to back-stop; .125 to .135 inch.
    Min. length of contact surface; $8 / 32$ inch
    Maximum height; $14 / 32$ inch
    Maximum width; $11 / 32$ inch
    List Price 4548 Spring bronze clip, Nickel plated.
    4592 Beryllium copper clip, Silver plated.

    ## BUSS CLIP ASSEMBLIES

    for $1 / 4$ inch Fuses MDL, MDX, MJB, MJW, MTH fuses)Clips as described above. Brass terminal. $3 / 16$ inch 6.32 washer head terminal screw. $1 / 4$ inch $4-40$ flat head iron mounting screw.
    4431 includes No. 4548 spring bronze clip, terminal screw, terminal and mounting screw.

    List Price $\$ 0.10$ 4432 includes No. 4592 beryllium copper clip, terminal screw, terminal and mounting screw. List Price $\$ 0.12$

    ## BUSS FUSE BLOCKS

    |  |  |  | Bakelite base blocks $3 / 16$ inch thick. Countersunk mounting holes for No. 6 flat head screws. Brass No. 6 terminal screws. No. 4548 spring bronze clips. <br> Full base, Screw forminal Block: |  |  |  |

    ## Other standard and special fuses, fuse blocks and fuse holders

    If the fuses, blocks and holders shown do not fit your requirements ask for information on other types.
    Fuses and fuse mountings to meet JAN and Military specifications also are available.
    If you have a special problem in protection send description or sketch giving number of circuits, type of fuse, terminals, etc., desired. We welcome such inquiries.

    ## BUSS FUSE HOLDERS

    Make it convenient to mount fuse on any equipment.
    Changing or inspection of fuse is easy and quick.
    Holder has removable knob. Fuse projects beyond hody of holder and is not held tight on orher end when knoh is removed.

    Fuse and contacts are protected from dirt and fumes.
    Good contact on fuse is made certain by strong coil spring pressure. Poor contact heating that often causes fuse to blow needlessly is eliminated.

    Holder bodies are made of black bakelite. All current carrying parts are of brass or copper. Terminals and all contact parts are bright alloy plated.

    ## PANEL MOUNTED HOLDERS <br> for $1 / 4$ inch Fuses

    Holders are inserted through hole
     in panel and are locked in place by nut on holder. They can be used on panels up to $5 / 16$ inch thick.
    Bayonet type knob requires only quarter turn
     to remove fuse. No screw driver is needed.

    Side terminal is held mechanically as well as by solder. Heat of soldering wire to it will not cause it to loosen or come off.

    Vibration will not cause failure of terminals as they are designed to stand severe service.

    Neoprene washer and steel locking nut (zinc plated, chromate dipped) furnished with each holder.

    Wire hole in terminals; . 115 inch.
    Normal current carrying capacity; 15 amperes.
    Listed as approved by Underwriters' Laboratories.
    HJM for $1 / 1 / \times$ linch fuses (AGX, MJB, MJW, SFE 14 ) HKP for $1 / 4 \times 11 / 4$ inch fuses (ABC, AGC, SFE20, MDL, MDX, MTH)
    .46

    ## IN-THE-LINE HOLDERS <br> for $1 / 4$ inch fuses

    These holders are for mounting fuse in wire. Holders consist of body and bayonet type
     knob - two contacts ready to be staked on ends of wire - a pressure spring that is used under
    contact in base of holder.
    Holders can also be mounted in panel up to $5 / 16$ inch thick by means of a No. 9969 Spring nut (Nut not furnished). Flat spot on holder permits it to be locked against rotation.

    Normal current carrying capacity: 15 amperes.
    Symbol
    List Price
    HOI for $1 / 4 \times 1$ inch fuses (AGX, MJB, MJW, SFE 14) $\$ 0.20$ Takes No. 18 or smaller wires.
    $H D J-A$ for $1 / 4 \times 11 / 4$ inch fuses ( $A B C, A G C$,
    MDL, MDX, MTH, SFE 20)
    Takes No. 18 or smaller wires.
    HDJ.B for $1 / 4 \times 11 / 4$ inch fuses (as above)
    Takes No. 14 or 16 wires.
    No. 9969 Spring nut for panel mounting ahove holders. . 04

    ## Holder-and-Fuse Assemblies

    Assembly consists of holder, fuse and 19 inch loop of No. 14 wire already staked and soldered to terminals.
    Offer simplest way to install protection. Wire can he cur to give leads of desired length. A spring nut, furnished with holder, can be used to mount holder on panel up to $3 / 32$ inch thick.

    List Price
    HRJ Complete with SFE 20 fuse
    \$0.45
    HRI Complete with SFE 14 fuse .45
    HRH Complete with SFE 9 fuse

    ## LONG TIME-LAG OR SLOW BLOWING TYPE

    These fuses avoid needless blows from starting currents or surges. They have a fuse link which operates only on very high overloads or short-circuits - they have a thermal cutout which functions on low overloads - the thermal cutout cannot operate quickly at any load, hence long time-lag is obtained. Yet protection is afforded against short-circuits or continued overloads.
    Test specification-cartv $110 \%$, open at $135 \%$ in 1 hour.

    313 м月 Series Littelfuses-Slo-Blo fuses with high time-lag to withetand heavy surges-quick on shorts. Designed for circuits with equipment having high inductive or capacitative surges, such as magnets, solenoids, etc., and for circuits with heavy starting currents, such as motors and lamp circuits. Anti-fatigue construction (compound element, with spring and resistor) makes these fuses ideal for inter-mittent-duty circuits on vibrators, control circuits, hi-tension electric fences, smail magnets, coils, etc. "Pioneered by Littelfuse."

    ## LITTELFUSE

    ## NEW INDICATING FUSE POSTS FOR $3 A B$ and $3 A G$ fUSES

    Fulfilling a wide need for a fuse post which indicates by means of a light when fuse is blown. Littelfuse has developed a line of Indicating Fuse Posts in ratings up to 1.5 amperes and 500 volts. In normal use the indication light. located in the extractor knob, is shunted by the fuse and does not light. When the fuse blows. the open circuit voltage is thrown across the lamp which then lights, indicating that the fuse is blown.

    ## DESIGN FEATURES

    1 Smallest on the market. $23 / 8^{\prime \prime}$ overall. $3 / 4$ above panel, $15 / 8$ below panel, including the solder terminals.

    2 The most positive indication. Light is completely above panel to provide $360^{\circ}$ indication from any point.

    3 Rugged. Molded black high strength bakelite body; tough translucent nylon non-breakable knob of fingertip design. No sharp points or knurls.

    4 Can be manufactured to meet government requirements of water-proofing and fungus resistance.

    5 Mounts on $1-1 / 16^{\prime \prime}$ minimum center to center, dimension, knob, $15 / 16$ " OD, body mounts in $5 / 8$ " diameter "D" nonturuing hole: 5/8-18 thread on body.

    6 lost extracts fuse with knob removal.
    7 Contact pressure on fuse-5 to 8 lbs.
    8 Since the lamps are in shunt with the fuse the minimum rating is 1 amp for $6-8 \mathrm{~V}, 1 / 4$ amp for 10.32 V . and $1 / 8$ amp for $90-500 \mathrm{~V}$ : maximum amperage all posts 15 amps.

    9 For standard commercial application a half twist bayonet type of lock between knob and body will be used. Where it is desirable and necessary that the unit be splash and/or water-proof from front panel, "O" rings will be added between the knob and the body and between the body and the banel, and the locking design will be changed to a threaded sorew type instead of the bayonet style.

    10 ldentification. In order to provide positive identification of each different voltage range, the knob and the body will be clearly marked. This obviates the necessity for noninterchangeability between ranges, and/or color coding.

    11 loth solde terminals protrude from the bottom of the unit for easier assembly in equipment.

    The post will be available for five different voltage ranges as follows:
    (i. S volts using an incandescent lamp.
    fo- :id volts using an incandescent lamp.
    !n-1:3 volts using a neon lamp.
    1:מ-2.an volts using a neon lamp.
    $\because 60-500$ volts using a neon lamp.
    The variety of voltage ranges provides maximum light fintensity and long life. I, amps protected by selies resistors.

    ## COMPLETE PROTECTION!

    The Elnienco Fused Plug is like any standard plug, is light in weight, bur easier to handle because of finger grips. How. ever, it contains 2 small fuses which provides complete protection against damage to the appliance and to the main line. The blown fuse is easy to remove and simple to replace. Fits any standard wall outlet.

    ## NEW MARKETS! GREATER VALUE!

    Approved by Underwriters Laboratories and used by many of the largest manufacturcrs of radio and electronic equipment, battery chargers, washing machines, curling irons, lighting equipment, automatic relay equipment, motors of every description, and practically every other' type of product that constames electricity.
    Every wired home, office and store is a prospect.
    We list a few of the torger consumers of the ELMENCO FUSED PLUG
    

    ## SIGHTMASTER CORPORATION

    ## NEW ROCHELLE, NEW YORK

    

    For use in radio, television, amplifiers and other electronic devices where heavy starting currents are not present.

    ## LOW VOLTAGE SERIES

    

    Quick blowing fuses with $11 / 2^{\prime \prime}$ No. 20 tinned copper leads (pigtails) for use in television and other electronic equipment where economy in space is essential.

    | Catalog No. | Maximum Voltage | List Price |  |
    | :--- | :---: | :---: | :---: |
    | 3 AG | $1 / 8$ | 250 | .23 |
    |  | $1 / 4,3 / 8,1 / 2$ or $3 / 4$ | 250 | .20 |
    |  | $1,11 / 2,2$ or 3 | 250 | .15 |
    |  | Underwriters' | Laboratories Approved |  |
    |  |  |  |  |

    
    Test $\quad\left\{\begin{array}{cl}\% \text { of Rating } & \text { Blow Time } \\ 110 \% & \text { Life } \\ 135 \% & 0-1 \text { hour } \\ 200 \% & 5-60 \text { seconds }\end{array}\right.$

    These fuses are engineered to withstand heavy starting currents. The design is such that these fuses operate only on very high overloads or short circuits. Catalog No.

    Naxinum Voltage List l'rice

    | $3 \Lambda G$ | $1 / 100$ or $1 / 32$ | 125 |
    | :---: | :---: | :---: |
    | $1 / 16$ to 1 amp. | 125 | .33 |
    | $11 / 4$ to 2 amp. | 125 | .27 |
    | $21 / 2$ to amp. | 125 | .25 |
    | $61 / 2$ to 30 | 32 | .20 |
    |  | Underwriters' Laboratories | Approved through 5 amp. |

    ## SIGHTMASTER 3AG timelag pigtail series

    $\left\{\begin{array}{cl}\text { \% of Rating } & \text { Blow Time } \\ 110 \% & \text { Life } \\ 135 \% & 0-1 \text { hour } \\ 200 \% & 5-60 \text { seconds }\end{array}\right.$

    Catalog No.

    | 3AG | 1/100 or 1/32 amp. | 125 | .45 |
    | :---: | :---: | :---: | :---: |
    |  | $1 / 16$ to 1 amp . | 125 | . 34 |
    |  | $11 / 4$ to 2 amp . | 125 | . 32 |
    |  | $21 / 2$ to 5 | 125 | . 30 |
    |  | $61 / 4$ to 30 | 32 | . 30 |

    ## SIGHTMASTER 8AG SERIES

    $1 / 4^{\prime \prime} \times 1^{\prime \prime}$
    
    Test $\quad\left\{\begin{array}{cl}\text { \% of Rating } & \text { Blow Time } \\ 110 \% & \text { Life } \\ 135 \% & 0-1 \text { hour } \\ 200 \% & 5 \text { sec. max. }\end{array}\right.$

    This series is similar to the 3AG fuses. This smaller size is used where space is a factor and also where a quick break under overload conditions is required. Especially recommended for use in electrical measuring equipment.

    | Catalog No. | Maximum Voltage | List Price |
    | :---: | :---: | :---: |
    | 8AG 1/16 | 250 | . 25 |
    | 1/8 | 250 | . 16 |
    | $1 / 4,3 / 8,1 / 2$ or $3 / 4$ | 250 125 | . 15 |
    | 5 ${ }^{1 / 2}$, 2 or 3 | 125 | . 10 |

    ## SIGHTMASTER 4AG SERIES

    $9 / 32^{\prime \prime} \times 114^{\prime \prime}$
    
    $\underset{\text { Test }}{\text { Tenifications }}\left\{\begin{array}{cl}\% \text { of Rating } & \text { Blow Time } \\ 110 \% & \text { Life } \\ 135 \% & 0-1 \text { hour } \\ 200 \% & 0-2 \text { minutes }\end{array}\right.$

    Fuses of the 4AG series may be considered a ruggedized version of the corresponding 3AG series, since these fuses afford greater protection against shock, vibration and rough handling than do the fuses of the 3.IG series. Most of the applications of this series are found in aircraft installations and wherever rugged construction is of major importance.
    

    ## SIGHTMASTER CORPORATION

    ## NEW ROCHELLE, NEW YORK

    ## SIGHTMASTER 4AG

    TIMELAG SERIES$9 / 32^{\prime \prime} \times 1 \frac{11}{4 \prime}$
    

    Test | Tecifications |
    | ---: | :--- | :--- |\(\left\{\begin{array}{cl}\% of Rating \& Blow Time <br>

    110 \prime / \& Life <br>
    135 \% \& 0-1 hour <br>
    200 \% \& 5-60 seconds\end{array}\right.\)

    High Timelag characteristics of this series makes these fuses ideal for circuits with heavy starting loads. Also, its more rugged construction makes this series ideal for the aircraft industry.

    | Catalog No. | Maximum Voltage | List l'rice |

    ## SIGHTMASTER 6-1

    INDICATING HOUSEHOLD FUSE "THE NEVER WITHOUT LIFE FUSE"

    New and exclusive patented plug for the home and industry. Neon light shines when fuse blows. Just a flick of the wrist and a new fuse is in the circuitgood for 6 times.

    List Price
    Available in amperages of 15. 20,
    25 and 30 amps. $\$ .80$

    Underwriters* Laboratories Approved

    ## COMPONENT RECTIFIERS

    Rectifiers for practically any d-c power requirement are available from General Electric. Vac-u-Sel rectifiers are a new type of selenium rectifier produced
    by an exclusive $G-E$ vacuum evaporation process. In addition, General Electric also makes a full line of copper-oxide and germanium rectifiers.
    

    Miniature Vac-u-Sel rectifiers
    

    Standard Vac-u-Sel stack construction
    

    Tube-mounted Vac-u Sel stack construction

    ## GENERAL ELECTRIC $\sqrt{1 C-V_{2}}$ Sl RECTIFIERS

    - 63 VOLT PEAK INVERSE
    - 130 C AMBIENT OPERATION
    - 60,000 HOURS LIFE EXPECTANCY

    The sherial vacuum exajoration procers employed in making Vac-u-Sel rectitiers makes nossible the outstanding performance characteristies of this selenium rectifier. With G-E Vac-u-Sel rectifiers you can now match performance requirements for life expectancy, ambient nperating temperature, and atmospheric protection, as well as elecrical characteristics. Three new rectifier cells make up the new line of Vac-u-Sel rectifiers: a 26 -volt, low-temperature cell; a 26-volt, high-temperature cell; and a 45 -volt, hiph-temperature cell.
    The 26 -volt, low-temperature cell is the standard industrial cell, tsed on applications where ambient operating temperatures will not exceed 55 C. Rectifiers using this cell have a life expectancy of 60,000 hurre at normal current ruting.

    ## COPPER-OXIDE RECTIFIER STACKS

    G-E copper-oxide rectitier stacks offer these outstanding ieatures:

    - No unforming
    - Ability to withstand momen. tary current overloads
    - Whility to withstand momentary voltase overloads
    - Iong life with little aring
    - Highest efficiency at low voltares
    These features of $\mathbf{G}-E$ colper"xile rectifiers make them "sleeially suited for certain which require tha reatilier to withstand high current inrush and mommentary voltare overload.
    burhaps the most winlespread use of coppreoxide rectifiers is in the invild of circuit-luraker oparation. IIcre, the unique characteristics of copser-oxinle rectifiers are especially important.
    The above foatures alsn make (i-F corpernoxile rectifiers pleal for lax followily abllisations: Blocking - Metering * Polarizins
    
    
     High-voltace surme protectors * loc velders. Write for Mallatin
    
    ${ }^{*}$ Registered trade-mark of General Electric Co.

    The 26-volt, high-temperature cell can meet operating requirenents up to 130 C at full voltage. Current necd not lie derated where shorter life is acceptable. Life expectancy at 130 C is 1000 hours.
    The 45 -volt, high-temperature cell has a 63 -volt peak inverse voltage. Unlike most 45 -volt rectifiers, this is a true, lonf-life industrial cell. Frequently, this rectifier may be sulistituted for those employing 26 -volt cells. Since fewer cells are recuited, savings of us) to 30 per cent in cost, and up to 30 per cent in the size of the stacks are possible. Life expectancy of the 45 -volt cells is 40,000 hours and they can he used at ambient temperatures up to 110 C .
    411 Vac-u-k rectifiers operate with exceptionally low forwari roltage drop and low reverse leakage, and their marsin of superiority in these charaeleristics incroasas with service. All fac-u-spl rectifiers undergn extensive tastiny ami grading, and matcherd cells are used in ussemblint stacks. A variety of finishes and mounting arranmemente are available to meet virtually any requirements. Write for Hullatime (iEA-593: (miniatures); GEA-6273 (standard).

    INDUSTRIAL GERMANIUM RECTIFIERS
    

    G-E industrial rectifiers offer these outstanding features:

    - Lowerst forward lrof juer ampere
    - Highest output valtag, pel cell
    - lest current output, snallpst size, and limbtest weipht per watt ontput oi existing metallic rectifiers
    - High efficiency
    - No formini required
    - No loss of rectification after remaining adle.

    These new G-E fermanium metallic rectitiers are of the mond-area
     Firfest output voltace por cell permits the use of fower colls. and
     womely hiof current densities, and a large d-c output is ohtainthle from a very small sermanium rectitier.
    The regulation is less than $G$ per cont when operated at the hizh current densities permissible with germanium rect. firrs. With most metallic rectifers, regulation is usually betwern $\boldsymbol{i}$ and of prow rem: at their normal current densities. Germanium rectititers hate an und aqulimation in power eorversion where size and werght twatirnurt:
     thers); GEA-ina:
    nuctroplating .
    
    

    ## SCHAUER INSTRUMENT

    

    TYPE C. 4

    Schaner copper oxide rectifiers for instrument and other uses are processed and individually tested to meet the rec!uirements of the user. Versatile processing techniques make possible variations in characteristics for special or umusual applications. Wach rectilier is rated conservatively for long life and dependable operation.
    Size "AA," " $A$ " and " $B$ " Rectifiers are encapsulated-fully sealed in special formula polyester plastic in attractive red color. Cells are specially processed with vacuum evaporated rold contact areas to give maximum elficiency, stable operation and low aging characteristics. All rectifiers are supplied with $3^{\prime \prime}$ leads, color-coded. (Red, positive; black, negative; yellow, ..C.) Plastic encapsulated rectifiers have lead insullation imbedeled in the plastic for better scaling, eliminating short circuits at the rectifier. lead lengths of other than $3^{\prime \prime}$ can be supplied on special order.

    ## RECTIFIERS

    $\because$ A" SIZE CELLS are $1 / 8$ " dia. cells for low capacitance and high frequency response. Maximum rating is 2 volts ID.C. at 1 MA in a full wave bridge.
    " $A$ " SIZE CELLS have good frequency responsc above the audio range and can be used at higher frequencies. Recommended for meter applications needing 1 MA or less for operation. Can be used for other applications requiring up to $5 \mathrm{M} . \mathrm{A}$.
    "B" SIZE, CELLLS are for meter, relay and other applications requiring 1 M. up to their maximum rating. Recommended for commercial and low audio frequency operation
    "C" SIZE CELLLS are for general applications requiring larger output currents and operation of incters, relays and other apparatus. Special process cells for varistor applications. Write, wire or telephone for complete information. We welcome your inquirics concerning any special rectification problem.

    ## Centre-Kooded

    ## SELENIUM RECTIFIERS For All DC Power Requirements

    

    ## HIGH VOLTAGE SELENIUM RECTIFIERS

    Sarkes Tarzian high voltage selenium rectifiers are designed for use in photo-flash supplies, cathode ray oscilloscopes, television receivers, high potential test equipment, and electronic equipments used by milltary forces.
    Designated as Type 0 for current ranges to 5 milliamperes and as Type 1 for current ranges to 25 milliamperes, the units are available in half wave, full wave bridge, and center tap stacks. Both types are available with voltage ratings to 4000 in single unit and hundreds of thousands of volts by using multiple units in series. In center tap and bridge circuits the maximum allowable D.C. current is 10 MA for Type 0 and 50 MA for Type 1 assemblies.
    The Type 0 , in a glass enclosure is hermetically sealed for high humidity operation (Half Wave units only) and mounting is by means of silver plated ferrules. Tre bakelite enclosed Type 0 rect fiers are designed for normal commercial use and electrical con-
     nection is made by means of axial pigtail use and electrical conrations to 208 volts $A C$ ar semblies require a mounting clip.
    

    The Type 1 rectifier is available only in square bakelite enclosures. The unit, normally supplied, is not hermetically sealed; however, it is possible to "capsulize" the Type I rectifier for high humidity applications

    For complete information or engineering assistance-write, phone or wire. No obligations on your part.

    New Handbook Available iz latres of valuable information alout

    RADIO
    RECEPTOR SELENIUM RECTIFIERS

    ...For complete protection in Radio and Television circuits

    Radio Receptor Selenium Rectifiers are built and tested to eliminate arc-over danger, short circuits and heating at the center contact point. This "Safe Center" feature is an added safety factor that gives protection during mounting and in use.

    Because of their consistent dependability under all conditions - including high humidity - these bright green units are demanded by an ever increasing number of engineers and servicemen in the U.S. and throughout the world. The rectifiers listed to the right are normally stocked by distributors. Many other types available for special applications.

    > See yeur lecel distributer for yeur requiroments. Recommended initial cell temperature is $70^{\circ} \mathrm{C}$.
    "Stud mounted - overall: 2".

    Current ratings are for half wave capacitive load with a maximum cell temperatura of $75^{\circ} \mathrm{C}$ when the rectifiers are new, in a maximum amblent temperature of $43^{\circ} \mathrm{C}$.

    Output current ratings are based on RMS rectifier current not in excess of 2.5 times rated output current. Dielectric test 900 V RMS between terminal lugs and eyslet.

    *Screw mounted-10/32 stud extends to one side only.
    $\dagger$ Across outer legs of center tap connection.
    These rectifiers may be used at lower inputs to secure lower DC voltages as required.

    More and more engineers choose Radio Receptor Selenium Rectifiers for their power applications. Rugged, dependable and highly efficient, these flexible units are giving long and satisfactory service in such diversified installations as the toll gates of N. Y.'s Triborough Bridge, elevators in more than 150 skyscrapers in New York and Chicago and mag-amp regulators used aboard many U.S.N. submarines.

    The stacks shown above are those which are normally in stock at your distributor and are adaptable for a wide range of applications. Many other types available for special applications. Division

    ## Illindurue Illearlic: Restifers

    S TA $N$ D A R D

    SERIES 500 Copper oxide only. Color coded. Welded leod wires $3^{\prime \prime}$ long. Synthetic locquer-enomel finish. Single 6-32 stud mounting. Avoilable in special types. Cell diometer $.500^{\prime \prime}$. Cell rating 5 r.m.s. volts, 30 overage mils.

    SERIES SOO-ERM Copper oxide or selenium. Colar coded. Solid lead wires $3^{\prime \prime}$ lang. Locquer finish. Single hole mounting. Available in special types. Cell diameter . $500^{\prime \prime}$. Cell ratings, copper oxide 5 r.m.s. valts, 30 overage mils; selenium, 25 r.m.s. volts, 30 overage mils.
    SERIES SOO-TUA Selenium anly. Color coded. Salid oxial leads $3^{\prime \prime}$ long. Locquer finish. Mounts by lead wires only. Fully enclosed ond sealed in phenolic tube. Half wave types only far high valtoge. Cell diameter .500". Cell rating 25 r.m.s. volts, 30 overoge mils. Per cell rotings subject to deroting according to rectifier design.
    SERIES SOO-TUR Selenium only. Color coded. Solid rodial leads $3^{\prime \prime}$ long. Locquer finish. Mounts by lead wires only. Fully enclosed and sealed in phenalic tube. Cell diometer, $.500^{\prime \prime}$. Cell rating 25 r.m.s. volts, 30 overoge mils. Per cell ratings subject to derating according to rectifier design.
    SERIES 280-ERM Copper oxide or selenium. Color coded. Solid lead wires $3^{\prime \prime}$ long. Locquer finish. Mounts by "Bracketerminal" combining cathode (plus) terminal and mounting bracket. Available in standard types only. Cell diameter $.280^{\prime \prime}$. Cell roting, copper oxide, 5 r.m.s. volts, 10 average mils; selenium, 25 r.m.s. volts, 10 overage mils.
    SERIES 280-TUA Selenium only. Color coded. Salid axial leads 3" long. Locquer finish. Mounts by leod wires only. Fully enclosed and seoled in phenolic tube. Half wave trpes only, for high voltoge. Cell diometer $.280^{\prime \prime}$. Cell rating 25 r.m.s. valts, 10 average mils. Per cell rating subject to derating according to rectifier design.
    SERES 280-TUR Selenium only. Color coded. Solid rodial leads 3" long. Lacquer finish. Mounts by lead wires only. Fully enclosed and sealed in phenolic tube. Cell diameter .280". Cell rating 25 r.m.s. volts, 10 average mils. Per cell roting subject to derating according to rectifier design.
    SERIES 160 Copper oxide or selenium. Color coded. Welded lead wires $3^{\prime \prime}$ long. Fully enclosed and seoled in molded phenolic case. Mounts by \#2 screw. Cell diameter . $160^{\prime \prime}$. Cell rating, copper oxide, 5 r.m.s. volts, 5 overage mils; selenium, 25 r.m.s. volts, 5 average mils.
    SERIES 160-C Copper oxide or selenium. Color coded. Welded lead wires $3^{\prime \prime}$ long. Fully enclosed and sealed in welded brass case. Mounts in midget fuse clip. Cell diameter $.160^{\prime \prime}$. Cell rating, copper oxide, 5 r.m.s. volts, 5 average mils; selenium, 25 r.m.s. volts, 5 average mils.
    SERIES 160 -ERM Copper oxide or selenium. Color coded. Solid leads $1^{\prime \prime}$ long. Locquer finish. Mounts by lead wires only. Cell diameter . $160^{\prime \prime}$. Cell rating, capper oxide, 5 r.m.s. volts, 5 overage mils; selenium, 25 r.m.s. volts, 5 average mils.

    Standard rectifiers are connected internally according to one of the five circuit diagrams shown.
    Series 500,160 and 160-C are the well known standard line of instrument rectifiers and are constructed to the highest standards of quality. Construction is conventional.
    TUA (tubular, axial leads) and TUR (tubular, radial leads) construction is desiroble especially in rectifiers designed for high voltage operation. Total enclosure of the stack however limits heot radiation necessitating derating of cells.
    ERM (external resilient member) construction insures maintenance of aptimum stack pressures regardless of ambient or operating temperotures. Rectifiers in ERM construction ore smaller, lighter and cheaper.

    ## TECHNICAL CHARACTERISTICS

    Power supply requirements for every radio，television and instrument use－ranging from small AC－DC receivers to large－ screen TV－can be met with available Kool－Sel rectifiers．A summary of the important engineering characteristics of each Kool－Sel type is given on this page．You should consider the use of Kool－Sel components for the follwing applicatins：
    RADIOS and RADIO－PHONOGRAPHS－Low－cost，efficient rectifiers for radios and radio－phonograph combinations are Kool－Sel KS－65，KS－75 and KS－150．The needs of most 5 －tube chassis are met by the KS－65，while the KS－75 and KS－ 150 are used in sets with larger current requirements．
    RADIO ACCESSORIES—TV boosters，UHF converters，pho－ nograph oscillators，intercoms and the like gain compactness and dependability when you use small，cool－running Kool－Sel． Type KS－65 is suitable for most of these uses．
    TELEVISION－High－voltage power supplies in television receivers－including color sets－use Kool－Sel rectifiers，Cata－ log Nos．KS－200，KS－250，KS－300，KS－350，KS－400 and KS－500． These rectifiers，used in voltage doubler or voltage tripler circuits，provide proper B－plus voltage，eliminating the size， cost，weight and hum problens of power transformers．
    LABORATORY INSTRUMENTS，POWER SUPPLIES，AM－ PLIFIERS－Rectified high voltage through the use of voltage doubler and tripler circuits，for equipment where current requirements run as high as 500 ma ，may be provided with Kool－Sel rectifiers．Catalog Nos．KS－200，KS－250，KS－300， KS－350，KS－400 and KS－500 will be found useful for laboratory power supplies，DC filament supplies，motion picture projec－

    $50-430 \mathrm{kc} ., 480 \mathrm{kc} .35 \mathrm{mc}$. And 50.54 mc . Voice, CW. NFM (with adaptor). Edge-lighted, direct frequercy-reading scale. with one range in view at a time. 3 I.F. stages at 456 kcs . employing 12 permeability-tuned circuits on all bands plus one I.F. stage at 1990 kcs on all frequencies above 7 mcs . Switching is done automatically when coil set is plugged in. Built-in, isolated heavy-duty power supply. Sensitivity of 1 mv . or betwer at 6 db . sig./noise. Selectivity variable from 8 kc . overall to app. 1200 cps . at 40 db . Current-regulated high frequency oscillator and first converter heaters. Voltage-regulated high frequency oscillator and S-meter amplifien. Negligible drift after warm-up. Micrometer dial for logging: Prövision for crystal calibrator unit. Variable ant. trimmer. Lively S-meter. Min. tubes in front end and high freq. osc. Osc. circuits not disabled when receiver in sead position. High-fidelity push-pull audio ( $\pm 2 \mathrm{db}$. $50-15,000$ cps.) with phone jack. BFO switcle separated from BFO freq. control. Illumination dimmer controL. Accessory socket for Select-O.Ject.
    $\$ 533.50$
    The NC.183D incorporates every feature you want in a truly modern receiver! Dual conversion on the three highest ranges (including $6,10,15,20$ and 40 meter ham bands) no "birdies"! Steepsided skirt selectivity with 3 I.F. stages (16 tuned circuits on the 3 high bands - 12 on all other bands, compared to 6 normally used) plus a new crystal filter. Approximately 1 microvolt sensitivity on 6 meters for a 10 db . signal-to-noise ratio! New, indirectly-lighted lucite dial scales! New bi-metailic, temperature-rompensated tuning condenser for drift-free operation! Plus all the time-tested features of the famous NC-183! Controls include: Main tuning; bandspread tuning; band switch; RF gain $\longrightarrow$ AC on/off; AF gain; send/receive switch; AVC/MVC switch; tone CWO switch; AC on/off; AF gain; send/receive switch; AVC/MVC switch; tone
    $\$ 399.50$
    For shortwave listeners, novices and experienced amateurs, here's a receiver that tops them all for value" Compare these features: Crystal filter and $S$ meter, Calibrated bandspread for $80,40,20,15,11$ and 10 meter bands (large $6^{\prime \prime}$ indirectly lucite scales), advanced A.C. superhet circuit uses 8 high gain minia. ture tubes plus rectifier, covers 540 kcs . to 40 mcs. in 4 bands, tuned R.F. stage, two I.F. stages, 2 andio stages with phono input and 2 -position tone control, antenna trimmer, separate high frequency oscillator, sensitivity control, series valve noise limiter, delayed A.V.C., headphone jack, standby-receive switch, conelrad (CD) frequencies clearly marked. The main tuning and bandspread tuning capacitors are connected in parallel on all bands. This arrange* ment permits bandspread runing at any frequency within the range of the receiver and a logging scale is provided. Controls include: Main tuning; bandspread tuning; band selector; sensitivity; AC on/off - volume; receive/standby switch; ANL On/Off switch; tone Hi-Lo switch; CWO pitch; antenna trimmer; AM/CW switch, selectivity, phasing.
    $\$ 149.95$
    NC-98 sW Same as above but furnished with shortwave broadcast bandspread logging scale instead of amateur scale.
    

    Compare the NC-88, feature for feature, with other receivers costing far more and you'll see why it's such a popular favorite with hams, novices and SWLS! Calibrated bandspread for $80,40,20,15,11$ and 10 meter bands (large $6^{\prime \prime}$ indirectly-lighted lucite scales), advanced A.C. superhet circuit uses 8 high gain miniature tubes plus rectifer, covers 540 kcs . to 40 mcs . in 4 bands, tuned R.F. stage, two I.F. stages, 2 audio stages with phono input and 2 -position tone control, built-in speaker, antenna trimmer, separate high irequency oscillator, sensitivity control, series valve noise limiter, delayed A.V.C., headphone jack, standby-receive switch. The main tuning and bandspread tuning capacitors jack, standby-receive switch. The main tuning and bandspread conning capacted in parallel on all bands. This arrangement permits bandspread tuning at any frequency within the range of the receiver and a logging scale is provided. Controls inclade: Main tuning; bandspread tuning; band selector; sensitivity; AC on/off - volume; receive/standby switch; ANL On/Off switch; tone Hi-Lo switch; CWO pitch; antenna trimmer; AM/CW switch. \$119.95
    

    NC-125 Incorporates famed National SELECT.O.JECT for amazing selectivity at such a low price! such a fow price. reading scales show amateur, police, ship and foreign frequencies. Continuous cov erage from 540 kcs . to 35 mcs . $\$ 199.95$
    

    SW-54 540 kcs . to 30 mcs. in 4 bands. Sensitive and selective superhet circuit, using new miniature tubes Bandspread dial is ad justable to assure log. justable accuracy. Built-in ging accuracy
    speaker and power speaker and power
    supply. Volume, re. supply. Volume, re ceive-standby, band.
    switch. AM - CW, phono. Headphones provision. Speaker.
    $\$ 49.95$

    ## COIL FORMS

    

    XR-50. These mica-filled bakelite coil forms may be wound as desired to provide a permeability tuned coil. The form winding length is $11 / 16^{\prime \prime}$ and the form winding diameter is $1 / 2$ inch. The iron slug is $3 / 8 "$ dia. by $1 / 2^{\prime \prime}$ long.
    XR-51. same but with brass slug.
    High-grade ceramic coil forms conforming to JAN specifications. May be wound as desired to provide a perme-ability-tuned coil. Extra lugs provided.

    XR-60 Grooved for \#26 wire with iron slug.
    XR-61 Grooved for \#26 wire with brass slug.
    XR-62 Not grooved, winding length $11 / 4^{\prime \prime}$ with iron slug.
    XR-63 Not"grooved, winding length $11 / 4$ " wïth brass slug.

    XR-70 Grooved for \#19 wire with iron slug.
    XR-71 Grooved for \#19 wire with brass slug.
    XR-72 Not grooved, winding length $1^{\prime \prime}$ with iron slug.
    XR-73 Not grooved, winding length $1^{\prime \prime}$ with brass slug.

    ## COUPIINGS

    TX.9. This small insulated flexible coupling provides high electrical efficiency when used to isolate circuits. Insulation is steatite. $15 / \mathrm{s}^{\prime \prime}$ diam. Fits $1 / 4^{\prime \prime}$ shaft.

    TX-10. A rery compact insulated cou. pling free trom backlash. Insulation is canvas bakelite. 1-1/16" diam. Fits $1 / 4^{\prime \prime}$ shaft.

    TX-19. A steatite insulated flexible coupling for $1 / 4^{\prime \prime}$ shafts. Conservaively rated at 5000 volts peak. Di a.ater $1 \frac{3 \prime \prime \prime}{}$, length $1^{\prime \prime}$. Length and as aover voltage can be increased :y turning collars outboard.

    TX-23. A deluxe insulated flexible coupling designed for coupling $1 / 4$ " shafts. Will handle a maximum radial misalignment of $1 / 16^{\prime \prime}$ also 2 degrees maximum angular misalignment.

    ## RAD RIGHT ANGLE DRIVE

    Right angle drive. A sturdy right angle drive with Die cast zinc Housing and Gears. Ideal for ganging condensers or potentiometers or other parts located in hard to get to locations on the chassis.
    

    ## SAFETY GRID AND PLATE CAPS

    SPP-9. Ceramic insulation. Fits 9/16" diameter.
    SPP-3. Ceramic insulation. Fits 3/8" diameter. National Safety Grid and Plate Caps have a ceramic body which offers protection against accidental contact with high voltage caps on tubes.

    ## GRID AND PLATE GRIPS

    Type 12, for 9/16" Caps.
    Type 24, for $3 / 8 /$ Caps.
    Type 8, for $1 /{ }^{\prime \prime}$ Caps.
    National Grid and Plate Grips provide a secure and positive contact with the tube cap and yet are released easily by a slight pressure
    
    

    These RF chokes are identical electrically, but differ in mounting provisions. The $R-100$ employs pigtail leads; the $R-100 \mathrm{U}$ has pigtail leads and a removable stand-off insulator; the $\mathrm{R}=100 \mathrm{~S}$ has cotter-pin lug terminals and a non-removable stand-off insulator; the $R-100$ ST has a 6r32 threaded stud at each end. These chokes are available in $2.5,5$ and 10 millihenry sizes and are rated at 125 milliamperes.
    

    These RF chokes are similar in size to $R-100$ series but have higher current capacity. The $R-300 U$ is provided with a removable stand-off insulator at one end. The R-300S has a non-removable stand-off insulator and cotter-pin lug terminals. The $\mathbf{R}-300$ ST has a 6-32 threaded stud at each end. Inductance values of $0.5,1.0,2.5$ and 5.0 millihenries are available with a current rating of 300 milliamperes. R-300, R-300U, R-300S and R-300ST are identical electrically.

    ## CRYSTAL SOCKEFS

    CS. The CS-5, CS-6, CS-7 and CS- 8 are crystal Mounting Sockets for crystal holders. Socket bases ceramic Conforming to Jan 110 Body glazed. Unglazed surface DC 200 treated.
    C5-5. Contacts spaced $500^{\prime \prime}$ pin diameter .125". Phosphor bronze contacts silver plated. CS-6. Contacts spaced $.486^{\prime \prime}$ : pin diameter .095". Phosphor bronze contacts silver plated. C5-7. Contacts spaced .486" pin diameter . $050^{\prime \prime}$. Beryllium copper contacts silver plated. CS-8. Contacts spaced .750" pin diameter .125". Phosphor bronze contacts silver plated.
    

    R-33. The R-33 series chokes are 2 section RF chokes available in 10,50 , 100 and 750 microhenry sizes. Also available in this series is a single layer solenoid choke of 1 microhenry inductance. All are rated at 100 milliamperes. The chokes are wound on a $3 / \mathrm{s}^{\prime \prime}$ long form and range in diameter up to $5 / 16^{\prime \prime}$ maximum.

    R-50, R-50-T. The R-50 series chokes are 3 and 4 -section RF chokes and available in $0.5,1,2.5$, and 10 millihenry sizes. They are rated at 100 millamperes. The chokes are wound on a $1^{\prime \prime}$ long form and have a maximum diameter of $15 / 32^{\prime \prime}$. The 10 millihenry $R-50-1$ choke is wound on an iron core.

    R-152. For use in the range between 2 and 4 Mc. Ideal for high power transmitter stages operated in the 80 meter amateur band. Inductance $4 \mathrm{~m} . \mathrm{h}$. , DC resistance 10 ohms, DC current 600 ma . Coils honeycomb wound on steatite core.

    ## DIALS, MECHANISMS AND KNOBS

    

    HRS (gray or black) The HRS series knobs are a popular easy to grip knob. They are molded of high quality plastic and have $13 / 8^{\prime \prime}$ dia. chrome plated bevel skirts fit $1 / \mathbf{x}^{\prime \prime}$ shafts available in the following scales:

    | HRS-1 | ON-OFF | through $30^{\circ}$ |
    | :--- | :--- | :--- |
    | HRS-2 | $5-0-5$ | through $180^{\circ}$ |
    | HRS-3 | $0-10$ | through $300^{\circ}$ |
    | HRS-4 | Single etched line |  |
    | HRS-5 | $0-10$ | through $180^{\circ}$ |

    HR (gray or black) An HRS type knob without the chrome plated skirt but with a white dot for spotting rela ive control settings.
    

    HRT-M. This smaller version of the HRT - now available in choice of gray or black - is $1-7 / 16^{\prime \prime}$ in diameter.
    AM Dial. The original "Velvet Vernier" mechanism in a metal skirted dial $3^{\prime \prime}$ in dia. ratio 5 te 1. It is available with $2,3,4,5$ or 6 scale and fits $1 \mathbf{1}^{\prime \prime}$ shaft. Mechanisms also available separately.
    $N$ Dial. The four-inch $N$ and $A D$ Dials have engine divided and die stamped scales respectivels. The $\mathbf{N}$ Dial has a decimal vernier; the AD Dial employs a pointer. The planetary drive has a ratio of 5 to 1 , and is contained within the body of the dial. $2,3,4$, 5 or black scale. Fits $1 / \mathbf{2}^{\prime \prime}$ shaft. Specify seale.

    HRM KNOB. This straight knurl beass satin HRM KNOB. This straight knurl beass satin shaft. See catalog for description.

    # Harvey-WELLS ELECTRONICS, INC. TBS-50 BANDMASTER TRANSMITTERS 

    40-50 WATTS - 8 BANDS - PHONE OR CW<br>80, 40, 20, 15, II, 10, 6 and 2 Meters<br>(completely wired and tested-not a kit)

    BANDMASTER SR. TBS-50C \$111.50

    Amateur Net

    A complete ready to go transmitter including the new crystal-oscillator-vfo switching circuit, Phone or CW - Eight bands - 80, 40, 20, 15, 11, 10, 6 and 2 meters. Ideal for either mobile or fixed station use. Will operate from A.C. power packs up to 450 volts at 275 ma., vibrator supply or dynamotor supply for portable mobile operation. Employs Pi antenna matching net work. Power input to final is 50 watts with 450 volt power supply on Bands 1 through 7, 30 watts on Band 8. No tuning adjustments are necessary except those required to resonate the final output to the antenna. May be mounted on rack panel with power supply. For use with carbon microphone. No plug in coils.
    CONTROLS: Band Switch. Excitation Control, Antenna Loading, Amplifier Tuning, Power-on Switch, Carrier-on Switch. Meter Switch. Antenna network will match non-reactive feeder of approximately $50-500$ ohms. Frequency calibration chart on front panel as well as two scale grid and plate DC milliammeter.
    TUBES: 6AQ5 Crystal Oscillator, 6AQ5 Buffer-Multiplier, 807 Final Amplifier, 2—6L6G Class B Modulators. In sturdy steel cabinet. $8^{\prime \prime}$ wide by $12^{\prime \prime}$ high by $8^{\prime \prime}$ deep.

    ## BANDMASTER DELUXE TBS-5OD \$137.50

    Amateur Nel
    The last word in a versatile small transmitter for ham or commercial use. Used extensively in foreign countries for important commercial applications. Has built-in three tube preamplifier for use with crystal mike, and ALL the features of the Bandmaster Sr.

    ## BANDMASTER VFO FOR TBS-50

    Extremely stable, both electrically and mechanically-no loss of power or frequeney shift even on 28 mc . The Bandmaster VFO has been designed to meet the flexible requirements of today's versatile amateur. Six bands-each directly calibrated on the oversize slide rule dial-provides $20-25$ volts R.F. output over entire frequency range, measured across the 6AQ5 in the transmitter oscillator-Plate and heater voltages are obtained from the terminal strip on the transmitter. Power requirements are 6.3 V $@ 0.65 \mathrm{amps}$. and $300 \mathrm{v} @ 30 \mathrm{ma}$. Highly stable clapp type oscillator circuit uses $6 A G 7$ and $O B 2$ voltage regulator.
    Cabinet size $9^{\prime \prime} \times 111 / 2^{\prime \prime} \times 4^{\prime \prime}$.
    $\$ 47.50$
    Amateur Net
    

    POWER SUPPLIES

    APS-50 BANDMASTER POWER SUPPLY FOR $110 v$ A.C.

    Delivers 425 v . at 275 . ma. and 6.3 v . at 4 amps . May be mounted on rack panel. For 110 Voit A.C. $50-60$ cycles.

    FOR PORTABLE OPERATION DPS-50
    A dyлamotor supply for portable operation. Delivers 300 Volts 250 ma.

    For 6 Volt operation.
    For 12 Volts operation ( 400 Volts 250 mel .
    

    ACCESSORIES

    ## REMOTE CONTROL PANEL FOR MOBILE OPERATION

    CRYSTAL MIKE PRE-AMPLIFIER
    CMA-50
    For dashboard mounting, complete with interconnect. ing and microphone cables.

    Provides for a complete remotely controlled installa. tion.
    

    Crystal microphone pre-am. plifier. Tint unit built into the Bandmaster Deluxe which you may add to other Bandmaster models. Simple to install. tion.
    

    ## Harvey-WELLS ELECTRONICS, INC. NEW! BANDMASTER SERIES

    ## T-90 BANDMASTER TRANSMITTER

    The $7-90$ is the result of our long study concerning the operating requirements of most amateurs. Sufficient power to "get out" on all bands, either fixed or mobile, under today's ORM conditions, plus space limitations of the average home, has been the prime objective in its design. The many refinements contributing to smooth and efficient operation which have been incorporated in the $\mathrm{T}-90$, have up to this time been found only in transmitters selling at a much higher price. A close study of the following features will provide convincing evidence that the $T .90$ is the transmitter YOU WANT for your shack or car DIMENSIONS (overall): Cabinet $123 / 8^{\prime \prime}$ wide, $101 / 2^{\prime \prime}$ deep. $63 / 4^{\prime \prime}$ high; weight $173 / 4$ lbs. Factory built and tested complete with tubes, less power supply.
    $\$ 179.50^{*}$

    ## R-9 BANDMASTER RECEIVER

    In our further studies of amateur requirements, we found that the ultimate desire of all was to have equipment which "went together." The difficulty of installing odd sizes of cabinets has always been a source of irritation to the neat and efficient operator. The R-9 is physically an identical twin to the T.90 Now at last, without any reservation, you can have fixed station performance either in your shack or in your car. This highly stable all-band double conversion receiver has a versatility and a number of refinements which have never before been offered in such small space. Price is complete with tubes. Dimensions same as transmitter.
    \$149.50*
    Amateur Net

    ## FEATURES - T-90 TRANSMITTER

    ## I. TVI Suppressed

    2. Complete band-switching; no plug-in coils
    3. Complete Break-in Keying or keying of multiplier stages only
    4. VFO Tuning without carrier on
    5. Cathode biased Exciter tubes and clamp tube control of Final Amplifier Screen Voltage
    6. Initial tuning at reduced power
    7. Three position excitation contral
    8. Antenna loading flexibility
    9. Selector switch allows meter-
    ing of PA Grid, PA Cathode and Modulator currents
    10. Remote Break-in and Receiver muting provided by relay control
    II. VFO voltage regulated and temperature compensated
    11. Illuminated dial and meter
    12. Crystal door on front panel
    13. Filament Operation 6 or 12 volts $A C / D C$
    14. Low average Modulator current
    15. Built-in provision for either Carbon, Crystal or Dynamic microphone and push-to-talk.

    ## FEATURES - R9 RECEIVER

    volf DC power supply avail.

    1. Double canversion on all bands
    2. Three turred circuits on each band, in R.F. section
    3. All coils slug tuned, provid ing high " $Q$ " circuits
    4. Separate oscillator coils for each band (no spurious response)
    5. Bandwidth:

    Four kilacycles wide at the 6 ab point
    6. Complete with tubes and built-in AC power supply. 6/12
    able
    7. Crystal filter and crystal calibrator avai isble as accesso. ries
    8. Approximatey $6^{\prime \prime}$ of dial spread on ill bands. Accurately calibrated
    9. Rigid Steel construction (Vibration-Proof)
    10. $63 / 4^{\prime \prime}$ height enables easy under dash mounting for mobile installation.

    POWER SUPPLIES AND ACCESSORIES
    

    APS-90 POWER SUPPLY ( 115 V. A.C.)
    Cabinet same size as transmitter. Supplied complete with cables. \$79.50*
    

    VPS-T90
    MOBILE POWER SUPPLY
    For b/12 volt D.C. operation.
    Designed for easy operation and
    service.
    \$89.50*
    

    SPEAKER FOR
    MOBILE
    OPERATION
    \$7.50*
    *All prices subiect to change without notice.
    

    SPEAKER FOR FIXED STATION OPERATION
    $\mathrm{H}^{\prime} \mathrm{gh}$ quality cual-6" $\times 9^{\prime \prime}$
    Cabinet matches other units.
    \$10.50*
    

    ## MC-55 FIVE BAND MOBILE CONVERTER

    For 10, 15, 20, 40 and 80 meters. 1.25 micro-volt sensitivity on alf bands. Large, attractive edge-lighted dial. $25-t 0-1$ worm gear tuning. Efficient automatic noise limiter built-in. Integral transmit-receive switch. Three gang tuning capacitor. Individual coils for each band and each circuit controiled by single band switch. Aperiodic i.f. stage aids in providing high-gain characteristic. Input impedance $50-72$ ohms. Output frequency 1550 kc . Separate input for car antenna is automatically switched to car radio when converter is switched out.
    Requires $150-180 \mathrm{v}$. at 18 ma . Provisions for either 6 or 12 -volt operation. Tube lineup: 6BJ6 r.f. amp: 12AT7 osc-det; 6BJ6 if. amp; 6AL5 noise limiter. Attracrive cabinet finished in dark gray enamel. Complete with tubes, cables and instruction sheets. Size: $4 \frac{1}{8 \prime \prime}$ high, $5 \frac{\pi}{4}$ " wide, $51 / 4^{n}$ deep. Shipping weight. 6 lbs. Amateur Nel.

    ## DB-23 PRESELECTOR

    Substantially improves the performance of any receiver. Employs three 6 J 6 twin triodes as neutralized push-pull stages in a unique combination of selective and wide band r.f. amplifiers. Provides minimum gain of 20 db throughout all ham bands from 3.5 to 30 mc with substantial image rejection. Signal-to-noise ratio improvement is better than 7.5 db over that of the receiver alone. Permits optimum use of mechan. ical, crystal or audio filters. Input circuits accurately match any standard type antenra. Operation is simple; merely set band selector and adjust peaking control for maximum signal.
    Entirely self-contained with built-in power supply. Handsome cabinet is small, compact and finished in blue-gray. Complete with all tubes and instruction sheet. Size: $5^{\prime \prime}$ high, $75_{8}^{\prime \prime \prime}$ wide, $6^{\prime \prime}$ deep. Shipping weight, $61 / 2 \mathrm{lbs}$.     ## SECOND OP DX INFORMATION COMPUTER

    No ham can afford to be without this ingenious computer, whether he is a DX enthusiast or not. Here on one clever instrument you can instantly read complete data on every country and amatcur sub-division. Right at your fingertips is the following information: great circle beam headings; time and date at DX location; continent; DX zone; prefix-to-country translations; QSL bureau addresses; postal rates for airmail, first class and QSL cards; international reply coupon exchange rates, etc. The "Second Op" includes log space to indicate date of contact and receipt of QSL from each country. Well made, of heavy stock with long lasting varnish finish. Amateur Net . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 1.00$

    ## MODEL 3005 FM BOOSTER

    The lasting pieasure of fine FM music under all conditions is made possible with the Model 3005 FM Booster. No more "lost programs" in difficult city locations or in outlying lowsigna! areas. Utilizing a special design high-gain circuit, this all-electronic broadband booster takes full advantage of all FM features without compromise. Extends the useful range of FM reception; clearly brings in stations not possible before. Increases signal strength over 10 times ( 20 db ) uniformly throushout the entire FM spectrum from 88 to 108 mc . Thermal relay permits FM booster to be turned "on" and "of" by the receiver without any circuit modifications. Completely automatic, no tuning or adjustment required simple to install.
    Uses two $6 \mathbf{J} 6$ dual triode tubes in a highly developed, low internal noise circuit. 300 -ohm input and output. For 105.125 volt, 60 cycles AC. Automatic switch actuated by sets consuming between 40 and 250 watts. Sturdy metal two-tone gray case. Vertical mounting brackets included; rubber feet. $51 / 2^{\prime \prime} \times 4^{\prime \prime} x$ $5 \mathrm{~s} / \mathrm{m}^{\mathrm{m}}$. Complete with tubes and plug-in cord. Shipping weight 3 lbs . List Price. . . . . . . . . . . . $\$ 45.00$

    The Millen S.W.R. bridge provides easy and inexpensive measurement of standing wave ratio on antennas using co-ax cable. As assembled the
    bridge is set up for 52 ohm line. A calibrated 75 bridge is set up for 52 ohm line. A calibrated 75
    ohm resistor is mounted inside the case for sub. ohm resistor is mounted inside the case for
    stitution in the circuit when 75 ohm line is used. No. 90671 .............................. . \$

    ## PHASE-SHIFT NETWORK

    A complete and laboratary aligned pair of phase:
    shift networks in a single compact $2^{\prime \prime} \times 1 / 16^{\prime \prime} \times 4^{\prime \prime}$ cose with characteristics so as to provide a phase
    shift befween the two networks of $90^{\circ} \pm 1,3^{\circ}$ over a frequency range of 225 cycles to 2750 cycles, This unit is equally well adapted for use in either single sideband tronsmitting or receiving equipment. When used in a suitably designed transmitter it is possible to obtain a 40 db suppression of the unwanted sideband. The No. 75012 precision adjusted phase-shift network makes possible the building of single sideband equipment without the necessity of complicated labaratary equipment for network adiustment.
    No. $75012 . . . . .$. .

    ## R9'er MATCHING PREAMPLIFIER

    The Millen 92101 is an electronis impedance matching device and a broad-band preamplifier combined into a single unit, designed primarily for operation on 6 and 10 meters. Coits for 20 meter band alsa available. Na 92101 , less tubes
    ## SO WATT EXCITER-TRANSMITTER

    Modern design includes features and shiolding for TVI reduction, bandswitching for 4-7-14-21-28 megacycle bands, circuit metering. Conservatively high power PA stages. 5763 oscillator-buffer-mulfiplier and 6146 power amplifier. Rack mounted. No. 90801 , less tubes

    VARIABLE FREQUENCY OSCILLATOR
    The No. 90711 is a complete transmitter control unit with 6SK7 temperature-compensated, electron coupled oscillator of exceptional stability and low drift, a 6 SK7 broad-band buffer or frequency doubler, o 6 A67 tuned amplifier which tracks with Output sulficient to drive an 807 is available on 160,80 and 40 meters and reduced output is available an 20 meters, Since the output is isolated from the oscillator by twa stages, zero frequency shift occurs when the output load is varied from shin occurs when the output load is varied from open circuitlo short circuit. The entire unit is unoccurs due to vibration. The keying is clean and free fram all annoying chirp, quick drift, jump, and similar difficulties often encountered in keying variable frequency oscillators.
    No. 90711 , with fube

    ## HIGH VOLTAGE POWER SUPPLY

    The No. 90281 high voltoge power supply has o d.e. output of 700 volts, with maximum current of 235 ma . In oddition, a.c. filoment power of 6.3 volts supply is an ideal unit for use with transmitters, such as the Millen No 90801, as well as general lab oratory purposes. The power supply gises two oratory purposes. The power supply uses two No
    816 rectifiers. The panel is standard $83 /^{\prime \prime} \times 19^{\prime \prime}$ ack muntin. rack mounting.

    ## HIGH FREQUENCY RF AMPLIFIER

    A physically small unil capable of o power outpul af 70 to 85 watts on 'phone or 87 to 110 watts on $\mathrm{C}-\mathrm{W}$ an $20,15,11,10,6$ or 2 meter amateur bands. Provision is made for quick band shift by means of the new No. 48000 series VHF plug-in coils. The Na. 90811 unit uses either an $829-8$ or 3E29.
    No. 9081 ! with 10 meter band coils, less
    tube..................................... \$-

    ## RF POWER AMPLIFIER

    This 500 watt amplifier may be used as the basis of o bigh power amateur transmitter. The No. 90881 RF power amplifier is wired for use with the papular " 812 A " type fubos. Other popular tubes may bo used, The amplifier is of unusually sturdy mechanical construction, on o $101 / 2^{\prime \prime}$ relay rack panel. Plug-in inductors are furnished for operation on 10, 20, 40 duch meter amoleur bands. The standard Millen No. 90801 exciter unit is on ideal driver for the No. 9080 excirer unit is an ideal driver for the Now No. 81 with por is an ide
    No. 40881 , with one set of coils, but less

    ## PANEL DIALS

    The No. 10035 illum nated panel dial has 12 to 1 ratio; size, $81 / 2^{\prime \prime} \times 61 / 2^{\prime \prime}$. Smoll No. 10039 has 8 to 1 ratio size, $4^{\circ} \times 311^{\prime \prime}$. Both ore of campoci mechanical design, easy to mount and have totally self.contoined mechunism, thus eliminating bock of ponel interference. Provision for mounting and marking auxiliary controls, such as switches, poentiometers, etc. provided on the No. 10035 Standord finish, either size, flot black ort metol. No. 10039 No. 10035

    ## WORW DRIVE UNIT

    Cast oluminum frome may be ponel or base mounted. Spring leaded split gears to minimize bock losh.
    Standord rotio $16 / 1$. Alsa in $48 / 1$ on request. No. 10000-(stote ratio) . . . . . . . . . . . . . \$

    ## DIALS AND KNOBS

    Just a few of the many stock types of small dials and knobs are illustrated herewith. 10007 is $11 / \mathbf{s}^{\prime \prime}$ diometer, 10009 is $21 / 2^{\prime \prime}$ and 10008 is $31 / 2^{\prime \prime}$ No. 10002
    No. 10008
    Na. 10008
    No. 10009
    No. 10018
    No. 10021
    No. 10065

    ## PIGMT ANGIE DRIVE

    Extremely compact, with provisions for many methads of maunting. Ideal for operoting potentiomelers, switches, etc., that must be locoted, for short leods, in remote parts of chossis. No. 10012.

    ## HIGM VOLTAGE INSULATED

    SHAFT EXTENSIONNo. 10061 shaft locks and the No. 39023 insulated high voltoge potentiometer extension mountings ore ovailoble as a ingle integrated unit-the No. 39024. The proper shaf length is independent of the panel thicknes. The standard shaft has provision for screw driver odjustment. Special shoft arrangements are available for industrial opplications. Extension straft and insulated coupling ore molded as o single unit to provide occuracy of alignment and eo:e of installation.
    Na. 39023, non lecking type
    No. 39024 , lacking type

    ## SHAFT LOCKS

    In oddition to the original No. 10060 and Na. 10061 "DESIGNED FOR APPLCATION" shaft locks, we can also furnign such voriations as the No. 10062 ond No. 10063 for easy thumb operation as illustrated obove. The No. 10061 instanlly canverts ony plain " $1 / 4$ shaff" volume control, condenser, etc. from "plain" to "haft locked" rype. Easy to maunt in place of regular mounting nut.
    No. 10060
    Ne. 10061
    No. 10062
    No. 10063

    ## TRANSMISSION LINE PLUG

    An inexpensive, compoct, and efficient palystyrene unit for use with the 300 ahm ribbon type poly ethylene transm ísion lines. Fits into standard Millen No. 33102 (aystal) sackef. Pin spacing 1/2 diameter. $095^{\circ}$
    No. 37412

    ## DIAL LOCK

    Compact, easy to mount, pasitive in oction, daes Compoct, esy for in perationl Rotation of dae "A" depresses finger " $B$ " and " $C$ " without imparting any ratary motion to Dial. Single hole maunted. No. 10050 .
    

    #  

    

    ## TUBE SOCKETS

    ## DESIGNED FOR APPLICATION

    MODERN SOCKETS for MODERN TUBES! Long Flashover path to chassis permits use with trans. mitting tubes, 866 rectifiers, etc. Long leakage path between contacts. Contacts are type proven by hundreds of millions already in government. commercial and broadcast service, to be extremely dependable. Sockets may be mounted either with or without metal flange. Mounts in standard size chassis hole. All types have barrier between contacts and chassis. All but octal and crystal sockets olso have barriers between individual contacts in addition.

    The No. 33888 shield is for use with the 33008 ostal socket. By its use, the electrostatic isolation of the grid and plate circuits of single-ended metal tubes can be increased to secure greater stability and $g$ ain.
    The 33087 tube clamp is easy to use, easy to install, effective in function. Available in special sizes for all types of subes. Single hole mounting. Spring steel, cadmium plated
    Cavity Socket Contast Discs, 33446 are for use with the "Lighthouse" ultra high frequency tube. This set consists of three different size unhardened beryllium copper multifinger contact discs. Heat treating instructions forwarded with each kit for hardening ofter spinning or forming to frequency requirements.
    Voltage regulator dual contact bayonet socket, 33991 black phenolic insulation and 33992 with low loss high leakage mica filled phenolis insulation.

    ## FLEXIBLE COUPLINGS

    The No. 39000 series of Millen "Designed for Application" flexible coupling units include, in addition to improved versions of the conventional types. also such exclusive original designs as the No. 39001 insulated universal jaint and the No. 39006 'slideaction" coupling lin both steatite and bakelite insulation).
    The No. 39006 "slide-action" coupling permits longitudinal shoft motion, eccentric shaft motion and out-of-line operation, as well as angulor drive without backlash.
    The No. 39005 is similar to the No. 39001, but is not insulated and is designed for applications where relatively high lorque is required. The steatite insulated No. 39001 has a special antirbacklash pivat and socket grip feature. All of the above illustrated units are for $1 / 4^{\prime \prime}$ shaft and ore stand ard production type units. The No. 39016 incorporates features which have long been desired in a flexible coupling. No Back Lash-Higher Flexibility - Higher Breakdown Voltage-Smaller Diameter-Shorter Length-Higher Alignment Accuracy-Higher Re. sistance to Mechanient Shock-Solid Insulating Barrier Diaphragm—Molded as a Single Unit.

    ## 04000 and 11000 SERIES TRANSMITTING CONDENSERS

    A new member of the "Designed for Application" series of transmilting variable air capacitors is the 04000 series with peak voltage ratings of 3000,6000 , and 9000 volts. Right ongle drive, 1-1 ratio. Adjustable drive shaft angle for either vertical or sloping panels. Sturdy construction, thick, roundedged, polished aluminum plates with $134^{\prime \prime}$ radius. Constant impedance, heavy current, multiple finger rotor contactor of new design. Available in all normal capacities.
    The 11000 series has $16 / 1$ ratio center drive and fixed angle drive shaft.

    | Code | Volts | Capacity | Price |
    | :---: | :---: | :---: | :---: |
    | 11035 | 3000 | 35 | $\$$ |
    | 11050 | 3000 | 50 |  |
    | 11070 | 3000 | 70 |  |
    | 04050 | 6000 | 50 |  |
    | 04060 | 9000 | 60 |  |
    | 04100 | 6000 | 90 |  |
    | 04200 | 3000 | 205 |  |

    ## 12000 and 16000 SERIES

    TRANSMITTING CONDENSERSRigid heavy channeled aluminum end plates. Isolantite insulation, polished or plain edges. One piece rotor contact spring and connection lug. Compact, easy to mount with con: nector lugs in convenient locations. Same plate sizes as 11000 series above.
    The 16000 series has same plate sizes as 04000 series. Also has constant impedance, heavy current, multiple finger rotor contactor of new design. Both 12000 and 16000 series available in single and double sections and many capacities and plate spacing.

    ## THE 28000-29000 SERIES VARIABLE AIR CAPACITORS

    "Designed for Application," double bearings, steatite end plates, cadmium or silver plated brass plates. Single ar double section $.022^{\prime \prime}$ or $.066^{\prime \prime}$ air gap. End plate size: $19 / 16^{\prime \prime} \times 11 / 16^{\prime \prime}$. Rotor plate radius: $3 / 4^{\prime \prime}$. Shaft lock, rear shaft extension, special mounting brackets, etc., to meet your requirements. The 28000 series has semi-circular rotor plate shape. The 29000 series has approximately straight frequency line rotor plate shape. Prices quoted on request. Many stock sizes.

    ## NEUTRALIZING CAPACITOR

    Designed originally for use in our own No. 90881 Power Amplifier, the No. 15011 dise neutralizing capacitor has such unique features as rigid channel frome, horizontal or vertical mounting, fine thread over-size lead screw with stop to prevent shorting and rotor lock. Heavy rounded-edged polished aluminum plates are $2^{\prime \prime}$ diameter. Glazed Steatite insulation.
    Na. 15011

    ## THRU-BUSHING

    Efficient, compact, easy to use and neat oppeoring. Fits $1 / 4^{\prime \prime}$ hole in chassis. Held in ploce with a drap af solder ar a "nick" from a crimping tool.
    No. 32150

    ## Exciters, Modulators and Power Supplies

    ## EXCITER-TRANSMITTER

    The 90801 Exciter-I'ransmitter is of the most mondern designiechading features and shielding for TW reduction, band-switching for the $4-\mathrm{i}-14-21$ and 28 megacyele band, circuit metering. Con ervatively rated for use either as a transmister or exciter. 5763 oscillatorhuffer multiplier and 01.46 pow $r$ amp lifier. 90 watts inputior $C W$. Can be keyed in the oscillator and, or amplitier or tyy means of keyed external V.F.O. such as the 90711.67 watts input ifhone. Rack mounted. $31 / 2^{\prime \prime}$ panel heisht.
    No. 94801, less tubes.
    $\$ 00.00$

    ## HIGII VOLTAGE POWER SUPPLY

    The 90281 hifh voltage power eupply has a d.c. output of 5.00 ta 700 volts, with maximum current of 235 ma . In addition, a.c. filament power of 6.3 volts at 4 amperes is alse, availablr. This power rupply is an deal unit for use with trinsmiters an well as generad laboratory purpose. A single power upply will provide high valtage for both the 90801 'Transmitter and tho 90831 Modalator. List s 2 816 zuercury vapor reetifiers and inoorporates a two section filter which resulte in excellent regalation and very low ripule. Nack mounted. $833_{4}^{\prime \prime}$ panel height.
    No. 90281 , less tubes
    . $\$ 0.00$

    ## MODULATOR

    The 9083140 watt modulator designed especially for use with 908tl transmitter. 12AX7 speech amplifier-6C4 voltage amplifier. class A $1316146^{\circ}$ s. Suitahle for modulating transmitters with power input up to 80 watts. Gain is ample for the use of low level, high impedance crystal or dynamic microphones. Frequency response is adjusted for good communication intelligibility with limited side bands. Modulator incorporates a switeh for complete ehange-over of modulator and transmitter from CW to 'phone. Rack mounted. 514" panel height.
    No. 90831, leas tubes.

    ## LOW VOLTAGE POWER SUPPLY (not illustrated)

    The 90201 is a compact uncased regulated and general purpose power supply either for table use, in the laboratory or for incorjoration as an integral part of larger egtipments. It will provide modulator and exciter low voltage as well as bias and heater voltager when used with the 90801 and 908.11 . lis multiple outputs include 250 volt 125 ma . unregulated - 105 volt 35 ma . rexulated-bias voltage to minus 100 volis- 6.3 volt filament power at 4.2 amperes.
    Model 90201, with tubes.

    ## LA HORATORY DELAY LINE STANDAIEIDS

    The Millen delay line kit effeetively provides a means for the: development and design enginerr to chrek the affect of various delays in their actual developmental setups without the time los. and expense of producing separate lines for each trial. Increased reguirement for time delay circuits in radar, color telerision and other modern electronic applications has presented a problem to the design and development engineer as it has been both time consuming and expensive to oktain delay lines for developmental work as cach line was necessarily cut to the estimated delay and any change in requirements nexessitated the fabrication of a new delay line. The Millen delay line kit i:- dewigned to provide a ready means of obtaining various delays from .10 microseconds through 2 microseconds in increments of .05 misroseconds except at the extreme ends of this range. The lines may be used repeatedly without deterioration as they are hermetically sealed, the smaller lines in glase tubes, the 1 micro.econd line io a metal container.

    Actual delar as measured by phase shift method are marked on each delay line. The lahoratory calibration of each delay line is accurate to $\neq 0.002$ microseconds on all of the .10 microzeeond .25 microsecond and .03 microsecond lines and $\pm 0.01$ microsecond on the 1 microsecond line. Combination of delay lines supplied makes possible the following delays:

    | $0.10 \mu s$. | $0.55 \mu s$. | $1.10 \mu s$, | $1.55 \mu s$, |
    | :--- | :--- | :--- | :--- |
    | 0.20 | 0.60 | 1.20 | 1.60 |
    | 0.25 | 0.65 | 1.25 | 1.65 |
    | 0.30 | 0.70 | 1.35 | 1.70 |
    | 0.35 | 0.85 | 1.40 | 1.150 |
    | 0.40 | 0.90 | 1.45 | 7.90 |
    | 0.45 | 1.00 | 1.50 | 2.00 |
    | 0.50 |  |  |  |

    Characteristic impedance - 1350 ohms $\pm 20 \%$.

    Each set consists of:

    ## nomimal

    ## oflat rol.

    $2-0.10 \mu \mathrm{~s} . \pm 0.01 \mu \mathrm{~s}$.
    $2-0.25 \mu \mathrm{~s} . \pm 0.025 \mu \mathrm{~s}$.
    $1-0.30 \mu \mathrm{~s} .=0.03 \mu \mathrm{~s}$.
    $1-1.00 \mu \mathrm{~s} . \pm 0.05 \mu \mathrm{~s}$

    ## CARIBRATION IORERANCM

    $\pm 0.002 \mu \mathrm{~s}$.
    $\pm 0.002 \mu \mathrm{~s}$.
    $\pm 0.002 \mu \mathrm{~s}$.
    $\pm 0.01 \mu \mathrm{~s}$.

    ## PHYSICAL DIMENSIOWS

    0.1 $\mu \mathrm{s}$. ${ }^{13 / h^{\prime \prime}}$ dia. $\times 41 /{ }^{\prime \prime \prime}$ ong
    $0.25 \mu \mathrm{~s}$. 一 $13 / \mathrm{s}^{\prime \prime}$ ", dia. $\times 75 \%^{\prime \prime}$ long $0.30 \mu \mathrm{~s} .{ }^{15} \mathrm{~s}^{\prime \prime}$ dio. $\times 7 \mathrm{~m}^{\prime \prime}$ long
    

    All seven lines are mounted in a metal ease $91 / 2^{\prime \prime} \times 5^{\prime \prime} \times 13^{\prime \prime}$ for convenience in storing and safety in handling.
    
    

    ## "Ilesigned for Application"

    ## Delay Lines and Networlis

    The James Millen Mfg. Co., Inc. has been producing continuous delay lines and lump constant delay networks since the origination of the demand for these components in pulse formation and other circuits requiring time delay. The most modern of these is the distributed constam delay line designed to comply with the most stringent electrical and mechanical refuirements for military, commercial and latoratory equipment.

    Millen distributed constant line is available as bulh line for laboratory use and in cither flesille or metallic hermetically sealed units adjusted to exaet time delay for use in production equipment. Lump constant delay networks mas be preferred for some specialized applications and can be furnished in open or hermetically scaled construction. The above illustrates several topical lines of both types. Our engineers are arailable to assist you in your delay line problems.

    ## Inesigned for Application

    ## Mu Metal Shields

    The James Millen Mfg. Co. Inc* has for many war = speciadizerl in the production of magnetie metal cathode ray tube shields for the entire electronics indastry. supplying magnetic metal shielats to manufarluring companies, laborawries and research organizations. Stock shields are immediately available for all of the more pornalar sizes and types of cathome rar tuhes as well as hezels fror $\underline{2}^{\prime \prime}, 3^{\prime \prime}$ and $5^{\prime \prime}$ size tutes.

    Many produrion problems, twover, make desirable special shields designerf in conjunction with the specialized requirement of the basie apparatus. Iterewith. are illustrated a momber of such eustom buile shixids. Our eustom darign and fabrieation department is at the serviee of our customers for the development and mamfacture of magnetie metal shiflds of either nieoloi or mumetal for such sperialised applieations.

    ## Midget Absorption Frequency Meters

    Many amateurs and experimenters da not realize that ane oi the most useful "tools" of the commercial transmitter designer is a series of very small absorption type frequency meters. These handy instruments can be poked into small shield campartments, coil cans, corners of chassis, etc., to check harmonics; parasitics; oscillator-doubler, etc., tank tuning; and a host of other such applications. Quickiy enables the design engineer to find out what is really "going on" in a circuit.

    Types 90605 thru 90609 ore extremely small and de signed primarily for engineering labaratary use where they
    will be handled with reasanable care. The most useful cambination being the group of four under code No. 90300 and cavering the tatal range of from 3.0 to 140 megacycles. When purchased in sets of four under cade No. 90600 o convenient carrying and storage case is included. Series 90601 are slightly larger and very much more rugged. They are further protected by a contour fitting transparent polystyrene case to protect against damage and dirt. This latter series is designed primarily for field use and are not quite as convenient for laboratory use as the 90605 thru 90608 types. All iypes have dials directly calibrated in frequency.

    | Code | Desrription | Net Price |
    | :---: | :---: | :---: |
    | 90604 | Rong $=160$ to 210 me . | \$ |

    S-53A The finest small communications receiver built and ideal where maximum performance is required in small space. Several steps better than the $\mathrm{s}-38 \mathrm{C}$, but not quite up to larger S-40B. Covers Broadcast Band $540-1630$ kc plus four short-wave bands covering $2.5-31$ and 48 54.5 Mc.

    Electrical bandspread for easy funing. Two i.i stages. Switches for automatic noise limiter, code reception and high-low tone. Phono jack for records. Headfone tip jacks on rear and built-in PM speaker. Temp. compensated to reduce fading due to irequency shift. for 105/ 125 V. 50/60 cycle AC.
    

    Brand New and very much wantedModel HT-30 Single Sideband AM and CW Transmitter/Exciter

    - Highly stable VFO with full 100:1 ratio gear drive system built-in, calilbrated in kc.
    - Stability comparable 10 most crys. tals $.009 \%$. Ifuil band switching.
    - Ample gain for 55 db microphone. Hum and noise 40 db down.
    - Full 50 watt peak power cutput. - Complete built-in metering.
    - Unwanted sideband at least 40 db down. AM-CW-SSB.
    - Undesired beat frequency down 60 db or more. T. V. I. suppressed.
    - Stable 50 kc filter system.
    - Provisions for coaxial output fitting.
    - Built-in voice control circuit with bias switching for final amplifier.
    

    Model $\$ \times .96$ Selectable Sideband Receiver

    - Covers Broadcast 538-1580 kc plus three S W $1720 \mathrm{kc}-34 \mathrm{Mc}$.
    - Double conversion with selectable crystal controlled second osciltators.
    - Selectable sideband reception of both sup.
    pressed carrier and full carrier transmis. sions. Highly selective 50 kc I. F. system.
    - CW operation with AVC on. Delayed AVC.
    - Calibrated bandspread- "S" meter-double superhet. Precision gear drive dial system.
    - 10 tubes, 1 rectifier and voltage regulator.
    
    S. 94 (S-95) These two new Civic Patrol receivers are over 10 times as sensitive as previous models, greater increased audio power output and built•in relay squelch system. Perfect for monitoring, police, fire, taxicab, telephone-mobile, forestry, Civil Defense. The S. 94 covers $30-50 \mathrm{Mc}$ and the S .95 150-173 Mc. Built-in speaker and provisions for headphones. Eight tubes plus rectifier. $105 / 125$ V. 50,60 cycle AC DC.
    
    S.38D Low cost unit with high priced perform. ance over Broadcast Band 540.1650 kc plus three short-wave bands from $1650 \mathrm{kc}-32 \mathrm{Mc}$. Electrical bandspread operates over large easytoread dial. Headphone tip jacks on rear and powerful buitt-in PM speaker. Oscillator for reception of code signals. Four tubes plus rectifier. $105 / 125$ V. $50 / 60$ cycle AC, DC.

    ## "N" TYPE TRANSMITTING CAPACITORS

    Designed for medium power high freuuency transmitters and short wave quency transmitters and short wave" theries mapintains the customary high series maintains the customary high yet eliminates closed circuit loops yot eliming
    

    ## GENERAL SPECIFICATIONS:

    CAPACITY ('HARAC'TERISTIC: S.I.C.
    FRAME: Improved aluminum end plates support heavy lateral ceramie insulating bars which carry the stators.
    SHAF'I: $1 / 4^{\prime \prime}$ diameter cadmiun plated steel.
    PLA'IEs: Aluminum, . $040^{\prime \prime}$ thick, with rounded edgos. Pla-7105 has $.025^{\prime \prime}$ thiek plates, buffed and polished *dges.
    HDABINGS: Cardwall shoulder type front bearing, with ball thrust roar bearings.
    MoliN'ING: Can be single hole nounted, or by thres mounting posts and screws, to front pancl. (hassis mounting on feet which form part of end plates. or use Cardwelf " M " brackfts, Cardwell part No. 301, for inverted nounting. for lowest stator-to-grosumd vapacity.

    ## (H) HAMMADLUND

    DATA TRANSMISSION - SELECTIVECALLING AND SUPERVISORYCONTROLEQUIPMENT for Centralized Operations Control

    TONE SIGNALING UNITS

    

    The new design Hammarlund Duplex Signaling Unit consists of a tone generator and receiver, designed to transmit and receive signaling, dial. ing, telemetering, teleprinting, supervisory controls and other information over wire lines, telephone or power line carrier, and radio or microwave communications circuits. Up to 48 separate functions can be controlled over a single communications channel by multiple use of these units.

    Because of their design, including plug-in attachment of components, single basic units may be applied in various combinations to constitute a system, or may be added to other systems to perform specific operations.

    ## REMOTE CONTROL AND SUPERVISORY SYSTEM

    The Hammarlund Multi-Gate System is the integral part of the new concept of controlling operations of a far-flung system from a central point. Multi-Gate provides complete "on-off" or "raise-lower" control and report-back indication of practically an unlimited number of remote switches for valves, pumps, lights, power transfer and other functions, as well as alarm indication. Pipelines, refineries, chemical plants, railroads, public utilities and many other industries are finding Multi-Gate an efficient, money saving tool. All the control operations can be performed over a single communications circuit.

    ## SELECTIVE CALLING OR SIGNALING

    Hammarlund Selective Calling equipment, added to 2 -way radio systems used to control large fleets of vehicles, or distant fixed stations, adds privacy, speed, safety, quietness and convenience to day-in-day-out operations. By the push of a button the dispatcher within 0.8 of a second selects the station which he wants to contact. Only the selected operator or group of operators can receive the call. If the operator of the car or station being calfed doesn't answer, an indicator lamp remains lighted to show he was called. This simple equipment can be added to any present installation, or incorporated in any type of installation now projected.
    THE HAMMARLUND MANUFACTURING COMPANY, INC.

    ## (1H HAMMARLUND

    ## COMMUNICATIONS RECEIVERS

    ## the New "PRO-310"

    From the modern, custom-built, professional look of its new design cabinet, to the modern etched and plated circuits in the RF section, the Pro.310 is all new. It's the communications receiver of tomorrow -here today. For either professional or amateur use.
    

    ## Here are its features:

    All frequencies can be read to 1 part in 5000. Bandspread is can. tinuausly calibrated aver the entire range fram 540 Ke t 035.5 Me . nat iust over a couple of selected bands as in mast ardinary receivers. Single Sideband Operation is yaurs because exalted BFO and sharp selectivity are built.in.

    Exceptional Stability resulting fram the use of the mast madern campanents and circuitry.

    High Image Rejection on all 6 bands. Dauble conversion on the tap 4 bands.

    Choice of calors. Either black with gold 'rim, or grey with s'iver trim.
    Rugged turret, sectianalized canstructiar, restful wrist-high cantrals, and many athers.

    ## THE "SP.600.JX"

    

    The "SP-600-JX" communications receiver, now also available to hams, is a masterpiece of receiver design and already is world-known for its oustanding construction and performance. This professional receiver, with its six bands covering the frequency spectrum from 540 Kc to 54 Mc , is being used in large quantities by the military and governmental agencies, as well as by commercial services, for both single and diversity reception.
    This magnificent receiver is a 20 tube dual conversion superheterodyne. The power supply is an integral part of the receiver chassis. Operation on any of six crystal controlled fixed frequency channels within the range of the receiver is immediately available. This designates it as the perfect receiver for point-to-point and network operations. Prearranged day and night fixed frequencies. With crystal control you can select your desired channels immediately.
    Stability is .001 to .01 percent depending on frequency to which receiver is tuned, image rejection is 80 db to 120 db down, and spurious responses are af least 100 db down. Sensitivity is 1 microvolt CW and 2 microvolts AM, while selectivity for the three calibrated crystal and three non-crystal ranges is from 200 cycles to 13 kc . Radiation is negligible with no cross-talk in multi-receiver installations.
    

    The "HQ-140-X" is a superheterodyne type receiver that provides amateurs and other short wave listeners with alt the advantages of modern professional design and circuitry. In addition, it incorporates those outstanding features that have made Hammarlund " HQ 's" famous for quality and performance. This receiver retains the high degree of sensitivity and selectivity of the "HQ-129-X," and in addition features notably improved frequency stability and image ratio. It covers a continuous range of frequencies from 540 Kc to 31 Mc , or from 555 meters to 9.7 meters, in six bands.
    Band spread tuning is supplied on the four higher frequency bands, with actual calibration in the $80,40,20,15$, and 10 meter amateur bands. Many types of noise and other interference have been substantially reduced by the outstanding noise limiter and the special Hammarlund patented crystal filter.

    ## FEATURES

    TUNING RANGES: $.54-1.32 \mathrm{mc}, 1.32-3.2 \mathrm{mc}, 3.2-5.7 \mathrm{mc}, 5.7-10 \mathrm{mc}$, 10-18 me, and 18-31 me.
    CAIIBRATED BAND SPREAD: $3.5-4 \mathrm{mc}, 7-7.3 \mathrm{mc}, 14-144 \mathrm{mc}, 20.9-$ 21.6 mc , and $28-30 \mathrm{me}$.

    TUBE IINE-UP: 6CA Osciltotor, 6BAS RF Amplifier, 6BES Mixer, 6BA ist IF Amplifier, 6BAS 2nd IF Amplifier, 6BA6 3re IF Anmplifier, 6AL5 cambination defectar. AVC and naise timiter, 12AU7 ist AF Amplifirer and BFO, $6 \mathrm{~V} 6 \mathrm{GT} / \mathrm{G}$ Audio Power Output, OC/VR105 Voltage Regulator and 5U4G Full Wave Rectifier.

    ## Write HAMMARLUND for detailed information

    ## (41) HAMMARLUND

    

    ## "BFC" CAPACITORS

    FEATURES—The "BFC" "butterfly" type capacitar has very law minimum capacity, law inductance and isalated ratar far use in VHF applicatians as a series capacitar with na ratar cantact. Mechanical and electrical symmetry and statar terminal lacatians minimize circuit inductance.
    CONSTRUCTION—Brass ratars and statars are saldered and nickel-plated. The cantact wiper is heavily silver-plated beryllium-capper. Tapped studs an the silicane treated steatite frant panel permit maunting the capacitar withat graunding the ratar. The sleeve type bearing is nickel-plated brass.
    SPECIFICATIONS—Straight line capacity. $90^{\circ}$ ratation fram minimum ta maximum capacity pasitian. Air gap is $0.030^{\prime \prime}$ naminal. Tested at 1200 V. R.M.S., 60 cycles between ratar and each statar.

    High Speed Ball-Bearing Madels Alsa Are Available

    ## "MAC" CAPACITORS

    FEATURES-The "MAC" pravides the law minimum capacity essential far use as a trimmer in the VHF range. It was engineered ta achieve the smallest dimensions practical ta meet the requirements of a miniaturized campanent.
    CONSTRUCTION—Its silicane treated steatite base is anly $3 / 4^{\prime \prime} \times 5 / \mathbf{s}^{\prime \prime}$. Ratar and statar are saldered assemblies and are af brass, silver-plated. Ratar and statar terminals are pasitioned ta permit single hale maunting.
    SPECIFICATIONS—Straight line capacity. Screwdriver adjustment. Air gap is $0.017^{\prime \prime}$ nominal. Tested at 750 V. R.M.S., 60 cycles.

    ## "FC" and "FNC" COUPLINGS

    

    FEATURES-The "FC-46-S" is an insulated flexible caupling designed to pravide far mechanical ganging af shafts even thaugh angularly misaligned. The smallest dimensians have been incorparated cansistent with the rugged construction necessary far general service. A high degree af electrical isalatian is achieved thraugh the use af silicone treoted steatite insulation. Flash-aver valtage is appraximately 5000 V . R.M.S. Brass hubs and spring temper phosphar branze fexible arms are nickel plated. An exclusive and impartant feature af this caupling is its characteristic af uniform side-thrust thraugh $360^{\circ}$ af ratation. This eliminates tendency ta vibrate at high speeds, minimizes bearing wear and assures accurate tracking.
    The "FNC-46-S" is a nan-insulated caupling far use where electrical continuity between shafts is required. The flexible arms are held securely to a nickel plated brass ring instead of an insulatar.

    ## STANDARD STOCK TYPES

    CODE FC-46-5
    CODE FNC-46-S
    Insulated flexible coupling
    Non-insulated flexible caupling

    ## (H) HAMMARLDND

    ## "APC" CAPACITORS

    FEATURES—The "APC" trimmer capacitor originated by Hammarlund over twenty years ago is still widely recagnized as the standard capacitor af its type. Its use is indicated in all classes of equipment where a compact. high quality air dielectric trimmer is required. It was designed to resist effects of temperature, moisture and vibration. silicone treated steatite insulation is used to insure high leakage resistance.

    CONSTRUCTION-8rass rotor and stator plates are soldered to brass supports. Nickelplated phosphar branze wiper assures positive rotor contact. All metal parts are nickelplated. Terminals are hot-tin dipped. Tapped brass mounting studs fastened to silicone treated steatite base permit mounting capacitor without grounding the rotor.
    

    |  | CAPACITY |  | PLATES |
    | :---: | :---: | :---: | :---: |
    |  | Max. | Min. |  |
    | APC-25 | 25. | 3.0 | 7 |

    | APC-100 | 100. | 5.5 | 27 |
    | APC-140 | 140. | 6.7 | 37 |

    SPECIFICATIONS—Straight line capacity characteristic. Avail able either with hexagonal collar on soted shaft (APC-A Type) to permit rator adjustments to be mace with wrench or screw. driver or with $1 / 2^{\prime \prime}$ extended shaft for knob contral or shaft coupling (APC-B Type). "APC.C" Lock Type now also available through distributors. Air Gap is $0.015^{\prime \prime}$ nominal. Tested at 600 V.R.M.S., 60 cycles.

    ## "MAPC" CAPACITORS

    FEATURES-The "MAPC" capacitor is representative of Hammarlund's efforts ta meet the demand for smaller dependable components. It is a scaled-down version of the popular "APC" with everything reduced except the quality and performance characteristics. For example, an "MAPC" is about half the size and weight of an "APC." Lower minimum capacities and low inductance make the "MAPC" suitable for VHF use.

    CONSTRUCTION-The standard "APC" construction is used in this capacitor. Rotors and stators are fabricated by soldering brass plates to supporting members and nickelplating the assemblies. Nickel-ploted phosphor bronze wiper assures positive rotor cantact. Topped brass mounting studs fastened to silicone treated steatite base permil mounting capacitor without grounding rotor.

    | MAPC-100 | 100. | 4.5 | 38 |

    SPECIFICATIONS—Straight line capaçany. Available either with screwdriver or socket wrerch adiustment (MAPC.A Type) or with $7 / 16^{\prime \prime}$ extended shaft for linob control or shaft coupling (MAPC-B Type). "MAPC.C" Lock Type now alsa available trough distributors. Air Gap is $0.0135^{\prime \prime}$ noninal Tested at 6CO V.R.M.S., 60 cycles.

    ## "NZ-10" CAPACITORS

    FEATURES_-The "NZ-IO" is a compact transmitter neutralizing capacitor designed for easy and accurote adjustment. The rotor is attached to a finethread lead screw which may be adjusted with smooth and precise action by a screwdriver and locked securely by a readily accessible clamping screw. A stop prevents shorting of plates at maximum capacity. Long leakoge paths to ground from both rotor and stator ore provided. Glazed sleatite insulators and smoothly rounded aluminum plates minimize flashover.
    SPECIFICATIONS—Capacity is adjustable from 2.3 to 10 mmf . Peak voltage rating is 3000 V . at maximum capacity (minimum gap) position.
    

    Write for the new HAMMARLUND Capacitor Catalog

    # (H1) HAMMADUND 

    

    SPECIFICATIONS-Straight line capacity. Single spaced types (HE and HFD) have $0.015^{\prime \prime}$ air gap and are tested at 600 V. R.M.S., 60 cycles. Wide spaced types (HF.X and HFD. X) have $0.045^{\prime \prime}$ air gap and are tested at 1400 V. R.M.S., 60 cycies.
    

    SPECIFICATIONS-Straight line capacity. Air gaps ant test voltages are as indicated in table. Howeve: "HF8D" breakdown voltages are doubled and capacitance valjes approximately halved when stator sections are connected in series.
    

    ## "HF" and "HFD" CAPACITORS

    SINGLE SECTION CAPACITOR-The "HF" is o single section tuning copocitor employing "APC" rotor ond stotor design. Extro long sleeve bearing and positive contoct nickel-ploted phosphor-bronze wiper moke this unit ideolly suited to high frequency opplicotions. Silicone treoted steotite insulotion. Single hole or bose mounting.
    DOUBLE SECTION CAPACITOR—The "HFD" duol copocitor, like the "HF" singles, incorporote odvonced feotures providing for moximum efficiency of high frequency. Aluminum front ond reor end ponels ore mounted on o heovy silicone treoted steatite base. Wide frant ond rear bearings with individual silver-ploted beryllium-copper wipers for eoch section ossure long life ond moximum contoct efficiency. Single hole ponel mount or bose mounting.

    D-Split stotor
    X—Wide-Spoced

    ## "HFA" and "HFBD" CAPACITORS

    SINGLE SECTION CAPACITOR-The "HFA" is o single section tuning copocitor similor to "HF" except thot lorger plotes permit wider oir-gops for the some copocitonce volues. Resultont higher breok-down rotings extend the use of the copocitor into the high frequency low-power tronsmitter field. A threoded sleeve beoring permits single hole mounting ond the brocket supplied moy be used for bose mounting. A lug type terminol soldered to the beoring provides on efficient rotor connection.
    DOUBLE SECTION CAPACITOR—The "'HFBD" is o dual, bolonced rotor tronsmitting copocitor employing front ond reor ponels plus o boll-thrust reor beoring, but otherwise incorporating constructional feotures identical to the smoller "HFA." An insuloted shoft extension sofeguords operoting personnel from the high voltoges which moy be opplied to the rotor. The smoll size, rugged construction, bolonced rotor ond ronge of copocitonce volues ond breokdown voltoges moke this copocitor ideolly suited to mony opplicotions.

    ## "MC" and "MCD" CAPACITORS

    FEATURES-The "MC" is a versatile single section luning capacitor designed ta give - choice of mountings, connections and capacity characteristics. "MC-S" capacitors have - straight line capacity characteristic. "MC-M" units have offset plates resulting in a "Midline" characteristic which more equally spaces frequencies. "MC-X" units are widespaced for high voltages. The "MCD" is a split-stator panel-mounted capacitor.

    SPECIFICATIONS-Straight line or "Midline" capacity characteristic. Single-spaced types have $0.0245^{\prime \prime}$ nominal air gap and are tested at 1000 V. R.M.S., 80 cycles. Wide-spaced ("X') types have $0.0715^{\prime \prime}$ nominal air gap and are lested at 1750 V. R.M.S., 60 cycles.

    ## "RMC" CAPACITORS

    FEATURES—The "RMC" wos designed specifically for opplications requiring an "MC' type tuning capacitor with very rigid construction. Its sturdy frame cansists af heavy gauge aluminum end panels held together by three aluminum tie rods. It has a brass sleeve front bearing and a single ball thrust rear bearing for smooth funing and a high degree of resetability. The rotor contact is a forked silver-plated beryllium-copper spring wiping against a wide disc on the rator.
    SPECIFICATIONS—Straight line capacity. Air gap is $0.0245^{\prime \prime}$ nominal.

    ## "VU" CAPACITORS

    FEATURES-The "VU" is a uniquely designed UHF tuning capacitor using completely original concepts. With it, canventional "lumped constant" circuits, rather than tuned cavity techniques, can be efficiently used up to 500 megacycles. In addition to employing the capacitor sections in series to eliminate the rotar wiper, the design also utilizes Pyrex balls ta farm precision bearings and to completely isolate the rotor. Thus, noise generated by rubbing metal-to-metal contacts and variable resistance paths in the bearings have been totally eliminated. Circuit connections are made to threaded studs on each stator. This permits vacuum tube and inductor to be mounted adjacent to and on opposite sides af the capacitor to minimize circuit inductance.

    | CODE | SERIES CAPACITY |  | PLATES/ |
    | :---: | :---: | :---: | :---: |

    ## JOHNSON KNOBS AND DIALS

    A distinctive line of matching knobs and dials suitable for the finest electronic equipment. All types are derived from a new basic knob design, the first in years. Knobs have twelve wel defined flutes and present an essentially round appearance.
    Tough, scratch resistant black phenolic is used for all molded paris (meets MIL-P-14). Mefal dial scales have an erched satin chrome finish. This contrasts areatly with deeply etched and filled engraving, provides maximum legribility under poor lighting conditions. All types have accurately centered brass inserts for !" shafts
    In addition to the items listed, JOHNSON is prepared to supply variations (in production auantities) such as, special shaft sizes, scales, set screws or indicators.

    ## SPINNER KNOBS

    For multi-turn dovices such as variable inductors, potentiometers etc. Spinner handle is machined aluminum and proiects "ib" from knob surface.
     116.986

    ## INSTRUMENT KNOBS

    Unique black phenolic knob may be finger operated or mounted soas to proiect thru panel and serewdriver actuated. The 116.214.1 is for $1 / 4$ " shafts. The 116.214 .2 fits " m " shofts.
    

    ## SKIRTED KNOBS

    
    Skirls are black phenolic and hove clearly defined indicator mark
    

    ## DIALS

    Beveled solin chrome skirls with markings cleorly visible, even in dim light.
    Cal. No. Illus. Calibration A B C E Nel Price
    
    
    
    
    Knobs have black phenolic skirts and flat satin chrome calibraied dial scales.
    

    ## VERNIER DIALS

    Friction vernier diols with calibroted salin chrome diol scoles. Vernier knobs same as 116-220 above except hove friction driving wheel and beoring to mount on panels up to $1 / 4^{\prime \prime}$ thick. The 116.265 has 3 to 1
    vernier, $116-285$ hos 5 to 1 ratio.
    Car. No. Calibration A B C E Net Prices
    

    ## COUNTER DIAL

    A positively colibrated drive for rotory varioble inductors and other multi-furn devices. Counter records up to 99 turns. Vernier diol calibrated $100-0$ over 360 degrees, moting possible accurate return to any pre-determined setting. Buils-in diol lock, "spinner knob" and attractivg block phenolic escuicheon. Furnished with mounting templote for cosy instollation.
    110-208-1 Counter dial with dial lock, escutcheon and $2^{3} y^{\prime \prime}$ spinner knob
    116-208-4 Same as above without dial lock

    ## ESCUTCHEON PLATE

    Aftroctive black phenolic escutcheon shown on 116-208-1 counter dial. Provides neat "window" for back-of-panel diol plate mounting. One edge of escutcheon suitable for attoching stondord $3 / i^{\prime \prime}$ wide etched name plate. Opening $11 / 4^{\prime \prime}$ wide $\times 7 / 8^{\prime \prime}$ high. Overall size $21 / 4^{\prime \prime} \times 1^{11 / 1 i^{\prime \prime}}$. Furnished with No. 2 screws.

    ## PILOT LIGHTS - GENERAL SPECIFICATIONS

    As a result of a comprehensive survey recently conducted among Design and Development Engineers, the following listing of Pilot and Indicator lights are classified by the E.F. Johnson Company as "PREFERRED."Pilot lightss elected from this aroun may bequickly obtained from the factory or are immediately availableat parts distributors throughout the country. Specials, including those meeting military specifications are available in production quantities.
    Standard iewel colors are clear, red, green, amber, blue, and opal; green and blue not recommended for use with neon lamps. When ordering -1 indicates clear; -2 , red; 3, green; 4 amber; -5, blue: 6 opa
    For a complete listing of all available Jahnson pilot lights and jewels, write for your capy of Johnson Pilot Lighi Cataloo No. 750.

    ## 1" ENCLOSED-GLASS JEWELS

    U. L. approved. Friction type iewel holder, bright chrome plated brass. Nickel plated, brass body -porcelain insulation. Bulb repiaceable from front panel. Solder terminals. Avaitable in two lenaths for either 110 volt, S 6 candelabra screw lamp or for shorter $T 41 / 2$ lamos such as the NF 45 . 147.1000 has faceted iewel, 147-1004 has smooth iewel for maximum visability with neon lamps. 1 mounting hole required. Mounting nut and fibre washer furnished. Jewels available in clear, red, green, blue, and opal.

    ## $1 / 2^{\prime \prime}$ ENCLOSED-FACETED GLASS JEWELS

    U. L. approved. Threaded iewel holder, knurled brass, nickel plated. Assembly is available in two different lenaths to accommodate the long, T3 $1 / 4$ minialure bayonet bulbs or the short, round G3 $1 / 2$ miniature bayonet types. Threaded jewel holdersare removable and assemblies are designed so bulbs may be replaced from front panel without using a special tool. Eauipped with solder ferminals. Mounting nut, fibre washer, and lock washer furnished. May be used in panels up to $3 / \mathrm{s}^{\text {n }}$ thick. 1116 " mounting hole required. Faceted jewels available in clear, red, green, amber, blue, and opol.

    Length
    

    ## ENCLOSED TYPES-WIDE ANGLE LUCITE LENS

    U. L. approved. Designed for economical confinuous operation utilizing neon or low power incandescent bulbs. Sockets are located so bulbs extend far forward in assemblies for maximum wide angle visibility. Tiny hemispheres on interior of lucite lens diffuse light for maximum visibility holders which may be removed tront or sides. One inch types have chrome plated, threaded lens screws out of bezel en housing forlb bubs, Mucile lens cap is threaded and with both types. Recommended with both types. Recommend

    ## 1" ENCLOSED-WIDE ANGLE "BULLSEYE" LENS

    U. L. approved. Threaded iewel holder, knurled brass, chrome plated. An extremely aftractive assembly designed to provide excellent visibility from any angle. Jewel has large inside diameter permitfing bulb to set well forward for maximum illumination. Hundreds of tiny hemispheres an interior surface of glass jewel provide diffusion of light in all directions. Lens exterior surface is mooth preventing the accumulation of dirtand dust. Bulb is replaceable from front panel. Phenolic insulation-screw terminals. May be used on panels up to ${ }^{3} x^{\prime \prime}$ thick. $1^{\prime \prime}$ mounting hole required. Mounting nut and fibre washer furnished. Jewels available in clear, red, areen, amber, blue, or opal.
    47.1600 Behind Panel Bulb Shape Lamp Base Price

    Economical semi-enclosed assembly Economical semi-enclosed assembly with chrome plated iewel bezel. Friction fit iewel holder easily removable for bulb replacement from front panel. Socket portion detaches from panel bush fibre washer and nut furnished. $1^{\prime \prime}$ mounting hole required. Faceled y and brackel nickel Dlated. fore washer and nut furnished. 1 mounting hole required. Faceled jewels available in clear, red reen, amber, blue, and opal.

    Pohmson $V$ i $k i n n$ amateur radio equipment
    The products briefly described below are from JOHNSON'S complete line of transmitting equipment and accessories for amateur and commercial use. For detailed information on these and other popular JOHNSON products, write for your copy of Catalog 955 . . . yours on request.
    

    VIKING "RANGER" TRANSMITTER EXCITER
    75 watts CW input . . . 65 watts phone. All amateur bands from 10 to 160 me ters. TVI suppressed-builtin VFO-timed sequence (break-in) keying system. Available as a kit or wired and tested.
    

    VIKING II
    TRANSMITTER
    180 watts CW input... 130 watts phone. Band-switching-all amateur bands from 10 to 160 meters-effectively TVI suppressed. Available as a kit or wired and lested.

    ## VIKING MOBILE TRANSMITTER

    

    A power packed mobile transmitter roted 60 watts maximum PA input. Instant bandswitching 75, $40,20,15$ and $11-10$ meters. Under-dash mounting-all controls readily accessible. Available as a kit or wired and tested.

    ## VIKING VFO KIT

    

    Variable frequency oscillator with 160 and 40 meter output for frequency multiplying transmitters. Accurately calibrated 160 through 10 meters. Available as a kit or wired and tested.

    VIKING KILOWATT POWER AMPLIFIER 1000 watts AM, CW or SSB. Boldly styled . . . contains every conceivable feature for safety, operat. ing convenience and peak performance.
    

    VIKING "ADVENTURER"

    ## CW KIT

    A compoct 50 watt CW transmitter kit. Completely self-contained -single knob bandswitching-effectively TVI suppressed. Easily assembled by novice or experienced amateur. 80, 40, 20, 15 and 11-10 meters.
    

    ## VIKING "MATCHBOX" ANTENNA COUPLER

    Performs all loading and switching functions required in medium power amateur stations. Covers amateur bands from 3.5 to 30 mc . Fully
     shielded.

    LOW PASS RF FILTER
    Handles more than 1000 watts RF-provides 75 db or more attenuation above 54 megacycles. SWR BRIDGE

    Provides accurate measurement of standing wave ratios for effective use of a low pass RF filter and antenna coupler.
    

    # TELEVISION REPLACEMENT COMPONENTS FOR MOTOROLA, TELEKING, MAGNAVOX, EMERSON, HALLICRAFTER, AND OTHER TELEVISION RECEIVERS NEW ABOVE CHASSIS TYPE TUNED 455 K.C. I.F. COILS 

    The lates in IF coils featuring his complete abose chassis type tuned IF coils that are permeability tuned rewulting in high $Q$, no drift for stable long life operation. supplied wih -nap spring clip for mounting through suitable holes in chassis.
    
     S-1607 Mmiature size 1F with excentionally high $Q$ and gain in many cases this if will outperform thandard if transfirmots. Size ${ }^{34} \times 2^{\prime \prime}$ Shicilled List Price, $\$ 1.90$

    ## 4.5 mc IF COMPONENTS

    Featuring the latest all above chassis type tuning using internal type bex wrenching elimmating core breakage. They are of the permeability tuned type using fixed silver mica conden-cr: insuring high $Q$ no driit long life operation supplied wih snap spring clip for mounting through suitable holes in chassis
    
    
     S-974 +.5 nie s. und trai jo chassis hole mount. L'mshielded List Price, 1.10

    ## HIGH VOLTAGE COILS

    S-999 High viltage flyhack. This transtormer is similar to the GE No. 77J and delivers approximately $1+$ k' for ample width and picture brilliancy up to 21 " picture tubes. List Price, $\$ 11.00$ S. 980 GE List Price, \$1.75 S-981 GE lipe width coil with IGC winding List Price, \$1.75 S-930 10 KJ R , F. power transiormer designed for coronaless performance at full rated output. S-918 R.F. Filament ransformer will deliver 30 KV when used with one S.930 and two S-918 in a voltage tripler circuit.

    ## NEW ABOVE CHASSIS 10.7 PERMEABILITY TYPE TUNED MIDGET FM COILS

    S-626 Ninget ratio detector to meet the critical demands for a sensitive and unusually stable FM detector, A peak to peak band width of 325 Kc with linearity exceeding plus or minus 125 Kc results in a high A bulit audio reproduction. Permeability tuned plus silver mica condensers offers long life low drift for the
     S-625 Nidget FA IF lligh performance in gain and band width with symmetrical wave shape is a result of correct $L / C$ raio. High $Q$ iron cores and low drift silver mica capicators make this a much desired IF ior net set or replacement. S-627 Midget FM Discriminator. The electrically centered secondary resulis in perect symmetry betweent negative and positive peaks. High output and excellent discrimination are obtained, List Prce, $\$ 3.30$ S-609 FM Choke. An excellent parasitic suppressor in the oscillator plate and filament circuits. 200 ma. $M F$ Choke. In excellent parasitic suppressor in the oscillator plate and filament circuits. 200 ina. List Price, $\$ 0.45$

    ## CUSTOM HIGH PERFORMANCE FERRITE LOOPSTICKS

    S-537 Adjustable design for small midget sets will outperform standard loop. List Price, $\$ 0.90$ S-538 Adjustable design for average table size set has exceptionally high gain and low drift, has outsiole int, connection. List Price, $\$ 1.25$ S-540 This antenna coil has twice the gain of the $S .538$ with a $Q$ of over 300 over the entire broalcast and eliminating an outside antenna.

    List Price, $\$ 1.50$

    Antenna Matching Coil (Balun)疌
    Far use in matching a $4: 1$ impedance ratia, such as 75 to 300 ohms. Two coils required in each network. Frequency range of impedance match 50 Mc to 220 Mc without introdueing an appre-
    ciable standing wave ratio. Can be used to cicable standing wave ratio. Can be used to
    replace $R C A$ \#3591, Philco \#32-4432-1, -2 , or -3, \#76-7071, and Motarola \#S-13.

    Also available are special subminiature Rotoroids, Types VTI-F and VTI-G. Inquiries are invited on "Rotoroids" with special features such as taps, additional windings, tracking characteristics, etc. Refer to Rotoroid technical brochure for information on characteristics.

    ## BURNELL AdjusToroiD.

    ## VARIABLE TOROIDAL INDUCTORS

    Now the advantages of the Rotoroid principle of inductance variationsimplicity, stability, linearity, and high " $Q$ "-can be realized economically in the numerous applications where toroid with a limited variation of inductance is desired. Using similar construction as the Rotoroid, the Adjustoroid allows a total inductance variation of approx. $10 \%$.

    B.I.F. (Band Pass Interstage Filfers)

    This series of interstage band pass filters will be of interest to project and design engineers to whom the time required for specially designed filters is prohibitive. A stock supply will be maintained for most commonly used center frequencies** between 60 and 50,000 cycles. The filter is designed to operate between the triode plate and the grid of a tube and provides a voltage gain of approximately 6 DB . Filters are hermetically sealed. Small size pernits use in compact or even miniaturized
     When ordering, specify BIF

    Cycles.

    ## D) ELUXE RELAY RACKS

    These relay racks are made of 16 gauge steel with 12 gauge panel mounting supports. The panel mounting supports are recessed so that no edges of the panel will be exposed.
    The front and back of the top, the two sides and the door are well louvered to provide adequate rentilation. The door is hung on sturdy, loose joint hinges; it is held closed by two attractive aluminum die cast plunger type snap action catches. A streamlined appearance is achieved by the use of rounded corners and red lined chrome trim. This relay rack is shipped knocked down and complete with all necessary hardware for assembly. All standard $19^{\prime \prime}$ panels will fit these racks. Overall width is $22^{\prime \prime}$. Depth $171 /$ " $^{\prime \prime}$. Inside clearance depth in back of panels $16^{\prime \prime \prime \prime}$. Clearance thru rear door $173 / 8^{\prime \prime}$. Clearance across panel mounting rails $173^{4}$ ". Panel rails tapped $10 / 32$ with W. E. spacing.
    A SPECIAL FEATURE IS THE USE OF FOUR STURDY SUPPPORTS IN THE BOTTOM, SO THAT CASTERS CAN BE FASTENED DIRECTLY TO the base, thereby achieving ready mobility.
    Bud RC-7756 casters will fit this unit. The easters are not included in the price of the caginet. These relay racks are supplied in either black or grey wrinkle finish, or light grey hammered finish. Use suffix letter " $B$ " for black wrinkle finish. Use suffix letter " $G$ " for grey wrinkle finish.
     Use suffix letters "HG" for light grey hammered finish.

    | $\begin{aligned} & \text { Catalog } \\ & \text { No. } \end{aligned}$ | Overall <br> Height | Panel Space | Shippinf: <br> Weight | Dealer Cost |

    | CR-1773 | 82-5/16" | 77' | 150 lbs . | 61.48 |

    ## SUPER DELUXE 2 IOOOR RACKS

    This relay rack is an entirely new model that consists of a relay rack made of 16 gauge steel with 12 gauge panel mounting supports. The panel mounting supports are recessed so that no edges of the panel will be exposed. IN ADDITION, THEY ARE ADJUSTABLE FROM FRONT TO BACK IN VARIOUS STOPPING POINTS. THIS ENABLES YOU TO USE THE SPACE IN FRONT AND BEHIND THE PANEL TO ANY DEGREE THAT YOU MAY FIND NECESSARY. Overall width is $22^{\prime \prime}$. Depth $171 / s^{\prime \prime}$. Inside clearance depth in back of panels $161 / \mathrm{s}^{\prime \prime}$. Clearance thru rear door $173 / 8$. Clearance across panel mounting rails $173 / 4$ ". Panel rails tapped $10 / 32$ with W. E. spacing. Clearance behind panels is $15^{\prime \prime}$ to $9^{\prime \prime}$ in increments of 1 inch.
    These racks are fitted with both front and rear doors. The louvred rear door is to cover any of the equipment behind the panel and at the same time provide easy accessibility to it. The front door, flush with front of rack, is to provide a means of concealing dials, knobs, etc., that may be in front of the panel.
    The exclusive Bud feature of supports on the bottom so the casters may be fixed directly to the base, eliminating the need and expense of dollies, is also present in this series of racks. Bud RC-7756 easters will fit these units. The casters are not included in the price of the cabinet.
    If black wrinkle finish is desired, use suffix letter "B." If grey wrinkle finish is desired, use suffix letter "G." If light grey hammered finish is desired, use suffix "HG."

    ## 00000

    METER PANELSAll meter panels are made of $1 / \mathrm{s}^{\prime \prime}$ thick steel. The small holes will fit either a $2^{\prime \prime}$ square or round meter. The large holes will fit either a $3^{\prime \prime}$ square or roundi meter. If black wrinkle finish is desired, specify by use of suffix "B," grey wrinkle finish by use of suffix "G" and light grey hammered finish by use of suffix "HG."

    ## ALUMINLM CHASSIS

    The construction and design of these chassis are exactly the same as that of our steel chassis bases. The aluminum chassis are welded on Government approved spot welders that are the same as those used in the welding of aluminum aircraft parts. As a result, you can depend on Bud Aluminum Chassis to do a perfect job and to stand up under all conditions.
    Please note that the gauges shown in the table are aluminum gauges. These chassis are supplied in an etched aluminum finish.

    ## MINIATURE ALUMINLM CHISSIS

    These small，open end aluminum chassis are the answer for miniature tube applications or sub－assem－ blies．They are made of hard aluminum with $1 / 4$＂ flanges on the bottom allowing the chassis to be fastened down．or allowing a hottom plate to be attached．Thes are extromely useful for a wide variety of applications such as small receivers，nar－ row band FM adapters or any place where the space is limited．The finish is etched aluminum．

    ## TIRIANGULAR MOUNTING BRACKETS

    For panel and chassis assemblies where large weights are in－ volved，these triangular mount－ ing brackets，with $3 / 4$＂flange， make extremely convenient sup－ ports．They are constructed of heavy gauge steel and are furnished in black enamel finish only．These are sold in pairs．

    | Catalor No． | Height | Depth | Actual <br> Weight lbs． | Dealer Cost |
    | :---: | :---: | :---: | :---: | :---: |
    | M 13－1266 | 5 ＂ | 5 ＂ | 1 | S． 44 pr ． |

    | M 13－1268 | $9^{\prime \prime}$ | $9{ }^{\prime \prime}$ | $11 / 2$ | 1.15 pr ． |

    ## BOX SHIELDS

    

    These shields have many uses；shielding power trans－ formers and chokes；covering and protecting various other components in power supplies，transmitters， receivers and other electronic units．The top and the sides are one picce steel．Size： $5^{\prime \prime}$ high x $4 \frac{1}{2} "$ deep x $71 / 2$＂wide．BS－1244 has perforated sted ends for ventilation．BS－1891 has solid ends．Flanges at the bottom provide for mounting．Thes units are fin－ ished in hlack wrinkle enamel only．

    | Catalog No． | Finds | Actual Weightlts． | Dealer Cost |
    | :---: | :---: | :---: | :---: |
    | BS－1244 | Ventilated | 1 | $\$ 2.45$ |
    | BS－1891 | Solid | $11 \underline{153}$ |  |

    ## INSTRUMENT \＆RECEIVER CABINETS

    

    Each cabinet has an evenly ：＂ecessed hinge cover with convenient finger Iift．The panel in the front of the cabinet is readily attached with self tapping screws．No opening in rear．Louvers provide satisfactory ven－ tilation．For chassis to fit thes？cahinets，see the open end chassis listed on page J－82．Finished in black wrinkle enamel only．

    | Cont．No． | Height | Width | Dヶpt．h | Dealer Cost |

    ## SLOPING PANEL CABINETS

    

    This entire front panel of this cabinet is removable if so desired. THIS CABINET IS ALSO PROVIDED WITH A HINGED TOP FOR EASY ACCESSIBILITY TO TUBES AND OTHER PARTS THAT ARE MOUNTED ON THE CHASSIS, WITHOUT NECESSITATING REMOVAL OF THE FRONT PANEL. These cabinets are finished in black wrinkle enamel or light grey hammertone. Specify with suffix B for black, HG for grey hammertone.

    ## SLOPING PANEL UTILITY BOXES

    

    The sloping panel utility box offers a streamlined appearance and enough space to house conveniently a two or three miniature tube amplifier or gadget. Height is $4^{\prime \prime}$, depth is $4^{1 / 4^{\prime \prime}}$. A $1 / 8{ }^{\prime \prime}$ flange around the rear opening of the cabinet provides convenient back cover mounting. Extremely compact, it will accommodate a Bud Miniature Aluminum Chassis. Finished in black wrinkle enamel only.

    | Catalog No. | Width | Use Chassis No. | Actual Weight lls. | Dealer Cost |

    ## MINIBOXES

    There are thousands of uses in the field of radio and elec－ tronics for these boxes．They are made of high quality aluminum．The design of the box permits installation of more components than would be possible in the more conventionally designed box of the same size．Construction is of the two piece type，each half forming three sides．The flange type construction assures adequate shielding．These units are available in either etched aluminum finish or grey hammertone finish．

    ## METER CASES

    

    Designed for all applications requiring a modern meter case．Size： $4^{11 / 4}$ height x $4^{\prime \prime}$ deep $\times 4^{\prime \prime}$ wide一rear of case open． All cases have a sloping front with the top corner rounded．Meter cases No． CM－1241 and CM－1242 have insulators on the top for leads to the meter． CM－1965 and CM－1966 are furnished without insulators．These steel units are finished in black wrinkle enamel or light grey hammertone．
    Also available are our new aluminum meter cases， prefixed by the letters CMA，as shown in the table below．These units are the same size and design as the steel meter cases，but are especially suitable for use when a case that will have no magnetic effect on a meter is required．No insulators furnished．These cases are etched aluminum finish or light grey hammertone．

    ## SPCCLAL SHEET METAL PABRICATION

    Now, Bud Radio, through its Metal Products Division, offers greatly increased facilities for the production of special sheet metal items. New machinery has been added, departments have been modernized and streamlined, and new methods have been developed.

    We make over four hundred different sheet metal products as stock items, which are illustrated elsewhere in this catalog. Often a slight change in one of our standard items will eliminate the necessity of special tools and dies, thereby reducing costs greatly. Since we produce thousands of sheet metal products. every month, for ourselves and for leading firms throughout the country, we are able to
    effect economies in production which mean lower prices and faster delivery.

    Our expanded facilities, expert workmanship, years of experience and manufacturing "know how" assure high quality products. In addition, our Engineering Staff is always available for consultation and advice. We suggest that you send us your blueprints for estimate.

    Whether the quantity be one, ten, one hundred, one thousand or many thousands, we are interested in the opportunity to be of service to you.

    Illustrated on this page are a few examples of specially fabricated sheet metal products.
    

    Only a few of many HD Produrtm are ahown. Werite for romplete catalog.

    ## TYPE "C" DELUXE CABINET RACKS <br> FOR 19" WIDE PANELS-18" and 24" DEEP

    #### Abstract

    Since 1927, PAR-METAL has been a pioneer in the design and creation of superior metal equipment for the radio and communications industries. This experience in combination with skilled craftsmen and high quality material, has made PAR-METAL PRODUCTS the standard of the industry.

    The beauty of these new enclosed type racks should prove a welcome addition to our line. It will appeal to those who wish to combine the rugged construction of our standard Type "C" racks with modern styling and improved design.

    The vertical trims which conceal the panel mounting screws are fastened by means of two "Cowl type" fasteners on each side, which permits the trims to be removed quickly and easily by a half-turn on the screw heads.

    The design of the vertical posts permits these racks to be installed in rows or "gangs," without the use of front joining strips between the racks. This provides a greater flexibility in their installation, particularly in broadcast stations.

    ## SPECIFICATIONS FOR THESE DELUXE TYPE RACKS

    CABINET: Entire cabinet is welded togetler into one integral unit. Body of cabinet is made from h" thick cold rolled sheet steel; top of cabinet is made from $5 / 64^{\prime \prime}$ thick steel; bottom is made from $7 / 64^{\prime \prime}$ thick steel.

    PANEL MOUNTING: Angle irons are $\frac{3}{10}$ " thick structural steel, holes are accurately drilled and tapped $12 / 24$ thread on standard $11 / 4$ " $1 / 2^{\prime \prime}$ spacings.

    DOOR: Doors are of a new type with vastly improved construction features. They are stamped from one piece of steel into a rigid unit. Door edges are folded to provide a snooth double thick edge. There are no "patch" type braces, etc., used for reinforcement.

    HARDWARE: Doors are equipped with die-cast "automobile" type sturdy handles, Hinges are of the "slip-joint" type so that doors may be easily removed. Screws for mounting panels are supplied. Front of rack is trimmed with chrome plated trinis at top and bottom.

    OUTLETS: A duplex receptacle and outlet box are provided in the back under the door. A rectangular opening is provided in the bottom for conduits, leads, etc.

    VERTICAL SIDE SUPPORTS: Vertical Side Supports (as show'n on Page $\mathrm{J}-93$ ), are available to fit all the racks listed on this page.

    CORNER TRIMS: All racks have quick detachable corner trims. which are fastened to the rack by means of two "Cowl Type" fasteners on each trim.

    PANELS: Panels $19^{\prime \prime}$ wide to fit these racks are described on Pages J-98 and J-99.

    FINISH: Black ripple with corner trims finished in dull black; or slate grey ripple with corner trims finished in slate grey are standard. Prime coat only is optional in place of ripple enamel finish at no extra charge, if so specified in your order.
    Aluminum grey lacquer is available at an additional charge. The letter "P" before Catalog No. indicates black ripple enamel; the letter "PG" before Catalog No. indicates slate grey ripple enamel.
    RACK SHELVES: Shelf $12-2218$ fits the $181 / 2^{\prime \prime}$ deep racks; and Shelf R-2924 fits the $24^{\prime \prime}$ deep racks. See Page J-97.
    ROLLER TRUCKS: Truck RT-41S fits the $181 / 2^{\prime \prime}$ deep raclis;

    ## TYPE＂C＂STANDARD CABINET RACKS

    ## FOR 19＂and 30＂WIDE PANELS

    These racks have been a standard unit in the electronic industry for many years，and have been adapted to a broad field of requirements．The construction is essentially the same as our DeLuxe Racks on Page J－90，and similar speci－ fications would apply as to CABINET，PANEL MOUNTING， DOOR，HARDWARE and OUTLET．

    Models G－2218，G－2219 and G－3024 have ad ditional reinforcement at the rear corners and are suitable for transmitter equipment The louvres on the rear door are covered with mesh screening in the inside，and addi． tional knockouts are provided for conduit and $4^{\prime \prime}$ square duct
    

    No．P． 6625

    CORNER TRIMS：All racks have quick，detachable，new colner trims，which are fastened to front of rack with two finger type＂captive screws．＂This permits quick．simple removal without the use of screw－drivers．etc

    TO SET UP IN GANGS OR ROWS：The racks may be joined together by means of a flat trim fastened to the front of the adjacent support angles，overlapping both racks Knockout holes $11 / s^{\prime \prime}$ in diameter are provided at the sides of the racks to permit connections between them．

    Racks are regularly shipped with corner trim as illustrated： where specified，the front joining trim is furnished without additional charge in place of the corner trim

    SIDE LOUVRES：Racks are available with louvres at sides if so ordered at no extra charge．（This is not suitable for ＂gang＂installations．）

    MODIFIED RACKS：Depth may be increased up to $2 S^{\prime \prime}$ to your specifications．Grille openings in top for additional ventilation are also available．Special openings in doors can also be provided

    FINISH：Black ripple with corner trims finished in dull black：or slate grey ripple with corner trims finished in slate grey are standard．Prime coat only is optional in place of ripple enamel finish at no extra charge if so sueci－ fied in your order．Almminum grey lacquer is available at an additional charge．The letter．＂P＂before Catalogr No． indicates black ripple enamel；the letter＂PG＂before Cata－ log No．indicates slate srey ripple enamel

    ## TYPE "C" UNIVERSAL CABINET RACKS

    THESE UNIVERSAL CABINET RACKS are similar in construction to our" standard Type "C" cabinet racks on Page J-88, except that the design has been modified to facilitate the location and mounting of cliassis supports, shelves, sliding shelves, and standard sliding devices. In addition, all racks, with and without front doors, have adjustable panel nounting angles, which may be positioned on the sides of the racks at any location from front to back.

    For the first time, we offer a complete line of cabinet racks, similar in design, with or without front doors, with open or closed sides, which can be used singly or grouped together in continuous rows. Where racks on Page J-91 of the same height are used, they may be set up and intermixed for $19^{\prime \prime}$ and $24^{\prime \prime}$ panels, with rear doors only, or with front and rear doors; the racks are available for $19^{\prime \prime}$ wide panels, in $18^{\prime \prime}$ and $24^{\prime \prime}$ depths, and for $24^{\prime \prime}$ wide panels in $24^{\prime \prime}$ depth. The same group arrangement can be made with racks on Page J-92.

    All racks with rear doors only are equipped with regular vertical trim strips to cover the panel monnting screws. However, whare slinling drawers and custom assembled sliding ehassis are used, these stambare trime will interfore with the operation of such drawers. To owneoms this lifticults, optional "Narrow-type' vertieal trims (same as racks with from dongs) are availalile which promit fre oporation of slititur
    
     of the rack proper are fall cabinet dexian, so that the edres of panels art reressed with trims removed.
    
    
     (1) in rows: the sidn jabls are purchasad separately for groupinar as rembired
    
    
    
    
     desmilend of that patar.

    The adsantares of "UNIVERSAL" type racks may the summarizal as follows:
    

    1. I complote line of racks to provide unit row type assembly, or for use as single racks.
    2. Nasks with ar without front doors, for either $19^{\prime \prime}$ or $24^{\prime \prime}$ widu panels may be used singly, or in rows, intermixed als rerfuiret.
    3. The panel monting angles on ALI, rueks are fully adjustable, and may les set at any position from front to hate.
    4. Virtiaral sille sulquits (see Paye J.93) for attachinur chassis hrackets, shelves, slides, ete., may be installed without arilling or titting.
    5. Kithur rewular or "Narrow Type" vertical comer trims are arailahle without arditional cost.
    6. I simplifiod methord is provided for installing stamdard or rustom-husitt slides.
    7. Available finishes are black or grey ripple enamel, primer coat only, grey hammertone or aluminum grey lacquer.

    ## SPEC\|FICATIONS FOR ALL UNIVERSAL TYPE RACKS ON PAGES J-91 AND J-92:

    

    CABINET: Entire cabinet is welded together into one integral unit. loody of cabinet is made from $1 / 16^{\prime \prime}$ thick cold rolled sheet steel; top of cabinet is made from $5 / 64^{\prime \prime}$ thick steel; bottom of cabinet is made from $7 / 64^{\prime \prime}$ thick steel.
    PANEL MOUNTING: Angle irons are $3 / 16^{\prime \prime}$ thick structural steel, holes are accurately drilled and tapped $12 / 24$ thread on standard $11 / 4^{\prime \prime}-1 / 2^{\prime \prime}$ spacings.
    DOOR: Doors are of a new type with vastly improved construction features. They are stamped from one piece of steel into a rigid unit. Door edges are folded to provide a smooth double thick edge. There are no "patch" type braces. etc. used for reinforcement.
    "FULL VENTILATING" type louvres provide adequate ventilation in the rear doors.
    HARDWARE: Doors are equipped with die-cast "automobile" type sturdy handles. llinges are of the "slip-joint" type so that doors may be easily removed. Screws for mounting panels are supplied. Front of rack is trimmed with chrome plated trims at top and bottom.

    OUTLETS: A duplex receptacle and outlet box are provided in the back under the door. A rectangular opening is provided in the bottom for conduits, leads. etc.
    

    MODIFICATIONS: Modified doors are available with louvres at Top OR Bottom only as required. Detachable side panels (listed on Page J-92) may be ordered with louvres to your specifications. Tops of cabinets can be supplied with round or rectangular onenings, with or without grilles or baffles.

    # UNIVERSAL CABINET RACK FITTINGS 

    ## VERTICAL SIDE SUPPORTS

    

    These vertical side supports are supplied in sets of four uprights to fit type＂PX，＂ ＂PR，＂＂FX＂and＂FR＂racks listed on Pages J．91 and J－92． （Cut shows side mounting brackets in place which are sold separately－see listing below）．Uprights are fastened to grooved bolt retainers which hold panel monnting angles in place．and are ad． justably mounted from fromt to back of rack．Holes are drilled and tapped vertically on＂universal centers＂to pro－ vide adequate vertical adjusi－ ment for mounting brackets． shelves．and varions sliding devices made for electronic－ equipment．
    When installed in racks for $19^{\prime \prime}$ wide panels，the clearance between uprights（from right to left）is $17 \frac{3}{4}$＂．［iprights are $25 /{ }^{\prime \prime}$ wide and $11 /$＂$^{\prime \prime}$ deep．
    Uprights are made from $1 / \mathrm{s}^{\prime \prime}$ steel．finished in aluminum enamel．Each set is supplied with necessary bolts for rack mountins．

    SLIDING SHELF UNITS
    

    Basic Slide Assembly SD－1916

    The basic assembly illustrated is sold as a complete unit． （hassis may be bolted directly to the sliding shelf；panels may be attached to the shelf using standard chassis brackets listed on Page J－101；flat steel or formed panels． $7^{\prime \prime}$ or larger， are suitable．
    The forward movement of shelves for $18^{\prime \prime}$ deep racks is $1: 1 / 4 "$ ；for $24^{\prime \prime}$ deep racks，it is $17 \frac{1}{4} 4^{\prime \prime}$ ．The shelf may be fuickly removed from the slide while it is in an extended position．
    The illustration shows a sliding shelf unit with the slide carrier in a vertical position．This type afforms the maxi－ mumi load capacity，but reduces the usable shelf space to 15 多＂wide．The shelf height is only $1^{\prime \prime}$ ．
    We also list shelves with slide carriers mounted horizontally under the shelf．This method permits the use of $17^{\prime \prime}$ wide chassis．but reduces the load capacity．The shelf height is increased to $13 / 4^{\prime \prime}$ ．All parts on hoth types are zinc plated．

    ## DELUXETYPE-FOR 19 " WIDE PANELS

    ## WITH REAR DOOR ONLY

    

    No. ER-225
    SERIES ER-225 RACKS: These units may be ganged in double or "muiti-rack" mits. When so ordered, racks are supplied with common intermediate sides which are joined to adjacent tops and bottoms. Solid intermediate sides are supplied unless otherwise specified. In multiple units, center joining trims are supplied.

    THESE DELUXE TYPE "A" RACKS are fully in keeping with modern streamlined styling. Vertical corner mouldings cover the panel mounting screws, similar to our Type "C" racks. Panels fit into a recess, so that the edges of panels are not exposed when corner mouldings are removed. Trimmed at top and bottom with chrome finished trims.

    CABINET: Entire cabinet is constructed of $1 / 16^{\prime \prime}$ thick cold-rolled steel. These racks are shipped "knocked-down" with necessary bolts for easy assembly.
    PANEL MOUNTING: Angle irons are of $7 / 64^{\prime \prime}$ thick steel, holes are accurately drilled and tapped 10-32 thread on universal centers for all types of panels.

    CORNER TRIMS: All racks have quick detachable, new corner trims which are fastened to front with two studs. This provides for rapid, finger-tip removal without the use of screwdrivers, etc.

    HARDWARE: Doors are of new design same as our Type "C" commercial racks. No. ER-223 is equipped with a "push-button" type concealed snap catch. The two larger models liave "automobile" type handles. Hinges are the "slip-joint" type so that doors may be easily removel. Front of rack is trimmed with chrome finished mouldings. Screws for mounting panels are supplied.

    FINISH: Slate grey ripple finish is standard. Black ripple enamel finish will be supplied without extra charge if so specified on your order.

    PANELS: Panels $19^{\prime \prime}$ wide to fit these racks are listed on Pages $\mathrm{J}-98$ and $\mathrm{J}-99$.

    ## WITH FRONT AND REAR DOORS

    

    No. FD- 225

    SERIES FD-225 RACKS: This series with front and rear doors have adjustable panel mounting angles. which may be located at any distance from front to rear of rack. VERTICAL SIDE SUPPORTS listed on Page $J-93$ will fit into these racks; all items listed on Page J-93 may he installed in these racks.

    ROLLER TRUCK: Roller truck No. RT-412 for Series ER-225 rarks: use RT-418 for Series FD-225; both are listed on Page J-97.

    SHELVES: For Series ER-225 Racks, use shelf No. ER-2212 listed on Page J-97. To install shelves in Series FD-225, it is recommended that Vertical Side Supports, brackets and shelves listed on Page J-93 be used.

    ## TYPE "A" ENCLOSED RELAY RACKS

    ## ROUNDED CORNER TYPE - FOR 19" WIDE PANELS

    ## WHTH FROINT AND REAR DOORS

    

    THESE RACKS ARE SIMILAR in construction to our Series ER-225 Racks. They provide a combination of standard functional design and superior construction at a modest price. The vertical front corners are nicely rounded, and the top and bottom are trimned with red-striped chrome finished mouldings. The panels fit into a recess. so that the edges are not exposed.

    CABINET: Entire cabinet is constructed ot $1 / 16^{\prime \prime}$ thick cold-rolled steel. These racks are shipped "knocked•down" with necessary bolts for easy assembly. Screws for mounting panels are supplied.

    PANEL MOUNTING: Angle irons are 7/64" thick steel, holes are accurately drilled and tapped $10-32$ thread on universal centers for all types of panels.

    HARDWARE: Door's are of new design same as our Type "C" commercial racks. No. ER-213 is equipped with a "push-button" type concealed snap catch. The two larger models have "automobile" type handles. Hinges are the "slip-joint" type so that doors may be easily removed.

    FRONT DOOR RACKS: On Series FD-215 racks, the front panel mounting angles are recessed $2^{\prime \prime}$ deep to allow clearance for dials, etc. The clear inside depth behind the panel is $131 / 2^{\prime \prime}$. The handle on front

    ## TYPE＂A＂CHANNEL RELAY RACKS

    ## FOR 19＂WIDE PANELS

    DELUXE TYPE

    No．RR－197
    

    OUR NEW DELUXE CHANNEL TYPE RELAY RACK extends the utility and applicability of the standard channel relay rack．

    The panel space has been changed to $7 \mathrm{~T}^{\prime \prime} \mathrm{x} 19 \mathrm{l}$＂，to match a standard height used on enclosed cabinet racks．
    The upright channels have been modified to an $8^{\prime \prime}$ over－ all depth．which when combined with a formed recess for the panels．greatly increases the rigidity of the rarck． The edges of the panels are not exposed．

    The rack is drilled and tapped for 110 －i2 screws at both front and back permitting the optional use of either panels，or dish type chassis mounted to the racks at both front and back．The full panel space of $77^{\prime \prime} \times 19^{\prime \prime}$ is available on the back．the same as the front．

    The clear distance between panel mounting flanges （from front to back）is $63 /{ }^{\prime \prime}$ ．It is practicable to use this $6^{\prime \prime}$ depth as an enclosure for dish type chassis listed on Page J－101．When such chassis are mounted at the hack，the addition of standard or hinged type panels （see Page J．99）will make a rack enclosure with a clear depth of $63 / 4$＂．The top cross－brace is provided with a grille for rentilation where needed．

    The top brace and the vertical channel members are securely welded together．The base and rear braces are shipped knocked down．with all necessary bolts for assembly．Panel mounting screws are also supplied．

    CATALOG No．RR－197：

    ## TYPE "C" RACK PANELS - 19" WIDE

    Unless otherwise indicated, these panels are made from $1 / 8^{\prime \prime}$ thick steel and are uniformly slotted to fit type "C" cabinet racks and all type "A" racks. They will also fit any other rack equipment having multiple $11 / 4^{\prime \prime}$ - $1 / 2^{\prime \prime}$ spacings or what is commonly termed as
    "W.E. spacing." They may be obtained in either black ripple enamel or slate grey ripple enamel. Panels can be furnished in aluminum grey lacquer or grey hammertone enamel at extra charge.

    GRILLE PANELS
    19" WIDE - $1 / \mathrm{s}^{\prime \prime}$ STEEL
    

    This modern type ventilat ing grille panel is stamped into the panel itself: it is not a pieced assembly.

    ## RECESSED METER PANELS 1/8" STEEL

    These panels are made so that the meters may be recessed from the
     front of the panel. Meters are protected by a plate glass insert, allowing $3 / 4$ " clearance in back of panel. A blank bakelite sub)panel is provided. The clear sub-panel space is $41 / 8 " x$ $15^{\prime \prime}$ on the $19^{\prime \prime}$ wide panel which is sufficient for $4-3^{\prime \prime}$ meters. On the $24^{\prime \prime}$ and $30^{\prime \prime}$ wide panel the clear subpanel space is $53 / 4 " \times 20^{\prime \prime}$ and $53 / 4 \times 26^{\prime \prime}$ respectively.

    ## STANDARD DESK PANELS

    These standard tables are rigidly made of $1 / 16^{\prime \prime}$ thick furniture steel. The rounded front corners are of seamless
     construction and the flanges of the shelf are folded in to movide smooth edges underneath. They are securely mounted to regular $1 / 8^{\prime \prime}$ steel panels, size $101 / 2^{\prime \prime} \times 19^{\prime \prime}$. They may be obtained in two sizes and finishes as listed below. The tables are $22^{\prime \prime}$ wide to give full working space across the front of the racks when mounted in place. Shipping weight is 25 lbs.

    | Cat. No. | Width | Depth | Finish | Net Price |
    | :--- | :---: | :---: | :--- | ---: |

    SINGLE UNIT ASSEMBLY
    

    The above illustrates how brackets are mounted. They are used for mounting chassis, standard shelves, or drawers. With all sides open, easy access saves considerable time in assembly.

    The combination of a control cabinet mounted on a table, desk or similar support has been in general use in the electronics industry for some time. Due to the various functions for which it may be employed, such equipment has assumed various forms, arrangements and sizes, requiring costly, custom-built construction to achieve their purpose.

    While it is obvious that no particular fixed design can serve every demand, we have devised a group of standardized units, the combination of which is readily adaptable for control stations, testing apparatus, sound distribution systems, and similar applications.

    The sizes and specifications of the various units are catalogued on the following page. There are several features which warrant your consideration, particularly the pedestal. Note that all doors of the pedestal are easily removable, allowing complete access to the interior from all sides. (See illustration at left.) Each side of the four supporting posts has also been drilled and tapped on "universal" centers, making it possible to mount standard rack panels or doors on any or all sides, at your preference. Each door is equipped with a "push-button" spring catch, plus a lock with interchangeable keys. The use of the lock is optional.

    Another time-saving aid is the method of supporting apparatus in the interior of the pedestal. Universal brackets are easily attached to any of the four sides by utilizing the tapped panel mounting holes. The brackets are slotted, so that almost continual vertical adjustment may be made. They may be used to support regular $17^{\prime \prime}$ wide chassis, or standard shelves. The shelves are suitable for mount ing amplifiers, power supplies, record changers, etc.

    All table-tops have screw type studs, which are inserted in matching holes already drilled in the pedestals. The desk cabinets have necessary mounting holes, but they have been omitted from the table top to permit a flexible assembly of similar cabinets, or other equipment.

    SPECIFICATIONS: The Desk Panel Cabinets, Table Tops and Pedestals are constructed of $1 / 16^{\prime \prime}$ thick furniture steel. Tliey are rigidly braced and reinforced wherever necessary, and substantially welded into integral units. No holes have been drilled in the table tops for desk cabinets, to permit cabinets to be located wherever desired.

    FINISH: Unless atherwise specified, the sfandard finish far all ifems an Pages J-102 and $\mathrm{J}-103$ is medium grey enamel. Black wrinkle, slafe grey wrinkle, grey hammerfone, or prime coat only is available af same price. Samples of above finishes will be mailed upon reques $f$.
    

    DOUBLE UNIT ASSEMBLY
    

    TRIPLE UNIT ASSEMBLY

    ## UTILITY DESK ASSEMIBLIES

    ## desk panel cabinets

    

    These cabinets are available in single, double and triple units, as listed below. Double and triple units are sllown 011 opposite page.
    D O O R S : Hinged door at back is remorable; ade. quately louvered for ventilation. Equipped with combined "push-button" catch and lock. Individual doors on each section of multiple unit cabinets.
    PARTITION: Solid partition between each section in multiple units, with wiring access holes.
    PANELS: Any panel up to $7 / 16^{\prime \prime}$ thick may be used. Upper panel is $121 / 4^{\prime \prime} \times 19^{\prime \prime}$, lower panel is $31 / 2^{\prime \prime} \times 19^{\prime \prime}$. Upper panel is mounted at $30^{\circ}$ angle. (See Page J-9s for panels.)
    MOUNTING HOLES: Drilled in bottom. Also two "knockout" holes $11 / 8^{"}$ diameter near back.

    | Cat. No. | Description | Length | Height | Depth | Net Price |

    | CC-103 | Triple ['nit | $621 /{ }^{\prime \prime}$ | 1814" | $10^{\prime \prime}$ | 90.00 |

    ## TABLE TOPS

    

    TABLE TOPS are made in three lengths, for use with single. double or triple unit assemblies. They are constructed from $1 / 16^{\prime \prime}$ furniture steel, braced on underside; all edges flanged underneath to provide smooth surface. Screw studs are inserted to match holes in pedestals. No holes are drilled in top for desk cabinets, so that cabinets may be located wherever desired.

    \section*{"Footrol" FOQT SWITCHES by GENERAL CONTROL COMPANY}

    TYPE MA A new light weight foot switch with an actuating treadle built into its top to permit operation with unusu-long-life SPDT "du oop" Limit Switch forms the internal switch action. Especially recommended for fast operation where minimum fatigue is important. Access to the internal "du-op" switch terminals is greatly facilitated by simply removing the front end of the casting.
    

    TYPE MC Especially adapted for unusual applications and hard use. Easily operated for foot, knee, hand, or elbow. Non-slip-tread top nay be operated at any point of its surface.
    TYPE MI An ideal treadletype foot switch, especially convenient for many applications. Inclined, non-slip tread has an adjustable throw and includes a heel rest. Two operating presures: 5 lbs , and 10 lbs . Mounting ears are provided on each side. A BX connector is mounted in the base, and terminal access is by a removable base plate
    

    TYPE MB Heavyduty switch, especially designed for industrial and machine tool applications where thoroughly safe, rugged, and dependable operation is required. Boot top prevents false operation.

    \section*{FOTROL}

    Since 1934, General Control Company has been a foremost manufacturer of Foot Switches. These are products of the highest quality; built for rug. ged industrial applications. The great number of GENERAL CONTROL foot switches now in everyday use throughout the world provides substantial evidence of their acceptance for all types of applications.

    TRUEI - more ADC Plugs and Jacks in broadeast use today than those of any other manufacturer.

    \section*{JACK S}

    Nickel silver springs. Silver alloy contacts. Tinned connecting lugs. Die formed, nickel plated frames.
    Standard dimensions, interchangeable with any telephone type jack using a \(1 / 4\)-inch plug.
    Spring arrangements available as follows:
    
    \begin{tabular}{|c|c|c|}
    \hline TYPE & FIG & LIST \\
    \hline PJ 116 & 1 & \(\$ 1.70\) \\
    PJ 318 & 2 & 1.27 \\
    PJ 125 & 3 & 1.70 \\
    PJ 123 & 4 & 1.16 \\
    PJ 117 & 6 & 1.60 \\
    PJ 203 & 7 & 1.38 \\
    PJ 115 & 8 & 1.48 \\
    PJ 638 & 9 & 1.70 \\
    PJ 339 & 9 & 1.92 \\
    \hline
    \end{tabular}

    For use with plugs PJ. 5 PL- 55 WE. 47 except PJ 339. use with WE-291.

    \section*{JACK PANELS}

    Constructed of solid bakelite, reinforced with steel.
    Slotted mounting brackets for use in 19" relay racks.
    Spacing prevents cross connection of adjacent circuits with double plug.
    Designation strip included on ai. panels. Single panel holds 24 jacks, requires \(13 / 4^{\prime \prime}\) panel space.
    Double panel holds 48 jacks, requires 21/8" panel space.
    \begin{tabular}{|l|l|c|}
    \hline TYPE & \multicolumn{1}{|c|}{ DESCRIPTION } & LIST \\
    \hline PJ 31 & Double, less Jocks & \(\$ 15.75\) \\
    PJ 33 & Single, less Jocks & 14.20 \\
    PJ 341 & Double, with 48 PJ 318 Jocks & 75.00 \\
    PJ 343 & Single, with 24 PJ 318 Jocks & 44.10 \\
    \hline
    \end{tabular}

    \section*{PLUGS}

    Interchangeoble with standord plugs as shown.
    Designed for easy assembly and card replocement.
    Insulated for 500 V. RMS. breakdown.
    
    \begin{tabular}{|c|c|c|c|}
    \hline TYPE & EQUIVALENT & NO. COND. (Ea. Plug) & LIST \\
    \hline PJ-1 & WE 241 & 3 & \(\$ 4.60\) \\
    PJ-5 & PL55, WE47 & 2 & 1.30 \\
    \hline
    \end{tabular}

    In addition to the plugs, jacks, and jack panels illustrated above - ADC manufactures a custom line of iron core components, such as transformers, filters, reactors and chokes, designed and built in production quantities to your specifications. For complete information address your inquiry to:

    \section*{PATCHCORDS}

    Best quolity tinned copper 2 conductor stronded wire. Heavy broided caver, with 6 " reinforcement of each end. Shield normolly grounded both ends.

    \section*{POWER TAP SWITCHES NON-SHORTING TYPE}
    

    Each switch is a non-shorting, single pole, rotary, multiposition unit. but switches can be ordered assembled 2 or 3 in tandem ( 2 maximum, 5 taps, for Model 111) to form multipole assemblies. All ceramic insulation, large, solid silver-to-silver contacts, and "slow-break" action especially designed for alternating current use establish new standards of dependability and performance. Switch shafts are electrically "dead"-insulated by strong ceramic hubs. Contacts and mechanism are entirely enclosed and protected (except for the Model 111).

    \section*{MODEL 111 TAP SWITCH}

    Alternating Current Rating 10 Amps. 150 Volts —Diameter \(13 / 4{ }^{\prime \prime}\) - Shaft Diameter \(1 / 4 "\) - Standard Mounting: For \(1 / 4^{\prime \prime \prime}\) panel maximum, by means of \(3 / 8^{\prime \prime}-32\) threaded bushing and hex. nut.

    \section*{TECHNICAL CHARACTERISTICS}

    > STANDARD

    CIRCUITS: SPST only-Normally open or normally closed.
    HEATER WATTAGE: 2 W prox.-Heaters can be operated continuously. STANDARD CONTACT RATING: \(115 \mathrm{~V} .-3 A\) A.C. (or 220V-0.5A A.C.)

    Maximum voltage between contacts ard heater-1500V. D.C. MINIATURE CONTACT RATING: 115V-2A A.C., other specifications same as spandard
    AMBIENT TEMPERATURES: Relays are compensated for temperafures of \(-55^{\circ}\) to \(+70^{\circ} \mathrm{C}\). Tolerances given are for \(20^{\circ} \mathrm{C}\).
    LIFE: With \(115 \mathrm{~V}-I A \mathrm{~A} . \mathrm{C}\)., non-induetive, at least 500,000 operations.

    EXCLUSIVEFEATURES
    - Actuated by a heater.
    - Operates on A.C., D.C., or Pulsating Current.
    - Hermetically sealed, Amperite Relays are not affected by altitude, moisture or other atmospheric conditions.
    - Compact, lightweight and inexpensive.

    ADVANCE RELAYS
    }
    

    POWER CONTROL TYPE

    PG SERIES
    (Formerly Series 9000/9100)
    

    Size: H—| \(1 / \mathrm{B}^{\prime \prime}\); W-I \(1 / 2^{\prime \prime}\) : L-I5/8'

    Campact, uniquely-designed general-purpase dauble-pale re lays. High magnetic strength, excellent wiping actian and shart blade structure. The many uses are extended by the small size - allawing practical hermetic sealing in a small enclasure. Vibration and shack are withstaad easily by these relays due to the special armature and frame design. PG types can be built to meet Army-Navy specificatians.

    List Prices:
    \begin{tabular}{llllr} 
    for 24 & V.D.C. & DPDT - order: & PG/2C/24VD & 58.47 \\
    for 6 V.A.C. & DPDT - order: & PG/2C/6VA & 8.47 \\
    for 115 V.A.C. & DPDT - order: & PG/2C/115VA & 9.47 \\
    Max. coil voltage obtainable: 440 & V.A.C. and 230 & V.D.C. & \\
    Confact ratings: 15 amperes @ 115 V.A.C. or 26.5 V.D.C. & (Resistive) \\
    Max. operating power: 4.0 watts & A.C. 2.0 watts & D.C.
    \end{tabular} Max, operating power: 4.0 watts A.C., 2.0 watts D.C.

    \section*{VERY SENSITIVE} TYPE

    SV SERIES
    (Formerly Series 1200)
    

    Size: \(H-1 / 1 / 2^{\prime \prime} ; W-2^{\prime \prime} ; L-20_{0}^{\prime \prime}\)

    SV Series D.C. relays are incomparable for use in any circuit restricted ta a few thausandths of a watt pawer consumptian. Excellent operatian in any pasition, even under extreme vibration and shock. Transparent, malded plastic cavers. Sturdy molded bakelite bases have bath screw and salder terminal connectors, and are easy to maunt. Adjustments are easily made .fith the vernier screws which vary relay sensitivity fram the 5 nilliwott factory setting.
    List Prices:
    for 2200 ohms SPDT - order: SV/IC/22000 .... 510.97
    for 8700 ohms SPDT - order: SV/IC/8700D 11.98
    for 14000 ohms SPDT - order: SV/IC/140000 12.64
    for 20000 ohms SPDT - order: SV/IC/20000D 14.56
    for 40000 ohms SPDT - order: SV/IC/40000 21.63
    Contact rating: 2 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive) Contact combination: SPDT only. Max. coil resistance: 40,000 ohms.

    \section*{MIDGET ANTENNA} TYPE

    AM SERIES
    (Formerly Series K(504RF/K1604RF)
    
    

    Space-saving "transmit-receive" antenna relays, ideally suited for hundreds of law-pawer RF applicatians. Efficient, yet inexpensive, these midget antenno units fill the need for 300 -ahm circuit switching in mabile, marine, aircraft, felevision, cammunicatian and fixed-station service. Silicone glass insulation for low RF loss. Canically-shaped silver cantacts assure low resistance paths for either "receive" or "transmit" positions. Beryllium-copper hinge holds armature firmly in place for smooth operatian.
    List Prices:
    far 115 V.A.C. DPDT - order: AM/2C/115VA \(\$ 5.45\) for 6 V.A.C. DPDT - order: AM/2C/6VA 5.45 for 6 V.D.C. DPDF - order: AM/2C/6VD 5.45 Max. coil voltage obtainable: 220 V.A.C. and 120 V.D.C
    Contact rating: 2 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive) Contact combinations: DPDT only. Max. operating power: 3.0 watts A.C., 1.5 walts D.C.
    F.O.B. Burbank, or Chicago warehouse for stock items. Prices for relays with over standard range coils will be supplied upon reaues:
    ananace ADVANCE RELAYS

    NGEREAYS

    \section*{SMALL ANTENNA TYPE}

    \section*{AH SERIES}
    (Formerly Sefies 1000/2000)
    

    A changeover relay designed specifically for RF use in fixedstatian operation - aircraft, marine, mabile and portable radio communications equipment. The small size of this relay makes it ideal for use in compact sets where the load does not exceed \(1 / 2 \mathrm{KW}\). For reliable transfer of antenno power, cantacts are one-quarter inch fine silver. Units are fast and positive in action, and will operate in any position.

    List Prices:
    \begin{tabular}{llll} 
    for 115 & V.A.C. & DPDT - order: & \(A H / 2 C / I I 5 V A\) \\
    for & 6 V.A.C. & DPDT - order: & \(A H / 2 C / 6 V A\) \\
    for & 6 V.D.C. & DPDT - order: & \(A H / 2 C / 6 V D\)
    \end{tabular}

    Max. coil voltage obtainable: 440 V.A.C. and 230 V.D.C.
    Contact rating: 10 amperes @ Its V.A.C. or 26.5 V.D.C. (Resistive) Max. operating power: 4.0 watts A.C.; 2.0 watts D.C.

    \section*{MIDGET TYPE}

    \section*{MF SERIES}
    (Formerly Series K(500A/K1600A)
    

    These ADVANCE design originals are general-purpose relays engineered for high efficiency ond low price. The small size of these midgets invites their installation in many cramped locafions. For 2 -ampere contact ratings, specify the MG Series. For 5 -ampere contacts order the MF Series. These relays offer beryllium copper armature hinges for perfect alignment - wiping action for positive contact - operation in any position - a combinatión assuring long, trouble-free life.

    \section*{List Prices:}
    

    \section*{POWER CONTROL} TYPE

    PC SERIES
    (Formerly Series
    9508, 960B, 9708 \& 98008)
    

    Size: \(\mathrm{H}-1{ }^{\circ}{ }^{\prime \prime}{ }^{\prime \prime}\) : \(W-15 / 0^{\prime \prime} ; L-25 / /^{\prime \prime}\)

    These small-size, low-wallage power-cantrol relays are available up to 4PDT. They are fully dependable units for operation on either AC ar DC - as you specify. Thausands of applications for these relays. Adequate armature overtravel provides good wiping action, thus keeping the large confoct surfaces clean. Standard-voltage units are obtainable quickly and af low cost.

    List Prices:
    

    Max. coil voltages obtainable: 440 V.A.C. and 230 V.D.C.
    Contact rating: 15 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive)

    \section*{"TINY MITE'" MINIATURE TYPE}

    MM SERIES
    (Formerly Series 000)
    

    Ulifa-small and feather-light ADVANCE "Tiny Mife" D.C. relay: require less than \(1 / 2\) cubic inch mounting space! Peanut-sized, hermetically-sealed enclosures are avoiloble to further expand the uses of these soundly-engineered units. All switching is enlirely above ground. Insulation is silicone glass. Single 2-56 screw mounting. Beryllium copper ormature hinge assures stoble performance under vibration and shock. Platinum-silver alloy contacts.

    List Prices:
    for 6 V.D.C. SPDT - order: MM/IC/6VD \(\$ 3.52\)
    for 24 V.D.C. DPDT - order: \(\mathrm{MM} / 2 \mathrm{C} / 24 \mathrm{VD}\) - 4.24
    for 2000 ohms DPDT - order: \(\mathrm{MM} / 2 \mathrm{C} / 2000 \mathrm{D}+\quad \mathbf{5 . 2 0}\)
    for 3000 ohms DPDT - order: \(M M / 2 C / 3000 \mathrm{D}\)
    for 5000 ohms DPDT - order: \(M M / 2 C / 5000 \mathrm{D}\)
    Max. coil resistance obtainable: 10,000 ohms. Weight: 10 grams.
    Contact rating: \(1 / 2\) ampere. Operating power: 0.7 watt.
    F.O.B. Burbank, or Chicago warehouse for stock items. Prices for relays with over standard range colls will be supplied upon request.

    \title{
    POTTER \& BRUMFIELD • PRINCETON, INDIANA STANDARD RELAYS
    }

    NOTE: Relays shown in this bulletin are standard relays in stock and ready for immediate shipment. From them a type can be chosen to meet the needs of most Electrical or Electronic applications.
    All relay contacts are rated at 115 volt-60 cycle, non inductive load.
    When ordering specify relay type and coil voltage or resistance.
    Example: PR1A, 115 Volts AC, 60 cycles or LB5 \(\mathbf{- 2 5 0 0}\) ohms resistance.
    To operate 110 V DC relays on 220 V DC put a 5 watt wire-wound resistor of a value approximately the relay coil resistance in series with the relay coil.
    CONTACT LEGEND: S-Single; D-Double; P-Pole; T-Throw; N-Normally; O-Open; C-Closed; B-Break; M-Make.

    \section*{KRP Series - ENCLOSED VOLTAGE ACTUATED RELAYS}

    The KRP relay is enclosed in a clear polystyrene, dust and weatherproof cover supplied with a standard octal plug. Contacts rated 5 amperes.
    KRP 11
    Dimensions: \(1^{13} / 32^{\prime \prime} \times 1^{13} / 32^{\prime \prime} \times 2^{\prime \prime}\) high (above socket).
    \begin{tabular}{|c|c|c|c|c|c|}

    \section*{GA Series-MULTIPLE leaf relays}

    Multiple leaf, all purpose relays permitting a wide range of contact combinations for many applications. Contacts rated 8 amperes.

    Dimensions: Max. \(1^{\prime \prime} \times 1^{11 / 16^{\prime \prime} \times}\) \(1^{25} / 32^{\prime \prime}\) high. Mounting: Std. \#8-32 tapped core with locating half punch.

    MH Series-MINIATURE TELEPHONE RELAYS
    

    MH 17
    Open Dimensions: \(176^{\prime \prime} \times 25 / 32^{\prime \prime} \times 13^{\prime \prime} \mathrm{g}^{\prime \prime}\) high.

    Extremely versatile, either voltage or current actuated. Fits hundreds of electrical or electronic circuits. 4 Form C pure silver contacts rated 5 amps. Open relay size: Max. \(15 / 8^{\prime \prime} x^{25} / 32^{\prime \prime}\).x \(19 / 16^{\prime \prime}\) high, mount with four \#3-48 tapped holes on \(3 / 8^{\prime \prime} \times 3.8^{\prime \prime}\) centers. Enclosed relay: Hermetically sealed to resist all climatic conditions. Size: \(1^{11} / 16^{\prime \prime} \times 11 / 3{ }^{\prime \prime}\) \(x 27 / 32\) " high. Mounts with three \#6-32 studs on \(1 / 2^{\prime \prime} \times 114^{\prime \prime}\) centers. Both open or sealed DC units withstand better than 10 G vibration shock.

    \hline SPDT & MC5A & 6,115 V. AC & \$3.90 \\
    \hline SPDT & MC5D & 6,24 V. DC & 3.45 \\
    \hline
    \end{tabular}

    SS Series-DC SUPER SENSITIVE RELAYS
    

    For circuits requiring low energy operation. Pure silver contacts rated 2 amps. Operates with 10 G vibration resistance an 10 MW . Armature ptecision balanced on needle-point bcarings; virtually friction-free movement. Dual series coils give greater sensitivity.
    Dimensions: \(111 / 16^{\prime \prime} \times 15 / 16^{\prime \prime} \times 111 / 16^{\prime \prime}\) high. Mounted with two \#6-32 tapped holes on \(23 / 32\) " centers.
    \begin{tabular}{c|c|c|c|c}
    \hline Type & Contacts & Coil Resistance & Max, Pull In & Net \\
    \hline SS5D & SPDT & 10,000 ohms & 1.0 MA & \(\$ 10.45\) \\
    \hline
    \end{tabular}

    \section*{KL Series-MULTIPLE CONTACT RELAYS}
    

    Varied contact combinations and high dielectric phenolic insulation affords extreme versatility and utility.

    Dimensions: KL5: \(115 / 16^{\prime \prime} \times 17 / 2^{\prime \prime} \times 115 / 16^{\prime \prime}\) high; KL11: \(1^{15 / 16^{\prime \prime} \times 13 / 8^{\prime \prime} \times 17 / 8^{\prime \prime} \mathrm{high} ; ~}\) KL14: 15/16" \(\times 17 / 16^{\prime \prime} \times 115 / 16^{\prime \prime}\) high; KL17: \(15 / 16^{\prime \prime} \times 111 / 16^{\prime \prime} \times 15 / 16^{\prime \prime}\) high. Mounted with two \#6-32 tapped holes on \(17 / 16^{\prime \prime}\) centers.
    \begin{tabular}{|c|c|c|c|c|c|}

    FOTOLECTRIC ANNOUNCER SET
    Automatically Announces the Entrance or Passing of Any Person

    \section*{COMPLETE WITH MIRROR AND CHIME}
    

    The Fotolectric Announcer is a complete three-piece set. It is designed to project a beam of light atross any entrance to any roon or buikling. Breaking of this light beam by person entering activates a pleasant chime. antomatically anmonncing the entrant. Chime can be located wherever signal is desired.

    The unit has efficient grid controlled rectifier circuit which insures maximum stability. The Unit combines Exciter Lamp and sensitive Photo-C'dl in metal case, size \(81 / 4^{\prime \prime} \times 61 / 2^{\prime \prime} \times 23 / 4^{\prime \prime}\), beautifully finished in gray hammerloid. Buth) has long lamp-life rating of 1000 hours. Operates on 110-120ㅇ: S(0-60 cycle. A.C.

    Model 61 Fotolectric Anmonncer, three-piece set including L'nit. Mirror and Chime.........Sct. each \(\$ 34.80\)

    MODEL 62 R \& L

    \section*{ELECTRONICALLY OPERATED RELAY} AND EXCITER LAMP SET
    

    Model 62-R Electronicaliy Operoted Relay
    

    Model 62-L Exciter Lamp

    This "two-unit" set has specially designed Exciter Lamp) ('nit and an Electronically ('perated Relay unit that includes the lhoto-Cell Recoiver. Relay and other electrical componcots. This combination hat proved efficient for combless simple applications for distances from a iew inche to 75 feet or where Relay is not required to operate in exces oi 300 times a minute. Supervises efficiently on simple applications such as Counting or sorting large objects; limit switeles; start and stop operations; opening loors, etc.
    Model 62 R \& L "「wo-L"nit Set"..............per set \(\$ 85.00\) Model 62.R Electronically. Operated Relay...each 69.75 Model 62-L Exciter Lamp.

    PHOTOELECTRIC RELAYS AND ACCESSORIES
    

    \section*{CR7505-K100G3 Relay}

    The CR7505-K゙100G: photoelectric relay and accessories provide a complete line of inexpensive, but thoroughly reliable. appararis for getioralpurpose indoor applications which include counting. diverting, controlling, signaling, limiting. and protecting. Underwriters' Laboratories approved.
    The CR7505-K100G3 includes phototube and thyratron, has a contact rating of \(10 \mathrm{amp} a-c\), may be used to start f-hp motors directly, and can operate all motor starters up to and including NEMA Size 4.

    \section*{Accessories for Use with -K100G3}

    Cat. No. 71 G 620 light-
     source transformer. rated 115 volts. En! 60 cycles, primary: 4.8 volts secondary: lens-barrel assembly CR7505-B207G1, 3 in . in diameter, for mounting directly on relay: two light sources, C201G1 with \(11 / 2-\mathrm{in}\). lens and -C203G1 with 3 -in. lens: two phototube holders with six feet of special phototube cable and a plug for connecting to tube sorket in the relay, -P211G1 with \(11 / 2-i n\). lens, and the -P212G1 with 3 -in. lens. With \(11 / 2-i n\). lens, maximum operating distance is 12 ft ; with 3 -in. lens. maximum operating distance is 30 ft . Sensitivity of -K100G3 may be increased five times by use of -B207G1 lens-barrel assembly.

    \section*{ELECTRONIC TIMERS AND DEVICES}

    Photoelectric Accessories for Use with -K201 and -N210 Series
    
    1. The CRT505-C200G1 light source is for general indoor application.
    2. The following light sources are of die-cast aluminum construction. The \(-\mathrm{C} 201 \mathrm{G1}\) light source has a \(11 / 2-\mathrm{in}\). lens, focusable from 2 feet to infinity. The - C202G1 has a double lens for short focus, for a concentrated spot approximately \(1 / 4 \mathrm{in}\). in dianeter at a distance of \(21 / 2 \cdot t \mathrm{in}\). in front of the lens. The -C203G1 lishlt source has a 3 -in. Jens, with high-intenaity lecarm for loma dietannm nppration. The
     in operation with the G1 group, but have rubber gaskets between the front and back covers which makes them weather-resistant and dust-tisht in accordance with NEMA Standards.
    4. 8 volts is ropuired for all the above light sources and the following transiormires aro recommended:

    Light-source transformers. The 9TY51A1 is pnclosed in a conduit box with knockouts for conduit connections. It is rated \(115 / 230\) volte, 50 tin cucles. The 9TM321A1 is of open-type construction, but has same rating as gTY:51A1. The 92G34 for 25/50/80 cycles is of Weather-resistant ronstruction; except for size and type of construction, rating is ilentical with 9TY51A1.
    
    3. The -C208 light source is explosion-proof and can be made watertight by applying a rubber gasket which is furnished. It has a 3 -in. lens and a self-contained step-down transformer for \(115 / 230\)-volt operation.
    4. The phototube holders are similar in construction to the light sources. The -P202G2 has a \(11 / 2-\mathrm{in}\). lens and the -P203G2 has a 3 -in. lens. Roth come with a 9 -ft phototube cable with spade terminale.

    \section*{CR7504-A142 Electronic Timer}

    \section*{CR7504-A142}
    

    \section*{Electronic Timer}

    The - 1142 timer is for tinsing applications of short time duration (-A142G1, 0,06 to 1.2 spec ; \(\mathrm{A} 1420 \mathrm{E}, 0.8\) to 12 sec; and -A142G3, 6 to 120 sec ) where long life, low maintenance, and high repetitive accuracy is required.

    The A142 has double-pole, doublethrow contacts; can be used to start thp motors directly. Time-range dials read directly in seconde.
    Two different types oi operation available; immediate-start for timing operations or delayed-start for providing a time delay. Power supply, 115/230 volts, \(50 / 60\) cycles; power consumption, 15 watte.
    

    \section*{CR7511-A126 \\ Resistance-sensitive \\ Relay}

    This relay is used to obtain a reliable watast from tha touch of twn cimiductors through which only small currente flow. It wili operate noturn. lights, contactors, and solenoids whenever there is sufficient chango in the resistance of a circuit, inin the resistance of a circuit, ind cludini In this way larsc amounts of power can be controlled from a low. current high-resistance input.
    It has \(10-\mathrm{amp}\) a-c contact ratine, twa ainglo-polo, double-throw. rontacts for cuntrolling twa independent. circuits. Fnclosure is weather- resistant and dust-tight.

    CR7505-R201G1 Smoke-density Indicator
    

    This control and associated equipment can be used to indicate smoke density, gas density, or the density of any fluid where density is directly related to the liphtit transmission throurh the fluill. It can be used to warn furnace operators be used to warn furnace operatirs of excessive smoke conditions, turn on blowers or relevant pquipment at any smoke.density ceve, and when used with a suitalle record of smoke density is always record of

    The indicator has a semi-duct-tight enclosure (NEMA Type 1A) and an industrial-type relay, i5 amp an industrial-type relay,
    make-break and 10 amp
    carrs, at 115 or 230 volts, a-c. Simple calibration adjuatments are made with four lorking type knobs on the panel, while indicating lichts and a smoke-density instrument are on the front cover of a panel.

    \section*{CR7505-B100 Photoelectric Relay and -C105 Light Source}
    

    The ORTE05-B100 inenrporaten a tuned circuit which allows the relay to be rebrenaive ro! ! to a light beam modulatod at approximately 900 cycles por second. Hence, it is insensitive to changes of natural or artificial light.

    The CRTEOECDRE containe ? light-source lamy, a trambformer, and a motor-triven slotted diak which "chops," or modulates, the light beam at approximately 900 cycles per second.

    When operating at distances of 1000 ft . or less, this equipment in ceneral has sufficient sensitivity so that the light from the sulur... must be reduced twenty times before the relay will drop out. This helps reduce false operation caused by adverse weather conditions. Both unita are mounted in outdoor enclosures.
    The units operate on \(115 / 230\) volts, 60 cycles, a-c. Contacts ar rated 10 volts, \(15 / 230\) volts, a-c. The relay is provided with a sensitivity control for adjustment for particular light-path distance.

    For complete information, consult your nearest G-E Apparatus Sales Office or Distributor, or write direct to Section 640-418, General Electric Company. Schenectady 5, New York.

    \section*{Sme. R MIIT RIPLEY GQMPANY, INC.}

    \section*{L-R BLOWERS - "Mighty-Mites"}

    The L-R Blowers are designed for applications requiritg the movement of large air volumes where space and weight are prime factors. These small blowers can be adapted to many applications such as the dispersion of heat generated by electronic equipment, induction heaters tube cooling in morie projectors. instrument cabinets, drying operations. photographic darkrooms and in other contined enclosures. Available in CW and CCW Rotation. Rotation determined by viewing from motor side

    \section*{A QUALITY DRY BATTERY FOR EVERY PURPOSE}
    

    GENERAL dry botteries cantain many outstanding advancements such as extra heavy seamless extruded zinc cups, the famaus paper thin seporotor permitting more mix and more active zinc area by utilization of the cell bottom, the curled rim lock seal which seals each cell individually. These features, found only in Generals, assure long shelf life as well as the maximum in dry batfery performance.

    \section*{GENERAL A \& B RADIO FARM PACKS}

    General A-B packs are made with \(L\) size cells in the \(A\) section. These cells are \(40 \%\) longer than the largest conventional \(11 / 4^{\%}\) diameter cell. This construction ossures the perfect balance between these " \(A\) " and " \(B\) " sections for current drains established by the Radio Industry.

    TIIE BIG 12 ATR YIBRITOR TEAM, as listerd above, meets \(90 \%\) of your replacement merels. (iive your customers tuick service and real satisfaction by keeping on hand at least one carh of these 12 popular ATR vibrators.
    ATll Yibrator are preceision luilt, featuring Cerami- stack Spacers, and are baded ly more than 23 years of vibrator design and research, development and manu-farturing-ATR Pioneered in the vibrator Field.

    Let THE BIG 12 ATR VIBRATOR TEAM
    Help You Win Satisfied Customers.
    

    \section*{TAPE RECORDER INVERTERS}

    Specially Designed for Operating Standard A.C. Tape Recorders, Wire Recorders, Dictating Machines, Radios, Public Address Systems, Amplifiers, Electric Razors, Record Players, Mixmasters, and Electronic Test Equipment from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Trains, and Planes. Ideal for Emergency Lighting.

    This group of ATR Inverters is especially recommended for use with standard A.C. operated tape or wire recorders, dictating machines, radios, amplifiers, and similar electronic equipment, being exceptionally well filtered to insure interference free radio reception. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-ife operation. All models indicated are equipped with ATR plug-in Inverter Vibrators. These Inverters also come equipped with four-point voltage regulators which make passible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is in excess of \(75 \%\). To figure approximate current consumption from storage battery, divide the rated input wattage of the recorder (or load) being operated by the storage battery voltage and further divide this answer by .75 which will give the actual current consumption based on the actual load and efficiency. The battery current consumption required for a tape recorder is normally less than that drawn by ordinary automobile headlight(s). These Tape Recorder Inverters are recommended only for use with loads having power factors in excess of \(70 \%\). ATR Inverters should be used only for the applications as outlined above.
    

    Above illustrates operation of tape recorder in car utilizing Inverter Remote Control Unit as shown below.
    Let your car be a ROLLING OFFICE dictate your reports promptly and accurately in the field - on the spot.
    
    \begin{tabular}{|c|c|c|c|c|c|c|}

    \hline
    \end{tabular}

    Radio frequency interference completely suppressed. *Recommeded for 24 Volt Batfery Systems. Any of the above type Inverters are available with 220 volt A.C. output at prices slightly higher. In ordering specify "S" affer the type number and substitute for the last letter in the code word "T"': that is, if a 110 volt D.C. Inverter having a 220 volt A.C. output is desired, this would be ordered as Type llOS covered by code word: "GRSFT."
    All models designated above are housed in attractively finished grey-hammerloid metal cabinets. Dimensions of Standard (RSE) Model Inverters, \(83 / 9^{\prime \prime} \times 9^{\prime \prime} \times 51 /\left.\right|^{\prime \prime}\); shipping weight, 19 lbs. Dimensions of Heavy Duty (RHF) Model Inverters, \(61 / 2^{\prime \prime}\) x \(111 / 0^{\prime \prime}\) x \(81 / 2^{11}\), shipping weight, 25 lbs. Dimensions of Super Heavy Duty (HSH) Model Inverters, \(61 / 2^{\prime \prime} \times 127 / \mathbf{y}^{\prime \prime} \times 8^{\prime \prime} / 2^{\prime \prime}\) : shipping weight, 34 lbs.
    For correct replacement vibrator, consult Inverter Vibrator Guide.

    REMOTE CONTROL UNIT - for under-dash mounting permitting installation of Inverter in auto-trunk compartment.

    List Price \(\$ 7.95\)
    

    MOUNTING BRACKEIS - to securely mount nverter in trunk compartment of car or under-dash, as illustrated. List Price \(\$ 4.95\) pr.

    JOBBERS ATTENTION: See Pages M-28 and M-29 in this ATR Section for your Catalog Needs!

    \section*{AIR \\ DICTATING MACHINE INVERTERS}

    Specially Designed for Operating Standard A.C. Dictating Machines, Small Radios, Record Players, Mix-masters, Food Blenders, Electric Razors, Electronic Test Equipment, and Most Small Electrical and Electronic Devices from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Planes, and Trains.

    This group of ATR Inverters is especially recommended for use with standard A.C. diclating machines, mall radies, racard players, minmasters, food blenders, electric razors, and other similar smali electronic or electrical equipment. The Inverters are filtered to suppress radio frequency interference. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation. All ATR models indicated are equipped with ATR plug-in Inverter Vibrators. Models RME and RSE come equipped with a four-point voltage regulator which makes possible the correct output voltage for minimum to maximum loads. The RSE Inverter Models connect to the storage battery by means of the heavy cables provided; whereas, ATR Mighty Midget (DME) Model and RME Aodal Invoitera, buing smullor output capacity units, plug directly into the cigarette lighter receptacle of car. The hattery consumption required is normally less than that drawn by one ordinary automobile headlight. The operating efficiency is approximately \(75 \%\). These Inverters are recommended only for use with loads having power factors in excess of \(70 \%\) and should be used only for the applications as outlined above.
    
    

    Illustrates Under-Dash Mounting for ATR Models RME and RSE. See Paqe \(\mathrm{M}-28\) for available
    accessories.

    JOBBERS ATTENTION: See Pages M-28 and M-29 in this ATR Section for your Catalog Needs!
    

    \section*{RADIO} INVERTERS

    Specially Designed for Operating Standard A.C. Radios, Radio-Phonographs, Tape Recorders, Wire Recorders, Record Players, Dictating Machines, Public Address Systems, Amplifiers, Radio Transmitters, Mix-masters, Food Blenders, Electric Razors, and Electronic Test Equipment from D.C. Voltages in Trains, Rural Areas, and in D.C. Districts.

    This group of ATR Inverters is especially recommended for use with standard \(A C\) radios, record players, tape or wire recorders, dictating machines, amplifiers, and similar elecitronic equipment being exceptionally well filtered to insure interference free radio operation. With ATR Inverters the need for special equipment is eliminated. They are designed for quiet, long-life, radio operation. All models indicated are equipped with ATR plug-in Inverter Vibrators. These Inverters also come equipped with four-point voltage regulators which make possible the correct output voltages which are lower or higher than normal. The operating efficiency is in excess of \(85 \%\). To figure approximate current consumption from D.C. voltage source, divide the rated input wattage of the radio set (or load) being operated by the D.C. voltage and further divide this answer by .85 which will give the actual current consumption based on the actual load and efficiency. These Radio Inverters are recommended only for use with loads having power factors in excess of \(70 \%\). ATR Radio Inverters should be used only for the applications as outlined above.
    

    ATR Inverters are not recommended for operating refrigerators, washing machines, or similar motor-driven appliances; also, ATR Inverters are not recommended for operating toasters, electric irons, sun lamps, or similar appliances of high wattage or low power factor. Any attempt to use the Inverter for applications not recommended will ruin the Inverter immediately and void the guarantee.

    \hline
    \end{tabular}

    Radio Frequency Interference Completely Suppressed
    For Inverters having larger or smaller output capacities or operating on other D.C. input voltages, please consult available ATR Inverter Catalog Sheets.
    Any of the above type Inverters are available with 220 volt A.C. output at prices slightly higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word " \(T\) "; that is, if a 110 volt D.C. Inverter having a 220 volt A.C. output is desired, this would be ordered as Type IIOS covered by code word, "NRSET."
    ATR Medium, Standard, and Heavy Duty Radio Inverters having designations RME, RSE, and RHF respectively, are housed in attractively finished grey-hammerloid metal cabinets.
    Dimensions of Medium (RME) Model Radio Inverters, \(83 / 8^{\prime \prime} \times 9^{\prime \prime} \times 33 / 4^{\prime \prime} ;\) shipping weight, 12 lbs.
    Dimensions of Standard (RSE) Model Radio Inverters, \(83 / 8^{\prime \prime} \times 9^{\prime \prime} \times 5 \frac{1}{4} 4^{\prime \prime}\) : shipping weight, 19 lbs.
    Dimensions of Heary Duty (RHF) Model Radio Inverters, \(61 / 2^{\prime \prime} \times 11 / 8^{\prime \prime} \times 81 / 2^{\prime \prime}\); shipping weight, 30 lbs.
    For correct ATR replacement vibrator, consult ATR Inverter Vibrator Guide.
    JOBBERS ATTENTION: See Pages M-28 and M-29 in this ATR Section for your Catalog Needs!
    

    \section*{TELEVISION Inverters}

    Specially Designed and Carefully Adjusted for Operating Television Receivers from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Trains, Planes, and D.C. Districts. Suitable for Use with All Types of Electronic Equipment where Precise Output Frequency is Required.

    This group of ATR Inverters has been selected from the ATR line of Standard and Heavy Duty Radio Inverters and Super Heavy Duty Inverters and have specially adjusted ATR Vibrators installed in them to provide the precisely adjusted output power frequency required for the operation of Television Sets. They are exceptionally well filtered to insure inter-ference-free reception. They are equipped with fourpoint voltage regulators. The operating efficiency is in excess of 85 percent. They are recommended for use with loads having power factors in excess of 70 percent.

    ATR Inverters should be used only for the applica. tions as outlined above.

    ATR Inverters are not recommended for operating refrigerators, washing machines or similar motordriven appliances: also, ATR Inverters are not recommended for operating toasters, electric irons, sun lamps, or similar appliances of high wattage or low power factor. Any attempt to use the Inverter for applications not recommended will ruin the Inverter immediately and void the guarantee.

    Featured cut above illustrates Model lloAT-RHF

    ATR Standard (RSE). Heavy Duty (RHF), and Super Heavy Duty (HSH) Television inverters are housed in attractively finished grey-hammerloid metal cabinets.
    

    Dimensions of Standard (RSE) Model Television Inverters, \(83 / 8^{\prime \prime} \times 9^{\prime \prime}\) (51/4": Shipping weight, 19 lbs.
    Dimensions of Heavy Duty (RHF) Model Television Inverters, 61/2" x \(111 / 9^{+1} \times 81 / 2^{+\prime}\); Shipping weight, 30 lbs.
    Dimensions of Super Heavy Duty (HSH) Model Television Inverters, \(6^{1 / 2 "} \times 121 / \mathbf{2}^{\prime \prime} \times 8^{1 / 2 " ;}\) Shipping weight, 34 lbs.

    \title{
    AIR \\ \\ "A" BATTERY \\ \\ "A" BATTERY ELIMINATORS AND TESTING AUTO RADIOS
    }

    \section*{6 VOLT OR 12 VOLT!}

    Specially Designed for Testing and Operating Auto Radios and D.C. Electrical Apparatus on Regular A.C. Lines, 105125 Volts, \(50-60\) Cycles.

    \section*{SUGGESTED USES:}

    As a power supply for radio sets, aircraft instruments, relays, motors and other electrical and electronic equipments. In the laboratory, for supplying various low D.C. voltages.
    Battery Eliminators may be treated as batteries in the sense that they can be connected in series for higher voltages at the same current output per unit or in parallel for the same output voltage per unit at higher currents.
    ```

    | Eliminates Storage
    Batteries and Battery Chargers.

    ```
    - Operates the Equipment at Maximum Efficiency at All Times.
    Delivers Filtered Direct Current at the Correct Voltage for Proper Operation.
    \(\checkmark\) Fully Automatic and Fool-Proof.
    

    Equipped with Full-Wave Dry Disc Selenium Rectifier, Assuring Noiseless, Inter-ference-Free Operation and Extreme Long Life and Reliability.
    TYPE \(610-E L I D-R a t e d\) output 6 volts at 10 amperes continuous. Size \(b^{6} / 2^{\prime \prime} \times 91 / 8^{\prime \prime}\) \(\times 81 / 2\) '. Shipping weight 22 lbs . Code word "SELIE.' Similar to illustration on left but with Voltmeter only.

    LIST PRICE \(\$ 59.40\)
    TYPE \(610 C\)-ELID-Rated output 6 volts at 10 amperes continuous or 12 volts at 6 amperes continuous. Size \(b 1 / 2^{\prime \prime} \times 91 / \mathrm{s}^{\prime \prime} \times 81 / /^{\prime \prime}\). Shipping weight, 22 Ibs. Appearance similar to 20 C -ELIR, above. Code word "SELIF." LIST PRICE \(\$ 66.58\)

    TYPE 620 C -ELIR-Rated output 6 volts at 20 amperes continuous or 12 volts at 10 amperes continuous. Uses dual rectifiers. Size \(61 / 2^{\prime \prime} \times 127 / 6^{\prime \prime} \times 81 / 2^{\prime \prime}\). Shipping weight, 33 lbs . Code word "HELIR." LIST PRICE \(\$ 93.90\)
    Either 6 or 12 volt output obtainable by means of simple output toggle switching arrangement having locking device to prevent accidental switching.
    All ATR Eliminators have as standard equipment: On-Off Switch. 8-Position Voltage Control. Meter (s). Fuse Protection, Rubber Mounting Feet, b-ft. All-Rubber Cord Set and Cabinet of heavy gauge metal having attractive grey-hammerloid finish.

    Illustrates Standard "A" Battery Eliminator, Model 610C.ELID; equipped with Voltmeter. Ammeter and Voltage Control.
    jObbers Attention: See Pages M-28 and M-29 in this ATR Section for your Catalog Needs!
    

    > For Operating Small A.C. Motors, Electronic Apparatus, Electrical Testing Equipment, and A.C. Electrical Appliances from D.C. Lines.

    These units are specially designed for applications as indicated, permitting the use of standard A.C. equipment on D.C. lines. These Inverters operate at an efficiency in excess of \(75 \%\) and are carefully built and equipped to give the longest possible life and operating satisfaction. All models indicated are equipped with an ATR plugin Inverter Vibrator of new design and construction, insuring increased long life and reliable service. All Inverters (except LIG) come equipped with four-point voltage regulators, which make possible thecorrect output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. These Industrial Inverters are recommended for use with loads having power factors as low as \(60 \%\). and as low as \(50 \%\) for the "P" Inverters indicated. These Inverters should not be used with Neon signs.

    ATR Inverters should be used only for the applications as outlined above.
    

    ATR Inverters are not recommended for operating refrigerators, washing machines or similar motor-driven appliances; also, ATR Inverters are not recommended for operating toasters, electric irons, sun lamps, or similar appliances of high wattage or low power factor. Any attempt to use the Inverter for applications not recommended will ruin the Inverter immediately and void the guarantee.

    \footnotetext{
    \(\ddagger\) Radio frequency interference suppressed. tRecommended for 24 vol\& battery systems.
    }

    All models designated above are housed in attractivaly finished grey hammarloid metal cabinets. The feature cut above illustrates Heavy Duty (IHS) Model Inverters. Dimensions of Standard Model (ISR) Inverters \(87 / 9^{\prime \prime} \times 9^{\prime \prime} \times 51 / 4^{\prime \prime}\); shipping weight, 19 Ibs.
    Dimensions of Heavy Duty Model (IHS) Inverters, \(61 / 2^{\prime \prime} \times 11 / 3^{\prime \prime} \times 81 / 2^{\prime \prime} ;\) shipping weight, 30 lbs . Dimensions of Low Power Model (LIG) Inverters, \(55 / /^{\prime \prime} \times 4^{\prime \prime} \times 61 / 4^{\prime \prime}\); shipping weight, 8 lbs.
    "'P"' Inverters are corrected for loads having power factors as low as \(50 \%\). For correct replacement vibrator, consult Inverter Vibrator Guide.
    JOBBERS ATTENTION: See Pages M-28 and M-29 in this ATR Section for your Catalog Needs!

    \section*{AIR}

    This group of ATR Inverters is especially recommended for use with standard A.C. operated germicidal lamps providing protection against bacteria and mold spores in perishable food areas or hospital-fike areas in trucks, boats, planes, and trains. Bacteria and mold spores cause losses of millions of dollars each year through spoilage, contamination, and added maintenance costs. Effective control of air-borne germs, bacteria and mold spores by use of germicidal lamps is widely used in processing and packaging of fresh food products. This same protection against contamination during delivery is now possible using germicidal lamps operating from an ATR Inverter connected to D.C. Storage Battery Power. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet long-life operation. These rugged, efficient, little power houses are self-maintaining - require no warm-up. They change your D.C. battery power to 110 volt A.C. (household type) power instantly and quietly. ATR Inverters are fully protected and are big enough to do a proper job and small enough to fit most anywhere. All models indicated are equipped with ATR plug-in Inverter Vibrators. These Inverters (except Model LIG) also come equipped with four-point voltage regulators which make possible the correct output voltage for minimum to maximum loads, and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is in excess of \(75 \%\). The battery current consumption required is normally less than that drawn by ordinary automobile headlight(s). These ATR Inverters should be used only for the application as outlined above.

    \section*{AIR shav-Paks}

    Specially Designed for Operating Standard A.C. Electric Shavers in Automobiles, Buses, Trucks, Boats, and Planes.

    ATR SHAV-PAKS are miniature DC-AC Inverters designed especially for the operation of standard A.C. electric shavers from 6 or 12 -volt storage batteries in automobiles, buses, trucks, boats, and planes. They are ideally suitable for traveling salesmen, executives, sportsmen, and all owners of electric shavers. The ATR SHAV. PAK very simply plugs into the cigarette lighter receptacle on the dash and changes the D.C. battery power to standard 110 -volt A.C. electricity for the operation of electric shavers anywhere! The ATR SHAV-PAK may also be used for operating other small A.C. devices having a wattage requirement of not more than 15 watts such as flea power timing motors. ATR SHAV-PAKS are equipped with ATR plug-in type vibrators which will give many years of satisfactory and dependable service.
    

    SALESMEN AND EXECUTIVES -"'Be Neat," have your alactric razor handy! Shave in the comfort of your own car, bost, or plane.

    \section*{Communication Vibrators for SUPER SERVICE}

    As introduced in the 1954 MayJune issues of many leading radio magazines, ATR COMMUNICATION VIBRATORS are truly THE WORLD'S FINEST. See reprint of ad on this page for feature specifications.

    ATR COMMUNICATION VIBRA. TORS eliminate the problom of shert-life call.backs on those tough two-way communication rigs. Yes, Sir! these ATR COMMUNICA. TION VIBRATORS deliver SUPER service.

    For additional specifications pertaining to ATR SUPER SERVICE COMMUNICATION VIBRATORS. see page M-15.

    ATR VIBRATORS FEATURE:
    CERAMIC STACK SPACERS with Two-Bolt Stack Construction - for adjustment parmanency under any operating condition

    INSTANT STARTING - as a result of highly efficient magnetic circuit with formed base for more uniform operation on both high and low voltages.

    LARGE OVERSIZED TUNGSTEN CONTACTS having Full Wiping Action-for greater reliability and longer life.

    PERFORATED REED of Highest Quality Swedish Spring Steel-for uniform flexibility and prevention of reed breakage.

    HIGHEST PRECISION CON STRUCTION AND WORKMAN. SHIP - Practically all parts used are held to within a tolerance of 0.0005 of an inch.

    VALUE PLUS - as readily evidenced by the Larger Contacts, Ceramic Spacers and Precision Construction and Workmanship.
    
    

    Cut sbove illustrates the ATR 20 contact type
    Vibrator os Used in ATR Model RHF and HSH vibrator as
    Inverters.

    \section*{Vibrators}

    Mallury Vibrators are engineerod to exacting specifications. Their superior action is a result of more than 20 years' research. Pure, natural rubber liners deaden sound and assure quiet operation. Special, tough-spring steel eliminates reed breakage. Heavy framing insures correct and exact alignment. Fxtra size and quality of contact points assure longer life. Each Mallory Vibrator is tested individually for correct output, starting voltage and wave form.

    \section*{Communication Vibrators for SUPER SERVICE}

    As introduced in the 1954 MayJune issuess of many leading radio magazines, ATR COMMUNICA. TION VIBRATORS ure truly THE WORLD'S FINEST. See reprint of Id on this page for feature specifications.

    ATR COMMUNICATION VIBRA. TORS eliminate the problem of short-life call-backs on those tough two-way communication rigs. Yes, Sir! these ATR COMMUNICATION VIBRATORS deliver SUPER SERVICE.

    For additional specifications pertaining to ATR SUPER SERVICE COMMUNICATION VIBRATORS, see page M.I5.

    ATR VIBRATORS FEATURE:

    CERAMIC STACK SPACERS with Two-Bolt Stack Construction - for adjustment permanency under any operating condition.

    INSTANT STARTING - as a result of highly efficient magnetic circuit with formed base for more uniform operation on both high and low voltages.

    LARGE OVERSIZED TUNGSTEN CONTACTS having Full Wiping Action-for greater reliability and longer life.

    PERFORATED REED of Highest Quality Swedish Spring Steel-for uniform flexibility and prevention of reed breakage.

    HIGHEST PRECISION CON. STRUCTION AND WORKMAN. SHIP - Practically all parts used are held to within a tolerance of 0.0005 of an inch.

    VALUE PLUS - as readily evidenced by the Larger Contacts, Ceramic Spacers and Precision Construction and Workmanship.
    
    - CERAMIC STACK SPACERS
    - 1/4" DIAMETER POWER CONTACTS
    - DRIVER-TYPE COIL CONSTRUCTION
    - SPECIAl REED hinge and wiring
    - POWER CAPABILITY UP TO 15 amperes

    A COMPLETE LINE OF REPLACEMENT
    AIR VIBRATORS
    FOR AUTOMOTIVE, HOUSEHOLD and TWO-WAY COMMUNICATION SETS

    ATR VIBRATORS are proven unils of the highest quality, engineered to perfection. They are backed by more than 23 years of vibrator design and research, development and manufacturing.
    ATR pioneered in the vibrator field.

    \section*{Vibrafors}

    Mallory Vibrators are engineered to exacting specifications. Their superior action is a result of more than 20 years' research. Pure, natural rubber liners deaden sound and assure quiet operation. Special, tough-spring steel eliminates reed breakage. Heavy framing insures correct and exact alignment. Extra size and quality of contact points assure longer life. Each Mallory Vibrator is tested individually for correct output, starting voltage and wave form.

    \section*{Vibrapacks}

    Mallory Vibrapacks are the ideal vibrator power supplies designed to provide at low cost, dependable, high-voltage, direct current from low-voltage, storage batteries. Mallory Vibrapacks offer high effciency, dependability, low maintenance cost and long life because of years of field testing. Added features are; light weight, compact ness and simplicity of installation.

    \section*{Selenium Rectifier Stacks}

    Mallory Selenium stacks are conservatively rated to provide long dependable service and good voltage regulation at high efficiency. Rectification is imme-diate-no warm-up period is required. 5-volt average drop across stack results in cooler operation.

    NOTE: All rectifiers are single phase, full wave, bridge type.
    Mounting Prefix: IB=Insulated Bolt; \(\mathrm{F}=\) Grounded Foot; \(\mathrm{IF}=\mathrm{In}\) sulated Foot; IS = Insulated Stud.
    \(P\) suffix designates reverse polarity stacking. Center terminal is DC positive.
    J suffix designates universal construction with loose mounting feet for foot, bolt or stud mounting replacement.
    \(\dagger\) To determine AC Amps: Multiply the DC amps by the following factors: Inductive load by 1.1 ; resistive load by 1.2 ; capacitive load by 1.4.
    § Ratings given are for resistive and inductive loads. To determine the Max. continuous InC amp. rating for capacitive and battery loads multiply these ratings by 0.82 .

    \section*{Rectifier Baffery Chargers Power Supplies - UL Approved}

    Mallory Automotive, Marine and Aviation Battery Chargers provide convenient, efficient and economical charging of any storage battery used in automobiles, buses, trucks, tractors, taxicabs, small boats. air planes and on the farm. Taper charging (an automatically decreasing charging rate) is designed into all Mallory chargers to prevent damage to battery plates and to insure maximum battery life. These chargers also are ideal for charging any 6 or 12 -volt strage battery used in industrial, engineering and research laboratories.

    * These chargers are equipped with a Universal DC Output Socket. No DC Cable Assemblies are packaged with Charger. Purchase either 12670 or R675 Cable Assembly.

    \section*{Mallory 6RS25 Heavy Dufy Six Volf DC Power Supply}

    The Mallory 6RS25 6 volt, 25 ampere rectifier type power supply is designed to replace storage battery-charger combinations for bench testing medium power 2-way mobile-phone equipment. It may ing well-fitered low voltage DC in the 25 ing well-hitered Hew voltage sheet-steel housing mamere it adaptable for use in garages as makes it adaptable for use in garages as mobile ranio bench equipment.

    5 volt 60 operates from a standard 115 volt 60 cycle source to supply DC
     variable loads of 0 to 25 amperes. Inter maximum of 40 amperes at 6 volts.

    An adjustable variable control allows quick selection of any voltage from 0 to 8 at 0 to 25 amperes. Three capacitors totaling \(30,000 \mathrm{mfd}\). filter the output to less than 1 volt ripple and suppress \(R\) F and power fine interference. A \(0-10\) volt DC voltmeter and a \(0-40\) ampere DC ammeter are included.

    Conduction cooling of the full-wave Selenium Rectifier Cells, automatic overloading protection, and a self resetting circuit breaker insure long life.

    Overall dimensions-11 high, \(101 / 1^{\prime \prime}\) wide, \(834^{\prime \prime}\) deep. Shipping weight-26 lbs. Catalog No. 6RS25 \(\$ 74.50\) Net

    \section*{Mallory 12RS6D Bench Power Supply}

    The Mallory 12RS6D is a dual purpose bench power supply designed for use on the radio service bench for operating conventional 6 and 12 volt automobile and truck radio sets. Fully AC. operated from the \(115 \mathrm{~V} / 60\) cycle line, the \(12 I\) SS6D supplies rectified and filtered DC in either of 2 ranges, Range "A" supplies 0 to 16 volts at 6 amperes continuously, or 12 amperes intermittently. Range "B" supplies 0 to 8 volts at 10 amperes; or 20 amperes intermittently. Both ranges are infinitely vari-
     able from zero to maximum oulput to permit precise adjustment of bench test voltages. The 12RS6D is equipped with a DC voltmeter, a DC ammeter, infinitely variable voltage control, a range switch, an on-off toggle switch, automatic overload protection, primary fuse and rubber-covered line cord and plug. The rectifying system employs a full-wave metallic rectifier. The cabinet is sheet steel finished in blue enamel and measures \(63 / 4^{\prime \prime}\) high, \(10^{3 / 6}\) wide and \(51 / 2^{\prime \prime}\) deep. Shipping weight approximately 8 lbs. Catalog No. 12RS6D \$39.95 Net

    \section*{Mallory Service Bench Rectopower Supplies}

    Modela 12RS14D and 28RS15D are designed to operate from 110-120 volts, 60-cycles, and are equipped with accurate reading DC overload circuit anmeters, self-reciosin, fuse protection in the AC circuit and an suse protection in the switch. Both models are equipped with a continuously adjustable transformerrotor system to provide precise adjustment of the output voltage to any value from 0 to rated output voltage. Hoth models are filtered by high-capacity electrolytic capac-
     itors.
    These models are also equipped with a new, simplified automatic voltage regulating system (no relays) which keeps the output voltage relatively constant as the load changes from no-load to full load. relatively constant as the load changes a 125 or \(0-16\) VDC (a) 14 A . Model 12RS14D will supply 0-8VDC @ 30 (3) or \(0-32 \mathrm{VDC}\) (1) 15 A . Model 12RS14D \(\$ 99.50\) Net. Model 28RS15D \(\$ 199.50\) Net.

    \section*{Mallory Vibrator Testers}

    The Mallory Vibrator Testers have been designed as companion units to the famous Mallory Service Bench Rectopower (18) Supplies 6KS10, 6RS25-1, \(121255,12 R S 6 \mathrm{D}\) or \(1212 S 14 \mathrm{D}\) (acting as variable power supplies) to test directly, without adapters, most of the popular vibrators and all of the 6 volt passenger car radio vibrators used since
    1940 . Either \(6 \times 5\) or \(0 Z 4\) rectifier tubes 1940. Either 6X5 or 0Z4 rectifier tubes may be plugged into the front panel thus pring interu vibrators to be tested in conjunction with the rectifier tube with which they normally work conjunction with the rectifier tube with rectifiers can readily be determined equipment. Defective vibrators or rectifying vibrators are tetermaned by the substitution methor Fither shunt or separars are tested by removing the rectifer tube. Hither from 100 separate drive vibrators can be tested of any freanency may be read directly from the "good-bad" meter scale. Shipping weight approximately 8 lbs . Model 6VT1-for 6-volt vibrators only
    Model 12VT1D-for either 6-volt or 12 -volt vibrators \(\mathbf{\$ 3 9 . 5 0}\) Net

    \section*{Mallory VA Series Rectopower \({ }^{\text {© }}\) Rectifier DC Power Supplies}

    Seven models are contained in the line of general utility filtered rectifier DC power supplies for designing, building, testing and repairing electrical and electronic equipment for the automotive, aviation and military equipment industries. The models may also be used for battery charging and electrolytic processes such as plating, anodizing, electrocleaning and electropolishing. These units incorporate voltmeter, ammeter, isolating-type transformer and many other features which make them desirable for production or laboratory use.

    The four independent filtered output circuits may be paralleled series-paralleled, seriesed, used independently or connected in several different combinations to provide simultaneous outputs as required. Delivery information and more detailed specifications on special Rectostarters (8) for aircraft engine starting and industrial electric truck battery charging, may be had by writing to P. R. Mallory \& Co., Inc., Box 1558, Indianapolis, Ind.

    \section*{Line Voltage Adjuster and Isolation Transformer}

    The Mallory Line Voltage Adjuster and Isolation Transformer is designed for electric and electronic applications requiring line voltage adjustment, line isolation or low voltage, heavy current output. It is a versatile and worthwhile accessory for use in radio-TV shops, laboratories and industrial service shops.

    Completely enclosed in an enamelled metal case, the LVA-2 provides: Infinitely variable AC-line adjustment from \(90-130\) volts (a) 1200 watts; an electrostatically-shielded, isolated, infinitely variable low voltage AC from 0 to 40 volts (a) 4 amperes in the isolation position, and 0 to 40 volts @ 8 amperes in the common line position; and an electrostatically-shielded, isolated, infinitely variable, 90 -volt to 130 -volt AC output (a) 350 watts. The unit is designed to operate from 105 to 125 volts, 60 cycles, single-phase. The infinitely variable common line and isolation outputs are selected in "common lineisolation" switch, and are fed to two standard AC outlets. Accurate output-voltage adjustment is afforded by the two-inch, 130 volt, AC meter. Overall case dimensions are: height-7/8"; depth-534"; width-61/2".

    \section*{AUTO RADIO - COMMUNICATIONS - SPECIAL PURPOSE}

    \section*{FEATURES}
    - C-D designed electronic micrometric equipment removes guesswork in confact point setting and assures consistent high quality.
    - Exdusive C-D pole piece design and armature weight results in a perfectly-balanced unit with greater efficiency.
    - Exclusive C-D base mounting results in a full floating unit, That's why C-D vibrators last longer,
    - Unit completely enclosed in new floating sock-an exclusive with C-D vibrators. Eliminates usual difficulties found in other vibrators.

    TODAY'S OUTSTAWDIWG D. C. POWER SUPPLIES...
    }

    \section*{in performance! in reliability! in dollar-for-dollar value!}

    \section*{SCHAUER BATTERY ELIMINATORS FOR SERVICING BOTH 6 and 12 VOLT AUTO RADIOS}

    Again Schauer leads the field! Here are streamlined, new Battery Eliminators specifically engineered to meet the growing needs of auto radio service men. In one compact unit, quality-built 1).C. Power Supplies which more than meet manufacturers' specifications for the operation and servicing of any 6 - or 12 -volt auto radio equipped with signal-seeking, push-button or manual tuners.
    SCHAUER MODEL AR S612 - Output adjustable by means of a rugged, silver contact tap switch. Toggle switch changes unit from 6 -volt to 12 -volt operation. Low range output: \(71 / 2\) volts at 12 amps , continuous; 20 amps., intermittent. High range: 15 volts at 6 amps., continuous; 11 amps., intermittent. Components include Selenium rectifiers, transformer, condenser-type filters, accurate 0.20 V.. and 0-20 A. meters, heavy wing-nut binding posts and carrying handle. Housed in sturdy steel case \(71^{\prime \prime \prime}\) wide \(x 91 / 2^{\prime \prime}\) deep x \(9^{\prime \prime}\) high.
    SCHAUER MODEL AR 4612 - Non-adjustable 6 -volt and 12 -volt Battery Eliminator. Built to same high-quality standards as Model AR 5612, above. Equipped with high-low switch to change from nominal 6 -volt to noninal 12 -volt operation.
    Own SCHAUER Battery Eliminators - they're the choice of leading service men. Specifications and illustrations of these units are found in Bulletin No. 1469. Write for your free copy.
    

    SCHAUER MODEL AR 5612

    \section*{ALSO AVAILABLE:}

    SCHAUER MODEL AR-5 - Adjustable 6 -volt Battery Eliminator. Delivers 6 volts D.C. with output adjustable for any load current between 3 and 15 amps ., indicated by \(0-15 \mathrm{~A}\). and \(0-8 \mathrm{~V}\). meters.
    schauer model ar-4 - A practical, lowcost, non-adjustable 6-volt Battery Eliminator. Delivers 6 -volts at approx. 15 amps.

    \section*{SCHAUER BATTERY CHARGERS}

    A complete line of battery chargers designed for safe recharging of storage batteries. All models equipped with exclusive Schauer "Charger Guard" - an automatic reset circuit breaker which acts instantly in case of overload or short circuit. No fuses, no manual resetting of circuit breaker.

    \section*{SCHAUER ADJUSTABLE BATTERY ELIMINATOR FOR 6 AND 12-VOLT AM AND FM 2-WAY AUTOMOBILE AND MARINE RADIOS}

    Schauer Type SA-48006 Battery Eliminator delivers either 6 -volts D.C. up to a maximum of 48 amps .; or 12 volts I.C. up to a maximum of 24 amps . A ruggedly built dial tap switch provides adjustment from less than 1 amp. up to the maximum output. A switch is provided to change to the voltage desired. Selenium rectifiers; efficient choke and condenser combination; heavy duty output terminals; precision D.C. voltmeter. Size: \(10^{\prime \prime}\) wide \(x\) for complete data.
    

    \section*{famous for moderate}

    \section*{DC POWER SUPPLIES} price premium quality and BATTERY ELIMINATORS

    \section*{New Model "D-612"}
    

    TEST SERVICE 12 \& 6 VOLT AUTO RADIOS
    Switch selects 12 or 6 V . output. 2 ranges: 0.8 and 0.16 V . continuously variable. \(0-10\) amps. continuous duty up to 12 V .20 amps . intermittent current rating. Unequalled qual. ity and performance at lowest cost.

    Model "NF"
    
    tist, service dC equipment from ac lines
    Choke input and Pi type filters with 1 choke. 2000 mid . condenser plus 1 choke, 4000 mid . condenser. D'Arsenval-type voltmeter 0-50 volts: ammeter 0.25 amperes, \(2 \%\) accuracy. Bridge type selenium rectifiers. Superior Powerstat for incremental voltage adjust. ment.
    

    DUAL RANGE FOR TESTING, SERVICING RADIOS AND ELECTRONIC EOUIPMENT
    115 volt \(50 / 60\) cycle input. 265 watts at 28 volts, 5 amperes. Choke input and \(\mathrm{Pi}_{\mathrm{t}}\) type filters with 2 chokes and 2.2000 mid. condensers. D'Arsenval-type voltmeter \(0-50\) volts \(2 \%\) accuracy. D'Arsenval-type ammeter 0.6 amperes \(2 \%\) accuracy. Bridge. type selenium rectiliers. Heavy duty control transformer for incremental voltage adjust. ment.

    \section*{Priced to Compete with Kits}

    Less than 5\% Ripple Over Rated Ranges
    MODEL "D-612"-0.8 and 0-16 V. Cont. Variable 10 amperes continuous duly up 1012 volts 20 amperes intermittent current rating
    An unmatched combination of unequalled performince, low price, and quality makes this a must for service technicians. Operates all auto radios. For relays, phone circuits, low voltage devices, electro-plating and battery charging. Patented EPL conduction cooling. Withstands high overloads for lifelong service. Changes from 6 to 12 volts at the flick of a switch. Same top quality as other EPL models

    MODEL " \(B\) " \(\mathbf{- 6}\) Volts, \(1-20\) amperes continuous rating, 35 amperes intermittent rating. Less than \(3 \%\) AC ripple. Operates \(2-6\) volt auto radias simuttaneously, phone circuits, low voltage devices. Conduction cooling increases power rating \(11 / 2\) times, lowest cost per ampere.

    Less than \(1 \%\) Ripple at Top Load
    MODEL "NF"-0-28 VOLTS, \(0-15\) amperes continuous rating, 25 amperes intermittent rating

    Serves broadest uses in industry, research and servicing. Only moder. ately priced heavy duty power supply with less than \(1 \%\) ripple at this output. Exclusive "EPL" selenium rectifier application increases power rating, lowers cost per ampere output. Finest components, trouble-free operation. Peak instantaneous current rating of 25 amperes (from 50/60 cycle 115 volt source). 0.36 volts up to 6 amperes.
    MODEL "N"-Same rating and specifications excepl for: \(5 \%\) ripple of 10 amperes, \(8 \%\) of 15 amperes, less 1 choke and 2 condensers, lower cost.

    \section*{Less than \(1 \%\) Ripple at Top Load}

    MODEL "EF'"-Dual Range: 0-28 VOLTS, 0-14 VOLTS, 0-5 amperes continuous rating, 10 amperes intermittent rating
    Virtually unlimited in operation and testing of electronic equipment that requires DC power. Completely variable voltage teature makes possible to test all equipment under almost any vollage input condition. Single control offers continuous voltage adjustment for different load conditions over the specified range. Patented conduction cooling gives longer rectifier life, increased power capacity. Attractively priced - high quality construction.

    MODEL "E"-seme reting and specifications, excepl for: \(3 \%\) AC ripple at 5 amperes; I choke and \(\mathbf{1 - 2 0 0 0}\) mfd., 50 voli condenser.

    \section*{MODEL "S" BATTERY ELIMINATOR}

    Converts batfery radios to AC all-elociric operation
    

    Model " \(S\) ' operates 1.4 volt 4 to 6 tube battery radio from 115 volt 50/60 cycle source. Complete filtering insures hum-free silent operation. Easily fits into battery compartment of most radios. Eliminates batteries, saves money. Low operating cost, uses only 11 watts. Has on-off switch. standard plug and sockets.

    QUIET - DEPENDABLE - LONG LIFE

    \section*{THEDADIADT CORPORATION}
    
    - ROTATORS
    - vibrators
    * auto aerials
    - tv antennas
    - power Supplies
    

    NOW - with the RADIART SEAL VENT, the vibrator is sealed BEFORE it is used - and VENTED after it is put into use. The RED SEAL rubberfaced bakelite plug prevents formation of an insulating film on the contacts. Heat generated when the vibrator is put into service melts the wax out of the sealed veni-hole and permits air circulation . . . FOR LONGER LIFE AND EVEN GREATER PERFORMANCE!

    The Radiart Vibrator Guide is the Standard of the Industry - Ask your jobber for your copy today!

    There are many reasons for the nation-wide preierence for Radiart Vibrators! One is the absolutely complete selec. tion of types manufactured there is a CORRECT Radiart replacement vibrator for most every need, to orig. inal specifications. In addi tion, the precision engineering behind the design of each type is backed up by highest standards of manufacture that assure peak performance . . . always!

    \(\mp\) A denotes Auro Rodio Style, \(S\) denates Single, \(T\) denates Tandem, \(H\) denotes Horizontal Mount, \(V\) denotes Vertical Mount. - denotes Vibrator to be wired into pasition.

    \section*{CIRCUIT DIAGRAMS}
    
    
    
    \(\qquad\)

    \section*{OBSOLETE TYPES}
    is entirely improctical to conlinue to stock the hundreds of different heovy-duty vibrolors thot have been supplied in post years for o lorge variety of uses. Every oftempt is made to maintain equipment in service, even though it ariginally used vibrotors which have generally become obsolete. Some obsolete vibrotor types ore still corried in limited stock at the factory. In a great many coses, simple instructions are availoble
    so thot a radio technicion can change wiring, sackets, or ather minor features in on old design to odopt it for use with new stondord vibrators.
    for information regarding o passible replacement for obsolete vibratars, send details including madel number af equipment, ariginal vibrator type number, valtoge and frequency to the dabber Service Department.

    \section*{RADIAFTVMFOMES}
    
    - For converting direct current to 110 volt \(\mathbf{6 0}\) cycle commercial AC.
    - For converting low voltage DC to high voltage DC.
    - For changing commercial AC to low volte age DC.
    - For obtaining sine-wave voltage, regulated AC from DC sources.
    - Suitable for any load within nameplate VA and P.F. ratings.
    - Ruggedly built for long and trouble. free service.
    
    1. Standard madels deliver 110 valts, 60 cycle, AC power. Continuous rotings are based on high power factor, rodio or TV rype loads. For inductive loads, ratings ore less by omount of the load power factor.
    2. All models are havied in cases of similar design and appearance. The clasz designations zignify opproximate size and weight, as follaw s:
    \begin{tabular}{|c|c|c|}
    \hline \multicolumn{3}{|c|}{} \\
    \hline LM - Light Midget & \(-3 \times 34 \times 4\) & -4 lbs . \\
    \hline M - Midget & \(-3^{1 / 16} \times 4 \% \times 51 \%\) & 6 \\
    \hline L - Lightweight & -51/2 \(\times 61 / 4 \times 8\) & - 12 \\
    \hline S - Standard & \(-5 \% \times 61 / 2 \times 9\) & 14 \\
    \hline H - Heovy & -61/2×71/2×11 & - 20 lbs . \\
    \hline SH - Super Heavy & \(-8 \times 91 / 2 \times 13\) & -35 \\
    \hline
    \end{tabular}
    3. For complete informotion see Rodiant VIPOWER Catolog.

    \section*{VOKAR "ITmperial replacement vibrators}

    FIRST premium-quality vibrator, designed, manufactured and packaged specifically for the replacement market - the Imperial is engineered to outperform and outlast any other vibrator on the market.
    Vokar guarantees this performance - unconditionally, for a full year!
    

    For all 6 and 12.volt outo-rodios built since 1939.

    \section*{QUALITY FEATURES - \\ TOP PERFORMANCE!}
    - LONGER SHELF LIFE
    - QUIETER
    - frequency accuracy
    - SURE STARTS
    - DEPENDABLE SERVICE

    \section*{WHY BUY 80 WHEN 8 WILL DO?}

    Only 8 Vokar Imperial Vibrators are needed for \(95 \%\) of all replacements. Over \(90 \%\) of requirements can be filled with only three lmperials!

    FILTERS-
    Any of the above Carter Genemotors or Magmotors can be furnished with complete filter mounted in metal box mounted below unit. Add ' \(\mathrm{X}^{\prime \prime}\) to end of code number and following prices. \(11 / 2^{\prime \prime}\) and ?" Frame Genemotor models and Magmotors, \(\$ 26.00\) list, \(3^{\prime \prime}\) Frame
    Genemotor Models, \(\$ 28.00\) list.
    STARTING RELAYS-
    Heavy Duty solenoid contactor starting relays are available for 5.5 .
    6. 12, 24. 28, 32 and 115 volt \(D C\) input. Add " \(R\) " to end of
    code number and \(\$ 8.00\) to list price Relay draws 1.3 amps at
    \(\delta\) volts). Seldom required on lovv power Magmotors.

    DUTY RATINGS
    ntermittent duty shall be considered 10 seconds on 20 seconds off Continuous duty is considered 24 bours per day.
    INPUT VOLTAGES-
    Any Carter Genemotor or Magmotor can be supplied for epecial input voltages other than 6 volts. For \(5.5,12,24,28,32\) ot 64 volt input add \(\$ 2.50\) to list. For \(115^{\circ}\) volt DC input add \(\$ 3.50\) to list.
    I.INE-O-LIFE* BRUSHES-

    All Carter products equipped with exclusive "LINE-O-LIFE" Brushes. Takes guess work out of brush replacements.
    TRADE MARK REG.

    See replacement parts reference chart page for other special models, farts and prices. The oflest name in Rotary Power Supplies for Mobile Radio

    \section*{CARTER SUPER CONVERTER-Changes DC to AC for}

    \section*{Amplifiers-Radios-High Power Factor equipment}
    
    C.arter Super Converter, Less Filter, 81/4" Long, 41/2" Wide, 5" Higii, Weight 13 lbs.
    Wherever DC to AC Conversion is necessary, the Carter Super Converter provides an efficient and reliable source of AC power. Standard models are designed for high power factor, non-inductive AC loads such as amplifiers, radio receivers, (requires filtered converter), etc. Ball bearing equipped, 3600 RPM. CAUTION: Standard Super Converters will not satisfactorily operate inductive loads such as AC motors, low power factor transformers, etc.
    Manually operated frequency controlled Converters available on special order. Maintain 60 cycle output with a + or - \(10 \%\) input voltage fluctuation.
    Special custom-matched Converters are also available for Wire and Tape Recorders, Sound Projectors, Television Receivers, etc. See Carter Selector Chart

    HEAVY DUTY SUPER CONVERTER
    10 \(1 / 4^{\prime \prime}\) long, \(41 / 2^{\prime \prime}\) wide, \(5^{\prime \prime}\) high, weight 19 lbs . Overall efficiency \(60 \%\) AC voltage regulation \(25 \%\).

    FILTERS-Available on all Super Converters. Eliminates Converter noise on most frequencies from 560 KC to 54 MC . Filter mounted in cast aluminum housing below Converter. Add " X " to Code Number and \(\$ 25.00\) to 1 list .
    FREQUENCY CONTROL-Manually operated frequency control available on all models. Complete with vibtating reed meter, and rheostat control in aluminum housing. Add \(\$ 60.00\) to list.
    FOR LOW COST-"Changera-Cycle" Frequency Control, add "A" to and of Code No. and \(\$ 10.00\) to list.
    VOLTAGE-FREQUENCY-Add \(\$ 5.00\) to list for 30 cycle output. Add \(\$ 10.00\) to list for 230 volt D.C. input.

    See Carter Selector Chart for Wire and Tape recorder, Television receivers, etc., recommended Converters.

    \section*{CUSTOM CONVERTER 300-400-500 WATT, 115 V. 60 CYCLE AC OUTPUT}
    

    The Custom is the latest addition to the Carter line of small DC to AC rotary converters. Created to meet the demands tor a compact and highly efficient two pole rotary converter, the Custom has been designed especially for amplifiers, office business machine, marine and mobile communications and high quality tape recorder requirements.

    The Custom is the only small rotary converter manufactured in recent years that has been expressly created to incorporate in its design all of the new materials and technical improvements developed in the past few years.

    High Power Factor-85 to \(100 \%\) Less Filter
    Cast aluminum base with rubber fect supplied, as illuserated. Average etficiency. \(60 \%\) all mudels listed less fileer single phase output unily Regulation approximately \(20 \%\) from no load to full load.

    \section*{FREQUENCY CONTROLLED CUSTOM FOR PROFESSIONAL AND BROADCAST TAPE RECORDING}
    

    The new Custom Converter with manual frequency control has been developed to provide a portable DC to \(A C\) power source for professional and broadcast tape recorders, heavy duty electronic measuring devices, and Tape recorder-AC motor driven camera combinations. Now for the first time, sufficient frequency constant \(A C\) power is available to operate this type of equipment from \(D C\) lines or battery source.
    The rheostat control and the frequency meter are mounted in the attractive aluminum housing. A noise filter is also available in the same housing, although it is not usually necessary for operating recorders, amplifiers or other audio devices. Filtering is required when radios or other RF circuits are opcrated from the converter.

    Convenient recessed DC male plug is furnished for 32, 64, 115 and 230 volt DC input models. 12, 24 and 28 models are equipped with heavy stranded input leads for battery connections, as shown. A flush AC mounted receptacle is supplied on all models for quick AC connections. The sturdy carrying handle allows the converter to be moved immediately after its operation, a life-saver for taping remote broadcasts.

    Each model must be designed to properly match the power factor, voltage, frequency, and load requirements. Any of the Custom models can be furnished with frequency control. Model listed below has been laboratory tested and is matched to provide perfect operation. Kindly send your special requirement to the factory for prompt and careful consideration.
    

    300 watt with Frequency Centrol, \(115 / 8^{\prime \prime}\) long. \(6+t^{\prime \prime}\) wide, \(101 / 4^{\prime \prime}\) high, Weight 44 lbs.
    400 and 500 watt, \(125 / 8^{\prime \prime}\) long, \(6 f^{\prime \prime}\) " wide, \(101 / 4^{\prime \prime}\) high - Weight 54 lbs.

    \section*{Girter \\ Selector Chait \\ \\ Converters for Popular Wire and Tape Recorders} \\ \\ Converters for Popular Wire and Tape Recorders}

    Converter AC output frequency and Converter Power Factor must he perfectly matehed to the recorder foad to assure proper recording and play
     Rotary Converters therefore will not operate the recorders properly as this type Converter wall produce higher AC voltage and frequency because of the inductive recorder load.
    The equipment listed below has heen lahoratory-tested and the corpect Carter Converter recommended for eash mudel. Use this chart fur your recorder Converter requirements. If the equipnent is not listed on this chart, please write tor the \(f\) etury

    *Harmonic filtered models. Harmonic content less than 3\%.
    tPortable models, supplied with cord and plug and output receplacle.

    \section*{FEATURES}
    1. Deliver accurate AC voltage within \(\pm 1 / 2 \%\)
    2. Stabilize output with more precision
    3. Regulate better at full load
    4. Hold up better under overload
    s. Better no-load to full-load regulation
    e. Accept wider input voltage range
    7. Less voltage change as units heat up
    - Less change in output as frequencies fluctuate
    -. Smaller, lighter, more compact; no moving parts
    10. Cost less to operate
    
    
    

    STYLE C

    The complete line of Raytheon Voltage Stabilizers is available through 155 authorized distributors. Special custom-built units, ranging from 5 to 10,000 watts are also available to meet special needs. Write for complete information.

    \section*{2 KVA Magnetic Amplifier}

    \section*{Voltage Stabilizer}

    Among the many advantages offered by Magnetic Amplifier Control are: constant voltage despite line voltage and frequency changes, lower harmonic content, better no load to fill load regulation, less cubic space required and ability to take heavy overload without damage. Employs selenium rectifiers and magnetic componenis in annplifier circuit-no filament type electron tubes and only one standard, longlife, readily available cold cathode voltage regulator tube. Voltage adjustment by potentiometer through screw driver slot in front panel. Write for complete information.
    

    \section*{SPECIFICATIONS}
    - Input: 115 volts, \(\pm 10 \%, 58-62\) cycles, single phase.
    - Output: 115 volts, 2000 va.
    - Fixed load stabilized to \(\pm 1 / 2 \%\) for line change.
    - Fixed load stabilized to \(\pm 1 \%\) for frequency change.
    - No load to full load (85\% power factor); \(1 \%\) maximum.
    - Temperature rise of components; \(50^{\circ} \mathrm{C}\) maximum.
    - Harmonics (at 60 cycles input); less than 5\% total.
    - Efficiency at full load (100\% power factor); 90\% minimum.
    - Mounting: Bench, floor, wall or relay rack.

    \section*{One Source for Volfage Control Equipment}

    \section*{VARIABLE TRANSFORMERS adjustable source of a-c voltage to 100 KVA}

    \section*{efficient - accurate - dependable}

    POWERSTAT variable transformers are autotransformers of toroidal core design with a movable brush tap which is rotated to deliver any desired output voltage from zero to, or above, line voltage. Glass smooth commutator surfaces and advanced winding techniques assure smooth operation and permit adjustment to a fraction of a volt. Other important features include: excellent regulation, high efficiency, conservative ratings, zero waveform distortion and rugged mechanical construction.

    A wide range of standard POWERSTAT variable transformers are available for 120,240 and 480 volt, single and three phase operation. Both manu-ally-operated and motor-driven types are offered. The rating chart lists some of the most-called-for standard POWERSTATS. Others - specifically designed to customer requirements-are available to fulfill each application. Consult us about your specific needs.
    standard types for varied applications

    \section*{POWERSTAT}

    VARIABLE TRANSFORMERS for

    OIL-COOLED OPERATION
    

    \section*{By immersing a}

    POWERSTAT in
    transformer oil, the rating above normal air operation is increased and duty in a corrosive atmosphere is possible. A standard line is offered in various ratings and sizes.

    EXPLOSIVE ATMOSPHERES

    TYPE X-1126
    To provide sofe operation in hazordous areas where a
     small arc or spork could couse an explosion, explosion-proof POWERSTATS are available. Standard models are approved by Underwriters' Laboratories for Class 1, Group D service.

    HIGH CURRENT NEEDS IIMITED OUTPUT RANGE

    TYPE 2106 C
    Refatively lorge amounts of power con be controlled
     by a small POWERSTAT when used in conjunction with o fixed-ratio transformer. This combination is known as a POWERSTAT Line Corrector. It can be used to correct line voltage variations to maintain a specified output voltage and to supply a limited output voltage range. A multitude of ratings are available.

    \title{
    STABILINE automatic voltage regulators to maintain constant output voltage made in 2 distinct types to meet each need
    }

    \section*{TYPE IE (INSTANTANEOUS ELECTRONIC)}
    
    for the most exacting control
    Type IE is completely electronic in operation with no moving parts. Providing instantaneous correction, it is ideal for laboratories, test lines, as a component of other equipment . . . and every. where that the most exacting voltage control is required. At no load, full load or any intermediate stage, constant output voltage is maintained regardless of line fluctuations. The output voltage is held to within \(\pm 0.1\) volts of nominal for wide line variations and within \(\pm 0.15\) volts of nominal for any load current or load power factor change from .5 lagging to .9 leading. Waveform distortion never exceeds \(3 \%\). Standard types are listed below. Consult us about your specific requirements.

    RATINGS TYPE EM
    for large industrial loads . . . for applications requiring zero waveform
     distortion and high efficiency
    Type EM is an electro-mechanical device with a very sensitive detector contralling a motordriven POWERSTAT variable transformer and auxiliary transformer. While not instantaneous, Type EM corrects faster than most other automatic voltage regulators. Highly efficient in operation, it finds widest application in controlling large industrial loads and also in electronic equipment where zero waveform distortion is essential. Features include: complete insensitivity to the magnitude and power factor of the load, no effect on system power factor, no critical adjustments and adjustable output voltage. Standard types listed below.

    \section*{A VARIABLE RANGE OF STABILIZED AND REGULATED D-C VOLTAGES FROM AN A-C SOURCE}

    The ideal source of low d-c voltages, the VARICELL is simply plugged into any convenient, single phase a-c outlel supplying a nominal 115 volts at 60 cycles and it is ready to operate. Turning the handwheel provides any desired output voltage from 0 to 30 volts. its load rating is 15 amperes. Any setting is unaffected by changes in line or load current. For any setting from 6 to 30 volts, R.M.S. ripple voltage never exceeds 0.1 volts, and stabilization and regulation is \(\pm 0.25\) volis.

    \section*{RF FILAMENT TRANSFORMERS}

    A sulf-resonant antas transformer for use with type 1 bis hactitior tule.
    W'ill operate with spellman lf coils
    TUNING PADDER iol Filament "ransformer"
    - BRONX, 67 , N. Y.

    \section*{ELECTRONIC RESEARCH ASSOCIATES, INC.}
    

    The standard 60 cycle models listed may also be operated at 400 cycles. The 400 cycle equivalents. however, are smaller and lighter for the same power rating.

    TRANSPACS

    \section*{Miniaturized Power Packs for Transistor, Vacuum Tube, and Standard Applications} SAVE SPACE, WIRING, AND WEIGHT

    Tubeless, miniaturized, self-contained, AC operated DC power packs. Wired into circuits TRANSPAC supplies a rugged, reliable source of DC power for miniature or standard size electronic devices. Design features include line isolation, rectification using semi-conductor diodes, use of selenium, gas, or magnetic amplifier regulators (dependent on model typel and high efficiency filtering. All units are in transformer type housings and specially potted to resist shock and vibration.

    \section*{STANDARD MODEL TRANSPACS}

    LOW VOLTAGE TRANSPACS
    Ideal for Magnetic Amplifier references, transistor and vacuum tube hias, and all types of regulated low voltage applications. Line and had regulated. Input 100.125 volts, 60 or 400 cyeles. Input rerulation leeter than \(\pm 2 \%\). Output regulation better than \(\pm 2 \%\). Ripple less than \(0.2 \%\).

    \author{
    TUBELESS! REGULATED DC/AC POWER SUPPLIES \\ \(\sqrt{ } \sqrt{ }\) High Conversion Efficiency \\ \(\sqrt{ }\) Low Heat Dissipation \\ , Excellent Transient Response \\ \(\checkmark\) No Tubes, Long Life \\ \(\sqrt{ } \sqrt{ }\) Zero Warm-up Time \\ \(\sqrt{ }\) Stable, Trouble-free Operation
    }

    These Tubeless Power Supplies pioneered by ERA eliminate the drawbacks inherent in standard vacuum tube equivalents. Line regulation is accomplished by passive magnetic elements. Use of variable auto-transformers provides for low loss constant impedance voltage adjustment down to zero output. Germanium junction diodes and low resistance filtering components are utilized for the DC output. This combination results in cool, high efficiency, long life operation, free from the convention control tube heat dissipation or Magnetic Amplifier transient limitations.

    OREFIELD, PA.
    

    \section*{ELECTRONICALLY REGULATED D.C. CONSTANT VOLTAGE POWER SUPPLIES}

    MODEL 1 RELAY RACK MOUNTING \(\$ 52.50\)

    Input: 105-125 volts AC. 50-60 cycles.
    DC Output Voltage: Continuously variable from 200 to 325 volts DC for load currents 0 to 100 ma .

    Regulation of DC Voltage: Better than \(1 \%\) for loads of 0 to 100 ma. and line voltage variations from 105 to 125 volts.

    Ripple Output: Less than 10 millivolts rms.
    Isolated Oulput: Both positive and negative sides of the output are isolated from ground. Either side may be grounded or the output may be left floating.

    AC Output for Filaments: An isolated AC voltage of 6.3 volts \(A C\) at 3 amperes is available at the output terminal connections.

    Overload Protection: A fuse momnted on the front panel protects supply against external overloads or internal failure.

    Input and Output Connections: All input and output comections are made to a single terminal strip conveniently located on the rear of the chassis.

    Dimensions: Standard \(19^{\prime \prime}\) relay rack mounting. D'anel Width: 19 inches: Panel Height: \(51 / 4\) inches; Hepth hehind l'anel: \(81 / 2\) inches.

    Cabinet and Panel Finish: Standard 13lack ripple enamel.

    Controls: Rear Chassis-DC output voltage control. Front P'anel-pilot light, input power switch, and fuse.
    Weight: Net weight is approximately 20 pounds.
    High Quality Components: Only components of the highest quality are used in this equipment insuring you years of trouble free dependable operation.

    Accessibility: by removing two small screws. the front panel may be remosed while the supply stays momated on a relay rack or cabinet. This allows quick and easy inspection.

    \section*{MODEL 2 SUB-CHASSIS MOUNTING \$49.50}

    Sub-chassis mounting type regulated power supplies are designed to save space and money. They can be momed on a chassis along with other components and thereby save space which wond he nsed by a relay rack mounting supply. Savings are made in the size and cost of the cabinet required for a job along with the lower cost of the sub-chassis mounting supplies.

    \section*{SAME AS MODEL 1 EXCEPT}

    Dimensions: \(9^{\prime \prime}\) wide. \(83 / 4\) " long, \(43 / 4\) " high above chassis. \(13 / 4\) " clearance required helow chassis. Size of cut-out required: \(\varepsilon^{1 / 8^{\prime \prime}}\) wide \(\times 8^{\prime \prime}\) high. Location of four monnting holes: \(85 / 8\) " wide \(x 8!!"\) high.

    Chassis Finish: Zinc plated or equivalent.
    Controls: DC output voltage control adjustable from the top side of the chassis.
    

    Weight: Net weight is approximately \(141 / 2 \mathrm{lhs}\).

    \section*{SOLA Electric Co. - Chicago 50, III.}

    FLUCTUATING LINE VOLTAGE
    CONSTANT OUTPUT VOLTAGE
    

    \section*{Automatic Instantaneous Voltage Regulation}

    SOLA Constant Voltage Traneformers are static magnetic voltage regulators. They are designed to provide a constant output voltage which is unaffected by changes in input voltage. You will find. listed in the following pages, the widest range of ratings and types available from stock offered loy any mamniaturer.

    In addition, CISTON DESIGXED [VITS can be manufactured in caparities from 1 V.A. to 25.0100 V.A., to suit your individual -prifications. When ordered in substantial quantities. Whey cost only slighty more than standard units of the sime general size. Often, time and money ean be saved ly dirert uee or modification of a regulator from the several lmodred sperial desizns on file. Custom derigns can inelude: speclat. Vol.TAGE RATIOS, SPECIAI. FREOI ENCIES COMIENSATION FOR FREQIENCY VARIITION. HITTHE OLTIUT VOITAGES. THREE-PHIEE SERVICE. and MLITARY SIECIFICATIONS.
    sOLA Constant Voltage Transformers have eight distinct advantages over regulators which depend solely upon saturation of core materials for their regulating action, or electronic type regulators:
    1. Response time, 1.5 cycles or less.
    2. No moving or renewahle parts . . . no manual adjustments.
    3. Completely automatic contimous regulation.
    4. Self-protecting against short circuits.
    5. Current limiting characteristic protects load equipment from excessive fault currents.
    6. Can often be substituted for conveutional non-regulating transformers.
    -. Relatively compact.
    : Provide isolation hetween input and output circuits.

    For complete operational data write for Bulletin 4M-CV-200
    

    \section*{CONSTANT VOLTAGE TRANSFORMER FOR PLATE AND FILAMENT SUPPLY TYPECVE}

    A single, compact source of filament and plate supply voltages . . . regulated to within \(\pm 3 \%\) or less with line voltage variations of \(100-130\) volts. Supplied with separate capacitor.

    POLY-PEDANCE MODULATION MULTI-TAPPED UNITS TO PROPERLY MATCH THE OUTPUT OF THE MODULATOR STAGE TO THE MODULATED LOAD. WILL MATCH ALL COMMON IMPEDANCES OF CLASS "B" MODULATOR ( 2,000 to 20,000 OHMS) TO CLASS "C" LOAD IMPEDANCES OF 2,000 TO 20,000 OHMS.

    The number of excellent transmitting tubes available is constantly matching some given modulator tubes or R.F. load. These units give increasing. R.F. applications, too, have increased and it is sometimes an almost unlimited range in power and impedance ratings to assure increasing. R.F. applications, to obtain the correct modulation transformer suitable for a correct impedance match in all cases.

    \section*{LINE ADJUSTING AUTOFORMERS}

    Stancor Line Adjusters permit operation of clectrical devices at 115 of a solector switch and is accurately indicated by an output voltmeter, volts when the supplied voltage is \(65,75,90,100,115,130\) or 145 . The meter has a convenient red-line marker at 115 volts on a 150 volt They are also useful for altering a 115 volt line above or below that scale level. The line adjuster input is correctable in seven steps by means

    \section*{DETAILS OF NEW EQUIPMENT LINE MOUNTINGS}

    H-TYPE MOUNTING-Hermetic sealing meets S-TYPE MOUNTIG-Precision-fitted steel all MIL-T-27 specifications. Steel base cover is bonded into the case by deep-seal soldering. Terminals are hermeticall: sealed by unique rubber gasket-ceramic bushing construction. Units are stud mounted.
    C-TYPE MOUNTING-Moisture-resistant compound surrounds coil and core. Ten-inch, \(12.11 .1-\) color-coded leads, ends stripped and tinned for easy soldering. Flange-mounted drawn steel
    base-covers and terminal boards, plus compound filling, keep moisture out. Solder-lug terminals are ctearly identified, easy to use. Drawn sterel cases are llange-mounted.

    B-TMPE MOINTING Steel bases are bonded into the drawn steel cases by deep-seal soldering to make units completely moisture proof. Studmounted cases take minimum chassis space.

    \section*{AUDIO TRANSFORMERS}

    CHICAGO STANDARD TRANSFORMER CORPORATION

    \section*{TRANSISTOR TRANSFORMERS}

    Here are the smallest iron core audio transformers ever built. They weigh less than \(1 / 10\) ounce and are no larger than the transistors they power. Write for Bulletin 462 showing typical circuit application.

    These transformers are designed primarily for transistor mudio application but they can be used wherever low power is involved. Useful range, below 1 mw level. They are constructed of extremely fine wire, wound on molded nylon bobbins, with special nickel alloy steel laminations. Mounting style is coil and iron only, type UM.

    SPECIAL Chicago-Stancor ultra-miniature transistor transformers, designed and built to your requirements, can be supplied in quantities of five or more. Send your specifications for information on price and delivery.

    \section*{MINIATURE HIGH FIDELITY AUDIO TRANSFORMERS}

    Chicago-Stancor Tinytrans are miniature transformers made with nickel steel laminations. They have an exceptional frequency response for units of this size; \(\pm 1 \mathrm{db} .30-1 \overline{0}, 000 \mathrm{cps}\), Maximum level 0 db . Write for Bulletin 463 showing frequency response curves on these transformers.

    These units are sealed and potted in \(7 / 8^{\prime \prime}\) square, anodized aluminum cases with phenolic terminal boards. Total height, including terminals, is \(11 / 4^{\prime \prime}\). The case has two \(2-56\) threaded inserts, \({ }^{11}\) 年" centers, for easy
     chassis mounting. The entire transformer weighs only 1.3 ounces.

    \section*{PUBLIC ADDRESS RANGE TRANSFORMERS}

    \section*{Frequency Response within \(\pm 1 \mathrm{db}, 50\) to 10,000 Cycles}

    Driver and output transformers in this CHI-
    CA(iO series are designed for three general power levels to fit a wide range of application. Up-to-date secondary impedances match 600 or 150 -ohm lines, 16,8 , and 4 -ohm speakers.
    ( \(16 / 8 / 8\)-ohm taps also suitable for \(20 / 6 / 3.2\)-ohm speakers.) Output transformers have tertiary windings for \(10 \%\) inverse feedback that minimizes distortion and provides extra audio watts without loss of fidelity.

    TRANSFORMERS
    CHICAGO STANDARD TRANSFORMER CORPORATION

    \section*{HF AND WF SERIES HIGH FIDELITY AUDIO TRANSFORMERS}

    \section*{HF Series}

    These units have a wide frequency response of 20 to \(20,000 \mathrm{cps}\) with \(\pm 1 \mathrm{db}\). Correct design reduces harmonic and intermodulation distortion to a negligible amount. Balanced construction minimizes hum pickup. Chicago-Stancor impregnation insures long life. Cases are finished in gray enamel and have four threaded holes at each end for flush mounting. Studtype terminals are plainly marked for easy identification.

    \section*{WF Series}

    These units are of the same outstanding quality as the HF Series above, and, with the exception of two units, have a frequency response within +2 db from \(50-20,000 \mathrm{cps}\) and \(\mathrm{F}-21\) and \(\mathrm{F}-35\) have a resp
    

    TResponse \(\pm 1\) db from 25 to \(20,000 \mathrm{cps}\).
    - As compared to standard uncased units. \(\ddagger\) Quadruple alloy magnetic shied.
    extremely low hum pickup. All WF units are cased in the WF-6 type cast case with phenolic terminal board and four tapped holes for flush mounting. Overall dimensions are \(2^{\prime \prime}\) high with \(11 / 2^{\prime \prime} \times 1 / 2^{\prime \prime}\) base area. Mounting centers are \(1^{3} z^{\prime \prime} \times 1^{5} x^{\prime \prime}\). Shipping weight is 0.6 lbs .
