NINETEENTH EDITION

## FOREWORD

RADIO'S MASTER ${ }^{\circledR}$ (is the official buying guide and reference book of radio parts and electronic equipment for the industry.
The distribution of this buying guide is not a representation by the person or firm distributing the same that all of the lines and all of the products contained herein are necessarily carried by such person or firm.

Prices are furnished only for information-they are not offered as quotations.

WHERE LIST PRICES ARE SHOWN, TRADE DISCOUNTS APPIY IN MOST CASES. . . . . PHONE OR WRITE FOR PRICES AND DELIVERY.

Enrolled manufacturers reserve the right to make mechanical changes in specifications necessitated by emergencies over which they have no control, and to change prices or withdraw items without notice.

Every precaution is taken to insure accuracy in the preparation of display pages and indexes, but the publishers cannot guarantee against the possibility of error or omission, nor can they be held responsible for price changes or withdrawal of items during or after publication.

## I M P ORTANT

When ordering, please mention RADIO'S MASTER, 19il EDITION, also page number on which the item appears and specific catalog or code number, if any. This will help to expedite the filling of your order and lessen the chance of error.

FOR SPECIFIC ITEMS AND THEIR PAGE NUMBERS, REFER TO GENERAL INDEX PAGES 9 TO 22 FOLLOWINg

# RADIO'S MASTER. <br> NINETEENTH EDITION <br> NUMERICAL INDEX OF MANUFACTURERS' DISPLAY PAGES <br> By Section and Folio 

NOTE: This is a bare outline of the eighteen sections of RADIO'S MASTER. It will serve for speedy reference and for the purpose of familiarizing yourself quickly with its general contents. Regular use of the Master will reveal many additional items too numerous to list here-you may also discover an item in a section to which it does not directly relate. For more complete and precise information, consult the detailed General Index which follows (Index pages 9 through 22).

# D A ELECTRON TUBES REPLACEMENT DIRECTORY 

for INDUSTRY and COMMUNICATIONS

## Direcł Replacement Types

RCA types shown below are direct replacements under all circumstances for corresponding types to be re－ placed．Tube types covered include：Vacuum Power

Tubes，Rectifier Tubes，Thyratrons，Ignitrons，Voltage Regulators，Phototubes，Cathode－Ray Tubes，and Special Types．

| Type to be Replaced | Replace by RCA Type | Type to be Replaced | Replace by RCA Type | Type to be Replaced | Replace by RCA Type | Type to be Replaced | Replace by RCA Type |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Foremost in the field

RAYTHEON TRANSISTORS lead the field in reliability. Over 1,000,000,000 operating hours of actual field performance in commercial equipment with only a fraction of $1 \%$ field returns. This proves their reliability to be
superior to that of vacuum tubes. Raytheon Transistors lead the field in number of units used in commercial equipment. Successful experimental, then pilot and now continuous mass production and inspection techniques are employed. Hundreds of thousands of Raytheon Transistors are in actual commercial use-many times more than all other makes combined.

GERMANIUM DIFFUSED JUNCTION PNP TRANSISTORS

## AAYTHEOM <br> GERMANIUM DIODES

## NEW

 WEATHER CYCLED GERMANIUM DIODES- Completely sealed against atmospheric conditions
- Every diode temperature-humidity cycled for 32 hours
- Samples of every production lot put through JAN-193 humidity test
- Available in both "plug-in" and "solder-in" design
- Extra rugged and shock resistant

- Coafed with protective insulating lacquer
- Extremely smoll size

# EQUPP YOUR SETS WITH THESE TUBES THAT HELP SALES! 

## Sylvania's high-quality

receiving tubes and picture tubes offer extra dependability ...extra fine performance.

Years of pioneering, research and development have established Sylvania as a world leader in the production of highest quality radio and television tubes. Today set builders and set owners alike know that Sylvania stands for the very highest quality and unbeatable dependability.

Moreover, the Sylvania tube line is a complete line providing tubes for every set and every circuit. Check this list of popular Sylvania tube types now available. For prices, specifications, and detailed data concerning any of these tubes, write a line on your letterhead to Dept. 4R-80 Sylvania.

## NATIONAL UNION ELECTRIC CORP MANOFIC:

# WESTINGHOUSE RELIATRON TUBES <br> WESTINGHOUSE TUBE FACILITIES 

Westinghouse RELIATRON receiving tubes, picture tubes, and power tubes are manufactured in these two giant modern plants which comprise the new Electronic Tube Division of Westinghouse Electric Corporation. The Division offers manufacturers and distributors of electronic equipment the complete lines of tubes listed on the following pages. All are produced under rigid Westinghouse quality control standaris. In addition Westinghouse is conducting long-range development programs on receiving and picture tubes for color television. For information concerning Westinghouse Electronic Tubes, contact one of the sales offices listed below:

Boston, Mass.
10 High Street LIberty 2-0600

Providence, R. .
51 Empire Street GAsper $1-0818$

Bloomfield, New Jersey
MacArthur Avenue BLoomfield 2-2200

## TRANSISTORS

Engineering samples of germanium and silicon diodes and transistors of several types
 are available. Out. standing additions to the Westinghouse line are three new Germanium PNP Junction Transistors for low power, low frequency amplifier applica. tions, the $2 \mathrm{~N} 54,2 \mathrm{~N} 55$, and 2 N 56 . These transistors are capable of dissipating more power than other transistors of comparable size. Operation within maximum ratings will permit stable function. These new junction transistors are designed for direct wiring. They are encapsulated in thermosetting resin which protects against deterioration due to penetration of any exterior agents.

## RECEIVING TUBES

Reliatron Tube performance is assured by an exacting program of quality
control. Every step in the manufacture of Reliatron Tubes from raw materials
to finished product - must meet siandards which are the toughest in the
industry.
Oomplete data on these tubes is available on request. Write: Westinghouse
Electronic Tube Division, Dept. RM 500, Elmira, New Iork.

## of Leadership!

Since 1934 Eimac electron-power tubes have been specified by leading engineers for all types of military and commercial application.

The incomparable performance, reliability and quality of Eimac tubes hes enabled Eitel-McCullough, Inc. to become the world's largest manufacturer of transmitting tubes in just two decades.

# CETRON ELECTRONIC TUBES © © 

Engineered and Manufactured by Continental Electric Co., Geneva, Illinois<br>Specialists in Phata Emissive and Phata Canductive Tubes

## CETRON PHOTOTUBES

CETRON phototubes are either of the gas-filled or of the vacuum type. With the gas-filled type, greater effective response is obtained, particularly in how impedance circuits, while the vacuum type is recommended where maximum stabily and signal to noise ratio are desired. CETRO. phototubes are sclceted as to their sensitivity and priced accordingly. Phototubes of the Super Class A/B or ase generally used for experimental purposes where very high sensitivities are required; Class $C$ or $R$ mostly for motion picture equipment; Clase $D$ for relay work, ete.

CETRON RED SENSITIVE PHOTOTUBES (S1 Surface)
CETRON red sensitive phototubes are suailable in three sensitivity classes, $A / B, C$ and D. The CETRON gas-filled and vacuum red sensitive tubes comprise a most complete line for sound reproduction. For complete engineering specifications, write for our pC $8 / 9$.

CETRON BLUE SENSITIVE PHOTOTUBES (S4 Surface)
CETRON blue sensitive phototubes are available in two sensitivity classes, $Q$ and $R$. The CETRON gas-filled and vacuum blue sensitive tubes comprise a most complete line for sound reproduction work from dye recorder film. For complete engineering specitications, write for our PC 8/9.

## CETRON LEAD SULPHIDE PHOTOCELLS (Infra-red)

CETRON lear sulfide infra-red photoconductive cells are made in a variety of miniature types. They are also available in a variety of sensitive areas and resistances. CETRON lead sulfide photocells are available in three sensitivity classes, A, C and D. For complete engineering specifications, write for our lead sulfide Jiterature.

## CETRON SPECIAL PURPOSE PHOTOTUBES

Continental Electric also manufactures a complete line of special purpose photocells, such as the CE-5, CE-7, CE-8, CE-10, CE-12, CE-15, CE-18, CE-26, etc. We will be happy to work with you on design and development problems, also on any special phototuhes your application may require. Full data, price, etc, on special phototubes will be forthcoming upon reouest.

Detailed engineering specifications on all tubes are available upon request. The extensive engineering and manufacturing facilities which we have, make possible the development and production of many types of special tubes to your specifications. If you have a problem involving the use of any CETRON tubes you are invited to consult us.

## WARRANTY

We guarantee all products manufactured by us to be free from all material and manufacturing defects and to give satisfactory service when operated in accordance with instructions indicated for their use.

> CONTINENTAL ELECTRIC CO. Geneva, Illinols

$+6268 / A X \cdot 9911$ and $6279 / A X-9912$ are improved. interchangeable versions of 4C35 and 5C22 respectively. Min. guaranteed life 1000 hrs.

## Electronic Tubes and Equipment

Tubes listed on this page can usually be supplied direct from stock. Many other types are available for immediate delivery - write for catalog. CHATHAM also designs, develops and manufactures special tubes to exact customer specifications - inquiries are invited.

## - CHATHAM RUGGEDIZED 2D21W THYRATRON

A ruggedized Xenon filled shield grid thyratron for grid controlled rectifier service. Permits use of high resistance in the grid circuit. Heater 6.3 volts, 6 amp . . . . inverse peak plate voltage 1300 volts, average plate current 100 ma.

- chatham ruggedized srawgy rectifier A ruggedized full wave high vacuum rectifier designed for high altitude operation. Heater voltage 5 volts, heater current 2 amps . Peals inverse voltage 2800 volts, peak plate current 650 ma .
- chatham gaste twin power triode

Features plate current and GM characteristics held to within $\pm 10 \%$. Recommended for voltage regulation circuits. No grid current; greatly reduced plate current draft. Plate current 125 ma at 40 volts D.C. Amplification factor 2.

- ChATHAM 6336 TWIN TRIODE

Specially suitable for voltage regulating applications. As a series tube will pass 150 ma per section at 40 volts D.C. Plate dissipation 30 watts; Amplification factor 2.7. Features hard glass envelope.

## - Chatham 122 RECTIFIER

A small bulb high voltage vacuum rectifier. Low cathode heating power and low dielectric losses make tube suitable for radio frequency supply circuits. Filament 1.25 volts, 275 amps.... Inverse peak anode voltage 15,000 , average plate current 1.5 ma . peak anode plate current 8.5 ma .

## - CHATHAM 3 B28 RECTIFIER

This rugged half wave Xenon filled rectifier will operate in any position and throughout an ambient temperature range of $-75^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$ Fil. 2.5 volts, 5.0 amp. . . . Inverse peak anode voltage 10,000 volts, .25 amp . average anode current.

## - chatham ab32 rectifier

A rugged half wave Xenon filled rectifier. Operates in any position throughout an ambient temperature range of $-75^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$ Fil. 5 volts, 7.5 amp . . . Inverse peak anode voltage 10,000 volts, 1.25 amp . average anode current.

## - CHATHAM 394A THYRATRON

A Mercury vapor and Argon filled thyratron for grid controlled rectifier service. Operates over a wide ambient temperature range. Heater 2.5 volts, 3.2 amps. . . . Inverse peak anode voltage 1250, average anode current 640 ma .

- Chatham 395a cold cathode gas triode Requires no filament supply and is used in many grid controlled rectifier and relay applications. Maximum DC anode current, 10 ma . Maximum DC anode voltage, 150 volts.
 built by CHATHAM checks receiver type tubes under pulse operating conditions.

## Gustom-Buitr Electronic Equipment

CHATHAM specializes in the
development, design, and construction of custom-built electronic equipment to exactly meet customers' requirements. Our capable staff of engineers will furnish prompt estimates or, if desired, will call to discuss your problem personally. Call or write today for complete information.

Write today for the informafive CHATHAM catolog. For free copy address requests on company letteshead - no obligation.

- 5 Megawatts radar modulator built by CHATHAM to rigid government standards.

## PRICES

Prices of manufacturers and suppliers' products listed in RADIO'S MASTER are subject at all times to change without notice - they should not be considered final.

Get quick on-the-spot quotations from your distributor who subscribes to our perpetual up-to-the-minute PRICING SERVICE.

## Model 2122C <br> 10-Watt Amplifier

Power Output: 10 watts at 2 笑 distortion. Peak 15 watts.
Frequency Response: 20 to 20,000 cycles plus or minus $3_{i} \mathrm{db}$ with controls set for flat response.
Hum Level: 65 db below rated output.
Inputs: Radio; Tape, TV or Crystal; \#1 Mag. \# \#2 Mag.
Controls: Selector switch with equalization (5 positions) : Volume: Bass, minus 14 db to plus 13 db variation at 100 cycies; ' 1 reble $w / \mathrm{AC}$ switch, minus 13 db to plas 12 db variation at 10 K cycles.
Outputs: 4, 8, 16 ohms, plus higr imp. jack for disc or tape recorders.
Power Consumption: 75 watts ; 117 volts; $50-60$ cycles.
Tubes: (Six) 2-6SC7; 1-6SL7; 2-6V6GT; 1-5Y3GT.
Size $\&$ Weight : $8^{\prime \prime}$ deep; $1112^{\prime \prime}$ wide $; 6^{\prime \prime}$ high. Net weight $101 / 2 \mathrm{lbs}$.

## Model $2199 B$ 12-Watt Amplifier

Power Output: 12 watts at $1 / 2$ of 19 . Peak 20 watts. Frequency Response: 20 to 20,000 cycles plus or minus $1_{2} \mathrm{db}$ with controls set for flat response.
Hum Level: 70 db below rated output.
Inputs: Radio; Tape or TV; Crystal; 2 Mag.; plus a special in. put for frequency modulated and ceramic pickups.
Controls: 7-position Equalization and Selector switah; continuously variable compensated Loudness Control; Gain; Bass. minus 14 db to plus 13 db at 100 cycles; Treble $\mathrm{w} / \mathrm{AC}$ switch, minus 13 db to plus 12 db at 10 K cycles; Motor Eumble Supminessor switch on chassis deck.
Outputs: 4,8,16 ohms, plus high imp. jack for tape or disc recorders.
Power Consumption: 75 watts; 117 volts: $50-60$ cycles.
Tubes: (Six) 1-6SC7; 2-6SL7; 2-6V6GT: 1-5Y3GT.
Size \& Weight: $88 / 8^{\prime \prime}$ deep; $18^{\prime \prime}$ wide: $61 / 4^{\prime \prime}$ high. Net wt. $131 / 2$ lbs.

Power Outpat: 20 watts at less than $.3 \%$. Peak 35 watts.
Frequency Response: 20 to 20,000 cycles plus or minus .2 db with controls set for flat response.
Hum Level: 80 db below rated output.
Inputs: TV; 2 Mag. ; Crystal ; Radio ; Tape ; Micro.
Controls: 5-position Equalizer switch; 5-position Selector switch ; Bass, minus 17 db to plus 15 db at 40 cycles; Treble, minus 28 db to pius 18 db at 15 K cycles; Volume; Compensation and On-Off switch.
Outputs: 4, 8, 16 ohms, plus high imp. jack for tape or disc recorders.
Power Consumption: 150 watts; 117 volts; $50-60$ cycles.
Tubes: (Seven) 1-12SC7; 1-6SN7GT ; 2-6SL7GT ; 2-5481; 1-5U4G.
Size \& Weight: $83 / 4^{\prime \prime}$ deep; $16^{\prime \prime}$ wide; $75 / 8^{\prime \prime}$ high. Net weight 24 lbs.

## Model 3-D BINAURAL Amplifier

Power Output: 20 watts ( 10 watts each channel) at less than $1 / 2$ of $1 \%$ total distortion. Peak 35 watts.
requen Res or minus $1 / 2 \mathrm{db}$ with tone controls set for flat response.
Hum Level: 70 db or more below rated output.
Dual Inputs: Tape, Radio, Phono
Controls: 8-position Selector switch; 6-position Function switch (Binaural, Monaural or Reverse Binaural, each with or without loudness) ; Balance; Gain; Bass, minus 18 db to plus 17 db at 100 cycles: Treble w/AC switch, minus 17 db to plus 16 db at 10 K cycles.
Dual Outputs: 4, 8, 16 ohms, plus high imp. jack for tape re-
corders.
Tubes: (Eleven) $2-12 A X 7 ; 2-12 A T 7 ; 2-12 A Y 7 ; 4-6 \mathrm{~V} 6 \mathrm{GT} ; 1$ - 6 U 4 G. Size \& Weight : $11^{\prime \prime}$ deep; $16^{\prime \prime}$ wide; $8^{\prime \prime}$ high. Net weight 26 lbs.

## Model 2145A Amplifier

WITH REMOTE CONTROL

## SPECIFICATIONS

Frequency Response: Within $\pm .25 \mathrm{db} 20$ to $\mathbf{3 0 , 0 0 0}$ cycles.
Power-Distortion: (a) Distortion at normal listening levels is less than 2 of $1 \%$.
(b) 20 watts at less than $2 \%$. Peak output 30 watts.
(c) Less than .1 of $1 \%$ total distortion contributed by preamplifiers and control unit.
Hum and Noise Level: (a) 80 db below full output minimum (b) No audible hum with all controls at maximunn, noise at least 10 db below surface noise of best record surface.
Inputs: Six: Hi-level mag; Lo-level mag; Crystal pickup: Microphone; Hi-level radio; Lo-level radio.
Controls: Remote Control Unit: Selector switch, 5 phono poeitions, 2 radio positions; Volume control (compensated): Bass control; Treble control. Power Amplifier: AC switch, provision for remote AC switch, Master gain control.
Output Impedance: 4, 8, 16 ohms.
Tubes: Eleven-3-12AU7; 3-12AX7; 2-6SN7GTA; 2-6B4G; $1-5 \mathrm{~V} 4 \mathrm{G}$.
Power Consumption: 150 watts nominal at 117 Volts, 50-60 Cycles.
Dimensions and Weights: Remote Control Unit: $31 / 2^{\prime \prime}$ deep, $10^{\prime \prime}$ wide, $41 / 4^{\prime \prime}$ high-Weight: $31 / 2 \mathrm{Lbs}$.
Power Amplifier: $81 / 2^{\prime \prime}$ deep, $17^{\prime \prime}$ wide, $7^{\prime \prime}$ high-Weight: 23 Lbs.

- Exceptional Tone Quality
- Phono Tops Available

A fine performing, versatile, 15 watt amplifier. Utilizes pushpull beam power output tubes, and an inverse feedback to reduce total distortion. Three inputs with separate volume controls permit simultaneous mixing of two microphones and a phonograph. Standard top can be easily replaced with a phono top accessory, either single speed (Model 2196) or three speed (Model 2197), making the phonograph an integral part of the amplifier.

## SPECIFICATIONS

Power Output: 15 Watts at Less Than Power Output: 15 Watts at Le
$5 \%$. Peak Power: 18 Watts.
Frequency Response: 30 to 15,000 Cycles Plus or Minus 2 db .
Gain: Microphone Channels, 120 db : Phono Channel, 81 db .
Hum Level: 65 db Below Rated Output. Inputs: 2 Microphone; 1 Phonograph. Input Impedances: Micro Channels, 3 megs.: Phono Channel, $1 / 2$ meg.
Controls: 2 Micro Volume 1 Phono Volume; 1 Tone with AC' Switch.

Output Impedances: $2.5 ; 4 ; 8 ; 16 ; 250$; 500 Ohms and 70 V Constant Voltage Tap.
Power Consumption: 100 Watts; 117 Volts; 50-60 Cycles.

Dimensions: $111 / 2^{\prime \prime}$ Deep; $8^{\prime \prime}$ High: 161/2" Wide.
Shipping Weight: 32 lbs .

## 25 WATT BELL AMPLIFIER

An eight tube version of one of Bell's most popular units, this model incorporates several new design features, including an additional microphone imput. Each of the three microphone inputs and the phonograph input has a separate volume control. Bass and treble tone controls are also separate. Easy-to-read, sloping, lighted control panel. Wide range of output impedances permits matching to any speaker load.

Phono Tops: Standard top can be easily replaced with single or three speed (Models 2196 or 2197) turntable phono top.

## SPECIFICATIONS

Power Output: 25 Watts at Less Than 5\%. Peak Power: 33 Watis.
Frequency Response: 30 to 18,000 cycles Plus or Minus 2 db .
Gain: Microphone Channels, 122 db ; Phono Channel, 80 db .
Hum Level: $6 \overline{\mathrm{D}} \mathrm{db}$ Below Rated Output. Inputs: 3 Microphone; 1 Plionograph. Input Impedances: Micro Channels, 3 megs. ; Phono Chsmnel, $1 / 2 \mathrm{meg}$.
Controls: 3 Micro Volume: 1 Phono
Volume; Bass: Treble, with AC Solume:

Output Impedances: 2.5; 4; 8; 16. 250; 500 Ohms; 70 V Constant Voltage Tap.
Power Consumption: 150 Watts, 117 Volts. 50-60 Cycles.
Tubes: 3-6AU6; 1-6SF5; 1-6N7; 2-6L6G; 1-5U4G.
Dimensions: $111 / 2^{\prime \prime}$ Deep; $8^{\prime \prime}$ High 161/2" Wide.
Shipping Weight: 34 lbs.

- Attractive Modern Design
- Four Inputs: Three microphone, 1 Phonograph
- Separate Bass and Treble Controls
- Illuminated Control Panel
- Phono Tops Available

## 50 WATT BELL AMPLIFIER

## Model 3750B

- Rugged Construction.
- Four Inputs.
- Bass and Treble Boost.
- Available for Remote Standby Operation.
- Excellent Frequency Response.

Sufficient wattage to cover 90 per cent of commercial sound requirements. Tone control circuits, operating in an inverse feedback network, provide wide tone adjustments with very low distortion.

Model 3750BR is the same basic amplifier with built-in stand-by relay for economical operation and prolonged life.

## SPECIFICATIONS

Power Output: 50 Watts at Less Than 5\%. Peak Power: 80 Watts.
Frequency Response: 30 to 15,000 Cycles Plus or Minus 1 db . Gain: Micro Channels, 125 db ; Phono ain: Micro Chan
Channel, 85 db .
Hum Level: 67 db Below Rated Output. Inputs: 3 Microphone; 1 Phonograph. Input Impedances: Micro Channels, 10 megs.; Phono Channel, 1 meg.
Controls: 3 Microphone Volume; 1 Phono Volume: Bass; Treble, with AC Power Switch. Model 3750BR has Stand-by Relay.

Output Impedances: 2.5; 4; 8; 16; 250 : and 500 Ohms and 70 V Constant Voltage Tap.
Power Consumption: 260 Watts at 117 Volts; $50-60$ Cycles. Adjustable 105-117-128 Volts.
Tubes: 3-7C6; 3-6SC7; 1-6SN7GT 2-6L6G ; 1-5U4G; 1-5R4GY; 1-5V 4 G .

Dimensions: $161 / 2^{\prime \prime}$ Deep ; $8^{\prime \prime}$ High: $161 / 2^{\prime \prime}$ Wide.
Shipping Weight: 60 lbs .

SERIES
AMPLIFIERS
A Low Priced Line of
Superior Utility Amplifiers

The same fine workmanship and materials as the incomparable KX. and H-Series. Designed tc lead the low-price field. For performance, dependability and economy the E-Series is today's best combination of high quality aud low cost. All models U/L approved.

E-10A: Delivers 10 watts from pushpull 6V6 tubes. Separate mike and phons controls. Multistage inverse feedback circuit. POWER OUTPUT: 10 feedback circuit. POWER OUTPUT: 10 watts at less than 5\%. FREQUENCY INPUTS: (2) 1 mike ( 2 meg.) gain 116 $\mathrm{db},{ }^{1}$ phono ( $1 / 2$ meg.) gain 77 db .
TONE CONTROL: Range 0 to -24 db . TONE CONTROL: Range 0 to -24 db . OUTPUT IMPEDANCES: $4,8,16$ and 500 ohms to octal socket. TUBES: (5) 1-6SC7, 1-6SI7, 2-6V6GT, 1 -6X5GT. FINISH: Silvergrey hammertone baked enamel. PANEL: Genuine etched enamel. POWER
CONSUMPTION: 60 watts at 117 volts, 60 cycles A.C. SIZE: $53 / 4^{\prime \prime} \mathrm{x}$ $103 /{ }^{\prime \prime} \times 63 / 4^{\prime \prime}$. WT.: $91 / 2 \mathrm{lbs}$. Less cover, $71 / 2$ lbs. LIST: (with tubes, without covers) $\$ 69.50$. Cover $\$ 7.21$. Plug Kit $\$ 1.71$.

E-17P3: A conservative 17 watt model with 3 speed phono. Separate bass and treble controls, phono bass boost, multi-stage inverse feed-back circuit. Input controls for mike and phono. POWER OUTPUT: 17 watts at less than $5 \%$. FREQUENCY RESPONSE: $\pm 2$ $\mathrm{db}, 40$ to 15,000 cycles. INPUTS: 1 mike ( 2 meg.) gain $115 \mathrm{db}, 1$ phono ( $1 / 2$ meg.) gain 77 db . OUTPUT IMPEDANCES: 4, 8, 16 and 500 ohms. TUBES: (5) 1-i2AX7, 1-6SJ7, 2-6L6G, 1-5V4G. FINISH: Silver-grey hammertone baked enamel. PANEL: Etched metal, lighted. POWER CONSUMPTION: 75 watts at 117 volts, 60 cycles A.C. SIZE: $83 /{ }^{\prime \prime} \times 141 / 8^{\prime \prime} x 8^{\prime \prime}$. WT.: $151 / 2$ lbs. LIST: (with tubes) $\$ 151.55$. Plug Kit $\$ 2.28$.
E-17: A 17 watt amplifier without 3 speed phono. Otherwise identical to model E-17P3. LIST: (with tubes and cover) $\$ 107.50$. Plug Kit $\$ 2.28$.

E-25: A dependable, full 25 watts with inputs for 2 mikes and 1 phono, separate bass and treble controls, phono bass boost, multistage inverse feedback circuit. POWER OUTPUT: 25 watts at less than $5 \%$. FREQUENCY RESPONSE: $\pm 2 \mathrm{db}, 40$ to 15,000 cycles. INPUTS: (3) 2 mike (2 meg.) gain 117 db , 1 phono ( $1 / 2$ meg.) gain 77 db . OUTPUT IMPEDANCES: 4, 8, 16 and 500 ohms. TUBES: (6) 1-12AX7, 1-6SC7, 1-615, 2-6L6G, 1-5V46. FINISH: Silvergrey hammertone baked enamel. PANEL: Etched metal, lighted. POWER CONSUMPTION: 90 watts, 117 volts, 60 cycles A.C. SIZE: $83,{ }^{\prime \prime} x$ $141 / 8^{\prime \prime} \times 8^{\prime \prime}$. WT.: $181 / 4 \mathrm{lbs}$. LIST: (with tubes and cover) $\$ 139.50$. Plug Kit \$3.24.
E-25P3: A 25 watt amplifier with 3 speed phono. Otherwise identical to model E-25. LIST: (with tubes) $\$ 183.18$. Plug Kit $\$ 3.24$.

E-254P3: A highly versatile, yet economical 4 channel, 25 watt amplifier with 3 speed phono. Features: high gain, inputs for 3 mikes and 1 phono, separate bass and treble tone controls, phono bass boost, multi-stage inverse feedback circuit. Pickup is highgrade turnover crystal. POWER OUTPUT: 25 watts at less than $5 \%$ distortion. FREQUENCY RESPONSE: $\pm 2 \mathrm{db}, 40$ to 15,000 cycles. 3 MIKE INPUTS: 2 meg., gain 123 db . PHONO INPUT: $1 / 2$ meg., gain 83 db . OUTPUT IMPEDANCES: $4,8,16$, and 500 ohms. TUBES (8): 3-6SF5, 1-6SJ7, 1-6SN7, 2-6L6G, 1-5V4G. FINISH: Silvergrey hammertone baked enamel. PANEL: Etched metal illuminated. CONTROLS: 3 mike 1 phono, 1 bass, 1 treble and power switch. POWER CONSUMPTION: 105 watts at 117 volts, 60 cycles A.C. POWER CONSUMPTION: 105 watts at IS7 volts, 60 cycles A.C. Plug Kit $\$ 3.90$.
E-254: A 25 watt amplifier without 3 speed phono. Otherwise identical to model E-254P3. LIST: (with tubes and cover) $\$ 169.50$. Plug Kit $\$ 3.90$.

E-50: A distortion-free, conservatively rated 50 watts using pushpull parallel 6L6 tubes and multistage inverse feedback circuit. Has inputs for 2 mikes, 1 phono, separate bass and treble controls, phono bass boost. Same as E-25 except as follows: POWER OUTPUT: 50 watts at less than $5 \%$. Mike gain 120 db , phono 79. OUTPUT IMPEDANCES: $4,8,16$ and 250 ohms. TUBES: (9) 1-6SJ7, 1-12AX7, $1-6 I 5,4-6 L 6 G$, 2-5V4G. POWER CONSUMPTION: 170 watts at 117 volts, 60 cycles A.C. SIZES: $111 / 4^{\prime \prime} \times 143 / 4^{\prime \prime} \times 81 / 2^{\prime \prime}$. WT.: 29 lbs. LIST: (with tubes and cover) $\$ 196.50$. Plug Kit $\$ 3.24$

E-504: A 4 channel 50 watt amplifier featuring: high gain, inputs for 3 mikes and 1 phono, separate bass and treble tone controls, phono bass boost, multi-stage inverse feedback, push pull parallel output system for owest distortion at all power levels. POWER OUTPUT: 50 watts at less than $5 \%$ distortion. FREQUENCY RESPONSE: $\pm 2 \mathrm{db}, 40$ to 15,000 cycles. THREE MIKE INPUTS: 2 meg., gain 126 db . PHONO INPUT: $1 / 2$ meq. gain 86 db . OUTPUT IMPEDANCES: 4, 8, 16 and 250 ohms. TUBES (11): 3-6SF5, 1-6SJ7, 1-6SN7, 4-6L6G, 2-5V4G. FINISH: Silvergrey hammertone baked enamel. PANEL: Etched metal illuminated. CONTROLS: 3 mike, 1 phono, 1 bass, 1 treble and power nated. CONTROLS: 3 mike, ${ }^{\text {l }}$ phonó 1 bass, 1 treble and power A.C. SIZE: $1114^{\prime \prime} \times 14^{3} 4^{\prime \prime} \times 81 / 2^{\prime \prime}$. WT : 30 watts, LIST. volith, 60 cycles cover) $\$ 239.50$. Plug Kit $\$ 3.90^{\circ}$.

## NEW 2-CHANNEL STEREOPHONIC AMPLIFIER!

3D-12: Built for the future! "Hollywood's 3-D reproduction now available for home enjoyment. For true Stereophonic or "Enhanced" 2-speaker Monaural reproduction from records, radio or tape. Channel Selector provides choice of stereophonic or "enhanced" monaural reproduction; reverses channels; gives choice of channel A or B separately; bass control range 0 to +18 db ; treble control range -24 to +13 db . Phono Crossover Control selects program source and crossovers. Includes positions for Orthophonic, N.A.B., Columbia, AES and 78 RPM recording curves. Crossovers apply to both channels. New "Focus" control balances speakers for maximum stereophonic presence. Single knob control of duplicate functions in matched channels makes this 2 channel amplifier as easy to operate as a conventional matched channels makes this 2 channel amplifier as easy to operate as a conventional $\pm 1 \mathrm{db}, 20$ to 20,000 cycles. Hum and noise 90 db , below 12 watts. POWER OUTPUT: Each $\pm 1 \mathrm{db}, 20$ to 20,000 cycles. Hum and noise 90 db , below 12 watts. POWER OUTPUT: Each channel, 12 watts at less than $2 \%$; 10 watts at less than $1 \%$. INPUTS to both channels provide for crystal pickups, high level magnetics (Pickering) . 025 volts, low level magnetics (G.E.) 008 volts, radio 1 volt, tape 1 volt. OUTPUT IMPEDANCES: 8 and 16 ohms to speakers at each output strip. Special response for Ciok Binaural recordings. 2 tape outputs, one from each channel, connect to owner's stereophonic tape recorder to produce stereophonic tapes. Average output using LP records: approximately 3 volts. Chassis provided with A.C. convenience outlet. Exclusive "Adjusta-Panel" feature. SIZE: $121 / 8^{\prime \prime}$ wide x $121 / 2$ " deep $\mathbf{x}$ 73:/" high. WT.: 19 lbs. Audiophile, NET: $\$ 179.50$.
All Prices and Specifications Subject to Change Without A'ntice.

E-1712R. A 17 watt dual speaker portable system consisting of one EH-212R skilit speaker and amplifier case atisembly with two $12^{\prime \prime}$ high gualirs P.M. speakers, each with 25' colble, protected by kick proof grills, and one E-17 amplifier with plugs. Size: $111 / 8^{\prime \prime} \times 201 / 2^{\prime \prime} x$ $21^{\prime \prime}$. Weight: 40 lbs. LIST: (less
 mike and srand) $\$ 209.28$
E-2512R: A 25 watt dual speaker portable system with model E-25 amplitier. Weight $421 / 2 \mathrm{lbs}$. LIST: (less mikes and stands $\$ 242.24$.
E-25412R: A. 25 watt dual speaker portable system consisting of one EH-212R split case assembly with two $12^{\prime \prime}$ P.M. speakers each with 25 cable, and model E-254 four channel amplifier LIST: (less inikes and stands) $\$ 272.90$.
 E-17P312R: A 17 watt dual speaker portable system with 3 speed phono. Consists o model E-17P3 amplifier in EH212R split case assembly. LIST: (less mike and stand) $\$ 252.96$ E-25P312R: A 25 watt dual speaker portable system with 3 .speed phono. Model E-25P3 amplifier in EH-212R split case assembiy. LIST: (less mikes and stands) $\$ 285.92$ E-254P312R: A 25 watt dual speaker portable system with 3 speed phono. Same as $E$ 25412R but with 3 speed phono top amplifier model E-254P3. LIST: (less mikes and stands) $\$ 316.58$.

## E SERIES MOBILE AMPLIFIERS

E-25MP: A 25 watt mobile amplifier with 78 RPM phono. For use on 6 V . storage battery or 117 V.A.C. Consumes minimum current per watt output. Has standby swixch, separate power and turntakle switches, heavy cuaty Jones plugs and receptacles for depend able connections to battery or AC. power. POWER OUTPUT: 25 watts at less than $5 \%$. RESPOASE: $\pm 2 \mathrm{db}, 50$ to 15,000 cycles INPUTS: 2 mikes $(2$ meg.) gairx 119 db , 1 phono ( $1 / 2$ meg.) gain 78 db . HIGF FREQ. ATTENUATOR: Range 28 resistance capacity coupling phase feed-oack, for phono ristor, 2000 V . hermetically sealed oil buffer condenser. OUTPUT IMPEDANCES: 4,8 , 16 , and 500 ohms to 2 octal speaker sockets and impedance selector. PHONO: Constant speed 78 rpm. PICKUP: Crystal. TUBES: (7) 1-12AX7, 1-6SJ7, 1-6J5, 2-6L6, 2-6X5GT. POWER CONSUMPTION: 107 watts, 117 vXGT. 20.5 amps. iurluding phono from 6V. battery. FINISH: Silvergrey hammertone taked enamel. PANEL: Etched metal, lighted SIZE. $83 / 4^{\prime \prime} \times 141 / 8^{\prime \prime} \times 1 ⿷^{\prime \prime}$. WT.: 26 lbs . LIST: (with tubes) $\$ 215.00$. Plug Kit $\$ 3.24$
E-25M: Same us E-25MP without phono. POWER CONSUMPTION: 91 watts A.C. or 17 amps . from 6 V.D.C. SIZE: $83 / /^{\prime \prime} \times 141 / 8^{\prime \prime} \times 8^{\prime \prime}$. WT.: 23 lbs. LIST: (with tubes) $\$ 195.75$. Plug Kit $\$ 3.24$.
E-25MP3: Same as model E-25MP except with 3 speed phono. LIST: (with tuioes) \$239.43. Plug Kit \$3.24.
E-10M: A 10 watt mobile amplifier. For use on 6 V.D.C. or 117 V, 60 cycles A.C. Features push-pull beam power output tubes with inverse tesdback for low distortion, standby battery saver switch, new freedom from vibrator hash, special mounting for easy removal of chassis, inputs for mike and phono, sturdy Jones connectors for battery and A.C. cables. POWER OUTPUT: 10 watts at less than $5 \%$. FREQUENCY RESPONSE: $\pm 2 \mathrm{db}, 50$ to 15,000 cycies. INPUTS: Mike ( 2 meg.) gain 115 db , phono ( $3 / 2$ meg.) gail 75 db . OUTPUT IMPEDANCES: 4, 8 , 16 ohms. TUBES: (5) 1-6SC7, 1-6SF5, 2-6V6GT, 1-6X5GT POWER CON. SUMPTION: ets watts, 117 volts, 8 amps. at 6 V.D.C. FINISH: Silvergrey hammertone baked enamel. PANEL: Etched metal with pilot lamp. SIZE: $61 / /^{\prime \prime} \times 63 / 4 \times 81 / 4^{\prime \prime}$. WT.: $93 / 4 \mathrm{lbs}$. LIST: (with tubes) $\$ 99.75$. Plug Kit $\$ 1.39$.

## RACK AND PANEL ASSEMBLIES

Any standard Newcomb amplifier may be obtained panel mounted on special order in $19^{\prime \prime} \times 83 / 4^{\prime \prime}$ panels, thus giving the custom designer a wide choice of equipment to meet any need.

MODEL 595-19 CABINET: (Illustrated) Sup plies a demand for a beautifully finished housing that is fully in keeping with the Newcomt tradition and reputation for quality. Panel space is $56^{\prime \prime}$. Design ac cepts standard 19"' wide panels. Mount ing holes are RMA standard $11 / 4^{\prime \prime}$ and $1 / 2^{\prime \prime}$ spacings. Panel mounting holes are tapped in $1 / 8^{\prime \prime}$ stock. Fully ventilated rear door provides easy accessibility. Entire cabinet is a complete welded assembly ready for use as you receive it. Finish is dark grey hammertone. Provision is made in the rear for nine $1 / 2^{\prime \prime}$ conduits. Included is a removable terminal strip mounting plate located near conduit in lets. Overall dimensions: $591 / 2^{\prime \prime} \times 23^{\prime \prime}$ wide $x 16^{\prime \prime}$ deep. Shipping weight: 92 lbs. LIST: \$189.50.

MODEL 385-19 CABINET: Provides $35^{\prime \prime}$ of panel space for standard $19^{\prime \prime}$, panels. 6. deep. Shipping weight: 72 lbs. LIST: $\$ 14950 \times 23$ wide $x$

In addition to the panel mounted amplifiers Newcomb also provides a wide selection of other equipment designed for custom rack installations

MODEL 1050-C PHONOGRAPH CHANGER PANEL is a practica solution to mounting a phono changer in cabinet 595-19. Bal] bearing drawer with wood motor board is adaptable for mount ing most popular changers. Panel size $19^{\prime \prime} \times 101 / 2^{\prime \prime}$. All panels are finished in silver-grey hammertone baked enamel. MODEL E2-525 PRE-AMPLIFIER answers the need for a simple, depend able but economical pre-amp for rack use. MODEL TB2-525 INTERCOM AMPLIFIER has built-in power supply, speaker, talk usten switch and separate talk and listen volume controls MODEL B-100-875 AM RADIO is the Newcomb B-100 radio mounted on an $83 / 4$ "panel. (See listing page B-35.) MODEL 700-MP MONITOR is available for installation of any $6^{\prime \prime}$ speaker. LEVER KEY PANELS are provided for use with CRL keys, $31 / 2^{\prime \prime}$ deep with slots for $6,8,10$ or 12 keys. LOUVERED PANELS for additional ventilation and BLANK PANELS are made in assorted sizes. SPECIAL PANELS are made to order to fit special equipment. Templates or suitable drawings must accompany order for any special sheet metal work. Full details of Newcomb rack and panel equipment available on request.

## ACCESSORIES FOR H AND K SERIES AMPLIFIERS

## COCOMO REMOTE CONTROLS

ALL NEWCOMB EQUIPMENT U/L APPROVED
-
TR-92: Input impedance 5,000 ohms to grid for bridging a $500-600$ ohm line. When plugged into sockets on K50B, H50B, H25B it converts for use as bridging amps. WT.: $11 / 4 \mathrm{lbs}$. LIST: $\$ 29.50$
TR-100: Identical to TR-91 but for use between 125-150 or 500-600 ohm mikes and grid. LIST: $\$ 32.50$.
puts. With K Series mixing and fading all H Series mike in controlled. Up to 2000 feet of cable may be used. No inductive pickup

RC-2 for H-15 amp. Requires ordinary 3 wire cable. $23 / 4^{\prime \prime} \times 6^{\prime \prime} \times$ 21/8". WT.: 1 lb . LIST: (less Cable) $\$ 10.50$

RC-3 for H-25 or H-4 amps. Requires ordinary 4 wire cable. $23 / 4^{\prime \prime}$ $\times 6^{\prime \prime} \times 21 / 8^{\prime \prime}$. WT.: 1 lb . LIST: (less Cable) $\$ 15.50$.

RC-4 for H-50 amp. Requires ordinary 5 wire cable. $23 / 4^{\prime \prime} \times 75 /$ 月 $^{\prime \prime}$ x $21 / 8^{\prime \prime}$. WT.: $11 / 4$ lbs. LIST: (less Cable) $\$ 19.50$.

RC-6 for KX-25, KX-50, KX-6 amps. Requires ordinary 7 wire cable. $23 / 4^{\prime \prime} \times 1114^{\prime \prime} \times 21 / 8^{\prime \prime}$. WT.: 2 lbs. LIST: (less Cable) $\$ 27.50$.

## PLUG-IN TRANSFORMERS

IITR-91: Features sextuple alloy and copper shielding for quiet operation right in amp. proper. Alloy core and specially designed windings for extended frequency response from 20 to 20,000 cycles. Plug base for easy installation. For use between $30-50$ or $200-250 \mathrm{ohm}$ mikes and grid. WT.: $11 / 4$ lbs. LIST: $\$ 32.50$.

CHANGE WITHOUT NOTICE

# NEWCOMB TRANSCRIPTION PLAYERS AND P.A. SYSTEMS 

Newcomb transcription players also serve as excellent p.a. systems when mike is attached to input provided. Foolproof in operation with emphasis on dependability, tone quality and light weight. ALL U/L approved.

## Variable control of tempo and pitch plus New Speed-O-Scope*

TR-25AM: 25 watt, 3 speed player and p.a. for all records up to $171 / 4^{\prime \prime}$. GIC variable reluctance. SCRATCH GUPPRESSOR: Colutrols surface UPPe POWER OUTPUT. 25 surface noise. POWER OUTPUT: 25 watts at less than 5\%. FREQUENCY RESPPNSE: -2 db $40-15,000$ cycles. INPUTS: 2 mikes, high impendance, gain 120 db . CONTROLS: (9) I phono bass, 1 phono treble, 1 phono vol.,
2 mike vol., 1 mike bass (Second 2 mike vol., 1 mike bass (Second mike unaffected by either set of
controls) 1 power, 1 scratch filter, controls) 1 power, 1 scratch filter, $331 / 3,45$ and 78 rpm, with variable speed control. Two lb, $10^{\prime \prime}$ turntable contributes to wow-free performance. FLOATING SOUND: Eliminates needle skipping. SPEAKERS: $21^{\prime \prime}$ in separate split case, each with $25^{\circ}$ cord. OUTPUT IMPEDANCES: 4 , 8 ohms. TUBES: (10) $2-6$ SC7, 1-6SJ7, 1-6SN7, 4-6V6GT, 2-5Y3. POWER CONSUMPTION: 130 watts, 117 volts, 60 cycles A.C. including motor. SIZE: Amp-phono case. $161 / 4^{\prime \prime} \times 161 / 4^{\prime \prime} \times 77 / 8^{\prime \prime}$. WT.: 36 lbs. Dual speaker case, $161 / 4^{" x} \times 161 / 4^{" x} \times 12^{\prime \prime}$. WT.: 19 lbs . LIST: $\$ 382.50$.

TR-16AM: 10 watt, 3 speed player and
 p.a. system. All records to $171 / 4^{\prime \prime}$. PICKUP: Twist type, dual needle G.E. variable reluctance. SCRATCH SUPPRESSOR controls surface noise. POWER OUTPUT: 10 watts at less than $5 \%$. FREQUENCY RESPONSE: $\pm 2$ db, 50 10,000 cycles. INPUTS: (2) 1 mike, 1 radio or phono changer. CONTROLS: (8) 1 treble, 1 base, 1 phono vol., i mike vol., (Circuit prevents phono bass mike vol.i (Circuit prevents phono bass from adding bass to mike.) 1 power, 1 scratch filter, $\frac{1}{}$ variable speed, $\frac{1}{2}$ motor A.C. MOTOR: 3 speed, $331 / 3$, 45 and 78 rpm with variable control. With 2 lb . turntable it achieves wow-ifee performance; FLOATING SOUND: Eliminates needle skipping. SPEAKER: ${ }^{\prime \prime}$ Alnico V PM dynamic, $25^{\circ}$ cable. TUBES: 6) 2-6SC7, 1-6SJ7, 2-6V6GT, 1-6X5GT. POWER CONSUMPTION: 70 watts, il' volts 60 cycles A.C. including motor. SIZE: $143 /{ }^{\prime \prime} \times x$ $153 / 4^{\prime \prime} \times 117 / 8^{\prime \prime}$. WT.: 33 lbs . LIST: $\$ 257.50$.
TR-16A: 10 watt, 3 speed player and p.a. PICKUP: Dual needle, featherwelght crystal. Needles semi-permanent, easily replaced. Has all features of TR-16AM except scratch suppressor. TUBES: (5) 1-6SC7, 1-6SJ7, 2-6V6GT, 1—6X5GT. WT.: 33 lbs. LIST: $\$ 233.25$.

CR-Il MIRE: Newcomb-Shure mike for TR models and R-16. Combines good voice with ruggedness. Unaffected by high temps. and humidity. Has on-off switch. With mtg . bracket, $7^{\text {c }}$ cable, plug. LIST: $\$ 23.75$.

T-112R EXTRA SPEAKER: For all TR models. 12" Alnico V PM dynamic, $25^{\prime}$ cord, kickproof metal grill. Plywood case covered in fabricoid. SIZE: 161/4"x $161 / 4^{\prime \prime} \times 77 / 8^{\prime \prime}$. WT.: 12 lbs . LIST; \$65.85.
*SPEED-O-SCOPE: A new strobe device to indicate exact $331 / 3,45$ or 78 speed that is practical for use around children. Completely concealed, it is protected from damage but is easily viewed by the polished metal mirror. It can even be read out of doors. A light intensifier switch improves readability in bright light. TR series only.

## APPROVED

## NEWCOMB PORTABLE PHONOGRAPHS AND RADIO

## R-12 PORTABLE PHONOGRAPH

Plays all 3 speeds, $331 / 3,45$ and 78 rpm. Featherweight pickup for long record life. $100 \%$ A.C. construction. U/L approved. Big $6^{\prime \prime} \times 9^{\prime \prime}$ speaker. Kickproof grill. 5 watt, 3 speed portable plays all records up to $12^{\prime \prime}$. speed portable plays all records up to skipping. Wonderfully rich, "console" tone quality and surprising full throated volume. quality and surprising full throated vorame. volume control and pilot light. Sturdy case is plywood covered volume control and pilot light. Sturdy in tabricoid With metal corner guaras. 20 lbs. LIST: $\$ 89.95$ (Plus Excise Tax where applicable).

RC-12A CHANGER PHONOGRAPH
Plays all 3 speeds, $331 / 3,45$ and 78 rpm . Featherweight pickup for long record life. $100 \%$ A.C. construction. U/L approved. Big $6^{\prime \prime} x 9^{\prime \prime}$ oval speaker with kickproof grill. Slumber switch turns off entire machine automatically after last record if desired. 5 watt table model with 3 speed changer. Except for case design and record changer it is the same fine machine as R-12. Cabinet is plywood construction covered in rich, deep brown, sturdy leather-finished fabricoid. Kickproof speaker grill is finished in soft gold color. Panel, dark brown with golden :trim, has tone soft gold color. Panel, dark brown with golden trim, has tone $143 /{ }^{\prime \prime} \times 95 / /^{\prime \prime} \times 181 / 2{ }^{\prime \prime}$. Wt.: $311 / 2$ lbs. LIET: $\$ 119.50$ (Plus Excise Tax where applicable).

## R-16 TRANSCRIPTION PLAYER

Shockproof Floating sound. 100\% A.C. construction. Big $10^{\prime \prime}$ speaker. U/L approved. Plays all records to $171 / 4^{\prime \prime}$. Separate mike and phono volume. A practical P.A. system.

A 5 watt portable, 3 speed transcription player with mike input and mixing volume control. Speaker in removable section of case with $25^{\circ}$ cable Plays all records, $331 / 3$, 45 and 78 rpm up to $171 / 4^{\prime \prime}$. Floating Sound construction eliminates needle skipping due to bumps and fars. Operating
panel has tone control, mike volume, phono volume and pioot light. panel has tone control, mike volume, phono volume and piot light. Sturdy carrying case is plywood covered in washable
material. Size: $14^{\prime \prime} \times 15^{\prime \prime} \times 81 / 2^{\prime \prime}$. WT.: 22 lbs . LIST: $\$ 115.00$.

## 8-100 TABLE RADIO

Big 6" speaker. Full A.C. construction. Built in loop. Extremely sensitive. Jack for added amplification or headphones. U/L approved.
AM radio that brings new quality and ruggedness to this field. Built in loop ruggedness to
 necessary. 3 gang design eliminates heterodyne squeals and assures adequate selectivity. Has jack connection to any TR-16 model for added volume, or may be used for headphones. 6" Alnico V PM dynamic speaker. Plywood cabinet is covered in two-tone fabricoid. Size: $75 / 8^{\prime \prime} \times 141 / 4^{\prime \prime} \times 8^{\prime \prime}$. TUBES: (6) 2-6SK7, 1—6SA7, 1-6SQ7. 1-6V6GT, 1-6X5GT. WT:: 131/4 lbs. LIST: $\$ 85.95$ (Plus Excise Tax where applicable).

## NEWCOMB G-12 GUITAR AMP.

POWER OUTPUT: 12 watts at less than $5 \%$ distortion. Over $90 \%$ of output at less than $2 \%$ distortion. FREQUENCY RESPONSE: $\pm 1 \mathrm{db} 30^{\circ}$ 15,000 cycles. INPUTS: (4) l mike (2 meg.) gain $115 \mathrm{db} ; 3$ musical instrument ( $1 / 2$ meg.) gain 100 db. CONTROLS: (2) 1 volume, 1 bass with power. TONE CONTROL: 0 to -23db. CASE: Plywood construction with strength for constant traveling abuse, covered in washable fabricoid material. SPEAKER: 12 " Alnico $V$ permanent magnet. TUBES: (5) 1-6SC7, 1-6SF5, 2--6V6GT, l-5Y3GT. SIZE: 91/4'x 147/e"xi83/a". WT.: 23 lbs. LIST: $\$ 139.50$ Protective Slip Cover.

An unexcelled combination of technical perfection, flexibility and listening pleasure, Average level distortion is reduced to vanish ing point. "Audi-balance" achieves perfect balance of output tubes for lowest distortion in seconds. Here is fidelity with ample reserve power, hum eliminated by D.C. filament supply, a high damping factor reduces transient distortion to minimum without disregarding needs of speakers, new A.E.S. response position, a new output connection to tape recorder. Panel mounting simplified, "Adjusta-panel" extends control shafts to $3 / 4$ ". Remote cable
POWER AMPLIFIER: Frequency response flat from 10 to 30,000 cycles with negligible deviation from 5 to 100,000 cycles. Distortion: As low as $005 \%$ at average listening levels; less than Inputs: All watts. Hum and Noise: 95 db below 25 watts. Six Inputs: All at main amplifier, 1 low level magnetic pickup (. 0092 volts), 1 high level magnetic pickup ( 0.046 volts), 1 crystal (. 61 volts), I radio (1 volt), 1 TV (1 volt), 1 tape ( 1 volt). Pre-amp: Shock mounted with full frequency compensation for various inputs. Controls: 1 master phono gain or "limit" control, 1 crystalmagnetic selector switch, 1 "Audi-balance" switch, I "Audibalance" control, 1 A.C. power switch on $5^{\prime}$ cable. Outputs: To speakers, 8 or 16 ohms at terminal strip. To tape, recorder, up to $61 / 2$ volts to high impedance "external amplifier" input of tape recorder, Auxiliary A.C. socket. Fuse for protection. Tubes: (power amp.) 2-12AX7, 1-12AU7, 2-6L6G, 1-5U4G. Power Consumption: 125 watts 117 volts 60 cycles A.C. Finish: Dove brown hammertone baked enamel Size: $4^{\prime \prime} \times 1{ }^{\prime \prime}$
REMOTE CONTROL: Cable length $5^{\prime}$ (Model $2 \mathrm{X}, 20^{\prime}$ extension cable available), Panel Controls: 1 bass, range -16 db to +23 db . (Special curve shape avoids overemphasis of mid-bass frequencies), 1 treble, range -25 to +23 db ., 1 five position record condition compensator, 1 five position crossover control selects ideal playback characteristics and automatically equalizes for lower average level of microgroove records, 1 program selector, 1 volume control Fletcher-Munson compensated for both highs and lows for utmost low level realism, i petite pilot lamp. Tubes: (remote unit) $1-12 A X 7,1-12 A V 6$. Finish: Brushed brass. Size: $85 / 8^{\prime \prime} \times 43 / /^{\circ 1} \times 37 / 8^{\prime \prime}$ high. Weight: total $281 / 2$ lbs. Audiophile, $N E T$. $\$ 269.50$.

## Classic 15, Ultra-High Fidelity 15 watts with complete remote control

Low distortion, excellent reserve power, advanced circuitry, new features, superb reproduction, easy installation are characteristics. Remote extends up to $50^{\circ}$. Design makes substantial savings possible in installation. Features new "Audi-balance" and "Adjusta-panel," excellent damping factor reduces speaker transient distortion, $\alpha$ new 5 position crossover selector includes A.E.S. and automatic level correction for microgroove recordings, and a new output connection to tape recorders.
POWER AMPLIFIER: Frequency response $\pm 1 \mathrm{db}$. 10-25,000 cycles with excellent response to 100,000 cycles. Distortion: Less than $1 / 10 \%$ at 12 watts, less than $.2 \%$ at 15 watts. Hum and Noise: 85 db . below 15 watts. Six Inputs: All at main amp., I low-level magnetic pickup (. 008 volts), I high level magnetic pickup (. 032 volts), 1 crystal pickup ( .546 volts), 1 radio ( 1 volt), 1 TV (I volt), 1 tape (l volt). Pre-amp: Shock mounted and full frequency corrected, for various inputs. Controls: 1 master phono gain or "limit" control, 1 crystal-magnetic selector switch, 1 "Audi-balance" control, 1 hum balance control, 1 A.C. power on $5^{\prime}$ cord. Outputs: To speakers, 8 or 16 ohms at terminal strip. To tape recorder, up to 1.9 volts to high impedance "external ampe" input of recorder. Auxiliary A.C. socket. Fuse tor protection. Tubes: (in power amp), 2-12AX7, 1-6AV6, $2-6 \mathrm{~L} 6 \mathrm{G}, 1-5 \mathrm{~V} 4 \mathrm{G}$. Power Consumption: 90 watts 117 volts 60 cycles A.C. Finish: Dove brown. Size: $14^{\prime \prime} \times 10^{\prime \prime} \times 71 / 4^{\prime \prime}$
REMOTE CONTROL: Cable $5^{\prime}$ (Model $2 \mathrm{X}, 20^{\prime}$ extension available). Panel Controls: 1 bass, range -17 to +20 db., 1 treble, range -20 to +18 db .., 1 five position crossover control, 1 program selector, 1 vol. control, Fletcher-Munson compensated for both highs and lows, l petite pilot lamp. Tubes: (remote) l-6AV6, 1-12AX7. (amo. and remote), $203 / 4 \mathrm{lbs}$. Audiophile, NET $\$ 179.50$. Weight

## A-15 HIGH FIDELITY 15 WATTS

 Distortion: Less than $.25 \%$ at 15 watts. 10 to 100,000 response with in -1 db. from 20 to 20,000 cycles. Built-in pre-amp fully compensated for magnetic pickups. Distortion free individual bass and treble controls. Crosso ver selector with A.E.S. response position. Fletcher-Munson bass and treble compensation. "Adjusia-panel" shaft extension. High damping factor. Hum balance control. Four Inputs: 1 low level magnetic pickup ( .0085 volts), 1 high level magnetic pickup ( .037 volts), 1 crystal (. 307 volts), 1 for radio, TV or tape ( .975 volts). Hum and Noise: 82 db . below 15 watts Controls: 1 bass, range to +19 db ., 1 treble, range -20 to +19 db . 1 program and crossover selector, 1 vol. Tubes: 1-6AV6, 2-[2AX7 2 -6L6G, $1-5 V 4 \mathrm{G}$. Output Impedances: 8 and 16 ohms to terminal strip, Auxiliary A.C. socket for accessories. Power Consumption: 90 watts at 117 volts 60 cycles A.C. Fuse for protection. Size: $10^{\prime}$ escutcheon, PT-67, NET $\$ 1.80$. Audiophile, NET $\$ 99.50$. Separate

## A. 104 R HIGH FIDELITY 12 WATTS <br> with remote control for easier installation

10 watts at less than $1 \% . \pm 1 \mathrm{db}$. 20 to 20,000 cycles with good re-
sponse to 100,000 cycles. Euilt-in pre-amp for nagrian s.axups. Separate bass and treble tone pre-amp for magreal ri-xups. Separate bass and treble tone controls. "Adjusta-panel" feature (Pat. applied for). Phono crossover selector with A.E.S. position. Fletcher-Munson bass and treble compensation. Hum balance control. Multi-stage inverse feetiback. The A-104R offers listening pleasure, technical refinements, parts quality, workmanship and special features not heretofore offered in this price class. Specifications include: 12 watts at less than 2\%. Four Inputs: Direct to main chassis, l low lavel maznetic pickup ( 0115 volts), 1 high level magnetic pickup ( 0515 volis) 1 crystal pickup (. 58 volts), 1 radio, TV or tape (. 98 volts). Hum and Noise: 70 db . below 12 watts. Controls: (on remote) 1 bass and power switch, range 0 db . to $+19 \mathrm{db} ., 1$ treble, range - 24 db. to +13 db .1 crossover and program selector, it vol. Tubes: 2-6AV6, 1-12AX7, 2-6V6G, 1-5Y3GT, Output Impedances: 8 and 16 ohms to terminal strip. Aux. A.C. socket for accessories and 16 Consumption: 70 watts 117 volts 60 cycles A C. Fuse tor Powor tion. Finish: Dove brown hammertone baked Fuse for protecpanel linish, brushed brass. ## Hasken SCOTT.INc. <br> "PACAAGED ENGINEERING"

## H. H. SCOTT TYPE 99-A TRANSCRIPTION AMPLIFIER

A complete wide-range control and power amplifier buitt as a single "front end" style unit. Out standing performance equals amplifiers costing several times as much. Separate 3-position turnover and rolloff equalizers give 9 record equalization curves. Input selector switch with inputs for magnetic pickup, crystal or constant amplitude pickups such as Weathers, and three high level inputs tuner, tape and TV. Automatic loudness control with adiustable loudness compensation and pickup evel adjustment. Treble and bass tone controls. Frequency response flat 20 cps to 30 kc , sharp cut off rumble filter below 20 cps . Hum better than 80 db below maximum output. Harmonic distortion less than $0.8 \%$ at full output. First-order beat-tone intermodulation less than $0.3 \%$ at full output Power output 12 watts, with clean, symmetrical clipping permitting performance equal audibly to much higher power ratings. Output terminals, 4, 8, 16 , and 500 ohms Self balancing phase inverter automatically balances output tubes. Input provisin $131 / 4 \times 33 / 4 \times 91 / 4^{\prime \prime}$. Shipping weight 15 lbs. Net Price $\$ 99.95$, West Coast $\$ 104.95$

## TYPE 121-A DYNAURAL EQUALIZER-PREAMPLIFIER

Rolloff frequency and both turnover frequency and extent of boost are continuously variable to compensate for any equalization curve. Amazing DYNAURAL noise suppressor virtually eliminates urntable rumble and record scratch without losing audible music Record distortion filter (range witch) has 6 cutoffs rumble suppression only and suppression-off witch) has positions. Linished in pensation. Finished in durable hand-tooled leather with machined anodized aluminum knobs elt-powered wh hum. Hum harp cutoff rumble filter below 19 cps . Two Cathode ollower outputs, main and tape recorder Maximum output voltage 15 volts. 3-channel treble and bass tone controls. Three AC outlets fo accessories. Rear panel controls: Pickup load, pickup sensitivity, 5 high level input controls. Fo $105-125$ volt $50-60 \mathrm{cPs} A C$ operation, fused. Tubes: $1-6 A L 5,2-6 B A 6,2-12 A X 7,1-12 A U 7$. Size $131 / 4 \times 41 / 4 \times 91 / 4$. Shipping weight 12 ibs. Designed
for use with H . H. Scott, Inc. 220 -A Power Amplifier. Can be used with many other amplifiers. Net Price $\$ 162.75$, West Coast $\$ 170.89$.

## TYPE 214-B REMOTE CONTROL AMPLIFIER

Rated FIRST CHOICE of all amplifiers in SATURDAY REVIEW HOME BOOK OF RECORDED MUSIC AND SOUND REPRODUCTION. COn sists of $120-\mathrm{B}$ Equalizer-Preamplifier and $220-\mathrm{A}$ Power Amplifier. Net Price $\$ 193.75$, West Coast $\$ 203.44$.

## TYPE 120-B EQUALIZER-PREAMPLIFER

Eight-position record compensator equalizes virtually all records. Input selector for $\mathbf{3}$ high level inputs, Tuner. TV. Extra, I low level input for magnetic pickups. Loudness control with switch Unique 3 -channel treble and bass tone controls. DC operated filaments for low hum. Input leve adjustment for matching any pickup. Switch and plug-in connections for accessory !14-A DYN AURAL Noise Suppressor. Provided with 6 ff . power-control cable. Mahogany cabinet. Tubes $1-12 A X 7,2-12 A U 7$. Size $10 \times 41 / 2 \times 61 / 4^{\prime \prime}$. Shipping weight 10 lbs . Net Price $\$ 76.25$, West Coast $\$ 80.06$.

## TYPE 220-A LABORATORY POWER AMPLIFIER

Undistorted power output 20 watts, maximum 25 watts. Frequency response flat 12 cycles to 55,000 cycles Self-balancing phase inverter automatically balances output tubes. Hum 90 db below full output. Harmoni distortion less than $0.5 \%$ at full 20 watts. Ist-order beat-tone intermodulation less than $0.1 \%$ at full output Hum control allows compensation for tube replacement. Input level adjustment. Two inputs. Class A operation throughout. Low output impedance for optimum speaker damping, less than 2 db regulation Output terminals for speakers of 1 to 24 ohms impedance. Tubes, $2.6 \mathrm{Lb}, 1-635,1-6 \mathrm{SN7}, 1-5 \mathrm{~V} 4$. For 110 $120 \mathrm{v}, 50-60$ cycle AC. Size $14 \times 61 / 2 \times 73 / 4^{\prime \prime}$. Shipping weight 20 lb . Net Price $\$ 117.50$, West Coast $\$ 123.37$.

## TYPE 210-B DYNAURAL LABORATORY AMPLIFIER

Patented DYNAURAL Noise Suppressor virtually eliminates rumble and record scratch from LP and shellac records without losing audible music. Adjustable record distortion filter limits response from ful 22 kc range to 12 ke or 6 kc , particularly useful with older records. 20 watt undistorted power output, 22 kc range 25 watt maximum power. Harmonic cistortion less than $5 \%$ a 84 below full output, DC on filaments modulation ess than 0 . $\%$ at fuli output. Hum let response response 12 - 2200 cps. Automatic loudness control. Whate and bass tone controls, according to chart iusting basic equalization with unique 3 -channel treble and bass tone controls, according to chart provided. Hum minimization control compensates for tube replacements. nput evel a diustment tor
 size $81 / 2 \times 14^{1 / 2} \times 101 / 4^{\prime \prime}$. Net Price $\$ 224.00$, West Coast $\$ 235.20^{\prime}$.

## TYPE 114-A DYNAURAL NOISE SUPPRESSOR

Virtually eliminates record scratch and turntable rumble from widerange music systems but without losing any audible music. For use with 120-B Equalizer-Preamplifier or 99-A Amplifier, simple plug-in connections afte preamplifier stage. Obtains power from 99-A or 120-B units or by plugging under amplifier power output tube such as $6 \mathrm{~L} 6,6 \mathrm{~V} 6,6 \mathrm{~Kb}$, 6 Fb beam-tetrode connected. DYNAURAL control and Record Distortion cutoff (rangeswitch), control degree of noise suppression, suppression-off, rumble, suppression only, and $20 \mathrm{kc}, 12 \mathrm{kc}$ and ${ }_{6}^{5 w h} \mathrm{kc}$ high-frequency cutoffs. Tubes 3 -12AU7, $1-6 A L 5$. Size $4 \times 61 / 4 \times 8^{\prime \prime}$ '. Shipping weight 4 lbs. Net 'Price $\$ 49.95$ West Coast $\$ 52.45$.

## TYPE 214-X8 VARIABLE SPEAKER CROSSOVER

Provides continuously adjustable speaker crossover from 175 to 3000 cycles. Balance control adjusts relative acoustical balance between high and low frequency speakers. For use between 120-8 Equalizer-Preamplifier and two 220-A power amplifiers, one for high frequency "tweeter," other for low frequency "wooter." Allows speaker connections directly o amplifiers for best damping without interposing resonant L.C filters. Size $7 \times 4 \times 3 / 2^{\prime \prime}$. Shipping weight 2 lbs. Net Price $\$ 29.95$, West Coast $\$ 31.45$.

## INTERELECTRONICS

## FOR THE ULTIMATE IN HIGH FIDELITY

"THE CORONATION"
 Advanced Williamson Supra-Linear Circuitry

HIGH OUTPUT: 60 watts peak, 30 watts continuous. FULL FREQUENCY RESPONSE: 5 to 200,000 cycles. POWER RESPONSE:

AT 15 WATTS: 7 cycles to 60,000 cycles within 0.1 DB
AT 25 WATTS: 15 cycles to 22,000 cycles within 0.1 DB
10 cycles to 50,000 cycles within 1.0 DB

## LOW DISTORTION:

Less than $0.05 \%$ harmonic distortion of 15 wotts
Less than $0.15 \%$ intermodulation distartion at 15 watts

## HUM AND NOISE LEVEL:

Better than 96 DB below full output.
EXCELLENT TRANSIENT RESPONSE:
Completely mon-ringing exclusive circuitry.
ULTRA-COMPACT: $43 / 4^{\prime \prime}$ wide, $15^{\prime \prime}$ long, $71 / 8^{\prime \prime}$ high mounts on single $51 / 4^{\prime \prime}$ rack panel.

HIGH SENSITIVITY: 0.75 volt for full output.
OUTPUT IMPEDANCES: 8 and 16 ohms.
TUBE COMPLEMENT: two KT66, two 65N7GTA, one 5U4G.
Superbly moster crafted throughout.
Polished chromium chassis, matched sealed power and output transformers, 29 section output transformer, with interleaved windings and special oriented steel laminations.
Bakefite terminal board mounting for all components, plug-in electrolytic condenser. Preamplifier power socket provided for the Coronation Consolette Pre-amplifier and Equalizer ond other pre-omps.
Two AC power receptocles, molded line cord. Heavy output to inpul loop negative feedback.
THREE NEGATIVE FEEDBACK LOOPS: Exclusive Interelectronics circuiltry.

USER NET, ONLY
$99^{50}$

THE CORONATION Consolette

## PREAMPLIFIER-EQUALIZER

ADVANCED EXCLUSIVE CIRCUITRY:
Unique new INTERELECTRONICS negative feedback circuitry. ALL controls operate through negative feedback. OVER 50 D8 FEEDBACK.
REYOLUTIONARY NEW INPUT TUBE:
Features the unequaled lowest noise English preamplifier ube, Z-729. Finest available. HUM INAUDIBLE with volume on full.
DISTORTION YIRTUALIY ELIMINATED:
Harmonic and intermodulation distortion barely measurable. Less than $0.02 \%$ harmonic and $0.05 \%$ intermodulation able. Less
FULL FREQUENCY RESPONSE:
5 to 200,000 cycles
NEW FUNCTIONAL CONTROLS:
Two major and five smaller control knobs permit simplified operation, provides the utmost in performance and flexibility
SEVEN FULL FUNCTIONING CONTROLS:

1. Selector switch-five inputs
2. Volume control
3. Loudness contour-continuously variable
4. Bass control-boost and cut
5. Treble control-boost and cut
6. Playback equalization crossover-four positio

SIXTEEN PRECISION PHONO PLAYBACK
EQUALIZATION CURVES:
Separate crossover and rolloff switching for maximum precision.
POWERFUL BASS AND TREBLE COMPENSATION:
Full 20 DB distortion-free boost and cut compensation through feedback, at 20 and 20,000 cycles, with inflection frequencies variable with compensation. Insures full correc tion capabilities for loud-speaker, room acoustics and program deficiencies.
five input selections:
TWO low level phonograph pickups or microphones, three high-level inputs for AM-FM tuner, tape recorder and Auxiliary. Necessary level controls are provided.
INDEPENDENT RECORDER OUTPUT:
Isolated from control circuit, allows feeding to tape, disc or other recorders.
LOUDNESS CONTOUR CONTROL
Continuously variable, permits adiustment TO INDIVIDUAL TASTE for dynamic range compensation in accordance with Fletcher-Munson curves.
ULTRA COMPACT:
Panel $33 / 4^{\prime \prime}$ " wide, $135 /{ }^{\prime \prime}$ " long, mounts from front into cabinet opening $3^{\prime \prime} \times 12^{\prime} / 8^{\prime \prime}$. Only $3^{\prime \prime}$ deep.
MASTER CRAFTED THROUGHOUT:
Finest molded sealed components. All critical control networks employ precision silver-mica condensers and deposited element resistors lifetime potted in epoxy resin for lasting accuracy. POLISHED CHROMIUM CABINET. BEAUTIFUL SATIN GOLD PANEL. Hand-rubbed custom finished wood cabinet available for table use
TUBE COMPLEMENT:
One Z-729, one 12AY7, one 12AX7.
USER NET:
Complete with all tubes, connecting cables and plugs, for operation with INTERELECTRONICS" "CORONATION"' amplifier or other amplifiers. Separate power supply for selfpowered operation, $\$ 9.95$.

USER NET, ONLY<br>79<br>50

# Bogen sound srstems 

(B)

(D)

Public Address, Paging, Music Distribution, and Intercommunication Svstems for every need-indoor, outdoor, portahle or mobile-for the large factory, school, church, stallium, or the small office, auditorium, bus or storedesigned and built by the country's largest manufacturer of sound systems.

Bogen amplifiers range in power from 6 watts to 125 watts and are available in a wide variety of "package" systems including different microphones and loudsyeakers for different applications. In addition, if you have a special problem, the Bogen Custom Engineering Division will design and assemble a system for your particular installation, regardless of size.
The table below lists the Bogen P.A. amplifiers and package systems, All are conservatively rated in accordance with accepted engineering standards. Each has a frequency reponse carefully selected to insure optimum performance in the applications for which the model lias been designed. Each amplifier marked with an asterisk (*) carries Underwriters' Laboratories approval. Each is finished in tasteful tones of green and buff or green and gray. All, except the mobile and phonograph top models, are available on panels for mounting in standard steel racks, if so ordered. (Panel mounting adds $\$ 24.25$ or $\$ 30.75$ to the list price, depending on the model.)

Deluse models JX50 and JX30 incorporate the exclusive Bogen ANTI-FEEDBACK CONTROL, which rermits the bogen A.NT-FEEDBACK CoN out of acoustic feedhack and hence the uze of more tuning out of acoustic feedhack and hence the nse of more power in the system. These moudels also featwe separate, continuously variahle bass and treble tone controls, and provision for plug -in remote valume control of two input channels. (Order remote control unit separaley-SCR50 [50' cable] at $\$ 16.75$ list price, or SCR100 [100' cable] at $\$ 21.25$ list price.)
All " $J$ " models (except J030) have provision for easy plug-in of low impedance input transtormers, when it is desired to use low impedance microphones located at a considerable distance from the amplifier. (Orter plug-in transformers separately for desired number of low impedance inputs: (T155, T156, Ti53, for $200.500,50$ ohms, respectively.) In addition, models FE10, RP.1, 110125, HO50 and JO30 may be ordered as low impedance versions HEL10, RP-1L, HOL125, HOL50 and JOL30, for \$18-\$25 additional to the list urice. "J" models also feature broadcast-type microphone connectors, with positive lock and quick disconnect.

For simple, rapid impedance matching between amplifier and speakers, constant voltage output taps ( 70 volts, 140 volts) are provided on all Bogen amplifiers where there is likely to be need for them, in addition to conventional constant impedance taps. These eliminate the involved calculations previously required to determine the necessary speaker matching transformers, if any.

All indoor systems include a microphone and two or four speakers mounted in wall baffles, with connecting cables and plugs, Outdoor systems include a microphone with cable and plug and one, two or three trumpets. Portable systems include a microphone and two speakers mounted in a carrying case (E) with cables and plugs. The case, which also carries the ammifier, divides into two speaker bafles ready for instant use.

No matter what your recuirement, you cannot buy a
(E)
 than a Bogen.

# Bogen SOUND SYSTEMS 

## PORTABLE 3-SPEED TRANSCRIPTION PLAYERS

## Equally Practical as Portable P.A. Systems

MODEIS VPIt and VP17X are high-fidelity phonographs featuring variable speed control over the entire range from 29 to 86 r.p.m. Ideal for instruction, square dancing, and all other applications in business, school or recreation requiring speeds of 78,45 and $331 / 3 \mathrm{r} . \mathrm{p} . \mathrm{m}$. plus variations from the three standard schools fecreorate 4 -pole constant velocity motor weirhted and rubber-padded turntable, 10 -watt speeds. ncorporate 4 -pole constant velocity motor, werted and housed in an attractive and compact high-fidelity amplifier and 12 -inch speaker, all carefuhy matched and housed in an attractive and compact carrying case. These models "Wow" is nerlipible Separate bass and treble tone controls are provided. and minimum record wear. Wow is neflicheck mounting. A microphone input with separate volume

VP17 (with piezo electric cartridge)
VP17X (with GE magnetic cartridge)
List Price: $\$ 215.00$, plus excise tax

MODELS FP17 and FP17X offer the three standard speeds, with the same amplifier (including tone controls and scratch filter) and same speaker and carrying case described above, for all applications where intermediate speed variations are not required.
FP17 (with piezo electric cartridge).......... List Price: $\$ 180.00$, plus excise tax FP17X (with GE marnetic cartridge).......... List Price: $\$ 195.00$, plus excise tax

MODEL ET16 provides the three standard speeds, employing a 5 -watt amplifier with tone corrector and a 10 -inch speaker. Excellent performance at low cost. ET16 (with piezo electric cartridge) List Price: $\$ 123.75$, plus excise tax

## CHALLENGER SOUND EQUIPMENT by Bogen

## 30-WATT P.A. AMPLIFIER AND SYSTEMS

- Individual controls for two microphones, phonograph, tone control.
- Terminal strip and 2 speaker plug-in sockets for connection of speaker lines.
- Moulded bakelite sockets throughout.
- Inverse feedback for better response and regulation.
- Extractor type fuse. . Recessed carrying handles.
- Output impedances: 4, 8, 16 ohms, 70 volts.
- Dimensions: CH30: $15^{\prime \prime}$ w. $\times 8^{\prime \prime}$ h. $x 10^{\prime \prime} \mathrm{d}$.

## NEW COMMUNO-PHONE SYSTEMS

Five Versatile Models to Solve Every Intercommunication Problem SERIES " $X$ "-Completely universal. Will serve installations requiring single master and several remote stations-installations requirinp several masters-or installations requiring several masters and several remotes. Model X110 has ten selector buttons; Model X210 has twenty. Gray steel cabinets; typewriter keyboard action; automatic busy signal; provision for plug-in of handset; 117 -volt, A.C., power supply; U.L. Approved.
SERIES 'C'—Serves installations requiring either a single master and several remote stations or several master stations only. Will not serve installations requiring a combination of several masters and remotes. Operates on voice coil lines, A.C.-D.C.; no busy signal; similar to Series " $X$ " in other respects.
MODEL "TWIN"-Complete 2 -station wireless system, requiring no cable between stations. Simply plug stations into regular power line and talk. Additional stations available; all will receive when any one transmits. Any can be locked in "continuously transmitting" position. U.L. Approved. TWIN (2 stations)

- 117-volt, A.C., power supply.

## MARK SIMPSON MFG. CO.

School and Institutional Control Amplifier with Complete Program Facilities MICROPHONE • RADIO • PHONOGRAPH

## MS SERIES <br> FOR 6 TO 36 STATIONS

28 Watts of Audio Power, 40 Watts Peak Power for 6, 12, 18 24, 30 and 36 Stations with Built-in Intercommunication Channel.

FEATURES: 28 Watt Amplifier - Built-in Intercommunication Channel - Two-way conversation - Simultaneous or selective paging - External phono provision - Volume-level indicator Input selector switch © External microphone provision - Piovision for external radio - U/L approved.
DESIGN AND CONSTRUCTION: Ample power for each speaker. Ample gain for external microphone and phonograph pickup. Group or selective paging. Calls may originate from any room to master when proper interconnecting cable is used. Separate volume controls for level adjustment of all calls. Volume-level indicator for correct level setting. Provision for connecting an external phonograph. Any standard radio may be adjusted for use. Two-way conversation feature permits easy communication. Balanced line for simplicity of installation. Use of more than 15 db of inverse feedback assures negligible change of volume level regardless of varying speaker loads.

Installation

The above is an inter－mixed system using Both Masters and Remotes．
Masters may call selectively or to all masters and remotes in the circuit．Master stations can originate calls to any remote at will． Remotes can answer any master from $\alpha$ dis－ ：ance but cannot originate calls nor talk to other remotes．Remotes can originate calls to any master in the circuit，but cannot talk with other remotes．Model JS Remote may originate a call to oniy one master．Model IS－6 Remote may originate a call to as many as six masters．
Remotes with switch can be installed for private or non－private use．

Each master can have his own private hook－ up of remotes．The remotes may or may not originate calls to the individual master． Masters can call each other regardless of whether master being called has its power on or off．
Illustration shows less than the maximum number of units possible in installation．
A JMP－6 Master may be connected to a total of six other units and a JMP－12 Master to a total of twelve other units．These units may be other masters or the JL，JS，and JS－6 Remotes， or a Masco Paging Amplifier and／or Paging Horns．All of these units may be mixed．

IJM-10 Master

## MASCO DUAL-PURPOSE MODELS

All Master Systems - Up to 11 Stations - MASTER-TO. REMOTE SYSTEMS - Single Master for Up to 10 Remotes All-Master Systems: The IJM-5 Master may be connected to a maximum of 5 other Masters for a total of 6 in the system. The IJM-10 may be used with up to 10 other Masters, or 11 Stations in one system.
Master-to-Remote Systems: An IIM-5 Master may be connected to a maximum of 5 Ji and JL Remotes. An IJM-10 Master may be connected to up to 10 JR and JL Remotes.

## MODELS IJM-5 AND IJM-10 ALL-MASTER SYSTEMS

FEATURES: Any station can call and talk with any other station, without interierence or cross-talk A Master can always call another Master, even if the called station's power is off 0 Up to 5 pairs of conversations may be held (in an IJM-10 system) at the same time - Economical to operate-only uses 20 watts per Master For AC or DC operation Attractively styled unbreakable cast aluminum cabinets, finished in dark mahogany

## MODELS IJM-5 AND IJM-10

Master can call any one or all Remotes at the same time - Stand by position on Master's selector switch keeps Master silent until called by a Remote Station - Master has volume control with on-cif switch and pilot light - System normally supplied for private operation of JR Remotes Simple conversion enables wiring for non-private operation of Remotes and JR and JL wirmg for non-private operation of Remotes and JR and JR Remates can reply to calways originate calls to Master - Master can page Remotes can always originate cals to Master Master can page directly through paging horns, and when non-private you can reply to calls through the horn, without using any switch Master can also page through paging amplifier and horns ICS Switch permits reply to calls from horns and also allows

- Stations may be up to 2,000 feet apart - Heavy duty Push-Bar Talk-Listen Switch on all stations, designed for long-life operation. - Lock-in position of Talk-Listen Switch on Masters, for dictation, baby-sitting, sick-room and similar uses • Pilot light on-off indicator " "All" position on selector switch for calling all stations simultaneously - Masters can page directly through one or moze horns or through paging amplifier and horns. Paqing horns cannot reply in an All-Master System.

## MASTER-TO-REMOTE SYSTEMS

Master's Talk-Listen Switch permits use for two-way baby-sitting, dictation, or sick-room use.

## HIGH FIDELITY AMPLIFIERS

## MASCO CUSTOM TEN

## 10 WATT HIGH FIDELITY AMPLIFIER

With Eight-Pesition Equalization Selector Plus Bass and Treble Compensated Volume Control - Removable Front Panel for Custom Installation.
FEATURES: Ten watts of low-distortion power - Free of internally-generated hum and noise Separate Bass and Treble Tone Controls - Bass-and Treble-Compersated Volume Control automatically increases both low and high frequency response with reduction in volume in accordance with the characteristics of the human ear as described by Fletcher and Munson - Four inputs for Radio or TV Tuner or Tape Recorder, Crystal Phono Pickup, Magnetic Phono Pickup - Recorder Output Jact on the Custom Ten Amplifier permits instantaneous recording while listening. Suitable for any tape. disc or wire recorder - More than 15 db of feedback over three stages - Removable Front Panel designed for Easy Custom Installation Beautifully styled black and gold panel and black chassis. Two internally Jused Auxiliary AC Power Outlets. Can be used on 105-125 volts, 50 or 60 cycles AC - U/L Approved - Pilot light socket and plug provided - Extralong control shafts supplied for custom cabinet installations.

## MASCO CM-EIGHT

## 8 WATT HIGH FIDELITY AMPLIFIER

An ECONOMICAL Amplifier with Performance Usually Found Only in More Expensive Equipment. FREQUENCY RESPONSE: 20 to 20.000 CYCLES PER SECOND $\pm 1$ DB. LESS THAN $1 \%$ HARMONIC DISTORTION AT 8 WATTS. REMOVABLE FRONT PANEL FOR CUSTOM INSTALLATIONS.

## Perfect for the BUDGET Custom Installation

An eight watt high fidelity unit complete with pre-amplifier and tone control equalization, with the fine performance usually expected only of more expensive equalizatio
Now possible for EVERYONE to enjoy the satisfaction of hiah-fidelitv music reproduetion.
FEATURES: Three-Position Selector Switch permits simple choice of Radio, Crystal ar Magnetic Phonograph, and Power-Off Eight watts of power output Very low hum and noise . Tone Control Equalization-wide variation of tone by the spparate Bass and Treble Tone controls assures proper reproduction of all iypes of recordings * Three Inputs for Radio Tuner, Magnetic Phonograph Prickup, castom cabinet installations Beautifully styled black and gold chassis and panel castom cabinet installations. Beautifully styled black and gold chassis and panel - Auxiliary AC, power outlet Can be used on 105-125 volts, shafts supplied for custom cabinet installations.

# Fleetwood Remote TELEVISION RECEIVERS 

CONRAC, INC., GLENDORA, CALIFORNIA

The Fleetwood Remote is a complete two chassis television system, built to professional standards. It employs 27 tubes in addition to the picture tube and provides audio power for a loudspeaker. The picture chassis is relay operated by the on-off switch of the Tuner, thus providing fu!l remote control. Both Tuner and Picture Units and attractively finished in gray and black baked enamel. Each Fleetwood includes a gold finished, hinged escutcheon plate for easy access to the secondary controls.

The separate Tuner Unit, with edgelit dial and individual channel pilot lamps includes the off-on, picture, volume, channel selection and fine tuning controls. The illuminated channel numbers are readily replaceable and a full set of numerals, from 2 to 82, is provided. The tuner is of the Super Cascode type and is completely adaptable for Ultra High Frequency reception, by a simple interchange of strips and insertion of the correct channel identification number. (It also can be used with a color picture chassis, Model 400. Write factory for details.) The four video I.F. stages provide full four megacycle bandpass, and there are separate cathode followers for audio and video circuits. Three audio outputs are provided: (a) low level high impedance, and (b) low level cathode follower, both for connection to existing music systems, and (c) power amplifier to operate a loud speaker.

## CHASSIS DIMENSIONS

| Units | Height | Width | Depth |
| :--- | ---: | ---: | ---: |

# HICH-FIEELITY COMPONENTS 

C800A FM-AM Tuner is Craftsmen's finest. Built-in phono pre-amplifier and record equalizer make the C800A extremely versatile for installations of all types. Front pinel-selected phono equalization for AES, $\mathbf{L P}$ or EURopean recording characteristics. Overall distortion: Less than $1 / 2 \%$ ar $100 \%$ FM, $1 / 2 \%$ at $50 \%$ AM. Sensitivity: $F M-4 \mu v$ for 30 db . quieting, AM-S $\mu v$ for $1 / 2 v$ audio output. Double-shadow tuning eye and AFC on FM simplifies tuning. Front panel AFC cutout for tuning weak stations. Has cathode follower audio output, continuously variable bass and treble controls provide up to 15 db . attenuation or boost. Size: $133 / 4 \times 101 / 2 \times$ 7 in. high. Shipping W'eight 22 lbs. Net.......................... $\$ 159.50$
C10 FM-AM Tuner. Choice of thousands for proven performance and dependability. Sensitivity: FM-5 $\mu \mathrm{v}$ for 30 db . quieting, $A M-5 \mu \mathrm{v}$ for $1 / 2 \mathrm{v}$ outpur. Flywheel Tuning and Automatic Frequency Control : AFC simplifies tuning and assures freedom from FM drift. Distortion: Less than $1 / 2 \%$ at $100 \% \mathrm{FM}, 1 \%$ at $50 \% \mathrm{AM}$. Frequency response: $\pm 1 \mathrm{db}, 20$ to $20,000 \mathrm{cps}$. Separate bass and treble tone controls provide up to 15 db . boost or atrenuation. Phono pre-amplifier compensated for magnetic cartridges. Input; High impedance for TV or tape. Outputs: "Detector" and "Amplifier," both cathode followers permit remote control of power amplifier. FM-AM low-noise antenna, 11 tubes plus rectifier. Size: $131 / 2 \times 91 / 2 \times 7$ in. high. Shipping Weight 17 lbs. Net.. ... ... $\$ 131.50$
C500A Ultra-Fidelity Amplifier - finest made at any price. Based on famous Williamson all-triode circuit with 20 db . inverse feedback. 10 watts output at less than $1 / 10 \%$ har. or $1 / 2 \%$ I.M. distortion; 1 watt at $1 / 10 \%$ har. or $1 / 20 \%$ I.M. distortion. Freq. response: 5 to $100,000 \mathrm{cps}$ $\pm 2 \mathrm{db}$. Hum: 一90db. Damping factor $32: 1$. Matched push-pull KT66 output tubes provide lowest possible distortion. Size: $131 / 2 \times 8 \times 71 / 2$ in. high. Shipping Weight 31 lbs . Net
$\$ 99.50$
C400 High-Fidelity Amplifier - Exceptional performance at low cost Streamlined narrow chassis simplifies custom installations. 10 watts ourput at less than $1 \%$ harm. or $5 \%$ I.M. Distortion. Freq. response: 10 to 30,000 cps. $\pm 1 \mathrm{db}$. Hum: -70 db . Damping factor: $4: 1$. Tubes: 6 J 5 , 6SN7GTA, push-pull 6V6GT's, 5Y3GT rect. Size: $14 \times 41 / 2 \times 51 / 6$ in high. Shipping Weight 12 lbs . Net
$\$ 42.90$
C450 High-Fidelity Amplifier. Compact high-fidelity amplifier for the budget minded. Freq. response : $\pm 1 \mathrm{db} .20$ to $20,000 \mathrm{cps} .6$ watts at less than $1 \%$ harm. distortion. Push-pull 6W6GT beam-tetrode output tubes. Size: $81 / 2 \times 6 \times 6$ stortinn. Push-pull 6 . $6 G T$ beam-tetrode output tubes

C900 FM Tuner. The ultimate in Stability Sensitivity, and Minimum Distortion. Extreme Sensitivity: 1.0 uv for 20 db . quieting provided by double-triode, cascode rf amplifier. Minimum Distortion: $0.1 \%$ I.M. dis-double-triode, cascode if amplifier. Minimum istortion: .1 or int. dising, essential for low distortion and eliminates FM drift. Maximum ing, essential for low distortion and eliminates FM drift. Maximum stability. Size: $131 / 2 \times 83 / 4 \times 7 \mathrm{in}$. high. Shipping Weight 12 lbs . Net .... $\$ 119.50$
CAl The complete High-Fidelity Home Music Assembly, ready to install. System includes C10 FM-AM Tuner. C400 High-Fidelity Amplifier, C20 Coaxial Dual Speaker, C30 3-Speed Record Player. Now, the quality of record reproduction with FISHER or other components no longer need be limited by the quality other components no longer need be limited by the quality of the phonograph cartridge. THE FISHER Series 50 Moving
Coil Phonograph Cartridges assure the finest reproduction of which the record is capable!

## OUTSTANDING FEATURES

MODEL 50.HM
User's Net $\$ 129.50$

## OUTSTANDING FEATURES

1) Smooth response to below 30 cycles per second. 2) Can be used with $12^{\prime \prime}$ or $15^{\prime \prime}$ ' single, coaxial, dual or triaxial speaker systems. For that reason you can change loudspeakers at any time in the future without obsoleting the speaker enclosure. 3) Does not require corner placement. Locate THE FISHER anywhere. 4) Air loading of the bass output is over four times that of an infinite baffle speaker enclosure. 5) Substantially extends the bottom bass range of any speaker. 6) Reduces the amplitude of the speaker's inherent bass resonant speaker's inherent bather bass response. 7) Special design eliminates synthetic or 'tuned' bass, ates synthetic or
with its characteristic 'boom' and barrel effect (particularly noticeable on the male speaking voice.) 8) There is no listener fatigue, regardless of volume level! 9) Additional tweeters, if desired, can be mounted at any time.

MODEL 50.HB
User's Net $\$ 134.50$

## For 12" and 15" Speaker Systems

Prices slightly higher West of the Rockies.
f. High compliance improves low hissuency response, reduces recoro eliminates tracking distortion. 2. Can be used with virtually any tone arm 3. Extremely low mass of stylus as sembly (featuring a hollow aluminum sembly feasults in greatly reduced stem) resulis in greatly reduced ing almost indefinitely the life ing almost indefinitely the life records and the stylus itself. 4. Supone acceptable material for the pur-
one acceptable material for the purpose. 5. Low impedance permits use of greatly varying cable length without loss of high frequency response and without its being subject to stray magnetic fields from nearby electronic equipment. 6. Rubber damping baffle protects moving parts from dust and suppresses needle talk. 7. Stylus suspension features shock-absorbing design to prevent accidental damage to both the stylus and the record.

THE FISHER Moving Coil Phonograph Cartridge, Model 50-LP (33-45 RPM)

$\$ 37.50$
THE FISHER Matching Transformer, Model MT-
(for use with pre-amplifiers with insufficient gain) \$8.75
IMPORTANT NOTE: Transformer not required with FISHER Models $50-\mathrm{PR}, 50-\mathrm{C}, 70-\mathrm{RT}$.

## THE FISHER FM-AM TUNER

THE FISHER Model 70-RT has all the features of the Model 50-R, but includes within the one chassis many of the control facilities and flexibility normally found anly in a separałe Preamplifier-Equalizer such as THE FISHER Mastar Audio Control, Series 50-C. For basic features, see Moded 50-R. Additional Features uf the Model 70-RT: Loudness Balance Control Switch. Phonograph preamplificafion and equalization. Two cathode follower outputs. Six Controls: Bass Control, Line Switch, Treble Volume, Loudness Balance, Channel and Equalization Selector Switch (Nine Positions: AM-Broad, AM-Sharp, FM, FM-AFC, AES, Ortho, LP, NARTB and TV), Station Selector. Tube Complement: Total of Fifteen, including 2-6 97 , 1-6CB6, 1-6BE6, 3-6BA6, 2-6AU6, I-6AL5, |-12AU7, 1-12AX7 I-6AV6, I-5Y3, I-6U5. Size: $143 / 4^{\prime \prime}$ wide, $81 / 2^{\prime \prime}{ }^{\prime \prime}$ high, $91 / 4^{\prime \prime}$ deep. Shipping Weight: 19 pounds.

FM and $A M$ sections are identical to $50-R$, described below. Built-in _preamplifier consists of two cascaded triode stages having adequate gain for even the lowest level magnetic pickups. Full choice of record equalization settings for proper acoustic balance of all makes of records.

Audio Section: Uniform response, $\pm 1 \mathrm{db}, 20$ to 20,000 cycles. Distortion less than $0.04 \%$ for 1 volt output; $0.8 \%$ for 10 volts output. Hum level on radio better than 90 db below 2 volts output with volume control at minimum (more than 86 db below 2 volts output with control at maximum.) Hum level on phono better than 62 db below output with 10 millivolts input signal. AM loop and FM dipole supplied.

Cables can be made any length up to 200 feet. The detector output is independent of the tone controls for use in recording applications or where a remote chassis is to be used. Bass and Treble Controls continuously variable, with 15 db of boost to 15 db of atfenuation at 50 and 10,000 cycles respectively. Adjustable Loudness Balance Control; can be turned on or off, as desired, from front panel.

## Model 70-RT

User's Net $\$ 184.50$
Prices slightly higher West of the Rockies.

## THE FISHER FM-AM TUNER

THE FISHER Model 50-R, based on its performance in the field, is without question the finest unit of its type in the country. General Features: 14 tubes including rectifiar and tuning eye. Self-powered. Completely shielded construction, inc:luding bottom plate. Six-gang variable capacitor. Flywheel funing. Both main chassis and front-end sub-chassis are of etched aluminum and individually shock mounted. Beautiful hammertone front panel. Brushed brass control marker plate. AM loop and FM dipole antennas supplied. Two suxiliary AC outlets. Two high Am iop and FM dipole antennas supplied. Two suxilary AC outlets. Two high ampedance inputs. Large tuning dial with logging scale. Channel indicator lights. Contmols: On-Off: Volume; Selector Switch (AM-8rodad AM-Sharp. FN, FM-AFC
 2.6AL5, 1-12AU7, 1-5
Weight: 19 pounds.

Incorporates a two-band superheterodyne circuit with separate front ends for FM and AM. Dual antenna inputs: 72 ohm or 300 ohm balanced. FM section is Armstrong system: Comprises cascode, tuned RF stage and two IF stages, followed by two cascaded limiters and a FosterSeeley discriminator. Adjustable AFC; can be switched in and out of circuif from front panel. Sensitivity: $11 / 2$ microvolts for 20 db of quieting on 72 ohm antenna input; 3 microvolts for 20 db of quieting on 300 ohm antenna input. Full limiting on signals as low as 1 microvolt. Frequency response: uniform from 20 to 20,000 cycles, $\pm 1 \mathrm{db}$.

AM section incorporates one tuned RF stage and two IF stages. IF band width adjustable from front panel. Frequency response: -3 db at 7,000 cycles in broad-tuning position. Band width in sharp-tuning position: 6 db down at 6 Kc . Sensitivity: less than I microvolt input for I volt output. Built-in 10 Kc heterodyne whistle filter. Dual antenna inputs. AM loop and FM dipole antennas supplied.

One triode stage of audio amplification. Frequency response: 20 to 20,000 cycles, $\pm 1 \mathrm{db}$. Distortion: less than $0.8 \%$ for 10 volts output, $0.04 \%$ for $\mid$ volt output. Hum level with volume control at minimum: more than 100 db below 2 volts output (more than 90 db below 2 volts output with control at maximum.) Cathode follower output permits use of tuner af any desired distance, up to 200 feet from amplifier.

## THE FISHER MASTER AUDIO CONTROL Series 50-C

5 insuts and 5 independent input level confrois: 3 high. level, I low-leval for magnetic cartridge and I microphone input. PHONOGRAPH PREAMPLIFIER has two "ascaded triode stages. Bass and Treble Controls produce up to 16 db of confinuously variable boost or aftenuation at 30 and 10,000 cycles respectively. MAXIMUM GAIN irort high level input: 22.4 db : low level: 53 db . HARMONIC DISTORTION: $0.02 \%$ at I volt, $0.05 \%$ at 5 volts $15.15 \%$ at 10 volts, $0.4 \%$ at 15 volts. INTERMODULATION DISTORTION: $0.08 \%$ af it volt, $0.2 \%$ at 5 volts, $0.5 \%$ a $\dagger$ 10 volts, $1.6 \%$ at 15 volts. FREQUENCY RESPONSE: $\pm 0.5$ $\mathrm{db}, 20$ to 20,000 cycles with controls in uniform response position. HUM AND NOISE LEVEL: On radio input Detler than 100 db below 2 volts output with control at rero; better than 90 db below signal with control at maximum. On phono insut - 68 db below output with a 10 mv mput signal. CATHODE FOLLOWER INPUT and two CATHODE FOLLOWER OUTPUTS permit leads up to 200 ff .
Model 50-CH (Chassis Only) ........User's Net $\$ 89.50$ Model 50-CM (Mahogany) ..........User's Net $\$ 97.50$ Model 50-CB (Blonde) User's Net \$97.50

The pe tormence of the 50-C will be limited only by the quality of the associated equipmeni. Features high gain with extreme reserve output voltage. Self-contained power supply, completaly shielded, with DC for all filaments. 8 Controls: Volume, Loudress balance, 5 position input Selector Switch. Two low and high frequency ever switches provide 25 combinations of record equalization. Bass and Treble controls. 3 spare AC receptacles. Tube complement: 2-I2AX7, 1-12AU7. Size -in Cabinet: $153 / 4^{\prime \prime}$ wide, $4 / 2^{\prime \prime}$ high, $61 / 9^{\prime \prime}$ deep; Chassis only: $143 / 4^{\prime \prime}$ wide, $31 / 2^{\prime \prime}$ high, $61 / 2^{\prime \prime}$ deep. Shipping waight: 10 pounds.

## THE FISHER AUDIO AMPLIEIER <br> Model 50-A

Expressly encineered to satisfy these criteria: low internal impedance, low harmonic and intermodulation distortion at all power levels, extramely low hum and noise level, unusual reserve power-handling capacity, high efficiency good transient response, wide freqrency response "good linearity (output versus input.) compactness, long compenent life, simple circuitry, complete accessibility for easy servicing and moderate cost.
HIGH OUTPUT, with less than $1 \%$ harmonic distortion at 50 watts. ( $.05 \%$ at 5 watts, $.08 \%$ at 10 watts.) INTERMODULATION DISTORTION' is below $.4 \%$ at 10 watts $.8 \%$ at 40 watts and $2 \%$ at 45 watts (measured $40 / 7000$ cycles at 4-1.) FREQUENCY RESPONSE is uniform with in $\pm .1 \mathrm{db}$ from 20 to 20,000 cyctes and within 1 db from 5 to 100,000 cycles. POWER OUTPUT is constant within I db at 40 watts, is to 60,000 cycles. HUM AND NOISE is better than 92 db below full output. INTERNAL IM PEDANCE is .53 ohms at the 16 -ohm tap, giving a damping factor of 31 . EFFICIENCY is in excess of $55 \%$ at full output compared to $25 \%-30 \%$ of typical Class A circuits. Level Control. TUBE COMPLEMEMT: 3-12AU7. 2-6CL6. 2-1614 and 2-5AW4. OUTPUT IMPEDANCES: B and 16 ohms. Jack in output tube circuit to medsure plale current. Accessible bias control to adjust plate current. Accessible fuse. Auxiliary AC receptacle. SIZE: $83 / 4^{\prime \prime}$. $141 / 2^{\prime \prime} \times 9^{\prime \prime}$ high. SHIPPING WEIGHT; 41 pounds. - -

User's Net \$159.50 Prices slightly higher West of the Rockies.

## THE FISHER AUDIO AMPLIFIER <br> Model 70-A

More clean watts per dollarl Extremely low harmonic and intermodulation distortion at all power levels, excellent transient response, wide frequency range and good linearity. Hum and noise are virtually non-measurable! HIGH OUTPUT, with less than $1 / 2 \%$ harmonic distortion at 25 watts ( 50 watts peak.) Less than $0.15 \%$ distortion at 20 watts; less than $0.05 \%$ at 10 watts. INTERMODULATION DISTORTION less than $1 / 2 \%$ at 20 watts and less than $0.2 \%$ at 10 watts. FREQUENCY RESPONSE is uniform within $\pm 0.1 \mathrm{db}$ from 20 to 20,000 cycles and is within 1 db from 10 to 50,000 cycles. POWER OUTPUT is 20 thin 1 db from to to 50,000 cycles. POWER OUTPUT is constant within NOI at 25 watts from 15 to 35,000 cycles. HUM AND NOISE LEVEL is better than 95 db below full output INTERNAL IMPEDANCE is 0.61 ohms at the 16 -ohm tap giving a damping factor of 26. PHASE SHIFT is less than 150 at 20 cyeles and less than 180 at 20,000 cycles. THE FISHER Model 70-A has four separate feedback loops to achieve low internal impedance, extremely low distortion and excellent transient-response. Two type 588 tubes, connected as tetrodes, are employed in the power

## Tomorrou's audio TODAY!

stage. The use of a unique sathode and screen feed-back circuit provides all the advantages of triode performance together with the efficiency of tetrodes. The carefully designed output transformer consists of fiffeen interleaved windings in conjunction with a grain-oriented steel core producing the finest in output transformer performance. The entire amplifier and power supply are built on one compact, steel chassis, simplifying installation. All transformers in drawn stee cans and sealey against moisture. TUBE COMPLEMENT: 1-12AT7, 1-12AUT, 2-588 1-5V4G. OUTPUT IMPEDANCES: 8 and 16 ohms. Fuse readily accessible. SIZE: 41/9' deep, $143 / 4^{\prime \prime}$ wide, $61 / 2^{\prime \prime}$ high. SHIPING WEIGHT: $21 / 2$ pounds.

# 卒: THE FISHER Finest Audio Products 

THE FISHER HI-LO FILTER SYSTEM Model 50-F

THE FISHER Hi-Lo Filter System, Model 50.F, does what conventional tone controls cannot do, for it suppresses all types of noise with an absolute minimum. loss of tonal range. It can be readily connected to any tuner, amplifier, high fidelity system, radio-phonograph, preamplifier-equalizer, magnetic tape re corder, etc. High impedance input. Cathode follower output, permitting connecting cable up to 200 feet long, if desired. All triode circuit, utilizing 1-I2AX7, pravants insartion loss. Hum level more than 70 db below I volt output. Uniform response within $1 / 2 \mathrm{db}, 20$ to 20,000 cycles, with cut-off selector switches in neutral position. Distortion so low as to be virtually nonmeasurable. Two, independent lever switches. Low-Frequency Cut-Off Points: Zero, 30,70 and 120 cycles at a slope of 10 db per octave. High-Frequency Cut-Off Points: 20 Kc (flat ${ }_{1}$ ) 10 Kc 6 Kc and 3 Kc , af a slope of 20 db per ocłave. Self-powered Built-in ON-OFF switch. Jewel pilot lisht. Completely shielded chassis, with bottom cover. Beautiful and durable plastic cabinet Etched brass control panel. Size: $43 / \mathbf{g}^{\prime \prime}$ high, $5 \mathrm{ft}^{\prime \prime}$ wide, $5^{\prime \prime}$ deep
 depths shown, for lever switches.) Shipping Weight: $33 / 4$ pounds.

THE FISHER PREAMPLIFIER-EQUALIZER
Model 50PR

THE FISHER Preamplifier-Equalizer, Model $50-P R$, is the first high quality unit af low cost, bringing professional recurd equal. ization facilities within the reach of every record collector. Its voltage gain is ample foe use with any low-leved magnetic cartnidge and it can be modified for constant amplitude or crystal pickups (a simple equalizer is required for the latter type.) Two stages of triode amplification (1-65C7). Exclusive foedback circuit assures full bow-frequency equalization. Spacial circuit dasign parmits output lead up to 50 feet in length. Two, independent lever switches. Low Frequency Turn-Over Points: AES, NARTB and ORTHO, LP, 800. High Frequency Roll-Off Positions: Zero (hat,) $8 \mathrm{db}, 12 \mathrm{db}$ AES (ORTHO), 16 db (NARTB.) Over-all gain, 40 db (I volt output from 10 millivolts input.) Hum level is 60 db below 10 millivolts input. Frequency response is uniform within I db of the published curve. Adjustable hum level control. Tube is shock-mounted to minimize possibility of microphonics. The 50-PR is self-powered and has a built-in AC switch. Jewol pilot light. Chassis is completely shielded. Bottom cover Beatiful and curable plastic cabinet with attractive, etched brass control pasel. Size: $43 / 3^{\prime \prime}$ high, $5+\frac{1}{\prime \prime}$ wide, $5^{\prime \prime}$ deep. Classis Size: $3 \mathrm{~T}^{\circ} \mathrm{g}^{\prime \prime}$ high, 4 tig' wide. $4 \mathrm{~T}^{\circ \prime} \mathrm{g}^{\prime \prime}$ deep. (Add $\mid \mathrm{K}^{\prime \prime}$ to dapths shown, for lever switches.) Shipping Weight: 33/4 pounds.

## THE FISHER HIGH QUALITY PREAMPLIFIER - Model PR-5

Designed to meet the need for a self-powered unit of excelient quality, yet moderate cost. THE FISHER Model PR-5 can be used with low-level magnetic pickups of any cost. THE FISHER MOdel PR-5 can be used with low-level magnetic pickups of any make. In wach case, exact and correct equalization is provided for the particular
pickup of your choice. Can also be used as a microphone preamplifier. OUTSTAND. pickup of your choice. Can also be used as a microphone preamplifier. OUTSTAND. ING FEATURES: 1. Virtually inaudible hum level, better than 60 db below one volt output in both phonograph and microphone use. 2. Frequency response is uniform within 2 db from 30 to 20,000 cycles on all applications. 3. The unit is self.powered, using components of a type that assure long, trouble-fres service. 4. Chassis is completely enclosed, with bottom cover. Latter is readily removable. 5. Two stages of friode amplification are utilized. 6. High Gain. On Phonograph: 10 millivolts (. 01 volts) input to produce one volt output, a voltage gain of 100 . On Microphone: I millivolt (001 volts) input to produce one volt output, a voltage gain of 1,000 . 7. An exclusive feedback circuit has been incorporated to produce full low frequency equalization. The latter has been designed for turn-over at 500 cycles (ORTHO.) B. Circuit design permits the use of output cable up to fifty feet. 9 . Complete installation and service manual, as well as all necessary connecting plugs suplied. 10 . Overall size: $33 / h^{\prime \prime} \times 5 / /^{\prime \prime} \times 35 / /^{\prime \prime}$ high. Shipping waight: 2 pounds.

# MIIEH-MISITR Custom Built TV Chassis 

The World's Most Powerful, Most Dependable TV Receivers Gobld Nedal Sfories

## CUSTOM BUILT DELUXE TV CHASSIS

Tech-Master design and construction are as fine as human hands and technical know-how can produce. The most advanced engineering methods, the finest components, the rigid alignment and test standards and the pledged determination to produce the OPTIMUM in Television adds up to the finest TV Chassis that the industry has to offer. In fringe areas as well as normal range areas, The Gold Medal Series brings modern motion picture brilliance and clarity to the TV screen.
A NEW SYSTEM OF PICTURE-SOUND SYNCHRONIZATION guarantees highest picture resolution with drift-free, undistorted sound under all signal conditions.

## Compare These Features

* TECH-MASTER 630 TYPE CIRCUIT: Of all the circuits known to the TV industry, the FCA-630 type is still acclaimed the finest. But, even the 630 is only as good as the Engineering, the Components and the Workmanship that go into it. These three factors are inherent in every Tech-Master Custom-Built Chassis.
$\star$ ADVANCED CASCODE TURRET TUNER, Adaptable to UHF Without Tools: Employs a Cascode RF amplifying stage, affords a high signal-to-noise output resulting in a sharper picture, with a minimum of "snow," even in weak signal areas. UHF channel strips may be inserted at any time, without the use of tools.
* Full 4 Mc Band Width for better picture definition.
$\star$ Quick-Action Keyed AGC Circuit assures stabilized control.
$\star$ New Hi-Sweep Auto Transiormer System for outstanding brilliance.
$\star 3$ Microvolt Sensitivity . . . Excellent for Fringe Areas.
$\star$ Full Horizontal and Vertical blanking.
$\star$ Area Control Switch (on front panel) for local or distant setting.
$\star$ Picture-Expander: Variable control for extra width under low line voltage conditions.
$\star$ Chassis are beautifully plated in gleaming nickel tinish ... come completely wired, aligned and tested, with all tubes (less kine).

## FOR NEW $90^{\circ}$ PICTURE TUBES UP TO 27'

Model 2430-9. Tech-Master's Latest Addition to the Gold Medal Series. Designed to drive $24^{\prime \prime}, 27^{\prime \prime}$ picture tubes and others requiring $90^{\circ}$ deflection. The size and quality of this ruggedly built chasis makes it defleal for school and commercial installations. The mositadvanced deideal for school and commercias tystallations. which feature 22 KV second anode voltage, polyethelene enclosed HV which feature 22 KV second anode voltage, polyethelene enciosed reep socket, quick retrace auto-transtormer, full horizontal and vertical sweep height controls, edge to edge focus and the latest $90^{\circ}$ ferrite casine yoke.

## FOR CUSTOM INSTALLATION

Model 2430:-Designed specifically for all picture tubes requiring 60 to 70 degrees horizontal deflection (21EP424AP4, etc.). Has quality 12" PM speaker, Universal picture tuise mounting brackets, Phono-input. Equipped with audio take-off to feed sound thru hi.fi system, if desired. Jack mounted on rear of chassis for easy connection.
$\$ 189.50$
Model 2431:-Same as Model 2430 (less sound take-off), but with true fidelity Push-Pull audio output.................. $\$ 199.35$

Model 2430-9:-For all $90^{\circ}$ picture tubes up to $27^{\prime \prime}$. Features similar to 2430 , but incorporates new high voltage horizontal and vertical sweep circuits..... $\mathbf{\$ 2 6 2 . 5 0}$ DIMENSIONS: $231 / 4^{\prime \prime}$ wide, $161 / 4^{\prime \prime}$ deep. SHIPPING WEIGHT: 70 lbs .

## CUSTOM DESIGNED, CUSTOM-BUILT TV CHASSIS Combining High Quality with Low Price For Picture Tubes Up to $24^{\prime \prime}$

MODEL C-30 has been engineered for the utmost in econamy, retaining every important feature necessary for quality of image and sound.
Here again is Top TV Performance attained through skilled engineering and finest set-tested components, embodied in a completely factory-wired chassis, pre-aligned, pre-adjusted and ready for use.
$\star$ Basic 630-Type Circuit Features Include:

Full 4 mc bandwidth
4-Stage Video IF
2-Stage Video Amplifier
$\star$ NEW, AUTOMATIC SOUND-PICTURE SYNCHRONIZATION.

* 29 Tubes, including rectifiers.
$\star$ Advanced, Cascode 12 channel turret tuner, adaptable to UHF without tools.
$\star$ 4-Stage Synchronizing Amplifier and Separator.
$\star 5$ Microvolt Sensitivity.
$\star 16 \mathrm{kv}$ 2nd Anode Voltage
$\star$ New, Automatic Horizontal Stabilizer.
$\star$ Automatic Background Control.
$\star$ Retrace Blanking Circuit.
$\star$ Double-time Constant AGC.

Designed for use with new, low-valtage E.S. self-focus tubes (17TP4, 21MP4, 24BP4, etc.)

MODEL C-30: completely wired, aligned and tested and all tubes (less picture tube)..... $\$ 149$. SO Dimensions: $213 / 4^{\prime \prime}$ wide x $161 / 4^{\prime \prime}$ deep. Shipping Weight: 55 lbs .

OFTVENJOYMENT with Built-in 82-Channel UHF/VHFCoverage

## UNIVERSAL TELEVISION KIT

Tech-Master brings high quality television within reach of the most economyminded customer, with the lowest price over for a top-performing, precisionengineered, AC/DC xit.
Tech-Masier's development of the IF "SynchroStrip" cuts in hall the amount of work required to assemble and wire the kit! It comes mounted in place, on the main chassis, together with the tuner, and is completely wired, aligned and tested. The newest engineering advancements have been utilized in the design of the horizontal and vertical sync circuits to assure excellent stability and noise immunity characteristics. Complete step by step instructions and diagrams (both pictorial and schematic) permit complete wiring over a week-end!
IDEAL FOR SCHOOLS: Requires minimum bench equipment; affords maximum opportunities for comprehensive TV training.
$\star$ Compact, light-weight easily portable unit, operates on both AC and DC for use with picture tubes up to $17^{\prime \prime}$ rectangular.

* Advanced and improved 12 channel turret tuner, adaptable to UHF without toolsl
$\star$ Latest type hi-gain stagger-tuned IF sybtem incorporating bi-tilar coils for excellent picture delinition.
* New AGC system, utilizing special delay network - for steady pictures regardless of varying transmission conditions.
* High efficiency beam power amplitier and ceramic core horizontal output transformer provide clear, bright pic transtormer provide clear, bright pi
tures and full horizontal deflection.
* Two-knob control on front panel provides automatically synchronized picture and sound.

MODEL 5116: "UNIVERSAL" Kit complete with set of 16 Circuit Tested Tubes, all hardware, instructions and picture tube mounting brackets, (less kine, wire and solder) ,-...-............................... $\$ 99.95$ Dimensions: $17^{\prime \prime}$ deep $\times 14^{\prime \prime}$ wide. Shipping Weight: Approx. 30 lbs .

## NEW DELUXE SUPERHET AC-DC RADIO KIT

Highest quality, easy-to-build Superhet Receiver Kit, consisting of quality components throughout, die-stamped plated chassis and wide range speaker.
Kit is furnished complete with modernly styled, handsome Bakelite cabinet ( $10^{\prime \prime} \times 51 / 2^{\prime \prime} \times 51 / 2$ ), attractive station selector and control knob. Only the finest components are furnished with this kit. Tunes all stan-
dard $A M$ broadcasts from $550-1720 \mathrm{KC}$. Super-sensitive, high gain dard AM broadcasts from $550-1720 \mathrm{KC}$. Super-sensitive, high gain
circuit assures outstanding reception with builtin loop antenna. Automatic volume control circuit to eliminate blasting or fading.
Tube Complement: 12SA7, 12SK7, 12SQ7, 50L6 and $35 Z 5$ rectifier.
Detailed schematic and pictorial diagrams with clearly inllustrated assembly instructions provide easy-to-follow directions for quick assembly. Operates $115-125$ volts, $50-60$ cycles, $A C$ or DC. Shipping Weight: 6 lbs . MODEL 3B5-K: Complete with tubes and cabinet ___ $\$ 19.95$
(Wire and solder not included)

Wherever quality custom television installations are desired, Tech-Master chassis are the overwhelming favorites. Tech-Master products are built to a standard, eot to a price. They are the result of advanced engineering coupled with an honest determination to obtain the optimura in reception, performance and value Tech-Master . . . first name in custombuilt TV receivers . . . is rapidly earning a similar reputation in the high fidelity audio field. The Tech-Master Williamson Amplifier Kit and the Tech-Master Pre-Amplifier Kit are made with the same "custom-quality" attention that is given to our TV receivers. We have cul ne corners, components are the finest. workmanship is meticulous. When you buy a Tech-Master Amplifier and Pre-Amplifier Kit, you get a world of pleasure, years of satisfaction.

## ANTENNA ACCESSORIES

## UHF LIGHTNING ARRESTERS (UL Approved)

- Ultra Low Loss - For Popular Type Transmission Lines

Standing-wave ratio less than $2: 1$ at 800 Mc . Iow-capacitance de sign. Low loss ... approximately 1 db at 800 Mc . Will accommodate most of the tubular round and over UHF transmission lines without the need of splicing or baring conductors. Resistance elements are made of a conductive rubber that is non-corrosive and impervious
to moisture. Screw Type
Screw Type 234A1
Suggested Llst Price: $\$ 1.53$
Strap Type 235Al
Suggested List Price: $\$ 1.40$
VHF LIGHTNING ARRESTERS (UL Approved)

- For $\mathbf{3 0 0} 0 \mathrm{Ohm}$ Ribbon-type Line - Simple to Instal

Screw Type for use with FM and TV antennas. Easy to install-n cutting or stripping of transmission line. Fits any $1 / 2^{\prime \prime}-2^{\prime \prime}$ pipe. Con

ype $214 \times 1$................................... Suggested List Price: $\$ 1.10$ Strap Type Arrester - wood screw firmly secured in body - no special tools needed. No cutting or stripping of transmission line. Type 215X1 ......................................Suggested List Price: $\$ 1.25$

## TV SET COUPLER (UL Approved)

- For 300-0hm Ribbon-type Line - Easy to Install Economical The RCA-240A1 TV Set Coupler permits simultaneous operation of two TV receivers from a common antenna. Can also be used in combinations of two to four units for simultaneous operation of two to four TV receivers from a common antenna. The $240 \mathrm{A1}$ reduce oscillator radiation between sets and has a flat hendpass response over the VHF bands. No cutting, splicing, or soldering response self-contained wood screw, no special tools needed soldering necessary Type 240A1

Suggested List Price: $\$ 1.95$ each

## spealiers, cabinets multicellular horns

9356 Sanfa Monica Blvd Beverly Hills, Calif.

161 Sixth Avenue
New York 13, N.Y.

## $604 C$ DUPLEX SPEAKER

The 604C Duplex is the finest single speaker on the market. Factory guaranteed irequency range from 30 22,000 cycles. Handles 50 watts peak power. The perfect sjeaker for music systems, highest quality pasing, and public address, $90^{\circ}$ horizontal distribution, $30^{\circ}$ vertical. Network imperlance, 16 ohms. Dimensions: $15 \mathrm{I}^{3} 8^{\prime \prime}$ diam., 11 1/8" deep. Weight with network, 40 pounds.

Net Price including Network: $\$ 156.00$

## 601A and 602A DUPLEX SPEAKERS

Highest quality for the home. Completely ir dependent high and low frequency speakers in a single frame. Factory guaranteed range of $30-22,000$ cycles.
601A-POWER: 20 watts cont.; 35 watts peak. IMPEDANCE: 8 ohms. LIM.: $121 / 4^{\prime \prime}$ diam., 5 5/8" deep. WT. with network: 17 lls.

Net Prise with network : $\$ 99.00$
602A-IOWER: 20 watts count.; 35 watts peak. IM. PEDANCE: 8 ohms. UIM.: $153^{3 \prime}$ diam., 714 deep. WT. with network: 25 lbs

Net Price with network: $\$ 114.00$

## CABINETS

Engineered for high quality saund reproduction. Cabinets are made of heavy plywool. All joints are screwed and glued. Interiors padded to eliminate spurious rattles and reflections. Code letters show speaker size: A-15"; B-12"; C-8".
605-A-Furniture Finiah Walnist or Mahogany
Height $35 \mathrm{~s} / \mathrm{m}^{\prime \prime}$, Width $31^{\prime \prime}$, Depth $171^{\prime \prime}$ 。 Net Price: $\$ 165.00$
 Depth $231 / 2^{\prime \prime}$.
Walnut or Mahogany Net Price: $\$ 122.00$
Limed Oak Net Price: $\$ 128.00$
612-A, B-Hammertone Gray.
Height $291 / 2^{\prime \prime}$, Width $25 \mathrm{k} / 2^{\prime \prime}$, Depth $173 / 4^{\prime \prime}$.
Net Price $\$ 56.00$
614-A, B, C-Portahle, Hammertone Gray.
Height $24 / 4 / 4$, Width $188 / 4 /$, Depth $141 / 4^{\prime \prime}$.
Net Price: $\$ 47.50$
618-B, C-Portahle, Slanting Front, Hammertone Gray. Height 22", Width $1 \%^{\prime \prime}$, Depth $131 / 4^{\prime \prime}$

Net Price: $\$ 36.00$

## 603B MULTICELL DIA-CONE SPEAKER

Offers high efficiency, broad distribution, wide frequency response, freedom from distortion. Dia-Cone principle provides extended frequency response. Multicellular horn loads high frequency diaphragm and distributes sound over $60^{\circ}$ hor., $40^{\circ}$ vert.: $15^{\prime \prime}$ cone insures full bass reproduction and 25 watt power-handling capacity. Voice coil: 8 ohms. Weisht: 18 lbs. Diameter: $15 \mathrm{~T}_{8}^{8}$ ". Depth $7^{\prime \prime}$. Net Price: $\$ 75.00$

## 600B DIA.CONE SPEAKER

Efficiency, small space requirements, light weight and superior quality of reproduction, make the 600 B an ideal unit in the lower priced speaker field. Utilizes Dia-Cone principle. Similar in construction to the 603B. V. C. 8 ohms. Power rating: 20 watta. Weight: 12 lbs. Diameter: $121 /{ }^{\prime \prime}$. Depth: $51 / \mathbf{4}^{\prime \prime}$. Net Price: $\$ 46.50$

## 400B DIA-CONE SPEAKER

Designed for use where the benefits of large-speaker performance cannot be utilized because of space and weight limitations. An extremely efficient, high quality unit, it is ideal for use in portalle devices, airplanes, busses, etc. V. C. imp. 8 ohms. Power rating: 12 watts. Weight: 4 lbs, "Diameter: $81 / 4^{\prime \prime}$. Depth: 3 \%/8"

Net Price: $\$ 22.50$

## 755A SPEAKER*

Exceptional frequency response, small size and moderate power handling capacity provide an ideal combination for low level distribution systems where multiple speaker are low level distribution systems where maltiple speakers are
used. Its small size makes wall installations practical and easy. Its small size makes wall itistallations practical and sions: $83 / 8^{\prime \prime}$ dia. $\times 31 / 8^{\prime \prime}$ deep. Weight: $43 / 4$ lis.

List Price: $\$ 30.95$
*I) istrihuted hy Graybar Electric Co.

## 820A CORNER SPEAKER SYSTEM

The Concert Grand of the loudspeaker world-full two.way system built into an attractive mahorany corner two-way includes newly designed direct radiating horn in reflex cabinet, an $80213 \mathrm{H} . \mathrm{F}$. unit mounted on H-808 multicellular horn, two 803A L.F. units and an N-8000 ( 800 cycle) network. provides unsurpassed quality over the entire audio ranke for home music installations, small auditoriums, audition roome, etc. Impedance 12 ohms- 30 watts. Inimensions: heigh,
$473^{\prime \prime}$; maximum width $421 / 2^{\prime \prime}$; maximum depth $20^{\prime \prime}$. Wt 230 lbs . 821A frame only-Net Price: $\$ \$ 99.00$

For use with Altec multicellular horns. When attached to $\mathrm{II}-8 \mathrm{sis}_{5} 8$ cell horm will produce sound level of 127 db at 5 feet with an input of 150 Wutts warble frequency of $700-1300$ cycles. Eiaphragen and voice ooil unit field replaceable. $300-8000$ cycles. Has provision for mounting $150+5-70$ volt matching trans. former under weather proof hood. Continuous power ahove 300 cycles 125 Watts, peak 150 Watts. When user as all-range speaker must attenuate frequencies below 300 cps . Im. yedance 4 ohms. Dimensions: $57 / 8{ }^{\prime \prime}$ diameter, $71 / 2^{\prime \prime}$ high, weight 19 lbs.

Net Price without transformer \$195.00

## 730A DRIVER UNIT

For use with Altec 30A and 40A horns. Has provision for mounting 15037X-70 Volt matching transformer under weather proof hood. 200-7,000 cycles. Diaphragm and voice coil assembly field replaceable. Power 40 Watts continuour, 80 Watts peak. When used as all-range speaker must attenuate frequencies below 200 cps. Impedance 8 ohms. Dimen. sions: $5 / /^{\prime \prime}$ diameter, $7^{n}$ high.

Net Prlce
without transformer $\$ 36.00$

## SPEAKERS

These speakers are engineered and manufactured solely for the replacement field for use in home receivers， auto sets，television sets and intercommunication sys－ tems．RETMA standard dimensions．Fully dust－proofed． Baked aluminum enamel finish．RETMA service guaran－ tee．QUAM UNIVERSAL MOUNTING BRACKET comes with all $31 / 2^{\prime \prime}$ to $6^{1 / 2} 2^{\prime \prime}$ speakers and may be attached to any two of the FOUR mounting holes in the $U$ shaped pot．Voice coil impedance of speakers listed below is 3.2 ohms $\pm 10 \%$ ．

QUAM ADJUST－A－CONE® SUSPENSION
This patented QUAM feature is your added assurance of trouble－free operation．In other speakers the spider is cemented in place with no means of accurate adjustment．The Adjust－a－Cone suspension permits precision centering of the voice coil as a final production operation．

## SPEAKERS

Fig．E

Fig．F

Fig．H

QUAM speakers have been produced under the same management since 1923 and are used by leading set and sound manufacturers throughout the world．Only QUAM speakers use the Adjust－a－Cone feature and the U shaped coil pot．Fully protected by patents－ their use insures customer satisfaction．

# OUTPUT TRANSFORMERS 

Designed by speaker engineers to give a true impedance match for a wide range undistorted sound.
Specifications of each unit include a full stack of best electrical steel, the maximum amount of copper, highest quality insulation and adhesives. Underwriters approved lead wire and complete vacuum impregnation. Individually packed in attractive boxes using the widely known QUAM descriptive part numbering system.

2. TCU \& TDU are universal type output transformers and provide matching impedances of $2500,4000,7500,10000 \& 16000$ ohms, also 7500 olım CT, 10000 ohm CT \& 16000 ohm CT

## QUAM FOCALIZER UNIT KITS

Fack kit consists of a Focalizer unit, a eentering handle, an aluminum mounting struction sheet.

- Provides sharper focus of the Television picture.
- Unaffected by temperature and voltage fluctuations.
- Easy to install.
- Ideal for reolacement or rebuilding Television sets for larger tubes.
- Used as original equipment in many leading sets.
Dimensions: O.D. $33_{8}^{\prime \prime \prime}$. Thickness: $11 / 4^{\prime \prime}$. Weight: $11 / 2$ lbs.
QF l-for nee with most picture tubes anode voltages up Q F $2-$ for use with picture tubes operating at anode voltages Q of 12 KV an-1 up. List Price $\$ 5.95$ of 15 KV to 18 KV . List Price $\$ 5.95$

## QUAM ION TRAPS

Quam ion traps can be used on any picture tube where a trap was used as original equioment. IT1 and IT2 Traps are equipped with wing nut and binding screw. IT3 and IT4 are spring type. Individually packed with instruction sheet.
ITI-Double field for tubes up to $10^{\prime \prime}$ in diameter. Field strength of 38 Gauss. Generally used with straight gun tubes. List Price $\$ 1.50$
1 T 2-Double field for tubes from $10^{\prime \prime}$ in diameter up. Field strength of 46 Gauss. Generally used with straight gun tubes ................... List Price $\$ 1.50$
1 T 3-Single field for tubes requiring field strength of 35 to 45 gauss. Generally used with tubes having a bent gun.

List Price $\$ 1.00$
1 T 4 -Single field for tubes requiring field strength of 45 to 55 gauss. Generally used with tubes having a bent gun.

## QUAM REAR SEAT AUTO SPEAKERS

Cotalogue \#AS-1 61/2" PM
Kit includes Quam $61 /{ }^{\prime \prime}$ PM Adjust-A. Cone speaker with capacity to handle ull output of any single ended auto et; 1.47 oz. Alnico V Magnet; $3 / 4$ oice coin, rugged 3 -position switch or lash mounting, ample cable for any installatin, Hocked eril screen, baffl plate, all necessary hardware, and installation instructions. Shipping weight 2 lbs .

List Price $\$ 9.95$

Cotalogue \#AS-3 5''x7'' PM
Kit includes $5^{\prime \prime} \times 7^{\prime \prime}$ PM Adjust-ACone speaker with capacity to handle full output of any single-ended auto set; 1.47 oz. Alnico V Magnet; $3 /{ }^{\text {n }}$ voice coil; rugged 3 -position switch for dash mounting, sufficient cable for any installation, flocked grill screen, baffle plate, all necessary hardware and installation instructions.
Shipping weight $21 / 4 \mathrm{lbs}$
List Price $\$ 11.95$

Cotalogue \#AS-2 6'"x9' PM
Deluxe model: Kit includes Quam heavy duty $6^{\prime \prime} \times 9^{\prime \prime}$ PM Adjust-A-Cone spaaker with ample capacity to handle full output of the most powerful auto set 2150 Alnico $V$ Marnet: rurged -position switch for dash mounting, 3 -position suble for any installation, slocked call for any installation, locked call screen, barle plate, sponge rie ins hllation all asy and hardware, and installation instructions. hardware, and installation
Shipping weight $31 / 2$ lhs. Shipping weight $31 / 2$ lhs

LIst Price $\$ 13.95$
Ohrome plated grille for AS-2
List Price \$2.15

RE-ENTRANT TRUMPETS RADIAL HORNS and SPEAKERS PM DRIVER UNITS

## Re-Entrant Trumpets, Radial Horns and Speakers

RE-35 RE-5J RE-60

RACON re-entrant horns and speakers are designed to deliver highly concentrated sound with great efficiency over long distances. This is due to true exponential design throughout and the elimination of all vibratory members and sound dissipating devices. The base and insire tone arms are husky aluminum castings and bell is a heavy gauge aluminum spinning. The $\mathrm{RE}-35, \mathrm{RE}-50$ and $\mathrm{RE}-60$ incorporate reflectors made of patented RACON ACOUSTIC MATERIAL to prevent resonant effects. All models are supplied with "U"-bracket mounting (ratchet swivel type on request). Finish is in weatherproof hard baked gray hammertone. $R E-60$ \& $R E-50$ recommended for maximum low frequency music reproduction. RE-35 and RE- 25 best suited for incidental music and high speech intelligibility.
The $S R-35 R$ and $S R-60 R$ are weatherproof radial reentrant horns designed to project sound over an area of 360 degrees. The centre reflectors are of patented RACON ACOUSTIC MATERIAL and the deflectors are aluminum spinnings covered with this same nonvibratory material. Standard "U" bracket supplied. Thread size is $13 / /^{\prime \prime}-18$, permitting the use of any driver unit listed below. $1_{1^{7}}^{7} "-16$ thread on request. The SR-60R is ideal for church tower sound installations and the SR-35R for incidental music and speech.

The SR-15R and SR-12R are rated at 20 and 10 watts respectively and are supplied complete with built-in 15 ohm* driver units. These models are intended primarily for speech in paging and "talk back" systems and are completely weatherproof. Supplied with cast swivel ratchet and wall bracket.

* 8 ohms on request at same price. 4 or 45 ohm 1.00 list additional.
** horn only

## Waterproof Permanent Magnet Driver Units

The driver unit is the most important single element in a successful public address system. In these four new driver units, primary emplasis is on: high continuous power handling capacity with ample reserve

for overload peaks up to $100 \%$, maximum conversion efficiency, response ranges suitable for every type sound system, and waterproof construction.

These four units employ Alnico V magnets and Armco magnetic iron throughout. All soft steel parts are doubly plated to prevent corrosion. An automatic electromagnetic cut-out switch is used in the magnetizing process, assuring maximum flux density in the gap and high uniformity. Units are individually measured for flux density. Each unit is tested with special equipment for power handling capacity as well as a 350 -volt ground test.

Long life plastic diaphragms and formers are supplied. Voice coil keads are non-fatiguing beryllium copper, insuring lifetime performance. All units are completely waterproof, yet permit ready replacement of diaphragm where needed.

## NEW SUPER X UNITS USING LATEST ALNICO V MAGNETS

*NOTE: Contains built-in 25 -watt line matching transformer, primary tapped at $500.1000 .1500,2000$; secondary; secondary 8 and 15 ohms.

# DOUBLE RE-ENTRANT MARINE SPEAKERS RE-ENTRANT PAGING SPEAKERS CONE SPEAKER ENCLOSURES 

## DOUBLE RE-ENTRANT MARINE SPEAKERS

The Models MR-30M, MG-21J, MG-21B and MN-15B marine speakers are designed primarily to meet the vigorous sound systems requirements aboard ship.

The driver unit and connecting leads are all enclosed, resulting in a completely waterproof speaker. Heavy aluminum spinnings are used throughout and back base is a husky, non-corrosive aluminum casting. A baked chromatic undercoat plus an outside lacquer finish is assurance of lasting service under severe conditions of humidity and temperature. Designed for three legged flush rear mounting. All models provided with cast aluminum transformer housing. Model MN-15B supplied with "U" bracket; "U"" bracket for other models on request at slight additional cost.

| DW-9R | $750-10,000$ | $70^{\circ}$ | 8 watts | *15 ohms |

* 8 ohms on request at same price. Four or 45 ohm 1.00 list additional.

These weatherproof re-entrant paging speakers are capable of high intelligibility in locations where high noise levels prevail. Construction is non-vibratory throughout and consists of heavy aluminum spinnings and castings. Voice coils are designed to provide a high degree of efficiency when these speakers are also used as microphones in "talk-back" systems. Ideal for replacing conventional cone speakers. RE-12 and RE-15 provided with heavy cast aluminum ratchet bracket. DW-9R is supplied with flange for flush mounting.

## NEW PAGING AND TALK-BACK SPEAKERS

RE-20 - Model RE-20 has a nominal rating of 25 watts and incorporates a varnish vacuum impregnated transformer provided with a removable weatherproof aluminum spinning. Primary impedances are 625, 1250, 2500 and 5000 ohms and the secondary is tapped at 4,8 , and 16 ohms. By connecting directly to and between these terminals, the resulting impedances of $310,625,1250,2500,3650,5000,7300,10000,14,500$ and 29,000 ohms are equivalent to $16,8,4,2,1.3,1.0,0.7,0.5,0.34$ and 0.17 watts respectively when connected across a 70 volt line. Weatherproof construction throughout.

MODEL RE-20, RE-11 RE-11 - Similar to the RE-20, but has a
higher cutoff and a nominal rating of 12 watts. The built-in 10 watt transformer has primary impedances of $500,1000,1500$ and 2000 ohms and a secondary tapped at 8 and 15 ohms.

RE-18 - This is the economical answer to all paging and talk-back applications where low to medium power levels are necessary and where "specs" do not call for line transformers. Bell and back cover are integrally spun of aluminum to assure weathergrally spun of aluminum to assure weatherunit. Complete with adjustable "U"' bracket

MODEL RE-18

Output from any straight trumpet is approximately 2 DB higher than corresponding re-entrant type because it lacks the attenuation inherent in all re-entrant horns. "Stormproof" Trumpets are made of non-vibratory RACON ACOUSTIC CLOTH. Weather-treated for indoor or outdoor use. "All Aluminum" Trumpets are made of

heavy gauge aluminum spinnings with rolled beaded edge and cast aluminum throat sections. "Unbreakable" Trumpets are made of heavy gauge aluminum spinnings reinforced and damped with Patented RACON ACOUSTIC MATERIAL. Large sizes are useful for church chime systems, C-D systems, airports and stadiums, parks, playgrounds, music festivals, for both speech and music. Smaller sizes for railroad and bus terminals, waiting rooms, factories.

NOTE: Models with 2,4 and 8 unit throats available. Prices on request.

## CAST ALUMINUM HORN TWEETERS

Response is essentially flat to 12,000 cycles, with excellent usable output to 15,000 cycles. Horn design permits wide angle distribution. Designed for a 1000 and 1500 cycle crossover to assure optimum cone response. These
NOTE: Instructions are packed with each tweeter, providing an easy method of home building a professional type 1000 -cycle crossover network.

The RACON COB-11 "cobra" type horn is designed for public address systems requiring high clarity reproduction with maximum concentration of sound in a horizontal plane. It is of "straight" horn design and exponentially flared for maximum transfer of energy. The low cutoff of 250 cycles results in crisp, highly articulate quality without a trace of boominess. The horn consists of a heavy two-piece non-vibratory aluminum casting and is provided with a two-section serrated mounting bracket. Finish is baked gray hammertone over a zinc chromate primer.

## CONE SPEAKER ENCLOSURES

These housings are strongly constructed, practically abuseproof. Back spinnings are steel and incorporate a watertight overlap seal which eliminates rain leakage at the juncture of front bell and rear housing. Two offiset mounting hooks are provided for easy installation. Aluminum Bell; Steel back acoustically damped - cone opening pro-

Write for particulars-co-axial and high-fidelity speaker systoms and enclosures.

## CHORDETTE

The Chordette is a fine piece of functional furniture. Use as a chair side or end table, bookshelf, or without legs-mount vertically.
SPEAKER SYSTEM: Utah two-way, two speaker high-fidelity speaker and enclosure system. One Utah $8^{\prime \prime}$ high-fidelity speaker-one, $31 / 2^{\prime \prime}$ high frequency unit. Speaker system designed so full
compensation is made for deficiency in human ear, as shown by Fletcher-Munsen curves. Enclosure volume 1.4 cubic feet. Air gap flux density closure volume 1.4 cubic feet. 8 averages 9,500 gauss. Rated at 8 watts of program materíal.
OVERALL DIMENSIONS: Height (with legs) 22" Cabinet only $11^{\prime \prime}-$ Width $22^{\prime \prime}$ - Depth $131 / 4^{\prime \prime}$

## CONCERTO

The fine woods and construction features of the new Concerto are a master achievement in the art of sound engineering and woodworking. Accoustically correct, the Concerto is a modified labyrinth type, dampened with $1^{\prime \prime}$ of fibre glass with a volume of 4.5 cubic feet.

SPEAKER SYSTEM: A Utah high-fidelity speaker system - with the unique Trio high frequency unit a two-way, four speaker system. One Utah $12^{\prime \prime}$ high-
fidelity speaker, plus three, $31 / 2^{\prime \prime}$ high frequency units, gives full coverage of the audio spectrum with a deep, rich bass. The two outer tweeters are angle mounted to assure in excess of 90 degrees dispersion of high frequencies. Frequency response of plus or minus 6 db from 30 to 15,000 cps. Usable range 20 to 20,000 cps. Air gap density - 11,000 gauss. Rated at 16 watts of program material. OVERALL DIMENSIONS: Height $30^{\prime \prime}-$ Width $21^{\prime \prime}$ - Depth 171/2"

| MODELS DESCRIPTION | SHIPPING WEIGHT |  |
| :---: | :---: | :---: |

| HF 300 C - Cherry, complete with speaker system HF 301 | 63 lbs. | 147.50 |

## TRIO

A finely designed and executed small cabinat with three high frequency units, the Trio can be connected with any radio, phonograph, television or audio amplifier - extending response beyond 15,000 cps. Reaches greatest effectiveness above 5,000 cycles - but the better the audio source - the better the Trio will sound. Begins functioning at $3,000 \mathrm{cps}$.

SPEAKER SYSTEM: Three Utah, $31 / 2^{\prime \prime}$ high frequency units, facing directly forward, the two outer units angle mounted to assure 90 degree dispersion of high frequencies. The Trio will match any voice coil impedance. It is complete with resistance, allowing user to match sensitivity to his present audio system. Rated at 16 watts of program material.
OVERALL DIMENSIONS: Height $5^{\prime \prime}$ - Width 12" - Depth 5 /16"

## BRILLANTE

The Brillante is a finely styled cabinet made from the The Brillante woad veneers with expert woodworking eraftsmanship. The enclosure is a modified labycraftsmanship. The enclosure is a modined with ${ }^{\text {a }}$ "
rinth type accoustically correct, dampened rinth type, accoustically correct,
of fibre glass with a volume of 4.8 cubic feet.
SPEAKER SYSTEM: Full coverage of the audio spectrum in achieved with one Utah $12^{\prime \prime}$ high-fidelity trum in achiever of unique cone and special basket design,
which handles more than the usual amount of power. Frequency response of plus or minus 5 db from 30 to 10,000 cps. Usable range from 20 to 19,500 cps. Air gap flux density averages 9,500 gauss. Rated at 10 watts of program material.

OVERALL DIMENSIONS: Height $30^{\prime \prime}$-Width $21^{\prime \prime}$ - Depth $171 / 2^{\prime \prime}$

 FINE HIGH-FIDELITY SPEAKER SYSTEMS AND SPEAKER ENCLOSURES
## RADIO PRODUCTS CO., INC.

HUNTINGTON, INDIANA

## ESQUIRE

The Esquire has a beauty, style and grace of design executed in fine woods that are hand rubbed to a patina of the finest furniture. It is a matched vented type of enclosure with a volume of 5.25 cubic feet.
SPEAKER SYSTEM: The Esquire has a Utah developed two-way, four speaker high-fidelity sound system, employing one Utah, $12^{\prime \prime}$ speaker and three, $31 / 2^{\prime \prime}$ high
frequency units. More than a 90 degree dispersion of high frequencies is assured by angle mounting. Usable range 20 to 20,000 cps. Reasonably flat re. sponse from 40 to 15,000 eps. Rated at 16 watts of program material.
OVERALL DIMENSIONS: Height $309 / 16^{\prime \prime}-$ Width

## SQUIRE

The Squite is styled and designed as a perfect companion piece to all the Utah High-Fidelity line of speaker enclosures, but it especially complements the Esquire.

The Sauire has been engineered and designed to house in one complete console unit, an AM-FM tuner, high-fidelity amplifier, standard record changer or professioral three-spieed turntable and pick-up arm. The compartments are arranged for the high-fidelity enthusiast's convenience. The pull-out record changer drawer is at the top, and the tilt-out tuner com-
partment is at the bottom with ample space for the high-fidelity amplifier at the rear.

DIMENSIONS:
OVERALL CABINET: Height $309 / 16^{\prime \prime}-$ Width
CHANGER DRAWER: Height $11^{\prime \prime}$ - Width $181 / 2^{\prime \prime}$ -Depth 16"
TUNER DRAWER: Height $10^{\prime \prime}$ - Width $17 y^{\prime \prime} z^{\prime \prime}$ Depth 12"
AMPLIFIER: Height $10^{\prime \prime}-$ Width $1^{\prime \prime}-$ Depth 12"

## QUARTET

The Quarfet is a perfect high-fidelity console for room corner applications. Its beautiful styling, fine woods and construction features will fit any decor. It is a matched vented type enclosure, accoustically dampened with $1^{\prime \prime}$ fibre glass on the two back surfaces and has a volume of 4.6 cubic feet.
SPEAKER SYSTEM: The Quartet has a Utah developed two-way four speaker high-fidelity system, comprised of one Utah, $12^{\prime \prime}$ unit with a voice coil diameter of $11 / 4^{\prime \prime}$, and three Utah, $31 / 2^{\prime \prime}$ high frequency units,
angle mounted to obtain a more than 90 degree dispersion. Frequency response of plus or minus 5 db from 30 to 15,500 cps. An air gap flux density of approximately 11,500 gauss. Rated af 18 watts of program material.

OVERALL DIMENSIONS: Height $381 / 2^{\prime \prime}$ - Width 301/4" (at widest point) -21 "(at front)-Pilaster $61 / 2^{\prime \prime}$ Depth $1911 / 16^{\prime \prime}$ (from back to face)- $215 / 16^{\prime \prime}$ (along wall)

MODELS DESCRIPTION

## UTONE WALL BAFFLES

built to sell - built to last
Utone wall baffles will complement any interior where speaker housing is needed. Quality built of where speaker housing is needed. Quality built of with waterproof glue and free from vibration and rattles. Their beautiful lacquer finish with matching
grill cloth, makes them attractive without being obtrusive-and they are priced right. Utone wall baffles are also available with a quality Utah Public Address Speaker mounted at quality Urah at no additional charge for factory mounting. Can also be supplied with line matching trans formers-tactory mounted.

## STEPHENS SPEAKER STSTEMS <br> FOR THEATRE AND HOME

## 500-D DIRECT DRIVE AMPLIFIER FINEST AMPLIFIER BUILT-NO OUTPUT TRANSFORMER

- Frequency response $\pm 1 / 4 \mathrm{db} 20-70,000$ c.p.s. Full 20 watts of audio - Distortion is less than $M_{2}$ of one per cent - Phase shift-less than $15^{\circ}$ at 20 c.pis. (Above figures are a true picture af full output of 20 watts.)
Here's the first amplifier to successfully eliminate the output transformer. All distortion introduced by transformers is eliminated. Great clority of tone is noticeable at once. Hum and noise are at a minimum, Frequency response is $\pm 1 / 4 \mathrm{db} 20-70,000 \mathrm{c} . \mathrm{p} . \mathrm{s}$., achieved with far less phase shift than can be obtained with a transformer . . especially on the low end. Maiching Stephens Tru Sonic spakers with 500 ohm v.c. impedance designed as companion units for the 500 D Amplifier are shown on adjoining page.

# STEPHENS MANUFACTURINGCORPORATION CULVER CITY, CALIFORNIA 

# Unererseriy IDIIISPRIITRIRS <br> RELIABLE... RUGGED DRIVER UNITS with these Exclusive Built-in Features 

- W-shaped Alnico 5 magnet results in maximum efficiency by reducing reluctance losses and surface leakage.
- Built-in transformers provide installation flexibility to meet any impedance requirement.
- Bi-sectional mechanism with foolproof automatic "rim-centered" diaphragm voice coil assembly assures immunity to shock and vibration . . . facilitates fleld maintenance.
- Full selection to meet all power, frequency response, impedance and mechanical requirements.

BI-SECTIONAL MECHANISMS

Specially tapered, one-piece linenbase phenolic diaphragms are set in an exclusive aluminum acoustical JH an exclusite aluminum acoustrec. tion at the upper register of the spectrum. This assures exceptionspectrum. This assures exception-
ally uniform overall frequency really uniform oreral frequency resyonse, and enables the diaphragm/ voice coil assembly to automatically center in the voice coil gap on the magnet top "plate. This exclusive University "rim-centering" tech nique results in shock-proof permanent voice coil concentricity; means smaller magnetic gap for greater flux density and conversion efficiency.

MODEL SA-HF-Meets all PA and industrial requirements. For heavy requirensents. speech or noise areas,
quality music.

MODEL MA-25 Fills low cost requirements without compromising quality. Rugged, weatherproof. Highly efficient to 6000 cycles.

## For Your Added Protection <br> There is more to University quality than meets the eye. All metals used in the manufacture of University equipment are given o number of special treatments prior to and during fabrication to insure life-lang protection against destructive elements which may be present in the environment, as well as to maintain the physical and acoustical properties for which they were originally selected. These treatments-plus the baked paint finish-serve as further pratection against corrosion, and as further proof of UNIVERSITY superiorify.

## Radial Reflex Projectors

## Uniform Sound in All Directions

- More economical - reduces the total number of loudspeakers required to cover a given orea.
- More efficient - driver-driven radial speakers provide as much as $500 \%$ greater output than cone speaker radials.
- Versatile - ideal for spacious oreas necessitating suspension installation, such as hangers, church towers, etc. Switable for voice and music.

| Dimensions | $101 / /^{\prime \prime} \mathrm{lg}$. bell, $181 / 2^{\prime \prime} \times 1 / 4^{\prime \prime}$ |
| Shipping Weight | nouth |
| LIST PRICE | \$35.00 |

A unique combination of battle-ship construction and swiss watch precision. . . . Features a pair of exponential horns having twin air columns in a single assembly-made possible for the first time through the perfection of a "dual exponential flare" design. This advance design provides wide-angle dispersion of sound, concentrating energy in the horizontal plane where it is most needed in covering wide areas efficiently and economically. Can be used with any University driver unit to meet any impedance, power or trequency response. See page C-16 for driver unit listings.
Sturdy " $U$ " bracket with serrated swivel joint permits up to $180^{\circ}$ vertical positioning and positive locking. Clever one-piece design prevents vibrations and erratic performance by elimination of any separate parts. Heavy gauge die-castings set a new standard in rugged construction and assure freedom from resonant type vibration.

# FOR WIDE ANGLE HORIZONTAL DISPERSION 

- Covers two large areas with a single driver unit.
- Reduces installation and equipment costs.
- Versatile bracket arrangement provides 4 different mounting positions.
- Buill for continuous heavy duty service.

## Bi-Directional Speaker - <br> Recommended for two-way

 applications requiring perfect clarity . . . A single heavy duty driver unit (supplied) serves both reflexed horns through a carefully designed acoustic coupler. Each horn has a wide $120^{\circ}$ sound projection pattern, with the sound projected $10^{\circ}$ downward (or $10^{\circ}$ outward) so that no energy will be lost in unoccupied space.
## Uneresay

## Reproduction with crisp clarify for maximum penetration

 through areas with high noise densityCheck these Feafures:

## / Famous University Reflex Design <br> Weatherproof, breakdown-proof construction <br> - Hermetically sealed driver units <br> - Small size - high efficiency

## MODEL SPA ADAPTER

Replaces standard triangular base used on all University paging speakers in order to mount to threaded $1 / 2^{\prime \prime}$ pipe. Order separately. List Price $\$ 1.50$

High efficiency
providen maxi-
mith coverage
power. Also an ideal talk-
back speaker because of high sessitivity. Rising frequency characteristics result in exceptional noise penetration. Features high power capacity.

MODEL. MIS
Designed for flange or flush mounting in cabinets, walls, ceilings, bulklreads, etc. Ideal for replacemint of cone speakers to replacemunt of increase oulput.

MODEL IBR
Small radial speakers, complete with built-in driver unit. Affords $360^{\circ}$ horizontal dispersion resulting in wide coverage with a minimum of speakers.

MODEL CR Reflex speaker conservatively rated at 20 watts continuous duty, and featuring built-in driver unit. Excellent tonal balance for music.

## SUBMERGENCE-PROOF SPEAKERS

Immune to salt spray, gases, live steam, fungi and all harmful dirt and dusts.

Designed to U. S. Navy submergence specs . . . . provide reliable, uninterrupted service with negligible maintenance under the most gruelling condifions. Numerous commercial and industrial applications: docks, bridges, boiler rooms, mines, railroads, etc.

## MODEL MSR

Reflexed air column horn for $360^{\circ}$ horizontal dispersion. Features completely die - cast aluminum housing and horn, hermetically sealed driver unit. Provides for both line matching transformer and volume control within housing. For wall or bulkhead mounting. (Model MSR-T includes 5420 transformer and T-Pad.)

# Unveray INITSSPELKRRS 

## For Listening Pleasure That Is Performance Proven

## The Dual Range Model 6201 Coaxial System

Now generally acknowledged as the industry's finest value in a high quality, $12^{\prime \prime}$ loudspeaker—and for good reason! The 6201 is one of the few true coaxial systems . . complete with horn type "Tweeter" driven by a separate high efficiency, high frequency driver, plus built-in inductance/capacitance type crossover network complete with variable "balance" control, supplied with 36 " of connecting cable and fully wired. A completely engineered package-iust connect the two free wires to the amplifier output terminals and presto, the system is ready to give you lifelike, always pleasant reproduction of your favorite musical selection. You can pay more but won't find a better engineered $1 \mathbf{1 2}^{\prime \prime}$ speaker than the popular model 6201.

## The Diffusicone 8 and 12 - Wide Range Speakers . . . at amazing low cost

University Diffusicone (pat. applied for) speakers bring within every music lovers grasp the endless pleasures of true concert hall quality reproduction without need for undue concern over speaker location. Exclusive "Diffusicone" design results in full fidelity anywhere in the room . . . full undistorted response, without loss of highs af listening points progressively off speaker axis.

Model 6200

Designell for Eeneral applications requiring a highly efficient, extended range plis loudspeaker with full-hodied re sponse to 10,000 cycles.
Ideal for improvement of commercial type radio, phono and TV comininations, for high quality P.A. and for sound reinforcement in restaurants, churches. schools, hespitals, stores, etc.

## C-15W SUPER 15" WOOFER

At last. a 15 " loudspeakn desimned not only to provide the acme of attainable perfection in the specitic reproduction of low frequencies, but one which defies olmolescence due to impedance matehing requirements as spealier systems are altered or expanded.
The C-15if may he used in any 2 , 3 or 4 -way speaker system ntilizinf wooter crossover up to 2000 crey
may ennloved. List $\$ 125.00$

- dual impedance range VOICE COIL-4-8 olims and 10-16 ohms arailable at speaker terminals.
- LONGEST VOICE CCIL axial DEPTH - Coil remains in gap, results in superior ronrersion ifficienes and transent response.

For complete product information get your copy of University Loudspeakers TECHNILOG of your local distributor.

# Unerens?ixy <br> IIIISSPLILRRS 

## FOR EXTENDED FREQUENCY RESPONSE HIGH EFFICIENCY TWEETERS

## Exclusive "Reciprocating Flares" principle offers these important performance advantages

1. Uniformity of response-negligible variation of sound intensity at various positions off speaker axis.
2. True wide angle response with optimuin angular distribution of sound-no radical shifts in energy level between vertical and horizontal planes.

Tests made with same driver on woth hornk-curves at $45^{\circ}$ off axis. The Curve Tells the Difference

2000 Cycle Tweeter Model 4401
Handles the output of amplifiers up to 25 watts when used with any suitable PM or field excited $8-15$ inch cone speaker and proper high pass filter and cross-over network. Exceptional performance at a cost that cannot be ignored.

Electrical and acoustical characteristics make it the most versatile high frequency tweeter available.

Professional reproduction for two and three way speaker systems . . . economical widerange response to the limits of audibility.

## Uniersiny LOLIDSPELKERS

## UNIVERSITY MULTI-SPEAKER SYSTEMS

 . . . the ULTIMATE for Limited or Spacious SettingsUniversity, the leader in Sound Engineering, achieves the outstanding combination of the ultimate in craftsmanship and engineering with pleasing and compatible exterior design. Superior high fidelity "presence" is re-created by these University multi-speaker systems due to the selection of perfectly balanced and carefully controlled components . . . the lyrically brilliant highs, the soft-colored mid-range, and the rich, distortion-free low frequencies which emanate from a precision-built acoustical chamber in enclosures styled to complement every University hi-fi enthusiast's home.

## The Classic . . .

- Houses leluxe multi-speaker system comprised of a wide angle high frequency tweeter, midd-range Cobraflex-2 horn and driver, the NEW CI5W low frequency woofer, and a specially de signed three-wily crossover network.
- Highly enkineered front folded horn works in conjunction with a rear battle chamber in perfected balance to taith fully reproduce deep dimension realisin of. bass tontrs.
- L/C type network crosses over at 350 and 6,000 cycles.
- Built-in "presence" and "brilliance" controls.
- Custom built Classic doubles as a Hi-Boy and Lo-Boy, Simple adjustable base accommodates Classic in a vertical or horizontal position for easy room arrangements.
- Available in hand rubbed Cherry and Blond Mahogany finishes.
- 11 rt. $341 / 2^{\prime \prime}, W_{d t h}+01 / 2^{\prime \prime}$, Dpth. $243 / 4$ ".
- User Net price $\$ 395.00$

## The Dean

- Includes same Deluxe multi-speaker sys term and network used in Classi
- "Cornerless-corner" design of ful"-folded hom path results in clean, supurb efficiency in the reproduction of low irequency range.
- Optimum performance not dezendent upon room position, due to new acoustic design o: enclosure
- Satin-like finishes in Cherry and Blond Mahorany. Both finishes same price.
- Height $361 / 4^{\prime \prime}$. Width 36", Depth 22"
- User Net Price: $\$ 395.00$

The Companion . . . Revolutionary musically balanced three-way high fifelity system pmploys combination woofer/mid-range and tweeter reproducers which are acoustically interconnected with a genume inductance-eapacitance dividing network.

- Special tonal balance control enhances personal listening tastes, program - material and room aconstics.
- Automatic Sessions timepiece will plan your musical itinerary . . . record your favorite program in your absence . . . awaken and accompany you to sleep while your choice symphony plays ... "shuts off" automatically, too.
- The Companion blends into many decorative fatterns for the music room, library, living room, den, sturly, tits into your bookcase or functional headboard, arid becomes an attructive floor unit when used with wrought iron legs.
- Modernly styled and availatle in Cherry and Blond Mahogany. Both finishes at
- Height $95 \%$ ", Wirlth $24^{\prime \prime}$, Depth $10^{\prime \prime}$.
- User Net Price: $\$ 99.50$

## Application and Installation

## UNIVERSITY 28-PAGE TECHNILOG

Written by sound experts to simplify the work of installation and servicemen to make their sound job easier. In the TECHNILOG you may find the answers to such instatlation and service problems as --

- Selecting the proper loudspeaker system.
- Methods of connecting speakers to the amplifier.
- Impedance matching.
- Imperlance matching transformers.
- Effectr of mamatch upon power transfer.
- Controlling loudspeaker volume.
- Overload protection of loudspeakers.
- Phasing loudspeakers.
- Reverberation.
- Batlling a cone speaker.

TECHNILOG is a valuable addition to any
technical library and is available to you at no cost.

## ATLAS 'DR' WEATHERPROOF DOUBLE-REENTRANT PROJECTORS

## Non-Resonant - Uniform Response - Sturdy • Stormproof Compact - Demountable

The modified exponential taper developed in Atlas projectors has proved most efficient for overall periormance. All acoustical paths are clean and uniform. Reflex turns are smooth and flowing. These important features eliminate turbulence, frequency cancellation and resultant signal distortion. Ruggedly constructed of heavy castings, precisior stampings, accurate die castings and uniform metal spinnings. All metal-to-metal surfaces insulated with nonvibratory material. Bell rim dampentd and mechanically protected with formed rubber rim. All metals specially processed by chemical and electro-chemical means to impart complete weather-protection. Heavy '"U" bracket mountings, securely fastened to main body asting of each model, do not fail even under extreme stress, strain or vibration. ${ }^{3 \frac{3}{2} a^{\prime \prime}-18}$ thread. For greatest efficiency and low frequency response, the larger size horns are recommended. The smaller horns are excellent where space and cost limitations pertain.

## ATLAS SUPER-POWER ALNICO-V-PLUS DRIVER UNITS

All models include Atlas "Alnico-V-Plus" super-efficient magnetic circuit magnetically shielded, hermetically sealed. One-piece unbreakable, high temperature and fatigue - proof phenolic diaphragm. Deluxe PD-5VT and PD-8VT include built-in "Uni-Match" trans former for universal matching to constant impedance and constant yoltage systems. All transformer taps and direct voice coil connections are brought out to waterproof "terminal window' on rear of phenolic unit housing. 13/8' 18 thread.

*Actual voice coil impedance. 'UniMatch" transformer offers 165, 250, $500,1000,2000$ ohms and variable 70 -volt line connections.
*Identical to Model PD-8VT, but supplied less transformer.

## RADIAL DRIVER UNIT PROJECTORS

- Non-Resonant - Dual Rubber Rims
- Uniform 3600 Coverage
- 100\% Stormproof

One of these models often is more efficient for large and high noise level areas than several ordinary projectors. For speech and music. Allaluminum construction smooth, uniform response. Thread $13 / 8^{\prime \prime}-18$. Use of H-2U 2 -unit mopt, output for single projector high power

These speakers include the newly developed, unbreakable, hermetically sealed driver units using the Alnico V-Plus magnetic ciscuit. As reproducers, and as microphones in talk-back circuits they provide a maximum of efficiency. The new ball swivel mounting bracket permits quick and simple directional adjustment in every position, horizontal and vertical. All-aluminum construction, finished in high lustre gray enamel over electrochemically treated surfaces.
Model HU.12-Subminiature speaker with high intelligibility at minimum input power.

SPEAKER SUPPORT STANDS
SS-2 - Foiding legs automatically level or uneven ground.
Supports a cluster Supports a cluster of speakers even under adverse wind conditions. Double clutch protection against accidental
release. Tube asrelease. Tube as-
sembly and legs are sembly and legs are cadmium plated steel; clutches and locks are machined iron castings. "Easyoff" top fitting permits attachment or removal of projector without tools. MODEL SS-2 MODEL SS-2 With HM-2

Model HU-I5V-Medium-size speaker that withstands consider able input power. Large diaphragm and magnetic assembly Mimilar to those used in the larger Allas reproducers.
Model HU-24V-Oversize speaker with obvious advantage of longer air column, so that it also reproduces music with exce lent results.
Model TP-15V-Dual speaker ideal for industrial and talk-back use: Modej TP-24V-Oversize dual speaker with longer air column for added efficiency, especially at the lower frequencies.

NEW WEATHERPROOF LINE MATCHING TRANSFORMER

Specifically designed for high efficiency and ease of installation, these new trans formers enable the matching of the popu lar Atlas "TP" and "HU" paging and talk-back speakers to either constant voltage ( 70 -volt line) or constant imped ance systems. The trausformer taps elimi nate the need for complex computations. Protective housings are heavy steel Double rubber grommets and gaskets pro tect cable connections entering the hous ing. Convenient transformer bracket is easily integrated with speaker mounting bracket-no extra fastenings needed. Fre quency response assures efficiency over entire range required, with a minimum insertion loss. Power-handling capacity of both models is 12 watts. Finish is in Model T-11-Primary: 500, 1000 , 1500 gray enamel. 8 ohms.
Model ing 40 ohms. Secondary: 4 and 8 ohms for mary: 45 ing 40-60 ohm intercom line to 8 ohm speaker. 8 ohms, for mitch-

TWO UNIT TO ONE PROJECTOR

When it is necessary to obtain the greatest possible power outpu from a single projector, the H-2U is recommended. It permits the use of 2 driver nnits with any type of projecto:. Cast aluminum construction. Threcds $13 / 8^{\prime \prime}-18$.

## LOWELL XCP SERIES

## Back Cover Protective Speaker Enclosure

EXISTING CONSTRUCTION

| Model | A | B | C | Spacker Sixo |
| :---: | :---: | :---: | :---: | :---: |
| XCP6 | 4" | 101/8" | 7" | 6" |
| xcos | 41/4" | $113 / 4{ }^{\prime \prime}$ | $81 /{ }^{\prime \prime}$ | $8{ }^{\prime \prime}$ |
| XCP1012 | $7{ }^{\prime \prime}$ | 1578* | 121/2" | $10^{\prime \prime}$ and 12" |

USES: This back cover protective speaker enclosure is designed for quick and labor saving wall or ceiling installation of yound systems in EXISTING CONSTRUCTION, ready for plastering.

DESCRIPTION: An all steel spot welded construction of heavy 22 ga metal complete with plaster ring attached. $3 / 4^{\prime \prime}$ knock-outs at $90^{\circ}$ - rugt preventive coating on exterior with very heavy undercoating material on interior to prevent metallic resonance. Sufficient back pressure relief for speaker is provided in order so operate at its highest peak of efficiency. Complete mounting hardware and mounting instructions are furnished to meet the problems of various types of installations.

Nofe: special overall depths and additional "loading" may be ordered at slightly higher price. (If space allows in wall or ceiling).

IMPORTANT: When eneunting back enclosure in wall or ceiling for slip fit, cut hole so the following size as per model ordered:
Model No. XCP6 - Cut hole $71 /{ }^{\prime \prime}$ in diameter and nail so lath. Model No. XCP8 - Cur hole $8 \mathrm{~s} / \mathrm{m}^{\prime \prime}$ in diameter and nail to lath. Model XCP1012 - Cut hole $123 /{ }^{\prime \prime}$ in diameter and nail to lath.

## FOR SUSPENDED CEILINGS:

Support XCP Series Back Cover Protective enclosures to Models SS 24 er 48 Steel Support Channels for positive streagth.

FEATURES: Protects speaker cone from falling dust and mortar. Prevents rodents from attacking back of speaker cone. Easily serviced withour damage to walls or ceiling. Reduces installation time.

PL Series Steel discs for mounting BL Series to concrete ceilings -

This type is a heavy 18 gauge steel disc with all hole locations punched for standard electrical outlet boxes.

## GENERAL INFORMATION:

The BL Series Baffles are constructed of heavy gauge aluminum spinnings accurately engineered for normal ceiling sound reinforcement. Due to its perfect speaker cone loading, feed-back is held to a minimum. CONTROLLED SOUND reproduction is obtained by proper conical dispersion of diffuser. The recommended placement of speaker baffles under normal ceiling heights are usually 25 feet off center of axis in straight line placement. High frequency diffuser is supported to housing by four $1 / 4$ " aluminum studs and threaded on one end mounted to housing. A press fit to diffuser thru soft rubber grommets to prevent metallic resonance. Sound coverage of $360^{\circ}$ is obtained with this baffle. All models are finished in brushed satin and coated with a colorless lacquer. This finish will also furnish a wonderful base coat or primer for on-the-job painting. All models are available in colored lacquers at slightly higher prices. Further information furnished on request.

## TYPE RS recessed wall type directional speaker baffles

AN EXCELLENT SPEAKER TRIM RING FOR MOST MODERN IN. STALLATIONS. HIGHLY RECOMMENDED FOR DRESS SHOPS, DEPARTMENT STORES AND NIGHT CLUBS. PROVIDES CONCEALMENT OF SPEAKERS. EASILY INSTALLED.

## description

Made of 18 gauge spun aluminum with $1 / 2^{\prime \prime}$ mounting flange. Mounts to wall with 4 toggle bolts or to Lowell models CP or XCP enclosures. Furnished with plastic grille cloth. Grilie cloth and speaker mount to trim ring with 4 round head screws. Standard finish - satin aluminum.

Lowell AL. Series speaker baffles are top quality heavy gauge satin finished aluminum spianings. Proper design assures $360^{\circ}$ diffusion of undistorted, "ear-level" sound with minimun of echo and feedback. Conical diffuser "Goats" on soft rubber grommets forming a press fit to aluniaum support studs which thread to the speaker housing ring. Baffles axe coated with clear lacquer which also serves as prime coat for on-thejob painting. Wide choice of colored lacquer finishes available on request. Shipped complete with hardware for mounting to Lowell Protective Speaker Enclosures illustrared.

## $360^{\circ}$ Coverage Low "EAR LEVEL" Sound

Even, undistorted sound coverage is provided by Lowell speaker baffles. Recommended baffle placement is usually $25^{\prime}$ from center of axis. Where straight line placement is impo:sible, triangulating the baffles in the ceiling is bighly effective.

## RADAX COAXIAL SPEAKERS

Discovery of the E.V RADAX
Principle provides an economical and super-efficient method of utilizing two disparate coaxially mount. ed cones to divide the audio spectrum ... while both operate from only a single vaice coil.

Built-in mechanical crossover from the low-frequency cone to the highfrequency propagator permits design of each cone for optimum response. This provides a true coaxial two-way speaker system that assures clean. sparkling wide-range reproduction
Frames are extra sturdy. Both
 meaker cones are moisture inhibited

## DIFFRACTION HORNS

Model BHD Diffraction Horn.
New principle provides perfect dispersion of high frequencies throush $180^{\circ}$ solid angle. Actual cutoff 600 cps , crossover 800 cps , eliminating cutoff disturbances. Made of fiberglass. For T10A or T25A driver. $388^{\prime \prime} \mathrm{h}, 141 / 4^{\prime \prime}$ w. $71 / 2^{\prime \prime}$ d. Mounking hardware included. Shpg, wt. 2 lbs.

8HD hast Price.................... $\$ 27.00$

Model 6HD Diffraction Horn. For systems utilizing 600 cps crossover. Horn designed with actual 400 cps cutoff; prevents response disturbances associated with operation too near actual cutoff point. Diffraction principle effects $180^{\circ}$ dispersion. $312^{\circ} h, 19 /^{\prime \prime}$ w. $12^{\prime \prime} \mathrm{d}$. For TIOA and T25A drivers. Shpg. wt. 3 lbs. Mounting hardware included.

## Public Address Loudspeaker System for perfect VOICE PENETRATION AND FULL RANGE MUSICASTING

The COMPOUND DIFFRACTION PROJECTOR* provides a loudspeaker system so advanced in concept-so efficient in performance-that there is no basis for comparison with conventiona P.A. reentrant horns. The "CDP" works in the same manner as an optical slit. When the slit width is of a shorter dimension than the wave length of the sound it passes, the sound energy is highly dispersed in the direction of this short dimension. Polar response of the "CDP" is phenomenal.
An increase in efficiency of three db over multi-cellular horns is achieved with better dis persion. There is no pinpointing effect since there are no cells to beam the sound path. Elimination of multiple throats at the driver mouth permits greater high-frequency efficiency as compared to multi-cellular horns. The direct path and optimum throat dimension of the "CDP" also has these advantages over the reentrant horn resulting in a greater transfer efficiency and smooth extended high-frequency response.
The Model $848^{\text {"CDP" }}$ provides peak-free response $\pm 5 \mathrm{db}$ to $10,000 \mathrm{cps}$-delivers $2 \frac{1}{2}$ octaves more musical range than usual P.A. units of even larger size. Soeech articulation index is sub stantially increased. Polar distribution pattern exceeds $120^{\circ}$. The Model 848 utilizes two coaxially mounted horns working from opposite sides of a single diaphragm. Each horn is designed for optimum reproduction within its own range. Low end response is augmented by 100 cos horn taper, which insures at least one-half octave added bass over that possible from larger conventional P.A. horns.
The "CDP'i bell and diaphragm are fabricated of molded fiberglass. Other parts are die-cast zinc and steel treated against corrosion. Edgewise-wound copper ribbon voice coil puts $30 \%$ more conductor in the gap, raising the efficiency $20 \%$. In EV tests the "CDP" driver has been subjected to months of continuous operation under 30 watts of power at 60 cycles AC without failure for any reason whatsoever. Should it become necessary, the diaphragm is easily replaced in a moment Silver contacts eliminate the need for solderins operations
The "CDP." with its higher sensitivity and power handiing on a basis of distributed signal, provides superior coverage of the listening area with fewer units and at far lower cost. The "CDP" unit is weather-proof, splash and blast proof, and virtually indestructible. It represents something so entirely new in public address efficiency and fidelity that it is indeed hard to believe such reproduction is possible.

CDP utilizes two coaxially mounted diffraction horns working from both sides of a single diaphragm. Each horn is designed for optimum air loading and reproduction within its own range.

## MODEL 848 COMPOUND DIFFRACTION PROJECTOR *

Conservatively rated at 25 watts. Nominal impedance is 16 ohms. The attractive neutral gray color is molded right into the bell material, which is impervious to acids, alkalies and mos solvents. Hang up bracket has two mounting positions. Projector may be installed horizontally or vertically for augmented dispersion. Dimensions at mouth: $101 / 2^{\prime \prime}$ wide, $201 / 2^{\prime \prime}$ high. Overall depth $20^{\prime \prime}$. Shipping weight 17 ibs. THE 175DLH HIGH FREQUENCY ASSEMBLY

## with the Koustical Lens

The Jin Lansing Koustical Lens is a true 14 -element diffusion lens operating in accordance with the most advanced optical-acoustic theory. Sound is distributed smoothly over a solid $90^{\circ}$ angle to all points in the listening area with equal intensity regardless of frequency. Phase interference, present in all types of horns including multi-cellular, is notably absent. The Koustical Lens is one unit in the 175 DLH Assembly which includes a high-precision high frequency driver, machined pure iron phasing plug, and cast aluminum exponential horn. Nominal impedance, 16 ohms. Power input is 25 watts above 1200 cps. Field, permanent 16 ohms. Power input is 25 watts above 1200 cps. Field, permanent
magnet. Horn throat diameter, $1^{\prime \prime}$. Mounting hole diameter, $5 \% / 8$. Overall length, $111 / 2^{\prime \prime}$. Shipping weight, 12 lhs.

User Net $\$ 118.50$

## COMPLETE TWO-WAY SYSTEM KITS

The D001 and D050 speaker systems can be purchased as a kit for installation in your own cabinet or for built-in installations.

## GENERAL PURPOSE

## $S_{\text {ignature }}$ Speakers

Only Jim Lansing Speakers ( $15^{\prime \prime}$ and $12^{\prime \prime}$ ) are marle with 4" diameter voice coils - of edgewound aluminum ribbon in the General Purpose models. The $4^{\prime \prime}$ coil stiffens the cone for true piston zction. Crisp, clean bass results a distinguishing feature immediately apparent. The $4^{\prime \prime}$ dural center dome is attached directly to the voice coil - as it should be - for smonth reproduction of the high frequencies. Properly housed, Jim Lansing General Purpose Speakers will reproduce verbatim every frequency recorded on the finest modern transcriptions.

## EVERY NOTE A PERFECT QUOTE

## MANUFACTURED FOR DUOTONE BY WORLD FAMOUS PHILIPS OF HOLLAND

## HI-FI MASTER RANGE LOUDSPEAKERS

MODEL 9762 - is a true Hi-Fi unit that replaces complex two-speaker sys tems using a "woofer" for the bass and a "rweeter" for the high frequencies These old cosily dual systems caused phase distortion and parasitic oscillations Model 9762 is a $12^{\prime \prime}$ speaker with 2 record efficiency of $14 \%$ at $400 \mathrm{c} / \mathrm{s}$ due to the use of an extra powerful Ticonal magnet Sound diffuser ensures uniform spatial distribution of high notes. With this loudspeaker the acoustical output and the reproduction range of $\mathrm{Hi} \cdot \mathrm{Fi}_{i}$ and other equipment can be rased to a level never before achieved! Frequency range is 40 to $2 \mathrm{G}, 00 \mathrm{c} / \mathrm{s}$.

## TECHNICAL SPECIFICATIONS

Frequency Response............................................... 40 to $20,000 \mathrm{c} / \mathrm{s}$
 Power handling capacity..................................................... 20 watts Resonance frequency ................................................................... $45 \mathrm{c} / \mathrm{s}$ Flux density................................................................11,000 Gauss Total magnetic flux ..............................................140,000 Maxwell Cone diameter.................................................................... 12 inches List Price $\$ 94.95$

MODEL 9760-12" in diameter, has a frequency range of 40 to $20,000 \mathrm{c} / \mathrm{s}$. The reproduction curve is extremely smooth. Sound diffuser ensures uniform spatial distribution of high notes. This model is "just right" for the finest Hi-Fi equipment but is less efficient than 9762 , namely efficiency of $7 \%$ at $400 \mathrm{c} / \mathrm{s}$. Voice Coil impedance at $1000 \mathrm{c} / \mathrm{s}-8$ ohms.
$\$ 49.95$
MODEL 9758 -a $10^{\circ}$ speaker with a 40 to $15.000 \mathrm{c} / \mathrm{s}$ frequency range Far superios to any other speaker of this size Copper ring fitted into deep ait gap keeps Voice Coil impedance independent of the frequency No frequency compensation needed in amplifier. Sound diffuser ensures uniform spatial distribution of high notes. Power 10 Watts; Efficiency at $400 \mathrm{c} / \mathrm{s}: 6 \%$, Voice Coil impedance at $1000 \mathrm{c} / \mathrm{s}: 8$ ohms.

List Price $\$ 49.95$
MODEL 9750-is an $81 / 2^{\prime \prime}$ speaker with frequency range of 40 to $13,500 \mathrm{c} / \mathrm{s}$. Extremely low frequency and very regular character. istics. Sound diffuser ensures uniform spatial distribution of high notes. Twice the normal air gap depth due to "TICONAL" magnet. Power: 6 Watts: Efficiency at $400 \mathrm{c} / \mathrm{s}: 10 \%$; Voice Coil impedance at $1000 \mathrm{c} / \mathrm{s}: 4$ ohms.

List Price $\$ 32.95$
MODEL 7010 - As $W_{\text {att }}$ speaker, extremely low price, $81 / 2^{\prime \prime}$ in diameter, 50 to $12,000 \mathrm{c} / \mathrm{s}$ frequency range that is specially constructed with magnetic system pressed into a high precision frame to avoid misalighment of the air gap, even in case of heavy shocks. Voice Coil impedance at $10,000 \mathrm{c} / \mathrm{s}$ : 4 ohms.

## MICROPHONES

DUOTONES SUPER "PENCIL" MIKE OMNIDIRECTIONAL, MOVING COIL EL 6040
Broadcast quality mike. especially designed for unobtrusiveness. This rugged, light microphone is truly omnidirectional. yet has a tremendous range of response-40 to $15,000 \mathrm{c} / \mathrm{s}$. Excellent for tape recording, outdoor work-every sound installation that must meet the highest standard of sound quality. Stender . . only $1^{\prime \prime}$ in diameter -model is ideal for television, reflecting no light and taking up minimum space. EL 6040 resists weather and rough handling. Impedance selector second plug for 50,500 and 25,000 ohms. Sen-sitive- 55 db at 25,000 ohms. Shorting switch is convertible into an interrupting switch... Swivel will absolutely not loosen or jam.

MODEL
EL 6040

| List Price $\$ 125.00$ <br> Stand (extra) $\$ 10.00$ <br> Impedance$\|$ Voltage |  |  |
| :---: | :---: | :---: |
| 25,000 ohms | 1.5 mV | Level |
| 500 ohms | 0.22 mV | -56.5 dB |
| 50 ohms | 0.07 mV | -73 |

Output voltage for sounds of various frequenciesiandangles of incidence, expressed in decibels with respect to the output voltage at $1000 \mathrm{c} / \mathrm{s}$.

## HAND MICROPHONE MOVING COIL TYPE 9564

Ide.al for factories, ships, buses, planes, poltce cars. fairs, mobile transmitters. Perfect voice reproduction even with very high ambient noise level. Frequency response: 100 to $10,000 \mathrm{c} / \mathrm{s}$. Minimum transmission of ambient noisc. Impedance: $10,000 \mathrm{ohms}$; Diaphragm of "Diaphragm Plastic". Equipped with switch, Withstands temperatures to $140^{\circ} \mathrm{F}$, Supplied with 2 yards of twin flex with plug.

List Price $\$ 59.00$

MODEL EL 6000

## CRYSTAL MICROPHONE

## EL 6000

Clear, natural reproduction. Molded. ivory mike of high impact-strength plastic. Can he held in the hand, ser on a table with or without the base, suspended or screwed on a floor stand. Response $50-8,000 \mathrm{c} / \mathrm{s}$; sensitivity - 50 db . Annealed aluminum diaphragm. Maroon base available if desired. List Price $\$ 16.95$ Base (extra) 3.0)

When Making a SOUND INVESTMENT - Remember CINAUDAGRAPH SPEAKERS

HIGH FIDELITY SPEAKERS
Hi.Lo Extended Range Single Unit - Direct Radiator Loud Speakers
The Cinaudagraph Hi lo extended range direct radiatar speakers are completely new. Designed to meet the demands where fime tone quality is appreciated. Not only is a uniform frequency response obtained but a very law value of harmonic distortion has been achieved and a high rate of decay which overcomes the detrimental effeets of "tails" and "hangovers." The active impedance curve of this model is also seen to be surprisingly flat over the operating frequency range. resulting in good power delivery from the oupput tubes of the amplifier to the voice coil. DESIGNED RIGHT . . . CONSTRUCTED RIGHT . . . WARRANTED 5 YEARS.

HEAVY DUTY PUBLIC ADDRESS SPEAKERS
Ruggedly built to give years af heavy duty service. Cinaudagraph public address speakers reproduce both voice and music with xcellent tone fidelity. Acaustically selected cones supply uniform frequency response and maximum conversion to acoustical power. These units are conservatively rated-all have dauble-cemented voice coil forms to prevent breakdown from momentary overload. All speakers listed are moisture resistant and dustpraaf; Alnico 5 permanent magnets are either welded or clamped in place. Made to operate efficiently oven at low power and frequency, these Cinaduagraph speakers are ideal for all public ad dress requirements. Carefully designedi produced and inspected all Cinaudagraph speakers represent the finest in acoustica equipment, and ean safely be specified for the mast exacting
installations. DESIGNED RIGHT..CONSTRUCTED RIGHT... WARRANTED 5 YEARS.

## $S_{\text {Suntina }}$ SPEAKERS <br> heard all over the world

GENERAL PURPOSE AND REPLACEMENT SPEAKERS
Designed and engineered to meet all replacement needs. Well suited for experimenters, intercom systems, radio, phonograph and TV. Magnetic structures carefully engineered around Alnico $V$ to produce maximum gap energy. Cones are carefully selected for uniformity and efficiency of response. TROUBLE FREE OPERATION IS ASSURED BY A TWO YEAR WARRANTY FROM DATE OF MANUFACTURE.

## WEATHEROID SPEAKERS

These speakers are especially designed for use in the open air and we highly recommend them for use in drive-in theatres, fairs, carnivals, circuses, amusement parks and race tracks. All models are dustproofed and cones are treated to withstand moisture. Metal parts are treated to resist corrosion. MATERIAL AND WORKMANSHIP WARRANTED FOR ONE YEAR.

## HIGH FIDELITY EXTENDED RANGE

Comparable to the best in both foreign and domestic hi-fidelity speakers at attractive prices. TROUBLEFREE OPERATION IS ASSURED BY A TWO YEAR WARRANTY FROM DATE OF MANUFACTURE.

MODEL "M" CABINET

METAL SPEAKER ENCLOSURES

SILVER SONANCE LINE

The Silver Sonance Line is divided into three parts. The first is the Universal Speaker Enclosure. There are many advantages of the Universal type of speaker housing that makes it the most outstanding unit of its type. It can be used in hospitals, schools, factories, auditoriums, stores, airports, railroad stations, stadiums and any other place where a speaker is used.

A prominent feature of this housing is the adjustability that is achieved by mounting our speaker case with an accessory known as the Bud Adjustable Mounting Bracket. Full information on this bracket is given on page $\mathrm{C}-41$. When the adjustable feature is not desired, the speaker housing may be attached directly to the wall. There are two holes in the sides of the speaker housing enabling installation in this manner. The holes in the cabinet are so spaced that the housing may be mounted either to an outlet box or screwed directly to the wall.

The new BUD UNIVERSAL speaker enclosures have a bi-lateral feature which permits sound to come from both the front and the back of the speaker housing. This is an ideal feature when speakers are used for paging purposes, or when speakers are used in corridors, hallways, or other places where the intention is to have the sound travel in two directions.

There is no danger of cracking, warping, splitting, or any of the other disadvantages found when a wood speaker baffle is used. Since our speaker enclosure is made of heavy gauge steel, none of these disadvantages are present. Changes in temperature and weather conditions have absolutely no effect on this speaker case. The finish is a beautiful silver grey hammertone. The hammertone finish assures ease of cleaning, as the housing may be cleaned by wiping with a damp cloth.

A special sound-deadening compound is used to eliminate the metallic resonant sound that is present in other metal speaker cases. All screws and nuts are furnished for mounting the speaker in the enclosure. There are no holes to drill and no time will be wasted in the installation.

metal speaker enclosures

## RECESSED CEILING and WALL ENCLOSURE

This speaker housing is suitable for an $8^{\prime \prime}$ speaker and reduces installation costs considerably. Adjustable brackets make the housing ideal for use in old or new construction. The depth of the box is $4^{\prime \prime}$, so that it can be mounted in walls where the studding is $2^{\prime \prime} \times 4^{\prime \prime}$.
All of the features of acoustical perfection, durability and economy found in the universal type of speaker enclosure apply to the recessed enclosure as well.
This speaker housing is easily installed in a ceiling where acoustical tile has been used, since the grill plate is a $14^{\prime \prime}$ square. This, therefore, perfectly covers the space from which a $12^{\prime \prime}$ acoustical tile has been removed.

## adJustable mounting Bracket

The adjustable mounting bracket can be used with any of the universal type enclosures. This makes possible an adjustable feature by which the speaker housing can be adjusted in any angle in a horizontal plane. There is a hole in the bracket which will pass a half inch conduit, permitting the speaker housing to be suspended from the ceiling.

| $28 / 4$ | 1.65 |
| $1 / 2$ | .75 |

## OUTLET BOX COVER PLATE

This unit is a cover plate for electrical outlet box enabling the adjustable bracket to be mounted directly to the outlet box. When used in conjunction with the adjustable bracket, movement in all horizontal and vertical directions is possible.

## REAR SEAT SPEAKER ASSEMBLY

This unit is available in two types, as shown in the table below. The rear seat speaker grill assembly consists of the rear seat speaker grill, together with mounting screws, switch, bracket for holding switch and sufficient wire for installation. The switch permits selection of either speaker or use of both speakers simultaneously.
The rear seat speaker grill is a finely louvered unit made from heavy gauge steel, which assures you of having a grill that will "take a beating." The finish is a beautiful silver grey hammertone, which is a fine enough finish to be attractive and yet dull enough to assure you that no glaring sun reflection will be picked up by a rear vision mirror and be a potential blinding flash to the driver.

## WALL TYPE SPEAKER CASES

 This is a distinctive line of speaker cabinets, for wall or table use. Since these units are made of steel, all troubles with wood warping and splitting are eliminated. Keyway holes are provided for wall mounting and four embossed feet on the bottom are provided to prevent damaging table surfaces. Finished in brown wrinkle enamel only.

## HYPEX "Three-sixty" PROJECTORS

 Designed for the reproduction of apeech and musle agnals at high emcienoy where high nolse levels exist. With the sound distributed over a circle, they are especially suitable for ingtaliations where coverage of relatively large areas and suspenaion from the colling are deaired. Model VR-11 if recommended lor speech reproduction while model m-241, of forcement. Driver unit has phenolic diaphragm: VR-241 uses same dlaphragm as VH-24 and VH-20: VR-11 uses same diaphragm as VH-15 and VH-91. VR-241 is equipped with weatherproof terminal box with connectlog cable passing through terdilnals provided. VR-11 has two-conductor rub-ber-covered cable for connections. Both equipped With heavy eyebolt at top for suspenslon.

## THE "HYPEX" HORN FORMULA -AN EXCLUSIVE JENSEN FEATURE

"Hypex" comes from the mathematical term "Hyperbolic Exponential" which describes the important difference between Jensen Projectors and those based on the simple exponential theory. Jensen research discovered a better ${ }_{r}$ more efficient horn formula which maintaing effective acoustic loading right down to acoustic cut-off and all Jensen Hyper* Projectors have this exclusive feature for better performance. For the facts on this development and a complete deseription of horn behavior, write for Technical Monograph No. 5, "Horn-type Loudspeaker". Price, 25c. T.M. Reg.

## SPEECH MASTER PROJECTORS

## H-520 COAXIAL

A new coaxtal loudspeaker with the smoothness, fine balance and wide range response you expect in a truly compression driver unit loaded hy a compression Hypex horn reproduces frequencles above 2000 cycles. An efficient $15^{\prime \prime}$ L-F unit handles the lower irequencies, impedance, and music signal input. Baffe open ing, $131 / "^{\prime \prime} 0 . \mathrm{D}, 151 /{ }^{\circ} ;$ depth, $98 /{ }^{3 \prime}$ Shipping Welght, 16 lbs. $\$ 7950$

## MODEL H-222 COAXIAL

Outstanding, efficient. new widerange $12^{\prime \prime}$ coaxial with compression brings a new meaning to high fidelity In a smail speaker. Integral fre quency divlsion. Power rating 25 watts. Impedance 16 ohms. Baffle
 cord. Shtpping Weight, 12 S5450
lbs ST-875. Net Each. ..

MODEL K-3IOA COAXIAL
A fine, low cost true two-way $15^{\circ}$ high fidelity speaker that will out periorm many at higher prices. In Power rating 16 watts. Impedance 16 ohms. Shipping Weight, 18 lbs ST-891. $\qquad$ ${ }^{5} 37^{60}$

## MODEL K-2 10 COAXIAL

A $12^{\prime \prime}$ high fidelity speaker at extremely 10 w cost. Integral frequency division system. Power rating 12

## Jensen Hi-Fi Sound Reproducers

## THE GREATER TRi-PLEX 3-WAY SPEAKER SYSTEM

Jensen's new greater TRi-PLEX is offered to you with the conviction that in quality of reproduction, it will outperiorm any comparable speaker system. Bass response has been enhanced with the new Bass-Ultraflex enclosure. The design ob jective hat been the attainment of the full high-fldelity frequency range with extreme smoothcoloration effects. The result is a reproducer which in its outstanding listening qualities will delight the discriminating listener who seeks completely falthful nausic reproduction without harshness or exaggeration.
Techalcally, the TP-200 represents a high point in the development of the true 3-way ystem. Three completely independent reproducers divide the frequency range a indicated in the specifications, the combined total result being blended into a superb unity which cannot be approached with short-cut designs which simulate, but do not airord comfortable, ivable ilstening quailty. For example, both mid-irequeney and high-frequency channels employ horn-loaded compression-driver units with plastic daphragm moving systems in precision sound chambers for utmost smoothnes controls are provided at the side of the cabinet for exact adjustment of response balance, presence and brightness to fit your surroundings and precise taste
New cabinet styling is a natural blend of simplicity and elegance which will merge gracected with traditional or modern decor. Woods are ofrered in a cholce of nne hardwood trim, all finely crafted in the best furniture-making traditions.
Each TRi-PLEX is individually tested and is accompanied by a certificate and uarantee of neriormance meeting the high englneering standards established to he design.

New Bass-Uitraflex. Enclosure princlple used in the new TRi-PLEX TP-200, 2-way DP-100 and BL-220 and BL-250 cabinets, is the lates on enclosure acoustics. Precisely matching "woofer" characteristics to enclosure volume, Bass-Ultra flex gives more true balanced bas response than prevlous methods em

May be used elther in a corner or against
sidewall with cxcellent results

## the new Cancerto 2-WAY SPEAKER SYSTEM

Here is high fidelity reproduction in a compact enclosure which fits even the crowded hying space, yet embodylng the smoothness balance and extreme frequency range coverage of the most expensive true coaxial speakers. There ts economy too-with fine rausic reproduction not approached except at far greater cost.
The CT-100 is a true 2-way system with separate "woofer" and "tweeter". The low frequency unit is the new P12-NL 12-inch speaker which was especially designed fo this reproducer. In combination with the Bass-Ultraflex cabinct, the system give ample, full bass response. High frequencies ahove 2000 cycles are handled by the RP-102 High Frequency Unit which provides exceptional smoothness and range approaching the practical upper limits of audibllity. A full 2-channel crossover net

The new cabinet design reflects fine proportions and clean sculptured appearance approprlate to ane traditional or modern nterior decor. Avalable in your choice of selected Mohagany or Blonde Korina veneers. Reproducer is fully assemabled and carefully tested at the factory. Shipping Weight 62 Lbs

## Jensen Cabinets and Enclosures

Type "C" Cabinets were espectally designed for low budget heh fidelity systems. Slzes for $\mathrm{S}^{\prime \prime} \mathrm{H}^{12^{\circ}}$ and $15^{\circ}$ speakers mahogany, Bass refex type
Type "B" Cabinet for 12 speakers is an inexpensive utility unit durably constructed of composition board finished in brown hammer lacquer.
satin striped walnut veneers with in beautifully finished ished grille. For $12^{\prime \prime}$ and $15^{\circ}$ speazers. Bass reffex type.
Type ${ }^{4 \beta^{\prime \prime}}$ Sector Cabinet for $8^{\circ}$ speakers is eapecially flexdble in mounting. May be used in corner, on wills, st Intersection of wall and celling or on post. Wood compo-
aition, finished in brown taçuer. Bass refiex type.

8. 121

"D"

H-81

These new Type "BI," Cabinets are beautifully-styled loudspeaker enclosures offering improved efficiency in bass response and achieving a new high in flexible adaptability to mounting of coaxial or triaxial speakers, mid-channel and high-irequency units, woofers, supertweeters, in any desired comblnation without sawing or cutting All units are easily mounted the Transiocoustc plastic grille cloth. Unused pre-cut openings to front baffle are automatically blocked by adapter baffle. Easy to follow instructions maise mounting a matter of moments.
The new cabinets are designed to fit in a comer or they may be placed gainst a sidewall. Low Irequency rediation is augmented by carefully coordinated acourtic passages opening into the sides of the cabinet. Simple yet graceful styling with nnely sculptured lines qualify these beautiful cabinets for a place in distingutshed modern or traditional nteriors. Cholcm of selected mahogany or korlas blonde plywoods with genuine matching solld wood trim.

## 

## 2-WAY HIGH FIDELITY REPRODUCER Measures only $231 / 4^{\prime \prime} \times 11^{\prime \prime} \times 10^{\prime \prime}$

First to give you real high fidelity in a small package the advantages of the 2 -way syatem principle, the new JENBEN ductlon when space for equipment is JImited. Can be used on a table, in bookshelves or on the fioor, either on its side or standing on end. Ideal for Improving the performance of portable phonographs, radio and TV sets, as well as for a basic hi-f systern in a small space. Excellent as an additional living room speaker for extenaton Comprises a special 8 -inch "woofer" plus a multicell horn-losded compression driver "tweeter", with bullt-in frequency division system, in a small compact enclosure designed for adequate bass potential. (Some bass boost is desirable under most listening conditions but more than enough is available in modern amplifers.) Capable of adequate, satisiylng bass reproductlon even remarkable power handing capacity and the unmistakable "presence" of the 2 -way hl-f reproducer. Corner position glves excellent performance with additional bass due to acoustic loadling effect of corner. I mpedance: 4 and 8 ohms, Power Rating: 20 watts maximum speech and music input. Size: $11^{*} \mathrm{high}, 234^{\prime \prime}$ wlde, $10^{\circ}$ grained Fabrikold intshed cabinet with contrasting front panel and cast metal trim burnished copper.

## NEW - $\frac{7 \text { Difenter }}{\text { PORTABLE }}$

Lets you take HI-FI with you!
Here's the first truly portable 2-way loudspeaker system with "big apeaker" performance . . . the new Duette Portable! Ideal for use with tape recorders, portable record players, electronle musical mastruments, for band sound relnforcement. by profassional recording engineers, lecturers, musiclans and hi-s isteners. Two or 8 ohms as needed. Lid holds 25-foot cable with plug, plus handy storage for two $7^{\prime \prime}$ or three $5^{\prime \prime}$ boxes of tape held by retalning strap. "Carry tested" rattle-proof handie on end of case. Sturdy construction, yet weighs only 21 lb
forren Modol DU-202. BT-855. Bame electrical and acoustic specfications as DU-201, with handy portable features deacribed above. Black leatherette case with contrasting gray panel. Slze 11 x 231/2 $\times 111 /{ }^{\prime}$.
$577^{50}$

## NEW - 7Ditrifer Jreasure Chest

Now the Duette becomes an elegant addition to traditional or Now the Duette becomes an elegant addition (Crad" models Handsomely styled chest design 18 avallable in both selected mahogany and blonde oak veneers with genuine matching hardFood trim. Fits on bookshelf or table in small space. For a freetanding plece, add the graceful modern wrought iron legs (not urnished-must be ordered separately).

Duette "Treasure Chest" gives the full performance of the true wo-way system with its special 8 -inch woofer and compresaion driver tweeter in an unusually compact scientifically designed as an Improvement addition for true hl-f from existing radio, TV, phonograph or tape recorder. Capable of adequate bass reproduction even at 10 wistening levels, Clean, smooth response Fith the unmistakable presence of the true two-way reproducer. Size: $11^{\prime \prime}$ high, $231 / /^{\prime \prime}$ wide. $10^{\prime \prime}$ deep. Same acoustlc and electrical pecificatlons as DU-201 above
Model DU-300 Duette "Treasure Chest" Reproducer S7 $6 \mathbf{5 0}$
Order ST-861 Mahogany, ST-860 Blonde Oaz.)

## GALBRAITH MARINE SPEAKERS

Galbraith Reproducers and Amplifiers, while designed primarily for installation aboard ship, are especially suitable for use on docks, in shipyards, and other locations where exposed to extremes of varrying temperatures and difficult moisture conditions.

## " 0 " MEDIUM POWER MARINE TYPE REPRODUCER E-27, Alt.-1

Approved by the U. S. Coast Guard ( $\mathrm{JJ} / \mathbf{1 6 1 , 0 0 4 \text { ) for installation on inspected }}$ merchant vessels when used with approved loudspeaker systems. This marine reproducer is a double re-entrant type of horn approximately $10^{\prime \prime}$ in diameter and $8^{\prime \prime}$ in depth. It is constructed of special salt water corrosion-resistant aluminum alloy castings and spinnings. All surfaces are alodine treated followed by zinc chromate primer and finished with a durable baked gray enamel. The high powered "Alnico V Plus" driver unit is located within a one-piece casting consisting of base plate and junction box and is held in position by the dome-shaped casting forming the horn proper. A neoprene gasket clamped between these two castings provides the seal necessary to exclude all moisture. This permits the speaker to be used in any location even on the exposed weather decks. The junction box is drilled and tapped for $1 / 2^{\prime \prime}$ I.P.S. stuffing drilled and Her-
 metic sealed feed-through leads prevent
any entrance of moisture to the driver unit voice coil chamber. Spring type terminals on driver unit and in junction box permit easy connection. This speaker is suitable for direct bulkhead mounting as its simple design permits quick replacement of the driver unit without removing the speaker from the bulkhead or discomecting the ship's wiring.

LIST PRICE $\$ 75.00$

## 15" HIGH POWERED MARINE REPRODUCER E-27, 544 Alt.-1

Searchlight Type Control Mechanism No. E-27,545-B

Approved by the U. S. Coast Guard (161,004) for installation on inspected merchant vessels when used with approved loudspeaker system. It is a double re-entrant type of horn approximately $15^{\prime \prime}$ in diameter $x 11^{\prime \prime}$ in depth, consisting of bronze castings and brass spinnings. The high powered "Alnico V Plus" Driver unit is located within the base casting, held in position my the one piece, cast bronze, Junction Box with sealing flange. The Junction Box is drilled and tapped for $1 / 2^{\prime \prime}$ I.I'S. stuffing gland. Hermetic sealed feed-through terminals prevent any entrance of moisture to the driver compartment. Spring type terminals on driver unit and in Junction Box permit easy connection.
The Adjustable Mounting Bracket, No. E-27, 546 , allows easy adjustment for directing speaker to cover the proper area, and permits quick replacement of the Driver Unit when necessary.

LIST PRICE $\$ 210.00$

Adjustable Mounting Bracket No. E-27,546

The Searchlight Type Control Mechanism provides 350 degrees of horizontal movement and 30 degrees of vertical movement above and below the horizontal axis. The Control Rods extend down within the Pilot House for inside control.

Model E-27, $545-\mathrm{B}$ is for deck mounting so that loudspeaker will clear the rail. This tripod stand raises the loudspeaker axis $54^{\prime \prime}$ above the deck. The overall height is $62^{\prime \prime}$ above the deck.

LIST PRICE $\$ 415.00$
Model E-27, 545 -A (not shown) is for deck mounting where low clearances must be provided. Horizontal axis of loudspeaker ig $18^{\prime \prime}$ above the deck. The averall height is $25^{\prime \prime}$ above the deck.

LIST PRICE $\$ 375.00$

OTHER GALBRAITH PRODUCTS INCLUDE: Docking and Navigating Systems, USCG approved; Emergency Aunnouncing Systems, USCG approved; Music Broadeast and General Announcing Systema; Audio Power Amplifiers from 1 to 5000 Watts Output; Regulated Power Supplies; Standard Power Supplies
from 50 to 5000 Volts at 50 to 10,000 Watts Output; Transformers, Reactors, etc. to MHL-T-27 Specs. and to individual requirements, miniature to 25 KVA capacity; Drainage and Breather Valves, USCG approved; Electric Air Heaters for industrial and marine use, LL, ESCG and US Navy approved.

## UNI-DIRECTIONAL RIBBON MICROPHONE

Model "333" Concert-Line

Here is the Concert-Line " $333^{\prime \prime}$, a new microphone created for discriminating users with the most exacting professional requirements. Here, indeed, is a major advance in microphone development and design! This small, ultra-cardioid " $333^{\prime \prime}$ is highly recommended for movie studios, TV studios, radio stations, professional recording, and highest quality "home recording" applications. Here is performance never before achieved in such a small and slender microphone. Here is matchless beauty and striking design to oppeal to those users who traditionally demand "the finest!" The " 333 " is uni-directional, will reduce the pickup of random noise energy by $73 \%$-prevents the pickup of moving props, scuffling feet and moving "dollies," so common when conventional broadcast microphones are used. Following are the feafures that make the " 333 " Concert-Line so outstanding in performance, so dependable in operation: (I) patented world-famous "Uniphase" system-providing a true ultro-cardioid pickup pattern; (2) response plus or minus $21 / 2 \mathrm{db}, 30-15,000 \mathrm{c.p.s.;}$ (3) multi-impedance switch; (4) voice music switch; (5) anti-"PFF," anti-blast filter screen; (6) high output; (7) vibration-isolation unit mounted in live rubber; (8) Cannon XL connector. All these important features, plus the striking design of the Concert-Line " 333 ," make it ideal for critical studio applications that call for the highest possible broadcast quality, small size and matchless beauty. The " 333 " has two-tone "Grayie" nonreflecting finish. Dimensions: width, $11 / 8^{\prime \prime}$; height, $39 / 16^{\prime \prime}$; depth, $13 / 4$." $^{\prime \prime}$

Model "525"
Concert-Line

## OMNI-DIRECTIONAL DYNAMIC MICROPHONE

The new Concert-Line " 525 " is an exceptionally fine probe microphone of broadcast quality. It features: (1) response, plus or minus $21 / 2 \mathrm{db}, 40-15,000 \mathrm{c.p.s.;}$ (2) a moving-coil mounted in a highly efficient magnetic structure with an "Alnico V" magnet; (3) dual-impedance switch for high or low impedance; (4) high output; (5) long life "Duracoustic" diaphragm-specially designed to withstand moisture, heat, cold and physical shock. The " 525 " is furnished with a 20 ", fwo-conductor, rubber-covered, shielded cable with Cannon XL-3-11 connector attached; swivel adapter; adjustable lavelier assembly (cord and clip), and a belt clip assembly. The " 525 " Concert-Line has a non-reflecting "Groyje" finish-which makes it blend into the background, giving the spotlight to the performer: Diameter, $11 / 8^{\prime \prime}$; Length, $817 / 32^{\prime \prime}$.

## BI-DIRECTIONAL GRADIENT MICROPHONE

Model "300" Concert-Line

## OMNI-DIRECTIONAL DYNAMIC MICROPHONE

Model "530" Slendyne

Model "315" Gradient

The new Slendyne " $530^{\prime \prime}$ is a probe microphone highly recommended for fine quality sound systems. It features: (1) frequency response 60-15,000 c.p.s.; (2) a moving coil mounted in a highly efficient magnetic structure, with "Alnico $V$ " magnet; (3) dual-impedance switch for high or low impedance; (4) high output; (5) long life "Duracoustic" diaphragm-specially designed to withstand moisture, heat, cold and physical shock. The " $530^{\prime \prime}$ is furnished with a 20', two-conductor, rubber-covered, shielded cable with Cannon XL-3-11 connector attached; swivel adapter; adjustable lavalier assembly (card and clip), and a belt clip assembly. The "530" Slendyne has a beautiful black and gold finish-which makes it especially ideal for those applications where a rich, distinctive microphone of striking design imparts added prestige and glamour to any sound system with which it is used. Dimensions: Diameter, $1 / 8^{\prime \prime}$; length 7 11/32."

## BI-DIRECTIONAL GRADIENT MICROPHONES

This rugged, high-fidelity, muiti-impedance microphone is recommended for highest-quality general purpose uses! The Gradient provides a bi-directional pickup pattern-permitting greater performer freedom (performers can stand at a $73 \%$ greater distance from the microphone!) The " 315 " picks up voice and music from front and back-is "dead" at the sides. Reduces reverberation and the pickup of distracting random noises by $66 \%$ ! Has a "Voice-Music" switch and Multi-Impedance switch. Response is 50 to 12,000 e.p.s. Permits the sound system to operate at a level almost 6 db higher than is possible with omni-directional microphones! Finished in rich, soft chrome. The " 315 " is "PFF" F Proof-can be used in outdoor drafts and moderate breezes! Dims: Ht., $6^{\prime \prime \prime}$ Wth., 1 7/16"; Dpth., $13 / 32^{\prime \prime}$.

"Small Breadeast" Model 5ses

## UNIDIRECTIONAL BYNAMIC MICROPHONES

The ""Small Unidynes" are the largest selling microphones throughout the world. A sturdy construction provides immunity of the moving coil system to abnormal atmospheric conditions and severe mechanical shock. 'Model " $55 S^{\prime \prime}$ is highly recommended for fine-quality public address; theater-stage sound systems; recording and remote broadcasting. Is widely used for fixed station use in the police, fire, and transportation services. Model "556S" is recommended for studio broadcasting, television use, and professional recording. Has Cannon XL connector and vibration-isolation unit. Both models reduce the pickup of random noise by $67 \%$; have smooth response from 40 to 15,000 c.p.s.; are supplied with a 20 -ft., high quality cable and plug assembly. Both models have the world-famous, patented "Uniphase" system.

| IMPEDANCE TABLE | OUTPUT LEVEL |
| :---: | :---: |
| L-35-50 ohms | 59.4 db below I Milliwatt per 10 mierobar signal |
| M-150-250 ohms | 60.1 db below 1 Milliwatt per 10 mierobar signal |
| H-High | 60.5 db below 1 volt per microbar |

Multi-Impedance Switch on Models " 555 S", " $556 S^{\prime \prime}$ " " 51 ". " 300 ", " 315 ", " 333 "

| MODEL | LIST PRICE |
| :---: | :---: |
| 5565 | $\$ 110.00$ |
| 555 | $\$ 76.50$ |

Model "31"
Sonodyme

## MULTI-IMPEDANCE HIGH OUTPUT DYNAMIC

The "Sonodyne" is ideal for all general purposes, including public address, wire and tape recording, and similar applications. It is widely used by bands, instrumentalists, and professional recording artists because of its outstanding reproduction of both voice and music. Widespread usage by home users of tape recorders indicates that the "Sonodyne" is the ideal high-quality, moderately-priced replacement for the conventional microphone supplied with tape recorders. Has built-in receptacle and a 15-ft., two-conductor shielded cable with microphone plug attached. Satin chrome finish. Model "51" List Price: $\$ 47.50$

| IMPEDANCE TABLE | OUTPUT LEVEL |

## THE NEW "SLIM-X" ALL-PURPOSE MICROPHONE

## FOR:

- Low Cost P.A. Systems
- Home Recording
- Hams
- General Purpose

The new "777" Slim-X Microphones are rugged little microphones weighing anly 6 ounces! They are designed for good-quality voice and music reproduc. tion. Their versatility and "hand-ability" make them ideal for use by lecturers, annauncers, instructors, and Hams; for audience participatian shaws; carnivals; panel and quiz shaws; and use with home. recarders. When maunted an either cradle ar swivel, the "777"' can be removed in a flash (no toals
necessary)-simply by lifting it out of the halder. This makes it an ideai "walk-around" hand-held microphane.
TECHNICAL INFORMATION: Smooth frequency response- 50 ta 10,000 c.p.s.; special-sealed crystal element-for long operoting life; high impedance; 7' single-canductor cable, discannect type. Dimen.

In the Hand sians: (Microphane only) Length, 41/2"; Diameter, $\mathbf{l}^{\prime \prime}$. Finish: Rich satin chrame overall. Note: All Models with lavalier Card, for suspension of micraphone araund neck.

## "SLIM-X" ASSEMBLIES

MODEL 777A includes 777 Micraphane; A-25 Swivel Adaptor; S.38 Desk Stand; Lavalier Cord. Model: 777A

List Price: $\$ \mathbf{2 9 . 0 0}$
MODEL 777SA includes 777S Mierophone; A-25 Swivel Adaptar; S-38 Desk Stand; Lavalier Cord.
Madel: 777SA List Price: $\$ 31.00$

## ACCESSORIES FOR "777"

MODEL S38 STAND is a heary die-cast base. Includes metal screw machine stud for cannecting micraphone adaptar to stand base.
Madel: S38
List Price: \$3.30
MODEL A25 SWIVEL ADAPTOR features a lang-life, high-quality swivel cannectar. Is lined with a lang-life nylan sleeve-for noise-free and scratch-free insertion and remaval af micraphone.

## "MONOPLEX" (Fig. A)

The only Super-Cardiaid Crystal Micraphone made-far superiar ta canventianal Crystal Micraphones! Excellent for highquality public address, communicatians, recording, and similor applicatians. The 737A operates under adverse canditians af backgraund noise and reverberatian-where a canventianal micraphane would be practically useless! Reduces pickup af random saund by $73 \%$ I Moisture-proofed "Metal Seal" crystal for long aperating life. Case pivats at rear, can be pointed taward desired sound or upwards for harizantal plane pickup. Has 15 ft . shielded cable. Rich satin chrome finish. High impedance.

| MODEL | OUTPUT | LIST PRICE |
| :---: | :---: | :---: |
| 737 A | 54.0 db <br> bolow 1 volt <br> per microbar | $\$ 42.50$ |

## THE "REX" (Fig. B)

Its low price makes this hand-held microphane a natural for "Hams" and law-eost public address systems. A rugged unit designed for high speech intelligibility. Saves extra costs, as it needs no desk stand! Has

Fig. A

List Price: $\$ 5.50$

*(Price includes cradle for mounting on stand.)
a braad base, camplete with stand adapter for mounting on floor stand. Sits firmly an a table top without tipping over. Die cast case. Frequency respanse 60 ta 9,000 c.p.s. $5^{\prime}$ shielded cable. Beautiful Bergundy-red metallic finish. Only $23 / 3^{\prime \prime}$ wide, $31 / 4^{\prime \prime}$ high, $11 / 8^{\prime \prime}$ thick. High impedance.

MODEL 707A (Fig. C) Ideal for low-cost P.A. systems, amateur 'phone transmitters and similar applications. Gaod-quality performance at low cost. Has typical semi-directional pickup. Has 7 ft . shielded cable. High impedance. Pearl Gray case with rich satin chrome finish on frant grille. Diameter 23/8".

| MODEL | OUTPUT | LIST PRICE |
| :---: | :---: | :---: |
| 707 A | 51.0 db below <br> 1 volt per microbar | $\$ 16.95$ |

Fig. D

LAPEL MICROPHONE (Fig. D) Specially designed unit widely used by lecturers, instructars, speakers, etc. High speech intelligibility. Response fram 40 to 6,000 c.p.s. $178^{\prime \prime}$ diameter. Has lapel clip. 20 -foat shielded single-conductar cable. High impedance.

| MODEL | OUTPUT <br> LEVEL | LIST <br> PRICE |
| :---: | :---: | :---: |
| 768 | S7db <br> below 1 volt <br> per microbar | $\$ 27.00$ |

## STRATOLINER (Fig. E)

An expensive-laoking crystal microphone of moderate cost. Wide-range respanse for good reproduction of either voice or music. Placed horizantally, the 708A is semi-direetianal; used vertically it becames nondirectional. Swivel permits $90^{\prime \prime}$ tilting of microphane. 7 ft . shielded cable and plug assembly. High impedance. Fearl Gray finish.

| MODEL | OUTPUT <br> LEVEL | LIST <br> PRICE |
| :---: | :---: | :---: |
| 708 A | 51.0 db below <br> 1 volt per microbar | $\$ 29.50$ |

## CONTROLLED RELUCTANCE MICROPHONES SHURE

THE "HERCULES"
The "Hercules" is a hand-held magnetic unit. Provides the ruggedness, clear reproduction, and high output long needed for Public Address, Communications, and
 Recording-AT AN AMAZINGLY LOW PRICE! Recommended for Announcing and Mobile Public Address Systems; Communications; Home Recording; high quality Inter-Communication. Ideal for general-purpose use in tropical countries and all coastal areas where humidity is a problem.
The output voltage is induced in a coil of wire by causing a sound wave to modulate the reluctance of the magnetic circuit. By the control of this reluctance the utmost in quality and stability is achieved. High impedance is obtained without the use of a transformer. The "Hercules" can be used either Indoors or Outdoors. Fits snugly in the hand, sits firmly on a desk. High impedance. Frequency response is 100 to 7,000 c.p.s. Furnished with $5^{\prime}$ shielded cable. Green metallic finish. Die-cast case. Complete with stand adapter. $22 / 3^{\prime \prime}$ wide, $31 / 4^{\prime \prime}$ high, $1 / 2^{\prime \prime}$ thick.

| MODEL | OUTPUT LEVEL | IMPEDANCE | LIST PRICE |
| :---: | :---: | :---: | :---: |
| $510 C$ | 52.5 db below <br> I volt per microbar | HIGH | $\$ 15.00$ |
| 5105 <br> (with switch) | 52.5 db below <br> I volt per microbar | HIGH |  |

## THE "GREEN BULLET"

The "Green Bullef" is a magnetic unit, especially designed to provide quality music and speech reproduction at moderate cost. It is practically immune to the effects of high temperatures and humidity. The "Green Bullet" has a stability assured by unique control of the reluctance of the magnetic system. It features: high output, good response, high impedance without the nead of a transformer. The "Grean Bullet" has a beautiful modern matallic green finish with a plated grille. Frequency response is 100 to 7,000 e.p.s. Furnished with $\mathbf{7}^{\prime}$ single-conductor shielded cable. High Impedance.

MODEL 520

MODEL 520SL

This naw Controlled Reluctance unit is designed to handie the most severe field requirements of paging and dispatching systems. The unit is supplied with 7 feat of 2-conductor shislded cable, and is wired to operate both microphone and relay circuits. The "Dispatcher" is ideal for police, taxi-cab, railroaa, airport, bus, truck, and all emergency communications work where dependability is vital. Large grip-bar assures positive contact.

| MODEL | OUTPUT LEVEL | IMPEDANCE | LIST PRICE |
| :---: | :---: | :---: | :---: |
| 520 | 52.5 db below <br> 1 volt par microbar | HIGH | $\$ 19.50$ |
| 5208 | 51 db below 1 milli- <br> wat per 10 microbars | $150-250$ ohms | $\$ 19.50$ |

## THE "RANGER"

The new Shure "Ranger" is a new development of a similar magnetic unit originally housed in microphones used by the Armed Forces. The "Ranger" is especially recommended for those applications where long lines are used, and a rugged hand-held microphone is needed. It is ideal for outdoor public address (sports arenas, athletic fields), mobile communications, ham, audience participation shows, etc. The "Ranger" is designed for high speech intelligibility. Easy to use, fits snugly in the palm of the hand. Has heavy-duty single-throw, double-pole leaf-type switch for push-to-talk operation. Phosphor-bronze blades and silver contacts for maximum operating life. Furnished with $5^{\prime}$ three-conductor shielded cable. Frequency response is 100 to 9,000 e.p.s.

| MODEL | OUTPUT LEVEL | IMPEDANCE | SHPG. WT. | CODE | LIST PRICE |
| :---: | :---: | :---: | :---: | :---: | :---: |

## CARBON MICROPHONE CARTRIDGE

Rugged microphone cortridge replacement for "C8", "100" , and " $120^{\prime \prime}$ " Series Corbon Microphones. Furnished with necessory mounting hordware and complete installation instructions. Direct replacement for the cartridge used in the Models 101A, 101B, 101C, 102A, 102B, 102C, 120, CB10, CB10B, CB10C, SB10E, CB11, C8118, CB12, CB12A, CB12B, CB12C, CB12D, CB12E, CB14, CB14A, CB15, CB15B, CB15C, CB15D, CB15F, C820, CB162, 91427 corbon microphones. Model: R10

## MICROPHONE ASSEMBLY

A Controlled Reluctance Micrephene and Desk Stond Assembly-ideal for fixed-stotion used in all types of communications work. Has a built-in switch for controlling both the microphone circuit ond on external reloy or control circult. Replacement for Mírs. Model No. CR84.
Medal 5iomb
List Price $\mathbf{\$ 3 8 . 5 0}$

Model 510 MD

## MODEL "100" SERIES CARBON MICROPHONES

Used around the world for police, taxi, bus, truck, and commercial applications - more than all other makes combinedl Rugged unit with clear, crisp voice response and high outpul. Heavy duty switch for push-totolk performonce. Furnished with bracket for wall mounting, plus coiled-cord cable. Adopted as stondord microphone by G.E., Link, Motorola, R.C.A. and others for 2-way radio communications equipment. Output level: 5db below 1 vali for 100 micrabar speech signol.

## CARBON "PACK" MICROPHONE

Designed for use with small portable ond mobile transmitters. Only $2^{\prime \prime \prime}$ in diameter ond $11 / 2^{\prime \prime}$ thick. Has 3-conductor coiled cord, metal-spring strain raliof, and Push-to-Tolk switch. Has some operoting characteristics as " 100 Series" Corbon Microphones. Replocement for Mfrs. Modal Nos. CE20, C821.
Model 115
List Price: $\$ \mathbf{2 s . 5 0}$

## SWITCHES AND ACCESSORIES

"GRIP-TO-TALK SLIDE-TO-LOCK" SWITCH Heavy-Duty Switch withstonds the mest severe fleld requirements of peging and dispatching systems. Ideal for Police, Taxi-Cab, Railroad, Airport, Bus, Truck, and all emergency communications work. Can be used with Shure connector-type erystol dynamic and carbon microphones of ony impedonce. Fits hondily on Shure S36A Desk Stand. Rich sotin chrome finish. Model: A8BA

List Pricer 11.75 Modei A88A
ON-OFF PRESS-TO-TALK SWITCHES

Model A838. Rotory-type "On-OF"" switeh. Qulckly aftached to any cable connector type Shure microphone.

## MODERN DESK STAND

Madel S36A. Streamlined Dask Mount fits all Shure cene nector-type microphones. Adopter provided for mountino other type microphonec. Ideol for use with A88A switch. Model: S36A

capacitor, in addition, Model W78 has capacitor, furnished as accessory. Withoul capacitor, output is 4.0 volts. With capacitor, output is 2.0 volts.

# SHURE CRYSTAL PHONOGRAPH PICKUPS WNONEEDLLES 

## PHONOGRAPH PICKUPS

Like the popular Shure Cartridges, each Shure Phonograph Pickup has been designed to meat specific requirements. There is af least one model for each type of reproduction desired - standard (78 RPM), fine-groove ( $331 / 3$ and 45 RPM), or single-needle "All Purpose" and dual-needle "Turnover" for playing all types of records. Each tone arm is scientifically curved and balanced for faithful tracking, and designed to emphasize the best qualities of the cartridge with which it is equipped.

## M-20 LIPSTIK MICROFHONE SYSTEM

The Altec Lipstik Microphone System was designed to mcet the demands for a smaller housing for the world-famous 21 Type Condenser Microphone. In addition to this new, compact Lipstik housing, the 21 C Microphone is used. This 21C Microphone is an improved version of the 21B and has an even wider and smoother frequency response. The compact Lipstik housing allows it to be used as a lapel microphone, a hand microphone, or a stand microphone as required. The size of the P-525A Power Supply makes a very amall, compact, and handy package. Frequency response 20-15,000 cycles.
Components of the $\mathrm{M}-20$ Lipstik Microphone System are:

21 C Condenser Microphone 165 A Lipstik Base 166A Stand Holder

NET PRICE: $\$ 198.00$

This microphone response curve is in agreement with measurements made by General madio Company and other major acoustical laboratories.

## M-11 MICROPHONE SYSTEM

The M-11 Microphone System will continue to be available to those customers who prefer the graceful shape of the 150 A Base to the compactness of the Lipstik type hase. The M-11 System will incorporate the new 21 C Microphone as described above in the M-20 Lipstik Microphone System. Components of the M-11 Microjhone System are:
21C Condenser Microphone
21 C Conde
150 A Base
150 A base 153 A Cable Set
P-518A or P.519A Power Suppl?

NET PRICE: $\$ 230.00$

## CARDIOID MICROPHONE 670A

The 670A Cardioid Microphone consists of a ribbon type element coupled to an acoustical network enclosed in an a.ttractive plastic housing. Similar in appearance and performance to the famous Model 639 Sficrophone and about half the size. It has three basic pickup patterns along with many variations of these three basic patterns. The 670A Microphone, because of its cardioid directional performance giving an 18 db attenuation between front and rear pickup, is an excellent all-purpose microphone for use in radio, TV. and recording studios as well as all types of difficult auditorium jobs. Frequency response uniform from 35 to 15,000 cycles in the cardioid position. Equipped with $5 / 8$ " $\times 2$ : swivel head. Output impedance $30 / 50$ and $150 / 250$ ohms. Output level - 58 dbm ( 10 dynes/cm 2.)

NET PRICE: $\$ 130.00$

## CARDIOID MICROPHONE*

639A and 63\% B
Ideal for broadcast or public address, these cardioid microphones with ribbon and dynamic elements provide the Eest possible pick-up under varying, difficult conditions. High quality three-way (639A) and six-way (639B) directivity patterns are uuickly selected by turning a screw. Each embadies a dynamic moving coil type pressurv elentent. Impedance average 40 ohms. Power output level: - 56 dbm ( 10 dynes $/ \mathrm{cm}^{2}$ ). Frequenty response: 40 . $10,000 \mathrm{cps}$.

## MODEL CB-1A

- New, improved combination UHF converter and VHF booster. Provices continuous tuning throughout UHF channeis. Absolute minimum oscillator drift. Greatly increased tuning ratio for easiest. accuriste fine funing. Consists of two tuned preselectors, a 6 T4 or AF4 UHE Oscillator and a 1 N82 silicon diode mixer. Converter Chatiges UHF iV channel to choice of $3,4,5$ or 6 in VHF frequency. Booster which are incorporated With the circuits of the Astatic CT-I Booster which are incorporated. Switching and tuning is provided to
permit using the VHF amplifier circuits as a VHF Booster only. The permit using the VHF amplifier circuits as a. VHF Booster only. The
 CB-IA easily connects to TV receiver with standard 300 ohm leads. Terminal board on rear of chassis has connections for both UHF and VHF antenna and lines to the receiver. Operates on IIO-120 V., 60 cycle AC, 30 watts.

Attractive metal cabinet, finished in mahogany or blond simulated woodgrain with gold trim, $9^{\prime \prime} \times 6^{\prime \prime} \times$ $53 / 4^{\prime \prime}$. Shipping weight, $71 / 2^{\prime} \mathrm{lbs}$.

## MODEL CT-1

- New, two-stage VHF Booster providing greatly improved picture quality. Band width over 7 megacycles on all VHF channels. The CT-I features a neutralized 6 J 6 driving a push-pull dual triode groumded grid circsit. Balanced, cascaded circuit provides added signal strength with low noise level. Controls: Channel Selector and 3-position switcin (Broster Off, Low Band, High Band). Has input and output connections for 72 or 300 ohm transmission lines. Housed in attractive metal cakinet finished in brown Hammerlin with gold trim,
 $61 / 2^{\prime \prime} \times 43 / 4^{\prime \prime} \times 47 /$ " $^{\prime \prime}$ deep. Also available in mahagany or blond simulated woodgrain. Complete with tubes and selenium rectifier. For operation from llo120 volts, 60 cycle AC. Shipping Weight, 5 Ibs.

## CARBON MODEL 10 M 5

- For mobile applications, ship-to-shore communication, multitude of other uses. Unparalleled high sensitivity among carbon mikes, designed for greater ruggedness and convenience in use. Ideal response for speech clarity: 100 to 4500 c.p.s. range. Double-pole, single-throw switch, with relay and microphone circuits nor:mally open (press-to-talk), adapts easily to wide variety of circuits. Four-conductor, self-coiling cable: retracted length, 12 inches; extended length, five feet. Coiled sprinaz cable protector. Surface mounting wall, panel or dash hang-up bracket. Grey Hammerlin finish, die-cast housing.

## CRYSTAL MODEL DK-1

- New non-directional unit for studio and public address, featuring reduced size and design establisned primarily to allow unobstructed, least detracting view of performer. Brushed chrome finish contributes to this purpose by reducing distracting light reflections and glare. Excellent frequency range, with rising characteristic between 2,000 and 5,000 c.p.s. Output level is approximately - 55 dk . Crystal element has moisture-proof coating. Includes 10 ft . rubber covered, shielded single conductor cable. Available with offoon switch (SC-II) at $\$ 2.70$ extra.

DK-I-Code ASURV
List Price
The JT-SERIES CRYSTAL \& CERAMIC

- Because of their wide range of usefulness, excellent performance and low price, Astafic JT-Series Microphones are used extensively for amateur, public address and home recording. JI-Series Microptones are available in both wide and voice range models and, in addition to standard equipment, are furnished complete with concentric cable connector, convenient wood handle interlocking metal base. Crystal model has $10^{\prime}$ cable; ceramic, $5^{\prime}$. Wood handle may be removed and mirrophone used on floor stand. Crystal models' output level, -52 db , provides ample reserve for use with high gain amplifiers. Ceramic mod. els' output approximately -62 db . Opalescent gray with bright chrome grille.

## "VELVET VOICE" CERAMIC

- Also identica! in appearance with Model 20t, but employing the amazing, new piezoelectric ceramic element. Recommended where high temperatures and humidity are service factors. Ecuipped with $5^{\prime}$ cable. Output level approximately -62 db . Frequency response 30 to 10,000 c.p.s.

Available with On-Off switch at $\$ 1.05$ extra

## The DYNAMIC

- Three models-50 ohm impedance, high impedance or multi-impedance, the latter having a multi-impedance transformer and impedance selector switch to provide choice of 50, 200 and 500 ohms or high impedances. A semi-directional, all purpose dynamic microphone incorporating a unitary moving coil system, and carefully proportioned acoustic circuit to highly damp the natural resonance of the moving system and provide a response characteristic substantially flat from 50 to 7,000 cycles. Output level ON.HZ approximately -55 db . The "DN"' design employs all features necessary for wide applicability, including Astatic's tilting-head. swivel mount permitting semi- or non-directional positions. Opalescent gray and bright chrome finish. High- or multi-im. pedance models oniy are available with Type SC-ll Off.On Switch (as illustrated) of $\$ 2.75$ extra. 10 -ft shielded cable.

## The TURNER Company Cedar Rapids, lowa

## BROADCAST DYNAMIC MICROPHONES

## THE ARISTOCRAT MODELS 50D and 50D-TV

The Turner Aristocrat is an ultra wide range, high fidelity dynamic microphone. It offers high quality performance with the most realistic reproduction of voice and music yet attrined with microphones of it type. Advanced circuit design with type. Advanced circuit design with high output dynamic generator re quires no closely associated auxiliary equipment.
The Aristocrat is now offered in satin black finish with matching desk stand (Model 50D-TV, illustrated) or in satin chrome finish with match. ing desk stand (Model 50D). Match ing desk stands have built in shock mounts. The swivel coupler permit
 almost instantaneous change from stand to hand use and vice versa. The Aristocrat is essentially non-directional in operation - equally effective for individual or group pickups. Use the Aristocrat anywhere, indoors or out - on stand, in hand, suspended or concealed in stage settings. Use the Aristocrat everywhere performance
of the highest quality is demanded.
Model 50D. Finished in satin chrome. Complete with swivel coupler, cable set and matching desk stand with shock.

Model 50D-TY. Finished in satin black. Complete with swivel coupler, cable set and matching desk stand with shockmount........................................................................................................................... Price $\$ 125.00$ If matching stand for either model is not desired subtract $\$ 7.50$ from List Price.

## SPECIFICATIONS 50D and 50D-TV

FREQUENCY RESPONSE: 50 to 15,000 c.p.s. flat within $\pm 21 / 2 \mathrm{db}$ OUTPUT LEVEL: 56 db . below 1 volt/dyne/sq. cm. at high impedance. OUTPUT LEVEL: 56 db. below 1 volt/dyne/sq. cm. at high impedance.
IMPEDANCE: Choice of 50,200 , 500 ohms or high impedance ( 25,000 ohms) connected for balanced line output.
POLAR PATTERN: Essentially non-directional in any position
TRANSFORMER: Magnetically shielded for minimum hum pickup
DIAPHRAGM: Specially designed aluminum alloy.
CASE: All metal. Specify satin chrome (50D) or gatin black (50D-TV) finish.
MOUNTING: Swivel type. Standard $5 /{ }^{*}-27$ thread.
DIMENSIONS: $15 / 8$ "maximum diameter; $61 / 2 "$ long (less e:able connector). WEIGHT: 16 ounces (less cable).
CABLE: 20 ft ., high quality two conductor shielded cable wil.h Cannon quick-disconnect plug.

## MODEL 51D and 51D-TV

This dynamic microphone, handsomely fin ished in rich umber grey or satin black, offers exceptionally high quality performance at a low cost. No closely associated auxiliary equipment required.

Model 51D. Finished in umber grey. Complete with swivel coupler, cable set and matching stand with shockmount

Model 51D-TV. Same as 51D but finished in satin black. Lisł Price $\$ 92.50$ If matching stand for either model is not desired subtract $\$ 7.50$ from List Price.

## SPECIFICATIONS 51D and 51D-TV

FREQUENCY RESPONSE: 60 to 13,000 c.p.s. substantially flat OUTPUT LEVEL: 58 db below 1 volt/dyne/sq. cm . at high impedance. IMPEDANCE: Choice of $50,200,500$ ohms or high impedanee ( 25,000 ohms) connected for balanced line output.
POLAR PATTERN: Essentially non-directional in any position.
TRANSFORMER: Magnetically shielded for minimum ham pickup.
DIAPHRAGM: Special aluminum alloy.
CASE: All metal: Specify umber grey (51D) or satin black (51D-TV).
MOUNTING: Swivel type. Standard $5 /{ }^{\circ}=27$ thread.
DIMENSIONS: $15 /{ }^{\prime \prime}$ maximum diameter, $61 / 2^{\prime \prime}$ long (lesp cable connector).
WEIGHT: 16 oz . (less cable).
CABLE: 12 foot high quality two conductor shielded cable with Cannon quick-disconnect plug.

Compact, Slender Dynamic af a Popular Price

## MODEL 95 D

High quality, general purpose microphone with such features as Alnico V Magnets ard moving coils. The 95D has excellent sound characteristics and a wide response range for premium performance with applications from tape recorders to commercial broadcasting. Excellent sensitivity to voice and music - modern, graceful lines - available in satin chrome or satin black finish

Model 95D Dynamic List Price $\$ 35.00$

Model S95D Dynamic (with slide switch) ........ List Price $\$ 38.50$

## SPECIFICATIONS 95 D

FREQUENCY RESPONSE: 100 to 10,000 c.p.s.
OUTPUT LEVEL: 58 db below 1 volt/dyne/sq. cm.
CABLE: 20 -foot removable cable set.
CASE: All metal. Specify satin chrome or satin black.
MOUNTING: Coupler swings microphone in $60^{\circ}$ arc. Standard \%" - 27 thread.
IMPEDANCES: High impedance wired single ended (single conductor shielded cable). 50, 200 or 500 ohms wired for balanced line (two conductor shielded cable).

MTCROPTOMES for SOUND PERFORMANCE
The TURNER Company Cedar Rapids, lowa

Popular, Powerful, Miniafure Crystal Microphone THE TURNER MODEL 80

One of the most beautiful, serviceable and versatile crystal microphones of all time. The slender, graceful Model 80 is so tiny you can hide it in your palm, yet it is a big performer within its frequency range of 80 to 7,000 c.p.s. Level, about -58 db . The case of die-cast zinc alloy, satin chrome plated - total weight, 5 ozs. A 7-ft. attached single conductor shielded cable is included. High quality Bimorph moisture sealed crystal is blast and mechanical shock proofed.

Turner 80 on C-4 Stand

Model 80 (does wol inelude stand) $\qquad$ List Price $\mathbf{\$ 1 5 . 9 5}$

THE C-4 STAND was espectally designed to give maximum maneuverability to the Model 80 Microphone. It pivots the microphone in a $135^{\circ}$ arc for any operational angle. It holds the microphone firmly by the unique, positive action hinge, yet moves smoothly and easily to any desired position without adjustment. The C-4 Stand is solidly built of die-cast zinc overlaid with matching satin chrome plate. It will not tip or silide with the weight of the cord. Standard 5/8" - 27 thread.
Model C4 Matching Stand.
Lisf Price $\$ 5.75$

# New, lightweight lapel microphone THE TURNER L-100 

## with the swivel clip that grips from any angle

#### Abstract

This brand new Turner beauty weighs only 1 ounce. It has an alligator clip with a tough spring that really holds, and it's rubber padded, can't tear clothing. Best of all, it's on an adjustable clip - ywu can clip on the Turner L- 100 from any angle and the mike stays straight up . . . cord hangs straight down. Case is light-grey, design neat and inconspicuous. A high quality Bimorph, moisture-sealed crystal produces a top signal level. Speech reproduction is crisp, clear cut. Chest sound damped out. The L- 100 is also available with a ceramic interior at the same price. Use for P. A., retording and demonsirations. Same mike is available as the Model 100 without clip for tape recording, dictographic and other uses requiring a lightweifht hand held microphone. Turner L-100 (with elip and 20-4t. cable) $\qquad$ List Price $\$ 12.50$ Turner Model 100 (without clip and with 7-ft. cable) $\qquad$ List Price \$8.00

## SPECIFICATIONS

Models L-100 and 100 Crystal RESPONSE: 50 to 10,000 c.p.s. LEVEL:-52 db.
CABLE: 20 - ft . attached single conductor shie!ded.
DIMENSIONS: $\underline{-\prime}^{\prime \prime} \dot{x} 11 / 16^{\prime \prime}$ withuut clip.

WEIGHT: 1 ounce, less cable.
Models L-100C and 100C Ceramic
RESPONSE: 80 to 9,000 c.p.s.
LEVEL: Approx. -61 db .
CABLE: 7-ft. attached single conductor shielded.

## MODEL 81

Smaller than the Model 80, the Model 81 pictured here has a PC1M Amphenol connector attached. Same technical specifications as Model 80. Excellent for built-in applications, sound reinforcers, dictograph and detective work.
Model 81
List Price $\$ 13.95$
(Available with 7 foot removable cable set at extra cost. Also crailable with Amphenol microphone switch Model 7S-MClS ot extra cost.)

Nowhere is the diminutive size of this microphone more sharply evident than when adapted for use with the famous Turner "Third Hand." The "Third Hand" slips over your head in a jiffy and holds microphone close to your mouth for excellent volume without feedback. Ideal for window demonstrations, carmival and sideshow work and switchboard, operators. Same technical specitications as Model 80. 20 foot attached single conductor shielded cable.
Model 82-3H. Complete with "Third Hand'" ...........List Price $\$ 22.75$

$\$ 41.50$
MODEL 999 BALANCEDLINE DYNAMIC
Same as Model 99 but farnished with 3 pin polarized locking con nector and $2 G$ ft. balanced line low capacity cable.

List Price $\$ 45.00$

## MODELU9S MULTI-IMPEDANCEDYNAMIC

$50,200,500$ ohms or hish impedance - get it quickly with the tarn of the switch on the Turner U9S Iynamic. Same precision engineering and rugged construction as the Model 999 with built-in tapped multi-impedance transformer and switch. Dependable at al
impedances and frequencies. Gurmetal metalustre finish. LEVEL -52 db at high impedance. RESPONSE: $80-9,000$ c.p.B. Complete with 20 ft . balanced line removable cable srt .
Model U9S
List Price $\$ 49.50$

## MODEL 2 11

High Quality Dynamic, precision engineered for oustanding per formance. Unique diaphrasm structure of the 211 resuls in extremely low harmonic and phase distortion without sacrifice of high output level. A sensitive unit, yet ruggedly built for depentable use indoor or out under the most difficult acoustic and climatic conditions. Withstands rousth handling. For quality rezording, P. A., sound
systems and broadcast work, including FM. LENEL: -5 1 db. at high impedance. RESPONSE: $50-10,000 \mathrm{c}$.p.s. Equipped with $90^{\circ}$ tilting head, balanced line output connection, and 80 ft . 2 -conductor, heavy duty removab'e cable set. Satin chrome finish. 50 ohms, 200 ohms, 500 ohms or high impedance.
Model 211
List Price $\$ 42.50$

## MODEL $22 X$ CRYSTAL $22 D$ DYNAMIC

Accurate pickup and faithful reproduction have male these units the most popular general purfose microphones on the market. Used by amateurs, paging and call sysiems, home recording, and genera sound work indoors and out. Modern styling and rich satin chrome finish. Full $90^{\circ}$ tilting head for serni- or nons-मirectional (microphone pointed straight, up) operation. Standard 5/8" - 27 coupler mount iLg. MODEL $22 \times$ CRYSTAL has hirl quality humidity protected crystal in mechanical shock proefed mourting. I.EVEL: -52 db RESPONSE: 60-9,000 ©.[.s. Complete with 7 ft . removable cable set Model 22X ................................................................................................... Price $\$ 24.75$ Model S-22X with slide on-off switch .. ...... .. ...... .... List Price $\$ 27.25$

MODEL 22D DYNANIC features high quality Alnico magnets in high level dynamic circuit. LEVEL: -54 db . at high impedance. RESPONSE: $100-9,001$ c.p.s. 7 ft . removable cable set. Hirh impedance wired single ended (single conductor shielded cable). 50, 200 or 500 ohms wired for balanced line (two conducter shirlded cable).

Model 22D $\qquad$ .List Price $\$ 29.95$

Model S-22D with slide on-off switch $\qquad$ ..List Price \$32.45

## MODEL $33 X$ - 33 D

These high fidelity, anl purpose units combine high output with smooth response over a wide frequency ran:ze. Excellent speech and music reproduct ion. Streamlined case deaign with rich satin chrome finish. $90^{\circ}$ tilting head perrits semi- or non-directional operation. Removable cable feature allows quick interchange of cables.

MODEL $33 \times$ CRYSTAL has high quality 2 -element moisture sealed rystal and mechanical shock proofing. LEVEI: -5: db. RESPONSE: erystal and mechanical shock prooning. Lemvalile cable set.
Model $33 X$
Model S-33X with slide on-of switeh

## MODEL 87

A unit engineered with single element riobon supported in the field of an Alnico $Y$ magnet for maximum sensitivity. Thorough shielding excludes hum pickup. The Model 87 has a bi-directional pickup pattern with exceptionally smooth responce from $80-8,000$ e.p.s. LEVEL: -62 db . at high impedance. Built-in impedance switeh gives

MODEL 33D DYNAMIC - Smuoth, high level dynamie circuit. Alnico magnets. LEVEL: -54 db . at high impedanee. RESPONSE: $100-9,000$ e.p.s. Complete with 20 ft . renovable cable set. High impedance wired single ended (aingle conductor shirlied cable). 50,200 or 500 ohms wired for balanced line (two conduetor shielded cable.

Model 33D
List Price $\$ 31.90$
Model S-33D with slide on-off switch $\qquad$ List Price \$34.40

MICROPHONES
for SOUND PERFODMAHCE

## The TURNER Company

# CONVENIENT HAND-HELD MICROPHONES MULTI-PURPOSE MICROPHONE - THE "HAN-D" 

## Model 9D Dynamic Model 9R Carbon

One of the handiest and most useful microphones made. Hang it, hold it, or mount on any standard floor or desk stand. Standard $5 / 8$ "-27 thread mounting. Balanced to fit the hand. Especially engineered for maximum response to voice, "Han-D" also delivers smooth, natural response to music pickups. Ideal for stage, paging, public address, amateur, mobile and traveling mike broadcasting. Will not blast from close speaking. Die-cast zinc alloy case. Satin chrome finish.

MODEL 9D DYNAMIC - Recommended for more severe conditions and extremes of climate and temperature. LEVEI,: -52 dh. at high impedance. IRESPONSE: $150 \cdot 7,000$ c.p.s. Complete with removable 7 ft . single conductor shjelded calle set. $50,200,500$ ohms or high impedance furnished standard with positive contact slide switch.
Model 9D
Model P9D
List Price $\$ 32.50$
List Price $\$ 32.50$
(Same as 91) with push-to-talk non-locking switch)
MODEL 9X CRYSTAL - Equipped with high quality, shock mounted. humidity protected crystal for indoor or outcloor use. I, EVEL: -52 db . humidity protected crystal for indoor or outdoor use. LEEVEL: - 52 db . RESPONSE: $60-7,000$ c.p.s. Complete with 7 it.
shielded cable set and positive contact slide switch.
Madel 9X
List Price $\$ 25.85$
Model P9X List Price \$25.85

## (Same as 9X but with push-to-talk non-locking switch)

MODEL SR9R CARBON - Recommended for use with mobile equipment and for ham operations. Two circuit, side-button, push-to-talk switch for on-off microphone control and external relay circuit. Furnished with four-conductor, 7 foot unshielded attached cahle. LEVEL; approximately -42 db . RESPONSE: 200-4,000 c.p.s. with rising characteristics for maximum intelligibility. 80 ohms nominal D.C. resistance.
Model SR9R
Model SR9D
List Price $\$ 30.75$
$\qquad$ List Price $\mathbf{\$ 3 7 . 4 0}$
(Same specifications as 9D but furnished with side-button, push-to-talk switch for external relay control. Attached 7 foot calbe, three conductor, one shielded for high impedance; 4 -conductor, 2 shielded balanced line for low im. pedances.)

New Carbon and Dynamic Moblle Microphones

## THETURNER 90

MODEL SR-90R CARBON - Designed to fit your hand comfortably. Furnished with DPST push-totalk switch. normally open, one pole in microphone circuit and one pole in external relay circuit - 4 -conductor unshielded Koilıd Kord ( $11^{\prime \prime}$ retracted - $5^{\prime}$ extended). Also available with push-to-talk on-off switch only and 2 -conductor unshielded Koiled Kord as Model S-90R. FRE. QUENCT RESPONSE: 200 to $4,00 \mathrm{w}$ c.p.s. OUTPUT LEVEL: -42 db .80 ohms nominal D.C. resistance. Satin chrome plated zinc die-cast case, Furnished with hook for hanging and bracket for wall or dash mounting.

Model SR-90R - Madel S-90R.List Price $\mathbf{\$ 2 6 . 5 0}$
MODEL SR-90D DYNAMIC - Same general appearance as SR-90R. LEVEL: -48 dh . at high impedance. RESPONSE: 200 to 9,000 c.p.s. SPST purh-to-talk switch, normally open, for on-off cimntrol of external relay circuit; 200 ohm impedance furnished with 4 -conductor, 2 shielded, 5 foot attached cable - high impedance furnished with 3 -conductor, one shielded, attached 5 foot cable.
Model SR-90D
List Price $\$ 29.50$

Watertight - Dust-Proof - Corrosian-Proof
MODEL 7 OD DYNAMIC

Clear, crisp voics response and high output unaffected ly dust, corrosiun, rainfall, mist, steam or trtal imniersion. Heavy duty push-to-talk switeh normally open. Hook for banging or bracket for wall mounting (specify choice). Complete with 7 ft . attached cable, $\stackrel{2}{2}$ conductor shielded for low impedances sinple conductor shielded for high impedance. RESPONSE: 200 to 5,000 c.p.s. with slightly rising characteristic for maximum speech intelligibility. LEVEI: -52 db . IMPEDANCE: Choice of 50,200 or 500 ohins comnected for balanced lise, or high impedance with single ended output, CASE: Zinc diecast alloy. DIMEN-

Model 70D
List Price $\mathbf{\$ 4 2 . 5 0}$

## MODEL 7 OR CARBON

Same as for 70D except with Ligh quality carbon cartridge giving excellent articulation and intelligihility for speech. D.C. PESISTANCE: 80 ohms, nominal. OITPUT L.EVEL: -42 db .
Model 70R
List Price $\$ 38.50$

## MODEL 20X CRYSTAL

Use for all fields of applications where low cost is a factor. Rugged die-cast metal case is tinished in bronze metalustre. Equipped with hook ring for hanging. SIZE: $61 / 2^{\prime \prime} \times 21^{\prime \prime}$ $\times 1$ 舛" overall.
MODEL 20X CRYSTAL - A high impedance microphone with -52 db . output. RESPONSE: 70-7,000 c.p.s. 7 ft. attached single conductor cable fully shielded. Weight less cable: $90 \%$.
Model
20X* $\qquad$ List Price $\$ 17.00$

MODEL 20D DYNAMIC - Recommended for more severe service conditions and extremes of climate and temperature. Either high impedance or 30 ohms available, please specify.

OUTPUT LEVEL: -52 db . at high impedance. RESPONSE $100-7,000$ c.p.s. 7 ft . attached single conductor cable fully shielded. Weight less cable: 12 oz .
Model 20D* $\qquad$ List Price $\$ 21.50$

MODEL 20R CARBON-Has best response curve for highest articulation and intelligibility and low distortion. Excellent speech reproduction. OUTPUT LEVEL: -42 db . D.C. resistance of 80 ohms naminal. $1 / 2$ volt developed by normal speech. RESPONSE: 200-4,000 c.p.s. $48^{\prime \prime}$ two corductor unshielded cable included. Weight less cahle: 10 oz .
Model 20R* single button carbon .............List Price $\$ 17.00$

[^11]Models SR-20X, SR-20D and SR-20R. Same as S20 models but normally open awitch is wired for relay control. Add $\$ 6.00$ to list price of $20 X, 200$ or $20 R$.

## MODEL 34X CRYSTAL MICROPHONE

Attractive, high fidelity, semi-directional crybtal unit. Highly recommended for studio and public address installations as well as quality recording work. Advanced engineering design with full $90^{\circ}$ tilting head permits tilting to most advantageous position. Quick removable cable feature. The Model 34 X utilizes a high quality Bimorph moisture sealed crystal - is blast and mechanical shock proofed. Use indoors or out Satin chrome finish. LEVEH: -52 dh, RESPONSE $60-10,000$ c.p.s. Complete with 20 ft. removable cable set.
Model 34X ................................................................................................ Price $\$ 32.00$ Model S-34X with slide on-off switch ........................ Price $\$ 34.50$

## MODEL 140 LAPEL MICROPHONE

Small, lightweight and inconspicuous, the Jd 40 can be worn on the lapel, used with the 311 or concealed. Hirhest quality Bimorph, moisture sealed crystal produces lish signal level. Engineered for moisture sealear speech reproduction. Chest sounds damped out. Used for crisp, clear speech reproduction. Chest sounds damped out andican apound re-built-in applications, public address, recording and as are ared for dictographic and detective work. Alligator inforcers. Also used for dictographic and detective work. Alngator LID meL: -52 db . RESPONSE: $50 \cdot 8,000$ c.p.s. With 20 ft . attached LEVEI
cable.
Model $L 40$
List Price $\mathbf{\$ 2 5 . 0 0}$
With Third Hand - L40-3H slips over neck in a jiffy. Ideal for mobile sound work and call systems where operator needs both hands free. Indispensable for demonstrators.
Model $140-3 \mathrm{H}$
List Price $\$ \mathbf{3 2 . 5 0}$

## FAMOUS TURNER "THIRD HAND"

Slips over your head in a jiffy and holids microphone close to your mouth, where you get excellent volume without feedback. As natural to wear as a necktie. Lets you use both hands elsewhere. Stays out of your line of vision. Talk close without craning your neck. Cuts down background noises. Can be used with long line as travelinf microphone. lileal for window demonstrations, etc. Has $6 \frac{1}{4}$ " flexible mooseneck; $5 / 8{ }^{\prime \prime}$ - 27 thread. Black enamel finish. Recommende fooseneck; with Turner microplıones as they will not blast from close speaking. speaking.
Model 3 H

List Price $\$ 5.00$

## THE TURNER CHALLENGERS

Priced within the range of almost every user, Turner Challengers offer performance, quality and appearance usually found in microphones isting at twice their low cost. Engineered with substantially flat response and high output level, they give clear cut reproduction of voice and music. Truly economical!
MODEL BX CRYSTAL - For recoriling, P. A. and amateur work. Brown Metalustre finish. LEVEL: -52 db. RESPONSE: 60-6,000 c.p.s. Camplete with 7 ft . attached cable.

Model BX
List Price \$11.75
MODEL BD DYNAMIC_Same appearance and finish as BX. Equipped with dynamic cartridge. Works equally well indoors or out. LEVEl.: -52 db , at high impedance. RESPONSE: $100-6,000$ 4.p.s Complete -52 db at high impedance. Res 500 ohms or hirh impedance. with 7 ft. attached cable. 50, 200,500 ohms or hifh impedance. $\mathbf{~ M o d e l}$ BD ................................................................................ Price $\mathbf{\$ 1 8 . 5 0}$ MODEL.CX CRYSTAL - Satin chrome finish. 7 ft. removable cable set. Standard 5/8" - 27 thread mounting. LEVEL: -52 db . RESPONSE: 60-7,000 c.p.s.

List Price $\$ 18.00$
MODEL CD DYNAMIC - Same style and finish as CX. High quality magnets. 7 ft . removable cable set. LEVEL: -52 db at high im. vedance. RESPONSE: $100-7,0140$ c.p.s. $50,200,500$ ohms or ligh impedance.
Model CD
Kist Price $\$ 22.85$

## For Hand, Stand or Desk Use

## MODEL 60X CRYSTAL

Good quality speech reproduction at low cost. For smateurs, P. A and paying systems. Two-ply, torsional, moisture staled crystal circuit has aluminum diaphragm, shock proof mounting, wind and hast prooferl. Attractive die-cast alloy case is finished in baked on peach enamel. Furnished with standard $8 /{ }^{\prime \prime}-27$ thread tor stand mounting. L.EVEL: -52 db . RESPONSE: 70-7,000 c., p.s. 6 ft . attacher single conductor shielded fabric covered *ablu. Anchored firmly to case with Heyco strain relief bushing. DIMENSIONS: $3_{\frac{7}{7}}^{7}$ " high $x 23 s^{\prime \prime}$ wide $\times 1 \mathrm{~h}^{\prime \prime}$ thick. Weight, 10 oz .
Model 60X
List Price $\$ 10.85$

## TURNER DESK STANDS

Model C-3 Stand

Model C-4 Stand

MODEL C-3. Finished completely in beautiful satin chrome. 6 inches high with $43 / 8^{\prime \prime}$ upright, base 5 inches in diameter, weighs 14 ounces. $5 / 8^{\prime \prime}-27$ thread to fit any standard microphone.
Model C-3
List Price $\$ 4.50$
MODEL C-2. Same as C-3 but with $1^{\prime \prime}$ upright.
Model C-2 List Price $\mathbf{\$ 4 . 5 0}$ MODEL C-5. Same as C-3 but with $23 / 8{ }^{\prime \prime}$ upright.
Model C-5 $\qquad$
MODEL B-3. Same as C-3 but finished completely in rich brown metalustre.
Model B-3 $\quad$ List Price $\$ 3.35$
MODEL G-3. Same as C-3 but finished completely in handsome gunmetal lustre.
Model G-3
$\times \quad$ List Price $\mathbf{\$ 3 . 3 5}$
MODEL C-4. Designed especially for Model 80 Microphone, but has $5 / 8^{\prime \prime}-27$ thread mounting so that other microphones may be mounted on it. Finished in satin chrome. Model C-4

List Price $\$ 5.75$

## MATCHING TRANSFORMERS

Turner transformers match low impedance microphones to high impedance amplifier input. Permit longer lines. Helps eliminate hum pickup.

MODEL TR2 - Matches any line to grid Model TR2 matches $: 0-50,200-250$ and 500 ohms lines to grid. Incorporates finest transformer available. Wide range response: $\pm 1 \mathrm{db}$. from 40-10,000 c.p.s. One hole mounting. Equipped with 3 -contact locking connector and 7 ft .2 conductor shielded, balanced line cable.

Model TR2
List Price $\$ 16.00$

Replacement cartridges for all Turner Microphones are available. Write for complete infermation.

## New AMPERITE STUDIO "Ribbon" MICROPHONE

 MODELS R8OH-R8OLA "Blastproof Velocity" Eliminates Feedback Troubles

The Finest in Microphones regardless of Price

Reproduction is of the very highest type. Excellent for broadcasting, recording and public address. Eliminates feedback troubles. Will not become "boomy" on close talking. An entire orchestra can be faithfully reproduced.
Pick-up angle $120^{\circ}$ front and back with practically no frequency discrimination. In spite of the wide pick-up angle, feedback is reduced to a minimum.

Not affected by temperature, altitude or humidity. Will operate under any clinatic conditions-indoors or outdoors. Not affected by wind.

Frequency range $40-14,000 \mathrm{cps}$. Output -56 db . Complete with switch (optional), cable connector and 25' cable. Finish-Chrome. Stand. thread, Standard $5 / 8^{n}-27$.

MS.10C Leader

MS-12C Standard

$\underset{\substack{\text { Standard } \\ \text { DeLuxe }}}{\text { MS-11C }}$

The "Full-Grip" Clutch offers an extended length clutch body, permitting a secure, full-hand grip. The clutch mechanism is inner-lined with a wearproof bakelite locking collet which grips without jamming, slipping, or sudden dropping. All bases are functionally designed to offer maximum stability for a given base weight. The maximum base mass is located at the outer periphery of the casting where the concentrated weight is most useful. All bases include self-leveling, shockabsorbent base pads, plus three additional "anti-tip" points located between the base pads. The complete tube assemblies of all models are "super-chrome" plated, assuring "life-time" wear. All models terminate in $a^{\circ} 5 / 8^{\prime \prime}-27$ carefully machined thread.

## *SAFETY AIR-LOCK CUSHION

Sensational new Atlas feature that prevents accidental or sudden slippage of telescoping section. This section is always "cushioned on air," and the controlled escapement allows only a slow, smooth, quiet collapse of stand.

## ADJUSTABLE BANQUET STAND

Features "Full-Grip Velvet-Action" adjustment. Tube and base handsome super-chrome finished. Adjustable $18^{\prime \prime}-32^{\prime \prime}$. Base diameter $8^{\prime \prime}$. Wt. 5 lbs. Model Ts. 6

List Price $\$ 9.00$

## 'VELVET ACTION' DESK STAND

 DS-5 and DS.7 Desk Stands-Same fine finish and workmanship as floor models. Adjustable DS-7 has heavy duty $5 / 8^{\prime \prime}$ and $7 / 8^{\prime \prime}$ tubing. Felt base pads included. Base diameter $6^{\prime \prime}$, gray shrivel finish; tube chromium plated.

| Model | Adj. Height | List Price |
| :---: | :---: | :---: |
| DS.5 | Fixed $6^{\prime \prime}$ | $\$ 3.00$ |
| DS-7 | $8^{\prime \prime}$ to $13^{\prime \prime}$ | 5.00 |

## MODEL DS-10—"The Streamliner"

Modern - Attractive - Functional
Stable!
Compliments appearance of any mike. Conceals mike cable in slot beneath center section of chromium trim and directs it out at rear of base. Adequate space under base for installation of "on-cff" or "press-to-talk" switch.

Model DS-10
List Price $\mathbf{\$ 5 . 0 0}$

# ATLAS SOUND CORP. 

## the complete line for every public address need!

## 'SNAP ON' MICROPHONE ATTACHMENT

Permits any mike to be attached to or removed from any floor stand - instantly, safesy, witnout on-and-off threadıng. SU-1 is ball-bearing spring sleeve attachment: one section is attached to mike, other section is permanently fastened to stand.
Model SO-I
List Price $\mathbf{\$ 2 . 7 5}$

## flexible goose neck

Attachable to any mike stand or fixture. Ends have $5 / 6^{\prime \prime}-27$ male and female threads. GN-13 is $13^{\prime \prime}$ long; GN-19 is $19^{\prime \prime}$ long. Finished in polished chrome.
Model GN•13-List Price $\mathbf{\$ 2 . 7 5} \quad$ Model GN-19—List Price $\$ 3.75$

## 'BABY BOOM' ATTACHMENT

Easily attached to any mike stand and locked in any position. Also effectively used with bracket clamps BC-l and SK-l. Boom length $32^{\prime \prime}$, chrome plated. Castings in gun meial shrivel. 5/8"-27 threads. Ship. wt. ?? lbs.
Model BB-I
List Price $\$ 7.50$

## SKY HOOK

Answers many mike positioning problems. Fastens securely to ledges, round pipes, stanchions*. Has $5 / 8{ }^{\prime \prime}-27$ thread for any mike. Can etc. Casting finish, gun metal shrivel; $3^{\prime \prime}$ long tube, chrome.
*Excellent for attaching an extra mike to a conventional floor stand.
Model SK-I
List Price $\mathbf{\$ 3 . 5 0}$

## TS-7 BANQUET STAND (Only)

For use with TB-1. Heavy base, $10^{\prime \prime}$ diam. All parts super-chrome plated. Adjustable tube assembly. Easily placed on and moved along speaker's table. Ship. wt. 11 lbs.
Model TS-7
List Price $\$ 10.00$

## DUPLEX MIKE MOUNT

## With Desk Attachment

Permits use of 2 mikes on any single stand. Reduces "off mike" possibil" ity. Desk attachment and mike support arms detachable. Thus one mike alone may be used-to one side or rear of desk. Finished in chrome and cadmium. Moulded composition desk, $9^{\prime \prime} x$ 11". Ship wt. $21 / 2 \mathrm{lbs}$. TB-1 List $\$ 10.00$

CABLE HANGER $\rightarrow$ Proven necessity on every mike stand. Fits all tubes, $7 / 8^{\prime \prime}$ to $11 / 4^{\prime \prime}$ diam.; attached and removed by 1 screw. All parts chrome fin:sh. Model CH-1 List Price $\$ 3.00$

## $\leftarrow \quad$ GYROMATIC SWIVEL

Permits any mike to be adjusted and locked into any angle on any floor or desk stand. Also useful with SK-1, BC-l, etc. Precision die castings, super-chrome finish. $41 / 2^{\prime \prime}$ long. $5 / 6^{\prime \prime}-27$ male and female threads. Model SW-1

List Price $\$ 4.00$

## BRACKET CLAMP

Very versatile. Usable with BB-1, GN-13, etc. Clamp can be removed and top flange screwed or bolted into position. Chrome tube $6^{\prime \prime}$ long. $5 / 8^{\prime \prime}-27$ thread. Model BC-1

List Price $\$ 3.50$

Model 630 High Fidelity, High-Output Dynamic. Brilliant, general purpose highoutput dynamic, famous for quality at modest cost. Response 60 $13,000 \mathrm{cps}$. Output level -55 db . Compact, light weight, unaffected by heat and humidity. Acoustalloy diaphragm. Tiltable head. Built-in MC-4 cable connector. Satin chrome finish. On-off switch. $18^{\prime}$ cable. Available in $50,150,250$ ohms or $\mathrm{Hi}-\mathrm{Z}$. Size $2^{\prime \prime} \times 61 / 4^{\prime \prime}$. Net wt. ill.
Llaf Price.
.$\$ 47.00$

Model 647 New P. A. Lavalier Dynamic. Small, rusged, versatile. For chest desk or hand use, indoors and outdoors. Supplied with neck cord, support clips and $18^{\prime}$ cord. Omnidirectional polar pattern. Response $60-13,000 \mathrm{cps}$ at -57 db level. Available in 50 ohms or $\mathrm{Hi}-\mathrm{Z}$. Acoustalloy diaphragm. Built-in cable connector. Black anodized finish. Size $5^{\prime \prime}$ long. $1^{\prime \prime}$ diameter. Net wt. less cable 4 oz .
List Price. . . . . . . . . . . . . . . . . . . . . . . . . $\$ 80.00$

Model 623 Slim Dynamic. E.V styled slim dynamic microphone in the medium price field. namic microphone in the medium price field. used on stand or in hand Semi-directional used on stand or in hand. Semi-directional. Response $65-8000 \mathrm{cps}$. Output -55 db . Choice of Hi or Low-Z by changing one wire in cable connector. Acoustalloy diaphragm. Pressure cast case finished in satin chrome. Tiltable head. On-off switch. Built-in MC4 connector. $1 / /^{\prime \prime}-27$ thread.
Size $71 / 2^{\prime \prime} \times 15 / 16^{\prime \prime} .18^{\prime}$ cable. Net we. 15 oz .
List Price.
..$\$ 49.50$

Model 611 "Mercury" Dynamic. A traditionally styled fine performing dynamic microphone for general sound pick-up. Response Acoustalloy diaphragm. Tiltable head. On-off Acoustalloy diaphragm. Tiltable head. Onoff
switch. Built-in MC 3 connector. $5 / 8^{\prime \prime}-27$ thread. switch. Buitt-in MC-3 connector. $5 / 8-27$ thread.
Satin chrome finish. Available in 50,150 and 250 Satin chrome finish. Available in 50,150 and 250 ohms or $\mathrm{Hi}-2$. Low impedance balanced to ground.
Size $28 / 8^{\prime \prime} \times 31 / 8^{\prime \prime} \times 614^{\prime \prime}$ incl. stud. Net wt. $11 / 4 \mathrm{lbs}$. Model 611-8. With $6^{\prime}$ cable Lisf. . . . . $\$ 35.50$ Model 611-20. With $18^{\prime}$ cable List. . . . $\$ 37.50$

Model 911 "Mercury" Crysial. Same smart design and fine performance as Model 611. Response $50-8000 \mathrm{cps}$. Output -50 db . Metal Seal Crystal. Hi-Z. Net wt. 11/4 lbs.

## TELEVISION-BROADCAST DYNAMIC MICROPHONES

E-V engineering brings you new, versatile high-output designs in keeping with current requirements for better television-broadcast flexibility and quality. Unique Variable " $D$ " cardioid principle delivers greater front-to-back discrimination, ultra wide range with rugged single dynamic element. Slim-Trim omnidirectional units set new style standards. Close tolerances and individual laboratory control guarantee uniformity. Ideal for recording, high quality public address and audience participation.

Madel 635 Broadeast Dynemic. Meets exacting requirements of TV and Broadcast service. Compact, rugged, versatile-used in studios and on remotes, on a stand or in the hand, indoors and out. Semi-directional, the Model 635 affords uniform high quality while meeting demand of most rigorous operating conditions. Uniform response from $60-13.000 \mathrm{cps}$. Output level -55 db . $50-250$ ohms impedance selector. Acoustalloy diaphragm. Head tilts through $90^{\circ}$ arc. $5 / \xi^{\circ}-27$ thread. Built-in Cannon XL-3 connector. Satin chrome finish. $188^{\prime}$ cable. Size $2^{\prime \prime} \times 614^{\prime \prime}$. Net wt. $15 / 2 \mathrm{lbs}$.

List Price.
$\$ 75.00$

Model 654 Slim-Trim Broadeast Dynomic. Frequency response $50-14,000 \mathrm{cps}$. Output level -55 db . Quality matches closely, with less range, that of model 655; microphone is an excellent utility unit for all commercial uses. Recessed selector provides 50 or 250 ohrrs impedance. Popproof head. Acoustalloy diaphragm. Black ${ }_{56^{m}-27}$ thread. Built-in Carnon XL-3 connector. $18^{\prime}$ cable. Size: $10^{\prime \prime}$ long with $5 / 8^{\prime \prime}-27$ thread. $18^{\prime}$ cable. Size: $10^{\prime \prime}$ long with stud, I" diameter. Net wt. $151 / 2 \mathrm{oz}$.
List Price.
. $\$ 95.00$
Model 655 Slim-Trim TV Dynamic. Frequency response $40-20,000 \mathrm{cps}$. Output level -55 db . Achieves most extended efficient HF response in ny microphone cornmercially available. Exed in neny laboratories as test standard. Excellent evel affords high signal-tothermal noise ratio. Pop-proof head stops blasts. Can be used on stand, in hand or on boom. Easily concealed in studio props. Acoustalloy diaphragm. Impedance 250 ohms; easily changed to 50 ohms. Cannon UA-3 connector. Has $1 / 2{ }^{\prime \prime}$ pipe thread. $8 / 8^{\prime \prime}-27$ adapter furnished. Black anodized finish. Size with swivel $113 / 3^{\prime \prime}$ long, $\mathrm{I}^{\prime \prime}$ diameter. $18^{\prime}$ cable. Net wt. 11 oz .
List Price. . . . . . . . . . . . . . . . . . . . . . . . $\$ 200.00$

646

Madel 666 Supar Cardiald Micraphone Totally new concept in directional microphane desisn uses Variable D principle (variable acousical distance between front and back opetaings). Automatically effects uniform discrimization gainst back sounds by an average of 24 db with no less than 14 db at any frequency. Highly esistant to mechanical shock. Model another octave of uniform Hr response over that ound in conventional broadcast cardioide. Permits close talking with no bass accentuation. Increases working distance over pressure microphones by factor of 1.7:1 due to reverberation reduction. Designed for operation on boom, stand or in hand. Uses only one moving element with exclusive, rugged Acoustalloy diaphraism. Reaponse range, typical $30-15,000 \mathrm{cps}$; output $-5 / \$ \mathrm{~b}$. Impedance changed on internal terminal board. Wired for 50 ohms, taps at 150 and 250 ohms. Aluminum cast case finished in TV gray. Auily-in Cannon UA-3 connector. Clamp-on stand moant included with $1 / 2^{\prime \prime}$ pipe threads and $55^{\prime 2}-27$ adaptor. $20^{\circ}$ cable. Size $71 / 2^{\prime \prime}$ lone, $1 \% / /^{\prime \prime}$ maximum diameter. Net wt. 11 oz.
List Price.
.$\$ 245.00$
Model 650 Broadeast Dynamic. Uniform frequency response $40-15,000 \mathrm{cps}$. Output level -48 db. Dual-type external shock mount. Recessed impedance selector switch gives 50 or 250 "ohms Tiltable head. Pressure cast case, with durable satin chrome finish. Acoustalloy diaphragm. Built in Cannon XL-3 connector. $8 / 8 \mathrm{~N}$-27 stand coupler. $18^{\prime}$ cable. Size $214^{\prime \prime} \times 45 /{ }^{\prime \prime} \times 51 /{ }^{\prime \prime}$ including stud. Shock mount is $13 / 2^{\prime \prime} \times 37 /^{\prime \prime}$. Net wt. including shock mount 3 lbs.
Llst Price.
. $\$ 150.00$

Madel 646 New Lavaller Dynamic. Remarkably small, versatile. For chest, desk or hand use. Neck cord and support clips supplied. Frequeney response. $40-15,000 \mathrm{cps}$. Output level -7 db . Choice of either $50,150,250$ ohms impedance. Acoustalloy diaphragm. Omnidirectional partem. Built-in cable connector. Gray anodized finish. $30^{\prime}$ cable. Size $6 \%^{\prime \prime}$ long $\left.\right|^{\prime \prime}$ diameter. Net wt. less cable. 7 or.

List Pries.
$\$ 140.00$

## CARDIOID UNIDIRECTIONAL MICROPHONES

E.V Mechanophase* Principle provides wide-angle front pick-up-dead at rear. Solves difficult sound pick-up problems-assures finer, clearer reproduction of voice and music-simplifies microphone and speaker placernent-increases pick-up range-permits higher volume levels. Tiitable head. Satin chrome: $5 / 8^{\prime \prime}-27$ thread. $18^{\prime \prime}$ cable. Size, less shock mount, $28 / 1^{\prime \prime} \times 3^{\prime \prime} \times 8^{\prime \prime}$.

Model 726 Dynamic (Cardyne 1). Frequency esponse. $50-8000$ cps. Output level -55 db . Hish-Low impedance selector. Built-in MC-3 type connector. On-off switch. Net wt. 2 lbs. 6 oz.
List Price. . . . . . . . . . . . . . . . . . . . . . . . . $\$ 75.00$

> Model 731 Dynomic (Cardyne II). Flat respons $40-10.000 \mathrm{cps}$. Output level -52 db Dual-type external shock mount. Hish-Low impedance selector. Built-in Cannon XL-3 connector. Onoff switch (optional). Net wt. $21 / 2 \mathrm{lbs}$.

List Price. $\qquad$ .$\$ 95.00$

Model 950 Cardax Crystal. First high level cardioid crystal microphone with Dual Frequeney Response-Flat response for wide range pi:k-up (output -57 db ) or rising characteristic for extra crispness of speech (output -50 db ). Hii-Z; fully enclosed Metal Seal crystal. Built-in MCl connector. Onooff switch. Size $21 / 2^{\prime \prime} \times 27 / 8^{\prime \prime} \times 61 / /^{\prime \prime}$, including stud. Net wt. 1 lb .2 oz .

## DIFFERENTIAL AND SPECIAL-PURPOSE MICROPHONES

Model 6225KK Dynomic Handset. Meets rigid requirements of paging, intercom and communication services. Light weight, shock resistant, bakemagnetic receiver with response from $200-4000$ magnetic receiver wicrensen relay circui cps. Switch closes microphone and relay circuit.
Respense $100-6000$ cps. Output level -55 db . Respense 100.6000 cps. 250 utpur level -5 stallo Microphone impedance 250 ohms. Acoustalloy diaphragm. $5^{\circ}$ five-conductor unshielded colled

Model 805 Contact Microphane. For guitar, banjo, mandolin, violin or any vibrating musical instrument. Increases natural sound volume, en riches tonal effects. High impedance. Crystal sealed against moisture. Chrome finish. 15 ' cable. Net wt. 5 oz. List Price. . . . . . . . . . . . . . . . . $\$ 19.75$

Model 606 Differential* Dynamic. Close-talk ing, noise-cancelling microphone. Used in airport control towers, police dispatching, close-talking P.A. and high noise industrial applications. Response substantially flat. 100.6000 cps . Output measured at $1 / 2^{\prime \prime}-55 \mathrm{db}$. Acoustalloy diaphragm. Head at $22^{\circ}$ fixed tilt. $5 / 8^{\prime \prime}-27$ thread. Built, in $\mathrm{MC}-1$ connector. Satin chrome. Size $2^{n} \times 31 /^{n} \times$ $21 / 2^{\prime \prime}$ incl. stud. Net wt. 12 oz. Choice of 50,250 ohms or Hi-Z. Low impedances not balanced to ground. $18^{\prime}$ cable. List Price. . . . . . . . . . . $\$ 45.00$

Only ELECTRO-VOICE can offer you noisecancelling. DIFFERENTIAL microphones. By the DIFFERENTIAL principle, ambient or distant sound is fed into dual apertures in complete
phase relationship to provide virtually complete phase relation
cancellation.

Par. No. 2,350,010

Madel 600D Dynamic Mobile-Mike. Lightweight, hand held, extra-rugged. Output -55 db . Acoustalloy diaphragm. Press-to-talk switch. Size, $21 / 4^{\prime \prime} \times 2^{\prime \prime} \times 4^{\prime \prime}$. Black phenolic case with mounting bracket. 5' cable. Choice of 50,250 ohms or Hi-Z. Net wt. less cable 8 oz. Lisi Price........ $\$ 38.50$
Model 210KK Carbon. Similar to Model 600 D, but single-button carbon. Gives high intel. ligibility speech transmission. Substantially flat ligibility speech transmiss ion. Substantialy hitah. $5^{\prime}$ coiled cord. Net wt. less cable 6 oz.

## MICROPHONE ACCESSORIES

Model 366 Suspension Shock Mount Extremey light boom suspension shock mount designed for use with 666 microphone. Combined weight of 366 and 666 is 17 oz ., thus solving many problems of boorn operation. No tools required for installing microphone. Pigtail cable connection with UA-3 connectors provides cable loop isolating boom shock noises. Made for any microphone with $1^{\prime \prime}$ diameter (EV 666, 655, 646).
List Price. .
.$\$ 40.00$
Model 300 Detachoble Microphone Clomp Light weight adaptor fits any cylindrical microphone with $1^{\prime \prime}$ diameter. Provides positive means with finger operated clamp. Rubber insert prewith finger operated clamp. Rubber insert pread or adaptor for $5 / 8$ " -27 thread.
List Price.
.$\$ 10.00$
Model 420 Desk Stand. Heavy cast iron stand attractively finished in TV gray. Specifically designed for use with E.V 666, 655, 646, or microphones with $1^{\prime \prime}$ diameter. Clamp, attachment for mounting $1^{\prime \prime}$ cy lindrical microphones without tools. Heavy cast iron base holds microphone in position when subjected to ordinary strain. Net wt. 3 lbs. List Price.
. $\$ 20.00$
Madel 416 Desk Siand. For use with 646, 647 microphones. Black rubber. Size $31 /{ }^{\prime \prime}$ base diameter, $1^{17}$ high. Net wt. 2 oz.
List Price.
. $\$ 5.00$
Mode! 423-A Desk Stand. Sturdy, smartly styled, round die-cast base, 51/8" diam. Rests firmly. Rich satin chrome. Rubber base buttons. $8 / 8^{\prime \prime}-27$ thread. Choice of $3^{\prime \prime}$ or $5^{\prime \prime}$ matching stem riser. Net wt. 1 lb .
List Price.
. $\$ 4.50$
Model 427-A Desk Stond. Attractive, round die-cast base rests stably on desk or table. $5^{\prime \prime}$ stem riser. Satin chrome. Standard $5 / 8^{\prime \prime}$-27 thread. Base diam. $43 / 8^{\prime \prime}$. Net wt. 10 oz .
Lisl Price.

Madel 345 Shock Mount. Dual-type external shock mount prevents reproduction of external shock mount prevents reproduction of external shocks and stand vibrations. Permits tilting microremoved. Satin chrome. Size $11 / 2^{\prime \prime} \times 37 / 8^{\prime \prime}$. Net wt. 10 oz. List Price....................... $\$ 13.00$ Model 428 Touch-to-Talk Stand. Fits standard $5 / 9 /=27$ thread. Lever-type switch for relay operation or microphone on-off-closes or opens instantly, or locks in "talk", position, with fingerip action. Gives easy "break-in" operation in communications, P.A., paging, dispatching. SPDT switch is self-contained unit, easily removable. Satin chrome. Gray plastic switch lever with locking button. Ht. $7^{\prime \prime}$. Base diam. $51 / 8^{\prime \prime}$. Net wt. $13 / 4 \mathrm{lb}$. Lisi Price . . . . . . . . . . . . . . . . . $\$ 16.00$ Model 335 Blast Filtor. Acoustically treated, scientifically curved grille stops wind and breath blasts in dynamic microphones. Does not affect frequency response. Easily fits over head of E-V Models 630,635 and 605 microphones. Satin chrome. List Price........................ $\$ 5.50$ Madel 502 Matching Transfarmer. Transformer windings have low distributed capacity and are amply shielded against inductive hum by a shield inside a pressure cast case. Designed for mounting on a mplifier chassis or in series with the microphone line. Designed for 50,25 and 500 ohms-to $\mathrm{Hi}-\mathrm{Z}$. Broadcast fidelity. Response 40 $20,000 \mathrm{cps} \pm 1 \mathrm{db}$, for speech or music. MC. 4 input connector. List Price. . . . . . . .... $\$ 15.00$ Model 425 Deluxe Floor Stand. Button at top of shaft gives one-hand height control from $37^{\prime \prime}$ to $66^{\prime \prime}$. Locks automatically on release. Shaft can be rotated without any adjustment device. Unique locking-type adjustable legs permit stand to be placed flush against wall or speaker's table. Easy to assemble or take apart. Folds into small, compact package. Modern die-cast base. 3-leg spread 17". Satin chrome. Net wt. 71/2 lbs.

## CARTRIDGES FOR 78 R.P.M.

Model 12 Crystal. The most versatile 78 r.p.m. cartridge. 2 volt output is ideal for most phono combinations. Weighs $1 / 5$ ounce. fracks merfectly with less needle force. Ideal for "racks perfectly with less needle force. Leeal for in stock cartridges for general replacement. Sup fied with Snap-n Holder and mounting hasdware. or Webster-Electric side misunting cartridges. Model 12, with 0.3 Osmium needle. Ust. . . $\$ 7.50$

Model 32 Crystal. Provides the longest record life, lowest needle talk and greatest stylus life. Ideal for record enthusiasts with valuable libraries of 78 r.p.m. records. Frequency response to 10.000 cps . Output 1.8 volts, ussabe in most radio-phono combFations. Standard $1 / 2^{\prime \prime}$ mounting. Uses E-V whisker-type needle.
Model 32, with O .3 Osmium needle. List. ... $\$ 6.50$
Model 42 Ceramic*. The model 42 cartridge utilizes a ceramic generating element for complete moisture protection. Long-lasting in extrenty back of Mode 42 for Mounting bracket of Model 42 for mounting in tone arms with $1 / 2^{\prime \prime}$ hole centers.
Model 42, with 0.3 Osmium needle. Lisl. . . . $\$ 4.50$

## CARTRIDGES FOR 45 and $331 / 3$ R.P.M.

Model 14 Crystol. The Model 14 cartridge gets all the music from the extensed range fine groove records. Response follows professional standards ... free from peaks and disortion that mar wide range response. Response, 30 to 10 kc . A truly high दidelity phono-cartridge that requires no expensive preamplifier or equalizer Output, I volt. Uses E-V 1 -mil. whisker type neecie Model 14, with 0.1 Osmium needle. Lisl... . $\$ 7.50$ Model 14-S, with S-1 Sapphire needle. Lisl. . . $\mathbf{\$ 8 . 5 0}$

Modal 34 Crystol. The high compliance voltage product of this cartridge makes it a superb replacement for 45 and $331 / 3 \mathrm{r} . \mathrm{pm}$. players. Reproduction is fuller yet needle tra.ks with whisker touch. Records sound better and las longer. 1.25 volts output is slightly higher than average fine groove cartridge. Mounting bracket has $1 / 2^{\prime \prime}$ and $5 / /^{\prime \prime}$ hole centers. Ideal replacement in RCA-type
players. Uses E.V whisker-type 1 -mil needle. Model 34, with 0.1 Osmiumn needle. Lisf. . . . $\$ \mathbf{\$ . 5 0}$ Model 34.S, with S.1 Sapphire needle. List. . . $\$ 7.50$

Modal 44 Ceramic*. Model 44 utilizes a ceramic generating element for complete moisture protection. Makes an ideal, long lasting replacement in hot, humid climates. Output is .8 volt. Model 44 mounts in tone arms with eitler $1 / 2^{\prime \prime}$ or $5 / 8^{\prime \prime}$ hole centers.
Model 44, with O-I Osmiumt needle. List . . . . \$6.\$0 Model 44.S, with S.1 Sapphire needle. List. . . $\$ 7.50$
*Electro-Voice ceramic phono-cartridges are directly interchangeable with silent-needle-type crystal cartridges those that do not use the thumb screw). E-V ceramic cartridges have eqwivalent output to the manufacturers' original crystal types they replace.

## CARTRIDGES FOR 78, 45, $331 / 3$ R.P.M.

Model 33 Crystal. Utilizes a special needle which plays all three speeds with a single tip. Simplifes opeal ther 23 miled changers. Tracks well in all grooves. 2.3 mil tip needles. Output 125 volts needles. Jutput 78 voits on microgroove, 1.8 volts on 78 r.p.m. records. Mounting bracket has standard $3 / /^{\prime \prime}$ hole centers. Uses E-V whisker-type 2.3 mil needle.

Model 33, with $0-2$ Osmium needle. List. . . $\$ 6.50$
Model 33-S, with S-2 Sapphire needle. List.. . $\$ 7.50$

## Model 43 Ceramic\%. Model

143 utilizes a specially designed all-purpose needle which plays all three soeeds with a single tip. Ceramic generating element assures complete moisture protection. Ideal replacement for multi-speed changers in hot, humid elimates. Output is .5 to I volt. Mounting bracket holes spaced at $1 / 2^{\prime \prime}$. Model 43, with O-2 Osmium needle. Lisf. . . . $\$ 6.50$ Model 43-S, with S. 3 Sapphire needle. Lisl. . . $\$ 7.50$

Model 16-TT Crystal TWIN TILT. Plays all 3 speeds with a one-piece, twin-tip needle without weight change. Complete with Tilt mechanism. Merely tilt the selector handle to select the 1 -mil or 3 -mil needle tip... for slow or fast speed records. Output, I-volt on each tip. Exart replacement for Webcor tilt cartridges. With Osmium 3-mil tip and Sapphire I-mil tip on single E.V silent, whisker-type stylus.
Model 16-TT, List Price . . . . . . . . . . . . . . . . . $\$ 10.00$ Modal 16. Cartridge only, without Tilt mechan. ism, but with Osmium 3 -mil tip and Sapphire 1 -mil tip, for exact replacement of units already installed.
List Price.
.$\$ 9.00$
Model 46-T Coramie:* TURNOVER. Popular turnover type cartridge with sepsrate needles for fast and slow speed records. The two needles are isolated from one another allowing correct frequency response on each. "Free" needie does not cause distortion. Output, 8 volt on each needle. Positive-acting turnover mechanism pre: vents needle set-down error. Mounting plate supplied for LOD type cartridges. Complete with 3 -mil Osmium needle and 1 -mil Sapphire needle.
Model 46-T. List Price. $\qquad$ . $\$ 10.00$

Model 46. Same but without turnover hainess for installation in existing mechanism.
List Price. .
.$\$ 9.00$
Model 96-T Crystal Iurnover. Utilizes a crystal generating element. Output is 1 volt on each needle. Incorporates all construction features of 46-T
Model 96-T. List Prica . . . . . . . . . . . . . . . . . ............................. . \$10.00
Modal 96. Same but without turnover harness for installation in existing mechanism.
List Price. .
WITHOUT NEEDLE
Model 60 Cryslal Duo-volt. This Bimorpht crystal cartridge permits rasy selection of high or medium output for the job Connect leads to the two outer terminals for
volts output or to the center terminal and one outer terminal for 2 volts. On 78 r.p.m. records, output is 6 or 3 volts. No soldering. No accesscries required. Uses any standard 3 -mil, 1 -mil, or all purpose needle. $1 / 2^{\prime \prime}$ mounting hole centers. Aluminum case. Ideal for varied replacement needs. Model 60. Less needle. List Price . . . . . . . . $\$ 4.95$

Model 50 Crystal. Bimorph high level cartridge, supplied without needle. Can be used with any standard 1 -mil, 3 -mil or allpurpose tip replacement needle. Output level with straight shank is 2.5 voits. Excellent replacement in record players with low gain amplifiers and in single play phonographs. Aluminum case.
Model 50. Less needle. List Price . . . . . . . . $\$ 4.50$

# CONDENSER MICROPHONES 

## "PROFESSIONAL"

## Model CM 2001

The CAPPS "PROFESSIONAL" is designed especially for High Fidelity enthusiasts, professional musicians and recording artists. It combines the high performance standards of the CAPPS "STUDIO" microphone with economies achieved through volume production. It is supplied COMPLETE with self contained PREAMPLIFIER, POWER SUPPLY, and CABLE. Dimensions: $11 / 8$ " dia. x $6^{\prime \prime}$ long; weight: 12 ozs.

High impedance.

SETS NEW RECORDING
INDUSTRY STANDARDS

- 30-15,000 cps $\pm 3 \mathrm{db}$
- Omnidirectional
- Acoustically faithful
- Free from angular discrimimation
- Blast proof
- Unaffected by moist atmospheres

"STUDIO"
Model CM 2030-30 Ohm Model CM 2250-250 Ohm

Custom built and used by leading high fidelity recording and movie studios for the past several years, the CAPPS "STUDIO" condenser microphone is now available to all who want or must have the ultimate in acoustical transmission. Small and unobtrusive, this microphone has a quick-mount feature which allows its use either hand-held or on a microphone stand. It houses a miniature self-contained preamplifier.

Dimensions: $11 / 8^{\prime \prime}$ dia. x 6 " long. Microphone operates with Power Supply CM 3003 and Cable No. 51

## POWER SUPPLY, Model CM 3003

Designed for rugged and conlinuous operation, the CAPPS Model CM 3003 preamplifier power supply, used with the CAPPS Model CM 2030 or CM 2250 microphones assures the quality performance and dependability which is built into each CAPPS microphone.
CABLE No. 51 (not shown)
Cable connects microphone to power supply, 25 ft. long, equipped with Cannon connectors Nos. P-6-CG-11 and P-6-CG-12.

FINEST IN AUDIO SINCE 1929

## RIBBON and DYNAMIC CARDIOID

FREQUENCY RESPONSE: $\mathbf{4 0 . 1 5 , 0 0 0}$ c.p.s., plus of minus 2.5 db.

OUTPUT LEVEL: -86 db . for 50 ohms impedance (0 db $=1$ volt/dyne/cm²).
POLAR PATTERN: True cardiaid. Easily and quickly changed to bi-directional ribbon only, or omni-directionat dynomic only.
IMPEDANCE: Easily and quickly changed to 50,150 or 250 ohms.
CONNECTOR: Connon XL-3.11 "lotch-lock" connector. CABLE; 25 ft . two-conductor shielded rubber covered.
STAND COUPLING: 5"'. 27 threod on combination swivel ond "slide-lock."
DIMENSIONS: Ht. 6 ins., dia. 2 ins., wt. 20 ozs.

The PNMA cartridge is designed for use in extreme temperafure and humidity conditions. Crystal element is moisture.resistont, sealed in a metal jocket, and will withstond temperatures to 200 degrees Fohrenheit. FOR BEST RESULTS: PNMA cartridges should be terminoted into o load resistor of 5 megohms or higher. Low copacity cable from cartridge to omplifier input should be used, and should be as short os possible.

Lieensed under Potents of Western Electric Co., Inc.
E., PASADENA 1, GALIFORNIA

*Standard Series operated from test record RCA 12-5-31V.
A 15 millivalt output level is sufficient to drive most amplifiers designed for magnetic cartridges to full output.

## BRUSH MODEL BA-106 MICROPHONE

The Brush Mcdel BA-106 is a high quality microphone incorporating the hermetically sealed "Acousticel"* with Sintered bronze damping. "Metalseal" " crystal is used for protection against conditions of high humidity. This microphone offers unexcelled response in microphones of this type and price range.
Vibration, shock or low frequency wind noise do not affect the performance of this microphone.
Output level 50 db . below $1 \mathrm{volt} / \mathrm{dyne} \mathrm{cm}^{2}$.
Flat from 40 to $6,000 \mathrm{cps}$. Unexcelled for home recording, public address systems, ham shacks, monitoring and institutional and industrial applications.

Net Wt. $11 / 4 \mathrm{lbs}$.

Shipping Wt. $31 / 4 \mathrm{lbs}$.

## List Price

. $\$ 22.75$

## BRUSH MODEL BA- 109 MICROPHONE

The Brush Model BA-109 microphone using the improved Acousticel* was created for public address, home recording and amateur applications. The "Metalseal"* crystal insures long life and reliability. Styled in rich maroon plastic and brushed chrome in compliance with the recent trend in industrial design.
$\checkmark$ Response from 40 to $10,000 \mathrm{cps}$
2 Output Level 54 db . below 1 volt/dyne $\mathrm{cm}^{2}$.
$\checkmark$ Non-directional.

- High Impedance equivalent to approximately .002 mfd . ( 1.8 meg . ohms at 1,000 cycles.)
The microphone is designed for use with standard $5 / 8^{\prime \prime}$ 27 thread microphone stand.

## BRUSH MODEL "BL-2" LAPEL MICROPHONE

The improved Model BL-2 lapel microphone features virtually flat response from 30 to 10,000 cycles. Output level 57 db . below 1 volt/dyne/ $\mathrm{cm}^{2}$. Small and rugged ( $11 / 2^{\prime \prime} \times 21 / 4^{\prime \prime}$ ) the BL-2 can be used in hand or as instrument plckup as well as in lapel.
Microphone complete with $25^{\prime}$ of cable.
Model BL-2 . . . (BA-111) . . . . . . $\$ 25.00$ nist Net Wt. 8 oz .

Shipping Wt. 2 lbs .

## CRYSTAL CUTTER

## Brush Model " RC-20"

The Brush RC-20 Crystal Cutter has been designed to satisfy the demand for high quality, low cost zecordings in the home, school and studio. Dre to its inherent stiffness, the RC-20 will cut lateral type records in virtually all hard or soft disc materials. Being of simple and compact design, it is readily adaptable to all types of transcription equipment. A three watt amplifier is sufficient to satisfactorily drive the RC-20 cutter frequency response-flat within plus or minus 3 db . from 50 to $9,000 \mathrm{cps}$.
Cuts "Constant Ampliturde" without equalization, and "Constant Velocity" or other desired frequency characteristics with suitable equalization. Complete technical data sent on request. Cutter (less stylus).
Net. Wt. 4 oz., Ship. Wt. 2 lbs. Mod. BC-20 (\#385) \$25.00 list

## HUSHATONE*

## Model BA-303

A miniature, molded plastic extension speaker for under pillow use. Disc "shaped (4 $3^{31}$ " dia. by $1 \frac{1}{18}$ " thick). Makes no uncomfortable. lump beneath the pillow. Tone quality comparable to cone type speaker because of specially engineered response. Speaker gives ample output with low power consumption (.001 watt). Hermetically sealed, can be dipped into disinfecting solution (temperature not above $120^{\circ} \mathrm{F}$ ). Light weight BIMORPH* crystal drive element insures uniform response and high Sensitivity. No parts to wear, loosen, or become detached. Furnished in maroon with satin chrome trim. HUSHATONE* with $10^{\prime}$ cord.

Net. Wt. 8 oz., Ship. Wt. 2 lbs. BA-303 . . . . $\$ 13.00$ list

Brush crystal phones possess the following outstanding features:

1. BIMORPH * crystal drive element of such high impedance that line or circuit characteristics are not affected when monitored by Brush phones.
2. Wider range response with more uniform output.
3. Compensation for ear coupling.
4. Light-weight, rugged, shock-proof construction.

## HEADPHONES

## Brush Model

BA-206
Designed for use where High Fidelity and smooth frequency response are of paramount importance. They are especially applicable to broadcast monitoring, to laboratory use in the study of sound measurements, the study of sound miasuremactis, audiometry and similar exacting headphone applications. Features exceptionally flat frequency re-
sponse. Impedance of 50,000 ohms sponse. Impedance of 50,000 ohms
at 1000 cps; no transformer required. Ideal for multiple installa tion. Sensitivity is approx. 6.3 dynes $/ \mathrm{cm}^{2} /$ volt at 1000 cps . Low percentage of distortion. Designed to give your ear a smooth comfortable air-tight fit which provides an excellent bass response. The Metalseal Crystal drive element is of such high impedance that line or circuit characteristics are not affected when monitored by these phones. Available in double, single and lorgnette models:

## PRESTO 64-A TRANSCRIPTION TURNTABLE

The Presto 64-A transcription turntable offers the following features which are of major importance to the owner and operator: Unusual mechanical simplicity low mechanical disturbance . . . maximum speed accuracy . . . extreme ruggedness for long continuous operation . . . instantaneous selection of desired speed and no requirements for mechanical adjustments.

This transeription turntable is directly gear driven and employs two separate motors, one for $33-1 / 3$, and the other for 78.26 rpm . There is no friction device of any kind in the mechanism and no mechanical shift is required to change speeds. To select 33-1/3 rpm, 78 rpm or "off," the operator merely throws a three position switch. These changes may be made as rapidly as desired while the turntable is in motion with no damage to the mechanism. Only one motor at a time is in operation. The transmission "over runs" the motor which is not turning and thus does not carry it along in rotation although the stationary motor is never disengaged from the mechanism.

## SPECIFICATIONS

Standard Equipment: The $64-\mathrm{A}$ transeription turntable includes the electro-mechanical gear drive, turntable and cabinet. A reproducer and network is not included.
Speed Accuracy: No deviation from 33-1/3 and 78.26 rpm .
Noise Level: Mechanical noise originating in the equipment over. 50 db below program level.

Power Requirements: Approximately 75 watts from a 115 volt, 60 cycle line. Motors are of the 1800 rpm synchronous type and are available for other voltages and frequencies at additional cost. Mounting: Turntable and gear drive mounted in heavy wood cabinet $24 \times 24$ $\times 33$ inches ( $61 \times 61 \times 84 \mathrm{~cm}$.)

List Price, $\$ 585.00$

## PRESTO 6-N RECORDER AND 90-B AMPLIFIER

The PRESTO 6-N Recorder and $90-\mathrm{B}$ Amplifier is the ideal recording equipment for portable or stationery operation.

The $6-\mathrm{N}$ Recorder is outstanding in its suitability for broadcast stations tecause it offers all the qualifications for good recordings, including master recorss, at the nost economical price. It is ideal for the station requiring delayed broadcast of network programs, and for reference recordings.

The 6-N standard equipment inclurles the Presto 1-D cutting head, spiraling feed screw, rertical danper, time scale and pick-up. It is spiraling feed screw, vertical danner.
available for microgroove recordinglifier contains all the facilities
The Presto $90-\mathrm{B}$ recording amplation The Presto $90-\mathrm{B}$ recording amplifier contains all the facilities
necessary for operation on remote assignments, but with an overall necessary for operation on remote assignments, but with an
performance found only in biuh-firlolity studio equipment.
performance found only in bigh-firlelity studio equipment. It consists of three preamplifiers with individual gain controls,
mixer circuit, a master gain control and power amplifier. Provi sion is made for connecting the Presto $161 \cdot \mathrm{~A}$ automatic equalizer (radius compensator)
A five-position selector switch provides the following characteristics: 1 -flat response, 30 to $15,000 \pm 1 \mathrm{db} ; 2-\mathrm{NAB} 331 / 3 \mathrm{rpm}$ recording: 3 -present day $78-\mathrm{rpm}$ recording; $4-\mathrm{NAB}$ playback, and
-automatic equalization. The flat response can be modified by variable bass and treble controls, fivint emphasis up to a maximum of 20 db at 100 and 7,500 eycles per second or 20 db de-emphasis at -200 cveles per second.

Noise is 55 db below recording level and distortion at maximum output is less than $1.5 \%$.

The use of input and output selector switches makes the $90-\mathrm{B}$ mplifier unusually flexible. It permits combining the signals of three microphones or of two microphones and either one of two pickuns. By using the "Line" position, recordings can be made from an incoming program line. The output selector has three positions; playhack (public address), contisuous recording and simultaneous recording. While recording, the line jack provides a monitoring outlet or permits feeding a program line at the correct level

The correct level is monitored by means of a Weston Type 30 VU indicator with illuminated scale and its closely controlled electrical and dynamic characteristics make it an ideal volume indicator for recording.

PRESTO K-1O RECORDER FOR MICROGROOVE AND REGULAR RECORDING

The PRESTO K-10 Recorder, formerly known as the K-8, the foremost machine of its kind to be used in schools for speech, voice, most machine of its kind to be used in schools for speech, voice, GROOVE (long-playing) recording as well as the standard method

Note these features:

- Cutting pitches of 112 lines per inch Outside-in, 112 lines Inside-out, 224 lines per inch Outside-in and 224 lines per inch Inside-out.
- Standard unit is equipped for two speeds, $331 / 3$ and 78 rpm . Available for three speeds, 33 1/3, 45 and 78 rpm at additional cost.
- The cutting head is equipped with an advance ball which regulates the depth of the groove more accurately than a counter spring
- The K-10 is equipped with a turnover type cartridge having sapphire stylii for both standard and microgroove records. The cartridge is a ceramic type which has high output and is not easily affected by high temperature and humidity.
- A single control permits instant choice of recording playback, or public address. Amplifier also contains radio and monitor jacks.
The PRESTO K-10 will, when set for MICROGROOVE, record $63 / 4$ minutes on every inch of disc used. This means that a 15 minute recording with good fidelity can be put on one side of a $12^{\prime \prime}$ dise! And a half-hour can be put on one side of a $131 / 4$ " disc. Seven minutes can be recorded on one side of a $61 / 3^{\prime \prime}$ disc
Net Price of K-10, less microphone and stand................ $\$ 366.50$
* $\$ 5.00$ additional for 45 rpm pulley and record adapter.

## TL-10 PRESTO TAPE DRIVE

 Presto offers an ingenious tape transport mechanism which can be quickly installed on any
sixteen inch turntable. This mechanism derives its power from the turntable-it has no notors of its own. The present model is for tape reproduction only-no erasing or recording is included. No amplifier is provided. The equalized output of the playback head may be fed directly into standard speech input equipment.
The TL-10 Tape Drive consists of a triangular shaped cast chassis which mounts on two small posts fastened to the turntahle panel. One point of the triangle carries the tape capstan and this rests directly on the center pin of the turntable to which the TL- 10 is attached. A belt drive from the under side of the capstan rotates the take-up reel through a slip clutch. The reproducer head and guide pulleys are located on the upper side of the chassis and the equalizer network is placed below.
Two capstans are available for 15 or $71 / 2$ inches per second tape speed based on the turntable speed of 78 rpm . Rewinding is achieved by transferring the empty reel to the take-up spindle and releasing the drag on the supply spindle. Specify type of turntable when ordering

The output of the head and equalizer is sufficiently high to be fed directly into a high quality preamplifier such as found in standard broadcast speech input equipment. An unusual type of capstan is employed, consisting of a wheel, relatively large in diameter, and having a rubber rim. The tape is wrapped around this capstan $180^{\circ}$ and obtains very great traction against the rubber 日urface.

NETPRICES

$\$ 132.50$
3-SPEED MICROGROOV
\& STANDARD PLAYBACK TURNTABLE TYpe T-15
The Presto Type T-15 turntable is an unusually high quality unit for the reproduction of recordings at $331 / 3,45$ and 78 rpm . The design provides an instantaneous speed selection with a very convenient control arrangement.
FEATURES:

- Heavy cast aluminum $12^{\prime \prime}$ turntable accurately machined and balanced.
- Precision idler wheels and motor pulley.
- Good speed regulation-minimum "wow."
- Performance comparable to transcription equipment.
- May be connected to any radio or audio amplifier.

PT-920 with RA-1 Adapter In Position
Specifications
Speeds: $71 / 2$ and 15 ips . Frequency Response: 50$15,000 \mathrm{cps}$ at $15^{\prime \prime} / \mathrm{sec}$. tape speed and $50.10,000 \mathrm{cps}$ at $7 \frac{1}{2}$ " sec. Reels: 7 and $10 \frac{1}{2}$ in. Signal to noise ratio is 50 db with $2 \%$ distortion at 400 cps . Instan taneous speed variations at $15^{\prime \prime} / \mathrm{sec}$. is not more than $0.25 \%$. Microphone input impedance normally 250 ohms. Output of amplifier 15 ohms, 10 watts. Bridging ohms. 20 put of amplifier 15 ohms, 10 watts. Bridging input 20,000 ohms, unbal
40 lbs; $\mathbf{A} 920-35$ lbs.

## PT-920 TAPE RECORDER

The Presto PT-920 tape recorder has been developed for fully professional re cording work and hence no compromise has been made with qaulity of material and workmanship. The PT-920 has been designed especially for broadcast stations anil recording studios and has found wide acceptance among colleges and uni-

The PT-920 is composed of the R-7 mechanism and the A-920 amplifier.
The PT-920 may be operated with the RA-1 reel adapter which allows the use of $2400-\mathrm{ft}$. reels of tape. Every normal function and all of the wide range quality of the PT-920 are retained when using the RA-1 adapter.
The R-7 consists of a three-motor drive system, separate erase, record, and reproduce heads and two separate amplifters - one arrangement permits instantaneous monitoring of the tape. The equipment takes standard RMA $7^{\prime \prime}$ reels. Continuous recording with two mechanical sections (type $R-7$ ) and one amplifier section (A.920) may be done by interconnecting the units through the SA-12 changeover switch.

The A-920 amplifier las a single microphone input plus a high impedance bridging input. In the play back position it delivers 10 watts when used with an external speaker. Two small speakers are in cluded in the amplifier and are mounted directly behind the front panel either side of the meter. A 2 -stage amplifier provides instantaneous monitoring during recording. This is for use with high im pedance phones or to be fed into an outside amplifier.

Prices Complete PT-920 ...... $\$ 749.00$ R-7 Tape Transport Mech. .................... 425.00 SA-12 Transfer Switch $\mathbf{4 6 . 0 0}$ A-920 Amplifier ........ 324,00 RA-1 Adapter ............ 39.00

## R-11 TAPE RECORDER

The R-11 Recorder is an unusually fine mechanism which can be mounted in a relay rack, in the CS- 10 carrying case or the CC-1 console. The main panel is a heavy aluminum casting to which all other components are attached, including the Presto CDR-200 self-contained capstan drive assembly.
The three heads of the R-11 are mounted as a group and are contained in a completely closed housing. Tape is threaded by simply dropping it into the opening made by pulling forward the front cover which also holds the tape off the heads for running the tape at fast speeds.

PERFORMANCE DATA
Frequency Rexponse: $50-15,000$ at 15 in/sec. and $50-10,000$ at $7 \mathrm{in} / \mathrm{sec}$. Signal to Nolse Ratio: 50 db at $3 \%$ distortion.
Flutter: $0.15 \%$ at $15 \mathrm{in} / \mathrm{sec} ., 0.25 \%$ at $71 / 2 \mathrm{in} / \mathrm{sec}$.
Dimensions: $19^{\prime \prime} \times 14^{\prime \prime} \times 10^{\prime \prime}$. Weight: 48 lbs .

## PB-I7A TAPE REPRODUCER

The Presto PB-17A has been especially designed for playing tape on wired music systems, in industrial plants, amusement parks, skating rings, etc. The capstan is centrally placed with a half-track head on either side. Dual track tape traveling at $3 \% / 4 \mathrm{in} / \mathrm{sec}$ provides a continuous playing cycle of 8 hours. Tape reels are 14 in . diameter and hold 4800 ft . of tape. The PB- 17 mechanism reverses automatically at both ends of the tape. Frequency response is $50-8000 \mathrm{cps}$.

Price $\$ 650.00$

## 900-A3 AMPLIFIER

The 900 - A8 ampliffer (formerly 900 -A2) actually consists of separate tape recording and reproducing (monitoring) amplifiers and a common power supply. Output of reproducing amplifier is plus 20 db , 500 ohms. Three-microphone mixer is normally wired for 250 ohms.

Type $901-\mathrm{A}$ is similar to $900-\mathrm{A} 3$ except three-microphone mixer is replaced by 500 ohm transformer for line level.

## A-920 AMPLIFIER

The A-920 amplifier is a combination tape recording and reproducing
amplifier. Output is 15 ohms, 10 watts. Input is for single micro. amplifter. Output is 15 ohms, 10 watts. Input is for single microphone, normally 250 ohms. Monitoring during recording is accom-
plished through the reproduce preamplifier uaing high impedance phones. Net Price (Rack Mounting or Portable) $\$ 324.00$

## REK-0-KUT Company

## WORLD'S TWO GREATEST HI-FIDELITY PORTABLE SOUND SYSTEMS

The RHYTHMASTER is equipped with the CVS-12 Continuously-Variable Speed Iurntable.

The RECITALIST is equipped with the LP-743, 3 -Speed Turntable.

## BOTH OFFER

## 3 instruments in one * PHONOGRAPH $\star$ P.A. SYSTEM * BROADCAST RECEIVER (when used with FM Tuner)

Indispensable for Recreation Centers, Broadcast Stations, Advertising Agencies, Schools, Hospitals, Record Collectors, Musicians, Etc.
THE RHYTHMASTER AND THE RECITALIST are the only full-range portable phonographs that balance the response characteristics of amplifier, speaker and speaker enclosure. By carefully compensating the natural resonances of these three components, undesirable reverampations ure eliminated, and truly lifelike sound reproduction is achieved.
THE POLYPHONIC SELECTOR, an exclusive Rek-O-Kut engineering triumph, found only in the Recitalist and the Rhythraster, maintains THE POLYPHONIC SELECTOR, an exclusive Rek-O-Kut enginecring triumph, found only, in,the Recitalist and the Rhythraster, maintains the proper relationship between the higls and lows when the record is plaved at any valume, either very softly or very loud! Thus, the
high notes of the vislins, chimes, triansles, cymbals, etc, are always reproducerl clearly and distinctly in all their original heanty and cannot he drowned out by the loud passages of the brasses and percussion instruments.
THE RHYTHMASTER'S PATENTED CONTINUOUSLY-VARIABLE SPEED TURNTABLE plays records not only at $331 / 3.45$ and 78 R.P.M., but at ANY speed variation from 25 to 100 R.P'M. Not only will the CVS Turntable play your records back at the exact pitch and tempo they were recorded, hut also at any increased or decreased tempo to fit a particular need: *DANCING:-Set the rhythm oiz sour folk-tance, tango, rhuml) to your own taste. 太PHYSICAL EDUCATION:-Set the rhytlim most suitable for teaching swimming, exercises, etc. $\star$ MUSICIANS:-(1) You can now set the pitch of your records to your own personal interpretation of any recording (2) You can set the pitch of the record to match the pitch of vour piano or other instrument for purposes of accompaniment. $\star$ SCHOOLS:-Invaluable the pitch of the record to match the pitch of your piano or other instrument ior purposes ofracting misic, band instruments, languages, typing, dancing, gymnastics, etc. $\subset$ RECREATION CENTERS, CAMPS, COMMUNITY tool for teaching misic, band instruments, languages, typing, dancing, gymnastics, etc. 大RECR
THE RHYTHMASTER AND RECITALIST ARE BOTH "FLEXIBLE" INSTRUMENTS. (1) A microphone input enables "mixing" of live music or voice simutaneously with a recording being played. (2) Can be used as a high fidelity public addreas system. (3) By cornecting an AM or FM Tuner, these phonographs becone superb broadcast receivers.

## SPECIFICATIONS

TURNTABLE: $12^{\prime \prime}$ cast aluminum, with hardened and ground shaft. MOTOR: Constant-spred, 4 pole induction.
SPEAKER: $10^{\prime \prime}$ PM type, built to our exacting specifications with heavy Alnico $V$ magnet.
AMPLIFIER: Erequency response is controlled by Polyphonic Selector. Position No. 1-Uniform within 1 db from 50 to 15,000 cycles. Position No. 2-Bass up 4 db at 100 cycles, treble uniform above 5.006 cycles.

Position No. $3^{-}$Bass up 6 db at 100 cycles, treble uniform above 5,0013 cycles.
Position No. 4-Uniform from 50 to 3,000 cycles, increasingly sharp cut off, 14 db down at 10,000 cycles.
PICKUP: $16^{\prime \prime}$ with cual stylus cartridse. Plays up to $16^{\prime \prime}$ hroadcast transcriptions, standard commercial pressings and micro-groove records.
POWER OUTPUT: 10 watts at less than $3 \%$ total harmonic distortion.
INPUT CHANNELS-THREE: High impedance microphone, radio, phono-pickup.
INPUT GAIN: Microphone, 120 db ; phono-pickup, 80 db ; radio, 80 db ; magnetic pickup, 90 db .
OUTPUT IMPEDANCE: 6-8 olms at sueaker jack.
NOISE LEVEL: More than 50 db below rated output with all controls set at maximum
CONTROLS: Micronhone, radio-phono, Polyphonic Setector
TUBE COMPLEMENT: (2) 6SL7, (2) 6V6GT, (1) 5Y3GT plus (1) 6SC7 for magnetic pickup.

POWER INPUT: 70 watts.
CASE: Sturdy Plywood, covered with rich grey leatherette.
DIMENSIONS: $17^{\prime \prime}$ wide, $91 / 2^{\prime \prime}$ high, $211 / 4^{\prime \prime}$ deep (Closed).
WEIGHT: 38 pounds.

## Challenger De Luxe <br> PROFESSIONAL 13/4" DISC RECORDER

## FOR STANDARD AND MICRO-GROOVE RECORDING

The "Challenger," America's finest professional $131 / 4$ " disc recorder, is built to meet the respective needs of the Professional Recordist, Musician, Educator and Recording Enthusiast who wants to make permanent, professional recordings. The "Challenger" embodies the most advanced design, engineering and production techniques in the disc recording industry. The many exclusive operating features incorporated in the "Challenger" simplify and improve the art of disc recording.

## SPECIFICATIONS

1. MOTOR: Hysteresis Synchronous motor (TR-12H, described in detail on page E-8), fitted with lamitex drive pulley. Suapended in sheer shock mounts to prevent transmisssion of motor vibration.
2. RECORDING AREA: Records from $6^{\prime \prime}$ up to $131 /{ }^{\prime \prime}$ maaters.
3. SPEEDS: Simple, finger-tip speed control for instantaneous selection of speed desired - 78,45 . or $33 \% \mathrm{RPM}$.
4. OVERHEAD RECORDING MECHANISM:
(a) "LIFTOMATIC SAFETY CAM" prevents double cutting and damage to the stylus by automatically raising the cutter from the disc as it approaches the renter of the record.
(b) FACILITATES INTERCHANGING LEADSCREWS for standard or micro-groove recording.
(c) SPIRAL GROOVES: Run-in, run-out and locked grooves are made with a simple, manual operation.
5. PICKUP ARM: $16^{\prime \prime}$ with dual stylus magnetic variable reluctance cartridge. Plays up to $16^{\prime \prime}$ broadcast transeriptions, standard commercial pressinga and micro-groove records.
6. TURNTABLE: Precision machined aluminum fitted with hardened and ground shaft. Driven by two double-duty neoprene idlers running against the inside rim.
7. SPEAKER: $10^{\prime \prime}$ PM type. Custom-thuilt to rigid REK-O-KUT syecifications for extra power and wide range. Mounted into detachable cover of case.
8. CASE: Sturdy plywood covered with rich grey leatherette. Built to withstand rough usage.
9. DIMENSIONS: $25^{\prime \prime} \times 22^{\prime \prime} \times 12^{\prime \prime}$. Weight: 65 Lbs.

## R-8A UNIVERSAL RECORDING AMPLIFIER <br> (as used in DeLuxe "Challenger")

MODELS T-12H and T-43H DUAL SPEED 12" TRANSCRIPTION TURNTABLES
The REK-O-KUT Models T-12H and T-43H are the only $12^{\prime \prime}$ dual speed turntables that meet the standards for speed regulation and wow content models. The T +12 H and T -43 H are recommended for use with Hi-Fi amplifiers and performance standards equal the REK-O-KUT $16^{\prime \prime}$ broadcast SPECIFICATIONS :

1. NOISE LEVEL (a) T-12H—T-43H:50 db below average recording level.
(b) T-12-T-43: 40 db below average recording level.
2. MOTORS: (a) T-12H and T-43H - Hysteresis Synchronous.
(b) T-12 and T.43-4 pole, built to REK-O-KUT specifications.
All motors, shock mounted, are fitted with lamitex pulleys, which are pressed on, and ground concentric to the motor shaft-an exclusive REK-O-KUT feature which in. sures smooth, rumble-free operation.
3. COMPONENTS:

Turntable-Cast aluminum, machined and balanced.
Chassis-Aluminum casting, cross ribbed, flush mount. Requires a rectangular cutout for mounting. Easily installed.
Drive-Internal rim drive through doubleduty Neoprene idlers insures free, smooth and quiet operation.

Shafts-Hardened, ground and polished to
a micro-finish

- SPEED SELEECTION: Instantaneous speed shift engages either 78 .or $331 / 3$ RPM idler without stopping turntable or removing disc

5. FINISH: Grey Wrinkle
6. DIMENSIONS: Front to Back 15"; Width $13^{\prime \prime}$; Height $13 / 8^{\prime \prime}$ above motor panel and $5^{n}$ below motor panel. Weight 13 lbs.

## MODEL LP-743 - 3 SPEED 12" TRANSCRIPTION TURNTABLE

Here is the outstanding value for the discriminating buyer who seeks a quality three-speed turntable, at a moderate price. The LP-743 meets the growing demand for a good turntable which is priced between deluxe models and ordinary phono motors. Designed and dimensioned for easy replacement of obsolete motors in average consoles.

SPECIFICATIONS:

1. NOISE LEVEL: 30 dh below average recording level.
2. TURNTABLE: Lathe-turned and balanced. Made of laboratory tested aluminum casting.
3. MOTOR: 4 pole, designed for smooth, quiet, vibration-free operation, fitted with a Lamitex motor pulley.
4. SHAFT: Turntable shaft hardened, ground and polished
5. 

SPEED CHANGES: Instantaneous without stopping turntable or removing disc.
6. FINISH: Grey hammertone.
7. DIMENSIONS: Front to Back 14"; Width $12^{\prime \prime}$; Height $13 / 8^{\prime \prime}$ above motor panel; $5^{\prime \prime}$ below Height $13 / 8 "$ above motor p

## MODEL CVS-12 - CONTINUOUSLY VARIABLE-SPEED TURNTABLE Plays at any speed from 20 to 100 RPM without distortion or warble

Operates on 50 or 60 cycles. Just plug in ... no more changing of motor pulley or idler to convert from 50 to 60 cycles, or vice versa. Speeds are regulated by a simple movement of the lever to compensate for any fluctuations in line voltage or frequencies. Plays all standard and microgroove recoris as well as $16^{\prime \prime}$ professional broadcast transcriptions. Excellent for broadcast stations, dise jockeys, schools, dance studios, musicians, singers, record collectors, gymnasiums, etc. The only turn table to use in areus of fluctuating line voltage, frequency, or with portable power plant.

## SPECIFICATIONS:

1. SPEED RANGES: Continuously Variable.
(a) $110 \mathrm{~V} \cdot 60$ cycles, Range: 25 to 100 RPM . (b) $110 \mathrm{~V} \cdot 50$ cycles, Range: 20 to 85 RPM .
2. MOTOR: Constant speed, 4 pole, with cone pulley.
3. DRIVE: Exclusive VARI-CON* self-seating rim drive.
*Patent
4. TURNTABLE: 12" cast aluminum, with hard ened and ground shaft.
5. NOISE LEVEL: 30 db minimum below average recording level.

## REK-O-KUT COMPANY

## . ., for the BROADCASTER and the RECORDING STUDIO

Model B-16H

THE UNIVERSAL DEMAND for a 16-inch, 3-speed transeription turntable, specifically designed and engineered for the three popular disc recording speeds, has now been filled by the REK-O-KUT Model B-16H.

Entirely new elements of design and engineering, based upon suggestions made by leading engineers in the field, were embodied to produce this "cuthentic" threespeed turntable. As a result, all three recording speeds- $331 / 3,45$ and 78 —can be selected with equal facility simply by turning an indicator.

The B-16H is dimensioned for ready replacement of your obsolete two-speed tables in your present consoles or cabinets. Some cabinets may require slight modifications for fitting.

## ONLY COMPLETE LINE OF TAPE RECORDERS AND ACCESSORIES

Professional quality at moderate price is the big appeal of Pentron Equipment. Compare . . . see how Pentron units match the performance of costlier equipment. For Hi-Fi custom installation, or portability, Pentron will satisfy your needs - at less than you expected to pay.

## 2+1 SPEAKER TAPE RECORDER

First 3-Speaker Tape Recorder with separafe "roving speaker" adds new dimension to sound. New mobile speaker can be placed anywhere and directioned to give balanced reproduction. This unique feature creates amazing realism and sparkling voice playback. Hear this new listening thrill!

- "Roving tweeter" in lid has own volume control.
- 2 internal matched speakers for bass and middle range.
- Complete LC crossover network at 1000 CPS.
- Only 33 lbs. total weight

MODEL HT-225
with separate "Roving Speaker" \$225.00 list

## HI-FI TAPE RECORDING EQUIPMENT FOR BUDGET-CONSCIOUS

 SOUND PERFECTIONISTSPentron components give you balanced recording throughout the entire audio range. Wired ready to plug into any audio system. Units can be ordered separate or premounted in carrying case. You have a choice of a Deluxe (HFP-1) PreAmplifier or the Standard (PRE-7) Prė-Amplifier. Model $97-3 M$ Tape Mechanism is matched with both.
These are the two pre-mounted combinations.

## The prime function of your hi-fi TONE ARM

AND DEVEIOPMENT CO.. Inc., Milliard St., Manchester. Conin. Divinion of the GRAY MANUFACTURING COMPANY
Originators of the Gray Telephone Pay Station and the Gray Audograph and PhonAudograph.

GRAY EQUALIZER 6027 . . . for use with GE Cartridges. Provides in four steps various combinations of equalization required for all types of records.
GRAY EQUALIZER 603 . . . Ensures a selection of five response curves with selector switch to permit instant accommodation of either professional mode: GE or Picliering Cartridges.

MODEL 213 - The new Clarkstan 12" record arm offers the best in standard disc and micrograave reproductian. Heavy aluminum casting eliminates audible resanance point. The slide-in cartridge hoider allows instantaneous maunting of all types of standard cartridges. Silverplated, spring loaded plungers maintain pasitive electrical contact without necessity of soldering. Quick acting weight adjustment is positive and accurate for change from microgroove to standard records. Arm has adjustable height, fits all standard turntables. Vertical roller bearing and thrust ball bearing minimize cramping - no mechanical bias on the pickup. Finish grey wrinkle and brushed chrome. Net Price $\$ 22.00$

MODEL 213G - Same arm slotted to accommodate G.E. cartridge RPX-050.

Net Price $\$ \mathbf{2 2 . 0 0}$
 groove and standard recards - any size up to $17^{\prime \prime}$ diameter. Overall length of arm is $143 / 8^{\prime \prime}$. Has adjustable height for all turntable conditions. Vertical roller bearings and ball thrust bearings eliminate mechanical bias on the pickup. Attractively finished in grey wrinkle and brushed chrome.

Net Price $\$ \mathbf{2 2 . 5 0}$
MODEL 212G - Same arm slotted to accommodate G.E. cartridge RPX-050.

Net Price $\mathbf{\$ 2 2 . 5 0}$

## WIDE RANGE RV PICKUP

MODEL 201 - Clarkstan RV wide range variable reluctance cartridge for best reproduction of LP microgroove and standard records. Instantaneously replaceable and interchangeable needles. Frequency velocity responsive to above $12,000 \mathrm{cps}$. Needle force $5-7$ grams for LP microgroove, as low as 10 grams for conventional records. Output 60 millivolts. High impedance -5,50, 250 and 500 ohm models available. $1 / 2^{\prime \prime}$ mounting centers. Supplied with sapphire
 stylus. Specify $.0012^{\prime \prime}$ for LP microgroove or $.0030^{\prime \prime}$ tip radius for standard records. Tip radii of $.0015^{\prime \prime}, .0022^{\prime \prime}, .0025^{\prime \prime}$ also available. (Can also be supplied with diamond stylus of any of obove tip radii.) Net Price $\$ 15.00$

PACIFIC TRANSDUCER CORP., Los Angeles 64, California
(formerly CLARKSTAN CORP.)

## AUDIO SWEEP FREQUENCY TRANSCRIPTION

The Sweep Frequency Transcription is a new method of making instantaneous frequency response runs. It has been frequency response runs. It has been designed with all correction factors therefore no charts or graphs are therefore, no chart sweded. Befor the Tration the Sweep Frequency Transcription, the tone record was used for frequency esponse measurements on playback ystems. This method was both time consuming and laborious. If adjust ments were required, a new frequency un was required after each adjust ment. Now all that is needed is a athode ray oscilloscope and a Sweep Frequency Transcriptioh for instananeous response measurements. Only a few quick adjustments on the equalizer circuits and the job is done. For complete frequency checking of all broadeast fransmission equipment and components for production testing of phonographic reproducers, filter networks, audio amplifiers, preampliiers, tone control systems and components.
MODEL 1000A - 12" Vinylite transcription, 78 RPM, 70 to 10,000 cps. recorded flat $\pm 1 \mathrm{db}$. Net Price $\$ 6.60$ MODEL 1000D - 12': Vinylite transerip. ion, $78 \mathrm{RPM}, 5 \mathrm{KC}$ to 15 KC . recorded flat $\pm 1 \mathrm{db}$.

MODEL 100A - 16" Vinylite transcrip. ion, 33-1/3 RPM, 60 to 10,000 cps. recorded with NAs curve.

Nef Price $\$ 10.00$
MODEL 102M - $12^{\prime \prime}$ Vinylite, for mierogroove festing, $33-1 / 3$ RPM, 70 to 10,000 eps. modified NAB recording. Net Price $\$ 6.60$
MODEL 115 - audio sweep frequency film, 35 mm , positive print, variable density, 10 ft . lengths Net Price $\$ 10.00$ MODEL 116 - audio sweep frequency ilm, 35 mm , positive print, variable area, in 10 ft . lengths. Net Price $\$ 10.00$ MODEL 117 - audio sweep frequency ilm, 16 mm , positive print, variable density, in 10 ft . lengths.

Net Price $\$ 10.00$

## STEADY STATE FREQUENCY RECORDS

A series of new test records in which all the information for the engineer is annotated for both the cutfing and reproduction. In recording these records harmonic distortion was kept to the lowest possible figure. Extreme care throughout the processing cycle was used. Careful re production, using the latest techniques insures exact duplica. tion of the original recordings in each pressing. MODEL 2000S - Steady State Frequency
Record, 12" Vinylite, 78.26 RPM 50 Record, $12^{\prime \prime}$ Vinylite, 78.26 RPM 50
cps. to 10,000 cps. flat recording II cps. to 10,000 eps. flat recording if side only).

Net Price $\$ 3.90$
MODELS 20015 \& 20025 - Microgroove Steady State Frequency Record, 12** Vinylite, 33-1/3 RPM, 50 cps. to 10,000 eps. one side NAB, other side flat recording. Net Price $\$ 3.90$ MODEL 101 - Intermodulation Test Record, $12^{\prime \prime}$ Vinylite, 33-1/3 RPM, standard groove, $1 / 4$ ratio, 7 KC and 100 cps. (1 side only). Net Price $\$ 3.90$

## MODEL 260. DIAMOND STYLUS TURN-OVER PICKUP

## PICIKERING MODEL 260 DIAMOND STYLUS TURN-OVER PICKUP . . .

Inherent in the development, engineering and manufacture of the 260 Turn-Over Pickup, are the factors which have earned such a high reputation for Pickering Audio Components. . . . The 260 is now available wi:h diamond styli - diamond styli wear longer, ard prolong the life of recordings. The 260 has an output of 30 milivolts at 10 cm per second; it mounts easily in any type arm. The 260 Turn-Over Pickup may be used with the Pickering 410 Input System, 230H Preamplifier, 132E Record Compensator and 190 Arm or in any high quality playback system.

## (P) PICRERING PROFESSIONAL AUDIO COMPOMENTS FOR RECORD PLAYBACK

Models D-120M, S-120M, D-140S and S-140S, with diamond or sappiire stylus, are without equal; they produce the finest quality reproduction of lateral recordings.
MGDLLS D-120M AND S-120M are for phaying standard records and transerip ti.jns requiring 2.5 mil strli. MCDEL. D. 1405 AND S- 140 S are for long playing. microgroove records; $331 / 3$ and 45 RPM .

## THE PICKERING CARTRIDGE

## PICKERING CARTRIDGES . . .

are the choice of audio engineers throughout the world. They are universally acclaimed because of their high output, wide range performance and low distortion. They have an output of 50 milivolts at 10 cm per second and are used wherever a fine cartridge is required in radio stations, recording studios and for purposes of quality control by leading record manufacturers.

Model S-120M with .0027" Sapphire stylus . .

Model D-120M with .0025" Diamond stylus . . .
Model S-140S with .001" Sapphire stylus for long-playing MICROGROOVE recordings

Model D-1405 with .O01" Diamond stylus for long-playing MICROGROOVE recordings

Sertes 140 and 120 frequency response characteristics with various load impedance values are shown in the accompanying curves.

## THE PICKERING 410 AUDIO INPUT SYSTEM

. . . is designed to provide a complete audio control center. Model 410 may be used in any high quality playback system. Three input channels are provided-one for magnetic cartridges and 2 "flat" channels for other audio circuits. A 3 -position equalizer network is built into the magnetic cartridge channel and provides accurate equalization for LP, AES and 78 rpm recording characteristics. Separate bass and treble controls are also provided. These are of the step-type and permit bass and treble adjustments in 2 db increments. The tonse control circuits are intended to compensate for record characteristics and for listener-environment acoustical conditions. They are not intended to compensate for amplifier and/or loudspeaker deficiencies. Model 410 is intended for use with the highest quality professional type playback equipment. The output of the Model 410 is fed from a cathodefollower circuit and will work into any high quality audio or line amplifier having a high impedance input. It may also be lised with a transformer for the purpose of feeding a 500 ohm line. Because of its flexibility, low noise and low distortion level, it is ideally suited for bridging and monitoring purposes and for critical listening applications.

Playback and Tone Confrol Characteristics

## PREAMPLIFIER model 230H

## EQUALIZES THE BASS RESPONSE OF RECORDS AND TRANSCRIPTIONS AND PROVIDES THE NECESSARY GAIN FOR HIGH-QUALITY MAGNETIC PICKUPS.

The Pickering 230 H Preamplifier is designed to operate with any high-quality amplifier having a high impedance input. It is selfpowered, operates from the 115 volt AC line, and is installed by simply plugging in.
Model 230 H is unique in its accuracy of equalization, being superior to most broadcast station equipment in this respect. Further, the intermodulation and harmonic distortion is lower than good engineering practice requires in professional equipment.

The 230H Preamplifier represents the most advanced design ever achieved in phonograph preamplifiers, and like all Pickering Audio Equipment, symbolizes maximum performance.

## TECHNICAL SPECIFICATIONS

FREQUENCY RESPONSE: Within 2 db from $40-20,000 \mathrm{cps}$. Com $\cdot$ pensates for 6 db per octave loss below 500 cps . . . . OUTPUT: High impedance, 2 volts average from phonograph records. (For $500 / 600$ ohm ouiput at - 10 dbm use Pickering 600 transformer, available as accessory equipment.) . . . DISTORTION: Not moré than 0.2 percent intermodulation at normal output level. Not more than 0.4 percent intermodulation at +10 db over normal level. Not more than 1.7 percent intermodulation at +20 db over
normal level. . . HUM LEVEL: -56 db below maximum signal. . . INSTALLATION: Unit furnished with 6 ft . approved cord which can be connected to wall socket or amplifier. Input socket - standard type; matching plug furnished with unit. Output - terminal strip. Rubber shock mounts provided. DIMENSIONS, WEIGHTS AND TUBES: Size of preamplifier: $71 / 2$ inches long. $31 / 2$ inches deep and $45 / 8$ inches high. Weight: 2 lbs. 6 oz. Tubes: 6C4, 6x4, 6AU5 (any gaod, standard brand).

## SWITCH POSITIONS

1 - European 78 - This group covers HMV, English Decca, FFRR $78^{\prime}$ s and American pressings of European recordings. 2 - London 33, Old LP - For London FFRR 331/3, old Columbia LP's and most makes of $331 / 3$ microgroove recordings made before June 1953. 3 - Old Capitol, AES - For all Capitol recordings and most domestic 78's made before June 1953. Original AES playback characteristic. 4 - A.E.S., Victor Orthophonic, Columbia, Capitol 78, 45, 33 - The new AES characteristic for all of the latest RCA Victor, Columbia, Capitol and Decca recordings 78, 45, 33. 5 - Maximum Highs, Maximum Bass - No high frequency roll off - 500 cycle bass turnover. 6 - Noisy Records - This position permits playing of old noisy records with objectionable hiss removed.

## RECORD COMPENSATOR model 132 I

## PROVIDES THE FLEXIBILITY REQUIRED TO PROPERLY EQUALIZE FOR THE DIFFERENT RECORDING CHARACTERISTICS USED BY VARIOUS RECORD MANUFACTURERS.

The Pickering Record Compensator permits proper equalization of the amplifier system to produce optimum reproduction of individual records; because all linear circuit elements are used it has no inherent distortion. This Compensator permits each individual record to offer all of its quality without compromise . . . permits getting the maximum use out of scratched and worn records. Its six positions correctly equalize for all of the established recording characteristics including microgroove and standard records, domestic and foreign.
The Pickering Record Compensator is a most important addition to any record player equipped with an amplifier system having a high gain preamplifier, such as the Pickering 230 H . It is easily installed, and like all Pickering Audio Equipment, symbolizes maximum performance.

## TECHNICAL SPECIFICATIONS

INPUT: High impedance magnetic cartricige . . . OUTPUT: To feed into high-gain amplifier which has 6 db per octave rise below 500 cycles per second, and which has an input resistance of 47,000 ohms . . . INSTALLATION: Unit can be mounted in any position (on panels up to $3 / 8$ inch thick) by means of threaded bushing. Since no power is required to operate the Record Compensator only a single connection has to be made to a suitable preamplifier. Input connection - standard socket. Matching plug furnished with unit. Maximum distance between record compensator and preamplifier input 20 inches, cable supplied . . . DIMENSIONS AND WEIGHT: Size of unit: $17 / 9^{\prime \prime}$ square by $3^{1 / 1 / a^{\prime \prime}}$ overall, less switch shaft. Weight: $6^{1 / 2}$ oz.

# PICKERING PROFESSIONAL AUDIO COMPONENTS FOR RECORD PLAYBACK 

## PICKUP ARM model 190 D

## THE ONLY ARM CAPABLE OF OPTIMUM PERFORMANCE ON BOTH MICROGROOVE AND STANDARD RECORDS.

Much distortion in playing records can be caused by an inadequate pickup arm, regardless of how good the cartridge. The most common causes of distortion inherent in the operation of conventional arms are poor tracking and excessive record and stylus wear. These undesirable qualities are a result of improper lateral and vertical moments of intertia and an incorrect relationship between the two. Further, many arms cause tracking error which creates needless distortion.

The Pickering 190-D Pickup Arm is designed to overcome the disadvantage of all conventional arms, the shortcomings of which have been severely accentuated by the advent of LP microgroove records. Extensive investigation by Pickering engineers disclosed that reproducer arms which perform well on 78 RPM phonograph records and standard transcriptions will not necessarily produce good results on LP microgroove records. In fact no commercially available arm was found which would meet all of the requirements for this type of service.
The 190-D Pickup Arm embodies all the features determined as significant and important to enable a high quality cartridge to meet the stringent requirements for playing LP records without distortion and free of record and stylus wear: 1-The ratio of vertical-to-lateral moment of inertia is as low as possible 2 -The vertical mass has been minimized in order to track any record without imposing extra vertical load on grooves. It plays badly warped records just as well as flat ones. . . 3 There is no spurious arm resonance at any frequency 4 -Pivot friction is 4-Wer than 3 gram centimeters and the bearings are rugged and trouble-free 5-The arm is statically balanced about the vertical axis to eliminate tendency to jump grooves when subjected to bumping or jarring . . . 6-Offset head reduces tracking error to less than plus or minus $21 / 2^{\circ}$ Stylus point is protected against contact with anything but the record grooves. It cannot strike the turntable mat or cener-pin. record grooves. It cannot strike the "'Urntable In addition to these it plays al size records up to the 190-D Pickup Arm features: important design considerations, the 190-D Pickup Arm features: Sensitive tracking force adjustment ... height adjustments for urntables from $11^{\prime \prime}$ to $2^{\prime \prime}$ high . . one-hole mounting and selfcontained levelling screws . Model plug-in cartridge holder arm magnetic arm rest ... Model 190D, the new and smaller arm $141 / 4^{\prime \prime}$ long, when combined with a high quality manually oper141/4" lorg, when combined with a high quality Piekering Cartridges used with the Model 190-D Arm require $50 \%$ less vertical tracking force than is required when using conventional arms.

## EQUALIZER model 163A

A loss-type equalizing network for use with the Model 161M Pickup. It is designed to compensate for most of the commonly encountered record characteristics. Position 1flat high frequency response to over $15,000 \mathrm{cps}$. Low frequency rise to give full compensation from 500 to 40 cycles. Position 2-flat high frequency response. Low frequency response approximately 5 db . below position 1. Position 3-for NAB or Orthacoustic transcriptions. Position 4-Low frequencies same as position 2. High frequencies sharply attenuated to reduce surface noise. Attenuation starts at 4000 cycles. Position 5-low frequencies same as position 1. High frequencies same as position 4. $250 / 600$ ohms output,-60 lb. Size $31 / 2 \times 33 / 4 \times 5$ inches. Shipping weight 2 lbs .

# EACH PICKERING PICKUP AND CARTRIDGE IS UNCONDITIONALIY GUARANTEED 

For Models 160 or 161 Diamond stylus of any radius
$\$ 22.50 \mathrm{Net}$

With the exception of the stylus point, all models of the Pickering Cartridge Reproducer and Pickering reproducing equipment, are covered by an unconditional guarantee provided that the unit has not been tampered with nor subjected to extraordinary abuse. Replacement diamond and sapphire styli can be installed in cartridge reproducers for the following net charges:

For Cartridge Reproducers

Special Radius Diamond for 120 and 140 Series
22.50 Net
.001" Diamond for 140 Series.

## TITONE TURNOVER CARTRIDGES

| 9980-5 | (2-sapphires) |  | $\begin{aligned} & \text { LHT PRIC } \\ & \$ 9.50 \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| 9980-5D | (1-mil diomond | 3-mil sapphire) | 34.00 |
| 9980-D | (2-diomonds) |  | \$6.00 |

TITONE TURNOVER REPLACEMENT NEEDLES

|  | UsT PRIC |  |
| :--- | :--- | ---: |
| 9987-S | (2-sapphires) | $\$ 3.50$ |
| 9987-SD (1-mil diomond, 3-mil sepphire) 28.00 |  |  |
| 9987-D | (2-diamands) | 50.00 |

Anew and revolutionary cartridge designed to provide unequalled listening enjoyment of all records, regardless of speed or groove size.
Essentially two cartridges in one. the Tatone Turnover represents the ultimate refinement of the needle change principle - only the tiny jewel tip itself is changed - thus permitting the design of a reproducer in which no nnused bit moving part can "eat up" the energy being transmitted by the needle.
Foremost among the many outstanding featnree of the new Turnover are:
Adoptobility - Because of its small size and its standard half-inch mounting centers, the new Turnover will replace and modernize most three-speed cartridge installations.
Simplicity of replocement - Since only the needie rotates. the entire needle assemblv may be readily removed or replaced
Proper proove fit - Each jewel tup is accurately polished to insnre an exact fit in the appropriate groove. thereby providing perfect coupling to the record
Superior trocking obility - The high lateral compliance not only belps reduce record wear, but permits the stylus to track even the lowest freqnencies at all speeds. and at a single low needle force
High sensitivity - The new, improved ceramic element of the Turn. over provides the unusually high output of 095 volts on the RCA 12.5.51 microgroove test record, eliminating the need for any preamplification,
Outstanding response - The wide frequency range of the new Turn over is unprecedented in piezoelectric pickups.
The curves below show the average response, without equalizers of any type, of the Turnover cartridge to the two most widely used recording characteristics. This outstanding response is pointed up in striking fashion by the dotted cnrve, showing the response of a typical competitive turnover type cartridge.

## CERAMIC—the wonder element that reproduces electrically the exact tones recorded on the disc, yet is impervious to moisture and unaffected by temperature.

# SPECIFICATIONS 

The most versatile single cartridge ever developed, providing the means for playing all speed records without need for changing needle or adjusting tracking force

With the introdiction of the Playal ceramic cartridge and the new "truncated-cone" needle, Sonotone has produced the first truly universal cartridge, able to track all groove sizes without the distortion common to the usual "compromise" 2 -mil radius needle

This new cartridge, like the Turnover, is unequalled in performance. embodying the same advanced design features that have made the name Sonotone famous.

Principal among these features are.
Adaptability - Because of its standard half-inch mounting centers and small size, the Playal may be readily used to modernize most existing phono pickup installations.

Exceltent Frequency Response - The curve below shows the smooth, wide range response of the Playal cartridge. The upper curve shows the response to the Columbia LP characteristic, the lower to that of the RCA Orthophonic characteristic.

Low Distortion - The extremely high lateral compliance combined with the unique "truncated cone" needle enables the Playal to track any groove with negligible distortion, even at the very low frequencies

High Sensitivity - New advances in the development of the ceramic element have produced a cartridge with an output of approximately I volt on microgroove records.

Easy Replacement - The Playal needle may be replaced without even removing the cartridge from the pickup arm. If preferred, a conventional I-mil or 3 -mil sapphire-tip needle may be used instead of the "truncated.cone"

| Tracking Force | 9 grams |

## Pickups for facsimile Reproduction

In One Single Magnetic Unit 33-1/3-45-78 rpm

- One, single magnetic unit and one low point-pressure for all discs.
- Replaceable Sapphire (or diamond).
- Response 20 to over $15,000 \mathrm{cps}$.
- Needle-talk practically nil.*
- Near-infinite compliance.
- Tracking phenomenal.
- Flexible plug-in connectors.
- Listening Quality - Superb.

By merely inserting the desired styli, the POLYPHASE makes possible any of the following combinations:

1. Microgroove and 78 rpm
2. Both Microgroove
3. Both 78 rpm
4. Microgroove and lateral transcriptions
5. 78 rpm and lateral transcriptions
6. Both for lateral transcriptions

Write for "ELECTRONIC PHONO FACTS"

## COMPASS-PIVOTED tonc-arms

 unquestionably, the simplest and most efficient arms yet devised.- Only THREE parts.
- Highest tracking efficiency.
- No restraint to stylus travel.
- Frontal oscillations nil.
- No springs.
- No fatigue.
- Maintains original point-pressure permanently-regardless of climatic changes.
- Greatest possible distance between stylus and vertical pivots.

## STYLUS-DISK

Trade Mark

1. Just as a fuse protects an electric circuit, the STYLUS. DISK protects your records against ruination by a worn stylus (needle). Periodic use of the STYLUS. DISK will relieve you of all worry.
2. The STYLUS.DISK gives VISUAL warning of ruinous stylus-wear . . . at its inception.
3. Will test any type of stylus, in any type of pickup-in a jiffy- $331 / 3-45 \cdot 78$.
4. Neither stylus nor the cartridge need be removed for the test.
5. The grooves may be used over and over again, until finally a defective stylus (needle) scrapes the groôve-walls-(color change). Should last for years.

STYLUS-DISK Pats. Pend.
Pointer \#39 in Weil's "ELECTRONIC PHONO FACTS" reads: "No jewel-point is permanent, be it diamond or sapphire. Tberefore, periodic checking is necessary if good reproduction and tbe records themselves are to be preserved." The great variation in durability of jewel-points (any jewel point) gives extreme importance to the ever present question:

WHEN TO CHANGE STYLUS?

## HIGH FIDELITY CUTTERS

AUDAX CUTTER H. 5 - Substantially FLAT to 10,000 cycles, Distortion about $1.2 \%$ at 1000 cycles. Fully modulates groove with input of about 18 db with 96 lines. Impedances up to 500 ohms.

AUDAX CUTTER H-4 - Substantially FLAT to 8,000 cycles. Distortion about $1.7 \%$ at 1000 cycles. Fully modulates groove with input of about 18 db with 96 lines. Impedances up to 500 ohms. List Price $\$ 125.00$

AUDAX CUTTER H-3 - Substantially FLAT to about 7500 cycles. Distortion about $2.1 \%$ at 1000 cycles. Fully modulates groove with input of about 18 db with 96 lines. Impedances up to 4000 ohms.

List Price $\$ 83.00$

AUDAX Cutters are readily interchangeable on most recording machines

# WEBSTER <br> RACINE 

ELECTRIC
WISCONSIN

MODEL AX . . . for three-speed use. Delivers .8 volts at $331 / 3$ - 45 rpm and 1.5 volts at 78 rpm with 7 grams tracking pressure. Furnished with two needles, removable twist mechanism and terminal lugs
$\$ 8.50$

MODEL BX . . . for use with R.C.A. automatic changers and Columbia players. Tracks perfectly at $331 / 3$ 45 rpm. Equipped with needle, special mounting loracket, spacers, nuts and bolts. Develops . 4 to .6 volts.
$\$ 6.50$

MODEL CX . . . single-needle cartridge for either 78 rpm or three-speed application. Use of three-mil needle makes CX a 78 rpm player. Twomil needle adapts to three-speed use. May be flange, clip, stud or bracket mounted. Delivers 2.0 volts at $331 / 3$ 45 rpm and 4.5 volts at 73 rpm .
$\$ 4.95$

MODEL FX . . . two-needle twist cartridge for three-speed application. High output cartridge developing 2.5 volts at $33 \mathrm{t} / 3-45 \mathrm{rpm}$ and 6.0 volts at 78 rpm. Shunting capacitor, furnished, adapts it to low output applications ( 0.6 volts at $331 / 3$ - 45 rpm and 1.2 volts at 78 rpmn ). Besides capacitor, $F X$ is furnished with needles and spacers. $\qquad$ $\$ 8.50$

MODEL W5 . . . for 78 rpm replacements. Three-terminal construction. Develops either 1.5 or 4.0 volts at $3 / 4$-ounce tracking pressure. Furnished with needle, rest button, extra needle screw, terminal lugs and jumper.
$\$ 5.75$

# THORENS COMPANY NEW HYDE PAEK, N. Y. 

## CD. 43 RECORD CHANGER

FEATURES:

- Motor E-53
- 12 inch turntable
- High-fidelity designed tonearm for minimum tracking error
- Two plug-in heads easily adaptable for all popular American cartridges
- Styled to add beauty to any custom installation
- Automatically intermixes 10 inch and 12 inch records, special selector for 7 inch size with all metal spindle for large hole records sold separately
- Last record shut-off, reject, repeat, and pause controls
- Muting switch
- Tonearm tracking weight adjustment screw
- Built in condenser
- Specially designed rubber shielded shock mountings

## CBA-83 AUTOMATIC RECORD PLAYER

FEATURES :

- Motor E-53
- 12 inch turntable
- High-fidelity designed tonearm
for minimum tracking error
- Two pluy-in heads easily adaptable for all popular American cartridges
- Push button control for record size
- Reject control
- Automatic shut-off switch with tonearm returning to rest position
- Muting switch
- Tonearm tracking weight adjustment screw
- Built in condenser
- Specially designed rubber shielded shock mountings NET PRICE $\$ 67.50$

## MOTOR E-53

Each THORENS unit is equipped with the direct drive, governor controlled variable speed motor E-53, world famons for its silent, rumble and wow-free operation.

CB-33 MANUAL RECORD PLAYER
FEATURES:

- Motor E-53
- 12 inch turntable
- High-fidelity designed tonearm for minimum tracking error

## Customers Prefer <br> V-M FEATURES

- Automatic Set-Down for $7^{\prime \prime}, 10^{\prime \prime}$ and $12^{\prime \prime}$ records. No controls necessary.
- Automatic Manual Operation, no extra control necessary for manual operation.
- Tri-o-matic Spindle affords positive record protection; records lowered-not dropped -on spindle shelf.
- Automatic Shutoff with all records. Tone arm returns to rest and motor shuts off.
- Completely Jamproof. All moving parts, including tone arm, may be held at any time without damaging mechanism.
- Underwriters Approved throughout, mechanically and electrically.
- Record Capacity, twelve $10^{\prime \prime}$ and ten $12^{\prime \prime}$, $331 / 8$ or 78 rpm ; fourteen $7^{\prime \prime}, 45 \mathrm{rpm}$ records. Positive intermix of any ten $12^{\prime \prime}$ or $10^{\prime \prime}$ records of same speed.

V-M Model 920 tri-o-matic ${ }^{\circledR}$ Record Changer Attachment

Beautiful deluxe automatic, 3-speed record changer at a low price. Has handsome mahogany grained plastic base; all tri-omatic features PLUS exclusive Siesta Switch that shuts off everything (including amplifier and lamp plug-in in base!) after last record plays. Model 920 plays through any standard TV or radio equipped with phono input. Has $6^{\prime}$ AC cord and $4^{\prime}$ phono cord. Size $12^{\prime \prime} \times 93 / 6^{\prime \prime} \times 7^{\prime \prime}$. Shipping wt. $91 / 4 \mathrm{lbs}$.

Men whe know all changers well buy hundreds of thousands of V-M Record Changers for their installations. Quality, exclusive features and low price enable V-M Record Changers to out-sell any other line in the world. For good steady profits today, and tomorrow, buy V-M Record Changers!

V-M tri-o-matic Model 936 HF high fidelity
Record Changer Attachment
World's first changer attachment specifically designed for high fldelity. Features die cast arm, two plug-in heads included to fit most cartridges (pre-amp. stage required with marnetic pickup). Laminated turntable, balanced, has precision-formed concentricity. Extra powerful 4 -pole, 4 -COIL motor, mut ing switch, tri-o-matic spindle and V-M 45 spindle is included. Gold base, burgundy accessories. Complete with $6^{\prime}$ AC cord, $4^{\prime}$ phono cord with plugs. Is $131 / 2^{\prime \prime} \times 131 / 4^{\prime \prime}$ x $91 /{ }^{\prime \prime}$. Shipping wt. 18 lbs ., 3 oz .

## V-M Model 935HF

Same as 936 HF less metal pan, for use with mounting board. Min. mounting space, $131 / 2^{n}$ $\times 13_{1 / 4 "{ }^{\prime \prime}} \times 1 / 2^{\prime \prime}$. Shipping wt. 12 lbs., 6 oz.

V-M tri-o-matic Model 951 Replacement Changer
Has all tri-o-matic features. Is installed as original equipment in most phono combinations. Superior quality throughout. Deep maroon finish, gold $\geq$-needle tone arm and record support arm. Complete with $42^{\prime \prime}$ AC and phono cords. Minimum mounting space, $131^{3 \prime} \times 117 /^{\prime \prime} \times 71 / 4^{\prime \prime}$. Shpg. wt. $111 / 4 \mathrm{lbs}$.

## V-M tri-omatic Model 951 GE Recard Changer

Has all the famous tri-o-matic features. Is same as Model 956GE less metal pan. 42" AC and phono cords. Rich maroon finish, gold accessories, Dimensions, 13 为" $\times 12^{\prime \prime}$

V-M 45 Spindle Accessory
Permits automatic play of up to fourteen large center-hole records Eliminates center-hole adapters Slips quickly, easily over standard tri-o-matie spindle. Shipping wt (per carton of six), 3 lbs., 2 oz.

V-M tri-o-matic Model 956 Changer Attachment
Is same as Model 951 but mounted on metal pan as wired changer to play through any standard radio or TV. Complete with $6^{\prime}$ AC cord and $4^{\prime}$ phono cord. Measures 13 友" $\times 12^{\prime \prime} \times 8^{\prime \prime}$. Shipping wt. 14 lbs., 2 oz.

## V-M tri-o-matic Model 956GE

Record Changer Attachment
Has all tri-o-matic features plus high fidelity GE twin sapphire variable reluctance cartridge (requires pre-amp. stage), constantspeed, 4 -pole motor, muting switch. Maroon finish, gold accessories. Measures 13 4/s x $12^{\prime \prime} \times 8$ \%/8". Shipping wt. 15 lbs., 2 oz.

## V-M HIGH FIDELITY

## TAPE-DISC RECORDING ASSEMBLIES

HOME-RECORDING AND PHONOGRAPH ASSEMBLIES

## TAPE-DISCRECORDING ASSEMBLY

MODEL 250
115 volts a. c., 60 cycles
List Price, $\mathbf{\$ 7 7 . 5 0}$
When connected with the proper amplifier, the Model 250 performs the following functions:

- RECORDS TAPE FROM RECORDS
RECORDS DISCS FROM TAPE
- RECORDS MICROPHONE ON TAPE
- RECORDS RADIO ON DISC
- RECORDS MICROPHONE

RECORDS M

- RECORDS RADIO ON TAPE
- plays back both tape AND DISCS
- PLAYS ANY 78 R.P.M. RECORDS

TAPE RECORDING FEATURES:
One hour recording time.
Dual track.
Fast forward and reverse.
Permanent magnet erase head. Turntable acts as flywheel giving consłant tape speed. Designed for use with $5^{\prime \prime}$ reels. Tape speed $33 / 4^{\prime \prime}$ per second. Designed for use with either plastic or paper base tape.

No tape threading - Merely place tape around turntable - Automatically drops into correct position. Due to ingenious clutch and drive mechanism, impossible to throw tape.
Mechanical interlock eliminates any possibility of accidentally erasing tape.
Equipped with a switch for recording head electrical interlock. Automatically shuts off at end of tape playback.

DISC RECORDER AND PLAYBACK FEATURES:
Cuts records up to $10^{\prime \prime}$ in diameter at 78 R.P.M.

Plays 78 R.P.M. recorded discs and all 78 R.P.M. commercial records. When pivot of arm is lifted it snaps into recording position, engages lead screw, and insures proper angle for cutting stylus.
Merely push arm down for playback.
Simple to interchange cutting stylus and playback needle.
Dimensions: Width $121 / 2^{\prime \prime}$, Length $171 / 2^{\prime \prime}$, Depth below mounting plate 4". Equipped with G.I. smooth power, dynamically balanced four-pole motor. Net weight $101 / 2 \mathrm{lbs}$. Shipping weight 14 ance.

## THE GENERAL INDUSTRIES COMPANY, ELYRIA, OHIO

# CF GENERAL INDUSTRIES © Smeooth Pouver phonocraph motors, TAPE-DISC RECORDER AND DISC RECORDERS 

Suitable for every phonograph instrument where low cost, dependable performance, compactness, light weight and quietness of operation are important considerations. GI phonomotors are even in speed and have ample power to play $10^{\prime \prime}$ and $12^{\prime \prime}$ records. Fan cooling permits use in partially closed cabinets. Designed to comply with Underwriters' Laboratories' requirements

115 volts a. c., 60 cycles
Rim drive, 2 -pole motor. Rubber insulated from both mounting plate and turntabie for quiet operation. Turntable shaft revolves with turntable, and is grooved for turntable clip. Furnished with 9 " turntable and complete with mounting plate ready for installation.
Dimensions: lengrth-31/2"; Width-2"; Depth-2" below mounting plate
lacked in individual cartons. Shipring weight-4 lbs.

MODEL LC - 78 R. P. M.
List Price, \$6.50
115 volts a.c., 60 cycles
A low-priced 78 R.P.M. 2-pole, rim drive motor suitable for installation where size and cost are prime factors. Furnished with $8^{\prime \prime}$ turntable and mounting plate ready for installation.

Dimensions: Length- $31 /{ }^{\prime \prime}$; width— $2^{\prime \prime}$; depth- $17 /{ }^{\prime \prime}$ below mounting plate. Packed in individual cartons. Shipping weight-4 liss.

115 volts a. c., 60 cycles
Heavy duty, rim drive, 4-pole motor. Rubber insulated from both mounting plare and turntable for exceptionally quiet operation. Turntable shaft revolves with tumtable and is grooved for holding clip. Retractable pin in turntable permits playing standard records without adjustment. Efficient performance is assured by positive alignment of driving pulleys, idler and turntable in one plane. Furnished with $10^{\prime \prime}$ weighted turntable and complete with mounting plate ready for installation.

Dimensions: Length— $33 / 8^{\prime \prime}$; Width- $33^{\prime \prime \prime}$; bepth- $215^{\prime \prime}$ below mounting plate. packed in individual cartons. shipping weight- 9 his.

## DUAL-SPEEDPHONOGRAPH MOTORS

MODEL DS - 45, 33-1/3 R. P. M.

## 115 volts a. c., 60 cycles

A novel $45-331 / 3$ R.PM. rim drive, 2 -pole motor. Very compact. Employs a Neoprene belt for the $331 / 3$ R.P.M. speed. 45 R.P.M. speed is obtained direct from rotor staft. Speed is changed by a simple external lever movement. Specially designed and manufactured to hold wow and rumble to a minimum for excellent reproduction of the new records. Turntable shaft revolves with turntable, and is grooved for turntable clip. Available with $8^{\prime \prime}$ or $\vartheta^{\prime \prime}$ turntable, using same mounting plate.

List Prise, $\$ 10.40$
Dimensions: Length—3 $1 / 8^{\prime \prime}$; Widih— $21 / 4 " ;$ Depth— 2 昌" $^{\prime \prime}$ below mounting plate. Furnished complete with turntable and mounting plate ready for installation. Shipping weight-4 lbs.

MODEL DM - 33-1/3, 78 R. P. M. $\quad$ MODEL DE - 45, 78 R.P.M.
115 volts a. c., 60 cycles
Novel and ingenious rim drive, 2-pole motors. Very compact. Employs a Neoprene belt for slow speeds. 78 R.P.M. speed is obtained direct from rotor shaft. Speed is changed by a simple external lever movement. Specially designed and manufactured to hold wow and rumble to a minimum for excellent reproduction of new records. Turntable shaft: revolves with turntable, and is grooved for turntable clip. Available with $9^{\prime \prime}$ turntable.

List Price, $\$ 10.40$
Dimensions: Length- $31 / 8^{\prime \prime}$; Width- $21 \mathrm{~s}^{\prime \prime}$; Depth- $27 / 8^{\prime \prime}$ below mounting plate. Furnished complete with $9^{\prime \prime}$ turntable and mounting plate ready for installation. Shipping weight-4 lbs.

## THREE-SPEED PHONOGRAPH MOTORS

## DELUXE THREE-SPEED RIM DRIVE FOUR POLE MOTOR

MODEL DSS - 78, 45, $331 / 3$ R. P. M.

115 volts a.c., 60 cycles

Model DSS Simple speed change is accomplished by shifting the idler wheel vertically to the appropriate diameter on the motor shaft for desired turntable speed. When shifting speed selector to off position, a switch turns the motor off and the idler wheel is disengaged from the motor shaft. The driving motor is of the four-pole, shaded-pole type resulting in absolute minimum of stray field radiation-ideally suited for use with all types of pickups including magnetic. Motor uses oilless bearings and motor is dynamically balanced to a fine degree.

Precision construction throughout-low friction oilless turntable bearing-radially operated shift lever- 10 inch turntable.

List Price, $\mathbf{\$ 2 4 . 5 0}$
 complete with 10 inch turntable, speed indicator dial, 45 RPM record adapter, off-on switch, and mounting plate ready for installation. Packed in individual cartons. Shipping Weight $61 / 2 \mathrm{lbs}$.

## THREE SPEED TWO POLE PHONOGRAPH MOTORS

MODEL SS - 78, 45, $331 / 3$ R. P. M.
Very compact, three-speed, phonograph motor using the vertical idler shifting principle. Idler wheel drives the turntable directly from the appropriate step on the motor shaft. Idler wheel is disengaged from motor shaft during non-operating periods. Precision construction throughout. Uses a ribbed main mounting plate to assure stability and proper relationship of all components. Rumble and wow are held to a minimum. Motor uses oilless bearing and dynamically balanced rotor. Turntable shaft revolves with turntable and is grooved for turntable clip. Available with 8 inch turntable. A 45 RPM record adapter and a speed indicator dial are furnished with each motor.

List Price, \$10.95
Dimensions: Length $5^{\prime \prime}$ —Width 4 3 $3^{\prime \prime}$ —Depth $2 \frac{15}{}{ }^{\prime \prime}$ below mounting plate. Furnished complete with turntable and mounting plate ready for installation. Packed in individual cartons. Shipping Weight 4 lbs.

Model SS

MODEL TR - 45, 78, $331 / 3$ R. P. M.
115 volits a.c., 60 cycles
Deluxe three-speed rim drive, 2 -pole motor. Turntable speeds of $331 / 3,45$ and 78 R.P.M. are secured through three separate pulleys running on oil-impregnated bearings and mounted on a turret plate. By means of a simple lever, the desired pulley is brought into contact with the idler wheel. The two pulleys not in contact with the idler wheel remain stationary. Symmetrical electrical and mechanical design results in minimum stray field and maximum performance. Ingenious locking device holds turret plate firmly in driving position at any of the three speeds. Available with $8^{\prime \prime}$ or $9^{\prime \prime}$ turntable. A 45 R.P.M. record adapter and speed indicator dial are furnished with each motor.

List Price, \$12.10
Dimensions: Length- $31 /{ }^{\prime \prime}$ "; Width— $21 / 4$ "; Depth— $28^{\prime \prime}$ below mounting plate. Furnished complete with turntable and mounting plate ready for installation. Shipping weight-4 lbe.

#### Abstract

MODEL DR - 78, 33-1/3 R. P. M. - MODEL DZ - 78, 45 R. P. M. MODEL DV - 45, 33-1/3 R. P. M.

115 volts a. c.r 60 cycles Deluxe rim drive, 4 -pole motors with a simple and positive mechanism for shifting from one speed to the other. Speed change is accomplished by means of an external push-pull lever. An ingenious mechanism raises and lowers the entire idler assembly, disengages the idler wheel from the two-diameter motor shaft and moves the idler wheel from one diameter to the other. At the slow speed the idler wheel engages the small diameter of the motor shaft; at the fast speed it engages the large diameter.

List Price, \$21.75 Dimensions: I.ength-6"; Width-5 $5 /{ }^{\prime \prime}$; Depth- $25 /{ }^{\prime \prime}$ " below mounting plate. Furnisized com. plete with $10^{\prime \prime}$ turntable and mounting plate ready for installation. Shipping weight- $61 / 2$ lbs.

## TAPE, WIREAND DISC RECORDING MOTORS

## MODEL D-10

Heavy duty 4-pole, shaded pole induction motors. $1 / 70$ H.P. Free speed: 1740 R.P.M. Maximum running torque: 11 ounce-inches.
Features include: A locating and locking arrangement for both top and bottom covers which assures high accuracy in alignment of rotor within the stator bore; new air intake; dual cooling fans and self-aligning, oil-impregrated sleeve bearings.
These high torque motors are used in practically all tape, wire and disc recorders now being manufactured.

List Price, $\$ 16.75$
Dimensions: Length- $3 \%$ "; Width- $33 \%^{\prime \prime}$; Depth $3^{\prime \prime}$ below mounting plate; Shaft diameier- ${ }^{\prime \prime}$

## HOME RECORDING AND PHONOGRAPH ASSEMBLIES

MODEL GI-R85L - LP, 78 and 33-1/3 R. P. M. with conversion spring for changing the 33-1/3 R. P. M. speed to 45 R. P. M.
$\underset{\substack{\text { MODEL GI-R90L } \\ \text { Standard }}}{\text { M }} \mathbf{7 8}$ \& $33-1 / 3$ R. P. M. - )
Model GI-R90L is the standard model which has been in the GI line for several years. It cuts 120 lines per inch, and plays back records with the standard needle pressure.
The Model GI-R8SL incorporates a dual purpose pickup cartridge and an excellent and simple adjusiment for playing the LP records and standard records. It cuts 160 lines per inch. In a separate envelope is furnished a conversion spring for changing the $331 / 3$ R.P.M. speed to 45 R.P.M. with mounting instructions printed thereon.
Both models cut records up to $10^{\prime \prime}$ diameter . . . play records up to $12^{\prime \prime}$ diameter. To shift motor from one speed to the other, merely turn the speed change dial. Beautiful walnut wood grain on steel base plate. Streamline plastic trim on pickup and cutter arm attractively engraved with legends "Reproducer" and "Recorder". Turntable recessed into well in base plate. Merely lower cutting arm over record dise to start recording. Convenient, depth-of-cut adjustment. Dynam-ically-balanced, rim drive, 4 -pole motor. Compensating switck operated by speed change dial.

MODEL Gl-R85L - LP ${ }^{\circ}$. List Price, $\$ 56.50$ MODEL GI-R90L - STANDARD . List Price, 52.00
Assembly iacludes dual speed motor; $10^{\prime \prime}$ weighted turntajle; crystal cutter; crystal pickup; compensation switch; pickup and cutter arm rests; drawn steel base plate with formed down edges. Above prices include crystal cutter.
For (M41.10) magnetic cuffer add $\$ 2.00$ each.
Dimensions: Base plate- $15^{\prime \prime}$ wide; ${ }^{111} 1^{\prime \prime}$ " front to back; helight above lower edge of base plate- $2 \pi / \%^{\prime \prime}$; depth below lower edse of base plate- $37 / 3^{\prime \prime}$. Packed in individual cartons. Shipping weight- 17 lbs.

# ALHANCE PHONOMOTORS <br> ALLIANCE MANUFACTURING COMPANY - ALLIANCE, OHIO 

## Phonomotors

New three-speed phonomotors for record players $331 / 3,45$ and 78 RPM records New single speed 78 RPM phonomotors

## General Purpose Motors

Alliance makes a variety of fractional horse-power, shaded pole induction motors to service many specific small load applications. One of the most popular is Model B. Others are used not only in the radio-phonograph and recording industry, but in a wide range of product classifications. The motors illustrated in this catalogue are standard models designed for practical utility and to meet the maximum number of mechanical and electrical requirements for motors in this class.
(Typical uses ore electronic, mechanicol, electric contrals - radio tuning and turn-table drives - disc lape and wire recorderrs - fans - heating controls - coin operated mechanisms - miscellaneous uses.)

This deluxe 78 RPM phonomotor assembly is quiet and extremely smooth in operation. It embodies all of the superior features which made the original Model 80 famous, with a new, more powerful motor.

## ALLIANCE 78 RPM PHONOMOTOR MODEL JT Low Cost - Ideal for Hi-Fi

Model JT is available with 8 inch and 9 inch turn-table diameters and has the same basic motor as used on Model JPT with turn-tables available in color choice. Also available for motor winding for use in series with 25L6 vacuum tube filament. Rotating spindle revolves with turntable. Features shockproof vibration mounting - a truly fine performing unit made to highest precision standards.

## ALLIANCE PHONOMOTORS

MODEL JPT - A completely new design. Retains all of the features of original model, which became the standard of the industry, with many added improvements. Adequate reserve power in motor. Elimination of stepped pulley reduces possibility of wow and rumble. Added neutral position on shifter lever removes drive shaft from contad with rubber tiie when instrument is not in use. Attractive plastic knob on shifter lever available in color. TURNTABLES AVAILABLE IN CHOICE OF COLORS. Furnished with plastic 45 RPM center disc. Can be furnished with winding for operotion in series with 25 L6 fube
filament if desired.. Furnished with speed indicator escutcheon plate. Same mcunting plate cut-out as single speed 78 RPM unit illustrated, thus providing greater versatility for manufacturers of phonograph equipment.

The model JPT provides unimpaired performance at all speeds. Single lever shifts and indexes speeds with freer movement. Electronic dynamically balanced rotor. Vibration-proof mountings. Minimum rumble and hum. Unexcelled speed regulation. Designed to meet U. L. requirements. Occupies minimum space. Millions have been sold.

MODEL JP - The most economicol player motor on the market. Availoble with $61 / 2^{\prime \prime}, 8^{\prime \prime}$ and $9^{\prime \prime}$ turntable diometers. Same basic motor as used on JPT model. Same mounting cutout as three speed unit illustrated. Turntables available in color choice. Also available with motor winding for use in series with 2516 vacuum tube flament. Scintered metal tip on terntable spindle revolves with record.

> ALLIANCE SINGLE-SPEED PHONOMOTOR MODEL JP

List Price
$\$ 6.05$

Deluxe unit also available. Uses rotating turntable spindle. Shock proof vibration mounting. Same mounting cut-out requirements as other units shown. A truly fine performing unit. Highest quality - lowest price.

117 volts 60 cycles, continues open rating with $65^{\circ}$ centigrade temperature rise. Motor can be supplied with internal fans for mechanical duty. Mounting hole $1 \% /{ }^{\prime \prime}$ center.

Prices vary with stack thickness

## MODEL MS MOTOR

## A LEADER FOR MANY YEARS

The Alliance Model MS motor is ideal for driving fans, timers, or other rotisseries, light loads. It is an adaptation of the quiet, smooth running motor which is used to power the Models MP8, MP9, and MP10 Phonomotors. It measures $31 / 8^{\prime \prime} \times 2^{\prime \prime} \times 13 / 4$ " not including the $7 / 16^{\prime \prime}$ long shaff extension which has an $11 / 16^{\prime \prime}$ diameter. Rotation is clockwise facing the shaft extension. Its self aligning bearings are of the porous bronze oilless type. Operating over a wide range of $A C$ voltages from 24 to 250 and frequency of 40,50 , or 60 cycles, this compact lightweight motor can be incorporated as the vital power source in all kinds of electrical and mechanical devices. Large oil wicks provide lifetime lubrication.

# ALLIANCE MOTORS GENERAL TYPES FOR SMALL LOADS 

## MODEL B Shaded Pole Induction Motor

 FOR HI FIDELITY PLAYERS FANS - RECORDERS - HEATERS and OTHER DEVICESModel B is a 4-pole shaded pole induction motor, especially adapted for such devices as fans, unit heaters, blowers, air circulators, disc, tape and wire recorders. Comes in three standard lamination stack thicknesses. The range of power is from $1 / 100$ h.p. up to $1 / 25$ h.p. Where necessary the motor can be supplied completely enclosed with oil tubes.
Important advantages for Model B are economy of operation, low induced hum, low magnetic field, cool running, flexible power range and compactness. A real Hi-Fi power plant.

SPECIFICATIONS

MECHANICAL
$33 / \mathrm{s}^{\prime \prime}$ square, with length of $21 / \mathrm{s}^{\prime \prime}$ over the end bracket for the $11 / 4^{\prime \prime}$ stack. $5 / 16^{\prime \prime}$ diameter shaft.
Porous bronze, oillness type, self aligning bearings - amply proportioned, with large oil reserves.
Semi-open or fully enclosed construction. Can be supplied with oil tubes if required.
Four No. $10-32$ bolts equally spaced for end mounting or motor can be supplied with mounting bushings on end covers.
$3 / 4^{\prime \prime}, 11 / 4^{\prime \prime}$ and $13 / 4^{\prime \prime}$ lamination stacks depending on rating required.

Max. weight - approx. 5.6 lbs. for largest stack thickness.
Single Phase, 4-pade, shaded pole induction motor with squirrel cage rotor.
Approx. 1/25 h.p. for fans - approx. 1/40 h.p. for mechanical loads without external cooling. Entire power range runs from 1/100 h.p. to $1 / 25 \mathrm{~h} . \mathrm{p}$. for semi-enclosed construction.
Starting torque approx. $\mathbf{4 0} \%$ of torque af full load rating. 1550 r.p.m. full load speed.
A. C. only - 115 valts, 60 cycles. Clockwise or counter clockwise rotation - tol reversible. Can be wound for 50 nycles and other voltages.
internal cooling fans on each end.

* Available with Diamond Tip

MILLER abbreviatians and designatians to assist in using this chart:

| MG Microgroove-Plays $331 / 3$ and 45 RPM | (M) After Miller Cat. No, designates |
| :--- | :--- |
| AG All Groove-Plays $331 / 3,45$ and 78 RPM | (S) After Mium Alloy Tip Cat. No. designates |
| STD Standard—Plays 78 RPM | (D) After Miller Synthetic Tip Cat. No. designates |
| Diamond |  |

"I" before the suffix (M) or ( $\$$ ) designates a 1 mil needle for 33-45 RPM
"3" before the suffix (M) or (S) designates a 3 mil needle for 78 RPM
A three number designation ending in " 13 " indicates an All Groove or a dual needle for playing all record speeds
The above needles are representative Miller Replacement Needies . . . Miller has a needle for every cartridge. Needles not listed supplied on request.

## Densen needles for the replacement trade

The largest, most complate line of exact replacement needles for all popular phono cartridges. Figures in point column indicate point size $1=.001^{\prime \prime}$ micro-groove for $331 / 3$ and $45 \mathrm{rpm;} 2=.002^{\prime \prime}$ for all 3 apeeds; $3=.003^{\prime \prime}$ standard for 78 ppm ; $1 / 3=$ twin needle, $001^{\prime \prime}$ and $003^{\prime \prime}$; $2.5=$ $.0025^{\prime \prime}$ transcription. Needles with sapphire points, indicated by asterisk (*), are also available with genuine dismond points; others hsve osmium points. Illustrations (except GE-11 snd S-66) are exact size. Illustrations showing .Of3" needles apply also to corresponding ool and $.002^{\prime \prime}$ stock numbers. When ordering diamond point needles, simply add " $D$ " to needle number.

## "50' Needle Disploy

Attrsctive counter display that holds $2 \dot{4}$ of the lowest priced quality phono needles on the market. Durosmium tipped needles (individually packaged)-fine for both popular and classical recordings 000000 Jensen No. 5D; per display, net. $\$ 6.00$

Concert Needle Display

Colorful counter display thst holds 13 individually packaged needles. The needles have Du. rosmium tips, and are contructed with fexible shanks o protect records. Provide full-range recording reproduction.
000000 Jensen No. 10D; per display, net $\$ 6.00$

## 1470 Needle Display (illustrated)

Contains the most populsr assortment of needles, as follows:
Beautiful plastic display with compartment for storing needles (card type packaging). In ventory control feature solves your stocking problems. All needles in this asisortment may be ordered individually in card type packaging.
000000 Jensen No. 1470
per display, net
$\$ 15.00$

1470 Display

## THE LEADING TAPE IN THE AUDIO-VISUAL FIELD

The same long years of design, engineering and production experience that have made PERMO the world's largest and oldest maker of long life phonograph needles are your assurance of highest professional standards in Permo Recording Tape and Accessories.

Permo Recording Tape is packed 12 individually boxed reels to the carton.
tall Nab hub and real pockages supplied in sturdy clath hinge type box with tray and hub boss for secure handling.

## The Quietest Magnetic Recording Wire Ever Produced!

BECAUSE-Permo Recording Wire combines a new low D-C noise wire with Lubri-Lo. Permo's exclusive wire lubrication process achieves new professional standards of high fidelity in wire recording. An improvement of fully 10 db . over competitive wires.

## Know Yaw r Needles-Know WHY Derma Needles add so much to listening pleasure.

Permometal alloys are produced from formulas which are the result of twenty-five years of continued basic metallurgical research in our Permo laboratories. Plus knowledge and experience gained from their extensive use in all phases of the phonograph industry such as coin operated phonographs, commercial recording studias, record demonstration booths, home phonographs, high fidelity equipment and many special applications.
Variations of the basic formula are used to produce the finest metal tipped needles obtainable for each type of service.

Permalite shielded jewel tips are produced from the finest synthetic Sapphire. Synthetic Sapphire is more uniform and makes a better jewel tip for phonograph needles than natural Sapphire. In addition to the suepert qualities of the jewel tip itself, each tip is uniquely mounted in metal shanks and shielded with shatter proof Permolite which is highly resistant to accidental damage.

Permo's mounting technique is unique in the needle industry and provides an overall reduction of mass and weight at the point in the moving system which is most critical.

This results in an improvement of frequency response which is extremely important-particularly to Hi -ft fans.
This patented combination of tip material, method of mounting and process of shielding makes Permolite shielded jewel needles the outstanding leader in fine jewel needles.

## च

Diamond tipped needles will retain their shape and surface condition much longer than any other kind.
If the condition of the surface and the shape of the tip is correct to start with, Diamonds will also give maximum record life.

However. the slightest imperfection of surface condition or shape will also do more damage to records than any other kind of needle.

Permopolished Diamond tips are finished to the most rigid shape specifications and then given a special "Permopolish" treatment which conditions the surface to produce minimum surface friction and recard wear.
It is not enough to use Diamond tipped needles.
Insure the life of your records by using Permopolished Diamond Tipped Needles.

## There is no substitute for Quality and Workmanship

# Scȫt Magnetic Tape 

## The acknowledged international standard of the recording industry

Rigid manufacturing standards, continuous research and testing have made "scoтch" Brand Magnetic Tape the international quality standard. More recording engineers use "scoтcн" Brand Magnetic Tape than all other brands combined. Ask for it-look for it in the distinctive plaid decorated box. The brand name "sсотсн" is your assurance of sound quality.

## SCOTiCH Magnetic Tape is available in the following types and sizes:

[^17]111 AP is supplied on $7^{\prime \prime}$ plastic reel with speciol $23 / /^{\prime \prime}$ hub. Other 1200 ft . lengths ( $7^{\prime \prime}$ reels) of tapes are supplied on new "V" slof $7^{\prime \prime}$ reels with $21 / 4^{\prime \prime}$ hubs.

## Scöïch Splicing Tape \#41

This is a pressure sensitive tape specially designed for splicing magnetic tape. Its white thermosetting adhesive will not ooze and cause sticky splices when spliced to magnetic tape. $1 / 2^{\prime \prime} \times 150^{\prime \prime}$ length on handy metal utility dispenser. Stock No. 41-1/2S . . . . . . . . . . List price $39 \$$

This is a tough $1 / 4^{\prime \prime}$ high. inapact strength paper tape that can be spliced to magnetic tape for a threading leader, identification of selections within reel, for cueing and exact timing. $1 / 4^{\prime \prime} \times 150 \mathrm{ft}$. length.
Stock No. 43-1.5. . . . . . . . . . List price 60 \$

Scöïcn Write on Labels \#48

Radio's Master - 19th Edition

## For truly fine recording and reproduction

For more than a decade, Audiodiscs have consistently maintained their position of eminent leadership in every field of instantaneous disc recording.
A superior lacquer coating, applied to the mirror-smooth aluminum base by a patented process, gives these outstanding advantages: maximum uniformity of coating, permanent resistance to humidity, longer stylus life, freedom from audible background scratch, long playback life, brilliant frequency response. and freedom from deterioration with age.

## 155 Series Miniature 7-Confact Connector

For use in the interconnection of miniature electronic equipment. Over-all diameter in cluding the retaining flange is only ${ }^{5} \mathbf{s}^{\prime \prime}$. Bodies are threaded to mrunt without external shells. Contacts are for No. 20 wire.
No. 155-352 Male Connector.
List $\$ 3.00$
List 4.50
No. 155-353 Female Connector

## BLUE RIBBON CONNECTORS <br> RACK and PANEL

These connectors feature a unique spring contact construction that provides positive contact, even under vibration, with low insertion and extraction force while maintaining high individual contact pressure. Spring menbers meet all service requireinents with a safety factor of five or more.

## QWIK Microphone Connectors

AMPHENOL QWIK Microphone Connectors are the newest, the most efficient and certainly the most attractive connectors ever offered for microphone use. Available in 3 or 4 contacts with either male or female plugs or receptacles, the new QWIKs are distinguished not only by their appearance but by their many unique electrical and mechanical features.

Of course it is the remarkable design of the QUVIKs which first catches the eye. The plugs are bullet shapedstreamlined perfectly into the deep black cord protector. The receptacles are smaller than any corresponding types yet carry out the clean appearance and sturdy construction typified by the plugs. Both the plug and the receptacie are finished in a rich satin nickle coating. The push buttons are a bright blue accent on the QWIKs. Invisible when the connectors are engaged are the brilliant gold plated contacts and the blue dielectric.

There are many utilitarian features which serve to back up the outward beauty of the QWIKs. All shell bodies are made of high grade zinc alloy-a material much stronger than microphone use demands. The satin nickle finish has excellent resistance to corrosion and has been well proved on other AMPHENOL products. The dielectric material is the famous 1-501 blue, an AMPHENOL developed compound that is also used in military AN
connectors under government specifications. Contacts are high conductivity bronze, gold plated over silver for appearance, easy soldering and indefinite shelf life. The push buttons are made of tough tenite, the same material used for such high impact applications as hammer and chisel handles. QWIKs incorporate a positive type cable clamp to supply internal cable strain relief.

All disconnection of the QWIKs is achieved by simple thumb pressure on the button. Female plugs are released from male receptacles by sliding the button on the plug forward. Male plugs are released from the female receptacle by depressing the button on the receptacle. This method of disconnection has been deliberately designed to prevent accidental disconnect. At the same time there is no hard tugging-QWIKs don't have to be worked loose. Another feature that will be enjoyed by the users of QWIKs is that all disconnection can be easily made by one hand.

## Series 75 Microphone Connectors-Single Contact

Fit almost every microphone. Standard with leading manufacturers for many years. Compact. rugged, neat. Chassis receptacles are integral parts of mucrophones usirg single conductor cable. Widely used in amplifiers, transmitters. phonoelectric devices, home recorders and similar equipment. They are also suitable for connecting various units such as PM speakers, headphones, and for theft alarms or wall type coin operated devices, etc.

In the 75 Series, plugs mate with all cable jacks and receptacles. Circuit closing contacts are the same except that they close the circuit when plug is disengaged, eliminating open circuit grid howls.

Locknut Receptacles mount in . $385^{\prime \prime}$ holes when grounding to chassis and $1 / 2^{\prime \prime}$ holes for ungrounded 2 circuit applications.

Cap and Chain

Seals open chassis units against dirt and dust. Also used with 80 Series Connectors. 75-CCC1 . . List $\$ .55$ C1.Cr.ClosedCircuit

M Male. F Female. The most popular connectors are shown in bold face type.

Series 80 Cable Connectors are designed for shielded cables; for single and two conductor coaxial cables, microphone cables; for twisted pairs, concentric lines, photo cell leads. patch cords and similar uses. Suitable for connecting model railroad equipment, pin ball games and other small electrical apparatus. Elements are high dielectric black Bakelite. Receptacles mount in $5 / 8^{\prime \prime}$ chassis holes. Maximum chassis thickness for locknut type receptacles is $11 / 32^{\prime \prime}$.

Mating families of connectors are listed in horizontal lines.

The most popular connectors are shown in bold face type.

Cap and Chain required is 75-CCC1.
M Male. F Female.

## Series 91 Microphone Connectors 3 and 4 Contacts

Some of the advantages of Amphenol Series 91 Microphone Connectors . .

- Accidental disconnections are eliminated by a positive screw-type connection.
- Incorrect insertions are impossible because connectors are polarized
- Pulling and twisting strain on soldered contacts is eliminated because a squeeze-type clamp grips cable securely after assembly.
Chassis receptacles mount in $27 / 32^{\prime \prime}$ chassis holes.
Maximum chassis thickness for chassis receptacle is $1 / 8^{\prime \prime}$.
Mating families of connectors are listed in horizontal lines.

## Amphenol Coax and Twinax RG Cables

Amphenol Coaxial and Twinax RG Cables are produced to standards surpassing military specifications for electrical performance and mechanical excellence. Conductors are centered $20 \%$ closer for Coax and $50 \%$ closer for Twinax Cables than required by "AN" specifications.
Amphenol has cables that are designed to operate efficiently at temperatures as high as $500^{\circ}$ Fahrenheit. Teflon is used as the dielectric because of its low loss, high voltage breakdown and its ability to withstand heat.

AMPHENOL's AIR-CORE Twin-Lead is a superior low-loss lead-in for UHF. It is also ideal for VHF installations requiring long lengths of lead-in.

The concentrated field of energy bet ween the two conductors is largely protected ductors is largely protected by the polyethylene. This tieid of energy is almost entirely unaffected by exterior The field of energy in ordinary flat twin-lead is largely outside and exposed to all weather conditions. Under adverse conditions, the loss of flat lead-in will be three times the loss of Tubular Twin-lead under identical conditions.

List Per 1000 ft .
300 ohm Twin-lead

## End Seal

For use with 14-271 AIR-CORE Tubular Twin-Lead. 66-213. .... List per $100 \$ 5.00$

## Twin-Lead Transmission Lines

The use of brown pigmented polyethylene dielectric assures minimum RF loss and a more constant impedance over the exceptionally long life of Amphenol Twin-Lead. This remarkable material remains flexible at $-70^{\circ} \mathrm{C}$., repels water and is unaffected by acids, alkalies and oils.

## Receiving Twin-Lead

## VHF Television Antennas

Engineered and perfected in the Amphenol Antenna Development Laboratories, the antennas illustrated and described on this page will provide unsurpassed reception of FM and VHF signals. Top-quality
materials, rugged construction and the latest in design are incorporated into each Amphenol antenna to provide perfect performance. Each antenna packaged complete with instructions for easy installation.

## UHF TELEVISION ANTENNAS

AMPHENOL makes a complete line of quality-tested UHF antennas. Each different model is designed for better performance-each performs with distinction. There are certain features common to all AMPHENOL antennas which have become accepted by dealers and servicemen as the quality values with which to judge any antenna:
high gain and fine directivity, backed up by published charts which are scrupulously honest-sturdy construction and fine materials, backed up by years of dependable service. This combination of superior electrcial and mechanical characteristics has made AMPHENOL antennas the first choice in fine antennas.

CORNER REFLECTOR is a high gain, exceptionally sturdy antenna that receives all UHF channels, 14 to 83. Single, the CORNER REFLECTOR gain reaches a high of 13 db , while stacked the gain high is almost 18 db ! Directivity patterns reveal one strong major lobe for all channels, single and stacked. Installation of the CORNER REFLECTOR is a matter of seconds and this added to its superior performance record has made the AMPHENOL model the number one CORNER REFLECTOR type on the market.
114-058 CORNER REFLECTOR
. List ea. $\$ 12.50$
114-067 CORNER REFLECTOR STACKING HARNESS
. List ea. 1.95

YAGI type UHF antennas are available in 8 custom models, each assigned to a broad channel coverage. Gain is peaked for each model to an average high of 11 db , single, and 13 db , stacked. Because each A.MPHENOL YAGI will receive so many channels so well it may well be described as the only broadbanded UHF YAGI available today. State channel or channels wanted when ordering.
114-054 YAGI. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . List ea. $\$ 5.00$
114-066 YAGI STACKING HARNESS . . . . . . . . . . . . . . . . . . . . . . . . List ea. \$1.00

BO-TY AMPHENOL UHF antenna is available single or stacked. Recently re-designed for higher gain, the BO-TY is ideal for major signal areas or fringe locations. The single BO-TY gain is as high as 8.3 db single and over 12 db stacked. Larger aluninum dipoles, better dielectric material and improved construction are all features of the re-modeled AMPHENOL BO-TY.
114-062 BO-TY including stacking rod
.List ea. $\$ 5.75$

RHOMBIC is an antenna type that offers needle-sharp directivity and extremely-high gain. The AMPHENOL RHOMBIC also features an exclusive cross-braced construction that assures long years of installation life Gain for the RHOMBIC rises to almost 14 db !
114-060 RHOMBIC
List ea. \$13.50

STACKED-V will receive VHF, UHF or both! The angle between the seamless aluminum elements need only be adjusted to provide for each frequency range. Gain and directivity of the AMPHENOL STACKED-V are unusually good for an allchannel antenna.

## CANNON PLUGS <br> CANNON ELECTRIC CO．

3209 Humboldt Street，Los Angeles，Calif．－Telephone CApirol 5－125）

Note：All illustrations are not shown in same scale reduction．

CANNON＂TYPE XK＂PLUGS AND RECEPTACLES－A quality line of Con－ nectors，same inserts and similar in design to the＂Type X＂Series，but equipped with the fast－acting，sturdy Acme threaded coup－ ling ring and therefore．ideal for use on equipment which is subjected to consid－ erable vibration and tension on cables，such as on sound trucks and other portable units． XK－1 500v；XK－3 200v；XK－4，133v service．

EXPLODED VIEW XK－4W

The Cannon Electric Type＇XL＂Connec tor combines various features found in other Cannon types into a small fitting compara－ ble only in size to the Type＂ X ＂for low level sound transmission circuits．Among the leading features are the following：（1） convenient latchlock device to hold connec tor tight；（2）lightweight；（3）polarizing means；（4）compression gland with relief spring or integral clamp．if desired；（5） streamlined design；（6）tapped metal for insert retaining screw；（7）provision for spe－ cial grounding contact and grounding to shell．Contacts are 15 －amp．for No． 14 B\＆S stranded wire in 3 contact insert；10－amp． in 4 contact insert．Various finishes are available，bright nickel being standard． Steel shell types are available with satin chrome finish．Flashover Voltage 1400－1600v． （XL Series continued on next page）
TYPE＂XK－11＂STRAIGHT CORD PLUG（With Socket Insert） Shell is of die－cast zinc，cad．plated finish．Equipped with quick－acting coupling ring．Solder pot connections are easily accessible．Takes ${ }^{3}{ }^{3}$＂to ${ }^{\circ}{ }^{9 / 2}$＂cable．Built for long，dependable service．Mates with－12，${ }^{32}$－14．

| Contacts | Capacity | Wt．Lbs． | Cat．No． | List Pr． |
| :---: | :---: | :---: | :---: | :---: |

CANNON "TYPE P" FITTINGS. Universally used in sound and allied applications. "T'ype P" Fittings include a size and type for every requirement, with a high standard of quality. All $90^{\circ}$ Plugs lave split-shell construction for quick, easy access for wiring or inspection. Splash-proof but not weather-proof. Plug and receptacle dust caps are available. Laboratory tests show an average voltage-drop of not more than 10 millivolts, with current flowing at the rated capacity. Insulating material is black phenolic which has a $0.7 \%$ absorption in 24 hours of immersion in water and a dielectric strength of 550 volts per mil at 60 cycles. Two to 6 contact inserts accommodate No. 10 B\&S stranded wire; 8 contact insert No. 14 wire. Shell designs of the P-CG-11S and P-CG-12S, cord plugs have such improvements as shorter length, new rubler bushing, improved latch and spring, integral clamp. Shell of plug material is steel, integral clamp zinc.

NEW TYPES WILL MATE WITH SAME CORRESPONDING FITTINGS AS OLD DESIGN
(P Series continued on next page)

TYPE "P-23" STRAIGHT CORD PLUG (with Socket Insart), HEAVY DUTY-Shell is die-cast zinc for severe service, but employing all features such as the latch type locking device which is standard on "Type P." It has integral clamp for $8 / 4$ " cable. Also made for $I^{\prime \prime}$ " and $5 / 8^{\prime \prime}$ cable if specified. Satin chrome finish.

# CANNON PLUGS CANHON ELECTRIC CO. 

3209 Humboldt Street, Los Angèles, Calif. - Telephone CApitol 5-1251

CANNON "TYPE O" PIUGS AND RECEPTACLES. This series consists of a line of 3 -contact oval-shaped plugs and receptacles, equipped with Latch Locking Device. Contacts are silver-plated, full-floating, nontwisting, carry 30 -amp. capacity. Solder terminals are tinned for ease of wiring. $30-$ amp. contacts accommodate No. 30 amp . contacts accommodate No. 10 B\&S stranded wire. 2400 v flashover.

CANNON "TYPE X" PLUGS AND RECEPTACLES. The "Type X" Series of small connectors offers inexpensive fittings of reliable quality for sound service, radio, public address systems and geophysical research. In addition to compactness, many exclusive Cannon features are embodied in this series, such as full floating contacts in all socket inserts. Solder fot cable comections are easily accessible. Cable glands are removable. Contacts are so positive that no latching device is needed for ordinary uses. Operating voltages $\mathrm{X}-1,500 \mathrm{v}, \mathrm{X}-3,200 \mathrm{v}$, $\mathrm{X}-4,133 \mathrm{v}$.
(X Series continued next page)

TYPE "003-42" MICROPHONE OR PANEL RECEPTACLE (with Pin Insert)-Has flat base, with two lugs for mounting with \#4-40 oval-head screws. Made of die-cast zinc, and cadmium plated.

## CANNON PLUGS CANNON ELECTRIC CO.

## 3209 Humbold Street, Los Angeles, Calif. - Telephone CApitol 5-1251

Cannon Battery Connectors shown here are limited to two plug and one receptacle types. Their major use is for connection and disconnection of battery circuits for oil field engine starting. Shells of plugs are rubber; receptacle aluminum alloy, cadmium plate finish.
For detailed drawings and data, see Battery Bulletin.

APPLICATION

TYPE "M1-4-30"' ROUND SURFACE WALL RECEPTACLES
Flange $31 / 2^{\prime \prime}$ diameter. Four mounting holes, $90^{\circ}$ apart on a $13_{2}^{\prime \prime}$ radius for \#6 oval-head screws.

## CANNON PLUGS CANNON ELECTRIC CO.

## 3209 Humboldt Street, Los Angeles, Calif. - Telephone CApitol 5-1251

The TV (IK \& LKT) connectors are used on television cameras and related equipment, and are a part of the Cannon "K" series. The assemblies with the "LK" prefix are standard " $K$ ", those prefixes with 'I.KT" have special shells and/or cable entry construction.

The R24C insert has the following arrangement of 24 contacts: 3 \#16 coaxials, 21 $=14$ contacts. Shells are aluminum alloy cadmium plated; insulators are melamine, contacts brass, silver plated.

## LKT DUST CAPS

For pin insert assemblies. Chain $63 / 4^{\prime \prime}$ long, Eyelet $11 / 2^{\prime \prime}$ dia

The Type "AN"' Series is designed and made according to specific military standards. While the outstanding feature of the "AN" series is interchangeability, the quality and design features have made it widely applicable to non-military and commercial uses. The military specification "AN" finish is cadmium plate with olive drab. The recommended commercial finish is cadmium plate only. Socket contacts are of the quality closed entry type. The "AN" connectors shown in this catalog have plastic inserts. Other assemblies are available in pressurized, environment resisting, and fireproof types. This catalog lists only " AN " connectors available from jobbers. For complete information on all "AN", and associated types, write for latest "AN" bulletin.

The Type "K" Series were developed to meet the demands for a lighter and more compact electrical circuit quick disconnect fitting for aircraft. The "K" series preceded the "AN" series, and many features of the "K" connector were incorporated into the "AN" design. Since that time, the "K" series has undergone numerous changes, improvements, and additions in both shell sizes, types and insert arrangements. $K$ 's and RK's are used on aircraft interphone wing disconnects, D.F. loops, propeller cut-out switches, transmitters, instrument panels, Geiger-Muller counters, cathode ray recorders, occillographs, fast battery chargers, television cameras, phone recorder control circuits, power circuits, potentiometers, etc.

## - lock automatically

## INTERLOCK TEST PROD COUPLERS and ATTACHMENTS interchangeable attachments lock automatically

A time saving universal testing unit, the Hubbell Interlock Coupler and attachments shown lock automatically to give a perfect low contact resistance connection- disconnect quickly and easily when desired. Attachments are instantly interchangeable, making it unnecessary to change the entire test lead when changing from one tip to another. Parts sold separately or as a unit.

INTERCHANGEABLEATTACHMENTS

## INTERLOCK TYPE "S" PLUGS and JACKS 15 AMPERE CAPACITY

CONTACT PRESSURE 28 OZS.
PULL OUT 150 LBS.
CONTACT Material: Brass with copper-nickel-silver plate.
Wire size: No. 14 to No. 18.

> Our Development Laboratory will cooperate with your engineers to adapt Interlock for your specific applications. Write to Harvey Hubbell, Inc., Interlock Dept., Bridgeport 2, Connecticut.

## CINCH SOCKETS ARESTANDARD

MOLDED OCTAL
3.5/16" MOUNTING CENTERS

Molded from high dielectric black bakelite electric black bakelite or mica-filled low loss bakelite. Solder coated brass contacts and sturdy steel press-on type saddle with 4 ground lugs. Mounts in $1^{\prime \prime}$ chassis hole.

| No. | Description | List Price |
| :---: | :---: | :---: |
| 8AB | Black | Each $\$ .17$ |
| 8AM | Mica•Filled | Each |

MOLDED OCTAL
1 $11 /{ }^{\prime \prime}$ MOUNTING CENTERS

Same as 8A series molded octal above except has clinch-on type saddle with ground lugs and mounts in $11 / \mathrm{s}^{\prime \prime}$ chas sis hole. Available in black. mica - filled bakelite, or ceramic.

| No. | Description | List Price |
| :--- | :--- | :--- |
| 8EB | Black | Each $\$ .17$ |
| 8EM | Mica-Filled | Each |
| 8E | Ceramic | Each |

RING MOUNT OCTAL
Molded from high dielectric black bakelite. Solder coated brass contacts. Used extensively on test equipment, public address amplifiers and on other apparatus where sockets are exposed. Molded keyway in side ençages key in chassis hole, preventing socket from turning. Mounts in $1 \mathrm{ha}^{\prime \prime}$ chassis hole. Crimped retainer ring is furnished with these sockets.

## CINCH CAPACITOR "PLUG-IN" SOCKETS

Motion picture, telephone, airborne radio, broadcasting equipment, electric organs, and other electrical equipment need instant replacement when failures in electronic circuits occur at the capacitor connections. Cinch "Know How" has solved this problem

Designed for use with Mallory and Magnavox l" EP type condensers. Molded from high dielectric black bakelite. Sturdy steel mounting saddle has 4 ground lugs. $11 / 2$ mounting centers. 3 recessed center contacts for extended prongs of condenser and wo outer contacts flush with surface for short prongs of condenser. All contacts are solder coated for fast, easy soldering.

[^19]

DOUBLE

## PHONO JACK

Two positive grip phono jacks mounted on $\frac{1}{18}{ }^{1 \prime}$ bakelite panel with $13^{3} \mathbf{n}^{\prime \prime}$ mounting centers. Jacks are spaced on $1 / 2^{\prime \prime}$ centers. Panel is $11 / 2^{\prime \prime} \times 1 / 2^{\prime \prime}$. Used on recording units, receivers, etc Use Cinch No 13A phono plug with this jack.
No. List Price
81B Each $\$ .21$

SHIELDED EXTENSION JACK OAZSINCH

Cadmium plated brass shell $27^{70^{\prime \prime}}$ long with black bakelite insert providing insulation for solder coated brass positive arip contact. Use Cinch No. 13E Phono plug with this jack.

List Price
81E Each \$ . 32

## CINCH BATTERY PLUGS

## EQUIFLEX ALL METAL VIBRATION ISOLATORS

Equiflex Vibration Isolators consist of a double array of springs arranged to form two opposed cones, the springs serving to join the outer plate member resiliently to the inner tubular member. Within the two cones of multiple springs there is $a$ damper consisting of two floating metal stampings held apart by an internal compression spring. The damper serves to keep the amplitude at resonance within safe limits. The mounting incorporates safety rebound washers attached to each end of the inner tubular member, thus taking care of overload and shock conditions and keeping the equipment within proper limits.
With this type of construction, vibration is controlled both vertically and horizontally at the rated load the mounting deflects ${ }_{16}$ " (within a tolerance of zero to $10 \%$ ), whether the load is placed in the apial or the radial direction-vertically (either up or down), laterally (sideways, fore and aft, or diagonally), with the spring rate linear up to $1 / 8$ " deflection. The spring rate then stiffens slightly up to the maximum movement. The safety washers are designed to provide additional spring deflections when the mounted equipment is subjected to shock loads.
These units are made of steel finished in cadmium with a dichromote dip and will withstand a 100 hour salt spray test. Mcuntirgs will withstand 15G shocks without damage and will keep equipment captive up to 30G's. Two types of mounting are available. Square Plate Mounting and Circular Cap Mounting as illustrated.

FOR ANTENNA
LEAD-IN and 8 CONTACT ROTOR
This Wall Plate uses a Jones S-302-AB for the antenna lead-in and a S-308-AB for the rotor leads. Used with Cornell Dubilier, Crown, Radiant and other rotors having up to 8 wires. We suggest using a P-302FHT and P-308-FHT for this unit.

List Price Ea. \$2.51

## SERIES 101 PLUGS

The entire No. 101 Series of Plugs are identical with the exception of the cable ferrule which is furnished in four sizes as listed below. All metal parts are of brass. These Plugs fit all of the No. 101 Series Sockets. Assembly meets Navy
 Specifications. A low loss Plug and Socket ideal for high frequency connections.

The No. 101 Series Sockets are furnished in three types as shown below. Base is of Brass, Nickel Plated with Chrome Flash. Brass contact is Silver Plated. Insulation of low loss natural color XXX Bakelite. Meets Navy Specifications. The S-101-D is similar to the S-101 except that the Bakelite is recessed in the base. S-101-D Nod. is the same as S-101-D except that two sides of the base are milled as shown. Mounting Holes No. 101 -No. 41 drill on $\frac{11}{16}{ }^{\prime \prime}$ centers. Mounting holes No. 101-D and 101-D Mod. No. 30 drill on $\frac{13{ }^{\prime \prime}}{16}$ centers.

## SERIES 201

## PLUGS

The No. 201 Series Plugs are of the same design as the No. 101 but are of heavier stock and larger. Made in one size only with $3 / 8^{\prime \prime}$ ferrule. All metal parts are of Brass, same finish as No. 101 Series and Wax Impregnated Ceramic insulation. Overall length $1 \frac{9}{16}{ }^{\prime \prime}$. Prong diameter $\frac{5}{32}{ }^{\prime \prime}$. Fits only the 201 Socket.

## SOCKETS

The 201 Socket is similar to the S-101-D except larger. Brass base is nickel plated with Chrome Flash. Brass contact is Silver Plated. Insulation is of low loss natural color XXX Bakelite. Both Plug and Socket meet Navy Specifications.
Mounting holes - No. 30 drill on 1" centers.

$3 / 4^{\prime \prime}$ "-27 thread.

## SERIES 202

## PLUGS

## SOCKETS

The 202 Series Plugs and Sockets are made in two contacts only. Metal parts are of Brass with burnished Cadmium Plate. Insulation is of Molded Bakelite. Phosphor Bronze "Knife Switch" type Socket Contacts engage both sides of flat Plug Contacts-double contact area. Formed Fibre linings in caps. Polarized. Knurled nut has $3 / 4^{\prime \prime}-27$ thread.
Socket Mounting Holes. No. 30 drill on $l^{\prime \prime}$ centers.
The S-202-CCT-THR has been added to this series and when used with the P-202-CCT will make an ideal mictophone
 Plug)
P-202-FHT- $\$ 0.72$
(Same as above less Cable Clamps)

S-202-B- $\$ 1.05$
(Socket for Base
Mocg.)
S-202-FHT- $\$ 0.74$
P-202-B- $\$ 1.02$
(Same as ajove
(Same except Socket) except with Plug)

S-202-CCT-THR-\$1.21 (as shown above) Used with P-202-CCT as an extension connection

Small in size with good separation between contacts. Made in sizes of 2 to 33 contacts. All Plugs and Sockets are polarized so that Plugs of one size cannot fit into Sockets of another size. Body of Molded Bakelite. Phosphor bronze "knife-switch" type Socket contacts engage both sides of flat Plug contacts-double contact area. Plug prongs are $5 / 32^{\prime \prime}$ wide by $3 / 84^{\prime \prime}$ thick. Formed metal caps are finished in Black Crystal. Fibre linings for caps
are also formed. Plugs and Sockets arranged for either cap or panel mounting. Two contact Plugs and Sockets are round as shown at the right, all others are rectangular. Illustrated are the P-302CCT and S-302-AB. Standard 24 to 33 contact Plugs have a special long polarizing pin in approximate center position to assist in correct insertion and removal.

## General Specifications

Made in 2, 4, 6, 8, 10 and 12 contacts. All Plugs and Sockets are polarized. Body of molded Bakelite. Phosphor bronze "knifeswitch" type Socket contacts engage both sides of flat Plug Contacts-double contact area. Plug prongs are $1 / 4^{\prime \prime}$ wide by $\frac{1}{1}{ }^{\prime \prime}$ thick. Caps are finished in Black Crystal and equipped with fibre lining. Plugs and Sockets arranged for cap or panel mounting.

Note: Standard angle brackets cannot be attached to S-402-AB due to narrow block and insufficient material for screw threads. A special bracket is supplied (Type 46) See illustration. The Socket fits into this bracket which is attached to panel.

Check the No. 2400 Series Plugs and Sockets listed on pages F-42 and F-43 which are similar to the 400 Series except their design increases the creepage distances and therefore can take higher voltages.

S-402-AB (No. 46 Bracket)

The 2400 Series Plugs and Sockets are designed for highest electrical and mechanical efficiency, and although they carry the same rating as the 400 Series, they will actually handle considerably higher currents due to their improved construction.
An entirely new type of socket contact has been designed. Four individual flexing surfaces make positive contact over practically their entire length. Note in the illustration how they exert maximum pressure at every point. Also note unique method of anchoring terminals in the block-they cannot be moved up or down.
This design provides greater contact surface, increased pressure, with smoother action.
Socket contacts are of phosphor bronze, cadmium plated. Male contacts are of heavy brass $1 / 4^{\prime \prime} \times \frac{1}{11^{\prime \prime}}$, cad. mium plated.

Solder connecting side of Plug Body showing Recessed Pock ets with Barriers around contacts. Plug contacts are also in Recessed Pockets on opposite side.

Solder connecting side of Socket Body showing Recessed Pockets with Barriers around contacts. Socket contacis a:e a!so in Recessed Pockets on opposite side.

The contact to contact, and contact to ground distance has been considerably increased by mounting the contacts into recessed pockets with a Bakelite barrier surrounding and extending above. This method is used on both the top and bottom sides of both plugs and sockets, greatly increasing the leakage path.
The outside dimensions of corresponding plug and socket bodies are the same and can, therefore, be changed from brackets to caps, or vice versa.
Two styles of brackets are furnished "SB" (shallow bracket) for flush mounting and "DB" (deep bracket) for recessed mountirg. Caps are furnished with flared hole in top or end, or with cable clamps in top or end. Unless otherwise specified the following size cable entrance holes will be supplied:

$$
\begin{array}{lll}
2402-3 / 8^{\prime \prime} & 24 C 6-\frac{7}{18}{ }^{\prime \prime} & 2410-\frac{\theta^{\prime \prime}}{10^{\prime \prime}} \\
2404-1^{\prime \prime} 6^{\prime \prime} & 2408-\frac{9}{16} 6^{\prime \prime} & 2412-5 / 8^{\prime \prime}
\end{array}
$$

As noted above, the 2400 Series is furnished in 2, 4, 6, 8, 10 , and 12 contacts. All plugs and sockets are polarized.
Plug and socket bodies are of molded Bakelite. The fibre linings in the caps are the same for both plugs and sockets. A shoulder extends around the face side of plug and socket presenting a finished appearance when mounted in bracket or cap.
On account of this shoulder extending around the entire face of the body blocks, angle brackets cannot be used with the 2400 Series Plugs or Sockets.
The entire 2400 Series is interchargeable with the 400 Sories as 2400 Plugs fit corresponding 400 Sockets, and 400 Plugs fit corresponding 2400 Sockets.

## CNCH-JONES SALES • DIVISION OF CINCH MANUFACTURING CORPORATION

## "500" SERIES PLUGS AND SOCKETS

Designed for 3,000 volts and 25 amperes per contact. Circuit characteristics, however, may alter this rating one way or the other.
Long leakage path from terminal to terminal, and terminal to ground. Contacts are brass and phosphor bronze, silver plated. Metal parts of caps and brackets are steel, parkerized (rust-proofed). Plug and socket blocks are interchangeable in caps and brackets.
All sizes are polarized in a manner to prevent a smaller plug being inserted in a larger socket. Thus different sizes may be used on one installation without danger of making wrong connections.
Extreme care has been taken to make terminal connections under cap very accessible both for original wiring and subsequent inspection. The cap is insulated with canvas bakelite. Plug prong cross section $\frac{5}{16}{ }^{\prime \prime} \mathrm{x} \frac{3}{32^{\prime \prime}}$.
IMPORTANT: For safety with high voltages DEEP BRACKETS should always be used on one plug or socket, when the other plug or socket has a CAP. SHALLOW BRACKETS are for use only in connecting two units, each unit having plug or socket with SHALLOW BRACKET.

(Socket with Deep Bracket)

## LOCKS FOR 500 SERIES PLUGS AND SOCKETS

No. 500-L Locks
Locks shown above are used in connection with any DEEP BRACKET and cap combination.

The locks securely hold the units together, but they can be released instantly.
The mounting plates are made to fit all DEEP BRACKETS, and are fastened by the same screws or rivets that hold the deep brackets to the panel. Can not be used on shallow brackets. Sold in pairs only.

S-506-CE
(Socket with Cap)

P-506-DB
(Plug with Deep Bracket)

Cable entrance: Because of the great variation in type and size of cables, we have considered it best not to supply cable clamps of any kind. The cap end is made to accommodate standard EX clamps which may be obtained at any electrical jobbing house. The cap end will be furnished with round hole from $1 / 2^{\prime \prime}$ diameter and $11 / 4^{\prime \prime}$ diameter in steps of $1 / 8^{\prime \prime}$. if the size required is given on order. If no size is given, plain cap end with center punch locating center will be shipped.

## BARRIER TYPE TERMINAL STRIPS

Increased insulation is provided by having Barriers placed between each Terminal. These Barriers follow around the edge of the Strips and terminate at the base. They not only make a long leakage path but prevent direct shoris from frayed wires at the terminals. Mounting holes are at the ends as illustrated. The base is molded Bakelite. The Eyelets and Binder Screws are of brass, nickel plated. The $3 / 4 \mathrm{~W}$ or Y terminals are of brass, hot tin finish.

## FANNING STRIPS FOR CONNECTING TO BARRIER TERMINAL STRIPS

Jones Fanning Strip Terminals are of . $032^{\prime \prime}$ Brass. Cadmium Plated. The Bakelite strips are furnished with a hole in either the right or left end for fastening the cable with a cable clamp or lacing twine. Simplilies cable or harness wiring, assuring positive connections. Makes replacement of units an easy matter and assures correct connections after servicing.

No. 6-160.L

## ELCO SALES COMPANY, "M" STREET BELOW ERIE

Elco Varicon Miniature-Connectors provide the simplest, quickest, most positive means for connecting electronic or electric circuits. Varicons introduce "Keying Control", making it impossible to connect unmatched parts. Contact combinations in any number demanded by your specific needs are possible with Varicons; and any connector may be assembled by you or us from stock parts.

Prices below are for Varicons in General Purpose rnunuac. Varicons are alse available in Low-Loss Mica Phenolic, Alkyd, and General Purpose Phenolic in assorted colors, prices for which will be furnished upon request. For general specifications of All Varicons, rafer to description beneath Connector Kit at lower right hand corner of this page. For any other information regarding these "Miniature Connectors that work like Giants", your inquiry will meet with our immediate reply.

## TRANSISTOR SOCKET

SM3. Low loss phenolic casting (Grade MTS-E-4 per Jan P14) three contacts of beryllium copper silver plated tin dipped to facilitate soldering. Supplied with push on mcunting bracket. List, ea. \$0.46

## SUBMINIATURE SOCKET \& SHIELD

SM-3. Rectangular low loss phenolic ccsting (Grade MTS-E-4 per Jan P14). Three contacts of beryllium copper silver plated tin dipped to facilitate soldering. Supplied with mounting bracket.
SM-5. Same as above but with 5 contacts. List, ea. $\$ 0.47$
SM.6. Same as above but with 6 contacts. List, ea. . 54 SM-7. Same as above but with 7 contacts. List, ea. . 56 SM.8. Round subminiature socket made of the same low loss phenolic as the rectangular sockets. Nickel plated saddle for mounting. SH-1. Brass nickel plated round metal shield for SM-8 socket.

## PRINTED CIRCUIT SOCKET

## UHF SOCKET

Specifically designed socket for UHF applications requiring low inductance and low capacitance.
UHF.1. Recessed sccket for under chassis mounting. List, ea, \$0.36
UHF-2. Top chassis mountirg. List, ea. \$0.30 UHF3. Bottom chassis mounting. List, ea, $\$ 0.30$

## SHOCK MOUNTED SOCKETS

1316. Special designed shcck mounted socket for elimination of vibration and micrcphones. Mounting made of soft resilient rubber $1 / 8$ spacing. Available in 7 pin.

List, ea, $\$ 0.50$

1315. Special cesigned shock mounted sockel for elimination of vibration and microphonics. Mounting spring of grade C Phosphor Bronze. Available with 9 pin miniature scckel. 11/8 mounting centers. List, ea. $\$ 0.27$

List, ea. $\$ 0.46$

List, ea. \$0.65
List, ea, \$0.18

PC-7. 7 pin general purpose phenolic miniature sccket for printed ard elched circuit requirements. Rapid mounling with snap action contacts to secure sccket. Availuble with long strap for grounding tube shield.

List, ea. \$0.22
PC-9. Same as above but with 9 pin socket.

List, ea. \$0.34
HIGH VOLTAGE SOCKETS

9 pin general purpose phenolic miniature socket for center mounting or for direct mounting on the high voltage filter condenser.

HU-1. Availabie with $6 / 32$ outside thread. List, ea. $\$ 0.33$
HU-2. Available with $8 / 32$ cutside thread. List, ea. . 28

021.HV. Oclal sccket for use in high voliage circuit with 1B3 tube. Laminated bakelite with steel yoke that holds spring steel corona ring.

List, ea. $\$ 0.47$

## EBY SALES COMPANY of NEW YORK

## TURRET SOCKETS

Widely recognized for their usefulness in simplifying wiring and sub-assembly work. Space-saving and economical, lead lengths are reduced to a minimum thereby reducing capacitance. Available with 7 and 9 pin mica-filled miniature sockets. Spacer is brass cadmium plated; terminals are brass, silver plated; base is phenolic.

## SPEAKER CONNECTORS

Made of general purpose bakelite, plug is one piece construction, with protective flange that prevents touching of live contacts. Female is supplied with separate contacts for rapid assembly.

Above with wire leads available on request.
PHONO CONNECTORS
Designed for use in combining radio and phonograph sections of instrument, made of general purpose bakelite. Female is supplied with separate contacts, for use with 2,3 or 4 prong male.
75-2M 2 Prong Male
75-3M 3 Prong Male
75.4M 4 Prong Male
57-4F 4 Contact Female

## UNIVERSAL TYPE

Designed to give the added convenience of a banand plug connection. The brass bushing is fitted to take any of the standard banana plugs. Supplied with insulating base and two hex nuts as illustrated. Available in red and black.
$\$ .67$ Ea.

TWIN BINDING POSTS

No. 21-R. All-molded Bakelite, non-removable tops. Both posts completely insulated. Center mounting screw $6 / 32^{\prime \prime} \times 1 / 4^{\prime \prime}$ iong. Base is $2^{\prime \prime}$ long, $11 / 16^{\prime \prime}$ wide and $3 / 16^{\prime \prime}$ thick. Center distance between posts is $7 /{ }^{\prime \prime}$.

List Price $\$ 0.85$ Ea.
No. 21-S. Same as above with one post insulated. One mounting screw at end of base, ground post is second mounting screw.

List Price $\$ 0.90$ Ea.
Individual metal and spring type binding posts are also available in a variety of sizes and styles. Write for our complete catalor

## BATTERY STRAPS

45-2 Newly designed for new minialure 45 volt batteries. Emerson portable, etc.

List Price $\$ 0.53$ Ea.
67-2 Battery snap fastener for $671 / 2$ volt B Battery. + and - terminal connections securely staked on lough fibreboard in69.2 Same as above for 90 volt battery. List Price ............................................50.30 Ea

## TIP JACKS

No. 49. Top diameter $1 / 2^{\prime \prime} x$ 5/32" thick. Threaded brass body $5 / 16^{\prime \prime}-40 \times 3 / 4^{\prime \prime}$ long. One hexagon nut and two insulating washers furnished. Hole for washers is 19/64". Red or black bakelite top.
List Price: Red and Black

No. 52. Top diameter $1 / 2^{\prime \prime} \mathrm{x}$ $1 / 8^{\prime \prime}$ thick. Body is $5 / 16^{\prime \prime} \times 3 / 4^{\prime \prime}$ long. Special steel assembly washers, cadmium plated, are furnished. Red or black bakelite.
List Price: Red ........s0.13 Ea. Black ...... 0.11 Ea

No. 76. Same style as No. 52. Top diam. $5 / 6^{\prime \prime} \times 5 / 32^{\prime \prime}$ thick. Body is $.500 \times 27 / 32^{\prime \prime}$ long. List Price: Red.... $\$ 0.20$ Black.... $\$ 0.17$

## SCREW TERMINAL STRIPS

Brass contacts, steel screws cadmium plated. l/16" laminated bakelite plates. Spacing between terminals $1 / 2^{\prime \prime}$.

List

*Available with $7 / 16$ " terminal spacing.

FUSE HOLDER

Molded fuse holder for use in automobile radios, television sets and other applications requiring "in the line" fube holders. Wraparound fuse clip assures a firm positive grlpping contact. EBY "key" locking system affords greater mechanical strength and eliminates breakage. Furnished complete with wire leads and fuse. so..... $\qquad$ List Price, ea. $\$ 0.45$

Dage is vitally innerested in your special RF connector needs.

Dage has the ability to quickiy produce special RF connecturs ... from the smailest to the largest . . . with alt the skill and precision you've come to expect in Dage standard type connectors. Dage tools for new RF connector designs as soon as drawings become available.

Your special requests are handled by Dage with extra care Dage's experience and superb design facilities are always available to you during your planning phases. Dage and its representatives welcome your order, or your request for quotations or technical assistance.

For quality, quantity-rigbt now-write Dage today.

## DAGEELECTRICCO., INC.

## BACKGROUND FOR CIRCUITRY

Vector Socket-Turrets and Plug-In units provide a unique method for mounting electronic circuit components. saving space and increasing efficiency. Catalog numbers shown in bold face type are the most popular types.

## OCTAL, MINIATURE and NOVAL SOCKET-TURRETS

Sockets are standard bottom mounting with steel saddles carrying 4 ground lugs. Body is mica-filled phenolic carrying wrap-around brass contacts, cadmium plated. Terminal posts are $1 / 2^{\prime \prime} 0$. . with $1 / 16^{\prime \prime}$ wall. made of Grade XXXP laminated tan phenolic joined to socket. Six plated brass terminals at far end of turret plus three, six or none near socket. Mounting holes required are: for Octal 1" ctr. hole. side holes spaced $1.5 / 16^{\prime \prime}$ for $0.134^{\prime \prime}$ saddle holes (a larger type is also available-See 'A' below) ; for 7 pin miniature, $5 / 8^{\prime \prime}$ ctr. hole, side holes spaced $7 / 8^{\prime \prime}$ for $1 / 8^{\prime \prime}$ saddle holes; for 9 Pin Noval. $3 / 4^{\prime \prime} \mathrm{ctr}$. holes, side holes spaced $11 / 8^{\prime \prime}$ for $1 / 8^{\prime \prime}$ saddle holes.

For variations not always available from distributors but obtainable at the factory:

Add ' $A$ ' to No. for large octal socket (11/2 Mtg. Ctrs., $11 / 8^{\prime \prime}$ hole).
Add ' $J$ ' to No. for 'MFE' socket casting, beryllium contacts, silver plated. hot tin dipped.
Add ' $U$ ' to No. for $4-40 \mathrm{U}$ nuts which slip on saddle for easy mounting.
Add ' $G$ ' to No. for impregnation of turret for moisture and fungus protection.
Substitute ' L ' for ' O ' in No. if loctal socket required. $11.1 / 16$ ' hole. 1-5/16" mtg. ctrs.).
Note: Letters are printed on all above turrets to indicate terminal positions. A-F inclusive appear on remote end, G-L inclusive on row near socket ( $H, J . L$ for 3 terminal rows). " $A$ " and " $G$ " over " 1 " of socket.

Socket-Turrets are covered by Patent Nos. 2.604,584 \& 2,624,775.
SADDLE NUTS: A 'U' type nut which slips over standard socket saddles has been especially designed to promote easy mounting on the chassis. For \#4-40 machine screws. Order as \#440-U nut or simply add ' $U$ ' to number of socket ordered.

## TEST ADAPTERS

Vector Test Adapters are ideal for making measurements from the tube side of electronic equipment, where it is inconvenient to reach into the wiring compartment. The adapter is simply inserted between tube and socket completing the circuit and providing test tabs connecting with tube elements.

The T-789 set combines the 7-pin and 9-pin miniatures and octal in a plastic case. Or adapters may be obtained separately as follows:

| Catalog No. | Tube Type | Body Dia. | Skirt Did. | Length Iess Prang | Lead Shielding |
| :---: | :---: | :---: | :---: | :---: | :---: |
| T-7-M | 7 Pin Min. | $0.74{ }^{\prime \prime}$ | $1.03^{\prime \prime}$ | $1.47^{\prime \prime}$ | None |
| T-8.0 | 8 Pin Octal | 1.26 ${ }^{\prime \prime}$ | 1.56" | $1.50{ }^{\prime \prime}$ | None |
| T-9-N | 9 Pin Noval | 0.87 ${ }^{\prime \prime}$ | $1.16^{\prime \prime}$ | 1.47" | None |
| T. 789 S | above three | pes in cas | 11.75* | 3.75** | .62" |

## TUBE BASE PLUGS

These plugs fit the 7 and 9 pin miniature sockets and are useful for many experimental or plug-in purposes.

## FOR UNITIZED CIRCUITS

Amplifiers, counters, oscillators and the like can be readily assembled complataly on Plug-Ins, permitting quick changes of circuits. Making a Plug-In :nit involves little more than soldering in a few capacitors and resistors,

## ECONOMICAL AND CONVENIENT

Plugs are standard mica-filled, ring mounted octal style with 8 prongs as stondard. (9 or 11 prong plugs also available-see below). Sockets are standard mica-filled phenolic in octal., 7 Pin miniature or 9 Pin noval as ordered. Contacts are cadmium plated brass. Terminal turrets are Grade XXXP phenolic tubing $1 / 2^{\prime \prime}$ O.D. with $1 / 16^{\prime \prime}$ wall, carrying 12 plated brass terminals. Aluminum covers may e quickly detached' by removing screws af base. making inside completely accessible. Miniature and noval types carry military type tube shield base. Main lube shield not furnished. Types in bold face are most widely used and generally preferred for distributor stock.

## TEST EQUIPMENT FOR COLOR TV

## COLOR-BAR GENERATOR WR-6IA

The RCA WR-61A Color-Bar Generator is a compact, lightweight, portable instrument that produces with
 crystal-controlled accuracy 10 bars of color corresponding to $\mathbf{R} \cdot \mathrm{Y}, \mathrm{B}-\mathrm{Y}, \mathrm{G} \cdot \mathrm{Y}, \mathrm{I}$ and Q axes. The 10 bars are accurately spaced at $30^{\circ}$ phase intervals. Indispensable for checking the overall operation of color 10 becers is ind for adjusting color phasing, color synchronizing, and color matrixing. The phasing of the 10 bars is inherently accurate because an "offset" crystal-controlled oscillator is used to generate the No. subcarrier in addition to the use of crystal-controlled oscillators for the picture carrier (channel No. 3), sound carrier, and the horizontal sync and har frequency. The sound carrier (unmoduhated) is provided to insure precise tuning of the receiver, to check sound, rejection, and to checle for presence of beat interference between the color subcarrier and the sound carrier.
Luminance signals are provided at the edges of the color bars to check the "fit" or rexistration of the luminance and chrominance signals. A brightness signal is also available to check for possible shift of hue in the bright areas or highlights. The amplitude of the color subcarrier is adjustable in order to check
the color sync lock action in the receiver.

Color signals of positive or negative polarity are provided for both low impedance ( 75 ohms) and highimpedance ( 5000 ohms) video circuits.
The WR-61A has a shipping weight of $171 / 4 \mathrm{lbs}$. and is $93 / 4^{\prime \prime} \mathrm{h}, 131 / 2^{\prime \prime} \mathrm{w}, 71 /{ }^{\prime \prime} \mathrm{d}$. It is suppliedi with a blue-gray hammeroid case, a satin-aluminum panel, and with separate cables for $R F$ output and video signals. $\$ 247.50$ (Suggosted User Price)

## DOT-BAR GENERATOR WR-36A

The RCA WR-36A Dot-Bar Generator is designed to provide a patcern of optimum-size rectangular dots
 vertical bing convergence adjustments in color receivers. It also provides choice of horizontal bars, The number of bars is adjustable: 8 to 15 horizon bars; 11 in color and black-and-white receivers.
The WR-36A provides white dots on a black background. The dots are approximately $3 y / 16^{\prime \prime} x 3^{\prime \prime}$, as viewed on a $15^{\prime \prime}$ tube. Experience has shown that, under normal room lighting conditions, the use of smaller dots creates a strong tendency to run the brightness too high, thereby causing blooming, which is definitely undesirable for correct convergence adjustments.
Both modulated-RF and video output are provided. The RF output is continuously tunable over Channels 2 to 6 , with adjustable amplitude. Positive or negative video output of approximately 5 nolts is provided for feeding into the video amplifier of color or black-and-white receivers. Choice of internal 60 -cycle vertical sync or external sync is provided.
The WR-36A has a shipping weight of $17 / 4$ lbs. and is $93 / 4^{\prime \prime} h, 135 / 2^{\prime \prime} \mathrm{w}, 71 / 2^{\prime \prime} \mathrm{d}$. It is supplied with a blue-grey hammered case, a satin-aluminum panel, and with separate $R F$ cahle and leads.
\$147.50 (Suggested User Price)

## WIDEBAND OSCILLOSCOPE WO-78A

Designed especially for servicing of color TV receivers, the RCA WO-78A features: (1) Dual bandwidth with dual sensitivity; (2) Voltmeter-like facilities for measuring any portion of waveforms up to 4.5 Mc ; (3) Horizontal trace expansion of 3 times screen diameter: (4) Rise time $0.1 \mu \mathrm{sec}$.; (5) Tilt or overshoot less than $5 \%$ for square wave with $0.05 \mu \mathrm{sec}$. rise time; (6) Low-input capaci. tance, 9.5 $\mu \mu \mathrm{f}$; (7) High dc-input. 10 megohms; (8) 14 -position attenuator with small steps for generous overlap of ranges; (9) Flat-face CRT type 5ABP-1 post-accelerator type operating at approximately 3000 volts. $\$ 425.00$ (Suggested User Price)

Frequency Response:
Vertical Amplifier:
Wide Band.......... 3 cps to 4.5 Mc within —1dh
Narrow Band....... 3 cps to 500 Kc within -3 db
Horizontal Amplifier... 3 cps to 1.0 Mc within -6db

## VIDEO MULTIMARKER WG-295A

The RCA WG-295A Video MultiMarker provides five simultaneous absorption-type markers accurately preset at the following frequencies required in marking the video response curves in color receivers: 0.5 Mc (for $Q$ filter)
3.58 Mc (color subcarrier frequency)
1.5 Mc (for I filter)
4.5 Mc (sound-trap frequency)
2.5 Mc (for band-pass filter)

Each of the marker frequencies in the WG-295A is definitely and quickly identified simply by touching the corresponding contact on the MultiMarker; this has the effect of reducing the amplitude of the particular marker notch. The WG-295A is connected between the IF/VF output on the sweep generator and the regular video output cable.

The popular WO-88A-the 'scope that will do a job for you-combines all the essential features required for TV servicing!
The WO-88A has built-in voltage calibrating facilities which permit simultaneous waveshape display and peak-to-peak voltage measurements. Frequently, the shape of the TV waveform under observation will be correct but its amplitude will be low and, consequently, cause improper operation. Therefore, a TV scope is complete only if it can measure the peak-to-peak voltage of the displayed waveform. Check this feature on the " 88 "!

On the WO-88A, sync polarity may be reversed instantly by simply clicking a front-panel switch. This feature is important because TV pulses may be either positive or negative, depending upon where the "scope is connected. To avoid waveshape "jitter" or distortion. use a scope which will "lock in" readily on all types of TV waveforms. Check this feature on the " 88 "!
When yout use the WG-216B Low-Capacitance Probe supplied with the WO-88A, the over-all input res stance is raised to 10 megohnis! Because many TV circuits are extremely sensitive to resistive loading, normal circuit operation may be seriously disrupted by loading of the average 'scope. With the IVG-216B Low-Capacitance Probe, however, loading mroblems are minimized. Check this fcature on the " 88 "!
In addition, the WG-216B Low-Capacitance Probe decreases the over-all input capacitance to less than $10 \mu \mu \mathrm{f}$ ! Excessive capacitance loading can cause the horizontal oscillator to change frequency or stop oscillating. When the WO-88A is connected, the low over-all input capacitance leaves receiver operation essentially unaffected. Check this feature on the " 88 "!

## 7" OSCILLOSCOPE WO-56A

From the large 7" mu-metal-shielded CRT in a compact, space-saving cabinet to performance standards which include high sensitivity and wide frequency range-the WO-56A delivers peak performance for laboratory, factory and shop.

Identical vertical and horizontal direct-coupled, push-pull amplifiers have frequency-compensated and voltage-calibrated attenuator networks. A horizontal trace expansion of three times screen diameter with comparable vertical centering permits observation of minute trace detail. TV preset sweep facilities, retractable light shield, 60-cycle sweep and wide angle phasing control, "plus" and "minus" sync for locking-in "upright" or "inverted" wave shapes, high input impedance, peak-to-peak calibrating voltage, and many other time-saving features make this instrument one of the most desirable in the field.

Service technicians find the WR-59C tops for visual alignment and trouble-shooting of TV tuners, sound and picture if amplifiers, trap circuits, and video amplifiers. Combining such outstanding features as preset switch positions for all VHF TV channels and continuous tuning from 300 Kc to 50 Mc , the WR-59C has a high-output voltage flat and free from spurious responses. Fundamental signals are generated on all channels by a push-pull oscillator.

Such bonus features as a special blanking circuit for producing a zero reference line on an oscilloscope for quantitative gain meatsurements and for balancing discriminator circuits, and a phasecontrolled sweep voltage at power-line frequency for 'scopes lacking sweep and phase controls, a dual-piston attenuator with a range down to 5 microvolts . . . make this instrument a welcome addition to the most professional of service shops.

2.5-Mc Crystal Calibrator:

Accuracy
Accuracy ${ }^{\text {Total }}$ Number of Check Points............................................................................. $01 \%$ TV receiver.

Featuring continuous tuning, the RCA WR-89A Crystal-Calibrated Marker Generator furnishes you with an ri carrier of crystal accuracy for use in aligning and trouble-shooting of TV and communications receivers, transmitters, and other equipment in such services as fm , aeronautical, and marine, operating in the frequency range of $19-260 \mathrm{Mc}$. Calibration of the generator may be shecked at 2.5 Mc intervals throughout its tuning range by means of a built-in harmonic crystal oscillator of high accuracy.
In this one versatile instrument you not only get a multiple-marker generator but also a very useful bar-pattern generator for checking both vertical and horizontal deflection linearity of a TV receiver. When video and sync information from an operating TV receiver is fed into the WR-89A, you can use the generator as a rebroadcast transmitter to produce a TV picture on any channel of anotlier

And when an external ri signal is fed into the WR-89A, you may also use the generator as a heterodyne frequency meter for measuring the frequency of the external signal.

These and other important advantages reflect the expert engineering and functional design of the WR-89A-assuring you the dependability so essential for today's critical testing requirements.

Color has greatly increased the need for accuracy in rf-if alignment, and for complete sweep coverage of the video frequency range. The RCA WR-89A Crystal-Calibrated Marker Generator provides the accuracy that is essential for color alignment. The RCA WR-59C Sweep Generator provides complete coverage of the video-frequency range down to 50 Kc . Both of these instruments are ideally suited for color servicing.

- The RCA WR-86A UHF Sweep Generator is built around a frequency-modulated oscillator and is designed for production line and general service application on uhf receivers, converters, tuners, filters, antennas, transmission lines. and other equipment operating in the range of 300 to 950 Mc .
The Sweep oscillator employs the RCA-6AF4, a uhf oscillator triode, in a specially designed sweep circuit which results in excellent sweep linearity and a maximum amplitude variation of $0.1 \mathrm{db} / \mathrm{MC}$ combined with a large sweep width.
The oscillator compartment and its associated components are especially designed and sturdily constructed for best stability and reliable performance over extended operating periods. Critical parts are silver plated for maximum electrical efficiency. The entire oscillator section is enclosed in a special silver-plated case to minimize leakage.
A blanking circuit is included to provide a reference base line on an oscilloscope. The blanking circuit is normally in operation but may be incapacitated by a front-panel switch. The horizontal sweep frequency for the oscilloscope can be obtained from front-panel terminals.
The WR-86A has 50 -ohm output and will work into a 50 -ohm unbalanced or 300 -ohm balanced load. For 50 -ohm unbalanced circuits, the output cable is connected directly to the load. For 300 -ohm balanced circuits, the cable is plugged into a specially designed shielded balun (WG-296) which provides 300 -ohm balanced output. The balun is furnished with the WR-86A.

The instrument is engineered to give long trouble-free performance under severe operating conditions. Its simple tuning and directly read dial make the instrument easy to use on the production line and on the service bench.

## AUDIO SIGNAL GENERATOR WA-44A

Frequency Ranges:

You'll find the WA-44A excellent for: amplifier frequencyresponse checks; use in measuring intermodulation distortion in amplifiers; frequency response checks of tone controls; running frequency response curves on phonograph equalizers; checking input and output impedances of amplifiers; use in measuring resonance frequency of loudspeakers and speed of recorder/reproducer mechanisms.

And this compact, lightweight instrument is equally useful in: tuning bass-reflex enclosures; determining unknown audio frequencies; determining inductance and capacitance; audio signal tracing; determining the resonance frequency of LC circuits; and locating cabinet resonance and rattles. The RCA WA-44A features a new RC-type oscillator having a wide frequency range. which facilitates checking response of high-fidelity amplifiers, and an agc control circuit which insures stable performance. The output is flat within $\pm 1 \mathrm{db}$ over the entire frequency range.

## RF SIGNAL GENERATOR WR-49A

You don't have to bother with the nuisance job of connecting dc blocking capacitors to the probe tip of the RCA WR-49A RF Signal Generator, because it has built-in de blocking capacitors. With it. you can inject rf signals into plate circuits and other points where dc is present without placing a de load on the circuit under test-and with protection from burn-out in both the equipment and signal generator.
The functional-design dial facilitates accurate and easy readings. And full-length shielding of the output cable minimizes radiation and hum pickup in the receiver under test or adjacent test equipment. And that's not all! The extremely stable cathode-follower output stage isolates the oscillator from effects of load reactance and resistance, thereby maintaining good output waveform, voltage regulation, and frequency stability.
Compact and lightweight, the WR-49A can be depended upon in such applications as alignment and signal tracing of $a m$ and $f m$ radio receivers, alignment of low-frequency if amplifiers in TV receivers, and signal tracing and troubleshooting in TV receivers.

100 uhms or lower. . . . . . . . ...................... 30 cps to 3 Mc

Featuring a 71/2" meter, the new WV-87A Master VoltOhmyst is the deluxe member of the RCA VoltOhmyst family. It's peak-to-peak scales are particularly useful for television, radar, and other types of pulse work.
The WV-87A measures de voltages accurately in highimpedance circuits, even with ac present. It also reads rms values of sine waves and the peak-to-peak values of complex waves or recurrent pulses, even in the presence of dc.
Like all RCA VoltOhmysts, the WV-87A features $\pm 1 \%$ multiplier and shunt resistors, a $\pm 2 \%$ meter movement, high-input resistance, zero-center scale adjustment for discriminator alignment, dc polarityreversing switch, and a sturdy metal case for good rf shielding.
The RCA WV-87A Master VoltOhmyst has the accuracy and stability necessary for many laboratory applications. Its large, easy-to-read meter also makes it especially desirable as a permanently mounted instrument in the factory and repair shop.

For Source impedances of approximately
1000 ohms or lower. . . . . . . . . . . .

(including batteries) $\$ 100.00$ (Suggested User Price) includes instruction booklet, and two precision multiplier resistors, less batteries.

A battery operated microammeter, the RCA WV-84A is capable of reading from 0.002 to 1000 microamperes in six ranges. The WV-84A can be used with an external battery to measure resistance values as high as 90,000 megohms or may be used with an external resistor as a voltmeter with an input resistance of at least 100 megohms
per volt.
Circuit features of the WV-84A include negligible loading of the circuit under test, meter movement electronically protected against burn-out, and a self-contained battery power supply which makes the instrament completely portable.
The WV-84A is finding increased use by research laboratories in many fields-chem istry, medicine, electro-mechanics, electronics, nucleonics-for conducting experiments involving feeble currents. Industrial users find it an excellent instrument for making current and voltage measurements in electrolysis and corrosion investigations. The WV-84A may also be used for checking currents in light meters, in ultra-violet and infra-red detectors, and in spectrophotometric devices.

*For impedance of 100 ohms

Especially useful as a television signal tracer, the WV-97A features a high-impedance, high-frequency, full-wave rectifier for direct readings of peak-to-peak voltages up to 4,200 volts. With this instrument, you can readily obtain quantitative measurements of practically all of the important complex-waveform voltages found in video, sync, and deflection circuits.

The WV-97A is a deluxe instrument having such refinements as seven nonskip ranges on all functions, uniform "3 to 1" ratio between scales, wide frequency range, and extended voltage range.

Like all RCA VoltOhmysts, it has high input resistance, electronic protection against burn-out, zero-center scale, molded plastic meter case, rugged 200 microampere meter movement, $\pm 1 \%$ multiplier resistors, and other outstanding VoltOhmyst extras.
$\$ 67.50$ (Suggested User Price) including Direct Probe and Cable, DC/Direct Switch Probe, Ohms Lead, and Ground Lead, and instruction booklet.

## JUNIOR VOLTOHMYST WV-77A

Unquestionably the greatest value in all-electronic, ac-operated vacuum-tube voltohmmeters . . . the Junior VoltOhmyst provides versatility, accuracy, and dependability at low cost.
The WV-77A embodies all of the standard VoltOhmyst features such as high input resistance, low-input capacitance on dc functions, ability to measure dc in the presence of ac and vice versa, burn-out proof meter circuit, metal-case shielding against rf, $\pm 1 \%$ multiplier resistors, dc polarity reversing switch, negative feedback bridge circuit, zerocenter scale, plus wide frequency response and extended voltage ranges, positive-polarity ohms probe for quick testing of electrolytic capacitors, and many other features.
Factory-built, factory-tested, and calibrated against the finest laboratory standards, the Junior VoltOhmyst is deserving of its popularity.
$\$ 47.50$ (Suggested User Price) Complete with Probes and Cables, and instruction hooklet.

## RADIO BATTERY TESTER WV-37A

Now you can test , portable-radio batteries under actual load or "turned-on" conditions without the necessity of placing batteries in the set. The RCA WV-37A's built-in load circuits eliminate the time-consuming method required to test batteries with the conventional voltmeter. And the RCA WV.37A also gives you tional voltmeter. indication of true battery voltage than does the conventional voltmeter alone.
The selector switch on the front panel has nine prefixed positions to accommodate popular portable-radio batteries ranging from 1.5 volts to 90 volts. Eight blank test positions are provided to enable you to set up testing conditions of your own choosing for testing additional battery types.
Red and black plastic test prods joined to 36 -inch test leads are permanently attached to the tester. Weighing less than $31 / 2 \mathrm{lbs}$. the WV-37A measures a full $91 / 2^{\prime \prime}$ long, by $6^{\prime \prime}$ wide, by $1^{1 / 2^{\prime \prime}}$ deep.
You'll find the new RCA WV-37.A Radio Battery Tester a worthy addition to your service shop. Use it on the sales counter for checking used batteries or assuring the customer that replacement stock is fresh . : . on the service bench for accurate battery voltage indication "under normal load conditions--on shelf stock to keep a "running-check" on the condition of your shelf battery stock.
\$24.95 (Suggested User Price)

Nine prefixed switch positions for testing popular portable-radio-type batteries

Rugged, easy-to-read, $41 / 2^{\prime \prime}$ meter, all metal case, $\pm 2 \%$ meter movement

Built-in load circuits provide "in-use" testing conditions

Double meter-scale simultaneously indicates percentage of rated battery voltage and relative "good"... "useable". . . or "replace" condition

## DELUXE RACK WS-17A

The WS-17A is a deluxe three position test equirment rack. Add beauty and convenience to your test set-up with this streamlined rack. Sturdy all-steel construction with attractive satin-aluminum and blue-gray hammeroid finish.

$$
\$ 59.50 \text { (Suggested User Price) }
$$

RCA High Voltage Probes WG-289 and WG-290 are identical except for their connectors. The WG-289 is provided with microphone-type connector for use with the VoltOhmysts and other voltmeters having microphone-type connectors. The WG-290 is equipped with phone-tip connectors for use with voltmeters having phone-tip jacks.
These High Voltage Probes are capable of extending the dc voltage range of your meter to 50,000 volts. When used with a VoltOhmyst the input resistance is increased to 1000 megohms, an important feature when working in high-impedance circuits where loading seriously affects the stability of the circuit under test.
A choice of five multiplier resistors is available enabling these probes to be used with practically all popular electronic and non-electronic voltohmmeters.

## SPECIAL PURPOSE PROBES

LOW-CAPACITANCE PROBE WG-216B

The WG-216B is a "slip-on" type probe, designed for use with either the WG-218 or WG-220 Direct Probe in conjunction with an oscilloscope. When the WG-216B is used with either the RCA WO-56A or WO.88A oscilloscopes, the total input resistance is 10 megohms shunted by a capacity of less than $10 \mu \mu f$.

## DC/DIRECT PROBE WG-222

The WG-222 is a "slip-on" trpe probe with built-in 1-megohm isolating resistor and a unique switching facility. By virtue of the switch arrangement, it is possible to the swith arraltare or resistance, without measure de voltage or resistase, wh the changing probes. The WG-222 slips on the front of either the WG-218 or WG-220 and may be used with VoltOhmysts or other vacuum-tube voltmeters requiring a $1-\mathrm{mec}$ -
ohm isolating resistor.

* (Suggested User Price)

DC PROBE WG-217

The WG-217 is a "slip-on" type probe, designed for use with either the WG-218 or WG-220 as a DC Probe for VoltOhmysts or other types of voltohmmeters. The WG-217 contains a 1 -megohm isolating resistor, and has a sbunt capacitance of less than $2 \mu \mu f$. \$2.75*

DIRECT PROBE AND CABLE WG-218, WG-220

The WG-218 is a shielded input cable for use with volt-ohmmeters and oscilloscopes. It is fitted with a probe tip at one end and a microphone-type connector at the other end for connection to instruments having microphone-type cable connectors. The WG220 is the same electrically as the WG-218 but is fitted with pin-plug tips for connection to instruments having tip jacks or binding posts.

## DEMODULATOR PROBE WG-291

The WG-291 Demodulator Probe bas an input range of 500 Kc to 250 Mc with an input capacitance of only $2.25 \mu \mu f$. It separates the modulation from the RF carrier in an amplitude-modulated wave by means of a rectifier and a filter having a short time constant and an output frequency range of 30 to $5,000 \mathrm{cps}$. The $W \mathrm{WG}-291$ has a maximum input voltage of 20 rms volts and a maximum dc voltage rating of $\$ 7.95 *$ volts.

CRYSTAL-DIODE PROBE WG-264

The WG-264 Crystal-Diode Probe consists of a germanium rectifier and RC network in a plastic housing ... which conveniently slips on the Direct Probe of VoltOhmysts, slips on the WV W.97A. RF voltages at frequencies up to 250 Mc may be accurately measured with the WG-264. The ac voltage meange extends from 20 millivolts to 20 volts rms. dc voltages up to 250 volts can be present. voltages up to 250 volls $\$ 7.75^{*}$ present.

## RACK-ADAPTER PANEL WS-18A

The WS-18A Rack Adapter Panel may be used for mounting any of the matched RCA Test Instruments in standard $19^{\prime \prime}$ relay racks. Add convenience, standardization and the professional touch to your test bench set-up. Umber-gray finish, all steel construction.
$\$ 11.50$ (Suggested User Price)

## the greatest vacuum tube voltmeter VALUE ON THE MARKET!

- Capacitance and Milliampere ranges-found only on finest electronic multitesters.
W One zero adjustment holds for all ohm ranges.
- DC Probe furnished has ten megohm isoloting resistor incorporated.

V Zero Center for TV and FM discriminator alignment.
Additional jack provided for $\mathbf{5 0 0 0}$ volt range.

- 30 complete ranges for maximum versatility.
- Line voltage chonges have little effect on the stable, double triode, bridge-type circuit.
Extremely high DC input resistance for making measurements without loading circuit under test.
- Audio frequency response virtually flat to 25 kc on 0 to 100 volt ranges.
$\checkmark$ Slanted to give advantage of overhead lighting. Dual position, brown hammerloid aluminum panel shipped in $671 / 2^{\circ}$ angle position for ease of reading and convenient portability. May be readily changed to a $221 / 2^{\circ}$ angle for counter use by rotating in the rich brown steel cose.
- Genuine leather snop-on, flexible carrying strap; may be removed when used in a permanent counter set-up.
- Unique, front of the panel type, big $51 / 2^{\prime \prime}$ rectangular meter with three color scale; finest mechanical and electrical arrangement for an electronic device. Protected against possible burnouts in the circuit.
- Newly designed, original cylinder style battery holder houses two stondord flash light cells. Contacts are made by designed torque spring pressure (no soldering).
- Precision calibrated $1 \%$ multipliers in all voltage and milliompere circuits.

NEW RESISTANCE THERMOMETER HAS MANY INDUSTRIAL APPLICATIONS
An entirely new approach to measuring temperatures from $-50^{\circ} \mathrm{F}$ to $1000^{\circ} \mathrm{F}$ in a small self-powered instrument now offers a much needed solution to a wide variety of temperature control problems. Ideal for checking deep freeze cabinets, refrigerators, air temperatures, ovens, lead or wax pots, heat treating furnaces, chimney stack controls, etc. 2 scales: $-50^{\circ} \mathrm{F}$ to $300^{\circ} \mathrm{F}$ and $300^{\circ} \mathrm{F}$ to $1000^{\circ} \mathrm{F}$. (Also calibrated in Centigrade.) Direct reading temperature scale. $1 \%$ Precision wire wound resistors used in Wheatstone bridge circuit.
Negative temperature coefficient resistor compensates for ambient temperatures.
Chicago Resistance Thermometer Model 533 . . . . . Net $\$ 58.00$

## NEW CHICAGO DYNAMIC PLATE CONDUCTANCE TUBE TESTER INCLUDES AC-DC VOM, CONDENSER LEAKAGE TESTER and DRY BATTERY TESTER

The Model 532 is a complete portable service unit which not only tests all receiving tubes but also includes a high grade volt-ohmmeter, a 300 volt condenser leakage tester with meter indication and a battery tester. For checking tubes, a patented switching arrangement provides quick set-ups to test diodes as diodes, triodes as triodes and pentodes as pentodes. The Model 532 offers more useful features than other instruments of similar price.
PICTURE TUBE ADAPTOR INCLUDED.
UP-TO-THE-MINUTE ROLL CHART.
TESTS ALL RECEIVING TUBES.
TESTS HEARING AID AND OTHER BATTERIES. LARGE CLEAR PLASTIC METER WITH 3-COLOR SCALE.
AC AND DC VOLT-OHMMETER INCLUDES FOLLOWING RANGES:
AC VOLTS: $0.10-100-500.1000$
DC VOLTS: 0.10-100-500-1000
OHMS: 0-5000-50,000-500,000-50 Meg.
Extremely attractive 2 -tone Fabricoid covered carrying case: $16^{\prime \prime} \times 13^{\prime \prime} \times 7 \frac{1}{2^{\prime \prime}}$.
CHICAGO MODEL 532 TESTER, Complete
Net $\$ 90.00$

## CHICAGO DYNAMIC PLATE CONDUCTANCE TUBE and BATTERY TESTER

Similar to Model 532 above, for tube and battery testing only. A superior tube analyzer at extremely low cost. Attractive blue simulated leather covered wood carrying case: $16^{\prime \prime} \times 13^{\prime \prime} \times 71 / 2^{\prime \prime}$. Picture tube adapter included.

Designed for work inside on panel and checking circuits an pole.
Special strays supplied to hold instrument in easy reading position while supported from lineman's neck, leaving both hands free.
Large rectangular dial or. $51 / 2^{\prime \prime}$ meter flush with panel.
RED - DOT Lifetime Guaranteed meter. Onv recessed range switch will select any range on instrument.
Special banana jack consectors to eliminate all shock hazard.
Intrrior designud for easily accessible comprnents.
Hand and neck strap, test leads with alligator clips and instruction manual supplied with urit.
Black molled case, completely insulated to protect instrument from ground, $71 / 2^{\prime \prime} \times 51 / 2^{\prime \prime} \times 33_{3}^{7} 3^{\prime \prime}$.
Weight: 4 llis.

## R adio RIPRLETT Testers

## MODEL 630-A WITH MIRROR SCALE

A Laboratory-type Volt-Ohm-Mil-Ammeter with mirror-scales and more accurate components to compensate for the average individual characteristics of each instrument.
Especially designed for the engineer and technician who is in need of an instrument assuring the finest degree of accuracy possible in a commercially produced tester.
The long, mirrored scales eliminate parallax in making readings and special $1 / 2 \%$ resistors provide for greater accuracy.
Tester has large $51 / 2^{\prime \prime}$ meter, flush with panel. Unit constructionResistors, shunts, rectifier, batteries-all housed in a molded base integral with the switch. Provides direct connections without cabling. Simple to operate-only one switch, flush with panel surface, selects both circuit and range and minimizes chance of incorrect settings and burnouts. $1 / 2 \%$ resistors sealed in molded compartment. Batteries easily replaced-balanced double-spring tension grip makes this operation simple. Assures permanent contact. Precalibrated rectifier for easy replacement. Enclosed selector switch of molded construction keeps dirt out. Retains contact alignment permanently.
This Volt-Ohm-Mil-Ammeter incorporating a $51 / 2^{\prime \prime}$ meter with $43 / 8^{\prime \prime}$ scale, has RED - DOT Lifetime Guarantee. Dial has black markings on white except AC and OHM are red. A completely insulated, molded black case, $71 / 2^{\prime \prime} \times 51 / 2^{\prime \prime} \times 33^{7} 2^{\prime \prime}$, and panel with engraved white markings. Leather strap handle.
Rubber feet provided without charge fit into rear holes of 630 , $630-\mathrm{A}$ and 650 ; prevent slipping of tester when it lays on flat surface.
Weight: 4 lbs.

## Radio RIplet Testers

Model 3423

## NEW MUTUAL CONDUCTANCE TUBE TESTER

Here is Proportional Mutual Conductance tube testing by a new patented circuit-offering advantages hitherto unavailable to the service trade. The right Tube Tester for TV and Radio Tubes. The circuit provides the true proportional relationship to the Gm curve for measuring in Micromhos the tube characteristirs. Diodes and low power thyratrons are tested on the GOOD-?-BAD scale.
This new tester handles the most perplexing tube testing problems in many fields-Radio Servicing, Industrial Production, Laboratory Testing. Theatre and P.A. Equipment, Communications, etc. Patented circuit for Proportional Mutual Conductance tube testing employs actual signal oscillator ( 4 KC ) for grid signal. Thus, hum and ripple, and tubes with open grids present no problem, and cannot give false readings. Signal component of output is picked off and measured by the specially desimned instrument circuit. Tests all types of receiving tubes, low power transmitting tubes, rectifiers, thyratrons, voltage regulator tubes, eye tubes, subminiature, acorn. ballast tubes and pilot lamps. Continuity test circuit also may be used to check electrical appliances for shorts or open circuits. Flexble three-position lever switches for complete coverage of both present and future tube connections. Only three positions mean no guess work on settings. Speed and ease of operation marks use of the tester. 0-10 ACV (variable) available for testing low voltage tubes. Also five other voltages available. (10, 30,70 Aso and 250 ). Full range filament voltage settings provides complete and accurate filament or heater voltage at tube base connections.

## TUBE TESTER

A Triplett Tube Tester with new impruved testing flexibility permitting checking any type radio receiving tube, miniature hearing aid tubes, and TV picture tubes. The tester gives both "short" and "open" circuit claek of each element of every tube-an accurate analysis of the condition of all tube elements, connections, taps, efc. TV picture tubes are checked without removing them from the receiver, by use of an adapter that may be purchased separately. "Continuity" test is provided for checking electrical appliances, motors, etc.

Model 3413-A has flexible 3-position lever :avitches for complete coverage of present and future tabe conuertions. RMA pin numbering of tube element levers makes for quick reference of rube base connections. Illuminated. easy-to-read roll type tube chatt is built into the tester. Simplified test procedure makes it possible for user to add new tube data to chart when desired.

Line Voltage indication on center of meter dial permits observation and adjustment for line fluctuations. Filament; voltage: 0.63 volts to 110 volts in 14 steps.

Large 6" meter, RED - DOT Lifetime guaranteed, has 3-color easy-to-read GOOD-?-BAD scale.

Portable metal case, $1511 / 32^{\prime \prime} \times 111 / 32^{\prime \prime} \times 61 / \mathbf{R}^{\prime \prime}$, black satin wrinkle finish, with removable, hinged cover and leather handle. Panel attractively etched in black, silver and red. Complete instructions supplied. Power: 115 V., $50-60$ cyele A.C. Wt. 20 lbs.

SENSITIVITY-10 M.V. per inch (rms) maximum.
HORIZONTAL AMFLIFIER-Frequency Range
Flat within $\pm 20 \%$ from 20 Cycle to 150 KC . Deflection Sensitivity-. 15 RMS Volts/Inch. INPUT IMPEDANCE-Vertical Amplifier
2 Megohms in parallel with 20 MMF. with low capacity probe.
2 Megohms in parallel with 45 MMF . at input terminals.
CALIBRATING METER (ILLUMINATED)-Reads peak to peak voltages from 0 to 1000 Volts in 8 ranmes, the low range being $0-0.3$ volt peak to peak. Reading peak to peak voltages with Triplett Model 3441 makes it possible to view the percentage of positive and negative; plus reading peak to peak voltage direet. Where reading peak to peak voltage on a VTVM only peak to peak voltage is known.
PHONE JACK is on front panel connected to the output of the vertical amplifler so you can hear as you see. This makes a convenient way to familiarize the visual so you can hear as with the familiar audio sounds. Having a high gain amplifier system available also is ideal for tracing audio circuits and checking for noisy components.
LINEAR TIME BASE-10 CPS to $60 \mathrm{KC} /$ Second linear, available at panel.
TUBE COMPLEMENT-5UP1, 2-7A5. 5Y3, VR150, 6AC7, 12AT7, 3-6SN7, eX2. Total 11. Wide frequency ranges provide for Television servicing requiremen's.
Phased 60 CPS horizontal sweep and return trace eliminator for use with Sweep Generators.
Synchronizing and horizontal Sweep Selector combined in same control for simplicity in operation.
CASE-Metal, with black suede enamel finish, $15 \frac{11}{}{ }^{\prime \prime} \times 11 \frac{17}{\prime \prime \prime} \times 16^{\prime \prime}$. Leather handle. PANEL-Black, red and white characters etched on aluminum.
ACCESSORIES-One Co-Axial lead for Vertical Input.
POWER-105-115 Volts, 50-60 Cycles, 80 Watts. Wt. : 38 lbs.
all prices are subject to change - all models subject to revision

# Radio Triplet Testers 

# RADIO \& TV SERVICING WITH LOAD-CHEK Model 660 

Model 660

## RANGES

## WATTS—A.C. or D.C.: $0-500$ ( 50 division scale) <br> $0-1000$ ( 50 division scale) <br> VOLTS-A.C. or D.C.: $0-150$ ( 65 division scale)

The LOAD-CHEK for the first time makes it possible for every technician to utilize what is perhaps the simplest and quickest of all service methods-servicing by Power Consumption Measurements. long proven by auto-radio servicemen us a rapid method of localizing troubles in auto radios. Triplett Midel 660 is the first Wattmeter to be produced at moderate cost, and with the proper ranges. to bring this short-cut method within the reach of every radio and TV errviceman. Following are only two of many time-saving uses of this new instrument: LOCATING A SHORT-The chassis tag may show a normal consumption of 225 Watts. Simply plug a power cord of the chassis into LOAD-CHEK (no loose ends to connect or be in the way). Note the reading-which should be possibly 350 Watts. By removing the rectifier tube you can determine at once which side of the tube the short is on. With a soldering iron and long-nosed pliers you can check through the chassis. locate and correct the trouble without having to lay down tools or to check with lead wires !
REPLACING BURNED-OUT RESISTORS-With the chassis to be repaired plugged into a LOAD CHEK MODEL 660, note the wattage reading with the burned out resistor circuit open. Now replace the resistor. Should the increase in watts be greater than the resistor rating, it indicates an extra load has caused the trouble which has not been cleared. LOAD-CHEK is made-to-order for the busy serviceman because it's a Time Saver: and at its moderate cost can be standard equipment on every service bench.
RED - DOT Lifetime Guaranteed Meter.
Black, molded. insulated case, $21 / 2^{\prime \prime} \times 51 / 2^{\prime \prime} \times 6^{\prime \prime}$, with removable black leather strap handle. Black molded panel with white markings.
Weight: 2 lbs.

## Model 661

## RANGES

WATTS: D.C.-A.C. $0-150-300$
VOLTS: D.C.-A.C. $0-150$

This new LOAD-CHEK tester is designed for radio and low wattage appliances. Appearance and construction are the same as Model 660 with Watt range $150-300$. Black molded case, $6^{\prime \prime} \times 51 / 2^{\prime \prime} \times 2 \frac{1}{2} 2^{\prime \prime}$. insulated to protect instrument from ground.
Weight: 2 lbs
MODEL 661.................................. U.S.A. DEALER NET
$\$ 29.50$

## APPLIANCE TESTERS - Model 2002

RANGES: 0-1500-3000 Watts AC-DC at 10 Amp. normal, 20 Amp . Max., 40 Amp. momentary; 0-130-260 Volts AC-DC. Model 2002 shows power consumption of industrial equipment, radios, electric ranges, refrigerators, washers, etc., under actual operating conditions, on either DC or AC between 25 and 133 cycles. Wattmeter on the left and VoItmeter on the right permit Watts and Volts to be read simultaneously or independently. Shows if voltage remains within limits under operating loads. Shows faulty power lines. Heavy inner construction. Heavy leather case, with snap cover and leather handle, $6^{1 / 2^{\prime \prime}} \times 41 / 2^{\prime \prime} \times 31 / 4^{\prime \prime}$. Storage space for cord and plug furnished.
Weight: 2 lbs.
MODEL 2002
.U.S.A. DEALER NET
$\$ 39.50$

## Model 2006

RANGES: 0-25 AC-DC Amperes: 0-130-260 AC-DC Volts.
Model 2206 is designed for those who prefer the Voltmeter-Ammeter method of testing electric rarges, refrigerators, washers and other household appliances, plus many industrial uses. Simultaneous readings of line voltage and current drain. Compact, portable, heavy leather case, with strap handle, $61 / 2^{\prime \prime} \times 41 / 2^{\prime \prime} \times 31 / 4^{\prime \prime}$. Adequate storage space for cord and plug furnished.
Weight: 2 lbs.
MODEL 2006

Model 2002

Model 3436

- Large dial with uniform frequency graduations-no crowding at end of dial. $13^{\prime \prime}$ of long easily readable scale. Marked in both frequency and channels. Hand drawn for extreme accuracy.
- RF output maximum .5 volt. Variations in output over the range of frequencies is minimized.
- Output impedance 150 to 300 ohms.
- Ranges: UHF all fundamentals on channels 14-83 ( $470-900 \mathrm{MC}$ ). No harmonics for confusion.
- Triple shielding and excellent stability through special construction.
- Audio output available at panel, 0-20 volts.
- Voltage regulated power supply- 115 volt, $50-60$ cycle AC. Control tube supplies RF oscillator with voltage independent of line fluctuations.

## UHF MARKER GENERATOR AND ALL-PURPOSE SIGNAL GENERATOR <br> UHF Continuously Variable Through Channels $14-83$ on Linear Scale $13^{\prime \prime}$ Long - All Fundamental Readings $(470-900 \mathrm{MC})$ Accuracy - $1 / 2 \%$ to $1 \%$

An easy-to-use invaluable test aid as a Signal Generator or Marker Generator for: (1) Adjusting UHF TV receiver front ends and UHF converters. (2) Setting the end limits of UHF converters and receivers. (3) Pre-setting fixed channel converters, a procedure especially needed in fringe areas where the station signal may be too weak for sufficient test indication. Pre-setting can be easily accomplished with the Triplett 3436. (4) A reliable signal source to compare the gain of UHF receivers and converters, also especially needed in fringe areas. Bad crystals in the UHF section can be detected by this method. (5) Used as an alignment generator for UHF converters and TV front ends. (6) Used as a UHF Horizontal Bar Generator, the tester generates approximately 12 lines by using the modulation and feeding into the front end of the receiver. This makes possible linearity adjustment of the TV picture.
Piston-type attenuator. Adjustable modulation of RF signal at approximately 1000 cycles. Can be used as horizontal bar generator. ON-OFF switch. Also ON-OFF plate switch for pre-heating oscillator tube filament before applying plate voltage.
Heavy steel case, handsomely finished and professional in appearance, 1513" $\times 11_{3^{\prime} 2^{\prime \prime}} \times 81 / 4^{\prime \prime}$. Black baked-on suede enamel finish. Sturdy leather strap handle for ease in carrying; makes the generator adaptable for portable as well as test bench use. Weight: 24 lbs. net.
Panel etched heavy aluminum with red and black characters. Tubes, 6AF4, 6J5, 6K6, VR105 and 6X5. Complete with instruction books and test leads.
MODEL 3436...U.S.A. DEALER NET. . $\$ 169.50$

## HIGH RANGE D.C. VOLTMETERS FOR AMATEURS

Designed particularly for radio amateurs. High range $\mathbf{3}^{\prime \prime}$ D.C. Voltmeters- 1000 ohms per volt. Provided with special external metalized multipliers mounted on bakelite strip. Specify this type when ordering, or standard voltmeters will be furnished. Available $3^{\prime \prime}$ case, Madels 321-T, 327-T:

| Rainge | Price | Range | Price |
| :---: | :---: | :---: | :---: |
| 0-1000 | . $\$ 13.10$ | 0-4000 | . 813.10 |
| 0-2000 | 13.10 | 0-5000 | 13.10 |
| 0-3000 | 13.10 |  |  |

## SENSITIVE RELAYS

Highly sensitive Triplett relays of the D'Arsonval moving coil type, are carefully designed to give dependable, satisfactory performance. Since relays cover such a wide field and most of them are made to special order, no standard models are listed. Contacta are normally rated at 25 Milliamperes, 25 Volts; higher ratinge if required. Instrument relays are provided in $2^{\prime \prime}, 3^{\prime \prime}$ or Twin cases. Years of instrument experience are available to every relay user through Triplett's extensive service. Send us your applications with information specifying maximum and minimum ccrrents and voltages which will pass through relay coil and contact points, etc.

## RADIO AMATEUR EQUIPMENT FREQUENCY METER

A new band-switching, tuned Absorption type Frequency Meter covering five amateur bands. Incorporates the new germanium crystal and a D.C. Milliammeter indicator for greater sensitivity. Direct calibration on for greater sensitivity. Direct calibration on panel-no coils to change; switching permits instantaneous band change. Audio jack is provided for monitoring of phone signals -another new feature. Fully shielded. Calibration is in megacycles in the following bands: 3.5-4 MC; 7-7.3 MC ; 14-14.4 MC; $20-21.5 \mathrm{MC} ; 28-30 \mathrm{MC}$. Coil is removable and other coils may be substituted for special bands, if desired.
USEFUL FOR CHECKING: (1) Fundamental frequency of oscillating circuits. (2) mental frequency of oscillating circuits. (2) Presence, order and amplitude of harmonics. (3) For parasitic oscillations. (4) Neutralization of R. F. amplifiers. (5) Standing wave ratio on transmission lines. (6) Presence of
undesirable or small quantities of $R$. $F$. undesirable or small quantities
(7) Monitoring of phone signals.

## Red - Dot Lifetime Guaranteed Meter.

A fully shielded unit of compact pocket size. Overall height, including coil, $71 / 2^{\prime \prime}$; width $21 / 2 "$; depth $21 / 4$ ". Attractive gray "hamcluding coil, $71 / 2^{\prime \prime}$; width $21 / 2 "$; depth $21 /$
mered" enamel finish with black trim.

## TILTING CASE PORTABLES

Models 325 (D.C.): 335 (A.C.) are uniquely adapted for laboratory, experimental and special work. Advanced tilting feature permitis moving the in strument case to any ample up to 90 degrees for accurate readings. Molded $\times 31 / 2^{\prime \prime} \times 2{ }^{50} x^{\circ}$. D.C. scale length $2.49^{\prime \prime}$ A.C. 2.22". Accurate within $2 \%$. Also available with mirror scales hand calibrated to $1 \%$ accuracy. Quotations on request.

4.6" SCALE PORTABLES

One of lriplett's most popular portaides is the 6 molded case style: Model 625 (D.C.) : and Mode) 635 (A.C.). A.C. styles are shielded. Hand calibrated mirror seales on white enameled nietal dials, with knife-edge pointers. Accurate within 1". Scale lengtin: 4.61" D.C.: 4.4" A.C. Black moided case, $6^{\prime \prime} \times 51 / 2^{\prime \prime} \times 21^{\prime \prime}$. Detuchable leather strap handle. Leather carrying case at extra strap harge.

SCALE PORTABLES

Models 725 (D.C.) and 735 (A.C.) are precision portable instruments in handsome quarter-sawed golden oak cases. Hand-calibrated mirror scale and knife-edge pointer. Scale length: D.C. $6.4^{\prime \prime}$ : A.C. 5. $7^{\prime \prime}$. Accurate within $1^{\prime}$. Reliable instruments appropriate for exacting work. Case, $11^{\prime \prime} \times 9^{\prime \prime} \times 4^{\prime \prime}$, with handle. Detachable cover.

## VU METER

Volume Unit and Deribel Meters are used to measure sound or noise levels in amplifiers for Public Address, Theatres, Broadcasting Studios, Broadcasting Static Equipment. etc.
VU Meters are used for volume level measurements-including broadcast monitoring. Ballistic characteristics comply with standardization recommendations of NBC and CBS and Bell Telephone Laboratories. Internal impedance 3900 Ohms . Steady state referLaboratories. Internal impedance $\mathbf{e}$ ence 1 Milliwatt. For 600 Ohm line. Dynamic characteristics proence 1 Milliwatt. For 600 Ohm line. Dynamic characteristics pro-
vide for $99 r_{0}$ full scale deflection in 3 seconds. Specify scale type vide for $99 \%$ ful
when ordering:
Type "A": $0-100$ (black) -20 to +3 VU on top arc (red).
Type ' B ": $0-100$ (black) -20 to +3 VU on bottom arc (red).

## WATTMETERS - ELECTRODYNAMOMETER

These instruments can be used on single phase A.C. ar D.C. as Wattmeters. On apecial order they can be made up as voltapecial order they can be made up as voltcontained to 300 Volts- 10 Amperes. Over that external connection can be made. For use on frequencies up to 133 cycles per. use on frequencies up to second. Avsiiable in three-inch model 361 . Case dimensinns same as $321-\mathrm{T}$, except for depth, $2^{\prime \prime}$ hack of the flange $(2,6$ over studs). Almo available in $3^{\prime \prime}$ rectangular
 Model 367-A. Case diameter same as 327-T. except for depth, $2^{\prime \prime}{ }^{\prime \prime}$ back of flange ( $2 \overline{\%} /{ }^{\prime \prime}$ over studs). Other characteristics of the $367-\mathrm{A}$, such as Range, Voltage, Amps., etc., same as 361. Wattmeters can be combined in the Triplett Twin case with a voltmeter or Ammeter. Accuracy within $\pm 2 \%$. Standard range as follows:

## DECIBEL METER

DB Meters permit the operator of public address systems, etc.. to make instant adjustments to prevent sound blasting or distortion. General purpose type reads up 6 and down 10 decibels. Zero decibel $=1.73$ Volts. Calibrated for use on a 500 Ohm line. Reference level 6 Milliwatts. Resistance. 5000 Ohms. They consist of sensitive D.C. instrument coupled to a copper-oxide rectifier, Standard damping is provided unless highly damped instruments are specified. Quotation on request.

## A.C. RECTIFIER TYPE INSTRUMENTS

## D.C. AMMETER SWITCHBOARD SHUNTS

External shunts are available in the Ampere ratings listed and are to be used with instruments which operate at 50 M.V. full scale. The Ammeters will be supplied with dial reading in Amperes corresponding to rating of the shunt ordered. To determine price of the complete Ammeter, add shunt price to price of $0-50 \mathrm{Milli}$. voltmeter in Model desired.
Shunts are furnished with 5 ft . wire leads. Quotation upon request for replacement, or special $24^{\prime \prime}$ or $30^{\prime \prime}$ leads.
Switchboard shunts have molded bases through 200 Amp. rating. Curve Type Shunts (mount on meter studs) - $50 \mathrm{M} . \mathrm{V}$. (Specify on order.) 50 DC Amp. \$3.40: 75 DC Amp., \$4.10: 100 DC Amp., on order.) 50 .

## I NSTRUMENTSTHAT STAY ACCURATE

MODEL 260

World's Most Popular High Sensitivity Set Tester For RADIO and TELEVISION

There are more Simpson 260 high sensitivity volt-ohm-milliammeters in use today than all others combined. No other instrument of its kind has approached the world-wide popularity of the Simpson 260. In no other tester of its kind will you find the combination of useful ranges, accuracy, ruggedness, beauty and sensitivity developed to such a high degree of perfection.

Removal of the Model 260 from its heavy, handsome case of molded bakelite, will disclose how it differs from most set testers. You will see a sub-panel with a score of small recesses each holding a separate resistor or other component. You will notice complete absence of cable wiring. All connections are short and direct, thus offering a strength and firmness of assembly and the finest of insulation to reduce chances of shorts. All components are readily accessible. The front panel is a thing of beauty and long life. Pin jacks are recessed so no metal parts are exposed. All figures and symbols are molded into a heavy Bakelite panel and filled with durable white for long wear and legibility.

At $\mathbf{2 0 , 0 0 0}$ ohms per volt the 260 is highly dependable, rugged and accurate. Its practically negligible current consumption assures remarkably accurate voltage readings. It provides DC current readings as low as 2 microamperes and up to 10 amperes. Dependable resistance readings can be made up to 20 megohms and as low as $1 / 5$ ohm. With the 260 you can measure automatic frequency control, diode balancing circuits, grid currents of oscillator tubes and power tubes, bias of power detectors, automatic volume control diode currents, high-mu triode plate voltage, as well as a wide range of other measurements which cannot be checked with ordinary servicing instruments.

THE NEW MODEL 269
THE WORLD'S FIRST
COMMERCIALLY AVAILABLE 100,000 OHMS PER VOLT VOLT-OHM MICROAMMETER

BIG 7 INCH METER 33 RANGES COMPACT 7 INCH CASE

The Simpson Model 269 AC-DC ultra sensitive volt-ohm MICROAmmeter is ideal for voltage measurements in hivera - laboratory research work other electronic equipment!

Use it in place of VTVM's for many voltage and resistance measurements in TV and other service work.

Eliminates line cord . . . drift . . . tube replacement.

The new Simpson Model 269 Volt-Ohm-MICROammeter is the moat compact ultra high sensitivity instrument you can buy.

Every one of its 33 ranges has been customized to meet the needs of the electronic and electrical industries.

33 ranges through one control - saves time and assures accuracy.

Big seven-inch meter features an extra long scale for reading ease.

Rugged construction . . . designed for actual service use.

Measurement accuracy is $3 \%$ DC and $5 \% \mathrm{AC}$ of full scale deflection.

Simpson Adjust-A-Vue handle may be used to instantly support the instrument at a convenient viewing angle on a bench top.

The 269 offers dependable accuracy in a lightweight completely portable and compact case.

## MODEL 480 FM TV GENESCOPE

## Ideal For Servicing Both VHF and UHF TV Receivers . . .

In addition to providing, all the required signal sources for VHF television servicing, the Model 480 Genescope also includes a high sensitivity oscilloscope with unique advanced design in every detail and equipped with a high (requency crystal probe for signal tracing. Harmonics of the FM Generator can be used to observe overall response wave forms in UHF receivers and harmonics of the AM Generator receivers anking of this wave form nossible through most of the band.

The most
The variable oscillator sections are mounted one on each side of the oscilloscope section and are provided with large precision vernier dials having a $20: 1$ ratio and 1000 division logging scales. They are easy to read and can be quickly set to an exact frequency.

Modern FM and TV development and servicing requires the use of test equipment made to exacting standards. With this in mind we offer you the Genescope with the assurance that everything possible has been done to make it the most accutate, flexible and convenient in. strument available.

Muitiple shielding, generous bypassing of all power leads entering oscillator enclosures and adequate line input filtering eliminates excessive leakage and oscillator interaction.

Step and continuously variable attenuators on both AM and FM sections provide minutely controlled signal levels from a few microvolts for fringe area peaking operations to a magnitude suitable for single stage alignment.

A self contained impedance matching network is adjustable to any receiver input, balanced or unbalanced, in a matter of seconds. Values available include 300 ohm and 75 ohm termination with or without an intermediate attenuator pad and with or without an isolating condenser, open termination for maximum voltage outpur with or without isolating condenser and many other useful combinations.

## MODEL 479 TV-FM SIGNAL GENERATOR

A modern instrument for today's TV.FM problems. Exactly the same circuits, ranges and functions as the Model 480, described above, with the exception of the oscilloscope.
Size $17^{\prime \prime} \times 14^{\prime \prime} \times 7^{1 / 22^{\prime \prime}}$. Weight 29 lbs. Shipping Weight 35 lbs. Line Voltage: $105-125$ volts, 60 cycles, 50 watts
DEALER'S NET PRICE with Test Leads and Operator's
Manual
NET PRICE with Test Leads and Operator's
$\$ 325.00$

The center section of the Genescope contains the ascilloscope and all associated controls. The cathode ray tube of the oscilloscope is mounted vertically in the case in order to conserve bench space. The pasttern on the tube is brcught into view by use of a highly polished adjustable mirror at the top of the cabinet. The mirror may be quickly adjusted for any position of the operator. The tube face is placed well below the top surface of the caibnet in order to shield it from incident light thus producing a clear, sharp image nhampered by narrow angle light shields. The mirror when closed provides adequate protection for the cathode ray tube when not in use.

Direct cunnection to vertical and horizontal deflection plates and other internall functions are available through removable cover on the front panel.

## I NSTRUMENTSTHAT STAY AC CURATE

## MODEL 303 VACUUM TUBE VOLT-OHMMETER

The Simpson 303 really is a versatile instrument. It can be used as an electronic DC voltmeter, an ohmmeter, an AC voltmeter, an AF voltmeter, an RF voltmeter (with accessory probe), an output-meter, and an FM indicator.

The 303 truly is a worthy companion of the world famous Simpson Model 260 Volt-Ohm-Milliammeter. Simpson engineers spent months of painstaking research in the laboratory, working in close co-operation with TV set manufacturers to produce the 303 . This ruggedly buitt instrument has a volume of only 120 cubic inches, and is 60 to $70 \%$ more compact than any similar instrument. In achieving this compactness for greater portability Simpson did not sacrifice accuracy or functional value. Its large $4 \frac{1}{2}$-inch meter is easy to read. Features such as low current consumption and wide voltage and resistance ranges make the 303 an extremely versatile instrument.

Like all other instruments bearing the Simpson name, the 303 is of the highest quality construction throughout, but sells at an amazingly low price.

## SPECIFICATIONS

DC VOLTAGE: Ranges-1.2, 12, 60, 300, 1200 (30,000 with Accessory High Voltage Probe)
Accessory High Voltage Probe)

Renge- 20 volis maximum
Frequency-Flat 20 KC to 100 M.C.

Twenty-five separate meters at the turn of a switch. That is what you get in the Simpson Model 221 Roto Ranger. The necessity of reading numerous scales, so common in ordinary volt-ohm-milliammeters, is forever eliminated when you own a Roto Ranger. The chances for errors in making readings are reduced to a minimum. The Model 221 provides a separate direct reading scale for each range and does it automatically. Calibrations are not cramped. Each scale is full size, the same as it would be for a separate instrument. As the selector switch on the panel is moved to the range desired, an ingenious mech. anism rotates the proper range into position behind the meter window.

INSTRUMENTSTHATHTAYACCUR*A•TE

## MODEL 476 MIRROSCOPE

Simpson takes pleasure in presenting the revolutionary Model 476 Mirroscope. The objectives behind the design of the Model 476 were to eliminate certain inherent disadvantages found in the conventional type of oscilloscope.

By use of the Mirroscope principle the 5" cathode ray tube is mounted in a vertical position. This construction reduces bench space requirement to an area of only $9^{\prime \prime} \times 8^{\prime \prime}$ thereby permitting better concentration of associated equipment for any type of test procedure.

The cathode ray image is reflected from a high grade mirror mounted in the adjustable cover at the top of the cabinet, thus the viewing surface is brought near eye level when the instrument is used on benches of normal height. The mirror angle is quickly and easily adjusted to any position of the operator.

The cover with integral side wings forms an effective shield against external light sources or may be closed down for protection of the tube and mirror when the instrument is not in use.

The upright construction permits location of controls and connections for maximum convenience and allows for internal cathode ray tube connections at the front of the panel instead of the rear.

These and many other advantages will be disclosed when the construction and specifications of the Model 476 Mirroscope are considered fully.

## SENSITIVITY:

> Vertical direct Vertical amplifier -12 volts rms per inch. Horizontal direct -14 millivolts rms per inch. Horizontal amplifier - 38 volts rms per inch. millivolts rms per inch.

Horizontal trace expansion is over 4 times tube diameter. This makes it possible to examine minute portions of a response pattern for finer detail.
Linear Sweep frequency is continuously adjustable in five overlapping ranges from 15 cycles to $\mathbf{6 0 , 0 0 0}$ cycles. Internal, external or line frequency synchronization with variable amplitude is available.
Means for intensity or "Z axis" modulation is provided. Approximately 14 volts peak will blank a trace of nor mal intensity.

The vertical amplifier frequency response is within 3DB from 20 cycles to over 300,000 cycles and is usable to well over four megacycles. Square wave slant and overshoot is held to less than 5 per cent of amplitude. This response will be found adequate for all phases of television receiver service including observation and diagnosis of Sync. signals.

| INPUT IMPEDANCE:Vertical direct |  |

| 1-6J6 | Linear Sweep oscillator |
| 2-6X4 | High voltage rectifiers. |

## MODEL 276 OSCILLOSCOPE CALIBRATOR

The Simpson Model 276 Oscilloscope Calibrator adapts your oscilloscope for quick and accurate voltage measurements by comparative methods.

A twelve position switch provides six ranges each of RMS, Peak and Peak to Peak voltage with six alternate neutral positions for viewing the signal under observation.

Continuously variable calibrating voltage of power line frequency is supplied by the Model 276 and is indicated on a large $41 / 2$ inch meter which indicates RMS values from 0.06 volt to 90 volts, peak values from 0.1 volt to 125 volts and peak to peak values from 0.2 volt to 250 volts.

When the Model 276 Oscilloscope Calibrator is connected in series between a signal source and the Oscilloscope input, a convenient switching arrangement makes it possible to make quick comparative checks between the relative amplitude of the signal and of the measured voltage source. This system is most convenient because leads do not have to be shified around in order to calibrate the signal on the oscilloscope.
Housed in a rich black molded bakelite case identical to Models 260 and 303, this instrument will prove a worthy addition to the service dealer's equipment.

## MODEL 488 FIELD STRENGTH METER ...

Essential For Both VHF and UHF TV Receiver Installations

The Simpson Model 488 Television Field Strength Meter provides means for the measurement of Television signals in any locality. IT WILL WORK EQUALLY WELL FOR VHF AND UHF!

Although special consideration was given to fringe area applications in the design of this instrument it will be found of extreme value in all types of installations.

Location of maximum signal areas, antenna orientation and location, comparison of antenna systems, adjustment of boosters and checking antenna and lead-in installations are only a few of the many functions available.

Full scale sensitivity of the lowest range is approximately 50 microvolts and is an outstanding feature for those concerned with fringe area installations where maximum efficiency must be attained. Three additional ranges of approximately 500, 5000 and 50000 microvolts extends the usefulness of the Model 488 into areas of higher signal strength. Antenna installation for UHF reception requires exacting positioning and orientation and this requirement is completely satisfied with the Simpson 488.
The large $4 \frac{1}{2}$ inch modernistic meter is easily read from a considerable distance and all controls and connections arranged for greatest accessibility.

Model 488 is housed in a beautiful gray hammerloid finished case with sturdy leather handle for complete portability and ease of use.
Equipped for reception on all 12 VHF channels.

## NEW SIMPSON MODEL 498 FIELD STRENGTH METER GOES ANYWHERE!

This practical Simpson field strength meter answers the long-felt need of service technicians for a combination power line or battery operated field strength meter.
Simpson Model 498 operates from any one of four sources:

1. Simpson 498 operates from 117 V AC line OR
2. Simpson 498 operates from self-contained storage battery OR
3. Simpson 498 operates from your automobile battery* OR
4. Simpson 498 operates from your external battery.
Models housed in beautiful grey hammerloid finished case with heavy leather handle for greater portability.

## Feafures Accurafe Shorts and Leakage Tests with Indications in Ohms!

SIMPSON MODEL 1000 PLATE CONDUCTANCE TUBE TESTER

The Simpson Model 1000 will test any receiving tube including 9 pin miniatures and subminiatures with base arrangements in a line or circle. The Model 1000 tests an extremely important factor in the tube which is plate conductance. The dial indicates percentage of rated plate conductance which is closely related to mutual conductance since amplification factor remains constant throughout the life of the tube. Testing by the Simpson plate conductance method makes testing methods simpler . . . more positive . . . more accurate. These tests are made under conditions simulating actual use in radio, television, hearing aids and other electronic circuits.

Now, you can have reliable short tests because the Simpson 1000 quickly and conveniently shows you exact ohms values for interelement leakage and tube shorts.

Handy multi-position toggle switches help you make quick adjustments to proper voltages for bias, screen and plate supply. Each tube element is individually connected to the proper potential . . . insures against tube damage during testing.
Practical Simpson Snap-Out-Snap-In transparent plastic windows are provided over the fast action roll chart. They're instantly removed. You may add information on new tubes at any time. You'll like the easy-to-read type on the roll chart . . . eliminates squinting.

Simpson's roll chart service makes a new roll chart available each year and complimentary roll chart sup. plements are provided at regular intervals.

Every detail-no matter how small-has been engineered to meet your satisfaction. The fuse socket is on the front panel . . . dial cover is one piece unbreakable clear plastic.

The panel of the Model 1000 is finished in non-glare grey hammerloid and you'll like the rich burgundy carrying case, too. It looks like luggage. This is the tube tester you will be proud to own. See it at your parts jobber today.

## MODEL 381 CAPACITY BRIDGE

The Model 381 embodies a new and revolutionary circuit which enables even the inexperienced to make capacity measurement with ease and assurance.

Simplicity and ease of operation are features of this instrument. You merely press a button for the desired range, adjust the bridge arm for maximum meter deflection and read the capacity on the scale.

The small size of this tester, together with its wide range of capacity measurement and low price makes the Model 381 the ideal instrument for Radio and Television service dealers, broadcast engineers, electric repair shops, X-ray servicing, industrial maintenance departments or any other service where condensers are tested.

Housed in a beautiful bakelite case with a durable etched aluminum panel and many specially designed parts, the Model 381 Ca pacity Bridge exemplifies the high quality construction found in all Simpson instruments.

MODELS 240 and 230 VOLT-OHM-MILLIAMETERS

These two "Micro-Tester" portables are famous throughout the world for their ruggedness and built-in accuracy. They exemplify the construction features and utility that distinguish the entire Simpson line shown in this section.

Both are shock-proof and incorporate the special D'Arsonoval Simpson movement which is known for its extreme accuracy. Resistors are in matched pairs to provide the greatest possible accuracy for all ranges.

Model 240 - the "Hammeter" - was designed for the additional voltage and sensitivity demanded in radio testing. With its maximum voltage range of 3000 AC or DC, it was the first self-contained pocket portable instrument built expressly to check high voltage and all the component parts of transmitters and receivers.

Model 230, with a maximum voltage of 1000 volts AC or DC, is ideal for most industrial testing. Its ranges are adequate for most line voltages, for telephone, teletype, and general purpose testing.

Both models are housed in heavily molded bakelite cases, with all numbers and symbols recessed in the panel and filled with white enamel for greatest legibility and ease of reading. Both have full size $3^{\prime \prime}$ meters.

## RANGES

MODEL 240
AC Volts: $0.15,150,750,3000$ ( 1000 ohms per volt)

INSTRUMENTSTHAT STAYACCURATE

## MODEL 390 VOLT-AMP-WATTMETER

Ruggedly constructed for full load, continuous operation, the Simpson Model 390 is the first tester of its size ever made to give you volt, ampere and wattage readings in one compact instrument. It embraces two ranges each of voltage and current, providing four wattage ranges which cover practically all types and makes of appliances. The panel has volt-ampere combinations clearly indexed to the proper wattage range on the scale, which makes the instrument easy to use. All readings are shown on one meter. In normal position, the meter indicates volts. Ampere and watt readings are obtained by depressing button on the panel. The widely separated binding posts make it possible for the Model 390 to be used as an individual voltmeter or as an ammeter. The Model 390 has a molded bakelite case with all figures recessed in the panel, which are filled with white enamel for better legibility. Special sets of leads and plug furnished to simplify connections.

RANGES
AC Current, 60 cydes Volts: $0.150,0.300$ Volts: $0.150,0.300$
Amperes: $0.3,0.15$ Amperes: $0.3,0.15$

$0-1500,0-3000$

## MODELS 391 and 392 AC-DC VOLT-WATTMETERS

Designed for simultaneous reading of volts and watts, each of these handy little testers has two separate $3^{\prime \prime}$ square meters, one for volts and one for watts. Each has a built-in cord and plug for connection to the line outlet, and a receptacle for connecting the appliance under test. The ranges for each meter are selected by separate toggle switches recessed in the molded bakelite case. The low power consumption combined with the high efficiency of these instruments results in negligible loss and error in reading.

Model $391(3000$ watts max.)
Ranges: AC or DC

## MODEL 385 TEMPERATURE INDICATOR

This is the newest addition to the Simpson Appliance Tester line. You will find this a compact instrument which is ideal for measuring temperatures from $+70^{\circ} \mathrm{F}$ to as low as $-50^{\circ} \mathrm{F}$, where fast accurate temperature readings are important. The scale is designed so that the center portion is expanded, making the most widely used temperatures easy to read.
The Model 385 is ideal for use in the refrigeration service field and wherever temperature readings are important, such as deep freeze units, home refrigerators, walk-in coolers and air conditioning units.
The temperature readings can be taken at the end of the 15' lead which is supplied with the unit. The lead cord is small in diameter, making it possible to close the door of the equipment, thus obtaining temperature indications under actual conditions.
The probe can also be immersed in liquids where critical temperatures must be maintained.

Range: $-50^{\circ} \mathrm{F} .10+70^{\circ} \mathrm{F}$.
Battery, self-contained
Size: $3^{\prime \prime} \times 5 \% / 3^{\prime \prime} \times 21 / 2^{\prime \prime}$.

## MODEL 370 AC AMMETER

With self-contained current fransformer For use on 60 cycles
In the Model 370, a current transformer and indicating instrument have been combined in one small case to meet the consistent demand for a small multiple range AC ammeter, at a price that you can afford. Its many uses include the measurement of current drawn by all types of electric appliances and motors, heating elements, lamps, radio sets, etc. RANGES: 0.1 , $0.2 .5,0.5,0-10,0.25$ Amperes.

Size: $3^{\prime \prime} \times 57 / s^{\prime \prime} \times 21 / 2^{\prime \prime}$. Weight: $11 / 2$ lbs. Shipping Weight: 2 lbs.

## MODEL 377 DC VOLTMETER

## Resistance 1000 ohms per volf

Measures all dry battery voltage, both $A$ and $B$, for radio sets, also grid and plate voltage and filament voltage in battery-operated sets. High ranges may be used for checking DC line voltage. RANGES: $0.1,2.5,5,10,25,50,100,250,500,1000 \mathrm{DC}$ Volts.
Size: $3^{\prime \prime} \times 57 / 8^{\prime \prime} \times 21 / 2^{\prime \prime}$. Weight: $11 / 2$ lbs. Shipping Weight: 2 lbs. DEALER'S NET PRICE . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 19.95$

## MODEL 378 AC MILLIAMMETER

With self-contained current transformer
Here is the instrument that answers your need for a low cost, handy size milliammeter that combines a current transformer and an indicating instrument in one case. It offers five separate ranges, making it suitable for a wide variety of testing jobs. RANGES: $0.5, \mathbf{2 5}, \mathbf{1 0 0}$, 250,1000 MA.
Size: $3^{\prime \prime} \times 57 / 8^{\prime \prime} \times 2^{1 / 2 "}$. Weight: $11 / 2$ lbs. Shipping Weight: 21 lbs. DEALER'S NET PRICE . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 22.60$

## MODEL 379 BATTERY TESTER

Designed in accordance with the engineering specifications of leading battery manufacturers, this compact instrument is so ruggedly built that it will stand a lifetime of hard usage. The loading resistors have an accuracy of $1 \%$ and properly load all radio and hearing aid $A$ and $B$ batteries.

A single rotary switch selects the voltage of the battery under test and brings into line the correct loading resistor. The full $3^{\prime \prime}$ dial has three separate arcs, one for all radio A batteries, one for hearing aid A batteries, and one for all B batteries.

A percentage scale shows the exact condition of the battery in percentage of full voltage. The voltage reading can be quickly ob tained by multiplying the percentage reading by the selector-switch voltage setting.

Size: $3^{\prime \prime} \times 57 / \mathrm{s}^{\prime \prime} \times 2^{1 / 2 "}$. Weight: $11 / 4 \mathrm{lbs}$. Shipping Weight: 2 lbs.

Accessory Capacity Divider for Model 307 5262 Eveready Neolite Carrying Case for Model 307 ......... $\$ 8.75$

## NEW SIMPSON MODEL 355

 'MIDGETESTER'
## Smallest Practical Volt-Ohmmeter Commercially Available

Simpson Midgetester is as compact as a package of cigarettes. Size $1^{\prime \prime}$ thick, $41 / 2^{\prime \prime}$ long, and $23 / 4$ " wide $\cdot$. fits into your shirt pocket easily. Finished in attractive polished styrene case.
Ranges: AC and DC Volts 10,000 ohms per volt $0,3,12,60,300,1200$ volts. Resistance: $0-10,000$ ohms, $0-100,000$ ohms, $0-1$ megohm, $0-10$ megohms.

Dealer's Net Price, complete with test leads and instructions. . \$29.95

# Simpson <br> PANEL INSTRUMENTS 

MODELS 25, 35, 45, 55 $31 / 2^{\prime \prime}$ ROUND CASE - OPEN FACE STYLE. Flange diameter, $31 / 2$ "; depth overall, $21 / 4^{\prime \prime}$; body diameter, $23 / 4^{\prime \prime}$; scale length, 2 9/16". Bakelite case.

MODELS 27, 37, 47, 57 $31 / 2 "$ RECTANGULAR CASE. Width, $3^{\prime \prime \prime} ;$ height, $31 / 8^{\prime \prime}$. Mounts in round hole. Body diameter, $23 / 4$ ". Scale length 2 9/16". Bakelite case.

MODELS 29, 39, 49, 59 $4^{1 / 2 \prime \prime}$ RECTANGULAR CASE. Width $421 / 32^{\prime \prime}$, height, $413 / 64^{\prime \prime}$. Mounts in round hole. Body diameter $23 / 4^{\prime \prime}$. Scale length 3 29/32". Bakelite case.

# MARION ELECTRICAL INSTRUMENT CO., 401 CANAL ST., MANCHESTER, N. H. marion meters 

## MANUFACTURERS OF MARION

In Canado: H. Roy Gray, 44 Danforth Road, Toronto, Ontario Export Division: 13 East 40th Streol, Now York 16, N. Y. Cable Address ARLAB MARION RUGGEDIZED METERS
hermeticaliy sealed

New Marion ruggedized meters are an especially accurate and sensitive means for electrical measurement, even under extreme conditions of shock, vibration, mechanical stress and strain, weather conditions, and climate.

Ruggedized meters offer new freedom of application. They give faster response time, more sustained accuracy, lower bearing friction and longer life.

Ruggedized instruments meet the dimensional requirements of JAN I-6 and are completely interchangeable with existing $21 / 2^{\prime \prime}$ and $31 / 2^{\prime \prime}$ types. They are manufactured in standard $11 / 2^{\prime \prime}, 21 / 2^{\prime \prime}$, and $31 / 2^{\prime \prime}$ sizes.

When you want the finest in electrical instruments you can depend upon these new Marion ruggedized meters.

## MARION HERMETICALLY

## SEALED LIKE A VACUUM TUBE FOR GUARANTEED PERFORMANCE

Magnetically shielded. $2^{1 / 2 \prime 2} \times 31 / 2^{\prime \prime}$. Dustproof and moistureproof. Unaffected by heat, cold, humidity. Made to JAN specifications, giving peak performance with critical accuracy. Interchangeable round and square colored flanges for different panel needs.

$$

ADVANTAGES

- Speeds soldering operations by generating haat within the work In localized area. by producing - Improve quality by producing cleaner work
- Provents damage to surface finteh. This is important in glass-to-metal appilcations.
- Permits soldering of an entire seam or several jig-located parts at one time.
- Provides complete contral, timing or
duplication of solderlng processes.
Prevents mistakes and reduces rejects.
Provides local heat for otherwise inaccesslble parts.
Gives expert results with inexperienced operatort
Saves time, money, effort. Draws only 775 watts and then only at full load. Only 100 watts are
- Practically free from malntenance. No moving parts to wear out. Uses anly fow-prices, high sataty factor.
- Offers less hazard but does a neater, cleaner, faster job. No danger of sparking or RF burns from output terminal or work colls.

## MODEL PM-1

HM2

## MARION "4 FOR 1" FEATURE

Interchangeable Round and Square Colored Flanges... one instrument can thus fill four different needs:

1. ROUND

2. ROUND FOR STEEL PANEL

3. RECTANGULAR

4. rectancular for STEEL PANEL

## MARION PORTABLE BENCH TYPE INDUCTION SOLDERING UNIT

COMPACT . ${ }^{\text {. ADAPTABLE . . }}$ EFFICIENT
ECONOMICAL. . . SAFE . . EASY TO USE
FOR QUANTITY PRODUCTION
Use this low-cost, low-powered portable Marion Induction Heating Unit wherever production soldering of small metal parts and assemblies is required. It cuts costs by minimizing time, reducing labor, improving quality and eliminating the need for a high degree of skill. The unit has made a place for itself in the field of Radio, Electronics, Jewelry, Watches, Electrical Fixture Components, Toys, Auto Radio, Electronics, Jewelry, Watches, Electrical Fixture Components, Toys, Auto-
motive Parts, Household Fixtures and other fabrication applications requiring Small Part Assemblies.
FOR GLASS-TO-METAL SOLDERING
With the Marion Portable Bench-Type Induction Unit you can do glass-to-metal soldering on Resistors, Relays, Photo Cells, Meters, Capacitors, etc. It makes true hermetic sealing possible right in your own plant. Also, it is ideal for terminal, magnet and bearing assembly. It gives machinelike uniformity to a normally inexact operation.

## SPECIFICATIONS

Power Supply: 115 volts, 60 cycle.
Size: $153 / 4^{\prime \prime} \times 211 / 2^{\prime \prime} \times 15{ }^{\prime \prime}$.
Mounting: Standard relay rack cabinet.
Weight: 150 pounds.
Power: 775 watts at full power output, 100 watts standby.
The entire unit is rigidly assembled and mounted to prevent arc-over and failure of components.

## MARION <br> SERIES 52

Export Division: 13 Eost 40th Sireet, New York 16, N. Y. Coble Address ARLAB
STANDARD INSTRUMENTS

Space saver, yet has superior damping characteristics. $21 / 2^{\prime \prime}$ JAN Spec. round case ( 52 N ). Also available in standard $21 / 2^{\prime \prime}$ square (Model 52S) or with narrow flange brass case for R.F. Shielding (Model 52RM). Dependable, extra strong - has weil-aged Alnico magnet and heavy flanged construction. Popular for pocket test, portable radio, medical equipment and general electrical service where size and dependability count.

52N

525

52RM

## SERIES 53

Standard commercial $31 / 2^{\prime \prime}$ rectangular type ( 535 N ). Also available in $31 / 2^{\prime \prime}$ JAN Spec., round case (53RN). All Alnico construction. Excellent scale distribution characteristics. Ideal for portable test equipment and general electronic equipment application.

53SN

53RN

## ELAPSED TIME INDICATORS

Two sizes, $21 / 2^{*}$ and $31 / 2^{*}$, stondord JAN dimensions for ponel mounting. Low temperofure $\left(-55^{\circ} \mathrm{C}\right)$ storting. Operoting ronge $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$. True gloss-to-metol hermetic seol. Drown steel cose provides mognetic shielding. Registers in $1 / 10$ hour steps to 9999.9 or hour steps to 99999. Powered by 0 duroble, self-storting synchronous motor. Avoiloble for 110-125, 220250 volts, 50 or 60 cycle A.C.

## SERIES 56

New $b 1 / 2^{\prime \prime} \times 51 / 4^{\prime \prime}$ bakelite cased meter. Easy reading at a distance. Large open face has $100^{\circ}$ scale in $51 / 2^{\circ}$, arc. Room for multirange scale if needed. Milliamp ranges are Alnico if constructed. Alnico $V$ for microamps. Strong, accurate, efficient, dependable.

SERIES
$57 S$

Superb milliameter - more than a mere overgrown 3 incher $\mathrm{B}_{1} / 2^{\prime \prime} \times 7^{\prime \prime}$, open face, extra long scale. Enlarged pole shoe higigher torque movement higher damping factor. Accurate within $1 \%$. Used in large vacuum tube voltmeters, multitesters and production testing.

## MARION.MULTI-RANGE METER TESTER M-2

Marion Meter Tester (Model M-2) is the only instrument of its type available today. A laboratory and production tool for the measurement of the performance of DC electrical indicating instruments, it combines in one portable package an electronically regulated self-contained power supply, stepless vacuum tube voltage control, large $8 \frac{1}{2} / \prime$ mirror-scale individually hand-calibrated illuminated standard instrument, a decade of $.1 \%$ accurate manganin wire wound resistors, a resistance bridge, null indicator and associated switches.
The Marion Meter Tester measures current sensitivity of electrical indicating instruments in 10 steps from 25 ua full scale to 10MA full scale and from $0-100 \mathrm{v}$. The resistance measurement portion of the meter tester permits measuring of the internal resistance of the meter under test without exceeding its full scale rating. Accurate measurement of the internal resistance of sensitive microammeters and other instrument types is possible over the range of 0.5000 ohms.
It may also be used as a precise production limit-bridge in the same resistance range and will permit acceptance tolerances to be set for any value from $\pm 1 / 2$ of $1 \%$ to $\pm 20 \%$. The Marion Meter Tester is a means of high speed production inspection and calibration of electrical indicating

## SPECIFICATIONS <br> Sensitivity

ACCURACY: For current measurements

Model 57S
List \$22.00

When it comes to TEST EQUIPMENT build your own with Marion Multi-Ranger Meters. They will solve your problem of finding reasonably priced instruments with the critical accuracy you demand for test equipment or other auxiliary equipment with multiple functions.
These Multi-Ranger Meters permit you to assemble a highly accurate instrument for use as a voltmeter, milliammeter, high and low resistance ohmmeter, AC voltmeter and decibel meter. Build As Many Ranges As You Desire.
All instruments use Alnico Magnets, have full $100^{\circ}$ three-color scales, feature the new, tough Marion "Bulldozer" moving system that insures long life under severe operating canditions plus the highest degree of accuracy.

Shurite panel meters are attractive, rugged, dependable instruments with accuracy well within $5 \%$. All models have metal cases, telephone-black front; all require $23^{5} z^{\prime \prime}$ hole. DC meters are polarized-vane solenoid type, or moving-magnet construction when indicated, AC meters are double-vane repulsion type with jeweled bearing. Although the jewel construction costs more to build, it pays off by providing continuing accuracy during a longer useful life. All are guaranteed.

- Guarantee: All Shurite meters are guaranteed to users against defective workmanship and material, and will be repaired or replaced if sent to the factory postpaid with $40 \%$ handling charge within one year after date of purchase.

All-metal Dials-age and moisture resistant, lithographed in black on white for high visibility.

Sturdy Design-with husky new coil frames designed to prevent breakage, rigidly mounted in cases with anti-turning hex head studs. Interchangeable in other respects with a popular type of instrument formerly available.

- Modern Appearance-with concealed coils and new raised dial design, enhancing appearance and greatly increasing readability.
- Wide Selection-Shurite offers the broadest line of standard meters in the economypriced field. Distributor stocks are backed by factory inventory, another reason why Shurite is first with distributors.

TYPICAL USES: Shurite products, with their rugged design, and ability to duplicate readings, enjoy wide acceptance in the electronic and electrical fields. Applications include transmitters, receivers, TV antenna rotator controls, battery indicators, appliances, power sources, battery eliminators, electric fence controllers, and the very popular basic meters in radio test kits.

Shurite products are also specified for battery voltage indicators on emergency lighting, burglar and fire alarm systems, output meters on rectifiers (copper oxide, tungar or selenium types), rate-of-charge indicators, testers for hearing aid batteries and their chargers, ammeters for plating sets, and polarity indicators for metals analysis.

Other uses range from automotive test equipment to pin-ball circuit testers, and well-depth indicators. Shurite has long been the favorite brand for those who take their hobbies and experiments seriously.

## POCKET TYPE METERS

Madel 450

Various Shurite pocket meters using the bright-plated Model 450 case are in production. Stock numbers begin with 4 as the first digit. For example, the 0-3 DC Ammeter, as illustrated, is Stock No. 4202. The bulletin, "Shurite Pocket Types," available on request, is periodically revised to indicate pocket meters which are available.

## FLANGE ADAPTER RING

A sturdy flange ring for use with any Model 550 (round). Shurite meter where flange appearance is preferred. Meter then looks like Model 650. Wide flange, $23 / 4^{\prime \prime}$ dia. to be attached from front of panel. Telephone black finish. Screws, lockwashers and nuts included.
Model 5-A, Net. $\qquad$

## MOUNTING DETAILS

All Shurite Panel Meters have flush cases and require $2^{5}{ }^{5} 2^{\prime \prime}$ hole. Most standard ranges have 6-32 studs, and are mounted as follows:
DC
AC

## IMPORTANT—HOW TO ORDER:

For all standard models, give: (1) Model Number, (2) Range, (3) Stock Number. If Model number and stock number are not stated, Model 550 will be supplied.
ZERO ADJUSTERS (Z)
Zero adjusters are available only on Models $550-\mathrm{DC}$ and $650-\mathrm{DC}$. No zero adjuster on models using 950 case, except as supplied on No. 9300 Z and 9332 Z . When ordering, add Z to stock number. Example: Stock number for Model 550-DC voltmeter, $0-1$ volt rangewithout zero adjuster is 5101. With zero adjuster, it is 5101 Z .

## PANEL CALIBRATION (S)

Meters are calibrated for non-magnetic panels. If for magnetic (steel) panel mounting, specify thickness and overall size of panel, and add $-S$ to stock number when ordering, as 5101-S. If thickness of steel panel is not specified, meter will be supplied for .040 panel.

## VISCOSITY DAMPING (V)

Careful application of new silicone compound on bearing surfaces damps pointer overtravel. Add V to stock number, as 5406 V , and 5 cents to price. Not regularly stocked; available only on quantity order.

## SEE YOUR DISTRIBUTOR

Besides carrying most types, and being able to obtain your other needs promptly, your authorized Shurite distributor of electronic parts is qualified to suggest the right meter for your need.
(PRICES SHOWN ARE U.S.A. DEALER NET FOR INDIVIDUALLY BOXED METERS)

## AERO Instrument Company

NORTH HOLLYWOOD, CALIFORNIA
VIBRATING REED FREQUENCY \& TIMING INSTRUMENTS

## GENERAL DESCRIPTION

Vibrating Reed Instruments are direct reading frequency indicators for use where the efficient operation of A.C. equipment deperds npon the maintenance of known or constant frepuences, Thes are self eontained, their accuracy is sot affected by wide voltage varintions of wove form distortions and require no auxiliary apparatus. They consist of a number of sterl reeds, of hirh (), each of which is tuined to a of a nomber with the hand covered by the instrununt. Indicasingle frequen wis the reed in ton is with and esonare Running Time Meters are synchronous motor operated instruments to automatically measure synchronous motor operated instrume

## APPLICATIONS

A large demand exists for VIBRATING REED FREQUEN('Y METTERS for use with ensine drivers A. ${ }^{\circ}$. generator units as dhis is the most simple speed and frequeloy imlicator vet devised for A.c'. qenerator sets. These metris are also generally used in haboratory and portable test equipment, electronics, telephony, aircraft, industrial plants and numerous applications where electrical frequency indication is desired. Engineering services are available for those desiring assistance on their application problems. Running Time Meters are often used in conjunction with rem type frequency meters.

## MODEL 7002

Range: 48 -5t and 58.62 cycles for reading in either 00 or 60 cycles. Voltage: $125^{5}$ volts $\pm 20$ volts. Accuracy: $\pm 0.3 \%$ of designated frequency. Power Consumption: 1 watt. Resistance: Approximately 100 ohms per volt. Flush pancel mounting.

## PANEL INSTRUMENTS

These panel instruments reflect half a century of instrument skill, and the Weston tradition of building instruments to the highest standards of dependability and service.
Models 301, 425 and 476 are available in round flush bakelite cases $31 / 2^{\prime \prime}$ or $33 / 9^{\prime \prime}$, and $31 / 4^{\prime \prime}$ metal cases with black finish; also in round surface metal and rectangular flush bakelite cases. Models 301 and 425 supplied in round surface bakelite cases. Models 506, 507, 517 regularly supplied in round flush $21 / 2^{\prime \prime}$ bakelite and black finished metal cases; flush narrow flange metal and rectangular flush bakelite cases with a clamp for panel mounting. Model 506 available in surface metal case. All are calibrated normally for use on non-magnetic panels. For magnetic panel use instruments will be adjusted for steel panal thickness of 09"; Order instruments in bakelite cases far use on circuits above 300 volts when it is not pessible to connect in grounded side of line. For other instrument prices, write to Weston Electrical Instrument Corporation, Newark 5, New Jersey.

# MODEL 980 LINE - WESTON TEST EQUIPMENT 

## A New Simplified Approach to TV Alignment

The Weston Model 980 line provides servicemen with the most advanced, and by far the most simple and accurate method of TV receiver alignment. It comprises all of the instruments necessary for all-purpose observation of complex wave forms by the electronic industry.

With the Westan method, the output of the sweep generator is fed into the calibrator making it unnecessary to connect the calibrator to the TV set. Only two connections are necessary. This eliminates receiver oscillations ordinarily encountered with the conventional method of receiver test hook-up. Further, there is na disoppearance of markers at trap resonant frequencies. Response curve is not disturbed. Annoying trimmer touch-up on trap circuits is minimized.

## WESTON MODEL 985

## CALIBRATOR

The Westan Model 985 Calibrator is a highly functional instrument for TV shop, engineering, laboratory, and indusfrial alignment applications. Markers are pravided for waveform patterns, local tuner oscillator frequencies, and trap circuit alignment. The instrument is extremely useful far making linearity adjustments, calibrating signal generators, and determining signals of unknown frequencies.

## FEATURES

SCALE CALIBRATION: The frequency calibration of each frequency setting can be checked and adjusted with crystal accuracy. Crystal calibrating points are available at 1.5 and 4.5 megacycles throughout the entire scale. A scale shift knob is provided to align properly the scale with the crystal calibrating dots. A neon type bulb is utilized to indicate visibly the crystal frequency points.

SCALE PRESENTATION: Slide rule type in which ore scale is visible at a time. Ten scale range bands available . . . total scale length of $81 / 4 \mathrm{ft}$.

DUAL MARKERS: 4.5 me side band markers permit simultaneous observation of video and sound carrier.

INTERNAL MARKERS: Special circuitry provides an internal marker of either a positive or negative pulse suitable for $\mathbf{Z}$-axis intensity modulation of the scope pattern. This eliminates the necessity of feeding an RF calibrator signal directly into the TV receiver which can cause overload and oscillation in the TV set. The marker is visible even at the sound trap firequencies.

HETERODYNE DETECTION: With an input sensitivity of 500 microvolts, the local TY receiver-tuner channel oscillator frequency can be determined without tuner disassembly.

BAR PATTERN GENERATOR: Amplitude modulated signals of the band oscillator at 400 cyclas for the horizontal linearity check and 300 KC for the vertical linearity check can be readily fed to TV antenna terminals to produce horizontal and vertical bars.

This simplified technique is only possible when the companion instruments - Weston Calibrator and Sweep Generator - are used with a scope having provisions for Z -axis intensity modulation. However, individual instruments in the Model 980 line can be used with available, test equipment in the canventional method of alignment.

SEND FOR COMPLETE DATA ON THE NEW WESTON MODEL 983 OSCILLOSCOPE. (Wide band, Z-axis intensity modulated ideal for color.l Accessories for all instruments described are available.

## SPECIFICATIONS

FREQUENCY RANGE (with Variable Frequency Oscillator):

- 4110 megacycles in 7 bands.
- 170-260 megacycles in 3 bands.
- Use of second harmonic is suitable for UHF 340-520 megacycles in 3 bands.
OUTPUT ATTENUATOR RANGE: $100 \%$ to $1 \%$.
CRYSTAL MARKER ACCURACY: 1.5 mc position $\pm 0.01 \%$
4.5 mc position $\pm 0.01 \%$

INTERNAL MODULATION FREQUENCIES: $400 \mathrm{eps}, 300 \mathrm{KC}, 4.5 \mathrm{mc}$
HETERODYNE INPUT SENSITIVITY: 500 microvolts (VFO)
LINEARITY ADJUSTMENT: Horizontal - 400 cyeles

## WESTON MODEL 984 SWEEP GENERATOR

The Weston Model 984 is o top performance instrument, precision built for effective trouble shooting of sound ond video If circuits, ossocioted frop circuits, iV tuners, video omplifiers ond oll-purpose visuol olignment. It hos o high flot output voltage.

## FEATURES

BLANKING: Special circuitry produces a zero outpuł reference base which is essenfial for relative gain measurements.
RF OUTPUT: Frequency modulated signal, TV Channels 2 to 13 inclusive, complete FM coverage available ty means of two presel selector positions. FREQUENCIES ARE FUNDAMENTALS OF THE OSCILLATOR FREQUENCY.
IF/VIDEO OUTPUT: Frequency modulated signals ranging to 50 megacycles, continuous tuning, signals free from harmonics.
SWEEP WIDTH: Full 10 megacycles on all channels.
Z-AXIS TERMINAL: For use with the Model 985 Calibrator.

## SPECIFICATIONS

SWEEP WIDTH: $0-10$ Megacycles (continuously variable for both IF and $R F$ ranges).
OUTPUT VOLTAGE (RMS): 0.1 Volt . . . sweep is linear.
RF OUTPUT: TV channels 2 to 13 preset. Complete FM coverage available by means of two additional preset selector positions.
IF/VIDEO OUTPUT: 50 Megacycles (continuous tuning).
HORIZONTAL SWEEP FOR OSC $\dagger$ LLOSCOPE: Phase adiustment range - 1650. Frequency - Power Line 60 cycles per second.

CABLE TERMINATION: RF output - 300 ohms balanced. IF output 100 ohms.
POWER: $105 / 125$ volts, 60 cycles.

TUBE CONPLEMENT: 6J6, 6U8, 12AT7, 6X4.
CASE: Grey hammertone finished steel; leather carrying handle. PANEL: Etchad aluminum satin finish.
SIZE: $13.50^{\prime \prime} \times 10^{\prime \prime} \times 6.75^{\prime \prime}$.
APPROX. WEIGHT: 14 lbs. 4 or.
Model 984
Net Price $\$ 199.50$

## WESTON MODEL 981 PROPORTIONAL MUTUAL CONDUCTANCE TUBECHECKER

## FEATURES

METER MEASUREMENT OF HIGH LEAKAGE RESISTANCE: Provides an accurate meter measurement of leakage resistance as high as 5 megohms between tube elements, thus being particularly useful for TV servicing and TV line production assembly.

MULTIPLE SWITCHING FACILITIES: Protection against obsolescence is assured through the use of nine single circuit, twelve position, selector switches. These multiple switching facilities make possible many more combinations of tube connections.

TWIN SECTION TUBES: Three toggle switches make it possible to rapidly check and compare the respective sections of twin section tubes at only one setting of the selector switches

SINGLE SOCKET FOR EACH TUBE BASE REGARDLESS OF TU8E CONNECTION: Eliminates the possibility of plugging a tube into the wrong socket. Sockets are provided for conventional type tube bases as well as acorn, and 7 and 8 pin subminiatures.

HIGH TRANSCONDUCTANCE MEASUREMENT RANGE: A multiplier switch provides the following ranges: 3000 , $6000,12,000,24,000$ micromhos. Signal voltages of $3.2,1.6,8,8$ and .4 volts are provided at a frequency of 5 kilocycles.

ROLL INDEX CHART: Provides comprehensive, up-to-date test data on commonly encountered tubes, as well as those infrequently used.
GRID BIAS, PLATE VOLTAGE, METER SENSITIVITY: The grid bias and meter sensifivity are adiusted by variable panel controls. Plate and screen voltage selection allows checking of all receiving tubes including subminiature types.
VOLTAGE REGULATOR TUBES: A selenium rectifier supply furnishes 200 volts d-c for testing of voltage regulator tubes for maximum d-c current of 65 milliamperas.

## SPECIFICATIONS

FILAMENT VOLTAGES: ,65, 1.1, $1.5,2,2.5,3.3,5,6.3,7.5,10,13$, 20, 27.5, 35, 47, 70, 85, |l5.
SIGNAL VOLTAGES: 3.2, 1.6, .8, . 4 volts, a-c
RANGES: $3000,6000,12,000,24,000$ micromhos.
POWER REOUIREMENTS: 105 to 124 volts, 60 cycles single phase a-c, 311 watła
CASE: Grev hammertone finished steel.
SIZE: $17.56^{\prime \prime} \times 13.25^{\prime \prime} \times 6.00^{\prime \prime}$.

# 980 um: WESTON TEST EQUIPMENT 

## WESTON MODEL 982 VACUUM TUBE VOLTMETER

The Weston Model 982 is a self-contained, battery operated Vacuum Tube Voltmeter. It is particularly adaptable to the Radio-TV Servicing industry where the requirements of peak to peak measurement of a-c voltages exclude the use of conventional meters. This instrument makes possible quantitative measurement of all complex wave form voltages utilized in video, sync and deflection circuits with na a-c line interference in critical measurements.

## FEATURES

BATTERY OPERATED: Unit affords complete isolation from spurious response due to stray a-c fields and circulating ground currents. Extremely low drain for long battery life. Power Consumption: Less than 25 milliwatts.
DIRECT PEAK TO PEAK MEASUREMENTS.
NO SWITCHING OF LEADS IS REQUIRED: One shielded lead is used for all measurements, a.c, d-c, ohms, and peak to peak.
RANGE FUNCTION SWITCH: Makes negative and positive d-c potentials measurable DIRECILY.
HIGH INPUT IMPEDANCE: 10 megohms on d-e for aceurate measurements - 2.8 megs. d-c, RMS - I meg. a-c, peak to peak. NO ZERO SCALE DRIFT: Instrument can be used immediately without waiting for warm up ... resetting of zero corrector when switching from range to range is entirely eliminated.
DC ISOLATION ADAPTOR: Makes d-c measurements possible in the presence of a-c voltages.
FREQUENCY RESPONSE: Suitable for measurement of TV wave forms, such as sync pulses, saw tooth, drive voltages, and other complex wave form voltages.
DISCRIMINATOR ALIGNMENT: Zero corrector knob has sufficient latitude to center scale, so that discriminator measurements can be made.
1\% PRECISION RESISTORS UTILIZED.
RF PROBE is available as an accessory.

## SPECIFICATIONS

ACCURACY: $\pm \mathbf{3 \%}$ d-c - $\pm 5 \%$ a-c, RMS.
IMPEDANCE: 10 megs. d-c - 2.8 megs., a-c, RMS - 1 meg. a-c, peak to peak.

RANGES:

BATTERY LIFE: Battery A* - Approx. 90 days . . . is easily replaceable (Standard 1.5 volt, Size D Cell)
Battery $8^{*}$ - Shelf life approx. 1 year.
SCALE LENGTH: 4.63".
CASE: Grey hammertone finished steel with carrying strap.
PANEL: Aluminum finish with markings etched in black.
SIZE: $10^{\prime \prime} \times 7.38^{\prime \prime} \times 3.625^{\prime \prime}$.
APPROX. WEIGHT: 6 lbs. (complete with batteries and accessories). 4 lbs. (without batteries).
*Based on maximum use -8 hours per day.
Model 982
Net Price $\$ \mathbf{6 9 . 5 0}$

## WESTON MODEL 980 ANALYZER

(VOLT-OHM-MILLIAMMETER)
The Weston Model 980 Volt-Ohm-Milliammeter is a highly sensitive, accurate and rugged instrument with a combination of functional ranges which provide a wide range of test measurement applications in the electronic field. The instrument has a d-c sensitivity of $20,000 \mathrm{ohms} / \mathrm{volt}$, and an a-c sensitivity of 1000 ohms/rolt. Accuracy is $2 \%$ d-c, $3 \%$ o-c.

Range and functianal switching is greatly simplified by use of a single dial for all ranges and functions.

## SPECIFICATIONS

ACCURACY: 2\%, d-c; 3\%, a-c.
SCALE LENGTH: 4.63'.
RANGES:
D-C Volts: 1,6, 8, 40, 160, 400, 1600
at 20,000 ohms/volt.
A-C Volts: 1.6, 8, 40, 160, 400, 1600
at 1,000 ohms/volt.
DB Range: -15 db to +54 db (in six ranges).
D-C Milliamperes: 8, 80, 800.
D-C Microamperes: 80.
D-C Amperes: 8.

Available in $21 / 2^{\prime \prime}, 31 / 2^{\prime \prime}$, and $41 / 2^{\prime \prime}$ sizes JAN Spec. Round Case

Phaostron design and tooling permit the same basic movements in both Ruggedized and Non-Ruggedized instruments.
non-Ruggedized meters built to meet JAN-I-6 and MIL-M-6A
The Non-Ruggedized Meter incorporates all the basic features and improvements of the famous Phaostron Ruggedized and Sealed Meterwith the exception of the shock mounts necessary to produce a Ruggedized instrument to MIL-10304 specifications.
For applications not requiring these extreme exposures to shock, here is a meter that still maintains its excellent constancy of calibration with the same ruggedized movement, miniaturized moving coil assembly, R. F. shielding and aged Alnico Magnets that are featured in the Ruggedized Phaostron models.

WATERPROOF-O-RING SEAL
meets sealing requirements of MIL10304, and the meter can be taken apart in the field for servicing. Reassembly of the meter does not offect the infegrity of the seal.

SELF CONTAINED RUBBER SHOCK MOUNTS...control deflection of the instrument movement under shock. The specially developed rubber has good low temperature characteristics and high dielectric strength. It exhibits no corrosive properties even when exposed to extreme temperatures.

INSTRUMENT HOUSING ... Furnishes magnetic and electrostatic shielding which prevents external magnetic conditions from affecting the meter calibration.

SHOCK MOUNTED JEWELS AND PIVOTS...Large radius pivots reduce the unit loading and are incorporated with shock mounted jewels, assuring continuous accuracy when exposed to extreme shock and vibrational environment.

HAIRSPRINGS . . . for Phaostron RUGGEDIZED meters are formed of silver-coated beryllium copper springs of the shortest length consistent with the torque desired and are unaffected by high shock, vibration and impact.

# Hoyt PANEL AND PORTABLE INSTRUMENTS 

MODEL Nos. 600 and 607

HOYT moving-coil Meters, both panel-mounting and portable, are built on the D'Arsonval principle. All with carefully selected jewel bearings and insulated zero adjustors. Accurate to $2 \%$ of full scale.

Alnico Magnets with softiron or sintered pole-pieces of uniform flux density used in all movements. Permanently correct balance assured by HOYT designed "cross arm" spiral wire
balance in two planes. High torque to weight ratio. Quick response and good damping under all conditions. Either "knife-edge" or "lance" type pointers available on most models.

Small Meters ( $21 / 2^{\prime \prime} \times 41 / 2^{\prime \prime}$ ) have external pivot construction - best for sensitive movements in small instruments. Larger Meters have internal pivots. A wide range of sizes in round and square cases.

MODEL Nos. 635 and 597

NOTE: Meters listed are standard in Flush cases. Surface cases can be supplied in No. 17/L, No. 570, No. 574, if desired-specify case on order. If "in-between" ranges are required, add 50 c to price of next higher range listed. If "zero-center" ranges are reguired, add 50 c to price of that range. For in-hetwern ranges on moving-coil type coltmaters 300 volts and up, ald $\$ 2.00$ to prices shown.

NOTE: Unless otherwise spreified, all meters are calibrated on monmapretie panels. If steel panels are used, kindly so state, giving thickness of steel and size of panel hole, and meters will be calibrated for steel panels at no extra charge. All prices are net -subject to change or with. drawal without notice.

MODEL Nos. 582 and $17 / 3$

*These ranges carried in stock on Model 582 only. (Calibrated for non-marnetic panels.)

## STANDARD SWITCHBOARD SHUNTS

For price of high current Ammeters, add price of 50 milliwoltmeter to price of external shunt. shown below.

| $0 / 25$ | $\$ 6.50$ | $0 / 100$ | $\$ 6.50$ | $0 / 500$ | $\$ 11.00$ | $0 / 1500$ | $\$ 35.35$ |

## DYNAMIC MUTUAL CONDUCTANCE TUBE TESTER

## Most Accurate Engineers' Laboratory Model

Tests Tubes Per Tube Hondbooks and JAN Specifications

#### Abstract

Model 700: For precise laboratory measurements of the most important vacuum tube characteristics, Transconductance (Mutual Conductance). With this Tube Tester it is possible to duplicate the results found in tube manuals. This instrument places a separate voltage on each element of the tube. These voltages can be varied and measured by means of separate variable rheostats and meters in each circuit. A.C. ripple has been completely filtered out of the plate, screen and grid circuits. In addition to providing accurate measurements of Mutual Conductance, it is possible to study the behavior of various tubes when used in non-conventional and special types of circuits. Amplification Factor and Plate Resistance may be obtained from the test results. The HICKOK Model 700 may be operated in either of two ways. First, by making use of alternating current null methods of measurement in which capacitance and resistance errors have been eliminated; and second, by direct reading on a meter. The Null Method of making measurements on the tube is the most accurate and is the one which is recommended where sufficient time for the test is available. Complete with all leads and accessories. Attractive and sturdy case.

## TECHNICAL

1. Micromho ranges are avaitable as follows: 600, 1500, 3000, 6000.
15.000, 30,000 and 641,000 micromhos.
2. Four separate signal voltages are available, 1.0 volts, 0.5 volts, 0.1 volt and 0.05 volts.
3. Plate voltage supply is continuously variable from zero to 300 volts. An indiridual D.C. voltmeter in the plate circuit reads plate voltage at all times.
4. Screen voltage is continuously variable from 0 to 300 volts. This is metered by means of a separate D.C. Voltmeter in the screen circuit.
5. The control grid voltage is continuously variable from 0 to 75 volts. This voltage is measured by means of a separate D.C. Voltrister in the grid circuit. Provision is made to make bias either negative or positive. Suppressor can be used as bias either negative or
control grid if desired.
6. An extra negative circuit is provided for holding unused tube elements negative while test is heing made on other tube elem
7. Provision is made for testing tubes under self.bias conditions when reguired by that particular tuhe or when such informa. When required b
8. Filament voltage naar be applied to the tube up to 117 volts A.C. The separate A.C. Voltmeter in this circuit measures A.C. The separate A. . Volmeter in this circuit measures
the voltage applied to the filament at all times. This voltage the voltage applied to the
is continuously adjustable.
9. A D.C. MiMiammeter is provided for measuring plate current. Acreen current, or wathode current. This reads from 0 to 150

FEATURES...
ma, and may be switched into the three circuits for this purpose.
10. A separate D.C. Microammeter is mounted in the control grid circuit to read grid current, if and when it exists.
11. Amplification factor can be easily calculated from values obtained from the meter readings. Other factors may bc obtained from the
12. Provision is made for testing tapped filaments either in series or in parallel. Provision is made for adjusting to the electrical center of filament type tubes.
14. Twin tube sections may be tested either singularly or in parallel.
15. Screen grid tubes can be connected as triodes or tetrodes. etc., as may be desired. Switching arrangement is provided for this purpose.
16. A built.in power supply is included with the instrument providing thoroughly filtered D.C. on plate, screen, and control grid.
17. A voltage adjustment with an accurate A.C. meter in the circuit is provided to insure exact signal voltage and correct phasing.
18. Designed and calibrated for 60 cycles, 110 to 120 volts operation. Calitration for other frequencies and voltages available.
1). Approximate size - $8^{\prime \prime}$ D. x $20^{\prime \prime} \mathrm{W}$. x $9^{\prime \prime} \mathrm{I}$. Approximate 70 lbs . net, 90 lbs. shipping.

Model 7001: Null Reading Apparatus is self-contained in a small case placed alongside the Model 700 tester. It consists of a voltage supply (source from the Model 700 to assure correct phasing), a sensitive A.C. Galvanometer, a calibrated resistor, and an accurate 1.C. Voltmeter. It is connected directly into the plate circuit of the tube under test by binding posts on the panel of the Model 700. The grid-signal-produced-component of plate current is balanced by an equal and opposite current applied to the plate from the power supply through the calibrated resistor. The reading of the A.C. voltmeter at the bottom of the panel is proportional to the Transconductance of the tube, and is therefore calibrated in Micromhos. The effect of the Null Reading Method is to reduce resistance in series with the plate to zero, thereby assuring the highest accuracies obtainable. The A.C. Voltmeter calibrated in Micromhos is made as accurate as possible and has individually calibrated scales,
Model 7001: for obtaining bridge type null readings of $11 / 2 \%$ accuracy. $8^{\prime \prime}$ D., $8^{\prime \prime}$ W., $131 / 2^{\prime \prime} \mathrm{L}$.
Model 7001
Price: \$200.00

# DYNAMIC MUTUAL CONDUCTANCE TUBE TESTERS 

Model 539A

## ENGINEERS' LABORATORY MODEL RADIO, TELEVISION, LABORATORY, AVIATION and COMMUNICATION ENGINEERS' MODEL

Model 539A: Laboratory tube tester of highest accuracy. Dynamic Mutual Conductance with tube readings in micromhos for reliable test of tube gain under simulated operating conditions. Tests all tubes normally encountered in all phases of electronic workincluding the ruggedized types used by airlines, hearing aid tubes, and miniature types used in TV receivers. Provides increased accuracy for testing high-gain type tubes.
Designed with professional accuracy for engineers and engineering technicians, in the radio, television, aviation, communication and industrial field.
Model 539-A, illustrated at the left. Strong portable carrying case with detachable cover. Most convenient to provide laboratory accuracy for the field engineer. Case is attractively covered with durable black leatherette. $163 / 4^{\prime \prime} \mathrm{W}$., $183 / 8^{\prime \prime} \mathrm{L} ., 71 / 2^{\prime \prime}$ D. 28 lbs . net. 35 lbs . shipping wgt. $110-125$ V.A.C. 40 watts. Price: $\mathbf{\$ 2 8 7 . 0 0}$

## SPECIFICATIONS:

Permits choice of 3 A.C. signals: 0.25 volts: $0-15,000$, 30,000 micromhos. 0.5 volts: $0-6000$ micromhos. 2.5 volts: $0-3000,6000$ micromhos.

Vernier adjustment, with sensitive 2 -range meter, permits accurate setting of grid voltage.

## SPECIFICATIONS:

New Bias Fuse prevents accidental damage to bias potentiometer. New lucite meter window has staticfree coating.
Tube readings in micromhos $-0-3000,6000,15,000$.
Tests tubes under simulated operating conditions.
Contains the HICKOK Tube Gas Test and Tube Noise test.
Incorporates the new test feature that forecasts future life of a tube.
life of a tube.
Most valuable for accurate matching of tubes in television servicing.
Larger, $5^{\prime \prime}$ easy-to-read meter scale and calibrated GM circuit provide increased accuracy in testing today's newer tubes.
Tests all the latest tubes including miniature and subminiature types.
An improved "Short Test" is incorporated into the design of this tester.
Completely built of highest quality components for lasting accuracy and dependability.

## HICKOK... CHOICE OF THE EXPERTS

## TEST INSTRUMENTS

## DYNAMIC MUTUAL CONDUCTANCE IN A SMALLER COUNTER MODEL

Model 533AC, a lower cost dealer's counter model. Attractively designed to set on the counter and increase your tube sales. Highly accurate Dynamic Mutual Conductance circuits. Encourages customers to bring their tubes in where they can see the actual test. If customers' tubes check "OK" you have an excellent opportunity to invite him to bring his receiver in for a thorough check of all its circuits. With the 533-AC you will build customer confidence, increase tube sales and promote your complete radio and TV service.
Model 533AC, illustrated at the left. Satin finish aluminum panel. Beautifully styled, blue enameled steel case. $171 / 2^{\prime \prime}$ W., $181 / 2^{\prime \prime}$ L., $6^{\prime \prime} \mathrm{H}$. 23 lbs . net, 30 lbs . shipping weight. 105-125 V.A.C. 40 watts.

## Model 533AC

Price: $\$ 185.80$

## SPECIFICATIONS:

Dual-scale meter provides readings in micromhos for the technician.
A.C. Sigual 2.5 volts: $0-3000,6000,15.000$ micromhos. Quick, impressive, accurate, and dependable.
Detects more weak, ordinarily passable tubes.
Contains the HICKOK Tube Gas Test and a circuit for accurate forecast of future tube life.
Simple to operate.

Contains all necessary tube information on a handy built-in roll chart.
Tests tubes under simulated operating conditions.
Tests all the latest tubes including television.
Large $5^{\prime \prime}$ easy-to-read meter scale and calibrated GM circuit provide increased accuracy in testing today's newer tubes.
Contains the new HICKOK improved "Short Test."

## ATTRACTIVE DISPLAY MODEL.

Model 533DM
Price: $\$ 199.20$

## most effective

## TUBE SALESMAN

Model 533DM. Dealers who use this tube tester enthusiastically report that it is the best salesman they ever used.
Customer convincing, the 533-DM contains a huge, illuminated nineinch meter that clearly and accurately shows condition of the tube under test. Dual-scale meter provides micromho readings for the technician, and a multi-color "Good", "Replace", scale for easy customer interpretation across the counter.

Contains the HICKOK Tube Gas Test, and a circuit for accurate forcast of future tube life.
Detects more weak tubes.
Tests all the latest tubes including television.
$A C$ Signal 5 Volts: $0.3000,6000$. 15,000 micromhos.
Model 533DM, illustrated at the left. $9^{\prime \prime}$ chrome meter case, satin finish aluminum panel. Strong, at: tractive, enameled steel case. $261 / 2^{\prime \prime}$ $11 . .17^{\prime \prime \prime}$ W.. $11^{\prime \prime}$ D. 33 lbs . net. 43 lbs. shipping weight. $110-130$ V.A.C. 65 watts.

## TV PICTURE TUBE TESTER

- Lights TV picture tube .... Places actual raster on the face of the tube. NO OTHER TESTER DOES THIS. Tests all sizes of electromagnetically deflected TV picture tubes . . . Both electromagnetic and magnetic focus . . Both glass or metal shells. - Das definite and accurate rejection limits. Actually measures light output. Dual fused for full protection. Shorting. switch arrangement prevents shock hazard. High voltage . 7000 volts DC is more than enough to illuminate aluminized screens. Horizontal sweep frequency is 15,750 cps nominal sawtooth; vertical is 60 cycle sinusoidal. * When used with any standard HICKOK Dynamic Mutual Conductance Tube Tester, 590 will also accurately check for emission, shorts. gas content and grid control. Portable case $71 / 2^{\prime \prime}$ H., $191 / 2^{\prime \prime}$ W., $18^{\prime \prime} \mathrm{D} .25$ lbs. net; 33 lbs ship. $105-125^{2}$ V., $50-60$ cycles, 60 watts. Single and double ion traps, test leads and protective goggles are included.

## TUBE TESTER ROLL CHARTS

HICKOK periodically issues revised tube reference charts to include the data on all tubes available at time of each printing. Announcement of the availability of each new chart is sent to all registered owners of

HICKOK tube testers. This is another HICKOK service designed to help you maintain the speed and accuracy necessary in your profession. $\$ 1.00$ delivers up-to-date chart to you.

## TEST INSTRUMENTS

RADIO and TELEVISION TECHNICIANS' SMALL SIZE MODELS

Model 600A

Price: \$164.00

## DYNAMIC MUTUAL CONDUCTANCE IN A HANDIER, PORTABLE SIZE

Model 600A: New lighter weight portable. Dynamic Mutual Conductance in a radio and TV technicians' popularly priced model. Smaller, handier, but built to the high HICKOK standard for accuracy and dependability. A very popular model for on-location or shop-bench servicing. The 600A may also be used for lab. and industrial applications.
Model 600A, illustrated at the left. Strong portable carrying case with detachable cover. Case is attractively covered in durable, dark red leatherette. $163 / 4^{\prime \prime}$ W., $113 /^{\prime \prime}$ L., $71 / 2^{\prime \prime}$ D. 16 lbs . net, 21 lbs . shipping weight. $110-120$ V.A.C. 40 watts.
HICKOK testers remain up to date. . . . Periodically revised rollcharts, covering new tubes, are available to all registered owners of HICKOK Tube Testers.

SPECIFICATIONS:

Scale readings in micromhos for most accurate tube evaluation. A.C. Signal 2.5 volts: $0-3000,6000$, 15,000 micromhos.
Contains the HICKOK Tube Gas Test.
Acclaimed by the experts as a must for accurate television servicing.
New, large $5^{\prime \prime}$ meter scale is easier to read more accurately.

Detects more weak tubes with professional accuracy. Tests tubes under simulated operating conditions.
Tests the latest tubes including miniature and subminiature types.
New bias fuse prevents accidental damage to bias potentiometer.
Contains the new HICKOK improved "Short Test."

## ALL-PURPOSE TUBE and SET TESTER IN A HANDIER, PORTABLE SIZE

Model 605A: New, lighter weight portable. Radio and television technicians' popularly priced, all-purpose tube and set tester with built-in 20,000 ohm per volt D.C. multimeter panel. Designed for speedy, highly accurate radio and TV servicing.
Built to the high HICKOK quality standard throughout. Provides Dynamic Mutual Conductance circuits with tube readings in micromhos. A popular technicians model for on-location servicing. Smaller, lighter, but built entirely with highest quality components for accuracy and dependability.
Excellent for leakage tests of electrolytics, and checks for hum in any stage of receivers. Built with a minimum number of jacks. Ranges are selected with a rotary master switch. Test leads supplied.
Model 605A, illustrated at the left. Same case as Model 600A, above 17 lbs . net, 22 lbs shipping weight 110-120 V.A.C. 40 watts.

## SPECIFICATIONS:

Contains all features of the Model 600A listed above, including the HICKOK standard built-in roll chart and new HICKOK improved "Short Test."
New, large $5^{\prime \prime}$ meter scale is easier to read more accurately. Attractive lucite window has static-proof coating.
Accurate, built-in multimeter panel measures:
Volts: 0-1000 A.C. - D.C. in four ranges each.
Ohms: 20,000 per volt D.C.
1,000 per volt A.C.

Resistance: 0.1 to 100 megohms. (Center scale 25, 2500, 500,000 ohms.)
Inductance: to 70 henries. (By use of conversion chart furnished).
Capacitance: 50 microfarads, 5 microfarads, as low as .001 microfarads.
Current: D.C.; 10, 100, 500 MA .
Decibels: -10 to +50 .
New bias fuse prevents accidental damage to bias potentiometer.

> HICKOK... CHOICE OF THE EXPERTS

## THE ACCEPTED TV ALIGNMENT GENERATOR

## Model 610A

Price: \$219.00

Power Supply: 115-125 V., 50-60 cycles, A.C.
Tube Compliments: 6J6-Variable oscillator; 6J6-Fixed oscillator: 6J6-Mixer; 6SN7-Crystal oscillator \& marker oscillator; 6.5-Audio oscillator; 6X5Rectifier.
Net 28 Jbs. Shipping Weight: 36 lbs.
Size: $161 / 4^{\prime \prime} 131 / 4^{\prime \prime} \times 7^{\prime \prime}$; Satin aluminum finish parel; Blue Hammertex finished ste:l portahle case.

Model 610A: Popularly priced TV sweep generator Harmonic output useable for UHF. Contains 3 nost practical markers including Absorption. Marker Range: 19.5 to 48 m.c. - Covers all I.F. frequencies in TV receivers.
Contains linear swecp with unusual accuracy to $2 \%$. Hickok ferrous modulator furnishes symmetrical pattern response curve for casier and more accurate readings.

## THIS ONE INSTRUMENT DOES THIS

1. Provides accurate, complete visual alignment of any TV
2. Veceiver. Visualy align IF stages of any television receiverincluding the old and current bands, and new bands. Marker range- 19 to 48 mc .
3. Align all traps with a calibrated sigual-modulated or unmodulatel- 19 to 48 mc .
4. Insert a marker-accurate to .05 mc -at any point along the $1 F$ response curve. This marker frequency is directly calibrated on a dial $91 / 2$ inches long.
5. Align IF or RF Sections by single stage method-with high output.
6. Attenuate the output down to a very low signal in microvolts.
7. Highly stable.
8. Uutput multiplier control is 5 -stage with a vernier control calibrated fron 1 to 10.
9. Panel Jack accommorlates separate plug-in calibrating crystals for local TV channels. if desired.
10. Makes possible a crystal controlled frequency modulated or unmodulated for any frequency as low as 2 mc to the upper television channel No. 13 at 216 mc .
upper eeverision channet
11. Temperature compensated.
12. Completely shielded attenuator
13. Sweep phasing control.
14. Ty sweep frequency.
15. WM sweep frequency

## TELEVISION RF MARKER and Crystal Calibrator

## Model <br> 680

## TECHNICAL CHARACTERISTICS

Power supply required: 20 Watts, $105-125 \mathrm{~V}$ AC 50.70 cycles.

RF Output: $53.89 \mathrm{MC}, 174-217 \mathrm{MC}$.
VHF $106-178 \mathrm{MC}$ 2nd harmonic
UHF $424-712$ MC 8th harmonic
$522-651 \mathrm{MC}$ 3rd harmonic
696-868 MC 4th harmonic
15 V . RMS RF output, 31 crystal check points at 2.5 MC .

Size $111 / 4^{\prime \prime}$ W $\times 8 \frac{1}{4 \prime \prime} H \times 7^{\prime \prime} \mathrm{D}$, attractive portable steel case.
Weight: $13 \mathrm{I} / 4$ ths. net; 18 lbs . shipping.

Model 680: A perfect companion for the HICKOK 610-A TV Alignment Generator to provide the most complete, overall TV alignment including UHF.

The 680 is designed to rapidly solve the growing TV front-end maintenance problems. Thousands of TV front-cnds are failing daily due to age. The usual procedure of returning these units to the manufacturer for replacement has become increasingly difficult. Now, with the 680 you can build a big business on repairing TV front-ends yourself - to crystal accuracy. The 680 has directly calibrated channel, sound and picture frequencies accurate to $.05 \%$. Covers the ranges of 53-89 MC and 174-217 MC on fundamentals and to 868 MC on harmonics.

The 680 also is a crystal standard with choice of 3 crystals provided by means of a front panel switch. (A 2.5 MC crystal is supplied.) The built-in magic eye provides a visible zero beat indicator; a phone jack is also provided for an audiable indicator.
The 680 can be used as a heterodyne frequency meter for calibrating other generators up to 900 MC .
This fine instrument is the latest HICKOK development and can be used as a crystal standard in the shop, laboratory or factory, to check oscillators, generators and front-end or over all response curve of a TV receiver to an accuracy of $.05 \%$.

Price: \$129.50

## HICKOK

CHOICE OF THE EXPERTS

VHF-UHF MARKER GENERATOR

Model 690: Crystal controlled. High .25 volt RF output. Provides dual markers with any TV sweep generator. Features another HICKOK First - a Non-Parallax shadow type dial. Conventional dials unless viewed at exact, right-angle introduce error, since hairline indicator is always a slight distance from the scale. The HICKOK Non-Parallax dial can be viewed from any angle without introducing error. The 45 inches of dial can be self-calibrated to within $.05 \%$ accuracy with selfcontained crystal calibrator. Complete RF coverage channels 2 thru 83. Also, 3.57 mc crystal (color burst frequency) is available. Leading TV manufacturer's engineers have tested this unit and comment highly on its frequency, stability and time saving features. You need the 690 for VHF or UHF black and white alignment right now.

## Model 690

Price: $\$ \mathbf{2 3 7 . 0 0}$
OUTSTANDING FEATURES

- Exceptionally rapid and time saving method is employed in calibrating the dial. No counting of beats -no interpolation-no remembering of frequencies.
- Calibrates other signal generators to crystal accuracy.
- Complete RF coverage thru chamel 8.3. Picture and sound settings marked for all channel:.
- Marker can be modulated by self-contained 400 cycle. Especially valuable in stage-by-stage alignment. Eliminates tise of another instrument.
- Provision for wo other crystals, in addition to 2,5 mic crystal supplied. ( 3.57 mic crystal, frequency of the color burst, available for color work.)
- View two markers at once on response curve . . . main marker and marker of crystal selected. Greatly speeds alignment.
- Both electronic-eye and headphone jack provide visual or audible zero-beat.
- Attemuation is controlled by both step attenuator and vernier for completely regulated output.
- Linit is completely double-shiclded.
- All VHF frequencies on fundamentals. No spurious or confusing beats.
- Strong, attractive steel portable case. $16 \frac{1}{2} /{ }^{\prime \prime}$ W., 131/4" H., 8" D. 26 lbs. Net; 34 lbs. Ship.

## HETERODYNED MARKER ADDER

Model 691: This unit in conjunction with the Model 695 Sweep-Alignment and Model 690 Marker provides the utmost in TV alignment technique. Takes guesswork out of alignment jobs. Eliminates errors previously introduced by overload due to markers. The 691 provides a marker visible at all times (including trap points) and will not change in amplitude or distort the response curve WHAT-SO-EVER. This feature, in addition to the accuracy and minimum leakage of the other units ( $690-695$ ), will greatly simplify any alignment. The outputs of the sweep and marker generators are heterodyned and applied to a scope in such a manner that the marker signal will never pass through the receiver itself - therefore cannot cause overloading. This unit will work well with any of your present equipment that has an output of 50,000 microvolts or more.

## Model 691

Price: \$79.50

OUTSTANDING FEATURES

- Input RF volage required; 50,000 microvolts.
- Output marker voltage: maximum 3 volts.
- Attenuation oi marker: variable 0 to 60 db .
- Attenuation of response curve; variable 0 to 20 db .
- Input impedance: 90 ohms.
- Power supply required: 105-125 volts A.C., 50-60 cycles, 25 watts.
- Attractive steel portable case. $11 \frac{1}{4} 4^{\prime \prime}$ W., $8 \frac{1}{4 \prime \prime}$ H., $7^{\prime \prime}$ D. 10 lbs . Net; 15 lbs . Ship.

# VHF SWEEP-ALIGNMENT GENERATOR All Electronic Sweep 

Model 695: Here is a completely new generator with ALLELECTRONIC sweep. It will exactingly fill top requirements of the professional TV serviceman or lab. engineer. There are no moving parts to wear out. Though moderately priced, this unit features a sweep signal that is absolutely linear and without amplitude modulations. Features a high .3 volt output. Triple shielded - no leakage problem here. Signal can be attenuated from 3 to 300,000 microvolts. $0-12$ volts variable bias voltage with continuous tuning allows set alignment to more sensitive for "fringe areas," or less sensitive for "prime areas" to prevent overloading. Continuous tuning and detailed, easy-to-read scales provide foolproof method of alignment. Three RF oscillators provide complete VHF coverage on fundamentals and heterodyned output IF 0 to 50 mc . This assures the strong signal necessary for aligning front ends.

## Model 695

Price: \$265.00
OUTSTANDING FEATURES

- All-Electronic sweep.
- Fundamental output on all VHF channels ( 3 volt output).
- Continuously variable tuning.
- 0 to 50 mc . IF heterodyned output, 15 volts output.
- Blanking of oscillator, provides reference base line.
- 1.00 db . attenuation, 3 volt to 3 microvolt.
- Triple shielded, very low leakage. Provides attenuation down into "snow" region to check IF's for oscillation.
- Metered variable DC bias voltage 0.12 volts. Eliminates use of batteries for fixed bias.
- $170^{\circ}$ of phasing.
- Sweep width of $0.15 \mathrm{mc} ., \pm 3 \mathrm{mc}$. depending on frequency.
- Linear sweep.
- Amplitude variation of less than 0.1 db . per me.
- Output impedance is 90 ohms.
- Attractive steel portable case. $165 / 4^{\prime \prime}$ W., $131 / 4^{\prime \prime}$ H., $8^{\prime \prime}$ D. 30 lbs. net; 38 los. Shipping.

## NEW UHF SWEEP-ALIGNMENT GENERATOR

- Fundamental output on all UHF channels
- Linear, All-Electronic sweep
- Triple shielding - low leakage - better efficiency

Model 697: An entirely new instrument developed to meet the critical requirements for UHF alignment. Previous methods of UHF alignment depended on the use of harmonics which in many cases were both confusing and erratic. Fundamental output on all channels from 14 to 83 is one reason why this instrument will speed up alignment tasks. Fundamental output and excellent linearity are provided along the entire sweep width, which is as high as 75 mc . Amplitude is constant over the entire sweep range. One of the major HICKOK achievements in the development of the 697 is ALL-ELECTRONIC sweep... no moving parts to wear out or lose efficiency. Triple shielding suppresses leakage to the practical level - far below other comparable equipment. This instrument is specifically designed to provide bare minimum loading effects on UHF circuits under alignment.
Model 697
Price available on request.
OUTSTANDING FEATURES

- All-Electronic sweep.
- Fundamental output on channels 14 to 83 with .5 volt RF output.
- Continuous tuning.
- Blanking of oscillator gives reference base line.
- Piston type attenuator . . . better than 100 db . attenuation.
- Very low RF leakage . . . unit is triple shielded.
- Variable DC bias voltage of $0-12$ volts with calibrated output.
- $170^{\circ}$ of phasing.
- Sweep width of 0 to 25 mc . at low end of band, and 0 to 75 mc . at high end.
- Amplitude variation is less than 0.1 db . per me.
- Very linear sweep.
- Output impedance is 50 ohms or 300 ohms.
- Strong steel portable case in attractive design to match the HICKOK set. $161 / 4^{\prime \prime}$ L., $13 \frac{1}{4^{\prime \prime}}$ II., $10^{\prime \prime}$ D. 24 lbs , Net; 31 lbs . Ship.

## TEST INSTRUMENTS

## NEW UNIVERSAL VIDEO GENERATOR COMPATIBLE FOR COLOR OR BLACK AND WHITE RECEIVERS

Price: \$318.90

This fine new instrument is the first of its kind. Now ayailable to rapidly and accurately solve your service prohlems. Does in minutes many of the TV servicing johs that would require hours by other methods.
The 650 C has a new timer circuit which delivers video pulses of 60 cycles, 900 cycles, 15,750 cycles and 315 kc ., singularly or in any combination, both positive and negative output. Pulses are all locked together and crystal controlied for greater accuracy.

Pulses can be used directly, metered in peak-to-peak volts or to modulate the self-contained RF oscillator.
RF oscillator covers all TV channels in two bands (2-6 and 7-13), all on fundamentals. RF output is metered at all times from 1 to 10,000 microvolts with calihrated attenuation and variable percentage modulation. RF can be externally modulated with video trequencies from 5 cycles to 4 MC with variable percentage modulation on all channels.

Self-contained. substitute external video amplifier, 5 cycles to 4 MC with a variable gain from 0 to 10 , with high input impedance, low output impedance and metered peak-to-peak voltage output.

Includes horizontal and vertical sawtooth voltages which can be directly substituted for vertical and horizontal oscillator in a TV receiver. Both the vertical and horizontal sawtooth amplitude is sufficient to give full raster deflection and in the case of tyback type high voltage power supplies the horizontal sawtooth can be used to light up the picture tube.
The 650 C also contains an AC line voltage scale for instantaneous check on line voltage fluctuation, a common source of TV trouble.
This tester is an absolnte minst for accurate registration adjustment of the three color guns of color TV receivers, as well as accurate adjustment of focns, convergence, centering of ind aspect beams. purity yoke, dynamic convergence, linearity and aspect TV ratio. A rervicing now.

## OUISTANDING

FEATURES
Substitute Video Amplifier with gain of 0 to 10.
crystal controlled timer for greater accurocy.
Fast, accurate, the ideal instrument fer fringe area TV servicing.
nereases TV maintenance profits - allows you to trouble shoot many more installations per day.
Built only by HICKOK. Contains highest quality companents threughout for lasting accuracy and dependability.
Quickly localizes and accurately identifies trouble in ony section al a TV
Provides electronically accurate bar or dat pattern on the screen of any TV receiver - inderendent of station operation.
R.F. output, directhy calibrated in microvalts for sensitivity measurements. Atractive steel poirable case. $161 / 4^{\prime \prime} \times 131 / 4^{\prime \prime} \times 7^{\prime \prime} .29$ lbs. net; 37 lbs. shipping. Test leads included.

## MOST PRACTICAL UNIVERSAL NOISE GENERATOR

Industrial Engineer and
Radio-TV Technician's Model

Price: \$282.00
(with 300 mri head)
Also available with 1000 mc head. Priced accordingly higher.

Model 755: Extremely versatile unit for measurement of Noise factor in any receiver. This equipment is HICKOK engineered to provide the First Noise Generator in a completely self-contained unit. No additional equipment is required Unit has two indicating Meters. Most valuable for improved TV service. Quickly indicates amount of Noise inheren in receiver. By redncing the Noise in a TV receiver, the snow is reduced resulting in a clearer picture.
The Model 755 is designed with a VTVM side and a Generator Noise Side.
VOLTMETER SECTION :
Meter readings: 0.0 .1 V., 0.5 V., 1.0 V., and 5.0 V., Zero Center. Zero adjust provided for cancelling out contact potential (plus or minus 1 Volt maximum).
VTVM Meter scale permits reading double power to eliminate referring to instruction book for calculations. VTVM is voltage regulated.
OUTPUT SECTION:
DF Meter output readings
Receiver Input Impedance 300 Ohms: 0.19 db
Receiver Input Impedance 75 Ohms: $0-19 \mathrm{db}$
Receiver Input Impedance 50 Ohms: $0-17 \mathrm{db}$
NO BALUM NECESSARY TO MATCH IMPEDANCE.
Frequency Response: Flat from 10 MC to 250 MC .
SPECIAL FEATURES:
Permits extremely low sensitivity measurements. Has built-in standyhy position for Noise output. Spring loaded output control-increases life of noise diodes by returning it to zero output when not in use.
Noise diodes are built into probe whereby the output noise is connected directly to receiver input. This eliminates cancelling out capacities to the generator.
Three separate scales on the noise figure Meter vermit more simplified reading.
UHF Head with $100-1000 \mathrm{MC}$ is available .50 Ohms output, $0-17 \mathrm{db}$. Dual-purpose portable case. $1634^{\prime \prime}{ }^{\prime \prime} W$., $131 / 4^{\prime \prime} \mathrm{H}^{\circ} .8^{\prime \prime} \mathrm{D} .25 \mathrm{lbs}$. Net; 33 lbs . Shipping. Power consumption: 50.60 cycles, 115 Voits, 50 Watts.

## NEW SINE-SQUARE WAVE GENERATOR

## For Laborafory and Industrial Use

Model 710: This new instrument is a professional laboratory design to provide an accurately calibrated source of sine-wave and square-wave functions over a very wide frequency range.

## TECHNICAL FEATURES

- Sine wave total harmonics distortion below $1 \%$.
- Hum level better than 90 db down.
- Square wave rise time less than 0.1 Micro-second
- Direct coupled output for square wave.
- Synchronization output provided.
- Edge-lighted parallax correcting hairline on frequency dial facilitates lighly accurate readings.
- May be used as a portable instrument or for rack Mounting.

FREQUENCY COVERAGE
20 cycles to 1 MC in 5 ranges.
(A) Scale: 20 to $200 \mathrm{cps} ; \mathrm{xl}, \times 10, \times 100, \times 1 \mathrm{~K}$.

Calibrated to $\pm 2 \%, \pm 1 \mathrm{cps}$.
(B) Scale: 200 KC to 1 MC .

POWER CONSUMPTION :
$50-60$ cps., 115 Volts, 110 Watts, $83^{\prime \prime}$ H., $12^{\prime \prime}$ D., $16^{\prime \prime}$ W. ( $19^{\prime \prime}$ wide when rack mounted). 44 lbs . Net; 52 lbs. Shipping.

Wodel 235: Attractively designed technician's equipment for measurement of Field Strength. Large $4^{\prime \prime}$ meter is accurately calibrated in microvolts. Handy portable size design has self-contained battery power supply.

RANGES: VHF range has a sensitivity of from 10 Microvolts to 100,000 Microvelts.

LHF range sensitivity is from 30 Microvolts to 50,000 Microvolts.

TECHNICAL FEATURES: Frequency calibration is marked in Channel numbers for easier measurement. An Impedance Matching Network is available.
${ }_{85}$ Phone Jack Audio Monitoring.
$85 / 2^{\prime \prime} W^{W} .5^{\prime \prime \prime}$ D., $111 / 2^{\prime \prime}$ H., 10 lbs . Net; 15 lbs.

UNIVERSAL CRYSTAL CONTROLLED SIGNAL GENERATOR

Price: \$195.00

## MODEL 288X

## High Output AM-FM Generator

A variable frequency signal generator, crystal controlled, for accurate AM and FM alignment. Useable in TV alignment as a marker oscillator in cennection with television frontend or IF alignment, or the 288 X can also be used as an FM generator to align the sound IF amplifier of a TV receiver. RF unmodulated or internally amplitude modulated at 400 cycles, or internally frequency modulated. RF variable from 110 kc . to 110 mc . on $\mathbf{A M}$ and 110 kc . to 160 mc . on FM, in 7 bands, all fundamental. Fixed $50-\mathrm{mc}$. output is internally frequency modulated at 60 cycles or at 400 cycles for FM and television. Fixed, crystal-controlled $100-\mathrm{kc}$. and $1000 \cdot \mathrm{kc}$. outputs either unmodulated or internally amplitude modulated. Fixed 1000 kc . internally frequency modulated at 60 cycles for visual IF alignment. 50 mc . and 1000 kc . oscillators beat with variable RF oscillator to give variable FM signals. Variable AF output $0-15,000$ cycles; fixed AF, 400 cycles. Outputs continuously variable with multiplier and linear controls. Db meter-10 to plus 38 in 3 ranges. $105-125$-volt 60 -cycle operation. Test leads included.

## SPECIFICATIONS

Dimensions- $131 / 4^{\prime \prime} \times 166^{\prime \prime} \times 7^{\prime \prime}$ D. Scale--over $100^{\prime \prime}$
Net Weight- 251 bs .-Ship. 33 lbs . Satin-aluminum finish panel Meter-Model $51 \mathbf{X}$
steel case

O F
THE
EXPERTS

Model 292X
Price $\mathbf{\$ 2 9 6 . 0 0}$
Output cable, test leads. 1000 kc crystal, ant 20 db pad are included.

## 125 KC to 120 MC and 150 MC to 220 MC on fundamentals.

Model 292X: Here's an outstandingly accurate microvolt signal kenerator that meets the servicing, aligmment and calibration needs of such high-frequency users as police, fire departments, railroads relay press, maritime mobile, etc. Covers from 125 kc to 120 mc and from 150 mc to 220 mc -all on fundamentals. with an accuracy of $1.0 \%$. Has special provision for an optionally available crystal. controlled oscillator accurate to $005 \%$ in $30-50$ and $152-162 \mathrm{mc}$ mobile ranges. Has easy-to-read calibrated $8^{\prime \prime}$ dial with over $100^{\prime \prime}$ of scale Output voltages: 400 cycles AF, variable $0-2$ volts; RF unmodulated or modulated at 400 cycles-directly calibrated $0-100,000$ microvolts by means of internal crystal detector for meter. Also has provision for external modulation. Internal 1000 kc crystal-controlled reference oscillator with an accuracy of $0.5 \%$. Has excellent shielding; leakage is less than 0.2 microvolt. All controls are plainly marked. This new HICKOK Model 292X is the only popularly priced Microvolt Gen erator available that covers both Upper Channel TV and Mobile frequencies-on fundamentals.

## FEATURES

- Covers all AM, FM, TV and Mobile Frequencies in ranges. Also ideal for industrial applications.
- Crystal controlled. Temperature compensated from 2

Amplitude Modulated and Unmodulated Output from . 2 to 100,000 microvolts

- Cast Aluminum Attenuator for Minimum Signal Leakage
- May be externally modulated from 15 to 10,000 cycles per econd
- Decibel Meter for faster servicing to indicate reference leve
- Self-contained Crystal Oscillator Circuit-Crystals from 1 mc to 20 mc are available.
- Negligible Change in Frequency due to output
- Most accurate Microvolt Generator available for practical radio servicing and communication's manufacturers final inspections

TECHNICAL CHARACTERISTICS

Fundamental Frequency Coverage: Bands A through G-125 kc to 120 mc : Band $\mathrm{H}-150$ ₹o 220 mc . Output Calibrated: . 2 to 100,000 microvolts. Output Impedance: X1, X10, and X100 .2 to 100,000 microvolts. Output Impedance: X1, X10, and X100 microvolts - 5 ohms; $X 1 \mathrm{~K}$ - 30 ohms. $\lambda 10 \mathrm{C}$ - to 100 ohms. Modulation Fixed: 400 cycles. AF Output: 0-2 volts. The Model $292-X$ is wired for plug-in type crystals ( $152-162.30-50 \mathrm{mc}$ ). With accuracy to . $005 \%$. Self-Contained crystal oscillator circuit has crystal jack on front panel permitting crystal outputs at any
frequency from 1000 kc to 20 mc on fundamentals; and to over 250 mc on harmonics. Type CCO. 56 Crystal Oscillator unit avail. able with frequency accuracy to $.005 \%$ for Mobile Band coverage Self-Contained Decibel Meter: -10 to +38 DB in 3 ranges. Power Consumption: 35 watts at 115 volts. Meter Model : 50; 105-125 V. Consumption: 35 watts at 115 volts. Meter Model: 50 ; $105-125$ V.,

Model 292XAL
Price $\$ 326.00$

## AIRLINE MICROVOLT SIGNAL GENERATOR

Model 292XAL: The only Microvolt Generator to provide complete coverage from 125 KC to 165 MC on fundamentals.

Especially built to meet the exacting requirements of aircraft radio technicians. This one instrument provides complete coverage of the aircraft band including all the necessary IF frequencies, and covers all RF frequencies with calihrated output. Can be externally modulated from 15 to 10,000 cycles per second, and measures both input and output of units under test. This fine generator is, beyond a doubt, the best high quality oscillator available today at anywhere near its price range.

TECHNICAL FEATURES: Maintains dependable and accurate frequency calibration, is free of wave distortion, and has no spurious signals in the output system. Temperature compensation, self contained crystal oscillator reference level, and crystal controlled. Cast aluminum attenuator is especially designed to faithfully attenuate without frequency discrimination.

Doubly shielded for absolute minimum signal leakage. Model 292XAL Technical Characteristics are the same as the Model 292X listed ahove EXCEPTING that the 292..AL has continuous frequency coverage from 125 KC to 165 MC . However, all other features and accessories remain the same for both instruments.

## CAPACITANCE TESTER, TRUE VACUUM TUBE VOLT-OHM MILLIAMMETER

POWER SUPPLY: $105-125$ Y, 50.70 cycles. Ranges: Valts, A-C and D.C 0-3, 12, $30,120,300,1200$. Mils (0.C): $0-3,12,30,120,300,1200$. Cop.: $0-10,000$ minf in 2 ranges, 0.1000 mf in 5 ranges. Ind.: 50 mh -100 henries. Ohms: 0.1 ohm to 10,000 megohms in 7 ronges. Frequency: A-C up to approximately 200 me moy be meosured. Inpus Impedance: Volis D.C: 15 megohms, Volt A.C: 12 magohms. Tube Complement: $6 \times 5 \mathrm{GT}$ A-C rectifiers, $65 J 7$ cathode follower, 6SN7GT vocuum fube voltmeter.

## LABORATORY SIZE . . . LARGE NINE-INCH METER WITH ZERO CENTER SCALE

Model 209-A : A universal test instrument for all radio and elec. tronic service work. Accurately and easily measures wide ranges of inclutances. capacitances. resistances, currents and voltages, both A. ('. and 1 ).

This new giant size instrument matehes the size and attractive ness of the Hickok complete line of test equipment. Large 9 -inch meter improves ease of operation. Has a 1200 Volt scale, and a new Peak-to-Peak Voltmeter to measure peak to peak or RMS new Peak-to-P
The new Zero-Center scale on D.C. permits much faster alignment of discriminator and other galvanometer applications.

SPECIFICATIONS:

1) imensions-1.31/4". H.. 161/4" W., $7^{\prime \prime}$ D.

Heeight-18 ths. Net; 26 lbs. Ship.
Rlue baked Hammertex finish steel case with etched aluminum panel
High input imperance prevents loading when making voltage tests. Measurement of inductances are possible with the use of a conversion clart supplied in the instruction book. Possibility of damage due to overload is slight in all except current measurements. Power supply permits normal operation and accuracy with wide line voltage fuctuation.

Price \$132.50
Including high frequency probe and all leads.

## NEW LOW PRICE ELECTRONIC VOLT OHMMETER

- Huge HICKOK-Built 9" Meter
- Accurate Peak-to-Peak Scales
- Fast Continulty Tests
- AC-DC Single Unit Probe

Model 225: HICKOK practical engineering provides the low-cost answer to your needs for a multi-range Volt-Ohmmeter in a professional engineer's top quality instrument.
Designed around the HICKOK-built $9^{\prime \prime}$ internal pivot meter, the 225 offers many new features to improve the speed and accuracy of your radio-TV servicing.
Extra long scales minimize reading errors and permit permanent placement of the equipment at a more practical working distance.
Additional features: - Built-in audio tone speeds continuity tests - Accurate peak-to-Peak scales for measurement of complex waveforms © D.C. ZeroCcnter scale for galvanometer applications - New, HICKOK single unit A.C.-D.C. probe.

## SPECIFICATIONS:

Diniensions-131/4" H., 161/4" W. ${ }^{\prime \prime} 7^{\prime \prime}$ D.
Weight-15 lbs. Net.- 23 lbs. SHhipping.
Blue baked Hammertex finish steel case with etched aluminum panel.
Price \$89.50
Test leads and dual-purpose ACcluded. probe are included.

RANGES-D.C. VOLTMETER:
Plus D.C. Volts: 0 to $1.5,3,12,30,120,300,1200$.
Minus D.C. Valts: 0 to $1.5,3,12,30,120,300,1200$.
Input Resistance: 10 megohms with new HICKOK DualProbe.
Zero-Center Scale: For discriminator aligument and other galvanometer applications.

OHMMETER:
Design Center: 10 ohms.
Ranges: x1, x10, $\times 100, \times 1000, \times 10,000, \times 100,000$. x1 megohm. Readability: 0.2 ohms to 1,000 megohns.
A.C. VOLTMETER:

Ranges A.C. RMS: 0 to 1.5, 3, 12, 30, 120, 300, 1200.
Ranges A.C. Peak-to-Peak: 0 to 4, 8, 32, 80, 320, 800, 3200.
Frequency Characteristics : Flat from 40 cps . to 3.5 mc .

## HICKOK... CHOICE OF THE EXPERTS

# HANDY SIZE ELECTRONIC VOLTMETER includes: New, dual-purpose ac-dC probe 

Model 215
Price: \$67.50
Dkal Probe and Test leads included.

A single unit with built-in switching arrangement. (Patent applied for)
$\star$ Combination RMS or Peak-to-Peak voltage measurements.
丸 New, guaranteed insulated and shock-resistant case.

* Modern lucite meter case with large $5^{\prime \prime}$ easy-to-read scale.
* Handier size for greater portability.
$\star$ Zero-Center for faster discriminator.
Model 215: Is a top grade instrument of highest quality, accuracy and dependability. Though ideal for the radio-television manufacturer or service shop, this fine instrument will meet a great number of applications in the electronic design or industrial laboratory. Exceptionally versatile, the 215 provides the sensitivity and ranges for quick and accurate measurements of sine or complex waves of TV or industrial devices.

## RANGES

D. C. VOLTMETER

Volts: 0 to $1.5,3,12,30,120,300,1200$.
Input Resistance: 10 megohms with new HICKOK Dual-Probe.
Zero-Center. Scale: For discriminator alignment and other galvanometer applications.
OHMMETER
Design Center: 10 ohms.
Ranges $\times 1 \times 10, \times 100, \times 1,000, \times 10,000, \times 100,000, \times 1$ megohm.
Readability: 2 ohms to 1000 megohms.

Frequency Characteristics: Flat from 40 cps. to 3.5 MC . Crystal Probe available to extend frequency range to 250 MC .
Input Impedance: With new HICKOK Dual-Probe, 30 megohms shunted by 150 uuf.
105-125 VAC. Insulated, shock-resistant case. $534^{\prime \prime}$ W., $838^{\prime \prime} \mathrm{H} ., 41 / 2^{\prime \prime} \mathrm{D} ., 41 / 2 \mathrm{lbs}$. net weight. 7 lbs. shipping.
Test teads included:
New combination AC-DC HICKOK Dual-Probe, ohms lead and ground lead.

## HIGH SENSITIVITY VOLT-OHM-MILLIAMMETER

Model 450
Price: \$46.50
Test leads included.

## Compact Portable . . . Shock-Resistant Case

## LARGE 5" METER

RANGES:
20,000 ohms per volt DC. 5,000 ohms per volt AC.
Volts AC and DC: 2.5, $10,50,250,1,000,5,000$.
Output: 2.5, 10, 50, 250, 1,000.
Milliamperes, DC: 2.5, 10, 50, 250, 1,000
Microamperes, DC: 0 to 50.
Amperes, DC: 0-10.
Decibels: -30 to +55 , in 5 ranges.
OHMS:
0 to $1,000,5$ ohm center seale.
0 to $10,000,50$ ohm center scale.
0 to 1 meg., 5,000 ohm center scale.
0 to 100 meg., 500,000 ohm center scale.
Model 450: The last word in design for attractive, high sensitivity volt-ohm-milliammeters. It is thin, lightweight and fully portable.
The modern HICKOK lucite meter case provides increased readability. Large $5^{\prime \prime}$ meter scale can be read more accurately.
Compact HICKOK design provides the thinnest instrument of its kind. Handier for the Radio-TV or field engineer for on-location servicing. Provides work-bench accuracy for all field jobs. Durable neolite handle provides sturdy stand at just the correct angle for easy bench use.
The new HICKOK insulated and shock-resistant case protects the high sensitivity and accuracy of this fine instrument.
Rugged and dependable, the HICKOK 450 provides for long, hard, day-in, day-out service on the bench or in the field. (Battery operated). $81 / 2^{\prime \prime}$ H., $534^{\prime \prime}$ W., $\times 21 / 2^{\prime \prime}$ D. $23 / 4$ lbs. net, 5 lbs. shipping.

## HICKOK

CHOICE OF THE EXPERTS

DOUBLE RANGE DC KILOVOLTMETER

Model 465

For measuring DC voltages as high as 30,000 volts. 20,000 olim per volt sensitivity. Low current drain. Well insulated phenolic case for ample protection against the high voltages being measured. $7^{\prime \prime} \times 61 / 8^{\prime \prime} \times 4 \frac{5}{16 \prime \prime} .6$ lbs. net; $8^{1 / 2}$ lbs. shipping. Complete price including leads and carrying case $\$ 61.25$.

PORTABLE TRUE WATTMETER

Tests all AC electrical units under actual use conditions. Continuity test for shorts. Accurately tests even smallest units. $4^{\prime \prime}$ meter shows wattage, amperes and line voltage. Portable case complete with leads, $93 / 8^{\prime \prime} \times 61 / 4^{\prime \prime} \times 31 / 4^{\prime \prime} .6 \mathrm{lbs}$. net; 10 lbs. shipping. $\$ 105.00$. C-105 external transformer for ranges to 10,000 watts and 130 anip. $\$ 17.00$. 9 A and 9 B leads for 220 volts, $\$ 18.00$. Strong, de-tachable-cover carrying case. $\$ 10.20$.

## CRYSTALS

$\qquad$

Model CRT TV Picture Tube Test Accessory - Built for use with any HICKOK tube tester. Tests all types TV receiver electromagnetic picture tubes including Philco. Tube gas test, grid control test. short test, cathode emmission test.
$\$ 9.90$

"34" Crystal Demodulator Probe -
Use with any 'scope to trace a modulated RF signal, at any fremodulated RF signal, at any frequency, through radio or to receiver from the antenna post to the detector or discriminator. 4 ft . long. 2 oz. net; 2 lbs. shipping. A quick and accurate aid to trouble-shooting with your 'scope.
$\$ 9.80$
"75" Termination Pad - This accessory is for use with the HICKOK 610A or any other TV-FM alignment generator. Fliminates most standing waves on the length of output cable to insure accurate impedence match of the generator and TV receiver. Can be used on both 90 and 300 olm inputs. 6 oz . net; 2 lbs . shipping.
$\$ 8.50$

## PROBES and ACCESSORIES

PR 30 KV - High Voltage DC Probe - Extends VTVM range to 30,000 valts DC. Doubles use of any voltmeter. Ideal for use with HICKOK 203 or 209 . Heavy duty phenolic, 4 ft . cord and cable type connector. 12 oz . net; 2 lbs. ship. \$11.90

PR 30KVA - High Voltage DC Probe - For use with HICKOK Model 209A. 12 oz . net ; 2 lbs. ship.
$\$ 11.90$
PR 25 - Extends range of HICKOK Models 450 or 435-A to 25,000 volts DC. Can be used with any 20,000 ohm-per-volt multimeter with a 250 volt scale. 12 oz . net; 2 lbs . ship.
$\$ 11.90$
PR 15 - RF Crystal Probe - For use with HICKOK Model 215 or Model 225. 12 oz., net; 21 lbs. ship.
$\$ 7.59$

Model
175
"175" Oscilloscope Voltage Calibrator-Handy size, easy to use to accurately measure peak-to-peak voltages on any scope. Ranges: Peak--to-Peak: 0.1 volts, 1.0 volts. 10.0 volts. 100.0 volts. Accurate to $\pm 5 \%$ at 115 volts. Calibrates scope in peak-to-peak in any desired voltage. Wave shapes may be measured in peak-to-peak, volts without disconnecting calibrator from 'scope ... Perinitted through means of a self-contained switch.
Model 175: $6^{\prime \prime}$ II., $334^{\prime \prime}$ W., $2^{\prime \prime}$ D. $11 / 2$ lbs. Net; 2 lbs. Ship. $50-60$ cycles̀, 115 volts, 5 watts.
$\$ 13.94$

## TEST INSTRUMENTS

## Professional Laboratory Cathode Ray OSCILLOSCOPE

Model 1800: This fine piece of equipment offers the ultimate in Oscilloscope function for the industrial electronic laboratory.
The exceptional range, sensitivity and stability of the Model 1800 makes it a most desirable instrument for the professional electronic engineer in his detailed visual study of any one electrical quantity as a function of another electrical quantity.
This practical HICKOK design provides unusual versatility and ease of application for dependable general purpose Oscilloscope use.

Model 1800
Price available on request.

## FEATURES...

- Expansion: 12 times screen expansion.
- External capacity terminal for slower sweep is prorided at the panel.
- Sweep stability control for driven sweep is also included.
- Astigmatisnr and focus controls provide excellent definition.
- Illuminated dial has adjustable light intensity.
- Balance contral is provided at the front panel.
- Large knobs permit easy handling of controls.
- Standard 5" CRT visor for cameras is furnished.
- $Z$-axis and blanking amplifiers are included.

## PERFORMANCE SPECIFICATIONS

## VERTICAL AMPLIFIER

BALANCED INPUTS: Dual attenuation in steps of ten, from 1 to 1,000 .
VERTICAL CALIBRATE POSITION: . $01, .1,1,10,100$.
FREQUENCY RESPONSE: D.C. to 10 megacycles, 100 millivolts per inch rms, within 3 DB.
FREQUENCY RESPONSE: A.C., 3 cycles to 10 megacycles, 25 millivolts per inch rms, within 3 DB.
TRANSIENT RESPONSE: Over shoot; les than $2 \%$.
Rise time; $10 \%$ to $90 \%, 0.07$ microseconds.
VERTICAL DELAY: Maximum 0.25 microseconds.
UNDISTORTED DEFLECTION: $4^{\prime \prime}$ or better. (2000 v. acceleration). Flat faced tube, post anode connection available.
MECHANICAL: Balanced push-pull shock mounted amplifiers.
INPUT IMPEDANCE: 1 megohm shunted by 30 uuf.

## HORIZONTAL AMPLIFIER

FREQUENCY RESPONSE: 5 cycles to 1 megacycle within 3 DB . SENSITIVITY: 100 millivolts per inch rms.
INPUT IMPEDANCE: 1 megohm shunted by 30 uuf.
TRANSIENT RESPONSE: Overshoot; less than $2 \%$.
Rise time; $10 \%$ to $90 \%, 0.35$ microseconds.
MECHANICAL: Balanced push-pull shock mounted amplifiers.

## LINEAR TIME BASE

TUBES: All hard valve type.
FREQUENCY RANGE: 1000 milliseconds to 10 microseconds.
SYNCHRONIZATION: Driven (plus internal), (minus internal), (external).
Recurrent (plus internal), (minus internal), (external).

## PHYSICAL CHARACTERISTICS

CASE SIZE: $14^{\prime \prime}$ high, $12^{\prime \prime}$ wide, $18^{\prime \prime}$ deep.
WEIGHT: 60 lbs . net.
POWER CONSUMPTION: 250 watts, 47-450 cycles.

## NEW, HANDY SIZE $3^{3 \prime}$ PORTABLE OSCILLOSCOPE

Model 380A: Handy size oscilloscope is similar to equipment built for the armed forces and is of the highest quality throughout. It is slightly larger than a normal size telephone and provides a new high in dependable accuracy to both laboratory technicians and field engineers.
Features both vertical and horizontal DC Amplifiers with a sensitivity of better Features both vertical and horizontal DC Amplifiers with a sensitivit.
than 075 RMS volts per inch. Frequency coverage to beyond 5 MC . than .075 RMS volts per inch. Frequency coverage to beyond 5 MC.
Fully compensated horizontal and vertical attenuators, retractable light shield, Fully compensated horizontal and vertical attenuators, retractable light shield, direct connection to CR tube elements, and provision for Z -Axis modulation are other desirable characteristics.
Test leads, ( $3^{\prime}$ coaxial test cable, $6^{\prime \prime}$ coaxial test cable, $3^{\prime \prime}$ ground lead), are included. Storage compartment for leads is in accessory case.
This fine instrument is also available in a shock mounted, waterproof, moistureproof, strong aluminum case at $\$ 276.00$, or laboratory rack mount case at $\$ 276.00$.

## TECHNICAL CHARACTERISTICS:

(2) D.C. -2 megohms.
b) Horizontal Amplifier:
(1) A.C. -1.5 megohms shunted by 25 ( mmf capacity.
(2) D.C. -2 megohms.
c) Vertical Direct connection:

9 megohms shunted by 11 mmf .
d) Horizontal Direct connection: 9 megohms shunted by 11 mmf .
DEFLECTION SENSITIVITY:
a) Horizontal and Vertical:
.075 RMS yolts/inch.
b) Vertical Direct connection: 17 RMS volt/inch.
c) Horizontal Dírect connection:

25 RMS rolt/inch.

POWER SUPPLY
REQUIREMENTS:
a) 105 to 125 volts A.C. at 50 to 1000 cycles.
b) Power consumption 60 watts at 115 volts. ACCESSORIES INCLUDED:
3 ft . Coaxial Test Cable, 6 inch Coaxial Test Cable, 3 ft . Ground Lead, and Ruled Celuloid Screen. Also available with strong, aluminum waterproof, moisture-proof, shock mounted carrying case.
$51 / 2^{\prime \prime}$ wide $\times 8^{\prime \prime}$ high $\times 131 / 4^{\prime \prime}$ deep, less carrying case.
11 lbs. net.
$6^{\prime \prime}$ wide $\times 9^{\prime \prime}$ high $\times 131 / 2^{\prime \prime}$ deep, inchudind carrying case.
15 lbs. net.

Sweep Oscillator: 3 to 50 KC .
Power Supply: 105-125 VAC, $50-70$ cycles, 65 watts at 115 VAC.
Size: $10^{\prime \prime} \mathrm{W} \times 13^{\prime \prime}$ H $\times 18^{\prime \prime} \mathrm{D}$. In attractive, steel portalile case or natched set " $D$ " case. Weight: 27 lbs. net; 35 lbs. ship.

## NEW MODEL 670 OSCILLOSCOPE

## Accurate, Stable, High Sensitivity with <br> AC and DC AMPLIFIERS

Model 670: The more exacting requirements of today's television maintenance have made it necessary for the service technician to have a good 'Scope. The HICKOK Model 670 is designed with DC amplifiers to provide excellent square wave response - even down to DC.

Many TV receivers are so far out of alignment that extreme 'Scope sensitivity is necessary to properly show the response curve. The 670 provides this extra sensitivity - to 15 MV per inch.
To properly view all TV frequencies a wide band vertical ampli. fier is necessary. The 670 provides for this need by having a band width useable to beyond 2 MC. Push-pull amplifiers and polarity reversing switches are also new features you will find most useful in the 670.

## TECHNICAL FEATURES:

Highest practical sensitivity: 0.015 ( 15 millivolts) RMS per inch.
Demodulator circuil for viewing modulation on RF signal.
Recurrent linear sweep; 3 eycles to 50,000 cycles.
Reversing switches for both horizontal and vertical defection.
Fixed sweep frequency for herizental and verical wave forms to TV receivers.
Both negative and positive synchronlzing.
Line phasing control (approximately $180^{\circ}$ ).
Wide band vertical amplifier, useful beyond 5 mc.
Birect coupled, balanced (push-pull) amplifiers for both vertical and horizontal defection. Provision for 2 -axis modulation.
Permits the study and analysis of wave forms, and other electric and magnetic phenomena. Excellent square wave response.
Provides for the visual testing and alignment of amplitude and frequancy modulated receivers, os well as television equipment when used with a frequency modulated RF oscillator or swsep generator.

Price: \$244.00

## EXCEPTIONAL VALUE 5" OSCILLOSCOPE

Model 665
Price: \$129.50

## Excellent Characteristics for Radio - TV Receiver Work

Model 665: Here is real value in a HICKOK $5^{\prime \prime}$ cathode ray oscilloscope. This new instrument is good quality at a price well within the reach of every radio-TV technician. Thoroughly HICKOK designed with very good square wave characteristics and a frequency range entirely adequate for all TV receiver work. Built to the same attractive - sturdy construction as all other HICKOK equipment and guaranteed to give excellent service within the range of its technical characteristics.

## TECHNICAL SPECIFICATIONS

Frequency Range: 0.5 cycles to 700 KC , down 3 db .
Accelerating Potential: 1775 Volts (high intensity).
Square Wave Response: 40 cps to 100 KC , with less than $1 \%$ tilt. less than $2 \%$ overshoot
Dual Fuse: B+ is fused and the line is fused.
Amplifier: Push - pull, vertical sensitivity . 020 MV per inch.
Horizontal, .030 MV per inch.
Vertical Input Impedance: 15 MMF, 2.2 Megohms.
Horizontal Impedance: $52 \mathrm{MMF}, 0.1$ Megohms.
Excellent locking.
Sweep Oscillator Range: 18 cps . to 50 KC .
Withstands shock, vibration and humidity. CRT is shock-mounted,
Attractive blue hammertex steel case. $13^{\prime \prime}$ H., $1614^{\prime \prime}$ D., $91 / 2^{\prime \prime}$ W. 25 lbs. net; 30 lbs . shipping. $105-125 \mathrm{VAC}, 35$ watts.

# MODEL 19 AC-DC ASTATIC MILLAMMETERS, AMMETERS, VOLTMETERS, WATTMETERS, WATTLESS COMPONENT INDICATORS 

Astatic Electrodynamometer movements. Accuracy within $1 / 2$ of $1 \%$ on AC or DC. Not affected by external magnetic fields. Scale length: $51 / 2$ inches. Wattmeter seales are uniform, others uniformly squared. Mirror scales.

Model 19 portable instruments designed for precision AC and DC measurements. They are of astatic dynamonteter type with a greater accuracy than most other portable $A C$ and $D C$ instruments. Owing to the astatic design the indications are the same on either AC or DC .

## MODEL 13 AC DYNAMOMETER INSTRUMENT

Accuracy $1 / 2$ of $1 \%$. Shielded from effect of External Magnetic fields. Ammeters, Milliamneters, Voltmeters, Wattmeters - single phase. Mirror scales, Knife Edge Pointers. Scale length: $51 / 2$ inches.

These instruments are correct on AC of any frequency $\mathrm{up}_{\mathrm{p}}$ to 125 cycles. Built for use on higher frequencies. Deviations from the sinusoidal wave form met in ordinary testing have no noticeable effect on the calibration of these instruments. Voltmeters and wattmeters are self-contained up to 750 volts, designed to perform continuous service.
Dimensions: $31 / 4^{\prime \prime} \times 61 / 4^{\prime \prime} \times 71 / 8^{\prime \prime}$. Weight: $31 / 2 \mathrm{lbs}$. Case material: Phenolic.

## MODEL 14 DC AMMETERS, MILLIAMMETERS, MICROAMMETERS, VOLTMETERS, MILLIVOLTMETERS, VOLT-AMMETERS, THERMO-COUPLE METERS

D'Arsonval movements. Accuracy within $1 / 2$ of $1 \%$. Shielded from effect of external magnetic fields. Uniform scales provided in DC meter with anti-parralax mirrors. Scale length: $51 / 2$ inches.
Voltmeters in this model have a resistance of approximately 1000 ohms per volt, the exact resistance being marked on data card furnished with the instruments. Model 14 millivoltmeters are supplied with leads for connection to external shunts. Ammeters are self-contained up to 150 amperes, having negligible temperature coefficient built-in shunts. The drop across the ammeters is 50 millivolts. Model 14 microammeters are of the high torque, have excellent damping, and other rugged characteristics not usually found in high sensitivity instruments. Dimensions: $71 / 8^{\prime \prime} \times 61 / 4^{\prime \prime} \times 4^{\prime \prime}$. Weight: $61 / 2 \mathrm{lbs}$. Case material: Polished phenolic. Excellent magnetic damping.

## MODEL 18 DC INSTRUMENTS FOR ALL CLASSES OF DIRECT CURRENT TESTING

1)Arsonval movements. Accuracy within $1 / 2$ of $1 \%$. Shielded from external magnetic fields. Voltmeters, millivoltmeters, ammeters, milliammeters, microammeters, and volt-ammeters. Uniform mirror scales engraved on moistureproof stock. Scale Length: $51 / 2$ inches.
Excellent damping characteristics. This model is so designed that there is only a small overswing to the needle which results in quick and accurate readings Voltmeters have a resistance of 1000 ohms per volt. Voltmeters are self-contained up to 1000 volts and are designed for continuous use at 1000 volts without temperature error. The Volt-ammeters in this model are especially adaptable for making tests where consecutive volt and ampere readings are desired, such as motor test and battery test. Model 18 instruments, except in the higher voltage monges, will withend an instantaneous overload of 10 times the full scale value without damage or change in calibration. Dimensions: $71 / 8^{\prime \prime} \times 61 / 4^{\prime \prime} \times 31 / 4^{\prime \prime}$. Weight: $51 / 4$ lbs. Case material: Molded phenolic.

## HICKOK... Electrical Indicating Instruments

## 3½" ROUND-250 DEGREE METER

All DC meters can be supplied with accuracy either $1 \%$ or $2 \%$ of full scale deflection. The $A C$ meters, which use copper-oxide rectifier-type movements, have accuracy within $5 \%$ of full scale deflection under all conditions. These instruments are as accurate as panel mounting instruments having equal size mounting instruments having equal size and have the advantage of two and damped in accordance with American damped in accordance with American Standards Association Specifications, and their response time is also in aclows readings to be taken quickly and lows readings to

## 2½ 250 DEGREE AIRCRAFT METER

This instrument is mounted in a regulation aircraft case per Army-Navy specification, including the shielding and dimensional requirements. Has scale approximately $43 / /^{\prime \prime}$ long. Quick read. ability makes them desirable as flight instruments. Aircraft-type dial is a vailable. Mechanism specially designed for aircraft service and will meet vibrationresistant requirements, etc.

## DIRECT READING FREQUENCY METER, AIRCRAFT TYPE

These Hickok improved self-contained These Hickok improved self-contained frequency meters can be mounted in aircraft type cases of the large AN size. These are the smallest size frequency meters. This type of case is often convenient where space is a limiting factor. Suitable for aircraft use. Movement is shockproof. Case is dust and waterproof in accordance with ArmyNavy aircraft instrument specifications. Radium or fluorescent dials and pointers available.

## RUGGEDIZED PANEL METERS

$21 / 2^{\prime \prime}, 31 / 2^{\prime \prime}$ or $41 / 2^{\prime \prime}$
2:/2" MINIATURE SQUARE PANEL MOUNTING
The high Hickok standard of quality is now available in a ruggedized DC or rectifier type AC meter. This instrument provides the practical answer to requirements for shock proof meters with dependable accuracy. This highly efficient shock mount design permits pointer and scale divisions to be easily read when meter is under vibration. Rear panel is built with solder connections Exceptionally thick flint nections. Exceptionally thick fint hard glass withstands pressure and shock tests designated by military specifications. Designed for flush miounting. Zero adjuster is internal.

Flush mounting, phenolic case, wide flange only; and metal cases, wide and narrow flanges. Accurate within $11 / 2 \%$. These miniature panel mounting instruments are of the standardized $21 / 2^{\prime \prime}$ size, but have extra long scale lengths by reason of the wide angle of deflection and longer scale radius. Five types of cases are available. Lance type pointers regularly supplied, however, small spade pointers can be furnished.

## 31⁄2" ROUND FLUSH MOUNTINGS

Accurate within $11 / 2 \%$. Jarge opening symmetrically designed adnuits a maximum of light to the dial. Thick flange climinates danger of breakage and mproves appearance. Metal dials with white background are supplied in all standard ranges. Special dial designs are supplied on quantity orders, at no extra charge. Include internal illumination.

3½ SQUARE FLUSH MOUNTINGS

Accurate within $11 / 2 \%$. Large opening, symmetrically designed, admit maximum light to the dial. Thick flange eliminates danger of breakage and improves appearance. Require less panel space than round flush instruments. Metal dials with white background are supplied in all standard ranges. Special dial designs supplied on quantity al dial designs supplied on quantit lumination outainable by means of bulb umination in socket through the in inserted in a socket through the in strument base.

## HICKOK... Electrical.Indicating Instruments

## FOUR INCH RECTANGULAR PANEL

Accuracy within $11 / 2 \%$. Molded phenolic cases - for flush or surface mounting. Dull Black finish standard. Other phenolic colors available. DC Scale phength $33 / 4^{\prime \prime}$ - longest which can be attained in an instrument of this size. Attained in an instrument of tegres length $3.2^{\prime \prime}, 85$ degrees deAC Scale length 3.2 , Can be furnished with or without illuminated dials. Available also in $21^{\prime \prime} .31 / 2^{\prime \prime}$. and $5^{\prime \prime}$, for firsh mounting-Volt-ammeters, volt-milliammeters, etc. having built-in push-button switches available.

## 3½" RECTANGULAR SEMI-FLUSH

The new lucite-window model with a scale length of $31 / 4^{\prime \prime}$. Designed as attractive modernistic replacements for conventional $31 / 2^{\prime \prime}$ round or square flange instruments, and can be used in any space large enough to accommodate the standard $31 / 2^{\prime \prime}$ meter. This instrument is furnished shielded or unshielded and available in most AC and DC ranges. Available in clear front or opaqued front as shown. Also available in $5^{\prime \prime}$.

FIVE INCH RECTANGULAR

Large dial area. Accurate within $1 \frac{1}{2} \%$. Molded bakelite cases furnished shielded or unshielded. Dull black finish standard. other colors available. Flush mounting. DC scale length $5^{\prime \prime}$. AC scale length $4.25 \%$. Illuminated dials available. This instrument is a companion to other Hickok rectangular models but has proportionately larger dials, and is ideally suitable for use in electronic-testing equipment where multiple scale arcs are needed.

4" RECTANGULAR FREQUENCY METER

Frequency meters are self-contained with dimensions of $33 / 4^{\prime \prime} \times 4^{\prime \prime} \times 2^{\prime \prime}$. No external reactor is used. The instruments can be supplied shielded from the effect of external magnetic fields.

## CHARGICATOR

## CHARGICATOR PANEL MOUNT

The chargicator is an electrical hydro meter which places no load on the bat tery and may be left permanently connected. It has advantages over a hydrometer in that the batteries need not be disturbed when the reading is made, and the readings need not be made at the battery The chargicato mades an accurate and instant measure ment of battery conditions on a highly ment of battery conditions on a highly expanded scale, suppressed zero volt meter. Available in $21 / 2$ and $31 / 2$ sizes cial purposes.

## 4" "P" SERIES PORTABLE INSTRUMENTS

Scale lengths - AC Models P49, P49M - $3.15^{\prime \prime}$. DC Model P48-3.7". Accurate within $11 / 2 \%$. Dimensions: $4^{\prime \prime} \times 33 / 4^{\prime \prime} \times 2-3 / 16^{\prime \prime}$. Not shielded. These meters are manufactured in many ranges of voltmeters, millivoltmeters, ammeters, milliammeters, microammeters, volt-ammeters, and watt meters for use on both alternating and direct currents. A high quality solid leather carrying case can be supplied at extra charge.

SHUNTS
Hickok Portable Precision Shunts are of sufficient size to keep the temperature rise within the limits of N. E. M. A. standards. Shunts are accurately ad justed for 50 millivolt drop at full cur rent value. The shunt resistance material has negligible thermo-electric effect against copper and negligible temperature coefficient within the limit of operation of the shunt. Will operat at rated capacity continuously without impairment of accuracy. Leads supplied with all shunts when ordered with ammeters.

## FAN TYPE METER

D'Arsonval movement. Accuracy $1 \%$. Scale length: 7 inches. Dimensions: $8-19 / 32^{\prime \prime} \times 6-11 / 16^{\prime \prime} \times 2-1 / 16^{\prime \prime}$. This instrument is available in any combination of $D C$ ranges. It has a window in the top of the case so that a light can the top of the case so that a light can be mounted above it for external umination. This window. is, opthonal. I can be supplied with mirror scales and knife-edge pointers. The movements are especially designed for use in places where vibrations are encountered.

## CURRENT TRANSFORMERS

Hickok midget current transformers "Donut" design - for use, with inserted primaries. SERIES $i$ is primarily intended for use with ämmeters, and conforms to N. E. M. A. standards $1 / 2 \mathrm{X}$ as to ratio only. SERIES 2 con form to N. E. M. A. standards $1 / 2 \mathrm{X}$ as to ratio and phase angle, and are intended for use with wattmeters, also may be used with both wattmeters and ammeters. Secondary leads are five feet long with soldering lugs made to fit $1 / /^{\prime \prime}$ dia. stud

## HICKOK...EIectrical Indicating Instruments

## POCKET PORTABLE

MODEL 480 and 481-Accuracy within $1 \%$. Unshielded. DC Model 480 : Scale length $3.7^{\prime \prime}$. Voltmeters, millivoltmeters, ammeters, milliammeters, microammeters, and volt-ammeters. AC Model 481. Scale length 3.15". Ammeters, milliammeters, voltmeters, wattmeters - single phase. Mirror scaies, knife edge pointers.
Oak Case furnished with slip hinges permits the cover to be removed. The resistor compartment is separate from the meter movement and beneath the panel on which the binding posts are mounted. These instruments are specifically designed for smallness and accuracy. They will easily slip into the pocket and their high accuracy enables them to be used in many testing and inspecting applications. Found especially handy for field service work and are extensively used by the U. S. Signal Corps. Built with full open faces, enabling the use of multiple scales, which are easily readable and unusually long. The movements are especially designed for portable use in these models, and are of the very highest quality.
Dimensions: $634^{\prime \prime} \times 434^{\prime \prime} \times 294^{\prime \prime}$. Weight: 3 lbs .

MODEL $440-$ Accuracy either $1 \%$ or $1 / 2$ of $1 \%$. Scale length $434^{\prime \prime}$. Panel and meter cover are phenolic. Has a built-in lead compartment with leads supplied. The instrument comes in an oak case with strong, flexible carrying handle. Case is furnished with slip hinge cover, permitting the cover to be removed for easier use. This type of case is especially handy for field service work and is extensively used. All types have mirror scales, knife edge pointers and full open faces. The latter feature enables the use of multiple scales, which are easily readable and unusually long. The movements are especially designed for portable use in these models, and are of the very highest quality. This particular instrument has three DC voltage ranges; 30, 150, and 1500. Two millivolt ranges: 75 and 150. Three milliampere ranges; 30,60 , and 300. These instruments, however, are available in any combination of DC ranges. Dimensions: $81 / 2^{\prime \prime} \times 71 / 4^{\prime \prime} \times 31 / 2^{\prime \prime}$. Weight: 4 lbs .

## SWITCHBOARD TYPE

MODEL S12 DC, D'Arsonval Movements. Model S-11 AC, Electrodynamometers. Model S-11M AC, Magnetic Vane Movements. Scale length of $51 / \mathrm{B}^{\prime \prime}$. Shielded from External Magnetic Fields Ideally suited for heavy industrial applications. Movements are of the large switchboard type. The AC Ammeter at left is furnished either self contained or with an external switchboard mounting current transformer. Cases can be supplied impervious to magnetic dust, dirt and moisture found in heavy industries. Can withstand severe vibration, shocks and extreme of temperature though still maintain the guaranteed accuracy of $1 \%$. Available in surface type or flush type cases. Pressed steel cases, black enamel finish.
Dimensions: 53/8"W., $57 / /^{\prime \prime} H$., $41 / 4^{\prime \prime}$ D. plus $1 / 4^{\prime \prime}$ mounting studs.

Hickok is one of the foremost pioneers and manufacturers of electrical indicating instruments. Here shown are a few of the more popular types furnished. However, any practical range and type can be supplied. Your inquiry is invited. Kindly list details of your requirements. Prices are available on request.

## THE HICKOK ELECTRICAL INSTRUMENT CO.

10500 Dupont Avenue, Cleveland 8, Ohio

## HICKOK Electrical Indicating Instruments

# TELEVISION SIGNAL GENERATOR VHF - UHF* - COLOR 

It's the ideal generator which fulfills all your TV requirements. Just read these brief specifications and make comparisons.

Sweep Oscillator: Three convenient ranges, 2 MC thru 38 MC ; 38 MC thru $108 \mathrm{MC} ; 174 \mathrm{MC}$ thru 216 MC are all on fundamentals. Large accurately cali. brated dial with the TV channels clearly indicated. Reversible direction of sweep.
Sweep Width: Provided by rugged electro-mechanical sweep unit. Adjustable from 0 thru 18 MC in 7 steps for fast resetability. The full 18 MC sweep is essential to cover IF frequencies in color receivers and tor sweeping badly detuned tuners.
Marker Oscillator: Accurately calibrated dial ( $1 / 4$ of $1 \%$ ) gives complete marker coverage from 4 MC thru 216 MC with all the television IF frequencies on lighly stable fundamentals. Fa. cilities for using 3 marker pips simultaneously.
Crystal Oscillator: Separate crystal osciliator for use either as a marker or as a calibrator. Stable circuit oscil-
*Except tuners.

## Model TVG-2

lates with any crystal fundamental from 3 MC to 20 MC . More than adequate for color receivers. Output is controlled by selector switch to provide variable marker, crystal marker or both for calibration purposes. A BEAT DETECTOR is also incorporated for audible or visual checking of beat between variable marker oscillator and crystal.

400 Cycle Modulation: Provided for use with either the variable or crystal marker so traps can be adjusted by either audible or meter method.

Oscilloscope Timing: A phased 60 cycle sine wave timing voltage is provided with PHASE CONTROL to provide adjustment of double pattern. BI.ANKING is also available for sinole pattern trace with reference base line for measurement.

Video Modulation : Provision made for insertion of video signal to modulate the external marker output making passible "rebroadcasting" of television signals on any channel. Also an audio signal may be used to produce horizontal or vertical lines for linearity checks.
RF Output: Completely controllable with output control and step attenuator. Output impedance 90 ohms with last tap variable from 0 to 500 ohms. Complete flexibility right at your finger tips.
Sizc: Same height as other Jackson TV instruments. Dimensions $13^{\prime \prime}$ high, $81 / 2^{\prime \prime}$ deep, $191 / 8^{\prime \prime}$ wide.
Finish and Weight: An all steel gray llam-R-Tex cabinet. Shipping weight 35 pounds.

Dealer Net Price.
$\$ 245.00$

## CHALLENGER DYNAMIC ${ }^{\circledR}$ TUBE TESTER

## Model 715

## SPECIFICATIONS

Jackson Dynamic Test Principle: Applies separate element voltages to each tube element, making test under actual use conditions.
High Voltage Power Supply: By lesting tubes at higher plate voltages (over 200 volts for some types), more accurate results are obtained. This is an important feature of the Dynamic Tube Tester.
Improved Switching System : Provides spare circuits together with switch and socket positions for future use.
Simplified Operation: Uses latest Jackson "Service Engineered" switching procedure.

Better Readability: Large 4-inch. square meter is easy to read.
Complete Shorts Test: Each tube element is fully tested for possible shorts and leaks.
Wide application: Tests all tubes over 700 types - including television amplifiers and rectifiers.
Built-in Roll Chart: Indicates tube characteristics. One year free supplement service.
Finish and Wcight: Finished in gray Ham-R.Tex with harmonizing ivory knobs, meter cover, and push-buttons. Net weight, 11 lbs.; shipping weight, 14 lbs .
Dealer Net Price $\qquad$ $\mathbf{8 7 9 . 5 0}$

Complete with every valuable feature, including provision for CR tube testing.

New in design and pertormance, including the latest Jackson patented iwitching circuits.

Modern in every feature of construction, appearance, and operation.

KSONCERVIGE ENGINEERED" test instruments

# THE '54 MODEL CRO-2 5" OSCILLOSCOPE VHF - UHF - COLOR 

High Sensitivity - Wide Band. . 018 RMS volts per inch -Within 1 db to 4.S MC

burst signal so that the individual cycles can be clearly viewed.
Horizontal Deflection Sensitivity: Push-pull horizontal amplifiers have a sensitivity for all applications of 0.40 RMS volts per inch.
Vertical Input Impedance: 1.5 meg ohms, shunted by 20 micromicrofarads. Direct to plates balanced 6 megohms, shunted by 11 micromicrofarads.

## Horizontal Input Impedance: 1.1

 megohms.Linear Sweep Oscillator: Saw tooth wave 20 cycles thru 50 KC per second in 5 steps. Sine wave sweep of 60 cycles also available. Provision for external sweep synchronization.
Input Calibration: A standard voltage is provided for use in determining unknown voltages. Permits peak-to-peak measurement of all waveforms.
Vertical Polarity Reversal: By merely flipping a switch you can reverse the polarity of the voltage being supplied to the vertical deflection plates.
Return Trace Blanking: A new am-plifier-timer combination for blanking return traces, providing a clearer, sharper image at all times. Prevents confusion in waveform analysis.
Synchronizing Input Control: Four input control positions, Internal Positive - Internal Negative - External - 60 cycle.
Deflection Plate Connections: Direct

connections thru capacitors for AC only to deflection plates of $C R$ tube by means of terminal block at back of instrument. Intensity Modulation: Either 60 cycle internal intensity modulation or external intensity modulation through binding posts on front panel.
Accessories: Demodulation probe, Model CR-P, available for using scope as signal tracing instrument. Low capacity Cathode follower probe, Model loLCP, with 2 to 1 ratio and not more than 10 mmf effective input capacitance.
Size: Same height as other Jackson TV instruments. Dimensions $13^{\prime \prime}$ high, $101 / 4^{\prime \prime}$ wide $151 / 8^{\prime \prime}$ deep.
Finish: An all steel gray Ham-R-Tex cabinet.

## UHF TELEVISION SIGNAL GENERATOR Model 711

Ideal for all channel UHF alignment of tuners, converters, and tuning strips. Operation simplified by use of superheterodyne principles.

The Model 711 operates on fundamental frequencies for all channels 14 thru 83. Large enclosed dial accuracy $\pm 1 \%$ of indicated frequency. Vernier logging scale average accuracy $0.1 \%$ of indicated center frequency. UHF channel frequency calibrated directly opposite channel number scale. This provides a quick check in the transmission frequency of any channel.

A swept signal having a center frequency of 43.5 MC from any VHF generator (such as Jackson TVG-2) must be applied to the input. This signal and the signal from a local oscillator are fed into a crystal mixer and the difference frequency is applied to the output jack on the front panel. The local oscillator calibration appears on
the center scale marked "Oscillator Frequency."
The VHF markers are also used for checking various channels. It is not necessary to change the VHF generator once it has been set up, exactly as if it were being used to mark a VHF response curve having a center frequency of 43.5 MC .
Input impedance, 93 ohms high side to ground. Output impedance, 300 olms balanced to ground. Frequency coverage, 465 MC to 905 MC . Tube complement, $1-6 \mathrm{X} 4,1-6 \mathrm{~T} 4$ and $2-6 \mathrm{CB} 6$. Dimensions, $101 / 4^{\prime \prime}$ high x $13^{\prime \prime}$ wide $\times 83 /{ }^{\prime \prime}$ deep Power rating, 110-120 volts $50 / 60$ cycirs.
Shipping Weight, 17 lbs.
Finish: Gray Ham-R-Tex.
Dealer Net Price
$\$ 129.50$

## DYNAMIC ${ }^{\circledR}$ TUBE TESTER

This tester incorporates the most important engineering advancements in 12 years of tube tester research, such as the Dynamic test method, sequence switching and automatic line voltage indication. The Jackson Dynamic test circuit applies separate element voltages to each tube element. Separate load circuits are used to test tubes under peak conditions. These voltages and loads have been carefully selected for each tube to meet most ideally the normal operating condition of the tube. The current flowing only in the plate circuit of the tube under test is indicated on the 4 -inch meter in easy-to-read terms.

Sequence Switching makes possible SIMPLIFIED OPERATION, formerly unattainable in Dynamic test methods. There are actually only three control units to be set according to rotary chart listing for each tube. These are Heater Voltage (upper left), Plate Control (upper right) and the Sequence Switch (center). The only other adjustments are line voltage control and shorts test. The line voltage control is calibrated to indicate actual line voltage from 100 to 125 volts. This elim

inates the need for carrying a volt meter to check line voltage in the home.
Fast, Accurate Shorts Test lamp indicates only when tube is shorted. The shorts test control moves only through 4 positions - yet completely tests each tube element for possible shorts or leakage. The tube is tested under a heated cathode condition.

Correct. Test Voltage and Load Circuits protect tubes under test against damage by overload. Even low voltage battery types are provided with suitably low operating potentials. The full GOOD-BAD scale of the meter is used for each test. The meter scale is calibrated to read in percentage of relative micromhos. The meter is sufficiently sensitive that special "Low Scale" read ings are not required (such as for diodes, etc.)
Life-line test shows you accurate fore

ast of end of tabe life. Reduced output caused by over-age gives reduced reading on meter. Lets you catch bad tubes before they actually go bad.
Steel cases and panels finished in gray Ham-R-Tex.

## AUDIO OSCILLATOR Model 655

The model 655 provides an audio frequency voltage DEVELOPED AT ITS FUNDAMENTAL FREQUENCY. The basic design of this instrument is entirely different from the "beat frequency" type of Audio Oscillator.

## FEATURES

Resistance Capacity Tuned Circuit Design, engineered for improved operating characteristics of audio measurements.
No Zero Adjustment - Tuned Fundamental Frequency method provides permanently locked calibration.
Output Characteristics - A choice of either transformer coupled or resistive

Frequency Range - 20 cycles to 200,000 cycles in 4 ranges: $20-200$ cycles $/ 200-2000$ cycles $/ 2000$ to 20,000 cycles $/ 20,000$ cycles to 200,000 cycles.
Calibration - Logarithmic variation of frequency over the scale provides constant percentage accuracy at all frequencies.

Scale Length - Over 33 inches.
Output Loading - Five values of output loading: 10 ohms/250 ohms/
output is available. The Model 655 meets the most exacting requirements as to Waveform-Uniform Frequency Characteristics and Output Load Impedance Selection. A special feature of the output system is the 10 ohm tap for low impedance circuits such as speaker voice coils, etc.
Complete Stability - The stability of frequency calibration is constant throughout the entire range. The stabilized circuit permits large changes in line voltage to occur without affecting frequency or waveform and having negligible effect on output voltage.
Simplified Operation - It is only necessary to select desired Frequency and Output. There Are No Other

Controls - The pessibility of errors in operation is therefore eliminated.
Construction - Frequency dial is glass enclosed so that calibrations cannot become disfigured. Rugged mechanical features assure trouble free operation under service conditions.

## SPECIFICATIONS

500 ohms/5000 ohms/RESISTIVE. Controlled by selector switch.
Output Power - 500 Milliwatts (20 to 20,000 cycles transformer coupled). Output Control - Continuously variable from zero to maximum.
Waveform - Less than 5\% distortion at all frequencies between 30 and 15,000 cycles.
Frequency Characteristics - Plus or minus 1 DB $30-15,000$ cycles using trans. former coupled output.

Hum Level - Down more than 60 DB of maximum.
Accuracy - $3 \%$ or I cycle whichever is greater.
®Tubes - 1-6G6G, 1-6V6GT, 1-6SL7, 1-6C4, l-6F6GT, 1.5Y3GT furnished installed.
Dimensions - $13^{\prime \prime}$ wide $\times 91 / 2^{\prime \prime}$ high x $91 / 2^{\prime \prime}$ deep.
Shipping Weight, 32 lbs.
Dealer Net Price ...-............. $\$ 135.00$

This is the only CRT analyzer that completely and accurately tests all TV picture tubes, including both magnetic and electrostatic deflected types. It also tests oscilloscope, radar, and other special purpose CR tubes. No need to remove any tube from chassis or carton.

## Model 707

## SPECIFICATIONS

Beam Current: Test is made to the final anode - the only anode that really coants. The meter gives you an accurate forecast of tube life.
Grid Test: The beam current may be up to par; but, if the grid does not have the ability to cut off and control it , the tube is useless. Test voltage is ample for every type tube.
Gas Test: Certain amounts of gas in a CRT will render the tube inoperative. By checking the "gas current" to the FINAL anode, the presence of harmful gases is detected. High gas content indicates that the tube should be replaced as the life of the screen and/or cathode will be very limited.
Shorts Test : All elements are isolated for individual inter-element leakage tests. A circuit of high sensitivity is
used to give indications of leakage on a neon lamp.
Roll Chart: Provided for rapid indication of proper selections.
Circuit Selector Switches: Placed on an escutcheon to make them easily accessible for every tube setup and to limit t.st setting confusion.
Test Voltages: Both high and low voltage power supplies are provided for the various test requirements of a cathode ray tube.
VTVM: The analyzer is designed around a highly sensitive, balanced bridge type V'TVM. A continuously variable line voltage adjustment is provided to insure accurate readings.
Meter: An easy-to-read, full vision meter, designed especially for the CR'T Analyzer, includes a line voltage adjust point, a "beam current" range, a "gas current" range, and a reference scale. Case: The durable wooden airplane luggage covered carrying case is provided with ample space for storing the cable and adaptors.
Finish and Weight: Gray Harn-R Tex panel; ivory meter case. Net weight, 22 lbs.; shipping weight, $251 / 2 \mathrm{lbs}$.
Dealer Net Price

## "Super Vacuum Tube Volt-Ohm-Meter"

Here is a portable instrument you might have designed yourself. For it has everything you'd want in an ideal VTVM, and more. Luok at the features. See for yourself why the Jackson TELEVOLTER, a truly "Service-Engineered" instrument, is the easiest reading, easiest using instrument you've ever seen.

## NEW TELE-VOLTER Model 709 .

## SPECIFICATIONS

## D.C. VOLTMETER

Input Resistance: 11 megohms.
Volts: 0 to $1,5,10,50,100,500,1000$.
Calibrated Zero Center, positive or negative: 0 to $.5,2.5,5,25,50,250,500$.

## A.C. VOLTMETER

Input Impedance: . 2 megohms shunted by 150 mmf .
Volts: $\theta$ to $1,5,10,50,100,500,1000$.
Frequency Response: Essentially flat to 4.5 MC thru 0-100 scales.

Peak-to-Peak Ranges: 0 to $2.8,14,28$, 140, 280, 1400, 2800.
Peak values may also be remd directly by using the next lower scale than the one for which the instrument is set.

## OHM METER

Expanded logarithmic scale gives highly accurate readings in the following ranges: 0 to $1000,10,000,100,000 ; 1$ meg., 10 meg., 100 meg., 1000 meg.
ELECTRICAL CHARACTERISTICS
Meter Protection: The $7^{\prime \prime}$ square meter, with hair-line pointer, is electronically protected agaiast overload.

Controls: Range switch, circuit switch (including on-off switch), zero adjust, ohms adjust, probe function switch (built into probe).

Probes: One ground lead and one combination probe for D.C. and A.C./ohms readings. Probe has built-in switch for changing from D.C. to A.C. or ohms.

Scale Colors: Scales are printed in color for maximum ease in use.

Styling: Sloping front style, fully portalle. Finished in Gray Ham-R Tex. Red and black harmonizing colors in knobs, meter and nameplate.

Dimensions and Weight: $8 \% 4^{\prime \prime}$ deep, $81 / 4^{\prime \prime}$ high, $714^{\prime \prime}$ wide. Net weight, 10 lbs . Shipping weight, 13 lbs .

## EICO NEW Peak-to-Peak VTVM complete with New Dual-Purpose AC/DC Uni-Probe <br> (Pat, Pend.)

EICO's revolutionary new engineering design! The professional peak-to-peak VTVM that beats em all-in laboratory precision features AND low prices! Measures DIRECTLY p-p volłage of complex and sine waves: 0-4, 14, 42, 140, 420, 1400, 4200 volts p-P. DC/RMS sine voltage ranges: $0-I .5,5,15,50,150,500,1500$ volts (up to $30,000 \dot{V}$. with HVP probe). Resistance ranges: 0.2 ohms to 1000 megs. 7 non-skip ranges on every function. 4 functions: +DC Volts, -DC Volts, AC Volts, Ohms. Uniform 3 to 1 scale ratio for extreme wide-range accuracy. Large $4^{1 / 2} \mathbf{2}^{\prime \prime}$ meter in can't-burn-out circuit. Calibration without removing from cabinet. Zero-center for TV-FM discriminator alignment. One zero-adjustment for all functions and ranges. Frequency Response: 30 cps - 3 mc . $1 \%$ precision ceramic multiplier resistors. Exceptional circuit stability and accuracy. New satin finish etched panel, and grey wrinkle steel case. Leather handle. New compact size for extra-easy portability: $81 / 2^{\prime \prime} \times 5^{\prime \prime} \times 5^{\prime \prime}$. *OSCILLOSCOPE LOW CAPACITY PROBE: For TV waveform tracing in high impedance, high frequency or wide-band circuits. Eliminates distortion from overioading or frequency discrimination. Size: O.D. st", L. 6". Ship wh. 4 oz Model PLC-K,
$\$ 3.75$
Factory wired
\$5.75
*OSCILLOSCOPE DEMODULATOR PROBE: For signal tracing and checking of TV and radio RF and IF słages; for stage-by-stage alignment; and for locating hum modulation, ratio detector marking and marker generator calibration. Demodulates amplitude-modulated carriers between 150 kc and 250 mc . AF response flat from 20 cps to 6 kc . Size: O.D. $1^{\frac{5}{6}}{ }^{11}$ L. $6^{\prime \prime}$. Ship wt. 4 oz .
Model PSD-K,
KIT, only
$\$ 3.75$
Factory wired
$\$ 5.75$
*All the above new probes have ALL these EXCLUSIVE features: Fully shielded. Rugged ferminal board mounting of all parts. Shock-mounted floating construc tion. Easy accessibility of all parts.

## EICO Oscilloscope Voltage Calibrator

Makes your oscilloscope a wide-range, accurate, peak-ło-peak AC elecłronic volłmeter. Enables measurement of peak-to-peak voltages of complex and TV sweep circuit waveforms seen on a scope; calibration of Vertical and Horizontal scope amplifiers; determination of voltage amplitude required for intensity modulation or synchronization. Square wave output at power-line frequency with full scale readings of $0.1,1,10$ or 100 volts. Output variable from zero, and accuracy $\bar{M}^{5} \%$ of fuli-scale on each range. Size: $5^{\prime \prime} \times 7 \frac{5}{8} 8^{\prime \prime} \times 4^{\prime \prime}$. Ship wt. 4 lbs.
Model 495-K,
\$12.95
Factory wired
$\$ 17.95$

## EICO NEW Electronic Switch

Makes your ONE scope more useful than TWO in many cases. Simultaneously observe 2 patterns on 1 scope's screen: for direct comparison of voltage and current amplitudes, waveforms, frequencies and phase relationships; setting up voltage reference level or zero base line; checking amplifier distortion or crossover networks. Continuously variable switching rates in 3 ranges from less than 10 cps to over 2000 cps . Yery useful as a square wave generator over same range 5 tubes: 2-6AUS, 2-12AU7, 1-6X5, transformer-operated. 105-125 VAC, 50/60 cps Size: $6^{\prime \prime} \times 8^{\prime \prime} \times 6^{\prime \prime}$. ## Each EICO Kit contains both a Construc

 tion Book and an Operating Book step-by-step assembly instructions with easy-to-follow schematic and pietorial diagrams; and easy application data. All small parts are packed in individually marked envelopes clearly identified the drawings. Anyone can build the EICO Kits!You build EICO KITS in one evening . . . but they last a lifetime! AND YOU SAVE 50\%!

## 6 NEW GENERATORS TO CHOOSE FROM! 2 EICO RF-AF Signal Generators

Model 320: For AM-FM precision alignment and TV marker frequencies. Vernier Tuning Condenser. Highly stable RF oscillator, range: 150 KC. 102 MC with fundamentals to 34 MC . Separate audio oscillator supplies 400 -cycle pure sine wave voltage. Pure RF, modulated RF or pure AF for external testing. 3-color etched panel; rugged steel case. Ship wt. 10 lbs.
Model 320.K,
$\$ 19.95$
Factory wired
$\$ 29.95$
Model 322: In addition to all the outstanding laboratory-precision qualitias of the famous EICO Model 320 , the brand new Model 322 features the individual calibration of each of its 5 bands.
Model 322-K,
KIT, only
$\$ 23.95$
Factory wired
$\$ 34.95$

## EICO Deluxe RF-AF Signal Generator

Laboratory-precision generator EICO Service-Engineered with $1 \%$ accuracy. Frequency range: 75 kc - 150 mc in 7 calibrated ranges. Extremely stable. Illuminated hairline VERNIER TUNING. YR stabilized line supply. 400 -cycle pure sine wave with less than $5 \%$ distortion. Tube complement: 6X5, 7F7, 6C4, VR-150, 3-color etched panel; rugged steel case. 115 v., 60 cycles AC. Size: $12^{\prime \prime} \times 13^{\prime \prime} \times 7^{\prime \prime}$. Ship wt. 21 lbs.
Model 315-K.
$\$ 39.95$
$\$ 59.95$

## EICO TV-FM Sweep Generator

Covers all TV-FM alignment frequencies, $500 \mathrm{KC}-228 \mathrm{MC}$. Vernier-driven dial, Center of each of 13 TV channels marked on front panel. Sweepwidth variable 0-30 MC with mechanical inductive sweep - permits gain comparison of adjacent TV channels. Crystal marker escillator, variable amplitude, Provides for injec. tion of external marker. Phasing control. Complete with HF tubes. Less Crystal. Size: $10^{\prime \prime} \times 8^{\prime \prime} \times 634^{\prime \prime} .5$ MC Crystal, each, $\$ 3.95$. Ship w+. 12 lbs .
Model 360.K,
$\$ 34.95$
Factory wired
$\$ 49.95$

## EICO 5 MC and 4.5 MC Crystals

EICO-designed for all generators and oscillators, these highest quality erystals accommodate all standard sockets and circuits. Give excellent performance with EICO Model 360 Sweep Generator.
Model C-5:
$\$ 3.95$
Model C-4.5:
4.5 MC only
$\$ 3.95$

## EICO New Sine \& Square Wave Audio Generator

- Complete sine wave coverage: 20-200,000 cps. - Complete square wave coverage: $60.50,000 \mathrm{cps}$. - 4 gang tuning condenser. All frequency range resistors have $1 \%$ or better accuracy. Large easy-reading dial calibration: 0-100 linear reference scale. - Response $\pm 1.5 \mathrm{db}$ from 60 cps to 150 kc . Wien bridge RC oscillator. - Improved cathode follower output circuit. - Output Voltage: 10 v . at 1000 ohms load, $14 \vee$. at 10,000 ohms and higher, 8 v . at 500 ohms on sine wave square wave output higher. - High power output: 100 mw into rated load. - Rated load impedance: 1000 ohms resistive. - Continuously variable output attenuator. - Distortion $1 \%$ of rated output. © Hum less than $0.4 \%$ of rated output. - Tubes: 6X5, 6SJ7, 2-6K6, 6SN7, 6S6 (G-E 6-watt lamp). - 3-color etched rub-proof panal: rugged steel case. $115 V_{\text {. }}$ 50/60 cycles, 50 W . Size: $111 / s^{\prime \prime} \times 71 / 8^{\prime \prime} \times 75 /{ }^{\prime \prime}$. Shipping weight 14 lbs.
Model 377-K,
$\$ 31.95$
Factory wired
$\$ 49.95$

## EICO NEW Bar Generator

Enables rapid adjustment of iV picture Vertical and Horizontal linearity without hard-to-find station-transmitted test pattern. Produces 16 to 23 V bars and 13 to 22 H bars, adjustable in number to accommodate all screen sizes. Incorporates VHF osc., 'RF osc., and LF multivibrator. Adjustable from channel 2 to 6 . Deluxe 3-way antenna terminal clip fits any type antenna terminal including plug-in
 Size: $5^{\prime \prime} \times 7 / 2^{\prime \prime} \times 41 / 2^{\prime \prime}$. Ship wt. 6 lbs.
Model 495-K,
$\$ 14.95$

## EICO NEW Deluxe Multi-Signal Tracer

Entirely new 5 -fube instrument provides high gain RF and low gain audio channels with both visual and aural monitors (electron-ray tube and $5^{\text {P }}$, speaker). Permits RF, IF and audio signal tracing in TV, FM and AM sets. Highly useful noise localizer circuit that applies DC test voltage thru probe to suspectea component and simultaneously picks up and amplies effech. May be connecied as tes speaker, amplifier, or output transformer, and has output for Excelient smadi P.A. system. New satin finish etched panel; grey wrinkle steel

Model 147-K,
KIT, only
$\$ 24.95$
Factory wired.
\$39.95

## EICO Multi-Signal Tracer

Audibly traces all IF, RF, video and audio from ANT to SPKR or CRT without switching. Response well over 200 mc . 5" test speaker. Provision for visual tracing with VTVM. Complete with 65J7, 6K6, $6 \times 5$. Germanium crystal diode probe. 3-color etched panel; rugged steel case. 105-125 VAC, 50/60 cps. Size: $10^{\prime \prime} \times 8^{\prime \prime} \times 43 / 4^{\prime \prime}$. Ship wt. 9 ibs.
Model 145-K,
KIT, only
$\$ 19.95$
Factory wired
$\$ 28.95$

## EICO NEW Dual 6V \& 12 V Battery Eliminator and Charger

Gives you all the electrical power you need for 6 -volt and 12 -volt battery charging and auto radio servicing. 2 DC ranges: $0-8$ volts ( 10 amps continuous, 20 amps intermitfent), $0-16$ volts ( 6 amps continuous, 12 amps intermittent). Continuous voltage adjustment with variac-type transformer. Separate voltmeter and ammeter. Heavy duty selenium rectifiers. Fused primary; automatic reset circuit-breaker Size: $83 / 4^{\prime \prime} \times 101 / 2^{\prime \prime} \times 734^{\prime \prime}$. Ship wt. I5 lbs.
Model lo50-K,
$\$ 29.95$
Factory wired
$\$ 38.95$

## EICO 6 V Battery Eliminator and Charger

Similar to Model 1050, but designed primarily for 6 -volf operation ( 10 amps continuous, 20 amps intermittent). May be used for light 12 -volt operation (trickle charging, etc.).
Model 1040-K,
\$25.95
Factory wired
\$34.95

## EICO NEW RTMA Resistance Substitution Box

Enables rapid substitution of resistances from 15 ohms to 10 megohms in decade multiples of $15,22,33,47,68,100$ ohms. Uses 36 standard I watt, $\pm 10 \%$ RTMA. resistors. 5 -way jack-top binding post for connection of practically any type of test lead. Rugged, molded black bakelite cabinet; 2 -color deep-etched satin aluminum panel. Size: $31 / 4^{\prime 4} \times 61 / 2^{\prime \prime} \times 31 / 2^{\prime \prime}$. Ship. wt. 2 lbs.
Model Il00-K.

## EICO New Picture Tube Test Adapter

(for EICO Models 625 and 625-K Tube Testers)
With the new Model CRA and your EICO Tube Tester, you check all sizes TV Picture Tubes as fast and easily as any ordinary tube. Model CRA gives a quantitative measurement of cathode emission, and tests for filament continuity and shorts between elements. Comes complete with standard l2-pin TV tube socket, octal plug-in connector, and extra long 4 -foot cable that enables Pix Tube to remain in set WHILE TESTING.
$\$ 4.50$
EICO NEW Cathode Ray Tube Checker
Easy, fast, dependable testing of all sizes TV picture and oscilloscope type C-R tubes-right in the set or carton. Bridge measurement of peak beam current (proportional to screen brightness) using neon lamp as sensitive balance indicator. Balancing control calibrated directly in terms of tube condition. Detects open and shorted elements. Size: $91 / 2^{\prime \prime} \times 6 / 2^{\prime \prime} \times 3^{\prime \prime}$. Ship wt. 5 lbs .
Model 630-K,
\$17.95
$\$ 24.95$

## 6 NEW EICO VOLT-OHM-MILLIAMMETERS

EICO New Model 565 20,000 Ohms/Volt
Multimeter KIT \$24.95. Wired \$29.95.

- 31 FULL SCALE RANGES! - DC/AC/OUTPUT VOLTS: 0-2.5, 10, 50, 250, 1000 , 5000. - DC CURRENT: 0-100 ua : 10 , 100 , $500 \mathrm{ma}: 10$ Amp. - OHMS: 0-2000 200 K, 20 meg. - 5 DB RANGES: -12 to +55 . LARGE $41 / 2$ " 50 UA METER MOVEMENT. - HIGH-IMPACT Bakelite case. $63 / 4^{\prime \prime} \times 514^{\prime \prime} \times 3^{\prime \prime}$. Ship. wt. $23 / 4 \mathrm{lbs}$.
EICO New Model 555 20,000 Ohms/Volt Multimeter KIT \$29.95. Wired \$34.95. As above, with $1 \%$ precision resistors.
EICO New Model 5661000 Ohms/Volt Multimeter KIT \$14.90. Wired \$18.95. RANGES: Same as Model 536 (see below), plus 7 . output voltage ranges. Large $4 / 2^{\prime \prime} 400$ ua meter movement. $63 / 4^{\prime \prime} \times 51 / 4^{\prime \prime} \times 3^{\prime \prime}$. Ship, wt. 3 lbs .
EICO New Model 5561000 Ohms/Volt Multimeter KIT \$16.90. Wired \$23.50. EICO New Model 5361000 Ohms/Volt Multimeter KIT \$12.90. Wired \$14.90. - 31 1000 OHMS/VOLT FULL-SCALE RANGES! - DC/AC VOLTS: Zero to 1,5 , 10, 50, 100, 500, 5000. - DC/AC CURRENT: 0-1, 10 ma.i 0.1 , AAmP. OHMS:
 EICO New Model 5261000 Ohms/Volt Multimeter KIT \$13.90. Wired \$16.90. As above, with $1 \%$ precision resistors.

## EICO Decade Resistance Box

Exceptional accuracy, wide range and easy operation. Extremaly wide range of $0.99,999$ ohms in 1 -ohm steps with 5 decades and $1 / 2 \%$ precision at any sefting. Comparator Position permits instant substitution of actual equivalent component of the resistance value indicated on the box. Uses $1 / 2 \%$ accuracy 1 -watt resistors. Ruqged, trouble-free construction. Heavy-gauge quality steel cabinet. Size: $12^{\prime \prime}$ * $31 / 2^{\prime \prime} \times 3^{\prime \prime}$. Ship wt. 3 lbs.
Model lizl-K,
$\$ 19.95$
Factory wired.
$\$ 24.95$

## EICO NEW Decade Condenser Box

Uses only highest quality precision silver-mica capacitors: $\pm 1 \%$ accuracy, 500 VDC rated, . 001 power factor, minimum of 50,000 megs insulation resistance. Capacitors arranged in 3 decades to provide extremely wide range of 100 mmf to 0.111 mf in steps of 100 mmf . Smooth-action, positive detent ceramic wafer switches with silver-plated conłacłs. 5-way jack-top binding posts. Excellent for lab and circuit development work. Size: $9^{\prime \prime} \times 31 / 2^{\prime \prime} \times 3^{1 / 2^{\prime \prime}}$. Ship wt. $3^{\prime}$ lbs.
 Prices 5\% higher on West Coast.
ELECTRONIC INSTRUMENT CO., Inc. • Brooklyn II, N. Y.

# FOR PANELS AND TEST SETS 

TYPE NF-2C
EMICO panel and test meters are rugged and reliable instruments Cases are of steel and finished in durable black. DC meters have the new HI-TORK magnetic movements and are accurate to well within $5 \%$. AC neters are of the moving iron type and are also accurate to within $5 \%$.

MOUNTING- All model NF.2C and RF-2C meters will fit into a $2 \frac{1}{16}$ diameter hole and are mounted by means of a U clamp.

DESIGN-EMICO meters are designed to give satisfactory service ander the most severe conditions. They are styled to add to the prestige and appearance of electrical equipment.

CALIBRATION - Since the instruments are calibrated in steel cases, their accuracy is not affected by panels made of magnetic materials of nominal thickness.
GUARANTEED-All EMTCO instruments are guaranteed against defective material and workmanship for a period of one year after date of purchase, and will be repaired or replaced if sent to the factory postpaid with a 50 c handling charge.
EMICO instruments are available in quantities to jobbers or mann facturers in the following sizes: $\mathrm{NF}^{\prime \prime} \mathbf{2}^{\prime \prime}, \mathrm{RF}-21 / 2^{\prime \prime}$, and $\mathrm{RF}-41 / 2^{\prime \prime}$ at $3 \%$ accuracy. We invite your inquiries on instruments for special application.

TYPE RF.2C

TYPE RF-2C

## EMICO VOLTAGETESTER

designed to accurately test voltage at the receptacle

This new convenient voltage tester is strong, rugged and reliable. Case of steel finished in durable black. Damped meter movement, precision mechanism. Accuracy $\pm 5 \% .90^{\circ}$ swivel at the prongs make reading from angle easy. Dealers Net $\$ 3.00$.

$\star$ SERIES EV-20 VTVM and MULTI-RANGE TEST SET

Complete with coaxial Circuit Isolating Test Probe, Shielded Ohmmeter Test Cable, Standard \#227 Super-Flex Test Leads, Ohmmeter battery and full aperating instructions.

In modern, black ripple finished cabinet. Size-101/2"x51/4"x5".
CODE: Party Nel Price - $\$ 69.75$

## SERIES EV-20 VTVM and Multi-Range Test Set true zero - CENTER ON All VTVM RANGES <br> WITH DIRECT PEAK READING HIGH FREQUENCY SCALES Plus Complete Standard $\mathbf{1 0 0 0} \mathbf{O h m s} /$ Volt Functions 48 Ranges to 1200 Volis ${ }^{*}, 2000$ Megohms, 12 Amperes, +63 DB

Series EV-20 is a compact, high sensitivity, laboratory-type, circuit-testing instrument, incorporating the most modern electrical and physical design. It provides unparalleled performance, accuracy and versatility required for AM-FN-TV and general electronic circuit analysis.
Functionally similar to the deluxe Series EV-10A VTVM, with extra large $7^{\prime \prime}$ meter. described an Page. G-92) the Serles EV-20 (with $41 / 2$-inch metar) affords a highly efficient instrument at moderate cost.

RANGESPECIFICATIONS

- SIX ALL-ZERO CENTER VTVM RANGES: $131 / 3$ Megs. Constant Infut Resistance. $\pm 3, \pm 12, \pm 30, \pm 120, \pm 300, \pm 1200$ volts. -Direct geading to $\pm 60 \mathrm{KV}$ when used with Series TV-4 High Voltage Test Probe described on Fage G-95.
$\star$ SIX SELF.CONTAINED RESISTANCE GANGES: 0-2000 - 200,00C ohms. 0-2-20-200-2000 Megohms
* FOUR DIRECT PEAK READING HIGH FREQ. VTVM RANGES: 0-3-12-30-120 volts. (Requires RF-10A High Freq. Vacuum Tube Probe, Net Price $\$ 14.40$. No crystal rectifiers employed.)
* SIXAC-DC AND OUTPUT VOLTAGE RANGES at 1000 ohms per volt. 0-3-12-30-120-300-1200 volts.
* EIGHT D.C. CURRENT RANGES:
$0-300$ microcmps. 0-1.2-3-12-30-120-1200 MA 0-12 Amperes.
$\star$ SIX DECIBET RANGES from -20 to +63 DB . Calibrated for 600 ohm, 1 mw., zero DB.
$\star$ ROTARY RANGE - FUNCTION SELECTORS eliminate frequent and inefficient shiftina of test leads.

## IMPORTANTFEATURES

* VOLTAGE REGULATED - BRIDGE CIRCUIT
* DIRECT READING, ALL ZERO.CENTER VTVN Indicates both Polarity and Magnitude without switching or test lead reversal.
$\star$ SHIELDED CONNECTORS for D.C.-VTVM and RF-VTVM. Permits simultaneous and non-jnterfering connection of both the Circuit Isolating Test Probe and optional H.F. Vacuum Tube Probe Series RF-10A.
$\star$ DUAL - BALANCED ELECTRONIC BRIDGE OHMMETER-MEGOHMMETER uses two 1.5 volt cells easily replaced at rea: of cabinet.
* ADDITIONAL 1000 OHMS/VOLT FUNCTIONS permit routine ACDC voltage, DB and current measurements free of power line.
* 45/8" RECTANGULAR METER - 200 microamperes, $\pm 2 \%$. D'Arsonval construction.
$\star 1 \%$ Film type, Metallized and Wire-Wound resistors for all shunts and multipliers.
* Hecvy grige; round-comered, louvred stee] case with plastic handle. Etched, anodized, aluminum parel.

## Series E-400 <br> Wide Range Sweep Signal Generator Narrow and Witde Band Sweep Direct Reading from $\mathbf{2}$ to $\mathbf{4 8 0}$ Megacycles <br> directiy covers uhf and vhf i.f. allgnment requirements

Incorporating selected and true high frequency components and circuits, Series E-400 has been Application Englneered specifically for modern F.M. and TV oscillographic align. ment methods.
Stressing utmost simplicity of operation. llexibility and stability. Series E-400 affords an unparalleled stardard of performance and value for the efficient TV-FM Service Lab.

## FEATUEES

- Direct Frequency Reading - 2 to 480 MC in 7 bands without skip. Fiarmonically calibrated from 240 to 480 MC Directly Covirs freguency requirements for I.F. alianment of UHF VHF and color receivers
$\star 6$ Posilion Rotary Band Swith covers complete spectrum. No coil switching. Multiple oscillator B supply switch assures maximum irequency accurcey and stability.
$\star 61 / 2^{\circ}$ Etched Aluminum Tuning Dial-Engino turned finish. - 1500 Foint Vernier Scale for close calibration and resetting.
- Engraved Transparent Lucite Frequency Indicator.
- Internal Retrace Blanking Circuit eliminates dual trace of resporse patterns on oscillograph.
- Voltage Regulated Oscillators free of power supply variations.
$\star$ The Basic Circuit and Tube Complement - Uses 2 separate 6 C 4 high frequency beat oscillators plus a 6 J 6 reactance moculated high frequency oscillator. This positively minimizes generestion of unwanted extraneous signals. Also employs a 616 mixer-buffer, a 6C4 mu'tuples crysial oscillator and a 616 fincl marker-mixer ampific: 6X5 full wreve rectifier. YR-105 voltage regulator. 4Yl blankirg voltage rectifier.
$\star$ Selected, True High Frequency Circuit Components. Uses ceramic and air dielectric trimmers, coupling, by-pass and loading capacitors; rugged ceramic suspended, National Straight Line Frequency tuning condenser; modern miniature HF tubes; mica-filled low-lo:s sockets; shock mounted, compensared reactance modutaror; copper fulatim shieiding, etc.
* Narrow and Wide Band Swapp - 0 to 1 MC and 0 to 15 MC.
* Dual Continuous R.F. Attenuators triple shielded. Smootl., stepless, effective control from axtra high output ior single stage alicnment to m-nimum levels fo: multi-staje adjustments
* Wide Range Phasing Controd far Hor. sweep of oscillescope
$\star$ Multiple Crystal Marked-Caiibrctor built-tn. Accommodates 4 rotcry selected erystals. . $21 \%$ accuracy 4.5 MC and 2 MC crystals furnished as standard equipment. Crystal signal separitely attenuated for internal or external use.
* Crystal Calibrated and Contyol - Each instrument calibrated against crystal standards. The 2 MC crystal permits erystal monitering and calibration of external signal qenerators
$\star$ Terminated RG/U Type Caaxial Output Cable for efficient signal transmission with minimum standing wave effects.
$\star 8$ Element Double Section Balamced Line Filter plus Thorough Multi-Section Copper Plate Shislding of instrument cssures mumimur leakage and mindionor.
Simultaneous A.M. and F.M. test facilities for anti-A.M. check of F.M. second detector circuits. A.M. input jacks also permit use a:; a modulated H.F. A.M.. Generator.
* External Deviation inpu: facility for sweep repetition frequen cies other than internal 60 cycle source.
* Fuse Protected at panel extracor fuse post.
$\star$ Heary Gauge, Etched-Anodised Aluminum Panel.
$\star$ Fully Licensed under W. E. A. T. \& T. and Plerce patents. * Series E-400 (illustrated;-In louvered portable copperFlased case. Size $101 / 2^{\prime \prime} \times 12^{\prime \prime} \times 6^{\prime \prime}$. Comflete with tes cables, 2 crystals and eliborate Technical Manual.
Code: Nancy. Nnt Price- $\$ 139.75$
* E-400-PM - Consists of E-400 on $1211^{\prime \prime}$ x $19^{\prime \prime}$ steel panel for standard rack mount. Complete as abave
Code: Niece.
Nnt Price- $\$ 145.25$

## Series ES-500A High Sensifivity, Wide Range, $5^{\prime \prime}$ Oscilloscope Pusi--Pull Vertical and Horizontal Amplifiers 20 MV . per inch " V " Sensitivity SEIF-CONTAINED 1 vOIT PEAK TO PEAK CALIERATOR

Series ES-500A affords the ultimate in performance, visibility and operational flexibility at modexate cost.
"Precision" engineers have incorporated every necessary feature which they found to be required to meet the needs of the rapidly advancing art of electronics.

Series ES-5 0 OA provides an unparalleled combination of high sensitivity, extended frequency range and other essential fectures specifically desired for experimental and commercial visual circuit analysis.

## FEATURES

* High Senelitivity, Wide Range, Voltage Regulated, Push-Pall Vertica: Rmplifier-.02V. per inch deflection sensitivity. 10 cycles to 1 MC response. 2 megohms input resistance. Apprcx. 22 mmi . input capacity.
* Compeñsated Verical Input Step Attenuctor-X1, X10, X100
- Builtin Peak to Peak Voltage Calibrator, push-butten cen trolled at front of panel.
* Vertical Fhrse-Reversing Switch permits inversion of all patterns at will. Non-frequency discriminating.
Extended Range, Push-Pull Horizontal Amplifiar-150 MV (.15 V) per inch high deflection sensitivity adequate for mosi all "H" drive purposes. 10 cycles to 1 MC response at full gain. $1 / 2$ melgohm, approx. 20 mmfd . input.
Linear Multi-Vibrator Sweep Circuit-
10 cycles to 30 KC plus internal line or external sweep
* Amplitude Controlled, Four Way Synch. Selection-

Internal Positive, Internal Negative, External and Line.
"Z" Axis Modulation input facility for blanking, timing, ofc.
Interaml, Phasable 60 cycle Beam Blanking for eluminestion of alignment retrace; clean display of synch pulses, etc.
$\star$ Sweep Phasing Control for sinusoidal line sweep usagn. Wide anqle bricige circuit.

* Direct H and V Deflection Plate Connections and Audia Monitoring phrore iacks at rear. All four plates accessible.
* High Intensity CR Patterns through use of adequate high voltage power supply with separate $2 \times 2$ sectifier.
* The Circuit and Tube Complement-6C4 Vertical input cathode follower. 6CB6 first " $V$ " amplifier. 6C4 " $V$ " phase inverter. Push-Pull 6I6's vertical CR driver. 6SN7 first "H" amplifier and phase inverter. Push-Pull 12AV7 horizontal CR driver. and phase inverter. Push-Pull Multi-vibrator linear sweep oscillator. SC4 retrice blanking amplifier. 5 Y 3 low voltage rectifier. $2 \times 2$ hegh blanking amplifier.
* 7 Foux-Way Lab.-Type Input Terminals-Take banane plugs, phone tips, bare wire or spade lugs.
* Liğht Shield and Mask removable and rotatable.
* Extra Heary-Duty Construction and components to assure "Predsion"-engineered performance.
* Fully Licensed under Western Electric Co. patents.
$\star$ Series ES-500A-In louvered, black-ripple, heavy qruque steel case. Size $81 / 4^{\prime \prime} \times 141 / 2^{\prime \prime} \times 18^{\prime \prime}$. Complete with Ught shield, calibrating mask and comprehensive instruction manual. Code: Quick. Net Price- $\$ 173.70$

## Series SP-5-0scilloscope Test Probe Set

FOR: TV SIGNAL TRACING, ALIGNMENT, TROUBLE SHOOTING AND WAVEFORM ANALYSIS

* Specitically engineered for use with PRECISION Cathode Ray Oscillographs, Series ES-500 and ES-5 90 A.
* Set consists of shielded Master Cable and four different, detachable probe heads in custom-made vinyl carrying case.

1. HIGH IMPEDANCE-LOW CAPACITY PROBE
2. CRXSTAL-DEMODULATOR PROB:
3. RESISTIVE-ISOLATING PROBE

Net Price- $\$ 23.50$

- EV-10A (MCP) (illustrated) In black ripile Grifshed, heary gauge sterl case. Size $101 /{ }^{\prime \prime} I$ rontes. Code: Place Net Price $\$ 99.75$ - EV.IOA (P) In hardwood portable case with tool comparment Slze $12^{\prime \prime} \times 13^{\prime \prime} \times t^{\prime \prime}$. ## PRECISION SERIES EV-1OA VTVM—Megohmmeter TRUE ZERO-CENTER VTVM WITH 7" FULL-VIEW METER FOUR DIRECT PEAK READING HIGH FREQUENCY SCALES Plus standard 1000 Ohms per Volt Functions. Ranges to 6000 Volts, 2000 Megohms, 12 Amperes, +77 DB.

## All prices are subject to change without notice

A WIDE-RANGE, TRUE ZERO-CENTER ELECTRONIC INSTRUMENT, stressing the utmost in performance, accuracy, and ease of manipulation. The Series EV.10A permits rapid check of voltage, current, and resistance conditions encountered in modern A.M., F.M., and TV Networks, without materially disturbing the performance of circuits under analysis.

## RANGE SPECIFICATIONS

* Eight All Zezo-Center VTVM Ranges. $\pm 3, \pm 12, \pm 60, \pm 120, \pm 300, \pm 600$, $\pm 1200, \pm 6000$ volts D.C. self-contained.
* High Input Resistance -
$131 / 3$ megs. constant to 600 volts. $262 / 3$ megohms at 1200 volts.
$1331 / 3$ megohms at 6000 volts
* 4 Direct Reading High Freq. Ranges: 0-3-12-60-120 peak volts. Requires Series RF-10A High Fre. quency Vacuum Tube Test Probe de scribed and illustrated at left.)
* Extra-High Voltage Ranges to $\pm 60 \mathrm{KV}$. when employed with Series TV-4 High Voltage Probe described on page G-95.
* Six Ohmmeter-Megohmmeter Rangea: 0-2000-200,000 ohms. 0-2-20-200-2000 megohms.
- Eight Extra A.C.-D.C.-Output Voltage ranges at 1000 ohms per volt. $0-3-12-60-120-300-600-1200-6000 \mathrm{~V}$
* Eight D.C. Current Ranges: 0-300 microamperes. 0-1.2-6-30-120-600-1200 MA, 0-12 amps.
t Eight DB Ranges from -20 to +77 DB . Calibrated for $1 \mathrm{MW}, 600$ ohms zero DB.

## IMPORTANT FEATURES

* Voltage Regulated-Bridge Type Circuit: affords practical freedom from tube and line voltage variations.
* True Zero-Center VTVM-Indicates boih magnitude and polarity without re. versal of test prods on all ranges.
* Rotary Range and Function Selectors minimize shifting of test leads.
* Recessed 6000 volt Safety Jacins.
t Shielded Coax Test-Cable Connector permit both D.C. and R.F. probes to be connected simultaneously.
* Duo-Balanced Electronic-Bridge Ohm meter-Megohmmeter. Uses 2 self-con tained, standard 1.5 volt batteries.
* Special 1000 Ohms/Volt Functions per. mit routine AC-DC circuit tests free of need for power line connection.
* Exira-large 7" Rectangular Meter. 200 microampere, $\pm 2 \%$ sensitivity.
* Highest Quality Components employed throughout $1 \%$ wire, film and matched resistors * Silverplated switch contacts Leakage-resistant, plastic insul ated hook-up wire - Etched-anodized aluminum panel * Heavy duty line cord.

## Precision Series E-200-C Signal Generator A Modern Multi-Band Signal and Marker Generator for A.M., F.M., and Television Alignment.

Featuring "Servicing by Signal Substifution." The Dynamic Speed Approach to Receiver Allgnment and Adjustment Probiems.

## SPECIFICATIONS

* FREQUENGY COVERAGE: 88 KC . to 240 MC . 60 MC . on fundamental. $61 / 2^{\prime \prime}$ Dial direct reading in 9 bands to 240 MC . No charts required. * ACCURACY-CONSTANCY OF CALIBRATION: $1 \%$ accuracy on all bands. U:es "PRECISION" developed "UNIT-OSCILLATOR" turret construction. - 0-1000 POINT VERNIER SCALE, direct reading to one part in 1000.
* THE CIRCUIT-emplays a 6AU6 in srable E.C.O. circuit-modulated by a EL8 sine-wave audio oscilletor 5 Y 3 Full wave rectifier. - 400 CYCLE SIN-WAVE AUDIO OSCILLATOR-over 50 volts output. - DJAL R.F. ATTENUATORS - smooth stepless control of R.F. signal.
\& SHIE DING - Compartment shielding af vital components - Power trans. former electrostatically shielded-A.C. line is R.F. filtered.
- SHIELDED COAXIAL OUTPUT CABLE and (LO-HI) cable connectors.
* FOUR TYPES OF SIGNALS - "Unmod. R.F."' "400 cycle Mod. R.F.", "EXTERNALLY Mod. R.F."'"400 cycle audio Outout."
* DIRECT READING VARIABLE MODULATION- $0-100 \%$-triples signal utlity as cqainst obsolete fixed or siepped modulation of only 30 or $40 \%$.
$\star$ BIJILT-IN A.V.C.-A.G.C. SUBSTITUTION - Overcomes alignment troubles arising from varying receiver A.V.C. and A.G.C. voltage.
* HAND CAIIBRATED - Each irstrument is INDIVIDUALLY calibrated.
$\star$ FULLY LICENSED under patents of A. T. \& T. and W. E. Co's.
* Not only an efficient Signal Generator for purposes of alignment but also specifically designed for "Servicina by Signal Substitution.
- IDEAL MARKING GENERATOR - Exceptional stability and high accuracy renders Series E-200-C an excellent variajle frequency Marker Generator for use with the Series E- 000 cr s:milar hiah quality Sweeo Sianal Generator.

$\star$ Series E-200-C - (illustrated) In black ripple finished, pratable steel case. Size $101 /^{\prime \prime \prime} \times 12^{\prime \prime} \times 6^{\prime \prime}$. Complete with tubes, output cable and FREE copy of "Servicing by Signal Substitution."
Code: Trade.
Net Price- $\$ 78.50$
* Series E-200-C-PM-Consists of E-200-C on steel panel size $121 / 4^{\prime \prime} \times 19^{\prime \prime}$, for standard rack mount.
Code: Trace. Net Price- $\$ 84.00$

[^24]
## ELECTRONamic (Reg U. S. Pbtent Office) <br> Series 10-15 Electronamic Tinbe Master De Luxe Tube and Battery Merchandiser with extra-large 9" Meter

The All-Inclusive, Positive Vacuum Tube Performance Test that is not limited to Mutual Conductance Alone.
(See technical details in main catalog)

* Incorporates the Electronamic tube performance and birttery testing circuit, described for Serie.s 10-54 on page G-94.
$\star$ Designed particularly for equipment-conscious, progressive radio service-sales organizations, and tube-selling sections 51 department stores.
* PROMOTE CUSTOMER CONFIDENCE and tube sales via this impressive "Precision Tube Merchandiser.

## Series CR-30 CATHODE RAY TUBE TESTER TESTS ALL TV PICTURE TUBES (Tri-color, Magnetic and Electrostafic) OSCILLOSCOPE AND INDUSTRIAL CATHODE RAY TYPES

SERIES CR-30 IS A COMPLETE, SELF-CONTAINED INSTRUMENT particularly engineered for the very special needs of reliable, rapid and economical cathode ray tube testing, in the field, shop or laboratory. Series CR-30 is indispensible to efficient TV Service-Installation It provides reliable answer to the very important question. "IS IT THE CATHODE RAY TUBE OR IS IT THE TV CHASSIS?" Series CR-30 incorporates a BEAM CURRENT TEST CIRCUIT which checks overall electron-gun performance for Proportionate Picture Brightness. Additional direct testing facilities are provided for positive check of accelerating anodes and deflection plate elements.

Tri-color Picture Tube Testing Data will be made available,
as soon as practical, to all owners of the Model CR-30.
The Precision CR-30 should not be confused with cable adapters connecting to ordinary receiving tube testers which were never designed to mee: the very specialized needs of CR tube checking. Similarly, it is not to be confused with neon lamp units or similar devices of limited technical merit and which do not check all CR tubes or all tube elements.

## GENERAL AND TECHNICAL SPECIFICATIONS

* Testa All Modern Cathode Ray Tubes-Magnetic and Electrostatic without removal fram carton or TV chassis. $\star$ Testa All CR Tube Elemems-Not just a liraited few.
$\star$ Absolute Free-Point 14 Lever Element Selection System fror Short-Check, Leakage Testing and Quality Tests. Inderiendent of multiple base pin and floating element terminations.
* Beam Current Test Circuit checks all CR Tubes with Electron. gun in operation. It is the Electron Beam (and NOT total eathode emission) which "races the pictures or patterns on the face of the CR tube.

Total cathode emission can be very high and yet Beam Current (and picture b-ightness) unacceptably low. The CR-30 will reject such tubes because it is a Beam Current tester. Conversely, total cathode emissior can be low and yet Beam Current (and picture brightness) perfectly acceptable. The CR-30 will properly pass such tubes because it is a Beam Current tester. The significence of the above rests in the fact that Beam Current (and Ficture brichtness) is primarily associated with the condition of the center of the cathode surface and not the overcll cathode area. (See illustration below.)

$\star$ Voltage Requlated, Bridge Type VTVM provides the heart of the super sensitive, tube quality test circuit. Such high sensi tivity is cilso required for positive check of very low current anodes and deflection plates.
$\star$ Multiple Test Sensitivities plus selectable element test potentials permit proper accommodation of all CR tube types.
$\star$ Meter-Monitored, Micro-Line Voltage Adjustment provides close control of operating voltages.

* Accaracy of test circuits closely maintained by use of factory adjusted internal calibrating controls; plastic insulated, telephone iype cabled wiring; highest quality, conservatively rated components.
$\star$ Builitin, High Speed, Roller Tube Chart.
* Test Circuits Transformer isolated from power line.
$\star 45 / 9^{\prime \prime}$ Full Vision PACE Meter with special 4-color scale plate expressly designed and compensated for $C R$ tube testing requirements.
* Heavy Gauge Aluminum Panel, etched and anodized.
$\star$ PLUS many other special "PRECISION" details and features.
SERIES CH-30-In hardwood, tapered portable case, with hinged removable cover. Extra-Wide Tool and Test Cable Compartment. Overall Dimensions $1714^{\prime \prime} \times 133 / 4^{\prime \prime} \times 63 / 4^{\prime \prime}$. Complete with standard pictere tube cable, universal CR Tube Test Cable and detailed Instruction Manual.
Code: Daisy.
Net Price- $\$ 104.75$

All prices are subject to chonge without notice

## CIRCUIT TESTING FEATURES

A compiete, wide-range, high speed, pushbutton operated, super-sensitive test set

Completely Self-contained
$\star$ Six D.C. Voltage Ranges: 20,000 ohms per vclt.
$\star$ Six A.C. Voltage Ranges: 1000 ohms per velt
$\star$ Six Output Ranges at 10 LD ohms per volt. 0-6-12-60-3015-1200-6000 volts.

* Ranges to 30,000 Volts D.C. when used with

Series TV-2 super high voltage test probe.
Not included with 10-54. See page G-G5

* Seven D.C. Current Ranges:

0-60-120 microamperes.
0-1.2-12-120-1200 MA. and $0-12$ amperes.
$\star$ Four Seli-Contained Resistance Ranges:
0-6000-600,000 ohms; 0-6-60 megohms.
$\star$ Six Decibel Ranges from -20 to +70 DB .
$\star$ Automatic Push-Button range selection.

* $1 \%$ Wire, Film and Metallized Resistors.
blectronamic (Reg. U. S. Patent Office)

## Series 10-54 Electronamic Test Master <br> Combination Tube Performance Tester, Battery Tester, and 35 Range, Push-Button Operated, Supersensitive, A.C.-D.C. Set Tester. Ranges to 6000 Volts, 60 Microamps, 12 amps, 70 DB, 60 Meg. $\mathbf{2 0 , 0 0 0}$ Ohms per Volt D.C. -1000 Ohms per Volt A.C.

The All-Inclusive, Positive Vacuum Tube Performance Test that is not limited to Mutual Conductance Alone. (See technical detalls in main cotalog)
Series 10-54 affords to the discriminating instrument purchaser, THE COMPLETE PORTABLE SERVICE LABORATORY: engineered to meet the expand. ing needs of modern radio electronics. Provides every necessary facility for high speed, reliable tube and circuit testing associated with Industrial Electronics, Communications, Radio (A.M.F.M.), Television, Laboratory, etc, . . .

## TUBE AND BATTERY TESTING FEATURES

* A TUBE "PERFORMANCE" TESTER: "Precision"" ELECTRONAMIC circuit, plete "Path of Operation" not just at one arbitrary operating point or for ust one inconclusive characteristic.
* TESTS ALL MODERN TUBE TYPES: Noval 9 pin, 7 pin Acorn, dual capped H.F. tubes, Single-Ended TV, and F.M. amplifiers, low power transmitting tubes, sub-miniature types, etc. - including direct facilities up to twelve element prongs!
* ABSOLUTE FREE-POINT LEVER ELEMENT SELECTION: Highest possible, practical order of obsolescence insurance. Locates every tube element regardless of base position.
$\star$ ABSOLUTE FREE-POINT, INTER-ELEMENT SHORT-CHECK and Visible Filament Continuity System.
$\star$ DUAL SHORT-CHECK SENSITIVITY: Permits selection of tubes for special applications.
$\star$ INDIVIDUAL TUBE SECTION TESTS of multi-section tubes.
$\star$ A.M. and F.M. CATHODE RAY TUNING INDICATORS directly tested.
ING INDICATORS directly tested. directly on a 3-color seale.

## Series 10-12 Electronamic Tube Master <br> Truly Free-Point Tube and Battery Performance Tester.

The All-Inclusive, Positive Vacuum Tube Performance Test that is not IImited to Mufual Conductance Alone.
(See fechnical detalls in main catalog)
The $10-00$ Series of TUBE and TEST MASTERS represent the culmination of many years development of tube testing equipment to meet the exacting needs of the rapidly advancing field of electronics.

Incorporating the "PRECISION" ELECTRONAMIC Tube Performance Testing Circult. plus an advanced, "PRECISION" developed, multiple element, master lever selector system, truly can be said that the MASTER 10-00 Series offers, to the discriminating equipment purchaser. the highest possible practical order of test results and anti-absolescence insurance.

## TUBE AND BATTERY TESTING FEATURES

The Series 10-12 Electronamic Tube Master incorporates the same time-proven circult and exacting performance details described for the Series 10-54, above, under the heading: - and Battery Testing Features.

* 10-12-P (see 10-54-P illustra- $\mid$ 10-12-C (illustrated at right) tion and description above) In hardwood, tapered, portable case with tool compartment. Code: Facil.

Not Price - $\$ 107.50$

In modern, chrome-trimmed, zound edged counter cabinet. Fine dull black ripple finish on heavy gauge steel Slze $17^{\prime \prime} \times 177 / 8^{\prime \prime} \times 71 / 2^{\prime \prime}$ sloping to $3^{\prime \prime}$ at front. Code: Faith.

Net Price - $\$ 112.25$
$\star$ 10-12-PM (illustrated at right) Consists of $10-12$ chassis, mounted onto standard size steel panel, 171/2"x19" with dust cover. Fine, dull black ripple finish.
Code: Favor.
Not Price - $\$ 112.25$

All prices are subject to change without notice

858-P

* 858-P (inlustrated) In hardwood, portable case. Size $9^{\prime \prime} \times 10^{\prime \prime} \times 41 / 2^{\prime \prime}$. Complete with batteries and H.V. test leads. Code: Judge. Net Price - $\$ 61.50$
* 858-L In modern bakelite case. Size $71 / 2 " x 81 / 2^{\prime \prime} x 3^{\prime \prime}$. Complete with batteries and H.V. test leads.
Code: Jotty. $\quad$ Net Price - $\mathbf{\$ 5 8 . 7 5}$
$\star$ EIGHT D.C. VOLTAGE RANGES both 20,000 and 1000 ohms per volt. 0-3-6-12-60-300-600-1200-6003 volts. $\star$ EIGHT A.C. and OUTPUT VOLTAGE RANGES at 1000 ohms per voit. 0-3-6-12-60-300-600-1200-6000 volts. * EIGHT D.C. CURRENT RANGES: 0-60-120 microamperes. 0-1.2-12-120-600 MA. 0-1. 2-1\% amps. * Six RESISTANCE RANGES
sell-contained to 60 negotras. 0-6000-60,000-600,000 ohms 0-6-60-600 megohms

## Series 858 High Sensitivity Millti-Master HIGH SPEED, A.C.-D.C. MULTI-RANGE TEST SET <br> 54 Ranges to <br> 6,000 Volts, 60 Microamperes, 12 Amps., 600 Megs. +700 B . <br> 20,000 and 1,000 hhms per Volt D.C., $1,0000 \mathrm{hms}$ per Volt A.C.

Series 858 MULTIMASTER features a "PRECISION" designed, positive action Push-Button Range and Function selection system, afiord. ing the ultimate is operational efficiency.

Designed for reliable measurements in modern TV, F.M., A.M. and other critical electronic circuits where only minute current drain of the measuring instrument can be tolerated.

When employed in conjunction with the Series TV-2 super-high voltage safety fest probe (described below), direct reading facißties to $\mathbf{3 0 . 0 0 0}$ volts are previded. 60.000 volt multiplier is also available.

## SPECIFICATIONS

"PRECISION" engineering solves the high woltage test problem with utmast safety to the operator. Series TV hrow been cusfom designed and patent protected for YOUR sofety FIRST. Cartridge style, high voltage tubular multiplier permits use of a single "TV" probe with many high sensitivity test setz and V.T.V.M.'s. Full detalls on reverse side of "PRECISION'" cataing price sheet.

## IMPORTANT FEATURES

* Custom Molded Polystyrene Head, heavy duty bakelite handle and triple-ring barrier, specially machined internal lucite components, cill spell out "HIGH VOLTAGE ENGINE:ERED.
* High Dielectric Anti-Leakage Paths and wide, multi-channehed guarod-baraier ruiterate "HIGH VOLTAGE ENGNEERED."
* Internal and External Protective Grounding - Full handle length graundec internal slash-over-shield. External, grounded arc-back barrier. HIGH VOLTAGE ENGINEERED
$\star$ Heczy Duily, Grounded-Skielded Conrectizg Cable.
* Ceramic, Helical Film-Type, Cartridge Multiplier manufactured specifically for VERY HIGH VQLTAGE APMLICATION. Removed and changed quickly, conveniontly and without tools!
$\star$ Positive Grounds and High Voltage Connections through high compression contact spriags.
SERIES TVP-Test Probe les: multiplier cartridam, with $.080^{\prime \prime}$ oin plug terminations. Code: Ebony. Né Price - $\mathbf{\$ 1 2 . 3 5}$ SERIES TVP-A-Similar to TVP above, except temminates in standard scre-w-on connector for use with most VTVM's. (Less multiplier carridqe.) Code: Early. Net Price - $\$ 12.35$ SERIES TV2-With 30 KV cartridge for "Frecesion'r (or any) 20,000 ohms per velt test set with 6000 V . range. Nel Price - $\$ 14.75$ SERIES. TV-28-Same as TV-2 above, except terminates in high compression banona plugs for use with PFECLISION 120 or any other 20,000 ohms per voll test set with 6000 volt range and banary jacks. Net Price - $\mathbf{\$ 1 4 . 7 5}$ SERIES TV 4 -With cartridge for ranges to 60 KV for use with "Precision" EV-10A and EV-20. Code: Excel. Not Price - $\$ 14.75$ SERIES TV-4A-Same as TV4 above, except with special adapter for Model EV-10, not EV-10A. Code: Exact. Nei Price - $\$ 14.75$ TVM-Curtridge Multipliert only for Series TV. See reverse side of "Precision" catralog price sheet for complete listings.

## Series 866 De luxe Multi-Master

Panel-Mounted A.C.-D.C. Test Set;
with 9" Meter and Remote-Control Selector Unit 5000 and 1000 Ohms per V., D.C., 1000 Ohms. per V, A.C.

A LARORATORY TYPE HIGH VISIBILITY TEST SET INDISPENSABLE TO THE WELL EQUIPPED, MODERN TEST LABORATORY AND ELECTRONICS CLASSROOM.
The $9^{\prime \prime}$ meter and remote-control selector unit afford unparalleled operational efficiency with maximum physical mever protection via panel mounting above the work level.

> RANGES and SPECIFICATIONS

Except far sensitivity, the ranges, features and functions of the Series 866 are similar to those listed for the Series 858 , portable tes: set, described above.
$50 C 0$ and 1000 ohms per volt D.C. 1000 ohms per volt A.C. 54 Push-button Selected Ranges to:
6001 JV., 300 Microamps, 12 Amps., 200 Megs., +70 DB.

* 66 (illustyated) In standard panel mount, size $19^{\prime \prime}$ z $121 / 4^{\prime \prime}$ with cust cover. Complete with high voltage test leads and ohmmeser batteries. Code: Novel.

The Series 654 is awailable in the
same four model types as described same four model types as described for the Series 612 above.

## Series 612 CATHODE CONDUCTANCE TUBE TESTER <br> A Modern, Free Point, Lever-Operated TUBE and BATTERY TESTER

The very popular "600" Series brings to modern electronic tube checking the highest practical order of obsolescence insurance with utmost simplicity of operation, AT MODERATE COST. This has been achieved with full conformity to the well-known "Precision" standards of quality, workmanship, and performance.
The " 600 " tube testing parameters are based upon the well-established, time-proven emission testing principles as have been recommended by both tube manufacturers and R.T.M.A. The " 600 " line affords advanced design features and performance which render it incomparable amongst instruments in its category and price range.

## TUBE AND BATTERY TESTING FEATURES

* TESTS ALL MODERN TUBE TYPES including 7 pin Acorns, Noval 9 pin, dual capped H.F. tubes, sub-miniature types, F.M. and TV amplifiers.
612-P (illustrated) In hardwood, portabe case, Size $12^{\prime \prime} \times 13^{\prime \prime} \times 6^{\prime \prime}$. Code: Begin. Nel Price - $\$ 7950$
$\star$ 612-MCP Open style Metal Case Portable, Size $1012^{\prime \prime} \times 12^{\prime \prime} \times{ }^{\prime}$ Code: Brine.

Net Price - $\$ 76.75$

* 612-C In modern, chronue-trimmed, coun ter cabinet. Bacis ripple finish. Size $16^{\circ}$
 Code: Bison. Net Price - $\$ 82.25$
* 612-PM In standerrd size panel mount $121 / 4^{\prime \prime} \times 19^{\prime \prime}$ with drsit cover.
$\$ 82.25$

FILAMENT VOLTAGES $3 / 4$ to 117 volts.

* ABSOLUTE FREE-POINT 10 element lever selection for merit and short tests.
* DUAL SHORT-CHECK SENSITIVITY.
$\star$ INDIVIDUAL TESTS OF MULTI-SECTION TUBES including tuning indicators.
* BALLAST UNIT TESTS.
* MICRO-LINE ADJUSTMENT
* $41 / 2^{\prime \prime}$ METER, $2 \%$ ACCURACY.
* NOISE and CONDENSER TEST pin jacks * Pilot Light Test Socket.
* DYNAMIC "UNDER-LOAD" TEST for all popular radio A, B, and C dry batteries.
* Built-in, brass geared hi-speed roll chart.
$\star$ A nodized, deep-etched, heavy gauge aluminum panel, resistant to wear
* Panel-mounted Fuse Extractor Post.
* Test circuits completely transformerisolated from power line.
* Telephone type cabled, plastic-insulated, moisture resistant hook-up wire.
* Each instrument individually calibrated and sealed.

## Series 654 COMBINATION TUBE, BATIERY \& SET TESTER 20,000 OHMS PER VOLT D.C. 1,000 OHMS PER VOLT A.C. Ranges to $6,000 \mathrm{~V}$., 120 microamperes, 12 Amps., 60 Megs., +70 DB.

* SERIES 654 is an economical, compact, High Sensitivity Service Laborałory designed to meet the specific needs of modern electronics service, installation and maintenance, A.M., F.M., and T.V.

Series 654 incorporates the identical tube and battery testing features as described for the Series 612 above, PLUS a complete wide range, high sensitivity. A.C.-D.C. circuit tester.

## CIRCUIT TESTING FEATURES

* 5 D.C. Voltage Ranges: 20,000 ohms per volt $\star 5$ A.C. and Output Voltage Ranges:

$$
1000 \text { ohms per volt. }
$$

1000 ohms per volt.
$\star$ Ranges to 30,000 Volte D.C. when used with Series TV-2 Super high voltage test probe. 6 D.C. Current Ranges: 0-120 microamperes 0-1.2-12-120 MA. 0-1.2-12 Amperes $\star 3$ Wide Resistance Ranges: 0-600-600,000 ohms. 0-60 Megs. Self-contained batteries. $\star 5$ Decibel Ranges from - 12 to +70 DB

* Fully Rolary Selective Ranges and Functions.
$\star$ Only 2 Pin Jacke for all standard ranges.
* Recessed 6,000 V. safety pin jacks.
$\star 50$ microampere, $45 / 8^{\prime \prime}$ Wide-Angle meter. * $1 \%$ Wirewound and film-type resistors. * All circuits isolated from power line.

## MODEL PTA - PICTURE TUBE ADAPTER CABLE For Use With PRECISION Tube Testers

The Model PTA affords picture tube checking facilities within the limitations inherent in all devices of this type. It is ruggedly constructed from selected components and will provide long-lasting service.
The Model PTA is furnished complete with detailed instructions covering its use with all present PRECISION tube checkers in the 600 and $10-00$ series. The Model PTA can also be used with previous PRECISION tube checkers, Models 910, 912, 914, 915, 920, 922 and 954.
Code: Cable.
Net Price - $\$ 6.75$

Model 120: complete with batteries, test mads and manual. Over-al! case dimenstans: 53/8 $x 7 \times 31 / 8$ Code: Wheel

Net Price - \$39.95
Accessories Available for Model 120Model TV-2B: Super-High Voltarge Saiety Test Probe. Direct reading to 30KV Net Price - $\$ 14.75$ Model LC-3: Leathet Iristrument Case Custom-crafted of top-g.ain cerwhide. * Extra Large 51/4" Rugged 'Pace' Meter: 40 microamp sensitivity, $2 \%$ accurccy.
* $1 \%$ Multipliers and Shunts: wive-wound and high stability depos:ted-fi:m types
* Only 2 Plug-Jacks Serve All Standard Ranges: separately identified and i:0 lated jacks provide for extra-higin ranqes.
* "Transit" Safety Position on master rarge selector, protects meter during transportation and storage.
$\star$ Custom-Molded Phenolic Case and Parel set a new siandard for compact, efficient, laboratory instrument styling. Deeply engraved panel characters afiford maxi num legibility throughout the life of the mum legib

## Series 40 compac: AC-DC Test Set

with full size $3^{\prime \prime}$ rectangular meter 31 Self-Con-ained Ranges to 6000 Volts, $600 \mathrm{MA},+70 \mathrm{DB}, 5$ Megohms

In molded bakelith carrying case. Series 40 meets the need for a compactr yet rugged test set to withstand hard usage as is imposed by the service tech nician. maintenance engineer production inspector, troublehooter, etc
The Series 40 offers every advanced design feature and full banced design feature and fullbodxed components as are regucision' $\mathrm{s}^{\prime}$ larger multi-range test cisien s larger multi-range tesi seis, incluainge Rotary Range Selection-1\% shunts and mul-iplierst-heavy duty in:sulated pin jacks - Large zumeralled. oasy reading meter.
All ranges, including 6000 volis and 5 megohms, are self-contalned - no external batierles of multi pllers are required.

## RANGE SPECIFICATIONS

$\star 6$ A.C.-D.C. and Output Voltage Ranges at 1000 ohms par volt 0.3-12-60-300-1200-6000 volts.
$\star 4$ D.C. Current Rangess 0-.6-5-60-600 MA
$\star 3$ Resistance Ranges: J-5000-500,000 oims. $0-5$ megs
$\star 6$ Decibel Ranges: -22 to +70 DB

* Full Size 3" "Rectangular 'Pace' Meter:

400 microamperes sensitivity $\pm 2 \%$ accuracy
$\star 1 \%$ Wire-Wound and Deposited-Film Type Resistors.
$\star$ Only 2 Pin Jacks serve all standard ranges and functions
$\star$ Recessed 6000 volt safety jack for coperational safety
Series 40: In molded bakelite case, $33 / 4^{\prime \prime} \times 61 / 4^{\prime \prime} \times 21 / 2^{\prime \prime}$. Complete with ohmmete: batteraes, test leads, and manual. Cade: Visit

Met Pri=e - $\$ 26.95$
LC-2: Genuine top-grain cowhide carying case, custom-designed for the Series 40. Codes Young

Net Price - $\$ 5.75$

## Series 80 Wide Range Test Set

1000 Ohms per Volt A.C. and D.C. 34 Self-Contained Ranges to 6000 Volts, 2 Amperes, +70DB, 10 Megohms.

The Series BO is a laboratory type, rotary selective, multirange, circuit tester.
Combining rugged 1000 ohms per volt gensitivity with smal overall size, the Series BO is specifically intended for use where the ability to withstand greater electrical and physical overlond is of more importance tham extremely high sensitivity.
Series BO is "ApplicationEngineered" for general purpose industrial, telephone and radio ::ervice testing.

## SPECIFICATIONS

$\star 6$ A.C.-D.C.-Output Voltage Ranges: 1000 ohms per volt. 0-6-12-60-31:0-1200-6000 V
$\star 6$ D.C. Cuxrent Ranges:
 $0-6-6-60.300 \mathrm{MA}$
and $0-1.2-12 \mathrm{amps}$
$\star 4$ Resistcnce Ranges: Self-Contained batteries
0-1000-100. 400 ohms. 0-1-10 megohms.
$\star 6$ Decibel Zanges: from -20 to +70 DB

* 43/8" Rectangular 'Pace' Meter: 400 microampere, $2 \%$ accuracy
$\star 1 \%$ Wire-Wound and Deposited-Film Type Resistors.
$\star$ Rotary Eange Selection: All standard functions available at only 2 polarized tip jacks
$\star$ Recessed 6000 volt safety jack for operational safety.
Series BO: In molded bakelite case, $51 / 2^{\prime \prime} \times 71 / 8^{\prime \prime} \times 3^{\prime \prime}$. Complete With ohmmeter batter:es and test leads. Net Price - \$34.95
LC-1: Genuine top-grain cowhide carrying case, custom-designeri for the Series 80.
Code: Yearn
Net Price - $\$ 9.50$

# Instruments JBI Testers 

## APPLIANCE TEMPERATURE TESTERS

A NEW IDEA IN TESTERS - The need for scientific but sturdy portable test equipment in the cappliance service field is met by this exclusive line. Here the user profits from J-B-T's wide experience in building field test sets for many well-known manufacturers of ranges, irons, refrigerators, deep freeze units, and similar equipment. All J-B-T testoris include the principle of remote reading of temperature,-and lemperature measures the real usefulness of the appliance. Although called appliance testers, these homdy portable Although called applance toters, these handy poriable experimenting and research in industry and in laboratories.

## OVEN TESTERS

MODEL. 23-IP-1. Latest addition to the widely-known family of J-B-T oven temperature testers is this modern and compact unit. Like the Models 32-JP-3 and 32-JP-4 described below, this indicating portable pyrometer is designed to save time and furnish reliable information in testing and setting thermostats on electric or gas ranges and other appliances by showing oven temperatures as they change. The same size of dial, $0-650^{\circ} \mathrm{F}$., with $23 / 8^{\prime \prime}$ scale arc reading, is used but covered by an all-plastic instrument front. The indicator is mounted on a black metal panel affixed inside a pocket-sized, black top-grain leather case $41 / 2^{\prime \prime} \times 27 / 8^{\prime \prime} \pm 41 / 4^{\prime \prime}$ over hardware. Characteristic of more expensive pyrometers, the $23-\mathrm{JP}=1$ is cutomatically compensated for ambient temperature. Thus the tester eliminates calculations, avoids likelihood of serious arror as temperatures change inside the instrument itself, and gives foolproof direct readings. Supplied with attached SA-116 $51 / 2^{\prime}$ callbrated thermocouple, clip, and convection shield_- $\$ 23.50$

MODEL 32-JP-3. This sturdy, fast reading portable is by far the most widely used oven tester in the country. The rigid outer carrying case $6^{\prime \prime} \times 37 / /^{\prime \prime} \times 33^{3} / "^{\prime \prime}$ is covered in black leatherette; the glass-covered Indicator fits in a $31 / /^{\prime \prime}$ flanged metal
case. The dial shows $0-650^{\circ} \mathrm{F}$. in $10^{\circ}$ divisions readable to $21 / 2^{\circ}$. Excep-
 tlonally fast, continuous re-
sponse. Autosponse. Auto
matic compensamon for ambient tion for ambient valuable feature valuable fearure er is used for
 er is used for
sales demonstrations or inspection. More sales demonstrations, or inspection. More
details on the 32 -JP-3 are avadlable in Bulletin details on the 32-JP-3 are avallable in Bulletin JP-103. Price includes attached SA-aching to calibrated thermocouple, clip for attaching to
grill, and convection shield for steady readgrill, and convection shield for steady read-
ings. ings.
MODEL 32-JP-4. Companion tester to the 32-JP-3 with all the features of that tester, plus a leather carrying strap, and binding posts for quick attachment and interchanging of various thermocouples listed on this page, to check irons, washers, waffle-bakers, toasters, roasters, clothes dryers, etc. Range, $0-650^{\circ} \mathrm{F}$; black leatherette case $6^{\prime \prime} \times 37 / 8^{\prime \prime} \times 33 / /^{\prime \prime}$. More details on the 32-JP-4 are avallable in Bulletin JP-104. Price includes SA-116 51/2' calibrated thermocouple, clip and convection shield.

## IRON TESTER

MODEL 32-JIT. Self-contained bench type tester; checks all makes of irons; measures thermostat temperatures; and shows open or short circuits. Automatically compensated for room temperature. Also indicates oparating temperature of the sole plate (working surface) on non-elec tric or cordless irons, Black metal base; overall size $10^{\prime \prime} \times 12^{\prime \prime} \times 51 / 2^{\prime \prime}$ scale 0 - $650^{\circ} \mathrm{F}, 15 \mathrm{amp}$. fuse, $6^{\prime}$ cord, 110 -valt, $50-60$ cycles 31.65 Note: Orders for 32 -JIT Iron Testers are occasionally filled with $23-\mathrm{JIT}$ Iron Testers. Identical with 32-JIT illustrated, but using indicators with all-plastic front.

## ALL-PURPOSE TESTER

MODEL 61-JRT. This 9 - in - 1 tester speeds accurate temperature adjustment and current analysis of ranges, refrigerators, etc. Rapidly reads four cold zones, $-100^{\circ} \mathrm{F}$. to $+80^{\circ}$ F. up to $14^{\prime}$ distant; two heat zones $0-600^{\circ} \mathrm{F}$. up to $51 / 2^{\prime}$ distant; one voltage range 0-300 AC; and with transformer, two current ranges, $0-30$ and $0-60 \mathrm{amps}$, AC. Siurdy, polished walnut caso $151 / 2^{\prime \prime}$ I $100^{\prime \prime} \underbrace{\prime \prime} x 43 /{ }^{\prime \prime}$ with handle and slip hinges.
 Two-color etched metal panel. Separate switches protect Requires one standard flash-light cell, replaceable in the field. Temperature scale accuracy $\pm 2 \%$ of full scale. Rectified AC Temperature scale accuracy $\pm 2 \%$ of full scale. Rectifed AC ing irons, grills, roasters, washers, etc. Includes two SA-i62 ing irons, grills, roasiers, washers, etc. resistance bulbs, two SA-116 thermocouples, necessary electrical
leads, and AS-TR-2 built-in transformer
$\$ 107.25$

## For more details, see Bulletin JRT-349.

MODEL 61-JRT (LESS TRANSFORMER) Same unit, same scales, except does not read in amperes; AS-TR-2 transformer assembly omitted

## THERMOCOUPLES

(See next page for Resistance Bulbs and Tranuformers)
 SR-116 with SHIELD and CLIP. Standard flexible No. 22 gauge iron constantan, asbestos insulated, $5 / 22^{\prime}$. with attachment clip and convection shield as normally supplied with 23-JP-1, 32-JP-1, 32-JP-2, 32-JP-3, 32-JP-4, $50-\mathrm{JRT}$ and 61-JR'T Testors. (See SA-199 for extra quality, glass insulated type). SA-116__1.80
SA-170 (REPLACEMENT THERMOCOUPLE for HRON TESTERS 32-1IT and IT-1). Thermocouple and lead, including aluminum plate and spocial tip, quickly installed in the fiold_- $\$ 2.10$
SR-175 (PLAIN TIP). For roasters, waffle irons, etc., $51 / 2^{\prime}$ Iron constantan flexible No. 22 gauge, asbestos insulated, with small ball tip; used where clip and shield of SA-116 not suitable; for Models 32-JP-2, 32-JP-4, 60-JRT, and 61-JRT_
SA-176 (for TORSTERS, etc.) $51 / 2^{\prime}$ iron constantan No. 22 gauge asbestos insulated, with special disc to collect heat; easily attached to $32-\mathrm{JP-2}$ and $32-\mathrm{JP}-4$ oven testers, also $60-\mathrm{JRT}$ and 61-JRT
SA-188 (for AUTOMATIC WRSHER TEMPERATURES, etc.)
in" diameter copper tube, $4^{\prime \prime}$ long, encloses thermocouple for insertion in pipe or sample of water. fas 6 leads for attachmont to $32-\mathrm{JP}-2$ and $32-\mathrm{JP}-4$ oven testers, also $60-\mathrm{JRT}$ and $61-\mathrm{JRT}$ _ 33.85

SR-199 with SHIELD and CLIP. Same as SA-116 above, except duplex, non-fraying glass bratd construction; diameter . $115^{\prime \prime}$; recommended for frequent use with these testers at temperatures above $400^{\circ} \mathrm{F}$.

SA. 300 (for SURFACE READMYGS), Spring-type iron constantan in Transite tip with handle and 5' No. 22 gauge lead for extremely rapid heat readings; for attachment to 32-JP-2, 32-JP-4, 60-JRT and 61-JRT appliance testers
$\$ 5.50$

SA-301 (REPLACEMENT TIP FOR SA-300). Transite tip and thermal olement only

ACCESSORY IRON TESTER, MODEL IT-1. This attachment is identical with the 32-JIT, except there is no meter. It is easily connected to Models 32-JP-2, 32-JP-4, 60-JRT and 61-JRT. Shows open circuits and shorts, checks sole plate temperatures and thermostats on all types of frons

## Instruments <br> JBi

## TEMPERATURE INDICATORS

WHERE TO USE: To determine heat rise of motora, transformers and coils; for laboratory turnaces, inspection set-ups, for remote indication of infra-red and other oven temperatures; and to check temperatures in indus-
trial processes such as heat treating and annealing. When used with selector switch, permits centralized reading of one to ten thermocouples, as in Diesel exhaust manifold applications.

MODEL 32-J
MODEL 32-J PYROMETER IN SN-7 STAND. Mounted in sloping front black, metal stand, $41 / 4$ " high $\times 43 / \mathrm{g}^{\prime \prime}$ deep z 41/9" wide. Compensated for ambient temperature. Medium rusistance system, damped tor quick reading on $23 /$ /" $^{\prime \prime}$ ucale, assures ruggedness and pointer stability. To retain the $\pm 2 \%$ accuracy of the installation: use only the type and resistance of ther-
 mocouple and lead which are provided; do not cut extra leadzoil it-change in length changes calibration. A protection tube a not generally required. Many users find it zonvenient to keep an extra couple and lead on hand

AODEL 32-J IN SN-7 STAND (Supersedes Siv-3 Stand)
$0^{\circ}-650^{\circ} \mathrm{F}-350^{\circ} \mathrm{C}$, includes SA-91 thermocouple, SA-84 lead, ard CB-1 connector block - 530.25 $0^{\circ}-1200^{\circ} \mathrm{F}-650^{\circ} \mathrm{C}$, includes SA-87, SA-E2, and CB-1 $-2000^{\circ} \mathrm{F}-1100^{\circ} \mathrm{C}$ include 30.25

MODEL 32-J IN SN-8 STAND (not illustroted). With 3 binding posts to accommodate flexible extra lead ani thermocouple for Inard-to-reach locations. (Stand Supersedes SIV-5)
$0^{\circ}-650^{\circ} \mathrm{F}$ with SA-91 thermocoucle, SA-84 lead, CB-1 connector block, and SA-86 flexible lead and thermocouple__ 534.10

## MODEL 60.JPS

MODEL 60-JPS. This portable makes easy to know temperatures at one o ton locations. Excellent for study of heat in various parts of the same equipment, or in a battery of uaits. Knife-edge pointer, 5.6" scale. Heavyduty thermocouple switch has cyerage contact resistance of 002 anms or less. Automatically compensated for ambient temperature indoors or outdoors. To retain accuracy of $1 \%$ full scale, use leads and thermocouples equal to couples equal to resistance and m.m. which instrument is calibrated. MediWhich instrument is calibrated. Mediumbility. Housed in natural-finish wood case $113 / 8^{\prime \prime} \times 85 / 8^{\prime \prime} \times 45 / 8^{\prime \prime}$ over rubber case $13 / 8^{\circ} \times 8{ }^{8} / 8^{\prime} \times 45 / 8^{\prime \prime}$ over rubber $60-\mathrm{JPS}-0^{\circ}-600^{\circ} \mathrm{F}$ with SA. $86,7^{\prime}$ thermocouple and lead
${ }_{60-\mathrm{JPS}}^{\mathrm{for}} 0^{\circ}-1200^{\circ} \mathrm{F}$ with

feet. A "must ${ }^{\prime \prime}$ for inspection, maintenance, and engineering
$-\$ 101.85$
60 -JPS $0^{\circ}-1200^{\circ} \mathrm{F}$ with SA-88, SA-82, and CB-1 104.50 $60-\mathrm{JP}$-For one thermocoup and lead same as $60-$ JPS, but without selector switch.
$0^{\circ}-600^{\circ} \mathrm{F}$, with SA-86.
 $60-\mathrm{JP}-0^{\circ}-2000^{\circ} \mathrm{F}$, with SA-88, SA-82, ard CB-1 -77.00 Note: When ordering additional thermoeouples, specify couples and leads as above. Centigrade equivalent scales available on order.

## MODEL 70-J

MODEL 70-J PYROMETER, for accurate reading at a distance, has curate reading at a distance, has full $6^{\prime \prime}$ scale and spade pointer, with accuracy of $1 \%$ of total scale delection. Automatically compensated for
ambient temperature. Molded case ambient temperature. Molded case
 $73 / 8^{\prime \prime} \times 81 / 8^{\prime \prime} \times 11 / 2^{\prime \prime}$. Connections through bottom of case for wall or front-of-board mounting. When ordering, specify. which standard scale range: $0^{\circ}-600^{\circ} F$ for 1938 std. I-C; $\mathrm{O}^{\circ}-1200^{\circ} \mathrm{F}$ for $\mathrm{C}-\mathrm{A}$;
 $0^{\circ}-2000^{\circ} \mathrm{F}$ for C - A thermocouples.

年 $\mathbf{5 6 6 . 0 0}$
Note: Centigrade equivalent scales available on order.

## RESISTANCE BULBS (FOR COLD TESTING)

SA-142. Bulb with $14^{\prime}$ polyethylene lead, for use only with Model 60-JRT; calibration is not interchangeable with SA-162; has no embossed number SA-162. Bulb with $14^{\prime}$ polyethylene lead, for use only with Models $50-50$ and $61-\mathrm{JRT}$; identifiec by em-
bossed part number

CL-90 CLAMP. Metal clamp for holding SA-142 and SA-162 resistance bulbs in contact with surfaces up to $1 / 4^{\prime \prime}$ _ $\mathbf{0 . 2 8}$

## TRANSFORMERS

AS-TR-2. Attachment for compartment of 61-JRT all-purpose tester, completely housed, with jumper lead and panel; reads 30 and 60 AC amp. scales on tester
$\$ 16.50$
AS-TR-3. Attachment for increasing usefulness of 60-JRT a!l-purpose tester. Includes side rails for attaching inside compartment; fully housed. Reads 30 and 60 AC amp. by dividing voli sale by 10 or 5

## TEMPERATURE ACCESSORIES

LEAD WIRES. To bring the reference junction within the pyrometer, compensating or extension lead wires should always be used. See the instrument dial for (1) the kind of lead and (2) combined resistance of lead and thermocouple. Standard leads include:
SA-82 6' compensating lead for chromel-alumel couples; duplex, stranded; asbestos-insulated, cotton-braid impregnated with moisture-proof and flame-proof compound; terminals at with moisture-proof and flame-prool compound, terminals at SA-83 $26^{\prime}$ compensating lead for chromel-atumel as above $\begin{gathered}54.85\end{gathered}$
SA-84 6' extension lead for iron-constantan, 1938 calibration; duplex; moisture-proof and flame-proof; prepared as above
SA-85 $26^{\prime}$ extension lead for iron-constantan, 1938 calibration;
similar to above. similar to above
SA-86 $7^{\prime}$ iron-constantan thermocouple and lead combined; twisted pair No. 20 Ga., asbestos-insulated-for intermittent use on $650^{\circ} \mathrm{F}$ scales; terminals at meter end; other ead welded (Resistance not interchangeable with SA-84 or SA-85)___ $\$ 1.85$

THERMOCOUPLES. For pyrometers and leads atove, J-B-T thermocouples are carefully selected, standardized, tnd tested SA-87 12 " No. 14 Ga. chromel-alumel, 2-hole ceranic beads, fits $5 / 16^{\prime \prime}$ hole; welded tip. $\$ 3.10$
SA-88 same except $24^{\prime \prime}$ No. 14 Gc.
_ SA-89 12" No. 8 Ga. chromel-alumel, 2-hole ceramic beads. fits $7 / 15^{\prime \prime}$ hole; welded tip. $\qquad$ SA-90 same except $24^{\prime \prime}$ No. $8 \mathrm{Ga} . . . \quad$ _ $\$ 3.85$ SA-91 12" No. 14 Ga iron-constantan, 1938 calibration; 2-hole ceramic beads, fits $5 / 16^{\prime \prime}$ hole; welded tip................ $\$ 2.60$ Flexible Thermocouple, 7 ' length, see SA- 86 lead wire.

CONNECTOR BLOCK Model CB-1. Lava connector block, withstands high temperatures, accommodates all thermocouples up to No. 6 Ga. Heavy brass connectors keep contact resistance low. Can be used independent of connector
 head. -
PROTECTION TUBES. To support, enclose, and protect thermocouples like the above, especially at higher temperature or in damaging atmospheres, various wrought iron or alloy protection tubes are recommended. Please request separate catalog shee on them, also covering $\mathrm{CH}-6$ connector head.

## Instruments Ji. <br> Testers

## VIBRATING REED FREQUENCY METERS

J-B-T Vibrating Reed Frequency Meters are used extensively in radio, telephone, and television service, on engine generator sets, in laboratories, in many types of electronic equipment, on panel and control boards in central stations and industrial plants-wherever constant or known frequency is important to efficient operation of equipment. More than ten years of continuous experience covering many thousands of theme instruments are your assurance of quality for both commercial and defense applications.

The response patterns differ with the increments of frequency between reeds. For example, at 60 cycles, half-cycle steps give the broad response shown below at left, whereas full cycle steps bring the sharp response at right.

The patented, simplified design used in the J-B-T meter operates on AC or interrupted DC. The instrument consists of a case, base, dial and central mounting frame, with a series of spring steel reeds screwed to a reed mounting bar, individual driving coil surrounding each bank of reeds, permanent magnet, series resistor and terminal studs.
Each reed is adjusted to respond by resonance to but one frequency. As the alternating current (or interrupted direct current) excites the driving coil, the one reed "in tune" with the frequency in the coils will respond by vibrating rapidly because of permanent magnet polarization and induced magnetism from the coil. The instrument is adapted to specified operating voltage by a series resistor. Frequency of the current is read on the graduated face of the instrument.

Above: Models 30-F, 31-F, 33-F, 34-F; 31/4" Metal Case
Below: Models 30-FX, 31-FX, 33-FX, and 34-FX; Molded Case Meets Mounting Dimensions of JAN-I-6; ASAC39.1-1951; and MIL-M-6A (TYpe MR 34 or 35)

ADVANTAGES: Guaranteed accuracy at reference temperature of $77^{\circ} \mathrm{F}$ is $\pm 0.3 \%$ or better of the AC frequency being measured. unless otherwise stated. Accuracy on interrupted DC may be somewhat less. High fatigue safety factor for continuous operation. Temperature compensations are not required as temperature coefficient of reeds is only approximately 75 parts per million per degree $F$., negative.

All meters are permanently calibrated at the factory and do not require subseqt ?nt adjustment. J-B-T reeds have relatively high Q characteristici:, an especially desirable factor in electronic circuits. Wave serm or external magnetic fields do not ordinarily have an adverse effect. Built with no pivoted parts and with lock washers at eve $y$ critical point, these rugged meters can take rougher treatment than many instruments.

CAUTION: If a meter plugged in on a 60 cycle AC power line does not indicate a frequency of exactly 60 cycles, trust the meterl Power supply may momentarily be off-frequency due to changing load conditions beyond the control of the Utility. All J-B-T Vibrating Reed Frequency Meters are accurately calibrated at the factory, entirely independent of frequency of power supply. Production and inspection equipment are checked regularly against National Bureau of Standard frequency signals.

MODEL 30-F (Operating at 60 cy .)
MODEL 31-F
Used in standby power equipment. Handy for accurately measuring frequency of power source. Five reeds, 58-62 cycles, $100-130$ volts. Other characteristics same as Model 30-F.
31-F, 58-62 cy., $31 / 4^{\prime \prime}$ Metal Case …_-_ $\$ 23.65$ 31-FX, 58-62 cy., $31 / 2^{\prime \prime}$ Moided Case, JAN-I-6 mtg. ....... $\$ 23.65$

MODEL 34-FX

## MODEL 30-F

Range: 48-52 and 58-62 cycles. Double window for ease of reading frequency in either range. Often specified for export. 100-130 volts; 130 ohms per volt; 1 watt power con. sumption. Accuracy $\pm 0.3 \%$ ar reference temperature. Flusb panel mounting.
$30-\mathrm{F}, 48-52$ and $58-62 \mathrm{cy} ., 31 / 4^{\prime \prime}$ Metal Case $\$ 27.50$ 30-FX, 48-52 and 58-62 cy., $31 / 2^{\prime \prime}$ Molded Case, JAN-I-6 mtg .

Covers a broader frequency band. Nine reeds, 56-64 cycles, or in half-cycle steps (accuracy $\pm 0.2 \%$ ) 58-62 cycles. 100-130 volts; 130 ohms per volt; l watt power consumption. Flush panel mounting.

$\$ 40.70$

All FHXX Type 31/2', Frequency Meters;
Sealed Metal Case (Type MR36 of MIL-M-6A)

## NOTE ON METER VOLTAGE

J-B-T Vibrating Reed Frequency Meters of all sizes normally are made with two studs and are designed to be cormected across one phase of a multi-phase line. The single phase voltage to be specified for the meter. Special meters with extra studs are made only for the purpose of reading two or more voltages, not additional phases.

## 31/2" SEALED METERS

FHXX TYPE sealed meters, glass-to-metal construction with solder terminals and detachable flange, supersede the former FHX sealed meters (Print SK-24). While JAN-I-6 and MIL-M-6A (Type MR36) do not reier to frequency indicators, the FHXX series uses the front mounting dimensions, and meets or ex ceeds the sealing and electrical requirements including the 3000 volt breakdown. Mounting dimensions are shown below. Standard volt age is 100-130. Electrical
 are the same as for corresponding models without the HXX designation. Every meter tested in water where the absolute pressure of the air above the water is redut:ed to 2.5 inches of mertury (approx. $57,000 \mathrm{ft}$. altitude) and is maintained for one minute. While not reqularly stocked, these meters are in production.

## 21/2" SEALED METERS

As instruments available on special order, 3 -B-T can supply $31 / 2^{\prime \prime}$
sealed frequency meters with mounting as in Typr $\mathrm{MR} 3 \mathrm{~S}^{2}$.f MIL-M-6A.

## 11/2" SEALED METERS

MODEL 15-FHAC. Widely used on audio-oscillators as the frequency standard, the model illustrated operates 2 reeds, 60 and 400 cycles,
at approximately
$8-10$
volts at approximately 8 -10 volts for cathode follower circuit. Accuracy ba. $\%$ at ${ }^{2}$. Steel case has black telephone is $1, .$, solder tel minals. Barrel is $11 / 2^{\prime \prime}$ diameter 2.094" detachable flange covers glass-to-metal seal. See complete dimensions below.
$15-$ FHAC

## 15-FHAC

$\qquad$ \$20.30 15-FH-5 METERS (lower photo), use the same $11 / 2^{\prime \prime}$ black metal case. glass-to-metal seal, and $2.094^{\prime \prime}$ de tachable flange as the Model 15 FHAC. The 15-FH-5 series provides 5 reeds in a row for $100-130$ volt or eration. Used where size and weight are design considerations. $100 \%$ inspected for approx. $57,000 \mathrm{ft}$. altitude by same test as FHXX Type, above. Standard meter but not reqularly stocked. See complete dimensions below.
15-FH-54, 5 reeds, $390-410$ cy....... $\$ 25.85$
 15-FH-56, 5 reeds, $58-62$ cy........... 21.45

Sealed $11 / 2^{\prime \prime}$ Models 15-FHAC, 15-FH-54 and 15-FH-56.
Net Radio's Master - 19th Edition

## ELAPSED (OR RUNNING) TIME METERS AND 4" FREQUENCY METERS

## ELAPSED TIME METERS-60 Cycles

MODEL 31.EX. To record operating time of AC electrical and electronic equipment, this self-starting synchronous instrument registers in $1 / 10$ th hour steps to $9,999.9$ hours, then automatically re-sets. Shows tenths in red numerals, all others in black. Black molded case per diagram below matches FX, $31 / 2^{\prime \prime}$ frequency meters, and fully encloses all parts. J-B-T engineers recommend AC elapsed time meters for superior accuracy, especially where voltage or ambient temperatures vary widely. Popular for tube life, TV equipment, punch presses, conveyors, oil kurners, maintenance schedules, etc. 99,999 hour type is available on special order.
31 -EX, 60 cy., $110-125$ volts $\qquad$
 MODEL 31-ES, (Square Case). Same as 31-EX except black molded case $3^{\prime \prime} \times 3^{\prime \prime \prime}$, per print SK-34; 60 cy., 110-125 volts (not regularly stocked)

## ELAPSED TIME METERS-Tenths of Minutes

MODEL 31 -EXM, 60 cycles, $110-125$ volts, reading $0-9,999.9$ minutes: for short-run applications or readings at closer intervals than $31-E X$. Tenths of minutes in red, minutes in black numerals, other-
$\mathbf{\$ 1 6 . 2 5}$ wise identical with 31-EX

## 31/2" SEALED ELAPSED TIME METER-60 Cycles

MODEL 31-EHXX. Where rugged requirements make a completely sealed elapsed time meter desirable, this glass-to-metal construction, with flat glass front and $31 / 2^{\prime \prime}$ diameter separable flange, often is specified. Heavy-duty solder terminals are supplied. Every instrument is checked in a vacuum chamber. Overall dirnensions and appearance match the FHXX series sealed frequency meters per drawing on preceding page. See print SK-53 for complete mounting data. The meter registers in $1 / 10$ hour steps to $9,999.9$ hours, then automatically re-sets. Tenths indicator is in red, all others in black. $31-E H X X, 60 \mathrm{cy} ., 110-125$ volts $\qquad$ . $\$ 19.75$

## 21/2" SEALED ELAPSED TIME METERS—60 Cycles

MODEL 21-EHXX. This new $21 / 2^{\prime \prime}$ sealed meter, with front mount ing dimensions the same as Type MR-26 electrical indicating instruments in MIL-M-6A, nevertheless offers a full-size counter reading $0-9,999.9$ hours in $1 / 10$ th hour steps and a rugged selfstarting synchronous motor. Glass-to-metal seal makes the instrument completely tamper-proof. Please ask for mounting diagram. 21-EHXX, 60 cycles, $110-125$ volts. $\mathbf{\$ 2 4 . 7 5}$

## SEALED ELAPSED TIME METER-400 Cycles

MODEL 33-EHXX. Meeting a long-felt need for a stable 400 -cycle elapsed time meter compact enough to fit in a $31 / 2^{\prime \prime}$ flanged case, with all parts enclosed, is this new 400 -cycle elapsed time meter. The instrument now is being produced only in sealed construction, glass-to-metal, with separable flange, heavy-duty solder terminals, and flat glass front. External appearance matches FHXX series and Model 31 -EHXX sealed, 60 -cycle, elapsed time meter A slightly larger case is used per drawing in the next column. 33-EHXX, $400 \mathrm{cY} ., 0-9,999.9$ hours, $1 / 10$ hour steps, $110-125$ volts. $\$ 58.00$

Model 31-EX Molded Case, meets type MR-34 or MR-35 tlange dimonsions of MIL.M.6A, also JAN-1-6 and ASA C39.1-1951

## 400 CYCLE BROAD AND VERNIER INDICATOR

MODEL 41-FX. This 2 -window frequency meter is widely used for electronic and aircraft testing in commercial and military applications. The lower window shows a broad range of $300-500$ cycles, with 21 reeds in 10 -cycle steps. The upper window gives a vernier effect with 13 reeds indiccting $380-420$ cycles in 4 -cycle steps, with 2-cycle increments in the critical range of 396 -404 cycles. Housed in black molded case with flush front 4 A $^{\prime \prime}{ }^{\prime \prime}$ wide $\times 4{ }^{\prime \prime} 8^{\prime \prime}$ high
 and 23显" deep behind panel over studs, the insirument blends well with other panel meters. Made for 100-130 volt operation. Also available with 4 studs for 200-240, 115 , and 30 volts as used in aircraft analyzers. Full dimensions on drawing MD-38.
41-FX. 100-130 V
$\$ 120.00$
41-FX, triple voliage, without switch 135.00

## ELAPSED TIME AND FREQUENCY METERS

31-FE SERIES. To conserve panel space and centralize information, this panel instrument combines the elapsed time or running time meter with frequency reeds. It is used on motor generator sets and on electrical equipment where maintenance routine calls for periodic servicing. The J-B-T design, proved by years of field experience, uses a separate exciting coil for the reeds to achieve close control of reed amplitude and frequency. Reads 0-9,999.9 hours, and $58-62$ cycles with 5 reeds, for
 $100-130$ volt operation; self starting. Tenths shown in red, all Other numerals in black. Black metal case with front mounting same as model 31-F. Other dimensions per drawing below. For variations having 7 , 9 , or 11 reeds, not regularly slocked, such as Model 34-FE, see revised print SK-45.
31-FE, 31/4" metal case
31-FEX-1, (per print SK-44-- not regularly stocked) like Model 31-FE, except with $31 / 2^{\prime \prime}$ metal flange permanently attached for MIL-M-6A (MR-34 or MR-35) front mounting $\quad 34.10$

Model 31-FE and veriations in $31 / 40$ metal case; $25 / /^{\prime \prime}$ diameter recommended drill hole for barrel.

Model 33-EFXXX elapsed time moter, 400 cycles only $31 / 2^{\prime \prime}$ metal case; meots type MR-36 flange dimensions of MIL-M-6A, also JAN-1-6 and ASA C39.1-1951

# SYLVANIA TEST EQUIPMENT the last word in accuracy \& dependability 

## .

For Further Information, Write To:

Dependable for accurate measurement of ohms, DC, AC and RF volwages, DC current and Decibels. Accurate measurement of complex waveforms accommodared by new Peak oo Peak scale. Special subminiature diode cube in RF probe provides for a flat response from 10 kc to 300 mc on scales to 300 volss. The 7 inch meter movement and illuminated scale allows maximum readability.

## SERVICE POLYMETER-TYPE 301

A compact polymerer unit designed for dependable accurate measurement of ohms, DC volts, AC volts, DC current and Decibels. Features new Peak to Peak scaie for accurate measurement of complex waveforms. The 7 inch meter movetionally high-gain DC coupled instrument and incorporates many of the advanced features oi higher priced models. It is particularly surtable for observing the many complex waveforms in television and will comperently fulfill many service. production laboratory and industrial requirements.

## DELUXE POLYMETER-TYPE 302

 ment and illuminated scale allows maximum readibility.
## MARKER GENERATOR-TYFE 501

Provides 2 separate signais for marking an oscilioscope trace of response curves. Accurate adjustment of craps, frequency spatting, measuring bandwidth, and correct adjustment of the popular 4.5 mc , intercarrier sound circuits. VFO covers 15 to 240 mc . range.

## SWEEP GENERATOR-TYPE $\mathbf{5 0 0}$

No mechanical sweep. Uses reactance tube sweep in two ranges; 0.15 mc for TV, 0.600 kc for FM. Fundamentals from 2 to 230 mc . Special circuits to assure extreme linearity. Output 300 to $1 \oplus 0,000$ microvolts. Companion tồ 501 Marker.

TUBE TESTERS-TYPES 219 \& 220
Two models available the 219 counter type, 220 portable type. Composite mutual conductance and emission checker rejects tubes failing either requirement. Relative amount of heater-cathode and inter-element shorts or leakage shown on ME'TER. Designed by a tube manufacturer to check tubes for modern applications.

## VOLTAGE CALIBRATOR-TYPE 300

## TV LABORATORY OSCILLOSCOPE-TYPE 404

An esceptionally trigh-gain, wide band oscilluscope created especially for designing and servicing TV receivers. Accurately displays any TV pulse waveform or signal on a large 7-inch screen. Sensitivity: 10 millivolts rms per inch peak to peak deflection. Vertical response useful so 4.0 mc . Recommended for servicemen, laboratories, schools and industry.

Accurateiy measures reak to reak voltage of any waveíorm displayed on scope. Uses voltage regulated clipper circuit to give extreme accuracy in spite of line voltage fluctuation. Switch feeds either calibrating voltage or signal voltage to scope

# SUPERIOR <br> The New Model TV-11 <br> <br> TUBE <br> <br> TUBE <br> SPECIFICATIONS 

The model TV-11 operates on $105-130$ Volt 60 Cycles A.C. Comes housed in a beautiful handrubbed oak cabinet complete with portable cover.

* Tests all tubes including 4, 5, 6, 7, Octal, Lock-in, Peanut, Bantam, Hearing Aid, Thyratron, Miniatures, Sub-miniatures, Novals, Sub-Minars, Proximity fuse types, etc. Uses the new self-cleaning Lever Action Switches for individual element testing. Because all elements are numbered according to pin-number in the RMA base numbering system, the user can instantly identify which element is under test. Tubes having tapped filaments and tubes with filaments terminating in more than one pin are truly tested with the Model TV-11 as any of the pins may be placed in the neutral position when necessary.
* The Model TV-11 does not use any combination type sockets. Instead individual sockets are used for each type of tube. Thus it is impossible to damage a tube by inserting it in the wrong socket.
* Free-moving built-in roll chart provides complete data for all tubes.
* Newly designed Line Voltage Control compensates for variation of any line valtage between 105 Volts and 130 Volts.
* NOISE TEST: Phono-jack on front panel for plugging in either phones or external amplifier will detect microphonic tubes or noise due to faulty elements and loose internál connections.

## EXTRA SERVICE

The Model TV-11 may be used as an extremely sensitive Condenser Leakage Checker. A relaxation type oscillator incorporated in this model will detect leakage even when the frequency is one per minute.
 R. T. TU BE TESTER
complete picture tube tester for litfle more than the price of a "make-shift"

Tests off magnetically deflected tubes - . in the set in the carton!!

SPECIFICATIONS

- Tests all magnetically deflected picture tubes from 7 inch to 30 inch types.
- Tests for quality by the well established emission method. All readings on "GoodBad scale.
- Tests for inter-element shorts and leakages up to 5 megohms.
- Test for open elements.

Model TV-40 C.R.T. Tube Tester comes absolutely complete - nothing else to buy. Housed in round s15 ${ }^{85}$ cornered, molded

FOR ELECTRICAL CONTRACTORS AND MAINTENANCE MEN The New Model 640
 ANALYZER

The new Model 640 provides all the measuring services required for electrital maintenance, development, testing and repair work. Model 640 operates an a self-contained standard battery and is therefore always ready for use. No external source of current is required.

## Features

Precision Calibrated External Shunt for High Currents. An accurately calibrated external shunt enables exact HIGH CURRENT measurements up to 75 amperes.
Automatic Current Measurements. The Model 640 will measure the actual current consumption of any electrical device while the unit is in operation and without breaking any connections.

## SUPREME

Since 1927

## MULTI-METERS

The Supreme Model 543 (left) and Model 542 (right) volt-ohm-milliammeters have become real companions to maintenance men everywhere. Both instruments are the same size (approx. $6 \times 3 \times 2$ inches) and are available in either the moulded "B" style case (illustrated) or the metallic type case with leather handle and meter protector shield (Style "M"). Model 543 has 4 functions and 12 ranges and the Model 542 has 6 functions and 24 ranges.

| Model 543B | $\$ 24.60$ | Model 542B | $\$ 27.70$ |
| :--- | :--- | :--- | :--- |
| Model 543M | $\$ 28.30$ | Model 542M | $\$ 32.10$ |
| Test Leads | $\$ 1.40$ | Test Leads | $\$ 1.40$ |

## MINIMETERS

About the size of a cigarette pack, these fine little multi-range, single function instruments have found their way into a lot of shirt and vest pockets of electrical troubleshooters. Convenient size and durable construction for portability. Built with highest quality materials and workmanship for dependability. Quantity production for a budget price. Model 440 Ohmmeter only $\$ 12.90$ complete with test leads. Other functions available from $\$ 10.65$ to $\$ 14.50$.

## PANEL METERS

Leading manufacturers of electrical and electronic devices select Supreme meters for use in their products because they are quality built and dependable. Supreme meters are supplied for end equipment uses in a variety of sizes and designs "customed" to meet the need for special scales, dials and case appearance. A sketch or drawing of your meter needs will bring you a prompt quotation and delivery schedule from Supreme.

WRITE FOR ADDITIONAL INFORMATION: For prompt action, address your request for additional information to SUPREME, INC., BOX 5524, GREENWOOD, MISSISSIPPI. In addition to the items illustrated above, Supreme also makes Oscilloscopes, Tube Testers, Signal Generators, and special purpose instruments for both government and industry.

## MUTUAL CONDUCTANCE TUBE TESTER EMC MODEL 206

This completely flexible model using lewertype switches offers extremely acourate results with ease of operation. It represphts the finest in tube testing equipment at a price comparing favorably with amission-type testers.

CHECK THESE FEATURES

- Clicerks mutual conductance on a calibrated nieromino and "reject-gond" saale - Checks 5 clement tubes as pentades - Checks tubes for gas content - Suffirient phate current to check hoth emission and mutual condurtanec - Detects both shorted amd open clements - Completc switching flexibility allows all present and future tubes to le tested, regardless of location of elements un tube base - Tusts tubes for radio frequenry and other noise - Tests all tubes from .75 volts to 117 filament volts - Tests all joctal, uctal, and miniature tuhes - Tests cold rathode, magic eye, woltage regulator, ballast resistors - Instrument fuse is easily replacefl from panel front - Individual sockets for each tube base type eliminates possible errors - Cherks individual sertions of multi-purpose tubes - Checks 9 -prong miniature tubes - Cherks suldminiature tubes - Attractive four-color panel with durable hardwrinkle tinish Built-in roll chart.
MODEL 206P-With hand-rubbed oak carrying case..............................................................
MODEL 206C-Sloping counter case.... for MODEL 206

In this model EMC offers a durable, acemate instrument that gives easy, direct readings for all tuhns through the standard emission method of tusting. It uses four-position lever-type switclies and is housed in a hambrubhed, portaliz wak carrying rasw w

- Tests all tubes including Noval and suliminatures - ("ompletely flexihbr switching arrangement Checks batteries under rated load on "reject-good" scalc- Individual sokets for each type of tulhe base - Tests all tubes from .75 rolts to 117 filament wolts Tests cold cathole. magic eye, roltage regulator and ballast tubes - Has pilot light indicator - Checks for shorts and lcakacs bine voltage control compensates for line variations between 105 and 135 volts Built in roll chart proterted by nun-breakable transparabt plastic © Checks conlenser leakage to 1 megohm (hecks resistance uj to 4 megolms - Cbecks capacity from . 01 to 1 mfd. - Three rolor hammertone panel

## 12,080 HOURS OF ENGINEERING TO BRING YOU THE NEW AMAZING PRECISE MODEL \#300 OSCILLOSCOPE!

The Oscilloscope you've been seeking. . . . No other oscilloscope at any price - high or iow - with these desirable features - in beth Kit and Wired Form: SPECIFICATIONS: PRECISE MODEL 300 OSCILLOSCOPE -
VERTICAL: Vertical-flat (3dh) DC through 5 meacycles with senstitivity of oreater than 10 milivolts push-pull ( 3.94 Millivolts $/ \mathrm{cm}$ ); Constant Fesisthntee, Push-pull input immediately converted to single-ended normal or reverse phase by stortiatr bar at inputs 1 and 2; Frequency compensated rertical stepping attenuator selects AC or DC inputs; Push-pulI DC amplifiers from input through output; Internal electronic mixing through inputs 1 and 2; five-way binding posts
POSITIONING: Bridge type positioning on vertical and horizontal does not vary tube characteristics.
HORIZONTAL: Frequency compensated stepping attenuator in harizantal amplifier; Push-pull Horizont al out.
BLANKING: Internal (return trace blanked). external (return trace not blanked), 60 cycle or 120 eycle Blanking through Blanking amplifier circuit.
SYNCHRONIZATION: External. Internal Positive, Interral Negative, Internal 60 cycle or Internal 120 cycle synchronization.
SWEEP RATE: Driven or non-driven linear sweeps from 1 cycle to 80 KC in five ranges (1-10 cycles uses external C circuit); Trigger potentiometer.
MAGNIFIER: Electronic miguifier and magnifier positioher allow any part of a signal to be magnified up to ten times (equivalent to 70 inches of horizontal deflection).
CALIBRATION: Internal square wave calibrator and potentiometer for usillo oscilloscope as a VTVM on Peak to Peak measurements.
CALIBRATION SCREEN: Edge-illuminated scale and graticule may be turned on or off; filtered screen.
OUTPUTS ON FRONT PANEL: Plus Gate output; Sawtooth output; 60 cycle phasing output; 60 cycle unphased output; Calibration output.
FOCUSING: Astiomatism, focus and intensity control
CRT: NEW $7^{\prime \prime}$ Tube, normally supplied is medium persistency type 7VP1, or 7JP1 may also be used (oscilloscope green trace) - high persistency types available at additional cost. be used (oscilloscope green trace) high persistency type
DIRECT: Deflection plates available from rear of cabinet.
INTENSITY MODULATION: Z modulation throcgh modulation amplifier.
GENERAL: Low loss components; Over-designed fused power supply for additional circuitry: Deeply etched aluminum panel. New parts from original manufacturers - (NO SURPLUS); Steel cabinet; $11^{\prime \prime} \times 14^{\prime \prime} \times 17^{\prime \prime}$; complete with instruction hook and all components: Accessories: Model 912T (MM) Demodulator Probe and Model 960 Capacity Attenuator Probe available at extra cost - please see specifications on following pages.
Thrse are many additional features and circuits in kit form, which may be added to the
Mondel 300 . Please write us for descriptive literature. Madel 300. Please write us for descriptive literature.

- NEW PRECISE MODEL 111 Mutual Conductance and Emission Tube Tester

$$
\begin{aligned}
& \text { llo factory wired } \$ 139.95 \\
& \text { Weight.......................... } 30 \text { lbs. }
\end{aligned}
$$

$$
\text { Size............... } 14^{\prime \prime} \times 16^{\prime \prime} \times 6^{\prime \prime}
$$

ENGINEERING DESIGN CONSIDERATION: To understand the Model 111 Mutual Conductance and Emission Tube Tester, it is perhaps best to spend a moment with the original design considerations. Basically we recognize the fact that:

1. A GM or Emission type tube tester actually reads a goodly percentage of tube troubles-BUT each alone missed a great many. We could not say with any degree of assurance which type of tube test was the best. Certain applications required GM, while others required Emission. PRECISE Solution: The Model 111 checks Gm and Emission separately. It indicates on the roll chart the most important single test for normal applications. It is, of course, desirable to make both tests.
2. In AC-DC equipment, or series filaments arrangements, which are daily enjoying greater popularity the "Voltage Sapper" (a tube which developed too much filament voltage as compared to the other tubes) was a constant trouble. PRECISE Solution: The Modef 111 allows the filament current to be measured directly on the meter.
3. A whole series of different test voltages (sweeping from zero voltage up) was required. PRECISE Solution: The Modei 111 sweeps from 0 through the normal testing range when making measurements. This gives an average evaluation for the tube over an extended range of operation.
4. Short tests usually require elaborate switch manipulation. PRECISE Solution: The Model 111 uses a single rotary switch which checks each element against every other element. No conversion chart is required to ascertain which pins are shorted. This test may be made at any time hot or cold without changing any other switches.
5. The instrument would have to be rugged to stand the "trunk of a car" type of abuse. PRECISE Solu tion: in the Model 111 a heary steel cabinet houses the entire unit. The panel is deeply etched aluminum.
6. Tube Bias, being an important consideration, should actually be measured on the meter. PRECISE Solution: The Model 111 measures tube bias directly on the indicating meter.
7. The instrument should be simple to operate. PRECISE Solution: The Model 111 uses different type knobs, a no-backlash roll chart, and a sectionalized design setting off each section.
8. There should be a provision for new tubes. PRECISE Solution: The Model 111 is one of the simplest type tube testers to set up for new tubes. The pin connections and function positions may be taken directly from the tube manual. The instrument already includes provisions for testing many color tubes.
9. It should check all modern tubes. PRECISE Solution: The Model 111 is provided with sockets for testing the following type bases. Large 4 prong, large 5 prong, large 6 prong, large 7 prong, medium 7 prong, miniature 7 prong, in-line 7 prong (sub-miniature), Octal, Noval, sub-miniature 8 prong, Acorn CRT and Loctals.
10. The instrument should check Cathode Ray Tubes. PRECISE Solution: The Model 111 also checks cathode ray tubes by an included adaptor.

## - PRECISE MODEL 760

## Voltage Regulated Power Supply

The Madel 760 is an extremely versatile electronically regulated power supply capable of delivering an assortment of different voltages. It is invaluable in general repair and laboratory use.

## Regulated voltage

Ranpe- 160 volts to over 450 volts.
\% Requlation-Within 1\% at specified current duration.
\% Ripple-. $01 \%$ at specified surrents.
Max. Current- 100 ma depending on raltages.
Metering-Voltage and current are both metered by switches.
High Voltage-Unregulated variable to 1000 volts DC positive or negative. Voltage is metered. Maximum current of 1 ma.
Low AC Voltage-Unregulated 6.3 volts AC, 4 amperes capacity.
High AC Voltage- $\mathbf{3 7 5}$ volts AC, 50 ma, DC Capacity. Unregulated.
V.R. Tube Reference DC Voltage-DC reference voltage, low current, available for reference or screen operation.
All voltages ae capable of being used simultaneously except for the plus or minus 1000 volts. Either plus or minus may be used but not simultaneosly.

## GENERAL

The instrument is housed in a sturdy steel cabinet with a deeply etched aluminum panel. A rugged $41 / 2^{\prime \prime}$ meter movement is used for all metering. Shunt and multiplier resistors are within $1 \%$ accuracy. A leather carrying handle is povided. 5 Way binding posts are used for the regulated outputs. All other voltanes are available by pin jacks. The high and low voltage supplies each have a standby position and the voltage metered is indicated by a jeweled pilot light for the HV and LV. Basically the PRECISE 760 is a general purpose source of regulated voltages for substitution and experimental work. No returns are made to the cabinet allowing the instrument to be used for AC-DC applications.

## T1 - TRANSISTOR KIT ANOTHER NEW EXCLUSIVE KIT BY PRECISE

Now PRECISE makes it possible for you to build your own countless experiments with the most remarkable construction kit you've ever seen . . . the brand new PRECISE TI TRANSISTOR KIT. Components include transformer, chassis, TRANSISTORS, germanium diode, wire, etc. - everything you need for experimental construction plus the finest step-by-step instruction book ever prepared.

- PRECISE MODEL 960

The lowest prited CAPACITY ATTENUATOR PROBE, and what's more IT ALLOWS SCOPE MEASUPEMENTS TO BE MADE WITH $1 / 10$ th THE CAPACITY LOADING EFFECT.

- FREQUENCY RANGE: Through 105 NC , flat throuth normal commercial c.scilluscape frequenties.
- READINGS: Attenuated by a factor of ten to one.
- MAXJMUM A.C.: 1000 Volts.

960

- INPUT G:APACITY: Less than 7 mofd.
- Each prothe may be individually ralibraked.
- Non tydio-scopic insulation.
- PRECISE MODEL 912 R.F. Probe

Individually ralibrated at 75 megacyelus for accurary, impedance and shunt capacity. The lowest priced, wired, calibrated R.F. Prote.

- FREQUENCY RANGE: RMS readines from AF through 250 megacycles. Veritalily flat through 100 megnayeles.
- bailt in 600 volt blocking capacitator.
- INPUT CAPACITY: The approximate: input capacity is less than 3 mmfd usualiy about 1.2 mmfd.
- IFPUT RESISTANCE: Approx. 200,000 ohms at 1 HC. Approx.
150,000 ohms at 10 MC . Angrox, 25,000 ohms 100 MC . 150,000 ohms at 10 MC . Anprox. 25,000 ohms at 100 MC .

## - PRECISE MODEL 999

High Voltage Probe
The PRECISE: MODEL 999 High Voltage Probe was desioned for high voltage measuremeats with special emphasis on SAFETY, OPERATIONAL SIMmeasurements with special emphasis on SAFETY, OPERATIONAL SIM-
PLICITY AND RNGGED CONSTRUCTION. First in the industry to include any ore or more of the following features:

- MULTIPLE INSULATION: The only probe with at least three individual media onust be penetrated before voltage breakdown can occur.
- MECHANICALLY SHOCKPROOF CONSTRUCTION: The only probe to utilize a double spring suspension system in order to protect the Ceramic hish wittage multiplier resistor.
- INTERCHANGEABLE TIPS: The only probe where two tips are suppliedone, the conventional type for probing; the other, an alligator clip for connecting. permanently to the circuit.
- SWIVEL LEAD CONSTRUCTION: A special-fixed slip-ring arrangement is provided which prevents the test lead cable from snagoing or developing high strains at the junction of the cable and probe handle.
- INTERCHANGIEABLE RESISTORS: To match your instrument.

## FREED Test Instruments

## TYPE 1030-A LOW FREQUENCY "Q'’ INDICATOR

## USES

The Type 1030-A Low Frequency "Q" Indicator measures directly the " $Q$ " factor of coils. The instrument can also be used to measure the inductance of coils, distributed capacity, impedances, and dielectric losses. The " $Q$ " Indicator can be used to study the magnetic properties of iron, such as stability of iron cores in function of applied voltages, and iron losses as a function of the frequency.

## FEATURES

The main and essential feature of the instrument is that the " $Q$ " factor is read directly without any complicated computations. The possibility of measuring "Q" through the whole audio and supersonic frequency range is provided. The setting up and the measuring of the " $Q$ " of coils is practically instantaneous. The instrument is unaffected by line voltage variations, is entirely self-contained and A.C. operated. Both meters ("multiply-by" and "Q") are protected against overloads and cannot be burned out. The frequency range for " $Q$ " measurements is 20 to 200,000 cycles. The terminals of the variable decade condensers are available directly on the front panel of the instrument. The condensers, therefore, can be used as high quality precision variable condensers. To reduce the residual capacitance a link is provided on the front panel of the instrument which disconnects all but the 100 mmfd variable air condenser. When the link is closed five decade capacitors and the air variable are connected across the condenser

terminals. The R. C. Oscillator and variable impedance amplifier can be used as a separate low frequency generator with an output power of five watt.s into a 50 ohm load. The " $Q$ " scale is calibrated from 0 to 100. A high accuracy of measurement is obtained, since " $Q$ " variations from 0 to 100 are read on a 4 inch meter. " $Q$ " factors of coils can be measured with up to 100 volts across the coil, and therefore makes it possible to determine the stability and the variations of the " $Q$ " factor of coils in function of the applied voltage. The voltage fed into the series circuit is variable from 10 volts to .01 volt.

## SPECIFICATIONS

Range of " $Q$ " Measurements: The range of " $Q$ " factora is from 0.1 to 1000 over the frequency range from 20 to 200,000 cycles with an accuracy of $5 \%$.

Oscillator Frequency Range: Continuously variable from 20 to 200,000 cycles in four ranges.

Frequency Accuracy: $1 \%$ under normal temperature conditions. The frequency stability is better than $2 \%$ over a long period of time.

Output Impedance and Voltage: Four output impedances are available. (a) 10 ohms impedance - 25 V Output Voltage
(b) 1 ohm impedance - 2.5 V Output Voltage
(c) .2 ohm impedance - . 25 V Output Voltage
(d) .1 obm impedance - . $0: V$ Output Voltage These Impedances are measured at $50,000 \mathrm{cy}$.

Variable Condenser: The varimble concenser is composed of a $10 \times 1$ $\mathrm{mpld} ., 10 \times 0.1 \mathrm{mfd}$., $10 \times 0.01 \mathrm{mfd}$., $10 \times 0.001 \mathrm{mfd}$. and $10 \times$ 0.0001 mfd . decade condenser and a 100 mmid . variable sir condenser.

Power Supply: The instrument is eutirely self-coutained and A.C. operated. Total consumption 200 watrs.

Dimension: Width $191 / 2^{\prime \prime} \times$ Depth $141 / 2^{\prime \prime} \times$ Height $23^{\prime \prime}$
Weight: 120 lbs.

## TYPE 1020-B MEGOHMMETER

## USES

The Freed Type $1020-$ B Megohmmeter is a self contained and A.C. operated instru-
 ment equally useful in the laboratory or for production testing of the leakage resistance of insulation materials, condensers, cables, motors and transformer windings.

## FEATURES

Resistance values indicated directly on a four inch meter protected against over-load. Rapid and safe to use, test voltage removed from terminals and capacitive component discharged to ground in all positions of multiplier switch. Low resistance in series with component under test provides very short charging time for even the very largest capacitors. Calibration position provided to check accuracy of 500 volts D.C. potential.

500 volt test supply electronically regulated.

## SPECIFICATIONS

Range: 1 megohm to $2,000,000$ megohms in six overlapping ranges selected by a multiplier switch.
Accuracy: Plus or minus $3 \%$ on resistance values up to 100,000 megohms; plus or minus $5 \%$ from 100,000 to $2,000,000$ megohms.
Voltages on Unknown: The voltage applied to the unknown terminals is 500 volts D.C. and is independent (less than $1 \%$ ) of the value of the unknown.

Stability: Line voltage variations from $105-125$ volts will cause less than $\mathbf{2 \%}$ variation in the meter reading.
Power Supply: $105-125$ volts A.C. $50-60$ cycles 30 watts.
Dimensions: $91 / 2 \times 101 / 2 \times 8$ inches.
Net Weight: 18 pounde.

## TYPE 1620 MEGOHMMETER

CONTROLS

1. Range selector and calibrating exitch.
2. Zero adjust control for settin: meter scale to ixtin:ty.
3. Push button switch for activating the relay which applies test voltage ta terminais - when releused. diecharges cayacitive compon $n^{4}$ across the un known terminals.
4. Variable D.C. adjust - for setting the D.C. test voltage at dt:sired level.
5. A.C, on-off ewitch.

## DESCRIPTION

The instrument is a direct-reading, precision-balanced electronic ohmmeter with a variable D.C. test potential included as part of the unit. The D.C. test potential is variable from 50 to 1000 volts and is indicated by a four inch meter.
The insulation resistance is measured in six overlapping ranges and is indicated by a four inch meter, protected against overload. A relay, operated from the front panel, disconnects the high voltage from the test terminals and eliminates all danger of shock due to exposed high potential. In the standby position (when push button is rcleased) a resistance is connected between the chassis and the high voltage terminal, so that when measuring capacitors the danger of shock is eliminated when disconnecting the component under test.

## SPECIFICATIONS

Range: . 5 megohms to $4,000,000$ megohms in six overlapping ranges selected by a multiplier switch.
Accuracy: Plus or minus $5 \%$.
Voltages on Unknown: The voltage applied to the unknown terminals is continuously variable from 50 volts to 1000 volts. A $4^{\prime \prime}$ meter indicates the voltage applied to the unknown.

Terminals: Four terminals are provided, two for connecting the unknown, one guard and one ground.
Power Supply: $\mathbf{1 0 5 - 1 2 5}$ volts A.C. - 50-60 cycles.
Cabinet: $15^{\prime \prime} \times 9^{\prime \prime} \times 7 \frac{1}{2} 2^{\prime \prime}$.

## TYPE 1010-A COMPARISON AND LIMIT BRIDGE

## USES

This instrument is a comparison and limit bridge for use in both laboratory and production testing of resistors, condensers and inductors. The manufacturer of these components can use it for production teats, the user for incoming inspection and acceptance tests. The instrument is particularly useful for laboratory work (bridge or filters) where very accurate components are required.

## FEATURES

For precision and production testing, the bridge has many advantages. Power line operation and the visual indicator make the instrument completely aelf-contained. It can be used in noisy locations. Its small size and light weight permit the instrument to be moved easily and to be set up wherever necessary.

## DESCRIPTION

The instrument is composed of an oscillator, a bridge and a selective amplifier. The oscillator output is coupled into the bridge through a shielded isolation transformer. A witch is provided which connects either a high or low impedance winding across the witch is provided which connects either a high or low impedance winding across the bridge, consisting of two fixed resistors, the unknown impedance and the standard. A variable resior be the difference between the unknown and the standard on a specially calibrated dial. A high gain selective amplifier indicates the balance of the bridge. The general method of testing is the comparison of an unknown component with a standard component of the same type. Accurate percentage measurements are obtained by the use of precision components in the arms of the bridge. The use of a high gain amplifier and adequate internal shielding assures a very sharp and distinct balance.
A visual null indicator, consisting of a meter used in connection with the high gain amplifier makes it possible to use the No. 1010 -A Bridgs as a precision limit bridge in production testing.

SPECIF\|CATIONS

Frequency: Three test frequencies are available: 50 or 60 cycles, 1000 cycles and 10,000 cycles.
The 50 or 60 cycles are taken from the line. The 1000 and 10,000 cycles are generated by an oscillator and are accurate to within $\pm 2 \%$. Range: Two comparison ranges are provided. $5 \%$ and $20 \%$. The percentage difference is read directly on a calibrated dial.
Resistor Measurements: Resistors from 1 ohm to 20 megohms may be compared at 60 cycles to an accuracy of $\pm 0.1 \%$.
Condenser Measurements: Condensers from 50 mmfd to 10 mfd are measured at 1000 cycles. Condensers above 10 mfd are measured at 60 cycles. Condensers below 50 mmid may be measured if the groundunground switch is in the unground position.

Inouctor Measurements: Inductors may be measured at 60, 1000 or 10,000 cycles depending on their value. Range: 10 microhenries to 1000 henries.

Accuracy: On the $5 \%$ position the components can be adjusted to within an accuracy of $\pm 0.1 \%$.

Voltage Applied to the Unknown: Two controls are provided to vary the voltage across the unknown. A special low impedance winding is used when measuring small impedances and the voltage across these may be varied from . 1 to 1 volts. For higher values of impedance the voltage may be varied from .5 to 15 volus.
Power Supply: $105-125$ volts; 50.60 cycles.
Portable: Carrying cabinet of all metal construction.
Dimensions: $101 / 2^{\prime \prime} \times 12^{\prime \prime} \times 12^{\prime \prime}$.
Net Weight: 17 lbs.

## TYPE 1870 INCREMENTAL INDUCTANCE COMPARISON BRIDGE

USES
The Freed Type 1870 is designed for rapid production testing of transformers and chokes under actual operating conditions

The unit consiste of a variable D.C. Supply ( 0 to 500 ma ) a 60 cps . variable supply ( 0 to 135 volts) a comparison circuit and a vacuum tube voltmeter.

## SPECIFICATIONS

Inductance Range: 25 ml to 25 h .
Deviation Range: $\pm 20 \%$ with an accuracy of $1 \%$. $\pm 50 \%$ with an aecuracy of $5 \%$.
Frequency: The line frequency is used for most measurements. If another frequency is desired a jack is provided for connecting an external oscillator.
Voltage Applied to Unknown: Variable from 0 to 135 volts.
D.C. Current Range: 0 to 500 ma in four overlapping ranges, $0-5 \mathrm{ma}, 0-25 \mathrm{ma}$, $0.100 \mathrm{ma}, 0-500 \mathrm{ma}$.
Vacuum Tube Voltmeter: .01, .1, 1, 10, and ion volts full scale.
Power Supply: The instrument is entirely melf contained and operates on $\mathbf{1 0 0 . 1 2 5}$ volts, 50-60 cycles.
Dimensions: $191 / 2^{\prime \prime}$ high $\times 22^{\prime \prime}$ wide $\times 15^{\prime \prime}$ nowp.

## TYPE 1110-A INCREMENTAL INDUCTANCE BRIDGE

## USES

The Incremental Inductance Bridge is designed for measuring the inductance of Iron Core components at any frequency up to 10,000 cycles. Inductors can be measured with a superimposed direct current, therefore, the bridge will measure the incremental inductance of coils. The bridge can be used for determination of storage factor, "Q", either at a given frequency in function of the applied voltage or at a given voltage in function of the applied frequency. The loridge can be used by the manufacturers of iron core components. such as filter chokes, high $Q$ coils, and iron core audio and supersonic frequency components. Due to its very wide inductance range the instrument can be used as a general purpose laboratory inductance bridge.

## SPECIFICATIONS

Inductance Ranges: One millihenry to one thousand henries in tive ranges. In. ductance values are read directly from a four dial decade and a multiplier switch. The last range may be extended to 10,000 henries through the use of an external resistance
Conductance Ranges: One micrombo to one mho in five ranges, read directly from a four dial decade and a multiplier switch. This conductance represents the reciprocal of the A.C. resistance of the coil.
" Q " Range: " $Q$ " is measured as the product of Inductance (L), Frequency (W) and Conductance (G). The range of "Q" measured on the bridge is 0.5 to 100 . Measurement of inductance is independent of the vatues of " $Q$."
Accuracy: $1 \%$ through the frequency range from $60-1000$ cycles $2 \%$ for frequencies from 1000 to 10,000 cycles. This accuracy is decreased for extreme positions of the multiplier. Conductance measurements $5 \%$ from $60-1000$ eycles.

Frequency Range: The bridge is calibrated and adjustred at both 60 and 1000 cycles, but can be user] at any frequency up to 10,000 cycles. Errors resulting trom stray capacity increase with frequency A comprensated bridge with luwer itray capacities is available for A comirensated bridge with lower itray capacities is available for at higher frequesicies. Order Freed hodel 1110A-B.

Range of Super/mposed D.C.: on multipliar switch Hosition L X 100 the D.c. is !imited to 10 ma .

On the position L X 10, the D.C. is limited to 250 ma .
Inductors up to 11 Henries may be measured with 1. Amp DC through them.
Mounting: The bridge is supplied in a walnut cabinet or on special order for standard rack mounting.
Dimensions: Rack: 19" Wide x $8^{\prime \prime}$ Deep x $14^{\prime \prime}$ High Cabinet: $21^{\prime \prime}$ Wide $\times 8^{\prime \prime}$ Deep $\times 16 \%{ }^{\prime \prime \prime}$ High.
Net Weight: Rack: 37 lbs . Cabinet: 48 lbs.

## TYPE 1150 UNIVERSAL BRIDGE

## FEATURES

The Universal Bridge offers a variety of five possille bridge circuits. A wide range of capacitance, inductance, impedance, and phase ancle measurement can be made throughout the frequency spectrum from 20 cycles to 20,000 cycles.
Decalle resistors in the variable arms allow the unknown to be measured to four sirniticant tigures.
Operation is simple and both terminals and controls are arranged for convenience and ease of measurements.

## SPECIFICATIONS

Frequency Range: The bridge can be used at frequencies from 20 cycles to 20,000 cycles.
Accuracy: All resistors of the bridge arms are adjusted to $0.1 \%$. The absolute accuracy of measurement will depend upon the accuracy of standards used.
Inductance Range: The bridge will measure inductance of coils from 0.1 mh to 1000 henries with an accuracy of $0.5 \%$ at 1000 cycles.
Capacitance Range: Condensers from . 001 mf to 1 mf can be meatsured to within $0.5 \%$ at 1000 cycles. Condensers below .001 mf should be measured by the substitution method.
Mounting: The bridge is supplied in a walnut cabinet or on special order for standard rack mounting.
Dimensions: Kack: $19^{\prime \prime}$ Wide x $8^{\prime \prime}$ Deep x $14^{\prime \prime}$ High.
Cabinet: $21^{\prime \prime}$ Wide $\times 8^{\prime \prime}$ Deep $\times 10 \% / 8^{\prime \prime}$ High.
Weight: Rack: 32 lbs. Cabinet: 43 lbs.

## TYPE 1180 A.C. SUPPLY

A valuable laboratory instrument with continuously variable output from $1 / 10$ volt to 100 volts at 60 cycles.

Dimensions: 19" Wide x $5^{\prime \prime}$ Deep x $7^{\prime \prime}$ High.
Weight: $131 / 2 \mathrm{lbs}$.

# TYPE NO. 1170 D.C. SUPPLY 

USES
The Type 1170 Power Supply is intended to be used as a dependable source of direct current for the Incremental Inductance Bridge Type No. 1110-A. The supply can also be used as a general laboratory substitute for a high voltage storage battery.

## DESCRIPTION

The Type 1170 D.C. supply consists of an electronically regulated high voltage supply. Four independent control circuits provide four current ranges, namely 5 milliamperes, 25 milliamperes, 100 milliamperes and 500 milliamperes. The output current is indicated by a multirange $4^{\prime \prime}$ meter.

## SPECIFICATIONS

Current Ranges: Four current ranges - 5, 25, 100 and 500 milliamperes. Voltage Ranges: The maximum no load voltages corresponding to the four current ranges are the following: $500 \mathrm{MA}-270$ volts, $100 \mathrm{MA}-270$ volts, $25 \mathrm{MA}-55$ volts, $5 \mathrm{MA}-25$ volts. On both 500 MA and 100 MA range with the control set to zero, the output voltage is independent of the load.
Voltage Regulation: The unit operates from a 115 volts, 50-60 cycle line. For a line variation of plus or minus $10 \%$, the output voltage shall not vary more than $\pm 11 / 2 \%$.
Power Consumption: Under 500 MA full load the power consumption is 360 watts. Under no load conditions the consumption is 150 watts.
Hum Level: On the 270 volt, 500 milliampere range the hum level under full load condition is 6 millivolts which corresponds to -93 Db .

Mounting: The instrument is supplied for mounting on a 19 -inch relay rack or for cabinet moanting.
Dimensions: Rack: 19" Wide x $12 \frac{8}{1 "}^{\prime \prime}$ Deep $\times 121 / 4^{\prime \prime}$ High. Cabinet: $211 / 2^{\prime \prime}$ Wide $\times 15^{\prime \prime}$ Deep $\times 14^{\prime \prime}$ High. Net Weight: Rack Mounted 68 lbs. In Cabinet 89 lbs.

## TYPE 1210-A NULL DETECTOR AND VACUUM TUBE VOLTMETER

## USES

The Type 1210-A Null Detector and Vacuum Tube Voltmeter is primarily designed for bridge measurements. The Null Detector indicates the balance of the bridge, and the Vacuum Tube Voltmeter indicates the voltage across the unknown two terminal or four terminal network. The three selective circuits provide means for sharply tuning the instrument to audio frequencies commonly used for measurements. The Vacuum Tube Voltmeter can be used as a general purpose audio Vacuum Tube Voltmeter.

## DESCRIPTION

The Type $1210-\mathrm{A}$ Null Detector and Vacuum Tube Voltmeter is a combination of the Model 1140 Null Detector Amplifer, and a modiffed Model 1060 high input impedance Vacuum Tube Voltmeter. Both instruments are independent and feed two separate $4^{\prime \prime}$ meters.

## SPECIFICATIONS

NULL DETECTOR
input Impedance: 1 megohm in parallel with 25 mmf .
Frequency Response: 2 db from 20 to 20,000 cycles - 5 db at 50,000 cycles with filter switch in "out" position.
Null Detector Sensitivity: At 1000 cycles, 100 microvolts will give a $15 \%$ meter deflection.
Selective Amplifier: 26 db second harmonic attenuation at 60,400 and 1000 cycles. Selectivity at any other frequency between 20 cycles and 20 kc . may be obtained by connecting Freed Model 1940 to the external filter jack.
VACUUM TUBE VOLTMETER
Voltage Range: .01 volts to 100 volts in four ranges - ( $0.1,1,10,100$ volts at full scale).

Waveform Error: The instrument, is a full wave averacte meter and is free of turnover effects. For small amount of distortion the accuracy of the instrument is independent of the waveform.
Frequency Range: 20 cycles to 200,000 cycles ( 1 db ). Input Impedance: Equivalent to 50 megohms resistance in parallel with a 25 mmf condenser.
Meter Scale: Logarithmic Voltage Scale calibrated from 1 to 10 plus a linear db scale calibrated from 0 to 20 db . Dimensions: Rack Mwonting $19^{\prime \prime} \times 9^{\prime \prime} \times 111_{2}^{\prime \prime}-25$ lbs. In cabinet $21^{\prime \prime} \times 15^{\prime \prime} \times 13^{\prime \prime}-37 \mathrm{lbs}$.

## TYPE 1140-A NULL DETECTOR-AMPLIFIER

## USES

The Freed Model 1140-A Null Detector Amplifier is a sensitive null indicator for bridge measurements, providing visual null indications or aural when used in conjunction with headphones. The unit may also be used as a high gain amplifier for general laboratory work.

## DESCRIPTION

Functionally the instrument consists of a high gain linear amplifier with a 30 db . input attenuator in addition to the variable gain control. A four-inch panel meter provides visual null indications, the response of the meter circuit is approximately logarithmic over a 40 db . voltage range. Resonant circuits tuned to 60,400 and 1000 cycles limit the amplifier transmission characteristics to the three audio frequencies commonly used for bridge measurements or it may be used as a non-selective amplifler with filter "off."

## SPECIFICATIONS

Input Impedance: 1 megohm in parallel with 25 mmf . GAIN: 98 db . with 1 megohm load ( 6 mmf . shunt capacity), down 1.5 db . at 25,000 cycles, down 5 db . at 50,000 cycles,
 down 2 db . at 20 cycles.

Null Detector Sensitivity: At 1 kc .100 microvolts will give a $\mathbf{1 5 \%}$ meter deflection.
Selective Amplifier: 26 db . second harmonic attenuation at 60,400 and 1000 cycles. Selectivity at any other frequency between 20 cycles and 20 kc . may be obtained by connecting Freed Model 1940 to the external filter jack.
Output Impedance: Approximately 50,000 ohme.

Output Voltage: 40 volts undistarted into 1 megohm load, 10 volts into 20,000 ohms.
Power Supply: $105-125$ volts, $50-60$ cycles, 35 watts consumption. Mounting: This instrument can be supplied in cabinet model (Type No. 1140-A) or in a standard relay rack mount with dust cover (Type No. $1140-\mathrm{AR}$ ).
 No. $1140-\mathrm{AR}$ ) $19^{\prime \prime} \mathrm{L} . \times 8 \% /{ }^{\prime \prime} \mathrm{W}^{2} \mathrm{x} 9^{\prime \prime} \mathrm{D}$.
Weight: 24 lbs.

## TYPE 1040 A.C.-V.t. VOLTMETER

## USES

The type 1040 Vacuum Tube Voltmeter is a high impedance wide frequency range voltmeter which can be used at audio and supersonic frequencies. It is particularly recommended for (1) vibration studies involving very low frequencies, (2) frequency characteristics and gain measurements on amplifiers, (3) transmission losses on telephone circuits: filter and carrier systems up to 250,000 cycles, and (4) acoustic measurements, such as, determination of frequency response of microphones and loudspeakers. Because of the high sensitivity of the instrument, the voltmeter can be advantageously used as a null detector in A.C. bridge measurements. In addition to its use as a voltmeter, the instrument can be used as an ammeter to measure a wide range of currents by connecting it across suitable resistors. An output jack is provided so that the instrument may be used as an amplifier.

## FEATURES

Because of the low input capacity, a high value of input impedance is maintained over the five ranges of the voltmeter. A balanced rectifier, a balanced D.C. amplifier circuit, and a high amount of degeneration throughout the amplifier makes it independent of line voltage variations and changes in tube characteristics. A very important feature of the instrument is the logarithmic voltage scale of the meter. With this type of scale, the percentage accuracy of reading is uniform over the entire acale. Another advantage of the logarithmic scale is that it provides a uniform decibel scale which is a very valuable feature in sound and communication measurements. A zero adjustment and full scale adjustment are provided. These two controls serve for all ranges and no re-setting is necessary when switching from one range to another. The time constant of the instrument is adjusted in order to read very low frequencies of 7 to 10 cycles without any vibration of the needle. The circuit of the meter is arranged so that it cannot be burned out by any overload of the instrument. The vacuum tube voltmeter is small, compact, entirely self-contained, A.C. operated.

## SPECIFICATIONS

Voltage Ranges: .001 volts to 100 volts in five ranges ( $0.01,0.1$, $1.0,10$ and 100 volts full scale).
Accuracy: $2 \%$ of full scale on all five ranges, on sinusoidal voltages. Waveform Error: The instrument is a peak voltmeter calibrated to read RMS valurs. On distortud wave-forms, the percentage deviation of the reuding from RMS values may be as large as the percentage of the harmonics present.
Frequency Ranges: 10 to 250,000 cycles, .1 db . variation from 20 crcles to 150,000 cycles: .50 db . variation from 10 cycles to 250,000 creles.

Input Impedance: Equivalent to 500,000 ohm resistance in parallel with a 15 mmf . condenser.
Stability: Effect of variation in line voltage from 100 volts to 125 volts is $1 \%$. Effect in changes of tubes is less than $.5 \%$.
Scale: Logarithmic voltage scale calibrated from 1 to 10 plus a linear decibel scale calibrated from 0 db . to 20 db .
Meter: 4" suppressed zero 1 MA meter protected against overloads.
Power Supply: The instrument is entirely self-contained and operates on 100-125 volts, $50-60$ cycles. Total consumption, 40 Watts.
Dimensions: $47 \mathbf{/ g}^{\prime \prime} \times 5 \mathrm{~g} / \mathrm{m}^{\prime \prime} \times 97 /{ }^{\prime \prime}$.
Weight: 12 pounds.

## tYPE 1060 VACUUM TUBE VOLtMETER

## USES

The Type 1060 Vacuur Tube Voltmeter is a high impedance, wide frequency range voltmeter which can be used at audio and supersonic frequencies. It is particularly reeommended for

1. Deturnining transmission losses on - telephone circuits, filter and carrier systems up to 300,000 .
2. Making high impedance tuned circuit measurements where the high input resistance and low capacity of the instrument are invaluable.
3. Detormining frequency characteristics and making gain measurements on amplitiera
4. Making acoustic measurements, such as, determination of frequency response of mitrophones and loudspeakers.
5. Obserking vibration studjes involving very low frequencies.

Because of the high sensitivity of the instrument, the voltmeter can be advantageously usud gs a Null Detector in A.C. bridge measurements. In addition to its use as a voltmeter, the instrument can be used as an ammeter to measure a wide range of currents, ly connecting it across suitable resistors.

## FEATURES

Because of the low input capacity, a high value of the input impedance is maintained
orer the five ranges of the valtmeter. A high amount of degeneration throughout the amplifier makes it independent of line voltage variations and changes in tube characteristics. A very important feature of the instrument is the logarithmic voltage scale of the meter. With this type of scale, the percentage accuracy of reading is uniform over the entire scale. Another advantage of the logarithmic scale is that it provides a uniform decilel scale, which is a very valuable feature in sound and communication measurements. A full scale adjustment is provided. This control serves for all ranges and no re-setting is necessary when switching from one range to another. The time constant of the instrument is adjusted in order to read very low frequencies of 7 to 10 cycles without any vibration of the needle.

## SPECIFICATIONS

Voltage Ranges: . 001 volts to 100 volts in five ranges (.01, .1, 1 , 10 and $1 \mu 0$ volts full scale).
Wuveform Error: The instrument is a full wave average meter, and is free of turnover effects. For small amounts of distortion the accuracy of the instrument is independent of the waveform.
Frequency Range: 20 cycles to 300,000 cycles.

1 db variation from 20 to 200,000 cycles.
.5 db variation from 10 to 300,000 cycles.
Input Impedance: Equivalent to 50 megohms resistance in parallel with a 15 mmfd condenser.
Stability: Effect of variation in line voltage from 100 volts to 125 volts is less than $2 \%$. Effect in changes of tubes is less than $1 / 2 \%$. Dimensions: $11^{\prime \prime} \times 8^{\prime \prime} \times 8^{\prime \prime}$.

## REED Test Instruments

## TYPE 1560 DIfferential VOLTMETER

## USES

The Freed Type 1560 difference voltmeter has been designed to measure difference in voltage levels as low as 0.1 db . It is extremely useful when checking response and attenuation of filters, transformers and amplifiers. Because of its excellent stability and high sensitivity the type 1560 difference voltmeter may also be used to ohserve drift in amplifiers meters and filters.

## SPECIFICATIONS

Difference Voltage: 0.01 db . to $1 \mathrm{db} ., 0.1 \mathrm{db} ., 1 \mathrm{db}$. full scale.
Accuracy: .01 db .
Frequency Range: 30 cps to $200,000 \mathrm{cps}$.
Input Impedance: 1 megohm.
Reference Voltage: 2 volts monitored by vacuum tuhe volt meter on $4^{\prime \prime}$ meter scale. Scale: Calibrated in db. 4" meter protected against overload.
Power Supply: The instrument operates from a 100 to 125 volt 50 to 60 cycle line.

## TYPE 1580 DB DECADE AMPLIFIER

## USES

The Freed Type 1580 DB Decad Voltmeter is intended to be used as a dependahle means of measuring transformer turns ratio, and transformer, filter or amplifier attenuation. These measuremeasuring transformer turns ratio, and transfn
ments may be made to an accuracy of $1 \mathbf{d b}$.

## DESCRIPTION

Functionally, the instrument cunsists of a high impedance input cathode follower, a precision 6 -step attenuator, a preamplifier, three db decade attenuators ( $10 \mathrm{db} / \mathrm{step}, 1 \mathrm{db} / \mathrm{step}$ and $0.1 \mathrm{db} / \mathrm{step}$ ) A high amount of degeneration througheut the amplifier makes it independent of line voltage variations and changes in tube characteristics. The 4" meter is protected against overload.

## SPECIFICATIONS

Voltage Ranges: 0.001 to 100 volts in five ranges ( $0.01,0.1,1,10$ and 100 volts full scale). Accuracy: $\mathrm{E} \%$ of full scale on all ranges
Waveform Error: The instrument is a full wave average meter and is free of turnover effects. Frequency Range: 20 cycles to 200,000 cycles.
Input Impedance: Equivalent to 50 megohms resistance in parallel with 25 mmfd condenser. Meter: 4" meter protected against overload.
DB Attenuators: Three ten position db attenuators ( $10 \mathrm{db} / \mathrm{step}, 1 \mathrm{db} /$ step and $0.1 \mathrm{db} / \mathrm{step}$ ). Dimensions: $11^{\prime \prime} \times 12^{\prime \prime} \times 10^{1 / 2}$.

## TYPE 1570 DIRECT READING COMPARISON BRIDGE

## USES

The Type 1570 is a direct reading comparison bridge which may be used to compare a wide range of inductors. The per cent difference between the standard and unknown component is indicated quickly and accurately on a $5^{\prime \prime}$ meter. The instrument may be component is indicated quickly and accu
Two deviation ranges are provided: $\pm 5 \%$ and $\pm 20 \%$. On the $5 \%$ range, units can be compared to an accuracy of $\pm 0.1 \%$.

## DESCRIPTION

For precision and production testing the direct reading comparison bridge has many advantages. The unit is entirely self contained and A.C. operated. By providing a minimum of operating controls the unit has been designed to be used by even the most inexperienced operators. The per cent deviation is indicated quickly and accurately on a 5 " meter.

## SPECIFICATIONS

Deviation Range: $\pm 5 \%$ and $\pm 20 \%$ indicated on a $5^{\prime \prime}$ meter. Accuracy: $\pm 0.1 \%$.
Test Frequency: 1000 cycles.
Inductance Range: 1 mh to 10 h .

## FREED Test Instruments

## TYPE 1940 INTERSTAGE FILTER

## USES

This filter may be used with the Freed Type 1140-A Null Detector and Type 1210-A Null Detector VTVM or similar amplifiers. It can be set to any one of 7 fixed frequencies to reduce noise and harmonics when making bridge measurements.

## DESCRIPTION

The filters are parallel resonant circuits, and are designed to be used in the plate circuit of the amplifier. D.C. current through the inductor is limited to 3 ma . Terminals are provided for connecting an external capacitor to tune to any frequency between 50 cps and 20 kc .

## FEATURES

1. Each of 7 tuned frequencies is quickly available.
2. Any resonant frequency between 50 cps and 20 kc can be obtained with external capacitors.
3. Sharp anti resonant tuning.
4. Can be used directly in plate circuit.

SPECIFICATIONS
Frequencies: $100 \mathrm{cps}, 200 \mathrm{cps}, 50 \mathrm{cps}, 800 \mathrm{cps}, 1200 \mathrm{cps}, 2000 \mathrm{cps}$ and 10 ke adjusted to an accuracy of $\pm 2 \%$
Discrimination vs. 2nd harmonic approximately 28 db .
Terminals: shielded cord and plug for connection to nunl detector. Binding posis for connecting external capacitors.
Dimensions: $\mathbf{f l}^{\prime \prime} \times 6^{\prime \prime} \times 6^{\prime \prime}$.

## SERIES 1950 NULL ‘'T’’ FILTERS

The Freed Series 1950 Null T networks consist of two resistance capacitance networks, whose outputs completely cancel each other at the balance frequency. They may be used as rejection netwarks particularly at low frequencies where LC filters become excessively large.

Standard models are available for 30,60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation of the null frequency.

The null frequency is adjusted to a tolerance of $\pm 2 \%$.

## SPECIFICATIONS

Frequency Range: 20 kc to 1 mc .
Input Impedance: 500,000 ohms shunted by 70 mmfd . (plus capacity of input cable) on all ranges but the 0.1 volt range. The shunt capacitv on this range is 8.1 volt ra

Accuracy: Harmonic Distortion can be measured accurately to $0.1 \%$.
Sensitivity: Distortion levels of $0.1 \%$ can be read accurately for a signal input as low as 0.2 volts. Maximum input signal is 1000 volts rms.
Elimination Characteristics: Eliminates fundamental completely while attenuating second harmonic approximately $3 \%$.
Power Supply: $105 \cdot 125$ volts, $50-60$ cycles.
Dimensions: $19 \% /^{\prime \prime} \times 16 \% /^{\prime \prime} \times 15 \% /{ }^{\prime \prime}$.
Net Weight: 60 pounds.

## TYPE 1410 DISTORTION METER <br> USES

The Type 1410 Distortion Meter may be used in the latoratory or is production testing of receivers, amplifiers and oscillators.

## OESCRIPTION

The instrument consists of a capacitive input attenuator, a low impedance output preamplifier, a null $T$ network and a high gain vauuum tube vastreter.
The signal to be measured is applied to the capacitive input attenuator, which reduces it sufficiently so that it may be fed into a three stage cistortionless amplifier. The output impedance of this amplifier is $\mathbf{1}$ ohm due to the high amount of inverse feed back applied. In order to pravent the amplitier from being driven into non-linearity, a monitoring circuit is included in the ingrument.
The attenuated signal is fed into a null $T$ network which completely eliminates the fundamental. The residual aignal consists wholly of harmonics and noise, and this is measured by the vacuum tube voltmeter.
The null $T$ network is now switched out of the circuik and the signal level is attenuated by a calibrated resistive divider. When the voltmeter indicates the same level as the level of harmonics, the divider reads the percentace distortion directly.

## FEATURES

The high sensitivity of the instrument permits measurements to be made on signals as low as 0.2 volts to an accuracy of $0.1 \%$. Sigmals as high as 1000 volta may be applied to the input terminals directly.
The frequency range of the instrument is 20 kc to 1 mc . in 10 overlapping ranges. Frequencies up to 3 mc . are passed without attenuation by the amplifier circuits, so that distortion measurementa can be made ou fundamental frequencies up to 1 mc.
An isolation transformer and line filter provided with the instrument prevent any feedback through the power line.

## FREED Test Instruments

## FREED DECADE CAPACITORS

Freed decade capacitors are high quality capacitors designed for use in wave filters, tuned circuits and equalizers for audio and supersonic frequencies where a rather large variable capacitance is desired. Their stability, accuracy and low dissipation factor make them especially useful during the preliminary design period when capacitance values are determined experimentally.

Each decade is variable from 0 to 10 by use of 11 position selector switch. The losses in the switches and mountings are kept lcw by the use of special low loss, impregnated switch wafers. A positive detent mechanism allows the switch to be set accurately The accuracy is $\pm 1 \%$ at frequency of 1 kc .

No. 1415 is a $1 \mathrm{mfd} / \mathrm{step}$ mylar capacitor. Total capacitance 10 mfd .
No. 1416 is a $0.1 \mathrm{mfd} /$ step polystyrene capacitor. Total capacitance is 1 mfd .

No. 1417 is a $.01 \mathrm{mfd} /$ step polystyrene capacitor. Total capacitance is 0.1 mfd .

No. 1418 is a $.001 \mathrm{mfd} / \mathrm{step}$ polystyrene capacitor. Total capacitance is .01 mpd .

No. i419 is a $100 \mathrm{mmfd} / \mathrm{step}$ mica capacitor. Total capaoitance is .001 mfd .

No. 1250 is a three section decade capacitor. The type 1416, 1417 and 1418 are assembled together in a single wooden cabinet to give a total capacity of 1.110 mfd in .001 mfd steps.

No. 1350 is a five section decade capacitor. The type 1415, 1416, 1417 and 1418 are mounted on one panel with a 1000 mmfd precision air variable condenser.

No. 1351 is a six section decade capacitor. The type 1415, 1416 , 1417,1418 and 1419 are mounted on one panel with a 100 mmfd precision variable condenser. The 100 mmfd may be used singly in which case the stray capacity is less than 10 mmfd or it may be used in conjunction with the other decades by simply closing a shorting link.

The capacity is continuously variable from 10 mmfd to 11.11 mfd in 100 mmfd steps with $\pm 1 \%$ accuracy.

The maximum voltage that may be applied to these decades is 500 D.C. working volts.

The dissipation factor of the polystyrene units when measured at 1 kc . is less than .0002 . The dissipation factor of the $1 \mathrm{mfd} / \mathrm{step}$ decade (mylar) is less than 005 .

## TYPE 1905 WIDE-BAND AMPLIFIER

This amplifier is particularly valuable for filtor work where the output of the test oscillator is inadequate for the required signal voltage levels. It is extremely stable and will deliver 15 volts to a 600 ohm load at very low distortion over a wide range of frequencies.

## SPECIFICATHONS

Frequency Response: 10 eyeles to $3.5 \mathrm{Mc} . \pm$ rib.
20 cycles to $2.5 \mathrm{Mc} . \pm .5 \mathrm{db}$.
Output Voltage: 10 volte across fi00 ohm load.
30 volts across $1 \mathrm{C}, 000 \mathrm{ohm}$ load.
Distortion: Less than $.2 \%$ total harmonic at rated output.
Voltage Gain: 15 db .
Source Impedance: 600 ohm .
Loac Impedance; 600 ohm mirimum.
Power Supply: Self-contained, 105-125 volts, $50-10$ eycle input. Dimensions: $\overline{5} 1 / 2^{\prime \prime} \times 93 / 4 \times 43 / 4^{\prime \prime}$.

## FREED Test Instruments

## FREED MAGNETIC A.C. VOLTAGE REGULATORS AND D.C. VOLTAGE REGULATED SUPPLIES

The Freed 2000 Series Magnetic Voltage Regulators and Supplies are designed for laboratory and production applications where exacting voltage control with high reliability and instantaneous correction is required.

Closely regulated voltages over a wide range of line and load variations are provided. The exceptional performance of the regulators and supplies is achieved without the use of vacuum tubes or moving parts.

Additional features include high accuracy panelmounted output voltmeters, double fuse protection, and dual output sockets. For ease of operation, voltage controls, output sockets and fuses are mounted on the front panel.

Units are furnished in attractive black wrinkle finish steel cabinets or for rack mounting.

## HOW TO ORDER

Determine the line voltage and frequency and the characteristics of the load you wish to supply. Then refer to the appropriate section of the rating charts for a unit to meet your requirements.
If you cannot find a Freed Regulator which will meet your requirements, supply the following information when requesting quotations or recommendations:

1. Frequency, number of phases, input voltage range,
nominal input voltage, voltage unbalance between phases.
2. Nominal output voltage, output voltage range, lcad current, load KVA, load unbalance, load fluctuation.
3. Frequency and severity of line and load transients.
4. Special features such as finish, mounting, ambient temperature range, corrosive atmospheres, speed of correction required.

MEASUREMENTS CORPORATION

The Mcdel 82 provides extremely wide frequency coverage, designed for audio-frequency ond radio-frequency measurements of AM, FM and TV receivers, and for many other applications.

## STANDARD SIGNAL GENERATOR Model 82 <br> 20 Gycles - 50 Mc .

FREQUENCY RANGE: 20 cycles to 200 kilocycles in four ranges. 80 kilocycles to 50 megacycles in seven ranges, plus one blank range.
FREQUENCY ACCURACY: Each range is individually calibrated. 20 cycles to 200 kilocycles, accurate to $\pm 5 \%$. 80 kilocycles to 50 megacyeles, accurate to $\pm 1 \%$.
OUTPUT VOLTAGE AND IMPEDANCE: $0-50$ volts across 7500 ohms from 20 cycles to 200 kilocycles. (The output voltage and impedance in this range can be reduced by an external attenuator). 0.1 microvolt to 1 volt across 50 ohms over most of the range from 80 kilocycles to 50 megacycles.
MODULATION: Continuously variable $0.50 \%$ from 20 cycles to 20 kilocycles from internal variable oscillator or external source.
HARMONIC OUTPUT: Less than $1 \%$ from 20 cycles to 20 kilocycles; $3 \%$ or less from 20 kilocycles to 50 megacycles. LEAKAGE AND STRAY FIELD: Less than 1 microvolt from 80 kilocycles to 50 megacycles.
POWER SUPPLY: 117 volts, 60 cycles. 75 watts.
DIMENSIONS: $15^{\prime \prime}$ high $\times 19^{\prime \prime}$ wide $\times 12^{\prime \prime}$ deep overall. WEIGHT: 50 pounds.

## STANDARD SIGNAL GENERATOR Model 80 2 Mc . $\mathbf{4 0 0} \mathrm{Mc}$.

FREQUENCY RANGE: 2 to 400 megacycles in 6 bands, individually calibrated direct reading dial.
FREQUENCY ACCURACY: $\pm 0.5 \%$.
OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvolts.

## OUTPUT IMPEDANCE: 50 ohms.

MODULATION: Amplitude modulation is continuously varioble from 0 to $30 \%$. Modulation depth is indicated by a meter on the panel. Internal modulation of 400 or 1000 cycles is available. Modulation may also be applied from an exfernal source. Pulse modulation may be applied to the oscillator from an external source through a special connector. LEAKAGE AND STRAY FIELD: Attenuator leakage less than 0.1 microvolt. Power line leakage less than 0.5 microvolt. Siray fields less than two microvalis.
POWER SUPPLY: 117 volis, 50 to 60 eycles. 70 watts. PIMENSIONS: $11 \frac{1}{2} 2^{\prime \prime}$ high $\times 195 /{ }^{\prime \prime}$ wide $\times 11 \%{ }^{\prime \prime}$ deep, overoll.
WEIGHT: 45 pounds.

## PULSE GENERATOR • Model 79B

The Model 79-B generates voltage pulses of variable width and frequency for use with associated equipment such as the Model 80 Standard Signal Generator.
FREQUENCY RANGE: 60 to 100,000 pulses per second.
PULSE WIDTH: Continuously variable from 0.5 to 40 microseconds.
OUTPUT VOLTAGE: Approximately 150 to 200 volts peak positive with respect to ground.
"SYNC" OUTPUT: 35 volts positive with respect to ground. Displaced by $1 / 2$ period from pulse output.
"SYNC" INPUT: May be synchronized with as little as 2 volts peak from an external source.
POWER SUPPLY: 117 volts, 60 cycles. 115 watts.
DIMENSIONS: $10-13 / 16^{\prime \prime}$ high $\times 141 / 2^{\prime \prime}$ wide $\times 11-9 / 16^{\prime \prime}$ deep, overall.
WEIGHT: Approximately 31 pounds.

## MEASUREMENTS CORPORATION

 Sabouatoy Stanularals

The Model 65-B provides accurate test signals for the measurement of the sensitivity, selectivity, overload, distartion, noise and stage gain characteristics. In design and operation, it meats the exacting requirements for laboratory use and production testing.

## STANDARD SIGNAL GENERATOR Model 65-B 75 Kc .30 Mc.

FREQUENCY RANGE: 75 kilocycles to 30 megacycles in 6 push button ranges.
FREQUENCY CALIBRATION: Individually calibrated direct reading dial, for each range. Accurate to $\pm 0.5 \%$.
OUTPUT VOLTAGE: Continuously variable from 0.1 microvolt to 2.2 volts.

OUTPUT IMPEDANCE: 5 ohms to 0.2 volt, rising to 15 ohms af 2.2 volfs.
MODULATION: Continuously variable from 0 to $100 \%$; indicated directly by a meter on the panel. Modulation may be obtained either from an internal source of 400 or 1000 cycles or from an external source.
ENVELOPE DISTORTION: $4 \%$ at $100 \%$ modulation at 1 mega. eycle; $8 \%$ at $100 \%$ modulation at 15 Mc ; $1 \%$ at $30 \%$ modulation.

LEAKAGE: Less than 0.1 microvalt leakage with attenuator set for 0 output.
POWER SUPPLY: 117 valts, 60 cycles. 115 walts.
DIMENSIONS: $11 / 8^{\prime \prime}$ high $\times 20-5 / 16^{\prime \prime}$ long $\times 10 \frac{1}{2 \prime \prime}$ deep, overall.
WEIGHT: Approximately 55 pounds.

## FM STANDARD SIGNAL GENERATOR Model 78-FM $86 \mathrm{Mc} . \operatorname{lo8} \mathrm{Mc}$.

FREQUENCY RANGE: 86 to 108 megacycles, individually calibrated dial. Accurate to $\pm 0.5 \%$.

OUTPUT VOLTAGE: Continuously variable from 1 to 100,000 mierovolts. LEAKAGE: Less than 1 microvolt.

MODULATION: 400 and 8200 cycle internal audio oscillator. Can be madulated from an external source providing 7 volts across 5000 ohms. FIDELITY: Flat within two db from $D C$ to 15,000 eycles. Distortion is less than $1 \%$ at 75 kilocycles deviation. Transient response is excellent. POWER SUPPLY: 117 volts, 50 to 60 eycles. 36 watts.
DIMENSIONS: $103 / 4^{\prime \prime}$ high $\times 14 \frac{1}{4}$ " wide $\times 75 / \%^{\prime \prime}$ deep, overall.
WEIGHT: Approximately 25 pounds.

## IIF, CONVERTER • Model M-275

For use with the Model 78-FM Standard Signal Generator to provide carrier output at the IF frequencies used in FM and Television receivers. FREQUENCIES: 4.5, 10.7, 21.7 Mc . Provision for one extra frequency. OUTPUT VOLTAGE: 10 microvolts to 1.0 v . when used with Model 78-FM. BAND WIDTH: $\pm 250 \mathrm{Kc}$. from center frequency.
AMPLITUDE MODULATION: Up to approximately $80 \%$, combined with or exclusive of, FM. There is negligible spurious FM due to $A M$. The envelope. distortion is less than $10 \%$ af $80 \%$ modulation.
POWER SUPPLY: 117 volts, 50 to 60 cyeles, 45 watts.
DIMENSIONS: $10^{\prime \prime}$ high $\times 13^{\prime \prime}$ wide $\times 7^{\prime \prime}$ deep, overall.
WEIGHT: 15 pounds.

[^25]

# TELEVISION SIGNAL GENERATOR Model 90 

The first commercial wide-band, wide-range Signal Generator to be developed to meet the exacting standards of high definition television use.

## CARRIER FREQUENCY:

RANGE: 20 to 250 megacycles, in eight ranges.
ACCURACY: Built-in Crystal Frequency Standard permits setting to $.01 \%$. Dial scale may be set to $0.1 \%$.
STABILITY: Warm-up drift less than $.05 \%$. Less than $.01 \%$ after warm-up. LEAKAGE: Less than 10 microvolts.

## MODULATION:

Continuously varioble from zero to $100 \%$.
ENVELOPE: Sinusoidal, or composite television. Bandwidth to 3 db is 4 Mc . Rise time from $10 \%$ to $90 \%$ modulation 0.15 microsecond. Overshoot less than $5 \%$. Slope less than $5 \%$ on 60 -cycle square wave.
INPUT IMPEDANCE: 75 ohms $\pm 10 \%$ (RMA Stondard).
INPUT LEVEL: 1.5 volts peak to peak minimum level for $100 \%$ modulation. Black negolive polority.
MODULATION PERCENTAGE: $15 \%$ to $110 \%$; within $\pm 2 \%$.

## OUTPUT:

LEVEL: Continuously variable from 0.3 microvalt to 0.1 volt balanced to ground (meosured of $100 \%$ modulotion level).
IMPEDANCE: (a) 107 ohms line-to-line (balanced).
(b) 53.5 ohms line to ground (unbalaneed).
(c) Suitable pads may be employed to alter these impedances.

## DIMENSIONS:

OVERALL: Height—60"; Width—273/4"; Depth—25".
WEIGHT: Model 90-302 pounds.
External Voltage Regulator: 92 pounds.
POWER SUPPLY: With regulator, 117 volts, 60 cycles. 825 V.A.; without regulator, 117 volts, 60 cycles. 600 V.A.

## VACUUM TUBE VOLTMETER • Model 62

RANGE: Push button selection of 5 ranges- $1,3,10,30$ ond 100 volts full scale $A C$ or DC.

ACCURACY: $\pm 2 \%$ of full scale on each range, both $D C$ and sine-wave $A C$ at line voltage of 117 v .
INDICATION: Linear for DC and calibrated to indicate RMS values of a sine-wave or $70.7 \%$ of the peak value of o complex wave on $A C$.
FREQUENCY ERROR: Less than $10 \%$ from 30 cycles to over 150 megacycles. Resonant frequency of the probe with input terminals shorted is 300 megacycles.
INPUT IMPEDANCE: The input capacitance is approximately 7 mmf . The input resistance is a function of frequency.
POWER SUPPLY: 117 volts, 60 cyeles. 24 wotts.
DIMENSIONS: $7-3 / 16^{\prime \prime}$ high $\times 43 / 4^{\prime \prime}$ wide $\times 9-3 / 16^{\prime \prime}$ deep, overall.
WE1GHT: Approximately 8 pounds.

## STANDARD SIGNAL GENERATOT ${ }^{7}$ • Model 84

300 Mc. - 1000 Mc.

FREQUENCY RANGE: 300 to 1000 megacycles in one band; individually calibrated direct reading dial.
FREQUENCY ACCURACY:
$\pm 0.5 \%$.
OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvolts.

OUTPUT IMPEDANCE: 50 ohms.
MODULATION: 0 to $30 \%$ within $\pm 20 \%$ as determined by DC meter. Internal sine-wave oscillator; choice of 400,1000 , or 2500 cycles is provided. External modulation up to 30 kilocycles may be applied.

PULSE FREQUENCY: 60 to 100 Kc in three ranges, $60.1000,600-10,000$ and $6000-100,000$ pulses per second.

POWER SUPPLY: 117 volts, 50 to 60 cycles.
DIMENSIONS: $13^{\prime \prime}$ high $\times 26^{\prime \prime}$ wide $\times 12 \frac{1 / 8 "}{}$ deep, overall.
WEIGHT: Approximately 135 pounds, including external line voltage regulator.

The Model 84-TV incorparates a built-in pawer supply for $D C$ operation of the oscillator tube filament. This feature insures o low percentage of residual hum modulation.

## U.H.F.-TY STANDARD SIGNAL GENERATOR Model 84-TV $\quad 300 \mathrm{Mc} .1000 \mathrm{Mc}$.

Model 84-TV Siandard Signal Generator has been developed to meet the need for a reliable signal source for the UHF Television band. Research requirements as well as production testing needs are met with accuracy, stability and ease of operation.

MODULIATION: Continuously variable from zero to $30 \%$ from an internal 1000 -cycle oscillator. Provision is made for applying external modulation from 50 to 20,000 cycles. Approximately 5 volts r.m.s. across 100,000 ohms are required for $30 \%$ modulation.

POWER SUPPLY: Optimum performance is obtained from a 117 volts, 60 cycle power supply. The power consumption is 120 watts. An external step-down transformer for 220 volt, 50 cycle operation is available on special order.
LEAKAGE: Negligible.
DIMENSIONS: $11 \frac{5}{8 \prime \prime}$ high $\times 19 \frac{1}{8 \prime \prime}$ wide $\times 10 \frac{3}{4}$ " deep, overall.
WEIGHT: Approximately 40 pounds.

FREQUENCY DATA: 300 to 1000 megacycles, in one band. The individually calibrated dial reads directly in megacycles, and is accurate to $\pm 0.5 \%$.
OUTPUT VOLTAGE AND IMPEDANCE: The carrier output voltage is continuously variable from 0.1 microvalt to 1.0 volt across 50 ohms. The full 1 volt output, however, may not be possible above 900 megocycles. Output impedance, is seen at the panel connector, is approximately 53 ohms resistive.

SPECIFICATIONS:
GENERATOR:
LOW FREQUENCY: 60 cycles.
HIGH FREQUENCY: 3000 cycles.
LF/HF VOLTAGE RATIO: Fixed 4/1.
OUTPUT VOLTAGE: 10 v . mox. into high impedance or +5 DBM matched to 600 ohms.
OUTPUT IMPEDANCE: 2000 ohms.
RESIDUAL INTERMODULATION: $0.2 \%$.
ANALYZER:
INPUT VOLTAGE: Full scale ranges of 3,10 and 30 volis RMS. Less than one volt of mixed signol is sufficient for operation. INPUT IMPEDANCE: Greater than 400 K ohms. INTERMODULATION: Full scale ranges of 3,10 and $30 \%$. ACCURACY: $\pm 10 \%$ of full scale.
POWER SUPPLY: 117 volts, 60 cycles. 30 wotts.
DIMENSIONS: $71 / 4^{\prime \prime}$ high $\times 19^{\prime \prime}$ wide $\times 81 / 2^{\prime \prime}$ deep.
WEIGHT: 16 pounds.

## INTERMODULATION METER Model 31

## FEATURES:

- Campact, completely self-contoined unit withTest Signal Generator, Anolyzer, Voltmeter, Power Supply.
- Direct-reoding meter indicotes percentoge of intermodulation.
- Accurate metering of input voltage to analyzer.
- Easy to operate.
- Quick, accurate measurements.
- May be mounted in standard $19^{\prime \prime}$ relay rack. $17^{\prime \prime}$ relay rack panel space.)
- Connection for oscilloscope.

## USES:

- Insuring peak performance from all audio systems.
- Correct adjustment and mointenance of AM and FM receivers and transmitters.
- Checking linearity of film and disc recordings and reproductions.
- Checking phonograph pick-ups and recording styli.
- Checking record matrices.
- Adiusting bias in tope recordings.
- For quality control of all audio components and equipment.

# CRYSTAL CALIBRATORS Model III and Model III-B 

 Designed for the Calibration and Frequency Checking of -- Signal Generators - Transmitters - Receivers • Grid-Dip Meters And other equipment where a high degree of frequency accuracy is required.
## FREQUENCY RANGES

Model 111<br>.25 to 1000 Mc .<br>Model 111-B<br>.1 to 1000 Mc .

These instruments have been designed as dual-purpose calibrators. They not only provide a test signal of crystal-controlled frequency, but also have a self-contained receiver of 2 mićrowatts sensitivity. A new circuit arrangement with quartz crystal control utilizes the cross-modulation products of three separate oscillators. The fundamental frequencies of Model 111 are $.25,1.0$ and 10 megacycles, while those of the Model 111-B are .1, 1 and 10 megacycles.

FREQUENCY ACCURACY: $0.002 \%$.
POWER SUPPLY: 117 volts, 60 cycles; 18 watts.

DIMENSIONS: $6^{\prime \prime}$ wide, $95 / 8$ " high, $53 / 8$ " deep, overall. WEIGHT: 4 lbs.
V.HiF, RADIO NOISE and FIELD STRENGTH METER

POWER SUPPLY: Built-in regwlated dual power supply for operation from either 117 volts AC ( 55 watts) or 6 volts DC.

## Model 58

This versatile, portable instrument is useful in measuring signal-to-noise ratios, noise levels and for field strength surveys on TV, FM and AM transmitters.
FREQUENCY RANGE: 15 to 150 megacycles in five bands -dials directly calibrated in megacyeles to an accuracy of $\pm 2 \%$.
INPUT VOLTAGE RANGE: 1 to 100,000 microvolts induced in antenna. 1 to 100 microvalts on semi-logarithmic output meter, balanced resistance attenuator with ratios of 10,100 and 1000 ahead of all tubes.
GAIN STANDARDIZATION: Internal "shot noise" diode provides calibration standard. Special dial eliminates need for charts.
CIRCUIT: Superheterodyne circuit with tuned RF amplifier reduces image response.
BAND WIDTH: 150 kilocycles @ 2 X down.
DIMENSIONS: $9^{\prime \prime}$ high $\times 16^{\prime \prime}$ wide $\times 11^{\prime \prime}$ deep, overall WEIGHT: 35 pounds.

## SQUARE WAVE GENERATOR • Model 71

POWER SUPPLY: 117 volts, 50-6C cycles. ICO watis.
DIMENSIONS: $73 / 8^{\prime \prime}$ high $\times 15^{\prime \prime}$ wide $\times 8 \% 8^{\prime \prime}$ deep, overall. WEIGHT: Approximately 20 pounds.

Recommended for television testing and many different applications in developing $A M, F M$ and $T V$ equipment where square-wave analysis is of great importance.

FREQUENCY RANGE: Continuously variable from 6 to 100,000 cycles per second.
WAVE SHAPE: Rise time less than 0.2 microseconds with approximately $5 \%$ overshoot at 75 peak volts output. At 5 volts or less rise time is less than 0.1 microsecond.
OUTPUT VOLTAGE: Step attenuator giving $75,50,25$, $15,10,5$ peak volts fixed and 0 to 2.5 volts continuously variable.
SYNCHRONIZING OUTPUT: 25 volts peak.
R. F. MODULATOR: 5 volts maximum carrier input. Translation gain is approximately 0.1 . Output impedance is 600 ohms.

## PEAK-TO-PEAK VOLTMETER • Model 67

Designed for cudio and video level measurements and the measurement of audio electrical interference. The Model 67 is ideally suited for uses where the indication of true peak values is required.
VOLTAGE RANGE: 5 ranges; .0005 to 300 volts peak-io-peak. (Approximately . 0002 to 100 r.m.s. volts.)

SEMI-LOGARITHMIC SCALES: Hand calibrated; 0 to 30 peak-to-peak and 0 to 10 r.m.s. volts.
FREQUENCY RANGE: 5 to 100,000 sine-wave cycles per second.
INPUT IMPEDANCE: 1 megohm shunted by 30 mmid.

STABILITY: Less than $2 \%$ error with line variations from 110 volts to 120 volts.
RECORDER TERMINALS: Self-shorting type for external one milliampere graphic recorder or milliammeter.
POWER SUPPLY: 117 volts; $50-60$ cycles, 35 watts.
DIMENSIONS: $71 / 2^{\prime \prime}$ high $\times 7^{\prime \prime}$ wide $\times 93 / 8^{\prime \prime}$ deep, overall.
WEIGHT: 10 lbs .

## MEGACYCLE METER Model 59

The Only Grip-Dip Meter Covering the Wide Frequency Range of<br>\subsection*{2.2 Mc . to $\mathbf{4 0 0} \mathbf{~ M c .}$}

- For determining the resonant frequency of tuned circuits, antennas, transmission lines, or any resonant circuit.
- For measuring capacitance, inductance, $Q$, mutual inductance.
- For quartz crystal measurements.
- For preliminary tracking and alignment of receivers.
- As an auxiliary signal generator; modulated or unmodulated.
- For antenna tuning and transmitter neutralizing, power off.
- For locating parasitic circuits and spurious resonances.
- As a low sensitivity receiver for signal tracing.
- As a beat-frequency oscillator in conjunction with a fixed frequency oscillator for measuring video or wide-band amplifier bandwidths.
- As an oscillating or absorption marker for use with a sweep-frequency oscillator.
- For transmitter or oscillator frequency checking by beat note method and absorption wave meter method.

## And Many Other Applications.

## TELEVISION

The Model 59 is most useful in the construction and servicing of television receivers. It can be used for aligning video amplifiers, for peaking coils, sound traps, filters, stagger-tuned i.f.s, stagger-tuned amplifiers, sound i.f.s, local oscillators, carrier circuits, grid mixing circuits, etc. It is very effective for locating interference and for making traps and filters.

Available in the following frequencies: Model 59LF-0.1 to 4.5 Mc . Model $59 \mathrm{UHF}-430$ to 940 Mc .

FREQUENCY RANGE: 2.2 megacycles ta 400 megacycles with seven plug-in cails.

FREQUENCY ACCURACY: Individually calibrated dial, direct reading ta an accuracy of $\pm 2 \%$.

OUTPUT: CW ar MCW. Madulatian fixed at approximately $30 \%$, 120 cycles.

POWER SUPPLY: 117 valts, 60 cycles, 20 watts.
DIMENSIONS: Pawer unit: $51 / 8^{\circ}$ wide, $7-13 / 16^{\prime \prime}$ high, $83 / 8^{\prime \prime}$ deep, averall.

Weight: appraximately $61 / 2 \mathrm{lbs}$.
Oscillatar unit: $33 / 4^{\prime \prime}$ diameter, $2^{\prime \prime}$ deep.
Weight: appraximately 1 lb .

## WHEATSTONE BRIDGE

- A carefully engineered bridge made for all around use in lab., plant, or field. All models contain own $4 \frac{1}{2}$-volt battery power supply and galvanometer. Provision for external batteries and galvanometer if desired. All models have ratio dial settings of $.001, .01, .1,10,100$, and 1000 as well as built-in resistance standards of $1,10,100$, and $1000-$ ohm decades. Ratios are guaranteed to $.05 \%$ tolerance. Resistance dial resistors to $.1 \%$. Self-cleaning, four-leaf phosphor bronze wiper switches with detent mechanism mounted below panel. Galvanometer of well-known moving-coil type. Separate loinding posts for use of external galvanometer if desired, and for use of bridge as resistance decade. Hardwood case with removable cover. $91 / 4^{\prime \prime} \times 71 / 2^{\prime \prime} \times 6^{1 / 4}{ }^{\prime \prime} \mathrm{h}$. Wt. $91 / 4 \mathrm{lbs}$. net; $121 / 4 \mathrm{lbs}$. shipping.
MODEL RN-1. Standard Portable Wheatstone Bridge, complete with
batteries
Net Price $\$ 138.00$ MODEL RN-2. Standard Portable Wheatstone Bridge with Murray \& Varley Loops

Net Price $\$ 154.00$ MODEL RN-3. Same as RN-2 but with additional ratio settings of $1 / 9$, $1 / 4$ and $1 / 1$ and varying galvanometer sensitivity control.

Net Price $\$ 198.00$

## RESISTANCE DECADES

Available in standard models with resistance ranges of . 9 to 999,990 ohms total. Accuracy to $\pm 0.1 \%$. Self-cleaning, four-leaf phosphor bronze wiper switches with detent mechanism mounted below the panel. Hardwood case. Models DR-1A to DR-4. $53 / 4 " \times 8^{\prime \prime} \times 4^{\prime \prime}$ h.; wit. 4 lbs. net; 6 lbs. shipping. Models DR-10 to DR-14, $41_{8}^{\prime \prime} \times 6^{\prime \prime} \times 4^{\prime \prime}$ h.; wt. 3 Ibs. net; 5 lbs. shipping. Models DR-50 to DR-52, $61 / 8^{\prime \prime} \times 9^{\prime \prime} \times 41 / 4^{\prime \prime} \mathrm{h}$.; wf. 5 lbs. net; 7 lbs. shipping.

INDUSTRIALINSTRUMENTS, INC.
CEDAR GROVE, N.J.

# BERKSHIRE LABORATORIES <br> 300 BEAVER POND ROAD LINCOLN, MASSACHUSETTS 

These transformers are available at considerable savings in a sample packace containing one of each type, at only $\$ 21.50$ f.o.b. Lincoln, Mass. Postage prepaid if remittance accompanies order. Additional details and specifications on request.

## BERKSHIRE LABCASES

Your own three- or four-terminal networks can be made into convenient plug-in units by using Berkshire LABCASES. Useful for housing wave filters, wave-shaping circuits, and other standard or special circuits, the resulting plug-in units can easily be added to or removed from experimental set-ups for comparison purposes. The input terminals of one unit may be plugged into the output terminals of another, for cascade or tandem circuit arrangements. The cylindrical aluminum housing is $51 / 2$ inches long including terminals, and $11 / 2$ inches in diameter. Input terminals are banana-type, with standard $3 / 4$ inch spacing. Output binding posts accept banana plugs, spade lugs, or plain wire leads.

Model 19-S four-terminal networks $\$ 4.00$
Model 19.G three-terminal networks $\$ 3.50$ The Model 19-P LABCASE is designed to house complete circuits using up to 2 miniature tubes. A molded Tenite housing holds an octal plug, two 9 -pin Noval sockets, and ample space for circuit components. Price $\$ 2.00$. Quantity prices on application.

## BERKSHIRELABTRANS PULSETRANSFORMERS

These miniature pulse transformers combine compactness, convenience, and versatility. Designed for use in the microsecond and fractional-microsecond range, in equipment where space must be saved at no sacrifice in quality, they are provided with standard octal bases, for quick interchangeability in electronic as. semblies. Height is only 1.1 inch above chassis, diameter 1.37 inch.

This compact, self-contained unit converts the sinusoidal output of an oscillator into sharp pulses which may be used as vertical markers on a crt display, or as blanking or intensifying pulses. Pulse frequency is the same as that of the primary oscillator, with a lower limit of 25 cycles per second and an upper limit of one megacvele per second. Input terminals are banana plugs, for quick insertion into standard oscillator jacks. Output binding posts accept banana plugs, spade lugs, or plain wire leads. Overall length is $51 / 2$ inches, diameter $11 / 2$ inches ( $13 / 4$ for Models $\mathrm{I} \cdot \mathrm{U}$ and 1-Ul).

Special LABMARKERS having other characteristics can be supplied to order. If you have special requirements, please write for a quotation.

## BERKSHIRE LABSTROBE

The Model 18 LABSTROBE gives you a convenient means for stroboscopic observation of moving objects, such as motors, cyclic machinery, or phonograph turntables. The instrument plugs 'ito any 60 -cycle 115 -volt outlet, and delivers 100 -microsecond flashes at a repetition rate of 60 per second. The aluminized reflector produces maximum light output from a standard long.life neon bulb. Six-foot cord and chromed metal case the size of an ordinary flashlight. Price, $\$ 9.95$ f.o.b. Lincoln. Phonostrobe disks, for use with the LABSTROBE in checking speed of turntables at 78,45 , and $33-1 / 3$ RPM, are also available at 75 c each.

Order all Berkshire prodacts from your distributor, who has them in stock, or can get them.

Featuring small size, light weight and outstanding performance the HIGH, WIDE and TWIN POCKETSCOPES have become the "triple threaf" of the oscilloscope field. Their incomparable versafility, reliability and accuracy have skyrocketed this leam of truly portable instruments into unparalleled demand. Each oscilloscope features DC coupled amplifiers in both vertical and horizontal channels.

The S-14-A HI-GAIN POCKETSCOPE provides the optimum in oscilloscope flexibility for analysis of low-level electrical impulses. Extremely light weight ( $123 / 4 \mathrm{lbs}$ ), compact in size ( $12 \times 53 \times 7 \mathrm{in}$.), dependable and accurate in performance. Vertical and horizontal channels: $10 \mathrm{mv} \mathrm{rms} /$ inch with response within 2DB from DC to 200 KC and pulse rise of 1.8 , $\mu$ non-frequency discriminating attenuators and gain controls with internal calibration of trace amplitude...repetitive or trigger time base with linearization from $1 / 2$ cycle to 50 KC with $\pm$ sync or trigger.

The S-15-A mvrms/in. with response within-2DB POCKETSCOPE is a portable, twin tube, high sensitivity oscilloscope with two independent vertical as well as horizontal channels. It is indispensable for investigation of electronic circuits in industry, school and laboratory. Vertical channels 10 from DC t.o 200 KC and pulse rise time of $1.8 \mu \mathrm{~s} \ldots$ horizontal channels 1 v $\mathrm{rms} / \mathrm{in}$. within -2DB from DC to 150 KC... non-frequency discriminating controls . . . internal signal amplitude calibration .. linear time base from $1 / 2$ cycle to 50 KC , triggered or repeti-
 The S-11-A INDUSTRIAL POCKETSCOPE is a small, compact ( $5 \times 7 \times 11$ inches), and lightweight ( $83 / 4 \mathrm{lbs}$.) instrument for observing electrical circuit phenomena. The flexibility of the POCKETSCOPE permits its use for AC measurements as well as for DC. The vertical and horizontal amplifiers are capable of reproducing within -2DB from DC to 200 KC with a sensitivity of $0.1 \mathrm{vrms} / \mathrm{in} . .$. repetitive time base from 3 cycles to 50 KC continuously variable throughout its range . . variations of input impedance, line voltage or controls do not "bounce" the signal-the scope stabilizes immediately.

RAYONIC CATHODE RAY TUBES BY WATERMAN

## - Deflection in volts per inch.

${ }^{*}$ Light output of an element of a raster line (one mas long and not exceeding . 65 mm in width) in microlumens.

## 

> The PULSESCOPES are cathode ray tube oscilloscopes that portray the attribufes of the pulse: shape, amplitude, duration and time displacement. All P ULSESCOPES have internally generated markers with the basic difference that in the SAR PUISESCOPE the markers initiate the sweep while in the others the sweep starts the markers.

The S-6-A BROAD BAND Scope is a
PJLSESCOPE in performance, PQCKETSCOPE in size. The instrument measures DC as well as AC signals. Unique DC calibration methods permit rapid measurements of either positive or negative, AC or DC signals. Vertical amplifier sensitivity of $0.2 \mathrm{v} \mathrm{rms} / \mathrm{inch}$, and response to 5 $m \mathrm{~m}$ within 3DB... pulse rise time of $0.1 \mu \mathrm{~S}$. . . internal markers from I to $1000 \mu \mathrm{~s}$. . . repetitive or trigger sweep from 5 cycles to 500 KC with 5 X sweep expansion ... sweep, marker and DC calibrating voltage available externally. Size $81 / 2 \times 63 / 4$ $\times 133_{4} \mathrm{in}$. Weight 22 lbs . Operates from 50 to 400 cycles at 115 volts AC.

The S-5-A LAB PULSESCOPE is a JANized (Gov't Model No. OS-26) portable, AC, wide band-pass, laboratory oscilloscope ideal for pulse as well as general purpose measurements. Internal delay of $0.55 \mu \mathrm{~s}$ permits observation of pulse leading edge. Includes precision amplitude calibration, 10X sweep expansion, internal trace intensity time markers, internal trigger generators and many other features. Video amplifier $0.1 \mathrm{v} p$ to $p /$ inch . . . pulse rise time of $.035 \mu \mathrm{~s}$ or response to 11 mc . 1.25 to $125,000 \mu \mathrm{~s}$ triggered or repetitive sweep . . . internally generated markers from 0.2 to $500 \mu \mathrm{~s}$ trigger generator from 50 to 5000 pps. for internal and external triggering. Operates from 50 to 400 cycles at 115 volts AC.

The S-4-C SAR PULSESCOPE is a JANized (Gov't Model No. OS-4) portable instrument (31.5 lbs.) for precision pulse measurements for radar, TV and all electronic measurements. Portrays all attributes of the pulse... internal crystal controlled markers of 10 and $50 \mu s$ available for self-calibration ... in $R$ operation a small segment of the A sweep is expandable for detailed observation with a direct.reading calibrated dial accurate to $0.1 \%$. Video amplifier band-pasa up to $11 \mathrm{mc} .$. optional video detay 0.55 $\mu \mathrm{s} .$. pulse rise and fall time better than $0.07 \mu \mathrm{~s}$. . . R pedestal (sweep) 2.4 to $24 \mu \mathrm{~s}$... video sensitivity of 0.5 v . p to p/inch. Easily convertible from $\mu \mathrm{s}$ to yards. Operates from 50 to $40 \hat{0}$ cycles at 115 volts AC.

## RAKSCOPE

 Because the panel is only $7^{\prime \prime}$ high and firs any standard rack, the S-12-B RAKSCOPE admirably fills the need for a small oscilloscope of wide versatility. With all the features of the S.11-A POCKETSCOPE, the RAKSCOPE is JANized (Gov't Model No. OS-11), and has many additional advantages; the sweep, from 5 cycles to 50 KC , is either repetitive or trig. gered... vertical and horizontal amplifiers are $50 \mathrm{mv} \mathrm{rms} / \mathrm{inch}$ with band. pass from 0 to 200 KC . . . special phasing circuitry for frequency comparison.PHILADELPHIA 25, PENNA., U.S.A. ## VACUUM TUBE VOLTMETER MODEL 614

## SPECIFICATIONS

AC and DC Ranges 0.3, 10, $100,300,1000$ volts, with auxiliary probe $0 \cdot 30,000$ volts (dc); Resistance Ranges 0-100, $1000,10 \mathrm{~K}, 100 \mathrm{~K} .10$ megohms; AC Freq Resp 30 cps to 50 mc (with auxiliary probes); Input Impedance 10 megohms.

Model 614

These units have been developed to meet the needs of technicians engaged in the servicing of TV equipment, both black and white and COLOR.

These instruments are compact, ruggedized, lightweight and sturdily cased to withstand rough usage and will give complete satisfaction under all conditions.

They were designed for industry, field and laboratory uses. Stacking features have been provided as shown, thereby reducing bench space requirements.

All Prices Surbject to Cbange

## O N ALIGNMENT

SCALA SUPER-MARKER INJECTOR mixer-amplifier unit mixes small sample of sweep voltage with small sample of marker voltage (from external sweep-marker generator). Injects a large, stable pip into scope being used for alignment of TV receiver. Marker pip is always same size-from base line to top of curve. Pip does not affect pattern on scope, even at resonance peaks. Greatly speeds up and simplifies alignment jobs. Separate video and marker gain controls. May be used with any standard marker generator, sweep generator, and scope. Five tubes and Germanium diode. Size, $10^{\prime \prime} \times 8^{\prime \prime} \times 7^{\prime \prime}$. Cables and instructions supplied. For operation from 110.120 volts, 60 cycle A.C. Model SMI-53.

At leading jobbers, \$67.50
DUAL MARKER INJECTOR (SMI-53X), same physical appearance as SMI-53, above-but also has built-in crystal oscillator. Simply set marker generator on picture frequency and get both picture marker and sound marker out. Complete with 4.5 Mc . crys!al. For color, 3.579 Mc. crystal can be plugged into jack in front panel.

At leading iobbers, \$79.50

# OSCILLOGRAPH PROBES <br> - NEW TOOLS TO MAKE TV SERVICING EASIER, FASTER, MORE ACCURATE, MORE PROFITABLE 

SCALA TEST PROBES May be accurately used with all oscilloscopes. Complete with catle and instrcutions.

BZ-1 Signal Tracing Probe for individual check of IF stages, calibrating marker generator, checking output of sweep generator, etc. Low C, Hi-Z demodulator range, non-resonant to 225 mc ; useful to 1000 mc . Net, of leading jobbers, $\$ 9.75$

BZ-2 Low Capacity Probe permits tracing waveforms through $\mathrm{Hi}-\mathrm{Z}$ circuits without excessive distortion from circuit loading. Cuts effective input capacity of scope, attenuation 10 to 1.

Net, at leading jobbers, $\$ 9.75$

BZ-3 Voltage Divider Probe for checking horizontal sweep waveforms and voltages at plates of horizontal output or damper tubes. Does not distort waveform up to 15,000 volts peak to peak. 100-1 capacitance divider.

Net, at leading jobbers, \$9.75
BZ-4 Voltage Doubler Probe provides virtually double deflection on scope screen compared to halfwave probes. Dual low C Hi-Z demodulators useful to 150 mc .

Net, at leading jobbers, \$10.75

## PRECISE MEASUREMENTS COMPANY <br> BROOKLYN 23, N. Y.

TRANSPARENT CIRCUIT STAMPS

Provide clear sharp impressions of all the most used radio and electrical circuit symbols. Saves considerable drawing and drafting time. Provides neat looking standardized symbols on all your drawings. Lised by leading manufacturers and laboratories. Stamps are made of Vinylite and are acid proof and resistant to many common substances like petroleum solvents, greases, gasoline, benzine, etc. They are crystal clear and easily lined up by looking right through them. Built-in "CROSS HAIRS" allow pin point positioning. Not to be confused with shallow die stamps, these are made on expensive master dies which are very deeply sunk in and result in stamps with razor sharp impressions and anti-clogging qualities. Outlasts rubber stamps many times because Vinylite resists abrasion and is more resilient. Available in two popular sizes. May be purchased separately or in complete set. When ordering specify stamp number and size.

| SIZE A | CIRCUIT STAMP SET | (12 stamps) | $\$ 8.50$ |
| :--- | :--- | :---: | ---: |
| SIZE A | Individual Circuit Stamps | each | .85 |
| SIZE B | CIRCUIT STAMP SET | (12 stamps) | 10.00 |
| SIZE B | Individual Circuit Stamps | each | .95 |
| Larger size sets with more complete selections of symbols are available. |  |  |  |

## meter scale printing machine

Prints lettering, numbers and divisions on meter scales. Use any kind of seale material such as metal, paper, plastics, etc. Perfect lettering is assured because machine uses standard printers type available everywhere. Will print a single scale and make it look like expensive die printing. In daily use by many instrument manufacturers and testing laboratories.
Model
1500 Standard Scale Printer........ $\$ 150.00$
Ruling Pen Attachment-Lerer operated, for quickly ruling in the division lines.. $\$ 35.00$ Duplicating Attachment-Turns your scale printer into a duplicating machine for making up to 5,000 copies. Prints in black and white or brilliant colors.......... $\$ 35.00$

Basic Supply Kit-Contains an assortinent of metal type, spacers, ink roller, printing ink and just about every item needed to turn out neatly printed seales and dials..

## ELECTRO-GRAPHIC RECORDER

Designed to make the recording of voltages and currents a simple and straight forward matter. Unit features small size and low cost. Response is approximately 2 seconds full scale. Standard sensitivity is 1 Ma. Unit is direct writing and graph paper perfectly linear (no difficult curved scales to interpret). Field tests are continuing to be made on this unit and upon their completion, the unit will be released to the general market.

## INSTRUMENTS BUILT TO SPECIFICATIONS

We supply custom built magnetic amplifiers, transformers, high voltage equipment, printing machines. Our equipment is used by leading industrial concerns, research laboratories and the U. S. Government. We will gladly send quotations on your specific requirements.

## MICRO CIRCLE CUTTER

Cuts holes in all types of metals from stainless steel to magnesium. Perfect for plastics and wood. Especially recommended for cutting meter holes in panels.
Built-in micrometer type size control for precise settings. Extra heary constuction of the main beam and body make it useful for production jobs as well as experimental work. All are equipped with a $1 / 4^{\prime \prime}$ high speed steel cutting bit.

| Model | Type | Size | Price |

115 Volts 60 Volt Tap.

## MINIATURE HIGH VOLTAGE CONVERTER

Connect primary to batteries or 60 cycle AC and ohtain high voltage output. Single comand obtain high voltage output. Single compact unit contains both an efficient vibrator and a special step-up transformer. Works wel on regular flashlight cells. Use for photoflash sutfits, isolated power supplies and wherever high potentials and small size are required. Circuit diagrams supplied with each converter show suggested hookups to obtain any poltage between 50 volts and 7,000 volts at current. up to 1 Ma. Diagrams show how output can be easily stabilized (to better than $2 \%$ ) using only a minimum of parts thus makiny it useful for gieger counters, megohm meters, photomultiplier tubes, miniature oscilloscopes, etc.

YOUR LOCAL DISTRIBUTOR WILL BE GLAD TO SHOW YOU OUR PRODUCTS

# FROM MILLIWATTS TO KILOWATTS HIGH VOLTAGE POWER SUPPLIES AND EQUIPMENT 

Precise has sold thousands of these power supplies to laboratories, industrial concerns, the government and universities. Only the best available selected material goes into these units so that you will have manv rears of dependable service. Only a few of our standard models are shown below. Quosations on special power supplies cheerfully given.

## HIGH VOLTAGE

 POWER SUPPLIESA precision, well constructed high voltage supply for television, meter testing and callbration, electrostatic paintjng, breakdown tests, nuclear physics and wherever high potentials at low currents are needed. Output is well filtered direct current. Adjustable by means of a control on the front panel. Arailable with or without meter. Input voltage is 115 v ., 60 cycles.
Maximum Voltage
cycles
Price
$\$ 60.00$
$\$ 60.00$
80.00 Also available with two meters (as ill.) thus current and foltage can be read simultaneously. Perfect for breakdown and leakage measurements. Current limiter circuits protect meter on shorts. Price $\$ 35$ additional. Specify 50 uamps, 100

Megohm Reading Scales are arailable for the current reading models. This makes a fine mpgohmmeter where moderate degree of accuracy is required and when it is desired to have a known test coltage applied to the unit under test. The artual resistance in megohms as well as the leakage current and applied voltage are all

Price $\$ 40.00$ adlitional on any kilovoltmeter equipped power supply.
Regulated Power Supplies. Any model can be had with built-in regulation circuits. output remains within $5 \%$ over mast of the range. Same delivery time. Cluser

REGULATED AND HIGHER VOLTAGE SUPPLIES
Industrial Series Power Supplies. Arailable in ranges up to 100,000 rolts DC. Widely used throughout the nation. These units offer the finest in materials obtainable and are all backed by our famous service guarantee. Regulation circuits used depends on your accuracy requirements. Amplifier type regulators are used for moderate degrees of regulation. Chopper type stabilizer circuits that compare the high voltage output to known reference voltages are used if stability in the order of . $02 \%$ is required. Direct voltage reading switches and dials can be supplied so that of the best noter morements. Tubeless power and at accuracies that excced that and metallic rectifiers can be prowided when vour reduirements call for conuipment of this nature. Thie Model b050-AIll supply is illustrated. This unit provides up of this nature. The llodel 6050-AIl supply is illustrated. This unit prorides up to 50,000 volts mutput. It has both a buition direct reading kilovolmetur and
current meter, Regulation is in the order of $1 \%$ over most of the control range.

COMBINATION POWER SUPPLIES
Equipment rath be supplied that provides many voltages from a single convenient source. For example many customors want the High Voltage lower supply to also feed B+ roltage's to certain apparatus as well as filament power for tubes. We can usually give yon good service on this type of equipment.

## HIGH CURRENT POWER SUPPLIES

These industrial type power supplics are built for service and efficiency. All are of the transformer type and employ husky components that have been selected for their power handling eapacity. Controls are arranged so that obueration is greatly simplified and a number of safety features are built in for maximum protection of personnel and equipment. (Outgut is continuously variable from zero to full rated value. Polarity reversing models (as illustrated) can be had at additional cost.

High gain magnetic amplifice kilovoltmeters (AC or DC types) can be provided where extra high input impedances are needed. Has adrantage over electrostatic where extra high input impedances are needed. Ha
meters due to robust construction and fast responst.

PHOTO SHOWS THE SPECIAL 100 K.V. PROBE SUPPLIED WITH THE HIGHER RANGE INSTRUMENTS.

## MAGNETIC AMPHIFIERS

We can supnly magnetic amplifics for the conrersion of low roltages or currents into readily uscah!e power levels. Lnits are silent in oporation and outlast vacuum type circuits many times. A high order of stability is maintained and noise level is quite low. Power gains of up to a half million is readily obtainable. Complete magnetic umplifjer systems are available for resulation and rontrol of power supplies, motors, machiners, etc. Let us know your needs. We may be able 10 supplies, motors,
slip from stock.

## 100,000 VOLT TESTING TRANSFORMER

Widely used for testing of instruments, meters. resistors, insulation and wherver an AC type of roltage check is applicable Primary is designed for the standard 115 rilt 60 cycle power line and may be controlled if desired with any of the standare varialile transformers. Output 11 to 100,000 wolts AC. A special roltmeter wimling is incerporated and toplacing a 100 rolt meter across this winding the high voltage mutput can be uccurately determined. This winding is balaned for exactly $\mathbf{L} / 1000$ th of the witput (accurace $2 \%$ ).
Model 100 KVT. $\qquad$

## MEGOHM BRIDGE

This direct reading instrument will be found usefnl for the measurement of those extra high resistances and leakages. I'ses a patented circuit tnat eliminates effeets due to amplifier drift and results in greatly increased reading accuracy. Three dials are Intorporated: Jange Switeh, 1 Switch and Ten Tum Potentiometer. Readings may be made to the fifth plate and accuracy depends only upon the built-in standards. Jainge . 1 megohms to 1 million megohms.
Model 7000...

# PRECISE MEASUREMENTS COMPANY 

## MODEL 1100 AUDIO FREQUENCY GENERATOR

Frequency range from 18 cycles to 500 kc , with output constant $\pm 0.5 \mathrm{db}$, and calibration accuracy of $1 \%$. Output 150 or 600 ohms balanced +26 dbm max.; low imp. 50 volts or 1 watt. Distortion less than $0.1 \%$ over most of useful range. Output continuously variable from +26 to -70 d lm : 50 volts to 0.1 millivolt. Step aitenuator. Output meter calibrated in volts and dbm. Equivalent to SG/83. Miniature size $6^{\prime \prime} \mathrm{x}^{\prime \prime} 9^{\prime \prime}$ x $10^{\prime \prime}$ deep.

601-A WAVETRACER - AN AUDIO CURVE TRACER
Instantaneous visual display of frequency response of any audio system. Logarithmic vertical scale; linear in db. Completely self-contained including audio sweep generator, atienuator, mike preamplifier, and logarithmic voltmeter using 7" long-persistence CR tube.

## 540-A HETERODYNE CRYSTAL CALIBRATOR

Crystal controlled output at $100 \mathrm{kc}, 1 \mathrm{mc}$, and 10 mc , or from external crystal. Sensitive heterodyne detector provides wideband output; self contained speaker monitors audible beat. Miniature unit $6^{\prime \prime} \times 41 / 4^{\prime \prime} \times 6^{\prime \prime}$. $95-130$ volts, $50-400$ eycles.

## Model 740A TV "DO-ALL" GENERATOR

HERE-AT LAST! One compact, efficient instrument-which gives the performance of several combined instruments-Each of which is higher priced and all of which are needed for properly servicing TV and FM Receivers.
Signal Generator
Generates a modulated or unmodulated carrier signal covering every channel (YHF) and every if band on any TV or FM Receiver - ALL ON FUNDA. MENTALS. It will supply a 360 eycle audio signal at the audio output.
DATA: RANGE: 9 megacycles to 220 megacycles ALL ON FUNDAMENTALS - bands $9-11$ MODULATION: infernal modulation has been provided. Both 360 cycles and 141.75 kilocycles are available.
TUNING: Dial continuously calibrated thru $340^{\circ}$, giving extremely long calibration scale; enables easy reading and tuning. Each TV channal is precisely spotted on the dial. Accuracy for alignment, achieved by use of fine anti-backlash reducing mechanism. The only single easily portable instrument that provides for testing and checking alignment of: Front Ends, IF's, Horizontal and vertical linearity, syncs, sweens. size, position. focus coil, deflection coil. ion trap. Unusually fine circuit design, extreme stability, rugged mechanical construction. Smart looking unit with naw brushed aluminum etched panel and dial. Size $10^{\circ \circ} \times 6^{\prime \prime} \times 6^{\prime \prime}$. Weight 8 lbs. \$ 150 brushed aluminum etched panel and dial. size $10 \times \times 6$. Weight 8 lbs MODEL 740A-COMPLETE WIT
ON 5060 CYCLE $105-125 \mathrm{~V}$ AC

## Morker Generator . . .

Accurate to within $1 / 10$ of $1 \%$ on 9.11 megacycle band, and better than $1 / 2$ of $1 \%$ overall. better than $1 / 2$ of
Perfect for alignment.

## Pattern Generator . . <br> Produces either horizontal or vertical bars or cross hatch.

# Model 750 UHF and VHF "DO-ALL" TV SIGNAL GENERATOR 

Completely covered<br>Signol Morker Pottern

Versatile in concept, the RCP Model 750 can check and test alignment of front ends. If's, sound and
pix traps, linearity, syncs, sweeps, positioning, focus and deflection. Designed for portable or tocus and deflection. Designed for portable or bench use, the 7 tion and appearance. It is handsomely finished in tion and eppearance. It is handsomely finished in an attractive brushed aluminum panel with a steel $\underset{\forall}{\mathrm{y}}$ AC. $\vee A C$.

## SPECIFICATIONS

BANDS: 9.11 MC, 21-47 MC, 54-220 MC, 465.690 MC, 650.900 MC .
TUNING: Special anti-backlash drive combined with the inductuner guarantees the extreme accuracy. Dial is continuously calibrafed through $340^{\circ}$.
MODULATION: 360 cycles and 141.75 Kilocycles internal modulation has been provided $\$ 7050$ -unmodulated carrier signal is also available.
SIZE: $101 / 4^{\prime \prime} \times 61 / 2^{\prime \prime} \times 5$ TTh $^{\prime \prime}$.
WEIGHT: 9 fbs.
PRICE: $V$ Net

- Inductuner insures accuracy of within $1 / 2$ of $1 \%$ over the entite range of 9 Mc to $900{ }^{2} \mathrm{Mc}$. - All VHF frequencies are on fundamentals.
- RF's and IF's are clearly calibrated on a large RF's and IF's are clearly
- Steady horizontal bars, vertical bars and crosshateh patfern individually produced on ali channels.
- Supplies a 360 cycle Audio Signal.

## Model 123 "FLYBACKER"

The answer to fast, reliable testing of flyback transformers and yokes. Quickly, accurately, checks the horizontal output circuit of all TV receivers.

Extremely sensitive, the Model 123 Flybacker immediately shows up a single shorfed furn in a flyback transformer or yoke. Its light, portable design serves to advantage in the shop and in the home.
All tests can be carried out with the components in place in the TV receiver, and call-backs can be prevented by checking all flyback transformers and yokes in stock for opens, shorts, etc. Flybacker tests are also applicable to inductive windings on any transformer, choke, solenoid, relays, etc. Where the impedance is not relatively low. In fact the instrument may be used as a proportional AC Ohmmeter.

- Three "GOOD BAD' scales.
- One scale for yokes.
- Tests low and high impedance yokes.
- Direct reading numbered scale.
- Tests while components are in TV receiver.
- Tests high impedance sections of all transformers. Complete with test leads with alligator clips and tube and instructions ready to use. Operates
on los-125 volts 60 cycle $A C$-size $6^{\prime \prime} \times 9 / 8 \times 4 / 4^{11}$-weight $61 / 2$ lbs.-shipping weight 8 lbs.

## MODEL 8873A • SERVISHOP

- Cathode Ray Tube Tester
- Cathode Ray Tube Reactivator

A Service Package to Meet Your AM-FM, and TV Tes Needs!

- Tube Tester
- AF Signal Generator
- Vacuum Tube Voltmeter
- AM Signal Generator
- FM Signal Generator

This unit includes: An up-to-date tube fester for testing and rejuvenating Cathode Ray Tubes as well test.ing all modern, miniature, noval base and subminiature tubes Uses the speedy Rollindex Tube Chart. A complete 17 range VTVM with exceptionally high input impedance ( 25 megohms). Check $A C$ and $D C$ volts with negligible loading of circuit. Accuracy $\pm 3 \%$ DC, $\pm 5 \%$ AC. Measures ohms from .2 to 1000 megohms. Includes High-Voltage Probe. The Signal Generator is a fixed frequency AM. FM generator and Audio Oscillator.

Advanced engimeering results in the fine performance of the Model 808A Tube Tester-Reactivator and VTVM in combination with the Model 730 AF-AM-FM Signaligner.

Complete with tubes, batteries, leads, etc. in beautifully finished oak portable case, ready to operate on $50-69$ cycle, 105 to 125 V . AC. Size $161 / 2^{\prime \prime} \times 123 / 4^{\prime \prime} \times 51 / 4^{\prime \prime}$. Wt. 18 lbs
\$139.95 Net

## Model 730 - Universal Signaliner

 AF-AM (RF) - FM SIGNAL GENERATORSimplicity, speed and accuracy are accomplished by fixed frequency points at which circuits are calibrated. 8ROADCAST BAND ALIGNMENT is provided by fixed frequencies of 1500 KC and 550 KC . Intermediate Frequencies of 456 KC and 465 KC are also supplied. Calibration provides for alignment of 460 KC IF systems.

FM BAND ALIGNMENT is provided by fixed frequencies at 88 MC and 108 MC which are at the ends of the band. Fixed frequencies of 10.7 MC and 9.1 MC provide for IF alignment. The FM section is frequency modulated for use with ratio detectors. RF frequency deviation is plus and minus 500 KC .

AUDIO FREQUENCY MODULATION is provided for AM at 400 cycles. A Separafe audio output of 400 cycles is also provided.
Calibrated to be accurate within $1 \%$. Suitable trim mers permit recalibration. Perfect operation from either $A C$ and $D C$ lines with equally high accuracy and stability. Entirely safe as the chassis and case are completely isolated from the line. Attenuator provides smooth control from high signal level to a high degree of attenuation.
Complete with tubes, shielded output cable, line cord and plug, ready to use on $105-125$ V. $50-60$ cycle AC. Attractively finished panel and case.
Size $7^{\prime \prime} \times 2 \frac{1}{4^{\prime \prime}} \times 23 / 4^{\prime \prime}$.

HVMP-C-Universal probe without termination, or resistor, For any VTVM and 20,000 ohm per volt multitester 4.95

## BAR KNOB

A scientifica!ly designed smart looking bar knob. Will not crack or split. Easier to grip because of flat parallel surfaces. Large recessed cup allows this knob to sit flush over even the largest lock nut. Size: $11 / 4^{\prime}$. Available in red or black.

# Model 657...RCP Electronic "DO-ALL" 

## 62 INDIVIDUAL ELECTRONIC

## RANGE MEASUREMENTS

Never before has there bean engineared one instrument to sell for under $\$ 100$ that Nan pos: hly match the versatility, efficiency and speed nf measurement built into this latest RCP design. Here are combined in one instrument five independent instrulatest RCP design. Here are combined in one instrument five independent instruments essential in service-production-development. Outstanding in performance,
measuring low frequency sinusoidal and both low and high repetition rate nonsinusoidal waveform.
D.C. Voltage: 16 ranges $0 \pm 1.5 \pm 3 \pm 6 \pm 30 \pm 150 \pm 600 \pm 1500 \pm 6000$.
D.C. Voltage: Zero Center 14 ranges $\pm .75 \pm 1.5 \pm 3 \pm 15 \pm 75 \pm 300 \pm 750$.
A.C. Voltage: Peak-to-Peak 7 ranges $0 \begin{array}{lllllllllll}-4.2 & -8.5 & -17 & -85 & -420 & -1700 & -4200\end{array}$
A.C. Voltage: RMS-7 ranges $0-1.5-3$ - $6-30-150-600-1500$.
A.C. High Voltage: RMS-Range 0.6000 Volts.

Ohmmeter: 8 ranges- $0-1000-10,000-100,000$ ohms. 0-1-10-100-1000-10,000 megohms. Center Scale 10.
Capacity meter: 6 ranges 1 micro-microfarad to 1.000 microfarads: $1.10 \mu \mu \mathrm{f}$; $.00001=$

Years Ahead in Design -

- $81 / 2^{*}$ Easy-to.View Meter provides instant measurement recognition of the several
scales.
- Simplified Controls save time. Illuminated individual settings of function and
- Carying Handle serves as inclinable rest-tilts the instrument for maximum readability.
- HVMP-3-riigh-voltage multiplier probe. Extends range to 30,000 volls............ $\$ 8.95$

## Model 706A... "Wide Range" Signal Generator

This new signal generator is the finest performer in its class. For equivalent performance the model 706A should be compared only with other signal generators selling from $\$ 90$ to $\$ 125$. It provides continuous coverage from 150 KC to 220 MC in 8 ranges. Six FUNDAMENTAL ranges cover up through 55 Megacyctes.

ACCURACY: within $1 \%$ of calibration adiust. ment.
STABILITY: and constancy of calibration is assured by special electron-coupled circuit design. permability adjusted coils and air trimmer capacitators.
MODULATION: 400 cycle sine wave audio oscillator with modulation continuously variable from $0 \%$ to $80 \%$. Above $80 \%$ has no Eractical application. At th's point tremendous distortion occurs in all signal generators. Un$\mathbf{m}$ =dulated signal is available if desired.
SHIELDING: Thorough shielding of all crifical circuits and components either individually or in compartment or both.

This includes oscillator tube, coil assembly, attenuator, switching circuit. Transformer is electrostatically shieided.
ATTENUATION: Ladder type step attenuator consisting of a multiplier and fine attenuator control.
AUDIO OSCILLATOR: 400 eycles at 50 ohms output impedance is availabie for external use - terminals on panel. Eight scales are clearly calibrated - continuous reading from 150 kilocyeles to 220 megacyeles. Planetary drive gives vernier funing with no backlash. Tube complement-68A6, 6SJ7, 6X4.

A high quality instrument in performance, construction and appearance. Size $15^{\prime \prime} \times 9^{\prime \prime} \times 7^{\prime \prime}$.
Wi. 14 los. Comp.ete with leads leady tor operation on $105-125$ volts, 50 to 60 eycles.

## Model 453 C ... New Master Multitester

- The One Great 20,000 Ohms Per Volt Multitester

A brilliant new completely self contained unit. The Model 453C was designed for direct metering-eliminates warm-up time, grounding, efc. Assures accurate dependable measurements for TV, FM, AM and industry. RANGES:

DC VOLTS: $0-2.5-10-50.250500 \cdot 1000-5000$ at 20,000 ohms per volt.
AC VOLTS: $0.2 .5 \cdot 10-50-250-500-1000$ volts.
DC MICROAMPS: 0-100-DC MILLIAMPS: 0-10-100-500.
OHMS: 0-2000 2 C0,0CO — MEGOHMS: 0-2-20 Meg.
DECIBELS:-12 to -3 to 15,14 to 29,28 to 43,34 to 49,40 to 55.

HVMP-20
High Voltage Probe $-\$ 8.95$
Extends range to 25,000 volts
HFP - 20
High Frequency Probe - $\mathbf{\$ 7 . 9 5}$
Increases Range to 400 Mc .

## RADIO GITY PRODUGTS CO., Inc. EASTON PENNSYIVANIA <br> TESTEQUIPMENT

## Model 780 - INCRA - COLOR — SWEEP GENERATOR

- RCP "Compatible" All Electronic Sweep Generatar

For Black and White and Color Television - Plus FM and AM Radio
Years ahead in design - Unexcelled in performance and versatility, the RCP Model 780 is engineered as a completely electronic sweep circuit without any motors or moving parts. Unique electronic unidirectional coupling provides for sweep in one direction only, at a uniform output level (AGC).

## Feafures:

- 180060 cycle phasing voltage for use on all oscilloscopes.
- Minimum 150,000 microvolts output, terminated with multiple shielded push-button attenuator with minimum leakage.
- Anti-parallax, illuminated dial scales on all ranges, with anfi-backlash dial mechanism.
- Defector/Comparitor output to permit comparison of the sweep oufput on any oscillograph.

Size: $91 / 4^{\prime \prime}$ wide $\times 91 / 4^{\prime \prime}$ high $\times 121 / 2^{\circ "}$ deep. Complete with output, scope, defector/comparitor cables.

# Model 463 - NEW 20,000 PER VOLT MULTITESTER 

\author{

- Low Enough in Cost so that No One Should Be Without a 4631
}

Small in size and with the utmost sensitivity, this compact, efficient unit assures dependable measurement for TV, FM, AM and industry. Designed for direct metering, the Model 463 eliminates warm-up time.

DC voltage multipliers are kept within one percent folerance and are of the deposit type. Meter tolerance is well within two percent.

## Model 327P - PORTABLE TUBE TESTER

- Meefs All of Today's Tube Testing Needs, Plus Tomorrow's Color Television Types

TH - Meets All of Today's Tube the development of a tube Here is a completely new approach in the development of a fube tester. Streamlined to meet all possible physical limitations, and yet with more testing performance built-in than any related type. tests all fubes in current radio and television receivers, as weal as test tubes in color TV receivers; will check transmitting
ballast, gaseous rectifiers, and tuning indicator types.
A new approach to the tube testing data permits easy and rapid insertion of new information when available. Data is also given on current color TV tubes.
If will check CR Picture Tubes both black and white and color by use of CR adapter cable (available at slight additional cost). Black and white picture tubes can readily be reactivated with this tester.

A fine instrument designed for ease of operation and portability. In solid oak carrying case with slip-hinge cover

Model 480 - AC-DC MULTITESTER

- Exceptional Performance Achieved with Latest RCP Design

Based upon the world-famous RCP 447 Multitester, the Model 480 sets an all-time high in value for an economical, rugged, universal tester that is a must for every laboratory, shop and serviceman's kit. 3"' square meter with 800 microampere D'Arsonval movement, gives 1000 ohms per volt sensifivity on DC and AC. Battery for ohmmefer circuit is readily removable and replaceable without soidering or unsoldering. Special spring contact clips make replacement immediately and easily.
Excellent rectifier characteristics and quality control of components in a very large production result in an unusually low price. Here is a betfer. yef more inexpensive instrument than the Model 447.
Housed in a compact, smart looking custom-molded case and panel, the Model 480 equals in appearance its quality and performance.

## Ask Your Local Parts Distributor For The New 1954 RCP Cátalog

# DIALIGHTCORPOIBATIDN <br> Foremost Manufacturer of Pilot Lights 

# PILDTLIGIT ASSEMILIES <br> T-3 $1 / 4$ NEON LAMP • NE-51 <br> 11/16" MOUNTING HOLE RUILT-IN IRESISTOR <br> (Patent No. 2,421,321) 

All of these ussemblien are listed by Under writers' Lahoratories. Inc.

For 110 and 220 volts
The new NE-51 lamp is especially useful for pilot lights to be operated on commercial voltages. It has a distinctive orange-red glow and consumes very little current.

## MULTI-VUE CAP

In addition to the advantages given by the provision of the built-in resistor, these assemblies offer another feature that is especially important in obtaining effective indication with the NE-51 Iamp. The "Multi-vue" cap shown at the right gives a high degree of visibility by directing an increased amount of light toward the eye when the indicator is viewed from any angle. When it is desirable to view the electrodes directly, the clear caps shown below are very effective. For concentrating the light into a beam the metal lens holders are equipped with convex lenses as shown.

ERING

BUILT-IN RESISTOR

External resistors will be furnished which will permit use of these pilot lights on voltages higher than 220 volts.

This series of pilot light assemblies is unique and has several exclusive features. The resistors are permanently built into the high quality DIALCO designed socket.

This socket is constructed with heavy molded bakelite insulation in which the terminals are securely anchored. The insulated socket is mounted in a threaded bushing equipped with nut and shakeproof washer for mounting on a panel of any usual thickness.

## No. 4 Series <br> Wire Leads

Insulated with heavy molded Bakelite. Square shoulder locks into square hole in bracket - all securely held by large tubular rivet.

## No. 12 Series - Double Contact Bayonet

 Ceramic Insulating DiskThe new " 12 " series socket is constructed with a high quality ceramic disk supporting the socket contacts. Recesses in the disk receive the lead wires so that no live metal is exposed.

## Wire Leads

The standard flexible leads are of plastic insulated approved wire, 18 gauge. Usual length is 8 inches; longer leads will be supplied when specified.

Many Bracket Types

LAMP INSTALLER
The DIALCO lamp installer shown below is a useful tool in installing lamps and in servicing pilot lights.

No. L-73

No. L-45
For NE-45 Neon

# DIALIGIT COIRIDIRATION <br> Foremost Manufacturer of Pilot Lights HBOOKLIV 37, N. Y. 

## CONNECTORS FOR SINGLE CONDUCTOR CABLE FOR MICROPHONES - SPEAKERS - PICK-UPS - JACKS <br> (using cable shield for second conductor)

The fittings shown here are designed for use with standard metal shielded single conductor cable up to $1 / 4^{\prime \prime}$ diameter. These connectors are heavily constructed from solid brass and all exposed parts are chrome plated and highly polished.

No. 101

## MALE CONNECTOR FOR CABLE

With spring protector to prevent sharp bending of cable. Solders to cable sheath - secured by set screw.

No. 102
PLUG WITH MALE CONNECTOR
Fits standard jacks

No. 103
CAP AND CHAIN
To protect unused male connectors. Chain secured by screw prevents loss when removed to make connection.

The cable end connectors are provided with rugged wire spring protectors which prevent sharp bends at the connection. The protector is soldered to the cable sheath and secured in the connector by a set screw so that all strain is relieved from the conductor.

No. 100
FEMALE CONNECTOR FOR CABLE
With spring protector to prevent sharp bending of cable. Solders to cable sheath - secured by set screw.

## MALE CONNECTOR FOR CHASSIS

Has sprung center contact which grounds before cable connection is broken preventing open circuit howls.

No. 50

## MALE CONNECTOR FOR CHASSIS

Shell grounds to panel - or may be insulated by washers. Fit $3 / 8^{\prime \prime}-24$ threaded hole or may be secured by nut.

## No. 50 P

## MALE CONNECTOR FOR CHASSIS (Similar to No. 50 above)

Designed for force fit in hole in panel. Requires no nut to secure in place.

## JEWEL LIGHT ASSEMBLIES

11/32" JEWEL . . VERTICAL MOUNTING
Adjustable to the focal length of any miniature screw or bayonet lamp. Mounts in 9/32" diameter hole on panels up to $1 / 4^{\prime \prime}$ thick. Tested at 125 volts. Faceted glcass. Panel Hardware, bright nickel - other parts cadmium. Standard colors.

## ELMENCO PRODUCTS CO.

## FUSED PLUGS

NOW AVAILABLE WITH TOUGH SHOCK-RESISTING HYCAR* SHELL for equipment subject to frequent handling and movement

* B. F. Goodrich Trademark

## COMPLETE PROTECTION!

The Elmenco Fused. Plug is like any standard plug, is light in weight, but easier to handle because of finger grips. How. ever, it contains 2 small fuses which provides complete protection against damage to the appliance and to the main line. The blown fuse is easy to remove and simple to replace. Fits any standard wall outlet.

## NEW MARKETS! GREATER VALUE!

Approved by Underwriters Laboratories and used by many of the largest manufacturcrs of radio and electronic equipment, battery chargers, washing machines, curling irons, lighting equipment, automatic relay equipment, motors of every description, and practically every other' type of product that constumes electricity.
Every wired home, office and store is a prospect.

We list a few of the larger consumers of the ELMENCO FUSED PLUG

## BUSS FUSE CLIPS for $1 / 4$ inch Fuses

(SFE 4, 6, 9, 14, 20, AGX, AGC, ABC,
MDL, MDX, MJB, MJW, MTH fuses)
Spring bronze clips are made of Herculoy -

a bronze of distinctly superior quality for spring clips. This metal gives clips great gripping strength and ability to retain spring under adverse conditions.
Beryllium copper clips combine low electrical resistance with great gripping strength. This means miximum electrical conductivity and results in cooler operarion of clips and fuse.

Size of mounting hole; . 130 to .135 inch.
Center of hole to back-stop; .125 to .135 inch.
Min. length of contact surface; $8 / 52$ inch

## Other standard and special fuses, <br> fuse blocks and fuse holders

If the fuses, blocks and holders shown do nor fit your requirements ask for information on other types.
Fuses and fuse mountings to meet JAN and Military specifications also are available.
If you have a special problem in protection send description or sketch giving number of circuits, type of fuse, terminals, etc., desired. We welcome such inquiries.

## BUSS FUSE HOLDERS

Make it convenient to mount fuse on any equipment.
Changing or inspection of fuse is easy and quick.
Holder has removable knob. Fuse projects beyond body of holder and is not held tight on other end when knob is removed.

Fuse and contacts are protected from dirt and fumes.
Good contact on fuse is made certain by strong coil spring pressure. Poor contact heating that often causes fuse to blow needlessly is eliminated.

Holder bodies are made of black bakelite. All current carrying parts are of brass or copper. Terminals and all contact parts are bright alloy plated.

## PANEL MOUNTED HOLDERS

## for $1 / 4$ inch Fuses

Holders are inserted through hole in panel and are locked in place by nut on holder. They can be used on panels up to 5/16 inch thick.
Bayonet type knob requires only quarter turn
 to remove fuse. No screw driver is needed.

Side terminal is held mechanically as well as by solder. Heat of soldering wire to it will not cause it to loosen or come off.

Vibration will not cause failure of terminals as they are designed to stand severe service.

Neoprene washer and steel locking nut (zinc plated, chromate dipped) furnished with each holder.

Wire hole in terminals; . 115 inch.
Normal current carrying capacity; 15 amperes.
Listed as approved by Underwriters' Laboratories.
$\qquad$
HJM for $1 / 4 \times$ linch fuses (AGX, MJB, MJW', SFE 14) $\$ 0.40$ HKP for $1 / 4 \times 11 / 4$ inch fuses (ABC, AGC, SFE20,

MDL, MDX, MTH)
.40

## IN-THE-LINE HOLDERS

## for $1 / 4$ inch fuses

These holders are for mounting fuse in wire. Holders consist of hody and bayonet type
 knob - two contacts ready to be staked on ends of wire - a pressure spring that is used under contact in base of holder-

Holders can also be mounted in panel up to $5 / 6$ inch thick by means of a No. 9969 Spring nut (Nut not furnished). Flat spot on holder permits it to be locked against rotarion.
Normal current carrying capacity: 15 amperes.
Symbol List Price
HDI for $1 / 4 \times 1$ inch fuses (AGX, MJB, MJW, SFE 14) $\$ 0.20$
Takes No. 18 or smaller wires.

## FUSETRON FUSES, $1 / 4 \times 11 / 4$ inch <br>  <br> Glass tuhe -Dual-Element type

 LONG TIME-LAG OR SLOW BLOWING TYPEThese fuses avoid needless hlows trom srarting currents or surces. They have a fuse link which operates only on very high overloads or short-circuits - they have a thermal cutout which functions on low overlonds - the thermal cutout cannot operate quickiy at any load, hence long time-lag is obtained. Yet protertion is afforded against short-circuits or continued overlonds.
Test aperification-carrv $110 \%$, open at $135 \%$ in 1 hour.

| 200 | 60 seconds max. |
|  | 5 seconds min. |

313000 Series Littelfuses-Slo-Blo fuses with high time-lag to withstand heavy surges-quick on shorts. Designed for circuits with equipment having high inductive or capacitative surges, such as magnets, solenoids, etc., and for circuits with heavy starting currents, such as motors and lamp circuits. Anti-fatigue construction (compound element. with spring and resistor) makes these fuses ideal for inter-mittent-duty circuits on vibrators, control circuits, hi-tension electric fences, small magnets, coils, etc. "'Pioneered by Littelfuse."

## 3 AB "TINY MIGHTY" "'LITTELFUSES'"

314000 Series Littelfuses-The smallest Underwriters' Laboratory approved fusee in ratings this high. Steatite enclosed, aroquenching, powder filled fuses. Shatterproofed against quiok shorts. Medium time lag. Recommended for use with amplifers, rectifers. battery charging equipment, small generators, control panels, amusement devices, communication and electronic equipment, radios, signal apparatus, small motor circuits, etc. Take less space than N.E.C. fuses-"Pioneered by Littelfuse."

CONSTRUCTION: Glass-enclosed. Littelfuse Locked Cap Assembly (no cements) prevents loosening of caps. High visibility transparent label for amperage. Elements mechanically depolarized by twisting age. $90^{\circ}$ (see illustrations) are braced agsinst extreme ai 9 (see "Gooseneck" are braced against extreme tarses up expansion sind contraction. Ratings 5 amps. or less use Suring and Link. Service life six times simple wire. The 4 AG and 5 AG sizes are supplied for Aircraft mire. The 4 AG and 5 AG sizes are supplied for Aircrait ervices for their atrength and greater carrying capacity

BAKELITE-ENCLOSED: 4 AB and 5 AB fuses recommended where severe overloads might shatter glass.

Long Vibration life
CURRENT RATING: Rated to NEC specifications to carry $10 \%$ overload indefinitely, to blow on $35 \%$ overload within 1 hr ., and $100 \%$ overload within 2
min. TAGE RATING: Voltage at which fusen will break without arcing over, or bursting under short circuit conditions
CIBRATION FACTOR: Minimum hours these fuses endure our Magnetic Vibrator operating 120 cycles a endure our Magnetic ibrator operating, while carrying the rated current. Acceleration is 10 times the worst field conditions.

NEW FUSE MOUNTING PANELS
Open type fuse panels, stocked in 12 -pole units as shown-we cut them to $1,2,3,4$ or more poles as ordered, or you may cut them in your plant ( $1 / 8^{\prime \prime}$ allowance for saw cut).

| Fuse Type | Mtg. Type | Dim. 'B" | Dim. "C" | Dim. "D" | Dim. "E" |

## BAKELITE IN-LINE FUSE RETAINER

Deaizned to hang in the puble or mount in the chassia. the inliue face relainer malded of hich manalat latelote in primaril. for low-colene applications: car radios, henters, wort hishita, elow ks etc
The atimanembled unit ronoivit of the hakelite bonts rearptacle. hashlite hmoh, with metal misert. one sprios, iwo knife-edine rivel contarta.
155000 Steries-A aventiled with a $19^{*}$ lann of wire lemit:

 155020A For 20-amp sl'E and 3aG fuses

Nost commonly used by large volume set maminacturer..
All above fuses approved by Underwriters' Laboratories except 315004 and 315005.

## METER BACK MOUNTING

Cat. No. 383002 (1059)-Mounts directly on meter hinding post. Will not tourh other posts on snallest standard meter. i.inen hakelite base, $1^{\prime \prime} \times 11 / 8^{\prime \prime}$ l.ength over serew terminal, $1 \frac{1 / 2}{}{ }^{n}$. Standard l'ackage 20. Weight $1 / 2 \mathrm{lb}$.

NEW IV SNAP-ON MOUNTINGS

Time saver for pigtail replarement. Snap on blown pigtail, then use regular fuse in other side. No soldering.

This Snap-On Mounting has a cut out on buth vidrs which makes the fuse arcesibile for replarement from botb sides. These are available in bulk, on cards and in plastic buxes of ten.

General Electric manufactures selenium rectifiers for every type of electronic and industrial application. The G-E selenium cells are produced by a unique "evaporation" process which produces exceptionally high electrical characteristics.

Long Life-Because of their low forward voltage drop and low backward leakage, G-E selenium stacks age more slowly. They offer the design engineer a quality, nonexpendable component which will last in service. The characteristics do not vary from stack to stack, affording better performance of the end equipment.

Stability and Reliability are two other important features of G-E selenium rectifiers. They have excellent initial characteristics and deteriorate very little with time and use.

Sizes and Ratings are available to meet practically any requirement. They have been used successfully from a few microamperes at 500,000 volts to over 100,000 amperes at 9 volts. Whenever direct current is required, their application should be considered. The three basic types of construction used in G-E selenium rectifiers are shown in the illustrations.

Applications-There are many electronic applications for selenium rectifiers. General Electric selenium rectifiers are ideal for voltage doubler circuits, voltage tripler circuits, clipping or slicing operations in electronic applications, or wherever rectification or d-c blocking is required. G-E miniature selenium rectifiers

MINIATURE SELENIUM RECTIFIERS are available in standard ratings of 50 ma and below at 26 volts to 5200 volts RMS. Stacks are available either in Textolite* tubes or metal-clad casings to meet government specifications for environmental protection. Either lead or bracket mountings can be furnished.
are used for blocking, electronic computer, magnetic amplifier, communication and signal circuits. Other applications include supplying power to operate d-c relays in control circuits, and as components in electronic equipment.

For Complete Information on G-E metallic rectifiers, consult your nearest General Electric Apparatus Sales Office, or write to Section $640-381$, General Electric Company, Schenectady 5, New York.

STANDARD CONSTRUC. TION of a typical G-E selenium stack consists of cells mounted on a metal stud, separated by spacers and spring contacts. Any rectifier circuit or combination of circuits can be assembled in a single stack. Various mounting and screw-terminals connections are available.

PHENOLIC TUBE construction is used when a less expensive and lighter - weight rectifier stack is desired. Good strength can be attained up to 10 cells on a single assembly.

General Electric Co.

## Progress is Our Most Imporrant Product GENERAL ELECTRIC

## SCHAUER <br> INSTRUMENT

TYPE
AA4PH

TYPE A2PH

Schauer copper oxide rectifiers for instrument and other uses are processed and individually tested to meet the requirements of the user. Versatile processing techniques make possible variations in characteristics for special or unusual applications. Each rectifier is rated conservatively for long life and dependable operation. Size "AA," "A" and "B" Rectifiers are encapsulated-fully sealed in special formula polyester plastic in attractive red color. Cells are specially processed with vacuum evaporated gold contact areas to give maximum efficiency, stable operation and low aging characteristics. All rectifiers are supplied with $3^{\prime \prime}$ leads, color-coded. (Red, positive; black, negative; yellow, A.C.) Plastic encapsulated rectifiers have lead insullation imbedded in the plastic for better sealing, eliminating short circuits at the rectifier. Lead lengths of other than $3^{\prime \prime}$ can be supplied on special order.

## RECTIFIERS

"AA" SIZE CELLS are $1 / 8$ " dia. cells for low capacitance and high frequency response. Maximum rating is 2 volts D.C. at 1 MA in a full wave bridge.
"A" SIZE CELLS have good frequency response above the audio range and can be used at higher frequencies. Recommended for meter applications needing 1 MA or less for operation. Can be used for other applications requiring up to 5 MA .
"B" SIZE CELLS are for meter, relay and other applications requiring 1 MA up to their maximum rating. Recommended for commercial and low audio frequency operation.
"C" SIZE CELLS are for general applications requiring larger output currents and operation of meters, relays and other apparatus. Special process cells for varistor applications. Write, wire or telephone for complete information. We welcome your inquiries concerning any special rectification problem.

## SCHAUER MANUFACTURING CORP. - Cincinnati 36, Ohio

Manufacturers of high-quality, dry-disc rectifiers since 1930.

Thinturue Meleallic: Restifers

EEZIES SCO Copper axide anly. Co'or caded. Weldnd lead wires $3^{\prime \prime}$ long. Synthetic lacquer-enamel finish. Single 6.32 stud maunting. Available in special types. Cell diameter $.500^{\prime \prime}$. Cell rating 5 r.m.s. valts, 30 average mils.

SERIES SOO-ERM Copper axide or selenium. Color coded. Solid lead wires $3^{\prime \prime}$ lang. Lacquer finish. Single hole mounting. Available in special types. Cell diameter . $500^{\prime \prime}$. Cell ratings, copper oxide 5 r.m.s. volts, 30 average mils; selenium, 25 r.m.s. volts, 30 average mils.
SEPIES S00-TUA Selenium only. Calor coded. Solid axial leads 3" long. lacquer finish. Maunts by lead wires only. Fully enclosed and sealed in phenalic tute. Hall wove types anly for high voltage. Cell diameter $.500^{\prime \prime}$. Celf rating 25 r.m.s. volts, 30 average mils. Per cell ratings subject to derating accarding to rectifier design.
SERIES SOO-TUR Selenium only. Calor caded. Solid radial leads $3^{\prime \prime}$ lang. lacquer finish. Mounts by lead wires anly. Fully enclased and sealed in phenalic tube. Cell diameter, $5.50^{\prime \prime}$. Cell rating 25 r.m.s. valts, 30 average mils. Per cell ratings subject to derating accarding to rectifier design.
SERIES 280-ERM Copper axide or selenium. Color coded. Solid lead wires 3" long. Lacquer finish. Maunts by "Bracketerminal" combining cathode (plus) terminal ond mounting bracket. Available in standard types only. Cell diameter . $280^{\prime \prime}$. Cell rating, copper axide, 5 r.m.s. volts, 10 average mils; selenium, 25 r.m.s. volts, 10 overage mils.
SERES 280-TUA Selenium only. Color coded. Solid axial leads $3^{\prime \prime}$ lang. Lacquer finish. Mounts by lead wires anly. Fully enclosed and sealed in phenolic tube. Hall wave types only, for high valtage. Cell diameter $.280^{\prime \prime}$. Cell rating 25 r.m.s. volts, 10 averoge mils. Per cell roting subject ta derating according to rectifier design.
SERIES 280-TUR Selenium only. Calor caded. Salid radial leads $3^{\prime \prime}$ long. Locquer finish. Mounts by lead wires only. Fully enclased and sealed in phenolic tube. Cell diameter . $283^{\prime \prime}$. Cell rating $25 \mathrm{r} . \mathrm{m} . \mathrm{s}$. valts, 10 average m.ls. Per cell rating subject to deroting according to rectifier design. SERIES 160 Capper oxide or selenium. Color coded. Welded lead wires 3" long. Fully enclosed ond sealed in molded phenolic case. Mounts by \# 2 screw. Cell diameter $.160^{\prime \prime}$. Cell rating, copper axide, 5 r.m.s. volts, 5 averoge mils; selenium, 25 r.m.s. volts, 5 average mils.
SERiES 160-C Copper oxide or selenium. Colar coded. Welded leod wires $3^{\prime \prime}$ long. Fully enclosed ond sealed in welded brass case. Maunts in midget fuse clip. Cell diameter $160^{\circ \prime}$. Cell rating, copper oxide, 5 r.m.s. volts, 5 average mils; selenium, 25 r.m.s. valts, 5 average mils.

SERIES 160-ERM Copper oxide or selenium. Calar coded. Salid leads $1^{\prime \prime}$ lang. Lacquer finish. Maunts by lead wires only. Cell diameter $.160^{\prime \prime}$. Cell roting, copper oxide, 5 r.m.s. volts, 5 overage mils; selenium, 25 r.m.s. volts, 5 average mils.

Standard rectifiers ore connected internolly occarding to one of the five circuit diagroms shown.
Series 500,160 and $160-\mathrm{C}$ are the well knawn standard line of instrument rectifiers and are constructed to the highest standards of quality. Constructian is canventional.
TUA (tubular, axial leads) and TUR (tubular, radial leads) canstruction is desirable especially in rectifiers designed for high voltage operation. Taral enclosure of the stack hawever limits heat radiation necessitating derating of cells.
ERM (external resilient member) construction insures maintenance of optimum stack pressures regardless of ambient or operating temperotures. Rectifiers in ERM construction ore smaller, lighter and cheaper.

## INTERNAL CIRCUITS

Standard rectifiers are connected internally according to one of the five circuit diagrams shown.

SINGLEPHASE—FULL WAVERECTIFIERSTACKS

## HIGH VOLTAGE SELENIUM RECTIFIERS

Sarkes Tarzian hlgh voltage selenium rectifiers are designed for use In photo-flash supplies, cathode ray oscilloscopes, television receivers, high potential test equipment, and electronic equipments used by military forces.
Designated as Type 0 for current ranges to 5 millamperes and as Type 1 for current ranges to 25 milliamperes, the units are available in half wave, full wave bridge, and center tap stacks. Both types are available with voltage ratings to 4000 in a single unit types are and hundreds of thousands of volts the maximum allowable D.C. curin center tap a 50 MA for Type 1 assemblies.
rent is 10 Type 0 , in a glass enclosure is hermetically sealed for high humidity operation (Half Wave units only) and mounting is by
 means of silver plated ferrules. The bakelite enciosed electrical confiers are designed for normal commercial use and electrical connection is made by means of axial pigtail leads. For inverse voltage
ratings to 208 volts A.C. tho unit is self supporting; longer assemblies require a mounting clip.

The Type 1 rectifier is avaliable only in square bakelite enclosures. The unlt, normally supplied, is not hermetically sealed; however, it is possible to "capsulize" the Type 1 rectifier for high humidity applications.
For complete information or engineering assistance-write, phone or wire. No obligations on your part.

New Handbook Available 72 pages oi valuable information about Radio and Television circuit diagrams - in cludes Color T.V. and new Sarkes Taraian Plug-In Rectifiers, Power Rectifiers, and High Voltage Rectifiers - advance information on applications. Handy reference size - $81 / 2$ x 11". Price \$1.00.

## RPR Germanium Diodes

## featuring polarity at a glance!

Radio Receptor's new Germanium Diodes feature polarity at a glance combined with simplicity of construction and sound design principles. The distinctive tapered shape of the glass-filled phenolic cartridge body speeds assembly because operators can see at a glance the correct direction of assembly.

Users are enthusiastic over the quality of the product which gives a maximum of trouble-free operation even under the most adverse conditions. Radio Receptor Germanium Diodes are currently being used in walkie. talkies, computers, TV sets, tuners and other electronic applications.

All values measured at $25^{\circ} \mathrm{C}$.

JUST ADDEDI THE FOLLOWING DIODE5 AL5O AVAILABLE: IN91, IN92, IN93, INIII, IN112, INII3, INII4, INIIS.

TYPE RR14， RR20，RR34 2N34，2N36 2N37，2N38

TYPE RR21

Intended for applications in low level audio circuits． Particularly applicable where small size and economy of operation are desirable．

Intended for applications in low level audio circuits requiring power outputs in the 10 milliwatt range．

TYPE RR38 Intended for applications requiring economy of opera－ tion at low power levels．Particularly applicable as the output stage for hearing aids and personal receivers．

－Max．noise figure of 16 db may be specified for RR14，RR20 \＆RR34 types by ordering units marked with yellow dor．
－The tinned flexible leads may be soldered directly into the circuit or plugged into a standard socker by curting the leads to 0.20 inches in length．Use socket type：Cinch No．SiA 14956 or cquivalent．Use heat sink when soldering to protect transistor from excessive heating．
－RRco Junction Transistors are hermetically sealed for light－proof，mois－ ture proof and contamination－free operation．

Seletron and Germanium Division RADIO RECEPTOR COMPANY，INC． In Radio and Electronics Since 1922

## For Industrial Applications

 SELENIUM RECTIFIERS

Rugged, high powered, center protected Seletron Selenium Rectifiers are ideal for diversified industrial applications because of their flexibility and high efficiency over a wide range of load. Typical of such uses are installations operating elevators in more than 150 office buildings in New York and Chicago and the spectacular Eveready searchlight on New York's Great White Way.
rectifier circuits. CONnections AND DIMENSIONS

NOTE: \#10-32 for all stacks with code numbers starting $P, Q, S, W Q, W S$ $\$ 5 / 16-18$ for all stacks with code num. bers starting U, W, H, WW, WH.

Our engineering department will be glad to aid you in the solution of your rectifier problems without obligafion. Write for booklet on SELETRON Selenium Rectifiers.

## MILLONS OF MINATURES IW SERUICE IW RADIO AND TELEVISION:

Current ratings abave are for a maximum plate temperature of $75^{\circ} \mathrm{C}$. when the rectifiers are new, in a maximite ambient temperature of $45^{\circ}$ C. Recommended plate temperature for new rectifiers is $70^{\circ} \mathrm{C}$. Output current ratings are based on R.M.S. rectifier current not in excess of 2.5 times rated output currentl.
*This rectifier is rated of 30 MA , when used with a 47 ahm series resistor.
†This rectifier is rated of 25 MA when used with a 47 ahm series resistor.
(1) Stud maunted-overall: $2^{\prime \prime}$

## - fifletrinill SELENIUM RECTIFIERS

Miniature Seletron Selenium Rectifiers are specified by an ever increasing number of engineers in the U. S. and throughout the world for radio, television and other electronic applications. The small size and thorough dependability under all types of punishing conditions make them ideal wherever long life and high efficiency are needed. The wide range of available sizes is listed to the left.

See your local distributor for your requirements.

## INTERNATIONAL RECTIFIER CORPORATION

INDUSTRIAL RECTIFIERS

Executive Offices: 1521 E . Grand Ave., El Segundo, Calif.- Phone: ORegon 8-6281 Chicage Branch Office: 205 West wacker Drive. Phone: Franklin 2-3889 New York Branch Office: 501 Madison Avenue. Phone: Plaza 5-8665

The Germanium Diodes produced by International Rectifier embody a completely new and superior design. Excellent shock and vibration resistant characteristics are obtained by the use of non-skid germanium crystal surface, double housing, precision formed whisker, and thermosetting plastic end seals. Retention of whisker adjustment is maintained by welded anchor pins. Kits of 10 diodes are also available.

These subminiature selenium diodes have been developed for use in electronic equipment where space is at a premium and ambient temperature is high. They are designed for stable operation in ambient temperatures from minus $50^{\circ} \mathrm{C}$ to plus $100^{\circ} \mathrm{C}$. Small and compact in size each unit is provided with pigtail leads to facilitate wiring into a crowded chassis. Potting within a thermosetting compound affords protection against corrosive atmosphere, moisture. fungus, and salt spray. Kits of 18 diodes are available.

## 

## HECTISEL <br> Conventional Open Type Assembly

Types: PRS 65, 75, $100,150,250,300,350,400,500$
Greatly improved due to the use of high quality plates of matched characteristics. This insures long life, dependability and maintenance free operation.

## NEW RECTISEL

The NEW RECTISEL Line of miniature electronic selenium rectifiers was expressly de-
signed for urgently needed applications in the following fields: RADIO and TELEVISION as voltage suppliers; VUOLTAGE REGULATORS: MULTIPLIERS; BIAS SUPPLY and FILA. MENT SUPPLY; TELEGRAPII, TELEPHONE and TELETYPE MACHINES. For Power: DC VALVES; ARC SUPPRESSORS; FREQUENCY MULTIPLIERS; VENDING MACHINES; RELAYS; BUSNEES BACHINES; SIGNAL CIRCUITS; CHOKES (especially for phonographs), etc., etc.
No center mounting therefore no center pressure and no center hot spots, due to the unique construction plates cannot loosen and turu. Light in weight. Better voltage regulation because the initial forward resistance is much lower and RATINGS FROM 25 25-100 MA. LONG LIFE are fully guaranteed.

## NEW IPLASTISEL

Miniature Selenium Rectifiers

High Voltage - Low Current Rectifiers
The entire facilities of the E.D.I. Engineering Department are available to assist you witl your problem. There is no obligation for this service. A letter, telegram, or phone call will result in a prompt reply.

In all ratings through 200 Ma . NEV.PLASTISEL rectifiers are molded into plastic, which gives them the appearance of small molded condensers. These sealed in units lave the following advantages.
They fit deally into miniaturization programs and printed circuit applications because they can be mounted against chassis or in contact with other complements.
Shock hazard in small contact chassis is completely eliminated when NEW-PLASTISEL units are used. No wiring need be run to rigid terminals as every NEW-PLASTISEL unit has pig tail leads.
Aids in heat dissipation.
COMPLETELY INSULATED AVOIDING ACCIDENTAL SHOLTS. NOTHING TO MELT OR SOFTEN. NON-INFLAMMABLE.

the all new

## Hobld Nadser

8 Big Features
No Comparable
Receiver Can Offer!

No other receiver at anywhere near the low price offers you these eight "high-priced" features: (1) Calibrated bandspread for 80, 40, 20, 15 and 11 meter bands (large 6 " indirectly-lighted lucite scales). (2) Delayed A.V.C. (3) Higher sensitivity. (4) New miniature tubes used exclusively. (5) Antenna trimmer. (6) Better selectivity. (7) An extra tube (total of eight plus rect.). (8) More compact.

Other wanted features include: Range of 540 kcs . to 40 mcs . in 4 bands. Tuned R.F. stage. Two I.F.
stages, 2 audio stages with phono input and 2-position tone control. Built-in-speaker. Separate high frequency oscillator. Sensitivity control. Series valve noise limiter. Headphone jack. Standby-receive switch.

CONTROLS: Ant. trimmer, main tuning, bandspread, sensitivity, receivestandby, band selector, ANL-OFF, tone, AM-CW, pitch, vol.-A.C. OFF.
TUBE COMPLEMENT: 6BA6, r.f.; 6BE6, mixer; 6C4, h.f. osc.; 6BD6, 1st i.f.; 6BD6, 2nd i.f.; 6AL5, 2nd det., AGC, ANL: 12AX7, 1st aud. and c.w. osc.; 6AQ5, aud. output; 5Y3/GT rect.

Radio's Master - 19th Edition

Small ceramic eoil forms designed primarily for high frequency applications and conforming to government specifcations. Call form is Grade L/ ceramic (JAN 1-10); base is silver-plated brass; core is brass or iron. Supplied with two nylon rings to sejarate coils if more thian one is wound on same form. Small holes in rings can be used to secure leads.

## COUPLINGS

TX-1. Leakage path $1^{*}$.

TX-9. This small insulated lexible coupling provides high electrical eff. ciency when used to isolate circuits. Insulation is steatite. $15 / 8^{\prime \prime}$ diam. Fits $1 / 4$ " shaft.

TX-10. A very compact insulated coupling free from backlash. Insolation is canvas bakelite. $1-1 / 16^{\prime \prime}$ diam. Fits $1 / 4$ " shaft

TX-19. A steatite insulated flexible coupling for $1 / 4^{\prime \prime}$ shafts. Conservatively rated at 5000 volts peak. Di. ameter $1 \% / 8^{\prime \prime}$. length $1^{\prime \prime}$. Length and flaghover voltage can be increased by turning collars outboard.

TX.23. A deluxe insulsted flexihle coupling designed tor coupling $1 / 4$ " thafts. Will handle a maximum radinl minalignment of $1 / 16^{\prime \prime}$ atso 2 degrees maximum angular misalignment.

TX-23

## SAFETY GRID. AND PLATE CAPS

SPP-9. Ceramic insulation. Fits 9/16" diameter.
SPP-3. Ceramic insulation. Fits 3/8" diameter. National Safety Grid and Plate Caps have a ceramic body which offers protection against accidemtal contact with high voltage caps on tubes.

## GRID AND PLATE GRIPS

Type 12, for $9 / 16^{\prime \prime}$ Caps.
Type 24, for "/8" Caps.
Type 8, for $1 / 4^{\prime \prime}$ Caps.
National Grid and Plate Grips provide a secure and positive contact with the tube cap and yet are released easily by a slight pressure on the ear.

Write Dept. $B 30$ for complete catalog, or detail drarings of parts advertised

These RF chokes are identical electrically, but differ in mount ing provisions. The $\mathrm{R}-100$ employs pigtail leads: the R-100U has pigtail leads and a removahle stand-of insulator: the R-100S has coter-pin lug terminals and a non-removable stand-off insulator: the K-1005r has a $6-32$ threaded stud at each end. These chokes are available in 2.5 .5 and 10 millihenry sizes and are rated at 125 miliamperss.

These RF chokes are similar in size to R-100 series but have higher current capacity. The R-300U is provided with a removable stand-off insulator at one end. The $\mathrm{R}-300 \mathrm{~S}$ has a non-removahle stand-off insulator and cotter-pin lur terminals. The R-300ST has a 6-32 threaded stud at each end Inductance values of $0.5,1.0,2.5$ and 5.0 millihenries are available with a current
f-300S and R-300ST are Identical electrically.

## CAPTIVI NUTS

National Captive Nuts of stainless steel may be pressed into aluminum and certain types of brass sheet metal to provide integral flushmounted tapped holes in $\pi$ wide variety of sizes, Four basic types have been designed for metal thicknesses of $1 / 16^{\prime \prime}, 3 / 32^{\prime \prime}, 1 / 8 ", 3 / 16^{\prime \prime}$ and $1 / 4$ ".

R-152

R-33. The R-33 series chokes are 2 . section RF chokes avnilable in 10.60 , 100 and 750 microhenry sizes. Also availabte in this series is a single layer solenoid choke of 1 microhenry inductance. All are rated at 100 millimmperes. The chokes are wound on a $5 / \mathrm{B}^{\prime \prime}$ long form and range in diameter up to $5 / 16^{\prime \prime}$ maximum.

R-50, R-50-\%. The R-50 series chokes are 3 and 4 -section RF chokes and wailable in $0.5,1,2.5$. and 10 millihenry sizes. They are rated at 100 millamperes. The chokes are wound on a $1^{\prime \prime}$ long form and have $n$ maximum diameter of $15 / 32^{\prime \prime}$. The 10 milfihenry R-50-1 choke is wound on an iron core.

R-152. For use in the range between 2 and 4 Mc . Ideal for high power transmitter slages operated in the 80 meter amateur band. Inductance $4 \mathrm{~m} . \mathrm{h}$., DC resistance $10 \mathrm{ohms}, \mathrm{DC}$ current 600 ma . Coils honeycomb wound on stentite rore.

DIALS, MECHANISMS AND KNOBS

HRS (gray or black) The HRS series knobs are a popular easy to grip knob. They are molded of high quality plastic and have $15 \delta^{\prime \prime}$ dia. chrome plated bevel 8 skirts fit $1 / 4^{\prime \prime}$ shafts available in the following scales :?

HRS-1
HRS-2
HRS-3
HRS-4 Single etched line
HRS-5 $0-10$
HR (gray or black) An HRS type knob without the chrome plated skirt but, with a white dot for spotting relative control settings.
through $30^{\circ}$ through $180^{\circ}$ through $300^{\circ}$
through $180^{\circ}$

HRT-M. This smaller, version of the HRT - now available in choice of gray or black - is $1-7 / 16^{\prime \prime}$ in diameter.
AM Dial. The original "Velvet Vernier" mechanism in a metal skirted dial $3^{\prime \prime}$ in dia. ratio 5 to 1 . It is available with $2,3,4,5$ or 6 scale and fits $1 / 4 /$ shaft. Mechanisnis also available separately.
$\mathbf{N}$ Dial. The four-inch $\mathbf{N}$ and $A D$ Dials have engine divided ami die stamped scales respectively. The $\mathbf{N}$ Dial has a decimal vernier: the AD Dial employs al pointer: 'The planetary drive has a ratio of ' 5 to 1 , and is contained within the body of the dial, 2, 3, 4 . 5 or black scale. Fits $1 / 6^{\prime \prime}$ shaft. Specify scale.

HRM KNOB. This straight knurl brass satin chrome finished knob with arrowhead fits ${ }^{1 / 4} 4^{\prime \prime}$ shaft. See catalog for deacription.

## GONSET "COMMUNICATORS"

The well known Gonset Communicator is now available in four different models to fully meet the varied requirements of Amoteur, CAP, Commercial. Industrial and Airpart services. Each model is a complete station $\dot{A} \dot{P}$ superhet receiver with "Coscode" RF, xil controlled tronsmitter. (VFO is also available separately.) Self-contained power supply for $115 \mathrm{~V} A C$ and 6 V DC. Modulator may also be used os a PA system, mobile or fixed. All models $10.3 / 8^{\prime \prime}$. light in weight, conveniently partoble.

COMMUNICATOR - I!
Tunable receiver, xtal cantralled able squelch (sitent stondby), tronsmister. (AM). Cavers 144. fomous Gonset noise clipper, 148.3 mes. 2E26 final delivers phone jock with speoker mut5.7 walts carrier. Hos adjust. ing, dial light switch etc.

COMMUNICATOR -It Model \#3025-Net-229.50
COMMUNICATOR I- Model \#3026 (less squelch, efc.)-Net-209.50

## LOW POWERED INDUSTRIAL "COMMUNICATOR"

Includes all basic features of ather Cammunicotors except hos xtal controlled transmitter and receiver for single, fixed frequency operatian between $152-172$ mes. Includes squelch and naise clipper. Power limited to F.C.C. regulations for low powered industrial services. Price includes builtin power supply for $O V D C$ and 115 V $A C$ and xtals for both transmitter and receiver.

Madel \#3042-Net-299.50 plus 13.48 Federal Exciso Tax.

## "UNICOM" "COMMUNICATOR"

Same as Industrial Communicator except receiver funes frequency range 108 to 128 mcs . Power oufput 6.7 wotts, or lower if application similar to low power industrial. Ideal for use at airports, air test centers, ambulances, etc. for communication with aircraft or control tower.
Model \#3043-Net-299.50 plus 13.48 Federal Excise Tax.

## "COMMUNICATOR" ZIPPER CARRYING BAG

Convenient carrying bog far oll Communicotor models. Halds Cammunicator plus mike, anfenno, coox and ather accessories. Canstructed of heovy canvos, padded. Altroctive green color.

CARRYING 8AG-Model \#3023-Net-14.95

## TWO METER VFO ........

Designed far use with Cammunicotor or most any other 2 meter rig. Has output of 24 mcs . and plugs directly into existing xtal socket. Multiple funed circuits minimize spurious radiations. Also has built-in oudio preomplifier to increase mike pickup where desired. Has selfcontoined $115 V$ AC power supply, ponel switch to permit "Zeroing in" on received signals. Attractive cabinet motches Cammunicator-same height, half as wide. Highly stable, rugged, dependable.

Model \#3024-Net-84.50

NOISE CLIPPER
A "must" far every mabile installation aperating above 2 or 3 me to reduce ignition interfer. ence. Works with
all AM receivers using canventional diode detectors. eosy io install. Complele inst

FREQ. RANGE: 1.7 .54 mcs continvous.
TU8ES: RF-6AG7, 6146. AF.12AT7, two 7C5's.
POWER REQUIREMENTS: 300 V . 500 V @ 200-225 ma (phone) and 6.3V AC or DC @ 3.15A. UD to 50 W input, phone or CW.
MODULATOR: Class AB2 tetrodes and integral hilevel speech clipping.
ANTENNA FEED: All conventional feed lines, Coax, ribban or open line or direct to Marcani antenna.
MICROPHONE INPUT: Any standord carbon or PA type hi-impedance dynomic or crystal.

## VFO FOR COMMANDER

A companion unit far use with the Commander. Unique circuit employs no tubes therefore affords good stability because of na heat gen. erated in heavy oluminum box. Same size os Super-Six. Cavers 10 , 15, 20 and 75 phone bands. Merely plug into receptacle an Commander panel. Stable, with construction ex. iremely sturdy for rugged mobile use.

## "CASCODE" PRE-AMPLIFIER

Gain is over 10 DB , wih naise figure of 5 D8 over mntire 2 meter band. Uses low-noise 6BQ7. Heater and plate valt. ages are abtained fram associated re. ceiver. Stondard coax input socket and $30^{\prime \prime}$ lead of coox sable is supplied for connection to antenna terminals of 2 meter receiver. Also ovailable for spos frequencies, belween 50 and 174 mcs Sixe: $3^{\prime \prime}$ wide, $31 / 2^{\prime \prime}$ high, $33 / 4^{\prime \prime}$ deep.

## DE LUXE NOISE CLIPPER-SQUELCHER

The combinotion is opplic. able to any amateur mobile or communications receiver. 5moll size permits easy mounting direcily beneoth ony of the Gonset stondard converters. The unit is very simply cannected to existing "outa receivers. Size: $41 / 8^{\prime \prime}$ deep $\times 51 / a^{\prime \prime}$ wide $x$

2 $1 / \mathrm{a}^{\prime \prime}$ high.
Model \#3000-Net-24.50

## "SIGNAL SLICER"

A highly selective I.F, omplifier far use with ony cor or home radio using stondord I.F. Will increose selectivity to 3.5 kc for better recep tion on crowded bands. Has built.in noise clipper to greatly reduce ignitian and similar naise. Brood-shorp switch. Is powered fram cor rodio. Drows only 1.5 mo plus heaters Size 61/8" $\times 5 \%{ }^{\prime \prime} \times 3^{\prime \prime}$.
