The Madel 330 is a camplete, crystal cantralled, amplitude madulated transmitter specificaliy designed for continuaus-service operation in Ro. intinuous-service operation in Ro The self-contained modulatar unit he self-contained modviatar uni has ample copacity to permit $100 \%$ vaice modulation at the rated car. This Transmitter is available for op This iransmiter is avallable for op eration on 35.58 or 43.58 megaey cles or on any ather spat frequency within the ronge of 30 to 50 mego cycles. Special filters and equip ment shielding combine to reduce spurious and harmonic emissions to a very low value.

## GROUND-TO-AIR

## MODEL 310

## 50W OUTPUT

The Madel 310 pravides a camplete twa-way fixed station far aperation on any single frequency from 118 to 132 mcs . within the oviation bands. The elements cantained within the single compast housing include an amplitude modulated transmilter roted at 50 watts output, a crystal controlled receiver, speech with oudio limiting control equipment and necessary power supplies.
The equipment is not limited in The equipment is not limited in scope to this specific opplication however since its dependability and excellent performance characteris. tics are equally applicable to paint-to-paint, base station-to-vehicular mobile or similor VHF services.

## GENERAL PURPOSE-H F

## CIVIL DEFENSE

## MODEL A4912 300W OUTPUT

The Model A-4912 transmitter is designed for either CW ar vaice operation within the frequency range fram 2 to 27 mcs . It hos pro. ronge fram 2 to 27 mcs. It has proput is from 500 to B00 watts depending upon the type of opera pencling upon the type of opera. bion. This is a general purpose unit buit to exacting commercial standpoint, morine ond ground aviotion point, morine and ground aviotion services. Arronged for high speed keying, also FSK when used with Rober is narmally law level but high level Class $B$ modulator and ex ternal speech console ovailable.

MODEL 237 250W OUTPUT

The Madel 237 is a complete, srys tal controlled, amplitude modu oled transmitter specifically de signed for continuous-service oper ation in Civil Defense or fixed paint-ta-point applicatians. The self contained modulator unit has am ple copacity to permit $100 \%$ voice modulation at the rated carrier oulput of 250 watts. This transmit. er is ovailable for operation on iwo frequencies with in the 1750 . i BOO Kreand ar on other adiocent channel frequencies up to 15 mc channel frequencies up ro mis. peria thers and shielding combine to reduce spur ous ond harmo

## BANDMASTER SR. ${ }^{5} 111^{50}$

A complete ready to go transmitter including the new crystal-oscillatorvfo switching circuit. Phone or CW - Eight bands - 80, 40, 20, 15, 11. 10, 6 and 2 Meters. Ideal for either mobile or fixed station use. Will operate from A.C. power packs up to 450 volts af 275 ma., vibrator supply or dynamotor supply for portable mobile operation. Employs Pi antenna matching net work. Power input to final is 50 watts with 450 volt power supply on Bands 1 through 7, 30 watts on Band 8. No tuning adjustments are necessary except those required to resonate the final output to the antenna. May be mounted on rack panel with power supply. For use with carbon microphone. No plug in coils.

CONTROLS: Band Switch, Excilation Control, Antenna Loading, Amplifier Tuning, Power-on Switch, Carrier-on Switch, Meter Switch. Antenna network will match non-reactive feeder of approximately $50-500$ ohms. Frequency calibration chart on front panel as well as two scale grid and plate D.C. milliammeter.
TUBES: 6AQ5 Crystal Oscillator, 6AQ5 Buffer-Multiplier, 807 Final Amplifier, 2-6L6G Class B Modulators. In sturdy steel cabinet, $8^{\prime \prime}$ wide by $12^{\prime \prime}$ high by $8^{\prime \prime}$ deep.

## BANDMASTER DELUXE ${ }^{5} 1377^{50}$

The last word in a versatile small transmitter for ham or commercial use. Used extensively in foreign countries for important commercial applications. Has built-in three tube preamplifier for use with crystal mike, and ALL the features of the Bandmaster Sr.

## POWER

APS-50 BANDMASTER POWER SUPPLY FOR $110 v$ A.C.

Delivers 425 v. at 275. mo. and 6.3 v . al 4 amps. May be mounted on rack panel. For 110 Volt A.C. $50-60$ cycles. $\qquad$ $\$ 39.50$

# FIXED.TUNED RECEIVER 

The latest of the famous MORROW cenverters. Tunes 75-40-20-15 \& 10 moter bands. Full dial bandspread on 5 easy to read scales. Sensitivity is less than $1 / 2$ micro-volt on all bands. Recommended for SSB recep. tion because of extreme stability. Uses 15 " $\mathrm{Hi} \mathrm{O}^{\prime \prime}$ coils and 10 Zero temp ceramic trimmers in Mixer and Osc assembly. Oscillaton tempere ature compensated. I.F. amplifier uses 2 transformers, 4 runed circuits. Antenne trimmer on front panel. Solid aluminum machined knobs. Tube compliment 6CB6 RF omplifier, 12AT7 Mixer-Oscillator, 68A6 I.F amplifier, and 6A15 noise limiter (5 BR) only. Housed in steel case, gray hammertone finish, size H-4" W-51/2" D. $63 / 4^{\prime \prime}$ SBRF for use with FTR only, 5BRLN basic converter, SBR same as obove plus noise limite er. 6 or 12 vole. Amateur net price: SBRF $\$ 67.95$. 5BRLN $\$ 69.95$. 5BR \$74.95.

The FTR is a revolutionary new crystal controlled peceiver puned to 1525 KC and when combined with a MORROW converter serves as an I.F. and Audio amplifier to form an outstanding communications re. ceiver. The following features are all included and many of them are exclusive in MORROW seceivers. Features include: A crystal controlled local oscillator; an I.F. amplifier (200KC) with a pass band of 3.5 KC at 6DB down; An automatic noise limiter; A three stage audio amplifier: A noise balanced squelch; A SSB stable B.F.O.; A hermeticaly sealed "S" moter; A field strength meter; A pelay controlled vibrator power supply; complete switching and a full compliment of controls on the front panel. Builf for amateur service with the design requirements of commercial equipment. Supplied complete with power sup. ply, less speaker. Amateur not price including tax . . $\$ 128.40$. 6 or 12 vols.

GC-10 and GC20.
The GC 10 and 20 are generator hash filters to be installed on the car genera. tor. After installation lust fune to minimum hash in receiver. GC-10 for 10 meters and GC- 20 for 20 meters Price: amateul net 3.25 .

MVL-50.
The MVL-50 is motor driven vartable inducianse coil that is remote rable inductance col dash of the car. controled from the dash of the car Used to tune the anema trimum transmifter frequency for maximum output. Can be used on all bands, 10 through 75. The $40^{\circ}$ and 75 meter bands require external loading coils Supplied with coax fitting and re mote control switch.
Price: amateur nei 24.95 .

The FC. 20.1 is a 25 watt AM modulated Crystal controlled, Base station Modulation is limited to $100 \%$. Available in single or dual channel models with a carrier frequency in the 30.45 MC band. Meets FCC and FCDA requirements. The receiver is equipped with a noise balanced squelch and opens on $1 / 4$ microvolt signal. Power source ls 115 V 60 Gycles.

FP. 1086.
The FP. 1086 is a 250 millawatt, crystal conirolled, AM modulated pack set. It is available for single channel operation in the 30.60 MC band. A four tube supen regenerative receiver is used. The case is of welded aluminum. A telescoping whip antenna and a canvas carfying bag is supplied. Dry battery power, is self contained.

The FL or FLP is a 2.5 wall, erysta controlled, AM modulated base or pact controlled, AM modulated base or pack
station. Available in single of duat channel models with a carrier frequency in the 30.45 MC band. Meeta FCC and FCDA requirements. The re ceiver has a sensitivity of 1 microvel and is equipped with an "g" meter and battery vall meters. Housed in and batrery voll meters. Housed in in aluminum case with handle. The two ets are identical except the FLP has a telescoping whip antenna and bat tery compartment.

The MB5 and MR25 are mobile, te. ceiver transmitters, crystal controlled, AM modulated with modulation limit. ers. The power output of the MBS is 5 wat's and the MB25 is 25 watts. Available in single or dual channel models with a carpier frequency in the no-45 MC band M Fets FCC and FCD $30-45$ MC band. Muets FCC and FCDA
requirements. The receiver is equipped pequirements. The receiver is equipped
with a noise balanced squelch that opens on $1 / 2$ microvolit. Available in 6 or 12 volts.

## MOBILE CONVERTERS

## high sensitivity - buIlt-in noise limiter - high-gain circuit

## MC-55 FIVE BAND MOBILE CONVERTER

For $10,15,20,40$ and 80 meters. 1.25 micro-volt sensitivity on all bands. Large, attractive edge-lighted dial. 25 -to-1 worm gear tuning. Efficient automatic noise limiter built-in. Integral transmit-receive switch. Three gang tuning capacitor. Individual coils for each band and each circuit controlled by single band switch. Aperiodic i.f. stage aids in providing high-gain characteristic. Input impedance $50-72$ ohms. Output frequency 1550 kc . Separate input for car antenna is automatically switched to car radio when converter is switched out.
Requires 150-180 v. at 18 ma . Provisions for either 6 or 12 -volt operation. Tube lineup: 6BJ6 r.f. amp; 12AT7 osc-det; 6BJ6 i.f. amp; 6AL5 noise limiter. Attractive cabinet finished in dark gray enamel. Complete with tubes, cables and instruction sheets. Size: $47 / 8^{\prime \prime}$ high, $58 / /^{\prime \prime}$ wide, $51 / 4^{\prime \prime}$ deep. ## MC-53 THREE BAND MOBILE CONVERTER

Specially designed for 2,6 and $10-11$ meters. 1.25 micro-volt sensitivity on all bands. 25 -to-1 worm gear tuning insures mechanical tuning stability. Individual coils for each band and each circuit. Three gang tuning. Aperiodic i.f. stage aids in providing high gain characteristic. Separate input connectors for each band and for car antenna. Handy send-receive switch. Built-in automatic noise limiter. Voltage regulator provides excellent stability. Designed for 6 -volt operation. Requires $150-180$ v. at 25 ma. Switching converter out automatically connects regular car antenna to car radio.
Output frequency 1550 kc . Tube lineup: 6AK5 r.f. amplifier; I2AT7 osc-det; 6BJ6 i.f.; 6AL5 limiter and OB2 voltage regulator. Attractive cabinet finished in gray enamel, measures only $53 / 4^{\prime \prime}$ wide, $47 / 8^{\prime \prime}$ high and $51 / 4^{\prime \prime}$ deep. Complete with all tubes, cables and instruction sheets. Size: $47 / 8^{\prime \prime}$ high, $53 / 4^{\prime \prime}$ wide, $51 / 4^{\prime \prime}$ deep. Shipping weight, 7 lbs. ## DB-23 PRESELECTOR

## 20-DB MINIMUM GAIN • 3 PUSH-PULL STAGES • SELF-TUNING

Substantially improves the performance of any receiver. Employs three 6 J 6 twin triodes as neutralized push-pull stages in a unique combination of selective and wide band r.f. amplifiers. Provides minimum gain of 20 db throughout all ham bands from 3.5 to 30 mc with substantial image rejection. Signal-to-noise ratio improvement is better than 7.5 db over that of the receiver alone. Permits optimum use of mechanical, crystal or audio filters. Input circuits accurately match any standard type antenna. Operation is simple; merely set band selector and adjust peaking control for maximum signal.
Entirely self-contained with built-in power supply. Handsorne cabinet is small, compact and finished in blue-gray. Complete with all tubes and instruction sheet. Size: $5^{\prime \prime}$ high, $75 / 8^{\prime \prime}$ wide, $6^{\prime \prime}$ deep. Shipping weight, 8 lbs . Ameleur Net.
$\$ 49.50$

## RME 100 SPEECH CLIPPER

3-20 DB CLIPPING • PI LOW-PASS FILTER • UNITY GAIN
Specially designed peak limiting pre-amplifier that provides higher articulation and intelligibility to combat QRM and ORN in phone bands. Ideal for use with Johnson Viking, Collins 32 V and all hambuilt phone equipment. Clipping level adjustable from $3-20 \mathrm{db}$. Pi low-pass filter provides high suppression of generated harmonics above 3000 cps , concentrating voice power to most effective band of fre quencies. Frequency response $200-3000 \mathrm{cps}$.
If set to provide $100 \%$ modulation, louder speech will not over-modulate. Front panel input for highimpedance microphone takes PC1M connector. Tube lineup: $6 \mathrm{SC7}, 6 \mathrm{H} 6$ and 6 X 5 GT rectifier. Entirely self-contained in handsome blue-gray steel cabinet. Complete with tubes, shielded output cable and instruction sheet. Size: $5^{\prime \prime}$ high, $75 / 8^{\prime \prime}$ wide, $6^{\prime \prime}$ deep. Shipping weight, 9 lbs. Amateur Nef . . . . . . . $\$ 39.50$

## SECOND OP DX INFORMATION COMPUTER

# THE ALHEN D. GARDWELL ELECTRONIGS PRODUCTIONS GORP 

PRECISION CAPACITOR
TYPE PL-24,050
Designed for frequency meters: requiring maximun mechanical and electrical precision. Type No. 4.080 gear and worm driven capacitor incorporates special design features representing years of research and usage. Capable of operating in a temperature range of minus 30 degrees $C(-86 F)$ to plus 8 s degrees $\mathbf{C}(+131 \mathrm{~F})$.

## CAPACITY RANGE: Maximum capacity 220 mmfd., méunums capacity 21 mumfl.

CAPACITY CHARACTERISTIC: Straight Jine Frequeney.
INSULATION: Moisture-proofed ceranic or gla-s-bonded mica. BACKLASH: Negligible.
RESETTABILITY: To 10 parts in one million.
GEAR DIRIVE: Precision split worm gear, equipped with precision ball bearings. Ratio 100: 1 throughout $360^{\circ}$.
 WEIGHT: $18 / 4 \mathrm{lbs}$. (with cast aluminum frame).
HOTOR CONTACT: Silver plated phosphor bronze spring with 2 silver contacts bearing on silver plated dise.
MOUNTIDG: 3 point, to bottom of main casting.
PL-24.050 ineludes capacitor (PI, 4.080), drum dial (P1, 4.089-1-A), fast running dial (PI. 3.200) and vernier ring (PL. 3.004). Lials are alurninum, black anodizel and precision engraved.
NOTE: This unit can be supplied with intermediate capacitance ranges atraight line capacitance or special gear ruduction on request.

MIDGETS FOR V.H.F.

Ninety degree capacitor with butterfy rotor plates, low distributed inductance and no moving contacts. Plates are easily removable so that
capacity range can be changed. Hinimum and maximum kapacity capacity range can be changed. Minimum and maximum kapacity
values as shown are measured from stator-to-stutor and are effective values as used when a coil is connected stator-to-stator with the rotor foating. Double bearing construction available ow request.

## SPECIFICATIONS

INSULATION: Moisture-proofed, low loss isolantite.
SHAFT: $1 / 4$ inch dianeter, brass, nickel plated.
PLATES: Aluminum, 0.020 inch thick, rounded edges.
MOUNTING: $3 / 8$ inch diameter panel mounting, or by trim-air mounting.
NOTE: All trim-gir hardware fits these units.

MIDWAY TRANSMITTING CAPACITORS

PI. 7030 with PL-5051 Mtg. Brackets
The Midway is ideal for low and medium power transmitters for portable mobile and aircraft equipment, due to its light weight, compart gize and extremely sturdy construction. Incorporating papator. eatures of the larger "X" type standard transmitting caparito

GENERAL SPECIFICATIONS:
CAPACITY CHARACTERISTICS: S.L.C.
CAPACITY CHARACTERISTICS: s.
FRAME: All aluminum end plates and tie
SHAFT: $1 /{ }^{\prime \prime}$ C.R. steel, cadmium pated. ${ }^{\text {P }}$. $025^{\prime \prime}$ aluminum. ()n sizes having airgap of $.070^{\prime \prime}$ or over, PLATES: $025^{\text {a }}$ aluminum.
BEARINGS: Brass, nickel plated shoulder type front bearing with ball thrust rear bearing.
INSULATION: Mycalex. MOUNTING: 3 point front panel mounting by with serews. Cardwell hex. posts. Two aluminum mounting leet with screvided instead,
 if so ordered. Type "M"
permit inverted mounting
permit inverted munting.

"N" TYPE TRANSMITTING

## CAPACITORS

Designed for medium power high frequency transmitters and short wave therapy apparatus, the Card well " $N$ " series maintains the customary high standard of Cardwell construction yet eliminates closed circuit loops completely.

## GENERAL SPECIFICATIONS:

CAPACITY CHARACTERISTIC: S.L.C
FRAME: Improved aluminum end plates support heavy lateral ceramic insulating bars which carry the stators.
SHAFT: $1 / 4$ " diameter cadmium plated steel.
PLATES: Aluminum, $040^{\prime \prime}$ thick, with rounded edges. PL-7105 has $.025^{\prime \prime}$ thick plates, buffed and polished edges.
BEARINGS: Cardwell shoulder type front bearing, with ball thrust rear bearings.
MOUNTING: Can be single hole mounted, or by three mounting posts and screws, to front panel. Chassis mounting on feet which form part of end plates, or use Cardwell "M" brackets, Cardwell part No. 301, for inverted mounting, for lowest stator-to-ground capacity.'

## THE ALLEN D. GARDWELL

## ELEGTRONIGS PRODUGTIONS GORP

## INSULATED COUPLINGS

Forisolating R.F. controls. Ceramic insulation (Alsimag No. 196). All flexible types have N.P. phosphor bronze springs, and heavy N.P. brass hubs, permanently swaged or spun riveted into the springs. Two fillister head, cup point. case hardened, steel set screws in earh hub insure positive lock to shaft.

All rigid types have improved threr-point-spider construction, carefully machined solid hrass castings, and are absolutely rigid.

Flexible types C, D, E and F fit both $1 / 4^{\prime \prime}$ diameter shat or a $3 / 8$ " shaft by removing bushing supplied.

## CME AHLEN D。 GARDMELL <br> ELECTRONICS PRODUCTIONS CORP.

## 40MG I. F. STRIP

BANDWIDTH: 3.75 mc (belween 6 db points) 3 I. F. stages plus crystal detector. SENSITIVITY: 70 micro-volts input to mixer grid for one volt output at second detector with zero bias.

TRAP REJECTIONS: 39.75 mc odjacent video at least 40 db .
41.25 mc accompanying sound of least 30 db .

47.25 mc adjacent sound af least 55 db .

PLATE SUPPLY: 150 volts.
FILAMENT SUPPLY: 6.3 (porallel).
CURRENT DRAIN: 28 ma of -3 volt bios.

Designed for use in monochrome T.V. receivers using inter-carrier sound systems, this I. F. strip is a compact "in-line" design featuring high gain and full band pass response. The complete unit can be pre-aligned and tested to customer specifications.

The laminate used for the chassis board and transformers has been especially designed for this application and has mechanical rigidity without be-
ing brittle. Transformer windings are etched on both sides of the laminate material. All laminate parts are protected with a special wax dip.

All tuning adjustments are above chassis through openings provided in the cans. Aluminum discs are threaded into center-tapped nylon inserts to provide accurate and reliable tuning.

## DESIGN IDEAS IN

## PHOTO WIRING

Quality at lowest price. Save labor, space, weight, cost.
Absolute uniformity throughout an entire production run. Selective soldering-our method prepares each circuit to accept solder only at selected points. One dip solder operation.

## PHOTO BLANKING

No dies or jigs, fast delivery, low costs. Ideal for short or long production runs. Frequent changes at very low costs. Intricate designs do not affect cost or delivery.

# JAMES MILHEN MALDEN 

## ONE INCH

INSTRUMENTATION OSCILLOSCOPE
Miniaturized, pockaged panel mounting cothode roy oscilloscope designed for use in instrumentation in ploce of he conventionol pointer "ype "moving coil meters uses the CPI ube. Ponel bezel matches in size ond type the standord $2^{\prime \prime}$ square meters. Magnitude, phase displacement, wave shope, etc. ore constontly visible on scope screen.
No. 90901 , less fube.................. $\$ 8$

## INSTRUMENT DIAL

The Na. 10030 is on extremely sturdy instrument type indicotor. Control shoft hos 1 to 1 rotio. Veeder type counter is direct reoding in 99 revolutions ond vernier scole permits reodings to 1 port in 100 of o single revolution. Hos built-in diol lock multi-revolution shansmitter cong. May be used with geor reduction mechanism for contral of froctional revalution capacitors, etc., in receivers or loboratory instruments. No. 10030

## GRID DIP METER

The No. 90651 MILIEN GRID DIP METER is compoet and completely self contained. The AC power supply is of the "transformer"" type. The drum diol has seven calibrated uniform length scales from 1.7 MC to 300 MC with generous over laps plus on arbitrary scole for use with special application inductors. Internol terminal strip permits battery operation for antenna measurement.
No. 90651 , with tube
Additional Inductors for Lower Frequencies
No. 46702- 925 to 2000 KC
No. 46703-500 to 1050 KC
No. 46704-325 to 800 KC
No. $46705-220$ to 350 KC

## LABORATORY SYNCHROSCOPES

The $5^{\prime \prime}$ laborotory synchroscopes are available with and withoul detector-video strips. Model P.4-2, with tubes. Model P-4E-2, with rubes

## MINIATURE SYNCHROSCOPE

The compact design of the No. 90952, meosuring only $71 / 2^{\prime \prime} \times 554^{\prime \prime} \times 13^{\prime \prime}$, and weighing only 17 lbs., makes available for the first time a truly DESIGNED FOR APPLICATION "field service" Synchroscope.
No. 90952 , with tubes . . . . . . . . . . . . . . \$

## CATHODE RAY OSCILLOSCOPES

The No. 90902 , No. 90903 and No. 90905 Rack Ponel Oscilloscopes, for two, three and five inch rubes, respectively, ore inexpensive bosic units ing confrols, sofety feofures, magnelic shielding, wwitches, etc. As a transmitter monitor, no oddi tionol equipment or accessories are required the well-known tropezoidal monitoring potterns ore secured by feeding moduloted corrier voltoge from a pickup loop directly to vertical plates of the cothode roy tube and audio modulating he 'o horizontal plates By the obdiliong valh ogits as swepp, pulse pene oudsilion such nits as sweeps, pulse generators, amplifiers, renienly on, nealy ren po d hily contried on tompanio rock panels, he orig on basceivabe unit may be expanded obaratory application.
No. 90902 , less tubes
No. 90903 , less tubes
No. 90905 , less tubes

## 'SCOPE AMPLIFIER - SWEEP UNIT

 Vertical and horizontal amplifiers olong with hard tube, saw tooth sweep generotor. Complete with power supply mounted on a standard $51 / 4^{\prime \prime}$ rock panel.No. 90921 , with tubes.
REGULATED POWER SUPPLIES A compact, uncased, regulated power supply, either for toble use in the laboratory or for in corporation as on integral pari of larger equip. ments. Regulated, unregulated, bios ond filament vol tages provided. Model 90201, less tubes . . . . . . . . . . . . . \$

90952

AMMES
(ल) $5 \frac{x^{2}}{2}$
MHLE $N$ MAS S A C H U SETYS

92101

STANDING WAVE RATIO BRIDGE The Millen S.W.R. bridge provides easy and in expensive measurement of standing wave rotio on antennas using co-ax cable. As assembled the bridge is set up for 52 ohm line. A calibrated 75 ohm resistor is mounted inside the case for sub stitution in the circuit when 75 ohm line is used. No. 90671

## PHASE-SHIFT NETWORK

A complete and laborotory aligned poir of phase shift networks in a single compatt $2^{\prime \prime} \times 17 / 6^{\prime \prime} \times 4$ case with characteristics so as to provide a phase shift between the two networks of $90^{\circ} \pm 1.3^{\circ}$ over a frequency range of 225 cycles to 2750 cycles. This unit is equally well adapted for use in either single sideband tronsmitting or receiving equipsingle When used in a suitably designed transmitte it is possible to obtoin o 40 db suppression of the unwanted sideband. The No, 75012 precision adjusted phose.shif! network makes possible the building of single sicieband equipment without the buldisity of complicated laboratory equipment for ecessiry of complicated laborctory equipment for network adjustment

## R''er MATCHING PREAMPLIFER

## The Millen 92101 is on electronic impedance

 motching device and a brood-bond preamplifier combined into a single unit, designed primorily for operation on 6 and 10 meters. Coils for 20 meter band also ovailable.No. 92101 , less tubes
50 WATT EXCITER-TRANSMITTER Modern design includes feotures and shielding for TVI reduction, bondswitching for 4-7-14-21-28 megacycle bonds, circuit metering. Conservotively rated for use either os o tronsmifter or exciter for high power PA stages. 5763 oscillator-buffer-multiplier and 6146 power amplifier. Rack mounted. No. 90801 , less tubes.

## VARIABLE FREQUENCY OSCILLATOR

The No. 9071 is a complete trans unit with 6SK7 temperature-compensated, electron coupled oscillotor of exceptionol stability and low drift, o $65 K 7$ brood-bond buffer or frequency doubler, a 6 A 67 tuned amplifier which tracks with the oscillator tuning, and a regulated power supply. Output sufficient 10 drive an 807 is availoble on 160,80 and 40 meters and reduced output is ovailoble on 20 meters. Since the output is isolated from the oscillator by two stoges, zero frequency shift occurs when the output lood is varied from open circuit to short circuit. The entire unit is unusually solidly builf so that no frequeney shifp occurs due to vibration. The keying is clean ond free from all annoying chirp, quick drift, jump, and similar difficulties often encounfered in keying variable trequency oscillotors. No. 90711 , with fubes.

## HIGH VOLTAGE POWER SUPPLY

The No. 90281 high voltoge power supply has a d.e. output of 700 valts, with maximum eurrent of 235 ma . In oddition, o.c. filament power of 6.3 volts at 4 amperes is atso ovoiloble so that this power supply is an ideal unit for use with tronsmittert, such as the Millen No. 90801, as well as genera! labordory purposes. The power supply uses two No, 816 rectifiers. The ponel is standard $81 / /^{\prime \prime} \times 19^{\prime \prime}$ rack mounting. No. 90281 , less tubes.

HIGH FREQUENCY RF AMPLIFIER A physically small unit copoble of a power outpul of 70 to 85 wotts on phone or 87 to 110 watts on C-W on $20,15,11,10,6$ or 2 meter amateur bands. Provision is mode for quick band shiff by means of the new No. 48000 series VHF plug-in coils. The No. 90811 unit uses either an 829-B or 3 E29.
No. 90811 with 10 meter bond coils, less tube.

## RF POWER AMPLIFIER

This 500 watt amplifier moy be used as the basis of o high power amateur transmitter. The No. 90881 RF power amplifier is wired for use with the populor " 812 A " tvpe lubes. Other popular tubes ma, the used. The omplifier is of unusuolly sturdy mechanical constructian, on o $101 / 2^{\prime \prime}$ relay rock ponel. Plug-in inductors ore furnished for operation on 10, 20, 40 or 80 mater amateur bands. The stondord Millen No. 90801 exciter unit is an ideal driver for the new No. 90881 RF power omplifier
No. 90881 , with one set of coils, but less
tubes

## JAMESEMMLIEN MALDEN-MASSACHUSETTS

The No. 10035 ifluminated panel dial has 12 to 1 ratio; size, $81 / 2^{\prime \prime} \times 61 / 2^{\prime \prime}$. Small No. 10039 has 8 to 1 ratio; size, $4^{\prime \prime} \times 3^{1 / 4^{\prime \prime}}$. Both ore of compact mechanical design, easy to mount and have totality self-rontained mechanism, thus eliminating back of pane inferference. Provision or mounting and tentiometers, ete., provided on the No. 10035 . Standard finish, either size, flat black ort metol. No. 10039 No. 10035

## WORM DRIVE UNIT

Cast aluminuin frame may be panel or bose mounted. Spring loaded split geors to minimize bock losh.
Standard ratio 16,1 . Also in $48 / 1$ on request. No. 10000 -(state ratio)

## DIALS AND KNOBS

Just a few of the many stock types of small dials and knobs ore illustrated herewith. 10007 is $15 / \mathrm{m}^{\prime \prime}$ diameter, 10009 is $21 / 2^{\prime \prime}$ and 10008 is $31 / 2^{2}$
No. 10002
No. 10008
No. 10008
No. 10009
No. 10015
No. 10015
No. 10018
No. 10021
No. 10065

## RIGHT ANGLE DRIVE

Extremely compoci, with provisions for many meth. ods of mounting. Ideol for operating potentiomelers, switches, etc., thot must be locoted, for short leads, in remote ports of chassis.
No. 10012

## HIGH VOLTAGE INSULATED

## SHAYT EXTENSION

No. 10061 shaft locks ond the No. 39023 insulated high voltoge potentiometer extension mountings are available os o single integrated unit- the No. 39024. The proper shaft length is independent of the ponel thickness. The stondord shaft hos provision for sciew driver odjustment. Spesiol shoft arrongemenis ore avoifoble for industrial opplicoions. Extension shaft and insuloted coupling ore molded os o single unit to provide accuracy of alignment ond ease of instollotion
No. 39023 , non locking type
No. 39024, locking type

## SHAFT LOCKS

n addition to the original No. "10060 ond No. 10061 "DESIGNED FOR APPLICATION" shaft locks we con also furnish such voriotions as the No. 10062 and No. 10063 for easy thumb operation os illusrated above. The No. 10061 instonily converts ony plain " $1 / 4$ shaff" volume control, condenser, etc. from "plain" to "shoft locked" type. Easy to mount in plase of regulor mounting nut.
No. 10060
No. 10061
No. 10062
No. 10063

## TRANSMISSION LINE PLUG

Aninexpensive, compact, and efficient polystyrene unit for use with the 300 ohm ribbon type poly ethylene transmission lines. Fits into standard Millen No. 33102 (crystal) socket. Pin spocing $1 / 2^{\prime \prime}$, diameter 095
No. 37412

## DIAL LOCK

Compoct, easy to mount, positive in action, does not alter dial setting in operationl Rotation of knob " $A$ " depresses finger " $B$ " and " $C$ " without imparting any rotary motion to Dial. Single hole mounted. No 10050.

#   

## TUBE SOCKETS

 DESIGNED FOR APPLICATIONMODERN SOCKETS for MODERN TUBES! Long Flashover poth to chassis permits use with transmitting tubes, 866 rectifiers, etc. Long leakage poth between contacts. Confocts are type proven by hundreds of millions already in government, commercial and broadcast service, to be extremely dependable. Sockets may be mounted either with or without metal flange. Mounts in standard size chassis hole. All types have barrier between contacts and chassis. All but actal and crystal sockets also have barriers between individual contacts in addition.
The No. 33888 shield is for use with the 33008 octal socket. By its use, the electrostatic isolation of the grid and plate circuits of single-ended metal tubes can be increasad to secure greoter stability and goin.

The 33087 tube clamp is easy to use, easy to install, effective in function. Available in special sizes for all types of tubes. Single hole mounting. Spring steel, cadmium ploted.

Covity Socket Contact Discs, 33446 ore for use with the "Lighthouse" ultra high frequency tube. This set consists of three different size unhardened beryllium copper multifinger contact discs. Hear treating instructions forwarded with each kit for hordening ofter spinning or forming to frequency requirements.

Voltage regulator dual contact bayonet socket 33991 black phenolic insulation and 33992 with low loss high leakage mica filled phenclic insulation.
No. 33004
No 33005.
No. 33006
No. 33007
No. 33008.
No. 33888
No. 33087
No. 33002.
No. 33102.
No. 33202.
No. 33302.
No. 33446*
No. 33991
No. 33992.

* For set of 3 . Single discs $\$ 0.00$ each.

## FLEXIBLE COUPLINGS

The No. 39000 series of Millen "Designed for Application" flexible coupling units include, in addition to impraved versions of the conventional types, also such exclusive original designs as the No. 39001 insulated universal joint and the No. 39006 "slide action" coupling (in bath steatite and bakelite insulation).
The No. 39006 "slide-actian" coupling permits longitudinal shaft motion, eccentric shaft motion and out-of-line operation, as well as angular drive without backlosh.
The No. 39005 is similar to the No. 3900 , but is not insulated and is designed for applications where relatively high forque is required. The steatife insulated No. 39001 has a special anti-backlash pivot and socket grip feature. All of the above ilustrated units are for $1 / 4^{\prime \prime}$ shaft and are stand ard production type units. The No. 39016 incorporates features which have long been desired in a flexible coupling. No Back Lash-Higher Flexibility-Higher Breakdown Voltage-Smaller Diameter-Shorter Length—Higher Alignment Accuracy-Higher Re sistance to Mechanienl Shock-Solid Insulating Barrier Diaphragm—Molded as a Single Unit. No. 39001
No. 39002
No. 39003.
No. 39005
No. 39006
No. 39016

## 04000 and 11000 SERIES TRANSMITTING CONDENSERS

A new member of the "Designed for Application" series of transmitting variable air capacitors is the 04000 series with peak voltage ratings of 3000,6000 , and 9000 volts. Right angle drive, 1-1 ratio. Adjustable drive shaft angle for either vertical or sloping ponels. Sturdy construction, thick, roundedged, polished aluminum plates with $13 / 4^{\prime \prime}$ radius. Constant impedance, heavy current, multiple finger rotor contactor of new design. Available in all normal capacities.
The 11000 series has $16 / 1$ ratio center drive and fixed angle drive shaft.

| Code | Volls | Capacity | Price |
| ---: | :---: | :---: | :---: |
| 11035 | 3000 | 35 | $\$$ |
| 11050 | 3000 | 50 |  |
| 11070 | 3000 | 70 |  |
| 04050 | 6000 | 50 |  |
| 04060 | 9000 | 60 |  |
| 04100 | 6000 | 90 |  |
| 04200 | 3000 | 205 |  |

## 12000 and 16000 SERIES TRANSMITTING CONDENSERS

Rigid heavy channeled aluminum end plates. Isolantite insulation, polished or plain edges. One piece rator contact spring and connection lug. Compact, easy to mount with connector lugs in convenient locations. Same plate sizes as 11000 series above.
The 16000 series has same plate sizes as 04000 series. Also has constant impedance, heavy currellt, multiple finger rotor contactor of new design. Both 12000 and 16000 series available in single and double sections and many capacities and plate spacing.

## THE 28000-29000 SERIES VARIABIE AIR CAPACITORS

"Designed for Application," double bearings, steatite end plates, cadmium or silver plated brass plates. Single or double section $.022^{\prime \prime}$ or $.066^{\prime \prime}$ air gop. End plate size: $19 / 16^{\prime \prime} \times 11 / 16^{\prime \prime}$. Rotor plate radius: $3 / 4^{\prime \prime}$. Shaft lock, rear shaft extension, special mounting brackets, etc., to meet your requirements. The 28000 series has semi-circular rotor plate shape. The 29000 series has approximately straight frequency line rotor plate shape. Prices quoted on request. Many stock sizes.

## NEUTRALIZING CAPACITOR

Designed originally for use in our own No. 90881 Power Amplifier, the No. 15011 disc neutralizing capacitor has such unique feafures as rigid channel frame, horizontol or vertical mounting, fine thread over-size lead screw with stop to prevent shorting and rotor lock. Heavy rounded-edged polished aluminum plates are $2^{\prime \prime}$ diameter. Glazed Steatite insulation.
No. 15011 \$

## THRU-BUSHING

Efficient, compact, easy to use and neat oppearing. Fits $1 / 4^{\prime \prime}$ hele in chassis. Held in place with a drop of solder or a "nick" from o crimping tool.
No. 32150

#  MALDENE:M ASSACHUSETTS 

## TRANSMITTING TANK COILS

A fult tine-all popular waltages for all bands. Send far special catalag sheet.

## TUNABLE COIL FORM

Standard actal base of low loss mica-filled bakelife, polystyrene $1 / 2^{\prime \prime}$ diameter coil form, heavy oluminum shield, iron tuning slug of high frequency type, suitable for use up to 35 mc . Adjusting serew protrudes through center hole of standard octal socket.
No. 74001, with iron core
\$
No. 74002 , less iron care

## RF CHOKES

Many have copied, few have equalled, and none have surpassed the genuine original design Millen Designed for Application series of midget RF Chokes. The more popular styles now in constant production are illustrated herewith. Special styles and variations to meet unusual requirements quickly furnished.
Figures 1 and 4 illustrate special types of RF chakes ovailable on order. The papular 34300 and 34200 series ore shown in figures 2 and 3 respectively.
General Specifications: $2.5 \mathrm{mH}, 250 \mathrm{~mA}$ for types $34100,34101,34102,34103$, 34104 , and $1 \mathrm{mH}, 300 \mathrm{~mA}$ for types 34105 , 34106, $34107,34108,34109$.

No. 34104

## MIDGET COIL FORMS

Made of low loss mica filled brown bakelite. Guide funnel makes for easy threoding of leads through pins.
No. 45000
No. 45004
No. 45005

## OCTAL BASE AND SHIELD

Low lass phenolic base with actul sacket plug and aluminum shield can $17 / 16 \times 1 / 1 \times 315 / 16$. No. 74400.

## I.F. TRANSFORMERS

The Millen "Designed for Application" line of I.F. tronsformers includes air condenser tuned, and permeability funed types for all applications. Standard stock units are for 456,1600 and 5000 kc .B.F.O.also ovailable.

## PERMEABILITY TUNED CERAMIC FORMS

In addition to the papular shielded plug-in perIn odility tuned forms, 74000 series, the 69040 searies of ceramic permeability funed unshielded forms are available as standard stack items. Windion are $13 / 2 \times 7 / 2$ for $69041-2 ; 1 / 4 \times 3 / 4$ for $69043-7-8$ $1 / 2 \times 11 / 6$ for $69045-6 ; 3 / 6 \times 3 / 16$ for 69044

## CERAMIC PLATE OR GRID CAPS

Soldering lug and contact one-piece. lug ears annealed and solder dipped to facilitate easy combination "mechanical plus soldered" connection of cable.
No. 36001-9/16'
No. 36002-3/8'
No. 36004-1/4'

## SNAP LOCK PLATE CAP

For Mobile, Industrial and other applications where tighter than normal grip with multiple finger $360^{\circ}$ low resistance contoct is required. Contact self-locking when cap is pressed into position. Insulated snap button at top releases contact grip for easy removal without damage to tube.
No. 36011-9/16"
No. 36012 - $3 / 8^{\prime \prime}$

## SAFETY TERMINAL

Combination high voltage terminal and thrubushing Tapered contact pin fits firmly into conical socket providing large area, low resistonce connection. Pin is swivel mounted in cap to prevent twisting of lead wire. No. 37001, Black or Red
No. 37501 , Low loss.

## TERMINAL STRIP

A sturdy four-terminal strip of molded black Textolite. Barriers between contacts. "Non turning" studs, threaded 8/32 each end. No. 37104

## POSTS, PLATES and PLUGS

Designed for Application! Compact, easy to use. Made in black and red regular bakelite as well as low loss brown mica filled bake. lite or steatite for R.F. uses. Posts have captive head.
No. 37202 Plotes (pr.).
\$
No. 37212 Plugs
No. 37222 Posts (pr.)

## STEATITE TERMINAL STRIPS

Terminal and lug are one piece. Lugs are Navy turret type and are free floating so as not to strain steatite during wide temperature variations. Easy to mount with series of round holes for integral chassis bushings.
No. 37302
No. 37303
No. 37304
No. 37305
No. 37306

## CATHODE RAY TUBE SHIELDS

For many yeors we hove specialized in the design and manufacture of mognetic metal shields of nicoloi and mumetat for cathode ray tubes in our awn complete equipment, os well as for applications of all other principal complete equipmen manufacturers. Stock types as well as special designs to customers' specifications promptly avoilable. No. 80045 -Nicoloi for 5BP I
Na. 80055-Nicolai for 5CP 1
Na. 80043-Nicoloi for 3" tube
No. 80042-Nicoloi for $2^{\prime \prime}$ tube

## BEZELS FOR

CATHODE RAY TUBES
Standard types ore of satin finish black plastic 5 size has neoprene support cushion and green lucite filter. $3^{\prime \prime}$ and $2^{\prime \prime}$ sazes have integat cushioning.
No. 80075-5
Ne. 80073-3
No. 80072-2
No. 80071 - 1

## MINIATUHIZEID

DESIGNED for APPLICATION miniaturized compo－ nents developed for use in our own equipment such as the 90901 Oscilloscope，are now available for separate sale． Many of these parts are similar in most details except size with their equivalents in our standard component parts group and in certain devices where complete miniaturiza－ tion is not paramount，a combination of standard and miniature eomponents may possibly he used to advantage． For convenience，we have also lisied on this page the ex－ tremely small sized coil forms from our standard catalogue． Additional miniature and sutminiature components are in process of design and will he announced shortly．

## Exciters, Modulators and Power Supplies

## EXCITER-TRANSMITTER

The 90Bul Exciter-Transmitter is of the most modern design including features and shielding for TVI reduction, band-switching for the 4-:-14-2i and 28 megacyele bands, circuit metering. Conservatively rated for use either as a transmitter or exciter. 5763 oscillator-buffer-nultiplier and 6146 power amplifier. 90 watts input for CW . Can be keyel in the oscillator and/or amplifier or by means of keyed external V.1:.). such as the 90711.67 watis input plone. Racs mosunted. 33/2" panel height.
No. 9cberl, lews tules.
$\$ 00.00$

## HIGH VOLTAGE POWER SUPPLY

The 90231 high voltage power supply has a d.c. output of 550 to 700 volts, with maximum current of 235 ma. In addition, a.c. filament power of 6.3 voits at 4 amperes is also a vailable. This power supply is an ideal unit for use with transmitters as well as general laboratory purposes. A single power supply will provide high voltage for both the 90841 Transmitter and the 90831 Modulator. Lses 2 816 mercury wapor rectifiers and incorporates a two section filter which resulte in excellent regulation and very low ripple. Racis mounted. $83 /{ }^{4}$ " panel height.
No. $902 \% 1$, less mubes.
. $\$ 00.00$

## MODULATOR

The $908: 310$ watt modulator designed espreciatly for use with 90 BOI transmitter. $121 \lambda 7$ speech amplifier-6C4 voltame amplifierclass AB1 6146's. Suitalle for modulating transmitters widi power input up to 80 watis. Gain is ample for the use of iow level, high impedlance erystal or dynamic microphmes. Frequency response is adjusted for good comnunication intelligibility with limited side bands. Modalator incorporates a switch for complete change-over of modulator and transmitier from CH to " $\mu$ hone. Rack mounted. 51/4" panel height.
No. 90831, kess tubes.
$\$ 00.00$

## LOW VoLTAGE POWER SUPPLY (not illustrated)

Tae 90201 is a compact uncased regulated and general purpose power supply either for talde use, in the laboratory or for incorpora tion as au integral part of karger equipments. It will provide modulator and exciter low voltage as well as bias and heater voltages when used with the 918001 and 90831. Its multiple outputa include 250 solt 125 ma. unregulated - 105 volt 35 ma. regulated-bias voltage to minus 1 (\%) volts -6.3 volt filament power at 4.2 amperes.
Model 90201, with tubes.

## LAIBDRAT(DRY IDELAY LINE STANDARDS

The Millen delay line kit effectively provides a means for the development and design engineer to eleek the affect nf varimus delays in their actual developte ental setups without the time loss and expense of producing sep.erate lines for each trial. Increased requirement for time delay circuits in radar, color telex ision and other moders clectronic appliostions has prosented a problem to the design and development enginerer as it has been both time consuming and expensive to oldtain delay lines for developmental work as each line was necessarily eut to the estimated delay and any change in requirements neressitated the fabrication of a new delay line. The Millen delay line kit is designed to provide a ready means of obtrining varinus defays from .10 microseconds through 2 microseconds in increments of 0.3 microseconds except at the extreme ends of this range. The lines may be used repeatedly without deterioration an they are harmetically sealed, the smaller lines in glaser tubes, the 1 mirenserond line in a metal container.

Actual delay as measured by phase shift method are marked on each delay line. 'The laboratory calibration of each dulay line is accorate to $\pm 0.002$ microseconds on all of the .10 mierosecond, .25 microsecond and .03 microsecond lines and $\pm 0.01$ microsecond on the 1 microsecond line. Combination of delay lines supplied makes possible the following delays:

| $0.10 \mu \mathrm{~s}$. | $0.55 \mu \mathrm{~s}$. | $1.10 \mu \mathrm{~s}$. | $1.55 \mu \mathrm{~s}$. |
| :--- | :--- | :--- | :--- |
| 0.20 | 0.60 | 1.20 | 1.60 |
| 0.25 | 0.65 | 1.25 | 1.85 |
| 0.30 | 0.70 | 1.30 | 1.70 |
| 0.35 | 0.75 | 1.35 | 1.75 |
| 0.40 | 0.80 | 1.40 | 1.80 |
| 0.45 | 0.90 | 1.50 | 2.00 |
| 0.50 | 1.00 |  |  |

Characteristic impedance - 1350 ohma $\pm 20 \%$.
PHYSICAL DIMENSIONS:
$0.1 \mu_{\mathrm{s} .}-15 / 32^{\prime \prime}$ dia. $\times 41 / \mathrm{s}^{\prime \prime}$ ong
0.25 us. - $15 / 32^{\prime \prime}$ dia. $\times 75 / 3^{\prime \prime}$ long
$0.30 \mu \mathrm{~s}$, $15 / 33^{\prime \prime}$ dia. $\times 75 / \mathrm{s}^{\prime \prime}$ long
$1.00 \mu \mathrm{~s} .-43 / 4^{\prime \prime} \times 43 /^{\prime \prime} \times 1$
All seven lines are mounted in a metal case $91 /^{\prime \prime} \times 5^{\prime \prime} \times 13 / 4^{\prime \prime}$ for convenience in storing and safety ia handling.

## "Designed for Application"

## Delay Lines and Networks

The James Millen Mfg. Co., Inc. has been producing continuous delay lines and lump constant delay networks since the origination of the demand for these components in pulse formation and other circuits requiring time delay. The most modern of these is the distributed constant delay line designed to comply with the most stringent electrical and mechanical requirements for military, commercial and laboratory equipment.

Millen distributed constant line is available as bulk line for laboratory use and in eitleer flexible or metallic hermetically sealed units adjusted to exact time delay for use in production equipment. Lump constant delay networks may be preferred for some specialized applications and can be furnished in open or hermetically sealed construction. The above illustrates several typical lines of both types. Our engineers are available to assist you in your delay line problems.

## 

## IJesigned for Application

## Mu Metal Shields

The James Millen Mfg. Co. Inc. has for many years specialized in the production of magnetic metal cathode ray tube shields for the entire electronics industry, supplying magnetic metal shields to manufacturing companies, laboralories and research organizations. Stock shields are inmediately available for all of the more popular sizes and types of cathode ray tubes as well as bezels for $2^{\prime \prime}, 3^{\prime \prime}$ and $5^{\prime \prime}$ size tubes.

Many production problems, howerer, make desirable special shiekls designed in conjunction with the specialized requirement of the basic apparatus. Herewith, are illustrated a number of such eustom built shields. Our custom design and fabrication department is at the service of our customers for the development and manufacture of magnetic metal shields of either nicoloi or mumetal for such specialized applications.

## Grid IIip Meters

Millen (irid Dip Meters are abalable to meet all varioum labmara tory and scricing requiremente
The 906e日 lodustrial Grid Dip Wetar eompletely ratibiated for laboratory use witl a ranze from 225 hr . to 30 ll mc . incorporates features dresired for buth industrial and laboratory application, inclading three wire prounding type power cord and suitable carrying case.
The Goforl ludustrial Crid Dip Veter is similar to the 90662 exeept for a redued ranke of $1 . \overline{8}$ to 300 mc . It likewige incorporates the three wire grounding type cord and metal carrying case.
'The 900. ${ }^{\prime}$ I standard Grid Dip Meter is a somewhat lers expensive version of the prid dip meter. 'T'se calibration while adequate for general nsage is not as complete as in the ease of ilie industrial model. It is supplied without grounding lead and without carrsing case. The range is 1.7 to 300 mc . Extra inductors available extends range to 220 hc .
'The Millon Grid Wip Weter is a calibrated stable RJ' omeillator unit with a meter to read gide enremt. The frequency determining coil is plusued into the unit oo that it may he used da a prolic.
These instruments are complete with a builtin transiormer type A. C. ;oner auply and interminal terminal board to provide connections for hattery operation where it is desirable to ase the unit on antenna measuremente and oller usages where A. .. power is
not a a alable. Compartoren hat been adiae ed without lone of werformance or consentence of usage. The intorperation of the power -umply. Decillator and prohe into a single ninit provides a ronsenient device for checking all types of circuits. The indecatink instrument is a standard 2 inch General filectric: instrument with an casy to read scale. The calibrated dial is a large $205^{\circ}$, Irum dial which provides seven direct reading scahes. phos an additional universal scale, all with the same lengtl and readability. Fath rance has its individual plugen probe completely enclosed in a contour fitting polystyrgie case for assurance of permancone of calibration as well at to prevent any possibility of mechanical damage or of unintentional contact with the components of the circuit being tested.

The Grid Dip Metars mas bo used as:

1. A Grid Hip ( $k$ ecillator
2. In Oscillatimg Inetector
3. ISignal Gomerator
4. An Indicatang Absorption VI aremeter
 ing frequency meter to determitse the resonant frequencies of de-cnergized tuned circuits.

## Midget Absorption Frequency Meters

Many amateurs and experimenters do not realize that one of the most useful "tools" of the commercicl transmitter designer is a series of very small absorption type frequency meters. These handy instruments can be poked into smail shield compartments, coil cans, corners of chassis, etc., to check hormonics; parasitics; oscillator-doubler, etc., tank turing; and a host of other such applications. Quickly enables the design engineer to find out what is really "going on" in a cicuit.

Types 90605 thw 90604 are extremely small and designed primarily for engineering laboratory use where they
will be handled with reasonable care. The most useful combinotion being the group of four under code No. 90600 and covering the total range of from 3.0 to 140 megacyeles. When purchased in sets of four under code No. 90600 a convenient carrying and storage case is included. Series 90601 are slightly lorger and very much more rugged. They cre further protected by a contour fitting transparent polystyrene case to protect against damage and dirt. This latter series is designed primarily for field use and are not quite as convenient for laboratory use as the 90605 thru 90608 types. All types have dials directly calibrated in frequency.

| Code | Description | Net Price |
| :---: | :---: | :---: |
| 90604 | Renge 180 to 210 mc . | \$ |
| 9060 | Renge 3.0 to 10 mac. |  |
| 90604 | Range 9.0 to 23 me. |  |
| 90607 | Range 23 to 60 mc . |  |
| $9000 \%$ | Renge 50 to 14.9 mc . |  |
| 90009 | Range 130 to 170 mc . |  |
| 9061 H1 | Renge 105 to : 50 mc . |  |
| $9061 \%$ | Renge 350 to 1000 kc . - Neon Indicator |  |
| $9062{ }^{6}$ | Range 150 to 350 kl. - - Neon Indicator |  |
| 90625 | Range 2 to 6 me .-Neon Indicatar |  |
| 90626. | Range 5.5 ta 15 mc .-Nean Indicatar |  |
| 9060 ${ }^{\text {H }}$ | Camplete set of 906045 thru 90608, in case |  |
| 90601 | Camplete set Field typ: Frequency Meters in metal carrying case 1.5 to 40 mic . |  |

## COMMUNICATIONS RECEIVERS

## The New <br> "HQ-140-X"

The "HQ-140-X" is a new superheterodyne type receiver that provides amateurs and other short wave listeners with all the advantages of modern professional design and circuitry. In addition, it incorporates those outstanding features that have made Hammarlund "HQ's" famous for quality and performance. This receiver retains the high degree of sensitivity and selectivity of the "HQ-129-X," and in addition features notably improved frequency stability and image ratio. It covers a continuous range of frequencies from 540 kc to 31 mc , or from 555 meters to 9.7 meters, in six bands.

Band spread tuning is supplied on the four higher frequency bands, with actual calibration in the 80 , $40,20,15$, and 10 meter amateur bands. Many types of noise and other interference have been substantially reduced by the outstanding noise limiter and the special Hammarlund patented crystal filter.

FEATURES
TUNING RANGES: $.54-1.32 \mathrm{mc}, 1.32-3.2 \mathrm{mc}, 3.2-5.7 \mathrm{mc}$, $5.7-10 \mathrm{mc}, 10-18 \mathrm{mc}$, and $18-31 \mathrm{mc}$.
CALABRATED BAND SPREAD: $3.5-4 \mathrm{mc}, 7-7.3 \mathrm{mc}, 14-14.4 \mathrm{mc}$, $20.9-21.6 \mathrm{mc}$, and $28-30 \mathrm{mc}$.
TUBE LINE-UP: 6C4 Oscillator, 6BA6 RF Amplifier, 6BE6 Mixer, GBA6 1st IF Amplifier, 6BA6 2nd IF Amplifier, 6BAG 3rd IF Ampli-' fier, 6AL5 combinotion detector, AVC and noise limiter, 12AU7 lst AF Amplifier and BFO, 6V6GT/G Audio Power Output, OC3/VR105 Voltage Regulator and 5U4G Full Wove Rectifier.

## The "SP-600-JX"

The "SP-600-JX" communications receiver, now also available to hams, is a masterpiece of receiver design and already is world-known for its outstanding construction and performance. This professional receiver, with its six bands covering the frequency spectrum from 540 kc to 54 mc , is being used in large quantities by the military and governmenial agencies, as well as by commercial services, for both single and diversity reception.
This magnificent receiver is a 20 tube dual conversion superheterodyne. The power supply is an integral part of the receiver chassis. Operation on any of six crystal controlled fixed frequency channels within the range of the receiver is immediately available. This designates it as the perfect receiver for point-to-point and network operations. Pre-arranged day and night fixed frequencies. With crystal control you can select your desired channels immediately.

Stability is .001 to .01 percent depending of frequency to whith receiver is tuned, image rejection is 80 db to 120 db down, ond spurious responses are of leost 100 db down. Sensitivity is 1 microvalt CW ond 2 microvolts $A M$, while selectivity for the three colibroted crystal and three non-crystal ranges is from 200 cycles to 13 kc . Radiation is negligible with no cross-tolk in multi-receiver instollations.

## Write HAMMARLUND for detailed information

## (H) HAMMARLUND

## "BFC" CAPACITORS

FEATURES-The 'BFC'" 'butterfly' type capacitar has very law minimum capacity, law inductance and isalated rotar far use in VHF applicatians as a series capacitor with na rotor cantact. Mechanical and electrical symmetry and statar terminal lacations minimize circuit inductance.
CONSTRUCTION—Brass ratars and statars are saldered and nickel-plated. The cantact wiper is heavily silver-plated beryllium-capper. Tapped studs an the silicane treated steatite frant panel permit maunting the capacitar withaut grounding the rotar. The sleeve type bearing is nickel-plated brass.
SPECIFICATIONS—Straight line capacity. $90^{\circ}$ ratatian fram minimum to maximum capacity positian. Air gap is $0.030^{\prime \prime}$ nominal. Tested af 1200 V. R.M.S., 60 eycles between ratar and each statar.

High Speed Ball-Bearing Madels Alsa Are Available

## "MAC" CAPACITORS

FEATURES - The "MAC" provides the law minimum capacity essential for use as a trimmer in the VHF range. It was engineered ta achieve the smallest dimensians practical to meet the requirements of a miniaturized campanent.
CONSTRUCTION—Its silicane treated steatite base is anly $3 / 4$ " $\times 5 / 8^{\prime \prime}$. Ratar and stator are soldered assemblies and are af brass, silver-plated. Ratar and statar terminals are pasitioned to permit single hole maunting.
SPECIFICATIONS—Straight line capacity. Screwdriver adiustment. Air gap is 0.017" nominal. Tested at 750 V. R.M.S., 60 cyeles.

## "FC" and "FNC" COUPLINGS

FEATURES—The 'FC-46-S' is on insulated flexible coupling designed to provide for mechanical ganging of shafts even though angularly misaligned. The smallest dimensions have been incorporated consistent with the rugged construction necessary for general service. A high degree of electrical isolation is achieved through the use of silicone treated steatite insulation. Flash-over valtage is approximately 5000 V . R.M.S. Brass hubs and spring temper phosphor bronze flexible arms are nickel plated. An exclusive and important feature of this coupling is its characteristic of uniform side-thrust through $360^{\circ}$ of rotation. This eliminates tendency to vibrate at high speeds, minimizes bearing wear and assures accurate tracking.

The "FNC-46-S" is a non-insulated coupling for use where electrical continuity between shafts is required. The flexible arms are held securely to a nickel plated brass ring instead of an insulator.

## STANDARD STOCK TYPES

CODE FC-46-5
CODE FNC-46-S

Insulated flexible coupling Non-insulated flexible coupling

THE HAMMARLUND MANUFACTURING COMPANY, INC.

## "APC" CAPACITORS

FEATURES-The "APC" trimmer capacitor originated by Hammarlund over twenty years ago is still widely recognized as the standard capacitor of its type. Its use is indicated in all classes of equipment where a compact, high quality air dielectric trimmer is required. It was designed to resist effects of temperature, moisture and vibration. Silicone treated steatite insulation is used to insure high leakage resistance.

CONSTRUCTION—Brass rotor and stator plates are soldered to brass supports. Nickelplated phosphor bronze wiper assures positive rotor contact. All metal parts are nickelplated. Terminals are hottin dipped. Tapped brass mounting studs fastened to silicone treated steatite base permit mounting capacitor without grounding the rotor.

| CODE | CAPACITY |  | PLATES |
| :---: | :---: | :---: | :---: |
|  | Max. | Min. |  |
| APC-25 | 25. | 3.0 | 7 |
| APC-50 | 50. | 3.9 | 14 |
| APC-75 | 75. | 4.6 | 20 |
| APC-100 | 100. | 5.5 | 27 |
| APC-140 | 140. | 6.7 | 37 |

SPECIFICATIONS-Straight line capacity characteristic. Hexagonal collar on slotted shaft permits rotor adjustinents to be made with wrench or screwdriver. Air Gap is $0.015^{\text {" }}$ nominal. Tested at 600 V. R.M.S., 60 cycles.

## "MAPC" CAPACITORS

FEATURES-The "MAPC" capacitor is representative of Hammarlund's efforts to meet the demand for smaller dependable components. It is a scaled-down version of the popular "APC" with everything reduced except the quality and performance characteristics. For example, an "MAPC" is about half the size and weight of an "APC." Lower minimum capacities and low inductance make the "MAPC" suitable for VHF use.
CONSTRUCTION—The standard "APC" construction is used in this capacitor. Rotors and stetors are fabricated by soldering brass plates to supporting members and nickelplating the assemblies. Nickel-plated phosphor bronze wiper assures positive rotor contact. Tapped brass mounting studs fastened to silicone treated steatite base permit mounting capacitor without grounding rotor.

| CODE | CAPACITY |  | PLATES |

| MAPC-75 | 75. | 3.9 | 29 |
| MAPC-100 | 100 | 4.5 | 38 |

SPECIFICATIONS—Strcight line capacity. Screwdriver or socke $\dagger$ wrench adjustment. Air gap is $0.0135^{\prime \prime}$ nominal. Tested at 600 V , R.M.S., 60 cycles.

## "NZ-10" CAPACITORS

FEATURES-The "NZ-10" is a compact transmitter neutralizing capacitor designed far easy and accurate adiustment. The rotor is attached to a fine-thread lead serew which may be adjusted with smooth and precise action by a screwdriver and locked securely by a readily accessible clamping screw. A stop prevents shorting of plates at maximum capacity. Long leakage paths to ground fram both rotor and stator are provided. Giazed steatite insulators and smoothly rounded aluminum plates minimize flashover.

SPECIFICATIONS_Capacity is adjustable from 2.3 to 10 mmf . Peak voltage rating is 3000 V . at maximum capacity (minimum gap) position.

Write for the new HAMMARLUND Capacitor Catalog

## (IF HAMMABLUMD

SPECIFICATIONS-Straight line capacify. Single spaced types $\left[\mathrm{HF}\right.$ ard HFD) have $0.015^{14}$ air gap and are tested at 600 V. R.M.S., 60 cycles. Wide spaced types (HF-X and HFD-X) have $0.045^{\prime \prime}$ air gap and are tested at 1400 V. R.M.S., 6E cycles.

SPECIFICATIONS-Straight line capacify. Air gaps and test volfages are as indicated in table. However, "HFBD" breakdown voltages are doubled and capacitance values edpproximately halved when stator sections are connected in series.

## "HF" and "HFD" CAPACITORS

SINGLE SECTION CAPACITOR-The "HF" is a single section tuning capacitar employing "APC" rotor and statar design. Extra lang sleeve bearing and positive contact nickel-plated phosphor-bronze wiper make this unit ideally suited to high frequency applications. Silicone treated steatite insulation. Single hole or base mounting.

DOUBLE SECTION CAPACITOR—The "HFD" dual capacitor, like the "HF" singles, incorporate advanced features praviding for maximum efficiency at high frequency. Aluminum front and rear end panels are mounted on a heavy silicone treated steatite base. Wide front and rear bearings with individual silver-plated beryllium-copper wipers for each section assure lang life and maximum contact efficiency. Single hole panel mount or base mounting.

D-Split stator
X-Wide-Spaced

## "HFA" and "HFBD" CAPACITORS

SINGLE SECTION CAPACITOR-The "HFA" is a single section tuning capacitor similar to "HF" except that larger plates permit wider air-gaps for the same capacitance values. Resultant higher break-down ratings extend the use of the capacitor into the high frequency low-power transmitter field. A threaded sleeve bearing permits single hole mounting and the bracket supplied may be used for base mounting. A lug type terminal soldered to the bearing provides an efficient rotor connection.
DOUBLE SECTION CAPACITOR-The "HFBD" is a dual, balanced rotor transmitting capacitor employing front and rear panels plus a ball-thrust rear bearing, but otherwise incarporating constructional features identical to the smaller "HFA." An insulated shaft extension safeguards operating persannel from the high voltages which may be applied to the rotor. The small size, rugged construction, balanced rotor and range of capacitance values and breakdown valtages make this capacitor ideally suited ta many applications.

## THE HAMMARLUND MANUFACTURING COMPANY, INC.

# (H) HAMMARLUND 

## "MC" and "MCD" CAPACITORS

FEATURES-The "MC" is a versatile single section tuning capacitor designed to give a choice of mountings, connections and copacity characteristics. "MC-S" capacitors have a stroight line capacity charocteristic. " $M C-M$ " units have offset plates resulting in a "Midline" characteristic which more equally spaces frequencies. "MC-X" units are widespaced for high voltages. The "MCD" is a split-stator panel-mounted capacitor.
SPECIFICATIONS—Straight line or "Midline" capacity characteristic. Single-spaced types have $0.0245^{\prime \prime}$ nominal air gap and are tested at 1000 V. R.M.S., 60 cycles. Wide-spaced ('X') types have $0.0715^{\prime \prime}$ nominal air gap and are tested of 1750 V. R.M.S., 60 cycles.

## "RMC" CAPACITORS

FEATURES-The "RMC" was designed specifically for applications requiring an "MC" type tuning capacitor with very rigid construction. Its sturdy frame consists of heavy gauge aluminum end panels held together by three aluminum tie rods. It has a bross sleeve front bearing and a single ball thrust rear bearing for smooth tuning and a high degree of resetability. The rotor contact is a forked silver-plated beryllium-copper spring wiping against a wide disc on the rotor.
SPECIFICATIONS—Straight line capacity. Air gap is 0.0245" nominal.

| RMC-325-S | 327. | 17.5 | 43 |

## "VU" CAPACITORS

FEATURES-The "VU" is a uniquely designed UHF tuning capacitor using completely original concepts. With it, conventional "lumped constant" circuits, rather than tuned cavity techniques, can be efficiently used up to 500 megacycles. In addition to employing the capacitor sections in series to eliminate the rotor wiper, the design also utilizes Pyrex balls to form precision bearings and to completely isolate the rotor. Thus, noise generated by rubbing metal-to-metal contacts and variable resistance paths in the bearings have been totally eliminated. Circuit connections are made to threaded studs on each stator. This permits vacuum tube and inductor to be mounted adjacent to and on opposite sides of the capacitor to minimize circuit inductance.

| CODE | SERIES CAPACITY |  | PLATES/ |
| :---: | :---: | :---: | :---: |
|  | Ef. | Min. | SECTION |
| VU-20 | 22.5 | 3.35 | 11 |
| VU-30 | 31.5 | 3.5 | 15 |
| VU-45 | 45.0 | 3.8 | 21 |

SPECIFICATIONS-The capacity characteristir approaches a straight line frequency curve as indicated by nominal values in table at left. Air gap is $0168^{\prime \prime}$ norsinal. Tested at 700 V. R.M.S., 60 cycles, between rotor and each stator.

## DELUXE <br> RELAY RACKS

These relay racks are made of 16 gauge steel with $1 / s^{\prime \prime}$ panel mounting supports. The panel mounting supports are recessed so that no edges of the panel will be exposed.

The front and back of the top, the two sides and the door are well louvered to provide adequate ventilation. The door is hung on sturdy. loose joint hinges; it is held closed by two attractive aluminum die cast plunger type snap action catches. A streamlined appearance is achieved by the use of rounded corners and red lined chrome trim. This relay rack is shipped knocked down and complete with all necessary hardware for assembly. All standard 19" panels will fit these racks.

A SPECIAL FEATURE IS THE USE OF FOUR STURDY SUPPORTS IN THE BOTTOM, SO THAT CASTERS CAN BE FASTENED DIRECTLY TO THE BASE. THEREBY ACHIEVING READY MOBILITY.

Bud RC-7756 casters will fit this unit. The casters are not included in the price of the cabinet. These relay racks are supplied in either black or grey wrinkle finish, or light grey hammered finish. Use suffix letter " $B$ " for black wrinkle finish. Use suffix letter "G" for grey wrinkle finish. Use suffix letters "HG" for light grey hammered finish.

## ADD-A-RACK SERIES

It always has been necessury to buy special racks with out louvers on one side to obtain maximum interio space with minimum of floor space. Now, you no epace when entire new cabinet when you want additional space. When multiple rack units are want ad we not only offer additional racks at a lower required, we not Only Add-A-Rack series can accomplish this savings.

Illnstration $A$ shows the two Add-A-Rack cabinets assembled together. Illustration $B$ shows the unique and ingenious method of adding a unit to your present equipment. Instead of buying an entirely new outht you purchase, as a unit, four parts: 1. The door, 2. the top, 3. the bottom, 4. an Add-A-Rack Coupling Unit The right ar left side of your present relay rack is removed and replaced by the Add-A-Rack Coupling Unit. Next, the top and bottom are fastened into place The side taken from the first rack is then fastened onto the second rack. Place the additional door into position and you now have two racks, properly and efficiently coupled together. In the same simple way, more racks can be gided at any time. Every one will be in a continuous one piece assembly.

This series is available in two ways. The first is a double unit consisting of a rack and a rack conpling unit. The second is an Add-A-Rack unit consisting of a door, a top, a botton and an Add-A-Rack coupling unit. Thes units are furnished with all necessary assembly and panel mounting hard ware. The same fine feature of the sturdy supports on the bottom for direct affixing of casters is present on the model.

CABINET RACKS-RELAY RACKS

## DELUXE CABINET RACKS

These cabinet racks are so made that a professional appearance is given. They are ideal for commercial broadcast stations, for amateur transmitters, for sound equipment or test equipment.

The five larger sizes have a hinged rear door, whale the smaller sizes have the welded panel in the rear.

No other manufacturer has the wide variety of sizes that are included in the Bud line of deluxe cabinet racks.
Adequate ventilation is assured by means of louvered sides and a $2^{\prime \prime}$ opening in the bottom of the back, which extends the entire width of the cabinet. "No scratch" extended metal feet are embossed on the bottom to minimize marring of the table top or any other equipment that this is placed on.

Specify a suffix " $E$ " when black wrinkle is desired, the suffix " $G$ " when grey wrinkle is desired, or the suffix "HG" when light grey hammered is desired.

## Telephone Type Relay Racks

Catalog Nos. RR-1263 and RR1264 are made of $1 / \mathbf{N}^{\prime \prime}$ steel channels, three inches deep, with cross bars of the same thickness. The design of the base has been improved to incorporate a chassis type bottom, together with the usual side together with the usual side angles, making this rack ex-
ceptionally strong and stable.

Holes are provided in the base to accommodate Bud RC-7756 casters. Depth $22^{\prime \prime}$. F'inish black wrinkle only.

The RR-1265 is a heavy duty rack, suitable for broadcast stations and other commercial installations, where it is desired that exceptionally sturdy construction be utilized. The usual manner of installation is to bolt this unit to the floor.
To emphasize the heavy duty construction, it is necessary to realize that the base is made of two angles $4^{\prime \prime} \times 6^{\prime \prime} \times b / 16^{\prime \prime}, 20 \% 8^{\prime \prime}$ long. The channels are $7 \$ 1 / 2^{\prime \prime}$ long and made of $3^{\prime \prime} x 1 \%{ }^{\prime \prime}$ iron channel. The two supporting cross bars are made of $5 / 16^{\prime \prime} \times 2^{\prime \prime}$ steel. Depth $15^{\prime \prime}$. Fínish כlack wrinkle only.
Any of the panel chassis shown on page J-45 or the standard relay rack panels shown on page $J-44$ can be used with these racks.

| RR-1265 | 721/2" | $661 / 2^{\prime \prime}$ | 100 | 44.40 |

## JUNIOR CABINET RACKS

This cabinet rack is a multi-purpose unit that is attractive, and useful and inexpensive. The cabinet is constructed to accommodate two panels: one panel is $101^{\prime \prime} \times 18-5 / 16^{\prime \prime}$ and the other is $83^{\prime \prime} \times 18-\overline{6} / 16^{\prime \prime}$. These panels are supplied with the cabinet. The Bud Junior Cabinet Rack is spacious enough to accommodate a chassis up to $10^{\prime \prime} \times 17^{\prime \prime}$.
The rear of the cabinet is covered by a hinged door with a locking device. The cabinet is finished in black wrinkle finish only.

| Catalog No. | Shipping Weight Pounds | Dlr. Cost |

## CHASSIS SUPPORTING ANGLES

Where heavy weights are encountered in chassis construction, the Bud Chassis Supporting Angles will distribute the weight on the sides of the racks to relieve the panel. The angles are made in two sizes from steel $1 / k^{\prime \prime}$ thick and are finished in black enamel only. The drawing shown around the chassis supporting angles in the picture which accompanies this is intendet to show the manner in which the chassis will be supported by these angles. Sold in pairs only.

[^28]CHASSIS MOUNTING；BRACLETS

Mounting brackets are essen－ tial to insure proper support of chassis．These brackets are formed of heary gauge steel eut away at the bottom to provide chassis clearance so that the －hassis can be mounted flush against the panel．Finished in black enamel only．Chassis mounting bracket Nos．Mi3－50 and MB－451 are designed for a chassis height of $4^{\prime \prime}$ ．These units are sold in pairs only．

## ENCLOSED METER PANEL

This meter panel is designed o give maximum protection to any meter．The steel panel has a large cut－out behind which is mounted a hlank masonite sub－panel．This sub－panel has a meter mounting arra of 4 ce $x$ $151<"$ ．This is sufficient space to mount four $3^{\prime \prime}$ meters．The meters are protected by a glass insert that mounts in slides．Due to the danger of breakage in shipment．the glass is not supplied with the panel．The $y$ lass insert shoutd be cut $16^{\prime \prime}$ long $\mathrm{x}^{4}{ }^{\prime}{ }^{\prime \prime}$＂wide． Finished in either black wrinkle grey wrinkle or lisht wrey hammered enamel dinish．Please be sure to specify the proper suffix when ordering．

## METER PANELS

All meter panels are made of以＂thick steel．The small holes will fit either a $2^{\prime \prime}$ square or round meter．The large holes will fit either a $3^{\prime \prime}$ square or round meter．If black wrinkle finish is desired，specify by use of suffix＂13＂，grey wrinkle finish by use of sulfix＂G＂and light grey hammered finish ly use of sultix＂HG；

## ALUMINUM CHASSIS

The construction and design of these chassis are exactly the same as that of our steel chassis bases． The aluminum chassis are welded on Government approved spot welders that are the same as those used in the welding of aluminum aircraft parts．As a result you can deprad on Bud Aluminum Chassis to do a perfect job and to stand up onder all conditions
1＇lease note that the gauges shown in the table are aluminum gauges．These chassis are supplied in an etched aluminum finish．

## OPEN END CHASSIS

These are primarily intended to be used with the various styles and sizes of Bud Metal Cabinets. These chassis are ideal for any type of small built-up units such as record amplifier, code oscillator, etc. From this you can see that there is a wide variety of applications. additional strength. The finish is electro-zinc plated.

## miniature aluminum chassis

These small, open end aluminum chassis are the answer for miniature tube applications or sub-assemblies. They are made of hard aluminum with $1 / 4^{\prime \prime}$ flanges on the bottom allowing the chassis to be fastened down, or allowing a bottom plate to be attached. They are extremely useful for a wide variety of applications such as small receivers, narrow band $F M$ adapters or any place where the space is limited. The finish is etched aluminum.

## AMILIFIER FOUNDATIONS

This standard Bud Amplifier Foundation consists of a regular chassis on which is attached a perforated metal cover providing all that you require in ventila tion. Easy grip handes attached furnished in black wrinkle finish only.

## Box SHIELDS

These shields have many uses: shielding power transformers and chokes: covering and protecting various other components in power supplies, transmitters, receivers and other electronic units. The top and the sides are one piece steel. BS-1244 has perforated teel ends for ventilation. BS-1891 has solid ends. Flanges at the bottom provide for mounting. These units are finished in black wrinkle enamel only.

| Catalog No. | Ends | Actual Weight lbs. | Dealer Cost |
| :--- | :---: | :---: | :---: |
| $185-124.1$ | Ventilated | 1 | $\$ 2.33$ |
| $1 B-1891$ | Solid | $11 / 2$ | 1.65 |

Only a few of many BUD Producta are shown. For complete catalog.
urite BUD RADIO. INC., 2118 E. 55th St., Cleveland, Ohio

## INSTRUMENT and RECEIVER CABINETS

Each cabinet has an evenly recessed hinge cover with convenient finger lift. The panel in the front of the cabinet is in the front of the cabinet attached with self tapreadily attached with self tapping screws. Louvers provide satisfactory ventilation. For chassis to fit these cabinets, see the open end chassis listed on page J-46. Finished in black
wrinkle enamel only. wrinkle enamel only.

STREAMLINED SCOPE and UTILITY

CABINETS
These are attractive cabinets that are adaptable to a variety of uses. All cabinets are supplied with chassis. Chassis height on all except CU-1991 and CU-1992 is $11 / 2$. CU-1991 is designed for $3^{\prime \prime}$ cathode ray tube and has a hinged cover to provide easy access to tube and other components. The chassis height is $2^{\prime \prime}$. CU-1992 is designed for a $5^{\prime \prime}$ cathode ray tube and alsa has a hinsed cover. Chassis height $3^{\prime \prime}$.

CARRYING CASES
These carrying cases have many uses. An easy grip handle is fastened to the top. Front and back panels are removable. Welded construction assures maximum strength where needed, and this unit is also available in aluminum to provide minimum weight where required for portable work, For chassis to fit these cabinets, see the chassis decks on page J-45. Prefix "CC" represents steel construction. Prefix "ACC" represents aluminum construction with etched finish.

## MINIATURE UTILITY CABINETS

(With Attached Chassis)

A long sought for item has been a small cabinet with a chassis attached to the front panel. This is indispensable for building electronic devices using miniature tubes or transistors. Front and rear panels are removable and fastened with self tapping screws that permit easy accessibility. Finished in black wrinkle enamel only.

## SLOIPING PANEL UTILITY BOXES

The sloping panel utility box offers a streamlined appearance and enough space to house conveniendly a two or three miniature tube amplifier or gadget. A :" flange around the rear opening of the cabinet provides convenient back cover mounting. Fxtremely compact, it will accommodate a Bud Miniature Aluminum Chassis. Finished in black wrinkle cname only.

| Catalor No. | Width | Use Chassis No. | Actual Weisht lbs. | Deale. Cost |
| :---: | :---: | :---: | :---: | :---: |

## TRUCK CASTERS

No. RC-T756 Heavy Duty type casters are recommended for our Deluxe Relay Racks and where weights of 400 lbs. or less are to be distributed on four casters. No. RC-7757 easters are light duty and are recommended for lighter weight. The wheels are high grarle, hard rubber composition and ball bearing type.

## HANDY BOXES

The design of the Handy Box permits a large number of small components to be easily wired or serviced. The cover is held by four self or serviced. The cover is held gauge steel and is furnished in black wrinkle finish only.

| Catalog |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |

## MINIBOXES

There are thousands of uses in the field
of radio and electronics for these boxes. They are made of high quality aluminum. The design of the box permits installation of more components than would be possible in the more conventionally designed box of the same size. Construction is of the two piece type. each half forming three sides. The flange type construction asures aricquate shidding. These units arc available in either etcher aluminum finish or wrey hammertone finish.

## METER CASES

Designed for all applications requiring a modern nieter case. All cases have a sloping ront wher the corner rounded. Meter No. CM-1241 and CM-1242 have insulators on the top for leads to the meter. CM-1965 and CM-1966 are furnished without insulators. These steel innits are finished in black wrinkle enamel only.
Also available are our nev-aluminum meter cases, prefixed by the letters CMA. as shown in the table below, These units bre the same size and design as the steel meter cases, but are especially suitable for use when a case that will have no magnetic effect on meter is required. No insulators furnished These casec etched aluminum finish.

| Catalog | Hole |  |  |

SPECLAL SHEET METAL PABRICATION

Now, Bud Radio, through its Metal Products Division, offers greatly increased facilities for the production of special sheet metal items. New machinery has been added, departments have been modernized and streamlined, and new methods have been developed.

We make over four hundred different sheet metal products as stock items, which are illustrated elsewhere in this catalog. Often a slight change in one of our standard items will eliminate the necessity of special tools and dies, thereby reducing costs greatly. Since we produce thousands of sheet metal products, every month, for ourselves and for leading firms throughout the country, we are able to
effect economies in production which mean lower prices and faster delivery.

Our expanded facilities, expert workmanship, years of experience and manufacturing "know how" assure high quality products. In addition, our Engineering Staff is always available for consultation and advice. We suggest that you send us your blueprints for estimate.

Whether the quantity be one, ten, one hundred, one thousard or many thousands, we are interested in the opportunity to be of service to you.

Illustrated on this page are a few examples of specially fabricated sheet metal products.

Only a fen of many Hull Producin are ahonn. For romplete catalog.

## bUD CODE PRACTICE OSCILLATOR AND MONITOR CPO.128A

The BUD CODEMASTER is a real money-saver. No longer do you have to consider your code practice oscillator useless after you have learned the useless after you have learned the
code. A flip of the switch and you code. A flp of the switch and you really versatile instrument. It has a $4^{\prime \prime}$ built-in permanent magnetic dymamic speaker and will operate up to twenty earphones. 2 tubes- 50 C 5 and 35 W 4 .

A volume control, and pitch control permit adjustments to suit individual requirements.

Any number of keys can be connected in parallel to the oscillator for group practice.
This unit will operate on 110 volts A.C. or D.C. An external speaker may be plugged in without the use of an output and all wide and $31 / 2$ " deep the rear. The units is $61 / 2 "$ high, $51 / 2^{\prime \prime}$ wtde and $31 / 2 "$ deop. It is finished in Grey Hammertone
enamel with red lettering. Catalog No.
CPO-128A
Dealer Cost $\$ 15.75$

HTtER CONDENSER-single section BUD GIANT TRANSMITTER CONframe consisting of $3 / 16^{\prime \prime}$ thick a sturdy frame consisting of $3 / 16$ "thick alumidiameter duraluminum rods. Formed hrackets at top and bottom of end plates provide for mounting these units, and permit placing of associnted inductances directly on the condenser. Rontor and stator plates are ac.
curately stamped frona $0.064^{\prime \prime}$ thick highly polished aluminum with all edges rounded to minimize corona loss and danger of peak-voltage flash-over. The plates are separated by aceurately machined duraluminum spacers of the condenser.

The large two-f
The large two-finger rotor-contact spring, made from plated sping brass, assures positive contact with noise-free operation. the electrostatic field to keep dielectric are placed well outside the electrostatic field to keep dielectric losses at a minimum.

## IBUD FREQUENCY CALIBAATOR FCC.9OA

To comply with federal regulations, some means of accurately checking transmitter frequency must be available at every "ham" station. The BUD FCC-90A consists of a 100 kc . crystal oscillator that is Completely Self-Powered and has 2 tubes. It will give 100 kc . check points on all bands up to 30 megacycles. This enables the operator to determine exact band edges.
No extra wiring is required to install this unit. Plug the FCC-90A into a 110 volt receptacle, connect the piek-up lead to the antenna binding post of the receiver and the unit is ready for operation. An ON-OFF switch and a STANDBY switch are provided.
$\underset{\text { Catalog No. }}{\text { COM }}$

## BUD NEUTRAIIZING AND HIGH

 his line of condensers will thl every neutralizing and high frequency tuning requirement that modern circuits pose. The two-pillar construction makes this unit unusually sturdy and eliminates any possibinty of capacie varjaton due to vibration. by means of it is permanently locked in any position, by the lop-nut provided Any loose position is take up a special nut and locked to give smooth operation. Plates have rounded edges. Steatite insulation is used.

BUD TINY MITE DUAL CONDENSERS The construction of these units is similar to the regular Tiny Mite Tuning Condensers. The two end pieces are held together frmly with two tie-rods.
A separate round plate is soldered on rotor rod to shield the two stator sections. Large surface front and rear sleeve bearings, provide smooth rotation.

L.ATMCE WOUNII R. F. CHOKES For all general purpose applications requiring a high quality choke nt a rensonable price, this line finds wide acceptance. Each choke is wound from silk-rovered cnameled copper wire on a white reramis bobhin. Leads are terminated with two convenient soldering lugs. Chokes can be monnted with a 6-32 screw through the center of the form. and each winding is thoroughly impregnated against noisture. The wide range of sizes fills practically every choke refuirement in standard radio circuits Choke base diam. $1-1 / 16^{\prime \prime}$. distance between ends of leads $15 /{ }^{\prime \prime}$

## THANSMHTVING CHOKES

Here are two heavy duty $F$. $F$. Chokes that can really tike it in high powered transinitter plate circuits. Wach choke is wound on $9 / 16$ " dia. Steatite rod. has comection lugs and a mounting foot. prevents moisture absorption und enubles them to withatand momentary overlonds without collapsing the individual pies.
Consists of flyo graduated pies wound in continuous winding. Care has bern taken to prevent any of thu pies from being resonant on an anateur mund and to keep the distributed capacity at a minimum. Overnll helght $31 / 4{ }^{\prime \prime}$

| Catalog |  | Current | 1. $C$ | Dealer |
| :---: | :---: | :---: | :---: | :---: |
| Number. | Inductance | Capacity | Resistance | Cost |

ULTRA HIGH FREQUENCY R, F. CHOKES
 These chokes were designed to meet the requirements of builders of high frequency receivers and transmitters. Consists of ceramic rod With a single layer winding terminated
with strap leads at each cnd. particularly suitable for use on 2 or 6 meters. CH-570 is supplicd with a hounting foot and is sometimes used as a nlament choke in certain types of high frequency oscillator and amplifier circuits.

## HE WOUND K. F. CHOKES

Each choke has a continuous winding of sllk covered enameled copper wire and the pies constituting this winding are wound on a $1 / 4$ " diameter ceramic core. Chokes are made with both strap and wire leads. The CH-876 is a heavy duty choke intended for circuits, such as transmitter plate cirents, where high cur, overall length of $11 / 2^{\prime \prime}$.

HE IT HADMATRG, PIATE AVO GRID THBE

Bud heat radiating conmedors fit all sizes of industrial Rnd transmitting wountu tubes. Thesc connectors serve a dual pur pose, not only are they uspfol to nake connertions to plate or grid terminals, bit they provide a lirge heat radiating surface that will dissipate heat from the glass seal and tube clement, Fight sizes fit all grid and plate leads and also provide suffi cient heat radiation for any tube operating in the range of 50 to 2000 watts. All radiators are machined from spocial alumi num rod. Edges are rounded to niminize corona loss.

Table below lists Connectors to fit varlous Tubes

## Ferrite Rod Loop Antenna

The electrical characteristics of this newly developed type Ferrite Rod Loop Antenna make possible a generol replocement loop that offers out stonding performance. Reception of distont stotions will be improved to the extent that no antenno or ground will be required, and on local stotions much better reception will be insured. The Loop Rod Antenna hos an odiustoble induc. tonce which mokes it possible to peak the antenna stage by merely sliding the coil olong the ferrite rod; this olso enables it to be used with a variety of funing condensers.

TV Appliance Filter

These filters are designed to eliminate radio interference caused by horizantal oscillators in T.V. receivers and small electrical appliances such as sewing machines, vacuum cleaners, food mixers, and other similar devices requiring less than 550 watts. Inductive capacitive circuit assures maximum aftenuation of interference. Dimensians: $21 / 4^{\prime \prime}$ square $\times 4^{\prime \prime}$ long.

Coils and components shown in MEISSNER catalog, and transformers, chokes, etc. shown in the new companion THORDARSON catalog, are also listed in SAM's "Photofacts" and "Counterfacts."

Brand new THORDARSON-MEISSNER COMBINED T. V. REPLACEMENT GUIDE available free on request, shows correct replacement on about 6000 different T. V. sets. Covers: Horizontal syncs . . . deflection yokes . . . vertical outputs . . . ratio detector \& discriminator coils . . . chokes . . . I. F.'s . . . peaking coils . . . flybacks . . . powers . . . width controls . . . horizontal blocking oscillators . . . focus coils . . . vertical blocking oscillators . . . traps . . . audio outputs.

## Burnell <br> TOROIDAL DECADE INDUCTORS

One basic set of four decade units will provide inductance values in decade steps of 1 to 10 . This is accomplished by the use of the $1,2,3,4$, system. To further simplify and minimize the number of units employed for a given inductance, we have added an eight unit coil. By including this coil in the basic set it becomes unnecessary to employ more than two coils for any decade value up to twelve and extends the total possible range for all five coils up to eighteen.

## B.I.F. (BAND INTERSTAGE FILTERS)

## B.I.F. (BAND INTERSTAGE FILTERS)

This new series of interstage band pass filters will be of interest to project and design engineers to whom the time required for specially designed filters is prohibitive. A stock supply will be maintained for most commonly used center frequencies between 60 cycles and 50,000 cycles. The filter is designed to operate between the triode plate and the grid of a tube and provides a voltage gain of approximately 6DB. Filters are hermetically sealed. Small size permits use in compact or even miniaturized equipment. Dimensions are $1-3 / 16 \times 1-11 / 16$ $\times 2-1 / 4^{\prime \prime}$ high. When ordering specify BIF $\qquad$ Cycles.

# VIKING <br> "RANGER" <br> TRANSMITTER/EXCITER KIT 

Extremely compoct (only $15^{\prime \prime} \times 11^{\left.11 / 18^{\prime \prime} \times 9^{\prime \prime}\right), ~}$ the unit is designea throughout for eosy ossembly by the novice or experienced amateur. Wiring harness, punched chassis, all parts hardware and connectors are furnished along with complete step-by-step assembly instructions, pictarial diagrams and operating directions.
Car. No. 240-161 Viking Ranger Kit, less subes, crystal, key and mike. . ........S179.50 Amateur Net Cal. No. 240-161-2 wired ond tested. See your distributar for details.

BUILT-IN VFO—TVI SUPPRESSED

Designed as a completely self-contained, compact transmitter which con also be used as a flexible exciter unit without modification, she new Viking Ranger offers more features than any fransmitter-exciter ever built for amateurs.
As a transmitter, the Ranger is a compact, self-contained 75 watt CW or 65 watt Phone unit with $100 \%$ AM madulation and antenna load matching from 50 to 500 ohms. Operating on 160-80-40-20-15-11 and 10 meters crystal or VFO, it features high gain oudio with communications speech range and complete TVI shielding and filtering.
As an Exciter, the Ranger will drive any of the popular kilowatt level tubes and provides a high quality speech driver system for high powered modulators. Its design also enables basic control functions for the high powered stoge to be handled right at the exciter. No internal changes are necessory to change from transmitter to exciter operation.
The built in VFO has exceptional stability-accurate within 1 KC -dial calibrated in 10 KC increments. A smooth running planetary drive and a large edge-light excited plexiglass dial with ruled plexiglass painter assures tuning accurocy without parallox. Eosy to tune, the Ronger's basic tuning controls are locoted on the VFO Dial escutcheon. QSY within the phone or CW portion of a band is usually possible by merely changing the VFO frequency setting. For lorger frequency excursions, simply touch up the grid (buffer) tuning, adjust loading and dip the final. Simple as A B C. Other controls, used for initiol tuning up, chonging bands or changing mode of transmission, ore as follows: Off-Tune.Phone-Standby-CW switch, Bandswitch, Crystal 1-Crystol 9-VFO-VFO Zero switch, Meter Off-Osc.-Buffer-Grid-PlateMod. switch, Audio Gain, RF Drive, Coupling and Auxiliary Coupling. The VFO frequency control, Finol Plate tuning and Buffer tuning diols are on the VFO dial escutcheon.
A nine pin receptacle on the rear of the transmitter brings out TVI filtered control and audio leads for exciter operation. This plug olso permits the Ranger to be used as a filament and plate power source and a modulator for operating auxiliary equipment such as a VHF transmitter. Available of the outpur plug are 6.3 VAC at 5.5 Amp., 500 VDC of up to 210 MA and 300 VDC at up to 50 MA olong with the full 33 watts output of the modulator.
The Vikins Ranger tube lineup is as follows: 6 AU6 VFO-OA2 voltage reg., 6CL6 crystal osc., 6 CL6 buffer, 6146 final amplifier, 6 AQ 5 clamper, $12 A \times 7$ dual triode speech amp., 12AU7 dual triode audio driver, 2-1614 push pull modulators, 6 AX5 low voltage rectifier and 5R4 high valtage rectifier.

## JOHNSON AMATEUR EQUIPMENT AND ACCESSORIES

## LOW PASS FILTER

The Johnson Low Pass Filter consists of lour individually shielded sections. Handles more than 1000 watts RE, provides 75 DB or more attenuation above 54 mc . Insertion loss, less than .25 db . Teflon insulated fixed copacitors are replaceable. SO- 239 coaxial connectors at each end. Furnished completely wired and pre-tuned. Cat. No. 250-20 Low Pass Filter. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 1$ 3.50 Amateur Nei

## STANDING WAVE RATIO BRIDGE

Provides accurate measurement of stonding wave rotios to insure most effective use of a low pass filter and antenna coupler for ultimate in TVI suppression. 52 ohms impedance can be changed to 70 ohms or other desired value. Equipped with SO-239 connectors and polarized meter jacks.
Cat. No. 250-24 SWR Bridge.
. 5 9.75 Amoteur Net

## JOHNSON SIGNAL SENTRY

## CW OR PHONE MONITOR-ALL BANDS, NO TUNING

A non-frequency sensitive RF actuated monitor, the Johnson Signal Sentry monitors CW or phone on all amateur bands to 50 mc . Triggered directly by transmitter RF, unit acts os "On the Air" indicator because transmitter foifure is immediately apparent by lack of monitor output. Circuit designed to mute receiver audio when energized by transmitter enabling break-in operation. Powered from receiver or other available supply, the Signal Sentry is easily installed by plugging into receiver headphone jack-plugging headphones into monitor and coupling RF probe to transmilter. Controls: CW TONE and audio VOLUME.
Mastoon cabinet only $37 / 3^{\prime \prime} \times 3 \frac{3 / 8^{n}}{} \times 33 /^{\prime \prime}$. Unit is supplied wired and tested including instructions and all cables and connectors for installation. Tubes required but not furnished: one 12AX7, one 12AU7. Shipping weight 3 lbs CaI. No. 250-25 Johnson Signal Sentry, less fubes and power supply..................... $\$ 14.70$ Amateur Nef

# VIKING II TRANSMITTER KIT 

# INSTANT BANDSWITCHING TVI SUPPRESSED SELF-CONTAINED, NO PLUG-IN COILS 

| Band | Frequency Range | Rand | Frequency Range |
| :---: | :--- | :--- | :--- |
| $16(2$ | $1.8 \mathrm{mc}-2.4 \mathrm{mc}$. | EO | $9.8 \mathrm{mc}-15.0 \mathrm{mc}$. |

| 41 | $5.2 \mathrm{mc}-8.0 \mathrm{mc}$. | T0-11 | $21 \mathrm{mc} .-30 \mathrm{mc}$. |

RF section consists of a 6 All oscillator a 6 AO5 buffer/double and parollel 6146 outmut amplifier. Modulator pp 807 's operating class AB1 with 6AUS speech amplifier and 6AU6 driver. Parallial 5R4GY HV rectifiers. 5V4G low voltage rectifier with 6 AL5 bias rectifier and 6 AQ5 clamper screen volto ge regulator. Fixed bias applied to buffer and sutput amplifier for break-in CW aperation. Audio response limited to center of speech ranga.

Bandswitching and completely self-contained, the Viking II transmitter delivers 130 watts CW output and 100 watts phone, 160 through 10 meter amateur bands.
Effectively TVI suppressed, features include a heavily copper plated cabinet serving as a simple RF shield. Lid is bonded to cabinet with silver plated phosphor bronze contact fingers yet is easily opened by removing just three thumb screws. Cabinet lid and bottom plate are perforated for elfective air cooling.
Special shields provided for meter, dial window and shaft openings. Choke-capacitor type filters for power line leads, VFO receptacle, antenna relay terminals as well as key and mike jacks, plus internal filters at RF tubes effectively eliminate spurious radiation. Wide range pi-network output tuning system provides up to 30 db second harmonic attenuation before any external filtering. Shielded coaxial connectors are used for RF output and VFO input terminals.
All parts furnished including a complete set of tubes, cabinet, punched chassis, wirins harness, wire, terminals, grommets and all other hardware. Carefully detailed and illustrated instructions for assembly, test, and operation are also included.
Supplied for 115 volt $50 / 60$ cycle operation only. Cabinet dimensions $20^{\prime \prime}$ wide, 10 sir" $^{\prime \prime}$ hish, $13^{\prime \prime}$ deep. Net weight assembled, 65 pounds.

## JOHNSON MOBILE EQUIPMENT

Power-packed mobile kit for advanced amateurs. 60 watts PA input, instant bandswitching ( $75,40,20$ 15, 11, and 10 meters)-gang-tuned. $100 \%$ AM modulation en gineered for communications audio pass band. Single control coupling system simplifies loading. Ganged coupling circuits pre-tuned for efficient antenna matching. Separate PA trimmer permits large frequency excursions without antenna laading coil adjustments. RF section, 6 BH 6 oscillator, 6 AQ5 buffer doubler and 807 power amplifier. Powerful PP 807 modulator is designed for extra audio punch. 6 BH 6 speech amplifier and $6 \mathrm{BH}-16$ driver has sufficient gain for either high impedence or carbon micraphone.
Unique RF bios system protects RF subes ond modulotors. "Tune Receive, Transmit" switch enables "non-swish" VFO funing and receiver muting. Other controls: Audio Gain, PA Exitotion, Meter Switch, Crystol selocior ond filamentOn-Off.
Unit moy be wired for either 6 or 19 volts. Designed to use power supplies deliverin 300 volts ( 30 woits $P A$ input) to 600 volts ( 60 watts PA input) of 200 MA. Furnished in kiff form with ollt parts, punched chassis, hordwore ond connectors. Insifuctions completely illustrated for simplified qusembly by the experienced omateur. Control wiring specificotions and antenno suggestions

## VIKING MObILE VFO

A diminutive variable frequency ascillator designed specificaily for mobile use, the Viking Mobile VFO measures anly $4^{\prime \prime} \times 41 / 4^{\prime \prime} \times 5^{\prime \prime}$. Double bearing ceramic insulated tuning capaciror . . . ceramic air dielectric trimmers . . . ceramic switches ...ceramic coil form and heavy aluminum cabinet minimize frequency shift due to road shock and vibration. Split Colpitts oscillator, compensated for an extremely wide range of ambient temperatures, is voltage regulated. Separate amplifiermultiplier stage, operating essentially class $A$, provides isolation for constant oscillator looding.
Edge lighted lucite dial with vernier tuning designed for moximum visibility and accurote reset, VFO is calibrated for $75,40,20,15,11$ and 10 meter bands. Output 3.5 to 4 mc . for 75 meter band and 7.05 to 7.45 for $40,20,15$ and 10 . 10.5 mc . output also available for straighi doubling to 15 meters. Tube lineup, 6 BH H oscillator, 6 BH H buffer-multiplier and OA9 regulator. Ade quate output will drive any straight pentode crystal stoge. Cables and connectors for use with Viking Mobile supplied, easily adopied for use with virtually any mobile transmitter. Complete kit includes all parts, hord ware and assembly and operating instructions. Weight approximately 3 lbs.
Cot. No. 240-152 Viking Mobile VFO Kit, less tubes.

## JOHNSON "BI-NET" ANTENNA RESONATOR

Dual-band mobile antenna loading network for 10 and 80 meters. Mounts in center of standard mobile whip antenna for completely automatic band change while in motion. No relays or mechonical control required. Consists of two adjustable silver plated inductors and ceramic insulated fixed capacitor enclosed in a streamlined plastic housing. $3 / 8^{\prime \prime} .24$ female threads for ontenno mounting. Size, $47 / 6^{n}$ high, $5 \frac{3}{1 t^{\prime \prime}}$ lon $5,23 / 8^{n}$ wide. Weight, 14 oz.

## "WHIPLOAD 6" NEW BANDSWITCHING MOBILE LOADING SYSTEM

The new JOHNSON "Whiplcad 6" provides high efficiency base loading for mobile whips with instant bandswitch selection of six amoteur bonds: $75,40,20,15,11$ and 10 meters.
On 75 meters, a special variable capacitor, with a dial scale for occurate calibration, is shunted across the coil to permit tuning the entire band with accurate resel passible on any freauency. Complete coverage is available on the other bonds without funing.
The large diameter airwound cail with low loss polystyrene support strips provides extremely high " $Q$ " factor and much greater efficiency than usual small diameter loading coils. Taps for each band are assily adjusted initially using a grid dipper or field strength measurements and require no further attention. A fibre-glass housing protects assembly against mechanical shock and exposure without sacrificing high $Q$ and efficiency. Unit mounts on stondard mobile whip with hardware provided. May be used in conjunction with the Johrson Bi-Net to provide automatic $10-20$ meter operation without switching.
Cat. No. 250-26 Whipload-6, Bandswitching Mobile Artenna Loading Coil.

## ROTOMATIC ROTATOR AND ANTENNA ARRAYS

## JOHNSON ANTENNA ARRAYS

Rugged, parasitic beam antennas for the 20,15 and 10 meter amateur bands; designed for years of service in all weather conditions. Booms are $\Omega^{\prime \prime}$ galvanized steel tubin3, elements are of strons aluminum alloy. Heavy duty galvanized steel clamp. will not work loose yet provide adjustable. element spacing. Angle feet welded to buom for sturdy mounting. Adjustable " $T$ " or "Gamma" matching assembly included with element kits.
Elements are of adjustable length with specially designed bushings for maximum rigidity. Eocms and element kits are available separately for maximum design convenience. A complete array for one band consists of one element kit and appropriate boom assembly. Dual beams require element kit for each band, $138-153$ boom and 138-108 antenna switching relay. Kelay is DPDT, enclosed in weatherized can with clamps and procelain feed-through connectors.
Boom assemblies have fixed length and are available os follows: Element kits complete with "T". mathen, hardware

| Cat. No. | Length | For beams: | Arrateur Net |

## IMPROVED ROTOMATIC ANTENNA ROTATOR

Designed for rigorous service, the Johnson Rotomatic Rotator supports beam antennas weighing up to 175 pounds even under heavy icing conditions or high wind loadina. Rotates $1 \frac{1}{4}$ RPM-full $360^{\circ}$ either direction-over-all gear reduction, $1 \%, 00$ to 1 .
Heavily chrome plated RF slip rings provide smoth, noise free operation and low cortact resistance. Auxiliary slip rings provided for antenna switshing relay control. Rotator housing is cast aluminum; with $5 / 16$ steel rotating table. Unit hinged to tilt $90^{\circ}$ for antenna adjustments; can be rotated in tilted position. Complete assembly includes attractive desk top control box with selsyn indictior. Azimuth bearings continuously presented on illuminat əd dial. Controls include reversible rotation switch, power switch, and antenna relay switch. Weight 76 pounds.

Swinging link inductors for amoteur bands 160 thru 6 meters; 150,500 ond 1000 wott sizes. Two inductance values for each band permit choice of appropriate L/C ratio dictated by amplifier plate valtage and plate current. Polystyrene insulation, steatite boses and heavy wire sizes insure highest efficiency. HCS-Inductors match high voltage, low current tubes. LCS-Inductors match low voltage, high current tubes. Complete sembly includes Inductors for bands desired, one Jack Bor, one Link Arm Assembly and one or more Plug-in Links required for matching to line or antenno coupler.

ROTARY INDUCTOR
Same efficient inductor used in final tank of the VIKING II. May be used in any low and medium power transmitter with band.switching exc'ter to provide continuous tuning throughout the range 3.5 to 30.0 mcs . without changing coils. Variable pitch winding of Nc. 14 tinned copper wire. Maximum inductance 10 microhenries. Form and end plates steatite. Pasitive rolling contact assured by beryllium copper tension springs. Overall size: $21 / 2^{\prime \prime}$ wide $\times 41 / 2^{\prime \prime}$ long $\times 3^{\prime \prime}$ high. Supplied with Typical tuning curves.

Cat. No. 229-201

## JOHNSON KEYS AND PRACTICE SETS

## DELUXE SEMI-AUTOMATIC KEYS

An improved deluxe model maunted on heavy steel bose $61 / 4 \times 31 / 2^{\prime \prime} \times 1 / 2^{n}$. Five adjustments with lock nuts assure dependable operation at all speeds. Smooth, eosy oction, adjusiable from lowest to highest speeds. Vibrator orm, posts, circuit closing switch ond all mochine ports heavily chrome ploted. Heayy bross cannector strips under bose Insure law resistonce circuit. Two block fiber poddles con be odjusted seporotely to best height. Vibrotor beorings ore perfectly oligned ond free-acting. ## TYPE " $M$ " CAPACITORS

Requiring a panel area just $3 / 3^{\prime \prime}$ wide by $34^{\prime \prime}$ high, these diminutive capacitors provide the perfect onswer to problems encountered in the design of compact radio frequency equipment. Designed and constructed to provide peak performance throughout the VHF range, JOHN. SON Miniature Capacitors are ideal for compact aircraft and mobile equipment. Small in size, their low inertia mass and sturdy soldered construction assure reliability and lons service life under the most rigarous conditions.

## FEATURES

Bridge type stator terminal provides extremely low inductance path to both stator supports. Soldered plate construction, oversize bearing, and heavily anchored stator supports insure extreme rigidity. Relatively large beryllium copper compression spring rotor contact provides steady torque-rotor stays "put" where set. Rotor contact silver plated for low noise level at high frequencies-all other metal parts nickel plated. Steatite end frames DC. 200 trealed to maintain high insulation resistance.

## GENERAL SPECIFICATIONS

Mounting bushing threaded $1 / 4^{\prime \prime} .32$ with flats to prevent turning-mounting nut furnished. Peak voltage 1250 volts on $.017^{\prime \prime}$ spaced units- 850 volis on $160-130$ which is spaced $.013^{\prime \prime}-3 / 16^{\prime \prime}$ diameter shaft** slotted for screwdriver adjustment.
*Jnstrument type tuning knob to fit 3 /is" shaft available. (See knoband dial section of this catalog.)

## SINGLE SECTION

An ideal replacement for adjustable padders used in trimming RF and IF circuits, where stability and reliable capacity change are required. Plate spacing $.017^{\prime \prime}$ on all but 160.130 which has. $013^{\prime \prime}$ spacing.

Applicable wherever a small split stator capacitor is required. Electrically symmetrical, Butterflies provide perfect circuit balance. Plate spacing .017". Capacity is per section.

## SPECIALS

JOHNSON Miniature Air Variables are available in production quantities whith the following features: 1. Locking bearing. 2. $180^{\circ}$ stop. 3. Various shaft extensions. 4. High torque. On your special requirements-we will be happy to furnish quotations.

## EXPLANATION OF TYPE NUMBERS

The first partion of the type number indicates the capacity per section in mmfd. The following etter indicates the frame size or type. A second letter D indicates a two-section type. The final number multiplied by 100 is the approximate peak breakdown voltase.
Stated maximum and minimum values of capacitors are nominal, subject to olus or minus tolerances. Guaranteed values, or "lowest maximum, highest minimum" if necessary should be requested from the factory.

WASECA, MINNESOTA

## TYPE "L" CAPACITORS

A superior quality general purpase capacitar by JOHNSON embadying impartant advances in design and canstruction. The ratar bearing, statar suppart rads and maunting pasts are actually saldered directly ta the ceramic (steatite) end frames making the capacitar virtually vibratian praal. This exclusive ceramic salder feature makes the " $L$ " a perfect choice far porlable, mabile and aircraft apolications where vibration might cause failure af standard types.

## FEATURES

Rugged in electrical and mechanical design throughout, a special split sleeve tension bearing and silver plated beryllium capper cantact pravide canstant tarave and smaath, silent capacity variatian. Heavy brass saldered plates and large diameter tie rads pravide greal rigidity ta withstand extreme acceleration and deceleratian farces. Flating is new "bright allay", which is much mare carrasian resistant and has higher canductivity than standard platings.

## GENERAL SPECIFICATIONS

 centers. Remavable chassis maunting brackets pravided, can be used ta maunt auxiliary equidment. Plate spacing .030".

WASECA, MINNESOTA

## TYPE "R" CAPACITORS

The rugged JOHNSON version of a popular standardized capacitor. Featuring exfra heav steatite stator support insulators and soldered ;023" thick brass plates, all metal parts are heavily nickel plated for corrosion resistance. Brass end frames are thicker and heavier than other types. Double bearing construction and silver plated beryllium copper wiping contacts provide smooth, reliable performance in o wide variety of electronics applications. Plate spacing . 024", bearing threaded $3 / 8^{\prime \prime}-32$.
Cat. No Type No Cap. per Sec

| di | Y | Max. | Min. | Plates per Sec. | M | Net Pri |

| 149-6 | 140 R 12 | 320 | 13.5 | 19 | 119 年 | 2.65 |

Johnson Type R capacitors are available with $.036^{\prime \prime}, .050^{\prime \prime}, .071^{\prime \prime}$ or $.095^{\prime \prime}$ plate spacings as well as special platings and shaft lengths in production quantities. Also available without mounting feet for panel mounting applications.

## TYPE "K" CAPACITORS

Widely used for military and many commercial applications, the JOHNSON type K features DC 200 impregnated steatite end trames, slotted stator con lacts and extra risid soldered p'ate construction Square mounting studs tapped 4 - 36 on ${ }^{21 / r 2^{\prime \prime}}$ centers. Plates are brass, bright alloy plated.

| Cap. per Sec. |  |  |  |  |  |  |

| 158.5 | 100K10 | 100 | 6.4 | 27 | $15 / 8{ }^{\prime \prime}$ | 1.75 |

Other capacities and variations for special military and commercial specifications available in production quantities.

## TYPE " $J$ " CAPACITORS

A heavy duty miniature type has wider spacins (.025") than most small air variables, yet occupies little more space. Useful for small space plate tank circuits in low power stages where stondard miniatures have insufficient plate spacing. Soldered plate construction. $6-32$ tapped mounting studs on $\$ 4^{\prime \prime}$ centers. Mounting brackets and 6-32 screws provided.

## BAYONET

123-211 Stondord " 50 watt" socket for iumbo 4 pin boyonet based tubes, RETMA No. A4.29 Etched oluminum shell, glozed porceloin bose with two mounting holes. Double filament conacis, phosphor bronze cadmium ploted, desi gned for heovy current.
123-211-100 simitor to 123-211 except base is DC200 impregnoted steatite and cantacts are beryllium capper. 005 silver plated. Iridite $\boldsymbol{\%} 14$ treated aluminum shelk, \{ungus resistant washers 123-209 Heavy duty socket for medium 4 pin boyonet bose tubes, RETMA No. A4-10. White porcelain base equipped with four mounting holes. High current side wiping contacts are phosphor bronze, cadmium plated.
123-209-100 similar to 123-209 except DC200 impregnated steatite base and beryllium copper contocts. 005 silver plated. Iridite $* 14$ ireated aluminum shell, fun gus resistant washers.
123-210 Medium duty type boyonet, accepts 4 pin medium base tubes, RETMA No. A4-10. Compact $21 / 2^{\prime \prime}$ diameter, glazed porcelain base with wa mounting holes. Cadmium plated phosphor bronze contacts. Popular tor rectifier tube applications.
123-206 industrial bayonet socket for extremely high voltoge applications. Rugged aluminum shell. Socket will accommodate 8008, 5C22, FG104, GL146 and other tubes with super jumbo 4 pin boyonet boses, RETMA No. A4-18. Has steatite insulation, silver plated beryllium copper cantacts, screw terminals and three heovy retaining springs in the shell to hold pubes securely.

## SPECIAL PURPOSE 250 WATT

124-215 A wa unit socket far "250 watt" tubes such as the 204A and 849. Anade cap RETMA Nos. C1-8, C1-9 and C1-10, cathode maunting RETMA Nos. A3-20, A3-21, A322 and A3-23. Bases are glazed porcelain, contacts phosphar bronze nickel plated

## SPECIAL FOR 833 AND 833A

124-212 is a special sacket assembly far the 833 and 833 A consisting af a steatite base which supparts the tube and a pair af $119-843$ tube cap cannectors. Knurled thumb nuts permit easy installation of tube and base is designed ta minimize strains, on the tube envelape and prevent breakage. Heat radiating aluminum plote terminals have $43 / 8^{\prime \prime}$ flexible laminated leods.

## SPECIAL FOR EIMAC 152TL AND 304TL

124-213 A special sacket for Eimac 152TL and 304TL. Contacts may be connected for either series or parallel filaments.

## SPECIAL FOR 5D21, 705A AND 715A \& B

122-234 For Western Electric tubes 5D21, 705A and 715A \& B. Includes heavy top glazed steatite base and special locking device for retaining tube in socket

## TUBE SOCKET STANDARDIZATION

A new standordization program calculated to simplify the selection of sockets and to provide complete specificotions for stondard，industrial and military requirements hos been instituted recently．By reducing the number of variations in special socket types，if will permit the maintenance of stocks of militory and industrial types os well as standord sockets and provide shorter delivery cycles on quonsity orders．Specifica－ tions for the three variations of each socket type ore os follows
Standard：Commercial grade for general requirements．Bases，glozed porcelain or L4 steotite．Cushion woshers，fungus resistont gloss base melomine．
Industrial：Higher quality with glozed steatite bases，DC200 treated，phosphor branze or beryllium copper contocts .0005 silver ploted．Aluminum retaining shells or shields ore Iridite $\$ 14$ treoled．Gloss bose melamine cushion woshers，fungus resisiant．
Military：Top quality to meet oll militory requirements．Boses L4 or better glazed steothe．，DC200 ireated．Phosphor bronze or beryllium capper coniacts，heavy sil ver plated．Fungus resistont glass base melomine cushion woshers．Solder terminol ends hof tin dipped．Retoining shell bross .0003 nickel ploted．Aluminum shields or shield bases Iridite 44 treated．Threoded hardware． 0002 nickel ploled，unthreaded hardwore, 0003 nickel ploted．Enlire socket protecied for 200 hour salf spray．

# E.F.JOHNSON COMPANY <br> WASECA, MINNESOTA 

## JOHNSON KNOBS AND DIALS

A distinctive line of matching knobs and dials suitable for the finest electronic equipment. All types are derived from a new basic knob design, the first in years. Knobs have twelve well defined flutes and present an essentially round appearance.
Tough, scratch resistant black phenolic is used for all molded parts. Metal dial scales have an etched satin chrome finish. This contrasts greatly with deeply etched and filled engraving, provides maximum legibility under poor lighting conditions. All types have accurately centered brass inserts for $1 / 4^{\prime \prime}$ shafts.
In addition to the items listed, JOHNSON is prepared to supply variations (in production quantities) such as, special shaft sizes, scales, set screws or indicators.

## SOLDERLESS PHONE TIP PLUGS

Pin length ${ }^{13} 16^{\prime \prime}$ with $1 / 2^{\prime \prime}$ of tip $081^{\prime \prime}$ diameter. Knurled bady and nut permit leads ta be firmly secured withaut saldering. Bady and nut brass, nickel plated. May be used with all tip jacks listed.
$\qquad$
105-15
Shart salderless tip plug same as above except tip is 9 "原 $\operatorname{lan}$ and .081 diameter throughaut its length. May be used with all tip jacks listed except 105-432.

## BANANA PLUGS AND JACKS

Nickel-silver (not spring brass) springs with high nickel content for resistance to corrosion. High grade nickel ploted brass with occurate threads ond milled nuts. Studs extend full length for odded strength. JOHNSON banono plugs can be furnished on special order with beryllium copper springs ond ore ovailable plated nickel, codmium or silver when required. A selection or miniature solder type plugs is ovailoble with beryllium copper springs and a variety of platings. Orders for special plu gs should be of sufficient quantity to insure ecanamical production runs.

## PLUGS

108-750 (75) and 108-750-2 (75A) and 108-753 (75C) have nickel silver springs, securels swased to mochined full length studs. Hardware including solder terminal turnished, 108-754 (75D) is designed for riveting. Spring is beryllium copper.
108-759-1 (75BB) has $13 / \mathrm{s}^{/ 4}$ block plastic handle.
108-759-2 ( $75 B R$ ) has $13 /{ }^{\prime \prime}$ " red plostic hondle.
$108-770$ (77) and 108-771 (77A) ore jumbo size plugs with nickel silver springs ond machined studs. Furnished with hardware and solder terminal.
108-779-1 ( 77 BB ) Jumbo plug with $13 / /^{\prime \prime}$ black plastic handle.
108-772-2 (77BR) Jumbo plus with $11 / 4 / 2$ red plastic hondle.

## TYPE "C" DELUXE CABINET RACKS FOR 19" WIDE PANELS - $18^{\prime \prime}$ and 24" DEEP

[^31]The beauty of these new enclosed type racks should prove a welcome addition to our line. It will appeal to those who wish to combine the rugged construction of our standard Type "C" racks with modern styling and improved design.

The vertical trims which conceal the panel mounting screws are fastened by means of two "Cowl type" fasteners on each side, which permits the trims to be removed quickly and easily by a half-turn on the screw heads.

The design of the vertical posts permits these racks to be installed in rows or "gangs," without the use of front joining strips between the racks. This provides a greater flexibility in their instaliation, particularly in broadcast stations.

## SPECIFICATIONS FOR THESE DELUXE TYPE RACKS

CABINET: Entire cabinet is welded together into one integral unit. Body of cabinet is made from $\frac{1}{16}$ " thick cold rolled sheet steel; top of cabinet is made from $5 / 64^{\prime \prime}$ thick steel; bottom is made from $7 / 64$ " thick steel.

PANEL MOUNTING: Angle irons are Tin $^{3}$ " thick structural steel, holes are accurately drilled and tapped $12 / 24$ thread on standard $11 / 4^{\prime \prime}-1 / 2^{\prime \prime}$ spacings.

DOOR: Doors are of a new type with vastly improved construction features. They are stamped from one piece of steel into a rigid unit. Door edges are folded to provide a smooth double thick edge. There are no "patch" type braces, etc., used for reinforcement.

HARDWARE: Doors are equipped with die-cast "automobile" type sturdy handles. Hinges are of the "slip-joint" type so that doors may be easily removed. Screws for mounting panels are supplied. Front of rack is trimmed with chrome plated trims at top and bottom.

OUTLETS: A duplex receptacle and outlet box are provided in the back under the door. A rectangular opening is provided in the bottom for conduits, leads, etc.

CORNER TRIMS: All racks have quick detachable corner trims, which are fastened to the rack by means of two "Cowl Type" fasteners on each trim.

PANELS: Panels $19^{\prime \prime}$ wide to fit these racks are described on Page J-96. FINISH: Black ripple with corner trims finished in dull black; or slate grey ripple with corner trims finished in slate grey are standard. Prime coat only is optional in place of ripple enamel finish at no extra charge, if so specified in your order.
Aluminum grey lacquer is available at an additional charge. The letter " $P$ " before Catalog No. indicates black ripple enamel; the letter "PG" before Catalog No. indicates slate grey ripple enamel.
RACK SHELVES: Shelf R-2218 fits the $181 / 2^{\prime \prime}$ deep racks; and Shelf R-2224 fits the $24^{\prime \prime}$ deep racks. See Page J-95.
ROLLER TRUCKS: Truck RT-418 fits the $181 / 2^{\prime \prime}$ deep racks; and Truck RT-424 fits the $24^{\prime \prime}$ deep racks. See Page J- 95.

## PAR－METAL PRODUCTS

# TYPE＂C＂STANDARD RACKS FOR $19^{\prime \prime}$ and $30^{\prime \prime}$ WIDEPANELS 

These racks have been a standard unit in the electronic industry for many years，and have been adapted to a broad field of requirements．The construction is essentially the same as our DeLuxe Racks on Page $J-90$ ，and similar speci－ fications would apply as to CABINET，PANEL MOUNTING， DOOR．HARDWARE 解nd OUTLET．Corner trims are described below．

Models G－2218，G－2219 and G－3024 have ad－ ditional reinforcement at the rear corners， and are suitable for transmitter equipment． The louvres on the rear door are covered with mesh screening on the inside，and addf－ tional knockouts are provided for conduit and $4^{\prime \prime}$ square duct．

No．P－6675

CORNER TRIMS：All racks have quick，detachable，new corner trims．which are fastened to front of rack with two finger type＂captive screws．＂This permits quick，simple removal without the use of screw－drivers，etc．

TO SET UP IN GANGS OR ROWS：The racks may be joined together by means of a fiat trim fastened to the front of the adjacent support angles，overlapping both racks． Knockout holes $11 / 8^{\prime \prime}$ in diameter are provided at the sides of the racks to permit connections between them．

Racks are regularly shipped with corner trim as illustrated； where specified，the front joining trim is furnished without additional charge in place of the corner trim．

SIDE LOUVRES：Racks are available with louvres at sides if so ordered at no extra charge．（This is not suitable for ＂gang＂installations．）

MODIFIED RACKS：Depth may be increased up to $28^{\prime \prime}$ to your specifications．Grille openings in top for additional ventilation are also available．Special openings in doors can also be provided．

FINISH：Black ripple with corner trims finished in dull black；or slate grey ripple with corner trims finished in slate grey are standard．Prime coat only is optional in place of ripple enamel finish at no extra charge，if so speci－ fied in your order．Aluminum grey lacquer is available at an additional charge．The letter，＂P＂before Catalog No． indicates black ripple enamel；the letter＂PG＂before Cata－ $\log$ No．indicates slate grey ripple enamel．

## WITH REAR DOOR ONLY

## No. PX-6718

These universal racks are similar in con struction to our Type "C" standard racks listed on Page J-91, except that the design has been modified to facilitate the location and mounting of chassis supports, shelves, standard sliding devices, and sliding shelves.
Specifications are the same as those applying to CABINET, PANEL MOUNTING, DOOR, HARDWARE and OUTLETS on Page J-90.

The front vertical corners of the rack are regular cabinet design, so that panels may be recessed without exposed edges. New "narrow type" vertical corner trims maintain the attractive conventional design of similar racks, even though panel mounting screws are visible. Sliding shelves or drawers may be freely operated, or rack panel assemblies removed, without disturbing the trims.
The "narrow type" corner trims are standard "equipment on all series " $F X$ " racks. On series "PX" racks, regular trims to cover the panel mounting screws are standard, but "narrow type" trims are optional where so specified. Advantages of universal type racks may be summarized as follows:

1. The panel mounting angles are fully adjustable, and may lee positioned from front to back.
2. Racks will accommodate all standard panels up to
3. Either regular or "narrow type" trims are available on Series " PX " racks, and are interchangeable.
4. Vertical side supports (listed on Page J-93) may be installed without drilling or fitting.
5. Side brackets, with or without shelves, may be at tached to vertical side supports without drilling or
6. Various types of standard sliding devices in general use may be installed on the vertical side supports.
7. Racks with or without front doors, for either $19^{\prime \prime}$ or $24^{\prime \prime}$ wide panels, intermixed, may be "gganged" in
continuous rows.
CORNER TRIMS: "PX Series racks: Regular corner trims to cover panel screws are standard. "Narrow Type" trims will be supplied if so specified on your order. "Narrow Type" trims are standard on "FX" Series racks. Front joining trims may be substituted without extra charge.

FINISH: Black wrinkle enamel is standard. Grey wrinkle enamel or prime coat only is optional at same price.

No. FX-6718

ROLLER TRUCKS: (listed on Page J-95) Specify No. RT-418 for all racks with $19^{\prime \prime}$ panels. Specify No. RT-427 for all racks with $24^{\prime \prime}$ wide panels.
PANELS: Panels $19^{\prime \prime}$ or $24^{\prime \prime}$ wide to fit these racks are listed on Page J-96.
WHEN ORDERING, PLEASE GIVE FOLLOWING INFORMATION: Catalog number, FINISH (if other than black). Specify if "narrow type" trims are required on Series "PX" racks, otherwise regular type trims will be supplied.

## PAR-METAL PRODUCTS

## TYPE "C" UNIVERSAL CABINET RACKS

## VERTICAL SIDE SUPPORTS

These vertical side supports are supplied in sets of four uprights to fit Type "PX" and "FX" racks listed on J-92. (Cut shows side mounting brackets in place, which are sold separately-see listing below.) Uprights are fastened to grooved bolt retainers which hold panel mounting angles in place, and are adjustable from front to back. Holes are drilled and tapped vertically on "universal" centers to provide adequate vertical adjustment for side mounting brackets, shelves, and various sliding devices made for electronic equipment.
When installed in racks for $19^{\prime \prime}$ wide panels, the clearance between uprights (from right to left) is $173 / 4$ ". In racks for $24^{\prime \prime}$ wide panels, the clearance is $223 / 4$ ". Uprights are $25 / 8^{\prime \prime}$ wide and $11 / 2^{\prime \prime}$ deep.

Uprights are made from $1 / \mathbf{g}^{\prime \prime}$ steel, finished in aluminum lacquer. Supplied with necessary bolts for mounting in rack.

| Cat. No. | Height |
| :---: | :---: |
| VS-61 | $653 / 4 \prime \prime$ |

Prackets BR-118 and Shelf SS-1918
Sold in pairs. Slotted to provide additional vertical adjustment when fastened to Vertical Side Supports. Brackets are $2^{\prime \prime}$ wide and $1-13 / 16^{\prime \prime}$ high. Length fits $18^{\prime \prime}$ and $24^{\prime \prime}$ deep racks. Made from $1 / 8^{\prime \prime}$ steel, zinc plated. Necessary bolts supplied.

| Cat. No. | Length | To Fit Racks | Net Price |
| :--- | :---: | :---: | ---: |
| BR-118 | $14^{\prime \prime}$ | All $18^{\prime \prime}$ deep racks | $\$ 2.70 \mathrm{pr}$. |
| BR-124 | $20^{\prime \prime}$ | All $24^{\prime \prime}$ deep racks | 3.60 pr. |

## EQUIPMENT SHELVES

To be used with Side Mounting Brackets listed above. Makes a complete shelf between Vertical Side Supports. Material is $1 / 16^{\prime \prime}$ sheet steel; necessary holes and bolts for assembly included.

| Cat. No. | Width | Depth | Height | To Fit Racks | Net Price |
| :--- | :--- | :---: | :---: | :---: | :---: |
| SS.1918 | $15 \%^{\prime \prime}$ | $141 /^{\prime \prime}$ | $7 / 8^{\prime \prime}$ | $18^{\prime \prime}$ deej, | $\$ 2.85$ |

## SLIDING SHELF UNITS

These sliding shelves may be mounted in either Type " PX " or " FX " racks. When mounted onType "PX" racks, narrow trims must be used (see Page J-92). They are fastened directly to the front panel mounting angles, similar to regular panels.
The basic assembly illustrated is sold as a complete unit. Panel and chassis assemblies may be bolted to the shelves. Standard chassis brackets listed on Page J-97 may also be bolted to the shelves, using either flat or formed panels with a minimum height of 7". Forward movement of shelf is $131 / 4^{\prime \prime}$ on $18^{\prime \prime}$ deep racks, and $171^{\prime \prime}$ " on $24^{\prime \prime}$ deep racks. The shelf may be quickly inserted or removed from the slide, when in an extended position.

## PAR-METAL PRODUCTS <br> Made ly Electronte Speciallsta! TYPE "A" ENCLOSED RELAY RACKS FOR 19 " WIDEPANELS

No. ER-225

## DELUXE TYPE.

Our Type "A" Racks are produced in the modern, streamlined style in order that they blend in harmoniously with other equipment you have. In our DeLuxe type units (Series ER-225), the removable vertical corner mouldings are rounded and cover the panel mounting screws.

CABINET: Entire cabinet is constructed of $\frac{1}{18}{ }^{\prime \prime}$ thick cold-rolled steel. These racks are shipped "knockeddown" with necessary bolts for easy assembly.
PANEL MOUNTING: Angle irons are 7/64" thick steel, holes are accurately drilled and tapped $10 / 32$ thread on universal centers for all types of panels.
CORNER TRIMS: All racks have quick, detachable, new corner trims which are fastened to front with two studs. This provides for rapid, fingertip removal without the use of screwdrivers, etc.
HARDWARE: Doors are of new design same as our Type "C" commercial racks. No. ER-223 is equipped with a "push-button" type concealed snap catch. The two larger models have "automobile" type handles. Hinges are the "slip-joint" type so that doors may be easily removed. Front of rack is trimmed with chrome finished mouldings. Screws for mounting panels are supplied.
GANGING: These units may be ganged in double or "multi-rack" units. When so ordered, racks are supplied with common intermediate sides which are joined to adjacent tops and bottoms. Solid intermediate sides are supplied unless otherwise specified. In multiple units, center joining trims are supplied.
FINISH: Slate grey ripple enamel with corner trims finished in slate grey is standard. Black ripple enamel with corner trims finished in dull black will be supplied without extra charge if so specified in your order.

## DE LUXE TYPE WITH FRONT DOORS - FOR

These racks are similar in design to our No. ER-225 and ER-227 racks listed above, except that they are equipped with both front and rear doors. The front door is provided with a lock which is an integral part of the handle.
An important feature of these racks is provided by the full adjustment of panel mounting angles, so that they may be positioned at any distance from the front or rear doors. All other specifications are the same as

## NO. ER-215

These racks are similar in construction to the ER-225 type listed on this page. The panels fit into a recess so that the edges are not exposed: corner trims are omitted. Combines standard functional design and superior construction at an economical price.
FINISH: Slate grey ripple enamel is standard. Black ripple enamel is optional without extra charge, if so specified on your order.
RACK SHELVES: Shelf ER-2112 listed on Page J-95, fits these three racks.
ROLLER TRUCKS: Truck RT-411, listed on Page J-95, fits these tiree racks.

## 19" RACK PANELS

ROLLER TRUCKS: No. RT-418 fits racks listed below.

## PAR-METAL PRODUCTS

## STANDARD TYPE CHASSIS

Construction is the same as our heavy-duty chassis. Stamped from ore piece of cold rolled steel, and lave four sobid sides with welded corners. Bottom edres are flanged in on four sides to provide additioreal reinforcement, and they are drilled for bottum plates. The chassis are made from $\# 20$ raure steel except those marked (*) which are stamped from te" steel exactly like our heavy dity type.

## HEAVY DUTY TYPE CHASSIS

These heary duty luastes resemble the standard twes illustrated in the column af the left However, they are substantially ronstrueted for "heavy duty" uses since they are formed from one piece of $1 / 16^{\prime \prime}$ sheet stesl. Hottom plates and mountinis screws are supplied with each of these chassis.
Ends are drilled to fit standard chassis mounting brackets listed at the bottom of this column.

## RACK TYPE CHASSIS

These chassis are suitable for vertical mounting on pedestals or standard relay racks. They may lie mounted under the formed panels listed on Fage J.95 as they are made with additional slotted holes to clear panel mounting screws. They may be olstained from ${ }^{\prime \prime \prime}$ thick aluminum with etched finish, or $z^{\prime \prime}$ thick steel, zinc plated. Overall length, including mounting flanges, is $18 \mathrm{x} / \mathbf{y}^{\prime \prime}$.

## Standardized Units Adaptable to Individual Requirements

SINGLE UNIT
ASSEMBLY

The above will illustrate how brackets are mounted. They are used for mounting chassis, standard shelves, or drawers. With all sldes open, easy access saves considerable time in assembly.

The combination of a control cabinet mounted on a table, desk or similar support has been in general use in the electronics industry for some time. Due to the various functions for which it may be employed, such equipment has assumed various forms, arrangements and sizes, requiring costly, custom-built construction to achieve their purpose.

While it is obvious that no particular fixed design can serve every demand, we have devised a group of standardized units, the combination of which is readily adaptable for control stations, testing apparatus, sound distribution systems, and similar applications.

The sizes and specifications of the various units are catalogued on the following page. There are several features which warrant your consideration, particularly the pedestal. Note that all doors of the pedestal are easily removable, allowing complete access to the interior from all sides. (See illustration at left.) Each side of the four supporting posts has also been drilled and tapped on "universal" centers, making it possible to mount standard rack panels or doors on any or all sides, at your preference. Each door is equipped with a "push-button" spring catch, plus a lock with interchangeable keys. The use of the lock is optional.

Another time-saving aid is the method of supporting apparatus in the interior of the pedestal. Universal brackets are easily attached to any of the four sides by utilizing the tapped panel mounting holes. The brackets are slotted, so that almost continual vertical adjustment may be made. They may be used to support regular $17^{\prime \prime}$ wide chassis, or standard shelves. The shelves are suitable for mount ing amplifiers, power supplies, record changers, etc.

All table-tops have screw type studs, which are inserted in matching holes already drilled in the pedestals. The desk cabinets have necessary mounting holes, but they have been omitted from the table top to permit a flexible assembly of similar cabinets, or other equipment.

SPECIFICATIONS: The Desk Panel Cabinets, Table Tops and Pedestals are constructed of $1 / 16^{\prime \prime}$ thick furniture steel. They are rigidly braced and reinforced wherever necessary, and substantially welded into integral units. No holes have been drilled in the table tops for desk cabinets, to permit cabinets to be located wherever desired.

FINISH: Unless otherwise specified, the standard finish for all items on Pages J. 98 and J.99 is light grey enamel. Black wrinkle. slate grey wrinkle, grey hammertone, or prime coat only is available at same price. Samples of above finishes will be mailed upon request.

DOUBLE UNIT ASSEMBLY

TRIPLE UNIT ASSEMBLY

## PAR-METAL PRODUCTS

## desk Panel cabinets

These cabinets are available in single, double and triple units, as listed below. Double and triple units are shown on opposite page.

D O O R S : Hinged door at back is removable; ade quately louvered for ventilation. Equipped with combined "push-button" catch and lock. Individual doors on each section of multiple urit cabinets.
PARTITION: Solid partition between each section in multiple units, with wiring access holes.

PANELS: Any panel up to $7 / 16^{\prime \prime}$ thick may be used. Upper panel is $121 / 4^{\prime \prime} \times 19^{\prime \prime}$, lower panel is $31 / 2^{\prime \prime} \times 19^{\prime \prime}$. Upper panel is mounted at $30^{\circ}$ angle. (See Page J-96 for panels.)
MOUNTING HOLES: Drilled in bottom. Also two "knockout" holes $11 / 8$ " diameter near back.

| Cat. No. | Description | Length | Depth | Height |
| :--- | :--- | :--- | :--- | :---: |
| CC-101 | Single Finit | $215 /{ }^{\prime \prime}$ | $181 / /^{\prime \prime}$ | $16^{\prime \prime}$ |
| CC-102 | Double Lnit | $42^{\prime \prime}$ | $181 / /^{\prime \prime}$ | $16^{\prime \prime}$ |
| CC-103 | Triple Fnit | $621 / 4^{\prime \prime}$ | $181 / 4^{\prime \prime}$ | $16^{\prime \prime}$ |

## TABLE TOPS

TABLE TOPS are made in three lengths, for use with single, double or triple unit assemblies. They are constructed from $1 / 16^{\prime \prime}$ furniture steel, braced on underside; all edges flanged underneath to provide smooth surface. Screw studs are inserted to match holes in pedestals. No holes are drilled in top for desk cabinets, so that cabinets may be located wherever desired.

| Cat. No. | Description | Width | Length | Depth |
| :---: | :---: | :---: | :---: | :---: |
| T. 301 | Single Unit | $28^{\prime \prime}$ | $25^{\prime \prime}$ | $112^{\prime \prime}$ |
| T-302 | Doulile Unit | $28^{\prime \prime}$ | $55^{\prime \prime}$ | $112^{\prime \prime}$ |
| T. 303 | Tripie Unit | $28^{\prime \prime}$ | $71^{\prime \prime}$ | $11 / 2^{\prime \prime}$ |

## MOUNTING BRACKETS AND SHELF

BRACKETS are essential for mounting interior apparatus. Slotted for vertical adjustment on sides of rack pedestals. They may be used with or without shelf which fits between brackets. Drilled for easy assembly.

## RACK PEDESTALS

RACK PEDESTALS are rigidly welded together into one integral unit.
PANEL MOUNTING space is $21^{\prime \prime} \times 19^{\prime \prime}$ on all four sides, with holes tapped $10 / 32$ on "universal centers." Either panels or doors may be mounted on any side (not both).
DOORS are slip-in type held closed by combined "push-button catches" and locks. Doors are interchangeable and are available both plain and ventilated.
BASE is $4^{\prime \prime}$ high, set in for toe space; equipped with adjustable "glider type" casters.

PEDESTAL (less dours and panels). No. PD-200.
Overall Size: 22" long, $24^{\prime \prime}$ deep, $26^{\prime \prime}$ high.
Panel Space: $21^{\prime \prime} \times 19^{\prime \prime}$ on all four sides.
Clearance between corner posts: $173 / 4{ }^{\prime \prime}$.
Clearance inside (front to back) : $23^{\prime \prime}$. Clearance inside (left and right side): $21^{\prime \prime}$. Base height: $4^{\prime \prime}$.

PLAIN DOOR (without louvres). Catalog No. PD-201. Overall Size: $21^{\prime \prime}$ high, $19^{\prime \prime}$ wide, $11 / 2^{\prime \prime}$ deep.
VENTILATED DOOR (with louvres). No. PD-202.
NOTE: PANELS and CHASSIS for these units are listed on Pages J.96 and J.97.

## END PEDESTAL AND FLOOR BRACE

For use with $42^{\prime \prime}$ table top to make up DOUBLE UNIT ASSEMBLY. End pedestal is $6^{\prime \prime}$ wide and $24^{\prime \prime}$ deep, with step in base to match rack pedestal. Floor brace is $251 / 2^{\prime \prime}$ long. Shipped complete with necessary holes and hardware.

Cat. No.

> Unit

PD-210 Pedestal \& Floor Brace
(for doulle unit assembly)
PB-211 Fluor Brace Only
(for triple unit assembly)

## STIDE DRAWER

Suitable for mounting turntables, record chang. ers, etc. Drawer front is similar to $101 / 2^{\prime \prime}$ x $19^{\prime \prime}$ formed panel. If door is mounted at top of pedes. tal, a pair of brackets No. CB-20 is required. Since no base is supplied by us, we suggest it be purchased with changer or turntable.
Panel size (drawer front): $101 / 2^{\prime \prime} \times 19^{\prime \prime}$.
Mounting platforia: $171 / 2^{\prime \prime}$ long, $21^{\prime \prime}$ deep.
Clear height above platform: $83 / 4$ ".
Forward movement of drawer: 14".
Catalog No. CD-10
SEE PAGE J-98 FOR FINISHES AVAILABLE.

## TRANSMITTER RACKS

- Rigidly constructed of \#16 gauge steel with a \#12 gauge steel bottom and welded throughout.
- Panel mounting angles are $3 / 16$ thick and are tapped 12.24 on Universal spacing.
- Rear doors are hung on sturdy loosejointed hinges and closed by a chrome handle.
- A rectangular cut-out is made in the bottom for leads, etc.
- Racks are supplied with or without louvres.
- Vertical rounded corner moldings are supplied on RM racks.
- Tops and bottoms are trimmed with red striped chrome moulding.
- Panel mounting angles are adjustable to any distance from the front door by means of channel slides.
- FD racks have handles and locks.
- Racks finished in either black or gray wrinkle.
- For Gray Hammertone add $10 \%$ to net cost.

A Duplex Receptacle and Outlet Box are Furnished in the Back Under the Door.

SLIDING DRAWER
TO FIT STANDARD $19^{\prime \prime}$ ENCLOSED RELAY RACK CABINETS ( $22^{\prime \prime}$ wide $\times 18^{\prime \prime}$ deep)

Panel made of \#12 gauge steel; chassis of \# 16 steel and has a 1" flange on top and bottom to accommodate plywood for the record changer. The chassis is mountec on ball-bearing suspension slides which can sustain 40 lbs. Drawer extends II" from front of cabinet. Entire unit mounts on angle brackets which can be bolted on to the cabinet. Supplied knocked down with all necessary bolts for easy assembly. Locks in place by means of 2 adjustable pawl fasteners. Finished in black or gray wrinkle. For gray Hammertone add $10 \%$ to net cost.

PHOTOGRAPH SHOWING SLIDING DRAWER MOUNTED IN RACK CABINET (R MODEL)

## FRONT DODRS TO FIT STANDARD Ig" DESK RACK CABINETS

Constructed from one piece of \# 16 gauge steel. Two concealed piano hinges are provided with holes, punched to accommodate universal spacings and are made to fit on top of the panels. Supplied with cylinder lock and angle bracket to hold door in position. All necessary bolts furnished for easy assembly. Finished in Black or Gray Wrinkle. For Gray Hammertone add $10 \%$ to net cost.

SERVICING TV VERTICAL AND
HORIZONTAL OUTPUT SYSTEMS

## by Harry Thomas

A COMPLETE explanation of how vertical and horizontal output systems function. Discusses types of circuits used in TV receivers-waveforms encountered, construction of components, component constants, requirements and troubleshooting. For the TV service technician and the student of TV servicing. No other book in print offers equivalent coverage of the subject or explains details as clearly
CHAPTERS: 1. The Basic TV Picture System in Receivers; 2. Organization of the Basic Vertical and Horizontal Output System; 3. How the Vertical Output System Works; 4. How the Horizontal Output System Works; 5. The Deflection Yoke; 6. Variations in Horizontal Output Systems; 7. Construction and Replacement of Components in TV Output Systems; 8. Troubleshooting Vertical Output Systems; 9. Troubleshooting Horizontal Output Systems; Index.

Over 140 pages $51 / 2$ "x $81 / 2^{\prime \prime} \quad$ Iliustrated Net Price $\$ 2.40$ (Cat. No. 150)

## TV SWEEP ALIGNMENT TECHNIQUES

## by Art Liebscher, former RCA Test Equipment Specialist

NEVER BEFORE has there been a book such as this on TV sweep alignment! An expert gives you accurate, time-saving methods-and tells you how they work. The new SUPERMARK method of TV sweep alignment is introduced. Get maximum value from your test equipment and learn new uses. Chock-full of sweep curve pictures. Valuable for servicing in UHF signal areas.
CHAPTERS: 1. Introduction to Modern Sweep Alignment; 2. Modern Sweep Alignment Techniques; 3. Markers; 4. The Supermark; 5. Sweep Curves; 6. Tuner Curve Formation; 7. Intermediate Frequency Alignment; 8. Intermediate Frequency Curve Alignment; 9. Sound I-F and Sound Detector Alignment; 10. Video Amplifier Response Testing; 11. UHF Sweep Alignment, Index.

## HIGH FIDELITY SIMPLIFIED

## by Harold D. Weiler

LEARN what components you need to start you on the path to the ultimate in listening enjoyment. 'Those planning high fidelity music systems for their homes will save themselves time, money and trouble by reading this first, then making purchases." Radio-Television News.
Typical chapters: Sound !; Acoustics, Electronics and Music; The Simple Loudspeaker; The High-Fidelity Loudspeaker; Loudspeaker Enclosures; The Basic Amplifier; The Amplifier -Part 2; the Record Player; The Tuner; Use of the Home Music System, Tape Recorders.
208 pages $\quad 51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime} \quad$ (Cat. No. 142) Net Price $\$ 2.50$

## GUIDE TO AUDIO REPRODUCTION

## by Dovid Fidelman

HERE'S AN A TO Z explanation of the reproduction of sound. Discusses all phases of audio reproduction systems and their requirements. Design, construction, assembly, and testing of these systems and their components are fully covered. Full explanation of the circuitry of preamplifiers, amplifiers; complete discussion of phono cartridges, tuners, microphones, loudspeakers, and enclosures. Valuable for the radio and TV service technician, engineer and experimenter. A companion volume to the best-selling HIGH FIDELITY SIMPLIFIED.
(Cat. No. 148 )
Over 250 pages $51 / 2 " \times 81 / 2 "$ Hlustrated Net Price $\$ 3.50$

## RADIO OPERATOR'S LICENSE Q\&A MANUAL

By Milton Kautman<br>Fourth Edition, January 1953<br>(Elements 1 through 8)

SYSTEMATICALLY LISTED are the questions and answers to past FCC exams plus a FOLLOW-THROUGH discussion of the answer, so necessary for a complete understanding of the technical question. Abundant illustrations make difficult technical questions picture-clear.
Not simply an optional text, but an indispensable reference volume for student and operator, it is up-to-date in all respects as of the publication date. Based on the Government Study Guide and supplementary FCC releases, the volume offers valuable appendices (Small Vessel Direction Finders and Automatic Alarm) never before available in a book of this type.
(Cat. No. 130)
730 pages $51 / 2 " \times 81 / 2^{\prime \prime} \quad 243$ Illustrations Net Price $\$ 6.60$

## ELEMENT VIII-SHIP RADAR TECHNIQUES

Identical text as in book, separately bound for those specially interested in Ship Radar. Uses the same question-answerdiscussion pattern.
32 pages $51 / 2 " \times 81 / 2^{\prime \prime} \quad$ (Cat. No. 130A) Net Price \$. 78

## BROADCAST OPERATOR'S HANDBOOK

Second Edition (October, 1951) by Harold E. Ennes COMPLETELY REVISED and brought up to date, the text deals with the practical considerations of radio broadcasting and its equipment. It explains all the why's and wherefore's of daily studio routine. The first four parts of the book cover actual operating procedure in control rooms, the master control, remote controls, and the transmitter; the fifth and sixth parts discuss technical data for operators and technicians, including vital preventive maintenance.

# RIDER BOOKS-THE STANDARD OF THE INDUSTRY 

## COLOR TV

## INTRODUCTION TO COLOR TELEVISION

by M. Koufmon, Engineer, Color Engineering Lobs

## CBS-Columbio (A division of Columbia Broodcosting Sysfem

 ond H. Thomos, Senior Project EngineerFederal Communications Lobs, Inc. (A division of I. T. \& T.)

#### Abstract

ANSWERS technical questions on color TV which the layman might ask the service technician. Discusses color wavelengths and frequencies; primary colors and what they mean. Production of color by reflection and projection. Brightness, hue and saturation are defined. Gives basic features of the N. T. S. C. system. Differences between Tri-color, Colortron, and the Chromatron tubes are explained. Discusses circuits used in color TV receivers and gives complete explanations as to their operation-Setting up and adjustment procedure. CHAPTERS: 1. Introduction. 2. Fundamentals of Color for Television. 3. N. T. S. C. Color Television System. 4. Tri•Color Picture Tubes. The Color Television Receiver. 6. Adjustment of Color Television Receivers. (Cat. No. 1561 144 pages Illustroted Paper bound Only $\$ 2.10$

## HIGHLIGHTS OF COLOR TELEVISION

## by John R. Locke, Jr., Radio ond Television Depf. General Electric Compony, Syrocuse, New York

THIS BOOK introduces color television at a level which will be understandable to persons who are familiar with the black and white television system. All material is based on the recommendations of the N.T.S.C. Since a color television receiver must provide the necessary circuitry to reproduce the color information, the new problem is to understand the nature of these added circuits. Highlights of Color Tele vision supplies this information.
CHAPTERS: 1. Introduction. 2. Colorimetry. 3. The N. T. S. C. Color Signal. 4. The Transmitter. 5. Color Receiver. 6. The Shadow Mask Tri-Color Picture Tube. 7. Some Receiver Details. 8. General
Comments. Comments.

## UHF

## UHF TELEVISION ANTENNAS AND CONVERTERS by Allon Lyfel

ALMOST all of the receiver manufacturers have brought out a UHF system for use with their existing VHF receivers on the new band. These systems range from the simple single-channel device to complete tuners that can cover the entire band. This book explains in simple terms, the function and operation of the UHF conversion systems that are appearing on the market in ever increasing numbers. This book is meant to prepare the service dealer and serviceman to know the answers to the UHF question, as well as to prepare for the installation and maintenance.

128 pages $\quad 51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime} \quad$ illustrated Net Price $\$ 1.80$

## UHF PRACTICES AND PRINCIPLES

## by Allon Lyfe

LEARN NOW about the uhf practices and principles that will affect you in your everyday work in the near future. Operate successfully and profitably with the knowledge of special uhf techniques, concepts, and circuits explained here. UHF transmitting and receiving equipment is discussed as it applies to the various services using it. Much of the emphasis is on the practical applications to uhf television. UHF will mean added income for you. Learn about it now!

## TV SERVICING

## TV FIELD SERVICE MANUAL VOLUME 1 by Horold Alsberg

BY AND LARGE, the public is very reluctant to part with its receivers for any prolonged period of time. In the event of any trouble in the equipment. It is with the realization that more and more servicing must be done in the home that the field service data was conceived. Every set model of each manufacturer contains: Top view diagrams of tube locations; diagrams of rear controls-and front controls; tube listings and circuit functions; key voltages; diagrams of picture tube adjustments, AM tuner drive cord assemblies, and TV-FM tuner drive cord assemblies. On the opposite page is a listing of trouble symptoms (audio-video) and specific directions for trouble cures.
VOLUME 1 COVERS: Admiral, Affliated Retailers (Artone), Aimcee, (AMC), Air King, Air Marshal, Allied Purchasing, Andrea, Arvin
and Autornatic. and Automatic
120 pages (Cat. No. 155)
Only $\$ 2.10$

## TV TROUBLESHOOTING \& REPAIR GUIDEBOOK by Robert G. Middleton <br> Volume 1

A NEW, PRACTICAL, easy-to-use book for the TV service technician. It tells you how to spot receiver troubles and correct them. Contains factual information you must know to be a TV troubleshooting and repair expert. The Contents include: split-sound and intercarrier receivers, circuit variations and how they affect operating waveforms, simplified TV receiver troubleshooting by scope and picture tube screen display analysis, remedies for circuit troubles, visual methods of alignment and recognition of alignment problems. Also hundreds of handy hints and time-saving short cuts for troubleshooting sync circuits, video-amplifier circuits, locating buzz, etc. TV troubleshooting charts included. Not a theory book-but a practical, down-to-earth troubleshooting and repair glide that will help you earn more money.
204 pages $81 / 2^{\prime \prime} \times 11^{\prime \prime}$ (Cat. No. 140 ) Net Price $\$ 3.90$

## Volume 2

A GOLD MINE of valuable TV service information: Trouble-shooting front ends; Servicing the Video I-F strips: Faults in video amplifiers; Trouble analysis in sound I-F and detector systems; Practical pointers in audio amplifier servicing, Troubles in horizontal circuits. Not theoreticaleverything is practical from beginning to end.

## (Cat. No. 140-2)

160 pages $81 / 2^{\prime \prime} \times 11^{\prime \prime}$ Paper covered Net Price $\$ 3.30$

## RECEIVING TUBE SUBSTITUTION GUIDEBOOK <br> by H. A. Middlefon

ANSWERS ALL TUBE PROBLEMS by listing 2,500 radio-television tube substitutions in numerical sequence with accompanying wiring instructions, original and substitute tube socket illustrations. You will find information to help you turn out jobs that would otherwise remain on the shelf because of lack of proper tubes.

Paper bound
224 pages $81 / 2^{\prime \prime} \times 11^{\prime \prime} \quad$ (Cat. No. 135) Net Price $\$ 3.00$

## FIRST SUPPLEMENT

750 completely new and different radio-TV tube substitutions not listed in the first edition. Special section on substituting tubes in television receivers.
48 poges $81 / 2^{\prime \prime} \times 11^{\prime \prime} \quad$ (Cat. No. 139) Net Price $\$ .99$

## SECOND SUPPLEMENT

The Second Supplement features 134 TV PICTURE TUBE SUBSTITUTIONS as well as over 190 AM-FM-TV receiver tube substitutions. Used with original and first supplement volumes it is the most complete coverage available on tube substitutions.
48 Pages $81 / 2^{\prime \prime} \times 11^{\prime \prime} \quad$ (Cat. No. 139-2)
Net Price $\$ .99$

## GENERAL

## ENCYCLOPEDIA ON CATHODE-RAY OSCILLOSCOPES AND THEIR USES <br> by John F. Rider and Seymour D. Uslan

THE ONLY BOOK of its kind that tells you all you should know about an oscilloscope, this text fully and clearly describes the device, its construction and its capabilities. It explains what a scope is, what it can do, and how it is used. The authors thoroughly cover the applications of the oscilloscope in servicing, engineering, and research, and offer thousands of time-saving, labor-saving references, charts, waveforms, etc.
All oscilloscopes produced during 1940-1950, a total of more than 70 different models, are accurately described, with specifications and wiring diagrams.
If you are planning to buy a scope, this book will help you select the type best suited to your needs. If you already own one, it will show you how to increase your instrument's usefulness and value to you. We guarantee this book will save and earn many, many times its cost to you!
(Cat. No. 133 ) Half a million words - Easy to read 992 pages 3,000 Illustrations $81 / 2^{\prime \prime} \times 11^{\prime \prime} \quad$ Net Price $\$ 9.00$

> INSIDE THE VACuUM TUBE
> by John F. Rider

Clear, simple discussion of the theory of the vacuum tube and its operation.
CONTENTS: Introducing the Electron; Electron Emission; Movement of Charges; Space Charge and Plate Current; Fundamentals of Tube Characteristics; The Diode; The Triode; Static Characteristics of Triodes; Triode Dynamic Characteristics and Load Lines; Dynamic Transfer Characteristics: Voltage Amplification; The Tetrode and Pentode Vacuum Tubes; The Cathode Circuit; Power Amplifiers; Miscellancous Vacuum Tubes. Appendix. Index. (Cat. No. 115)
424 pages $51 / 2^{" \times} \times 1 / 2^{\prime \prime} \quad$ Illustrated Net Price $\$ 4.50$
HIGH FREQUENCY MEASURING TECHNIQUES USING TRANSMISSION LINES
by E. N. Phillips, W. G. Sterns, and N. J. Gamara
Shows how to measure wavelength, impedance, etc., in four-terminal networks. (Cat. No. 125)
58 pages $81 / 2 " \times 11$ " lllustrated Net Price $\$ 1.50$

## FM TRANSMISSION AND RECEPTION

Second Edition (November, 1950) by Rider \& Uslan
ALL YOUR QUESTIONS about new developments in f.m. are answered in this text. The latest functions and applications of f.m. are thoroughly and clearly discussed. Transmitting and receiving antennas are covered as well as various types of receivers, including television, their functioning and servicing. Radio servicemen, radio amateurs, engineers, students will find this an indispensable reference volume combining theory and practice.
EXTRA: Review Questions at the end of each chapter
(Cat. No. 102)
460 pages $51 / 2^{" \times 81 / 2 " ~ I l l u s t r a t e d ~ N e t ~ P r i c e ~} \$ 4.95$

## UNDERSTANDING MICROWAVES

by V.J. Young
This book provides foundation for understanding microwave radio, Tele. :ision and radar. Mathematics are confined to footnotes wherever possible. Covers theory and operation. Typical chapters: The Ultra-High Fre quency Concept; Transmission Lincs; Waveguides; Resonant Cavities; Radar and Communication.
385 pages $\quad 51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime} \quad$ Illustrated (Cat. No. 107) Cloth bound Net Price $\$ 6.00$

## UNDERSTANDING VECTORS AND PHASE IN RADIO

## by John F. Rider and Seymour D. Uslan

A shorthand method to easier understanding of radio theory, the text is written for every man in radio and electronics who has not had the advantage of technical training. Vectors are the engincer's shorthand a picturegraph adopted to eliminate mathematical and complex waverorm presentations; an understanding of which is necessary in following developments in FM and television.
160 pages Paper Cover (Cat. No. 103) Net Price $\$ .99$

## TECHNICIAN'S GUIDE TO TV PICTURE TUBES by Ifa Remer

A PICTURE TUBE servicing guide for the television installation and repair man. Covers the care. methods of handling, replacement maintenance and repair of the picture tube. It is writen for the technician who desires basic and specific information on the picture tube and its acecssories (including conversion) without wading though reams of rechnical data. complicated circuit explanations.
140 pages $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$ Illustrated (Cat. No. 163) Only $\$ 2.40$

## FUNDAMENTALS OF TRANSISTORS

## by Leonard Krugman

THE TRANSISTOR is now evolved to a point where it is suitable for many applications, hoth as a direct replacement and as a supplement to many applications, hoth as a direct replacement and as a supplement to
electron tubes. An expert has consolidated in practical form for the repair electron tubes. An expert has consolidated in practical form for the repair
man, the engineer, the hobbyist and the engineering student the explanation man, the engincer, the hobbyist and the engineering student the explanation
and application of the transistor. Basic transistor operation, characteristics, and application of the transistor. Basic trans
performance and applications are explained.
160 pages $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$ Illustrated (Cat. No. 160 ) Only $\$ 2.70$

## ADVANCED TELEVISION SERVICING TECHNIQUES

WRITTEN BY THE RETMA Pilot Training School Teaching Staff A completely NEW approach to books for TV service technicians. Written hy experts who are teaching every day. The contents have been tried and proven to be the finest ever written. Completely practical. A step-by-step, approach to how to service every section of a TV receiver with every kind of test equipment - by resistance measurement, by voltage measurement, by means of the scope. It explains the uscs of test equipment of all kinds in connection with TV receiver servicing, such as sueep Renerators signal generators - vacuum tube voltmeters - scones, ohmmeters!
This is not a theory book! It is a hook which every tectinician can usc on the bench - and every student in a TV school can use, becausc it tells what to do and how to do it.
Approx. 175 pages $81 / 2^{\prime \prime} \times 11$ " (Cat. No. 1611 Only $\$ 3.60$

## COLOR TV DICTIONARY

## by J. R. Johnson

FIRST COMPLETE explanation of new color TV terms with their definitions that everyone - service technicians, students. engineers, amateurs - interested in color television must be familiar with. This is more than a dictionary! Over 50 illustrations.
72 pages $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$ (Cat. No. 164) Only $\$ 1.25$

## R-C AND R-L TIME CONSTANT <br> Edited by Alexander Schure, Ph.D., Ed.D.

IIRST IN A SERIES of revicw books written expressly for the student who is studying electronics or the technician who has studied electronics and wishes to understand Time Constant (R-C and R-L) more clearly. It supplements the contents of courses in text books which are on a technical institute level. Covers practical applications of Time Constant and how it effects circuit operation.
About 48 pages $51 / 2^{\prime \prime} \times 91 / 2^{\prime \prime} \quad$ (Cat. No. 166) Only $\$ .90$

## ANTENNAS

## TV AND OTHER RECEIVING ANTENNAS

(Theory \& Practicel by Arnold B. Bailey, Antenna Consultant COMPLETE INFORMATION on all antenna types. Exclusive data available through no other source. Vitally useful in selection of antennas for various reception areas. Tables, charts and graphs replace mathematics. Valuable for technicians, engincers and students.
(Cat. No. 134)
606 pages $51 / 2^{\prime \prime} \times 1 / 2^{\prime \prime} \quad 310$ Illustrations Net Price $\$ 6.90$
TV AND ELECTRONICS AS A CAREER
by Ira Kamen and Richard H. Dorf and others
Here's your guide book to a profitable career in the electronics industry. Experts tell you what opportunities are offered, how to prepare yourself for them, how to go about getting the job you want.
(Cat. No. 137 )
326 pages $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime} \quad 136$ illustrations Net Price $\$ 2.50$ TV PICTURE PROJECTION AND ENLARGEMENT by Allan Lytel
THE STORY behind TV picture enlargement by viewing lenses and by projection systems is important to every serviceman. Read this text, which explains "how" and "why," and you will find adjustments of these receivers can be simple and rapid. It is a combinaton of theory and practice dollar-making, time-saving practice!
192 pages 140 illus. (Cat. No. 128) Net Price $\$ 3.30$

QST. Fanking high amozg the lerding technical publications of the world, QST presents cover to cover readiag each month The oldest continuously published radio magazine (it was founded in 1915) its technical xrticles are aimed at all classes of radio enthusiasts. Articles on radio theory literally paint word pictures for easy and thooough understanding of the subject . . . canstruction articles are clearly illustrated with pictures and diagrams. Typography and clarity are tops. Through the years its pages have presented many famous "tirsts" in the rrdio fielc. General interest articles and special columis abound. Complete advertising coverage. Truly, the "comp'e:e magczine on amateur rudio."............................ST and ARRL memberskip, $\$ 4$ in USA, $\$ 4.25$ in Canada, $\$ 5$ Elsewhere

The RADIO AMATEUR'S HANDBOOK. Internationaliy recognized as one of the most valuable and widely used books in electronics, the Radio Amateur's Handoook is universally consulted by both amateur and prajessional talike. Its more than 700 pages are arnually revised and modified in the light of current application ard technique. Known as the standard manual of amateur radio communication, the Handboosk is found on the desks of executives, engineers, technicians and purchesing agents of the redio industry as often as in the shacks of radio amateurs throuchout the world. In its capaeity as a text alone it is widely used in radio schools, colleges and the Armed Forces. Twentyseven :hapters plus a catalog secticn including invaluable complete data on all types of vacuum tubes........................... $\$ 3.00$

HOW TO BECOME A RADIO AMATEUR. Pointing the way for the beginner, How to Become a Readic Amateur tells what amateur radio i: and how to 'ge: styrted in this fascinating hobby Through its payes in clear, concise lanquage you learn about amathur radio. Special emphasi= given to the needs of the Novice licenser with trree complete simple stations featured.

The radio amateur's LICENSE MANUAL. Situdy guide and reference book, the License Manual points the way toward the coveted amateur licenst: Coruple:e with typical questions and answers to ali of the FCC amcteur examinations - Novice, Techuician, General and Extra-Class - it provides an ideal mears of selfstudy and examination. Continually kept up to date. Complete FCC regulations included..

The ARRL ANTENNA BOOK. A camplete book on antennas and antex:na systems representing an accumulation of years of pracical experience and knew-how. Its fourteen chapters are divided into two princifal divisions: (1) a basis text on antennas and irensmission lines, wave propagation and its relationship to antenna design, and the perfomance characteristics of directive antenna systems, and (2) specific designs for a multitude of antennas for various amateur bands. 268 pages, 408 illustrations.
. $\$ 1.50$
A COURSE IN RADIO FUNDAMENTALS. A complete course of study for use with the Radio Amateur's Hendbook, it enables the student to learn thoroughly the principles of radio by foilowing the time te:ted principle of "learning by doing." Study assignments, experiments and examination questions make this book equaliy applicable to individual home study or classroom use. Eicht perts lead the student from basic Elecricity and Magnetism to Wave Propagation and A.ztennas.

HINTS AND KINKS. If you build equipment and operate on arealeur radio station you will find Hints and Kinks a migkty valuable book in your shack and workshop. More than 300 practica: ideas give you a helping hand at all times......... $\$ \mathbf{\$} .00$

LEARNING THE RADIOTELEGRAPH CODE. Supplying the k\&y toward aastery of the International Morse Code, this publication trains you to handle the code skillfully and easily. Based on the accepted method of "sound conception," it is a boon to the beginner without access to the help of an experienced operator or code machine. Practical material for both home study and classroom use, as well as general operating information, is included...............................................................25c postpaid

ARRL WDRLD MAP. Printed in eight colors on heavy map paper with 267 countries clearly outlined. Call letter prefixes printed on the countries and in the margin. Continental boundaries and time zones plainly marked. Thirteen cotuntries have call districts inaicated. An equi-distant azimuthal projection centered on Wichita, Kansas. Prepared by ARRL and Rand-McNally. $\$ 200$

QST BINDERS. No need to let your copies of QST rest in a cisordered pile. . . . A QST Binder will keep them neat and orderly. Sturdy binders hold a one year file, protecting and preserving your copies. QSTs in the Binder open and lie flat at any page permitting quick and easy reference......................32.50

ARRL LIGHTNING CALCULATORS. Quick as a flash the answer is your: when you use an ARRL Lightning Calculator to sclve your =adio problems. TYPE A provides rapid, accurate an'd simple solutions of problems involving frequency, inductance and capacity. TYPE B provides direct reading answers to Ohm's Law problems involving resistance, voltage, current and pewer. An invaluable cid for the amateur, technician or engizeer.

LOG BOOX. Record keeping made easy. Fully ruled $81 / 2$ by 11 inch pages with legible headings permitting all necessary entries. Spiral bound to lie flat when open. 50c

MINILOG. Mobile and portable operational needs are met by this packet size log. Spiral bound, 4 by 6 inch pages. Headings for all necessary information.

30 c

RADIOGRAMS. First impressions are important. Official ARRL Radiacram Forms printed on high grade paper add prestige; inform: the addressee about amateur radio.

Per pad of 70 blanks, 35e

## RCA TECHNICAL LITERATURE

THE MOST AUTHORITATIVE IN THE INDUSTRY

- RCA KINESCOPES, KB-1022

Complete information on Characteristics, Interchangeability, Conversion

Here is the most complete booklet on kinescopes available in the industry. It was prepared by the RCA Commercial Engineering organization, which has produced the most authoritative and widely used technical literature in the trade. This 20-page booklet furnishes you with all the information you need on virtually every kinescope now on the market, well over 100 types. It tells you what to do when converting from glass to metal, from round to rectangular, from small to large size. You'll find that 'RCA Kinescopes' is one of the most valuable pieces of literature in your technical library. It's available now, at 25 c per copy.

## - SERVICE PARTS DIRECTORY FOR RCA VICTOR TV RECEIVERS (1952)

SP-1021 ( $\left.107 / 8^{\prime \prime} \times 163 / 4^{\prime \prime}\right)-36$ pages. Schematic diagrams, wiring diagrams, replacement parts, and top and bottom views for the 27 models of 1952 RCA Victor television receivers. The comprehensive index references RCA TV model names to model numbers, and model numbers to the publication in which information may be found. The format is similar to the popular directory for 1950-
 1951, the SP1014. Price, 50 cents per copy.

## - SERVICE PARTS DIRECTORY FOR RCA VICTOR TV RECEIVERS (1950-1951)

SP. 1014 ( $107 / 8^{\prime \prime} \times 163 / 4^{\prime \prime}$ )—142 pages.
 Schematic diagrams, replacement parts, and top and bottom views for the 71 models of 1950 and 1951 RCA Victor television receivers. The comprehensive index, easy to read model and chassis numbers, and the grouping of information on each set provide a ready source of reference for the service technician.

Price, $\$ 1.50$ per copy.

[^35]

## - RCA TV COMPONENTS

CTV. 1015 ( $\left.107 / 9^{\prime \prime} \times 83 / 8^{\prime \prime}\right)-20$ pages. Tabulated, easy-to-read specifications on over 80 RCA TV Components. Gives electrical ratings and characteristics, outline drawings, associated components, and typical circuits. Price, 35 cents per copy.

## - rCA VICtor service data

- Schematics
- Alignment Procedures
- Trouble-Shooting Suggestions
- Waveforms
- Wiring Diagrams

Complete, authoritative servicing information on all RCA Victor Radio, Phono, and TV sets . . . which cannot be found elsewhere. You'll find the servicing information you need, quickly and easily in RCA Victor Service Data.

## - RECEIVING TUBE MANUAL

RC. $17\left(83.8^{\prime \prime} \times 51 / 2^{\prime \prime}\right)-320$ pages. Supersedes RC-16. Revised, expanded, and brought up-todate. Contains the latest receiving tubes, in cluding types for black and white and color television applications. Features tube theory written for the layman, application data, re-sistance-coupled amplifier section, and several new circuits for high fidelity audio amplifiers. Features lie flat binding. Frice 60 cents

## - RADIOTRON DESIGNER'S HANDBOOK

The long-awaited 4 th edition of the Radiotron Designer's Handbcok covers comprehensively and thoroughly the design of radio and audio circuits and equipment.

- More than 4 times larger than the thitd edition.
- $150083 / 4^{\prime \prime} \times 51 / 2^{\prime \prime}$ pages. 1000 illustrations.
- More than 2500 references, many keyed in text.
- Extensive, cross-reference index - 7000 entries.
- Price $\$ 7.00$.

## - PHOTOTUBES, CATHODE-RAY AND SPECIAL TUBES

Bulletin CRPS-102-A ( $11^{\prime \prime} \times 81 / 2^{\prime \prime}$ )-20 pages. Completely revised and brought up to date. Technical information on 150 single-unit twin-unit, and multiplier phototubes, cathoderay tubes, camera tubes, monoscopes, and types for special applications. Includes ter. minal connections. Price 15 cents.*

- receiv ng tubes for am, fM, \& television broadcast

3ulletin 1275-F ( $107 / 6^{\prime \prime} \times 83 / 8^{\prime \prime}$ )-24 pages. Com letely revised and up to date. Contains char :cteristics of more than 495 RCA receivinc ubes and kinescopes. Socket connection diagrams arranged for quick and easy reference rice 15 cents.*

## - INSTRUCTION BOOKLETS

Complete authorized information on RCA transmitting tubes and other tubes for communications and indus try. Be sure to mention tube-type booklet desired. Single copy on any type free on request.

## - rCA battery catalog (bat-134B)

Up-to-the-minute information on RCA's complete line of dry cell batteries. Includes these important features:

- Complete RCA Battery Type descriptions
- Accurate socket data
- Battery Interchangeability Directory (cross reference on 13 Battery Brands shows the correct RCA replacement for 498 different battery types)
- Battery Replacement Guide
(lists correct RCA Battery complement for portables from 57 different manufacturers)

Price, 10 cents each

## - TUBE HANDBOOK

ALL TYPES HB-3 ( $7^{3} 6^{\prime \prime} \times 5^{\prime \prime}$ ). The bible of the industry-contains over 2700 pages of looseleaf data and curves on all RCA receiving tubes including kinescopes, power tubes, cathode-ray tubes, phototubes, and special tubes. Four deluxe 4 prong binders imprinted in gold. Available on subscription basis. Price $\$ 13.50^{\circ}$
 nclud ng service for first year. Write to -ommercial Engineering for descriptive 101*e: and order form.

* rover and gas tubes for radio and industry

Bulletin PG-101- $\AA$ ( $11^{\prime \prime} \times 81 / 2^{\prime \prime}$ )-20 pages. schnical information on more than 160 RCA acuum power tubes, rectifier tubes, thyrarons, ignitrons, and voltage regulators. Includes terminal connections. Price 15 cents."

- RCA INTERCHANGEABLLITY DIRECTORY

Form 1D. 1020 ( $107 / \mathrm{g}^{\prime \prime} \times 83 / \mathrm{g}^{\prime \prime}$ )-20 pages. Contains detailed industrial tube replacement information. 1600 type designations of 29 different manufacturers are listed in numeri-cal-alphabetical sequence in this directory. Free.

Copies of the publications listed above may be obtained from your RCA Tube Distributor, or direct from Commereial Engineering, Tube Division, Radio Corporation of America, Harrison, New Jersey.
*Prices shown apply in U.S.A. and are subject to change without notice.

## EAMOUS COYNE SHOP－TESTED TECHNICAL BOOKS

Here arr the latest solumes in the practieal COTNE book series．The data contained in these piblications is up－to－the－minute．All facts have been carefully pre－tested in the coYNE Shops，so that the information you get is authoritative and applicable to actual work in the field．COYNE Books pay for themselres in the us⿻上丨𣥂⿱亠䒑十⺝刂土，practical and complete information they provide．

## TY SERVICING <br> CYCLOPEDIA

The fact－packed Telerision ref－ ereace book by II．P．Manly． Corers every phase of TV，in－ cluding latest data on color TV and UHF．Provides a conplete understanding of how TV re－ ceiverṣ work，how to repair them and seep them operating properly．Special complete sec－ tion on picture pattern serricing （dozens of actual photos）．In－ clutes methods of testing and messurine performance in each section of any TV set，ulignment，amplifiers，antennas，controls，ion traps，syne circuits，power supplies，video IF ampli－ fiers，swrep oseillators，allaptors，converters－every－ thing coyered fully，practically，understandably an essential bouk for TV service technicians，experimen－ essers artudents－pacted with practical helpful in－ trar．

No．CTB－I
$\$ 5.95$

## LATEST TESTING NSTRUMENTS FOR <br> SERVICING RADIO－TY

The latest edition tells all about modern television，radio and electrical testing equip－ ment and how to use it most effectively．Parked with money naking shortcuts on troulble－ shooting，servicing，ronstruction and other sulbjects inrolving the use of test instruments．Includes 220 photos and diagrams．Covers Multipliers，Resistors，Ohmmeters，Oscillosenpes and many other subjects．All data has been pre－tested for practieal use in the Coyne radio shops． 350 pages， $5 \% 4^{\prime \prime} \times 8 \% \%^{\prime \prime}$ ．
No．CTB－3．
\＄3．25

## TELEVISION AND RADIO HANDBOOK

Here is the remarkable latest edition television and radio ＂answer＂bouk．With its 3000 facts packed into a single handy colume，the radioman，amateur and professional will find comt plete practical radio service in－ structions to sperd his trouble－ shouting．Corers most frequently encountered troubles in radio servicing；offers short－cut，time－ saving and work－saving solutions． Illustrated with hundreds of charts，diagrams， tables，eircuits and short－cuts．Latest data on UHF conversion methods，TV boosters，etc．Fully indexed fur ifuick，convenient reference． 375 pages． $41 / 2^{2}$ ． 7 1／4．
No．CTB－5
$\$ 2.75$

PRACTICAL TV SERVICING AND TROUBLE．

Authoritative，com plete，invaluable．Shows how in align sets，hou to serrice by patterns， how to install anten－ nas，how to use deflec－ tion methods，how to install methods，how to tune every part of the tune every part of the Audio and Video sec－ problems in the high and low voltage power supply sections．Full data on sweep oscillators，frequency contral．FM．amplifiers，tuners，etc．Features data on coior TV and new UHF channels．Includes 300 illustations（many in 4 colors）；gives 1500 TV farts．Absolutely essential for a complete grasp of
proper servicing techniques． 400 pages． $51 / 2^{\prime \prime} \times 81 / 2$＂． No．CTB－4 $\$ 4.25$

## TRANSISTORS AND

 THEIR APPLICATIONSBxplains in simple language the theory and practical ap－ plications of Transistors in TV，Radio and Flectronics Explains Transistor theory circuitry，characteristies components，testing instal lation and servicing．Clears an common misconceptions clearly explains the nature
 and use of Transistors． 100 pages $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$ No．CTB－7

## INDUSTRIAL <br> ELECTRONICS

Written especially for thusy electricians who want practical ＇on－the－fob＂simplified clec ronic information．TY＇－Radi echniciaus and electricians will find this book a＂rold－mine， ind this hollow belinine Starts riubt at electronic diata． Starts right at the begimning－ explains in simple language all the basic principles of electron cs．Fully illustrated with help ful photographs，diagramss and
tables． 468 pages． $53 / 4 / \times 83 / 4$
 tables． 468
No．CTB－2 $\qquad$

## ELECTRICAL TROUBLE－ <br> SHOOTING MANUAL

Writen for malntenance men－ or＂beginners＂as well as＂old timers＂－to help increase arning caparity．Contains a new step－ly－step trouble－shoot ing course and over 600 com mercial diagrams．In addition to full corerage of Electricity the look also rovers Refrigera
 ion，and rontains a large sec tion devital to serrieing every type of Industrial Electronic Eqlipment． 626 pages． $81 / 2^{\prime \prime} \times 11^{\prime \prime}$ ．
No．CTB－101

## ELECTRICIAN＇S

Here is the book erery elec trician ureds．Inrludes the atest code requirements，build－ ing condes．rules，tables，charts， testing glides，sizes of wire to ise on certain jols；full data on motors，currents and hun－ dreds of other gubjects every electrician needs to refer to Hakes available for immediate eference over 600 different electrical subjects． Electronies，ton，is included． 348 pages． $41 / 2^{\prime \prime} \mathrm{x}$ $71 / 2^{\prime \prime}$ ．illustrated．
No．CTB－102．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．．$\$ 2.75$

## APPLIED

PRACTICAL RADIO－TV
New set（1952 Fdition） of 5 practical．invaluable books．Up－to－the－minute 1780 page lihrary， $53 / 4^{11}$ x 8 \％／8． 500 subjects on latest Radio and TV＂know－ how．＂Includes color TV and IIHF．Tells how to install．align，balance all IV and Ifadio sets．For
 larity．orer 1200 illustrations and photograplis show the＂breakdown＂of equipment and circuits． VoLUME 1：Application of Rarlio and TV Principles． VOLUME 2 ：Radio．TV and F．M Receivers．VOLUME 3．Riadio and TV cirenits VOLUME 4：Latest Test－ 3：Radio and TV Cirents．VoluME 4：Latest Test－ ing Instrumens for Servicing Radio－Telerision，Vol－ UME 5：
Manual．

## POPULAR BOYCE BOOKS

Here are the two widely used volumes that com－ pletely and thoroughly digest the subjects of Tele－ vision and ladio．Easy－to－understand，thorough in their coverage，these best－selling books are a ＂MUST＂for the library of anyone interested in Electronics．

## VIDEO HANDBOOK

Affords raluable instruction on the entire subject of Telerision；gives expert data on methods of design，construction，production，installation，opera－ timn and seryicing．Fourteen complete sections，pro－ fusely illustrated and clearly written，corer the field of TV extanstively．This remarkable and prac－ tical hamboak is widely used by schools，engineers． students，experimenters and industrial technicians． 892 pages． $5^{\prime \prime} \times 7^{\prime \prime \prime}$

Sec．1－TV Past，Present and Future
Sec．2－Fundamentals of Blectronic TV
Sec．3－The TV Recciver
Sec．4－The TV Station
Sec．5－TV Aotenna Systems
Sec．6－Creating a TV Show
Sec．7－Deseription of Modern TV Receivers
Sec．8－Installing TV Rureivers
Sec． 9 －Servieing TV Recpivers
Sec．10－TV Test Equipment
Sec．11．－Building a TV＇Receiver
Sec．12－Mata Section
Sec． 13 －TV Terms
Sec．14－Isibliography
No．BB－2

## RADIO \＆ELECTRONICS HANDBOOK

Here is the basic knowledge and data of Radio and Blectronics digested into 18 sections，in com－ plete casy－to－find form．This is the most widely used handionk of its kind，packed with practica data presented in understandable language and supported by a wealth of ilustrations．Clearly explains radio and electronic theory，and covers in detail all phases of the stlbject．Ahsolutely invalu－ able to anyone concerned with radio or electronics 890 pages， $5^{\prime \prime} \times 7^{\prime \prime}$

Sec．1－Fundamentals of Radio
Sec．2－Vacuum T＇mes
Sec．3－llesistors
Sec．4－（＇aparitors
Sec．5－Chokes and Transformers
Sec．6－Switches and Dry Rectifiers
Sec．7－I 7 asic Circnits
Sec．8－A－M Receliers and Transmittery
Sec．9－Frequeney Modulation
Sec．10－Televisim
Sec．11－Sound Systems
Sec．12－Recording
Sec． 13 －Power Supplies
Sec．14－Antennas and Transmission Lines
Sec．15－Meters and Test Wquipment
Sec． 16 －Testing，Measuring and Aligaing
Sec． 17 －Jadio and Elertronic Data
Sec． 18 －Vacuum Tube Chart and Pin Index
No．BB－1．

## HANDY SERVICE GUIDES

## AM-FM SERVICING SHORT-CUTS

Describes actubl AM and FM service case histories; shous practical ways to solve similar trondes in any AM of FM set. 152 pages. $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$.
Ho. RK-1............................................................ 51
DIAL CORD STRINGING GUIDES
Volume 4-Shows the one right way to string dial rords in recelvers made from mid-1951 thrnugh 1953. With index. 96 pages. $51 / 2^{\prime \prime} \times 81 / 2$
No. DC-4 $\qquad$ $\$ 1.00$
Volume 3-cousers sets produced from 1950 through mid-1951, and TV-radio sets from 1946 through mid-1951. 96 pages. $51 / 2^{\prime \prime} \times 81 / 2$
No. DC-3
.... $\$ 1.00$
Volume 2 -rovers receivers produced from 1947 throush 1949. 96 pages. $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$ No. 1 throush 1946. 112 pages. $51 / 2 " \times 81 / 2^{\prime \prime}$.
No. DC-1
$\$ 1.00$
RADIO SET TUBE REPLACEMENT GUIDE
Shows where to replace each tube in 5500 receivers made from 1938 to 1948. 196 pages, $51 / 2{ }^{\text {n }} \times 81 / \%^{\prime \prime}$

## INVALUABLE TELEVISION BOOKS

 TELECASTING OPERATIONSThe only complete coverage of every phase of Telecasting, from theory through equipment, operation, maintenance, production-indispensable to anyone maintenance, production-indispensable to anyone No. OH-1.

PHOTOFACT TELEVISION COURSE A "must" for everyone interested in Telerision. Gives a clear, complete understanding of TV principles, operation and practice. With glossary of terms. 308 pages; $81 / 2^{\prime \prime} \times 11^{\prime \prime}$; illustrated. No. TV-1.
.... $\mathbf{\$ 3 . 0 0}$

## TV SERVICING SHORT-CUTS

Describes actual TV sertice case historles; shows how to solfe similar problems in any TV receiver quickly and profitably. 100 pages, $51 / 2^{\prime \prime}$ I $81 / 2^{\prime \prime}$.
No. TK-1.

## TV TEST INSTRUMENTS

Tells how each test instrument operates. Covers: Vacuum Tube Voltmeters, AAI Signal Generators, Sweep Signal Generators, Oscilloscopes, Video Signal Sweep Signal Generators, Oscilloscopes, Video Signal Generators, Ficld intensity Meters, Voltage Ca
brators. 148 pages, $81^{\prime \prime}$ I $11^{\prime \prime}$; illustrated.

## UHF CONVERTERS

Describes Lilf converter design and shows how they work. Covers 21 different converters in all popular makes. An essential book for the TV technician. 44 pages, $81 / 2^{\prime \prime}$ y $11^{\prime \prime}$.
No. UC-1
$\$ 1.00$
UHF ANTENNAS, CONVERTERS E TUNERS Covers all UHF antenna types, transmission lines and matehing networks, UHF installstion practices, UIIF converters and UHF tuners. 136 pages, $1 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$
No. UHF=7
50
TELEVISION ANTENNAS, 2nd Edition Deseribes all TV antenna tyjes. Tells how to select and install antennas, find troubles, use short-cuts, Full coverage of antenna principles and construction. 224 pages; $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$.
No. TAG-1 $\qquad$ $\$ 2.00$

## SERVICING TV IN CUSTOMER'S HOME

 Shows how to diagnose troulle using capacitor probe and VTVM. Describes "tube-pulling" method of trouble diagnosis and other short cuts for field servicing. 96 pages, $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$; illustrated.No. TC-1 $\qquad$

## MAKING MONEY IN TV SERVICING

Shows how to start and operate a profitable serricing business. Covers all plases of operation. 136 pages, $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$; illustrated.
No. MM-1
$\$ 1.2 \mathrm{~S}$

## TV TUBE LOCATION GUIDES

VOL. 4 -Shows tube positions and functions in hundreds of important TV receivers. Quickly helps locate the faulty tube. All new diagrams continue data coverage from Volume 3 (below). 192 pages, $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$; illustrated.
No. TGL-4 $\qquad$ $\mathbf{\$ 2 . 0 0}$
VOL. 3-Corers receivers not included in Vols. 1, 2 and 4. 192 pages, $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$
No. TGL-3
VOL. 2 -Gires tube positions and functions in hundreils of TV receivers Covers receivers not included in Vols. 1 and 3.208 pages, $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$. No. TGL-2.
$\$ 2.00$
VOL. 1-Corers hundreds of TV receivers made by 56 manufacturers. 208 pages, $51 / 2^{\prime \prime} \times 81 / 2^{\prime \prime}$; illus. No. TGL-1.

## AUDIO PUBLICATIONS THE RECORDING AND REPRODUCTION <br> OF SOUND

Enlarged 2nd Edition. New, completely revised and vastly enlarged. Biggest selling volume on the entire subject of Andio. Covers all aspects of recording, with full analysis of recorders and techniques. Complete data on amplifiers, speakers, mirrophones phonograph equipment, P.A., etc. Authoritatire work by 0liver Read. 810 pages, $6^{\prime \prime} \times 9^{\prime \prime}$. Profusely illus. No. RR-2

## AUDIO AMPLIFIERS

VOL. 4-Provides detailed, clear, uniform analysis of 75 important audio amplifiers and tuners pro duced during 1951 and 1952. Analyses are based on study of the actual equipment in the laboratory Includes circuit diagrams; parts information, ful technical coverage. 352 pages, $81 / 2^{\prime \prime} \times 11^{\prime \prime}$.
No. AA-4
... $\$ 3.95$
VOL. 3 -Covers 50 amplifiers and 22 tuncrs made during 1950.352 pages. $81 / 2^{\prime \prime} \times 11^{\prime \prime}$.
No. AA-3
$\$ 3.95$
VOL. 2-Corers 104 well-known audio amplifiers and 12 important tuners produced during 1949. 368 pages, $81 / 2^{\prime \prime} \times 11^{\prime \prime}$. Profusely ilfustrated.
No. AA-2
$\$ 3.95$

## RECORD CHANGER MANUALS

VOL. 5-Prorides clear, easy-to-use electrical and mechanical data on 22 record changers and tape recorders made during 1952 and 1953 . Feature exclusive "exploded" view diagrams, profuse phato graphic illustrations; full change cycle data in formation on adjustments; service hints and kinks complete replacement parts lists. 288 pages, $81 / 2^{\mathrm{m}}$ I $11^{\prime \prime}$; illustrated.
No. CM-5
$\$ 3.00$
VOL. 4-Corers 38 changers and recorders produced during $1951_{4.288} .2$ pages, $81 / 2^{\prime \prime} \times 11^{\prime \prime}$
No. CM-4
$\$ 3.00$
VOL. 3-Covers 44 models made in 1949 and 1950 , Including wire and tape recorders. 288 pages, $81 / 2^{\prime \prime} \times 11^{\prime \prime}$
No. CM-3........................................................................ 3.00
VOL. 2-Covers 45 changer models made in 1948 and early 1949 , plus leading wire and tape recorders. 432 pages, $81 / 2^{\prime \prime} \times 11^{\prime \prime}$; illustrated.
No. CM-2.

## COMMUNICATIONS RECEIVERS

VOL. 2-Complete design and construction analysi of 26 popular communications receivers produced in recent years. Each unit is thoroughly analyzed from actual laboratory study. Over 190 pages, $81 / 2^{\prime \prime} \times 11^{\prime \prime}$ No. CR-2

VOL. 1-Copers more than 50 of the most popular communications receivers manufactured hetween the end of the war and 1948. 264 pages, $81 / 2^{\prime \prime} \times 11^{\prime \prime}$. No. CR-1.

## AUTO RADIO SERVICE MANUALS

VOL. 3-Full service data on 47 chassis used in 1950,1951 and 1952 auto radio receivers. 288 pages, $812^{\prime \prime} \times 11^{\prime \prime}$.
No. AR-3
\$3.00
VOL. 2-Covers 60 chassis ( 90 models) used in 1948,1949 and 1950 auto radios. 288 pages, $81 / 2^{\prime \prime} \times 11$
$\$ 3.00$
VOL. 1-Covers 100 auto radio models made from 1946 to 1949 by $24 \mathrm{migrs} 396 \mathrm{p} ., 81 / 2^{\prime \prime} \times 11^{\prime \prime}$

## OUTSTANDING RADIO and ELECTRONIC BOOKS

RADIO HANDBOOK (ізтн воाтом)
$\$ 600$ IN U.s.A.
The most valuable reference work for practical radiomen, radio technicians and advanced amateurs. How to design, construct and operate standard types of radio transmitting and receiving equipment, at both low and high frequencies. Reference data galore; profusely indexed for easy finding, clearly illustrated, easy to read. New information on simplified TVI-proofing, bandswitching fixed-station and mobile transmitters, a remotely-tuned v-f-o for mobile or fixedstation use and many new ideas for improved operation. THE LARGEST "RADIO HANDBOOK" EVER PUBLISHED. 734 pages. Clothbound, goldstamped.

The still larger RADIO HANDBOOK, 14th ed., to be published winter 1954-55 tentative price
$\$ 750$
IN U.S.A.

## 

Every TV man needs if; every TV fan needs it. This amazing book has taken the failure out of many unsuccessful installations in low-signal areas, has improved the picture for many discouraged TV owners. Practical, easy to understand. How to select the best transmission lines, boosters and receivers . . eliminate "ghosts" . . . minimize fading. How to reduce interference and improve receiver performance. The standard guide for every installation engineer as well as a popular text for all TV enthusiasts. Paperbound. NEW SECOND EDITION.

## ANTENNA MANUAL

$\$ 350$ in U.s.A.
A necessity for everyone interested in transmission or reception. Gives the "why" and "how" of radio-wave propagation in the HF, VHF and UHF ranges, with a comprehensive coverage of antennas and transmission lines for all frequency ranges. Practical data on all the more popular types of antennas, and constructional information on many new FM, TV and communication antennas. Has the same happy combination of simply explained reference and background material combined with practical how-to-build-it data which has made the RADIO HANDBOOK one of the largest selling radio texts. Clothbound, goldstamped.

RADIOTELEPHONE LICENSE MANUAL
\$375
IN U.S.A.
Now combined in one convenient, easy to use volume... all the information necessary to obtain any commercial radiotelephone license. The complete list of questions and the clear, easily understood answers make this study guide an absolute necessity for everyone interested in any grade of radiotelephone license. Contains four elements: Element 1: Questions On Basic Law; Element II: Basic Operafing Practice; Element II: Basic Radiotelephone; Element IV: Advanced Radiotelephone. Paperbound.

## SURPLUS RADIO CONVERSION MANUALS

Conversions and data for: VOLUME I-BC-221 Frequency Meter; BC-342 Receiver; BC-348 Receiver; BC-312 Receiver: BC-412 Oscilloscope as a test scope or as a television receiver; BC-645 420-Mc. Transmitter/Receiver; BC-453A Series Receivers; BC-457A Series Transmitters; SCR-522 144-Mc. Transmitter/Receiver; TBY Transceiver with Xtal Control; PE-103A Dynamotori BC-1068A V-h-f Receiver; Electronics Surplus Indexi Cross Index of VT-Number tubes. VOLUME 11 - ARC-5 and BC-454 Receivers for $28 \mathrm{Me;} \mathrm{ARC-5} \mathrm{and} \mathrm{BC-457} \mathrm{Tx} \mathrm{for} 28-\mathrm{Mc}$. Mobile; ART-13 and ATC Xmitter; Surplus Beam Rotating Mechanisms; Selenium-Rect. Power Units; Hi-Fi Tuner from BC-946B Receiver; ARC-5 V-h-f Transmitters; GO-9 and TBW Xmitters; 9-W Amplifier from AM-26; TA.12B \& TA-12C Xmitters; AVT-112A Aircraft Xmitter; BC-375 \& BC-191 Xmitters; Model LM Freq. Meter; Primary Power Requirements Chart; ARB Recr. Diagram Only. Paperbound.

## WORLD'S RADIO TUBES (bran's radio tube vade mecum) - \$500 in u.s.a. The most complete list of transmitting and receiving tubes ever compiled. Characferistic data for over 15,000 tubes from 253 manufacturers. The only book of its kind, published in 16 languages. Paperbound.

## WORLD'S EQUIVALENT TUBES

(Bran's equivalent tube vade mecum)
\$500
A Companion volume to World's Radio Tubes. Lists in fabular, easy to follow form, completely equivalent tubes; tubes having a few differences and what these differences are. An invaluable
 aid to technicians and service-men in all parts of the world. Paperbound.

Due about June, 1954. Contains data on television tube only, similar to above.

## Mandl's Television Servicing

## EASY TO USE

A complete Master Trouble Index, listing 100 trouble symptoms in picture and sound with their possible causes and references to the pages on which directions for servicing are given, makes it easy for you to locate the source of trouble and correct it in minimum time. Dctailed trouble-shooting procedures cell you just What to do. Simple, clear explanations show how each unit in the TV receiver functions, with lists of the flaws that may occur in it, what points in the circuitry cause these flaws, how they affert orher components, and how they show up on the TV screen. Whether you want specific servicing instructions or further information about any part of the sec, you can easily and quickly find it here.

## THE PRACTICAL DETAILS YOU WANT

All the faults likely to occur, including those hard-to-find troubles, are dealt with. And you won't be confused by unnecessary theory. Only the essentials with. And you won't be confused by unnecessary theory. Only the essentials actually needed for practical servicing are given. You'll learn many practical time-saving methods:-simple signal-tracing procedures; how to improve recepalign I.P. stages; how to use the oscilloscope and orher test equipment, and many align i.P. stages; how to use the oscilloscop
trade tricks for diagnosing trouble quickly.

- NEW CHAPTER ON THE NTSC COLOR SYSTEM WITH SER. VICING FACTORS UP-TO-DATE DATA ON

## cascode tuners

automatically focused tubes new types of high-frequen. cy I.F. Systems
transistors
servicing UHF-VHF receivers
and other recent develop. ments

## HUNDREDS OF HELPFUL ILLUSTRATIONS

Original photographs, especially made for this book, show you what appears on the screen test patterns when there is a defective picture tube, diathermy interference, and scores of other causes of imperfecr pictures. 50 scope patterns give you handy checks for signal tracing and analysis of cir-
cuit performance. Hundreds of large, clear schematics, many from the major manufacturers, show you each circuit in each part of the TV receiver, and helpful block diagrams show you the arrange ment of the various parts in the set as a whole.

Mandl's TELEVISION SERVICE COURSE LABORATORY MANUAL
Working instructions and report sheets for 46 problems typical of those the serviceman meers. Covers each part of the receiver and rells exactly what to do and what to observe. Trouble index shows how faws appear in test patterns. Tables of useful data appended.

## Men on the job recommend these top-ranking aids

## Television for Radiomen 2nd Ed. by E. M. Noll

"By the time you are through with this book you'll have a GOOD foundation in TV," writes a radio and TV engineer. Written by a man nationally known for his many helptul articles and lectures on TV operation and servicing, this book principles, and function of every circuir and element in TV principles, and funcion of every circuir and element in TV reception ehe principles of trasmission, and the rech of instanlation, includes color and all latest developments.

## Television \& FM Antenna Guide

by E. M. Noll and Matthew Mandl A basic course on antenna theory combined with a complete handbook on all types of antennas. Shows you exactly how to determine, quickly and accurately, the best type of antenna for a particular site, the best position for it, and how to minimize the various kinds of interference. Includes full data on characteristics, dimensions, and comparatise performance of the different types of antennas.

## Movies for TV

by Jobn Battison
The basic information needed to insure success with movies for televising. Clear, simple explanations of TV principles that govern the telecasting of movies. Full details on construction, operation, and comparative costs of cameras, projectors, kinescope recordings, sound and lighting equipment, equipment for animation, editing, making titles and special effects. Practical do's and don't's of making newsseels, commercials. and features on film for telecastipg.

## Introduction to Practical Radio

by D. J. Tucker

One of the best "fundamentals" books 'ever published all the basic how's and why's of radio in terms you can EASILY understand. The necessary marh is explained at the points where it is used. Each principle is illustrated by many examples of its use in the construction and operation of radio apparatus. of its use in the construction and operation of radio apparatus.
Hundreds of practical problems for training.

## Elementary Mathematics for Radio, TV, and Electronics

by Bernhard Fischer and Herbert Jacobs

If you've ever hesitated to use a time-saving equation because you were nor quite sure how to set it up, or had moments of doubt about decimals and percentages, or wanted a quick check on your figures-this is the book for you! It makes crystal clear each step in the reasoning and each procedure in the arithmetic, geometry, and algebra needed by radio and TV technicians. You'll see how the simple, basic calculations are used in more complex problems. You'll find it easy to work out frequency resolutions, voltage drops, inductive reactances, decibels, and the many other problems in radio, television, and electronics in which accurate mathematics is essential. Hundreds of sample problems, both in the math itself and in its radio and TV applications, give yot ample practice.

## Radio and Television Mathematics

by Bernhard Fischer
A handbook of step-by-step solutions for every question requiring math in the FCC Study Guide and for hundreds of other circuit problems in radio, television, and electronics. Conveniently arranged under radio topics such as antenna power, plate-to-plate voltage, and 400 others, you'll find the formulas to use, the numerical values to substitute, and the step-by-step solutions to typical problems. 'By far the best book for preparing for FCC exams," says one radio man; and Radio-Electronics recommends it "for the place of honor beside its natural partner, the slide rule."

SMALL SWITCHES, LIMIT SWITCHES, AND MAGNETIC RELAYS

## SMALL SNAP-ACTION

This new, lightweight switch mechanism lends itself especially to applications where space is limited and long life is required.

The Switchette is operated by movement of the spring-return button located in the housing. This button can be actuated by a lever, bellows, or other means. Snap-action, double-break-contact construction gives the G-E Switchette a high current rating and makes it suitable for applications where the vibration is severe.

## FEATURES AND ADVANTAGES

.. Small (approximately $11 / 4 \mathrm{in}$. by $1 / 2 \mathrm{in}$. by $1 / 2 \mathrm{in}$.) and weighs only 9 grams ( 0.02 lb .).
2. Resists vibration and corrosion.
3. Phenolic-resin operating button provides better protection from live parts during operation.
4. Contact tips are 99.95 per cent pure silver.
5. Particularly suited to electronic applications because of negligible amount of contact bounce.
6. Five terminal arrangements are available, including the two shown above.
7. Wide variety of forms available; for example, three basic contact arrangements: single-circuit, normally open; singlecircuit, normally closed; and two-circuit, normally open and normally closed. Also many special forms.
Switchettes are available in ratings up to 10 amperes at 115 or 230 volts a-c. Write for Bulletin GEC-796.

SWITCH, G-E SWITCHETTE CR1070

Switchettas showing two terminal arrangements

## LIMIT SWITCH, CR1070-D1 12

This sturdy, open-type limit switch is operated by a plunger which provides $3^{\frac{7}{2}}$. inch overtravel. The contact mechanism of this derice is the G-E Switchette, which can be wired to control one normally open circuit and one normally closed circuit. Rated 10 amperes at 230 volts a-c. Write your nearest G-E Apparatus Sales Office for Eulletin GEC-197.

Open-type limit switch with push-rod operation

## GENERAL-PURPOSE RELAY, CR2790-E

The CR2790 relay is a compact attractively finished device for use either as a motor starter or a relaying unit. Available in either an open form or enclosed in a general-purpose or ex-
 plosion-proof housing. Three contact arrangements available: single-pole, single-throw; dou-ble-pole, single-throw; and double-pole, doublethrow. In the open form, all three contact arrangements use the same base, which facilitates mounting. In the enclosed form, the U-shaped cover makes wiring and servicing convenient. Rated 10 amp continuous, $110 / 120$ volts a-c.

## Applications

Control of pilot circuits in response to re mote control switch or thermostat, or for direct control of small motors which have built-in thermal overload protection.

As a fractional-horsepower motor starter, or in conjunction with a magnetic switch controlling larger motors, heating or lighting circuits, and signal systems. Bulletin GEC-257.

## Instruments JBi <br> Testers

## INSTRUMENT AND TESTER SWITCHES (LAMINATED)

## Rotary Selector - Single and Multi-Gang - Non-Shorting and Shorting

SS-14-2

BT Instrument-type Rotary Selector Switches are used widely in quality test equipment, portable instruments, inspection setups and avionics where trouble-free, dependable performance is of major importance. Available in two basic types-14 and 20 position-the design gives extra contacts in minimum space. One to six decks.

## features:

Reliability-Rigid, 3-post deck suspension, instead of the usual 2; all current carrying parts are brass or phosphor bronze, silver flashed and then heavily plated with pure silver to meet balanced spring (SS-14); leaf-type (SS-20), and sharp detent balanced spring (SS-14); leaf-type (SS-20), and sharp detent assure positive indexing. Springs of both switches are generally replaceable without disturbing soldered connections. Laminated plastic decks and rotors selected for maximum mechanical and dielectric strength.
Exceptional Compactness-14-position switch takes 13 circuits and" "off" in $2^{\prime \prime}$ circle; 20 -position switch handles 19 circuits and "off" in $2-23 / 32$ " circle. Each deck above first adds only $5 / 16$ ".

SS-20-2

Low Contact Loss-Double-grip collector arms, and large-area contacts, silver to silver, result in an average contact resistance of .007 ohms or less during the useful life of the switch.
Ample Dielectric-AC or DC; normal carrying capacity (not make-and-break), 1 amp.; maximum momentary capacity (not make-and-break), 5 amp.; maximum voltage between contacts 1,500 volts R.M.S.i between decks and qround, 2000 volts R.M.S.

Military Variations-The following can be supplied on special order at extra cost: (a) laminated plastic, Type PBE-P per Spec. MIL-P-3115B; (b) vacuum impregnation of rotors, decks, spacers, and ceramic spacers with approved fungicides; (c) hot tin dip on contact surfaces to be soldered; (d) 14 to 20 live positions, no off, (add suffix $F$, as SS-14-2F); (e) common position in non-standard location.

BASIC 14-POSITION: 11/4" Bar knob supplied only on individuclly packed units-not on bulk orders unless specified. Collector arm placed directly opposite to flat of shaft, unless otherwise specified. Contact lugs cnd common lugs positioned as shown below, 13 contacts per deck. One to six decks; for each additional deck (or gang) add $5 / 16^{\prime \prime}$ to depth. Continuous rotation type supplied unless otherwise specif:ed. Adjustable Stop normally is supplied on standard catcloged switches. Fixed Stops can be supplied on quantity orders at moderate cost. Panel locator positioned as shown unless ctherwise specified on bulk orders
BASIC 20-POSITION: $2^{2 "}$ Bar knob supplied only on individually packed units-not on bulk orders unless specified. Collector arm placed directly opposite to flat on shaft, unless otherwise specified. Contact lugs and common lugs positioned as shown, 19 contacts per deck, continuous rotation types. One to six decks; for each additioral deck, add $5^{\prime} 16^{\prime \prime}$ to depth. Continuous rotation type supplied unless otherwise specified. Panel locator positioned as shown unloss otherwise specified on bulk orders.

## SWITCH KIT (Laminated Phenolic)

Most of the 14 and 20 position laminated switches, plus special variations as needed, can be assembled quickly from the kit shown on an adjoiming page. Designers, service engineers, laboratories, and industrial maritenance departments will eapecially appreciate the convenience, flexibility, and time saved.

## ETCHED DIAL PLATES

For SS-14 or MS-14 Series; and for SS- 20 or MS-20 Series. Dull black finish - with raised bright metal numerals. $23 / 4^{\prime \prime}$ diameter.

## UNIQUE - MOLDED ROTARY SELECTOR SWITCHES

# Fully Enclosed - Single and Multi-Gang - Shorting and Non-Shorting 

- All moving contacts enclosed - minimizes dirt and corrosion.
- Contact lugs permanently integrated into switch assembly.
- Sturdy construction with 3 -post deck suspension, double grip collector arms, and rectangular drive shaft through decks for precision indexing.
- Interchangeable, electrically and mechanically, with J-B-T 14- and 20 -position laminated switches, widely used by industry and Armed Services.

## FEATURES:

For description of rigid 3-post construction; heavy pure

MS-20-1
tional compactness; . 097 ahm average contact resistance; current-carying capacity and voltage breakdown; see adjoinlng pase on SS- 14 and SS- 20 laminated switches. Besides fully enclosing all the moving contact parts, the molded switches difier from the laminated coastruction in the design of the detent mechanism, but both types provide the positive indexing whicb quickly identifies the superior quality of J-B-T switches.

BASIC 14-POSITION MOLDED (MS-14): 13 circuits and "off" per deck in 2 ". circle for compactnes:. Molded end cover regularly sumplied. $11 / 4^{" 1}$ Bar knob incleded verith individually boxed unitsnot on bulk orders unless specified. Collector arm placed directly opposite to flat of shatt, : : o thert knoo pointer points to live contact. Coramon or "off" contact lug s bent down for ready identification. Internal construction: dauble-grip collector arms hold contact lug on upper and lower surfaces; collector ring is self-wiping. One to ten decks add ${ }^{\text {fin }}$ " per deck (or gang) to depth; for eleven decks and over, add $1 / 2^{\prime \prime}$ to depth for double indexing mechanism; add ${ }^{5}{ }^{3}{ }^{2}$ " to depth for adjustable stop mechanism. Continuous rotation type supplied unless adjustable stop (type MAS) is ordered or on quantity orders, pre-sit fuxed stcps are specified. Panel locator is cvacilable on quantity orders when specified; on MS-14-4 and MS. 14-6, extra hex nut and longer sirew are supplied for inverting supporting screw nearest commor, thus converting into panel locitior.
BASIC 20-POSITION MOLDED (MS-20): 19 circuits and "off" per deck in $25 \%{ }^{\prime \prime}$ ", circle for compuctness. Molded end cover regularly supplied. 2" Bar knob included with individually boxed unitsnot on bulk orders uniess specified. Collector arm placed directly opposite to flat of shaft, 30 that knob pointer points to live contact. common or "off" contact lug is bent down for ready identification. Internal construction: dcuble-grip collector arms and self-wiping collector ring are standard canstruction. One to seven decks; add fin $^{\prime \prime}$ per deck (or gang) to depth. Continuous rotation type supplied; on quantity ordera, preset fixed stops are available. Panel plied; on quantity ordera, pre-set fixed stops are available, Panel locator available on quantity orders when specified; on MS-20-4
and MS-20-6, extra hex nut and longer screw are supplied for inand MS -20-6, extra hex nut and longer screw are supplied for in-
verting supporting screw nearest zommon, thus converting into verting suppo
panel locator.

## LEVER ACTION SWITCHES, KITS AND SPECIAL SWITCHES

3. and 4-Position Lever Switches - New 5-Position - Unique 6-Pole Double-throw per Deck

SS-14-1L4F-2
Two-Deck Lever-Action Switch

POSITIVE TYPE, 3 - and 4 . Positions. (Single-deck.) Specified where glolity is. Speciried where quality is a consideration, these lever switches offer many of the design features of the J-B-T SS-14 instrument-type rotary switches. The single-deck models (not illustrated) come in the conventional threepositions and in a newer four-position. Present uses include tube checkers, in spection apparatus, com munication systems, hobby equipment, consoles, and sound devices. The four-position types, interchangeable except in slot length with the standard three-position, provide the extra circuit which is often needed. Dimensions are shown on the drawing below. Variations in mounting hole sizes, lever length and tapped mounting holes can be supplied on long runs involving set-up charges. Switches are normally individually boxed with mounting hardwa:e and KN-17 black pointed knob instead of the knob illustrated. Spacing between single decks: recommended $3 / 4^{\prime \prime}$, minimum ${ }^{2} \mathbf{g}^{\prime \prime}$. Also see list of available mounting plates. Spring Return Type. Single deck 3-position switches also may be ordered with spring return. Lever returns to position ll, giving momentary action at positions 9 and 10 (Model Suffix-R').
Two-Deck Lever Action Switches. These use the same strong parts, 3 -pole suspension and double-grip collector arms as the one-deck type, but are specified where quality is the prime requirement Spacing is $3 / 6^{\prime \prime}$ berween decks, the same distance as TV twinlead wifes. Non-shorting (break before make) positive action, individually boxed including KN-17 knob and hardware. Recommended

## SWITCH KIT - 14. and 20-Positions

MODEL K-1. The instrumentqua:ity, laminated phenolic quitches described previously as SS-14 and SS-20 rotary types now are availrotary in kit form for quick assembly. This arrangement assembly. This arrangement is especially helpiul to engineers, experimenters, hams, and electronic maintenance depirtments, for special assemblies or emergency requirements. The sturdy, 448 crawer, stee: cabinet with 48 compartments cortains 15 SS-14 index assemblies; 11 SS-20 index assemblies; 50 14-position decks, including non-shorting (break before make), shorting (make before break); A-type ( 2 circuits);
 Cs-type (complete shorting); 14 live positions); and 33 20-position decks including nonshorting, shosting; A-type (2 circuits); and F-type ( 20 live positions). One simple tool for pushing rotors on switch shafts, also replacement parts list for ordering refills through distributors are included.
K-1 Kit

## Instruments

# SINGLE HOLE - FLUSH MOUNTING TOGGLE SWITCHES DESIGNED FOR GOVERNMENT SPECIFICATIONS JAN.S.23 AND MIL-S-6745 (AN-S-20a) 

## NEW

MEET ADVERSE OPERATING CONDITIONS

Heat and Cold . . . Specialized aircraft lubricant facilities operation at both low and high temperatures ( $-67^{\circ} \mathrm{F}$ to $185^{\circ} \mathrm{F}$.)

High Humidity . . . Materials, plating, construction and lubricant enable switches to withstand tropical climates.

Salt . . . Meet 100 hour Salt-Spray Test QQ-M-15la which is twice the required minimum.

Vibration and Shock . . . No momentary make or break or mechanical damage during stringent shake tests and 75 Gs drop test.

Overload . . . Tested to make and break at $50 \%$ overload for brief periods because of ample size solid coin silver contacts and rocker arms instead of clad or brazed construction. Contact resistance is under 0.005 ohms. High dielectric exceeds 900 volts r.m.s. at 60 cycles.

Rugged Service . . . Generously proportioned and substantially built for extra life. For instance, both screw-type terminals and solder lugs easily withstand a 30 pound pull test. Operating cycles far in excess of minimum specified as acceptable. Springs are stainless steel. Quality standards are maintained by in-plant testing of production samples.

## Multi-Section Rołary Switches

High grade, phenolic-insulated, rotary switches for radio and electronic equipment in circuits not exceoding 500 volts DC. 'I'hese switches have self-wiping silver-plated, copper alloy contacts which assure long, useful life. All models feature an adjustable stop, A $21 / 2^{\prime \prime}$ mounting area is required. Mounting depth is deable stop. A $21 / 2^{\prime \prime}$ mounting area is required. Mounting depth is dependent on number of sections. Switches have $1 / 4$ round shafts, $2^{\prime \prime}$ ong, and $3^{\prime \prime}-32$ bushings. Each switch supplied with pointer knob and mounting hardware. All switches have $1 / 2^{\prime \prime \prime}$ spacing between sections, except the 3 and 4 section which have $1 "$ spacing.

## 24-Position Tap Switch

For test equipment. Switches have 1 circuit and 24 positions. Phenolic insulation. Furnished with $38^{\prime \prime}-32$ brass bushing and $1 / 4^{\prime \prime} \times 2^{\prime \prime}$ notched shaft. Dial plate 394 , knob and mounting hardware supplied.
Catalog No. 13124 L List Price $\$ 3.50$

Circuit-Opening
Switch

For meter and circuit switching in test equipment and small transmitters. Switches have 4 sections and 2 to 12 positions with adjustable stop. Phenolic-insulated for 500 volt DC operation. Mounting depth behind panel $21 / 3^{\prime \prime}$. Supplied with $1 / 4^{\prime \prime} \times 2^{\prime \prime}$ notched shaft and $3 /{ }^{\prime \prime}-32$ brass bushing. Pointer knob, dial plate 382 , and mounting hardware included. Catalog No. 1400L List Price $\mathbf{\$ 5 . 9 0}$

## Two-Section, Five-Position "Hamswitch ${ }^{\text {® }}$

For meter or circuit switching in transmitters. Rated at 1000 volts AC up to 1500 volts DC. Two section, 5 position. 21/4" spacing between sections. $60^{\circ}$ indexing between positions. Adjustable stop. Nonshorting type. Supplied with $38^{n}-32$ bushing, $1 / 4^{\text {" }} \times 2^{\text {n }}$. notched round shaft. Pointer knob and mounting hardware furnished. Requires $31 / 4^{\prime \prime}$ mounting depth.
Catalog No. 151 L
List Price $\$ 2.75$

## Two-Section, Two-Circuit, Six-Position "Hamswitch"

Coil and circuit rotary switch with 6 positions, 2 circuits and 2 sections ( $1 / 2^{\prime \prime}$ spacing) designed to short out automatically all unused positions. Ideal for test oscillator switching, band-switching or meterswitching uses. Phenolic insulated and equipped with $38^{\prime \prime}-32$ bushing, $14^{\prime \prime} \times 2^{\prime \prime}$ notched round shaft and adjustable stop. Supplied with pointer knob and mounting hardware. Catalog No. 152L

List Price $\mathbf{\$ 3 . 2 5}$

## Decade Switches

Especially designed for use in the construction of capacitor and resistor decade instruments.
The unusual circuit arrangement of these switches permits real economies in the construction of precision resistor and capacitor decade assemblies since they require only 4 standard resistors or capacitors to complete a full decade of test values. Each switch is equipped with high grade phenolic insulation and heavily silvered contact members to assure excellent electrical stability. Adjustable stope are provided to permit interconnecting with other switches for multiple decade operation. One Mallory No. 366 bar knob and mounting nut furnished. Dial plates with 30 degree numeral spacing must be employed.
Catalog No. 153L Capacitor Decade Switch List Price $\$ 3.30$
Catalog No. 154L Resistor Decade Switch
List Price $\mathbf{\$ 3 . 7 0}$

## Jack Switches

Leaf-type switches actuated by rotary motion. Both types adaptable for use in such applications as laboratories, test panels and meter circuits. Standard models extend perpendicularly to panel; junior style parallel to panel. The $78^{\prime \prime}-32$ bushing may be used in panels up to $14^{\prime \prime}$ in thickness. Both types suitable for mounting in a single hole $7 / 18^{\prime \prime}$ diameter. Shaft is $1 / 4^{\prime \prime}$ round with suitable flat. Supplied with mounting hardware, but no knob.

## Single Push-Butfon Switches

Plunger-t ype switches for panel mounting in radio and electronic circuits. Available in a choice of 8 different circuit combinations for use in laboratories, on test panels, in meter circuits and in a wide variety of other applications. "L" indicates locking-type. Other types have spring return to normal position. Switches require $1 / 18^{\prime \prime}$ mounting hole, and will fit panel up to $1 / 4^{\prime \prime}$ in thickness. Mounting radius is $138^{\prime \prime}$; mounting depth is approximately $11 / 4^{\prime \prime}$. Switch body extends $15 / 6^{\prime \prime}$ ' behind panel. Supplied with polished phenolic button and mounting hardware.

## Ceramic Section "Ham Band" Switches

For use in transmitter plate circuits not exceeding 1000 volts DC with power up to 100 watts. Switches have 4 positions in $360^{\circ}$ rotation with each section a single circuit. $90^{\circ}$ indexing. All models are nonshorting. Ceramic insulation provides low losses at high frequencies. Equipped with double-contact tie roints. A $2^{\prime \prime}$ mounting area is required. Two-section models have $17 / /^{\prime \prime}$ spacing, all others have $1^{\prime \prime}$. Switches are supplied with $1 / 4^{\prime \prime}$ round shafis, $2^{\prime \prime}$ Iong, and \%/s"-32 bushings. Each switch is furnished with pointer knob and mounting hardware.

## Soldering Iron Tips

No. 311 -Replacement tip for soldering irons that are turned on for short periods only. Heats quicker than No. 312, but is not as long wearipr. Made of a special Mallory copper alloy long in use as a welding tip material. Nickel plated to resist corrosion. Size- $3 /{ }^{\prime \prime}$ diameter, 4" length. Plunger style with "screw driver" point.

List Price $\$ \mathbf{0 . 8 5}$

## Dial Plates

For Mallory Circuit Selector, Tap and All-Wave Switches.

List Price $\$ 0.20$ each (all types)
Neat-appearing Dial plates with easy-to-read aluminum figures clearly etched on solid black background. Dimensions are $1^{13} / 18^{\prime \prime}$ in diameter with $7 / 16^{\prime \prime}$ hole, with figures $7 / 64^{\prime \prime}$ high. $.020^{\prime \prime}$ aluminum stock.

No. 312-Replacement tip for soldering irons that are used continuously for long periods of time. Made of a special Mallory copper $\rightarrow$ alloy of great hardness and high electrical conductivity. Nickel plated to resist corrosion. Size- $3 / 6^{\prime \prime}$ diameter, $4^{\prime \prime}$ length. Plunger
style, with "screw driver" point.

Mallory Midgetrol

## SPLICING BLOCKS. PRECISION AND VERTICAL ATTENUATORS

## VERTICAL ATTENUATORS

Precision designed and manufactured to perform satisfactorily in every conceivable tyipe of sound equipment, from the most elaborate broadeating station to the simplest P.A. installation. Easily operated, completely shielded and dustproof. Narrow construction permits as many as seven mixers in onc row on a standard $19^{\prime \prime}$ rack.

## SPECIF\|CATIONS:

Noise Level: $130-1 \neq 0 \mathrm{db}$, below zero level.
Range: Standard units are furnished with 20 steps at 2 db , and inf. loss (off) on last contact....... 22 contacts.
Circult: Latder "T" or potentiometer is standard, other circuits can be furnished to order.
Impedance: Stanclard values $30,50,150,200,250,500$ and fi00 ohmis for ladders, and 250,000 ohms for potentiometers.
Pilot Light Switch: Normally closed, open in off position, S.P.S.T.

Size: $21 / 8^{\prime *} \times 51 / 8^{\prime \prime}$, depth $43 / 4^{\prime \prime}$. "(T-Pads are 2 \%" wide.)
Insertion Loss: 2 to 5 d . depending on circuit.
Mounting: Two 6.32 screwe in center line $4\left\{\xi^{\prime \prime}\right.$ c. to c. Cut lole in panel $23^{\prime \prime} \times 41 / 2^{\prime \prime}$.
Dial: Linear, etchel, easily read.
Contact Arms: Multiple laminated-wiping action.
Shielding: Electrostatic shield, dust proof.
Frequency Response: Flat to 50 kilocycles.

## EDITALL TAPE SPLICING BLOCK

A new exchasively lesigned tape splicing block that ean be uset in monjunction with anc tape recorder using standard tape. splices can be easily and quickly made with a minimum of fime and effort. Made of lifetime Duraluminum with no clips or mechanical parts to go out of order. Can be used as a s-purate unit or mounted as part of the tape recorder itself. Approximate overall dimensions-6 $1 / 2^{\prime \prime}$ long $\times 1^{\prime \prime}$ wide $x 3 / 8^{\prime \prime}$ hiph. Furnished with drilled and countersunk holes for easy mounting.

## TYPE 850 PRECISION ATTENUATOR

With the increased demand for precision in latoratory measurement of volume levels, transmission lusses, gains of amplifiers, etc., the older methods and standards have become olsolete. The present units are a complete redesign of our ohler precision attenuators and will serve as laboratory standards. These precision units are now furnished with jack terminals and are completely shielded. They are fiat for all frequencies in the audio range and reasonally flat to 200 ke . up to 70 dl , They are furnished with either rack or box mounting in gray finish.

## SPECIFICATIONS:

Mounting: Type x50-AT and S50-All, standard rack pancls, $355^{\prime \prime} \times 19^{\prime \prime} \times 1 / 8^{\prime \prime}$. Type $850-13$ furnished with dust cover.
Switches: Multiple leaf, silver alloy hladies with silver contacts. Ball type detent.

Terminals: Telephone type jacks are used for input and output connections. Solder terminals are providet on rear panels for permanent connections. Insertion of plugs into twin-jacks lifts rear terminal connections.

Type of Resistors: All resistors are non-inductively wound. Negligible phase angle.
Accuracy of Resistors: All windings are adjusterl to within $0.1 \%$ of the calculated value except on very low resistance values which are adjusted to within $0.25 \%$.
Frequency Characteristics: For "T" configuration, the frequency error is neglipible up to 80 dh . loss, below 50 kilocycles. Balanced 'H" configuration should he used where measurements above 50 kilocycles are necessary.

NEW TYPE 850 PRECISION ATTENUATORS

| Type | Mounting | Circuit | Range | Db/Step | Size <br> Rack Panel |

# TECH LABORATORIES INC. PALISADES PARK - NEW JERSEY 

## MINIATURE ROTARY SWITCHES

PA-2000 SWITCHES
STEATITE INSULATION
New Small Size! 1-7/16" d. gives saving of 7/16" over standard switches. One piece shaft construction for accurate indexing; odjustable stop allows selection of positions or continuous
 rotation; meet 50 hour salt spray tests. Available as complete switches or separate assemblies. Same ratings as the larger 2500 series switches plus excellent r.f. characteristics. Shaft $17 / 8^{\prime \prime}$ from bushing.

## PA. 1000 SWITCHES

ROTARY SWITCHES

A complete, new line that matches our 1400 Series in switching, and our PA-2000 Series in physical size. Index assemblies and hardware are indentical to PA-2000 Series accessories. Highstrength, high-resin, laminated phenolic insulation exceeds Phenolic Standards Grade XXXP. One-piece shaft construction permits accurate indexing. Adjustable stop permits selection of positions or continuous rotation (ll active positions, 1 off-position). Grade L-5 steatite spacers are used with nickel-plated brass
 shafts, bushings, tie bolts, and nuts. All other metal parts are treated to pass 50 -hour salt-spray test. Rating same as 1400 Series. General use, 6 watts. Excellent r.f. characteristics. Shaft $17 / 8^{\prime \prime}$ from bushing.

## SEPARATE INDEX ASSEMBLIES

Same as for PA-2000 Series shown at left.

## KIT No. 2000-MINIATURE STEATITE SWITCHES

Kit No. 2000 of miniature switch parts is made available to meet the demand of commercial users and the armed forces for smaller units. The kit has 39 sections, 12 complete index assemblies and extensive hardware. All metal parts will withstand a salt spray test of fifty hours.
Kit No. 2000 $\qquad$ List Price $\$ 80.00$

MINIATURE SWITCH HARDWARE AND ACCESSORIES
See listing on Page L-I5 of this catalog

## Kit No. 1000 - Miniature phenolic switches

Kit No. 1000 is to phenolic miniature switches what Kit No. 2000 is to iminiature steatite switches. It's a lab and experimental stock of switch sections, hardware, and indexes which puts any standard and practically any special switch in the hands of the user without delay. Specifications are the same as for regular PA. 1000 Series switches. The kit has 36 sections, 15 complete index assemblies, and hardware.

Kit No. 1000. $\qquad$ List Price $\$ 100.00$

## LEVER ACTION SWITCHES

Coil spring and cam index design provides guaranteed minimum life of 150,000 switching cycles. Smooth, "clean" action. Coil type index spring easily replaceable. Mounting plates available. Furnished with black paddle-type knob (same style knob also available in red and white). Shorting-make before break. Non-shorting-break before make.

| Number <br> Poles | Number <br> Positions | Type Indexing <br> 2 | $\mathbf{3}$ | Positive |

## MOUNTING Plates for lever switches

TYPE A—Made of . $035^{\prime \prime}$ die cut steel, black crackle finish. Eliminate alignment problems, provide $3 / 4^{\prime \prime}$ spacing between switches. Available for 1 to 5 switch mounting. Height of all plates is $2 \mathrm{~s} / \mathrm{m}^{\prime \prime}$.
TYPE B-Specially furnished for mounting lever switches in electrical outlet boxes. Chrome plated wall plates will fit all standard boxes with mounting holes $3-5 / 16^{\prime \prime}$ between centers. Ideal for P.A. or Intercom installations.

## DUAL SPEAKER SWITCH MOUNTING KIT

Kit No. PK-300-Contains complete assembly for switching between dual speakers such as auto rear seat and front seat speakers including etched dial-mounting plate and complete installation instructions.

Contents:
1 Cat. No. 1484 Dual speaker switch
1 Cot. No. P-216 Mounting bracket and dial
1 Cat. No. P-197 White split knurl pointer knob 2 Self tapping sheet metal mounting screws
Kit No. PK-300.
List Price $\$ 1.50$

## DIAL-MOUNTING BRACKET

Use with switch PA-2050 marked 1-2-3-4, for switching twin-lead antenna lines.
Cat. No. P-218.
List Price $\$ 0.55$

## 23 POSITION SELECTOR SWITCH

1443 "23 CLIPPER'•(B)—Single pole, 23 positions, shorting type contacts. High quality " $W$ " type construction requires only $1^{\prime \prime}$ behind the panel. Double wiping silver plated contacts mean low loss. Include dial plate. List Price

## SMALL GENERAL PURPOSE SWITCHES

TYPE 1460-Single pole, 2 position, shorting contacts, positive index. Can be used as SPST or SPD́T. For phono-radio, tone or sensitivity control.

List Price $\$ 0.75$
TYPE 1461-Single pole, 3 position, shorting contacts, positive index. Useful in miniature and band change, step type tone or sensitivity control, P.A. channel selector switch.

List Price $\$ 1.00$

TYPE 1462 -Double pole, 2 position, shorting contacts, positive index. Can be used as SPST, SPDT, DPST, DPDT-for meter reversing, P.A. channel, or switching both lines on phono-radio. List Price $\$ 1.00$

TYPE 1463-Single pole, 2 position, non-shorting confacts, spring return index. Same size as Type 1460. Useful

良分for meter reversing or momentary intercom talk switch. Non-shorting.

List Price $\$ 1.00$
TYPE 1464-Double pole, 2 position, non-shorting contacts, spring refurn index. Same physical size as Type 1462. Can also be used as SPST, SPDT or DPST. Used as meter switch and momentary line or remote
 speaker return on intercoms.

List Price $\$ 1.00$
TYPE 1465-Single pole, 4 position, shorting, positive index, with SPST AC line switch attached. The selector
 switch has 3 active positions and "off." The line switch operates between "off" and first active selector position. Line switch is Underwriters' approved for 3 amperes at 125 volts, 1 ampere at 250 volts A.C. Type 1465 is a replacement for "on-off" step tone control switches used in many AM and FM receivers. Shaft is $21 / 2^{\prime \prime}$ long from end of $1 / 4$ " bushing.

List Price \$1.75
TYPE 1472-2 pole, 3 position, non-shorting, contacts, positive index. An economical change switch for AM, FM, phono selector to amplifier in custom installatians.

List Price $\$ 1.25$
TYPE 1473 -Same as 1472 except shorting contacts.
 List Price \$1.25

TYPE 1483-Single pole, 3 position, shorting contacts, positive
 index. For use with dual or auxiliary rear seat auto radio speakers. Permits operation of either speaker separately or both simultaneously. List Price $\$ 0.90$

TYPE 1484 -Single pole, 3 position remote speaker switch. Same as Cat. No. 1483 except with $1 / 4$ " bushing and $7 / 16^{\prime \prime}$ split knurl shaft. 15/16" White split knurl pointer knob, Cat. No. P-197, is furnished.

List Price $\$ 0.90$

## Shorting Contacts make before break.

Non-shorting Contacts . . . break before make.

## SWITCHES (Cont'd)

ROTARY SELECTOR SWITCHES 2500 SERIES - STEATITE INSULATION

2500 Series Switches have highest qual. ity (grade L-5) Steatite insulation, meet crifical requirements of r.f. circuit applications. Bushing $3 / 8 " \times 32$ thd. $\times 3 / 8$ " long. Shaft $1 \% 8^{\prime \prime}$. Positive $30^{\circ}$ Index with adiustable stop. Separate parts alsa available. Packaged with Mig. nut, lockwasher and $11 / 4^{\prime \prime}$ black bar knob. Shorting-make before break. Non-Shorting-break before make.

## ROTARY SELECTOR SWITCHES

 1400 SERIES PHENCLIC INSULAIIONSeries 1400 offers compact design and quality consfruction. Laminated phenolic insulation. Mounting Bushings $3 / 8^{\prime \prime} \times 32$ thd. $x 3 /{ }^{\prime \prime}$ long. Shafts $17 / \mathrm{B}^{\prime \prime}$ from end of bushing. Positive $30^{\circ}$ index with adjustable stop. Revisions ar additions can easily be made due ta availability of all parts separately (see listings under hardware switch sections). Packaged with mtg. nut, lockwasher, $11 / 4 "$ black bar knob. Shorting—make before break. Non-shorting—break before make.

## ROTARY SWITCH KITS

## 1500 SWITCH KIT

A four drawer cabinet containing an adequate supply of sections and indexes listed on this page to custom build two 4 section switches, denser decade, and one I section resistor decade switch. For labs, engineers, hams, and experimenters needing specialized switching arrangementers needing specialized switching arrangeparts. List Price $\$ 60.00$
414 DELUXE SWITCH KIT - PHENOLIC
An extra large assortment of switch hardware and sections to make the widest possible assortment of phenolic switches to your needs. Contains III sections including 34 of the special "DD" deluxe sections listed below, 31 Index assemblies, 25 doz. spacers, 5 doz. shafts, 8 doz. Hie rods, 40 dial plates, and complete hardware. Especially suited to large users of specialized switches. All kit parts may be purchased for refill from stock listines.

$$
\text { List Price } \$ 200.00

## 419 DELUXE SWITCH KIT - STEATITE

Similar to the 414 Kit , but all sections are made of Cenfralab's high quality grade L-5 steatite ceramic, long regarded as "the best."' Contains standard and special deluxe sections below. Has 81 sections, 31 Index Assomblies, 26 doz. spacers, 35 knobs, 30 dial plates and assorted hardware. This is Centralab's finest switch kit. List Price $\$ 190.00$

## "DD" DELUXE SWITCH PARTS

"Double-D" describes CRL's extra heavy ( ${ }_{1 / 2}$ "' thick) rotor shaft switch and the corresponding hole in the section rotor. Also, deluxe switches have one-piece, positive indexing shaft and index assembly

## CUTLER-HAMMER SWITCHES

These Cutler-Hammer switches are of the one-hole mounted type, designed for convenient installation on panels, housings and other flat surfaces of machines and appliances. Experienced Cutler-Hammer engineers working closely with the eletronics and appliance manufacturers - have developed these devices to meet the requirements of every type of apparatus and every class of service.

## . . . for Electronics, Radio, Small Motors

These switches are designed to meet the exacting requirements of communication and power apparatus for all branches of the government. The single pole and double pole switches meet the specifications of JAN-S-23 and the four pole switches are designed to meet the same rigid requirements. Standard bushing length - 15/32".

## AMERICA'S FOOT SWITCH LEADER

A LINEMASTER Safety Exira!

## FOOT SWITCH GUARD <br> a necassary precaution wherever accidenfally tripping machine might be dangerous or costly. Strong and durable, with a black crackle finish on cast iron, it fits over and en closes switch.

Available for all Senior Models
Price $\$ 3.00$

Tip-Toe Control for Tip-Top Production! LINEMASTER, Jr. FOOT SWITCH

Lightweight, sensitive... ideal for women workars! Needs only a touch of the toe, while heel remains comfortably on the floor.
Aluminum housing,

black crackle finish.
Weight I lb, $51 / 2^{\prime \prime}$ long, $31 / 4^{\prime \prime}$ wide, $11 / 4^{\prime \prime}$ high. Rated at 15 amps. 115 volts A.C.: 15 amps., 250 volts A.C. Can be wired to operate as single pole, normally open; single pole, normally closed; or single pole double throw. Momentary Contact only. Price $\$ 7.50$ \#122-S-Rafed at 20 amps., $\mid 15-250$ volts A.C.

Price $\$ 7.75$

The LINEMASTER
TWIN-COMPACT

Forward-
Reverse 5witch \#4915 Twin

Twice as efficient because it works both ways!

The TWIN.COMPACT gives you all the gives you al the famous COMPACT -doubled-because it actually IS two complete LINE. MASTER COMPACTS, mounted on single base. Foolproof bridge between mountings prevents accidental operations of both at once.
Strong steel housing, black crackle finish. $6^{\prime \prime}$ long $3^{\prime \prime}$ wide, $11 / 2^{\prime \prime}$ high Weight I lb. Specifications (for each switch) same as for LINEMASTER COMPACT No. 491-S.

Price $\mathbf{\$ 8 . 5 0}$

The LINEMASTER

\#632-S-A.C. Rating: 20 amps. at 115 and 250 volts, singla pole, double throw. Price $\$ 7.50$
\#634-S-A.C. Rating: 10 amp. at IIs and 250 volts, simulated double pole, double throw. Price $\$ 9.75$ Safety quard available for all

## The LINEMASTER

## EXECUTIVE

Two Switches in One "On-Cenfer" Mechanical Interlock! This handsome switch is fool-proof and easy-to-fool-proof and easy-tooperate! Selective circuits and guaranteed interlock eliminates possibility of
accidentally tripping both
circuits simultaneously while
low, wide casing saves excessive
leg movement - foot pivots easily
from one side to the other.

Easy to wire-remove only one screw and
switch is ready. Either interior (or both) may be wired as normally open or normally closed-single pole-double throw. Cord sets available to your specifications.
Heavy stael housing, baked, hammertone grey finish. Weight, 14 or., $45 /{ }^{1 "}$ long, $4^{\prime \prime}$ wide, $11 / 4^{\prime \prime}$ high. Each interior rated af 15 amps at $125-250$ volts A.C.

The LINEMASTER
DUPLEX FOOT TREADLE SWITCH
Actually 2 switches in one compact housing! LINEMASTER'S new DUPLEX
 FOOT TREADLE SWITCH is especially well adapted for sound and transmission equipment; relays, solenoids and magnetic switches. The DUPLEX provides either forward-and-reverse or start-and-stop action with slight heal or toe pressure, and allows two circuits to be selectively operated from one noutral position. Available in two spring weights, to allow for operation from either sitting or standing positions.*
Cast aluminum housing, black crackle finish. Weight, $13 / 4 \mathrm{lbs}$.; length, $81 / 2^{\prime \prime}$; width, $312^{\prime \prime}$; height, $2^{\prime \prime}$. Rated at 15 amps, 110 volts A.C.; 15 amps., $220^{\circ}$ volts A.C. Either switch, or both, may be wired as single pole, normally open: single pole, normally closed; singlo pole, double throw.
*Specify \#475-S-heavy spring-for standing operation.
\#476-S-Light spring-for seated position.
Price $\$ 15.00$
"When awkward jobs hold you up-a LINEMASTER FOOT SWITCH is your third hand!"

PRECISION-EUILT • DEPENDABLE • RUGGED • ECONOMICAL • OVER IOOO APPLICATIONS

## LINEMASTER

## "SENIOR" 4000 SERIES

10 Maintained and Momentary Contact Models A sturdy industrialtype switch that operates with light pressure from foot or knee, leaving both hneed fraving bork hands free for work to give years of trouble-free service-trouble-free sed and
fuily enclosed and hooded for protection hagainst dirt and chips,
with additional heavy spring and cast stop under cover casting, to relieve pressure and strain on spring inside switch proper.
Heavy.dufy cast iron housing; black crackle enamel finish. 7" long, $4^{\prime \prime}$ wide, $31 / 4^{\prime \prime}$ rich. Weight, $5 / 44 \mathrm{lbs}$
MAINTAINED CONTACT MCDELS: Press to start—press to stop. MOMENTARY CONTACT MODELS: Press to start-release to stop.

## Trim, small

lightweight, instantaneous! MODEL T-51-S
Accurate control in a modern. minute, treadie switch! Single pole, double throw, momentary contact interior, that can be wired open or closed. Rubber base pad and rubber-ribbed treadle, fo:med steel casing with black crackle finisti. interior rated at 5 amps. 110 volts and 250 volts A.C. Weight 7 ozs.; $31 / 2^{\prime \prime}$ long. 25/8" wide, $\left.\right|^{\prime \prime}$ high. Price, without cord \$2.95 (Supplied on order., wired with $6^{\prime}$ cord and series plugs, $\$ 1.50$ extra) MODEL T-52-S
ONE treadle activates TWO switching operations! A partial downward stroke apers or closes one circuit. added pressure actuates the second circuit. Both in teriors, as well as exterior, meet specifications for
singleswitching Model Sinl-S.
Price, without cord, \$4.20
(Prices with cord-set on application)

The LINEMASTER

SWITCH
Small, sensifive, automafically safe! Particularly ideal for transmission equipment! Mechanical Interlock allows only one circuit to function at a time-and you can depend on it! LEKTRO-LOK operates on the feeter-totter system, with selective circuits. Pressure on one side actuates one circuit, release
 of pressure automatically returns switch to normal
"off'" position. Pressure on the other side is required before second switch is actuated, independent of first. Yet LEKTRO-LOK requires only a single cord-eliminates costly harness assemblies Rugged stamped metal housing, black crackle finish. Weight, 10
 Rating (A.C. only) 15 amps. at 25 volts, 15 amps. at 250 volts.

Price $\$ 5.25$
*LEKTRO-LOK is available, and can be supplied to your specifica tions, in many electrical combinations, such as:

Single pole, single throw, A.C. only ...... 10 A at 115 V $\begin{array}{ll}\text { Double break } & 5 \mathrm{~A} \text { at } 230 \mathrm{~V} \\ \text { Interiors so arranged as to simulate } & 10 \mathrm{~A} \text { at } 115 \mathrm{~V}\end{array}$ Interiors so arranged as to simulate Double pole, double throw 5 A at 230 V Special cord sets available to your specifications.

## SWITCHCRAFT PUSH－BUTTON \＆ROTARY SWITCHES

The＂Littel－Switch＂（A），available in 3 circuits，either in Red or Black one－piece Plastic Push－Button，non－locking only．Mounts in single $3 / 8{ }^{\prime \prime}$ dia．bole，panels up to $1 / \mathrm{K}^{\prime \prime}$ thick．Integral contacts are standard， recommended for low current only．
The＂FF－Switch＂（B），all common circuits，one－piece Black Plastic Push－Button，non－locking only．Mounts in single $3 / 8^{\prime \prime}$ dia．hole，panels up to $1 / 4^{\prime \prime}$ thick．Fine silver contacts rated 3 amperes， 120 volts A．C．， non－inductive．
The＂RS－Switch＂（C），locking and non－locking，2－or 3－position，all common circuits．Mounts in single $3 / 8^{\prime \prime}$ dia．hole，panels up to $1 / 4^{\prime \prime}$ thick． Fine silver contacts rated 3 amperes， 120 wolts A．C．（non－inductive）

[^37]
## SINGLE SECTION ROTARY SWITCHES

3612-01 to 3612-10

These single section rotary switches were designed to keep pace with the demand for smaller com. ponents. They are the smallest switches available to handle multi-circuit switching and are ruggedly puilt with heavy silver plated contacts, high grade phenolic insulators, best spring brass and steel These switches are ideal for radio-phono, wave band, tone control, meter and antennae switching appli cations, as well as many other uses in electronic equipments. All switches are supplied with one knob mounting nut and lock washer.

## MULTI-SECTION ROTARY SWITCHES

3612-11, 12, 15, 19

3612-18

The flat rivet "Wedgelock" which fastens the contact to the stator is an unique feature of these switches The small cross sectional area permits the use of sturdily designed contacts without sacrificing over-all stator size. The outstanding feature of this flat rivet is a contact assembly that will not loosen or rotate due to soldering heat. A free floating rotor assembly results in this rugged construction as the rotor blades do not support the assembly and only required rotor blades are used
One, two and four section switches in both shorting and non-shorting types are stocked to meet appli cations such as meter switching, test equipment and various electronic instruments. All switches are supplied with one knob, mounting nut and lock washer.

## Order by Part Number from Table Below

## LEVER ACTION SWITCHES

Erie Lever Action Switches employ the same type stator and construction as the Mult-Section Switches assuring a high quality assembly for inter-communication and test equipment applications. Smooth, positive action and indexing, high quality phenolic insulation, heavy silver-plated contacts and best spring brass are features which make the switch ideal for replacement or new uses.
Each switch is supplied with mounting screws and knob.
Packaged individually in a durable sealed plastic bag in the famliar Erie display box for maximum protection against corrosion.

Order by Part Number from Table Below

| Erie No. <br> Shorting <br> Type | Erie No. <br> Non-Shorting <br> Type | Type <br> Indexing | Number <br> of <br> Circuits | Number <br> of <br> Positions |

| $\cdots$ | $3612-22$ | Positive | 4 | 2 |

## GENERAL PURPOSE SWITCHES

3612-23, 24, 25

Extreme care was taken in the design of these very small compact switches to insure a very rugged and accurate construction. Again, the flat rivet is used to firmly secure the contacts against rotation in a very strong phenolic insulator. The stator assembly is attached directly to the detent plate insuring positive indexing. Heavy silver-plated contacts provide dependable and efficient operation. They may be used or simple circuit switchine and wherever space is at a premium.
Each switch is supplied with one knob, mounting nut and lock washer.
Packaged in individual durable sealed plastic bags and the familiar Erie display box.

(D and E) Two-Conductor Portable Jacks-I'sed on end of extension cord. Fits e-conductor pluss. Screw terminals take one pair phone tips. terminals or wires. Shield handles have tubular insulator to prevent short cirruits. Ideal for use in comecting audio and recording equipment. (J-NO and J-82).

## "imp" PUSHBUTTON SWITCHES

These switches are similar in general construction to the widely popular Carter "Imp" Short Jacks Finest nichel-silser springs with integral contacts High prade phenolic insulation. Rody, nuts and washors lright nickel-plated. Red or black Catalin 1-piece shaft and button. Surims fully insulated from the monting bushine and shaft.

Made in three circuit arrangements
IS-10 Series: "Make" contact, single circuit. normally open IS-20 Series: "Break" contact, single circuit, normally closed IS-30 Series: "Break-Make" contacts, single circuit, double throw

Carter telephone jacks
Circuit

## SPECIFICATIONS

CONTACTS: Silver-zinc alloy is standard. Coin silver, fine silver and others can also be supplied in production quantities. Businivg: plain bass is standard. Awailable with nickel-plate when specified.
AldRING: Finest grade nickel silver with soldering terminals hot tinned for easy soldering.
INSLLATION: Spacers made of high grade laminated phenolic.
FR.ME: Frame and face plate cadmium plated steel. Frame and face phat art electrically brazet to form one interial unit. This provides outstandint strength and superior ability to "stand the gatf." Where paramount quality and rugepelness is desired this telephone jack is recommended.
Carter "imp" Telephone Jacks can be supplied in many circuit combinations to suit your requirements. They are ideal for use in telephone, broadeast studio and audio equipment.

CARTER'S "imp" PLUNGER SWITCH

- Wiping-Rotating Action - Minimum Arcing - No Impact Load on Plunger - Longer Life - No Corroding Carbides or Oxides - Silver Plated Contactor and Terminals

Electrical Specifications and Types Available: Electrical Specifications and Types Available:
Carter's "imp" Plumrer switch is available in Carter's "imp" Plumger switch is available in a variety of mountings to muni most demands for this type of a switeh.
Electrical Specs: "Imp" plunger switch is designed to handle $3 / 4$ Amperes at $100-125$ Volts, $1 / 4$ Imperes at 250 Volts.
CHRCLITS: Sormally closed

## LONG AND SHORT FRAME JACKS

LONG JAChS . . . The original long jacks wer adapted from the telephone switchboard jacks. Longr rugged, phosphor-bronze springs parallel to the fhug axis give precise action. These jacks take minmum panel mounting space, less than the short jacks. Supplied with nickel-plated Palnut.
 SHORT JACKS . Carter short jacks are small and
compact, but do a full-sized job. Depth behind the panel SHORT JACKS . Carter short jacks are small and
compact, but do a full-sized job. Depth behind the panel compact, but do a full-sized job. Depth behind the panel
is cut down by placing the tempered nickel-silver springs is cut down by placing the tempered nickel-silver springs parallel to the panel. High quality sheet phenolic and or fibre used in Carter Jacks. Supplied with nickel-plated Palnut.
Short and long jacks mount in single $8 / 8$ "hole in panels up to ${ }^{5}{ }^{\prime \prime}$ thick. Fit of the plug in the jack is not affected by the thickness of the panel. Fit all standard plugs in two and three conductor types. Cadmium plated steel frame. All contacts between springs are fine silver, giving minimmm contact resistance.

## MINIATURE TAP SWITCHES

Designed to meet current miniaturization frend - all models are tested to 10,000 complete cycles (one cycle equals one complete rotation both clockwise and counterclockwise). All metal parts on these switches are plated to withstand 100 hours salt spray exposure in accordance with QQ-M-I5la.

SERIES 5000
Available up to 6 Decks- 2 to 10 contact positions per deck
Shorting (moke before break) or Non-shorting (breok before make)
Note: Add ' $S$ '" following switch number to desig nate shorting contocts

Rated to breok-1 omp., 115 v., A.C., non-inductive To corry-5 omps., 115 v., A.C.
Bushing keyway $.066^{\prime \prime}$ wide, $.036^{\prime \prime}$ deep.
Bushing $1 / 4$ " Long-3/8-32 thread.

(Red) $\quad \$ 0.75 \mathrm{ed}$

Dependable, positive contact is always insured - speed and convenience in testing of assembly line products and experimental apparatus in the laboratory is greatly facilitated by these spring action clips.

No. 2-2-_Plug-in Adapter Designed to greatly simplify the Designed to greatly simplify the
testing of resistors, capacitors, testing of resistors, capacifors, germanium diodes, and similar pigłail type components. Banana plugs are spaced on $3 / 4$ centers for use with the type of acks predominanfly used on laboratory test equipment.

# HFTHELTGON AIRCRAFT－TYPE SWITCHES AND INDICATOR IICHIS 

＂JR＂SWITCHES

## ＂JR＂Series PUSH BUTTON SWITCHES Momentary Confact

Exceptionally rugged and durable．Hetherington＂JR＂Series switches are available with any of 20 anodized aluminum adap－ ters for practically any mounting requirement．＂JR＂Series switches have the patented Hetherington snap－action mechan－ ism which positively cannot be＂teased＂on or ofr contact and provides exceptionally fast make－and－break for reduced arcing and contact wear．Contact surfaces and terminals are of heavy silver overlay on a copper base．Terminals are molded in phe－ nolic and cannot be torn loose by heavy wires．
RATIVGS： 10 amps resistive loarl， 5 amps inductive loath， 3 amps lamp load at 115 volts ace or 30 volts de． U．I．Approved for ar． 50.000 cycles minimum life under rated loads．
CONTACT ARRANGEMENTS：Nor mally open，Normally closed， 2 －circuit，

## Subminiature INDICATOR LIGHTS and SWITCH－LIGHT COMBINATIONS

These tiny，light－weight Hetherington indicator lights are sturdily constructed for military and industrial uses where long，trouble－free service under adverse conditions is a requisite．All types use standard $A N-3140$ lamps with ratings of 6,12 ，or 28 vdc．Removable plastic lens caps available in amber， blue，green，red，or white．Write for details on any type．

SERIES L1000：（A）F゙or regular piand mombing in $13{ }^{\prime \prime}$ hole．Supplied with

# TNTER-MLATIC TIME SWITCHES 

## A Complete Line of Quality Time Switches For All Automatic Control Requirements

## SERIES TS 60

- Standard On-Off time 5 witches

Recommended for automatic control of most electrical apparatus . . . neon signs, store window lighting, motors, fans, etc. Heavy duty-35 ampere rating . . . large, silver, snap-action contacts. Available in single pole, double pole and single pole-double throw models- 125 or 250 volts.

TS60SP

TS60LV

TS65SP

 TS60SP TS60SP-2TS60DP
TS60DP-2
TS605PDT
TSGOSPDT.-2
TS60LY
TS60LV-2
-TS65SP
MODEL T560LV FOR INDEPENDENT SWITCHING

Designed for switching low voltage thermostats to control heating and air conditioning systems. Separate terminals provided for connecting timing motor which operates on line voltage. Available in 125 or 250 volts (motor rating).

## PORTABLE PLUG-IN TIME SWITCH

Similar to TSGOSP except that case is equipped with receptacle and 6 ft . cord set. Recommended for all-around use on farms, in the home, and stores.
for 125 volts- 50 cycles, 125 volts- 25 cycles, or 250 volts- 50 cycles add $\$ 1,00$. All models U.L. approved except TS65SP.
*Portable plug-in-available only in 125 volts- 60 cycle.

## INTER-MATIC TIME-ALL

## - Portable Plug-In Appliance Timer

For all-around use in the home, effice or store. Ideal for converting any radio to a clock-radio: for controlling lights when no one is at home; for defrosting refrigurators (user selects defrost starting time to meet his needs); for controlling de-humidifiers, coffeemakers, broilers, fans, etc. Has manual control with automatic reset. Unique feature permits manual control without automatic reset, for continuous "off" or "on." Minimum on time - one hour; maximum, 23 hours. 24-hour,
 large, easy-to-read, time dial. Plug-in receptacle for equipment to be controlled. Attractive light gray plastic case, in modern design. Has 2 wall-mounting holes in rear. Size, $5 \times 4 \times 2 \frac{1}{2^{\prime}}$. Complete with 6 ft . cord, plug and full instructions. Shipping weight, 2 lbs. U.L. approved.

| Model <br> Number | Switch | Capacity | Volts | List |
| :--- | :---: | :---: | :---: | :---: |
| A211 | SPST | 15 amp. -1650 watt | 125 | $\$ 11.95$ |

## SERIES TS66 "SKIPPER"

- To Omit Operation On Selected Days

For control applications where it is desired to skip operation of the time switch on Safurdays Sundays, or other selected days.

Recommended for fully automatic time contro of air conditioning units, preheating of oil, lead, glue and melting pots, water soffening equipment, signs, animated displays, heating. pumps, motors and other applications for industrial and commercial use where offices, fac tories, and stores are closed on weekends or holidays.

## SIMPLE TO SET - EASY TO OPERATE

The Skipper has two dials, a time dial and a day dial. Day Dial is equipped with seven holes marked Mon., Tues., Wed., etc. Merely insert a screw in the hole beside each day or days on which operation is to be skipped. "On-Off" trippers operate in the regular manner. A special cutout tripper rotates the day dial every 24 hours.

The SKIPPER is also available in models for independent swifching* and portable plug-in models.**

| Model <br> Number | Switch | Amps per <br> Pole | Voltage <br> 60 Cycles | List <br> Price |
| :--- | :--- | :--- | :--- | :--- |
| TS66SP | SPST | 35 | 125 | $\$ 16.95$ |

| TS66LV-2* | SPST | 17.5 | 250 | 17.95 |
| TS66SP-S** | SPST | 15 | 125 | 21.95 |

For 125 volts -50 cycles, 125 volts -25 cycles, or 250 volts -50 cycles add $\$ 1.00$. All models U.L. approved excep $\$$ TS66SP-S.
**Portable plug-in-available only in 125 volts- 60 cycles.

## SERIES T670

- For Timings from 5 to 60 Minutes

## EXCLUSIVE T670 FEATURE

Up to 12 trippers can be placed on the same dial, at one time, with each tripper set for different "on-off" cycles ranging from 5 to 60 minutes.
Recommended for commercial refrigeration defrosting, automatic poultry feeders, ventilating systems, process timing, intermittent pumping of oil and water weils, or any application where fimings of less than one hour are desired.

## IT'S ALL IN THE TRIPPER

Specially designed trippers provide variable settings ranging from 5 to 60 minutes. A minute selector is provided for setting the number of minutes the 'on-off" cycle will operate. To set the tripper, loosen set screw, move the minute-selector to the desired number of minutes shown on scale. Tighten the screw and return the tripper to the dial.

For 125 volts- 50 cycies, 125 volts- 25 eycles, or 250 volts- 50 cycles add $\$ 1.00$.
Prices include three trippers furnished with time switch

Manufactured by INTERNATIONAL REGISTER CO.

## B E

## POWER TAP SWITCHES NON-SHORTING TYPE

Each switch is a non-shorting, single pole, rotary, multiposition unit, but switches can be ordered assembled 2 or 3 in tandem ( 2 maximum, 5 taps, for Model 111) to form multipole assemblies. All ceramic insulation, large, solid silver-to-silver contacts, and "slow-break" action especially designec for alternating current use establish new standards of dependability and performance. Switch shafts are electrically "dead"-insulated by strong ceramic hubs. Contacts and mechanism are entirely enclosed and protected (except for the Model 111).

## MODEL 111 TAP SWITCH

Alternating Current Rating 10 Amps. 150 Volts - Diameter $13 / 4^{\prime \prime}$ - Shaft Diameter $1 / 4^{\prime \prime}$ - Standard Mounting: For $1 / 4^{\prime \prime}$ panel maximum, by means of $3 / 8^{\prime \prime}-32$ threaded bushing and hex. nut.

For use with plugs PJ. 5 PL. 55 WE-47 except PJ 339, use with WE-291.

## JACK PANELS

Constructed of solid bakelite, reinforced with steel.
Slotted mounting brackets for use in 19" relay racks.
Spacking prevents cross connection of adjacent circuits with double plug.
Designction strip included on all panels.
Single panel holds 24 jacks, requires 13/4" panel space.
Double panel holds 48 jacks, requires $21 / \mathbf{s}^{\prime \prime}$ panel space.

| TYPE | DESCRIPTION | LIST |
| :--- | :--- | ---: |
| PJ 31 | Double, less Jacks | $\$ 15.75$ |
| PJ 33 | Single, less Jacks | 14.20 |
| PJ 341 | Double, with 48 PJ 318 Jacks | 75.00 |
| PJ 343 | Single, with 24 PJ 318 Jacks | 44.10 |

## PATCH CORDS

Best quality tinned copper 2 conductor stranded wire. Heavy braided cover, with 6 " reinforcement at each end. Shield normally grounded both ends.

In addition to the plugs, jacks, and jack panels illustrated above - ADC manufactures a custom line of iron core components, such as transformers, filters, reactors and chokes, designed and built in production quantities to your specifications. For complete information address your inquiry to:

## PLUGS

Interchangeable with standard plugs as shown.
Designed for easy assembly and cord replacement.
Insulated for 500 V. RMS. breakdown.

## PLUGS • JACKS • PATCH CORDS • JACK PANELS

## STANDARD PHONE PLUGS

The standard radio phone plug, widely used on P. A., etc., equipment. Designed to fit all standard jacks and available in both two and three conductor types. The " 511 " series, the two conductor plups, are provided with hindins head serews in terminal, handles of molded bakelite or metal when shielded plugs are required. The " 513 " geries are three conwhen shielded plugs are required. The "ols series are three conpluctor to standard phone jack.

No. 511-13lack plastic shell $\qquad$
No. 511-1-Red plastic shell . 65

Other lengths cords available-4, 6, and 10 ft . Replacement cords also available for all standard patch cord assemblies. See TRIMM Bullet in R-1 is for complete listing.

## "512" PLUG

Compact, non-protruding de sign. Bakelite body, nickel plated tip and sleeve. Cord pit tips held liy set serew.

No. 512-Black
$\$ .75$
No. 512.1-Red

## JACK PANELS

TRIMM "96" series. Most widely used, and intenderd for use with standard twin type patch cords. Mounts on standard 19 inch rack; single row $13 / 2^{\prime \prime}$ wide, double row $94 / 8^{\prime \prime}$ wide. Constructed of hake• lite, reinforced with ateel. Degignation strip included on panel.
No. 96-01-Single row, 12 pair jacks
See TRIMM Bulleit in R-23 for complete listing.

## JACK S

Uses the commonly known telephone type construction. Bushing at end of frame of brass, unthreaded, jack mounted ly means of screw in lrack side of panel. Frame, steel, zinc plated dichromate treated for maximum corrosion resistances. Springs are nickel silver, contacts are of palladium-silver alloy. Standard dimensions, interchanreahle with any similar type jack. More common circuits listed at right, all other circuits not shown available

## "95" SERIES

Provide low cost jack suit able for P.A., etc., applica tions. Panel mounting b, means of threaded bushings,
fits in $3 / 8{ }^{\prime \prime}$ dia. hole, panels up to $s{ }^{8 \prime}$ thick. projects behind panel $3 z^{\prime \prime}$. Spring contacts of nickel silver, held in place by interlocking insulating washers. Circuits designated similar to " 90 " series.
No. 95-01-Open circuit
No. 95-02-Closed circuit
$\$ .40$

NOTE: For more detailed information on TRIMM phone plugs and jack including a large variety not Iisted here, see Bulletins R-15, R-18, R-21 and R23.

## ANTENNA CHANGE-OVER

Mycalex Insulation is satisfactory for operation up to 60 MC . Triple-X Mycalex insulation is satisfactory for operation up to ${ }^{6}{ }^{3} \mathrm{M}^{\prime \prime}$. Trine silver insulation for operation up to 15 MC . All models use ${ }^{216 "}$ fine silver wiping action contacts rated at 4 amps. These relays are designed With ball-bearing armature pivot and have large contact spacing to
 signed so as to eliminate AC chatter. Size— $31 / \mathbf{s}^{\prime \prime} \times 31 / 8^{\prime \prime} \times 23 / 16^{\prime \prime}$

Same type of relay as above only two additional poles are added, one PUSH-TO-TALK control. Contacts etc. identical with Antenna-

R.F. AND GENERAL PURPOSE RELAY

An excellent relay for R.F. or high voltage remote control. Contacts are " $916^{\prime \prime}$ fine silver rated 4 amps. Designed with extremely short R.F. path, Ball-bearing armature pivot. All metal parts cadmium plated. RB Series are TRIPLE$\mathbf{X}$ insulated for frequencies up to 15 MC ., RM series are MYCALEX insulated for frequencies up to 60 MC . Size- $21 / 4^{\prime \prime} \times 31 / \mathbf{B}^{\prime \prime} \times 23 / 16^{\prime \prime}$

| Type | Insulation | $\begin{gathered} \text { Contact } \\ \text { Combination } \end{gathered}$ | Coil Voltage | $\begin{gathered} \text { Net } \\ \text { Prices } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| RBA-1 | TRIPLE-X | SPST (dble-break) | 110 V. A.C. | $\$ 3.30$ |

| RMA-2 | MYCALEX | DPST (sgle-break) | 110 V. A.C. | 4.65 |
| RMD-2 | MYCALEX | DPST (sgle-break) | 6 V. D.C. | 4.65 |

KEYING RELAY
Same specifications as RB Series except that the coil and return spring are faster acting. Follows a "Bug" with ease.

## LATCHING RELAY5

These relays are employed where it is not desirable to have current continuously on the coil. The latching arrangement is such that when the relay coil is energized the arma. ture closes and locks in a closed position by mechanical latching. An electrical im. pulse on the reset coil releases the armature from the latch and allows the relay to assume its initial position. $9 / 16^{\prime \prime}$ fine silver contacts. Bakelite Base. Size- 3 3/4 $2^{\prime \prime} \times 3 / 4$.

|  |  |  | Net <br> Type |

| L.ED | 6 Volts D.C. | 6 Volts D.C. | 4.50 |

## COMMUNICATION RELAYS

Ideally suited for use in telephone, remote control, signaling, com-
 munications circuits etc. Higli speed operation plus high sensitivity with high contact pressure. Contacts will handle 4 amps at 115 V. non-inductive load. Each relay has one make and one break contact sets Size- 3 " ${ }^{\prime \prime} \times 13 / 6^{\prime \prime} \times 15 /{ }^{\prime \prime}$.

## MS Series-MOTOR STARTING RELAYS

For hermetically sealed, ex-plosion-proof or other capacitor start, induction-run motors. Operates on back EMF of running winding. Armature gap can be altered to change pull-in; 115 -volt relay pulls in at 140 volts, releases at 40 volts; 230 -volt relay pulls in at 255 volts, releases at 80 volts.
Dimensions: $23 / 4^{\prime \prime} \times 21 / 16^{\prime \prime} \times 2^{\prime \prime}$ high. Mounted with two $5 / 2^{\prime \prime}$ dia. holes on $1916^{\prime \prime}$ centers.

When ordering, specify motor voltage and horsepower.

| Type MS2A: SPST-NC (1 form B), pure silver contacts for motors up to 1 HP |  |

## SP Series-HEAVY DUTY, SHOCK-PROOF RELAYS

SP 11
For industrial equipment control circuits, transmitter keying circuits or any application requiring fast and positive repetitive action. Balanced armature withstands shock and vibration. Fine silver contacts rated 8 amps., double break, 5 amps., single break.
Dimensions: $27 / 16^{\prime \prime} \times 15 / 8^{\prime \prime} \times 121 / 32^{\prime \prime}$ high. Mounted with two 6-32 tapped holes on $13 / 16^{\prime \prime}$ centers.
When ordering, specify coil voltage.

| :---: | :---: | :---: | :---: | :---: |
|  | Type | Net | Type | Net |
| DPDT | SP11A | \$4.75 | SP110 | \$4.30 |

CONTACT LEGEND: S—Single; D—Double; P-Pole; T-Throw; N-Normally; O-Open; C-Closed; BBreak; M-Make.

Highest quality parts and workmanship throughout.

NOTE : All relays described are standard types and can be purchased direct from P\&B distributors' stocks. When ordering specify type and coil voltage or resistance. Ex: "PRIA, 115 volts AC 60 cycles or LM5, 2500 ohms." To operate 110 V DC relays on 220 V DC put a 5 watt wire-wound resistor of a value approximating the relay coil resistance in series with the relay coil.

## Potter \& Prumbield <br> PRANCETON, INDIUANA

## KL Series-MULTIPLE CONTACT RELAYS

KL 17
Varied contact combinations and high dielectric phenolic insulation afford extreme versatility and utility. Especially suited for multiple switching in industrial applications where space is limited. Ex: machine tools, conveyors, automation circuits, etc. Pure silver contacts, rated 5 amps., $115 \mathrm{~V} 50-60 \mathrm{cy}$. AC non-inductive load.

Dimensions: KL5: $1^{15}$ 化" $\times 17 / 2^{\prime \prime} \times 115 /{ }^{\prime \prime}$ high; KL11: $155 / 6^{\prime \prime} \times 13 / 8^{\prime \prime} \times 17 / 8^{\prime \prime}$ high; KL14: $115 / 6^{\prime \prime \prime} \times 171^{\prime \prime} \times 115 / 6^{\prime \prime}$ high; KL17: $1^{15} / 1_{6 " \prime}^{\prime \prime} \times 11 / 6^{\prime \prime} \times{ }^{115} / 1^{\prime \prime}$ high. Mounted with two 6-32 tapped holes on $17 / 6^{\prime \prime}$ centers.

When ordering, specify coil voltage.

## KR Series-SMALL, LIGHT DUTY RELAYS

Small, light-weight, sturdy. For medium or low power antenna switching or any circuit requiring transfer of low or medium voltages. Pure silver contacts rated 5 amps., 115 V 50-60 cy. AC non-inductive load.
Dimensions: $17 / 8^{\prime \prime} \times 1^{3}$. $6^{\prime \prime} \times 1^{11160^{\prime \prime}}$ high. Mounted with single 6-32 screw.
When ordering, specify coil voltage.

## LK Series-LATCHING RELAYS

LK 17

Electrical latch, electrical release for automatic control of industrial machinery, safety or protective circuits. Readily adaptable to multi-circuit switching. Fine silver contacts rated 5 amps., $115 \mathrm{~V} 50-60 \mathrm{cy}$. AC non-inductive load. Coils withstand 500 V RMS breakdown.
Dimensions: $2^{29} / 32^{\prime \prime} \times 1{ }^{13} / 6^{\prime \prime} \times 125 / 32^{\prime \prime}$ high. Mounted with two $5 / 82^{\prime \prime}$ dia. holes on $13 / 8^{\prime \prime}$ centers.

When ordering, specify coil voltage. (Available only with coils of the same voltage. Example: LK 17A, two 6 V 50-60 cy. coils; LK 17D, two 6 V DC coils.)

## KRP-ENCLOSED KR SERIES RELAYS

KRP 11

The KRP is the KR relay enclosed in a clear polystyrene, dust and weatherproof cover through which the actual working of the relay may be seen. Supplied with standard octal plug only.

Dimensions: $13 / 32^{\prime \prime} \times 113 / 32^{\prime \prime} \times 2^{\prime \prime}$ high (above socket).

When ordering, specify coil voltage.

| Contacts | A.C. RELAYS <br> 6-12-24-115 Volts 50-60 Cy. |  | D.C. RELAYS <br> 6-12-24-110 Volts |  |

MH Series-MINIATURE TELEPHONE RELAYS

MH 17
Open Dimensions:

Extremely versatile. Fit hundreds of electrical or electronic circuits. 4 Form C pure silver contacts rated 5 amps., 115 V 50-60 cy. AC non-inductive load. Open relays mount with four 3-48 tapped holes on $3 / 8^{\prime \prime} \times 3 / 8^{\prime \prime}$ centers.
Sealed units resist all climatic condi$158^{\prime \prime} \times 25 / 32^{\prime \prime} \times 13 / /^{\prime \prime}$ high. tions. All-glass compression type header affords minimum leakage resistance of 10,000 megohms at $50 \%$ relative humidity; withstands high thermal shock. Metal housing. Mounts with three $6-32$ studs on $1 / 2^{\prime \prime} \times 11 / 4^{\prime \prime}$ centers. Size: $1^{111} 16^{\prime \prime} \times 11 / 32^{\prime \prime} \times 27 / 32^{\prime \prime}$ high.

Open and sealed DC units withstand better than 10G vibration and shock.

## RELAY DUST COVER No. 35DO13

Protects relays in dust-laden atmosphere. Fits all PR relays; change in mounting holes for other P\&B relays and tube sockets. Sheet steel base with 4 knock-outs; sheet aluminum cover with flanged ends fits down over base. Durable, hammerloid grey baked enamel finish.
Dimensions: $53 / 8^{\prime \prime} \times 33 / 8^{\prime \prime} \times$ $31 / 8^{\prime \prime}$ high.

Net $\$ 4.00$

## AP Series-RATCHET, IMPULSE RELAYS

For equipment requiring accurate repetitive switching. Stop mechanism assures positive positioning regardless of speed. Phenolic cams, wearresistant nylon pawl and ratchet with pin-hinged armature. Fine silver contacts rated 5 amps., 115 V 60 cy . AC non-inductive load. Dimensions: $3^{13} / 16^{\prime \prime} \times 25 / 16^{\prime \prime} \times 21 / 4^{\prime \prime}$ high. Mounted with three $5 / 32^{\prime \prime}$ diameter holes on $33 / 8^{\prime \prime} \times 7 / 8^{\prime \prime}$ centers.

When ordering, specify coil voltage.

## MB Series-MINIATURE DC CONTACTOR

Designed for very high current applications. Pure silver contacts and contact-shorting bar rated at 60 amperes non-inductive load, 28 V DC. Contact arrangement is 1 Form $X$ (SPST-NO-DM). Contact arms are heavy brass with large, tinned solder terminals. These contactors pull in at $75 \%$ of nominal voltage.
Dimensions: $15 / 8^{\prime \prime} \times 27 / 32^{\prime \prime} \times 13 / 8^{\prime \prime}$ high. Mounted with four 3-48 tapped holes on $3 / 8^{\prime \prime}$ centers.
When ordering, specify coil voltage.

| MB3D | $110 \mathrm{~V} . \mathrm{DC}$ | 3670 ohms | 4.40 |

## KCP Series-ENCLOSED PLATE CIRCUIT RELAYS

KCP

Constructed similar to KRP. Enclosed in polystyrene case with standard octal plug. For plate circuit use in photo-cell control or similar circuits. Fine silver contacts rated 2 amps., $115 \mathrm{~V}, 50-60$ cy. AC non-inductive load.

Dimensions: $1^{13} / 32^{\prime \prime} \times 1 \frac{13}{3} / 32^{\prime \prime} \times 2^{\prime \prime}$ high. When ordering, specifiy coil resistance.

| Contacts | Type | $\begin{gathered} \text { Coil } \\ \text { Resistance } \end{gathered}$ | Factory Adjustment Pull in MA | Net |
| :---: | :---: | :---: | :---: | :---: |

| DPDT | KCP11 | 10000 ohms | 5.0 | 6.80 |

## LS Series-PLATE CIRCUIT RELAYS

A low-priced relay designed for use in photo-cell control units and similar plate circuit applications. Pull-in readjustable by bending tail spring hook. Pure silver, SPDT contacts, rated at 5 amperes, 115 V AC; 28 V DC non-inductive load.
Dimensions: $2^{11} 16^{\prime \prime} \times 11 / 4^{\prime \prime} \times 13 / 8^{\prime \prime}$ high. Mounted with two $3 / 16$ " diameter holes on $2 \frac{5}{3} 2^{\prime \prime}$ centers.

When ordering, specify coil resistance.

| Contacts | Type | Coil <br> Resistance | Factory Adjustment <br> Pull in MA | Net |
| :---: | :---: | :---: | :---: | :---: |
| SPDT | LS5 | 2500 ohms | $\mathbf{9 . 0}$ | $\mathbf{N 2 . 2 5}$ |

| SPDT | LS5 | 10000 ohms | 4.5 | 2.35 |

## 75AO47-COIL BOBBIN KIT

Twenty-four assorted molded phenolic ( $85{ }^{\circ} \mathrm{C}$ rise- 1000 V RMS) bobbins - three each of 8 different sizes; core diameters from $7 / 32^{\prime \prime}$ to $7 / 16^{\prime \prime}$. For industrials, experimenters and amateurs. Net $\$ 1.50$.

#  <br> Potter s Prumplield <br> PRINCETON, IN DINANA 

## SS Series-DC SUPER SENSITIVE RELAYS

SS
For circuits requiring low energy operation such as photoelectric control, counting, sorting, batch monitor or safety interlock. Pure silver contacts rated 2 amps., 115 V 50-60 cy. AC or 28 V DC non-inductive load. Operates with 10G vibration resistance on 10 MW . Armature precision balanced on needle-point bearings; virtually friction-free movement. Dual series coils give greater sensitivity.

Dimensions: $1^{111 / 16^{\prime \prime} \times 1516^{\prime \prime} \times 11 / 16^{\prime \prime}}$ high. Mounted with two 6-32 tapped holes on ${ }^{23} / 52^{\prime \prime}$ centers.

| Type | Contacts | Coil Resistance | Max. Pull In | Net |
| :---: | :---: | :---: | :---: | :---: |
| SS5D | SPDT | 10,000 ohms | 1.0 MA | $\mathbf{5 9 . 9 0}$ |

## SM Series-MINIATURE RELAYS

Silver-rhodium contacts rated $1 / 4$ amp., 115 V $50-60 \mathrm{cy}$. AC non-inductive load or 28 V DC non-inductive load. Withstands 10G vibration up to 55 cps . Hermetically sealed in deep drawn steel can. Fits standard 7-pin miniature tube socket.

Dimensions: Height, $1^{11 / 16^{\prime \prime}}$ (above socket); diameter, $3 / 4^{\prime \prime}$. Contacts: SPDT.

## FR Series—PHOTO FLASH RELAYS

For photo-flash units employing high voltage discharge through a gas-filled tube. Contacts designed to carry a high surge current without sticking, burning or pitting. Repetitive accuracy comparable to a precision built camerashutter. For intermittentduty. Dimensions: $2^{31} /{ }^{\prime \prime} 2^{\prime \prime} \times 13 / 6^{\prime \prime} \times 15 / 8^{\prime \prime}$ high. Mounted with two ${ }^{5} / 5_{2 \prime \prime}^{\prime \prime}$ diameter holes on $25 / 8^{\prime \prime}$ centers.

When ordering, specify voltage.

| Type | Contacts | Coil Voltage | Net |
| :---: | :---: | :---: | :---: |
| FR5A | SPDT | 6 Volts, 50-60 cy. AC | \$3.60 Net |
| FR5D | SPDT | 2 Volts, DC | 3.60 Net |

## MC Series-CERAMIC INSULATED RELAYS

Inter-contact capacitance, 1.5 mmfd. maximum. Ceramic contact spacers minimize losses at high frequencies. Pure palladium contacts, rated 1 amp., 28 V DC resistive load; 115 V 60 cy . AC non-inductive load. DC types withstand 10 G vibration up to 300 cps and 25G shock.
Dimensions: ${ }^{25} / 2^{\prime \prime}$ wide x $19 / 2^{\prime \prime}$ high $\times 15 / 6^{\prime \prime}$ long.

| Contacts | Type | Coil Voltage | Net |
| :---: | :---: | :---: | :---: |
| SPDT | MC5A | $6 \mathrm{~V} .50-60 \mathrm{cy}$. AC | \$3.80 |
| SPDT | MC5A | 115 V. 50-60 cy. AC | 3.90 |
| SPDT | MC5D | $6 \mathrm{~V} . \mathrm{DC}$ | 3.50 |
| SPDT | MC5D | 24 V. DC | 3.60 |

## AF Series RELAY-400 CYCLE AC OPERATED

For replacement in aircraft-also industrial or government experimental laboratories using 400 cycle AC power source. Fine silver contacts rated 5 amps., 115 V 60 cy . AC non-inductive load.

Contact arrangement 2 Form C. Coil voltage: $115 \mathrm{~V}, 400 \mathrm{cy}$. AC.
Dimensions: $13 / 8^{\prime \prime} \times 19 / 16^{\prime \prime} \times 17 / 8^{\prime \prime}$ high.
Price
Net $\$ 7.60$

# POTTER \& BRUMFIELD RELAYS LEAD IN "USERSHIP" -WITH OVER 20 YEARS SATISFACTION 

## ADVANCE RELAYS

## POWER CONTROL TYPE

PG SERIES
(Formerly Serias 9000/9100)

Size: H—| $7 / 8^{\prime \prime}: W-11 / 2^{\prime \prime}: L-15 / 8^{\prime \prime}$

Compact, uniquely-designed general-purpose double-pole relays. High magnetic strength, excellent wiping action and short blade structure. The many uses are extended by the small size - allowing practical hermetic sealing in a small enclosure. Vibration and shock are withstaod easily by these relays due ta the special armature and frame design. PG types can be built to meet Army-Navy specificatians.

List Prices:
for 24 V.D.C. DPDT - order: PG/2C/24VD $\$ 8.47$
for 6 V.A.C. DPDT - order: PG/2C/6VA $\quad 8.47$ for 115 V.A.C. DPDT - order: PG/2C/II5VA - 8.47 Max. coil voltage obtainable: 440 V.A.C. and 230 V.D.C.
Contact ratings: 15 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive) Max. operating power: 4.0 watts A.C., 2.0 watts D.C.

## VERY SENSITIVE TYPE

SV SERIES
(Formerly Series I200)

Size: H-1/1/2"; W-2'; L-2 ${ }^{\prime \prime}{ }^{\prime \prime}$

SV Series D.C. relays are incomparable for use in any circuif restricted to a few thousandths of a watt power consumption. Excellent operation in any position, even under extreme vibration and shock. Transparent, molded plastic covers. Siurdy molded bakelite bases have both screw and solder terminal cannectors, and are easy to maunt. Adjustments are easily made with the vernier screws which vary relay sensitivity from the 5 milliwaft factary sefting
List Prices:
for 2200 ohms SPDT - order:
for 8700 ohms SPDT

## SMALL COAXIAL

## TYPE

CS SERIES
(Formerly Series 7400/8400)

Designed for coaxial line switching in small space. Very low standing wave ratia. Excellent for use in mobile, aircraft, marine, experimental and fixed-station cammunications equipment. The CS type is engineered for peak performance on 52 -ohm coaxial lines, and has $\mathbf{F}^{3} \mathbf{B}^{\prime \prime}$ fine silver internal SPDT contacts. Will easily handle $1 / 4 \mathrm{KW}$ at frequencies ta 300 megacycles. On special order, BNC ar other type connectors, sametimes preferred by manufacturers, will be supplied.
List Prices:
for 115 V.A.C. SPDT - order: $\quad$ CS/IC/II5VA $\quad \$ 15.73$ for 115 V.A.C. (with DPDT aux.) - order: CS/IC2C/115VA $\quad 17.55$ for 6 V.D.C. (with DPDT aux.) - order: CS/1C2C/6VD …........ 17.55 Max. coil voltage obtainable: 220 V.A.C. and 150 V.D.C.
Auxiliary contacts: 2 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive)

## ANTENNA TYPE

AT SERIES
(Formerly Series 400)

Heavy-duty RF transmitter antenna changeover relay. Conservative 1 kilowatt rating. Heavy $1 / 4$ " fine silver contacts. Insulated with ceramic Steatite. Positive wiping action of the contacts assures the flow of most minute currents far receiving positions. These ruggedly built relays have binding past terminals far easy cannectian ta antenna lines. Available with auxiliary single-pole single-thraw - narmally open canfacts.

List Prices:
for 115 V.A.C. DPDT - order: AT/2C/I15VA $\qquad$ $\$ 13.17$

Max. coil voltage obtainable: 440 V.A.C. and 230 V.D.C.
Auxiliary contacts: 10 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive) Max. operating power: 4.5 watts A.C., 2.3 watts D.C.
F.O.B. Burbank, or Chicago warehouse for stock items. Prices for relays with over standard range coils will be supplied upon request.

Space-saving "transmit-receive" antenna relays, ideally suited for hundreds of low-power RF applications. Efficient, yet inexpensive, these midget antenna units fill the need for 300 -ohm circuif switching in mobile, marine, aircraft, felevision, communication and fixed-station service. Silicone glass insulation for low RF loss. Conically-shaped silver contacts assure low resistance paths for either "receive" or "transmif" positions. Beryllium-copper hinge holds armature firmly in place for smooth operation.

## List Prices:

for 115 V.A.C. DPDT - order: $A M / 2 C / 115 \mathrm{VA} \quad \$ 5.45$

| for | 6 | V.A.C. | DPDT - order: |
| :--- | :--- | :--- | :--- |
| for | 6 | V.D.C. | DPDT $/ 2 C / 6 \mathrm{VA}$ |

Max. coil voltage obtainable: 220 V.A.C. and 120 V.D.C.
Contact rating: 2 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive) Confact combinations: DPDT only. Max. operating power: 3.0 watts A.C., 1.5 watts D.C.

## POWER CONTROL

 TYPEPC SERIES
(Formerly Series
$950 \mathrm{~B}, 960 \mathrm{~B}, 970 \mathrm{~B}$ \& 9800 B )

Size: $H-1{ }^{\circ}{ }^{\prime \prime}$ : W-TS/8": L-25/8"

These small-size, low-wattage power-control relays are available up to 4 PDT. They are fully dependable units for operation on either $A C$ or DC - as you specify. Thousands of applications for these reloys. Adequate armoture overtravel provides good wiping action, thus keeping the large contact surfaces clean. Stondard-valtage units are obtainable quickly and at low cost.

## List Prices:

TIME DELAY TYPE<br>DM SERIES<br>(Formerly Series 300BF)

These relays are excellent for use in pre-heating tube filaments, for specialized lighting circuits, photographic controls, etc. These relays provide an adjustable delay before make for the confrolled circuit. When the controlled circuit is completed, it remains closed until the inifial circuit is broken. Utilizes bi-metal thermal delay unit which can be adiusted for delays from 10 to 60 seconds. For proper recycling, the units require cooling of 8 to 10 times the delay period. DB Series units provide delay before break.

List Prices:
for 115 Y A
SPDT - order: for 115 V.A.C. DPDT - order: DM/2C/115VA

Contact rating: 15 amperes @ 115 V.A.C. or 28.5 V.D.C. (Resistive) Max. contact combination: DPDT. Operating power: 4.5 watts A.C.

## MIDGET TELEPHONE TYPE

TA SERIES
(Formerly Series 5000/6000)

Used by industries in every cotegory for a host of applications. Minimum power consumption and resistance to extreme vibration are provided through the use of short blades, shart armature travel and lang leverage actuation of contacts - plus highly efficient electro-magnets. Blodes are bifurcated for double-make platinum-silver alloy contacts. Many military specifications are easily met by these types.
List Prices:

# ADVANCE <br>  <br> ADVANCE RELAYS 

## SMALL ANTENNA TYPE

AH SERIES
(Formerly Series 1000/2000)

A changeover relay designed specifically for RF use in fixedstation operation - aircraft, marine, mobile and portable radio communications equipment. The small size of this relay makes it ideal for use in compact sets where the load does not exceed $1 / 2 \mathrm{KW}$. For reliable transfer of antenna power, contacts are one-quarter inch fine silver. Units are fast and positive in action, and will operate in any position.

List Prices:
for 115 V.A.C. DPDT - order: AH/2C/II5VA _ $\$ 10.97$
for 6 Y.A.C. DPDT - order:
for 6 V.D.C. DPDT - order:
$\qquad$ 10.97

Max. coil voltage obtainable: 440 V.A.C. and 230 V.D.C.
Contact rating: 10 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive) Max. operating power: 4.0 watts A.C.; 2.0 watts D.C.

## MIDGET TYPE

MF SERIES
(Formerly Series
KI500A/K1600A)

These ADVANCE design originals are general-purpose relays engineered for high efficiency and low price. The small size of these midgets invites their installation in many cramped locations. For 2 -ampere contact ratings, specify the MG Series. For 5 -ampere contacts order the MF Series. These relays offer beryllium copper armature hinges for perfect alignment - wiping oction for positive contact - operation in any position - a combination assuring long, trouble-free life.
List Prices:
for 115 V.A.C.
for 115 V.A.C.
for 115 V.A.C.

> SPDT ~ order:

MG/IC/I15VA $\qquad$ $\$ 4.31$ for 6 V.D.C. MG/2C/II5VA $\qquad$ 4.65 for 115 V.A.C 3PDT - order: $\qquad$ 6.92

Max. coil voltages obtainable: 220 V.A.C. and 120 V.D.C.
Max. contact combination: 3PDT. Operating power: I. 5 watts D.C.

## high-VOLTAGE TYPE

HV SERIES
(Formerly Series 2800)

A small-size D.C. unit engineered and developed for making and breaking high-voltage, low-current circuits. Leverage arm. ature principle is employed allowing the wide contact gap necessary for high-voltage switching, but keeping the size of the relay to a minimum. You can use this relay where bulky, "standard" design high-voltage units occupy too much space. Contact assembly is mounted on ceramic Steatite. This ADVANCE original will meet many of your specialized high-voltage needs.
List Prices:
for 24 V.D.C. SPST-NO-order: HV/IA/24VD $\$ 16.75$
for 6 V.D.C. SPST-NO-order: HV/IB/6VD ................................... 16.75
f 24 V.D.C. SPSTNO-order: HV/IB/GVD
for 6 V.D.C. SPDT - order: HV/IC/6VD 25.13
Max. coil voltage obtainable: 230 V.D.C. Contact rating: 5000 V.D.C. @ 200 milliamperes.
Max. contact combination: SPDT. Max. operating power: 4.0 watts D.C.

## OVERLOAD TYPE

OE \& OF SERIES
(Formerly Series 750A \& 750B)

Safeguards equipment against current surges or continuous overloads. Designed for D.C. eircuits, and especially applicable to radio transmitters. Set the potentiometer to provide the desired current limit - any overload will open the circuit. The circuit remains open until electrically reset. The OE Series is adjustable for any desired overload current between 250 and 500 milli. amperes, and the OF Series ranges from 500 to 1000 milliamperes.

List Prices:
for 115 V.A.C. (reset) DPST - order: $O E / 2 B / 115 \mathrm{VA} \ldots+\quad \$ 17.57$
for 115 V.A.C. (reset) DPST - order: OF/28//15VA 17.57
Max. reset voltages: 440 V.A.C. and 230 V.D.C.
Contact rating: 15 amperes @ 115 V.A.C. or 26.5 V.D.C. (Resistive) Contact combination: DPST-NC only. OH and OJ Series: manual reset.
F.O.B. Burbank, or Chicago warehouse for stock items. Prices for relays with over standard range coils will be supplied upon request.

# COAXIAL TYPE <br> CB SERIES <br> (Formerly Series 7200/8200) <br>  <br>  

Unsurpassed for coaxial switching. Designed for 52-ahm lines, the units aperate equally well in any pasition. Law standing wave ratias permit usage an frequencies up to 300 megacycles. The internal single-pole double-thraw contacts are heavy quarterinch fine silver. An inspection port at the cantact end of the anodized housing permits easy access to the internal contacts. External auxiliary stacking is available up to DPDT.
List Prices:

## SENSITIVE TYPE

SD SERIES
(Formerly Series 4000)

Small sensitive D.C. relays available up to six-pole, doublethraw. Applicable far hundreds af sensitive electranic circuit uses. Platinum-silver alloy cantacts. A variety of hermeticallysealed enclosure styles is available. High sensitivity, dual magnets, bifurcated blades with double-make centacts - all this in a compact unit accupying minimum space.
List Prices:

## "TINY MITE" MINIATURE TYPE

MM SERIES
(Formerly Series 000)

Ultra-small and feather-light ADVANCE "Tiny Mite" D.C. relays require less than $1 / 2$ cubic inch maunting space! Peanut-sized, hermetically-sealed enclasures are available ta further expand the uses of these soundiy-engineered units. All switching is enlirely abave ground. Insulation is silicone glass. Single 2.56 screw mounting. Beryllium copper armature hinge assures stable performance under vibratian and shock. Platinum-silver alloy cantacts.

List Prices:
for 6 V.D.C. SPDT - order: MM/IC/6VD $\$ 3.52$
for 24 V.D.C. DPDT - order: MM/2C/24VD 4.24
for 2000 ohms DPDT - order: MM/2C/2000D $\quad 5.20$
for 3600 ohms DPDT - order: MM/2C/3000D $\quad 5.81$
for 5000 ohms DPDT - order: MM/2C/5000D ..........................66
Max. coil resistance obtainable: 10,000 ohms. Weight: 10 grams.
Confact rating: $1 / 2$ ampere. Operating power: 0.7 watt.

COIL
ASSFMBLY

## SERIES 200-INTERCHANGEABLE

CONTACT SWITCH ASSEMBLIES

Two basic parts-a coll assembly and a contact assemblycomprise this simple, yet versatile, relay. Coil assembly consists of coil and field piece. Contact assembly consists of switch blades, armature, return spring and mounting bracket. The new midget contact assembly, which is interchangeable with the standard assembly, is also available in either single pole double throw, or double pole, double throw. The standard contact assembly is $27 / 8^{\prime \prime}$ long, $13 / 4$ " high, $l^{\prime \prime}$ wide. The midget assembly is $15 / 8^{\prime \prime}$ long, $11 / 2^{\prime \prime}$ high, $l^{\prime \prime}$ wide. The four contact assemblies can be used with any one of 13 cails to make a required relay. Contact points are rated at 8 amps., 115 volts, 60 cycles $A C$, non-inductive load.

## RC-100 REMOTE LOCKING CONTROL RELAY

A Guardian development of the momentary impulse locking
 control relay. The circuit to the coil needs to be energized only long enough to close armature; contacts lock automatically. Each impulse reverses position of contacts.
Standard coils operate on 115 volts, 50-60 cycles AC. Coils for other voltage and currents on specification.
Contacts, $1 / 4^{\prime \prime}$ fine silver metal rated at 1500 watts at 115 volts, 60 cycle, non-inductive. Can also be used in AC primary circuits of any power supply delivering up to $1 \mathrm{KW} .3^{\prime \prime}$ long, $21 / 8^{\prime \prime}$ wide, $1 \frac{1}{3} 7^{\prime \prime}$ high.
Applications-break-in control and phone to CW switching. Any circuit control where locking circuits are used.

## U-100 AND U-200 ADJUSTABLE UNDERLOAD RELAYS

Sensitive, precise, designed and constructed for long, trouble-free service. Relays are encased in aftractive black finished metal containers, protecting them from dirt, dust and maladjustment. Normal current through the coil on the U-100 is 300 milliamperes with an adjustable
 peres DC. Normal current through the coil on the U-200 is 600 milliamperes with an adjustable range of 200 to 400 milliamperes. Oversize contacts of fine silver, rated for the AC primary of any power supply delivering up to 500 watts.
Radio Application-protection of class " $B$ " audio equipment in case of class " $C$ " load failure, also class " $C$ " amplifier in case of excitation failure.
Industrial Application-Any DC circuit where it is desirable to maintain currents above a set value. $\mathrm{U}-100$ and U-200 are $3 \frac{5}{16}{ }^{\prime \prime}$ in diameter, $2 \frac{1 / 44^{\prime \prime}}{}$ high.

## T-100 AND T-110 TIME DELAY RELAYS

Standard coils operate on 115 volts, $50-60$ cycles non-inductive $\AA C$. Coils available on other voltages on specification. Oversize contacts rated at 1500 watts on 115 volts, $50-60$ cycles non-inductive. Can also be used in the AC primary of any power supply delivering up to 1 KW . Adjustable time delay for any period between 10 and 60 seconds.
Applications-Radio. In transmitter circuits to prevent damage of rectifiers and tube filaments by application of plate current before filaments are sufficiently heated. Industrial. Any control problem requiring the changing of circuits after a predetermined interval.

T-100- $51 / 4^{\prime \prime}$ long, $3^{\prime \prime}$ wide, $21 / 4^{\prime \prime}$ high. Shipping weight $11 / 4^{\circ} \mathrm{lbs}$. Laminated construction. List Price.. .520 .75 ea.

GUARDIAN SERIES T. 110 TIME DELAY RELAY

The $\mathrm{T}-110$ is a compact, sturdy, economical time delay relay for use in applications not requiring the capacities of the T-l'00. Contact capacity - 1250 watts on 115 volt, 60 cycle non-inductive $A \subset$. Can also be used in the AC primary circuit of any power supply delivering up to, and including, 1 KW . Adjustable time delay between 10 and 60 seconds.
T.l10-5 $5 \frac{6}{32}{ }^{\prime \prime}$ long, $3 \frac{1}{16}{ }^{\prime \prime}$ wide, $2 \frac{7}{16}{ }^{\prime \prime}$ high. Shipping Weight $8 \mathrm{oz} . . . . \quad$ List Price $\$ 15.65$ ea.

# RELAYS BY GUARDIAD 

## A COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS

SERIES R-100
H.F. RELAY

HIGH FREQUENCY RELAYS
The Series R-100, R-100B, and A-300 Guardian Relays are primarily designed for high frequency applications. They are low-loss insulated, compact, economical and sturdily constructed. The R-100 and R-100B are AlSiMag insulated, while the A-300 is mounted on a mycalex base with mycalex contact mounting bar.

Radio Applications - Antenna changeover, break-in, high voltage keying, grid controlled rectifier keying, remote control of receiver and transmitter, and other high frequency applications.

Industrial Applications - Oven control, remote motor control, short wave therapy and diathermy, heating equipment.

H.F. RELAY

## X-300-ER ADJUSTABLE OVERLOAD RELAY <br> with Electrical Reset

This relay offers positive, precise protection against current surges and continuous overloads - remote panel installation of the control poten. tiometer simplifying adjustment of relay to operate on any current value from 250 to 750 milliamperes - auxiliary contacts for pilot light indication of "overload" or "clear" position - reset relay can be operated from any convenient point. Voltage drop across overload coil is less than 10 volts at any current value. Insulation between coil and ground rated at 3000 volts.

X-300-ER-43/4" long, 1-15/16" wide, $2^{\prime \prime}$ high. Shipping weight 12 oz .
List Price. $\qquad$ $\$ 11.20 \mathrm{ed}$.

## B-100 BREAK-IN RELAY

Specially designed for breakin operation on amateur transmitters. Low current drain and compact construction, plus the use of $\alpha$ laminated field piece and
 armature insuring efficient operation, make the B-100 an ideal relay for this application. Standard coil operates on $115 \mathrm{~V} ., 50-60$ cycle AC. Silver contacts rated at 1500 watts, 60 cycles AC non-inductive, and in $A C$ primary circuits of any power supply delivering up to 1 KW .

B-100- $23 / 4^{\prime \prime}$ long, $21 / 6^{\prime \prime}$ high, $2 \frac{1}{4} 4^{\prime \prime}$ wide. Shipping weight 11 oz.

List Price. $\qquad$ $\$ 13.00$ •

## K-320 KEYING RELAY

A standard coil operates on 6 volts AC. Coils for other voltages on specification at a minimum of $10 \%$ additional to list price. Contacts-special over-size silver. Can handle 5,000 watts on 60 cycle non-inductive 115 volts $A C$ and in AC primary circuit of any power supply delivering up to and including 1 KW . Control capacity-up to 2,000 volts with clean make and break.

Applications-Control of filament center tap keying of any stage having up to 2,000 volts on plate; primary keying or control of power supplies up to and including 1,000 watts: and grid-controlled rectifier keying of 3,000 volt power supplies.
K.320-3" long, $1 \frac{1}{2 \prime \prime}$ wide, $1-15 / 16^{\prime \prime}$ high. Shipping weigh 4 oz.

## THERMOSTATIC

STANDARD

## AMPERITE

THERMOSTATIC
DELAY RELAYS

MINIATLRE

EXCLUSIVEFEATURES:

- Actuated by a heater.
- Operates on A.C., D.C., or Pulsating Current.
- Hermetically sealed, Amperite Relays are not affected by altitude, moisture or other atmospheric conditions.
- Compact, lightweight and inexpensive.

## TECHNICAL CHARAGTERISTICS

CIRCUITS: SPST only-Normally open or normally closed.
HEATER WATTAGE: 2 W prox.-Heaters can be operated continuously.
STANDARD CONTACT RATING: $115 \mathrm{~V} .-3 A$ A.C. (or $220 \mathrm{~V}-0.5 A \mathrm{~A} . \mathrm{C}$.) Maximum voltage between contacts and heater-1500V. D.C.
MINIATURE CONTACT RATING: $115 \mathrm{~V}-2 \mathrm{~A}$ A.C., other specifications same as standard.
AMBIENT TEMPERATURES: Relays are compensated for temperatures of $-55^{\circ}$ to $+70^{\circ} \mathrm{C}$. Tolerances given are for $20^{\circ} \mathrm{C}$.
LIFE: With 115 V-IA A.C., non-inductive, at least 500,000 opera:ions.

MINIATURE TYPES: Designated by letter T. (e.g. 6 NO5T) is available in all delays shown above bold dotted line.
Delays of 2 to 90 seconds are available in both standard radio octai and 9 -Pin miniature. Prices of both standard
and miniature type.
Flashers available only in low voltage heaters $6.3-26 \mathrm{~V}$.
Flash Rate available - pre-set at factory - 5 to 100 fpm .
Dealers Cost - $\$ 2.40$ each

## Superios. . RIPLEY COMPANY, INC.

## L-R BLOWERS - "Mighty-Mites"

The L-R Blowers are designed for applications requiring the movement of large air volumes where space and weight are prime factors. These small blowers can be adapted to many applications such as the dispersion of heat generated by electronic equipment, induction heaters, tube cooling in movie projectors, instrument cabinets, drying operations, photographic darkrooms and in other confined enclosures. Available in CW and CCW Rotation, Rotation determined by viewing from motor side.

## SUNSWITCH LIGHT CONTROL

The SUNSWITCH uses an ampli. fier and phototube that responds to the foot candle value of dayliyht. When illumination fails below a predetermined value, the lights are turned on. When the illumination has increased to the correct value, the lights are automatically turned off. Applications for the SUNSWITCH are numer-ous-Radio \& TV Towers, Signs, Factories, Construction Work, A irports, Railroads, Street Lights, etc. Mounted in standard weatherproof watt-hour meter case. Arailable in various models, carrying loads up to 60 Amps.

## ELECTRONIC RELAYS AND SWITCHES

Engineered for exceptional reliability, long life with minimum maintenance. These Relays are highly sensitive and utilize no coaxial cable. Designed for applications needing a very short or medium impulse . . as short as . 0005 seconds, and will furnish pulse to operate a reset. Jock or predetermined counter. The Ripley Phototule Relays have countless uses such as starting and stopping lighted displays, drinking fountains and machinery. Controls automatic paint sprays, announces the entrance and passing of customers.

ELECTRONIC TIMERS

The Ripley Timers are of the short interval period, stop cycle, Bhort interval period, stop cycle,
type. Built to control industrial processes, they meet the most processes, they meet the most exacting requirements of this
service by delivering dependable, aervice by delivering dependable,
accurate, and long.lived peraccurate, and long-lived per-
formance. Basic Models cover the formance. Basic Models cover the
ranges of from 05 to $.5, .1$ to 10 ., and 1 , to 100 . seconds and are available with any one of three different circuitg. Principle of operation is electronic, assuring freedom from trouble caused by mechanical lag or wear.

## ELECTRONIC Phototube COUNJERS

These sturdy, well built Electronic Counters are furmished with 5 -digit counters. Available with outside light source as well as a built-in light source. The model with built-in light source incorporates a reflector mirror which directs the beam back into the phototube, thus eliminating the need for an extra pair of wires. Operates on 110 or 220 volts, 25 or 60 cycles. Dimensions: $51 / 4^{\prime \prime} \times 6^{\prime \prime} \times 61 / 4^{\prime \prime}$ high.

## ELECTRONICALLY OPERATED RELAYS MODEL 63

Especially designed for use with a correct combination of the standardized Worner Photo-Cell and Exciter Lamp nuits shown at right. However. 1his Electronically Operated Relay will operate also from light sources such as daylight, artificial lights, radiant energy from metallic processing, etc.

Model 6.3 Electronically Operated Relay is a specially engineerel. highest quality unit. It enjoys wide preference as it efficiently meets exacting requirements and replaces the need of costly individually engineered equipment. Tecinical details on request.

## ELECTRONICALLY OPERATED RELAYS

Model 63, Described Ab
Model 63-A, combines Model 63 and Time Delay
Circuit giving delay from zero to 45 seconds.... $\$ 150.00$
Model $63-\mathrm{B}$, same as Model 63 with allditional
amplification to operate on less active change
of light
$\$ 150.00$

## ELECTRONICALLY OPERATED RELAY MODEL 64

An economical unit for practically any industrial application where cost is a factor. Designed for use with a combination 0 . standardized Worner PhotoCell and Exciter Lamp units shown at right.
Model 64 Electronically Operated Relay......each $\$ 67.50$

## EXCITER LAMP \& PHOTO-CELL RECEIVER UNITS

## For Use With Models 63, 63-A, 63-B and 64 Electronically Operated Relays

Model 33

Model 23

Model 31

Model 21

The Exciter Lamp unit is designed to project the light beam and the Photo-Cell Receiver is designed to pick up the beam and convert its light into electrical energy through the Electronically Operated Relay unit.
Model 33 Exciter Lamp is "standard" for general applications and is most generally recommended. Its light beam covers a distance from a few inches to 10 feet from Exciter Lamp to Photo-Cell. Heavy duty cast iron unit with $1 / 2$-inch conduit fittings. Gray finish.
Model 23 Ploto-Cell Receiver is engineered for ust with Model 33 Exciter Lamp. Same case specifications.
For use in damp surroundings. Models 33 and 23 can be made moisture-proof at slight aclditional cost.

Nodel 31 Exciter Lamp is "standard" where a lighter weight case is practical. Its light beam covers a distance from a few inches to 15 feet from Exciter Lamp to Photo-Cell. Case is 18 gauge steel, gray wrinkle finish. Has $1 / 2$-inch knockout.

Model 21 Photo-Cell Receiver is engineered for use with Model 31 Exciter Lamp. Same case specifications.

| Model No. | Dessription | Size, Inches | Pric |
| :---: | :---: | :---: | :---: |
| 33 | Exciter Lan | $41 / 4 \times 23 / 4 \times 23 / 4$ | \$13.50 |
| 23 | Photo-Cell Receiver | $41 / 4 \times 2314 \times 23 / 4$ | 19.50 |
| 31 | Exciter Lamp | $65 / 8 \times 2 \times 13 / 4$ | 11.00 |
| 21 | Photo-Cell Receive | $65 / 8 \times 2 \times 13 / 4$ | 17.00 |

FOTOLECTRIC ANNOUNCER SET

## Automatically Announces the Entrance or Passing of Any Person COMPLETE WITH MIRROR AND CHIME

The Fotolectric Announcer is a complete three-piece set. It is designed to project a beam of light across any entrance to any room or building. Breaking of this light beam by person entering activates a pleasant chime, automatically announcing the entrant. Chime can be located wherever signal is
desired.

The unit has efficient grid controlled rectifier circuit which insures maximum stability. The Unit combines Exciter Lamp and sensitive Photo-Cell in metal case, size $80 / 4^{\prime \prime} \times 61 / 2^{\prime \prime} \times 23 / 4^{\prime \prime}$, beautifully finished in gray hammerloid. Eulb has long lamp-life rating of 2000 hours. Operates on $110-120 \mathrm{~V}$; $50-60$ cycle, A.C.

Model 61 Fotolectric Announcer, three-piece set including Unit. Mirror and Chime..........Set. each $\$ 32.00$

## MODEL 62 R \& L ELECTRONICALLY OPERATED RELAY AND EXCITER LAMP SET

Model 62-R Electronically Operoted Reloy

Model 62.L Exciter Lamp

This "two-unit" set has specially designed Exciter Lamp Unit and an Electronically Operated Relay unit that includes the Photo-Cell Receiver, Relay and other electrical components. This combination has proved eificient for countless simple applications for distances from a few inches to 75 feet or where Relay is not required to operate in excess of 300 times a minute. Supervises efficiently on simple applications such as: Counting or sorting large objects; limit switches; start and stop operations; opening loors, etc.
Model 62 R \& L"Two-Unit Set"..............per set $\$ 85.00$ Model 62-R Electronicaily Operated Relay..each 69.75 Model 62-L Exciter Lamp...............................each 21.75

## FOTOLECTRIC BURGLAR ALARM SYSTEMS

An invisible light beam is projected by the Exciter Lamp to the Photo-cell contained in the Electronically Operated Relay. These two units constitute the "Fotolectric Set." The units are illustrated below.
MODEL 9000 SERIES The Worner Master Control System consists of a Master Control Panel used in combination with 1, 2, 3, or 4 Fotolectric Sets. Operates alarms the user installs. May be used with foil systems, etc. Sets off alarm if wiring of Fotolectric Set is tampered with. Relays controlled by a key-switch. For $110-120 \mathrm{~V}$. Panels are supplied with plate relays for the number of Fotolectric Sets ordered. Should Fotolectric Sets be added later, plate relays are supplied with Fotolectric Sets ordered.

Model 9000-R Master Control Panel prevents false alarm if power fluctuates 5 volts or more. If power fails completely, the unit automatically resets supervision when power is restored. each $\$ 74.00$
Model 9000 Master Control Panel is equipped to prevent false alarms when power fails completely ........each $\$ 54.00$ Sets for $150^{\prime}, 250^{\prime}$, and $500^{\prime}$ have unwanted light rejector which increases day-light range. Ranges listed are for infra-red light.

| Model No. | fotolectric Set |  |  | $\begin{aligned} & \text { Range } \\ & 100 \mathrm{ft} \text {. } \end{aligned}$ | Per Set |
| :---: | :---: | :---: | :---: | :---: | :---: |

MODEL 7000 SERIES operates with burglar alarm company's central office control, police signal or local alarn. The Relay may be connected either in series or parallel to meet circuit requirements. One or more Fotolectric Sets can be used and can be operated by an existing control panel. Can be used with foil systems, etc. For $110-120 \mathrm{~V}$ or 24 V .
Model No. Fotelectric Set Range Per Set 7100 Remote Cont. Trespass Trap. 100 ft . $\$ 84.00$ 7150 Remate Cont. Trespass Trap.. $150 \mathrm{ft} . \quad 108.00$ 7250 Remote Cont. Trespass Trap... 250 ft . 145.00 7500 Remote Cont. Trespass Trap.. 500 ft . 225.00

MODEL 5000 SERIES for $100^{\prime}$ range and $150^{\prime}$ range for interior use where a single beam is ample protection. Not intended for use with foil systems, etc. The Electronically Operated Relays of this series are equipped with lock and key. For 110 V .

## FOTOLECTRIC COMBUSTION SUPERVISOR

A three-piece set consisting of Exciter Lamp, Photocell Receiver and a choice of three Electronically Operated Relay units. Operates on the smoke detection principle. Dependably sets into operation the controls that maintain combustion efficiency. Fotolectric units are mounted opposite each other on the boiler breeching, so that the beam of light traverses the flow of smoke. A predetermined increase in density of smoke operates whatever alarm or automatic control equipment is used.
Electronically Operated Relay and Contrc1 Cabinets available in three nodels:
MODEL No. 71A - For use where no time delay is necessary. Usually used as an alarm device, and to actuate automatic combustion control equipment.
MODEL No. 71B -
Equipped with input time delay circuit to prevent needless operation of control equipment from voltage drop or short puffs of smoke. MODEL No. ${ }^{71 \mathrm{C}}$ Same as Model 71 B plus additional time delay holding circuit to continue operation of combustion control equipment for a predetermined period of time. Prevents cycling of equipment.

## FOTOLECTRIC FIRE PROTECTION

The Worner Fan Motor Stop installed on ventilating ducts detects smoke, gives alarm, stops fan to prevent fan-driven fire to a succession of outbreaks. Approved by Underwriters Laboratories. For full details, write for Bulletin 650.

## WORNER COMMUNICATING SYSTEMS

Models P-359, P-353

Model P-360
All WORNER units operate efficiently as far as 2000 feet apart. Persons at or near Sub-stations when called may answer without leaving their work, from as far away as 25 feet. "Silent feature" shuts out noise in vicinity at Station. 110 volt to 120 volt, A.C. or D.C. MODEL P-359 Selective Master Station. Handles 1 to 5 Sub-stations. Has 3 -tube amplifier. 1 watt output. Contains 5 -inch speaker for maximum input without talking directly into unit. All-metal cabinet; size $9 \mathbf{x}$ $61 / 4 \times 6$ inches. Finished in hammered walnut lacquer finish. ..................................................................each $\$ 34.75$
MODEL P-353 Combination Master Station. 2 to 5 units may be used, in any combination of Masters to Masters, or Masters to Sub-stations. Contains 3-tube amplifier. .............................................................each \$47.50
MODEL P-360 Sub-station. Has 5-inch speaker. Talklisten switch used by Sub to originate call; not used after Master answers. All-metal cabinet; size: 71/4 x 4 x 6 inches; finished in attractive hammered walnut lacquer finish.

PHOTOELECTRIC RELAYS AND ACCESSORIES

## CR7505-K100G3 Relay

The CRi505-K100G3 photoelectric relay and accessories provide a complete line of inexpensive. but thoroughly reliable, apparabut thor general-purpose indoor applications which include applications Which include counting, diverting, controlling, signaling, limiting, and protecting. Underwriters faboratories approved.

The CRi505-K100G3 includes phototube and thyratron, has a contact rating of 10 amp a-c, may be used to start f-hp motors directly, and can operate all motor starters up to and including NEMA Size 4.

## Accessories for Use with -K100G3

Cat. No. 71 G 690 light-
 source trancformer, rated 115 volts, $50 / 40$ eycles, primary: 4.8 volts sccondary; leus-harrel as. sembly CRT505. 13207G1, 3 in, in diameter, for mounting directly on relay; two lizht sources, -C201(i1 with $11 / 2$-in. lens and -C203G1 with 3 -in. lens; two phototule holders with six fect of special phototube rable and a plug for connecting to tube socket in the relay, -P211G1 with $11 / 2-\mathrm{in}$. lens, and the -P212G1 with 3 -in. lens. With $11 / 2-i n$. lens, maximum operating distance is 12 ft .; with 3 -in. lens, maximum operating distance is 30 ft . Sensitivity of -KI00G3 may be increased five times by use of B207G1 lens-barrel assembly.

## CR7505-K201G1, -K202G1 Relays

These photoelectric relays will perform the same type of functions as the -K100 with greater speed and sensitivity. These relays operate on either light increase or decrease, depending on connections. The relays will operate from light flashes on interruption of $1 / 15$ second between impulses, with not less than $1 / 15$ second bepulsen, flashes. The d-c phototube circuit pernits remote location of phototube with no loss in sensitivity.

## CR7505-K108G15 Relay

This device has a dust-tight, weather-resistant enclosing case for outdoor use, operates from either a 115 -volt d-c or a 25 -cycle supuly with power requirement of 20 volt-anueres $\mathrm{T}^{2}$ cover of the enof 20 voltamineres. The cover of the enclosing ease has a 3 -in. lens and aperture for admission of lirht to the phototube. A metal visor minimizes the effects of elanting sun rays and reneral daylight illumination. Maximum light-source distance from phototube is approximately 35 ft. A minimum illumination of 3 footcandles is necessary for satisfactory operation.

## CR7505-N210, -N211, -N212 Relays

These three relays are similar in circuit design and are especially adapted for photoelectric applications where a device must respond to rapid light changes or hirh operating rates
A time delay feature, adjustable up to $1 / 2$ second by means of a potentiometcr dial, is provided to delay the dropout of the mannetic relay in cases where time that the period would not be auficien to perform the external control oumcient to perform the external control operation degired.

The relays will respond to light changes as small as $1 / 2$ foot-candle, providing there is suf. ficient light on the phototuhe.

Separate phototube holders are required for thege units.

| Maximum Distance between Light Saurce and Phototube, Feet | Maximum Operating Rate per Min | Type of Relay <br> Contacts | Minimum <br> Light <br> Level <br> to Operate Relay Foot Candles* | Nominal Voltage | Line Frequenty | Selfcontained Phototube | Enclosure, NEMA Type | Minimum Required Duration Light Change (Seconds) | Volt amperes Required (excluding <br> Light Source) | Nomenclature CR 7505. |

*Light level measured in foot-candles at the phototube lens with a standard light meter, with entire lens illuminaten. $\dagger$ May use separate phototube holder. $\ddagger$ Relay will respond . 015 sec. after light change. Intemal timing circuit insures operation on pulses as short as 0.001 sec. and may be adjusted to keep relay energized up to 0.5 sec.
NEMA ENCLOSURE TYPES: I—Protection only, III-Weather-resistant, IV—Watertight, V-Dust-tight, VII-Explesion-proof.
[1

PHOTOELECTRIC RELAYS AND DEVICES

## Photoelectric Accessories for Use with -K201 and -N210 Series

1. The CRi505.Cu00011 light source is for general indoor application.
2. The following light sources are of die-cast aluminum construction. The C201G1 light source has a $11 / 2-\mathrm{in}$. lens, focusable from 2 feet to infinity. The C202G1 has a double lens for short focus, for a concentrated spot approximately $1 / 4-\mathrm{in}$. in diameter at a distance of $21 / 2-4 \mathrm{in}$. in front of the lens. The-C203G1 light source has a 3 -in. lens, with high-intensity beam for long-distance operation. The $-\mathrm{C} 201 \mathrm{G2}$, -C202G2, and -C203G2 are identical in operasion with the G1 group, but have rubber gaskets between the front and back covers which makes them weather-resistant and dust-tight in accordance with NFMA Stardards.
4.8 volts is required for all the above light sources and the following transformers are recommended:

Light-source transformers. The 9TY51A1 is enclosed in a condait box with knockouts for conduit connections. It is rated $115 / 230$ volts, $50 / 60$ cycles. The 9 TM321A1 is of open-type construction, but has same rating as 9TY51A1. The 92G34 for $25 / 50 / 60$ cycles is of weather-resistant construction; except for size and type of construction, rating is identical with 9TY51.11.

3. The $\mathbf{C 2 0 8}$ light bource is explosion-proof and can be ruade watertight by applying a rubber gasket which is furnished. It has a $3-\mathrm{in}$. lens and a self-contained step-down transformer for $115 / 230$ volt operation.
4. The phototube holders are similar in construction to the light sources. The -P202G2 has a $11 / 2-\mathrm{in}$. lens and the -P203G2 has a $3-\mathrm{in}$. lens. Beth come with a $9-\mathrm{ft}$. photo. tube cable with spade terminals.

## CR7504-A142 Electronic Timer

## CR7504-A142

## Electronic Timer

The -A142 timer is for timing applica. tions of short time duration ( $\cdot \mathrm{A} 142 \mathrm{G1}$, 0.06 to 1.2 sec .; A14202, 0.6 to 12 sec .; and -Al42G3, 6 to 120 sec .) where long life, low maintenance, and high repetitive accuracy is required.

The -A1\$2 has double pole, doublethrow contacts; can be used to start f-hp motors directly. Time-range diale read directly in seconds.
Two different types of operation available; immediate-start for timing opera. tions or delayed-start for providing a time delay. Power supply, $\quad 115 / 230$ volts, $50 / 60$ cycles; power consumption, 15 watte.

## CR7511-A126 Resisfance-sensifive Relay

This relay is used to obtain a rellable contact from the touch of two con ductors through which only small currents flow. It will operate motors, lights, contactors, and solenoids whenever there is, sufficient change in the resistance of a circuit, including liquid-level-control applications. In this way, large amounts ot power can be controlled from a low. current high-resistance input.
It has 10 amp a-ce contact rating, two single-pole, double-throw contacts for controling two independent cir cuits. Finclosure is weather-resistant cuits. F.nclosur
and dust-tight.

## CR7505-R201G1 Smoke-density Indicator

This control and associated equip ment can he userd to indicate smoke density, kas density, or the ilensity of any fluid where density is directle related to the light transmission throurh the fluid. It can be used to warn furnace onerators of excessive smoke conditions, to turn on blowers or relevant eguipment at ans smoke-density level. and when used with a suituble recorder, a continuous permanent record of smoke density is always available.

The indicator has a semi-fust-tight enclosure (NEMA Type iA) and an irdustrial type relay, 45 amp makehreak anj 10 amp carry, at 115 or 230 volts, a-c. Simple calibration adjustments are nade with our locking-type knobs on the panel, while indicat ang liche with a smoke-density instrument are on the front cover of a panel.

## CR7505-B100 Photoelectric Relay and -C105 Light Source

The CR7505-8100 incorporates a turied circuit which allowe the relay to be responsive onlyto a light beam modulated at approximately 900 eveles per second. Hence, it is insensitive to chankes of natural or artificial light.
The CRTEO5.C105 contains a light-souree lamp, a transormer, and a motor-driven lotted disk which "chops," or modulates. the linht beam at approximately 900 cycles per second.
When operating at distances of 1000 ft . or less, this equipment in general has sufficient sensitivity so that the light from the source must be reduced twenty times before the relay will drop out. This helps reduce false pueration caused by adverse will drop out. This helps reduce false operation caused by adver

The units operate on $115 / 230$ volts, 60 cycles, a.c. Contacts are rated 10 volts. $115 / 230$ volts, a-c. The relay is provided with a sersitivity control for adjustment for particular light path distance.

For oomplete Informatlon, consult your nearest G-E Apparatus Sales Office or Distrlbutor, or write direct to Section 640.381, General Electrle Company, Schenectady 5, New York.

A QUALITY DRY BATTERY FOREVERY PURPOSE

GENERAL dry batteries contain many outstanding advancements such as extra heavy seamless extruded zinc cups, the famous paper thin separator permitting more mix and more active zinc area by utilization of the cell bottom, the curled rim lock seal which seals each cell individually. These features, found only in Generals, assure lang shelf life as well as the maximum in dry battery performance.

## ENERAL A \& B RADIO FARM PACKS

General A-B packs are made with L size cells in the A section. These cells are $40 \%$ longer than the largest conventional $11 / 4$ " diameter cell. This construction assures the perfect balance between these " $A$ " and " $B$ " sections for current drains established by the Radio Industry.

## GENERAL ABC HOME RADIO BATTERIES

All cells used in General batteries are filled with active mix by loading equipment developed by General which automatically puts the right amount of mix into each cell and packs it uniformly. General home radio bafterles are accepted for their uniformity, dependability and long service.

## GENERAL PORTABLE A \& B PACKS

The small size cells used in portable batteries greatly reflect the benefits derived from General's patented construction. General Batteries deliver more service hours per dollar, therefore you will find them used as original equipment in more battery radios than any other brand.

GENERAL PORTABLEABATTERIES

## GENERAL ''DuroMite'" BATTERIES

New General DuraMite batteries are the finest in battery design and assembly. Thin, well-balanced flat cells are stacked like a rall of wafers. Each stack af cells sealed in its awn plastic case, keeping the cells fresh until put in use. Maximum service life can be abtained fram minimum of space used.

## GENERAL "FlashLite" \& LANTERN BATTERIES

The New General "Flashlite" cell cames ta the market ta fulfill the demand af practically every user. This demand is far exfra lang service, years af shelf life and pratection against corrosion damage. The Industrial cell is recammended when light is needed frequently and for lang periads.

No. 85-T-New Crocodile "Tip-Cllp"-equipped with standard phone tip on one jaw, otherwise same as No. 85. Ideal for use as a prod, for ordinary clip connections and for connections to insulated binding posts having non-removable heads. $25 / 8$ " long.
EACH NET............... $\$ 0.18$ LOTS OF 10.................. $\$ 0.13$
Use No. 87 Insulators for clips 85, 85.C and 85-T. Red and Black. Cover entire clip except nose. Protect against short and shock. Holp to distinguish leads.

NEW INSULATED ALLIGATOR CLIPS
Patent Pending

## No. 63 or 63-C Cllp

 Sold only as a unit, with factory-applied insulators.A radically new development that doubles the usefulness of Alligator Clips! Completely insulated right down to the nose. Flexible 2-piece skin-type vinyl insulator of high dielectric strength, with "ip action" slotted nose that permits opening of clip without exposing metal. Insulator nose is only $15 / 64^{\prime \prime}$ O.D. The tight fitting sheath preserves all the slimness of the Alligator Clip, still giving complete protection against shorts in even the tightest spots. These clips could be bunched torether-touching all around-without danger of shorting. Screw connection easily made by slipping insulator forward.
No. 63 INSULATED ALLIGATOR CLIP (STEEL) Composed of Mueller No. 60-S Alligator Clip steel, cadmium plated, screw connection, complete with 2 -piece vinyl iusulator. shipped half with red insulators, half black.
EACH NET........... $\$ 0.30$ LOTS OF 10........... $\$ 0.21$
No. 63-C INSULATED ALLIGATOR CLIP (COPPER) Composed of Mueller No. 60-CS Alligator clip, solid copper, brass screw connection. Shipped half with red insulators, half black. $\$ 0.23$
$E A C H$ NET.......... $\$ 0.33$ LOTS OF 10......... $\$ 0.2$

## ALLIGATOR CLIPS

No. 60-CONVENTIONAL TYPE
Accurately made, slim jaws, fine meshing teeth. Convenient, round thumb grip, bar: rel connection for banana plug. Equipped rel connection for banana plug. Equipped with small soldering lip. Strong spring
with a hard bite. Cadmium plated. (2" long.
EACH NET.

## THE 'TENNA-CLAMP"

A New 3-in-1 Stand-aff Insulator Clamp! Supports TV ond FM Leod-ins on MASTS, PIPES, GUTTERS ond GUY-WIRES
 Has same general features and specifi cations as Tenna-Clampipe described aloove except different type clamp channeled on end to take standard guy-wire in addition to pipes.
has THESE USEFUL FEATURES -- One standard size solves many lead-in problems - far more useful than straps or wire bands.

- Brings lead-in to edge of roof - right where you want it - no more "draplng" of wire across the roof.
- On those hlgh jobs, come right down a guy-wire - and get around the gutter in the clear.

## LOW PRICES!

All packed 100 in a carton
No. 135-For all types of Cables. EACH NET, $\$ 0.14$ LOTS OF 10, $\$ 0.10$ LOTS OF 100, $\$ 0.084$

## THE SNAPPER

A Long Insuloted Test Clip ond A "Triple Threof"' Rodio Tool
U. S. Patent

No. $2,074,324$
No. 99

## 7" Long insulated

The long tube is of insulating naterial and is fitted with spring contact jaws on the far end. The jaws are operated by a push of the thumb on the near end. Wire is quicks and easily con. nected in a hole in the insulator knob binding post on the near (end. May be used as (1) A "Deep Sea" Electric Test Clip-test contacts with ease, deep in the recesses of radio chassis with no danger of short circuits; (2) An Electric Contact Prod-clip jaws may be used to make quick prod contacts, or clip one Snapper on ground circuit and prod with another; (3) A Retriever-start small screws and nuts or pick up odds and ends that may accidentally be dropped into inaccessible places.
PRICE..... $\$ 1.20$ EACH Dealers' Wholesale Price, each.... $\$ 0.72$ Net Snappers are generally used in pairs-1 red and 1 black.

## CLAMPIPE GROUND CLAMP

No. 58

The exclusive patented fea ture of a C -shaped cross section iu combination with a L-shaped clamp gives a rigidity and effectiveness to the Clampipe that cannot be found in any other make.
The ClamPipe will not bend or lop over when applied to at pipe. The point of the larre case hardened screw, cuts through rust, paint or corrosion into clean, fresh metal, insurine a good cous lact. The Clamp may be lact. The Clamp may be flush against a wall. Will Allsh against a
not spread open.
The best ground clamp value on the market. Applicable to pipe 2/8" to $1 \%$ " outaide diameter
EACM NET Packed 10 in a box

THE BIG 12 ATR VIBRATOR TEAM, as listed above, meets $90 \%$ of your replacement needs. Give your customers quick service and real satisfaction by keeping on hand at least one each of these 12 popular ATR vibrators.
ATR Vibrator are precision built, featuring Ceramic Stack Spacers, and are backed by more than 23 years of vibrator design and research, development and manu facturing-ATR Pioneered in the Vibrator Field.

## Let THE BIG 12 ATR VIBRATOR TEAM Help You Win Satisfied Customers.

# TAPE RECORDER INVERTERS 

Specially Designed for Operating Standard A.C. Tape Recorders, Wire Recorders, Dictating Machines, Radios, Public Address Systems, Amplifiers, Electric Razors, Record Players, Mixmasters, and Electronic Test Equipment from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Trains, and Planes. Ideal for Emergency Lighting.

This group of ATR Inverters is especially recommended for use witt standard A.C. operated tape or wire recorders, dictating machines, radios, amplifiers, and similar electronic equipment, being exceptconally well filtered to insure interference free radio reception. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation. All models indicated are equipped with ATR plug-in Inverter Vibrators. These Inverters also come equipped with four-point voltage regulators which make possible
the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is in excess of $75 \%$. To figure approximate current consumption from storage battery, divide the rated input wattage of the recorder (or load) being operated by the storage battery voltage and further divide this answer by .75 which will give the actual current consumption based on the actual load and efficiency. The battery current consumption required for a tape recorder is normally less than that drawn by ordinary automobile headlight(s). These Tape Recorder Inverters are recommended only for use with loads having power factors in excess of $70 \%$. ATR Inverters should be used only for the applications as outlined above.

Above illustrates operation of tape recorder in car utilizing Inverter Remote Control Unit as shown below.
Let your car be a ROLLING OFFICE dicłate your reports promptly and accurately in the field - on the spot.

Radio frequency interference completely suppressed. *Recommeded for 24 Volt Battery Systems. Any of the above type Inverters are available with 220 volt A.C. Output at prices slightly higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T": that is, if a 110 volt D.C. Inverter having a 220 volt A.C. output is desired, this would be ordered as Type IIOS covered by code word, "GRSET."
All models designated above are housed in attractively finished grey-hammerloid metal cabinets. Dimensions o- Standard (RSE) Model Inverters, $83 / 8^{\prime \prime} \times 9^{\prime \prime} \times 51 / 4^{\prime \prime}$, shipping weight 19 Ibs. Dimensions of Heavy Duty 1 RHF) Model Inverters, $61 / 2^{\prime \prime} \times 111 / 8^{\prime \prime} \times 81 / 2^{\prime \prime}{ }^{\prime \prime}$ shipping weight. 25 lbs . Dimensions of Super Heavy Duty (HSH) Model Inverters, $61 / 2^{\prime \prime} \times 127 / 8^{\prime \prime} \times 81 / 2^{\prime \prime}$ shipping weight, 34 lbs.
For correct replacemenf vibrator, consult Inverter Vibrator Guide.

## ACCESSORIES

REMOTE CONTROL UNIT - for under-dash mounting permitfing installation of Inverter in auto-trunk compartment. List Price \$6.95

MOUNTING BRACKETS - to securely mount Inverter in trunk compartment of car or under-dash, as illustrated. List Price $\$ 4.95$ or

CIGARETTE LIGHTER CORD SET - to pluq into ciqarette lighter receptacle on dash. List Price \$3.95 EXTENSION CABLES - to provide additional cable lenaths for installation of Inverter in trunk compartment. List Price $\$ 11.95$ Pr.

JOBBERS ATTENTION: See Pages M-30 and M-31 in this ATR Section for your Catalog Needs!

# DICTATING MACHINE INVERTERS 

Specially Designed for Operating Standard A.C. Dictating Machines, Small Radios, Record Players, Mix-masters, Food Blenders, Electric Razors, Electronic Test Equipment, and Most Small Electrical and Electronic Devices from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Planes, and Trains.

This group of ATR Inverters is especially recommended for use with standard A.C. dictating machines, small radios, record players, mixmasters, food blenders, electric razors, and other similar small electronic or electrical equipment. The Inverters are filtered to suppress radio frequency interference. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation. All ATR models indicated are equipped with ATR plug-in Inverter Vibrators. Models RME and RSE come equipped with a four-point voltage regulator which makes possible the correct output voltage for minimum to maximum loads. These two ATR Inverter models connect to the storage battery by means of the heavy cables provided; whereas, ATR Mighty Midget (DME) Model Inverter, being a smaller output capacity unit, plugs directly into the cigarette lighter of car. The battery current consumption required is normally less than that drawn by one ordinary automobile headlight. The operating efficiency is approximately $75 \%$. These Inverters are recommended only for use with loads having power factors in excess of $70 \%$, and should be used only for the applications as outlined above.

Illustrates Under-Dash Mounting for ATR Models RME and RSE. See Page M-22 for available accessories.

For Inverters having larger or srraller capacities, or for operation on other D.C. input voltages, please consult available AIR Inverter cata'og sheets. *Recommendd for 24-Volt Battery Systems.
All models designated above are housed in attractively finished grey-hammerloid metal cabinets. Dimensions of Standard (RSE) Model Inverter, $83^{\prime \prime} \times 9^{\prime \prime} \times 51 / 4^{\prime \prime}$ : shipping weight, 19 |bs. Dimensions of Medium (RME) Model Inverters, $834^{\prime \prime} \times 8^{\prime \prime} \times 3^{\prime 3} / 4^{\prime \prime}$ : shipping weigith 12 lbs . Dimensions of Mighty Midget (DME) Model Inverters, $51 / 4^{\prime \prime} \times 43 / 4^{\circ \prime} \times 23 / 4^{\prime \prime}$; shipping weight, 5 lbs. For correct replacement vibrator consult Inverter Vibrator Guide.

JOBBERS ATTENTION: See Pages $M-30$ and $M-31$ in this ATR Section for your Catalog Needs!

Specially Designed for Operating Standard A.C. Radios, Radio-Phonographs, Tape Recorders; Wire Recorders, Record Players, Dictating Machines, Public Address Systems, Amplifiers, Radio Transmitters, Mix-masters, Food Blenders, Electric Razors, and Electronic Test Equipment from D.C. Voltages in Trains, Rural Areas, and in D.C. Districts.

This group of ATR Inverters is especially recommended for use with standard AC radios, record players, tape or wire recorders, dictating machines, amplifiers, and similar electronic equipment being exceptionally well filtered to insure inferference free radio operation. With ATR Inverters the need for special equipment is eliminated. They are designed for quiet, long-life, radio operation. All models indicated are equipped with ATR plug-in Inverter Vibrators. These Inverters also come equipped with four-point voltage regulators which make possible the correct output voltages which are lower or higher than normal. The operating efficiency is in excess of $85 \%$. To figure approximate current consumption from D.C. voltage source, divide the rated input wattage of the radio set (or load) being operated by the D.C. voltage and further divide this answer by .85 which will give the actual current consumption based on the actual load and efficiency. These Radio Inverters are recommended only for use with loads having power factors in excess of $70 \%$. ATR Radio Inverters should be used only for the applications as outlined above.

ATR Inverters are not recommended for operating refrigerators, washing machines, or similar motor-driven appliances; also. ATR Inverters are not recommended for operating toasters, electric irons, sun lamps, or similar appliances of high wattage or low power factor. Any attempt to use the Inverter for applications not recommended will ruin the Inverter immediately and void the guarantee.

| Type | Input D.C. Volts | $\begin{gathered} \text { A.C. } \\ \text { output } \\ 60 \text { Cyeles } \end{gathered}$ | Output Wattage |  | SHIPPING WEIGHT | LIST PRICE |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 110-R5E | 110 | 110 | 250 | 150 | 19 | 59.95 |
| 220-R5E | 220 | 110 | 250 | 150 | 19 | 69.50 |

Radio Frequency Interference Complefely Suppressed
For Inverters having larger or smaller output capacities or operating on other D.C. input voltages, please consult available ATR Inverter Catalog Sheets.
Any of the above type inverters are available with 220 volt A.C. output at prices slightly higher. In ordering, specify " 5 " after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D.C. Inverter having a 220 volt A.C. output is desired, this would be ordered as Type 1105 covered by code word, "NRSET."
ATR Medium, Standard, and Heavy Duty Radio Inverters having designations RME, RSE, and RHF respectively, are housed in attractively finished grey-hammerloid metal cabinets.
Dimensions of Modium (RME) Model Radio Inverters, $83 / 8^{\prime \prime} \times 9^{\prime \prime} \times 33 / 4^{\prime \prime}$; shipping weight, 12 lbs.
Dimensions of Standard (RSE) Model Radio Inverters, $83 / 8^{\prime \prime} \times 9^{\prime \prime} \times 51 / 4^{\prime \prime}$; shipping weight, 19 lbs.
Dimensions of Heavy Duty (RHF) Model Radio Inverters, $61 / 2^{\prime \prime} \times 1 i 1 / 8^{\prime \prime} \times 81 / 2^{\prime \prime} ;$ shipping weight, 30 lbs .
For correct ATR replacement vibrator, consult ATR Inverter Vibrator Guide.
JOBBERS ATTENTION: See Pages M-30 and M-31 in this ATR Section for your Catalog Needs!

## TELEVISION Inverters

Specially Designed and Carefully Adjusted for operating Television Receivers from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Trains, Planes, and D.C. Districts. Suitable for Use with All Types of Electronic Equipment where Precise Output Erequency is Required.

This group of ATR Inverters has been selected from the ATR line of Standard and Heavy Duty Radio Inverters and Super Heavy Duty Inverters and have specially adjusted ATR Vibrators installed in them to provide the precisely adjusted output power frequency required for the operation of Television Sets. They are exceptionally well filtered to insure inter-ference-free reception. They are equipped with fourpoint voltage regulators. The operating efficiency is in excess of 85 percent. They are recommended for use with loads having power factors in excess of 70 percent.
ATR Inverters should be used only for the applications as outlined above.

ATR Inverters are not recommended for operating refrigerators; washing machines or similar motordriven appliances: alsc, ATR Inverters are not recommended for operating toasters, electric irons, sun lamps, or similar appliances of high wattage or low power factor. Any attempt to use the Inverter for applications not recommended will ruin the Inverter immediately and void the guarantee.

Featured cut above illustrates Model IICAT-RHF.
ATR Standard (RSE), Heavy Duty (RHF), and Super Heavy Duty (HSH) Television Inverters are housed in attractively finished grey-harmereloid metal cabinets.

Dimensions of Standard (RSE) Model Television Inverters, 8\%" $\times$ " $\times 51 / 4^{\prime \prime}$ : Shipping weight, 19 lbs.
Dimensions of Heary Duty (RHF) Model Television Inverters, $61 / 2^{\prime \prime} \times$ $111 /{ }^{\prime \prime} \times 81 / 2^{\prime}$; Shipping weight, 30 lbs.
Dimensions of Super Heary Duty (HSH) Model Television Inverters, $61 / 2^{\prime \prime} \times 127 \mathbf{g}^{\prime \prime} \times 81 / 2^{\prime \prime}$; Shipping waight, 34 lbs.
For correct replacement vibrator, consult Inverter Vibrator Guide.

## ACCESSORIES for 6, 12, and 28 Volt D.c. Input Inverters.

REMOTE CONTROL UNIT - for under-dash mounting permitting installation of Inverter in auto-trunk compartment.

EXTENSION CABLES - to provide additional cable lengths for installation of Inverter In trunk compartment. List Price $\$ 11.95$ pr.
jobbers Attention: See Pages M-30 and M-31 in this ATR Section for your Catalog Needs!

#  <br> "A" BATTERY ELIMINATORS ... FOR DEMONSTRATING AND TESTING AUTO RADIOS 

## 6 VOLT OR 12 VOLT!

Specially Designed for Testing and Operating Auto Radios and D.C. Electrical Apparatus on Regular A.C. Lines, 105 125 Volts, $50-60$ Cycles.

## SUGGESTED USES:

As a power supply for radio sets, aircraft instruments, relays, motors and other electrical and electronic equipments. In the laboratory, for supplying various low D.C. voltages.
Battery Eliminators may be treated as batteries in the sense that they can be connected in series for higher voltages at the same current output per unit or in parallel for the same output voltage per unit at higher currents.

\author{

- Eliminates Storage Batteries and Battery Chargers. <br> - Delivers Filtered Direct Current at the Correct Voltage for Proper Operation. <br> $\checkmark$ Operates the Equipment at Maximum Efficiency at All Times. <br> - Fully Automatic and Fool-Proof.
}

Equipped with Full-Wave Dry Disc Selenium Rectifier, Assuring Noiseless, Inter-ference-Free Operation and Extreme Long Life and Reliability.

TYPE 610 -ELID—Rated output 6 volts at 10 amperes continuous. Size $61 / 2 \times 91 / 8^{\prime \prime}$
$\times 81 / 2^{\prime \prime}$. Shipping weight 22 lbs. Code word "SELIE". Similar to illustration on $\times 81 / 2{ }^{2}$. Shipping weight 22 lbs. Code word "SELIE." Similar to illustration on left but with Voltmeter only.

LIST PRICE $\$ 59.40$
TYPE 610 C -ELID-Rated output 6 volts at 10 amperes continuous or 12 volts at 6 amperes continuous. Size $61 / 2^{\prime \prime} \times 91 / 8^{\prime \prime} \times 81 / 2^{\prime \prime}$. Shipping weight, 22 lbs. Appearance similar to 20C-ELIR, above. Code word "SELIF."

LIST PRICE $\$ 66.58$
TYPE 620C-ELIR-Rated output 6 volts at 20 amperes continuous or 12 volts at 10 amperes continuous. Uses dual rectifiers. Size $61 / 2^{\prime \prime} \times 121 / 8^{\prime \prime} \times 81 / 2^{\prime \prime}$. Shipping weight, 33 lbs. Code word "HELIR."

LIST PRICE $\$ 93.90$
Either 6 or 12 volt output obtainable by means of simple output toggle switching arrangement having locking device to prevent accidental switching.
All ATR Eliminators have as standard equipment: $\mathrm{O}_{n}$-Off Switch, 8-Position Voltage Control, Meter(s), Fuse Protection, Rubber Mounting Feet, 6-ft. All-Rubber Cord Set and Cabinet of heavy gauge metal having attractive grey-hammerioid finish.

Illustrates Standard "A" Battery Eliminator, Model 610 C -ELID; equipped with Voltmeter, Ammeter and Voltage Control.
ages M-30 and M-31 in this ATR Section for your Cafalog Needs!

> For Operating Small A.C. Motors, Electronic Apparatus, Electrical Testing Equipment, and A.C. Electrical Appliances from D.C. Lines.

4
These units are specially designed for applications as indicated, permitting the use of standard A.C. equipment on D.C. lines. These Inverters operate at an efficiency in excess of $75 \%$ and are carefully built and equipped to give the longest possible life and operating satisfaction. All models indicated are equipped with an ATR plugin Inverter Vibrator of new design and construction, insuring increased long life and reliable service. All Inverters (except LIG) come equipped with four-point voltage regulators, which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. These Industrial Inverters are recommended for use with loads having power factors as low as $60 \%$, and as low as $50 \%$ for the " P " Inverters indicated. These Inverters should not be used with Neon sigrs.

ATR Inverters should be used only for the applications as outlined above.

ATR Inverters are not recommended for operating refrigerators, washing machines or similar motor-driven appliances; also, ATR Inverters are not iecommended for operating toasters, electric irons, sun lamps, or similar appliances of high wattage or low power factor. Any attempt to use the Inverter for applications not recommended will ruin the Inverter immediately and void the guarantee.

[^39]JOBBERS ATTENTION: See Pages M-30 and M-31 in this ATR Section for your Catalog Needs!

This group of ATR Inverters is especially recommended for use with standard A.C. operated germicidal lamps providing protection against bacteria and mold spores in perishable food areas or hospital-like areas in trucks, boats, planes, and trains. Bacteria and mold spores cause losses of millions of dollars each year through spoilage, contamination, and added maintenance costs. Effective control of air-borne germs, bacteria and mold spores by use of germicidal lamps is widely used in processing and packaging of fresh food products. This same protection against contamination during delivery is now possible using germicidal lamps operating from an ATR Inverter connected to D.C. Storage Battery Power. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet long-life operation. These rugged, efficient, little power houses are self-maintaining - require no warm-up. They change your D.C. battery power to 110 volt A.C. (household type) power instantly and quietly. ATR Inverters are fully protected and are big enough to do a proper job and small enough to fit most anywhere. All models indicated are equipped with ATR plug-in Inverter Vibrators. These Inverters (except Model LIG) also come equipped with four-point voltage regulators which make possible the correct output voltage for minimum to maximum loads, and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is in excess of $75 \%$. The batfery current consumption required is normally less than that drawn by ordinary automobile headlight(s). These ATR Inverters should be used only for the application as outlined above.

## shav-paks

Specially Designed for Operating Standard A.C. Electric Shavers in Automobiles, Buses, Trucks, Boats, and Planes.

ATR SHAV-PAKS are miniature DC-AC Inverters designed especially for the operation of standard A.C. electric shavers from 6 or 12 -volt storage batteries in automobiles, buses, trucks, boats, and planes. They are ideally suitable for traveling salesmen, executives, sportsmen, and all owners of electric shavers. The ATR SHAVPAK very simply plugs into the cigarette lighter receptacle on the dash and changes the D.C. battery power to standard 110 -volt A.C. electricity for the operation of electric shavers anywhere! The ATR SHAV-PAK may also be used for operating other small A.C. devices having a wattage requirement of not more than 15 watts such as flea power timing motors. ATR SHAV-PAKS are equipped with ATR plug-in type vibrators which will give many years of satisfactory and dependable service.

## Vibrators

Mallory Vibrators are engineered to exacting specifications. Their superior action is a result of more than 20 years' research. Pure, natural rubber liners deaden sound and assure quiet operation. Special, tough-spring steel eliminates reed breakage. Heavy framing insures correct and exact alignment. Extra size and quality of contact points assure longer life. Each Mallory Vibrator is tested individually for correct output, starting voltage and wave form.

Use only these types in design of new equipment. Other typee are for replacement purposes only.

* Hermetically Sealed Construction
† A grounding cup for $11 / 2^{\prime \prime}$ diametere vibrators which makee a low r.f. ground connection between vibrator can and power supply chassis.
- Five special sockets for Practical Vibrator Tester. Supplied as complete kit only.

## NE W <br> THE '54 MALLORY VIBRATOR GUIDE

Contains Vibrator Replacement Information. See Your Mallory Distributor.

Mallory Vibrapacks are the ideal vibrator power supplies designed to provide at low cost, dependable, high-voltage, direct current from low-voltage, storage batteries. Mallory Vibrapacks offer high effciency, dependability, low maintenance cost and long life because of years of field testing. Added features are; light weight, compactness and simplicity of installation.

the Max. continuous DC amp. rating for capacitive and battery the Max, continuous DC amp. rating
loads multiply these ratings by 0.82 .

## Rectifier Battery Chargers Power Supplies - UL Approved

Mallory Automotive, Marine and Aviation Battery Chargers provide convenient, efficient and economical charging of any storage battery used in automobiles, buses, trucks, tractors, taxicabs, small boats, airplanes and on the farm. Taper charging (an automatically decreasing charging rate) is designed into all and to insure chars to prevent damage to battery plates also are ideal maximum battery life. These chargers battery used in induatrial engineering and resears laboratories. laboratories.

* These chargers are equipped with a Universal DC Output Sociret. No DC Cable Assemblies are packaged with Charger. Purchase either R670 or R675 Cable Assembly.

## Mallory 6RS25 Heavy Duty Six Volt DC Power Supply

The Mallory 6RS25 6 volt, 25 ampere rectifier type power supply is designed to replace storage battery-charger combinations for bench testing medium power 2 -way mobile-phone equipment. It may also be utilized for non-radio uses requiring well-filtered low voltage DC in the 25 ampere range. Heavy sheet-steel housing makes it adaptable for use in garages as mobile radio bench equipment.
The 6RS25 operates from a standard 115 volt 60 cycle source to supply DC voltage from 0 to 8 volts at continuous or
 variable loads of 0 to 25 amperes. Intermittently, it will supply a maximum of 40 amperes at 6 volts.
An adjustable variable control allows quick selection of any voltage from 0 to 8 at 0 to 25 amperes. Three capacitors totaling $30,000 \mathrm{mfd}$. filter the output to less than 1 volt ripple and suppreas $R F$ and power line interference. A $0-10$ volt $D C$ voltmeter and a $0-40$ ampere $D C$ ammeter are included.
Conduction cooling of the full-wave Selenium Rectifier Cells, automatic overloading protection, and a self resetting circuit breaker insure long life.

Overall dimensions-11" high, $101 / 2^{\prime \prime}$ wide, $8 * /{ }^{\prime \prime}$ deep. Shipping weight-26 lbs. Catalog No. 6RS25 \$74.50 Net

## Mallory 12RS6D Bench Power Supply

The Mallory 12RS6D is a dual purpose bench power supply designed for use on the radio service bench for operat ing conventional 6 and 12 volt automobile and truck radio sets. Fully AC operated from the $115 \mathrm{~V} / 60$ cycle line, the 12IRS6D supplies rectified and filtered DC in either of 2 ranges. Range "A" supplies 0 to 16 volts at 6 amperes continuously, or 12 amperes intermittently. Range "B" supplies 0 to 8 volts at 10 amperes; or 20 amperes intermittently. Both ranges are infinitely vari-
 able from zero to maximum output to permit precise adjustment of bench test voltages. The 12RS6D is equipped with a DC voltmeter, a DC ammeter, infinitely variable voltage control, a range switch, an on-off toggle switch, automatic overload protection, primary fuse and rubber-covered line cord and plug. The rectifying system employs blue enamel and measures $6 \%^{\circ}$ high, $103^{\prime \prime}$ wide and $5 \%^{\prime \prime}$ deep ping weight approximately 8 lbs. Catalog No. $12 R S 6 \mathrm{D} 89.95$ Net

## Mallory Service Bench Rectopower Supplies

Models 12RS14D and 28RS15D are designed to operate from $110-120$ volts, 60-cycles, and are equipped with accurate reading DC voltmeters and ammeters, self-reclosing overload circuit breakers in the DC circuit, fuge protection in the AC circuit and an "on-off" switch. Both models are equipped with a continuously adjustable transformerrotor system to provide precise adjustment of the output voltage to any value from 0 to rated output voltage. Both models are filtered by high-capacity electrolytic capac-
 itors.

These models are also equipped with a new, simplified automatic voltage regulating system (no relays) which keepe the output voltage relatively constant as the load changes from no-load to full load. Model 12RS14D will supply 0-8VDC@ ${ }^{35 A}$ or 0-16VDC 14A

## Mallory Vibrator Testers

The Mallory Vibrator Testers have been designed as companion units to the famous Mallory Service Bench Rectopower (8) Supplies 6RS10, 6RS25-1, 12RS5, 12RS6D or 12RSI4D (acting as variable power supplies) to teat directly, without adapters, most of the popular vibrators and all of the 6 volt passenger car radio vibrators used since passenger car radio Vibrators used since may be plugged into the front panel thus permitting intersper vibrators to be tested in conjunction with the rectifier tube with rectifiers can readily be determined by the substitution method. Self rectifying vibrators are tested by removing the rectifier tube. Either shunt or separate drive vibrators can be tested of any frequency shunt or separate drive vibrators can be tested of any frequency
from 100 to 250 cycles. The condition of the vibrator being tested from be read directly from the "good-bad" meter scale. Shipping may be read directly from
Model 6VT1-for 6-volt vibrators only
Model 12 VT1D-for either 6-volt or 12 -volt vibrators $\mathbf{8 4} 4.95$ Net

## Mallory VA Series Rectopower® Rectifier DC Power Supplies

Seven models are contained in the line of general utility filtered rectifier DC power supplies for designing, building, testing and repairing electrical and electronic equipment for the automotive, avia tion and military equipment industries. The models may also be used for battery charging and electrolytic processes such as plating, anodizing, electrocleaning and electropolishing. These units incor porate voltmeter, ammeter, isolating-type transformer and many other features which make them desirable for production or laboratory use.
The four independent filtered output circuits may be paralleled series-paralleled, seriesed, used independently or connected in severa different combinations to provide simultaneous outputs as required. Delivery information and more detailed specifications on special Rectostarters(8) for aircraft engine starting and industrial electric truck battery charging, may be had by writing to P. R. Mallory a Co., Inc., Box 1558, Indianapolis, Ind.

VA400
VA800

* 25 and 50 cycle Rectopower supplies are available at additional cost.

The Mallory Line Voltage Adjuster and Iaolation Transformer is designed for electric and electronic applications requiring line voltage adjustment, line isolation or low voltage, heavy current output. It is a versatile and worthwhile accessory for use in radio-TV shops, laboratories and industrial service shops.

Completely enclosed in an enamelled metal case, the LVA-2 pro-
Completely enclosedin an enameled metal case, $90-130$ volts a vides: Infinitely variable AC-line adjustment from $90-130$ volts a 1200 watts; an electrostatically-shielded, isolated, infinitely variable low voltage AC from 0 to 40 volts @ 4 amperes in the isolation posiion, and 0 to 40 volts a 8 amperes in the common line position, and an elecirostatically-ghielded, isolated, infinitely variable, 90 -volt to 130 -volt AC output @ 350 watts. The unit 18 designed to operate from 105 to 125 volts, 60 cycles, single-phase. The infinitely variable common line and isolation outputs are selected in common lineisolation" switch, and are fed to two standard AC outlets. Accurate output-voltage adjustment is afforded by the two-inch, 130 volt, AC meter. Overall case dimensions are: height-7/8"; depth-5 $3{ }^{\prime \prime}$ "; width-61/2".
Catalog No. LVA-2 $\quad \$ 41.95$ Net

Line Voltage Adjuster and Isolation Transformer

The CRT-1 Capacitor-Resistor Tester is a practical analyser for laboratories and production lines. It provides checking of extended resistor and capacitor ranges in addition to power factor and leakage measurements of capacitors. Inductances may be checked by the substitution method.
The CRT- 1 measures resistances from $1 / 10 \mathrm{ohm}$ to 50 megohms; capacitances from 10 mmfds . to 5000 mfds ; electrolytic capacitor power factors from 0 to $50 \%$; paper, mica or ceramic capacitor leakages from . 2 to 18 micro-amperes; electrolytic capacitor leakages from $1 / 10$ to 10 milliamperes; and insulation resistances to more than 2000 megohms. Provision is also made for direct comparison of inductances such as unknown values of speaker coils, transformers, or choke coils against like units of known values. Capacitors up to 450 WVDC may be checked at their rated voltages.
Fully AC operated from $110-120$ volts, 60 cycles, the CRT- 1 has a built-in power supply. It comes complete with tubes. Dimensions are: $63{ }^{\prime \prime} \mathrm{high}$; $51 / 2^{\prime \prime}$ deep; and $10 \%{ }^{\prime \prime}$ wide.

## * CORNELL-DUBILIER AUTO RADIO VIBRATORS

## FEATURES

- C-D designed electronic micrometric equipment removes guesswork in contact point setting and assures cansistent high quality.
- Exclusive C-D pole piece design and armature weight results in a perfectly-balanced unit with greater efficiency.
- Exclusive C-D base mounting results in a full floating unit. That's why C-D vibrators last longer.
- Unit completely enclosed in new floating sockan exclusive with C-D vibrators. Eliminates usual difficulties found in other vibrators.
- New stack design will take peak voltages of even 4,200 volts with no damage to vibrator.

Mr. Serviceman: Always have these types on band. The, constitute $88 \%$ of all your demand in the ratio shown.

# TODAY'S OUTSTANDING D. C. POWLER SUPPLIES... 

## in performance! in reliability! in dollar-for-dollar value!

## SCHAUER BATTERY ELIMINATORS FOR SERVICING BOTH 6 and 12 VOLT AUTO RADIOS

Again Schauer leads the field! Here are streamlined, new Battery Eliminators specifically engineered to meet the growing needs of auto radio service men. In one compact unit, quality-built D.C. Power Supplies which more than meet manufacturers' specifications for the operation and servicing of any 6 - or 12 -volt auto radio equipped with signal-seeking, push-button or manual tuners.
SCHAUER MODEL AR 5612 - Output adjustable by means of a rugged, silver contact tap switch. Toggle switch changes unit from 6 -volt to 12 -volt operation. Low range output: $71 / 2$ volts at 12 amps ., continuous; 20 amps., intermittent. High range: 15 volts at 6 amps., continuous; 11 amps., intermittent. Components include Selenium rectifiers, transformer, condenser-type filters, accurate $0-20 \mathrm{~V}$. and $0-20$ A. meters, heavy wing-nut binding posts and carrying handle. Housed in sturdy steel case $71 / 2^{\prime \prime}$ wide $\times 91 / 2^{\prime \prime}$ deep $\times 9^{\prime \prime}$ high.
SChAUER MODEL AR 4612 - Non-adjustable 6 -volt and 12 -volt Battery Eliminator. Built to same high-quality standards as Model AR 5612, above. Equipped with high-low switch to change from nominal 6 -volt to nominal 12 -volt operation.
Own SCHAUER Battery Eliminators - they're the choice of leading service men. Specifications and illustrations of these units are found in Bulletin No. 1469. Write for your free copy.

SCHAUER MODEL AR 5612

## ALSO AVAILABLE:

SCHAUER MODEL AR-S - Adjustable 6-volt Battery Eliminator. Delivers 6 volts D.C. with output adjustable for any load current between 3 and 15 amps ., indicated by $0-15 \mathrm{~A}$. and $0-8 \mathrm{~V}$. meters.
SCHAUER MODEL AR-4 - A practical, lowcost, non-adjustable 6-volt Battery Eliminator. Delivers 6 -volts at approx. 15 amps.

## SCHAUER <br> BATTERY CHARGERS

A complete line of battery chargers designed for safe recharging of storage batteries. Available in models for charging 6 -volt batteries and other models for charging 12 -volt batteries. Four to 20 ampere capacities.

Equipped with exclusive Schauer "Charger-Guard" -an automatic corrector which acts instantly in case of an overload or short circuit. No manual resetting of the circuit breaker, and fuses are eliminated. Approved by Underwriters' Laboratories, Inc. Write for Bulletin 2469.

Model AR-6

## SCHAUER VIBRATOR ANALYZER AND POWER SUPPLY MODEL AR-6

Don't gamble on auto radio vibrator performance! Protect your profits and avoid comebacks by owning the original and most reliable vibrator analyzer available today. Schauer AR-6 combines an adjustable $0-8$ volt D.C. Power Sapply with a Vibrator Analyzer that will thoroughly test practically all interrupter and synchronous, shunt or series-driven 6 -volt vibrators. Test results are determined by accurate meter readings - not by the unreliable substitution method! See your Schauer jobber. Write for Bulletin 1469.

## DC POWER SUPPLIES and BATTERY ELIMINATORS

TEST SERVICE 12 \& 6 VOLT AUTO EADIOS Switch selects 12 or 6 V . output. 2 ranges: 0.8 and 0.16 V . continuously variable. 0.10 amps. continuous duty up to 12 V .20 amps. intermittent current rating. Unequalled quality and performance at lowest cost.

test, service dc equipment FROM AC LINES
Choke input and Pi type filters with 1 choke, 2000 mid. condenser pilus 1 choke, 4000 mfd . condenser. D'Arsenval-type voltmeter 0.50 volts; ammeter $0-25$ amperes, $2 \%$ accuracy. Bridge type seleniun rectifiers. Superior Powerstat for incremental voltage adjustment.

Model "B"

TEST, SERVICE DC EQUIPMENT FROM AC LINES
Less than $3 \%$ AC ripple or hum. Damped volt and ammeters (no wiggling). 8 Heavyduty power tap adjustments. Voltmeter 0-10 volts $3 \%$ accuracy. Heavy duty selenium rectifiers, switch, transformer, choke and 6000 mid. filter condenser.

Model 's's'

"A" Supply Output: 5-6 tubes (average) 1.4 volts at $320 \mathrm{ma} ; 4$ tubes 1.4 volts at 250 ma; 4 tubes 1.4 volts at 200 ma. "B" Supply Output: 90 volts DC at 12 ma . Primary: 115 volts AC at 60 cycles. Also for 220 volt operation.

## Priced to Compete with Kits <br> Less than 5\% Ripple Over Rated Ranges MODEL "D-612" - 0-8 and 0-16 v. Cont. Variable

10 amperes continuous duty up to 12 volts
20 amperes intermittent current rating
An unmatched combination of unequalled performance, low price and quality makes this a must for service technicians. Operates all auto radios. For relays, phone circuits, low voltage devices, electroplating and battery charging. Patented EPL conduction cooling. Withstands high overloads for lifelong service. Changes from 6 to 12 volts at the flick of a switch. Same top quality as other EPL models.
MODEL C-12 Our populor DC POWER SUPPLY MODEL "C-12"12 and 6 volt auto radio. 0-16 volts from 0-8 amperes continuous output. Up to 12 amperes intermittently. Only $3 \%$ ripple at full load. Extremely fine voltage control with Superior Powerstat Voltage Control (Model 10).

# Less than $1 \%$ Ripple at Top Load <br> MODEL "NF" - 0-28 VOLTS, 0-15 amperes 

## continuous rating, 25 amperes intermittent rating

Serves broadest uses in industry, research and servicing. Only moderately "priced Power Supply with less than 1\% ripple at this output. Exclusive "EPL" selenium rectifier application increases power rating, lowers cost per ampere output. Finest components, trouble-free operation. Peak instantaneous current rating of 25 amperes (from 50/60 cycle 115 volt source), $0-36$ volts up to 6 amperes. Size $141 / 4 \times 141 / 4 \times 93 / 44^{\prime \prime}$. Net Weight: 71 lbs.
MODEL "N". Same rating and specifications except for:
$5 \%$ ripple at 10 amperes, $8 \%$ at 15 amperes, less 1 choke and 2 condensers, lower cost, net weight 65 lbs .

## MODEL "B"-6 Volts, 1-20 amperes continuous rating, 35 amperes intermiftent rating

Tests, operates auto radios, relays, phone circuits, other low voltage devices. Conduction cooling increases rectifier power rating $11 / 2$ times, lowest cost per ampere output. Ample power to operate two auto radios at once. Peak instantaneous current rating of 35 amperes (from $50 / 60$ cycle 115 volt source). Supplies 3 to 9 volts at other ratings. Size: $12 \times 7 \times 81 / 2^{\prime \prime}$. Net weight: 29 lbs.

MODEL "BJ". 6 VOLTS, 1-12.5 omperes
Continuous rating, 25 amperes intermittent rating
Same as "B" except for: lower output and cost; operates 1 auto radio; AC ripple less than $5 \%$ at 6 volts, 8 amperes; voltmeter $0-10$ volts; ammeter $0-20$ amperes $5 \%$ accuracy.

## 

## MODEL "S" BATTERY ELIMINATOR

Converts battery radios to AC all-electric operation
Model "S" operates 1.4 volt 4 to 6 tube battery radio from 115 volt 50/60 cycle source. Complete filtering insures hum-free silent operation. Easily fits into battery compartment of most radios. Eliminates batteries, saves money. Low operating cost, uses only 11 watts. Has on-off switch, standard plug and sockets. Cabinet: Blue Hammerloid finished steel. Size:. $23 / 8 \times 33 / 4 \times 63 / 4^{\prime \prime}$. Net weight: $21 / 2 \mathrm{lbs}$.

ELECTRO PRODUCTS LABORATORIES, INC. • Pioneer Manufacturers of DC Power Supplies

# JAMES Angle Drive VIBRATORS 

JAMES vibrators, the engineers standard, are designed for the more difficult applications. Featuring "Angle Drive", ceramic spacers, dynamic contact wiping and other JAMES exclusive patented designs. These components are demanded by critical service engineers.

## DC TO AC CONVERTERS

The RADIART line of converters is complete and furnishes 110 volt 60 cycle AC current from 6, 12, 32, or 110 volt direct current sources. Vibrator powered, they are completely dependable ...easily installed and fit most any requirement. The RADIART name plate on each converter is your assurance of long life and outstanding performance.

## Dynamotors

## CHANGE volt

DYNAMOTOR

Operates 6 v. Radios from 12 v . Batteries

It is now possible to operate 6 v . Two-W'ay radio equipment from 12 v . systems without rewiring or modifications with the New Carter Change-A-Volt Dynamotor.
Designed for long life, this dynamotor comes complete with all necessary fuses, hookup wire and relay to directly convert a 12 v . battery to a 6 v . radio supply. Model B615V for 30 watt transmitters delivers 15 amperes continuously for receive and 45 amperes for transmit. Also available in 24, 28, 32, 48 and 64 volt inputs to change directly to 6 or 12 volt and can be furnished less the fuse block, relay, switch and wiring.
Change-A-Volt can also be used as a battery equalizer when used with a double pole switch or relay for operating low volt equipment on several cells of higher voltage battery systems.

| Change. A.Volt |  |  | Outrut |  | Duty | Temp. <br> Rise ${ }^{\circ} \mathrm{C}$. | List <br> Price |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Model | Volts | Amps | Vults | Amps |  |  |  |
| B615V | 12 | 115 | 6 | 15 | Con. | 50 | \$88.95 |
| E615V | 24 | 5.7 | G | 18 | Con. | 50 | 88.95 |
| J615V | 28 | 5.0 | 6 | 15 | Con. | 50 | 88.95 |
| C615V | 32 | 4.3 | 6 | 15 | Con. | 50 | 88.95 |
| W61sV | 48 | 2.9 | 6 | 15 | Con. | 50 | 89.95 |
| H615V | 64 | 2.2 | G | $1 *$ | Con. | 50 | 89.95 |
| E128V | 24 | 6.0 | 12 | H | Con. | 50 | 88.95 |
| J128V | 28 | 5.3 | 12 | 8 | Con. | 50 | 88.95 |
| C128V | 32 | 4.6 | 12 | 8 | Con. | 50 | 88.95 |

| H128V | 64 | 2.3 | 12 | 8 | Con. | 50 | 89.95 |

Above models will deliver about thee times continuous outpur current rating on ir:termittent transmitter service.
All models $101 / 4^{\prime \prime}$ long, $41 / 2^{\prime \prime}$ wide, $5^{\prime \prime}$ high, less relay. Weight with accessorics, approzimately 25 ths.

## THE NEW DUOV(OLT GENEMOTORS

Operates from either 6 or 12 v. Batfery Power

The six volt storage battery, has been replaced by a 12 volt battery in many of the new automobiles. This has created a need for a dual-voltage power sapply for operating mobile radio equipment . . . a genemotor unit that will operate efficiently either on 6 or 12 volts.
DUOVOLT powered mobile radio equipment may be transferred from one car to another, regardless of battery voltage, without the slightest impairment of transmitting or receiving quality. without replacement of the genemotor, and without modification of the wiring hook-up.
The $6 / 12 \mathrm{v}$. Carter DUOVOLT Genemotor ineorporates two separate 6 volt input windings, each baving its own field. Six or twelve volt operation is obtained simply by connecting the four input leads in parallel or in series. You get full efficiency at either 6 or 12 volt operation.
The DLOVOLT is the same size as standard Caster Genemotors, except for $7 / 8^{\prime \prime}$ longer length. It will fit in almost any space accommodating the standard unit, a great advantage to set manufacturers.
For NEW radio installations, specify the Carter DUOVOLT when the equipment is purchased.

## FILTERS - STARTING RELAYS

## FILTERS -

Any of the above Cartur Genemotors or Magmotors can be furnished with complete filter mounted in metal box mounted below unit. Add " X " to end of coule number and following pricen. $11 / 2$ " and $2^{\prime \prime}$ Frame Genemotor models and Magmetors, $\$ 26.00$ list, $3^{\prime \prime}$ Frame Genemotor Models, $\$ 28.00$ list.
STARTING RELAYS-
Heavy Duty solenoid contactor starting relays are available for 5.5 , $6,12,24,28,32$ and 115 valt $D C$ input. Add " $R$ " to end of code number and $\$ 8.130$ to list price (Relay draws 1.3 amps at 6 volts). Seldom required on low power Magmotors.

DUTY RATINGS
Intermittent duty shall be considered 10 seconds on 20 seconds off. Continuous duty is considered 24 hours per day.
INPUT VOLTAGES -
Any Carter Genemotor or Magmotor can be supplied for special input voltages other than 6 volts. For $5.5,12,24,28,32$ or 64 volt input add $\$ 2.50$ to list. For 115 volt DC input add $\$ 3.50$ to list.
LINE-O-LIFE* BRUSHES-
All Carter products equipped with exclusive "LINE-O.LIFE" Brushes.
Takes guess work out of brush replacements.
*TRADE MARK REG.

See replacement parts reference chart page for other special models, parts and prices.

## Cortes SuparConverter <br> The oldest name in Rotary $P_{\text {over Supplies for Mobile Radio }}$

CARTER SUPER CONVERTER-Changes DC to AC for
Amplifiers-Radios-High Power Factor equipment

Carter Super Converter, Less Filter, $81 / 4^{\prime \prime}$ Long, $41 / 2^{\prime \prime}$ Wide, $5^{\prime \prime}$ High, Weight 13 les.
Wherever DC to AC Conversion is necessary, the Carter Super Converter provides an efficient and reliable source of AC power. Standard models are designed for high power factor, non-inductive AC loads such as amplifiers, radio receivers, (requires filtered converter), etc. Ball bearing equipped, 3600 RPM. CAUTION: Standard Super Converters will not satisfactorily operate inductive loads such as AC motors, low power factor transformers, etc.
Manually operated frequency controlled Converters available on special order. Maintain 60 cycle output with a + or - $10 \%$ input voltage fluctuation.
Special custom-matched Converters are also available for Wire and Tape Recorders, Sound Projectors, Television Receivers, etc. See Carter Selector Chart

## HEAVY DUTY SUPER CONVERTER

$101 / 4^{\prime \prime}$ long, $41 / 2^{\prime \prime}$ wide, $5^{\prime \prime}$ high, weight 19 lbs .
Overall efficiency $60 \% \mathrm{AC}$ voltage regulation $25 \%$.

## OUTSTANDING FEATURES

SMALL SIZE-Smallest Rotary Converter. Lightweight. CARRYING HANDLE

Easier to carry, no more "juggling" with a hot unit.
OUTPUT RECEPTACLE-Convenient plug-in AC outlet.

## ARMATURE

Double wound, insulated ungrounded winding. Built-in cooling fan.
BALL BEARINGS
Sealed ball bearings require no lubrication or attention.

## SPECIFICATIONS

Carter Super Converter, 40 to 150 watts models $81 / 4$ " long, $41 / 2^{\prime \prime}$ wide, $5^{\prime \prime}$ high, weight 13 lbs .
High power factor, 85 to $100 \%$. Less filter.

FILTERS-Available on all Super Converters. Eliminates Converter noise on most frequencies from 560 KC to 54 MC . Filter mounted in cast aluminum housing below Converter. Add " X " to Code Number and $\$ 25.00$ to list.
FREQUENCY CONTROL-Manually operated frequency control available on all models. Complete with vibrating reed meter, and rheostat control in aluminum housing. Add $\$ 60.00$ to list.
FOR LOW COST-"Change•a-Cycle" Frequency Control, add " $A$ " to end of Code No. and $\$ 10.00$ to list.
VOLTAGE-FREQUENCY-Add $\$ 5.00$ to list for 50 cycle output. Add $\$ 10.00$ to list for 230 volt D.C. input.

See Carter Selector Chart for Wire and Tape recorder, Television receivers, etc., recommended Converters.

## CUSTOM CONVERTER 300-400-500 WATT, 115 V. 60 CYCLE AC OUTPUT

The Custom is the latest addition to the Carter line of small $D C$ to $A C$ rotary converters. Created to reet the demands for a compact and highly efficient two pole rotary converter, the Custom has been designed especially for amplifiers, office business machine, marine and mobile communications and high quality tape recorder requirements
The Custom is the only small rotary converter manufactured in recent years that has been expressly created to incorporate in its design all of the new materials and technical improvements developed in the past few years.

High Power Factor-85 to $100 \%$ Less Filter
Cast aluminum base with rubber feet supplied, as illustrated. Average efficiency, $60 \%$ all models listed less filter single phase output only. Regulation approximately $20 \sigma_{0}$ from no load to full load.
300 watt, $115 / 8^{\prime \prime}$ long, $6 \frac{1}{5}{ }^{\prime \prime}$ widr- $71 / 4^{\prime \prime}$ hign - Weight 38 lbs. 400 and 500 watt, $125 / 8^{\prime \prime}$ long, $64^{\prime \prime}$ wide, $71 / 4^{\prime}$ trgh - Weight 44 lbs.

## FREQUENCY CONTROLLED CUSTOM FOR PROFESSIONAL AND BROADCAST TAPE RECORDING

The new Custem Converter with manual frequency control has been developed to provide a portable DC to AC power source for professional and broadcast tape recorders, heavy duty electronic measuring devices, and Tape recorder-AC motor driven camera combinations. Now for the first time, sufficient frequency constant $A C$ power is available to operate this type of equipment from $D C$ lines or battery source.

The rheostat control and the frequency meter are mounted in the attractive aluminum housing. A noise filter is also available in the same housing, although it is not usually necessary for operating recorders, amplifiers or other audio devices. Filtering is required when radios or other RF circuits are operated from the converter.

Convenient recessed DC male plug is furnished for 32, 64, 115 and 230 volt DC input models. 12, 34 and 28 models are equipped with heavy stranded input leads for battery connections, as shown. A flush AC mounted receptacle is supplied on all models for quick AC connections. The sturdy carrying handle allows the converter to be moved immediately after its operation, a life-saver for taping remote broadcasts.

Each model must be designed to properly match the power factor, voltage, frequency, and load requirements. Any of the Custom models can be furnished with frequency control. Model listed below has been laboratory tested and is matched to provide perfect operation. Kindly send your special require. ment to the factory for prompt and careful consideration.

| Frequency | Controlled | Custom Canverters |  |

# Carter Custom- Matched Converters for Popular Wire and Jape Recorders-Sound Projectors-Phono Motors-Jelevision 

Whenever DC to AC Rotary Converters are used to power wire and tape recorders or other similar recording equipment, the Converter AC output frequency and Converter Power Factor must be perfectly matched to the recorder load to assure proper recording and play back performance. Most wire and tape recorders are of medium Power Factor design, approximately $70 \%$. Standard high power factor ( 85 to $100 \%$ ) Rotary Converters therefore will not operate the recorders properly as this type Converter will produce higher AC voltage and frequency because of the inductive recorder load. It is imperative therefore, only factory-tested and recommended Converters be selected for wire and tape recorder operation.
The equipment listed below has been laboratory-tested and the correct Carter Converter recommended for each model. Use this chart for your recorder Converter requirements. If the equipment is not listed on the chart, please write to the factory and information will be supplied, if available.

WIRE AND TAPE RECORDER CONVERTERS $70 \%$ P.F.

## SOUND PROJECTORS AND PHONO MOTOR CONVERTERS

Ampro Premier 20 \& 30, 8ell \& Howell No. 179, DeVry Super No. 16, Victor Lite Weight*, Victor Triumph No. 60*, Victor Sonomaster*, General Industries RM4, Green Flier Dual Speed

CONYERTER OPERATES SOUND AMPLIFIER ONLY, NOT PROJECTOR LAMP OR MOTOR. *Victor Animatograph Co. CONVERTER OPERATES SOUND AMPLIFIER ONLY, NOT PROJECTY
WILL NOT OPERATE PROJECTORS FROM BATTERY INPUT. II5 OR 230 VOLT D.C. INPUT ONLY

## CARTER TELEVISION CONVERTERS

## Other Carter Products

## SUPER-

 DYNAMOTORFor aircraft, marine police and railroad communications. Input voltages range from 5.5 v . DC to I15 v. DC... out. puts from 400 v . to 1000 v. DC. Specified by leading airlines, marine, and mobile radio manufacturers. Size $81 / 4^{\prime \prime} \times 4 \frac{1}{\prime^{\prime \prime}}$. Weight $113 / 4 \mathrm{lbs}$.

INDUCTOR ALTERNATOR

Provides mobila high frequency $A C$ power ( 400 to 800 cycles), up to 150 watts, from DC source. Perfect for aircraft, geophysical, Government and laboratory research. Can also supply up to 400 v . DC plate voltage if necessary.

Model W-6710 OPEN TYPE CONSTRUCTION FOR CHASSIS MOUNTING

Insures constant 6 volts output at 25 watts, stabilized to $\pm 1 / 2 \%$ from an input of 95 to 130 volts.

Raytheon Voltage Stabilizers can be incorporated into any equipment or used as an accessory. All models wili operate on an input of 95 to 130 volts, 60 cycles, single phase with an output of 115 volts stabilized to $\pm 1 / 2 \%$. The Catalog No. VR-7B rated at 2000 watts is a dual purpose unit and will operate on an input of 95 to 130 volts, single phase, with an output of 115 volts or on an input of 190 to 260 volts and an output of 230 volts. The new Model W- 6710 supplies a steady 6 -volt output at 25 watts, stabilized to $\pm 1 / 2 \%$ from an input of 95 to 130 volts at 60 cycles.

The complete line of Raytheon Voltage Stabilizers is available through 155 authorized distributors. Special custom-built units, ranging from 5 to 10,000 watts are also available to meet special needs. Write for complete information.

## NEW AATHEOM 2 KVA

## Magnetic Amplifier

 VOLTAGE STABILIZERAmong the many advantages offered by Magnetic Amplifier Control are: constant voltage despite line voltage and frequency changes, lower harmonic content, better no load to full load regulation, less cubic space required and ability to take heavy overload without damage. Employs selenium rectifiers and magnetic components in amplifier circuit - no filament type electron tubes and only one standard, long-life, readily available cold cathode voltage regulator tube. Voltage adjustment by potentiometer through screw driver slot in front panel. Write for complete information.

## SPECIFICATIONS

- Input; 115 volts, $\pm 10 \%, 58-62$ cycles, single phase.
- Output: 115 volts, 2000 va .
- Fixed load stabilized to $\pm 1 / 2 \%$ for line change.
- Fixed laad stabilized to $\pm \mathbf{1} \%$ for frequency change.
- No load to full load ( $85 \%$ power factor); $1 \%$ maximum.

- Temperature rise of components; $50^{\circ} \mathrm{C}$ maximum.
- Harmonics (at 60 cycles inpui); less than $5 \%$ total.
- Efficiency af full load (100\% power factor); $90 \%$ minimum.
- Mounting: Bench, floor, wall or relay rack.

## Battery Eliminator

 -Reg. U. S. Pat. Off. Here is the modern, economical and reliable way to obtain D.C. power direct from an A.C. source. These neverfailing battery eliminators operate entirely without moving parts.Input $110-125$ volts, 60 cycle, AC single phase

MINIATURE PULSE TRANSFORMERS For Blocking Oscillator Use

These hermetically sealed, MIL-T. 27 type pulse transformers are designed for universal blocking oscillator use at repetition rates from 50 to 5000 pps.
UX-7307A and UX-7350A are identical in electrical characteristics, having two windings for 1000 ohms impedance and two windings to
match 250 ohms. To cover a wider variety of applications, the windings are arranged differently in the two transformers.
These units are also available in octal type tube bases as UX. 7307 and UX-7350. Bulletin DL-K 320 gives complete information including typical circuits. Write for it.

| Pulse Width In <br> Microseconds* | Rise Time In <br> Microseconds | Droop | Front-Edge <br> Overshoot | Tralling Edge <br> Back Swing |
| :---: | :---: | :---: | :---: | :---: |
| 0.25 | .07 | $1 \%$ | $4 \%$ | $5 \%$ |
| 0.50 | .07 | $1 \%$ | $4 \%$ | $6 \%$ |
| 1.00 | .07 | $2 \%$ | $4 \%$ | $6 \%$ |
| 2.00 | .07 | $4 \%$ | $4 \%$ | $7 \%$ |
| 5.00 | .07 | $10 \%$ | $4 \%$ | $11 \%$ |

-Measured at base of pulse
Electrical characteristics measured by a H-P*212A pulse generator and a Dumont \#303 nscillo. scope. Measurements made with secondary loaded with 1000 ohms. The transformers are tested in 1000 VD.C., and the maximum voltage across the 1000 ohm windings is 300 volts peak.

"These units are supplied with an "l" terminal which allaws connecting in the fietd ${ }^{10}$ limit the autput voltage to the applied voltage. If "L" type connection is required on other madels, the "L" must be included in the type number when ardering.
tWhen these POWERSTATS are "L" connected so that the out put valtoge daes not exceed the applied voltoge, the frequency range is $50 / 60$ cycles.

## One Source for Voltage Control Equipment

## VARIABLE TRANSFORMERS adjustable source of a-c voltage to 100 KVA

## efficient • accurate • dependable

POWERSTAT variable transformers are autotransformers of toroidal core design with a movable brush tap which is rotated to deliver any desired output voltage from zero to, or above, line voltage. Glass smooth commutator surfaces and advanced winding techniques assure smooth operation and permit adjustment to a fraction of a volt. Other important features include: excellent regulation, high efficiency, conservative ratings, zero waveform distortion and rugged mechanical construction.

A wide range of standard POWERSTAT variable transformers are available for 120, 240 and 480 volt, single and three phase operation. Both manu-ally-operated and motor-driven types are offered. The rating chart lists some of the most-called-for standard POWERSTATS. Others - specifically designed to customer requirements-are available to fulfill each application. Consult us about your specific needs.

OIL-COOLED OPERATION

By immersing o POWERSTAT in transformer oil, the rating above normal air operation is increased and duty in a corrosive atmosphere is possible. A standard line is offered in various ratings and sizes.

EXPLOSIVE ATMOSPHERES
TYPE X-1 126
To provide safe operation in hazardous areas where a
 small arc or spark could cause an explosion, explosion-proof POWERSTATS are available. Standard models are ap. proved by Underwriters' Lab. oratories for Class 1, Group D service.
high Current needs LIMITED OUTPUT RANGE

TYPE 2106LC
Relativoly large amounts of power can be controlled
 by a small POWERSTAT when used in conjunction with a fixed-ratio transformer. This combination is known as a POWERSTAT Line Corrector. It can be used to correct line voltage variations to maintain o specifled autput voltage and to supply o limited output voltage range. A multitude of ratings are available.

For complete information, ask your nearest distributor the SUPERIOR ELECTRIC Co.

54 Clarke Avenue, Bristol, Connecticut

# STABILINE automatic voltage regulators to maintain constant output voltage made in 2 distinct types to meet each need 

## TYPE IE (INSTANTANEOUS ELECTRONIC)

## for the most exacting control

Type IE is completely electronic in operation with no moving parts. Providing instantaneous correction, it is ideal for laboratories, test lines, as a component of other equipment . . . and everywhere that the most exacting voltage control is required. At no load, full load or any intermediate stage, constant output voltage is maintained regardless of line fluctuations. The output voltage is held to within $\pm 0.1$ volts of nominal for wide line variations and within $\pm 0.15$ volts of nominal for any load current or load power factor change from .5 lagging to .9 leading Waveform distortion never exceeds $3 \%$. Standard types are listed below. Consult us obout your specific requirements.

## TYPE EM (ELECTRO MECHANICAL)

TYPE EM 4115

EM CONTROL CIRCUIT
RATINGS TYPE IE

TYPE IE'S'1002R
TYPE IE5101R
 plications requiring zero waveform distortion and high efficiency
Type EM is an electro-mechanical device with o very sensitive defector controlling o motordriven POWERSTAT variable transformer ond ouxiliory transformer. While not instantaneous, Type EM corrects faster thon most other automatic voltage regulators. Highly efficient in operotion, it finds widest application in controlling large industrial loads and also in electronic equipment where zero waveform distortion is essentiol. Features include: complete insensitivity to the magnitude ond power factor of the load, no effect on system power factor, no critical odiustments and adiustoble output voltoge. Standard types listed below.

## VARICELL d-c power supplies

## A VARIABLE RANGE OF STABILIZED AND REGULATED D-C VOLTAGES FROM AN A-C SOURCE

The ideal source of low d-c voltages, the VARICELL is simply plugged into any convenient, single phase a-c outlet supplying a nominal 115 volts at 60 cycles and $t$ is ready to operate. Turning the handwheel provides any desired output voltage from 0 to 30 volts. Its load rating is 15 amperes. Any setting is unaffected by changes in line or load current. For any setting from 6 to 30 volts, R.M.S. ripple voltage never exceeds 0.1 volts, and stabilization and regulation is $\pm 0.25$ volts.

## A COMPACT, PORTABLE SOURCE OF Variable a-c voltage

This is a handy instrument widely used in chemical, physical, electrical and other laboratories and in inspection, testing and plant maintenance departments. It eliminates the need tor collecting a voriable transformer, voltmeter and connection leads when tests involve variable a-c valtages. All necessary components are housed in a compact, aluminum case. By furning the "On-Off" switch to "On"; snapping the line-load switch to "Load" and rotating the knob, the desired voltage is available at the output receptacles and binding posts. Ratings are available to meet every requirement.
FOR COMPLETE INFORMATION, SEND FOR BULLETIN P553G

TYPE UCIM superior 5-WAY binding posts

This versatile binding post offers 5 different methads of connection . . permanent clamping, spade lug, clip-lead, banana plug, or looping and clamping Ruggedly built of the finest materials it provides complete insulation, a current capacity of 30 amperes and a working voltage of 1,000 volts. Two available colors, red and black, provide circuit identification where required.

WRITE FOR BULLETIN BP652 DESCRIBING THE 5-WAY BINDING POSTS

## SUPERIOR ELECTRIC - SPECIALISTS IN VOLTAGE CONTROL

Thoroughly familiar with every type of voltage control problem, The Superior Electric Company is well qualified to heip with your specific requirements. We will be giad to reconmend slandard equipment exactiy suited to your needs - or to engineer special types or new designs fot unusual applicatians.

For complete information, ask your nearest distributor

# the SUPERIOR ELECTRIC Co. 

54 Clarke Avenue, Bristol, Connecticut

## MODEL PN-60

## REVERSIBLE POLARITY RF DC POWER SUPPLY

Polarity changes made on front panel. Continuously variable from 0 KV to 60 KV . Current output 1 milliampere at 60 KV . Overall Dimensions $2212^{\prime \prime} \times 21^{\prime \prime} \times 15^{\prime \prime}$. Ideal for electrostatic paint spraying, capacitor charging and testing as well as many other uses.

PN-60 Complete with Meter
$\$ 675.00$ Net

## MODEL 2040 - 40 KV DC POWER SUPPLY

A ruggedly built power supply whicb is in constant use in laboratories and industrial plants throughout the world for condenser charging, electrostatic spraying and struss testing, etc. Nothing finer available at five times the price. Designed for constant use and will stand severe abuse. Availahice with milher positive or negative 40 KV output. Voltage range of approx. 15 to 40 KV . The 15 to 40 KV variance in voltage is controlled throungh a knob on the front panel. If refuirwl for TV use, a voltage output of approx. 4 to 6 KV is available through a tap. Voltages supplied through a 4 ft . HV safety ciohle. specify desired polarity when ordering. $\$ 136.90$ Net With HV meter installed in front panel. $\$ 50$ additiona

MODEL LAB-40 continuously variABLE REGULATED 25 to 40KV DC POWER SUPPLY

Unit has a 4 to 6 KV focus tap for use with flying spot kin-scope recording tubes, etc. Regulations of $3.5 \%$ at 1 milliampere. Available either with locking controls or standard knob.

With meter $\$ 620$ Net Less Meter $\$ 545$ Net

MODEL LAB-30PN - REVERSIBLE POLARITY - Continuously Variable 1 to $\mathbf{3 0} \mathbf{K V}$
Regulated DC Power Supply with regulations of $0.5 \%$ at 1 milliampere. Although rated at 1 ma., this unit at 1 milhiampere. Although rated at 1 ma., this unit is capalile of 2 ma. operation within regulation specifications. This 16 tube unit is of the RF type consisting of a separate oscillator and buffer feeding the power oscillator into a doubler rectifier. Regulations accomplished through feed-hack into a IDC amplifier plus simultaneous output control of the buffer. Polarity reversille front tront paanel. Standard Rack Model-19"wide x $12^{\prime \prime}$ high x $13^{\prime \prime}$ deep. Standard Bench Model-21" wide $\times 14^{\prime \prime}$ high $\times 15^{\prime \prime}$ deep.

With Meter $\$ 670$ Net - Less Meter $\$ 595$ Net
MODEL LAB-30 is a positive polarity output regulated High Voltage DC Power Supply with same polarity. With Meter $\$ 570$ Net - Less Meter $\$ 495$ Net

## MODEL PN-30R - REVERSIBLE POLARITY CONTINUOUSLY VARIABLE 1-30 KV UNREGULATED DC POWER SUPPLY

A light, compact unit in wide use for insulation testing, precipators and laboratory research. Polarity reversilhle from front panel. Current output - approx. 2 milliamperes at $20 \mathrm{KV} ; 250$ microamperes at 30 KV . lipput
 With meter installed on front panel $\ldots . . . . . . \$ 50$ additional UNIT SHOWN LESS FRONT PANEL

This compact, well designed. ruggedly huilt DC supply utilizos two 6 ades tubes as a parallel oscillator feeding a $1 X$. rectifier tube. For an output voltare of $41 / 2 \mathrm{KY}$ DC at 1 milliampere, the low voltage input requarement is 250 V at $50 \mathrm{milli}-$ amperes. By varying the DC input the ontput voltage can be rarried from alprox. 1 KV to $71 / 2$
 wide. In completely enclosed metal housing (not shown). Less low viltage DC supply .... $\$ 32.50$ Net

## MODEL RG-30 - Continuously Variable 15-30 KV Regulated DC Power Supply

A high grade supply which incorporates a voltage tap in the range of 4 to 6 KV for use with $5 W P 15$, $5 \mathrm{Tl} \mathrm{T}^{4}$ and flying spot tubes. Regulations better than $.5 \%$ at 1 milliampere. In wide use for color tule deyelopment work, transeription recording systems. Power supply also available with focus and convergence voltage taps for RCA Tri-Color tubes at slight udditiona) cost. With meter installed on front panel........ $\$ 50$ additional

## RF FILAMENT TRANSFORMERS

A self-resonant auto transformer for use with type 1 B3 Rectifier tube.
Will operate with Spellman HV coils
TUNING PADDER for Filament Transformer.

## SPELLMAN <br> television co., inc.

- BRONX, 67 , N. Y.

## Perma-Power Battery Eliminators

far 105-125V.,

For $11 / 2$ volt radios with 4,5 or 6 iubes. Designed to give constant power from varying line voltages. Maintains rated cuiput under varying tube loads. Universal sockets for all battery plugs. Fits in back of battery radios as well as battery compartments of most pirtables.
Provides: "A" 1.45 Volts D.C. at 200 to STOCK No. A-101

Model "E"

## Battery

 EliminaforFor 2 volt radios with 4 to 8 tubes. Designed to supply "A" and "B" power under ages and loads. Provides hum-free operation without distortion or "motor boating." Fits in back of battery radios as well as battery compartments of most portables.
Provides: "A" 2 Volts D.C. at 750 M.A. "B" 135 Volts D.C. at 25 M.A. tapped at $112 \nabla, 90$ vand 67 V.
$21 / 4^{\prime \prime} \times 47 / 8^{\prime \prime} \times 6-13 / 16^{\prime \prime}-4 \mathrm{lbs}$.

## Automatic Instantaneous Voltage Regulation

SOLA Constant Voltage Transformers are static magnetic voltage regulators. They are designed to provide a constant output voltage which is unaffected by changes in input voltage. You will find, listed in the following pages, the widest range of ratings and types available from stock offered by any manufacturer.
In addition, CUSTOM DESIGNED UNITS can be manufactured in capacities from 1 V.A. to 25,000 V.A., to suit your individual specifications. When ordered in subyour ind quantities, they cost only slightly more than standard units of the same general size. Often, time and money can be saved by direct use or modification of a regulator from the several hundred special designs on file. Custom designs can include: SPECIAL VOLTAGE RATIOS, SPECIAL FREQUENCIES, COMPENSATION FOR FREQUENCY VARIATION, MULTIPLE OUTPUT VOLTAGES, THREE-PHASE SERVICE, and MILITARY SPECIFICATIONS.

SOLA Constant Voltage Transformers have eight distinct advantages over regulators which depend solely upon saturation of core materials for their regulating action, or electronic type regulators:

1. Response time, 1.5 cycles or less.
2. No moving or renewable parts . . . no manual adr justments.
3. Completely automatic continuous regulation.
4. Self-protecting against short circuits.
5. Current limiting characteristic protects load equipment from excessive fault currents.
6. Can often be substituted for conventional non-regulating transformers.
7. Relatively compact.
8. Provide isolation between input and output circuits.

For complete operational data write for Bulletin 4M-CV-200

## CONSTANT VOLTAGE TRANSFORMER FOR PLATE AND FILAMENT SUPPLY <br> TYPECVE

A single, compact source of filament and plate supply voltages ... regulated to within $\pm 3 \%$ or less with line voltage variations of $100-130$ volts. Supplied with separate capacitor.

ELECTRICAL AND MECHANICAL SPECIFICATIONS: Input $100-130 \mathrm{v}, 60$ cycle

Prices upon request. Submit your special requirements to our enginears.
Above ratings are continuous duty with temperature of $40^{\circ} \mathrm{C}$.
Also supplied for 6, 14, 24, 28, or 32 Volt input. "SP" and "SF" dynamotors may be supplied in fan-ventilated construction as types "SPF" and "SFF". Prices upon request.

MODEL "BK-35" CONVERTER (Less Flltar)

GOTHARD ROTARY CONVERTERS
TYPE "K' 3600 RPM Rated Output 110V AC 60 cycles 1 phase 0.90 p.f.

Ball Bearings and Filters are atandard on all models. Unless ordered otherwise Converters are furnighed with filter. Can be furnished with Marine Type Filter, 220V AC output, automatic frequency control, manual frequency control, 28, 48 or 64 volt input, 50 cycle output, other ratings not listed above. Prices and delivery on request.

## PRICES

Prices of manufacturers and suppliers' products listed in RADIO'S MASTER are subject at all times to change without notice - they should not be considered final.

Get quick onithe-spot quotations from your distributor whọ subscribes to our perpetual up-to-the-minute PRICING SERVICE.

fficial Pricing System of radio - electronic - television parts and equipment. Supported by the industry: distributors, manufacturers, and their sales representatives.

Loose-leaf, flexible binder. Contains over 1100 pages.

Published by
united catalog publishers, inc.
106-110 Lafayefte Street New York 13, N. Y.
DELIVERY

Delivery is often dependent on the availability of raw materials. So check with your distributor for delivery information.

## TELEVISION COMPONENTS

This section contains only specific television components. Consult following Stancor pages for other audios, powers and chokes having extensive application in television, radio and electronics.

HORIZONTAL DEFLECTION AND HIGH VOLTAGE (FLYBACK) TRANSFORMERS

Stancor exact replacement fybacks are built from the set manufacturers' original specifications. They are exact electrical and physical duplicates of the units

| Part No. | Approx. Anode Kv | Application | Mounting Type | Shpg. Wt. in Lbs. | List Price |
| :---: | :---: | :---: | :---: | :---: | :---: |
| A-8118 | 13-14 | Exact replacement, RCA 211T5 | HH | 1.8 | \$11.60 |
| A-8127 | 9-10 | Exact replacement, RCA 211T1 and 211T3 | HH | 1.8 | 9.65 |
| A-8128 | 10-11 | Similar to A-8127, for higher voltage applcations. Exact replacement for Admiral 79C23-3, 79C28-1; Airline 22E42; Dumont 20-375, 20004261; Hofiman 5123, 5134, Majestic C9.240-1; Meok, Philharmonic, Teletone and many others | HO | 1.8 | 10.90 |
| A-8129 | 12-13 | Conversion unit | HH | 1.8 | 10.65 |
| A-8130 | 10-14 | Universal unit. Packed with six schematics showing connections for various circuits. Exact replacement G.F. 77J1 except where 6CD6 horizontal output tube is used | HG | 0.9 | 10.00 |
| A-8131 | 11-13 | Exact replaoement for Dumont, Capehart, Emerson, Packard-Bell, RCA and othera using direct drive circuits | HR | 0.5 | 6.50 |
| A-8132 | 13-15 | Exact replscement for Munts TO-0031 | HM | 1.3 | 10.50 |
| A-8133 | 12.5-15 | Exact replacement for Admiral 79C30-1, 79C30-3 | HA | 1.0 | 10.50 |
| A-8134 | 12.5-15 | Exact replacement for Admiral 79C30-2, 79C30-4, 70038-1, 79D38-1 | HA | 1.0 | 10.50 |
| A-8135 | 13-15 | Exact replacement for Admiral 79D41-1, 79D41-2, also replaces Sheraton Video products ELr-106, EL-119, EL-119B | H8 | 1.2 | 10.75 |
| A-8136 | 13-15 | Exact replacement for Philharmonic 80-263, 80-265, 20-265-2, used in Apex, Ambassador, AMC, Brunswick, Pathe, Silvertone, also used in Airline, Jackson, Lafayette, Meok, Olympio, Starrett and many others | HP | 1.2 | 10.00 |
| A-8137 | 13-15 | Exact replacement for Hoffman 5035 | HC | 1.2 | 10.00 |
| A-8220 | 13-15 | Exact replacement for Philco 32-8565, including terminal board oomponents | HD | 1.0 | 10.65 |
| A-8221 | 13-15 | Exact replacement for Philoo 32-8555, with capacitor, resistor and choke coil on terminal board | HD | 1.0 | 11.25 |
| A-8222 | 13-15 | Exact replacement for Philco 32-8533 and 32-8534 with capacitor, resistor and choke coil on terminal board | HD | 1.0 | 10.70 |
| A-8223 | 13-15 | Exact replacement for Phitco 32-8572, with chove coil on terminal board | HC | 1.2 | 9.65 |
| A-8224 | 13-15 | Exact replacement for Motorola 24C711265, 24C71126A, 24C721200, with horizontal centering pot, variable gap width control and tube socket on terminal board | HE | 1.5 | 13.10 |
| A-8225 | 13-15 | Exact replacement for Motorola 24K71213, with same components as A-8224 | HE | 1.3 | 13.10 |
| A-8226 | 13-15 | Exact replacement for Motorola 24K721301, 24 K 721301 C , 24K 721517C, with same components as A-8224 | HE | 1.3 | 13.10 |
| A-8227 | 13-15 | Exact replacement for Sylvania 241-0003 | HJ | 0.8 | $\overline{7.20}$ |
| A-8228 | 13-15 | Exact replacement for Sylvania 241-0005 and 241-0006 | HJ | 0.8 | 7.70 |
| A-8229 | 13-15 | Exact replacement for Sylvania 241-0007 | HJ | 0.9 | 8.10 |
| A-8230 | 13-15 | Exact replacement Air King, CBS-Columbia and Silvertone part numbers 10104, 10107, 10108, 10110, 10126 and 10135 | HK | 1.0 | 10.50 |
| A-8231 | 13-15 | Exact replacement for CBS-Columbia and Silvertone part numbers 10136, 10136B, 10137, 10138 and 10159 | HK | 1.0 | 10.50 |
| A-8232 | 13-15 | Exact replacement for Emerson 738067, 738068, 738069, 738073, 738074, 738075 and 738082 | HL | 1.0 | 10.50 |
| A-8233 | 13-15 | Exact replacement for RCA 76430 and 76795 | HC | 1.2 | 10.35 |
| A-8234 | 13-15 | Exact replacement for RCA 76501 | HN | 0.8 | 6.30 |
| A-8235 | 13-15 | Exact replacement for RCA 75519, 75585 and 76381 | HN | 0.8 | 6.85 |

## DEFLECTION YOKES

All Stancor deflection yokes have ferrite cores and cosine distributed windings for anti-astigmatic focusing. All units with an "A" suffix have networks and extra long leads.
The networks have a capacitor across each half of the horizontal coils. There will
always be a capacitor acrose the "high" half of the yoke-regardlese of circuit variation. Network rewiring is virtually eliminated.
All yokes have molded coil forms that automatically orient the coils to provide a minimum of "crosstalk." Shipping weight 1.0 lbs.

## ISOLATION TESTING TRANSFORMER

Large enough to handie almost any television or radio receiver on 105,115 and 125 , with 117 volts $\mathbf{A C}$, 1 es providing output voltages of 105, 115 and 125, with 117 volts AC from the line, for testing purposes
or may be employed to correct a high or low line voltage. Has electrostatic shield.

| Part <br> No. | Wattage | Primary <br> Voltage | Secondary <br> Voltage | Height <br> Overall | Base <br> Area | Mtg. <br> Type | Shpg. Wt. <br> in | List |

## HIGH FIDELITY OUTPUT TRANSFORMERS

## Better than $\pm 1 \mathrm{db}$ from 20 to 20,000 cps.

 and manufacturing practices to provide outstanding audio response designcost. Maximum power level ls conservatively rated at 50 watts. They are deatgned to match the most popular types of output tubes to speaker or line lmpedances.

Extensively interleaved "triflar" windings, extremely tight ooupling and careful electrical balance result in audio fdelity to please the most oritical speciallst. Inasmuch as elaborate shielding is not required at the audio outpat level, an inexpensive, but thoroughiy practical. Type $C$ mounting
is used. Shipplig wetght is 6.5 ibs.

*Where more than one secondary Impedance is shown, only one value ts to be used at any thme.
+Primary provided with seven tape for Ultra-Linear application.

SMOOTHING CHOKES FOR D.C. POWER SUPPLIES.
Inductance varies with the amount of D C. flowing through the coil, are rated at 10 volts, 60 cycles, with maximum D.C. in winding. Inductance varies wits have been tested under uniform conditions. They Tolerance of plus $15 \%$ is maintained on all ratings.

POLY-PEDANCE MODULATION MULTI-TAPPED UNITS TO PROPERLY MATCH THE OUTPUT OF THE MODULATOR STAGE TO THE MODULATED LOAD. WILL MATCH ALL COMMON IMPEDANCES OF CLASS " B " MODULATOR ( $\mathbf{2}, 000$ to $\mathbf{2 0 , 0 0 0}$ OHMS) TO CLASS "C" LOAD IMPEDANCES OF $\mathbf{2 , 0 0 0}$ TO $\mathbf{2 0 , 0 0 0}$ OHMS.

The number of excellent transmitting tubes available is constantly matching some given modulator tubes or R.F. load. These units give increasing. R.F. applications, too, have increased and it is sometimes an almost unlimited range in power and impedance ratings to assure difficust to obtain the correct modulation transformer suitable for a correct impedance match in all cases.

Large enough to handle almost any television or radio receiver on test. 115 and 125, with 117 volts, A.C., from the line for testing purposes or Has three standard receptacles, providing output voltages of 105, for correction of high or low line voltage. Has electrostatic shield.

AUTOFORMERS

## LINE ADJUSTING AUTOFORMERS

Stancor Line Adjusters permit operation of electrical devices at 116 of a selector switch and is accurately indicated by an output voltmeter ts when the supplied is $65,75,90,100,115,130$ or 145. They are also useful for altering a 115 volt line above or below that scale. level. The line adjuster input is correctable in seven steps by means

## MINIATURES

JAF SERIES - HERMETICALly SEALED
These tiny transformers are hermetically sealed to MIL-T-27 requirements and are encased in standard military AF cans deep-drawn from "Trialloy" nlckel alloy magnetic shielding material. Wide frequency range is consistently achieved by layer wound coils of extremely fine wire.

TRIAD TRANSFORMER CORP.

## HERMETICALLY SEALED TRANSFORMERS

LOW LEVEL AUDIO Transformers
TRIAD low-level audio transformers have been adopted as standard by many manufacturers of the finest in audio equipment. No other transformers offer such wide frequency range and such effective magnetic shielding in such small size. Shlelding up to 95 db , is attained by multiple "Trialioy" cases interleaved with heavy copper
shading rings. These transformers are solldly constructed, rigidly mounted with welded stainless steel studs, and hermetically sealed to MIL-T-27 specifications. Beautiful appearance, unmatched performance, long life, minimum size, are outstanding features of these quality transformers.

# TRIAD TRANSFORMER CORP. 

## POWER COMPONENTS

## hermetically sealed

meet all the requirements of the MIL-T-27 specification for Grade 1 , Class A service. Among the qualification requirements are: $40^{\circ} \mathrm{C}$ maximum temperature rise, 10000 megohm insulation resistance, 10 day humidity and vibration oycie, alternate plus $85^{\circ} \mathrm{C}$ and minus $55^{\circ} \mathrm{C}$ temperature oycling. These are the finest transformers available!

TRIAD "HS" series power components are designed to meet the most stringent operating conditions in military and commercial service. They are hermetically sealed in heavy deap-drawn MIL standard Chey are hermetically sealed in heavy deep-drawn Mil standard designed with highest quality materials, and beautifully finlshed In baked grey enamel. Both 50-60 cyole and $380-1500$ oyclo designs

## TRIAD TRANSFORMER CORP.

## TOROIDS

TOROID COILS for WAVE FILTERS
The nearest practical approach to the perfect inductor of no resistance, no capacity, and infinite " $Q$," is made by winding on a pressed molybdenum-permalloy dust core of toroidal shape. Depending on size and composition of core materials. TRIAD Toroids will develop " 0 "s of greater than 200 , inductance values up to 25 Henrles and stablity with level, temperature and up to 25 Henries and stability with level, temperature and is plus or minus $1 \%$ Values of DC indicated as permissible will not reduce inductance values by more than $5 \%$.
not reduce inductance values by more than $5 \%$.

TRIAD Toroids are ordinarily encapsulated in translucent plastic material, but may be obtained in a hermetically sealed case if desired. When ordering Toroids to be hermetically sealed, they will be furnished in the cases shown in the margin. List prices shown are to be added to the list price of the uncased types. When ordering hermetically sealed Toroids, order by the uncased number, followed by the letters HS. Example: EA.1000.HS.
Special inductors, made to your specifications as to inductance and "Q." may be ordered from the factory. Prices on request.

These miniature blocking oscilator transformers are now in quantity production for manufacturers in a number of applications and with outstanding results. Their multlple winding construction makes them avallable for a variety of circuits and their fast rise time (. 05 microseconds) makes them exceptionally useful. Positive hermetic sealing prevents deteriora tion of performance with time (absolutely necestary for long shelf life).

PL-4

## TRIAD TRANSFORMER CORP.

## HIGH FIDELITY OUTPUT TRANSFORMERS

## Hermetically Sealed HIGH LEVEL OUTPUT

TRIAD "HS" Series Output Transformers represent the application of the most modern techniques in the deslon of fine audio equipment. Ust of annealed grain-oriented core materlals, cumbined with multiple interleaved coll structures, have resulted in an open circuit inductance to leakage inductance ratio of 10,000 , representing a frequency
response range of better than 13 octaves. These transformers will deliver full rated power output within 1 db . from 7.50000 cycles. Full DC plate current can be carried through the primary windings, but every effort should be made to balance the two plates in push-puli circuits to obtain optimum results at the extreme low frequencles.

| $\begin{array}{c}\text { Type } \\ \text { No. }\end{array}$ | $\begin{array}{c}\text { List } \\ \text { Price }\end{array}$ | Application |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |$)$

## HIGH LEVEL OUTPUT

The Triad high fidelity transformers in the group below afford a standard of performance exceeded only by the "HS" series outputs. These transformers have a frequency response linear within 1 db . from $20-20000$. Feedback loops employing as high as 30 db . of negative feedback may be used.

## TRIAD TRANSFORMER CORP.

## AMPLIFIER KITS <br> For High Fidelity Reproduction

## HF-3-Preamplifier and Equalizer

A power amplifier such as our HF- 18 or HF-40 wilf deliver outstanding reproduction when supplied with one volt or more of input, as from an AM or FM tuner. From a magnetic head additional gain is needed. In addition, frequency correction is necessary to equalize various recording styles and to correct for inherent deficiencies of the room and reproducer combination.

Feotures of the HF-3 are:
Adequate gain to drive an HF-40 or HF-18 from any commercial pickup or microphone.
Nine separate compensation networks to cover all standard recording systems now in use.
Equalization of low and high frequency gain up to 22 db.. either of emphasis or of attenuation. (New type of tone control circuit.)
Completely self powered, with DC filament supply to insure minimum hum and noise back ground.
Aluminum chassis limits magnetic field distribution through chassis.

## HF-3 Kit

Includes complete punched sectional aluminum chassis and complete assembly instructions, plus R-56A, A-75J and two C-1X transformers.
Net Welght, 5 pounds.
List Price $\$ 32.80$

## HF-12-10 Watt Power Amplifier Kit

The HF-12 is a complete amplifier with built-In pramplifier to accommodate all crystal and magnetic cartridges. It employs a new reactance type of tone control and a complete 9 point switch to afford compenstion for all types of records in common use.
This kit is an improvement and elaboration of the original TRIAD HF. 10 kit of which there are many thousands in use today and giving outstanding service.
This kit is a revision of the amplifier described in the article which appeared In the Ootober 1953 issue of Radio and Television Nows, entitied "Improved Kappler Amplifier," by Charles P. Boegli.

Features of the MF-12 are:
Full 10 watts output from 20 cycles to 35,000 cycles.
Frequency response linear within 1 db . from 13 to 50,000 cycles.
Complete preampllifer tone control and record compensation for all standard recordings, on a single $8 \times 12$ chassis.
DC filament supply far preamplifier tubes. Aluminum chassis limits magnetic field distribution through chassis.
Noise and hum level down 68 db . below maximum full power output.
HF- 12 Kit
The HF-12 kit includes a completely punched sectional aluminum chassis and complote assembly instructions, plus R-14A, C-13X, A-75J and S-31A transformers.
Net weight, $141 / 2$ pounds.
HF-12A Kit
Same as HF-12 kit, except HSM-81 hermetically sealed output transformer is used instead of the S-31A.
Net weight, 15 pounds.

## HF-12B Kit

List Price $\$ 68.90$
Same as HF-12 kit, except S-32A output transformer is used. This kit will be used where line impedances are required of $500 / 250 / 125$ ohms
Net weight, $141 / 2$ pounds.
List Price $\$ 50.90$
HF-12C Kit
Same as HF-12 kit, except HSM-82 hermetically sealed output transformer is used.
Net weight, 15 pounds.
List Price $\$ 68.90$

## HF18-'Williamson Type' All Triode Amplifier

The "Wifliamson Type" amplifier has a deserved reputation for quality of performance among high fidelity enthuslasts. Its quality is superb and its performance outstanding with extended frequency range and exceptionally low distortion.
With TRIAD transformers, the "Williamson" shows even wider frequency range with lower distortion. This unit is ideal where higher power is needed.
The output tubes may be operated as pentodes and the screens fed from taps on the output transformer. This will increase the output power to 22 watts with very little increase in distortion. The S-148.A, HSM-189 and HSM-190 transformers have the proper screen taps for this type of operation.
Features of the HF-18 are:
Full power output of 16.5 watts for triode operation or 20 watts for pentode operaion from 12 to 60,000 cycles.
Frequency response linear from 7 cycles to 80 kc . within 0.2 db .
Distortion under $1 / 2 \%$ from 20 cycles to 45 kc .
Aluminum chassis limits magnetic field distribution through chassis
Noise and hum approximately $\mathbf{8 0} \mathbf{~ d b}$. down from maximum level
HF. 18 Kit
HF. 18 kit

- 18 kit includes a completely punched ectional aluminum chassis with complete instructions, plus R-58A, C-14X, and S-148A transformers.
Net welght, $203 / 4$ pounds.
List Price $\$ 63.65$
HF-18A Ki4
Same as HF-18 kit, except HSM-189 hermetically sealed output transformer is used instead of S-148A transformer.
Net weight. 22 pounds.
List Price $\$ 77.40$
HF-18C Kit
Same as HF-18 kit, except HSM-190 hermetically sealed output transformer is used instead of the S-148A. The HSM-190 output transformer secondary matches 500/250/125 ohms.
Not weight, 22 pounds.
List Price $\$ 77.40$

## HF-40_40 Watt Auditorium Amplifier

Improved amplifier techniques as exemplified in the HF-12 and HF-18 have seldom been applied to higher power units. However, peak powers in ordinary home listening often exceed the capacity of these amplifiers for short periods of time and increased power is desirable for those who desire the utmost in fidelity.
At least two manufacturers of "Stereophonic" sound for theatres have adapted this amplifier as standard for theater installation where the extreme stability made possible by the regulated power supply is of great value.
Features of the HF-40 ore:
Regulated screen voltage and fixed bias voltage permit unchanged performance under wide variations in line voltage and loading.
Full power output of 40 watts from 20 to 40,000 cycles. Peak power of 55 watts available.
Frequency response 10 to 40,000 cyctes within one db
Distortion under $1 \%$ from 18 to 40,000 cycles at full power output.
Aluminum chassis Ilmits magnetic field distribution through chassis.
Noise and hum down 75 db .
Net Weight, $351 / 2$ pounds.
Net Weigh
HF-40 k
HF.40 kit incluces punched sectional aluminum chassis and complete instructions, plus R-46A, C-17X and S-42A transformers.

HF-40A Kit
List Price $\$ 78.35$

Same as HF-40 kit, except HSM-94 hermetically sealed output transformer is used instead of S-42A transformer.
Net weight, $353 / 4$ pounds.
List Price \$116.60
HF-40C Kit
Same as HF. 40 kit, exoept HSM-95 her-
metically sealed output tranaformer is
used instead of S-42A transformer.
Net welght, $35 \frac{3}{4}$ pounds.
List Price $\$ 116.60$

TRIAD power components are liberally designed to best meet averape design specifications and to ensure maximum utility for each design. All units are beautifully finished in baked grey enamel and have all connection data permanently marked on the case.
All types are "Climatite" treated, both coil and core, for protection apainst moisture and for elimination of lamination chatter. Although they are smal in size, the high quality materials used keep losses to a rise below 550 O Only rise below 550 C. Oniy copper foil static shields. grounded to the case and core, are used. by UL for high temperature operation.

A-62BC $\quad 24.00$ deiver 305 into an 80 m.f.d. condenser, using 2 rectifier tubes, low capacity damper tube winding.

| $6.3 V . \cdot 10 A$. | $4+6$ | $41 / 2$ | $33 / 4$ | $33 / 4$ | 3 | 16 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

$$
\begin{aligned}
& \text { 6.3V.-2.5A. } \\
& 6.3 \mathrm{~V} .-1.2 A . *
\end{aligned}
$$

R-62BC is designed to deliver 365 V into an $80 \mathrm{~m} . f . d$. condenser, using 2 rectifier tubes, low capacity damper tube winding.

| R-63BC | 19.50 | 131 V. | 900 | $6.3 \mathrm{~V},-9 \mathrm{~A}$. | $31^{3}$ | $41 / 2$ | $33 / 4$ | $33 / 4$ | 3 | 11 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

131 V. winding designed for use in a voltage doubler circuit.
*New item. †Less than $100 \mathrm{~m} . \operatorname{mof}$. d. capacity to ground and insulated for high voltage damper tube.
Height of transformers in BC cases is measured from chassis line to top of case. Copper shading ring on all BC cases to
reduce external manntic field.

## TRIAD TRANSFORMER CORP.

## HORIZONTAL OUTPUT (FLYBACK) Transformers

| Type No. | List Price | Application |  | Dim.-Inches |  |  | Wt. Lbs. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Type | H | W | D |  |
| D. 1 | \$ 9.00 | Delivers 12,000-14,000 anode volts from single 68G6 or 6806 driver and single HV rectifier. Ample deflection for $70^{\circ}$ tubes. | 0 | 4 | 3 | 21/2 | 3/4 |
| D-2 | 9.00 | Autoformer type. Delivers 14,000 V. from 6BG6 or 6BQ6 driver and single HV rect. Sufficient for $70^{\circ}$ tubes. Direct replacement for Hoffman 5143, 5144, 5146, 5148. | 0 | 4 | 31/2 | 3 | 3/4 |
| D-11 | 9.65 | Delivers $9,000 \mathrm{~V}$. from single 6BG6 tube, and single HV rect. 530 operation. Replaces RCA $211 \mathrm{T1}, 211 \mathrm{~T} 3$, matches $\mathrm{Y}-11, \mathrm{Y}-12$. | H | 43/4 | 33/4 | 21/8 | 2 |
| D-14 | 10.45 | Delivers 14,000 rolts from single 6BG6. Replaces GE $77 J 1$. Universal matching of yokes. | P | 4 | 21/2 | 23/4 | 3/4 |
| D. 15 | 10.45 | Delivers 14,000 volts from single 6BG6. Has AGC circuit winding. Secondary tapped for Universal use. Matches Y12, Y17, Y21, Y22. | P | 4 | 21/2 | 23/4 | $3 / 4$ |
| D-19 | 10.45 | Delivers $14,000-16,000$ V. Single driver, $70^{\circ}, 17^{\prime \prime}$ to $24^{\prime \prime}$ tubes. Replaces RCA 225T1. Matches Y12, Y17, Y19, Y21, Y22. | P | 4 | 21/2 | 23/4 | $3 / 4$ |
| DA-20 | 7.00 | Delivers $13,000-14,000$ V. Single driver, air core. Replaces RCA 74951 and Packard Bell 89432 . Matches Y-20. | T | 25,8 | 3 | 3 | 1/2 |
| D-22 | 10.45 | Delivers 16,000 V. Single driver, $70^{\circ}, 17^{\prime \prime}$ to $24^{\prime \prime}$ tubes. 90 KC De-Ringer. Replaces Packard Bell $89438-\mathrm{B}$. Matches Y -22. | P | 4 | 21/2 | 23/4 | $3 / 4$ |
| D-24 | 10.45 | Delivers $\mathbf{1 8 , 0 0 0}$ V. Single driver, $\mathbf{7 0}^{\circ}, 17^{\prime \prime}$ to $24^{\prime \prime}$ tubes. Matches Y-24. | P | 4 | 21/2 | 23/4 | $3 / 4$ |
| D-26 | 10.00 | Voltage doubler type, $\mathbf{2 0 , 0 0 0} \mathrm{V}$. for $70^{0}-90^{\circ}$ deflection. Replaces Hoffman 5033-2. | 0 | 4 | 3 | 21/2 | $3 / 4$ |
| D-27 | 10.00 | Delivers $15,000 \mathrm{~V}$. for sets using selenium rectifiers and single 6BQ6. Replaces Hoffman 5035. | 0 | 4 | 3 | 21/2 | $3 / 4$ |
| *D-28 | 10.00 | Delivers 15,000 V., using single 6B06. Replaces Hoffman 5160. | Qa | 4 | 3 | 21/2 | 3/4 |
| D-31 | 11.00 | Universal type, universal mounting, $16,000 \mathrm{~V}$. using single driver all types, $70^{\circ}$ deflection. Replaces RCA 231 i 1 plus low induccance tap for width coil. Can be used as auto transformer and with all yokes. | L | 41/4 | 23/4 | 23/8 | $3 / 4$ |
| *D.32 | 10.75 | Universał type, universal mounting. Supplies 13.5 KV to 15 KV from all driver tubes, has AGC or AFC tapped winding. Matches all yokes. | L | 41/4 | 23/4 | 23/8 | $3 / 4$ |
| *D.33 | 10.00 | Universal type, universal mtg. Supplies 12 KV to 14 KV from all driver tubes. Low inductance width coil tap, has AGC or AFC tapped winding similar to D-32, but lower impedance secondaries. Matches all yokes. | L | 41/4 | 23/4 | 23/8 | $3 / 4$ |
| *D.35 | 11.00 | Universa! type, universal mtg. Supplies $14,000 \mathrm{~V}$, from single drivers. Separated width coil winding. Replaces RCA 223T1, 224T1, 230 Tl and 232T1. Matches all yokes. | L | 41/4 | 23/4 | 23/8 | 3/4 |
| *DA-36 | 3.50 | Coil only. replaces Zenith part No. S-18567. | TT | 21/4 | 21/4 | $11 / 2$ | 1/4 |
| *DA-37 | 3.50 | Coil only, replaces Zenith part No. S-19032. | TT | 21/4 | 21/4 | 11/2 | 1/4 |
| *D-50 | 11.50 | $90^{\circ}$ autoformer, designed especially for $90^{\circ}$ deflection systems. $24^{\prime \prime}, 27^{\prime \prime}, 30^{\prime \prime}$ picture tubes. Matches $Y$. 50 yoke. | P | 4 | 21/4 | 23/4 | $3 / 4$ |
| *MB-10 | . 35 | Universal mounting bracket designed for universal mounting on $\mathrm{D}-14, \mathrm{D}-15, \mathrm{D}-19, \mathrm{D}-22, \mathrm{D}-24$ and $\mathrm{D}-50$. | MB |  |  |  | 1/8 |
| *New item. |  |  |  |  |  |  |  |

## MODULATION TRANSFORMERS-THE "FIVE" SERIES

SNC universal madulation ironsformers ore specifically desianed to provide moximum opplication passibilities per type. All units ore provided with two indentical secondary windings, permitting series ar porollel aperation. Chonges in the ratio can be readily occamplished, when desired, without remaving the unit from the chossis. Alast units ovoiloble in either air coaled ar compound flled coses. UNIVERSAL TYPES

PLATE TRANSFORMERS-THE "SEVEN" SERIES
All SNC plate transformers hove dual secondory rotings. Most units ovalloble in either air cooled or compound filled cases. All unils contoin electrostatic shields between primory and high voltoge windings.

See Page N-33 for Dimensional Illustrations.

# D PEERLESS <br> ELECTRICAL PRODUCTS 

## DIVISION

（E）New，Special Feature，item．
＊＊All primaries are $117 \mathrm{~V}, 60$ cycle
＊All low－imperlance windings of high－level output and impedance matching trans－ output and impedance matching trans－ formers mav be worked into loa
All transformers in this aroup
plied with electro－static shoup are sup－ plied with electro－static shield．

$\ddagger$ Low flux－density core for preamplifiers．
${ }^{1}$ CCS－Continuous duty．
${ }^{2}$ ICAS－Intermittent duty（ $20 \%$ duty
${ }_{3}$ evecle center tap on second winding．
4 Haximum operating level， 1 mw reference．
© Choke input to filter．

－Impedance is total of two separate wind－ ings．
－For RTMA standardized 70 volt line．
－These units may also be used as bridging transiormers．Complete application data in each packing box．

## INPUTTRANSFORMERS (20-20 PLUS)

| Type <br> Number | Descriptive Data |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

P-P. Has 2 sec, windings with bal, cap. to grnd. Electrostatic shield is provided between pri. and sec. Has 90 db electromagnetic shielding. Insertion loss $11 / 4 \mathrm{db}$. Transformer will operate into open circuit or resistive load. Frequency resp. down Iess than 1 db at 15 KC , when operated into resistive load shunted with 120 MMFD , cap. High power rating makes transf. suitable for use as output transf.

OUTPUT TRANSFORMERS (20-20 PLUS)
 Has C.T. tertiary of 24.5 ohms which may be used for feedback or grnded, for electrostatic slield, Parallel feed is required.
Astatic balance and electromagnetic shield provide approx. 50 db of shelding. Insertion loss 0.5 db . Transf. may be used as Astatic balance and electromagnetic shield provide approx. 50 db of sh'elding. Insertion loss 0.5 db . Transf. may be used as excellent input transf. to either single or P-P grids. When used this waf balanced low impedance winding provides excellent line termination.

STACO Transformers are compact and modern in design. Only the highest quality silican lamination steel is used which assures cool operoting transformers. Each coil is layer wound with the best quality enameled wires, each layer is insulated with heavy insulating material, each coil is varnished impregnated and high temperature baked. High Voltoge Breakdown fest is performed on each coil and transformer in accordance with existing RMA Specs. This combination of high quality materials plus the finest workmanship is assurance of better and lasting performance at highest operoting efficiency, yet casts no more than average.
Finishes: Mount type \#1, Black baked enamel, Maunt type \#2, Black baked enamel, Mount type \#3, Natural Bufied Aluminum, Mount type \#4, Block Wrinkle baked enamel.

Modern high fidelity broadcasting and transcription apparatus require the utmost performance and reliability in the audio transformers used in their circuitry. The Freed "Quality Grade" audio transformers are wide band, high fidelity components featuring astatic construction, longitudinal balance, low harmonic distortion, uniform response, high efficiency, and constant impedance match throughout the audio frequency spectrum. Maximum neutralization of stray fields is accomplished by use of humbalanced coil structures and multiple alloy shielding. High fidelity is achieved on every tap of universal impedance winding without line reflection of transverse coupling.
All Quality Grade Components are thoroughly impregnated in a special non-hygroscopic varnish, and fully encapsulated in a moisture proof, high.melting point compound.

When supplied with leads: DC-L
When supplied with terminals: DC-T
U-16 IMPEDANCE IN OHMS
*A 70 volts level can be obtained for the folowing impedances:
500 ohms -10 watts +40 VU
330 ohms -15 watts +42 VU
250 ohms $-\quad 20$ watts +43 VU
200 ohms $-\quad 25$ watts +44 VU
125 ohms $-\quad 40$ watts +46 VU
50 ohms -100 watts +50 VU
$50,125,200 \mathrm{CT}, 250,330,500 \mathrm{CT}$.
125 and 500 ohms can be used for 150 and 600 ohms.

NEW FREED CIRCUIT REVISES WILLIAMSON HI-FIDELITY AMPLIFIER FOR IMPROVED PERFORMANCE

FREQUENCY IN CYCLES PER SECOND

Freed ultra high fidelity amplifier with exceptional audio quality is now possible thru the use of specially designed high fidelity low cost Freed transformers and reactors; high fidelity output transformer KA-10, power transformer KP-10 and filter reactors $\mathrm{KC}-10$ and $\mathrm{KC}-11$.
Ask your Freed distributor or write for bulletin No. 5402. This bulletin contains detailed construction and performance characteristics of this unique amplifier.

## FREED FILTERS

Freed Standard Filters are Hermetically Sealed miniature high performance components designed for both production and laboratory apparatus in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics.
Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters. The standard filters are available in Low Pass, High Pass and Band Pass Filters.
LOW PASS FILTERS: The attenuation characteristics of Low Pass Filters are 6 db at cut-off frequency, 35 db at 1.5 cut-off frequency and 40 db at 2 cut-off frequency.
ILP-Interstage Low Pass Filter. Characteristic impedance 10,000 ohms.
LLP-Line Low Pass Filter. Characteristic Impedance 10,000 ohms.
HIGH PASS FILTERS: The attenuation characteristics of High Pass Filters are 6 db at cut-off frequency, 35 db and 40 db at 0.67 and 0.5 cut-off frequency.
IHP—Interstage High Pass Filter. Characteristic Impedance 10,000 ohms.
LHP-Line High Pass Filter. Characteristic Impedance $500-600$ ohms.
BAND PASS FILTERS: The attenuation characteristics of Band Pass Filters are 2 db at plus or minus $3 \%$ of center frequency, 40 db at 0.5 and 2 center frequency. Special filters in all six types are available for any frequency from 300 to 20,000 cycles.
IBP-Interstage Band Pass Filter. Nominal input impedance $-10,000$ ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 2:1.
LBP-Line Band Pass Filter. Nominal input impedance $500-600$ ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage gain 9:1.

## STOCK FILTERS

Frequency is indicated by numbers following filter designation:

## FREED MACNETIC AMPLIFIERS

MAGNETIC AMPLIFIERS - SATURABLE TRANSFORMERS - SATURABLE REACTORS - FAST-RESPONSE MAGNETIC AMPLIFIERS - HIGH-TEMPERATURE MAGNETIC AMPLIFIERS - DRIFT-FREE MAGNETIC AMPLIFIERS
Freed Magnetic Amplifiers, Saturable Transformers and Reactors are designed for efficient operation and long life. They can be used in most applications that require reliable power amplifiers. The types of amplifiers listed below are designed to control AC servomotors.
Development facilities are available for the design of magnetic amplifiers to meet specific requirements, All standard units are hermetically sealed and meet MlL-T-27 Specifications.
SATURABLE TRANSFORMERS
Controlled with dual triode; plate supply can be either DC or AC; no rectifiers; AC or DC: control signals.
PUSH-PULL MAGNETIC AMPLIFIERS
$A C$ or $D C$ control signals; high gain; may be used with magnetic or vacuum tube preamplifiers
if needed.
High gain; half-cycle per stage response time; AO or DC control signals; RC feedback networks for control system stabilization can be used directly; preamplifier not needed.
HIGH TEMPERATURE MAGNETIC AMPLIFIERS
Designed to operate in ambient temperatures as high as $200^{\circ} \mathrm{C}$.; AC or DC control signals. DRIFT-FREE MAGNETIC AMPLIFIERS
For rigid drift-free requirements of control systems; designed to meet specific requirements.
SATURABLETRANSFORMERS

## MILITARY PULSE TRANSFORMERS

HERMETICALLY SEALED PULSE TRANS. FORMERS for use in blocking oscillators, low level interstage coupling, and modulator outputs. Made in accordance with MIL-T-27 specifications. These pulse transformers are designed for maximum These pulse transformers are designed for maximum Bower, efficiency and optimum pulse performance. Balanced coil structures permit series or parallel connection of windings for turn ratios other than unity. Pulse charactertistics, voltages and impedance levels will depend upon interconnections made.

PROFESSIONAL GRADE AUDIO TRANSFORMERS
For popular priced high fidelity amplifiers, professional equipment and receivers, for home and public address service. Freed has developed this series of audio transformers using the latest design techniques and the best commercially available materials. Except for units carrying unbalanced direct current, the frequency response is commercially available materials. Except for units carrying unbalanced direct current, the frequency response is
hetter than $\pm 1 \mathrm{DB}$ from 30 to 15,000 cycles. All units feature excellent performance characteristics with hetter than $\pm 1$ DB from
minimum size and weight.

## .taion Freed Transformers oum

FREED TRANSFORMERS (CONT.)

* Patent Pending

High Fidelity Output Transformers for Every Application!

[^43]** All cases are furnished in silver grey hammerloid finish. 10 -inch color coded wire leads are brought out through case bottoms.
Case type " $A$ " mounts with base flange. Case type " $B$ " has provision for either top or bottom mounting.

## ACRO PRODUCTS COMPANY

PHILADELPHIA 28, PA.

## FERRANT|Transformers

This group of transformers are hermetically sealed in standard Mil-T-27 case sizes, and are designed to meet the full requirements of the Mil-T-27 specification. They provide the highest standard of quality necessary for professional and military requirements.

The range includes the specific types stan-
dardized by the Armed Services Electro Standards Agency for universal military use, as well as a group of standard types for 400 cycle power supplies.

Use of these standard high quality components in experimental equipment will avoid the necessity for redesign for production.

ITRNTII

## FERRANT|Transformers

## Filter Reactors

To match the power and audio transformers, these reactors are of the same high quality in design and construction, and are hermetically sealed in standard Mil-T-27 cases. Types particularly suitable for 400 cycle power supplies are included.

## For 50-60 Cycle Power Supplies

| Cat. No. | DC Amps | Inductance <br> Henries | Resistance <br> Ohms | Test Volts | Case | Net Price |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| FC 10 | .020 | 30 | 1100 | 1500 | AJ | $\$ 6.50$ |
| FC 11 | .070 | 15 | 345 | 2500 | GB | 7.40 |
| FC 12 | .150 | 10 | 135 | 2500 | JB | 9.20 |

Two efficient reactors, inductance values .8 and 2.4 henrys respectively, are designed for noise suppression circuits, but can be used in any tuned circuit requiring the given inductances. Inductance values sccurate within $-5 \%$ with up to 15 ms . d-c. Minimum Q of 20. Mounted in identical drawn steel cases.

## DETAILS OF NEW EQUIPMENT LINE MOUNTINGS

H-TYPE MOUNTING-Hermetic sealing meets all MIL-T-27 specifications. Steel base cover is bonded into the case by deep-seal soldering. Terminals are hermetioally sealed by unique rubber gasket-ceramic bushing construction. Units are stud mounted.
C-TYPE MOUNTING-Moisture-resistant compound surrounds coil and core. Ten-inch, RMA-color-coded leads, ends stripped and tinned for easy soldering. Flange-mounted drawn steel cases.

S-TYPE MOUNT1NG-Precision-fitted steel base-covers and terminal boards, plus compound filling, keep moisture out. Solder-fug terminals are clearly identified, easy to use. Drawn steel cases are flange-mounted.

B-TYPE MOUNTING-Steel bases are bonded into the drawn steel cases by deep-seal soldering to make units completely moisture proof. Studmounted cases take minimum chassis space. Convenient, compact, pin-type terminals.

## NEW EQUIPMENT

## TRANSISTOR TRANSFORMERS

Here are the smallest iron core audio transformers ever built. They weigh less than $1 / 10$ ounce and are no larger than the transistors they power. Write for Bulletin 462 showing typical circuit application.

These transformers are designed primarily for transistor audio application but they can be used wherever low power is involved. Useful range, below 1 mw level. They are constructed of extremely fine wire, wound on molded nylon bobbins, with special nickel alloy steel laminations. Mounting style is coil and iron only, type UM.

SPECIAL Chicago-Stancor ultra-miniature transistor transformers, designed and built to your requirements, can be supplied in quantities of five or more. Send your specifications for information on price and delivery.

§Dimensions $\pm .015^{\prime \prime}$.

## MINIATURE HIGH FIDELITY AUDIO TRANSFORMERS

Chicago-Stancor Tinytrans are miniature transformers made with nickel steel laminations. They have an exceptional frequency response for units of this size; $\pm 1 \mathrm{db} .30-15,000 \mathrm{cps}$, Maximum level 0 db . Write for Bulletin 463 showing frequency response curves on these transformers.

These units are sealed and potted in $7 / 8^{\prime \prime}$ square, anodized aluminum cases with phenolic terminal boards. Total height, including terminals, is $11 / 4^{\prime \prime}$. The case has two $2-56$ threaded inserts, $11 / 6^{\prime \prime}$ centers, for easy
 chassis mounting. The entire transformer weighs only 1.3 ounces.

## PUBLIC ADDRESS RANGE TRANSFORMERS

## Frequency Response within $\pm 1 \mathrm{db}, 50$ to 10,000 Cycles

Driver and output transformers in this CHICAGO series are designed for three general power levels to fit a wide range of application. Up-to-date secondary impedances match 600 or Up-to-date secondary impedances match 600 o
(16/8/4-ohm taps also suitable for $20 / 6 / 3.2$-ohm speakers.) Output transformers have tertiary windings for $10 \%$ inverse feedback that minimizes distortion and provides extra audio watts without loss of fidelity.

400 CYCLE TRANSFORMERS AND REACTORS

## HF AND WF SERIES HIGH FIDELITY AUDIO TRANSFORMERS

## HF Series

These units have a wide frequency response of 20 to $20,000 \mathrm{cps}$ with $\pm 1 \mathrm{db}$. Correct design reduces harmonic and intermodulation distortion to a negligible amount. Balanced construction minimizes hum pickup. Chicago-Stancor impregnation insures long life. Cases are finished in gray enamel and have four threaded holes at each end for flush mounting. Studtype terminals are plainly marked for easy identification.

## LOW IMPEDANCE TO GRID

| Part No. | Application | Primary Imp/Ohms | Secondary Imp/Ohms | Max. <br> Level | Hum-Pickup Reduction | $\mathrm{Mtg} .$ | List Price |

$$

## WF Series

These units are of the same outstanding quality as the HF Series extremely low hum pickup. All WF units are cased in the WF-6 above, and, with the exception of two units, have a frequency response of $30-20,000$ cps within $\pm 2 \mathrm{db}$. The WF-21 and WF-35 have a response within $\pm 2 \mathrm{db}$ from $50-20,000 \mathrm{cps}$ and have multiple alloy shields for

## ISOLATION

TRANS-
FORMERS

CHICAGO Iaolation Tratgformers are designed for a dual purpone: (1) To aupply 115 volts isolated from a line of above/below normal, or norma!, voltage primary switch sets for 125/115/105 volts, $50 / 60$ cycles; or (2) For use in servicing to mliminate shock hazard, by isolating chassis ground from line ground (particularly important on "hot" AC-DC television sets). Aiso provide 125 and 105 volts on the secondary for locating doubtful tubes, etc.

| Cat. No. | Capacity | List Price |

| $18-250$ | 250 VA | 27.75 |

C-TYPE MOUNTING

## MODULATION

 TFANSFORMER CMS-1

Chisago's No. CMS-1 Modulation Traosiormer and matching Driver Transormer No. CDS-1, at right, are idea!ly suited for use in ham and commercial spevch transmitters. No. CMS-1 will deliver $200-350$ watts of Class B audio power from P-P 203 A 's, 211 's, $805^{\prime} \mathrm{s}, 75 \mathrm{TL}$ 's, etc. to a Class C load with response va-iations not excesding +1 db . over the stated frequency range $\pm$ Primary ir over stated frequency range. Primary ct; zecondary, $8000 / 6000 / 4000$ ahms.
Cast size 26. Wt., 22 lbs. Cast? size 26. Wt., 22 lbs.
No. CMS-1 . . . . . . . . . List Price, \$49.50

MODULATION TRANSFORMER CMS. 3

Delivors 50 or- 750 watts of Class $B$ audio power from 810 s , 822 's, etc. to a Class C load. Frequency response is within $\pm 1$ db. over the stated voice range. Primary impedance, $18,000 / 12,000$ obms CT; secondary, 6,250 ohms. FS-Type mouming siee 65 (see pege $\mathbf{N}-57$ ). Wt. 48 lbs.
No. Curs-3. . . . . . . . . List Price, \$09.60

COMMUNICATIONS RANGE AUDIO TRANSFORMERS
Frequency Response within $\pm 1 \mathrm{db}, 200$ to 3,500 Cycles
These transformers are specifically designed for such as amateur, police, railroad, and aircraft use in receiving and transmitting equipment types, where clear voice reproduction is desired

## LINEAR STANDARD AUDIO TRANSFORMERS

## LINEAR STANDARD AUDIO UNITS FEATURE:

UNIFORM FREQUENCY RESPONSE . . at low frequencies, is effected through the use of HIPERM-ALLOY, a STABLE nickel iron alloy of very high initial permeability. Uniform high frequency response is the result of multiple section interleaved windings arranged in a semi-toroidal coil structure. This, plus special winding methods and insulations, assures a minimum of distributed capacity and leakage reactance.

UTC LINEAR STANDARD transformers are the ONLY audio units with a GUARANTEED uniform response . . $\pm 1$ DB from 20 to 20,000 cycles.

MINIMUM HUM PICKUP . . . is accomplished through the use of a hum balanced, semi-toroidal, coil structure which affords maximum neutralization of external fields. In addition, all units employ high conductivity outer case for maximum shielding. For very low level applications, units whose code numbers end in $X$ employ multiple alloy shielding, making possible a transformer with extremely low inductive pickup.

NEGLIGIBLE WAVE FORM DISTORTION is a function of proper impedance matching, minimum phase shift, and low flux density These elements have been given great attention in the design of Linear Standard units. It is interesting to note that an output transformer reasonably flat from 20 to 20,000 cycles may show serious distortions at 30 to 10,000 cycles. For this reason, UTC high level units have a frequency range better than guaranteed value, generally 7 cycles to 50,000 cycles (see page $N-101$ ).

MULTIPLE TAP WINDINGS . . . make possible a wide combination of impedance terminations without impairing fidelity or efficiency. Precision winding methods result in winding accuracy of $.1 \%$. . perfect balance of inductance and capacity . . exact impedance reflection.

DEPENDABILITY . . . is a function of external and internal structure. Linear Standard units are housed in rugged die cast cases of precise dimension with reversible mounting to permit above chassis or subchassis wiring. The solid terminal posts on low absorption bakelite are arranged in a circular layout so that a round chassis hole will clear all terminals. Coils are vacuum baked and impreg. nated. Semi-hermetic sealing is accomplished through the use of a high adhesion compound poured through the large opening opposite the terminal board after controlled preheating of the unit for full compound penetration.

## LS OUTPUT

 TRANSFORMERS THE FINESTWhile the UTC Linear Stendord line is eenerally designed for a flat response from 20 cyclos to 20 Kc ., a much wider response is required for output tronsformers. Ai is noted in the first curve below, typlacal 10 cycles ond transformers ore down lors thon Bo at of eyctes ond
less than 1 DB ot 40 to 60 Kc . Becouse of this, ofine power ouiput curve is possible. (Second curve.) The third figure below illustrotes squote waves obtoined with the $\mathbf{1 5 . 6 3}$ transformer in a "Williomson" Amplliter Circuit. Of perticulor interest is the short rise time, which if far superior for UTC transformert thon any stondord make whith we have mesiured.

In choosing power components for broadcast and commercial equipment, the first factor to be considered is dependability. Linear standard power components are very conservatively designed for maximum reliability. Designs provide for low temperature rise, $40^{\circ}$, and high insulation safety factors. Only the finest of materials and workmanship are used throughout.

The low power components of the Linear Standard series are housed in the familiar rectangular LS case with top or bottom mounting facilities. High power components are housed in end castings which completely protect the winding, while directly exposing the laminations for maximum heat trans. fer.

All units have a deep grey finish to obtain the highest heat radiation coefficient. Large components (up to 250 KVA) are housed in oil tanks.

## HIPERM ALLOY TRANSFORMERS

The IJTC Hiperm alloy audio and power transformers are specifically designed for portable and compact service. While light in weight, neither dependability nor fidelity has been sacrificed. The frequency characteristic of the Hiperm alloy audio units is uniform from 30 to 20,000 cycles. They in corporate a Hiperm-alloy nickel iron core and hum balanced coil structure. The rugged die cast case is of high conductivity alloy finished in grey, arranged for mounting with the terminals either up or down. DC in Prim'y shown is maximum unbalanced.

TYPE H. 1 CASE

| $10 W$ | DANCETOGR | A |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Type No. | Application $\quad$Primary <br> (ohms) mp. | Secondary Impedance | $\begin{aligned} & \pm 1 \mathrm{db} \\ & \underset{\text { from }}{ } \end{aligned}$ | Max. Level | DC in Prim'y | Case No . |

## ULTRA COMPACT AUDIO UNITS

The UTC UItra compact audio units are small and light in weight, ideally suited to remote amplifier and similar compact equipment. High fidelity is obtainable in all individual units, the frequency response being $\pm 2 \mathrm{DB}$ from 30 to 20,000 cycles.
All units except those carrying DC in Primary employ a true hum balancing. coil structure, which combined with a high conductivity outer case, effects good inductive shielding. The die-cast case provides for top or bottom mounting. Maximum operating level +7 DB .

## LOW IMPEDANCE TO GRID AND MIXING TRANSFORMERS

| Type | Application | Primary Impedance | Secondary impedance | $\pm 2 \mathrm{db}$ from |
| :---: | :---: | :---: | :---: | :---: |
| A.10 | Low impedance mike, pickup, or multiple line to grid | $\begin{aligned} & 50,125 / 150,200 / 250, \\ & 333,500 / 600 \text { hhms } \end{aligned}$ | 50,000 ohms | 20-20,000 |
| A. 11 | Low impedance mike, pickup. or line to 1 of 2 grids | 50, 200, 500 | 50,000 ohms | $50 \cdot 20,000$ multiple alloy shield for extremely low hum pickup |
| A. 12 | Low impedance mike, pickup, or multiple line to push pull grids | $\begin{aligned} & 50,125 / 150,200 / 250, \\ & 333,500 / 600 \mathrm{ohms} \end{aligned}$ | 80,000 ohms overall, in two sections | 20-20,000 |
| A.14 | Dynamic microphone to one or two grids | 30 ohms | 50,000 ohms overall, in two sections | 20-20,000 |
| A-20 | Mixing, low impedance mike, pickup, or multiple line to multiple line | $\begin{aligned} & 50,125 / 150,200 / 250 . \\ & 333,500 / 600 \text { ohms } \end{aligned}$ | $\begin{aligned} & 50,125 / 150,200 / 250 . \\ & 333,500 / 600 \mathrm{ohms} \end{aligned}$ | 10-50,000 |
| A.21 | Mixing, low impedance mike, pickup, or line to line | 50, 200/250, 500/600 | 50, 200/250. 500/600 | 30-30,000 multiple alloy shield for extremely low hum pickup |

## INTERSTAGE AUDIO TRANSFORMERS

| Type No. | Application | Primary Impedance | Secondary Impedance | $\pm 2 \mathrm{db}$ from |
| :---: | :---: | :---: | :---: | :---: |
| A. 16 | Single plate to single grid | 15,000 ohms | 60,000 ohms, 2:1 turn ratio | 20-20,000 |
| A-17 | Single plate to single grid 8 MA unbalanced D.C. | As above | As above | 40-20,000 |
| A-18 | Single plate to two grids. Split primary, can also be used for P.P. plates | 15,000 ohms | 80,000 ohms overall, 2.3:1 turn ratio over. all | 20-20,000 |
| A-19 | Single plate to two grids 8 MA unbalanced D.C. | $15,000 \text { ohms }$ | 80,000 ohms overall, 2.3:1 turn ratio over. all | 40-20,000 |

# OUNCER AUDIO UNITS 

## Standard and plug-IN types

UTC OUNCER components represent the acme in compact quality transformers. These units, which weigh one ounce, are fully impregnated and sealed in a drawn aluminum housing $7 / \mathrm{s}^{\prime \prime}$ diameter . . . mounting opposite terminal board.
Ouncer items are ideal for portable broadcast, hearing aid, aircraft, concealed service, and similar applications. High fidelity characteristics are provided, uniform within approximately 1 DB from 30 to 20,000 cycles, except for $0.14,0.15$, and units carrying $D C$ which are intended for voice frequencies. Maximum level 0 DB.
"P" series units are identical to the UTC OUNCER units but are sealed in bakelite housings with plug-in base to fit standard octal socket. While of submersion proof design, these units weigh but two ounces. Oversize pins in the base make it impossible to dislodge these units from their sockets.

This transformer provides very low hum pickup . . . employs two heavy gauge hipermalloy shields plus orientable mounting. Primary centertap is balanced to $1 \%$.
Can be used for $150,200,250,500$, or 600 ohm sources . . 200:1 impedance ratio.

## MICROPHONE CABLE TRANSFORMERS

UTC Cable transformers are designed to be inserted in the cable circuit, and are ruggedly constructed to withstand mechanical abuse. The cable connectlons (supplied less cable) are made through spring strain relief to terminal boards inside the end caps, $11 / 2 "$ dlameter . . . 212/2" long . . . $1 / 2$ tb.

Typa MC-1-primary tapped $30 / 50$ and 200/250 ohms, secondary to grid, standard fidelity.
Type MC-2-primary tapped $30 / 50$ and $200 / 250$ ohms, secondary to grid, high fidellty.

## HERMETICALLY SEALED COMPONENTS

For over fifteen years UTC has been the largest supplier of transformer components for military applications, to customer specifications. Listed below are a number of types, to latest military specifications, which are now catalogued as UTC stock items.
Terminals on items $\mathrm{H}-20$ through $\mathrm{H}-24$ are neoprene-ceramic assemblies. All other units employ glass bead headers, but can be supplied with neoprene-ceramic terminals where required. For printed circuit use, wire terminals on glass header units can be straightened out without injury. Straight wire terminals available on production orders.
The frequency response ratings are based on military requirements. Actually, most of the units that do not carry DC are appreciably better in response than the range shown.
The level ratings are maximum level for reasonable distortion at the lowest frequency specified. For higher frequencies considerably higher levels are permissible.
The impedance ratings are listed in standard manner. Obviously, a transformer with a 15,000 ohm primary impedance can operate from a tube representing a source impedance of 7700 ohms, etc. In addition, transformers can be used for applications differing considerably from those shown, keeping in mind that impedance ratio is constant. Lower source impedance will improve response and level ratings . . higher source impedance will reduce frequency range and level rating.

## HERMETICALLY SEALED PULSE TRANSFORMERS

Because of the wide variety of blocking oscillator, interstage, and modulator pulse applications, the bulk of UTC pulse transformers are designed to customer's specifications. Through versatile design, however, the stock pulse transformers listed below take care of most low level applications. The units are hermetically sealed and tested to MIL-T-27 Specifications. Wide ranges of pulse duration, loading, and level are obtainable by variations in the manner of connecting the balanced coil structure windings. An engineering sheet accompanies each unit, providing data for typical applications.
The H-40 and H-41 units employ identical windings suitable for different applications because of the manner in which the windings are brought out to the terminals. These units have two windings for 250 ohm impedance, and two windings for 1,000 ohm impedance. Pulse widths from .1 to 5 microseconds are realized with excellent fidèilty. At 5 microsecond operation the maximum working voltages for the $\mathrm{H}-40$ and $\mathrm{H}-41$ are 175 volts peak for 250 ohms . . 350 volts for 1,000 ohms. These voltages can be increased at lower pulse widths.
H-42 and H-43 are highly miniaturized hermetically sealed. . . MLL-T- 27 units. They incorporate three equal windings capable of being inter-connected for wide versatility in blocking oscillator, interstage, and impedance matching service. The wound Hipermalloy core is uncut to effect maximum efficiency Peak working voltage is 175 volts per winding.

## MAGNETIC AMPLIFIERS FOR SERVO MOTOR APPLICATIONS

FIG. ${ }^{\circ} 2$
GRID CIRCUIT
GRID CIRCUIT
DCOIFICATION FOR DC INPUT

The MAT 1-4 Magnetic Amplifiers are exceptionally stable units designed for the control of 2 phase 400 cycle servo motors. They are compact . . . hermetically sealed . magnetically shielded . . . and meet MIL.T-27 and MIL-E-5400 Specifications. The output is sinusoidal, amplitude variable, and phase reversible. Control is provided by a dual triode such as a 12AU7operating with a plate voltage of 115 volts, 400 cycles, or higher. The signal to the triode grids can be polarity reversible DC or phase reversible 400 cycles with or without suppressed carrier modulation. These units eliminate DC power requirements as well as temperature sensitive dry disc rectifiers. The high input impedance provides minimum loading on sensing elements and high power gain. Ringing at low load level has been reduced to a minimum through high internal damping factors. The power output figures are conservative . . . power gain of the MAGNETIC STRUCTURE is approximately 40 . . . response time aproximately 7.5 milliseconds. The maximum null voltage is 3 volts RMS. For single phase supply voltage the load capacitor should effect $90^{\circ}$ phase shift with motor load . . . for 3 phase, $30^{\circ}$ phase shift. The chart values shown are approximate.)

For AC signal control the circuit of Figure 1 is employed. For DC signai control Figure 2 applies. Figure 3 shows the use of a power transformer (MAT-5) which provides higher plate voltages and eliminates the input transformer (MAT-6). The typical response curve of Figure 4 applies to all units, the larger units feeding heavier loads.

## NEW "M" TYPE TOROIDS Manmm size

UTC Permalloy Dust Toroids have been the standard of the industry for over 15 years. The MQ series of colls provide the highest $Q$ factor in their class (see curves below), with miniaturized dimensions. All units are hermetically sealed to MIL-T-27 Specifications

The stability is excellent. For the MQE. 7 the inductance change is less than $1 \%$ for voltages from . 1 to 3 volts. The MQA- 13 change is less than $1 \%$ for applied voltages from 1 to 20 volts. The MQB-5 change is less than $1 \%$ for applied voltages from .1 to 50 volts. DC is permissible through the coil (values listed below). Inductance is virtually independent of frequency temperature and vibration.

Hum pickup is extremely low due to the toroidal winding structure, with windings uniformly spread over the core. The case is of high permeability, affording additional shielding such that close spacing of units can be effected, the coupling attenuation being approximately 80 DB .

Other values of inductance than those listed are available on special order at the price of the next higher listed value.

| VIC.11 | . 85 | 12 | VIC-22 | 130. | 1 |

UTC type VIC variable inductors offer a revolutionary approach to the problem of tuned audio circuits. By adjusting a set screw in the side of the case, an inductance value of $+85 \%,-45 \%$ from mean value is obtainable. Setting is positive. Effective Q for a wide frequency range and variation of inductance with applied AC voltage are shown on the illustrated curves, for a typical VIC unit.

The VIC inductor is housed in a rugged die cast case $1^{11 / 2 "}$ long, $11 / 4^{\prime \prime}$ wide and $11 / 6^{"}$ high with mounting centers on terminal board side $14 / 16$ " by ${ }^{2 \% / 32}{ }^{\prime}$ : Weight is $51 / 202$.

*DC MA shown is moximum recommended . . . will effect some reduction in inductonce ond $Q$.

## UTC HERMETIC VARIABLE INDUCTORS

| IYPE <br> No. | Min. <br> Hys. | Mean <br> Hys. | Max. <br> Hys. | OC <br> Ma |
| :---: | :---: | :---: | :---: | :---: |
| HVG-1 | .002 | .006 | .025 | 100 |
| HVC-2 | .005 | .015 | .06 | 60 |
| HVC-3 | .011 | .040 | .15 | 40 |
| HVC-4 | .03 | .1 | .4 | 30 |
| HVC.5 | .07 | .25 | 1.0 | 20 |
| HVC-6 | .2 | .6 | 2.5 | 15 |
| HVC-7 | .5 | 1.5 | 6.0 | 10 |

| HVC-11 | 20 | 60 | 250 | 2 |
| HVC-12 | 50 | 150 | 600 | 1.5 |

UTC variable inductors have served as the ideal solution to many filter, oscillator, equalizer, and tuned amlifier problems-for over a decade. Extended development has now made possible the new HVC series of inductors with improved characteristics. They are hermetically sealed to MIL-T-27 specs . . . extremely compact . . . wider inductance range . . . higher Q's . . . lower and higher frequencies ... superior voltage and temperature stability.

Adjustment of set screw in top of case permits chang. ing inductance $+300 \%+0-70 \%$ of nominal value shown. Setting is positive. Effective $Q$ for a wide fre. quency range and variation of inductance with applied AC voltage are shown on the illustrated curves, for a typical HVC unit. Case dimensions are $11 / 8$ long, $25 / 12$ wide $11_{16}$ " high. The two terminals and two $4 / 40$ mounting studs are on opposite diagonals-15/16" spacing.

-DC MA shown is moximum recommended . . . will effect some reduction in inductance and $O$.

## LOW FREQUENCY HIGH Q COILS

Permalloy dust toroids are not suited to providing high $\mathbf{Q}$ at low frequencies. The MQL series of laminated Hipermalloy coils were specifically designed for this class of service. The unique structure employed provides exceptional $Q$ and stability. Inductance values are laboratory adjusted to $2 \%$ tolerance at 1 volt, 60 cycles. Stability with voltage is excellent, for MQL-3 inductance variation is less than $1 \%$ from .1 V to 1 V. 60 cycles. Temperature stability is exceptional, total inductance swing being less than $3.5 \%$ for the wide range of $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$. A hum reducing lamination structure plus heavy Hipermalloy shielding provide very low hum pickup . . . 240 microvolts/gauss for MQL-3 series connected. Two identical windings brought out to four terminals permit series, parallel, center tapped, or transformer type connections.

## HIGH Q PRECISION INDUCTANCE DECADES

UTC DI Inductance decades are invaluable instruments for design and experimental work with tuned circuits, wave filters, and equalizers. They set new standards of Q, stability, frequency range, and convenience. The low hum pickup toroid coits employ a new permalloy dust core which, combined with special winding methods, provides very high Q, excellent voltage and temperature stability, and high self resonance frequency. The switch employed is a new low capacity type which lab tests have proven for low contact resistance after 100,000 operations. The inductance values are laboratory adjusted to better than $1 \%$ precision.
DI inductance decades are housed in a compact, rugged, die cast case with control on a sloping panel, ideally suiting these units to laboratory use. Ganging panels are available for mounting two, three, or four decades together. It is merely necessary to unscrew the four rubber feet at bottom of decade to attach to panel

UTC standardized filters have been designeo to take care of many present day filter requirements through stock units. The interstage type filters have a nominal impedance of 10,000 ohms, and lend themselves to effecting gain simultaneously with their frequency discrimination
BMI units (Band Pass) have 2:1 gain. They are sharply peaked, having approximately 2 DB attenuation at plus or minus $3 \%$ from center frequency and attentuation of 40 DB per octave as shown. Input 10,000 ohms, output to grid. HMI units (High Pass) have a loss of less than 6 DB at cutoff frequency, and an attenuation of 35 DB at .67 cutoff frequency. Input and output 10,000 ohms.
LMI units (Low Pass) have a loss of less than 6 OB at cutoff frequency, and an attenuation of 35 DB at 1.5 cutoff frequency. Input and output 10,000 ohms. HML (High Pass), and LML (Low Pass) filters are similar to the interstage filters, in sll characteristics, except that they are intended for an input and output impedance of $500 / 600$ ohms. BML (Band Pass) have input of $500 / 600$ ohms, output to grid.
All of the standard filters are housed in hermetically sealed cases, shielded to reduce hum pickup to 150 MV per gauss at 60 cycles.
In addition to the stock filters listed, any of the six types are available as special units for any frequency from 100 to 12,000 cycles. Order by type followed by frequency, as LM1-2500, designating low pass interstage filter-2500 cycles cutoff frequency. These special units are priced at $\$ 35.00$ net

# BROADCAST AND RECORDING EQUALIZERS AND FILTERS 

500/600 ohms

## 3AX UNIVERSAL EQUALIZER

The universal characteristics of the UTC $3 A X$ equalizer have made the most popular item for broadcast and recording equalization. Thls unique unlt, with which most communications engineers are already famllar, is an accurately calibrated, quickly adjustable, comblned low and high frequency equalizer. The low frequency controls Include a switch for adjusting the maximum equalization frequency to 25,50 , or 100 cycles and a callbrated $T$-pad for exact adjustment of the amount of equalization. The high frequency portion of this unit includos a switch to set maximum equalization point at $4000,6000,8000,10,000$ or 15,000 cycles, and a similar calibrated control reading directly In DB, Equalization up to 25 DB avallable at any frequency selected.

Through a unlque arrangement of compensatlng pads, changes in adjustment of the $3 A X$ equalizer do not affect the apparent aural level. This permits changes in tone color, with negligible change in volume. Where rapld changeovet is required in service from one line to another, or from recording to play back, it is merely necessary to predetermine the required setting. The actual adjustment of the conirols can be taken care of almost instantaneously. The construction is of the depressed chassls, etched panel, rack mount type. Thoroughly shielded against inductive plckup with UTC Trialloy Shielding. Dimenslons of panel $3 v_{2} \times 19^{*}$ Depth $7 / 7_{7} *$ Welght 15 lbs .

## 3A UNIVERSAL EQUALIZER

The $3 A$ equalizer is Identical to the $3 A X$ described above, except that it does not incorporate the compensating pads for constant insertion loss the Insertion loss is roughly proportional to the amount of equalization employed. All othel characteristics identical with the $3 A X$ unit, this Item weighs 10 lbs.

## 4C SOUND EFFECTS FILTER

The use of fitters to obtain unusual sound effects is now finding wide appllcation in broacast technique. The Model ac Filter was originally developed for one of the large broadcasting chains, and is now used extensively by most broadcast stations. Two controls are provided by the $51 / \mu^{\prime \prime} \times 19^{*}$ panel, which is similar in appearance to the $3 A x$ unit The welght of the 4 C unit is 20 los.
The low pass switch can be set for cutoft frequencies of $100,250,500,1000,2000,3000,4000$, or 5000 cycles. The migh pass switch has identical frequency points. The great number of cutoff frequencles provides for a wide latitude of tone control. If desired. though not normally necessary. external potentiometers may be inserted in the circult for attenuation control.

## COMMERCIAL GRADE COMPONENTS

The commercial grade series of transformers incorporate conservative design and rugged construction to assure dependability under continuous service operation in industrial and commercial grade communication equipment. These units are mounted in uniform drawn cases finished in light grey enamel, and intended for chassis mounting. All items are poured with special sealing compound in addition to vacuum impregnation of coil structures. Type numbers are identical with the PA units except for the prefix "CG.'
CG-134. 135 and 136 are of the hum-bucking type to assure low hum pick-up. All audio components are linear. $\pm 11 / 2$ OB from 40 to 10,000 cycles no unbalanced D.C.), except CVL and CVM units . . . 40 to 6000 cycles. Parallel feed low level interstage units with 50,000 ohms and .25 mfd .200 ohm windings on input transformers are balanced and may be used for 150 to 250 nhm circuits.

NEW UNIVERSAL INTERSTAGE EQUALIZER-CGE-1A
The UTC CGE-1A is the ideal device for any application where frequency response control is desired. Incorporating the latest developments in design and manufaciure, this new unit provides the ultimate in control and flexibility. This equalizer is not a simple R-C tone control, but employs resonant circuits in a unique arrangement providing equalization characteristics unobtainable by conventional circuits. Designed to work from a low or medium impedance source 0 to 20,000 ohms) to a high impedance ( $500,000 \mathrm{ohms}$ or open grid), the CGE-1A affords continuously variable equalization over a 30 DB range at either end of the spectrum, while introducing only 18 DB tatal insertion loss. (See curve above). Complete independence of high frequency and low frequency controls permits a wide variety of settings without affecting the over-all volume level. Because of its low insertion loss, this unit may be incorporated directly in many amplifiers. If existent gain is low, a single medium-mu triode stage will provide both proper gain and source impedance. The mechanical construction permits mounting with case on panel directly behind controls, or with case separated from controls and panel. An etched calibrated panel is provided.
CGE-1A Panel Dim. 23/8" $\times 31 / 2^{\prime \prime} \times 21 / 2^{\prime \prime}$ deep. Wt. 2 lbs .
DYNAMIC NOISE SUPPRESSION INQUCTOR
Incorporates two accurate High Q colls [.8 hy. and 2.4 hy . for use in dynamic noise suppression circuits Exceilent circuit accompanles unit.

# COMMERCIAL GRADE COMPONENTS 

UTC CG power transformers, Varimatch units and chokes are designed to A.I E.E. commercial standards. Ratings are conservative for continuous duty. Designs provide temperature rise less than 55 degrees C . Units are tested for breakdown at twice maximum working voltage plus 1000 volts. Plate trans. formers are given a surge test of $250 \%$ normal voltage at 200 cydes. All items are vacuum impregnated and sealed with special insulating compound. The conservative design and manufacturing procedure of these units make them suitable for virtually all types of commercial equipment as well as ideally suited for quality amateur and public address service.

## CG PIATE TRANSFORMERS

Primaries for 105, 115. 220, 230 volts, 50/60 cycles. For reduced power, secondary voltages can be reduced to half by using 220 V . Pri. on 110 volts. These transformers may be used on 25 to 43 cycles if 220 V . Pri. is used on 110 volts. Secondary voltage is simultaneously halved.

## UNIVERSAL MODULATION TRANSFORMERS

Secondary carries class $C$ current
Any modulator tubes to any RF load. (See chart)

UTC Special Series transformers are specifically designed for amateur and popular-priced PA service. The Special units are finished in a rich, commercial type medium gray enamel. A recessed terminal strip is provided permitting above chassis or breadboard wiring in addition to standard chassis type wiring. The universal windings provided on driver, matching and output transformers assure a maximum of flexibility. Modulator output units will carry the $D C$ current of the class $C$ stage for any of the impedances available and will match practically any audio tubes to any RF load within the power rating of the transformer. Large components are housed in formed cases with top or bottom mounting. All units are vacuum impregnated-compound filled.

## TYPICAL MODULATOR COMBINATIONS

## SPECIAL SERIES POWER EQUIPMENT

UTC Special Series power supply components are designed specifically for amateur and popular-priced PA service. The ralings are based on such applications and recommended for components should be employed. Tapped coil structures on power, and bias supply transformers afford maximum flexibility, permitting a given transformer to be used with many circuits and types of tubes. Stand by service should not be obtained by interrupting high voltage center tap.

## REPLACEMENT TYPE COMPONENTS

UTC replacement type transformers (Pri. 117 V. $50 / 60$ cycles) represent the culmination of years of development in this field. All units are low temperature rise, vacuum sealed against humidity with special impregnating materials to prevent corrosion and electrolysis. Shells and brackets are finished in attractive high lustre black enamel.

## REPLACEMENT TYPE COMPONENTS

## VARITRAN VOLTAGE ADJUSTERS

Input 115 volts $50 / 60$ cycles. Output continually adjustable from 0.130 Volts through roller contact on exposed autotransformer winding. Regulation and efficiency are excellent, no wave form distortion. Output voltage is independent of load. Complete with tine cord, switch, and receptacle . . . for loads up-to 570 Watts . . 5 A.

| Type |  | Dimensions | Wt. |
| :--- | :--- | :--- | :--- |
| $\mathrm{V}-1-\mathrm{M}$ | with meter | $47 / \times 97 / 6 \times 35 /$ | 14 lbs. |
| $\mathrm{V}-1$ | Without meter | $4 \% \times 8$ | $\times 35 /$ |

## EXPORT VOLTAGE ADAPTER

Complete with cord and plug and special locking awitch providing for lina voltagea of $105,115,125,135,150,210,230,250$ volts; 42 to 60 cycles. Output voltage 115.

## PHOTO FLASH TRANSFORMERS

Can be used for elther standard (Amglo type) or rigger (Sylvanla type) multiple flash Dulbs. Cif+ cult detalls included with transformer.

PF-1 Primary for 115 volts, $50 / 60$ - cycles. Secondaries for power supply delivering 2200 volts $D C$ to condenser up to 100 Mfd . Compound sealed in $\mathbf{G} \cdot 3^{*}$ case $23 / 3 \times 23 / 4$ ( $53 / 4$ Including flanges) $\times 21 / 2$ inches high. Weight 2 lbs .

P-2 For portable service. Primary tapped for 4 volt of 6 volt battery (full valve vibrator). Secondary for power supply delivering 2200 volts DC to condenser up to 60 Mfd . Compound seated In G-3* case. Weight 2 lbs .

PF-3 Triggef Transformer 15 KV peak. 7/ 0.0 $\times 3^{\prime \prime}$ long. Welght 202

PF-4 Dual Pri. for either 4 V battery or 115 V 50/60 cycles. Secondary for power supply dellyering 900 volts DC to condenser up to 150 Mfo 6.3* case, 2 Lb.

SUBOUNCER UNITS
FOR HEARING AIDS...VEST POCKET RADIOS...MIDGET DEVICES
UTC Sub-Ouncer units fulfill an essential requirement for miniaturized components having relatively high efficiency and wide frequency response Through the use of special nickel iron core materials and winding methods, these miniature units have performance and dependability characteristics far superior to any other comparable items. They are ideal for hearing aids, miniature radios, and other types of miniature electronic equipment.
The coils employ automatic layer windings of double Formex wire . . . in a molded Nylon bobbin. All insulation is of cellulose acetate. Four inch colon coded flexible leads are employed, securely anchored mechanically. No mounting facilities are provided, since this would preclude maximum flexibilit) in location. Units are vacuum impregnated and double (water proof) sealed. The curves below indicate the excellent frequency response available Alternate curves are shown to indicate operating characteristics in various typical applications.

## SUB-SUBOUNCER UNITS FOR HEARING AIDS AND ULTRA-MINIATURE EQUIPMENT

UTC Sub-SubOuncer units have exceptionally high efficiency and frequency range in their ultra-mıniature size. This has been effected through the use of specially selected Hiperm-Alloy core material and special winding methods The constructional details are identical to those of the Sub-Ouncer units described above. The curves below show actual characteristics under typical conditions of application.

# REVOLUTIONARY LINEAR STANDARD AMPLIFIER 

## NEW HEIGHT OF FIDELITY 20 WATTS...KIT FORM

The Linear Standard amplifier climaxes a project assigned to our audio engineering group a year ago. The problem was, why does a Williamson circuit amplifier which tests beautifully in the laboratory seem to have considerable distortion in actual use? It took a year to fully determine the nature and cause of these distortions and the positive corrective measures. This new amplifier not only provides for full frequency response over the audio range but, in addition, sets a new standard for minimum transient dirtortion.

An inherent weakness of the Williamson circuit lies in the fact that its negative feedback becomes positive at subsonic and supersonic frequencies. The resultant instability in use lends to parasitic oscillation at the high end and large subaudio cone excursions both of which produce substantial distortions. The Linear Standard Amplifier uses Multiple Loop Feedback and network stabilization to completely eliminate these instabilities. The oscillagrams below show comparative performance. The flat frequency response and extremely low intermodulation distortion provided by 36 db feedback, are self evident from the curves shown.

In addition to providing an ideal amplifier electrically, considerable thought was given to its physical form. A number of points were considered extremely important: (1) Size should be minimum (power and audio on one chassis). (2) Each kit must have identical characteristics to lab model. (3) Rugged, reliable, structure is essential.

This resulted in a rather unique construction employing a printed circuit panel as large as the chassis with virtually all components pre-assembled and wired. The result is that each kit, which comes complete, including tubes and cover, can be fully pretested before shipment. Additional wiring involves only the connection of 17 leads to screw terminals for completion.

## LVB-II7 Line Voltage Eooster

Engineered to sofely and occurately mstore soquitred voltome to meny IV sel of electrieat appliance. Insures full strength, width, and height of iV picture when low line voltage weokens and shrinks pteture Corrects low line wollage sync anti oscitlotar drifi froubles.

350 watl rating . . . ample for most reqoitaments, sestores line walloge of 90 through 135 volts to 117 volis output. Simple plug-in installation. Automalically operated. . furns on and off with sel or appliance. Mulfi-Tap Sulector Switch Und Calibrated Neon Indicator permit exart valtage boost. Overloall Fuse Prolestian protects against unsafe line voltage incsease.

Shipping waight: 4 bs.
LIST PRICE $\mathbf{\$ 1 7 9 5}$

## LVB "Jr" Economy Voltage Booster

Reliable budged priced unit. Single gwith controt . provites 10 volt bcost, dsop or straight-thragh line. 350 watl rating . . . simple plug. it iastallation.
Cotolog Mo. 3021

Shipping weigbt: 3 lbs
LIST PRICE ONLY $\$ 675$

## Replacement Receiver Transformers

Designed to pravide the serviceman with a serie, of trarstormers thar require minimua invesiment to civer the most aften reavired repair maeds.

TRANSISTOR TRANSFORMER

# TINYFORMERS "The Mast Efficient of stll" 

## OPEN TYPE TINYFORMERS

## Part numbers MI thru M10

Preferred and specified as standard equipment by leading manufacturers of miniature electronic devices. Available in 7 types, each heat sealed in a cellulose acetate envelope, contained in fibreglass box with Chart Sheet that glves frequency in cycles, response in decibels and complete details.

## MU-METAL SHIELDED TINYFORMERS

## Part numbers MI-S thru M7-S

Mu-Metal Shielded Tinyformers are for use in closely coupled or high gain circuits. Hum level can be reduced 18 to 20 db . Tiny size, extreme lightweight ( 104 per pound) are made possible by fine wire, precise nylon coil forms and high-nickel alloy high-Q cores. Supplied in satin finish with flexible color coded leads. The Mu-Metal Shielded Tinyformer is potted in a non-hydroscopic compound for excellent moisture and humidity-proof construction.

## hermetically sealed tinyformers

## Part numbers Mil-H thru M7-H

Hermetically sealed to Mil-T-27, Grade 1, Class A. Glass sealed $1 / 8^{\prime \prime}$ high terminal construction.
Tinyformer is encased and sealed in metal container with a black satin finish. Mounts with one \#3-48 stud, $3 / 16^{\prime \prime}$ long and is supplied with lock washer and nickel plated hex nut.

## GRAMER TINYFORMER

transformers are designed for highest efficiency in transistor circuits. Tiny size and extreme lightweight are made possible by fine wires, precise nylon coil forms and high-nickel alloy high-Q cores. They are attractively packaged for quick sales.

## FP-WP Dry Electrolytic Capacifors

For use at ambient temperatures up to $85^{\circ} \mathrm{C}$ in filter and by-pass circuits in radio, TV and industrial electronics. Sealed in aluminum cans with twist-prong, lug construction. FP types have Mallory exclusive Fabricated Plates. WP have special etched plates. All feature low RF aections. Separate anode terminals. Case is common cathode For hardware, see page 11, Mallory Capacitors Section, of this catalog.

FP-WP-Quads

[^45]$\dagger \dagger$ FP2 40 recommended for photoflash applications. Can is ungrounded. $\Delta$ pin should be used as ground.

## Aluminum Can Threaded Neck Dry Electrolyfic Capacifors

For replacement of wet and dry electrolytic capacitors. RS, RM and HS have flexible, insulated leads. HD and SR have solder lug anode connections; cathodes are connected to case.

*Will operate at $85^{\circ} \mathrm{C}$. Others operate at $65^{\circ} \mathrm{C}$.

## Cardboard Tubular Dry Electrolytic Capacifors

Economical, cardboard tube, wax-sealed filter and by-pass units. Have flexible, insulated leads out one end except those marked (*) which have negative leads out opposite ends All units (except TN111) are supplied with mounting strap; in addition all units marked ( $\dagger$ ) have special feet for vertical mounting.

## Plastic Cased High Capacity and Non-Polarized Electrolytic Capacifors

HC types are for use with dry disc rectifiers, in such applications as; movie equipment and electric fence power supplies. NP types are non-polarized for intermit tent $A \mathbf{C}$ service.

## Capacitor Selector

For determining correct capacity to use in making replacements of defective motor starting capacitors which have lost their identity．For checking capacity ranges from 25 to 645 mfd ． $110-125 \mathrm{VAC}$ ．

Catalog No．MSS－101 \＄15．00 Net．

Mefal Cased Oil Impregnated Paper Capacitors

For vibrator buffer, coupling and other electronic circuits where highest quality, tubular-type capacitors are required. Mineral oilimpregnated, heremetically sealed, metal-cased tubulars with external insulating sleeves. $2 \%^{\prime \prime}$ leads. For operation at $85^{\circ} \mathrm{C}$.

## Steel-Cased, Oil-Filled Capacitors

For general use in air craft, marine, geophysical and industrial elec tronic equipment where extreme dependability under severe conditions s deaired. Oil impregnated, single, dual, and triple section units housed in rugged, hermetically sealed, hot-tinned steel cases. Single sections have two terminals. Dual section units have three terminals with left terminal common, and both are internally insulated from case. Triple units have three terminals with common ground to case. All terminals protrude in a row on one long side of case.

## Disc Ceramic Capacifors

#### Abstract

Small physical size, rugged construction, and excellent electrical characteristics. These unique capacitors are particularly suitable for replacement of molded mica and paper tubular units fhey have dipped phenolic coating for maximum protection from moisture.

## Stand-Off Cerumic Capacitors

Recommended for the dual purpose of by-passing R.F. current to ground, and of mechanically supporting other circuit elements. They are especially suited for VHF and UHF applications because of their low inductance and high resonant frequency.

| Cat. No. | Cap. mmfd | Tolerance | Fig. No. * | List Price |
| :---: | :---: | :---: | :---: | :---: |
| SC-521 | 1000 | $20 \%$ | 2 | $\$ 1.00$ |
| SC-535 | 500 | $20 \%$ | 2 | $\mathbf{1 . 0 0}$ |

## Feed-Thru Ceramic Capacitor

A well built, sturdy, feed-thru capacitor used to by-pass R.F. to ground in feed-thru applications. Wire terminals are rugged and wili ground in feed-thru applications. Wire terminals are points for several connections for supporting other circuit elements, and are sufficiently long for point-to-point wiring.

| Cat. No. | Cap. mmfd | Tolerance | Fig. No. | List Price |
| :---: | :---: | :---: | :---: | :---: |
| FC5215 | 1500 | $20 \%$ | 3 | $\$ 1.00$ |

## Ceramic Irimmer Capacitors

Small, electrically stable capacitors tor use in high frequency FM-TV circuits. Each capacitor consists of fired silver electrodes on a ceramic rotor and base. They have a $360^{\circ}$ rotor with a subatantially constant capacity change and are completely sealed from dust and dirt. Single or dual units are available.
Solder type lugg at each end of ca pacitor.
Two clearance holea are provided in each capacitor for screw mounting.

Single Units-Overall size ${ }^{21 / 32^{\prime \prime}} \times^{27 / 32^{\prime \prime}} \times 78^{\prime \prime}$ thick. Voltage Rating-600 VDC

Fixed Ceramic Capacitors

Mallory tubular, fixed, ceramic capacitors are manufactured in 3 types. UC is general purpose type for by-passing, coupling and other applications where a moderate capacitance change with temperature change can be tolerated. ZT is zero temperature type, the nominal capacitance of which remains substantially constant over a temperature variation from $-55^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$. NT is negative temperature type with a negative coefficient of 750 parts/million/degrees C. These capacitors are supplied with a dipped phenolic insulation for protection against moisture and have radially placed bare, tinnedcopper leads approximately $11 / 4^{\prime \prime}$ long.

Voltage Rating-600VDC.

For reducing or eliminating radio frequency interference caused by various electrical appliances.
Type $W$ has dual capacitors housed in metal tubes. Common lead of capacitors connected to case, except WSP type which has shocklimiting capacitor from common lead to case. Designed for direct mounting. Type $X$ has single and dual capacitors housed in round metal case, except X6 which is housed in rectangular plastic case. Deaigned for plug-in mounting. Type Z-Single and dual inductancecapacity filters housed in round metal container and designed for
insertion between appliance and electrical outlet. Types Z6 and Z8 have terminal for return lead to ground of appliance. Type Z8A designed for direct mounting and is equipped with $5^{\prime \prime}$ flexible leads. Type LC-combination inductance-capacity filter housed in rectangular metal case. Equipped with line cord and plug as well as outlet for appliance. Type LB-heavy duty choke-capacity, combination filters sealed in rectangular, standard, heavy-gauge metal cut-out boxes. Equipped with heavy, flexible insulated wire leads for splicing with house or motor wiring.

## MALLORY TYPE "K" VITREOUS WIRE-WOUND POWER RHEOSTATS AND POTENTIOMETERS

Hinged-spring contact arm; low contact resistance; low wear; easy cleaning and brush replacement; antibacklash characteristic.

See complete line Mallory page 4 Potentiometers, Rheostats, Resistors Section

## Radio Frequency Choke Coil

General purpose radio frequency choke coils for all circuits. Hour-glass wound for low distributed capacity. Housed in com pact insulating tubes. Two bare tinned copper wire leads, one at each end.

| Catalog Number | Turns | Wire | Inductance* Microhenries | Size <br> Dia. Length | List <br> Price |

* Measured at 2.5 mc .

## MALLORY PLASCAP!

Plastic tubular capacitor with Maisture-Proof Construction.
For complete description and listing see page 4, Mallory Capacitor section, this catalog.

## MICA CAPACITORS

## Mica Receiver Capacitors

Designed for use in radio, TV and industrial electronic circuits. Made with carefully selected mica and foil. Phenolic
 case with RTMA color coding for identification.

$=500$ VDC Working - 1000 VDC Test

## Mica Transmifting Capacifors (Type MH)

For use in transmitting and power amplifier circuits. Made with accurately gauged, high-quality, India mica in molded phenolic case.
Test volts are $200 \%$ of WVDC. Case size $156^{\prime \prime} \times 11 / 8^{\prime \prime}$ (minus terminals).

Case Size: $41 / 18^{\prime \prime} \times 234^{\prime \prime} \times 21 / 4^{\prime \prime}$ (Minus Terminals).
Capacity tolerance $\pm 20 \%$.

## Instructions for use of RETMA Color Code

Hold capacitor with arrow pointing to right. From left to right, the first dot shall always be white to indicate standard RETMA molded mica capacitor. The second and third dots become the first two significant figures in the capacitance. The second row is read from right to keft. The lower right dot should be the multipler. The bower second dot indicates the tolerance and the lower left dot indicates the class.

Example shown above $=1300 \mathrm{mmfd} . \pm 2 \%, 500$ V.W.
The key to color significance is as follows:

| Color | Sig. Fig. | Mult. | Tol. | Clase.* |
| :---: | :---: | :---: | :---: | :---: |
| Black | 0 | 1 | $\pm 20 \%$ | A |
| Brown | 1 | 10 |  | $\stackrel{\text { B }}{\text { B }}$ |
| Red | 2 | 100 | $\pm 2 \%$ | C |
| Orange | 3 | 1000 | $\pm 3 \%$ | D |
| Yellow | 4 | 10000 |  |  |
| Green | 5 |  | $\pm 5 \%$ |  |
| Blue | 6 |  |  |  |
| Violet | 8 |  |  |  |
| Wray | 8 9 |  |  | J |
| Goid |  | 0.1 |  |  |
| Silver |  | 0.01 | $\pm 10 \%$ |  |

[^46]

## Transmiffing Capacifors (Type TX)

For radio, television, transmitting and all circuits requiring high voltage capacitors. Compact rectangular oil filled capacitors of sturdy construation. Capacity tolerance $-10 \%$ $+20 \%$. Do not use on $\Delta C$.

# METAL-CLAD AND TANTALYTIC CAPACITORS 

## SUBMINIATURE METAL-CLAD TUBULAR CAPACITORS

Subminiature metal-clad tubular capacitors are available with Permafil solid dielectric for operation from -55 C to +125 C , or with Pyranol* liquid dielectric for operation from -55 C to +85 C , without derating. Silicone end seals of all-welded construction provide maximum resistance to thermal and physical shock and permit soldering up to the bushing without danger of seal damage. Butt-welded leads can be supplied either axially or at right angles. Permafil units combine small size and no liquid leakage with high insulation resistance and ability to withstand extreme temperature cycling. Pyranol units are 20 per cent smaller than comparable oil-filled capacitors.
Both types meet performance requirements of MIL-C25A and can be supplied in standard case sizes in either tab or extended foil designs. Ratings range from . 001 to $1.0 \mu \mathrm{f}$ in voltages of $100,200,300,400$, and $600 \mathrm{~d}-\mathrm{c}$ working.
Write for Bulletin GEC-987.

TANTALYTIC CAPACITORS FOR LOW-VOLTAGE USE

The Tantalytic capacitor is designed for certain directcurrent applications up to 150 WYDC where aluminum electrolytics and paper capacitors are not entirely satisfactory, and is suggested for use where superior characteristics and nltimate size reduction in the high quality electrolytic field are of prime importance.
This capacitor is a tantalum-electrode, electrolytic unit, similar in construction to an aluminum electrolytic capacitor, but smaller in size because of the characteristics of the tantalum. The Tantalytic capacitor has lower leakage currents. longer shelf life. and a wider range of temperature operation ( -55 C to +85 C ), without derating. than the conventional aluminum electrolytic capacitor. Tantalytic capacitors, in a wide range of ratings. are currently being used in telephone equipment and military communication and ordnance equipment.
Write for Bulletin GEC-80s.

## MICRO-MINIATURE TANTALYTIC CAPACITORS

Micro-miniature Tantalytic capacitors are designed for low-voltage d-c applications where long shelf life, electrical stability, and ultimate size reduction are of prime importance. Widely used in hearing aids and other subminiature assemblies employing transistors, microminiatures are rated as high as 4 volts, $8 \mu \mathrm{f}$ in the点-inch case; higher ratings can be achieved in the $1 / 2$-inch case. Capacitance tolerance for all units is $-0 \%+100 \%$.
The micro-miniature employs a tantalum anode enclosed in a silver case and impregnated with a nonacid electrolyte. A synthetic plug is roll-crimped into the end of the case and a solderable tin-coated nickel lead is lap-welded to the projecting tantalum anode lead. This permits connection up to the bushing. The case itself is the cathode and is equipped with a tin-coated nickel lead soldered to the case. The unit is of the polarized type.

Write for Bulletin GEA-6065.
*Registered trade-mark of General Electric Co.

## PYRANOL CAPACITORS

## CAPACITORS TO MEET MILITARY SPECIFICATION MIL-C-25A 100 to $\mathbf{1 2 , 5 0 0}$ Volts D-c - 0.01 to 15 Microfarads

CP 53,54 -Bathtub style CP 61, 63, 65, 67, 69_Miniature Rectangula

Intended primarily for feeder, by-pass, and blocking purposes, these units are qualified for applications where the alternating-current component of the impressed voltage is small with respect to the direct-current rating.

All case styles are available in Characteris tics $D$. $E$ and $F$. Single-section units are supplied with a capacitance tolerance of $\pm 10$ per cent ( $K$ ), and two- and three-section units with a capacitance tolerance of +20 per cent, - 10 per cent (V). Spade-lug and footed mounting brackets are available for use with capacitors on which the mounting bracket is not an integral part

In addition to their regular applications, these units may also be used at higher temperatures, with higher voltages for short life applications, and with a.c voltages.
Write to the nearest G-E Apparatus Sales Office for Bulletin GEC-810.

## ENERGY-STORAGE DISCHARGE CAPACITORS

G-E light-duty energy-storage capacitors are made in a wide range of ratings to fit practically every requirement of high-speed flash photography, as well as home and industrial welders for light metals. C'areful construction, high-quality materials, and skilful design contribute to long life and efficient operation.
Write for Bulletin GEA-4646.
STANDARD RATINGS

CAPACITOR NETWORKS

These capacitor networks are designed for radar and industrial equipment where the normal (exponential) capacitor discharge shape is not suitable and where an impulse having a definite energy content and duration is required.
General Electric pioneered in the development of mineral-oil-treated paper dielectric capacitor networks for air, sea, and land radar, and is a prime supplier for the government services. The products supplied vary from the miniature types in use with aircraft and guided missiles to the large designs for land-based radar.
Write for Bullet'n GEA-4996.

## PYRANOL' CAPACITORS

*Registered trade-mark of General Electric Co.

## STANDARD COMMERCIAL TYPES

## For A-c and D-c Applications - Fixed Paper-dielectric Capacitors

A-c/d-c dual-rated Pyranol capacitors for motors, controls, luminous-tube transformers, electronic equipments, and other applications will reduce inventories, simplify design problems, and increase standardization. Capacitors in the voltage ranges 236 through 660 volts, a-c, and 400 through 1500 volts, $d-c$, are now dual-rated and can be used for either a-c or d-c applications. Other a-c and d-c ratings available: 0.01 to 75 microfarads, 236 to 660 volts, a-c, and 400 to 100,000 volts, $d-c$.
Because of the high dielectric strength, high permittivity, and exceptional stability of Pyranol, its use as a treating material has made possible a capacitor which is much smaller in size, and far superior to those formerly available.

## Design Advantages

(1) Units are small and compact, because of the use of Pyranol.
(2) A wide range of ratings is available in rectangular, cylindrical, and oval cases.
(3) Three styles of mounting brackets are available and are supplied separate from the units. Units may be operated in any position.

Write to the nearest G-E Apparatus Sales Office for Bulletin GEC-809.

Case Style 70

Case Style 70 units with various types of terminals and removable mounting brackets

These Pyranol fixed paper-dielectric capacitors in Case Style 70 are hermetically sealed in rectangular cases. This line includes standard ratings, ranging from very small units weighing only three ounces to large high-voltage units weighing up to 175 pounds.
All are of single-capacity construction, with a capacitance tolerance of $\pm 10$ per cent. Cases are isolated and the two bushings are brought out through the cover. Units in $600-, 1000$ - and 1500 -volt ratings are available with either solder-lug terminals or with pillar-insulator terminals. All higher-voltage ratings have pillar-insulator terminals. These units inay be operated in altitudes up to 7500 feet.
Up to 600 volts d-c, bushings with solder-lug terminals are made of G-E silicone; above this rating, they are of phenolic-cup construction. Bushings with pillar-

[^47]Page P-14

PYRANOL' CAPACIIORS

## Case Style 70 (Cont.)

insulator terminals are made of molded phenolic or porcelain of the highest quality. All bushings are thoroughly bonded to the container to provide a permanent liquid-tight seal.

All units can be supplied with removable mounting brackets. Both spade-lug and L-type are available. Brackets can be attached to either the top or the bottom of the units to permit upright or inverted mounting.
Write to the nearest G-E Apparatus Sales Office for Bulletin GEC-809.

[^48]Case Style 60

These small rectangular-case fxed-paper-dielectric units are of narrower width than the "buthtub" units. and will fit into a very restricted panel surface, where case height is not the limiting dimension. Removabletype mounting lugs are of very sturdy construction

These units have solder-lug terminals, and are available in either single- or dual-section construction for all circuit diagrams.

The metallic containers are hermetically sealed, and of deep drawn construction.

Case Style 60 units have no brackets, but removable brackets of either the footed or spadelug type can be supplied.

## CAPACITORS FOR OSCILLATOR TANK CIRCUITS

This line of fixed paper-dielectric capacitors has been developed primarily for grid and plate blocking service in the electronic oscillator circuits of high-frequency induction-heating equipments. They can also be used to advantage in other high-frequency oscillator circuits of a similar nature.

G-E high-voltage paper-dielectric capacitors are of relatively high capacitance ( 0.01 mu f) tor high-frequency units, yet they are more economical than conventional highfrequency units of considerably smaller capacitante values. They can, therefore, be applied with savings me cost as well as reduced losses and lower voltage drop across the capacitor.

## feafures

Hermetically sealed in metallic cases.
Single-bushing construction for minimum size.
Removable mounting bract ets.
Internal lead connections arranged for minimum inductance.
Write for Bulletin GEA-4388.

## SCREWBASE ELECTROLYtics

Type PLS-Capacitor sections have separate positive leads and common negative lead
Type LS-Positive terminal is lug connection, can is negative terminal
Type SC-For use where high peaks may occur . . . Lug connection is positive, can is negative
Type CL-Same as Type SC, but with can insulated from Sections . . . Separate positive and negative leads
Type WR-Designed to replace wet electrolytics . . . Will withstand extremely high A-C ripples . . . Has lug terminal
Type AP-For high voltage applications . . . Sections are connected in series . . . Insulated leads

- For Broadcast Amplifiers, Police Radio, and Other Applications where Rapid Changing of Capacitors is Desired
- Will Fit Standard Octal Base Tube Sockets
- Hermetically Sealed in Metal Cans for Long Life
- Will Stand Up under High Temperatures, High Ripple Currents, High Surge Voltages

## HLV HIGH CAPACITANCE ELECTROLYTICS

- Especially Designed for Filter Circuits in Motion Picture Amplifiers and Other Critical High GairAmplifier Equipment
- Compact Construction for Greater Utility
- Hermetically Sealed in Aluminum Cans
- Have Outer Insulating Cardboard Tube

# SPRAGUE CAPACITORS 

## CERA-MITE* CERAMIC CAPACITORS

- Tiny, Tough, Dependable In Every Application
- Low Self-inductance Of Silvered Flat-plate Design Means Very High By-pass Efficiency in All TV Circuits
- Flat-plate Construction Permits Higher Selfresonant Frequency Than Tubular Ceramic Or Molded Mica Capacitors
- Tough Moisture-proof Coating Protects Against Short-circuiting And Assures Good Performance Under Severe Conditions Of Humidity And Vibration
- Cera-mite Capacitors Easily Fit Into Tight Spaces, Even Across Subminiature Tube Sockets
- Designed For $85^{\circ} \mathrm{C}\left(185^{\circ} \mathrm{F}\right)$ Continuous Operation
*Trademork

## GENERAL APPLICATION TYPES

- Excellent Where Temperature Coefficient is - Ideal For Replacing Older Types Of General Not Important, Such As By-pass and Coupling Applications Application Capacitors Such as Molded Micas, Tubular Ceramics, and Paper Tubulars

## SPRAGUE CAPACITORS

## BULPLATE ${ }^{\circledR}$ PRINTED CIRCUITS

- Especially Designed to Save Space and Reduce Assembly Time
- A Combination of Resistors and Capacitors of Maximum Compactness
- Integral Connections are "Printed" and Brought Out to External Leads Which Are Anchored to the Basic Ceramic Plate
- Completed Unit is Protectod by a Moisture-proof Coating
- Capacitors are rated af 500 volts d-c, 1000 volts test, while the maximum voltage to be applied across the resistors is 250 volts d-c; except on 100 Cl where all elements are rated of 100 volts d.e.

- Designed for Ultra-high-frequency TV Receivers and Electronic Equipment
- Flat Disc Design Means Low Self-inductance and High Selfresonant Frequency - Superior to Similar Units using Tubular Ceramic Elemenis
- Capacitar Bement Sealed in Top of Ferrule or Screwhead with Plastic Resin
- 502C "shirt studs" are for u-h-f Coupling Applications in TV Sets
- 503C are Feed-thru Capacitors Intended for Filtering Leads thru Chassis-Ferrule Shank fits Standard Push Clip
- Stand-off Capacitors for By-pass Applicatians: 501C has Ferrule Shank to fit Standard push clip, 505C has Self-tapping 6-32 Thread, 507C has Standard $6-32$ Thread, 506 C has Self-tapping 10-32 Thread, 508C has Standard 10-32 Thread-All Screwmounting Types Have Hexagon Heads
- Order by Typu, Capacitance, Voltage, Class—Units Listed here are Rated at 500 WVDC

## hi-voltage DOORKNOB ceramics

## CUP CERAMICS

These precisian capacitors are widely used in high stability r-t oscillators where frequency contral is important. Tolerance on capacitance can be held to $\pm 1 \%$, and on temperature coefficient to $\pm 10 \mathrm{ppm}$. Hermetically sealed construction and low self inductance are noteworthy as are high $Q$, capacitance stability, and retrace characteristics.

Available in $500,1000,1500$ volt ratings for all standard temperature coefficients from P100 to N750. Write on campany letterhead for complete details. r-f oscillators where
frequency contral is

## WITH INTERCHANGEABLE SCREW-IN TERMINALS TO FIT ALL TV SETS

- A New Idea in High Volt- Molded Guard Rings Lengthen Surface age Capacitor Design.
- Molded in Non - flammable, Moisture-resistant Thermosetting Plastic

Creepage Path

| MMF | KV | Dia. $\times$ Length | Cat. No. | List |
| :--- | :---: | :---: | :---: | ---: |

| 500 | 30 | $15 / 16 \times 11 / 4$ | 30DK-T5 | 4.50 |

TV YOKE CAPACITOR REPLACEMENT KIT

- Capacitance in yoke applications is critical. Incorrect value produces distortion which only proper rating can correct.
- "Trial and error" method is often necessary to choose proper capacitor. This selection gives complete coverage of required fractional values between 33 and 82 mmf .
for complete details.

## PRECISION <br> TUBULARS

For exacting circuitry in electronic instru. mentatian and high stability oscillators. The same stacked disc construction as metal cup ceramics but with higher capacitance range.

Hermetically sealed in plated metal tubes for moisture protection. Rated for $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ operation as are cup ceramics.
Available in $\pm 1 \%$ capacitance tolerances! Available in 500, 1000,1500 volt ratings for all standard temperorure coefficients from P100 to N750. Write on company letterhead

## CERAMIC TRIMMERS

Widely used in precision circuitry where maximum stability is required. Unlike ordinary law cost trimmers, the special construction of these top-quality
 units prevents corrosion, permits mounting against chassis, and guarantees long, trouble-free life.
Write on letterhead for complete details.

[^50]* DESIGNED FOR BUFFER APPLICATIONS

## SPRAGUE CAPACITORS

68P MIDGET ${ }^{\circledR}$ tUBULARS

- Amazingly Small In Size Without Any Sacrifice In Performance - The Smallest Reliable Paper Tubular
- Will Fit Tight Spots In Pocket Radios, Auto Radios And Other Small Electronic Assemblies That Require High Temperature Operation, Good Humidity Performance, And Minimum Size At Moderate Cost
- Designed For $85^{\circ} \mathrm{C}\left(185^{\circ} \mathrm{F}\right)$ Operation

## HYPASS ${ }^{\circ}$ CAPACITORS

- Exclusive Sprague 3-terminal Network Feed-thru Capacitors
- Bypass V-H-F Currents Where Ordinary Capacjtors are ineffective
- Suppress TVI from Short-wave Transmitters, Diathermy Machines, Electronic .Heating Apparatus, etc.
- Eliminate lnterference caused by Line-conducted Radiation Between Neighboring TV Sets
- Install Leads in Series with Circuit Being Filtered and Ground the Case

*Has female serew terminals
†Bilkhead mounting.

## 72P resonant capacitors

## PEP UP OLD RADIO SETS:

- Stabilize Any AC-DC "Squealer" Receiver
- Stop Self-oscillation, Permitting "On-the-nose" Alignment in a Jiffy
- Very Low Impedance at 465 KC Intermediate Frequency
- By-pass Unwanted I-F Signals Improve Set Performance

# SPRAGUE CAPACITORS 

## PX metal-encased tubulars

- Rubber-phenolic Compression Disc Seals Assure Positive Hermetic Closure
- Oil-Filled And Oil-Impregnated For Greater Dielectric Strength at Higher Temperatures
- A Product Of New Techniques, Materials, And Processes For Maximum Dependability Under Most Severe Operating Conditions
- Furnished With Insulating Kraftboard Outer Sleeve

# SPRAGUE CAPACITORS 

## CR RECTANGULAR OILS

- Capacitor Sections Hermetically Sealed In Ruggedly Constructed Rectangular Metal Cans
- Impregnated And Filled With KVO (Kilo Voit Oil), A Special Sprague Development
- Extremely High Insulation Resistance.
- Designed For Good Performance And Long Life, Even Under High Surge Voltages And High Ambient Temperatures.
- Terminals Have Universal Mounting Feature-Equipped With "Lifeguard" Protective Caps

## INTERFERENCE FILTERS

FITEROM TBPES

- Suppress Man-made Radio and TV interference
- Small, Completely Self-contained
- Quickly, Easily mstalled

Pilterol Types 1, 2, and 3-Designed for connection in series with power supoly lires to interference-producing devices . . . A 3-terminal network with the case as one terminal . . . The selected filter should have a rating higher than the continuous operating current of the coffending device . . . A single Filterol connected to the high side of the line is usually sufficient . . . In severe cases a Filterol in each leg of the power line may be necessary . . . For three or four-wire systems, a Filterol in each wire is neressary.

Filterol Type 4-A new, exclusive Sprague develepment incorporating a Sprague HYPASS® Capacitor . . . Provides exceptionally high attenuation at frequencies above 5 megacyeles . . . Intended for small devices with continuous current ratings up to 20 amperes.

| Cat. No. | Amps. Volts $A C$ or $D C$ | Size | List |  |
| :--- | :---: | :---: | :---: | ---: |
| Filterol 1 | 1 | 115 | $1 / 8 \times 11 / 4 \times 1 / 4$ | $\$ 13.50$ |
| Filterol 2 | 10 | 115 | $11 / 8 \times 2 \times 2$ | 14.80 |
| Filterol 3 | 35 | 115 | $17 / 8 \times 27 / 8 \times 31 / 8$ | 27.40 |
| Filterol 4 | 20 | 115 | $1^{11}$ dia. $\times 113 / 16^{\prime \prime}$ long | 3.05 |

IF types

IF-15-TRIPLE-SECTION FILTER for all small motor-operated devices such as food and drink mixers, vacuum cleaners, fans, drills, etc. Especially designed to prevent accidental shocks from discharge of filter capacitors.
IF-11-DUAL HIGH-CAPACITY FILTER with completely enclosed safety construction. Designed for use on motors over 1 horsepower and up to 220 volts AC or DC. Also used on high-current arcing or sparking devices.
(F-21-COMPACT DUAL FILTER for use across brushes of fractional horsepower motors with the can grounded to motor frame. May also be used across line terminals of motors.
IF-S1-SINGLE SECTION 2-LEAD FILTER with can completely insulated. For use across make-and-break contacts, such os thermostats, circuit breakers, door-bells, buzzers, relays, etc.
IF-37-3-SECIION DELTA-CONNECTED FILTER especially designed for fluorescent fixtures. Only one IF-37 required for each offending fixture. Also effective on make-and-break governor-type motors. Underwriters' Laboratories approved.

| Cat. No. | Volts AC or DC | Dia. $\times$ Length | List |
| :--- | :---: | :---: | :---: |

# SPRAGUE CAPACITORS 

## TO-4 TEL-OHMIKE CAPACITOR-RESITOR ANALYZER

PRICED SO YOU CAN AFFORD IT!
The handiest instrument you can buy! Modern service shops find it a must. Although moderately priced for radio and television repair shops, it offers you the quality and the accuracy required by the nation's outstanding laboratories.

The TO-4 comes complete with step-by-step instruction manual and capacitor guide.

- CAPACITANCE BRIDGE measures up to 2000 mf in five overlapping ranges. The special 1 mmf to 100 mmf range is exclusive with the Sprague Tel-Ohmike.
- INSULATION RESISTANCE directly read on large meter up to 20,000 megohms for paper, ceramic, and mica capacitors. No guessing with neon lamps.
- LEAKAGE CURRENT of electrolytics measured directly on meter, with exact rated voltage up to 600 v . applied from continuously adjustable power supply. Two ranges: $0-6-60 \mathrm{ma}$. No guessing on eye-width or counting lamp blinks when you use a TO-4!
- POWER FACTOR of electrolytic capacitors measured by Wien Bridge up to $55 \%$ in three ranges.
- RESISTANCE BRIDGE measures from 2.5 ohms to 25 megohms at line frequency.
- MAGIC-EYE TUBE simplifies bridge balancing for capacitance, power factor, and resistance measurements.
- PUSH-BUTTONS for instant range selection, also discharge capacitors for safety automatically upon release.
- MODERN CASE finished in two-tone gray; measures $87 / 8^{\prime \prime}$ high, $145 / 8^{\prime \prime}$ wide, $61 / 8^{\prime \prime}$ deep. Weight only $121 / 2$ pounds.

## KT-1 KWIK-TEST ${ }^{\circ}$ CAPACITOR CHECKER

An IDEAL supplement to the TO-4 Tel-Ohmike. With 75 to 100 capacitors in each set, here's a quick, easy way to check them ail in a iiffy, for the KT-1 tests capacitors while they're wired in a set. NO NEED TO REMOVE THEM FROM THE CIRCUIT! The KT-1 instantly tells you whether or not a capacitor is open, shorted, or intermittent. This is the hottest thing we've ever offered to the service trade!

- Simply press a button and magic eye tube tells you if a capacitor is open, shorted, or intermittent.
- Checks by-pass, blocking, and coupling capacitors from 30 mmf to 2000 mmf, even when capacitor under test is wired in parallel with a resistance as low as 60 ohms. Capacitors between. 1 mf and 2000 mf
may be tested even when in parallel with resistance as low as 2 ohms.
- Sturdy steel case with medium gray wrinkle finish. Light gray front panel with clear black markings.
- Overall size of the KT- 1 is $9^{\prime \prime}$ high $\times 6^{\prime \prime}$ wide $\times 51 / 4^{\prime \prime}$ deep -Net weight, 6 lbs .

Known the world over for their reliability under all operating conditions, El-Menco Capacitors are chosen by manufacturers who want successful performance and long life from theis products.

El-Menco fixed mica dielectric capacitors are compact, precision made. Manufactured in accordance with American military standards to meet Army and Navy MIL-C-5A Specifications. All impregnated and MIL or RMA color coded. Standard specifications limits are shown.

Moulded in low loss bakelite, tested at double the working voltage. Tests for dielectric strength, insulation resistance, temperature co-efficient and capacitance drift, humidity and life tests according to MIL and RMA STANDARDS. All units are wax dipped for salt water immersion seal.

All the above are silver mica only. (Characteristic "E"). Stanảard Tolerance: $\pm 5 \%$. Closest Tolerance: $\pm .5$ mmid.
For low voltage circuitry, higher capacities are available at 100 VDCW rating.

## EL - MEN CO CA P A CI T O R S

## TELEVISION • TRANSMITTING • INDUSTRIAL HIGH VOLTAGE MICA CAPACITORS DC WORKING VOLTAGES: FROM 1000 TO 2500 VOLTS

 Molded in CM-20, CM-35 and CM-40 Cases
#### Abstract

Demand for smaller units in higher voltages designed to meet the requirements for Television, Power Amplifiers, Low Power Transmitters, and various Industrial Uses has increased. El-MENCO designed and produced units listed below are especially adaptable to compact circuits where space is an important factor. Their acceptance has been overwhelming by the various manufacturers of Television Receivers.

In many cases, these units will do the work of capacitors molded in CM-45, CM-50, and CM-55 cases without breaking down. No Special Mountings Are Necessary; just wire right into the circuit.

The capacitors are molded in low-loss bakelite and tested at double the branded voltage. They are tested for dielectric strength, insulation resistance, temperature coefficient, capacitance drift, susceptibility to humidity, and length of life, according to RCM Standards. All units are wax-dipped for protection against salt water immersion.

MINERAL OIL IMPREGNATION NON-INDUCTIVE WINDING SYNTHETIC RESIN END SEALS STEATITE CASE

## PAPER TUBULAR CAPACITORS CP TYPE

El-Menco CP type paper tubular capacitors are sealed into Steatite Tubes which serve to insulate the capacitor electrically as well as against moisture and heat. The capacitor insert is impregnated with Mineral Oil, thereby assuring long life at $85^{\circ} \mathrm{C}$ operating conditions. This feature insures successful operation at the high ambient temperatures existing in small, compact enclosures.

The Non-Inbuctively wound paper and foil units are sealed in the Ceramic Tubes by means of baked Synthetic Resin End Fills which cannot melt at any conceivable operating temperature. The end fills will not dissolve in wax, permitting the capacitors to be potted without damage to in the insert. Leads are of tinned copper $21 / 4^{\prime \prime}$ long.

Many of the large Television, Transmitter and High Voltage Amplifier manufacturers have found these capacitors to be of highest quality. Breakdown tests have exceeded the required standards.

## Single and Dual PADDERS

El-Menco Padding Condensers have been acclaimed by engineers as the finest development in adjustable mica condensers.
The construction is such as to completely enclose and protect the delicate edges of the mica films, made of the finest quality clear India ruby mica.
The phosphor bronze adjusting plates assure permanent resilience and freedom from mechanical fatigue. All parts are heavily plated to resist corrosion.

## CERAMIC CAPACITORS

Use primarily for coupling and by-pass in RF and higher frequency circuits, ELMENCO ceramic capacitors are wax impregnated with low-loss phenolic coating. Insulation resistance far exceeds the 10,000 megohm minimum requirements. Voltage rating is $1500 \mathrm{VDCT}, 500 \mathrm{VDCW}$. $90 \%$ relative humidity test for 100 hours. Radial leads are $114^{\prime \prime}$ minimum No. 22 tinned copper wire.

## SILVER HIGH "K" DISC

Reduced self-inductance due to flat design makes these units particularly adaptable to VHF applications.
Capacity and tolerance stamped on capacitor.
Maximum dimensions:

$$

El-Fenco Hich Voltage Capacitors are manufactured in accordance with MIL and RMA specifications for molded mica capacitors and are additionally dpsigned to operate at higher voltages than normally expected of units of this size. They are ideally suited for use in high voltage, bow power circuits, barticularly where space require ments are an important factor. Axial wire leads provide simplicity of wiring throurh alimination of adfed mounting devices. All unita are molded in low-loss phenolic cases and are wax-dipped for protection against salt-water immersion.

## Type 46 Trimmer and Type 30 Padder Kits

A complete stock of trimmers and padders is provided in these compact, easily handled, and readily accessible kits. Always have a full line of El-Menco trimmers and padders available for immediate use.

TYPE 46 TRIMMER KIT
Provides a capacity range from $11 / 2$ to 780 mmfd .
Twenty-four units of each size available in type 46 trimmers (see P-41).
The cotal list price for all units included in the kit is $\$ 130.80$.
Yet you may have this complete kit for only
Special Kit List Price $\$ 100.00$

Provides apacity range from 15 to 3055 mmfd
( $30 \mathrm{M}: 15$ to 2525 mmfd .)
Twelve units of each size available in type 34 or type 30 M (see P-40).
The total list price for all units included in the kit is \$191.40.
Yet you may have this complete kit for only
Special Kit List Price $\$ 145.00$

## TYPE＂SA＂OIL FILLED

Full informatior，including data on Pyroteen filled capacitors， available in Catalog 1083A．
1．INDCO OIL＂A＂IMPREGNATED AND FILLED－ permitting efficient operation over widest range of temperatures．
2．HERAETICALLY SEALAD CASE－is unaffocted by time，humidity，or operating temperatures． 3．HIGHEST GRADE CONDENSER TISSUES－in sure long uninterrupted life．
4．HIGH－GLAZE PORCELALN INSULATORS—insure low moisture absorption and high terminal to case flash over．
5．CONSERVATIVELY RATEI－safe for continuous operation at 10 per cent orerload．
6．＂SPACE SAVER＂UNIVERSAL MOUNTING BRACKET－provides adjustable capacitor heights． 7．LEAI COATED STEEL CASE－is non－corrosive and lacquer finished．
8．TESTEI FOUR TIMES BEFORE SHIPMENT－ guarantees perfect product electrically，mechanically． If riveted teminal construction is wated in place of porcelain stand－off insulaturs ald＂R＂to catalog mumbror．For example，6SABn changes to bisiliso．Submersinn proof terminal construction to meet Army and Navy Specifications is optional；specify on order． Standard capacjts whance phas or minus 10 ber cent．Monnting TYPE SA TYPE SA－No mounting brackets，TYPE SAU－－＂Space saver＂ mikersal bathet．TYPE SAJ－－suldored vertical monnama bracket． Type SAL—Reversible mounting foot bracket．TYPE SAH—Re－

## TYPE＂BE＂ELECTROLYTICS

## Full information available in Catalog 1083A

＂BE＂series electrolytic capacitors are designed to meet the growing need for small electrolytic capaci－ tors in equipment where extreme reliability is required and where the capacitors are subject to the most adverse conditions of temperature and humidity．This series is designed similar to oil filled capacitors．The are hermetically sealed and will pass sult watur inmersion tests．Standard construc tion is with side terminals．Top and bottom ter－ minals supplied on rerpuest．

ET SERIES ELECTROLYTIC CAPACITORS
Full information available in Catalog 1083A

＂ET＂series capacitors have been designed for ease in installation and reliability．They are constructed to withstand the most severe operating conditions en－ countered in industrial and electronic equipment．Es－ pecially controlled manufacturing processes insure that the equipment in which these capacitors are used will function without interruption．Capacitors can be supplied for operation at temperatures ranging from minus 40 to plus 85 degrees Centigrade．Mounting is effected by inserting the capacitor through the slots in either the chassis or mounting plate，and twisting the mounting prongs 90 degrees．

# INDUSTRIAL 

## STABELEX ''D'' CAPACITORS

Technical Information Available in Catalog 1117A Stabelex Capacitors represent a new series of capacitors being made available to industry for the first time.

Advancements in science and industry have created the need for capacitors having characteristics far superior to either laboratory type or commercial capacitors now available.

Advanced designs in equipment which have not been possible because of the unavailability of suitable capacitors have now become practical.

The Stabelex family of capacitors has been developed after a long period of research and has been made for special applications for quite some time. However, it is only now that these capacitors became available to industry.

Other Stabelex capacitors will be announced from time to time, each having its own special characteristics for use in applications for which they are most suited.

\left.| Suggested | Applications |
| :--- | :--- |
| Computers |  |$\right]$| Input Capacitors | Filter Networks |
| :--- | :--- |
| Coupling Capacitors | Radio Frequency Circuits |
| RC Circuits | Etc. |

Many variations and special characteristics are possible with Stabelex capacitors that are not possible with any other type and it is, therefore, to the interest of the user to indicate, where possible, the application to which these capacitors will be put.

Type MM
An extremely popular type of conden ser due to its exceptional hirh quality and midget si\％e．Hermetically sealed in a small metal case and scientifically vented，to protect against adverse op． erating conditions of voltage，temper－ ature and humidity．Container is insulated by a high grade tube which is spun over the ends of the can to eliminate shorts when wires are bent close to container．Wasily monnted by their rigid wire leads．

Type SM
Type＂SM＂units are embedded in a high temperature wax and then sealed in a thoroughly impregnated card－ board tube，affording complete imnimn－ ity to moisture penetration．New higli voltage formation gives complete pro－ tection against surges and high peak voltares．The addition of the strap mounting bracket has proved favorable in its use due to its wide application in AC．IVC and portable sets in the replacement field．The strap can be moved to the best mounting position and then bolted or soldered．Supplied with color－coded，Underwriters Ap－ proved，rubber covered leads．

## RADIO INTERFERENCE ELIMINATORS

Full information available in Catalog 1083A
INDUSTRIAL CONDENSER CORP．has made a special study of the suppression of noises caused by fluorescent lighting．No． 7249 capac－ itor is designed with three leads，two leads to be connected across the 110 volt line and the single lead to be grounded．No． 4219 is housed in a metal container and is self grounding．It is supplied with strap mounting for easy in－ stallation．No． 4252 is a flat type unit designed to mount on the ballast support of circline bal－ lasts．The convenient mounting flap grounds the unit when the stem of the lamp is placed through the mounting hole．

| Catalog |  |
| :---: | :---: |
| Number | Dimensions in Inches |

## ＂BLUE BEAVER＂ELECTROLYTIC TUBULARS

CD＂Blue Beavers＂have become the service industry＇s most popular tubular electrolytic－being DESIGNED EXPRESSIY AND EXCLUSIVELY FOR SERVICE REPLACEMENT APPLICATIONS．Type BR is the compact unit in aluminum can with cardboard outer sleeve．Fits neatly into the cramped quarters of a chassis－ self－supported by means of rigid tinned copper leads．The larger sizes may be further supported by means of a metal strap．NEGATIVE TERMINAL IS GROUNDED TO CAN．
TEMPERATURE RANGE－to $+85^{\circ} \mathrm{C}$ except 500 V．D．C．，to $+65^{\circ} \mathrm{C}$ ．

MULTI－SECTION TUBULAR ELECTROLYTICS

A new series af campact，fubular metal－cased，cardbaard sleeved electra－
lytics－specially sealed against heat and humidity．

Featuring－
－Direct－fa－ferminal internal lead canstructian reduces passi－ bility af sharts．（Pure aluminum wires crimped securaly ta－ gether with auter leads within aluminum stud terminals．）
－New high－insulatian vinylite cavered leads－generaus 7 inches lang．
－Sectians sealed in aluminum tube for pratection against moisture getting in，or electralyte drying aut．
－Wax impregnated cardbaard auter insulatian sleeve．
－Rubber diaphragm－type vent insures ideal vent actian under all canditians．
－IDEAL FOR OPERATION AT TEMPERATURES UP TO $85^{\circ} \mathrm{C}$ ．

## HIGH-CAPACITY LOW-VOLTAGE ELECTROLYTICS

BRH compact tubular electrolytic capacitors are widely em. ployed in portable radio power restifying circuits, electric fence devices, telephone and D.C. timing circuits. Hermetically sealed in pure aluminum cans with an external cardboard insulating sleeve, these units are provided with metal mounting strap and bare wire leads for convenient wiring into any circuit assembly.

TEMPERATURE RANGE to $+85^{\circ} \mathrm{C}$.

UP, UPT \& UPE TWIST-PRONG BASE ELECTROLYTICS

Types UP and UPT capacitors are small, conveniently-mounted, round can-type electrolytic units furnished with bakelite and metal mounting washers. Terminals are tinned for soldering
They are dependable in operation over wide temperature variations with minimum capacity change.
Units are especially designed for use in television, radio, amplifier and other equipment where extremely high temperatures, voltage surges and ripple currents are encountered. They are particularly popular as replacement capacitors for all standard television receivers.§
Type UPE units are designed for use in selenium rectifier circuits. When using selenium rectifiers in televison, radio or other equipment, care must be taken to employ ONLY this type electrolytic capacitor and protective resistor-See page 10.
TEMP. RANGE: to incl. 475 V.D.C.W. $+85^{\circ} \mathrm{C}$.
over 475 V.D.C.W. $+65^{\circ} \mathrm{C}$.

SELENIUM RECTIFIER CAPACITORS
Type UPE are etched anode and cathode units especially engineered to prevent capacity drop due to high ripple and surge currents normally encountered in selenium rectifier circuits. A protective series-resistor of approximately 50 ohms for a 100 ma. load, and af leost 10 ohms far o 250 ma . load, should always be used to protect both the rectifier and filter capacitors. Use only type UPE in selenium rectifier circuits.

ROUND CAN-TYPE ELECTROLYTICS

Type EB electrolytic copocitors ore especiolly suited for replacement purposes in rodio receivers to reploce units of lorger physical sizes. They ore identical in mounting hole dimensions and generol construction to Type WR copocitors except thot they are provided with insulated color-coded wire leods $8^{\prime \prime}$ long. Bokelite threaded neck.

TYPE EB-450-VOLT O.C. WKG.
TEMPERATURE RANGE to $+65^{\circ} \mathrm{C}$.

## MOLDED TUBULAR CAPACITORS

 "The CUB"

The Cornell-Dubilier "CUB" is an outstandingly superior molded capacifor unequaled by any molded tubulor herefofore developed. The "CUB" possesses characteristics that will meet the wide and demonding opplications found in critical industrial, military and experimental electronic equipment.
This is the unit recommended for general replacement service.t Sold exclusively through C-D electronic parts Distributors.
The "CUB" is molded in extra hord, non-inflammable bake-lite-tough, durable and exceptionally resistant to moisture, high temperature and shock.
The unit is processed by special vacuum-temperature-cycling impregnation-the 200 and 400 valt series are impregnated with HT compound and the 600 volt and up series ore impregnated with oil (Dykanol " $C$ ").
In countless production test runs, the "CUB" has survived an average of 30 cycles of the punishing JAN and MIL Temperature and Immersion Cycling Test.
The "CUB" is dry assembly processed and sealed immediately affer impregnation. This technique results in life long high insulation resistance, low power factor, and exceptional capacitance stability. Each unit is tested at several times its rated voltage to insure high dielectric strength.
At least a $50 \%$ greater resistance to humidity and a $15 \%-25 \%$ greater voltage breakdown over comparable molded tubulars, is built into the C-D "CUB'.
Extra strang copper-weld leads eliminate breakage during assembly and throughout service life. The leads are solder sealed securely to the unit.
TEMP. RANGE: HT Compound $-40^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$

$$
\text { Dykanol "C" }-55^{\circ} \mathrm{C} \text { to }+100^{\circ} \mathrm{C}

MOLDED MYLAR＊TUBULARS

## MYLAR＊Polyester Film MOLDED TUBULAR CAPACITORS

Cornell－Dubilier＇s new PM SERIES of molded fubular capacitors are designed to meet the need for a rugged，high－femperature MOLDED unit．These are fabricated with the Du Pont Company＇s latest new dielectric material，＂MYLAR＂which maintains excel－ lent electrical characteristics at temperatures up to $+130^{\circ} \mathrm{C}$ ． Over the temperature range of from $-55^{\circ} \mathrm{C}$ to $+100^{\circ} \mathrm{C}$ full rated voltage can be applied，and to $+130^{\circ} \mathrm{C}$ voltage is de rated only to $75 \%$ ．Insulation resistance values are exceptionally high at any operating temperature and capacitance variation with thermal change is relatively small．The dielectric absorp－ tion and the power factor of the new capacitors is unusually low．
Non－inductive construction is employed with lead wires securely soldered to the extended foils，insuring low resistance connec－ tions and low radio frequency impedance．The durable thermo－ setting plastic case $\dagger$ construction holds copperweld lead wires and sections firmly in place to withstand extremes of handling， soldering temperafures，vibration and shock．

Standard sizes in 400，600， 1000 and 1600 VDC ranges are listed in the accompanying table．
－DU PONT trade mark．
†For metal－cased MYLAR tubulars－See Type TWM－Page 17.
TEMPERATURE RANGE：$-55^{\circ} \mathrm{C}$ to $+130^{\circ} \mathrm{C}$ ．

## ＂MINIROC＂

MYLAR＊Polyester Film

## MINIATURE STEATITE－CASED CAPACITORS

（Identical in appearance to BUDROC－lllus．Page 15\}
Cornell－Dubilier＂MINIROC＇type STM series capacifors are high quality fubular units in non－metallic（steatite）cases．They have exceptionally HIGH INSULATION RESISTANCE and are fully pro－ tected against moisture．Operating temperafure ranges from $-55^{\circ} \mathrm{C}$ ．to $130^{\circ} \mathrm{C}$ ．with no voltage derating required．These unusually fine characteristics are due to the use of MYLAR＊ Polyester Film dielectric，finest quality steatite cases，Polykane end－fill and C－D＇s painstaking processing．The C－D Polykane end－fill tightly bands to the lead wires and steatite tubes pre－ venting the entry of any moisture while at the same time locking the capacitor section and lead wires in place．Polykane will not soften，melt or flow at any operating temperature．
－DU PONT trade mark．
Temperature Range：$-55^{\circ} \mathrm{C}$ to $+130^{\circ} \mathrm{C}$ ．

# MINIATURE METAL-CASED TUBŪ̄̄̄̄RS "'DEMICONS"' 

The Cornell-Dubilier series af "DEMICON" capacitars affer miniaturized tubular metal-cased units designed and pracessed ta meet rigid and severe aperating requirements particularly where space limitatians are an impartant factar.
Unique and impraved manufacturing pracesses have cantributed ta a product af unusual stability, dependability, and langevity, as aftested ta by field-test praven service aver a long periad af time.
Carnell-Dubilier DEMICONS are hermetically sealed in metal cases, with glass-ta-metal seal terminals and are available in a wide variety af maunting styles, impregnants, falerances, and internal canstructian. See Bulletins NB-147 and NB-151.

## COMPACT METALIZED－PAPER CAPACITORS

Cornell－Dubilier self－healing，metalized paper capacitors have better electrical characteristics and extra long service life． Units are light and compact．
＂PUP＂units have bare wire leads securely anchored in metal end－caps，wax－impregnated and dip－sealed against humidity． All units are extended foil－non－inductive wound for low im－ pedance af high frequencies，have high insulation resistance， low power factor and small capacity change with temperature and life．
＂METAPUPS＂are one piece metal tubular cased，pressure sealed by spin－over on synthetic rubber gaskels．
＂SEALPUPS＂are a high quality metalized paper capacitor， designed for smallest size and positive seal against moisture． They are hermetically sealed in metal cases with solder－ seal glass ferminals．Especially recommended in military and commercial equipment where miniafure size and light weight are paramount．

For further data on C－D metalized capacitors，write for Bulle－ tins 142－3－4 and NB－152．

TEMPERATURE RANGE：$-40^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}$ ．

## HIGH TEMPERATURE Metalized-Paper CAPACITORS

- POLYKANE-IMPREGNATED: This impregnant insures excellent electrical properties over long service life.
- MOISTURE RESISTANT: MTX fubulars have the finest glass-to-metal solder seal terminals for maximum protection against moisture. MPX fubulars have POLYKANE-impregnated paper fubes, bonded securely to the POLYKANE fill. An external flash wax dip provides an increased moisture seal for extra long storage and service conditions under extremes of humidity.
- NON-LEAKING: "POLYKANE" is a solid thermosetting piastic that will not soften, crack, or leak at the maximum temperature No oil or wax is used internally with these units.

 ENCAPSULATED Molded-Case MIDGET MICA CAPACITORS

Cornell-Dubilier "SUPER MICADONS'" represent on entirely new concep. tion in Midget Mica Copacitor construction. The vastly improved design and construction of the new "SUPER MICADONS" (Types IA and 5A) now makes it possible to produce miniature units of greatly increased capacifance and superior quality over conventional units of the same case size. SEE ENG. BULL. 155 FOR DETAILED DATA AND COMPLETE LISTINGS.

TYPE 1 A
5TD. TOL.: $\pm 5 \%+$ TEMP. RANGE: $-55^{\circ} \mathrm{C}$ to $+130^{\circ} \mathrm{C}$.

## Co:

MOLDED MIDGET "SILVER-MIKE" CAPACITORS

* 20 TINNED BRASS WIRE

## HIGH-STABILITY "SILVER-MIKE'* UNITS

Type 22R miniature "Silver-Mike" capacitors are especially adapted for use in circuits where accuracy and stability of copacity is of prime importance. They ore rated at 500 volts D.C.W. and tested at 1,000 volts D.C., molded in low-loss red plastic and fully protected against physical damage or changes in characteristics due to varying afmospheric conditions.
STANDARD TOLERANCE $\pm 5 \%$, but in no instance less than $\pm 1 \mathrm{mmf}$. For capacity Tolerance of: $20 \%$ deduct $10 \%$ from List; $10 \%$ deduct $5 \%$ from List; $3 \%$ add $10 \%$ to List; $2 \%$ add $15 \%$ to List; $1 \%$ add $25 \%$ to List.

Notes On Ordering 5R, 1R, IDR Units
Standard capacity tolerance is $5 \%$. Also ovailable, on special order, Standara capacisy or pius or minus $3 \%$, udd $10 \%$ to list prices, $2 \%$ odd $15 \%$ to list prices and $1 \%$ add $25 \%$ to list prices, for within 1 mmfd.$15 \%$ to list prices and $1 \%$ add $25 \%$ to list prices, (or within mmid.whichever is greater). All types can olso
$10 \%$ and $20 \%$ tolerances of tower prices.
-Reg. U.S. Pot. Off.

TYPE IR-X•: ${ }^{\circ}$ THICK TYPE IDR-X- is THICK TYPE IR \& IDR

TYPE 5R

Types 1R, 1DR, and 5R "Silver-Mike" silvered mica capacitors are designed for use in high $Q$ electronic circuits where frequency stability and minimum loss must be maintained. They are ideally suited for use in circuits where the LC product must be mointained constant, and particularly adapled for use in tuning IF transformers, push-button tuning circuits and other similar applications. Standard units are molded in low-loss red plastic.

## "TINYMIKE' GENERAL PURPOSE Miniature DISC Ceramic Capacitors

FEATURES OF "TINYMIKE" DISC-TYPE CERAMIC CAPACITORS

- Small, space-soving and - Adapted for wide variety lightweight. af applicatians.
- Available in all papular capacifies.

Minimized eddy current lasses due ta canstructian.

- Guaranteed minimum ca. - Law inductance, stable, depacity talerance.

> Available with temperature compensating characteristics.

SINGLES:
TEMPERATURE RANGE: to $+85^{\circ} \mathrm{C}$. TOLERANCE: GMC
(Guaranteed Minimum Capacity)
PACKAGED: 5 per envelape.
500 V. D.C. W.

DUALS:
TEMPERATURE RANGE: to $+85^{\circ} \mathrm{C}$. TOLERANCE: GMC
PACKAGED: 1 per envelape.

## UNIVERSAL "MITYMIKE" HIGH VOLTAGE CERAMIC CAPACITORS

## FEATURES OF "MITYMIKE' HIGH VOLTAGE CERAMIC CAPACITORS

- New, superior design and construction.
- Generous factor of safety permits use at FULL rated voltage.
- High insulation resistance, low power factor.
- Choice of terminal styles to meet all TV assembly requirements.

The C-D Universal Type MMU "MITYMIKE" is an entirely new and superior quality unit developed from extensive field experience over a long period. Weaknesses heretofore found in this type capacitor have been eliminated by C-D processing techniques.
Thus, the special quality encasing material forms a complete homogeneous bond between all elements and the ceramic dielectric. The permanent bond between the casing material and the ceramic element prevents formation of corona, hence preventing deterioration of the capacitor.
High purity silver electrodes are heat-bonded to the dielectric
— and the silver-plated terminal studs in furn, firmly soldered direct to the electrodes.
A high degree of operating stability in service and extended life can be expected of the C-D MMU.
