Six selected terminal styles are furnished with each body, permitting many combinations of terminals to cover a wide range of installation designs.

Because of the superior materials and quality construction of the MMU, a generous factor of safety is built into the "MITYMIKE', allowing operation af FULL RATED VOLTAGE.

STANDARD TOLERANCE: $+50 \%,-20 \%$

## PRINTED ELECTRONIC CIRCUITS (P.E.C.) ${ }^{\text {® }}$

The term, "printed circuit," has come to be a catch-phrase to deseribe anytling from a piece of tinfoil cemented on a plastic plate to a carbon-Dacked piece of adhesive tape. As the pioneer and leader in the field, we designate the true Printed ELECTRONIC Circuit as a compleie circuit element . . . wiring, capacitors, and resistors. Centralabrinted ELECTRONIC Circuits offer a combination of resistors and

PRINTEDELECTRONIC CIRCUIT KITS

## HANDY PLASTI-PAK

NO. PCK-18
18 P.E.C. units . . . 9 of the most popular types. selected in ratio to usage. Packed in a hinged-lid Plasti-Pak, 81/4' $\times 41 / 4^{1{ }^{\circ}} \times 11 / 4^{1^{1}}$. You can use these 18 guaranteed P.E.C. units to replace 42 old-style resistors and 52 old-style capacitors. There is no extra charge for the container or the P.E.C. Guide enclosed. Kit No. PCK-18.......... List Price $\$ 15.00$ Net \$ 9.00

## HANDY PLASTI-PAK NO. PCK-45

45 P.E.C. unizs . . . 21 P.E.C. types
in ratio of popularity and use. Packed in a hinged-lid Plasti-Pak, $81 / 4^{\prime \prime} \times 41 / 4^{\prime \prime} \times 11 / 4^{\prime \prime}$. These 45 widely-used circuit elements are equivalent to 106 ceramic-based resistors and 133 ceramic capacitors. No extra tharge for the container or the P.E.C. Guide enclosed.
KIT No. PCK-45 $\qquad$ List Price $\$ 40.00$ - Net $\$ 24.00$

HANDY SHOP-PAK NO. PCK-110
110 P.E.C. units . . . 5 each of 22 widely-used types. $\ldots$ the equivalent of 255 ceramic-based ceramic capacitors. All P.E.C.'s are sealed in envelopes-clearly marked. Packed in blue, $8^{\prime \prime} \times 6^{\prime \prime} \times 6^{3} /{ }^{\prime \prime}{ }^{\prime \prime}$, fourdrawer metal cabinet. New P.E.C. Gude helps you save ime replacing old-style resishors and capacitors where the schematic calls for a similar eapacity.
Rit No. PCK-IIO
Net $\$ 55.80$

## MASTER KIT NO. PCK-220

## 220 P.E.C. units 23 P.E.C. typet

- . a master stock assortment of all active P.E.C. units in ratio to popularity and usage. Designed for the larger, progressive service engineer. Equivalent to a stock of 525 resistors and 620 capacitors. P.E.C.'s are guaranteed to be free of defects in materials and workmanship for one year. Packed in blue, four-drawer metal cabinet, $91 / 2^{\prime \prime} \times 11 / z^{\prime \prime} \times 93 / 4^{\prime \prime}$. Cabinet and five P.E.C. Guides included free. KIT No. PCK-220

List Price $\$ 193.00$ - Net $\$ 115.80$

## PRINTED ELECTRONIC CIRCUITS (P.E.C.) (Cont'd)

## TV ATtENUATOR SWITCH CAT. No. PCH-4 PRINTED ELECTRONIC CIRCUIT H PADS

The Centralab PCH-4 Television Attenuato: switch is designed as a service tool to defermbe the amount of attenuation required to secure oest IV reception. It is also valuable for permanent installation in receivers. The switch Incorporates Centralab's exclusive Printed Circuit TV H.Pads.

## ADVANTAGES OF SWITCH

The switching arrangement makes it possible to attenuate each station as much or as little as necessary depending on daily conditions such as weather or existing inferference, and allows for proper aftenuation to balance two or more stations. Switching also eliminates the "hit-or-miss"' method of installing H-Pads. Switch is installed in series with 300 ohm-twinlead. PCH-4.

## ASK YOUR CENTRALAB DISTRIBUTOR FOR PRINTED ELECTRONIC CIRCUIT GUIDE NO. 3

A practical working manual that saves you time and money. Shows circuit schematics that guide you Givesing P.E.C.'s to replace standard components. Gives other useful information.

Attenuation Rating 30 db 40 db

## STEATITE

Centralab has been producing fine ceramics since 1928 . . . primarily for its own use in fixed resistors ceramic capacitors, switches, and more recently, printed electronic circuits. Offen called upon by other manufacfurers to produce many "standard" and custom designs, some very intricate. Centralab is the only ceramic manufacturer capable of producing many of these in quantity. All items listed are Grade L-5 Steatite, approved without limitation for Army and Nayy use. Characteristics: Uniform, white appearance, high dielectric strength, exceedingly low loss at high frequencies, and strong mechan strength, exceedingly low loss at high frequencies, and strong mechan-
ically. Impervious to moisture and common acids, will not warp, withstands high temperatures; harder than hardest quartz.

Ask your Centralab distributor for bullatin 42-181 which completely lists JAN Ceramic Standoffs by type, part number, dimensions, minimum usable threads, and prices.

## CERAMIC CAPACITORS

## MOLDED DISC CERAMIC HI-KAPS® For Bypass, Coupling and General Applications

Molded disc ceramics feature

highest available breakdown to ground, highest lead strength, and resistance to mechanical damage, closest tolerance. "MD's" can be placed directly against a chassis, or adjacent to high voltage leads without danger of flashover or breakdown. Low inductance makes these units highly efficient in high frequency circuits. They are not recommended for use in resonant or funing applications. Voltage Rating: 1,000 V.D.C.W. to 5,000 $\mathrm{mmf}, 600$ V.D.C.W. over $5,000 \mathrm{mmf}$. Maintain high capacity and stand up under $+85^{\circ} \mathrm{C}$. operation. Insulation - Molded Centrathenet. 2,500 V.D.C. breakdown to ground. Electrical properties constant to 3,000 megacycles. Insulation resistance of molding 300,000 megohms. Moisfure absorption . $005 \%$. Power factor of molding $.02 \%$. Fungus resistant. Unaffected by ozone, salt water, any known acid, or solvent at room temperature. Will not become brittle at $-55^{\circ}$ C. Leads - No. 22 tinned copper $11 / 2^{\prime \prime}$ long. All units one size - $11 / 16^{\prime \prime}$ diameter, $3 / 16^{\prime \prime}$ thick, maximum. Packaged - 5 units per polyethelene bag. 5 bags ( 25 units) per carton.

## CERAMIC CAPACITORS (Cont'd)

TC TEMPERATURE COMPENSATING TUBULARS

Designed especially to limit frequency drift in r.f. circuits where temperafure variations are prevalent. These capacitors are constructed with a ceramic bady which changes capacities as the temperature varies. Use Centralab TC Hi-Kaps when servicing superhet receivers-replace alder types in ascillatar and detectar circuits in TV, AM and FM receivers. 1,200 valts D.C. test; 600 volts D.C. warking.

TCZ TUBULAR HI-KAPB
All TC Hi-Kaps conform to JAN-C-20A specificatians. NPO Units (JAN-CH-CJ.CK) which shaw zera capacitance change over temperature range - $20^{\circ}$ C. to $+85^{\circ} \mathrm{C}$.

## INTERMEDIATE TC TUBULARS <br> TYPES TCA AND TCL

The addition of Neqative 330 and Negative 1500 TC Tubular Capacitors to the Centralab line increases the already complete selection and makes the CRL TC list the most useful and flexible of any stock manufacturer. Values most carefully selected from the most popular types in manufacturing usage. All units meet JAN specifications for military in manufacturing usage. All units meet JAN specifications for military use. Color coded in compliance with RETMA and JAN specs. Infermediate values allow additional IC values without combining two or
more standard capacitors. Packaged one per envelope with complate more standard capacitors. Packaged one
data, five envelopes per display carton.

CERAMIC FEED-THRU HI-KAPS® TYPES FT AND MFT

CTG
$0-0=$

Type FT Feed-Thru ar bushing maunted capacitor has been specifically designed and widely used in high frequency circuits where, in addition to feed thru, a capacity graund ta either chassis or shield is desired. Lead inductance is virtually eliminated. Type MFT MINIATURE Eyelet Feed-Thru is a candensed version af the abave units required in mony rew ultro-high frequency applications where space is of a premium. VOLTAGES-Bath styles500 V.D.C.W., 1,000 V.D.C. Test.

## TYPE DF FLAT-PLATE HI-KAP* CAPACITORS

600 Y.D.C.W., 1200 V.D.C. Test-Low mass weight, unusual thinness plus inherent Centralab ceramic capacitor stability and permanence make these units extremely popular for general make these units extreme
replacement application.

# SANGAMO CAPACITORS 

SANGAMO TYpe MT＇Chieftain＇＂electrolytics are especially designed for television and other electronic applications where operation at $85^{\circ} \mathrm{C}$ ．temperatures is required．They are hermetically sealed in round aluminum containers which are encased in heavy insulating sleeves on which polarity is clearly indicated．Being small in physical size they are most popular where mounting in smoll in physical size they are most populor where mounting in mounted in almost any position Double－thick paper spacers as－ mounfed in almost any position．Double－thick paper spacers as－ sure adequate breakdown characteristies and all sections are tightiy held in ploce within the container．Nuliple staking con－ nects the terminal tabs to the electrodes and provides permanent low resistance contact throughout the life of the capacitor．Low voltage units utilize etched cathodes to maintain uniform capacity when they are subjected to combined conditions of heat and high ripple currents．

TYPE FM

The SANGAMO Type FM＂Arrowhead＇electrolytic capacitors ore similor in design to the Type MT＂Chieftain＇＂in every respect except leads．The Type FM is equipped with flexible，insulated wire leads and stud terminals eliminating the problem of crossed wires and the necessity for the use of insulating sleeves．They are much smaller than the wax－end filled types with insulated leads． The eapacitors themselves are housed in round aluminum con－ tainers which ore encased in heavy insulating sleeves．They are especially designed for the rugged television requirements where $85^{\circ} \mathrm{C}$ ．operating temperatures are encountered．

## TYPE MMT

MINIATURE TUBES
SANGAMO Type MMT miniature tubular electrolytic capacitors are designed for use in miniaturized equipment and are ideally suited to meet the precise operoting require－ ments of low voltage eircuits．They are small in physical size and are self supporting by means of strong bare tinned copper wire leads． The Type MMT capacitors are contained in drawn aluminum tubes encased in a fitted cardboard insulating sleeve．Polarity of all units is clearly marked on the cardboard sleeve．

NOTE：Diagram dimensions are for metal tubes．Add Inch to diameter and st inch to length for dimensions over cardboard insulating tube．

# SANGAMO CAPACITORS 

ELECTROLYTIC CAPACITORS

TYPE PL FOR TELEVISION AND OTHER ELECTRONIC APPLICATIONS

The SANGAMO Type PL＂Warrior＂electrolytic copacitors are specially designed for all television and electronic applications requiring long life and dependable performance at $85^{\circ} \mathrm{C}$ under conditions of extreme ripple currents and high surge voltages． They are sealed in round aluminum cans and have twist－prong tabs for washer or direct chassis mounting．The capacitor ele－ ment current carrying tabs are securely clamped and staked to the terminal lugs，providing permanent，low resistance con－ nections．In all cases the aluminum can is negative and the mounting ring provides the negative electrical connection．

The Type PL has been specially engineered for she rigid TV replacement applications found in all of the leading television receivers manufactured in the industry．

## ELECTROLYTIC CAPACITORS

## TYPE BTE

The SANGAMO Type BIE electrolytic capacitor is ideally suited for filter and bypass circuits in marine， aireraft，geophysical and many other applications． The Type BTE cartridges are first sealed in aluminum tubes and then encosed in sturdy－corrosion－resistant， hot tivined steel cases providing a complete hermetic seal under extremes of weather conditions．All units are equipped with glassi－fo－metal sealed terminals． Mourrling flanges with $3 / 16^{\prime \prime}$ holes are provided at eac：h end．

The SANGAMO Type CS "Tomahawk" electrolytic capacitors are contained in wax-filled cardboard tubes with insulated leads approximately 8 inches in length extending from both ends of the unit. Capacity, voltage and polarity of each section is clearly indicated by color of the lead wires; coding information necessary to identify the individual sections is clearly stamped on the tube. Each unit is supplied with a mounting strap to facilitate mounting to the chassis.

## TYPE SL

wet electrolytics，the Designed primarily as replacements for Type SL electrolytic capacitors are assem－ bled in round aluminum cans with threaded necks providing easy mounting to a chassis with the aid of a palnut which is supplied．The Type SL is completely insulated from the container，the negative connection being made to one of the insulated leads extending through the threaded neck of the can．

## TYPE TS

ideally suited for all applications where quick capacitor changes are required，the SAN－ GAMO Type TS units are equipped with a four－pin octal base mounting for use with standard octal base tube sockets．The special design of the bakelite octal base insures that the aluminum con－ tainer will not contact the mounting surface and the connections to the brass pin terminals are imbedded in this bakelite base．The base pins are nickel－plated to prevent corrosion and insure good contact with the socket terminals．

## PAPER CAPACITORS

PLASTIC MOLDED TUBULAR

The SANGAMO＂Telechief＂is molded in Sangamo HUMIDI－ TITE to provide more stable capacity values，unsurpassed mois－ fure resistance，excellent seal characteristics，and operation up to $85^{\circ} \mathrm{C}$ ．temperature．Small in physical size，and rugged in construction，this tubular is especially adaptable to television， auto radio，small AC－DC sel，and other uses．The leads are firmly imbedded in the hard plastic case and have been especially designed to resist breakage．The＂Telechief＂assures operating dependability under extremes of heat，humidity and physical stress．

# SANGAMO CAPACITORS 

## PAPER CAPACITORS

The Type 50 paper capacitors are pri－ marily intended for bypass application． They are non－inductively wound，are sup－ plied in fractional capacity values，and will provided efficient and continuous oper－ ation in R．F．and A．F．bypass，audio fre－ quency coupling，and other A．C．circuits． These units are impregnated and filled with mineral oil and may be operated under severe humidity conditions at tempera－ tures up to $+85^{\circ} \mathrm{C}$ ．

## TYPE 40－41

The SANGAMO Types 40 and 41 diaclor impregnated and filled paper capacitors are ideal for use in high voltage filter applications． Enclosed in aluminum containers，they facil－ itate convenient mounting to the chassis，an insulating washer and spade lug being provided for this purpose．In the Type 40 one connection is provided by an insulated terminal and the other is provided by the case．In the Type 41 both terminals are completely insulated from the case．
NOTE：These units built to comply with the efectrical requirements of specification JAN－C－25 Style Cl－40－41．

The Types 62 and 64 SANGAMO non－inductively wound paper capac－ itors are impregnated and filled with mineral oil and are hermetically sealed in seamless drawn－steel cases． The mineral oil impregnant assures dependable service betwen the wide temperature limits of $-55^{\circ} \mathrm{C}$ ．and $+85^{\circ} \mathrm{C}$ ．Standard capacitors are supplied with top terminals and brackets for upright mounting．When bottom terminals and inverted mounting are required，add the let－ ter＂$B$＂to the end of the catalog number．

# PAPER CAPACITORS 

## TYPE 71 Seminole

SANGAMO Type 71 diaclor impregnated and filled paper capacitors have the advantage of light weight，and are smaller than the case size specified by JAN－C－25．Diaclor＊is a spe－ cially compounded，chemically purified chlorinated dielectric oil．This synthetic impregnant，whose characteristics can be controlled with great uniformity，possesses a high dielectric constant，high volume resistivity，low power factor，high dielec－ tric strength，and is non－infiammable and non－explosive．Type A mounting brackets are supplied with each capacitor as standard equipment．If Type B or C brackets ore required，they must be specified when ordering．Either composition rivet or stand－off porcelain terminals can be supplied，and the type desired should be specified．

## TYPE 21 Chippewa

Hermetically sealed in metal Pubes，the SANGAMO Type 21 paper copacitor is primarily de－ signed for bypass and coupling applications．They are non－in－ ductively wound；and，impreg－ nated and filled with mineral oil assuring greatest stability of capacity and low power factor over the wide range of temperatures from $-55^{\circ} \mathrm{C}$ ．to $+85^{\circ} \mathrm{C}$ ． These units are built to comply with the electrical requirements of Specification JAN－C－25 Style CP 25－26－27－28－29．

## SANGAMO CAPACITORS

## NEW MOLDING COMPOUND FOR

## SANGAMO WIRE LEAD MICAS

All SANGAMO wire-lead micas are molded in HUMIDITITE, a new molding compound developed by Sangamo, that gives them moisture resistance characteristics far superior to any others on the market. The standard moisture resistance test described in MIL-C-5A (proposed) Specification requires mica capacitors to offer at least 100 megohms of insulation resistance after ten 24-hour cycles in a humidity chamber at $\mathbf{9 0 \%}$ to $95 \%$ relative humidity. The best competitive micas barely meet this requirement . . . but Sangamo HUMIDITITE Micas, under the same conditions, all tested in excess of 50,000 megohms! For additional information about HUMIDITITE, write for Engineering Bulletin No. TS-111.

## SANGAMO CAPACITORS

## High Voltage "Television" Mica Capacitors

These molded mica capacitors are specially designed for the high temperatures and voltages encounterd in tetevision applications. They may also be used in power amplifiers, low power transmitters and other industrial uses. They are fabricated with India ruby mica and are carefully tested to insure maximum performance under these difficult operating conditions.

*Thickness 29/64". For meter mounting bracket add letter " 5 "' to Type designation ; if assembled add 30 cents to list price; if unassembled add 20 cents and specify case size.

Standard tolerance $\pm 10 \%$. B Characteristic, unless otherwise specified.
Inquiry should be directed to the factory as to the availahility of capacities and voltages other than those listed above. Prices subject to change without notice.

## TYPE FI

MICACAPACITORS

TYPE Fi

Types F1 and F2 capacitors, the smallest of the Sangamo line of transmitting types, possess a range of voltage and current ratings suitable for many applications. They are housed in low loss molded bakelite cases. The mica and foil sections are permanently clamped, vocuum impregnated, and installed in the nafed, and instalied in the provide stable characteristics and adequate moisture proofing.

Type $G$ ceramic cased capacitors are intended for service where highest voltage and R.F. current ratings are required, such as in commercial transmitting or induction heating applications. All possible steps are taken in design and manufacturing operations to insure permanence of quality. Current ratings of these four sizes as well as detailed information on the Type G5 will be supplied upon request. Terminal plates are designed to permit any usual connecting or mounting practices.

## ERIE RESISTOR CORPORATION-ERIE, PA.

## ERIE GENERAL PURPOSE CERAMICONS ${ }^{\circledR}$

## TYPES GP1 - GP2 - GP3

ERIE CERAMICONS are small fixed capacitors consisting essentially of a ceramic dielectric with silver electrodes which are fired on at a very high temperature. Erie Ceramicons are outstanding because of their excellent high frequency characteristics, small size, rugged construction and availability in a wide range of capacity values.
GP1 CERAMICONS - The performance specifications of Type GPI Ceramicons are identical with those of temperature compensating types of Ceramicons. A GP designation does allow the capacitor manufacturer added flexibility in selecting ceramic body. These capacitors meet performance specifications of RETMA Standard No. REC-107-A, Class 1, Characteristic U2.

GP2 CERAMICONS - The capacitance of GP2 Ceramicons will not vary more than $+10 \%$ or $-35 \%$ from $+25^{\circ} \mathrm{C}$. value, as the temperature is varied from $-40^{\circ} \mathrm{C}$. to $+85^{\circ} \mathrm{C}$. These capacitors meet the performance specifications of RETMA Standard No. REC-107-A, Class 2, Characteristic Y5Y.

GP3 CERAMICONS - The capacitance of GP3 Ceramicons will not vary more than $+25 \%$ or $-50 \%$ from the $25^{\circ} \mathrm{C}$. value, as the temperature is varied from $+10^{\circ} \mathrm{C}$. to $+75^{\circ} \mathrm{C}$. These capacitors meet the performance specifications of RETMA Standard No. REC-107-A, Class 2, Characteristic $25 Z$.

## "GP" ${ }^{\text {® }}$ GENERAL PURPOSE CERAMICONS

are ideally suited for such applications as coupling and by-passing, in circuits where temperature coefficient is not important - in other words for all receiver applications except in frequency determining circuits. Working voltage - 600 volts D. C. Use Erie "GP" Ceramicons as replacements for molded mica and paper tubular capacitors.

Note: "Ceramicon" and "GP Ceramicon" are regitered trade mamea and reler to ceramic dielectric capacitory meaufactured only by Erie Resitior Corporation.

# TEMPERATURE COMPENSATING CERAMICONS ${ }^{\circledR}$ 

Erie Ceramicons are capacity-sensitive to temperature in varying pre-determined degrees, and because of this characteristic have found wide-spread application as temperature-compensating elements in circuits which must
be frequency-stabilized over wide temperature ranges. They are also manufactured with practically no thermal sensitivity for use in applications requiring a capacitor whose value is not affected by temperature.

## NPO TEMPERATURE COEFFICIENT CERAMICONS ${ }^{\circledR}$

NPO Temperature Coefficient Ceramicons are highly recommended for frequency determining applications where no capacity change with change in temperature is desired. " $Q$ " for NPO Ceramicons above 30 mmf is 1000
or higher. Below 30 mmf " Q " decreases slightly as capacity decreases. Working voltage - 600 volts D. C. Recomzended as replacements for silver-raica capacitore.

## NEGATIVE TEMPERATURE COEFFIĊIENT CERAMICONS ${ }^{\circledR}$

N330 and N750 units provide temperature compensation to eliminate drift. Positive and Negative Temperature Coefficient Ceramicons P100 throuqh N1400 are available
on special order through your distributor. See table, Page 3 for other values and styles.

## PARALLELING TC AND CAPACITIES

A wide range of capacitance values and temperature coefficients can be obtained by using Erie NPO capacitors in parallel with either N330 or N750 units. The following
formulae are used in determining the capacitance of the various temperature compensating units that are required to obtain any desired temperature coefficient and capacitance:

## 1. (Capacitance in MMF) (Temp. Coef. Required) *750

Capacitance in MMF of the N750 unit to be used (use nearest standard capacitance value)
2. (Total Capacitance Required) minus the value found in step $1=$ capacitance in MMF of the NPO unit to be used.
3. The total desired capacitance and temperature coefficient are obtained by connecting the units found in steps 1 and 2 in parallel.
-If an N330 unit is to be used in parallel with an NPO unit, substitute 330 for 750 in this equation.

## ERIE RESISTOR CORPORATION-ERIE, PA.

## ERIE DISC CERAMICONS ${ }^{\circledR}$

Erie Disc Ceramicons consist of a flat ceramic dielectric with silver fired onto the dielectric. Lead wires are firmly soldered to the silver electrodes, and the unit is given a
protective coating of phenolic. Low series inductance assures efficient high frequency operation.

## TEMPERATURE COMPENSATING DISC CERAMICONS ${ }^{\circledR}$

Erie Temperature Compensating Disc Ceramicons in four sizes, 831, 801, 811, 821, offer all standard combinations of temperature coefficient and capacitance value. They are intended for circuit use requiring pronounced stability ol capacitance, or exact temperature compensation, high " $Q$ " and high insulation resistance. Each size is manu-
factured in standard coefficients P120 through N2100, providing capacitance values from 1.5 MMF to 725 MMF . These disc units are tested for conformance to Erie specifications that have applied to Tubular Ceramicons for many years. Further, they meet all requirements for RETMA REC-107A Class 1 ceramic capacitors.

CAPACITANCE RANGES IN MMF
(AVAILABLE ON SPECIAL ORDER)

| Temperature Coefficient | Style 831 | Style 801 | Style 811 | Style 821 |
| :---: | :---: | :---: | :---: | :---: |

| N1400 | 20.66 | 67.115 | 116.300 | Not Available |
| N2100 | 33.87 | 88-146 | 147-395 | Not Available |

Note: Disc Ceramicons are also supplied to broader, General Purpose, temperature coefficientlimits:
GP(SL) - any nominal coefficient P100 through N750.
GP1 - any nominal coelficient P100 through N1400.

## ERIE RESISTOR CORPORATION-ERIE, PA.

## ERIE HIGH VOLTAGE DISC CERAMICONS ${ }^{\circledR}$

Designed to employ the same basic diameters that have been standardized in 600 volt capacitors. Careful and detailed life testing has been accomplished over a long period of time to establish required dielectric thicknesses
to assure conservative ratings in the high voltage line. They differ in appearance from lower voltage units in having greater thickness, the degree of difference depending on voltage rating.

## ERIE ELECTRONIC PRINTED CIRCUITS

Erie Resistor began the development of Printed Circuits in 1940. Since then the advantages of Printed Circuits have been amply demonstrated then the advantages of Printed Citcuita have been ampl
and Erie has made important contributions in the tield. work of several capacitora and resitators may be combined in one installation unit. Erie Printed Circuits have simplitied design and pro duction problems for manufacturers of radio and television receivers, hearing aids, and other electronic products.

## ERIE RESISTOR CORPORATION-ERIE, PA.

# ERIE BUTTON ${ }^{\circledR}$ <br> SILVER-MICA CAPACITORS 

style CB

These are midget silver-mica capacitors, for use where compact size, mınimum series inductance, and high leakage resistance are essential. They offer high stability of capacitance over the full temperature range $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$. Erie button silvermica capacitors are unmatched for V.H.F. and U.H.F work. " $Q$ " at 1 MC is not less than 1000 above 100 MMF ; not less than 700 between 50 and 100 MMF ; not less than 500 below 50 MMF . Type $370-\mathrm{CB}$ has ring type metal shell with three soldering ears. High potential terminal at either end for feed-thru connection. Type 370-FA is fastened to chassis with $3-48$ screw.

## ERIE CERAMICON ${ }^{\circledR}$ TRIMMERS

These trimmers have been well known for years for their stability under the most exacting conditions. The top of the base and underside of the titanium dioxide rotor are lapped optically flat, thus eliminating air space variations with temperature. Fired silver electrodes are applied to top of base and rotor, so that capacity is changed by varying the
amount of overlap. Capacity change per degree of rotation is approximately constant, resulting in a smoothness of adjustment not possible with compression type trimmers, where the greater part of capacity change is concentrated close to one end of adjustment.

## ERIE TUBULAR TRIMMERS

These are compact, economical Tubular Trimmers that are ideal for applications calling for a low minimum capacity and a high ratio of maximum to minimum capacity. Styles 532 and 535 have molded plastic dielectric. Styler 31 15-01 and 3139-01 have ceramic dielectric.

## ERIE STAND-OFF CERAMICONS ${ }^{\text {i }}$

Stand-oft Ceramicons, an original Erie development, are now widely used for the dual purposes of by-passing R.F. current to ground, and of mechanically supporting other circuit elements. They are especially suited for V.H.F. and U.H.F. applications, due to their low-inductance electrical paths and resultant high resonant frequency.

## ERIE FEED-THRU CERAMICONS ${ }^{\circledR}$

These very practical feed-thru capacitors are highly recommended for by-passing R.F. to ground in feed-thru applications. Wire terminals of Style 362 and hook type terminals of Style 327 are sufficiently rugged to serve as tie points for several connections, for supporting other circuit elements, and long enough for point to point wiring. Style 327 is hermetically sealed and ruggedized, and is primarily for military and similar commercial usage Nut supplied.

## ERIE "HI-STAB" DEPOSITED CARBON RESISTORS

Erie deposited carbon resistors are made by a process developed and perfected as a result of years of work in the laboratory of Erie Resistor Limited in England.
The Erie basic Style 155 resistor employs a highly stable resistance film that is applied in the form of carbon deposited at high temperature on the surface of a ceramic rod. Precise D.C. resistance values as close as $1 \%$ tolerance are produced by spiral cutting on the outside resistance film. This resistance rod then has axial leads firmly attached and the rod is encased in thermo-setting molded plastic insulation, a unique feature for resistors of this type.
Style 155 "Hi-Stab" resistor, rated at $1 / 2$ watt, is designed to meet the requirements of Styles RN-15 and RN- 20 as specified under MIL-R-10509A, and is available in resistances from 100 ohms to 470,000 ohms, tolerance of $5 \%, 2 \%$, and $1 \%$.

TYPE AEP PLUG-IN ELECTROLYTIC CAPACITORS
Quick change, hermeticallv sealed dry electrolytic. Plugs into standard octal socket for fast replacement or testing when continuous service is important. Higi capacity and ultra-compact, using etched foil in anall can sizes. Non-corrodive aluminum internal construction throughout. Vented for safety.

TYPE PRS • DANDEES • TUBULAR ALUMINUM CAN ELECTROLYTICS $\left(85^{\circ} \mathrm{C}\right)$

## －Singles Triples

 －Quals units Tubular units encased in lumily suited for compact peciall sured for compact abemblies．Sinele element mits hare solid wire leads． Dual，triple，and quard unit are sulpplied with stranded wire leads and safety sleeves．The hisher voltage listinge meet the new radio and electronic circuit poten－ tials．particularly in cath de－ray applications like ore－ray applications like oscillorraphs． PRS units are normally supplied with etched foil， but plain foil is available． figh－purity aluminum con－ truction．Vented for ex cersive gas pressures．

Toughest capacitors ever offered for radin－electronic equipment．DURANITE capacitors are entirely new－in design，impregnant， processinf，and rasing．New technique glove－fitting contact and seal throughout．DURANITE provides a permanent，non－ varying，rock－hard casing，does not dry out，does not develop cracks or fissures．Pig－tail leads firmly imbedded，won＇t pull out， won＇t work loose．Moisture－proof；oprerate from suls zero to over $210^{\circ} \mathrm{F}$ ．Exposure to temperatures of $250^{\circ} \mathrm{F}$ ．will not impair life or performance，no deterioration on the shelf．

HI－VOLTAGE－TYPE 34 －TUBULAR PAPER CAPACITORS

Hi－voliage type 34 oil imprignated，tuhular capacitora are compaet hiph－grade units．Overall wax dipped for ligh re． sistance to humidity．
Units rated from 2500 VDCW and up are designed to meet the elevatel peraks and transients encountered in clevision and other tathode－ray tube applications and to redece the effecté of corona．
These high－voltage units are encased in cardhoard tales with tinned wire leads，und have an improved end－seal for longer life under operating conditions to which they are subjected． Supplied with radial mounting band at no extra cost．

## AEROVOX HYVOLS* - TYPE JPO9

Immersion-proof in sturdy rectangular metal can. Highvoltage screw type pillar terminals fitted with soldering lugs. Use of "HYVOL" allows exceptionally compact size for capacity, working voltage, and safety factor. Intended for heavy-duty continuous service in transmitters, amplifiers, etc. Type MB bracket is supplied unless otherwise specified, except on units with base sizes $33 / /^{\prime \prime} \times 3-3 / 16^{\prime \prime}$ and $33 / 4^{\prime \prime} \times 4-9 / 16^{\prime \prime}$ where Type MS bracket is supplied. MSB is available for all types upon request.

COMPACT HYVOL*

Compact, immersion-proof unit. Different base sizes make units adaptable for duals and triples. Even on single sections, different base sizes make units fit in particular applications where Type 16 's do not fit. Type 18 CB is standard, but Type 18 CT (terminals on top) also available.

| $3 \times .25$ | $2 \%$ |

CAPACITORS - TYPE JPI 8 CB
Compact, immorsion-proof unit. of minimum size and weight. Corrosion-proof metal container. Special immersionproof terminals for severe atmospheric and climatic conditions. Type 16 CT is standard, but Type 16 CB (terminals on bottom) units also available.

## TYPE P83Z MICRCMINIATURES METALLIZED-PAPER CAPACITOR5

 dielectric capacitor particularly applicable in the electronic field to replace the low ca. pacity paper units now heing used. Hyvol K impregnated in bumidity resistant molded thermo-plastic cases.

## TYPE P3OZ BATHTUBS METALLIZED-PAPER CAPACITORS

## Aerovox Mofor-Starting Capacitors

## ATYPEFOREVERY APPLICATION

Aerovox motor capacitors are available in two general categories:
(1) Exact-Duplicate Replacements, precisely matching the mechanical and electrical features of the original equipment; and
(2) Universal Replacements, for a minimum stock of numbers taking care of the maximum range of motor applications.

Exact-Duplicate Replacements do the "same-as-new" service job insisted upon by critical customers. Universal Replacements mean maximum convenience with minimum investment. And, of course, Aerovox also supplies the hardware, housings, caps, mountings

INTERFERENCE FILTERS

TYPE IN-23. Fspeeially used for neon sign fixtures. Consenient mounting bracket. One filter for each fixture. Flexible learls. Also used on small miotors. Size $1 \times 21 / 8$ inches.

TYPE IN-27. Simple, inexpensise, plug-in unit where interference is slight. Size $13 / 8{ }^{x}$ $11 / 2$ inches.
TYPE IN-28. For use where grourd is at considerable distance. Most efficent when mounted on appliance. Bracket supplied. Size: $13 / 8 \times 2$ inches.

List \$2.00

TYPE IN-29. Effective plug-in unit for local noise sources of variable character but strong intensity. Esyecially suited for shavers and other vibrating devices. Size: $13 / 8 \times 3$ inchos.

TYPE IN-30. Similar to IN-29 thit with greater indurtance to handle more severe noise interference. Size: $13 / 8 \times 3$ inches.

TYPE \{N-31. Braeket mounted unit with high inductance. Size: $17 / 8 \times 3$ inches. List $\$ 3.00$ TYPE IN-42. Heavy duty unit for serimus inferference from jower transmission lines, etc. pluge into outlet. Appliance or radio plugs into receptacle in filter. Mounting ring pro-
 2 1/2" dia. x $33 / 4$ ".

List $\$ 7.50$

## UHF - INTERFERENCE FILTERS

These latent filter units provide maximum attenuation from 150 KC well up into the ITHF rance. And they are extra-rugged, extra-compart, extra-efficient, by any comparison with previous filters.
P'rimary applications are in r.f. noise suppression work in military or commercial aircraft and for vehicular low-voltage d.c. applications. Also, for special applications such as hattery or low-voltage d.c. filters, for shield room applications, and for critical equipment.
Available in seven standard types meeting a wide variety of applications. For extraordinary requirements, sieecial filters can be developed and built to vour order.

AEROVOX RESEARCH WORKER
A snappy, informative, practical engineering paper, issued monthly, the AEROVOX RESEARCH WORKER is free to servicemen, engineers, hams, and other interested radio workers. Ask your AEROVOX jobber how you may subscribe, or write direct.

## INTERFERENCE ANALYZER

TYPE ANL-37
The Aerovox Filter Selector eliminates the cuess work in delermining the proper filter to use. plags lotween interfering device and outlet. Adjust selector switeh until noise is eliminated or minimized. Dial then indicates type filter (IN27 thru INis) to be used.
Unit in handsome, sturdy metal cabinet. Compartment contains necessary attachment pluge and clips. Size: $51 / 2 \times 5 i / 2 \times 8$ inches.
HEAVY DUTY INDUSTRIAL FILTERS

TYPE IN-105. Same as IN- 104 except container is bathtuh type metal can. Size: $18 /{ }^{\prime \prime} x$ TYPE ${ }^{\frac{X}{4}}$ IN-106. Beat filter for fluorescents. Jabauced network. Especially suited for radio and television ealesrooms. One unit per fixture in series where power loads enter. Metal container with fonr stranded wire leads. Mating: 125 V . AC or DC; 2.6 amps. Size:

## BUILT-IN FILTERS

High attenuation type, hermetically sealed unils for use where sevele interference is encountered and dependability is required. For permanently mounted applications.
Aerovox sperial "Pi type" construction insures efficient radio noise reduction over low frequency broadcast, shortwave, and television bands. Suitable for Army-Navy or aircraft equipment where immersion and severe humid. ity tests must be met.

## R-F NOISE CAPACITANCE SUPPRESSCRS

## Type INA-116 Type INA-117 Type INA-118

These radio-noise supuression raphacitors have been especially degifned for use in nilitary or commercial, aireraft and designed for use in nilitary or commercial, aircraft and vehicular applications. Primary application is as an r-f bypass capacitor from line to pround in low voltage de supply lines. Units are especially treated to assure extremely long noise-free life.
Operating tenperature range is minus 55 degrees $C$ to plus 95 degrees $C$. For full 150 volt rating the operating tem. perature range is minus 55 degrese $\mathbf{C}$ to plus 50 degrees $C$ I'nits mas be used at operating voltages up to 120 vde over
a temberaturs range of minus 55 degrees (" to plus 71 degrees a temseraturs range of minus 55 degrece "' to plus 71 degrees
C; and vo vde over a range of minus 55 degrees $C$ to plus 95 derrees C .

Heavy duty. industrial-type interference filters consisting of one or more highly efficent radio noise filter elements. Enclosed in black painted steel surface cabinet. for permanent installations of power equipment. One ell ment fur line. Cabinets meet Underwriters requirements, and have standard knockouts. Rating: 250 v. AC -25 to 60 cps . or 600 v. DC.

## SINGLE-PHASE BALANCED NETWORK

Other INB filters available for up to 200 amperes. Write for information.

TYPE IN-104. Small, inexpensive filter unit of low impedance, delta-connected capacitors. Connest one unit for each fluorescent light fixture or across line leads every eight fert in core lighting. Tuloular with single hole mountinu bracket. $\sigma^{\prime \prime}$ stranded wire insmlated leads. Can common for grounding. Rating: $12 \overline{5}$ v. AC or DC. Size: $1^{\prime \prime}$ dia. $x 28^{\prime \prime \prime}$.

TYPE IN-109. Balanced network filter for severe r-f noises from small appliances. Metal container and four insulated, stranded wire leads. Case common for grounding. Rating : 125 v. AC or DC; 2.5 amps. Size: $17 /{ }^{\prime \prime}{ }^{\prime \prime} \mathrm{x}$
List $\$ 3.80$ TYPE IN-133. Hermetically sealed, metal cused unit - bracket mounterl. Delta-connected capacitor combination for connecting across line. Excellent for use in areas near radio stations. $6^{\prime \prime}$ insulated stranded wire leads. Can common for grounding. Ratinir: 125 V AC or DC. Size: $17 / \mathbf{D}^{\prime \prime} \times 1 \frac{6}{8 \prime} \times$ For single wire unbalanced applications. For two wire filtering use one filter in each line Filter case must be securely bonded to the filter appliance and ground for maximum ef ficiency. These filters when used on high soltage AC should te used only on perma nently grounded equipment.

TYPE 1467LS-HV

Compact, precision made mica dielectric capacitors made in accordance with JaN specification C-5. These are the smallest mica capacitors liated in the JAN C-5 sperifleation. All capacturs are molned in low-lose bakelie. impregnated and colorcodied. They are tegted to meet JAN reguirements for dielectric strencth, insulation resistanice, temperature cofficience, capacitance iff. himionty and he turnighed upon request
Thpe 1468 and 1467 units are of the stacked mica snc foil typer and aro made unts ar gilrered-mica and are arailahle in characteristics $C$. $D$. and $E$ of the JAN specification. gilrered-mica and are arailahe in

TYPE 1469

TYPES 1650-1654
Heariest-duty molded in bakelite mica capacitors of the AEROVOX line. Threaded mounting holes for roundhead screw terminals or plain holes available. Add suffix A for plein holes. Types 1656, 1651, and 1652 are supplied in brown or low-loss bakelite. Types 1653L and 1654L in low-loss bakelite only.

600 VDCW . 1445 DCT

HIGHVOLTAGEMICAS
TYPE 1445 -47
Designed with insulated mounting holes $1_{\mathrm{y}^{5} " \text { " apart independent of soldering lugs }}$ Used to shunt meter windings. large or small meter-mounting brackets availeble. Specify by sutix (A) for large or (E) for small brackets.

## SILVERED MICA CAPACITORS

AEROSOX silveral mica units for most cricical applications where precise capaeity values are required. Encaserl in red low-loss bake. lite. Nimilar in external appearance to stambard bakelite molded mica unis.
Available with temperature coeficient and retrace characteristics as defined by characteristics A to F inclusive of REC-115 and JAN-C-5 specifications for molden\} "afacitors. Excentionally high "Q." Mechanically protected against phosicol damake and changes in elcetrical characteristies due to varsing atmospuevic sonditions. Wax impregnated extematly. ldeal for circuits where inductance and capacity probluct must remain constam under all operating émoditions.

## HI-Q DISK CERAMIC CAPACITORS

Hi-Q ceramic disk capacitors are available in a range of capacities from 10 mm to 30,000 used for by-passing, blocking and coupling applications. They are sturdily constructed, precision tested, and moistureproofed against high humidities. In many instances these $\mathrm{Hi}-\mathrm{Q}$ disk capacitors offer advantages over the regular capacitors through their space saving features. Multiple capacities can be fabricated on single disks affording additional savings of space and installation costs. The silrer electrodes are fired directly to the ceramic dielectric to assure low noise operation. They are coated with a non-hydroscopic phenolic and are impregnated with a micro-crystalline wax which protects the units from humidity and affords a sturdy construction.

## General Purpose

Hi-Q br-pass disks are fixed ceramio dielectric capacitors specifically suited for by-pass or roupling applications or for fre quency discriminating circuits where $?$ and capacity stabilits
are not of major importance. These disks are available in the capacitier listed below. 10 mmf to 30,000 in tolerances as specified. The smallest possible stami. ard disk has been used for each value of capacity.

hi-VOLTAGE DISK CAPACITORS General Purpose

Hi-Q high voltage disk capacitors are available in many capacities and voltage ratings. These types offer many possible uses in TV circuits where voltages above 500 are necessary. They are the ideal units for dependable day-after-day service. Hi-Q has available numerous combinations of capacity, working voltages and physical sizes. These low cost units are manufactured to specific tolerances as listed.

## HI-Q TUBULAR CERAMIC CAPACITORS

Hi-Q general purpose tubular ceramic capacitors may be used for coupling, bypassing and filtering where frequency control is not critical (not to be confused with the $\mathrm{Hi} \cdot \mathrm{Q}$ line of close tolerance temperature compensating units). Available in two types (SI and CI) small in size, rugged construction and available in a wide range of capacity values.

## HI-Q TEMPERATURE COMPENSATING DISK CAPACITORS

The temperature coefficient of ceramic capacitors is an inherent characteristic of the cergmic body. By controlling this oefficient, the use of ceramies has been extended to countless applications in the electronic and communications field Temperature corfficient is dotermined by the ceramic mix and therefore certain tolerances are standardized. Following is a list of standard recommended tolerances used in this listing:
Temp, Coef.
Tolerance_-PPM
Temp. Coef
N330
N750
$+30$
Tolerance_PPM
$\pm 500$
$\pm 100$

The toleranees shown are maximum deviation. The actual average temprature coefferient usually runs close to nominal Aerovox III-G is the fret to offer temperature compensating capacitors in hoth disk and tubular styles as stock items Hi-Q temperature compensating disks are specifically suited for resonant eircuit applications or any other applications where high $Q$ and stalility of capacity are esGential. They meet all specitications of RTMA Class 1 fixed ceramic dielectric解 the capacity ranges and tolerances listed below.

SI-TV HI-VOLTAGE CERAMIC CAPACITORS

A recent addition to the already complete line of Aerovox Hi-Q Ceramic capacitors. Especially adapted to television applications this capacitor is arailable in two sizes. For capacities from 4.7 - mmp. to 22 . mmf . the size is $.280 \times .750$. For 24 . inmf . to 60 nimf. the case size is $.312 \times 1.250$. All units referred to here are 6000 Volts DCW.

## HI-Q TUBULAR FEED-THRU CAPACITORS

Hi-Q Feed-Thru Capacitore provide means to transmit thru shieds or ground potentials and simultancously by-pass unwanted fremencies, A good mechanital conmertion is provided by the silver-plated bushing. These are excelent dependable unite pren under severe mechanical vibrations as in aircraft, missiles and aufomotive requirements. All mite are flash tested at 1250 wols D.C.
Hi-(, Byelet Feed-Thru Ceramie cabacitors prowde the ultimate in miniaturization. They can lef soldered directly to the chassis and grovide excellent by-pass performance where space is crificul. Faplecially recommended for use in LHF.

## HI-Q TUBULAR STAND-OFF CAPACITORS

Hi-Q stand-off capacitors are lasically tubular, having as an inteqral part of their construction. a wrew fixture for mounting to the chassis or common ground. Close coupling and their unique construction make them an excellent choice for by*passing high frequencies.
All units are coated with a high temperature enamel, stamped for capacity and supplied with mounting nut, if desired.
The MCS is a quick mounting type which pernits high speed meehanical installation. The ceramic tulse is enclosed in a cadmiumplated metal case with a specially developed end seal for frotection against humidity and temperature changes.
All units are flash tested at 1250 volts D.C. The power factar is under $3 \%$ and the installafion resistance is above 7500 megolime.

## HI-Q HIGH VOLTAGE "CARTWHEEL" CAPACITORS

Hi-Q high voltage "cartwhecls" are thoroughly tested units capable of assuring dependable service while withstanding high voltages. This new universal type (UV) offers interchangeable terminals in 5 styles for use in filter and by-pass applications in TV high voltage power supplies.

Hardware for Types LV-501 • 3 is included. Above prices are for EXTRA hardware.

## PLANET MANUFACTURING CORPORATION <br> BLOOMFIELD, <br> NEW

## Universal Replacement Type Electrolytics <br> "LYTICAP" DRY ELECTROLYTICS

Hermetically sealed in aluminum tubes, covered with red kraftboard insulating jackets - tinned copper leads - dual capacitors (Type IL) have common negative, center mounting strap and insulated leads.

- Dimensions are for metal tubes. Add $\frac{1}{16}$ " to diameter and $1 / 8^{\prime \prime}$ to length for over-all dimensions over cardboard insulating fube.

Universal Replacement Type Electrolytics

## "CT" <br> DRY ELECTROLYTICS

Constructed in strong cardboard tubes, impregnated under pressure - long insulated leads of UL approved wire out both ends - mounting strap.

## PLASTICON DC RECTANGULARS

Mineral oil impregnated and filled. Hermetically sealed. Can be operated in any position, continuously at $10 \%$ over rated voltage up to $+40^{\circ} \mathrm{C}$. Tolerance $10 \%$. Ambient temperature range $-40^{\circ} \mathrm{C}$. to $+85^{\circ} \mathrm{C}$. Insulators: Two ceramic type bushings for standard temperature range. Two solderedin metallized glass insulators for extended temperature range. All DC rectangulars have $8-32$ screw and hex nut terminals with removable hot-tinned solder lugs. Case: Rectangular base, lead coated steel with heavy finish of grey organic lacquer.

Same specifications as DC Rectangulars. Insulators: Two wet-process porcelain bushings on Types AOCO6C, AOCO1M \& AOCO2M. One ceramic bushing can grounded on Types AOCOBM, AOCO5M, AOCO8M and AOCO10M. Case: Obround (flattened oval) cross section. Drawn or lock-seam lead coated steel with heavy finish of gray organic lacquer. Two right ancle mounting foot brackets are provided as standard on all AOCO capacitors. Add $1 / 2 "$ to depth to get mounting centers.

## （C）Hivolt POWER SUPPLIES

## Where size and weight must be kept to a minimum－

These hermetically－sealed，self－contained power supplies are de－ signed for Hi Voltage low current DC for many applications．Our exclusive engineering techniques and oil－filled construction assure smaller，lighter，more flexible units．
－radiation counters
－dust and electrostatic precipitators
－spectrographic analyzers
－oscilloscopes
－projection television sets－display tubes，etc．

MINIMITE* TYPE MM

## Miniofure Metal-Cased Tubular

 Electrolytics
## "SM"* Safety MargIn Construction

- Hermetically sealed aluminum-cased tubulars. Small and light. Ideal for underchassis mounting in compact, tight as. semblies.
- Designed to withstand high surge voltages and high ripple currents. Stable capacitance characteristics. Long service life.
- Exceptionally low leakage. Terminal tab connections provide permanent low-resistance contact for life of the unit.
- Outer insulating tube. Duals have centered mounting strap, and 8 leads (common negative).
- \#20 bare wire leads, $8^{\prime \prime}$ long
- Widely specified for original equipment and as fopular replacements with qualityminded servicemen.

## Cardboard-Cased Electrolytics

TYPE ES

ASTRON-improved design. Long service life. Electrically and mechanically superior to similar.appearing units.

- Dual and triple-section units. (un be used in place of costlier metal can types of equal rating in television, radio, radio-phono and other equipment. $65^{\circ} \mathrm{C}$. operation.

Sections wrapped in plastic film. Lasting protection from moisture, humidity, sever est climatic conditions. High-melting point wax fill.
Centered radial mounting strap. Plastic insulated wire leads, $6^{\text {tr }}$ long. Color coding on tubes.

- Overall wax coating for added protection agrainst moisture and humidity.

ASTRON BLUE-POINT Type BP capacitors are the finest allpurpose molded plastic paper tubulars ever made.

They are designed for continuous operation at temperatures up to $85^{\circ} \mathrm{C}$. withouf volfage deraling. The famous BLUE-POINT seal makes them unsurpassed for dependability in television, radio, and a wide variety of applications where a combination of small size, excellent capacitance-temperature stability and resistance to vibration and moisture are prime requisites.

ASTRON BLUE-POINT capacitors give equally dependable and unvaried performance under all climatic conditions including tropical, hot and humid climates.

Due to solid thermosetting impregnant, BLUE POINTS show highly stable capacitance characteristics; also low power factor and high insulation resistance over the entire temperature range $-55^{\circ} \mathrm{C}$. to $+85^{\circ} \mathrm{C}$. Capacitance change at $25^{\circ} \mathrm{C}$. is less than $\pm 5 \%$ over the entire temperature range. The 400 volt and 600 -volt units can be operated at $125^{\circ} \mathrm{C}$. When derated to a voltage equal to $60 \%$ of their $85^{\circ} \mathrm{C}$. rating.

The ASTRON-developed BLUE-POINT seal and molding process (patent pending) is completely new and revolutionary in the capacitor art.

The BLUE-POINT actually bonds itself to the plastic seal and the wire leads to form the tightest seal ever produced against moisture and humidity and the severest climatic conditions. Both the seal and shell are completely resistant to soldering iron heat.

ASTRON BLUE-POINT capacitors are identified by their distinctive yellow plastic case and are clearly marked with rated voltage, capacitance and outside foil location.

## TRADE MAKK

## ASTRON CORPORATION

TYPE AM

- Pressure molded units. Sealed terminal con nections. Iong, troublp-free service.
- Smaller than conventional paper tubular types. Better humidity and heat seal - in molded units at no extra cost.
- Ideal as original units or replacements in television, radio, radio-phonos and other commercial applications.
- Operation at temperatures up to $85^{\circ} \mathrm{C}$.
- Teeads $2^{\prime \prime}$ long. Individually tested and fully guaranteed. Attractive red label for pasi identification.

# METEOR* SUBMINIATURE PAPER CAPACITORS 

## For $125^{\circ}$ C. Operation without voltage derating

- Amazingly small sizes, compact and light weight units.
- Highly dependable operation at temperatures up to $125^{\circ} \mathrm{C}$. withouf voltage derating.
- Exceptional capacitance stability, less than $5 \%$ change, over entire temperature range of $-65^{\circ} \mathrm{C}$. to $+125^{\circ} \mathrm{C}$. due to use of ASTRON-developed high-temperature impregnant X-250*
- High insulation resistance, low power factor, unusually low resonance lass. High test voltage indicates extra margin of safety in operation.
- Built to exceed stringent requirements of Specification MIL-C25A for Styles CP04-05-08-09-10-11 (ASTRON Types AQ, TQF, and variations); and Styles CP53-54-55, Characteristic $K$ (ASTRON Type ADZ, bathtub).
- Positive hermetic closure of the metal cases is assured by glass-to-metal solder seal terminals.
- Tubulars supplied in a variety of construction and mounting styles to meet your specific needs: extended foil or inserted tab; capacitor section grounded to case or insulated from case; plastic outer sleeve; with soldered-on tangential or Ltype bracket; screw neck mounting style; or stud-base mounting style.

# METALITE ${ }^{\text {® }}$ <br> Metallized Paper Capacitors for $65^{\circ} \mathrm{C}$. and $85^{\circ} \mathrm{C}$. Operation METALITE CAPACITORS 

## Feature:

- Ultra-compact sizes. Light weight. Ideal for miniaturization applications, and portable, mobile and airborne equipment.
- As much as $75 \%$ reduction in size over conventional paperfoil capacitors.
- Self-healing - the ability to withstand high dielectric stresses. METALITE capacitors can be subjected to momentary overvoltages and surges over and over again without danger of permanent failure.
- Temperature Range (Metal cased units) $-65^{\circ} \mathrm{C}$. to $+85^{\circ} \mathrm{C}$.; (cardboard cased Type ML) $-55^{\circ} \mathrm{C}$. to $+65^{\circ} \mathrm{C}$.
- Excellent RF characteristics. Low RF impedance due to small sizes and short current path. Low power factor.
- Wide variety of applications: RF and audio bypass circuits, noise suppression filters and systems, instruments, and various types of communication equipment where small sixe, light weight and the self-healing feature are especial!y desirable characteristics to meet specific circuit requirements.
- Interchangeablity with standard paper-foil capacitor designs when operated within published ratings and circuit requirements.

METALITE TYPE ML
Cardboard Tubulars
$65^{\circ} \mathrm{C}$. Operation

- Temperature Range $-65^{\circ} \mathrm{C}$. to $+65^{\circ} \mathrm{C}$.
- Microcrystalline hydrocarbon wax impregnated.
- Sturdy, wax-impregnated cardboard tubes. Strong terminal connections, metal end caus. Units can be point-to-point connected and supported by own leads.
- Wire leads $11 /{ }^{\prime \prime}$ long.
- Overall mineral wax coating for added protection against moisture and humidity.
- Standard capacitance tolerance: - $20 \%$ $+30 \%$.

# METALITE HY-MET* <br> High Temperature Mefallized Paper Capacitors for $100^{\circ} \mathrm{C}$. and $125^{\circ} \mathrm{C}$. Operation 

HY-MET CAPACITORS

## Feature:

- Temperature Range (Metal cased units) $-65^{\circ} \mathrm{C}$. to $+125^{\circ} \mathrm{C}$. (cardboard cased Type MLL) $-55^{\circ} \mathrm{C}$. to $+100^{\circ} \mathrm{C}$.
- Exceptionally small, ultra-compact sizes and light weight for given ratings. As much as $75 \%$ reduction in size over conventional paper-foil types.
- Self-healing; obility to withstand high dielectric stresses. HY-MET capacitors can be subjected to momentary overvoltages and surges over and over again without danger of permanent failure.
- Extremely low RF impedance due to small size and short current path. Excellent RF characteristics.
- Solid thermosetting impregnant provides high dielectric strength, improved insulation resistance over conventional metallized paper capacitors and permits high temperature operation.
- Hermetically sealed cases. Glass-fo-metal sealed terminals (except cardboard tubular Type MLL).
- Wide variety of applications in communications equipment, instruments, noise suppression filfers and systems where small size, light weight, self-healing feature and high temperature operation are prerequisites.
- Interchangeability with standard paper-fail capacitor designs when operated within published ratings and circuit requirements.

## Electronic Fabricators，Inc．

Electronic Fabricators，Inc．manufac－ tures FFCON Capacitors in standard production with tolerances of $\pm \mathbf{5 c} / \mathrm{c}$ ， $\pm 2 \%$ ，and $\pm 1 \%$ ！

Type MH（Metal Case，Hermetically Sealed）and Type MC（Cardboard Tube）are EFCON Capacitors using DuPont Company＇s moisture－proof ＂Mylar＂＊polyester film．The use of ＂Mylar＂results in high stability over an extended temperature range $\left(-60^{\circ} \mathrm{C}\right.$ to $\left.+125^{\circ} \mathrm{C}\right)$ without de－ ＊DuPont Trademark
rating and provides high insulation resistance together with low dielectric absorption．
EFCON，Type MH Capacitors are hermetically sealed with glass－to－ metal，solder－sealed terminals．Both Type MH and Type MC are produc－ tion tested to withstand a D．C．volt－ age of $250 \%$ of rated voltage at $25^{\circ} \mathrm{C}$ between terminals．Type MH is also tested between terminal and case．

TYPE MH HERMETICALLY SEALED

## Dual Midgetrol Volume Confrols and Accessories

Mallory Midgetrol Volume Control Parts and Accessories enable the serviceman to duplicate the physical and electrical characteristics of hundreds of Concentric Shaft Dual Carbon Controls, Single Shaft hundreds of Concentric Shaft Dual Carbon Controls, Single Shaft bon control combinations for fast replacement in TV, home and auto radio sets. Supplied as separate front and rear control sections, these parts are easy to assemble, practical and economical, and eliminate delays while waiting delivery of manufacturer's original controls. UF is $15 / 16^{\prime \prime}$ diameter carbon front section; UR is $18 / 16^{\prime \prime}$ carbon rear section; WF is wire-wound front section. A kit of standard assembly parts is supplied with each front section. For accessory fittings and switches, see page 2, Mallory Resistors and Controls Section, this catalog. Average mounting depth behind panel for a carbon dual is $1 \frac{1 / 8}{\%}$; with switch, is 1 \%".

For Midgetrol accessory parts, see Page 2, Mallory Resistors and Controls Section, this catalog.

## Midgetrol Accessory Parts

DS-35-Flatted split knurl shaft end. Special for Zenith.
List Price $\$ 0.45$
DS-36-Special $3^{\prime \prime}$ extension shaft for tubular shaft Midgetrols and 2-watt, wire-wound controls. Also used for coupling a front and rear section together to make a single-shaft, dual control for osciloscope and other push-pull amplifier service. Packaged with the DS-36 are two shaft-end knob adaptors, one knurled and slotted, one flatted

List Price \$0.45
DS-37-3/18" diameter shafts for use with round-shaft Midgetrols to accommodate knobs requiring $3 / 6^{\prime \prime}$ shaft. List Price $\mathbf{\$ 0 . 4 5}$

EB-158-Special bushing. $7 / 16^{\prime \prime}-28$ thread, $1^{\prime 1} / 15^{\prime \prime}$ long with $3 / 6^{\prime \prime}$ milled double flat.
EB-214-Special bushing: $1 / 2^{\prime \prime}-28$ thread, $23 / 16^{\prime \prime}$ long with .403 milled flat.

List Price $\mathbf{\$ 0 . 6 0}$

| US-28 | Single Pole-Double Throw. | .75 |

## Explanation of Mallory Tapers

Taper Number 1 is a modified logarithmic left hand taper in the carbon type of control and an approximation to this logarithmic taper in the wire-wound type. This taper should always be used in shunt circuits, as in usual antenna and audio circuits, or where only the center and left hand terminals are used.

Taper Number 2 is a right hand logarithmic taper in the carbon and an approximation in the wire-wound type. Used in series circuits as in cathode voltage controls, or where only the center and right hand terminals are used.
Taper Number 4 is a linear taper. Strictly speaking it is not a "taper" although commonly referred to as such. A linear "taper" is used wherever a control should be such that voltage change is proportional to the degree of rotation.

Taper Number 7 is made only in the wire-wound type of control and is a form of left hand taper. This taper is desirable for the antenna shunt plus bias control, wherein greater attenuation is obtained by increasing the bias voltage. The slight left taper then suffices to gradually reduce the signal to zero volume by the shunting action in the antenna circuit.

## TV Focus Controls

These $15{ }^{\prime \prime}$ diameter units are designed espe cially for focus control replacement in TV sets. They are 4 watt, wire-wound, and have a special taper. One control, plus accessories and complete instructions per display carton.

| Catalog <br> Number | Ohms Resistance <br> (Maximum) | Type <br> Element | Shaft <br> Length | List <br> Price |

All SU-No. 4-Linear Taper. (see Explanation of Mallory Tapers, page 2, Mallory Resistors and Controls section, this catalog).

## Theater Speaker Controls

Designed for use with Motiograph, Simplex, International and other outdoor theater motion picture equipment. Quality constructed with pig-tail rotor connections and corrosion-resistant finish to assure long, noise-free life. Housed in $1 / 16^{n}$ diameter metal case. Mounting nut supplied.

Two Waft Wire-Wound TV and Industrial Pofenfiometers

For replacement of positioning, hold and focus controls in TV. Also ideal for industrial circuits up to 1500 volts AC. Completely enclosed in $15 / 16^{"}$ diameter phenolic case. Thumb-knurled $1 / 4$ " diameter, $5 / 1 s^{*}$ long, screw driver, slotted, insulated shaft. All have linear resistance change.
For special $3^{\prime \prime}$ extension shaft, DS-36, see page 2, Mallory Resistors and Controls Section, this catalog.

Four Waft Wire-Wound Potentiometers and Rheostats

Four-watt, wire-wound controls designed especially for low voltage TV, test equipment, industrial and electronic applications. These controls are supplied with a $3 / 6^{\prime \prime}$ long bushing and have $1 / 4^{\prime \prime}$ round knurled screw driver slotted shafts $7 /{ }^{\circ \prime}$ long. Overall case diameter is $15 /{ }^{\prime \prime}$. Mounting radius, including solder lugs, is $11 / 4^{\circ}$ and mounting depth is 58 ". Rheostat styles have "off" position. All have linear resistance change and insulated shaft. For Dial I'late No. 395 , see page 4, Mallory Resistors and Controls Section, this catalog.

## Seven Waft Wire-Wound

 Pofenfiometers| Has 7 -watt dissipation, grounded contact arm and linear resistance change. Metal case is $256^{\circ}$ diameter, //8" deep. Shaft is $1 / 4^{\prime \prime}$ diameter and $38^{\prime \prime}$ long with screw driver slot. For Dial plate No. 399, see page 5, Mallory Resistors and Controls Section, this catalog. |  |  |  |

Type "K"
Vitreous
Wire-Wound Power Rheostats and
Pofenfiometers

Mallory Power Rheostats and Potentiometers are used with Battery Chargers, Blue Print Machines, Dental and Medical Equibuent, Fans, Film Printers, Generators, Motion Picture rojectors, currors Mallory Power Rheostats and Potentiometers are constructed by Mallory Power theostats and pote into position and applying a prouniformly winding resistance wire into position and applying a protective coating of vitreous enamel. The element contact arm is hinged and under constant pressure to insure proper contact with available, in addition to those below. A knob and dial plate are avalable, in addition to tho
supplied with each rheostat.

Order by waftage and resistance. For example: A 25-wall 100 ohm unit is indicated by 25K100P. A 100-waft 12 ohm unif is 100K12P. Or, a 50-watt . 5 ohm unit is 50K.5P . . . efc.

## Mercury "A" Batieries

Provide up to 4 times energy-volume ratio of other types of batteries. Ideal for use in portable electronic equipment, etc. Perform under wide range of adverse weather and humidity conditions. No need for rotation or rest periods. Uniform and optimum discharge voltage throughout long service life. 1.34 volts. Button height $.058^{*}$.

## Yard-Ohm Resistance Kits

Each Yard-Ohm Kit consista of the following: 1 yard spiral wound resistance wire; 1 yard insulated braid; 24 spiral wire leads. The kit is available in eight resistance values.
Dissipation-all types: $1 / 2$ watt per inch.

| List Price \$0.75 each |  |  |  |  |  |

## Mallory Fixed and Adjustable Vitreous Enamel Resisfors

Wire-wound, covered with a special, vitreous, non-alkaline, non-hygroscopic enamel coating which assures exceptional sealing and permanence of electrical characteristics. Adjust-

able types equipped with slider. 5 and 10 watt sizes have tinned-copper leads. All others supplied with mounting feet.

Types HS and DC Deposited Carbon Resistors

( Resistors illustrated are approximately 2/3 actual size)

## Type DC $\pm$ 1\% Deposited Carbon Precision Resistors

Mallory Deposited Carbon Precision Resistors are designed primarily as low-cost replacements for expensive wire-wound resistors in high-quality laboratory instruments. Their unique operating characteristics also make them ideal for replacement or substitution in all radio, television, electronic, or electric circuitry where stability, close tolerance, low-noise, and low inductance are desired. Average shelf life change will not exceed $1 / 4 \%$ per year. One thousand hour load life test indicates a maximum change not exceeding $\pm 1 \%$.

These resistors are formed of pure, crystalline-carbon particles deposited on specially compounded ceramic. Each Mallory Deposited Carbon Resistor is equipped with $1 / 2^{\prime \prime}$ tinned copper, axially-placed leads rigidly attached to silver plated brass end-caps. Baked mois-ture-resistant insulation is incorporated in construction for protection against humidity. Each resistor is calibrated at a nominal temperature of $25^{\circ} \mathrm{C}$. and each has a negative temperature coefficient range of approximately $.03 \%$ for low resistance values, through $.08 \%$ for resistances exceeding 1 megohm.

Each unit is inspected according to requirements of accepted government specifications, and each is marked with resistance value, type and tolerance, except the smaller types which have a separate label.

All DC Types are packaged in this dust-free plastic tube, assuring adequate physical protection.

| Cat No. | Wattage | Working Volts | Size (in inches) Dia. Length | Standard Value Resistance Range | List Price |
| :---: | :---: | :---: | :---: | :---: | :---: |
| DC1/4 | . 25 | 300 | $3 / 32 \times 17 / 32$ | $50 \mathrm{ohms}-1 \mathrm{Meg}$. | \$1.50 |
| DC1/2 | . 50 | 500 | $11 / 64 \times 13 / 18$ | 70 ohms-5 Meg. | . 67 |

[^61]
## Type HS Hi-Stability Deposited Carbon Resistors

For the first time the well-known advantages of high-stability, low inductance, and small size of Mallory Deposited Carbon Resistors are available at moderate cost for use in many commercial applications where accuracy of resistance is of less importance than the consistency of operation over long periods of time and through many changes of temperature. Average shelf life change will not exceed $1 / 4 \%$ per year. One thousand hour load life test indicates a maximum change not exceeding $\pm 1 \%$.

Television servicemen, laboratory technicians, and model shop engineers, in particular, will find these resistors ideal for critical television and other oscillator circuits where constancy of resistance is of utmost importance. The electrical and mechanical characteristics of HS types are exactly the same as similar DC types, with exception of the resistance tolerance which has been increased to $\pm 10 \%$ of the nominal value. The same quality and temperature coefficient, as featured in the DC types, is maintained throughout.

| Cat. No. | Wattage | Working <br> Volts | Size (in inches) <br> Dia. Length | Standard Value <br> Resistance Range | List <br> Price |
| :--- | :---: | :---: | :---: | :---: | :---: |
| HS1/2 | .50 | 500 | $11 / 64 \times 13 / 18$ | 47 ohms-8.2 Meg. | $\$ 0.35$ |
| HS1/2A | .50 | 350 | $1164 \times 19 / 32$ | 10 ohms-3.3 Meg. | .40 |
| HS1/2C | .50 | 350 | $11 / 64 \times 15 / 32$ | 10 ohms-1.2 Meg. | .45 |
| HS1 | 1.00 | 500 | $9 / 32 \times 15 / 16$ | 100 ohms- 10 Meg. | .50 |

Each of the four HS types is available in the following RTMA resistance values, within resistance ranges shown in the chart above:

| Ohms | Ohms | Ohms | Ohms | Ohms | Ohms |

When ordering specify type and resistance value desired.

## SPECIAL ORDERS <br> \section*{- Made to Your Specifications}

Mallory Deposited Carbon Precision Resistors are also available in DC types made to exact customer specifications requiring a wider range of resistance values from 2 ohms to 50 megohms. DC type resistors are also available in hermetically sealed types and with special coatings or sleeves.

## (1) IISULATED RESISTORS

## COLOR CODING AND STAMPING

Resistance values are clearly indicated by standard RETMA Color Code. All resistors in Distributor Packages, except BTR, are individually stamped with value and wattage.

TYPE BW INSULATED WIRE WOUND RESISTORS

Type BW's are exceptionally stable, inexpensive wire wound resisiors for low range requirpmunts. These small, completely insulated units are similar in appearance to insulated composition resistors but are readily identified by the double width of the first color code band.

The wire element is uniformly and tightly woind on an insulated corr. Tinned. solid wire leads are keyed to the element by a mecially desjuned terminal. Leads are anchored inside the insulation and cannot turn or pull loose.

## 1 RC <br> IISULATED RESISTORS

## STANDARD STOCK VALUES

BT and BW Insulated Resistors are available in HETMA Ranges within the maximum and minimum values for each type. Stock values are listed below.

RESIST-O-KITS

Handy pocket-size metal kit of $1 / 2$ or 1 watt BT Resistors. 10 compartments: lid snaps securely shut. Ranges marked on each resistor in Kit. Ideal for service calls.

List Price $\$ 9.00$

## TYPE $甲$ VOLUME CONTROL CABINET

Stocked with 18 new Type Q Controls plus switches and special shafts-for handling over $90 \%$ of all AM, FM and TV Single Carbon Control replacements. Individually marked compartments contain controls- 3 special drawers hold shafts, switches and spare parts. Everything neat, protected, there when you want it. No charge for sturdy metal cabinet; you pay only for its contents.

CONTENTS-Contains one each of the following $Q$ Controls: Q11-116, Q11-123, Q13-123, Q11-128, Q13-128, Q11-130, Q13-130, Q13-130X, Q11-133, Q13133X, Q11-137, Q13-137, Q13-137X, Q13-139, Q13-139X, Q18-139X; and two type Q13-133 controls. Also included are six 76-1 Switches and five Special Shafts.

LIST PRICE $\$ 30.90$

## CONCENTRIKIT STOCK CABINET ASSORTMENT \#14

Wide-coverage, low cost dealer stock of CONCENTRIKIT parts. Provides coverage of 404 concentric dual listings (equivalent of 188 different concentric duals)-TV coverage which would require dealer investment of $\$ 403.44$ in factory-assembled controls.

CONTENTS-Contains 30 selected Base-Elements, 34 Exact Duplicate Shafts, 4 K-2 CONCENTRIKITS and 3 Switches. Provides "less-than-a-minute" assembly without shaft modification.
Assortment \#14 is contained in sturdy IRC fourdrawer all-metal stock cabinet. 28 compartments are prominently labeled as to contents. Cabinet stacks with IRC Resist-O-Cabinets. Full replacement data on stock coverage is included.

COVERAGE - Supplies replacement coverage among 77 Trade Names including RCA, Emerson, Admiral, Philco, Crosley, G.E. and many other widely sold makes.

LIST PRICE $\$ 44.60$

IEC CONCENTRIPAKS are practical assortments of IRC CONTENTRIKITS, Base-Elements, Exact Duplicate Shafts and Switches selecteal from the concentric dual requirements of specific brands of TV sets. CONCENTRIPAKS afford wide coverage of replacement needs at a fraction of the cost of factory-assembled controls.
Contained in an extra heavy plastic stock box with 11 compartments and sturdy hinged top, each CONCENTRIPAK includes complete replacement data for the parts included, showing manufacturer's part and stock numbers, IRC parts required for control assembly, pricing guide. List of contents is in easy-to-use chart form. CONCENTRIKIT parts included feature "less-than-a-minute" assembly without filing, slotting, soldering or cutting of shafts.

## CONCENTRIPAK—KC-1 FOR PHILCO

Feplaces any one of 13 Philco concentric duals plus 21 specific controls of 18 other widely sold makes - TV coverage which would require dealer investment of $\$ 25.62$ in factory-assembled controls.
Contains both K-2 and K-3 CONCENTRIKITS, 9 selected Base-Elements, 18 Exact Duplicate Shafts and Switch, and replacement data.

LIST PRICE $\$ 17.00$

## CONCENTRIPAK—KC-2 FOR RCA

Replaces any one of 14 RCA concentric dual controls plus 38 part number listings among 17 other makes-coverage which would require dealer investment of $\$ 30.36$ in factory-assembled controls.
Contains K-2 CONCENTRIKIT, 10 selected BaseElements, 8 special Replacement Shafts and Switch, and complete replacement dafa.

LIST PRICE $\$ 12.40$

## CONCENTRIPAK—KC-3 FOR ADM\|RAL

Replaces any one of 14 Admiral canceutric dual coutrols pIus additional controls for Packard-Bell, Sparton and Stromberg-Carlson - TV coverage which would require dealer investment of $\$ 30.00$ in factory-assembled controls.
Contains K-2 CONCENTRIKIT, 10 selected BaseElements, 8 Special Replacement Shafts, and 2 Switches. Replacenent data included.

LIST PRICE $\$ 13.00$

## IRC TYPE Q VOLUME CONTROLS

IRC＇s Type $Q$ Control is the basic control for all set servicing． It is carafully engineered to meet most replacement requirements with a minimum stock．
The quality appearance and＂cushioned turn＂of the $Q$ Control assure customer satisfaction．Fasier installation and dependable performance provide more profitable servicing．

## KNOB MASTER STANDARD FIXED SHAFT

Standard shaft is knurled，flatted and slotted and fits most knobs without alteration．For knurled or spring type push－on knohs， cut to length．For over－size，worn or weh type knobs，split shaft slot lengthwise and spread ends．For poritioned knobs，bend down control locating pins and rotate control base for correct knob position．

1／4＂LONG BUSHING
Shorter bushing and compact $f^{\prime \prime}$ dosign suit $Q$ Controls to all small sets，yet handle large set needs as well．

7 STANDARD TAPERS FOR $\boldsymbol{Q}$ CONTROLS

A－For potentiometer or rheostat where uniform resistance change is required．
B－Semi－logarithmic curve for tone control or audio circuit control．
B Reverse－Semi－logarithmic curve－reverse taper for use in contrast and picture control circuits in television．
C－Logarithmic curve for audio circuit control or antenna whunt control．
C Reverse－Semi－logarithmic curve－reverse taper for use in contrast and picture control circuite in television．
D－Tapered at hoth ends to provide control of grid bias and antenna circuit．Used where control of grid bias is important in controlling volume．
H－Tapped logarithmic curve for audio level control for auto－ matic bass compensation．

## TAB MOUNT CONTROLS

Many recent TV sets use Tab Mount Controls． These are single controls without switch．They differ from standard controls in that bushing is omitted and mounting to chassis is made with two heavy twist－type mounting tabs．

## IRC TAB－MOUNT KITS

Since assembly of rab－Mount Controls is so simple．IRC supplies three 3－Part Tab－Mount kits which will assemblow with any stand－ ard plain or tappent IRC Base－Element to provide satisfactory Tib Mount Controls．Each TM Kit includes a Tab－type Ground Plate，a control cover and a finger－knurled and serew－driver slotted shaft of appropiate lensth for universal replacement． Packaged with instruction sheet but withont necessary Base－ Element．

TM－1－IRO Tab－Mount Kit－Shaft $1 / 4^{\prime \prime}$ long．List Price $\$ 0.60$

TM－2－IRC Tab－Mount Kit－Shaft 58 ＂ long．List Price $\$ 0.60$

TM－3－1KC Tab－Mount Kit－Shaft $1^{\prime \prime}$ long．

List Price $\$ 0.60$

## IRC <br> Q CONTROL ACCESSORIES

## IRC SWITCHES

The Type 76 Switch is designed and pro－ duced by lRC．It is supplied in two types． 76－1 Sincle Pole Sinsle Throw，and 76－2 Double Pole Single Throw．Switch is spe－ cially engineered for the $U$（ontrol with matching blue Bakelite enclosure．It at－ taches easily and quickly，and for added consenience，the one－piece terminals have elongared holes．List Price $\$ 0.60$

## 16 INTERCHANGEABLE FIXED SHAFTS FOR Q CONTROLS

Knob Master Shaft．Same as supplied in Type Q Controls．Flatted，qrooved and knurled． $3^{\prime \prime}$ long．List Price $\$ 0.50$

Slotted or tongued．For remote control cables．Includes $\mathrm{T}^{7 \prime \prime}$ and 1 每＂guide fun－ nels and tongue．Approximately $31 / 2^{\prime \prime}$ long from mounting face． $1 / 4$＂diameter．

Llst Price $\$ 0.45$

Specially slotted with hole in bottom．For Philco sets．Slot $1 /{ }^{\prime \prime} \times \times$ 尔＂deep．Approxi－ mately $1_{18}{ }^{16}$ long from mounting face when installed in control． $1 / 4^{\prime \prime}$ diameter．

List Price $\$ 0.30$

HQ

Flatted，with groove for dial plate．For Delco，RCA，Sears－Roebuck and Westing－ house sets． $3^{3}{ }^{\prime \prime}$ deep flat． $3^{3} 4^{\prime \prime}$ deep groove． Approximately $1 \mathrm{tlz}^{\prime \prime}$ long from mounting face． $1 / 4$＂diameter．List Price $\$ 0.30$

1／8＂diameter with $.105^{\prime \prime}$ flat．For Zenith models where shaft must operate inside another shaft．Approximately $41 / 8^{\prime \prime}$ long from mounting face．List Price $\$ 0.45$

Special $1 / 4^{\prime \prime}$ round with two concentric holes in end．For Motorola sets．Approxi－ mately $14 / 8$＂long from mounting face．

List Price $\$ 0.30$

L¢

Short flat with groove and threaded hole in end．For Belmont and Montromery Ward sets．s＂deep flat．ho＂deep grovir．A1， proximately $1^{\prime \prime}$ long fiom mounsine face． $1 / 4^{\prime \prime}$ diameter．List Price $\$ 0.35$

Special double－flat，threaled for ${ }^{3}$＂$"$ on end．For Belmont，Montgomery－Ward and Wells－Gardner setg．Has two concentric holes in end，the smaller being threaded． Approximately $11 / 2^{n}$ long from monnting
List Price $\$ 0.45$ face．

Universal ${ }^{3}$＂flatted and slotted shaft．Siot milled entire length of shaft except for thin web，Approximately 4＂$^{\prime \prime}$ lonr from mounting face．List Price $\$ 0.45$

Universal $1 / 4$＂full－round shatt approxi－ mately $3^{\prime \prime}$ long fron muntin：face．For mately $3^{\prime \prime}$ long fron muntiny face．For
$1 / 4^{\prime \prime}$ or $3 / 8^{\prime \prime}$ bushingt． $3 / 8^{\prime \prime}$ bushing included． List Price $\$ 0.35$

Very short screw－driver slot shaft．Slot，
 mounting face．$T_{1}$ Wameter．for $3 / 8$ bushing only．Bushing included．

List Prise $\$ 0.35$

（ ombination finger knurl and acrew driver slot．Shaft knurjed at end for $1 / 8$＂．Screw criver slot in end， ＂3 $^{2 \prime} \mathrm{~K} \mathrm{i}^{\prime \prime \prime} .1 / 4^{\prime \prime}$ diameter． A ploroximately $3 / 4$＂long from monnting face．

Insulated shaft for use in television．Drive arm and shaft of insulating material．Used without retainer ring． $3^{\prime 2}$ long from mount－ ing face．Easily cut to required lengtls． 1／4．diameter．CANNOT BE USED WITH SUITCH．List Price $\$ 0.60$

Identical with BQ Shaft except for addi tion of friction clutch－drive arm．Used for remote control as in auto ridios．

List Price $\$ 0.60$

Sprecial tongued shaft－m1＂long from mounting face，tongre $子^{3}{ }^{* 1}$ wide， ic＂$^{9}$ lomg， ． 150 ＂thick．For Magnavos TV lieceiveis．

List Price $\$ 0.35$

 monnting face，tongue $1 / 4 *$ wide， $2,2 "$ long， $062^{\prime \prime}$ thick．For Zenil ${ }^{1 / 4} \mathrm{~V}$ V Receivers．

List Price $\$ 0.35$

## FOR QUICK，EASY CONVERSION TO＂SPECIALS＂ WITH FIXED SHAFT SECURITY

This feature adapts the $Q$ Control to a＂special＂in 6 easy steps．（I）Remove control cover by bending up tabs．（2）Remove Resilient Retainer Ring with knife or pointed tool．（3）Remove standard shaft from control base．（4）Insert special shaft in bise． （5）Roll new fing into shaft groove．（6）Replace cover（or add switch）．
IRC INTERCHANGEABLE FIXED SHAFTS ARE INDIVIDUALLY PACKAGED with complete instruciions and extra Resilient Retainer Ring．

## IRC Q CONTROL ACCESSORIES

## ASSEMBLE YOUR OWN STANDARD OR SPECIAL IRC $\varphi$ CONTROLS

For those who would like to use their IRC BaseElement stock for assembly of standard controls, the component parts are available. Plain $Q$ Control assemblies with 1-Base-Element, 1-Interchangeable Fixed Shaft, 1-QCB Bushing and 1-QCC Cover. Switch type $Q$ control assemblies with 1-BaseElement, 1-Interchangeable Fixed Shaft, 1-QCB Bushing and 1 of either $76-1$ or $76-2$ Switch.
QCB-BUSHING— $3 / 8-32$ thread. $1 / 4$ " long. Pkg. of 5.
List Price $\$ 0.30$
QCC-COVER-For plain or tapped controls. Pkg. of $\overline{\text { List }}^{\text {Price }} \$ 0.45$
IRC VOLUME CONTROL GROUNDING LUG-Same as supplied with IRC Type Q Controls. Fits $3 / 8^{\prime \prime}$ bush ing. Lug length from hole center$1{ }^{13}{ }^{\prime \prime}$. Type QCL Grounding Lags. Pkg. of 5 . List Price $\$ 0.17$ STANDARD Q CONTROL LOCKNUTHex nut for $3 / 8-32$ thread. $\mathrm{i}^{\text {昜 }}$ across flats. Type QCN. Pkg. of 10.

List Price $\$ 0.25$

## EXTENSION SHAFTS

These attach to regular shafts, thus extending length to any needed size. They frequently make it possible to use standard controls for "special" jolis.

## Type

Shaft 441
Shaft

 Shaft 444 $8^{\prime \prime} \times 1 / 4^{\prime \prime}$ dia. $x 3^{3}$ "' flat for $4^{\prime \prime}$ lengths List Price $\$ 0.40$

## PLAIN OR INSULATED SHAFT COUPLERS

For use with standard controls to meet special shaft requirements. Two set screws give rigid connection.
TYPE C2-Insulated coupler for use with square type shaft used by Motorola.

TYPE C3-Plain coupler to couple $1 / 4^{\prime \prime}$ shafta; insert allows coupling of $1 / 4^{\prime \prime}$ shaft to ${ }^{3}{ }^{\prime \prime}$ shaft.

List Price $\$ 0.30$

## SLEEVE BUSHINGS

S 1

S 2

S 5

TYPE Sl-For use with standard controls. List Price $\$ 0.45$
TYPE S2-To provide bearing for switching mechanism.
List Price $\$ 0.30$
TYPE S3-For use with standard controls to set control hack
 — $3 / 8$ " dia. for $1 / 2 ", 3 / \mathbf{}^{\prime \prime}-32$ thd.-. 344 flat.

List Price $\$ 0.60$
TYPE S4—For use with concentric duals to provide $\mathbb{1}^{7}{ }^{\prime \prime}$ dia. lmshing. $11 / 2^{\prime \prime}-\mathrm{r}^{7} \mathrm{e}^{\prime \prime}-28$ thd. full length-. 375 dbl. flat.

List Price $\$ 0.60$
TYPE S5-For use with standard controls to provide $1 / 2$ " dia. lushing, $21 / 4$ " $1 / 2^{\prime \prime}-28$ thd. full length-. 437 flat.

List Price $\$ 0.60$

## SPECIAL PURPOSE CONTROLS

Type QJ-3 $^{\prime}$ TV ATTENUATOR

- Reduces overloading effects on TV sets in strong signal areas.
- Diminishes interstation interference caused by nearby or powerful stations.
- Minimizes buzz due to high signal level in intercarrier systems.
- Permits easy adjustment of sigriul RIGHT AT SET.
- Frequently prevents mismatch of antenna load to set.

IRC's QJ-3 TV Attenuator permits ready adjustment of signal input to TV sets. In most cases, it corrects or substantially reduces such conditions as:-Adjacent channel interference, back rround picture on weaker stations, poor definition, pirture and sound breakover. Also useful in service work-duplicating fringe area signals when shop is near strong local station. L.dst Price $\$ 3.30$

A continuously compensated control that boosts lows and highs as volume is decreased-maintains depth and brilliance even at whisper level. Type LC-1 replaces makeshift compensating unitstapped volume controls, stepped-type loudness controls. bass and treble boost circuits. Automatically maintains proper balance of all frequencies in the audio spectrum at any listening level. Simplicity itself-as easy to wire into an audio circuit as any standard three-terminal volume control. Complete instructions included, showing applications. Type 76-1 or $76-2$ switch can be added to this control.

List Price $\$ 9.95$

TYPE 4WS-Identical to Type 4WK except equipped with short, knurled and slotted shaft. Desimned for replacement without shaft alteration of TV controls mounted at chassis rear or under front panel concealment. Dimensions same as Type $4 W K$ except $5 /{ }^{\prime \prime}$ shaft length.

HIGH VOLTAGE CONTROLS - receivers using pieture tubes reyuring electrostatic forus. Wquipued with Kinoh Master Shaft. Diameter $2 \not 1^{\prime \prime}$. deptl behind panel ? $_{2} "$. hushing $1 / 4^{\prime \prime}$, shaft lenarth $3^{\prime \prime}$.

## (1®) TELEVISION CONTROLS

## FACTORY-ASSEMBLED

EXACT DUPLICATE CONCENTRIC DUALS

For Service Technicians who prefer factory-assembled controls, IRC provides a complete line of over 500 Factory-Assembled Exact Duplicate TV Concentric Duals. Both Carbon and Wire Wound Element types are included to meet the needs of over 5500 TV sets.

PART NUMBER MANUAL (Form S012C) provides complete cross-reference from manufacturers' Part or Stock Numbers.

Net ${ }^{15}$

IRC TV Concentric Duals—both FactoryAssembled Exact Duplicates and Universal Concentrikits - are double-money back GUARANTEED! Mechanical and elecfrical specifications are all based on set manufacłurers' procurement prints. Resistance values are matched; tapers are closely followed; shaft lengths are never less than manufacfurers' nominal, never more than $\frac{3}{3}^{\frac{3}{2}}{ }^{\prime \prime}$ longer.

NEW, SIMPLIFIED IRC CONCENTRIKITS AND EXACT DUPLICATE SHAFTS

## GIVE "LESS-THAN-A-MINUTE" ASSEMBLY OF TV CONCENTRIC DUAL CONTROLS

Here's the outstanding development in TV Concentric Dual replacements-a universal stock of parts which assemble into Exact Duplicate Controls in less-than-a-minute! Makes practical wide coverage of special TV Controls with a low cost stock of parts. Reduces obsolescence. Permits faster, more efficient and more profitable servicing.

FOUR NEW IRC CONCENTRIKITS of simplified, improved design plus new 1RC Exact* Duplicate Shafts and a greatly expanded selection of Base-Elements provide exceptionally wide coverage, including wire-wound-carbon combinations.

NO FILING OR CUTTING OF SHAFTS. IRC Exact Duplicate Shafts are ready for assembly into completed concentric duals. No alterations are required! No special tools needed!

PARTS NEEDED FOR ASSEMBLY. Each control requires only 2 base elements, a pair of shafts and a switch (when needed), in addition to CONCENTRIKIT. IRC's PART NUMBER MANUAL, (Form S012- 154 Net) supplies complete listing of parts needed for each manufacturer's part number.

K-2 CONCENTRIKIT. For assembly of concentric duals having 2 carbon sections. Contain 4 parts: Panel Cover, Rear Cover, Bushing and Mounting Nut. Assembly instructions included. Requires following additional parts, depending upon specification desired:
2-Base-Elemente (Type B)
1-Outer Shaft (Types P1 or P2)
1-Inner Shaft (Types R1, R2, R3 or R4)
1-Switch—when needed (Types $76-1$ or $76-2$ )
KS-2 Universal Shaft Kit may be used with K-2 CONCENTRIKIT in place of Exact Duplicate Outer and Innter Shafta.

List Price $\$ 0.80$

K-3 CONCENTRIKIT. For assembly of concentric duals baving wire-wound panel section and carbon rear section. Contains 4 parts: Panel Cover, Rear Cover, Ground Plate and Mounting Nut. Assembly instructions included. Requires additional parts, depending upon specification desired, as follows:
1-Pane! Base-Element (Type W)
1-Rear Base-Element (Type B)
1 -Outer Shaft (Types P3 or P4)
1-Inner Shaft (Types R1, R2, R3 or R4)
1-Switch-when needed (Types 76-1 or 76-2)
KS-3 Universal Shaft Kit may be used with K-3 CONCENTRIKIT in place of Exact Duplicate Outer and Inner Shafts.

List Price $\$ 0.80$
K-4 CONCENTRIKIT. For assembly of concentric duals having 2 carbon sections. Contains 4 parts: Panel Cover, Rear Cover, SPECLAI. BLSHING FOK MOTOROLA, and Mounting Nut. Assembly instructions included. Requires same additional parts, depending upon specification desired, as listed for $\mathrm{K}-2$ Concentrikit.

List Price $\$ 0.90$
K-5 CONCENTRIKIT. Use, contents and additional parts required are the same as listed for K-2 Concentrikit, except SPECIAL 1/4" LONG BUSHING FOR HALLICRAFTERS is included.

List Price $\$ 0.80$

IRC Base-Elements are a revolutionary advance in concentric dual replacement. A relatively small stock at low investment provides wide coverage of electrical requirements of many concentric duals. Each unit is a complete molded control base with element, terminals and collector ring installed. There are no loose parts.

Two types of Base-Elements are available: Type $B$ for panel or rear carbon sections and Type $W$ for wire-wound panel sections.
Twc Base-Elements are required for each concentric dual.

＊New items required for TV replacement．
For use with CONCENTRIKITS in place of Exact Duplicate Shafts．Requires shaft modification to desired specification． KS－2 Shaft Kit is for controls in which both sections are carbon．Use with K－2，K－4 or K－5 CONCENTRIKIT，
KS－：Shaft Kit is for controls in which panel section is wire－ wound and rear section is carbon．Use with $\mathrm{K}-3$ CONCEN－ TRIKIT．
KS－2 or KS－3
LIST PRICE $\$ 1.20$

SINGLE CONTROLS

IRC Distributor Controls for Industry offer commercial users a wide selection of resistance values and two industrial shaft types. Shafts are fixed. This combination of wide selection of values and speedy Distributor delivery holds many advantages for industrial purchasers. These Industrial Controls are adaptations of the new, compact 1. $^{\prime \prime}$ " Q Control. Power rating is $1 / 2$ watt, 500 volts maximum. Electrical rotation is the same with or without switch. 3/8" bushing is brass and held to close tolerance for snug shaft fit.
Terminals are heavily tinned for easy soldering, and may be bent without becoming noisy. Two locating lugs are provided, either or both of which may be bent down if not needed. Molded base. Both Types $P Q$ and $R Q$ are supplied in standard tapers.

TYPE PQ. Full round $1 / 4^{\prime \prime}$ shaft, approximately $3^{\prime \prime}$ from mounting face, with $3 / 8^{\prime \prime}$ long bushing. Available in 33 stock values as shown. Regular IRC stock numbers are used with prefix PQ .

LIST \$1.25
TYPE RQ. Very short screw-driver slot shaft, $1 / 4^{\prime \prime}$ diameter and approximately $1 / 2^{\prime \prime}$ long from mounting face with $3 / 8^{\prime \prime}$ long bushing. Available in 33 values as shown. Regular IRC stock numbers are used with prefix RQ.

## DISTRIBUTOR CONTROLS FOR IIDUSTRY

## DUALS AND TRIPLES

IRC Type $P Q$ and $R Q$ Industrial Controls are supplied as single controls. Dual Control and Triple Cuntrol combinatiors are available by adding IRC MITITISFCTIONS.

MULTISECTIONS
1RC MULTISECTIONS are complete control sections that can be added like a switeh to any $Q$. $P Q$ or RQ Control. With these units, the Radio Techniciarr or Engineer is provided with an endless variety of dual, triple or even quadruple controls. Duals ascembled irom IRC MULTI: Available in a selection of 22 values, as shown in following table fach MULTISECTION adds $\frac{1}{3}$ " to basic control.

## MULTISECTION DIMENSIONS

IRC Power Wire Wounds are rugged resistors specially engineered for dependable heavy-duty performance. They are supplied in a variety of power ratings, resistance values, sizes and terminal types. In addition to the conventional tubular types, IRC also supplies: 4 watt completely insulated Type PW-4 with axial leads, and two new high temperature resistors rated at 7 and 10 watts. Type PW-7 and PW-10 are fully insulated in rectangular ceramic cases and have axial leads.

IRC Power Wire Wounds are designed for continuous operation at full rated power. Derating is unnecessary even for the highest stock values. IRC Power Wire Wounds are full size, thus capable of efficiently handling greater wattage. Cooler performance assures longer resistor life, and safeguards critical components mounted adjacently. Clear, permanent markings show type, size, wattage, and resistance value; markings improve in legibility with temperature rise. Terminals are tin plated for easy soldering.

## ADJUSTABLE POWER

 WIRE WOUND RESSTORS

STOCK VALUES AND LIST PRICES

BRACKETS: Bracket holes are for 8-32 screws.

TYPE X BANDS
Type " $X$ " bands are furnianed for $21 / 2 \mathrm{DA}$. $41 / \mathrm{EA}, \mathrm{f} 1 / 2 \mathrm{EA}, 61 / \mathrm{HA}$ and $10 x^{2} \mathrm{Ha}$. Type 13 A , because of its small size, is furnithed with special adjustable band.

IRC Precision Wire Wound Resistors surpass MIL－R－93A Specifications．MIL and JAN Style equivalents are shown below．

Impróved ceramic winding forms have high insu－ lating qualities，high mechanical strength and low coefficient of expansion．Improved winding tech－ niqute，developed by IRC，eliminates shorted turns or strains in the winding．Improved insulation pro－ vides greater humidity protection and contributes to longer trouble－free service．Improved lug and lead terminals assure perfect electrical connections without strain on the windings，and are easily soldered．

IRC offers a complete line of redesigned Plecision Wire Wound lesistors．These improved units are fully interchangeable with earlier types，while providing higher standards of performance plus new sizes and terminals．
All IRC Precisions．except Type WW10J，are fur－ nished with rugged lug terminals for soldered connections．Type WW10J has wire lead terminals $2^{\prime \prime}$ long
All Types except WW8J and WW10J are wound with adjacent sections in opposite directions．This provides windings of low residual inductance．and windings that have little coupling effect from other parts of the circuit．Type WW8J．with single section．is wound non－inductively．＇rype WW＇10．J has a single section winding，but inductance is minimized by the comparatively small size of this unit．

1RC <br> CLOSE TOLERANCE

## PRECISTORS

}

## PRECISTORS

}

$1 / 2,1$ and 2 WATTS

IRC Deposited Carbon Precision Resistors offer a unique combination of close tolerance. stability and economy. Pure erystalline carlon is bonded to selected ceramic cores to produce a resistor ideally suited to the requirements of instrumentation, advanced electronics and critical television circuits.
Deposited Carbon Precistors provide a combination of characteristics not found in any other resistor type. The wide range of values, accuracy, high stability. low voltage coefficient, excellent frequency characteristics, predictable temperature characteristics. high voltage rating, low noike level and small nize of PRECISTOHS make them superior for many popular applications.

LRC Trpe DC Deposited Carbon l'recistors are available in three sizes: $1 / 2$ watt (body size $9^{9 \prime \prime}$, $x 3^{3} 9^{\prime \prime}$ ), 1 watt (hody size $19^{\prime \prime} x$ 3"), and 2 watts (hody size $\left.23_{6 " \prime}^{3} \times{ }_{3}^{9} z^{\prime \prime}\right)$. Accuracy $\pm 1 \%\left(25^{\circ} \mathrm{C}\right)$.
For complete protection against scratches, jars and surface injury IRC PRECDSTORS are factory packed in capped plastic tubeb. This special precision packaying also saferuards these close tolerance resistors against excessive handling.

# MOLDED <br> BORON - CARBON <br> PRECISTORS <br> $1 \%$ ACCURACY <br> $1 / 2$ WATT 

## CLOSE TOLERANCE PRECISTORS

## TYPE MBC

IRC's Molded Boron-Carbon Precistor is a precision film type resistor that incorporates the added advantages of a fully insulated unit. The molded plastic housing provides complete mechanical protection, and minimizes the effect of moisture. Because of its greater heat dissipating capacity, load life characteristics for the Type MBC are improved over those of either boron or deposited carbon unmolded units.

## APPLICATIONS

Type MBC Molded Boron-Carbons are particularly suited for applications where unmolded boron or deposited carbon units cannot be used due to the risk of mechanical damage to their coating, insulation breakdown, or high moisture change.

## SPECIFICATIONS

WATTAGE RATING: $1 / 2$ watt at $40^{\circ} \mathrm{C}$. ambient (per MIL-R-10509A), derated to 0 at $120^{\circ} \mathrm{C}$.
RESISTANCE VALUES: 10 ohms to 510 K ohms.
TOLERANCE: Standard tolerance is $1 \%$.
IDENTIFICATION: Housing is distinctive green plastic. Type designation, resistance value and tolerance are stamped on each unit.

## *JIN Types

Average half-wave rectified current at 60 cps and $25{ }^{\circ} \mathrm{C}$ ! For zero dynamic resistance

## DIMENSIONS

Overall hody dimensions approximately . $250^{\prime \prime}$ diameter by . $435^{\prime \prime}$ long. Axial leads $11 / 2^{\prime \prime}$. Illustrations above are actual size.

## MICROSTAK SELENIUM DIODES

Type GA Microstak Diodes for use in low current circuits where very high back resistance and low forward resistance are required. Miniature selenium cells with outstanding performance characteristics. they are ideal for such applications as A. V. C., switching, blocking and bias supplies. Design and small size give high frequency performance not found in conventional cells - tests prove their successful performance in circnit applications up to 1 megacycle. Hermetically sealed to assure stable operation under high humidity, dust, fumes and changing pressures.

Dimensions: (Type 6GA1) Length of leads - $11 / 2^{\prime \prime}$. Body length - . $450^{\prime \prime}$. Diameter - . 145". (Type 9GA1) Length of leads - $11 / 2^{\prime \prime}$. Body length - . $500^{\prime \prime}$. Diameter - . $210^{\prime \prime}$.

## TYPE 6GA1

Stock No. 6GA1-2B. Minimum forward current (at 2 V.D.C.) is 0.5 M.A. and corresponding resistance, 4000 ohms. Maxinum inverse current (at 20 V.D.C.) is 20 microamperes and corresponding resistance, 1 megohm. Peak inverse volts - 36 . Continuous inverse volts -22. Maximum A.C. input (RMS volts with resistive load only) - 26 . Temperature range is $-55^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$. Shunt capacitance - approximately 25 mmf (measured with two plates back. to-back on 1000 cycle bridge).

List $\$ 1.67$

Stock No. 6GA1-3C. Minimum forward current (at 2 V.D.C.) is 1 M.A. and corresponding resistance, 2000 ohms. Maximum inverse current (at 20 V.D.C.) is 10 microamperes and corresponding resistance, 2 megohms.

List \$2.25

## TYPE 9GAI

Stock No. 9GA1-2B. Characteristics are the same as the 6GA1-2B.

List $\$ 1.50$
Stock No. 9GA1-3C. Characteristics are the same as the 6GA1-3C

List \$2.04

## COMPOSITION-ELEMENT CONTROLS

These "Pick-A.Shaft"" and "Ad-A-Switch"* controls will take any of the shafts listed on page R-30 including High Voltage Coupler and insulated shaft. Your choice of any one of the 12 shafts listed, (this does not include insulated shaft) with each con trol. "AT" controls use "SWA" Switche and "A47F" controls use "SWE" Switches, both shown on page R-30. "AM" controls use "SWA" switches while "A47" controls use "SWE" switches, both shown on page R.30. Tolerances for these controls are in accordance with RETMA standards; Overall resistance tolerance of plus $/$ minus $20 \%$ for all values up to and including 100 K ohms; Plus/minus $30 \%$ for all values above 100 K ohms.

Graph Explanation:
Taper S-Straight or uniform resistance change with rotation.
Taper T-Right-hand $\mathbf{3 0 \%}$ resistance at $50 \%$ of C.C.W. rotation.
Taper U-Left-hand $1 \%$ resistance at $331 / 3 \%$ of C.W. rotation.
Taper V -Right-hand $20 \%$ resistance at $50 \%$ of C.C.W. rotation.
Tapar W-Left-hand $20 \%$ resistance at $50 \%$ of C.W. rotation.

Taper Z-Left-hand (Log. audio) $10 \%$ re sistance at $50 \%$ of C.W. rotation.
Taper Y-Left-hand $5 \%$ resistance at $50 \%$ of C.W. rotation.

"AT" controls have taps 1, 2, and 3 located at $371 / 2 \%, 50 \%$, and $621 / 2 \%$ of rotation respectively. "A47F" controls have taps 1 and 3 located at $30 \%$ and $70 \%$ of rotation respectively. These controls are available with factory-assembled shafte at no extra charge by omitting the prefix "A" from the catalog number and designating the type of shaft desired when ordering. Example: T-95, with KSS-3 shaft, or $47 \mathrm{~F}-200 \mathrm{~K}$ with FS-3 shaft.

## SERIES "DC" $1 / 2-W A T T$ DUAL CONTROLS

These composition element controls are ganged together so that both are operated by a single shaft in corresponding rotation. They have a $21 / 8^{\prime \prime}$ fixed milled shaft. Tolerances are in accordance with RETMA standards; Overall resistance tolerance of plus/minus $20 \%$ for all values up to and including 100 K ohms; Plus/minus $30 \%$ for all values above 100 K ohms. These controls use "SWA" switches. Other combinations of ohmages available. Prices and information upon request.

## UNIVERAL BALLAST

Standard Packing: Individual Carton.
STANDARD BALLAST
Exact replacements for resistor tuhe types.

## TELEVISION BALLAST

Specific TV receiver tube-type ballasts.

## LINE VOLTAGE REGULATORS

A protective unit designed to prevent line voltage
surges from reaching radio or TV receivers. Will reduce surges up to 140 volts down to approximately 110 volts. Plugs in outlet and provides outlet for eceiver, Available as follows

FOR TELEVISION RECEIVER8
Type Rat. For Use with Diang Leth List
$\begin{array}{lllll}\text { TVA } 300 & 200 \text { to } 300 \text { watts } & 1 \% \text { 欴" } & 1 \% / \prime \prime & \$ 2.50\end{array}$
Standard Packing- 10 (ten) per carton
FOR RADIO RECEIVERS

## AIRCRAFT-TYPE POWER RHEOSTATS

Basically the same unit as the 25 and 50 watt Power Rheostats, mechanically and electrically, Unjt is encased in metal housing rendering it explosion-proof and moisture resistant.

Terminals arc screw-type lugs plated to prevent corrosion. 5 - and 50. watt perer rheostats when encased in metal housing, are deratert $30 \%$.

Prices include AN-3220-2 knob. Standard Packing: Individual Carton.

## SOUND-SYSTEM CONTROLS

For proper control of volume and tone alike, Clarostat offers a choice of several controls, such as $L$ - and $T$-pads, output attenuators, and individual-speaker volume controls as used for drive.in theatre instal
lations. These are not ordinary radio controls but rather soundsystem controls designed and built for critical requirements.

CIT-LIST PRICE $\$ 4.25$

## CONSTANT-IMPEDANCE CONTROLS

Self-compensating volume controls known as L-pads and T-pads for use in sound systems. Rated at $21 / 2$ watts DC, but will handle up to 10 watts audio. Continuous range from 0.5 to 30 decibels attenuation in $90 \%$ rotation. Last $10 \%$ affords infinite attenuation. With Clarostat constantimpedance L-pads and T-pads the input and output impedances of associated circuits can be kept within the limits of a constant required value.

## CONSTANT IMPEDANCE OUTPUT ATTENUATORS

Series "CIB", rated at 10 watts, but will handle up to 30 watts in uudio circuit. Linear attenuation provided in 3 decibel steps up to 24 db , then 30 db followed by infinitv. Equipped with dial plate and har knob. One-hole mounting, $8 / 8$ " bushing diameter. $1^{\prime \prime}$ shaft. This control has been developed to meet the need for a constant-impedance altenuator capable of handling considerable power without measur4he insertion loss. Recommended as an output level control for power ampliffers, or as an mput attenuator for individual or for a group of speakers in a public address system.

When ordering, request Series 48 , or $48-9$, plus the ohmage. For example: Series 48.250 K (with split-locking bushing order as Series 48-9-250K.) Dual combinations available as Series D48. Any combination of ohmages within range specifled may le ohtained on order. PRICE: Due to the special nature of these units, prices and specific information will be sent upon request.

## WIRE-WOUND - SERIES 49

Wire-wound controls with a power rating of 1.5 watts. $8 / /^{\prime \prime}$ diameter lowloss phenolic housing. Linear taper resistance through $300^{\circ}$ mechanical and electrical rotation. Breakdown between metal mounting surface and element or terminal, greater than 1,000 Volts AC.
Bushing $3 / 4^{\prime \prime} x 32$ NEF-2, $1 / 4^{\prime \prime}$ long. $1 / 8^{\prime \prime}$ diameter round shaft, $1 / 2^{\prime \prime}$ long. Hexagon mounting nut $\mathrm{if}^{\prime \prime \prime}$ thick $\mathrm{x} \mathrm{in}^{\prime \prime \prime}$ across flat.
Also available as Series $49-9$ incorporating screwdriver slotted shaft with split-locking, bushing. Split bushing $1 / 4^{\prime \prime} \times 32$ NEF-2, $3 / 8{ }^{\prime \prime}$ long. Shaft length of is"
Dual combinations available as Series D49. Any combination of ohmages within range speciffed below may be obtained on order.

Pat. Pending

Series $49,49-9$, and D49 are available in any ohmage from 10 ohms to 20 K .
PRICE: Due to the special nature of these units, prices and specific information will be sent upon request.

## C-LINE CONTROLS

A new line of composition-element and wire-wound controls designed specifically for industrial, laboratory, and other semi-critical applications. The new "C-line" conttols are deluxe versions, mechanically and electrically, of the popular Clarostat Series 37 , composition element; Series 43, wire-wound; Series 58, wire-wound; Series 10 wire-wound controls.
All exposed metal parts of the "C-line" controls have corrosion. resistant finishes. Terminals have suitable finish for ease of soldoring Covers are close-fitting with no cut-onts, resulting in practically a dust-proof, moisture-proof control. Tnits are in sealed dustproof plastic bags, packaged in the stanlard Clarostat cartons. In this manner, controls retain factory fresh appearance and performance even through an extended shelf-life.
Designated as the "C-line" Controls, these latest additions to the Clarostat line are of factory-assembled, fixed-shaft type. They are available with either a $15 / 8{ }^{\prime \prime}$ round, nickel plated shaft, or a $1 / 8$ " screwdriver slot-type shaft witli split locking bushine.

The C'1 desipmation indicates a $15 / 8^{\prime \prime}$ round shaft beyond hushins; 3/8" long bushing with $3 / 8-32-N E F-2$ thread. The C2 designation is a $1 / 8^{\prime \prime}$ screwdrjver slotted shaft with a $1 / 2^{\prime \prime}$ split locking bushing. One nickel plated machined hexagon mounting nut and one internal lock washer supplied with all units. All C2 units are supplied with one nickel plated machined hexaron locking nut.

All "C-line" controls are available as follows on special order:
(1) Switches available for all " C -line" controls.
(2) Other ohmages not listed as standard catalog numbers.
(3) Other tapers not listed as standard catalog numbers.
(4) Other bushings and shaft lengths not listed as standard catalog items
(5) As dual combinations. Prices and delivery information on request.

## SERIES "37C1" and "37C2" 1-WATT CONTROLS

Flectrical tolerances are plus/minus $10 \%$ for all values up to and including 100,000 ohms, and plus/minus $20 \%$ for values above 100,000 ohms up to 10 megohms. All controls rated 1 watt.

Wire-wound resistors for most rugged applications. Will withstand tremendous overloads and temperature changes without changes in resistance values or appearance. Wire windings on high-grade ceramic and coated with special
inorganic cement. In accordance with RETMA standards inorganic cement. In accordance with RETMA standards;
overall tolerances are $\pm 5 \%$ for resistors of $50 \Omega$ and overall tolerances are $45 \%$ for resistors of $50 \Omega$ and
higher. For resistors of $49.9 \Omega$ and lower, overall toler. ances are $\pm 10 \%$.

SERIES PR-5-F-Kated 5 watts. $\mathbf{s}^{\prime \prime \prime}$ dia. by $1^{\prime \prime}$ long. Lead wires and timned lugs. Standard packing- 10 per carton.
SERIES AC-10-F—Rated 10 watts. ${ }^{5} 6^{\prime \prime}$ dia. by $13 / 4^{\prime \prime}$ long. Lead wires and timned lugs. Standard lacking-10 per carton.
SERIES AC-20-K—Rated 20 watts. $9^{\prime \prime \prime}$ dia. by $2^{\prime \prime}$ long. Lead wires and tinned lugs. Standard Packing-5 per carton.
SERIES A-25-K—Rated 25 watts. $9^{9 \prime \prime}$ dia. by $21 / 2^{\prime \prime}$ long. Supplied with mounting brackets. Standard Packing-lndividually Boxed. SERIES K-40-N-Rated 40 watts. $3 / 4^{\prime \prime}$ dia. by $31 / 2^{\prime \prime}$ long. Supplied with mounting brackets. Standard Packing-Individually Boxed. SERIES K-50-N—Rated 50 watts. $3 / /^{\prime \prime}$ dia. by $41 / 2^{\prime \prime}$ long. Supplied with mounting brackets. Standard Packing-Individually Boxed. SERIES K-80-N—Rated 80 watts. $\mathbb{K}^{\prime \prime}$ dia. by $61 / 2^{\prime \prime}$ long. Supplied with mounting brackets. Standard Packing-lndividually Boxed.
"GREENOHM JR." SERIES C4GJ-Inoxpmive coramic•case re sistors. Wire-wound on spun plass fiber core. (ement-filled ceramic case. Rated 5 watts. $1^{\circ \prime \prime}$ dia. by $1^{\prime \prime}$ long. $11 /$ " $^{\prime \prime}$ axial pigtatil leads. Standlong. $11 / 2$ axial pack.-10 per carton.
"GREENOHM JR." SERIES C7GJ-Same construction as series C4 GJ. Rated 10 watts. ${ }^{6}{ }^{6 \prime \prime}$ dia. by $13 / 4 "$ long. Standard Packing-10 per carton.

SERIES K-100-W-Rated 100 watts. $11 / 8^{\prime \prime}$ dia. by $61 / 2^{\prime \prime}$ long. Supplied with mounting brackets. Standard Packing-lndividually Boxed. SERIES K-160-W-Rated 160 watts. $11 / 8^{\prime \prime}$ dia. by $81 / 2$ long. Supplied with mounting brackets. Standard Packing-lndividually Boxed.
SERIES K-200-W-Rated 200 watts. $11 / 8^{\prime \prime}$ dia. by $101 / 2^{\prime \prime}$ long. Supplied with mounting lorackets. Standard Packing-individually Boxed.

"GLASOHM"* FLEXIBLE RESISTORS

Fixed wire-wound resistors on glass filre core with flexible woven glass biler casing. Made up to any length on order. A substitute for a wide range of carbon resistors. Standard yries $1^{\prime \prime}$ lony with $2^{\prime \prime}$ pigtail leads, is" dia. RETMA color coderi. RETMA overall tolerances are plus/minus $10 \%$.

LIST PRICE $\$ 0.30$
Standard Packing: 10 per carton.

## "GREENOHM"* RESISTOR KIT

Wall Card holding 20 most popular sized 10 watt "Greenohm" resistors. As units are removed, value appears on card for reordering. Metal clips afford easy mounting of units replaced. Dimensions: $101 / 2^{\prime \prime} \times 12^{\prime \prime}$.

Wall card contains Wire-Wound Fixed Power Resistors as follows:

Cat. No. GK-1................. LIST PRICE $\$ 11.00$

## POWER RESISTOR DECADE BOX

The Resistance Decade Box Model No. 2401 allows changing resistance at a flip of the switch in a working circuit. Any value obtainable from 1 ohm to 999,999 in steps of one ohm and at a maximum power rating of 225 watts using a maximum of 1000 volts 1.C. or 660 volts A.C.

Resistance changing switches are of the type that prevents a resistance breakdown between steps, thus protecting delicate meters and measuring instruments in the circuit. Pointer knobs indicate at a glance the resistance value knobs indic
being used.
Clarostat "Greenohm" resistors are used

throughout. These are inorganic-cement-coated wire-wound power resistors. The resistors are mounted on rigid metal supports. A baffle plate separating the resistor bank from the switch assembly protects the latter against heat.
The heavy-gauge metal case is finished in frosted gray wrinkle, with an etched black-and-aluminum front panel. 13 in . long; $81 / 2$ in. deep; $53 / 4$ in. high. Weight, 11 lbs.
SUGGESTED USES: Resistance determination. Load Resistance. Meter Multiplier. Calibrating Meters. Providing any desired ohmage as a universal power resistor.

SINGLE MAGNET TYPE TV-2
For all tubes requiring only one bend in beam, either electromagnetic or electrostatic, as listed below:

WARD LEONARD

## 25-Watt - 50-Watt

The Ward Leonard 25-watt (Type 25R) and 50-watt (Type 50R) Type Rheostats are especially suited for use in electronic and electrical circuits where gradual and positive resistance change is essential. Balanced contact arms, self-lubricating metal graphite contact shoes, and no backlash in the drive shaft combine to assure uniform contact pressure and smooth operation.

Standard shaft length for back-of-board mounting on $1 / 4^{\prime \prime}$ panel.

## 100-Watt - 150-Watt

The Ward leonard 100-watt (Type 100R) and 150-watt (Type 150R) Ring Type Rheostats are of sturdy construction for electrical applications, such as control of fractional h.p. motors, rectifiers, voltage regulators, and some electronic circuits, such as filament and battery control.

Copyright by U. C. P., Inc.

TYPE IOOR

Radio's Master - 19th Edition

Wire wound resistors, sfurdy construction, using low temperature coefficient materials. Coated with Ward Leonard's own crazeless Green Enamel.

## OTHER STOCK

 RESISTORSPloque Type - Available in three sizes, 25 -watt, 50 -watt, and 150 -watt.
Dise Type - Available in 24 . waft size.
Non-Inductive Type - Available in three sizes, 35-watt, 80 watt, and 160 -watt.

For camplete information on all our stock resistors ask for our Catalag D-130.

## RLUE SHAFT RADIOHMS®

The most widely accepted line of 15/16" diameter carbon-type confrols, constructed to meet exacting radio, television, and industrial standards. Switch types are tested to assure instant, smooth, positive operation. Blue, anodized aluminum shafts, $3^{\prime \prime}$ long with universal mill. Rating $1 / 2$ watt. Type BSK units have $21 / s^{\prime \prime}$ brass split-knurl shafts. Switches are universal DPST, easily wired for SPST or 3-wire use.

## TYPE "AB" ADASHAFT RADIOHMS® SELECT THE CONTROL <br> ADD-A-SHAFT TO. MEET YOUR NEEDS

Adashaft Controls are now built in the popular Madel " $B$ "15/16" construction. The basic control unit is constructed with a patented stub shaft . . . usable just this way in many cases as a short, screwdriver slotted unit. A selection of nine basic shaft types are available, ranging from $3 / \mathrm{s}^{\prime \prime}$ to $10^{\prime \prime}$ in length, including auto types, insulating nylon and many others. This original, patented Centralab construction permits instant locking . . . resulting in a solid, integral, well aligned unit. There is no price premium on Adashaft . . . you pay for exactly what you need. After adding the required shaft, the units may be converted to switch type with the new
 "Fastatch" $\dagger$ type KB line switches. All "AB"' characteristics same as Model B. Packagedsingly including all data.

## CONTROLS (Cont'd)

MODEL "A" 1 WATT PATENTED NON-RUBBING CONTACT CONTROLS

Wall type resistor element provides one-third longer effective resistor length assuring low noise level, closer taper tolerance, double load carrying ability. Patented non-rubbing contact eliminates all friction between resistance element and contacting member assuring accuracy . . . the resistance strip CAN'T wear out.

STANDARD RESISTANCE TAPERS

## SNAP-TITE* REPLACEMENT CONTROL For speed-servicing 4 t "hidden" volume controls

 The revolutionary new Centralab control with amazing time-saving features:- SNAP-TITE is installed by just pushing it into the chassis mounting hole. It holds itself in place.
- No tools needed for mounting; no nuts, lockwashers, or any other hardware. A clean, fast replacement.
- Six spring clips grip the panel for positive, non-twist mounting.

Replaces any standard control type. (One or two locating lugs.)

- Shaft is molded, high-strength polystyrene, fingertip knurled and slotted for screwdriver adjustment. Extends $1 / 2^{\prime \prime}$ from face of mount. ing surface.
The ten values below will replace $75 \%$ of current rear-end or "hidden" television controls:

*Trademark

## THE COMDENTROL $\dagger$

The COMPENTROL is a volume control and special Printed Electronic Circuit network designed to better reproduce the apparent bass and treble response of amplifiers, radio, and television sets when volume is at low level. For use in radio sets ( 5 or more tube AC or DC), audio amplifiers, or phono combinations.

## NEW FASTATCH*

DUAL CONCENTRIC CONTROL SYSTEM
No tools needed . . .

Centralab's new system of dual concentric control replacement saves stocking and availability "headaches" for radio, black-and-white and color television controls. The unit is ideal also for manufacturers and laboratories that need special dual concentric controls. Nothing to bend, no tools required for assembly. Built with extremely popular, patented "Fastatch" construction, these controls are completely guaranteed by Centralab against defects in workmanship.

- Fastatch Duals are completely assembled, tested, and guaranteed front and rear units, not "put-together" controls. You don't do the manufacturer's work.
- No extra tools needed - the units snap together.
- Closely held tolerances, some more critical than original manufacturers' specifications, insure perfect fit and operation of front to rear, inner to outer shafts.
- Precision made front and rear controls are stacked separately. Instead of 400 units, just 126 cover all current and FUTURE dual concentric specifications.
- By checking popularity listings of Fastatch Duols, a small stock of controls for popular sets in your area can be maintained. With a minimum investment, you can have the correct dual control for any replacement needed.

FASTATCH DUAL
Outer shaft is $3-5 / 16^{\prime \prime}$ long from mounting surface, with double-fluted mill . . . brass for quick cutting to proper length. Use for single or double flat or round shaft. Scores make cutting for single or double slot easy.

FRONT UNIT

## FASTATCH DUAL - REAR UNIT

List Price $\$ 1.60$ - F or R

Distinctive blue aluminum inner shaft is $33 / 4^{\prime \prime}$ long from mounting surface. Easily cut to proper length. Diameter, $3 / 16^{\prime \prime}$ with . $156^{\prime \prime}$ flat. Fits . $187^{\prime \prime}$ or $.202^{\prime \prime}$ flat shaft knob - spring adapter furnished for other knob types convert to switch type with type KB switches listed on page R-40. Front and rear units.

# "Nobleloy" metal flem resistors 

NF-Continental "Nobeloy" type NF is a metal film miniature precision resistor. Metallic resistance element is deposited on a low loss ceramic carrier. A layer of vitreous enamel protects metal film against unusual atmosphere conditions. Axial leads are firmly fastened to silver contact bands. Initial accuracy and high stability make these resistors best suited for critical applications. Primarily designed to meet MIL-R-10509A specifications. Color coded to RETMA standard values.
$\mathbf{X}$ - Continental "Nobleloy" type X metal film resistors have radial leads firnly affixed to extremely low resistance metal contact films to reduce contact resistance. This type of design with hollow center permits greater heat radiation to withstand overloads, and possesses excellent resistance stability under adverse operating conditions. Resistance and tolerance are marked on each unit. Coated with a gray colored enamel.
PX-Continental "Nobleloy" type PX metal film resistors are constructed the same as type X . A different improved alloy resistance film is employed to allow for better temperature coefficient. Resistance and tolerance are marked on each unit. Coated with an orange colored enamel.

Meet JAN-R-11 Specifications
Low Noise Level Small Size Insulated
Continental's "CARBOMITE" type M resistors are manufactured by the most exacting standards to produce a stable and rugged resistor capable of operating at maximum efficiency in any circuit. All resistors are marked with resistance in addition to the RETMA code. Standard packages are 10 and 50 per item in all three sizes. They are also available in the NEW "RESIST-O-FILE" package consisting of five resistors of a value and size mounted on a $3 \times 5$ indexed file card. These resistors mounted on a card are coded as MR. They are available in standard boxes of 10 cards per value.

| Resistance Range | List Prices |  |
| :---: | :---: | :---: |

| 10 ohms to 22 megohms | .66 | .33 |

## RESIST-O-FILE CABINETS

Resist-O-File type MR (carded resistors) are available in a handy assortment contained in a $3 \times 5$ card cabinet. Each cabinet contains the most popular resistance values used.
CODE MCI $1 / 2,1 / 2$ Watt, ( 200 resistors) 1 card each of: 10 ohms, $15,22,33,47,68,100,150,220,330,470,680,1000,1500$, $2200,3300,4700,6800,10 \mathrm{~K}, 15 \mathrm{~K}, 22 \mathrm{~K}, 33 \mathrm{~K}, 47 \mathrm{~K}, 68 \mathrm{~K}$, $150 \mathrm{~K}, 220 \mathrm{~K}, 330 \mathrm{~K}, 680 \mathrm{~K}, 1.5 \mathrm{Meg}, 2.2 \mathrm{Meg}, 3.3 \mathrm{Meg}, 4.7 \mathrm{Meg}$, 6.8 Meg , and 10 Meg .2 cards each of $100 \mathrm{~K}, 470 \mathrm{~K}$ and 1 Meg .

CODE MC1, 1 Watt, ( 200 resistors) same values and quantities as code $\mathrm{MCI}^{\mathrm{I}} / 2$ assortment.
CODE MC2, 2 Watt, ( 150 Resistors) 1 card each of: 10 ohms, $15,22,47,68,100,150,220,330,470,680,1000,1500$, $2200,3300,4700,6800,10 \mathrm{~K}, 15 \mathrm{~K}, 22 \mathrm{~K}, 33 \mathrm{~K}, 47 \mathrm{~K}, 68 \mathrm{~K}$, $100 \mathrm{~K}, 150 \mathrm{~K}, 220 \mathrm{~K}, 330 \mathrm{~K}, 470 \mathrm{~K}, 680 \mathrm{~K}$, and 1 Meg .

The cabinet is furnished free, you pay for the resistors only. Shipping weight 8 lbs.

## "WM" TYPE WIRE WOUND RESISTORS

Resistance Wire Molded in Bakelite Axial Leads
Soldered Connections RETMA Color Coded
Continental type WM resistors are wound evenly to prevent shorting of turns. A minimum of .0015 inch wire is used for the winding. The terminals are securely and permanently connected to the winding. They are resistant to moisture. The WM resistor is recommended for circuits requiring very low resistance which is not ordinarily available in the carbon style. Packaged in boxes of 10 or 50 each.

| Type | Wattage | Size |

CONTINENTAL CARBON, INC.

## AUTO RADIO SUPPRESSORS

CONTINENTAL SUPPRESSORS have been subjected to years of laboratory development and actual road service. They effectively remove noise interference from spark discharge at the plugs and high-tension distributor - yet do not in any way affect the motor car ignition system.

They have mechanical strength to stand the most severe scrvice. The resistance value of 10,000 ohms has been scientifically determined. Sparking across the terminals is eliminated by careful shaping of the electrodes and cases.
The S-19, S-21 and S-23 Suppressors are equipped with a removable terminal nut for spade type mountings.

## VITREOUS ENAMELED RESISTORS

## Fixed Wire-Wound Types

LECTROHM Resistors are manufactured from the highest quality materials obtainable and are rated according to RTMA standards. They are rugged, dependable, accurate-quality components that will give long, trouble-free service. Mounting brackets available for $10,20,50,80,100,160$ and 200 watt units.

## LECTROHM IS CREATING NEW DESIGNS AND MATERIALS IN WIRE WOUND RESISTORS FOR NEW ASSEMBLY METHODS

In addition to supplying the electronics industry with a superior vitreous enameled wire-wound power resistors in the familiar sizes and ratings, LECTROHM is producing whole new groups of types, each designed to solve a special problem. Miniaturization and printed circuit restrictions in space and ventilation no longer are complicated by conventional power re-
sistor size standards. New coating materials and winding methods developed by LECTROHM permit an infinite variety of configurations yet retain operating and life characteristics expected of the finest grade vitreous enameled types. LECTROHM engineers will fit the resistor size and shape to your design.

## TYPICAL LECTROHMS

 FOR PRINTED CIRCUITSOther styles quickly designed for your individual space limitations.

3 to 25 watts. $\quad 10$ to 25,000 Ohms.

LECTROHM AXIAL LEAD WIREWOUNDS
For added convenience in mounting in many types of assembly.

$$
1 \text { to } 10 \text { watts. } \quad 10 \text { to } 25,000 \text { Ohms. }
$$

## LECTROHM ABOVE CHASSIS TYPE

More efficient use of space designed to eliminate heat beneath the chassis. Lectrohm engineers will create resistors to fit your available space.

5 to 25 watts. 10 to 15,000 Ohms.

NEW LECTROHMS FOR UTMOST ECONOMY
Competing in price with sand coated types, but offering a new standard of moisture resistance and long life performance.
5 to 20 watts. 10 to $\mathbf{1 5 , 0 0 0} 0 \mathrm{hms}$.

RIB-ON-EDGE LECTROHM (STANDARD SIZES AND VALUES)
155 to 420 watts.
06 to 22 Ohms.

VITREOUS ENAMELED LECTROHM-FERRULE TYPE (STANDARD SIZES AND VALUES)

13 to 190 watts.
To 100,000 Ohms.

## UNMOUNTED DECADE RESISTANCES

In response to a demand from engineers, manufacturers and physicists who design and construct their own eledrical measuring instruments, we have unade the Shallerose Unmounted Decade Resistances available. They are of the same construction as those used in the popular Shalicross Resistance Decades described above and consist of ten Shallcross Resistors mounted on a ceramic instrument switch.

## SHALLCROSS

## No. 6100

FAULT
LOCATION WHEATSTONE BRIDGE

Resistance range 1 ohm to 1.011 megohms

## SPECIFICATIONS

APPIICATIONS-Measures resistance from 1 ohm to 1 megohm. Locates grounds, crosses, opens, and shorts by Murray, Varley, Hilborn, or Fisher Loop and Capacitance tests.
ACCURACY-Overall- $\pm 0.1 \%+0.01$ ohm; Ratio resistors$\pm 0.05 \%$; All others- $\pm 0.1 \%$.
RHEOSTAT ARM—Four decades. 10,110 ohms in 1 ohm steps. Can also be used as a resistance hox.
GALVANOMETER-Kugged Shallcross galvanometer is built-in. Sensitivity 1 micro-amp. per mms scale division.
SWITCHES-Shalleross moided phenolic instrument switches. Pure nickel contaets. beryllium copper brushes.
CASE:-Light weight aluminum carrying-type case with battery compartment and removal lid.
DIMENSIONS-Length $878^{\prime \prime}$, width $738^{\prime \prime}$, height $5 \%^{\prime \prime}$.
WEICHT-Approx. 8 lbs. PRICE- $\$ 175.00$.

* Does not include knob or dial.

MOUNTING: Single $8 / \mathbf{B}^{\prime \prime}$ Hole Mounting-Panels up to $3 /$ /f" $^{\prime \prime}$ Thick. All of the above are available with aluminum dust cover, shield, and isolated shaft at $\$ 3.00$ additional.
K noh 1916-1 (illustrated): $\mathbf{\$ 0 . 2 5}$ additional and aluminum dial 0-10 4522-1 $\$ 0.70$ additional.
specifications

## SHALLCROSS ROTARY SELECTOR SWITCHES <br> SELECTOR SWITCHE

Like other Shalleross instrument components, these Rotary Selector Switches are designed to cover a very wide field of application in both shorting and non-shorting types, and can be ing and non-shorting types, and can be Details on any type for practically any application on request. Suffixes $B$ and S denote Brass and Silver contacts and contact arms. Write for Specification Sheet SS.6.

These Shallcross Features Mean better performance • BIGGER VALUE
$\checkmark$ Off position attenuation well in excess of 100 db.

- $25 \%$ to $50 \%$ fewer sol. dered joints.
$\checkmark$ Noise level ratings that are factual. ( 130 db or more below zero level).
d Non-inductive Shallcross precision resistors used throughout assure flat attenuation to and beyond 30 kc .
- Types and sizes engi. neered for all needs. Artenuation accuracies of $1 \%$, resistor accuracies of $0.1 \%$, on special order.
Shallcross Audio Attenuators are available in either varia"le or fixed units, the former often being seferred to as a "control" and the latter, as a "pad".
Controls are available with as few as 5 steps or as many as 32 steps with an attenuation as small as $\% .1 \mathrm{db}$ per step. The total attenuation for a single control does not exceed 125 db since such high attenuation approaches the noise level of the switching mechanism.
The complete story of Shallcross attenuators may be found in Shallcross Engineering Bulletin \#4, copies of which are available on request. Specifications and prices are given below for a few of the most popular variable attenuators.
IMPEDANCE: $150,500,250 / 500,600$ ohms, except potentiometers, which are 100,000 and 250,000 ohms.
RESISTORS: All nan-inductively wirewound, $\pm 5 \%$ tolerance, except types preceded with "C.", which are composition selected to $\pm 5 \%$.
ATTENUATION: Increases for counter-clockwise rotation of knob end of shrift.
FREQUENCY RESPONSE: Flat over entire audio range.
SWITCH MECHANISM: Multi-leaf wiper arms, collector rings and contacts available in tarnish rrsistant silver alloy or brass. Noise level -130 db .
DETENT: Indexing mechanism available on any unit for $\$ 0.75$ list Back of panel depth is then increased " 10 ".
DIALS: $\$ 1.50$ list each additional.
KNOBS (VA-16906): $\$ 0.60$ list each additional.

## VITREOUS ENAMELED RHEOSTATS

## CLOSE CONTROL RHEOSTATS

## Underwriters' Laboratories Reexamination Service Listed

For many years the Ohmite line of ten wirewound, vitreous enameled rheostats, ranging from 25 to 1000 watts in size, has been the most extensive available to industry. Six of the most popular sizes have been carried in stock by Ohmite Distributors and at our factory. Now, the other four sizes, the Model G, 75 watts; Model P, 225 watts; Model T, 750 watts; and the Model U, 1000 watts are available from stock, thus making the entire line of ten sizes quickly obtainable for design and production needs and for emergencies.
FEATURES OF CONSTRUCTION: Ohmite rheostats are designed to produce permanently smooth, close control. The construction is all ceramic and metal; there is nothing to smoke, char, shrink, or shift. All models have insulated shafts with provision to keep the rheostat from turning on the panel. The resistance wire is wound over a solid ceramic core. Each turn is a separate resistance step and is locked against shifting by vitreous enamel. The core and base are also bonded by vitreous enamel. The pivoted universal-action-mounted contact brush is of copper-graphite or silver-graphite on the heavier current rheostats. It rides upon a large flat surface and assures perfect contact without wear on the wire. Pressure

## MODEL "H", Series A - 25 WATT

Diameter $19^{\prime \prime \prime}$ "-Depth behind panel $13 / 8^{\prime \prime}$-Shaft $1 / 4^{\prime \prime}$ diameter. | 0320 | 125 | . 630 | T. 03 |  |  |  |  |

at the contact and at the center lead are independent. The construction is patented under U. S. Patent No. $1,942,495$ and Re-issue 19607; other patents pending. Ohmite Rheostat Models H, J, K, L, and N, all marked Series A, are listed under the Underwriters' Laboratories Reexamination Service.

RATING: The current carrying capacities shown in the tables are for use in free air; when units are enclosed, these currents should be reduced possibly as much as $30 \%$ to $50 \%$, depending upon the degree of ventilation. The rated current will cause the rheostat to dissipate its rated wattage when the full resistance is in the circuit.

Model " $L$ "

## MODEL "I'", Series A - 150 WATT

Diameter $4^{\prime \prime}$-Depth behind panel $2^{\prime \prime}$-Shaft $1 / 4^{\prime \prime}$ Diameter. Rota tion $300^{\circ}-$ Mounting for panels up to $1 / 4^{\prime \prime}, 3 / s^{\prime \prime}-32$ Bushing and Hex. Nut or two $10-32 \times 3 / 4$ "flat head screws, mounting centers $7 / s^{\prime \prime}$ each side of center of shaft on line perpenditular to center ter minal.-Stock No. 5150 Knob Supplied.

## OHMITE "LITTLE DEVIL"® RESISTORS

Ohmite "Little Devils" are full $1 / 2$ Watt, 1 Watt and 2 Watt Insulated Composition Resistors and can be used at their full wattage ratings at $70^{\circ} \mathrm{C}$. ( $158^{\circ} \mathrm{F}$.) ambient temperature. They meet requirements of specification JAN-R-11.
"LITTLE DEVILS" are available from stock in $1 / 2,1$ and 2 watt sizes with $\pm 5 \%$ or $\pm 10 \%$ tolerance. The standard RMA values, 10 ohms to 22 megohms can be furnished. In the 1 watt size, $\pm 10 \%$ tolerance values as low as 2.7 ohms are available from stock.

## Stocked in RETMA Values $\pm 5 \%$ or $\pm 10 \%$ Tolerance

(Figures in bold type are $\pm 10 \%$ RETMA values. All values except (*) available in $\pm 5 \%$ tolerance.)

High quality, small size, wire-wound resistors ideal for voltage dropping, bias units, bleeders, etc. They're extrasturdy, all-ceramic, vitreous enameled. These all-welded construction units have welded high-strength alloy terminals. For perfect electrical connection, the resistance wire is welded to the terminal. They give time-proved protection against shock, vibration, heat and humidity. Their long record of continuous trouble-free service--their wide use in all climates of the world -prove their complete reliability and economy. All units can be conveniently mounted by means of their $1^{1 / 2 \prime \prime}$ tinned wire leads.

## OHMITE R.F. PLATE CHOKES

This series of seven Ohmite single layer wound solenoid radio frequency plate chokes covers the entire frequency range of 3 to 520 megacycles. The four highest frequency chokes are wound on low power factor plastic cores while the other three units are wound on steatite tubes. Windings are insulated and protected by a moisture-proof coating. The single layer winding is designed to avoid adverse harmonic effects within the recommended operating range and also prevents breakdown from high r.f. potentials.

Non-magnetic Brackets Furnished with Z-7. The Z-14 and $Z-28$ are rated at 600 ma . All others 1000 ma .

## 2 WATT MOLDED COMPOSITION POTENTIOMETER - TYPE AB

## LITTLE DEVIL® RESISTOR ASSORTMENTS FOR SERVICE USE

Serviceman's assortments of 150 Ohmite "Little Devil," $1 / 2$-watt, or 125 , 1-watt or 2 -watt insulated composition resistors, in the 40 values ( 10 ohms to 10 megohms) most frequently used by servicemen. The assortment is offered at the price of the resistors alone-the cabinet is furnished without extra cost! Cabinet is only $9^{\prime \prime}$ long, $43 / 4^{\prime \prime}$ high, and $5 \frac{1}{4} 4^{\prime \prime}$ deep.

## NEW OHM'S LAW CALCULATOR

Redesigned! This new, improved version of the famous Ohmite Ohm's Law Calculator - popular the world over with servicemen, engineers and students - now has scales for solving parallel resistance problems, AND a standard slide rule. More useful than ever! With
 one setting of the slide the calculator gives the answer to any Ohm's Law problem-reading directly in ohms, volts, amperes, and watts. Three of the new scales on the back provide a quick, one-setting means of solving parallel resistance problems. The slide rule scales will multiply, divide, find squares, and square roots.
Ohm's Law Calculator (Cardboard) ..........Net Price $\mathbf{\$ 0 . 2 5}$
Ohm's Law Calculator (Plastic)
Net Price 1.50

The Type AB Potentiometer is an exceptionally high quality unit designed especially for industrial, laboratory, radio service and other uses where reliability is particularly important. Because the resistor element is molded, the unit has an exceptionally large safety factor. The power rating of 2 watts is unusual for a unit of such small size. The unit has a very low noise level and low voltage coefficient. It will pass the ArmyNavy 200 hour salt spray test, specification AN-QQ-S-91. The single unit is $1-1 / 16^{\prime \prime}$ diameter and extends $9 / 16^{\prime \prime}$ behind the panel. The dual unit extends $1-3 / 16^{\prime \prime}$ behind the panel. The $2^{\prime \prime}$ long round shaft (including the $3 / 8^{\prime \prime}$ long mounting bushing) is available from stock on potentiometers with all three resistance tapers and on the dual unit. The screwdriver shaft with locking-nut is available from stock on the linear taper units only. A SPST switch, to be attached to the back of the control, can be supplied extra.

# SPRAGUE RESISTORS 

KOOLOHM ${ }^{\otimes}$ WIRE-WOUND RESISTORS

- Wound with wire which is insulated before winding with a flexible ceramic coating. This coating is impervious to heat as high as $1000^{\circ} \mathrm{C}$.
- Each resistor is "tropicalized" by a glazed ceramic outer coating and new type end seals which offer complete protection against moisture or any other climatic conditions
- May be mounted anywhere-even flat against chassis or grounded parts
- Exiremely high insulation resistance-10,000 volts from surface of ceramic jacket to inner resistance elements
- Insulated wire permits winding higher values in layers, which means much smaller physical sizes for each wattage rating
Insulated wire permits true "non-inductive" wound designs

NOTE: ALL NIT TYPES ARE NON-INDUCTIVE

## DALE PRODUGTS, ING. columbus, mebraska u.s.a.

HERMEIC SEAL - RUGGEDIZED DEPOSITED CARBON PRECIION RESISTORS

## The ultimate in precision under ALL conditions

- Completely sealled.
- Fully insulated.
- Non-Hydroscopic.
- Thermal Shock Proof.
- Ultra-high-frequency.
- Ruggedized construction.

DALOHM hermetic sealed ruggedized precision resistors are produced under most exacting methods of quality control. They are completely solder sealed in a newly developed envelope of non-hydroscopic ceramic. Ideally suited for use in U.H.F. equipment where only the optimum of quality may be tolerated, Ruggedized for incorporation into "snap-in" component clips. Production tested for resistance to thermal shock, salt-water immersion and humidity.

## DALE PRODUGTS, ING.

## FOR EXCEPTIONAL ACCURACY IN ANY LOW-HIGH RESISTANCE RANGE

Dalohm deposited carbon resistors are manufactured under a licensed agreement with Western Electric. The matchless stability and accuracy of these precision resistors are the result of years of intensive research and development. Dalohm deposited carbon resistors are manufactured by depositing pure carbon in crystalline form which is bonded to a selected ceramic core. They are intended for circuits calling for the accuracy and stability of wire wound resistors such as instrumentation, advanced electronics and critical television circuits but with the marked economy of carbon resistors.

Dalohm deposited carbon resistors are sealed from moisture by special silicone coating material having a high dielectric strength, excellent thermal conductivity, and offer high resistance to abrasion.

## DIMENSIONS OF DEPOSITED CARBON RESISTORS

DIMENSIONS OF RSE-TYPE RESISTORS

## "RUGGEDIZED" <br> RSE-Type Miniature POWER RESISTORS

DALOHM "Ruggedized" Precision Power Resistors not only answer the space problem, but the shock problem. They are designed for trouble-free performance under the most exacting and demanding conditions.
RSE-Type resistors are sealed in Silicone and housed in black metal tubing. (Suggested mounting clip: Atlas E-E Corp.) RSE-Type resistors have same tolerances and T.C. as RS Types.

PRECISION RESISTORS exceed applicable JAN and MIL specifications STANDARD TOLERANCE $\pm 1 \%$. TOLERANCES AS LOW AS $\pm .05 \%$ CAN BE HAD ON SPECIAL ORDER. TEMP. COEF. $0.00002 /{ }^{\circ} \mathrm{C}$.
Dale engineers and chemists have compounded a chemically inert material making possible these light weight precision resistors that surpass the requirements of applicable JAN and MIL specifications.
In addition to these resistors being completely impervious to the penetrating effects of salt ions, humidity, moisture, and corrosive gases and vapors, this new material in which the Dalohm precision wire wound resistors are encased has very high dielectric strength and due to its coefficient of expansion matching that of wire itself, it eliminates the possibility of distorted windings and shorted turns which are quite common in other types of resistors.
The superior quality of Dalohm precision wire wound resistors is assured through thorough testing, temperature cycling, salt water immersion, humidity, and overload tests. These are without a doubt the precision resistors for dependable and long life operation under the most adverse conditions.

Export Dept.: Pan-Mar Corporation, 1270 Broadway, New York 1, New York

Type A-25 - Will with. stand rugged treatment under the most adverse conditions. It has unusually smooth mechanical operation. The terminals, made of strong corrosion resistant alloy, are permanently welded to the winding form. The wound ring is made an integral part of the refractory base by vitreous enamel. The phosphor bronze actuating arm,
 with its graphite brush, gives smoothest action and excellent electrical control. Shafts are insulated. Three terminals permit either potentiometer or rheostat use; and our new high temperature gray enamel gives an added safely factor.

Types H-50, H-100, H-150 - These are our newest rheostats and they will give longer service and greater protection. They are designed for use under extremes of humidity and abnormal atmospheric conditions. The unique "buss bar" pype brush aufomatically adjusts ten. sion for complete, continuous contact. It eliminates backlash and prevents binding. It assures
 perfect contact with the entire winding surface. Our new high-temperature gray enamel bonding gives you an increased safety factor and betfer overall service. These improved rheostats are designed to comply with current standards of: (a) Military Specifications JAN-R-22. (b) R.T. M.A. (c) N.E.M.A. (d) "listed by Underwriters Laboratories, Inc."

RATING-current ratings shown for all Rheostats are for use in free air. When units are enclosed values should be reduced about $50 \%$.
Data on non-stock Rheostats-special shafts and bushings; values intermediate to those listed; tapered windings; tandem assemblies, efc., furnished upon request.

## FIXED VITREOUS ENAMELED RESISTORS WITH MOUNTING BRACKETS

Five stock sizes fill a greal variely of applications.
Ratings are in accordance with NEMA standards, being based on a temperature rise of $300^{\circ} \mathrm{C}$. in free air.
Data on types, sizes and values not listed herein, and for resistors with intermediate taps, :special mountings, etc., furnished upon request.

## ADJUSTABLE VITREOUS ENAMELED RESISTORS WITH MOUNTING BRACKETS

Emimodying features originated by Hardwick, Hindle, Inc., resulting in a Resistor possessing the many advantages of Vitreous Enamel Construction, plus an adjustable feature.
The winding is closely and evenly spaced, assuring ample insulation between turns. Where the winding appears exposed in the lrack, its underside is tightly embedded in the enamel, the upper surface only being exposed for contact with the adiustable band.
All sizes of Adjustable Resistors listed herein are furnished complete with mounting brackets and with one adjustable contact band.

Blue Ribbon resistors differ from tubular resistors in that they are wound on an elliptical core. An aluminum bar through the center insures more even distribution of heat, avoiding hot spots.
Our gray enamel eliminates crazing which results in failure of the resistive element due to moisture penetration from humidity, salt and other severe afmospheric condifions.
Mounting studs-corrosion and rust resistant -peened to the ends of the thru-bar conduct heat to the mounting surface. You can stack two or more units. Our method of fastening the fube to the thru-bar prevents loosening
In comparison with tubular units of equivalent wattage rating these resistors offer outstanding advantages: - Higher wattage rating par unit space requirement. - Reduction in space requirement. - Simple sturdy mounting single or stacked. - Light weight. - Lower inductance.
Designed for and manufactured in accord ance with JAN-R-26A specifications.

*This rating based on a maximum temperature rise of 300 degrees $C$. with the Resistor mounted horizontally on a $10^{\prime \prime \prime} \times 10^{\prime \prime} \times .040^{\prime \prime}$ steel plate supported horizontally $1 / 2^{\prime \prime}$ above a wooden surface.
When Resistors are mounted on a non-metallic base the nominal watt rating should be reduced by approximately $15 \%$.

## 10 and 20 WATT FIXED VITREOUS ENAMELED RESISTORS

Designed for radio service and replacement use-conservatively rated-wound upon Steatite Tube-combination lug and pigtail terminal connections. Vitreous

enamel insulation, insures proof against moisture. 10 watt and 20 watt sizes, in the range of resistance values shown.

## 5\% AND 10\% TOLERANCE-1/2-1-2 WATT RATINGS

G-H fixed composition resistors are of the highest quality and combine the desirable features of great mechanical strength, permanent electrical characteristics and minimum physical size for a given wattage rating. Leads ore differentially tempered to prevent sharp bends near the resistor body while still permitting ready forming to fit a particular arrangement.

G-H resistors are supplied in convenient packages having a perforated top section which permits the tops to hinge, (as shown in the illustration) or to be removed entirely. Since each resistor is held in an upright position by a honeycomb section within the lower portion of the box, the leads of all resistors remaining within a given container are exposed to view. Resistance value and tolerance indication are clearly marked on sides and top cover of the container. These features greatly facilitate stock location and stock control checking.
G-H maintains a complete stock of $5 \%$ and $10 \%$ tolerance resistors in all wattage ratings to insure rapid delivery on all orders.

## PAPER DIELECTRIC CAPACITORS

Custom manufactured to customers specifications. Can be supplied in any practical capacity, working voltage and tolerance. Containers and terminal arrangements may be in accordance with customers drawings.

Capacitors can be manufactured for AC or DC operation . . . . impregnated with Wax, Tensoil, ar in the stable, highly superior oil impregnant, G-H PERMANOL. Your inquiries are invited.

## CONSTRUCTION

The TRU-OHM power rheostat will provide smooth variation of resistance under the most severe operat ing conditions. The all ceramic-metal construction insures dependable service even at extreme operat ing temperatures. An extra deep core, on which the resistance wire is toroidally wound, means a more conservative power rating.
Types R-50, 75, 100 and 150 have an exclusive torsion spring assembly which provides uniform pressure of the contact brush against the winding at all times. Current flows from the brush through a flexible shunt wire to a large size slip ring. Positive, low-wear contact is maintained against the center terminal by an adequate compression spring. Back lash in the rotat ing assembly is reduced to a minimum by means of the design. A positive stop is provided at the extremes of rotation entirely independent at the contact arm assembly.

## SPECIAL FEATURES

TRU-OHM rheostats are available with many extras such as off positions, screw driver control, shaft as semblies for special mounting conditions, etc. Prompt engineering service is available for all special requirements. Knobs furnished upon request.

## SLIDEOHM WIRE-WOUND

Slideohm Resistors are for use in any application where it is necessary or desirable to have one or more intermediate resistance values; or in circuits that need to be changed from time to time to meet varying electrical conditions. Slideohm Resistors are built of the highest grade low temperature coefficient materials, and are coated with tough crazeless Vitreous Enamel.

Adjustable resistors combining adjustment to any resistance value within unit's range, with positive, permanent, non•fluctuating qualities of wire-wound resistor. Each Slideohm Resistor is provided with horizontal mounting brackets and one adjustable contact slider.

## WATT RATINGS

Nominal Watt ratings for Slideohm Resistors apply when the entire resistor is in the circuit. For most practical purposes the watt rating for each part of the resistor is approximately proportional to the amount of the resistance that is in the circuit.

Mounting brackets are furnished with all Slideohm Resistors.

Price of resistor includes brackets and one adjustable band.

## WIRE-WOUND VITREOUS ENAMELED FIXED RESISTORS

TYPES 931-933

Compact genuine wire-wound, vitreous-enamel. Correctly designed, highest quality materials used throughout. Note these features:

1. Crack-proof refractory tubing for the support. Adequate heat dissipation.
2. Quality resistance wire precisely spaced, tension wound.
3. Copper terminal band clamped to tubing. Wire ends wrapped and brazed around raised ear.
4. Heavy vitreous-enamel coating for permanent seal against moisture, oxidation and mechanical damage.
5. Pig-tajl of stiff wire 2 in. long soldered to terminal band for posi-
tive, non-breakable connection.

\$Operated at low temp., rated at 7 watts.

INSULATED MOLDED CARBON RESISTORS
TYPES 1097-1098

Small, nuiseless, vibration-proof. Crack-proof molded casing around molded carbon resistince element. Tinned copper pig-tail leads 2 in. long. Rr-sists humidity effects. Ideal for AVC circuits, high-gain long. Rr-sists humidity effects. Iaeal for avC circuits, high-gain amplifiers. RTMA color-coded; stamped with
cision tested. Standard tolerance $\pm 10 \%$.
 TYPE 1098-1 Watt-Size: $1 / 4^{\prime \prime} \mathrm{x} 3 / 4^{\prime \prime}$ Ig........... List $\$ 0.25$ TYPE 1099-2 Watt-Size: $3 / 8^{\prime \prime} \times 1$ " 8 " $\mathrm{Ig} . . . . . . .$. List $\$ 0.33$

Carbofilm RESISTORS
}

## PRECISION RESISTORS MADE WITH MATCHLESS ACCURACY

Made under licensed agreement with Western Electric, these precision resistors are the result of years of intensive research in developing components with extreme accuracy and stability. Carbofilm resistors are intended for circuits calling for the accuracy and stability of wirewound resistors with the marked economy of carbon resistors. They serve a real need in test equipment and laboratory instruments. All in all, Carbofilm resistors meet the requirements of accuracy, stability and economy.

The Carbofilm resistors are a carbon deposit type and are available in the following standard or jobber stock sizes with the resistance value shown in the listing.

Packed and sealed in plastic tubes for your protection.

STANDARD NUMBERS
Carboflm Resistors are available in the following standard or jobberstocked sizes, and in the resistance values shown in the listings:

| Type | Sizes | Min. Ohms | Max. <br> Megohms | Peak <br> Volts* |
| :--- | :---: | :---: | :---: | :---: |
| CP-1/2 watt | $0.230 \mathrm{D} \times 1 / \mathrm{L}$ | 100 | 5 | 1500 |
| CPL- $/ 2$ watt | $0.230 \mathrm{D} \times 1 \mathrm{~L}$ | $5,100,000$ | 7.5 | 2000 |
| CP-1 watt | $0.293 \mathrm{D} \times 18 \mathrm{~L}$ | 100 | 15 | 2500 |
| CP.2 watt | $0.293 \mathrm{D} \times 2 \mathrm{~L}$ | 100 | 100 | 6000 |
| * Provided wattage rating is not exceeded. |  |  |  |  |

## WIRT co.

## WIRE WOUND ADJUSTABLE RESISTORS

WIRT Adjustable Resistors are space wound on low loss ceramic tubes to which the resistance wire is bonded, resulting in dependability and long life. Protection of the windings is afforded by the PHENOCOTE covering which is described fully on the preceeding page. One adjustable Slider Band, screw driver type, is furnished as standard. Bakelite knob type bands can be furnished on special order at slightly higher prices as shown below. These bands are made with small contact buttons located on the inside of the band so that a number of taps may be made without shorting out excessive resistance.

TABLE OF SPECIFICATIONS OF ADJUSTABLE RESISTORS

| Cat. No. | Sizes |  | Resistance Limits (Ohms) | $\begin{aligned} & \text { List } \\ & \text { Price } \\ & \text { (Ea.) } \end{aligned}$ | Accessories |  |  | Mount- <br> ing <br> Centers | Packing |

## WIRE WOUND FIXED RESISTORS

To satisfy the most exacting needs of the Radio and Electronic Industries, Wirt Fixed Wire-wound Resistors are regularly furnished in PHENOCOTE protective coatings, developed and steadily improved over a period of many years in the Wirt Laboratories. The resistor wire is space wound on low loss ceramic tubes. The PHENOCOTE covering is an exclusive organic cement coating offering maximum protection to the resistance winding against the detrimental effects of
 moisture, humidity and electrolysis. Absolutely inert chemically, it will not effect the most delicate windings. It is particularly recommended for fine wire sizes and all applications where the maximum temperature of the unit will not exceed $300^{\circ} \mathrm{F}$. These Resistors are universally used in the Radio, Electronic, Instrument, Public Address and Test Equipment fields.

TABLE OF SPECIFICATIONS OF FIXED RESISTORS

| Cat. No. | Watts | Sizes Phys. | Resistance Limits (Ohms) | List Price (Ea.) | Accessories Terminals | Mounting Brackets | Mounting <br> Centers | Packing |

## BALLASI TUBE FOR AUTOMATIC REGULAMON OF CURRENT AND VOLTAGE

T9 BULB

AUTOMATIC REGULATION WHAT IT 1S! AMPERITE is an automatic "rheostat" designed to keep the current in a circuit at a definite value, e.g., 0.5 amps . Should the supply voltage increase, the AMPERITE will autnmatically increase in resistance to take up the increaso in supply voltage. Since AMPERITE is a constant current device, it can only be used on a fixed load.

## SIZES:

T-5 $1 / 2$ L. Miniature. O.D. 1t"; seated hright. $23_{8}$ ". T-6 $1 / 2$ L. Miniature. O.D. $\beta_{6}^{\prime \prime \prime}$; seated height. $23{ }^{3}{ }^{2}$. T-9, Detal lase. U.D. 1 存"; Geated height, $3^{\prime \prime}$.

CHARACTERISTIC CURVE
Characteristic curve of a typical Amperite. Approximate curve of any other Amperite can be obtained by multiplying or dividing the current or voltage scale by any number.
We strongly recommend that you send us your speciflcations on special problems, and let us recommend the BALLAST TUBE you need.

## AMPERITE NUMBERING SYSTEM

In general, the AMPERITE number approxinately denotes the current-voltage threshold value:

| AMPERITE NIMMER | 3-4 | 3114 | 11-7 | 12-11 | 121111 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| THRESHOLD CLERENT | 0.3 | 0.35 | 1.0 | 1.2 | 1.25 |
| THRESIIOLD VOLTAGE | 4.0 | 4.0 | 7.0 | 11.0 | 11.0 |

|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |

## ADVANTAGES

Light . . Compact . . . No Moving Parts (Will withstand vibrations of 10 G min.) . . . Her metically Sealed (Not affected by altitude or humidity changes) . . . Can Be Changed as Easily as a Radio Tube . . . Operates Equally Well on AC or DC . . . Inexpensive.

## CAPACITIES AVAILABLE

Current values of 60 ma . to 5 amps; threshold voltage 0.4 to 40 V . Maximum dissipation per AMPERITE 50w per tube (ST19 bulb). Any number of AMPERITES with the same voltage range can be operated in parallel. AMPERITES should not be used in series.

## AMBIENT EFFECTS

Variations of $-50^{\circ}$ to $+70^{\circ} \mathrm{C}$. will change the current of an AMPERITE approximately $\pm 2 \%$ on the regulating portion of the curve.

## LIFE EXPECTANCY

Average life 2000 hours prox.; if AMPERITE filament is operated at black temperatureaverage life 5000 hours prox., depending on use.

## AGEING

AMPERITE Ballast Tubes may change ap. proximately up to $3 \%$ in current if aged for 4 t. 8 hours, at maximum voltage. They will change very little thereafter.

## POWER SUPPLIES

We strongly recommend, for any particular application, to fill and return one of our special problem sheets (ASP 343) and permit us to reconimend the inost suitable AMPERITE.

Power
Supply Dry Ceils 6 Volts 12 Volts 26 Volts 115 .Volts Supily
Vriation $2.2-3.0 \mathrm{~F} 5.5-7.5 \mathrm{~V} 10.0-14.0 \mathrm{~V} 22.0-30.0 \mathrm{~V} \quad 105-125 \mathrm{~V}$ Desired
on load 1.8.2.0V 3.9-4.1V 6.1-6.4V 17.5-18.5V 90-95V Required on
AMPERITE 0.4-1.0V 1.0-3.4V 3.9-7.6V $4.5-11.5 \mathrm{~V} \quad 15-30 \mathrm{~V}$ Current
Variation .29-.32a .29-.31a .29-.31a .29-.32a .28-.32a

The above chart shows the naximum load voltage for the gireu supply to obtain $2 \%$ regulation on load. Better regulation is obtainable by increasing the voltage across the AMPERITE. In general, the higher the percent of the supply voltage taken by the AMPERITE, the better the regulation.

| 1255/8 | 8 | 20 | 60 mmf . | .400" | $100^{\prime}$ | 250' | $500^{\prime}$ | $100{ }^{\prime}$ |

Construction: Each conductor, extra flexible stranded tinned copper, cotton wrap, . $020^{\prime \prime}$ "Hi-Tension" low capacity rubber, color coded, conductors twisted, braided tinned copper shield, cotton wrap, tough black rubber jacket overall.

For alternate put-up use code: $D=250 \mathrm{ft} ., E=500 \mathrm{ft} ., F=1000 \mathrm{ft}$.

## PLASTIC MICROPHONE CABLE SINGLE CONDUCTOR

GENERAL PURPOSE: For use with all lapel, crystal, ribbon and other impedance microphones. Use No. 1703 for LAPEL MICROPHONES. Use No. 1704 and No. 1706 for CRYSTAL, RIBBON and other IMPEDANCE MICROPHONES.

| No. | Size | Strand | Capacity Per Ft. | O.D. | Standard Put-up | Alternate Put-up |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1703 | 24 | 7/32 | 38 mmf . | .145" | $500^{\prime}$ | $100^{\prime}$ | $250{ }^{\prime}$ | 1000 |
| 1704 | 24 | 10/34 | 25 mmf . | .200" | $500^{\prime}$ | $100^{\prime}$ | 250' | $1000^{\prime}$ |
| 1706 | 20 | 26/34 | 39 mmf . | .175" | $500^{\prime}$ | $100^{\prime}$ | 250' | $1000^{\prime}$ |

Construction:
Single conductor flexible stranded tinned copper, polyethylene insulation, braided tinned copper shield, plastic jacket overall.

## TWO CONDUCTOR

GENERAL PURPOSE: For use with carbon and other low impedance microphones.

| No. | Cond. Size | Strand | Capacity Per Ft. | O.D. | Standard Put-up |  | terna ut-up |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1710 | 2 T22] | 16/34 | 32 mmf . | . $235{ }^{\prime \prime}$ | $500^{\prime}$ | $100^{\prime}$ | $250{ }^{\prime}$ | $1000^{\prime}$ |
| Construction: |  |  |  |  |  |  |  |  |
| Two conductors $22-16 / 34$ flexible stranded tinned copper, polyethylene insulation, color coded, conductors twisted, cushioned with fillers, cotton wrap, braided tinned copper shield, plastic jacket overall. |  |  |  |  |  |  |  |  |
| For alternate put-ups use code: $Q=100 \mathrm{ft.} \mathrm{D}=,250 \mathrm{ft.} F=,1000 \mathrm{ft}$ |  |  |  |  |  |  |  |  |

## PLASTIC INTER-COMMUNICATION CABLE

4 CONDUCTORS $(2$ Shielded-2 Unshielded)
general purpose: This cable is designed for general wiring from station to station where a shielded twisted pair is essential to eliminate cross talk.

| No. | Cond. | Size | Strand | 0.D. | Standard Put-up | Alternate Put-ud |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1243/4 | 4 | 22 | 7/30 | .315 ${ }^{\prime \prime}$ | $500^{\prime}$ | $1000{ }^{\prime}$ |

Construction: Four conductors 22-7/30 tinned copper, vinyl plastic insulation, color coded; tinned copper shield over two conductors, two conductors unshielded; plastic jacket overall.

## 3 CONDUCTORS (1 Shielded-2 Unshielded)

GENERAL PURPOSE: This cable is designed for general wiring from station to station where a shielded single conductor is essential to eliminate cross talk.

| No. | Cond. | Size | Strand | O.D. | Standard Put-ud | Alternate Put-up |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\overline{1242}$ | 3 | 22 | $7 / 30$ | .170" | $500^{\prime}$ | $1000^{\prime}$ |
| 1243 | 3 | 22 | 7/30 | .215 ${ }^{\prime \prime}$ | $500^{\prime}$ | $100{ }^{\prime}$ |

Construction: Three conductors $22-7 / 30$ tinned copper, vinyl plastic insulation, color coded; tinned copper shield over one conductor, two conductors unshielded; cotton braid overall (No. 1242), or plastic jacket overall (No. 1243).

For alternate put-up use code: $F=1000 \mathrm{ft}$.

## SHIELDED TWISTED PAIR CABLE

general purpose: Where small diameter is required for sound recording, photo electric cell circuits, public address systems, etc.

| No. | Cond. | Size | Strand | Standard <br> Put-up |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1261 | 2 | 24 | $16 / 36$ | $.115^{\prime \prime}$ | $1000^{\prime}$ |

Constrution: Two conductors 24-16/36 extra flexible tinned copper, $1 / 64^{\prime \prime}$ vinyl insula. tion, color coded, conductors twisted, very fine tinned copper shield overall.

## ARMORED DUPLEX SPEAKER CABLE

GENERAL PURPOSE: For P.A. systems, oil burner installations, automotive wiring, etc.

|  |  |  | Standard <br> No. |  | Cond. | Size | Strand |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Construction: Two conductors parallel, 18-16/30 stranded tinned copper, rubber insulated,
 color coded, lacquered cotton braid, galvanized steel armor overall.

For alternate put-up use code: $F=1000 \mathrm{ft}$.

## SHIELDED PHONO AND GRID WIRE

GENERAL PURPOSE: Extreme flexibility and limpness make this an ideal wire for phonograph pick-up arm cable and grid wire.

| No. | Cond. | Size | Strand | Insulation | 0.D. | Standard <br> Put-up | Alternate <br> Put-up |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1200 | 1 | 24 | $16 / 36$ | $.010^{\prime \prime}$ | $.080^{\prime \prime}$ | $1000^{\prime}$ | $100^{\prime}$ |
| 1201 | 1 | 24 | $16 / 36$ | $.010^{\prime \prime}$ | $.095^{\prime \prime}$ | $1000^{\prime}$ | $100^{\prime}$ |
| 1202 | 2 | 24 | $16 / 36$ | $.010^{\prime \prime}$ | $.115^{\prime \prime}$ | $1000^{\prime}$ | - |

Construction: No. 1200-Single conductor 24-16/36 extra flexible stranded tinned copper, vinyl plastic insulation, fine close tinned copper shield overall.
Per, vinyl plamic as No. 1200 plus cotton braid over shield.
No. 1202 same as No. 1200 except two conductors with shield overall.
For alternate put-ups use code: $Q=100 \mathrm{ft}$.

# ALPHA WIRE CORPORATION © 

## Construction:

Each conductor 22 AW/G tinned copper, plastic insulation, conductors color coded, twisted into pairs, plastic jacket overall.

For alternate put-up use code: $\mathrm{Q}=100 \mathrm{ft}$.

Each conductor 20-10/30 stranded tinned copper, 1/64" thermo plastic insulation, color coded, conductors twisted, brown cotton braid overall Alternate put-up use code:
$D=250 \mathrm{ft} ., E=500 \mathrm{ft} ., F=1000 \mathrm{ft}$.

## Construction:

Each conductor 18 AWG solid bare copper wire, thermoplastic insulation, color coded, conductors twisted, waxed cotton braid overall.

## Construction:

Nos. 1279, 1280: Each conductor 19 AWG solid tinned copper, $1 / 64^{\prime \prime}$ telephone compound rubber, heavy cotton braid (ridged for polarity) with specially treated compound to make it weatherproof for resistance against rain, anow, hail and cold.
Nos. 1279V, 1280V: Each conductor 19 AWG solid tinned copper, .024" plastic inaulation (ridged for polarity), conductors twisted.

## PLASTIC COMMUNICATION CABLE

(TWISTED PAIRS)
GENERAL PURPOSE: For use in connecting intercommunication systems, annunciators, telephones and wherever a multiple circuit hook-up is required SOLID CONDUCTORS

## BRAIDED COMMUNICATION CABLE

(TWISTED PAIRS)
GENERAL PURPOSE: For interior use designed for connecting inter-communication systems, annunciators, telephones, etc.

| No. | Pairs | Cond. | Size | O.D. | Standara Put-up | Alternate Put-up |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1276/2 | 2 | 4 | 22 Solid | .185" | $1000^{\prime}$ | $100^{\prime}$ |
| 1276/3 | 3 | 6 | 22 Solid | .210" | $1000^{\prime}$ | $100^{\prime}$ |
| 1276 | 6 | 12 | 22 Solid | .240" | $1000^{\prime}$ | $100^{\prime}$ |
| 1277 | 10 | 20 | 22 Solid | . $300{ }^{\prime \prime}$ | $1000^{\prime}$ | $100^{\prime}$ |
| 1277/13 | 13 | 26 | 22 Solid | $.360{ }^{\prime \prime}$ | $1000^{\prime}$ | $100^{\prime}$ |
| 1277/15 | 16 | 32 | 22 Solid | . $380^{\prime \prime}$ | $1000^{\prime}$ | $100^{\prime}$ |
| 1277/25 | 26 | 52 | 22 Solid | .445" | $1000^{\prime}$ | $100^{\prime}$ |
| 1277/50 | 51 | 102 | 22 Solid | .650" | $1000^{\prime}$ | - |

Construction: Each conductor 22 AWG solid tinned copper wire, two reverse serves paraffined, color coded, conductors twisted into pairs, then covered with an impregnated double paper wrap, and overall a cotton braid aturated with a moisture-proof, flame retarding, rodent-proof compound.

For alternate put-up use code: $Q=100 \mathrm{ft}$.

## LEAD-COVERED COMMUNICATION CABLE

(TWISTED PAIRS)
general purpose: For use indoors, outdoors, underground and in pipes for connecting inter-communication systems, annunciators, telephones, etc.

| No. | Palrs | Cond. | Size | O.D. | Standard Put-up |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1289 | 6 | 12 | 22 Solid | . $375^{\prime \prime}$ | $1000^{\prime}$ |
| 1291 | 10 | 20 | 22 Solid | . 450 " | $1000^{\prime}$ |
| 1293 | 16 | 32 | 22 Solid | . $510^{\prime \prime}$ | $1000^{\prime}$ |
| 1295 | 26 | 52 | 22 Solid | . $560{ }^{\prime \prime}$ | $1000^{\prime}$ |

Consfruction: Similar to Braided Communication Cable above, but with lead antimony sheath instead of cotton braid over the twisted pairs.

## LEAD SHEATHED CABLE

GENERAL PURPOSE: For P.A. systems, communications, traffic control, mines, railroads and many other uses where severe moisture conditions are encountered. For all outdoor use including underground and underwater.

| No. | Cond. | Size | O.D. | Standard Put-up |
| :---: | :---: | :---: | :---: | :---: |
| 1271 | 2 | 19 Solid | .325 | $1000^{\prime}$ |

## Construction:

Two conductors 19 AWG solld tinned copper, $1 / 32^{\prime \prime}$ "Hi-Tension" rubber, color coded, conductors twisted, pure lead sheath overall.

## PLASTIC INTER-COMMUNICATION WIRE

GENERAL PURPOSE: For connecting sound and inter-communication systems, general audio hook-up, etc.

| No. | Cond. | Size |  | O.D. | Standard Put-up | Alternate Put-up |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1793 | 2 | 22 Solid | 1 | .125" | $500^{\circ}$ | $1000{ }^{\prime}$ |
| 1794 | 3 | 22 Solid |  | . $130^{\prime \prime}$ | $500^{\prime}$ | $1000^{\prime}$ |

## Construction:

Conductors 22 AWG solid tinned copper, plastic insulation, color coded, conductors twisted, plastic jacket overall.

Construction: /
Each conductor 20-26/34 extra flexible stranded tinned copper, cotton wrap, 1/32" "Hi-Tension rubber, color coded, conductors twisted, cushioned with cotton fillers, cotton wrap, tough black rubber jacket overall.

For alternate put-ups use code: $D=250 \mathrm{ft} ., E=500 \mathrm{ft} ., F=1000 \mathrm{ft}$.

Construction:
Each conductor stranded bare copper, cotton separator, 1/32" rubber, color coded, conductors twisted, cushioned with jute fillers, $40 \%$ tough rubber jacket overall.

## RUBBER SHEATHED SERVICE CORD

## (UNDERWRITERS APPROVED)

GENERAL PURPOSE: For amplifiers, sound systems, speakers, vacuum cleaners, electric tools, washing machines, refrigerators, appliances, trouble lights, garage lamps or wherever a rough usage power line is required.

| No. | Cond. | Size | Type | Current <br> Carrying <br> Capacity | Voltage Rating | O.D. | Standard Put-up |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1951 | 2 | 18 | SV | 5 amps | 300 | .250" | $250^{\prime}$ |

| 1953/3 | 3 | 16 | SJ | 7 amps | 300 | .375" | $250{ }^{\prime}$ |
| 1954 | 2 | 18 | S | 5 amps | 600 | . $390^{\prime \prime}$ | $250{ }^{\prime}$ |
| 1955 | 2 | 16 | S | 7 amps | 600 | .410" | $250{ }^{\prime}$ |
| 1956 | 2 | 14 | S | 15 amps | 600 | .540" | $250{ }^{\prime}$ |
| 1957 | 2 | 12 | S | 20 amps | 600 | .605" | $250{ }^{\prime}$ |
| 1958 | 2 | 10 | S | 25 amps | 600 | .640" | $250^{\prime}$ |

Available with Addifional Conductors. Also other sizes.

Construction:
Two conductors paraliel, $18.41 / 34$ extra flexible bare copper, color coded, cotton serve, $40 \%$ bare copper, color coded, cotton serve,
tough rubber jacket overall. Slit in jacket to tough rabber jacket ove

[^66]
## E-Z STRIP LAMP CORD-TYPE POSJ

(UNDERWRITERS APPROVED)
GENERAL PURPOSE: For line cord on radios, lamps, electric clocks, food mixers and other small instruments and appliances.

| No. | Cond. | Size | Strand | O.D. | Standard Put-up |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1966 | 2 | 18 | 41/34 | .235 ${ }^{\circ} \times .130^{\prime \prime}$ | 100 |
| 1967 | 2 | 18 | 41/34 | .235" $\times .130^{\prime \prime}$ | $250^{\circ}$ |

## TWISTED PAIR TRANSMISSION LINE

 (WEATHERPROOF BRAID)GENERAL PURPOSE: For inter-com hook-up. Also suitable for low loss coupling between antenna and receiver as doublet style twisted lead-in.

| No. | Cond. | Size | Strand | O.D. | Standard Put-up |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1146 | 2 | 22 | 7/30 | .175" | $500^{\prime}$ |
| 1135 | 2 | 18 | 16/30 | .190" | $500{ }^{\prime}$ |

## ALPHA WIRE CORPORATION

## KINKLESS TEST LEAD WIRE

GENERAL PURPOSE: As test leads in analyzers, oscillators and all other types of testing apparatus or wherever an EXTRA FLEXIBLE insulated wire is required.

## DIATHERMY CABLE

GENERAL PURPOSE: Its extreme flexibility and tough rubber jacket give it long life. This cable is used as a lead on therapy apparatus, charging cable, battery lead, underground cable, etc.

| No. | Size | Strand | Insulation | O.D. | Standard <br> Put-up |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{1 6 2 3}$ | 14 | $104 / 34$ | $3 / 64^{\prime \prime}$ | $.300^{\prime \prime}$ | $100^{\prime}$ |
| $\mathbf{1 6 2 5}$ | 14 | $104 / 34$ | $3 / 64^{\prime \prime}$ | $.300^{\prime \prime}$ | $1000^{\prime}$ |

Single conductor 14-104/34 copper, paper serve, $3 / 64^{\prime \prime}$ ASTM performance grade rubber, double cotton braid, . $040^{\prime \prime}$ oil resistant neoprene rubber jacket.

## RG-COAXIAL CABLE

GENERAL PURPOSE: For radio frequency applications wherever a low capacitance shielded cable is required.

| No. | Type | Size | Strand | $\begin{array}{c}\text { Capacitance } \\ \text { Per Ft. }\end{array}$ |  | O.D. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | \(\left.\begin{array}{c}Standard <br>

Put-up\end{array}\right]\)

Single conductor, polyethylene insulation, braided copper shield, plastic jacket overall.

## ALPHA MIRE CORPORATION

FLEXIBLE TINNED COPPER

Construction:
Composed of very fine soft annealed tinned copper wires braided and rolled flat.

For alternate put-ups use code:
$Q=100 \mathrm{ft} ., D=250 \mathrm{ft} ., E=500 \mathrm{ft} ., F=1000 \mathrm{ft}$.

FLEXIBLE TINNED COPPER

## Construction:

Composed of very fine soft annealed tinned copper wires braided and rolled flat.

For alternate put-up use code: $E=500 \mathrm{ft}$.

## Consfruction:

Single conductor atranded tinned copper, low lowe insulation, highly lacquered braid, close tinned copper shield overall.

## Construction:

Single conductor stranded tinned copper, low loss insulation, close tinned copper shield, platic -acket overall.

```
For alternate put-ups use code:
    E=500 ft., Q=100 ft.
```

## TINNED COPPER SHIELDING

GENERAL PURPOSE: For shielding speaker leads, lead-ins, amplifier wires, auto radio installations. Also for bonding.

| No. | Sizes of Wires | I.D. | Standard Put-up | Al:ernate Put ups |  |  |  |

## LACQUERED HOOK-UP AND LEAD-IN WIRE

GENERAL PURPOSE: For point to point soldering connections on transformers, amplifiers, panel hook-up, etc., where a low loss dielectric is required. It is not a pushback wire but will strip easily.

# ALPHA <br> WIRE CORPORATION 

TYPE SRIR—GLASS BRAID HOOK-UP WIRE (JAN-C-76) (1000 VOLT)

GENERAL PURPOSE: For hook-up where secondary insulation is required on SRIR wire in electronic devices, aircraft instruments, radio, radar, transmitters, receivers, etc.

Construction: Single conductor stranded tinned copper, thernoplastic insulation, glass braid, lacquered.

## TYPE SRIR-SHIELDED HOOK-UP WIRE (JAN-C-76) <br> (1000 VOLT)

general purpose: For use when a shielded wire is required in electronic devices, aircraft instruments, radio, radar, transmitters, receivers, etc.

Construction: Single conductor stranded tinned copper, thermoplastic insulation, braided tinned copper shield overall.

Also available to order in additional sizes and multiple conductors.

## TYPE WL HOOK-UP WIRE (JAN-C-76) <br> (600 VOLT)

GENERAL PURPOSE:
Electronic Devices
Aircraft Instruments

Radio Radar

Transmitters Receivers

Lighting and Power Rectifiers

CONSTAUCTION:
Single conductor stranded tinned copper with thermoplastic insulation, lacquered cotton or glass braid, or nylon jacket. FUNGUS PROOF.
CHARACTERISTICS:
Stability at High Temperatures - Flexibility at
Low Temperatures - Resistant to: Flame, Moisture

## *COLOR CODE

$\begin{array}{ll}\text { 0-Black } & \text { 2-Red } \\ \text { 1-Brown } & \text { 3-Orang }\end{array}$

## Construction:

Single conductor stranded tinned copper, plastic insulation, nylon jacket overall.

## Construction:

Single conductor stranded tinned copper, plastic insulation, nylon jacket, braided tinned copper shield overall.

Also available to order in addifional sizes and multiple conductors.

Single conductor 16-19/29 stranded tinned copper, rubber insulated, cotton braid highly lacquered.

Single conductor 16-19/29 stranded tinned cop per, rubber insulated, cotton braid highly lacquered, tinned copper shield overall.

For alternate put-ups use code:
$D=250 \mathrm{ft} ., E=500 \mathrm{ft} ., F=1000 \mathrm{ft}$.

## LACQUERED PRIMARY WIRE

GENERAL PURPOSE: For automobile head, tail, side, dashboard lamps, horn, spotlight, instrument leads and general high voltage and primary voltage applications.

| 1166 | 4 | 7/12 | 3670 Lbs. | .240" | $500^{\circ}$ |

## DIAL CABLE

PHOSPHOR BRONZE
Construction: 42 strands ( $6 x 7 x .004$ ) genuine phosphor bronze wire with a linen center for extra flexibility.

| No. | Tensile Strength | O.D. | Standard <br> Put-up |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1692 | 1 | 50 lbs. | 1 | $.036^{\prime \prime}$ | I |

BRAIDED LINEN
Consfruction: Composed of a very strong linen center over which is a smooth black braid.

| 1696 | 1 | 40 ibs. | I | .057" | 1 | $500^{\prime}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1699 | I | 22.5 lbs. | 1 | .036" | I | $500^{\prime}$ |
| 1700 E | I | 18 lbs. | 1 | .027" | I | $500^{\prime}$ |

Consfruction:

Single conductor 24-16/36 extra flexible bare copper, covered with dark brown cotton braid or plastic insulation.

## AC-DC ANTENNA WIRE

GENERAL PURPOSE: Ideal replacement wire for universal midgets, indoor aerials and loop antennas.

| No. | Type | Size | Strand | O.D. | Standard <br> Put-up |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{1 2 8 1}$ | Cotton | 24 | $16 / 36$ | $.050^{\prime \prime}$ | $25^{\prime}$ Disc |
| $\mathbf{1 2 8 1 V}$ | Plastic | 24 | $16 / 36$ | $.047^{\prime \prime}$ | $25^{\prime}$ Disc |
| $\mathbf{1 2 8 4}$ | Cotton | 24 | $16 / 36$ | $.050^{\prime \prime}$ | $1000^{\prime}$ Spl. |
| 1284 V | Plastic | 24 | $16 / 36$ | $.047^{\prime \prime}$ | $1000^{\prime}$ Spl. |

## Construction:

E-Z strip rubber parallel cord (Type POSJ) with small unbreakable soft rubber attachment plug. Free end stripped and tinned ready to attach. Also available in other lengths.

## ALPHA E-Z STRIP LINE CORD

## (UNDERWRITERS APPROVED)

GENERAL PURPOSE: This is the modern and ideal power supply cord for replacement on radios, lamps, fans, etc.

| No. | Conductors | Size | Strand | O.D. | Length |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2106 | 2 | 18 | $41 / 34$ | $.235^{\prime \prime} \times .130^{\prime \prime}$ | $6^{\prime}$ |
| 2109 | 2 | 18 | $41 / 34$ | $.235^{\prime \prime} \times .130^{\prime \prime}$ | $9^{\prime}$ |
| 2112 | 2 | 18 | $41 / 34$ | $.235^{\prime \prime} \times .130^{\prime \prime}$ | $12^{\prime}$ |

## SERVICESPOOL ASSORTMENT

General Purpose: Designed for quality wiring in radio, television, phonographs, audio equipment, instruments and electronic devices.

## NOTE: USEFUL INFORMATION FOR ORDERING

- All teats on apacifications are approximate and aubject to normal manufacturing tolerances.
- Lengths other than those regularly listed can be furnished.
- Other wires and cables made to specifications.
- Use the following symbols alongside catalog number for other than standard put-ups.

| COILS | COILS | COILS | SPOOLS | SPOOLS | SPOOLS |

# ELECTRONIC WIRES \& CABLES 

## microphone cables <br> plastic microphone cable

## microphone cables

rubber microphone cable

multiple conductor cables rubber-iacketed portable cord

Belden multiple conductor cables are developed for long service life, excellent mechanical and eleetrical characteristics, and uniform quali-
ty. These cablea are used for multitude of applications, ineluding moititures of applestiont, including power and interconnecting cords on radio recciver, elsertranic deviceat, remote control circuits, and press-to-talk mierophone circuits.

## THE WILLIAM

 BRAN D AND CO., INC., WILLIMANTIC, CONN.
## MINIATURIZATION WIRE

Specially developed for use in electronic equipment within the range of $-55^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$, and maximum operating voltage of 600 volts rms . This wire is ideal for use in miniaturized equipment as both hook-up wire and lead wire for transformers, chokes and other components, where space is at a premium and operating temperatures are high. Available in both standard and flesible . . in solid colors or candy striped with 1, 2 or 3 tracers

The primary insulation is Turbo 540, an extruded polyvinyl chloride compound that is resistant to the effects of water, oils, aircraft engine fuels, hydraulic fluids, ethylene glycol, alcohol, dilute acids, alkalies and fungus. Over the primary insulation there is an extruded jacket of nylon to give added mechanical protection and abrasion resistance.

## TRANSMISSION LINES AND CABLES

Efficient TV and FM Reception depends on the right cable lead-in. With every installation of a TV or FM set and antenna make sure that you are selling trouble-free, efficient transmission lines. It's the important link that insures customer satisfaction. TURBO BRAND Transmission Lines and Cables are furnished in three basic types to fit every specific installation need. Tops in transmission insures tops in reception.

TURBO RIBBON-TYPE TWIN LEAD
300 OHM OVAL TYPE 300 OHM DUMBBELL TYPE (Cat. \#1004)

Specially recommended for VHF reception in strong signal areas. For outdoor use, it is furnished with $7 / 28$ conductor and $.065^{\prime \prime}$ web thickness to resist rain, snow, dirt or salt deposits, minimizing impedance and preserving electrical efficiency.
(Cat. \#1002)
Made especially for use in indoor antennae and for wiring inside the chassis of TV and FM receivers. It is flat with the twin conductors on either edge, and is extremely flexible. This cable uses a $7 / 30$ conductor and a $.040^{\prime \prime}$ web thickness. Inside the chassis short lengths are used to conduct the signal between circuits.

## TURBO COAXIAL LINES

The use of Coaxial Lines for carrying signals from the antenna to the TV receiver has the distinct advantage that this type of lead-in is not affected by atmospheric conditions at any time.

## ROTATOR CABLE <br> (Cat. \#1014)

4 conductor ribbon cable for antenna rotator use is also available from stock on $1,000 \mathrm{ft}$. putups - specify Turbo \#1014. A complete line of multi-conductor jacketed cables for intercommunication and control circuits are available.

## TURBOTHERM "60" Radio and Instrument Hook-Up Wire to Specification JAN-C-76

The conductor can be furnished in either solid or stianded tinned copper wire. The primary insulation is an extruded polyvinyl chloride compound that is resistant to the effects of water, oils, aircraft engine fuels, hydraulic fluids, ethylene glycol, alcohol, dilute acids, alkalies and fungus. This wire has excellent electrical properties.

Type WL wire is designed for general purpose applications at 600 Volts rms or less. It is normally furnished with an extruded nylon jacket over the primary insulation.

Type $5 \mathbb{R} \mathbb{R}$ is designed for general purpose applications at 1000 Volte rms or less. It is normally furnished without an outer covering.

Type SRHV is designed for general purpose applications at 2500 Volts rms or less. It is normally furnished without an outer covering
These wires can be furnished in all solid colors of vinyl insulation or up to 3 colored spiral tracers on a white background. Other colors with apiral tracers can be furnished but their use is not recommended.

## TYPE WL - EXTRUDED NYLON JACKET HOOK-UP WIRE (Fungus Proof)

SPEC. JAN-C-76

Extensively used in electmnic devices, aircralt instrumenta, lighting and power transmitters, radiar. etc. Constructed of une conductor, conper tinned high heat vinyl insulation with an extruded Nylon jacket overall. This wire will not fray, crack or rut; it is non-combuatible with extreme high chemical and abrasion rewielance; pxtreme low moisture alsorption and low dielectric leakage; extremely flexible over a wide temurrature range it remains soft and pliable at reduced temperatures; it will absorh hard usage, frequent hending and twisting.

HIGH VOLTAGE \& CATHODE-RAY TUBE LEAD CABLE

This Hixh Voltage and (?athode Ray Tube lead Wire is approved for 10.000 . 2n.0n0. and $\mathbf{t 0 , 0 0 0}$ volt applications. It is made of RlitaN (flame retarding type loulyethylene) which is high heat rasistant and mnisture reasiatant. Approved by A.S.T.M. It has a dielectric coustant of 2.7 and a power factor of .002 . Available in white.

Where wire is shipped on returnable spools or reels a deposit covering same will be required. No eredit will be allowed for returnable reels and spools unless returned prepaid within 12 months from date of shipment. All deposit spools and reels are billed separately on invoice and mot included in price of materials sold.

# ANACONDA FOAM POLYETHYLENE TRANSMISSION LINE 

The finest all-purpose VHF UHF line in use today. Actual results under the most adverse conditions have proven beyond doubt that this line will withstand solt air. mnisture, extremes of heat and cold and other factors that cause rapia cieterioration and signal loss in other types of transmission lines. No sealing is necessary with this foam-line as moisture cannot penetrate the cellular construction of this cable. High strength 22 Ga . solid copperweld conductors are imbedded deep in the insulation concentrating the field of energy INSIDE THE CABLE. Cable is very light, 100 feet weighing slightly over 2 lbs . Developed through the combined afforts of Anaconda and RCA, acknow'edged leaders in television cable research and development. Cable size is approximately $.450 \times .350$.

Columbia now offers several types of exceptional quality TY lines at moderate prices. Virgin Polyethylene and clean bright conductors assure best results in all TV installations. All cables have a smooth polished finish the in all TV installations. All cables have a smooth polished finish that will effectivery shed dipt and moisture

For use in Intercom Systems as statiun to station wiring, the cables listed below will handle most installations. Each conductor is 22 ga. solid soft drawn copper and has on .010 wall of durable color coded plastic. Each pair is individually twisted and pairs are covered overall with an adequate plastic jacket.

## HOOKUP WIRE ASSORTMENT

Here is an unusual item sure to be appreciated by every serviceman. No need now to have odd lengths of hookup wire scattered all over the service bench. Six 100 foot individual spools of 300 volt plastic insulated hookup wire are held rigidly on a metal shaft enabling the serviceman or experimenter to mount all six snools directly over or anywhere on a bench. Six different colors in each assortment. Available in 22,20 and 18 Ga -both solid and stranded.

## DELUXE TELEVISION SERVICE LITE

This newly designed service lite is one of the finest items in our entire line of television service accessories. Has a $21 / 4$ inch highly palished aluminum reflector and wide opening spring clamp that will permit this lite to be attached almost anywhere inside the television cabinet teaving both hands free to work. Lower part of clamp has rubber covering that will hold firmly wherever it is placed. Comes complete with $71 / 2$ watt 110 Volt bulb and six foot parallal plastic cord with unbreakable male plug for attaching to baseboard or inta service block on our all purpose Television Service Cord. Display card furnished with orders for 25 or more lites.
CAT. NO. 185 DELUXE TELEVISION SERVICE LITE

## STEEL GUY WIRE

Columbia offers a complete line of galvanized stael guy wire for all antenna installations. This wire has high tensile strength and is weatherproof. rustproof and stretch proof.

# Military Types A ROME CABLE PRODUCT Thermoplastic Insulated Military Type Hook-up Wire 

Comply to Joint Army-Navy Specification JAN-C-76 and manufactured under specific approval of the Armed Services Electro Standards Agency (ASESA) Impervious to oils, acids, alkalios, moisture and flame and possessing unusually high dielectric strength.

## Rome Synthinol <br> THERMOPLASTIC INSULATED <br> HOOK-UP WIRE

## SPECIFICATIONS

Hone Synthinol is a molyvinyl chloride type of thermo plastio insulation impervious to oils, acids, alkalies. moisture and flame, and possessing unusually high dielectric strength, Colors are of gem-like permaneney Approved by Underwriters 1 .aboratories where exposed $t 0$ temperatures not exceeding $80^{\circ}$ Centigrade or Where exposed to oll at temperatures not exceeding $60^{\circ}$ Centigrade with ratings at 300 and 600 volts as indicated helow. The Underwrlters' upprowal seal appears on every factory lengti reel of lome synthinol.
Rome synthinol is spectally designed for the chassis and sub-chassis wiring of radio and television receivers and transmitters as well as all other types of elertronic equip) ment. It has physical and electrical characteristios of unusual jermanency.

ALL OTHER SIZES CAN BE SUPPLIED PER JAN-C. 76 SPECIFICATIONS

## FORMVAR WIRE-No. 2000

Corered with the new, tough, abrasion-resisting film. Takes up less space. Has these imporant qualities: No danger from stretehing and bending during assembly. Dough at hot fail after 2 perature. Resists alrasion better. Stable under heat aging. Does not fail after 2 hours at $105^{\circ}$ C. Completely insoluble to petroleum solvents. Adequate acid and alkali resistance. Constant dialectrje properties. Infinite Use Single Formyar for mow voltage
Use Single Formvar for low voltage coils, Heavy Formyar to replace Enamel Paper, Enamel Cotton, Enamel Silk, Double Cotton and Double Silk.

No. 531-75 F00T SPECIAL
75 feet $7 \times 26$ Bare Copper Aerial Wire; 25 feet No. 16 Rubber Coyered Lead-in Wire; 1 Adjustable Ground Clamp: 2 Porcelain Insulaturs; 2 Purcelain Nail Knobs; 1 Window Lead-in Strip; lnstallation Instructions.
o. 532 -C'mtains 1 Underwriter Approved Lightning Arrestor, otherwist same as No. 531.
75 feet $7 \times 24$ Enameled Aerial Wire; 25 feet No. 16 Rubher Corered Lead-in Wire: 1 L'uderuriter Approved Lightning Arrestor; 2 Large Glass Insulaturs; 1 Slur Grip Gound Clamp: 1 Duco Window Lead-in Strip; 2 Porcelain Nail Knobs; Installation Instructlons.

No. 541-EXTRA VALUE

## 100 FOOT SERIES

100 feet $7 \times 26$ Bare Copper Aerial Wire; 25 Peet No, 16 Rubher Covered Lead-in Wire; 1 Adjustable Ground Clamp; 2 Porrelain Insulators; 2 Porcelain Nail Knobs; 1 Window Lead-in Strip; Installation Instructions.
No. 542 - Contains linderwriter Approved Lightning Arrestor, otherwise same as No. 541.
No, 551 -Contains 100 feet $7 \times 24$ Copper Aerisl Wire, othervise same as No, 541 .
No. 552 -Contains 100 Peet $7 x 24$ Aerial Wire; 1 I'nderuriter Approved Lightning Arrestor, ithepwise same as No. 541.

RESISTANCE LINE CORDS for AC-DC Radio Sets

The cords have a wide market for replacement on AC-DC radios with worn out cords: also on those formerly haring lot resistance. Consists of a 6 foot cord with red and black rubber corered line cord wires and an ashestos corered resistance having separate terminal braid. Consolidated cords have an exelusive tinned copper terminal on the resistance cord that can be soldered. Colored cotton tracer designates ohmage.

## VOLTAGE DATA

The table and example below indicate tube roltages and how to determine proper cord. Check the voltages of each tube in the voltage table. Add all voltages togetber, allowing $10 \%$ rariation, plus or minus.

## VOLTAGE REDUCER CORD SETS

## No. 2451

The Consolidated Voltage Reduce? Cord Set can be used anjwhere that it is necessary to reduce line roltage from 220 volts to 110 volts for radios, electrie clocks, household appliances. electric dry shavers, etc. It las a special built-in resistor which reduces 220 rolts $A C$ or $D C$ to 110 polts without any additional derices. It comes as a 6 foot cord with dark brorn glazed cotton corering. Parked in attractire two-color box.
No. 2451-Ameriean male plug with American female receptacle. $\qquad$ .$\$ 1.90$

## microphone cables

Cornish Microphone Cables are available in plastic and rubber insulations. Plastic cables utilize polyethylene insulation on the conductor with outer vinyl plastic jacket. They are dasigned for low capacitanee, high insulation resistance, low attenuation; and withstand severe service under all operating conditions.

## phonograph pick-up arm cable

This cable is designed specifically for use as phonograph pick-up arm cable. The conductor, being stranded from $\# 36$ AWG wire, is very flexible. The overall diameter of the wire is quite small and cable is devoid of stiffness.

BILITY n-RUSTING GROUND RODS and CLAMPS

Copperweld Ground Rods and Clamps provide the reliable grounding protection necessary for successful performance, elimination of interference and safe operation of radio and television equipment. The rugged steel core gives the stiffness you need for easy driving. High conductance and lasting protection against corrosion are provided by the heavy molten-welded copper covering.
Millions of Copperweld Ground Rods are rendering permanent grounding protection. You're SAFE when you use Copperweld - the only Molten-Welded Ground Rods. They give you PROVED dependability - PROVED economy - PROVED longer service.

## COPPERWELD GUY STRAND

Ideal for guying radio and television antenna mosts and towers. It provides greater safety, permonent high strength and rust proof construction for the life of the antenna. Furnished in two sizes, 3 No. 18 (breaking strength 550 Lbs.) and 3 No. 14 (breaking strength 1000 Lbs). Lengths of $100^{\prime}, 200^{\prime}, 250^{\prime}, 500^{\prime}$ and $1000^{\prime}$ are ovailable.

## COPPERWELD GROUNDING WIRE

## COPPERWELD ANTENNA WIRE

Preferred for many years by professionals and amoteurs. Becouse of its high strength, it maintains a fixed length. Furnished in 4 sizes, No. 10 Awg, No. 12 Awg, No. 14 Awg, and No. 18 Awg, in coil lengths of $100,250,500,1000$ and 3000 feet - bare and insulated. Sizes 10, 12 and 14 available with Polyvinylchloride (PVC) Insulation.

Used to connect antenna mast to ground rod. Annealed for easy handling. Available in two sizes, No. 8 Awg and No. 10 Awg. Cails are furnished in various lengths ranging from 50 to 500 ft .

Copperweld is also used for television twin-lead wire, coaxial cable, resistor and condenser pigtails, radio tube parts and various allied components manufactured and sold by other companies.
Additional information available upon request.

# TV Lead-in Cables by Federal 

## Transmission Lines for Every Television Application - by America's Leading Manufacturer of Solid Dielectric HF Cables

## TV-1185 All-Channel Tubular TV Line - 300 ohms

"Pipeline" of the Air

For the Finest VHF, UHF

The now TV-1185 is more durable, more flexible, more efficient. Smaller in O.D.-it fits all stand-ofi lorackets and lightning arrestors, holds its shape going around sharp ingle edges. TV-1185, with its
"silver" polyethylene insulation, is highly resistant to sunlight, heat, moisture, salt spray, and other deposits. The energy field stays within the sheath . . . for very low loss . . . more constant impedance.

## TV Lead-In Cable

Community system secondary lead-in. Also used with unbalanced input TV receivers in low signal strength areas.

RG-59/U Coaxial 73-Ohm TV Lead-In Cable Community system tap-off lead-in. Also used with unbalanced input TV receivers where top-quality installation is essential,

## Non-radiating TV Cables (Used with K-14)

## K-125 Coaxial 72-Ohm TV Lead-In Cable

 (Formerly SP.75)Double-shielded and double-jacketed to protect community TV systems from signal leakage. Where radiation exists, Federal's K-125 alternates for Federal's RG-11/U as secondary lead-in.

K-1 26 Coaxial 73-Ohm TV Lead-In Cable (Formerly SP.76)
Double-shielded and double-jacketed. Where radiation exists, K-126 alternates for Federal's RG-59/U as tap-off lead-in

## TV-1182 "Silver" Heavy-Duty TV Line $300-\mathrm{Ohms}$

Insulated with Federal's "Silver" polyethylene - the revolutionary developmert that provides greater resistance to weather, heat and sunlight. Unchanging electrical and physical characteristics assure long, trouble-free service.

K-111 Shielded 300-Ohm TV Lead-In
Shielded and balanced TV lead-in that minimizes "snow," "ghosts" and electrical noise due to transmission line pick-up. For use in high signal strength, bigh noise level areas.

RG-8/U Coaxial 52-Ohm TV Lead-In Cable Characteristics and quality proved in every installation where this type low-loss cable is indicated. For special applications and experimental work.

Aluminum ground wire atso available on 500 foot spoals or 50 foot coils at a small additianal charge - all types of aluminum wire spooled or coiled to your speciflcations.
All ground wire shipped F.O.B. factory, New York City - specify type of coils ar spools when ordering.

We also manufacture foam and other types of insulated wires.
Write to factory for complete details and catalog.

COMPLETE LINE OF GROUND RODS, AND GROUND CLAMPS

## GROUND RODS MADE OF ALUMINUM, PURE COPPER, AND COPPER CAPED

"JAN-spec" WIRES

## WIRES TO GOVERNMENT SPECIFICATION <br> ARMY - NAVY • AIR FORCE <br> JAN-C-76 - MIL - ANJ-C-48A

## TYPE SRIR HOOK-UP WIRE

Construction: Tinned copper-stranded or solid. Nominal insulation thickness, .015" Thermoplastic. Rating 1000 VOLTS (working). Temperatures -40 C to +60 C .
Sizes: 28 to 6. Colors: all NEMA standard colors. Tracers on solid colors also available. Catalog No. 100.

## TYPE SRIR GLASS BRAID

Construction: Tinned copper with thermoplastic insulation and braided glass and flame resisting lacquer finish over all. Temperature rating, -40 C to +60 C .

Sizes: $\mathbf{2 8}$ to 6. All standard NEMA color coding and also available with tracers on solid colors. Catalog No. 101.

## TYPE WL - NYLON —— HOOK-UP WIRE

Construction: Tinned copper stranded or solid. Nominal insulation thickness . $010^{\prime \prime \prime}$ Thermoplastic with $.005^{\prime \prime}$ extruded nylon. Rating 600 VOLTS (working). Temperature rating - 40C to $+60 C$.
Sizes: 28 io 6. Colors: bright standard NEMA colors, also tracers on solid colors.
Catalog No. 102.

## TYPE SRHV HOOK-UP WIRE

Construction: Tinned copper, stranded or solid. Nominal insulation $.031^{\text {" }}$ Thermoplastic. Rating 2500 VOLTS (working). Temperature rating, -40 C to +60 C .
Sizes: 28 to 6 . Colors: all standard NEMA colors, also available tracers on solid colors.
Catalog No. 103.

## TYPE MIL-W-16878

Construction: Tinned copper, stranded or solid. Nominal insulation Thermoplastic, with or without nylon jacket. Types A, B, C and D.

Sizes ond Colors: all sizes and colors and tracers.
Catalog No. 120.

## TYPE SRRF HOOK-UP WIRE R. F. INSULATED

Construction: Tinned copper stranded, polyethylene insulated with or without glass braid. Rating 1000 VOLTS (working).
Sizes: 24 to 6. Colors: all NEMA standard colors, also tracer on solid colors. For use in radio frequency circuits.
Catalog No. 105.

## hational - largest electronics and aircraft wire and cable inventory west of chicago!

WIRE \& CABLE CORPORATION
136 SAN FERNANDO ROAD, LOS ANGELES • PHONE CApitol 1-2171

## AIRCRAFT WIRE

TYPE ANJC - 48-A - Aircraft power and lighting cable
Construction: Flexible tinned copper, vinyl insulation with cotton braid with fungicidal treatment. Flame resisting lacquer finish. Low Tension: 600 VOLTS (working).

Sizes: 22 to 4/0. Colors: White.
Catalog No. 200.

## TYPE AN-C-168

Construction: Flexible tinned copper, vinyl insulotion with cotton broid with fungicidal treotment. Flome resisting locquer finish. Tinned copper braid shield. Low Tension: 600 VOLTS (working).

Sizes: 22 to 4/0. Colors: White.
Catalog No. 201.

TYPE MIL-W 5086 \& MIL-W 5274 A AIRCRAFT, power and lighting cables. TYPE 1

Construction: Tinned copper stranded, synthetic resin insulotion with nylon jacket. Rating 600 VOLTS (working).

Sizes: all standard gauges. Color: White.
Catalog No. 202.

## TYPE MIL-C-7078

Construction: Tinned copper stranded, synthetic resin insulation with nylon jacket and tinned copper shield. Rating 600 VOLTS (working).

Sizes: all standard gauges. Color: White.
Cotalog No. 203.

## TYPE 2

Construction: Tinned copper stranded, synthetic resin insulation plus glass braid, plus synthetic insulation with overall nylon jacket. Rating 600 VOLTS (working).

Sizes: all standard gauges. Colors: White.
Catalog No. 204.

## TYPE MIL-C-7078

Construction: Tinned copper stranded, synthetic resin insulation plus glass braid, plus synthetic insulation with overall nylon jacket and tinned copper shield. Rating 600 VOLTS (working). Sizes: all standard gauges. Colors: White.

Catalog No. 205.

## MICROPHONE CABLE AND INTERCOM CABLE

PLASTIC JACKETED MICROPHONE CABLE - one conductor<br>Construction: General purpose, low loss, poly insulated, tinned copper shield, stranded one conductor, overall poly jacket, nominal capacitance per foot: $\mathbf{3 2} \mathbf{~ m m f}$.<br>Size: Oulside diameter . $130^{\prime \prime}$.<br>Catalog No. 600/1.

# PLASTIC JACKETED MICROPHONE CABLE - two conductor <br> Construction: General purpose, low loss, poly insulated, tinned copper shield. Stranded, twisted two conductor with filler. Nominal capacitance per foot between conductors 18 mm . <br> Size: Outside diameter $.225^{\prime \prime}$. <br> Catalog No. 601/2. 

## RUBBER JACKETED MICROPHONE CABLE

Construction: Extra flexible stranded tinned copper conductors, cotton serve between concovered with tough rubber outer jacket. For use indoor and outdoor.

Sizes: 20 gauge stranded tinned copper, available from one conductor to eight conductors.
Catalog No. 603/1-8.

## INTERCOM CABLE

Construction: Twisted pairs, one to fifty-one pairs, twenty-two gauge solid copper, thermoplastic insulation, overall thermoplastic jacket or overall treated cotton braid.

Catalog No. 605.

GENERAL PURPOSE MULTI CONDUCTOR CONTROL CABLES MICROPHONE CABLE AND INTERCOM CABLE (Continued)

## MULTI CONDUCTOR CONTROL CABLE

General purpose control cable, up to thirty or more conductor, with or without shielded members, or overall shield, etc., with plastic or tough rubber overall jacket.

## CO-AXIAL CABLES

Standard co-axial cables carried in stock $R G 7 / U, 8 / U, 9 / A U, 11 / U, 17 / U, 34 / U, 58 / U$, $58 / \mathrm{AU}, 59 / \mathrm{U}, 62 / \mathrm{U}$, etc.

IMMEDIATE DELIVERY FROM WAREHOUSE STOCKS

Sizes 7/16" thru $21 /{ }^{\prime \prime}$ in coils. in plasic pres pose Insulite qualified under spec. MIL.-I-631A, Type F, Form U, Grade A, Classes I and II, Categories 1 and 2.

## ABOUT INSULITE

Insulite, commercial and specification grade VinyI tubing is manufactured from only the highest quality materials. Extreme care in preparing the compound formulations assures product uniformity. The most modern of plants, complete with compounding facilities and controlled extrusion techniques, together with modem inspection equipment provides rigid physical and visual inspection on each length of tubing, assuring a finished product fully guaranteed against defective workmanship and materials. A product development laboratory is engaged in constant research to provide you with the finest in tubing.

| Flame Resistance | ** | ** |
| Approx. Durometer Hardness (Shore "A") | 66 | 86 |

[^67]
# POLYSTYRENE ROD - TUBING - SHEET 

For radio and electronic applications, because of its very low loss factor at ultra high frequencies, Polystyrene is the ideal material for insulators, coil forms, shields, etc. It has excellent arc resistance, is non-tracking and has splendid insulating properties. Because its water absorption is practically zero it has excellent dimensional stability.

## POLYSTYRENE ROD - Transparent

Available in $12^{\prime \prime}$ or $48^{\prime \prime}$ lengths

## Serving Industry Since 1910

## Porcelain Product's teleusulon \& Ravol Insuluraons

## TV-FM LEAD-IN TUBIS

Provide essential insalation and neatness of appearance for lead-ins groing through walls partitions, etc.
Type \#890 Tuber -
Handles the conventional $3 / \mathrm{s}^{\prime \prime}$ wide 300 Ohm common flat lead-ins. Outside diameter f : use a $3 / /^{\prime \prime}$ drill.
Type \#g91 Tubes -
UHF Tubes with the round holes, twe slots or key-ways, for Amphenol Cable \#14-271 or equivalent. Outside diameter H: use a $3 / 4^{\prime \prime}$ drill.
Type $=895$ Tubes - (but hollow) UHF cable equivalent to FedFral's Rand Tubular UHF. Outside diameter $H$ : use a $3 / 4^{\prime \prime}$ drill.
Type \#894, Tules -
For oval UHF cable made under many trade names and numbers. Examples: Belden $\$ 8235$. The wide oval hole requires a larger outside diameter. Ontside diameter $3 / 4^{\prime \prime}$ : use 剖" dxill.

| Length | Wt. per M | Length | Wt. per M |
| :---: | :---: | :---: | :---: |
| 4" | 143 Lbs. | $8^{\prime \prime}$ | 275 Lbs. |
| $5{ }^{\prime \prime}$ | 175 Lbs. | $10^{\prime \prime}$ | 330 Lbs. |
| 6" | 210 Lbs. |  |  |

## TV-FM LEAD-HN 5U|PPORTS

The perfect insulator. Easy to install. Holds lead-in positively and rigidly. Size - $2^{\prime \prime}$ high, $1-1 / 4^{\prime \prime}$ wide, $3 / 4^{\prime \prime}$ wide. Supports lead-in 1-7/16" from surface. Weight 170 lbs. per M.
$\qquad$ HOOK TYPE
No. 9418-H
For light.weight $3 / 8^{\text {Now }}$, wide flat 300 Ohm twin lead-in.
No. $9422 \quad$ No. 9422 -
For heavy-weight 1/2" wide oval 300 Ohm twin lead-in.
Ne. 9423 Coaxial Cable.
No. 9424
No. 9423-H
For $1 / 4^{n}$ round 72 Ohm Coaxial Cable.
No. 9424-1

For 3/8 round Caraxial Cable

## ANTENNA INSULATORS

Made of highest quality electrical Porcelain. Pressare molded to assure dense strang body. Glazed.

No. 8117 - Round, White glaze. Size 2-1/2" long $1^{\prime \prime \prime}$ diameter, $1 / 4^{\prime \prime}$ holes. Weight 146 Lbs. per M.
No. 8118 - Sarae as No. 8117 but brown glaze. Weight 146 Lbs. per M.
No. 8119 - Oval, White glaze. Size $2-/ 2^{\prime \prime}$ long, $1^{\prime \prime}$ diameter, $1 / 4^{\prime \prime}$ holes. Weight 130 Lbs. per M.
No. 8120 - Same as No. 8119 but brown glaze. Weight 130 Lbs. per $M$.
No. 8130 - Small airplane type, oval, white glaze. Size $1-3 / 8^{\prime \prime}$ long, $7 / 8^{\prime \prime}$ diameter, $7 / 32^{\prime \prime}$ holes. Weight 60 Lbs. per M.
No. 8131 - Large airplane type, oval, white, glaze. Size $2^{\prime \prime}$ long, 1-1/8" diameter, 9/32" holes. Weight 90 Lbs. per M.
No. 500D - Strain type, brown glaze. Size 2-1/8" long, 1-9/16" diameter, $3 / 8^{\prime \prime}$ hoies. Weight 250 Lbs. per M.

## INSULATED SCREW EYES

No. 1925 - Seven and one-quarter inches long oven-all. White glaze insulator with $5 / 16^{\prime \prime}$ hole. Weight 110 Lbs. per M.
No. 1926 - Same as No. 1925 but 3" long over-all. Weight 90 Lbs. per M.

Ne 1961 - Split bridle-riag type. Insulator has diagonal slot $1 / 4^{\prime \prime}$ wide to facilitate quick threading of conductor. Orer-all length $3-5 / 16^{\prime \prime}$. White glaze insulator ha: $5 / 8^{\prime \prime}$ hole. Weight 100 Lbs. per M.
Na. 1962 - Sume as No. 1961 but 2-5/8" long over-all. Weight 90 Lbs. per M.

ALL.ALUMINUM CONSTRUCTION

## AMERICA'S LARGEST MANUFACTURER OF "CONICAL-V-BEAMS"

## VHF-SINGLE CHANNEL ANTENNAS

ALL-ALUMINUM CONSTRUCTION

5 ELEMENT YAGI

Precision Cut for Single Channel Emphasis Single bay:
Y5X.1 for Ch. 2 or 3
Y5X-1 for Ch. 4, 5, 6
Y5X-1 for Ch. 7 to 13
Two bay stacks:
Y5X-2 for Ch. 2 or 3
Y5X-2 for Ch. 4, 5, 6
Y5X2 for Ch. 7 to 13

## 'FISHBONE JR."

Precision Cut for Single Channel Emphasis Single bay:
Y6X-1 for Ch. 2 or 3
Y6X-1 for Ch. 4, 5, 6, or FM
Y6X-1 for Ch. 7 to 13
Two bay stacke:
Y6X-2 for Ch. 2 or 3
Y6X-2 for Ch. 4, 5, 6, or FM
Y6X-2 for Ch. 7 to 13

5 elements, single driven for creditable performance with outstanding economy. High impedance folded dipoles found on all Telrex Yaqis result in perfect 300 ohm impedance match. No standing waves.

Specify channel when ordering.

## "FISHBONE"

Precision Cut for Single Channel Emphasis Single bay:

FBT-1

Y6X-2

6 elements, twin-driven. Outperforms most ten element. single-driven Yagis! Like all Telrex Yagis, these Yagis are Precision Engineered for reception of a single channel (which must be specified when ordering) to secure all the gains of which Yagi designs are capable.

Specify channel when
ordering.

FBT-1 for Ch. 4 or 5
FBT-1 for Ch. 6
FBT-1 for Ch. 7 to 13
Two bay stacks:
1/2 wave stacked for optimum performance.
FBT- 2 for Ch. 7 to 13

10 elements, twin-driven. Outperforms any other Yagi! Despite its exceptional gain and front-to-back ratio, has full channel band-pass. Completely pre-assembled, like all Telrex Yagis. All aluminum.

Specify channel when ordering.

Export Packing (Wood Crating) $\$ 17.00$ additional, net.

Telrex "Beamed Power-Perfect Match" Arrays are fully integrated units combining really practical structures with built-in performance that assures "Top man on the frequerıcy" results at your site . . . without endless "cut and try" hacksaw engineering.

Every Telrex 2, 6, 10, 15, 20, and 40 meter Array is a professionally designed, precision manufactured communications array which is accurately tuned, then calibrated for optimum gain, perfect match and a balanced uni-lobe pattern that puts your signal out in front where you want it!

A feature of every Telrex "Beamed Power" Array is the Telrex designed coaxial balun and " T " transformer which permits optimum coaxial line coupling and insures a broad band resistive match, and a completely cold transmission line for pattern symmetry, highest $\mathrm{s} / \mathrm{n}$ and signal to interference ratios, and minimum TVI.

## 2-EL. 20 METER PRE-TUNED "MINI-BEAM"

Compact size $2^{\prime \prime} \times 82^{\prime \prime}$ boom; $21 / 2^{\prime \prime}$ center reinforcing section; $13 / 8^{\prime \prime}$ mounting hole; reflector $20-\mathrm{ft}$., driven element 19 ft ., gain $4.6 \mathrm{db} ; \mathrm{F} / \mathrm{B} 15 \mathrm{db}$.

## AMERICA'S LARGEST MANUFACTURER OF"CONICAL-V-BEAMS"

## WARD TV Antennas

## WARD'S DYMON-VANE CONICAL

WARD'S Dymon-vane is one of the new WARD Televane TV Antennas. Tele-vanes, the newest concept in TV antennas, are designed to add beauty to the housetop and to make any owner proud to own one. With its black wrought iron appearance, the Dymonvane has a weather-vane look that enhances the appearance of any home.
The Dymon-vane is an 8 element conical for VHF channels 2 through 13 in metropolitan areas, cross-
arm I' O.D. Permatube with flat black finish. Both models are new fold-up design with parabolic principle reflector and preassembled for easier installation.
Model TV-310-Single Bay. Individually packed. Shipping wgt. 15 lbs. ea. 6 units standard quantity.
Model TVS.315-Double Bay. Individually packed. Shipping wgt. 28 lbs. ea. 3 units standard quantity.
Model TV-77-Stacking Kit for stacking 2 two-bay units into 4-bay unit.

Another of the Tele-vane TV Antennas designed to add beauty to the home is Ward's Circle-vane Yagi. The Circle-vane is a 10 element double driven VHF antenna for use on channels 2 through 6 in areas where $g$ in and directivity pattern are important. Crossarm is I"."O.D. Permatube with flat black

finish with elements of $1 / 2^{\prime \prime}$ aluminum. Antenna comes with 3 major sub-assemblies with elements attached and folded for easy assembly.

Model TV. 300 -Individually packed. Shipping wgt. 35 lbs. ea. 3 units standard quantity.

## WARD'S PARA-CON

Combines parabolic and conical principles to assure maximum picture clarity and concentration of weak signals. Rugged aluminum elements. . . . heavy duty cross arm . . . molded plastic insulators.
Model TVA-62-Single bay . . . bulk packed . . . 6 units standard quantity.
Model TVA.63-Single bay . . . individually packed . . . 6 units standard quantity.
Model TVSA.66-Double bay . . . bulk packed . . . 3 units standard quantity.
Model TVSA-67—Double bay . . . individually packed . . . 3 units standard quantity.

## WARD'S TROMBONE

Designed for high gain on all channels-UHF and VHF. 8 elements properly spaced and streamline in design. Engineered for sharp directivity, 300 ohm impedance match and low VSWR. Completely preassembled.
Model TV-132-Single Bay . . . individually packed . . . shipping wgt. 5 lbs. ea. . 6 units standard quantity.
Model TVS-142-Double Bay ... individually packed . . . shipping wgt. II lbs. ea. . . . 3 units standard quantity.
Model TVS-161 Triple Bay . . . individually packed . . . shipping wgt. $161 / 2$ Ibs. ea. . . . 3 units standard quantity.

Designed to permit elements to be assembled at 3 different angles, as indicated, depending on areas in which located and channels desired. All aluminum construction, light, rugged. Completely preassembled.
Model tV-130-Single Bay . . . individually packed . . . shipping wgt. 3 lbs. ea. . . . 6 units standard quantity.
Model TVS-141-Stacked Model . . . shipping wgt. 7 lbs. ea. . . . 3 units standard quantity.

## WARD'S UHF Indoor Can-Can

An attractive item in either black wrought iron and bronze finish, or all bronze finish with brown base, the Indoor Can-Can is equivalent to stacked bow ties electrically. Ideal for auxiliary antenna wherever UHF has been added. Completely preassembled with lead.
Model TV-215-Black and Bronze finish . . . individually packed . . . shipping wgt. $31 / 2 \mathrm{lbs}$. ea. . . . 6 units standard quantity.
Model TV-216—Bronze finish with brown base . . . individually packed . . . shipping wgt. $31 / 2 \mathrm{lbs}$. ea. . . . 6 units standard quantity.

Model TV-215

## WARD'S CAN-CAN

For either new UHF installation or as an auxiliary UHF antenna, the Can-Can is designed for reception for the entire UHF band. Compact, sturdy all-aluminum construction. . . . Completely preassembled. Individually packed . . . shipping wgt. 2 lbs. ea. . . . 6 units standard quantity.

Model TV-202

## WARD'S Corner Reflector

Designed for suburban and semi-fringe areas, the Corner Reflector is ruggedly constructed to eliminate picture flutter, ghosts and vibration. Completely preassembled. Individually packed . . . shipping wgt. 4 lbs. ea. . . . 6 units standard quantity.

## Model TV-203

## WARD'S UHF Bow Tie Antenna

The only bow tie antenna with adjustable screen, easily spaced to favor stations in any area, for best possible local reception. Insulators have been eliminated and "free space" terminals incorporated to provide higher gain and flatter response across the UHF band - all possibility of picture deterioration and antenna shorting eliminated.
All Aluminum Construction . . . Completely preassembled . . . Rugged Design.
Model TV-189-Single Bay . . . individually packed . . . shipping wgt. $21 / 2 \mathrm{Ibs}$. ea. . . . 6 units standard quantity.
Model TYS-191—Double Bay . . . individually packed . . . shipping wgt. 5 lbs. ed. . . . 3 units standard quantity.
Model TV-190—Stacking Kit.

## WARDTV Accessories

Mocel C-34

## WARD'S TOWER JACK

TOWER JACK makes erecting telescopic masts a one-man job . . . just mount antennas on top section and raise away. Handles any 2 to 5 sec tion mast from $11 / 4^{\prime \prime}$ to $21 / 4^{\circ "}$ in diameter. Easy to carry from job to job.

Model TJ-1-Shipping wgt. II lbs. . . . 3 units standard quantity.

## WARD'S ANTENNA BASES

All Ward Bases are weather-proofed, easy to mount on outside walls or pitched or flat roofs:
Model C-34-Heavy Duty Base for any telescopic masts $11 / 4^{" t}$ to $21 / 4^{\prime \prime}$ O.D.
Model C-14-Self Supporting Base for $11 / 4^{" O}$ O.D. . . . Individually packed . . . shipping wgt. $11 / 2$ lbs. ea. . . . 6 units standard quantity.

## ZIP-HI

## Telescoping Mast

Zip-Hi mast comes in 2, 3, 4 or 5 sections . . . cannot collapse during installation . . . O.D. ranging from $11 / 4^{\prime \prime}$ to $21 / 4^{\prime \prime}$. . . selflocking guy-rings . . . constructed of Permatube with durable plastic coating. Shipped collapsed with guy-rings and all hardware.

Model ME-20—2 sections
Model ME-30-3 sections
Model ME-40-4 sections
Model ME-50-5 sections

3 units of a size standard quantity.

## WARD Diplexer

The foolproof, waterproof, dependable, Ward Diplexer can be used either outside to connect a UHF and VHF antenna to one transmission line or inside to connect one transmission line to the VHF-UHF terminals of a TV set. Permits use of a single lead-in and eliminates switches.

## WARD Auto Aerials

## SIDE COWL MOUNTS

Two stanchions for sturdy installation. Smartly designed insulariors with chrome caps. Conversion kit for torpedo bodies included.

## LONG RANGER

Special sensitivity for low signal strength areas. Two stanchion, triple chrome plated, rattle-proof.

Four sections, extends to $100^{\prime \prime}$
EZ-on instan Cable
EZ-on installation
Model SC-8-Individually packed, 12 to a master carton, 22 lbs. Individual weight, I lb. 10 oz.

## SKY QUEEN

Smartly styled for side mounting. Rugqed construction Finest quality heavy duty brass tubing, with corrosion-free triple chrome plate. Raffle-proof.

Three sections. extends to 66'
36" Elektran Cable
EZ-on installation
Model SC-6-individually packed 12 to a master carton 17 lbs. Individual weight, 1 lb. 5 oz.

## MASTER

Model SC-3A-12 to a master carton, 13 lbs. Individual weight, I lb.

## World Famous Ward Exclusive Patenfed <br> EIGHT-BALL Non-Disappearing TOP COWL OR FENDER MOUNTS

Completely installed from the outside in 5 minutes . . . at any desired angle. Fits any car. Rugged construction. Completely rattleproof. Smart appearance. The universal, most popular auto aerial.

Three sections; adjustable from $56^{\prime \prime}$ to $22^{\prime \prime}$ 36" Elektran Cable
Model TCF-3B-Individually packed, 12 to master carton. 14 lbs. Individual weight 1 lb .
Model TCF-2B-Same as Model TCF-3B with only two sections.
Model TCF-3C-Same as Model TCF-3B with 54' lead.

# WARD Auto Aerials 

## PHANTOM

Disappearing

A disappearing antenna - $100 \%$ shielded against engine noises. Includes Eight-Ball for easy, smart installation plus popular disappearing feature for attractive built-in appearance.

Three sections, $56^{\prime \prime}$ to $31 / 2^{\prime \prime}$ when collapsed. 36" Elektran Cable

Universal mounting bracket for sturdy installation

Model DCF-3-Individually packed, 12 to master carton, 17 lbs . Individual weight I lb.

Model DCF-3A-Same as Model DCF-3 with 54" lead.

## MAJORETTE

A new, top-quality aerial priced to meet the keenest competition. 3 Sections extend to 56'. Triple chromed on Admiralty Brass. Ward's exclusive 8-Ball top cowl or fender mount. Genuine Elektran lead cable. Quickly and easily installed from outside.

Model TA-3-36" lead
Model TB-3-54" lead

Covered by one or more of the following Patent Numbers: 104968, 119160, 2152316 2251889, 2252671. 2269947. 2366634.

Provides additional lead length required for fender installation.

Here is a handsome, colorful display to catch the eye, create interest and make sales . . . on your counter or in your windows. Available at your distributors.

Put this business builder to work for YOU. Identify yourself with the world's oldest, largest, exclusive manufacturer of antennas.

Model WCD. 3

## DEALER DISPLAY RACK $\rightarrow$

Colorful and compact in black wrought iron with yellow white and black sign, Ward's new permanent display rack will "dress-up" any show room. For practical "see-it" demonstrations, an aerial can be mounted on the side of the rack.
Model WDD-1-Contains 3 TCF-3B and 3 TCF-3C assortment.
Model WDD-2-Contains 6 TCF-3C assortment.
Model WDD-3-Contains 6 TCF-3B assortment.

## $<$-JOBBER DISPLAY RACK

Here's the modern way to store, as well as display, the Ward Auto Aerial line. This beautiful permanent black wrought iron and expanded metal rack with yellow, white and black trimmings will attract every eye ... and will sell more aerials for you.
Model WJD. 1 - Contains 24 TCF-3B and 12 TCF-3C assortment.
Model WJD-2 - Contains 36 TCF-3C assortment.
Model WJD-3 - Contains 36 TCF-3B assortment.

## by WARD

## BUILT FOR RIGOROUS SERVICE

## UNIVERSAL SWIVEL MOUNTS

Antennas built for the hardest mobile use. Separate components may be combined to meet any requirements. These rear-mounting Transmitting Antennas are designed for the $25-45 \mathrm{mc}$. services. Base mounts in such a way as to allow the whip rod to be held vertically regardless of contour of vehicle body.
$\leftarrow$ SPP-3B

## SINGLE ROD

Special Alloy Whip Rod of maximum resilience and durability. $84^{\circ "}$ Single rod for use in the range of 30 to 45 mcs . Non-Corroding, stainless steel tapered for proper stress distribution. Base Adapter threaded $3 / 6-24$ to permit mounting on SPP-3 Base or SPP-3A Spring.
Individually packed. Approx. wh.: $\mathbf{2}^{1 / 2}$ lbs.

SPP. $12 \rightarrow$

## ADJUSTABLE 2-SECTION ROD

Adjustable Rod. Telescopes from $85{ }^{\prime \prime}$ to $103^{\prime \prime}$ and is equipped with a locking device that permits removal of the whip rod and replacement at the exact previous length. Heavy wall, hard drawn brass tubing threaded $3 / 8-24$ to fry either SPP-3 Base or tion. tion.
Ind. packed. Approx. weight: 2 lbs. 10 oz.

SPP. 3

## SWIVEL BASE

Swivel base for mounting at any desired point. Half balls of cast aluminum tapped $3 / 6-24$ to ac. cept whip rods and shock springs. Insulator of black bakelite - rubber gaskets - steel backup plate. All screws are Allen Head type with wrenches supplied.
Individually packed. Approx. wt.: I lb. 10 oz.

## SPP-3A

## SHOCK MOUNTING SPRING

This sturdy spring is used to lessen damage to the whip rod. A flexible lead through the center of the spring maintains constant electrical impedance through the spring assembly. $3 / 8-24$ stud on one end - $3 / 8-24$ tapped hole on opposite end - approximately $6^{\prime \prime}$ in height made of oil tempered wire.
Individually packed. Approx. wt.: 2 lbs. 3 oz.

## NEW 10 METER MOBILE $\leftarrow$ TRANSMITTING ANTENNA <br> NEEDS BUT I HOLE FOR INSTALLATION!

Ward's SPP-143 transmitting antenna can be installed on cowl, fender or flat rear deck of any automobile without the necessity of drilling a series of unsightly holes. It is developed to use one $15 / 16^{\prime \prime}$ hole, that can easily be plugged or used to mount a Ward BBall standard broadeast antenna. The short, standard $551 / 2^{14}$ rod reduces damage from overhead constructions.

MODEL SPP-143

## NEW POLICE <br> TRANSMITTING ANTENNA $\rightarrow$ GIVES COMPLETE DISGUISE to detective Cars

To any criminal a long whip antenna is a police car giveaway. To achieve complete disguise. Ward engineered a standard automotive aerial to withstand transmitting currents and permanently fix the rod length.

WITH "QUICK RIG" - "B" COMSTRUCTION E-Z-BEE

Featuring the NEW, Matchless
"B'" Construction

Designed for
HIGHEST GAIN
in Fringe Areas and QUICK, EASY INSTALLATION

The SPICO E-Z-BEE outdoor antenna has proven itself, under rigorous testing conditions, that it will outperform and outlast all others.

Opens as easily as an umbrella-no screws, no tools needed!

Quick rig for permanent installation within minutes. Pro-assembled, foldoway, individually boxed.

The Only All-Channel VHF Outdoor Antenna with ALL these features:

Unique "B" construction
Forward resonator section
Mid-band parasitic resonator
Narrow beam width eliminates inferference
and ghosts
High gain throughout all channels
All aluminum, eliminates electrolytic action

Quick-rig, pre-assembled foldaway for E-Z installation
Non-corrosive construction
May be stacked in any number of bays
Elements securely held and positioned Uni-directional
High front-to-back ratio

Model 904 (illustrated) for VHF and COLOR. List \$16.95
Model 904U—Available with attached bowtie for UHF, VHF and COLOR

SPICO, the industry's fastest selling TV antenna line, makes the "E-Z-BEE" another money maker for you. Unique "B" construction eliminates stacking of extra bays in most locations . . . permanent installation in minutes. Weatherproof to withstand all conditions, Customers' satisfaction guaranteed,

## HY-LITE ANTENNAS for any installation

Any antenna problem can be solved with the use of the proper HY-LITE model. There is a unit for every purpose and every job. Single channel and all-band antennae are available for local, medium, and fringe areos.
HY-LITE units are mode of tubing that is specifically manufactured for use in antennae. Combined with HY-LITE ime proven methods of construction, this tubing is made into units that will give unequalled reception and long life.

## HY-LITE END FIRE ARRAYS

MODEL D. V., 2-13
Versatile local and semi-fringe unit. Stacked for fringe area. Features simplicity of installation.

MODEL C. V., 2-13, UHF
Advanced all channel End-Fire Con cal high uniform gains fringe area unit. Stacked for more gain

## HY-LITE CONICAL TV ANTENNAS

## MODEL X6R2, 2-13

6-Element Insert. Dipole. Pre-assembled Reflector.

MODEL X6HR2, 2-13
All Band-High Gain Two Elements Peaked for Migh Band.

MODEL X4R2, 2-13
4-Element Dipole Pre-assembled Reflector.

## HY-LITE "YACl"

The HY-LITE "YAGI" is designed for signal reception on a specific channel. The important feature of the "YAGI" type antenna for TV receivers is the directional characteristic. This affords greater discrimination against unwanted interfering signals and at the same time gives better reception to the TV Signal the "YAGI" is de. signed to receive. Specify channel when ordering

MODEL 10Y \#14-83 YAGI
Peaked for top efficiency on a single channel. Made in 10 elements and des ignated by 10 Y \# 14 for channel 14 , etc. Made in 5 elements and designated by $5 Y$ \#14 etc. Order by channel. (Pre. assembled.)

MODEL SY
5-Element Yagi. Pre-assembled, Elements Pre-aligned.

MODEL BY
B-Element Yagi. Low Band supplied with exira boom Cross-Arm as shown.

MODEL $10 Y$
10-Element Yagi. Low Band supplied
with extra Boom Cross-Arm as shown YAGI MODELS FOR UHF AVAILABLE

## HY-LITE SNAP OUTS

MODEL BHF, 7-13
High Band Folded Dipole \& Reflector Pre-assembled

MODEL 5030, 2-5 8 5030-6
Low Band Folded Dipole \& Reflector.

MODEL S070, 2-6
Low Band Straight Dipole \& Reflector Pre-assembled for Law Impedance Lead.

MODEL S070 BHF, 2-13
Folded High with Straight Low.

MODEL 5030 BHF, 2-13
Folded High with Folded Low Dipoles with Reflectors.

MODEL S040, 2-13
In-Line High \& Low.

MODEL S040-D, 2-13
In-Line High \& Low Additional Director for High Band.

## HY-LITE UHF ANTENNAS

MODEL UFDV "DOODLE-VEE"
High gain - ALL BAND UHF Available, Double or four bay. All alumi num snap-out assembly, including Q' Bars.

MODEL UFBT
UHF Bow tie with grid bar reflector
_ all band - High gain - Broad band. Available for stacking with "Q" Bars. Completely pre-assembled.

MODEL UFT70 "BAR-GAIN"
High gain broad band uniform UHF
response. Top grade aluminum, preassembled.

## HY-LITE FM ANTENNAS

## MODEL FM 30

Folded Dipole \& Reflector.

MODEL Y FM
High Gain Directional F.M. Antenna for Areas with Weak Signal.

## BROAD-BAND VHF TRAPPER

## TRAPPER CO-LINEAR YAGI-Cat. No. 1880

The most revolutionary antenna introduced in years. This one antenna model meets all VHF reception needs in primary, medium, medium-fringe and fringe areas plus UHF in primary areas. Exclusive Taco trapper wave-tray design makes possible a high-gain, yet neat, streamlined antenna. No larger than ordinary 5 -element antenna. Packed 2 to a carton for convenience.

ALSO Catalog No. 1882—Two stacked kit.
AVAILABLE Catalog No. 1884-Four stacked kit.

## HIGH-GAIN VHF TELEVISION ANTENNAS

## LOW-BAND SINGLE CHANNEL

TEN-ELEMENT TWO-DIAMETER YAGI-Cot. No. 1310 ()
Eight directors and one reflector provide excellent front-to-back ratio and directivity for noise rejection. Twodiameter driven dipole matches $300-\mathrm{ohm}$ transmission line for maximum energy transfer. May be stacked for increased performance. Cat. No. 1312 ( ) 2-bäy stucking lines also available.
5-ELEMENT YAG1-Cat. No. 1325 ()
An economical antenna for use in medium to medium-fringe installations. Twodiameter driven element provides 300 -ohm terminal impedance. Cat. No. 1327 () diameter driven element provides 30
2 -bay stacking lines also available.

10-ELEMENT TWIN-DRIVEN YAGI-Cat. No. 1800 ( )
Features the patented Taco twin-driven principle whereby two folded dipoles are driven in parallel for higher gain and improved terminal impedance. Extremely high front-to-hack ratio and sharp directivity for outstanding signal-to-noise ratio. Cat. No. 1802 ( ) 2-bay stacking lines also available.

## HIGH-BANDSINGLECHANNEL

10-ELEMENT YAGI-Cat. No. 1850 ( )
Provides extra gain for frimre area installations on selected high-band channel. Excellent directivity and front-to-back ratio, Two-diameter driven element provides optimum match for 300 -ohm transmission line. Ideal for use with Taco Supercharger. Also available as stacked array, Cat. No. 1851 ( ).
5-ELEMENT YAGI-Cat. No. 1350 ( )
Designed for high-band single channel reception in medium and fringe areas. Provides the basic advantares of the yagi design along with low cost. Used extensively
 in metropolitan areas where noise rejection is desired. Also available is Cat. No.
13.51 stacked array.

## LOW-BAND MULTI-CHANNEL

## BAZOOKA-TUNED YAGl-Cat. No. 1410 (—)

Used where high gain is desired on two low-band channels. (Available in following combinations: ( 2 and 6); (3 and 6); (4 and 5); (4 and 6). Bazooka tuning device maintains sharp tuning necessary for high gain.

## TRIPLE-DRIVEN BROAD-BAND YAGI-Cat. No. 1836

Designed to meet the needs for a high-gain antenna in areas where channels 3 through 6 are operating. Triple-Driven feature provides high-gain and shary directivity.
 Terminal impedance matches 300 -ohm transmission line. Stacking Kit, No. 1842 , Terminal impedance mat

TRIPLE-DRIVEN BROAD-BAND PAGI-Cat. No. 1840
Receives all low-band ehannels from 2 through 6. Perfect mechanical lalance plus extreme rugredness lends this antenna to areas recejving stations from many directions through use of mechanical rotor, Gool front-to-back ratio minimizes adjacent and co-channel interference, Stacking Kit. No. 1842 for two stack installations.

## HIGH-BAND MULTI-CHANNEL

BAZOOKA.TUNED HIGH-BAND TAGI-Cat. No. 1860
Bazooka-tuning element broad-bands the basic ten-element yagi design providing excellent gain and directivity on high-band channela 7 through 13. Desifned for use in fringe area installations. May he used in combination with Taco low-band antennas to a single transmission line by the use of Taco Hi-Lo Magi-Mix unit described on opposite page. Cat. No. 1862 () 2-bay stacking lines also availuhle.

[^70]
# HIGH-GAIN UHF TELEVISION ANTENNAS <br> BROAD-BAND, BOW-TIE, CHANNELS 14 THRU 83 

For complete coverage of the entire UHF band, the open bow-tie developed by Taco has no rival. Proved in every demonstration to outperform all others by wide margins. Open design minimizes vibration. Multiple stacking, coupled by factory

3032 designed phasing lines, provide excellent gain. Screen-type reflector and large frontal area of this four stack Bow-Tie saves time in hunting for touchy "hot spots." Kralastic insulators assure top dielectric quality and mechanical strength.

Cat. No. 3006C is designed to mount on top of existing mast or below VIIF antenna by clamping to mast section.
Cat. No. 3034A is designed for mounting to existing mast. light weight and ease of assembly are salient features.

Cat. No. 3035 Horizontal Stocking Kit for either 30060 or 3034 A antenna provides improved pick-up Cat. No. 3032 Dual Bow-Tie with Screen Grid Refector.

3034

## BROAD-BAND UHF YAGIS

UHF GRID YAGI-Cat. No. 3015
The first television antenna to be offered to the trade that is an all-aluminum, all-welded assembly. No assembled parts to corrode or loosen. Perfect electrical and mechanical union for life of installation. Grid Reflector plus 8 directors provide sharp directivity and high front-to-lack ratio. Choice of single, double, or four-stacked arrays make this model ideal for use in any UHF installation. Available in five models covering the following channels: (14-29); (21-26); (30-50); (41-63); (56-83). Special models are available for any local needs.

SELECTRONIC SWITCH
Cat. No. 873
Cat. No. 873 - Double-pole. triple throw switch. Ideal for use in switching antennas at receiver. Extremely low-loss. Matches 300 -ohm impedance. May also be used in audio systems, or for store TV demonstrations.

## MAGI-MIXCOUPLERS

Magi-Mix coupling devices incorporating low loss high " $Q$ " coils and mounted in weatherpronf, easy to attach plastic housings, are available in various types

- to couple VHF bigh-band and VHF low-band to a single down lead. - for coupling UIIF and VHF antennas to a single transmission line. - a triple duty unit for coupling high-band VHF, low-hand VHF and UHF antennas into a single transmission line.
a UHF model for coupling two UHF antennas (channels 14 thru 42 ) and ( 58 thru 83 ) into a single LHF transmission line.

## MULTI-SET COUPLERS

Cot. Nos. 820-2, 3, and 4-Two or more television receivers may e operated from a single antenna nstallation through use of these couplers. Available in two, three and four set models, all employ the low loss hirh " Q " design nherent in Taco Magi-Mix Coup lers, etc.

## SPECIALIZED ANTENNA SYSTEMS

Technical Appliance Corporation maintains the most complete antenna engineering staff, laboratory and testing grounds in the country. As a result, Taco has been called upon to design, develop and manufacture the most critical antennas for both the military and civilian markets for specialized manufacture

Technical Appliance Corporation enjoys the distinction of being the oldest television and radio antenna manufacturer in the United States. The experience gained over the years in practical antenna engineering is apparent in all Taco designs. In addition to experience, the Taco laboratory is equipped with the latest antenna testing instruments and facilities. The engineering department is constantly growing as young engineers are added to the staff, bringing with them new ideas that are combined with the unparalleled experience of the older engineers in the laboratory.

Production-wise, Taco offers equipment not usually found in an ordinary television antenna manufacturing setup. Such equipment includes high-precision machine tools, a fully equipped tool and die shop, aluminum welding equipment and a complete metal-finishing department. Whatever your antenna requirements-Taco is your best choice.

TACO MAINTAINS THE FINEST ENGINEERING AND PRODUCTION FACILITIES IN THE ANTENNA INDUSTRY

## Fiberglas antenna . . . with these

| Length |
| :---: |
| $60^{\prime \prime}$ to $90^{\prime \prime}$ |
| Net Price |
| $\$ 7.74$ |

- price includes $3 / 8$ " -24 chrome-plated brass fitting at base and smooth, rounded tip. Larger ball at tip and special base fittings available on request. Rods are white Fiberglas. Special colors available on quantity orders.

NOTE: The best impedance match requires a somewhat shorter "Wonderod" antennae than is required with solid steel.

## POSITIVE "WONDEROD" ADVANTAGES:

- Will not corrode excellent weathering properties
- Will not take a set
- Light weight, reduces bumping on springmount

## - Exceptionally high flexual strength

- High impact strength

## - Excellent insulation even at high frequencies

Reduces hazard of operating under live wires, around sub-stations, etc.

PAT. APPLIED FOR

New "Wonderod" is a Fiberglas reinforced antennae for mobile radio equipment . . . made by the pioneer manufacturer of Fiberglas fishing rods. Thoroughly tested under extreme conditions, for commercial and private installations. STOCK SIZES READILY AVAILABLE. Inquiries Solicited for Custom-Built Antennae. Mounts available.

COLUMBIA PRODUCTS COMPANY
excellent weathering enough to take the hard knocks a police antennae encounters. That's the report of CAPT'. TEE HUTTO, commanding officer of South Carolina Highway Patrol, whose "Wonderod" antennae has withstood every test known to a police officer.

## A PROVEN TOP PERFORMER

## CHECK THE NEW, EXCLUSIVE FEATURES!

Gears-Brass and steel machine cut gears set to within $002^{\prime \prime}$. Final gear is $3^{\prime \prime}$ in diameter and $3 / 16^{\prime \prime}$ thick, has own roller ball thrust bearing.
Housing - Reinforced - High strength aluminum casting, not affected by extreme temperature changes.
Brake - Automatic brake releases only when motor is energized. Prevents coasting and windmilling. Permits use of a spur gear drive which increases delivered torque. Terminals - Readily accessible. Standard terminal screws permit 4 wire hook-up to be made with screw driver only.
Bearing-Built in roller ball thrust bearing. 175 pounds weight capacity without additional accessories. Direction Indicator-A tele-metering indication system. A complete unit within itself, hermetically sealed. Not a rheostat device.
Motor-Lifetime lubricated capacitor motor.

## CROWN COMPASS INDICATOR

Constant Indication - No need to rotate antenna to obtain a reading. Needle does not fluctuate... stays steady and accurate. Is easily observed and accurately read.
Automatic Voltage Compensation -Line voltage variations do not interfere with the indicating accuracy. No need to calibrate or adjust.

Finger Tip Suitch - One switch controls antenna in either direction.
Dial - Compass indicating type. Illuminated for easy reading.
Control Box-Beautiful mahogany Bakelite.
Off and On Switch-Located next to dial. Electrically safe, push button type.

## CROWN Roller-Bearing GUY RING

Cast aluminum construction. Alloy used has extra high corrosion resistance rating.

- Weather-proof . . . no danger of freeze-ups due to unique outside casting design.
- Roller-bearing equipped for easy turning.
- Stand-off insulator furnished as standard equipment . . . tapped hole for fast installation, can be used with maximum of 6 guy wires.
- Fits any mast up to $13 / 4$ " O.D. Furnished complete with 6 bolts, 12 locking nuts, and 3 guy wire thimbles.
- Shipping weight approximately 2 pounds.
- Bearing lubrication will not freeze at $50^{\circ} \mathrm{F}$. below zero or melt at $200^{\circ} \mathrm{F}$.
- Can be used with the Crown Antenna Rotator where the rotator is mounted at the base of the antenna mast.

With the Newly Designed EEECTRONIC DIPOLE SEPARATORS (as illustroted)

1. Excellent for fringe area and DX receiving and broad band
receiving and high gain on all channels - 2 through 13.
2. Ghost problems reduced or eliminated due to excellent pattern.
3. Clearer pictures up ta 125 miles ar more from the station.
4. Provides 10 OB or more gain on high channels where gain is most needed.
5. Has excellent front ta back ratio an all channels. Eliminates co-channel interference.
6. Minimizes interference: Airplane Flutter - Diathermy and Ignitian - F.M. - Neon Signs - X-Ray - Industrial - Eic.
7. Eliminates double stacked arrays, and aut-perfarms 2 bay yagis on low band and 4 bay yagis on high channels.
8. Only one transmission line necessary.
9. No worry over possible channel changes on either high or low channels.
10. It can be tipped without tilting the mast - to take advantage of the horizontal wave lengths.
11. Can be used with an Antenna Rotor.

SUMMARIZING THE PERFORMANCE CHARACTERISTICS: The excellent gain pattern and line match are outstanding on all of the high channels and very good on all of the low channels.

PACKED: One to a corrugated shipping carton.
SHIPPING WEIGHT: 12 Ibs. Complete with Assembly Instructions.

Design Patent Pending - U.S. \& Fareign Countries
ANTENNA SIZE:
6' 2' High (less most), 8' Wide, 4' Deep

## NEW. . . SENSATIONAL

## TV DISTRIBUTION AMPLIFIER

## Permits operation of TWO TV

 receivers from ONE antenna at same time. (VHF-UHF).WITH BOOST IN SIGNAL STRENGTM

## THE Tu rotema as an electronic

 amplifier, also gives you booster effect, improving picture quality in "fringe" as well as metropolitan areas.

- A stronger signal to both sets than if each set were connected separately to its own antenna.
- Boost in signal strength improves noise and "snow" conditions which may exist in TV receivers. Amplification and isolation design of Duo-tenna insures against radiation interference between sets.
- Exclusive UHF distribution input. Immediately converts two seis to UHF reception with a single UHF converter.
- Exceptionally broad band width of Duo-tenna makes it ideal for reception of color telecasts.
- Eliminates unsightly addition of a second antenna. Saves expense of second antenna, accessories and installation labor.
- Easy to install. Complete instructions included.
- Factory guaranteed for complete satisfaction.

## SPECIFICATIONS

SZE: $8^{\prime \prime} \times 5 \%^{\prime \prime} \times 23 \mu^{\prime \prime}$. Attractive gray hammertone metal cabinet. Mount on bock of one set, or place wherever convenient to both sets. TUBES: Two 6BK7A.
GAIN: Between 1 db . and 5 db . (as function af channel) with less than 1 db . variation over any one channel.
PIRFORMANCE: Signal delivered to each set is an average of 3 db . better than the signal available from the average antenna. A theorefically ideal non-electronis: coupler introduces a loss of 3 db . at each set (if both are funed to the same channel). The Duo-tenna performs an average of 3 db . better than separate antennae. It does 0 minimum of 6 db . better than a nonelectronic coupling device.
INPUTS: YHF Antenna, 300 ohms. UHF Converter (Chonnel 5 or 6 ), 300 ohms. OUTPUTS: Two 300 ohm twin-lead connections to TV sets.
POWER CONSUMPTION: $110-120$ Volts, $A C$ only, 20 Wotts.
Complete with tubes and full instructions
MODEL DA-2000: LIST PRICE $\qquad$ $\$ 39.50$

Instantly converts all Super Fans in hiah gain VHF-UF antennas.

## THE WORLD'S LARGEST MANUFACTURER OF TV ANTENNAS

Radio's Master - 19th Edition

The exclusive "Original Adjustable Idea" intermediate tightening serew draws up slack as it chafes the pipe-bores through rust, dirt and seale, and at the same time contracts band around pipe or ground rod. The band around the pipe is a means of support for the serew and is not a part of the circuit. OVER $41,000,000$ BLACO GROUND CladMPs HAVE BEEN MANLFACTURED BY US SINCE 1904.
Use low amperage clamps for grounding telephones, lightning protectors, radios, alarm systems, electric fences, signaling devices, appliances, TV and FM antennas, and similar circuits. Use high amperage clamps for grounding electrical equipment, conduits, armored cable, metal surface wiring raceways, alarm systems, communications equipment, and similar circuits. Not for grounding neutral of wiring systems.
Part A-1E is same as Part A-1 except shield is furnished. A-1 equal to Signal Corps Clamp TM-106, Part 6Z1906, Navy G-17-C-9612. B-1 equal to Navy G-17-C-9610, and AT\&T AT-6751. T-1 equal to Signal Corps 5B3350, and AT\&T AT-6751. May also be used on $3 / 8{ }^{\prime \prime}$ and $1 / 2^{\prime \prime}$ ground rod by cutting off hand at soldered nut and between pin. Put tightening serew through hole in band. Two or more low amperage type clamps may be linked together to encircle all sizes of pipe.
B-1 and T-1—For all telephone, radio and signal circuit station grounds. The design prineiples of this clamp are field-proven to maintain high pressure contact and maximum conductivity to joint. Clamps are adjustable for grounding to iron or copper pipe. Nometimes called a Station Ground Clamp. Made only of copper and brass materials. When installed shield fits betwern tightening screw and pipe. Furnished with $3 / 8$ hex brass tightening screw and $7^{\prime \prime \prime}$ hex brass lock nut. A socket wrench is available from the manufacturer for installing B-1 or T-1.
3SL, 4SL, 5SL, 6SL Clamps consist of a flexible perforated pure copper band, which encircles the pipe. A boss raised on the flat end of the removable solderless connector fits into band holes to give a clean and smooth contact surface. Tightening screw with lock nut is threaded through the boss and assures a perfect ground. All parts are identical in desisn and construction, the only difference is the thickness of copper band, and sige of outside dia. (or I.P.S.) a clamp will fit. Solderless connector takes ground wire up to No. 4 AWG. P'ure copper band $8 / 6^{\prime \prime}$ wide is properly tempered making it easy to wrap around the pipe.

STAND-OFF STRAPS-Strap has all the physical features of our BLACO A-1, B-1 and T-1 ground clamps. They are marle from copper or plated steel. Illustrated it right, less hardware (screw, nut, washer). Stand-off is used to tighten band around pipe.
REA APPROVAL-Blaco Parts B-1, T-1, 0, and A-1E (A-1 with shield added) are REA approved and are listed in the "Surgested List of Materials Suitable for Use on REA Borrowers' Telephone Systems."

## ROYAL SWEDGE AND DIMPLE MAST

Beautiful durable 16 gauge steel tubing. Electrogalvanized finish oufside, baked enamel inside, for complete rust protection. Masr sections available in $5^{\prime}$ and $10^{\circ}$ lengths for easy "on the spot" assembly.

$$
\begin{array}{llllll}
\text { RSD. } 5 \mathrm{ft} . \text { sections } & 1-1 / 4^{\prime \prime} \text { O.D. } 16 \text { ga. } & 3.9 & 2.10 \\
\text { RSD-10 f. sections } 1-1 / 4^{\prime \prime} \text { O.D } 16 . & \text { ga. } & 7.8 & 4.05
\end{array}
$$

Swedge plus Dimple equals Positive No-Turn Locking.

## ROMAKTELC TELEMASTS  <br> ROYALTEL ACCESSORIES

Dengmed to simplify and make safe the securing of guy wire lines. The Gitime Winch is mounted with one Bolt. The channale and ratchets are mado of 12 ga . steel, with drums of heary steel reds, ell electrogetranized. It is foolproof, in that the cottor pins lock firmly in place against the ratchet pawls. A turn of the wrench gives proper temion to the Guy Lines.

ShIPPNG WEGHT ! LB.
GLW LIST PRICE \$2.78

ROLLED EDGE GUY RING $\varepsilon$

1. Royal's Rolled Edge Guy Ring eliminates danger of guy line boing cut by a sharp ring odge.

## PREMAX MOUNTINGS BASE MOUNTINGS

Type 1-Galvanized malleable iron or chrome plated brass hardware with height to post bese w 8 lbs. to for all Premax Vertical Ants. Available for an premax Vertical Antennas. SpecThis is also number or post diameter.
Type 2-Light design with brown glazed porcelain and removable top post. In steel only. Height to post base $6^{\prime \prime}$. For Premax Antennas up to $24^{\prime}$. Specify Antenna number or post diameter.

## DECK OR ROOF MOUNTING

Type $6-6^{\prime \prime}$ flange in galvanized malleable iron with studs and bolts for $1 / 2 "$ to $6^{\prime \prime}$ deck. Lead-thru construction permits connections below roof or deck. Height to post base $3^{\prime \prime}$ to $5^{\prime \prime}$. Weight $111 / 2 \mathrm{lbs}$. Available for al Premax Antennas. Specify Ancenna number or post diameter.

## TYPE IO-C MOUNTING CLAMP

Type 10-C Mounting Clamp has porcelain split bushing in stamped steel frame. Height to center $2^{\prime \prime}$. Wt. $8 / 4 \mathrm{lb}$. Sizes to fit $5 / 8^{\prime \prime}, 3 / 4^{\prime \prime}, 7 / x^{\prime \prime}$ and $1^{\prime \prime}$ only.

## TYPE 10-S STANDOFF INSULATOR

Type 10-S is a heavy-duty insulator in chrome-plated bronze with brown glazed porcelain. Solid or hinged clamp. Height to center about $41 / 2^{\prime \prime}$. Wt. 3 lbs. Available in sizes to fit $1 / 8^{\prime \prime}$ to $11 / 2^{\prime \prime}$ tube diameter.

## TYPE 13-S STANDOFF INSULATOR

Type 13-S-In heavy cast alumium or brass, plain or chrome-plated, with brown glazed porcelain, $3^{\prime \prime}$ diameter. Height to center $43 / 4^{\prime \prime}$. W t. 2 lbs. In sizes to fit $8 / 4^{\prime \prime}$ to $11 / 2^{\prime \prime}$. Specify size and material ; also whether solid or hinge cap.

## SERIES C CENTER-LOADED MARINE ANTENNAS

Center-Loaded Collapsible Marine Antenna for 2 to 3 mc . with power gain of 6 db . Two telescoping base sections with top whip. Extended length 17 ft ., collapsing to 7 ft . In aluminum, monel and stainless. Fits standard Premax Mountings shown on preceding page.

|  |  | Base | Base | Wt. |

## MOBILE

For $1 /$ r" $^{\prime \prime}$ Diam. Whips

TYPE R-2 - Universal Mounting. Solid aluminum split-ball can be adjusted to any angle. Has shielded coax con nection.

TYPE RS-2-Similar to the above except has spring as shown under Type SA-1.

TYPE S-I - Spring Mounting, heary - duty spring, bakelite insulation with rubber gasket and steel back-plate with shielded co-ax fit ting. Ht. $5^{\prime \prime}$.

TYPE SA-1 - Spring Adaptor (similar to Type S-1 and RS-2 which can be attached to Type K, L, TA, CA or NA Mounting. Ht. $43 /^{\prime \prime}$, Dia. $15 /{ }^{15}$.

TYPE F- $30^{\circ}$ Adjustable Mounting for fender cowl or gravel pan. Chrome - plated bras with bakelite insulation.

## MOUNTINGS

or Any $3 / 8^{\prime \prime}-24$ Maie Thread
TYPE NA-1 - Bumper Mounting with ceramic cone insulator and steel bracket.

TYPE L-I - Bumper
Mounting, ${ }^{\text {a pairs }}$
ceramic cone insulators
with steel bracket. $10^{\prime \prime}$ adjustment.

TYPE XL - Panel Mounting, similar to L-1 Mounting, similar to b-1.

TYPE K-I - Bumper Mounting, ceramic cone insulators, cadmium plated brackets; 10" height adjustment.
TYPE TA - Trunk or Panel Mounting ; ceramic cone insulators, cadmium - plated brackets. Fits any contour surface. $10^{\prime \prime}$ adjustment.

TYPE CA - "Chain Style" Bumper Mounting. Clamps on any bumper with $1^{\prime \prime}$ clearance; no drilling ; theftance;

## CIVIL DEFENSE, PUBLIC SERVICE, FIRE, POLICE ANTENNAS 100 TO 162 MEGACYCLES

FCDA is insisting on adequate communications in Civil Defense and cities everywhere are installing RACES Defense and cities everywhere are instaling Race and equipment that cals for outstanding ground plane and urofitable numbers to cover this new market.

## GP314

## GROUND PLANE ANTENNAS

For point-to-point installations, Premax has two VHF Antennas: The Style GP-8 which has elements of heavily-plated spring steel with skirt wires that can be bent down to any angle to match coax cable. Mounting is within a water-proof housing that fits standard housing thru pipe.
$1 / 2^{\prime \prime}$ pipe. Cable carries down 2 meter and CD.
Style GP-314 for 144 Mc. For 2 meter and CD. Style GP-3is for 152 to 162 Mc . For police and taxi.

## ADJUSTABLE GROUND PLANE ANTENNAS

Another low-cost type Ground Plane Antenna is adjustable from 20 to 40 mc . or 40 to 60 mc . Standing wave ratio matching to 52 -ohm line is 1.07 to 1.13 and to 72 -ohm line is 1.27 to 1.23 depending on type of transformer cable. All-aluminum construction employing adjustable tubular elements. Style GP-430-Adjustable 20 to 40 Mc .

Style GP-450-Adjustable 40 to 60 Mc .

## CAR-TOP OR MOBILE ANTENNAS

Premax Mobile or Car-Top Antennas are made of heavily-plated, highlytempered spring steel wire in elements of precise diameters and lengths. Mountings are well insulated and so designed that one man can install them through a single small hole in a car roof.
STYLE CD-114 for 144 mc. For 2-meter amateur and CD. Porcelain insulator. One man installation thru $1 / 2^{\prime \prime}$ rooftop hole. STYLE CD-112 for 108 to 120 mc . For aircraft and CAP. Similar to CD-114. STYLE CD-115 for 152 to

CD. 114 162 mc . For police and taxi. Similar otCD-114.

## EMERGENCY TYPE

STYLE CD-214 for 144 mc Emergency type with rubber Emergency type with rubber suction cup base. No hole required. Can be installed in matter of seconds. Ideal for CD.

STYLE CD-215 for 152 to 162 mc. For police and taxi. Similar to CD-214.

STYLE CD-212 for 108 to 120 me For aircraft and CAP. Similar to CD-214.

## BAETR TOWERS FOR TELEVISION

## NEW HEAVY GAUGE TELESCOPING MASTS

New mast joint requires a minimum of hardware, has $6^{\prime \prime}$ overlap for added strength and rigidity. Heavy gauge J \& L Permatube construction. Free-floating cupped guy washer included-will not bind mast even if a ladder is placed against it

## SOUND CADDY

Highly serviceable portable case. Accommodates two 12 -in. speakers with space below for most amplifiers (with turn-table) up to 30 watts. Amollfier bolts to mounting board. Mahogany leatherette 17" wide by $23^{\prime \prime}$ high by $13^{\prime \prime}$ deep. SC-I-Shipping Weight $22 \mathrm{lbs} . .$. Net $\$ 19.50$

## RECORD CHANGER CASE

Sturdily built for long dependable service. Handsome mahogany leatherette with brass-finish hardware (also corner hardware, not shown). Clearance above mounting board $61 / 2 \mathrm{in}$. Size $161 / 2^{\prime \prime}$ square by $111 / 2^{\prime \prime}$; inside $3 / 4^{\prime \prime}$ less.
PC-IA-Shipping Weight 16 lbs.

THE NEW Campryy call tube caddy

## COUNTS and CARRIES Your TUBES

Specially designed for the television serviceman. Makes work easier and quicker - and YOU more efficient. Holds up to 262 receiving-type ubes, plus TOOLS and MEIER. You TAKE INYENTORY AT A GLANCE. Missing cartons easily spotted.
Shop owners say the Tube Caddy PAYS FOR ITSELF IN 3 WEEKS time. Their men are checked in and out faster, and always arrive on the job with the tubes they need. This means more calls per day, and lower cost per call. Moreover, customers recognize their service is up-to-theminute, with every aid available for faster, more efficient repair.
Heavy two-tone gray scuff-resistant leatherette with handsome brass Heavy two-tone gray scuffreresistant leatheretfe
finish hardware. Solidly built for long service.
TC-4-Size $8 \times 15 \times 21$ in. Shipping Weight 16 $\qquad$ Net $\$ 13.95$

## DELUXE TUBE CADDY

Combines drawers with convenient top tray for TOOLS and METER. Holds up to 225 tubes. Heary two-tone grey to 225 tubes. Heavy two-tone grey leatherette, etc., same high quality as above. Stay hinges support top cover: slip-out hinges on front cover with clips for data sheets or mirror (not furnished).
$\begin{gathered}\text { IC-3-Size } \\ \text { weight } \\ 16 \\ \text { lbs }\end{gathered} \times 14 / 2 \times 9 / 4 \mathrm{in}$. Shipping weight 16 lbs.. $\quad$ Net $\$ 14.95$

ORIGINAL "TUBE CADDY"
Holds up to 249 tubes without a single inch of waste space. Prized possession of thousands of TV servicemen. Drawer. partitions removable to accommodate TOOLS and METER. Brown leatherette. Slip-out hinges, etc. Size $20 \times 131 / 2 \times 9$ inches.
TC-18-Ship. Wt. 16 lbs.-_........Net $\$ 13.50$

## TUBE CADDY "JUNIOR"

Companion piece to larger units above. Same work-saving features in $2 / 3$ rds the size and weight. Easy to carry. Holds up to 143 tubes, or less with TOOLS and METER. Brown leatherette, slip-out hinges on cover, etc. Handy size $151 / 2 \times 13 \times 8$ in.

TC-2-Ship. Wł. 13 lbs $\qquad$ Net $\$ 7.75$

## TV CABINETS For All Popular TV Chassls

16" to 27" Tube • Mahogany or Blonde, Same Price Convert your TV chassis into a complete set with minimum cost. Exceptionally well built Argos cabinets fit finest surroundings. ALL ARGOS PRODUCTS equipment is sold only through Parts Jobbers. The name Argos stands for craftsmanship in cabinetry. Prices slightly higher West of Rockies.

## MALIORY MODEL 88 UHF COMVERTER

The Mallory Model 88 UHF Converter expands the receiving capability of any conventional VHF television set to include reception of all UHF stations located within the signal range.

Designed for continuous tuning, this UHF converter insures a compatible balance of inductance and capacitance over the entire, tuning spectrum from 470 to 890 megacycles with a single control.

The smooth and easy operation of the Model 88 Converter is the result of many years of Mallory research in the field of variable inductance tuning devices. This program has resulted in the successful combination of modern circuit techniques required for converting conventional UHF signals to intermediate channels. The Model 88 will result in added television entertainment, through wider program selection, from the conventional television receiver.
The Model 88 Converter is equipped with a built-in UHF antenna which permits installation without the need for special tools or technical skills.

To simplify the operation of this unit even further, a 3-position, "master control"' switch is located on the panel to assure rapid selection of:
(a) UHF station tuning.
(b) Normal operation of the VHF set.
(c) Switching VHF set and converter off and on.

Complete installation and operating instructions and warranty are included with each unit.
Catalog No. Model 88
List Price $\$ 34.95$

## DETAILEDSPECIFICATIONS

Tuning Range: The tuning range of the Model 88 extends from 470 to 890 megacycles in a continuous, unbroken aweep of the tuning dial. This permits accurate tuning of all UHF TV channels without the addition of strips, coils, or band switches. The Mallory Converter is constantly tuned for operation in all areas of television reception.
Tube Complement: 6AF4/6T4 Oscillator; 6CB6 I.F. Amplifier: Selenium Rectifier; and a 1N72 UHF Diode Detector.
Circuitry: Three tuned circuits are employed in the UHF range to provide antenna pre-selection as well as the oscillator-mixer tuning function. These circuits are controlled manually by means of a single shaft actuated from the front panel of the converter. A 6CB6 amplifier, operating at a mean of 82 megacycles, is part of the Model 88. It provides additional amplification at the converter I.F. (either VHF channel 5 or 6). A combination change-over and AC on-off switch is provided to permit quick selection of either VHF or UHF stations from the front panel of the instrument.
Antenna Input Impedance: 300 ohms nominal.
Output Impedance: 300 ohms.
Stability: Oscillator drift and instability in the Model 88 are reduced to a negligible factor by the omission of all mechanically unstable parts, such as; air-tuned condensers, long leads, awitches, and coil strips. Thermal sensitive parts are mounted away from heat producing components such as the I.F. and power supply tubes. The Model 88 stabilizes after approximately 1 minute when used with inter-carrier VHF TV sets, and after 3 to 5 minutes when employed with split-circuit sets.
Dial Mechanism: The dial is a slide-rule type, calibrated in TV channels 14 through 82. Full coverage of the entire tuning range is accomplished with approximately 7.5 turns of the tuning knob. Numerals indicating calibration are in gold on glass, and extend approximately $4^{\prime \prime}$ across the face of the instrument.
Power Supply: The Model 88 is designed for 117 volt, 60 cycle operation. The power supply consists of a transformer, a selenium rectifier, and a resistance-capacitance filter. Approximately 25 watts of power are required for operation.
Cabinet: Cabinet is attractive and of compact modern design. Measures $71 / 2^{\prime \prime}$ wide, $4^{5 / 16^{\prime \prime}}$ deep, and $53 /^{\prime \prime}$ high. Bottom of cabinet has felt pads to prevent marring of furniture.
Weight: Approximately $31 / 4 \mathrm{lbs}$.

## THE MALIORY UHF INDUCTUMER*

The Mallory UHF Inductuner, the result of years of research by P. R. Mallory \& Co. Inc. in variableinductance tuning of resonant circuits, is a compact assembly of variable inductances available in three sections. It will tune continuously the UHF range of television channels from 470 to 890 megacycles when used with proper circuitry.

Features of the UHF Inductuner include: reduction in overall capacitance while maintaining the same compact case as used for the Spiral Tuner; complete shielding between sections; shaping of the various sections for oscillator tracking at an I.F. of 82 Mc .; rugged contacts, and positive, uni-control coverage in $270^{\circ}$ of rotation.

Additional information is available on request.

## SPIRAL TUNERS • GRID BIAS CELLS

Mallory Spiral Inducfuner*

The two, three and four gang Spiral Inductuners* are variable inductance tuning devices designed to provide efficient front-end tuning in deluxe television and FM receivers and boosters. When used in conjunction with suitable tubes and a mini mum of circuit wiring, these Inductuners assure accurate, noise-free and continuous tuning of the entire frequency spectrum from 52 through 216 megacycles. The Inductuner eliminates the need for band switches, plug-in coils, turret coil assemblies or complicated circuit wiring when used for this purpose.

Tuning is accomplished in all models by means of a single $1 / 4$ " shaft to vary the inductance of each of the inductors simultaneously from the front of the equipment using the Inductuner. Automatic stops at the maximum and minimum inductance positions are provided to prevent damage to the inductors.

The individual coils have a maximum inductance of .985 uh and a minimum inductance of .025 uh. Total shaft turns are $5.925+.060-$ .000. Each Inductuner has a $2 \frac{1}{2} 2^{\prime \prime}$ shaft— $14^{\prime \prime}$ diameter.

Model 8302 is ideal for use in a TV booster (see schematic diagram below). Models 8303 or 8304 are suitable for TV front-end service.

* Inductuner-Registered trade mark for Mallory variable inductance tuning devices. Manufactured and sold under one or more of the following Paul Ware and Mallory patents: 2,163644, 2,163645, $2,163646,2,163647,2,260877,2,377789,2,377790,2,399060$, 2,405890, 2,443020, 2,443822, 2,505178, 2,540863, 2,666906. Other patents applied for.

Grid Bias Cells

Mallory Grid Bias Cells are amall acorn shaped, self-contained devices. The metal con tainer or cup is the negative electrode. The black disc is the positive electrode.
The principal use of Mallory Grid Bias Cells is in the biasing of the first audio amplifier tube in modern high-gain receivers. The bias cell does not need to be by-passed to ground

The no-current potential of the cells is within plus or minus $10 \%$ of their rated voltage. The cells are strictly potential or voltage cells for biasing class "A" amplifier tubes and should not be used for biasing power tubes or oscillators, or for any circuit where direct current may flow through, or be drawn from, the cells.

The cells may be used at temperatures from $0^{\circ} \mathrm{F}$ to $140^{\circ} \mathrm{F}$. The voltage of the cells remains reasonably constant throughout this wide temperature range. Whenever possible, place the bias cells in the coolest location. The cells exhibit no change in characteristics when exposed to a relative humidity of $90 \%$ at $120^{\circ} \mathrm{F}$

Mallory Grid Bias Cells are non-reactive at audio frequencies. The DC resistance of the cell ranges between 10,000 and 40,000 ohms. The cells do not cause noise.

## Two-Gang Spiral Inducłuner Booster for TV, FM and General Purpose Tuning Continuous Range: $\mathbf{5 4}$ to $\mathbf{2 1 6}$ Mc.

At the left is a schematic diagram of a fullcoverage, TV booster employing the Mallory No. 8302 2-gang Spiral Inductuner. This TV hooster is entirely practical and suitable for home-shop construction by the average technician. The Inductuner supplies all the essentials required for tuning in one, compact, factory-adjusted unit, thus providing simplified construction. No tuning condensers, band switches or plug-in coils are needed. Possible errors usually attendant with hand-wound coils and unknown tolerances of tuning condensers are completely avoided.
The proven efficiency and high gain of a 6AK5 tube has been utilized to the fullest extent. The antenna changeover switch usually found in booster circuits has been eliminated to provide vital R.F. wiring, which is short and direct. An infinitely variable screen grid gain control has been added to prevent overloading by strong, local signals, Either 300 -ohm balanced or 72 -ohm unbalanced input and output feed lines may be employed with comparable results.

A folder containing detailed and construc tional information, plus a listing of component required for building an Inductuner booster, is packed with each No. 8302 Inductuner.

## TENNA-TOP ANTENNA-MOUNTED TV BOOSTER <br> Low Noise - All Channal - Self-tuning - Permits Long Lead-ins

Mounts at antenna, ahead of lead-in. Amplifies only wanted TV signals, NOT local noise picked up by lead-in. Completely automatic, fully electronic. NO manual tuning necessary. Exclusive EV broadband circuit assures uniform high gain across entire band width. Tapped power transformer in junction box permits satisfactory operation with long lead-ins. Use of high quality wire allows lengths up to $3000^{\prime}$. Extremely stable, no signal drift, no limiting peaks. Easy to install. Single lead-in carries power up, brings amplified TV signal down. Uses all-band or separate hi and low channel antennas. Amplifier unit is rugged, weather-proof, troublefree. Easily mounted on mast. Junction control box easily hidden in TV set.

Model 3010 SUPER-TENNA TOP. Uses four tubes for two separate high and low band 2-stage amplifiers. Input and output $150-300$ ohms. Booster unit $711^{\prime \prime} \times 71 / 8^{\prime \prime} \times 6^{\prime \prime}$ in rugged, moisture-proofed housing. Junction control box $69 / 4^{\prime \prime} \times 31 / 8^{\prime \prime} \times 141 / 2^{\prime \prime}$ finished in gray hammertone. For 105.125 volts, 50.60 cycles AC. Complete with four 6 J 6 tubes, mounting brackets, and plug-in cord. Shipping weight 11 lbs.

List Price.

## MODEL 3400 UHF TV BOOSTER

High Gain - Increased Sensilivity - Micrometer Type Tuning

Again EV creative engineering contributes a major advance in ultra high frequency electronic research with the production of the Model 3400 UHF TV Booster. If you are located in a UHF fringe area the Model 3400 will enable UHF reception equal to that in primary areas. The use of a special push-pull grounded grid circuit provides a substantial increase in sensitivity, improved signal-to-noise ratio and reduced "off frequency" interference. Exclusive micrometer type tuning system permits smooth, precision tuning over the entire UHF range, channels 14 through 83. As a result of careful, thorough UHF engineering, the performance, stability and ease of tuning of the Model 3400 UHF Booster compares favorably with the finest VHF boosters.

Modal 3400 UHF pOOSTER. Employs two 6AJ4 RF amplifiers in a push-pull grounded grid circuit with silver plated, distributed constant resonant system. Frequency range, 470 mc to 890 mc .300 -ohm input and output impedance. For $105 \cdot 125$ volt, 60 cycle AC. 19 watts power consumption. Attractive metal cabinet finished in rich, warm brown. $78 / 4^{\prime \prime}$ wide, $51 / /^{\prime \prime}$ high, $61 / 4^{\prime \prime}$ deep. Shipping weight $5 \frac{1}{2}$ lbs.

List Price.
.$\$ 44.78$

## MODEL 3005 FM BOOSTER

## Fully Automatic - High Gain - Broadband

The lasting pleasure of fine FM music under all conditions is made possible with the Model 3005 FM Booster. No more "lost programs" in difficult city locations or in outlying lowsignal areas. Utilizing a special design high-gain circuit, this all-electronic broadband booster takes full advantage of all FM features without compromise. Extends the useful range of FM reception; clearly brings in stations not possible before. Increases signal strength over 10 times ( 20 db ) uniformly throughout the entire FM spectrum from 88 to 108 mc . Thermal relay permits FM booster to be turned "on" and "off" by the receiver without any circuit modifications. Completely automatic, no tuning or adjustment required; simple to install.
Model 3005 FM BOOSTER. Uses two dual triode tubes in a highly developed, low internal noise circuit. 300 -ohm input and output. For $105-125$ volt, 60 cycles AC. Automatic switch actuated by sets consuming between 40 and 250 watts. Sturdy metal two-tone gray case. Vertical mounting brackets included; rubber feet. $55 / 2^{\prime \prime} \times 4^{\prime \prime} \times 53 / 8^{\prime \prime}$. Complete with tubes and plug-in cord. Shipping weight 3 lbs .

DB. 550

DB-550 REGENCY CASCADE VHF BOOSTER

Two-sitgg. Model with twice as much Eain and low noise. Superior performance. Single tuning knob . . . large, casy to reat numbers. Designed esHeecially for use with CASCODE front puds. Only $\$ 37.50$ Lisł Price

## VB-1 REGENCY VOLTAGE BOOSTER

The answer to low line voltage problems. (iet full power potential and peak performation from your TV set or any electrical device drawing 350 watts or less. This manually operated autoformer maintains full 117 volt power supply, Insures full sizo TV preture when low line voltage shrinks pictur, size. $\quad \$ 19.95$ List Price

POWER SLPPLY

## HF-1000 REGENCY PLOFESSIONAL HIGH FIDELITY EQUIPMENT FOR THE HOME

For those who can afford the finest. To mote the requirements of discriminating music lovers, the Regency Professional High Fidelity Ensemble for the Home has been developed and built . . . without regard to cost. Exceptional care and research have gone intc the unusual flexibility of the extracrdinary controls . . . which allow precise adjustraents, not only for the source of the sound but for the particular room acoustic and individual psycho-acoastics. An utterly new concept in appearance, as well as lusury listening, the gold and black phsemble is denigued with such striking simplicity that it need not be housed in a cabinet. REGENCI
guarantees these units forever against defects in material and workmanship, $\mathbf{\$ 1 0 0 0 . 0 0}$ Audiophile Net

POWER AMPLIFIER

PRE-AMPLIFIER

## HF-1 50 REGENCY HIGH FIDELITY AUDIO AMPLIFIER

HF-150

A sensationally prices qualaty high fidelity amplifier with output to cover $99 \%$ of all applipations. Frequency range from 20 cycles to 40,0 a0 cycles. Five controls on thie HF-150 demonstrates its real flexibility. Bass and on-off switch-trehi.-loudruess con-trol-level control-record compensation and input selectar. Handsome gold anodized aluminum chassis makes it umecessary to hide.
$\$ 99.50$ Audioohile Net

## HP. 45 REGENCY HIG|H PASS FILTER

Here is an effective High Pubs Fifter to suppress televisien interference. It is a constant " $K$ " type filter with a cut-off frequency of approximutely 45 mc in a 300 ohm balanced line. Signals above 55 me are passed through the filter without loss.

Amateur Met, only $\$ 0.99$
-

## RC-53 REGENCY UHF CONVERTER

RC-53

The fastest moving converter because of its low price, high quality, and in addition, provides conversion from all liff channels to a wide selection of VHF chamels. A convenient AC outlet is provifed for control of the TV set by meana of the OFF-ON switch. Unixcelled performance. Housed in an itfractive bakelite cabinet.

List Price $\$ 19.95$

## DE-98A REGENCY FM BOOSTER

DB-98A
This rompact booster brings in the full shory of FM sound even when you live miles from the transmitter. Just plug it in-then settle back and enjoy luxury listening such as you've never hefore experjenced. 88-108 MC. Pushpull amplifier. Attractive plastic cabinct harmonizes with any style radio.
$\$ 29.95$ List Prlce

RT-700 REGENCY CHAIRSIDE TELEVISION CONTROL

Regency puts an end to "jack-in-thebox" televiewing with this easily in. stalled Remote Control. It works on as mucis as 100 ft . of cable. Permits running cable around room periphery. Changet channels, controls coutrast, and ajusts volume from where the picture is viewed. $\$ 69.95$ List Price

Ask your Regency representative about the Regency HI-Fi distribution plan.

## I.D.E.A., INC., Regency Division•Indianapolis, Indiana

## Millions of TV Set Owners are your prospects for New and improved STADR TUNERS

The Standard Tuner is the most widely used "front end" in the television industry . . . now performing in more than $11,000,000$ sets representing 40 per cent of the market. Standard tuners are specified by 75 nationally known manufacturers because of proved dependability, superior gain and easy conversion to UHF.

## SUPER CASCODE TUNER, TV-2232* <br> Dealer, $\mathbf{\$ 2 4 . 5 0}$ List, $\$ \mathbf{3 4 . 5 0}$

Standard super cascode tuner TV-2232 receives signals at further distances than the original cascode tuner, making it your most effective tuner replacement in fringe areas.

SPECIFICATIONS

*This tuner I.F. is nominally set at 22.3me at the factory but can be adjusted to any frequancy within the range of $19-26 \mathrm{mc}$. Also avallable in the 41 mc range.

PENTODE TUNER, TV-1 532
Dealer, \$22.95 List, \$32.50
Standard pentode tuner No. TV-1 532, completely redesigned for top performance, is your ideal replacement where signals are stronger.

# UHF CONVERTERS. TUNERS. TEST EQUIPMENT 

## COAXIAL TUNING • PRESELECTION • AMPLIFICATION

## The superior performance of Granco UHF converters and tuners is due to these Granco features

COAXIAL TUNING: Most efficient UHF tuning system known. Extreme mechanical and electrical precision. No wiper contacts. Con tinuous tuning over entire UHF band. Highest stability.
FINE TUNING: No "on-again off-again" tuning with Granco. No slipping past desired channel, especially with weak signals. Instead, fine tuning is simple and positive with high-ratio tuning knob. "On-the-button" tuning assured without need for "safecracker's touch."
PRESELECTION: Rejects unwanted signals and spurious interference, Only the desired signal tuned in. A "must" in areas with two or more channels, either JHF or VHF

AMPLIFICATION: Low-loss tuning and associated circuitry, plus high-gain amplification of tuned-in channel, means cleaner, brighter, more enjoyable pictures.
WORKS WITH ANY TV SET: The Granco UHF Converter feeds a 300 -ohm input to any VHF television set tuned to Channel 5 or 6 . Selector switch instantly provides for UHF or VHF reception.
FITS THE REQUIREMENTS: With four models to choose from, Granco meets the requirements of every purse and purpose. No need to pay more than necessary for entirely satisfactory resulta in any

## "CHALLENGER" Series SLU

- More converter, less cost
- All.channel continuous tuning
- Two-cavity coaxial tuner
- Smart styling for modern decor
- Fine tuning; preselection: stability

No other UHF converter in this price class - or other makes costing up to $\$ 10$ more - can match the performance of the "Challenger." Works with indoor antenna in usual locations. Smart modern styling - plastic cabinet, large gilt-center tuning knob, semi-circular tuning dial, easily-read channel designations, selector-switch knob. Positively - and ready to meet any challenge - the SLU "Chal. lenger" stands for most converter for least cost.

MODEL SLU "CHALLENGER": Complete with tubes (6AF4 oscillator, 6CB6 I.F. amplifier, IN72 crystal mixer). Individually packaged in corrugated carton, with instructions. LIST PRICE: Mahogany, $\$ 24,95$; sand, $\$ 27.95$.

## "SUPER" Series MTU

- Greatest gain for weakest signals
- Three-cavity tinuous tuner
- High-ratio tuning knob
- Cascode amplification
- High-power two-unit chassis

Combining outstanding performance with smartest styling. Neets esthetic requirements of the fastidious housewife, while performance meets the rigid demands of the advanced TV fan. The logical converter in areas Where signal strength is low and where distance is great. Model MTU will work where other converters do not perform at all. Two-unit chassis, with complete power supply including vacuum-tube rectifler and three-cavity coaxial tuner. Exceptionally smart appearance - metal cabinet in simulated mahogany (or blond at slightly higher price) set off by gold-framed panel with quadrilled upper half. Large gilt-center tuning indicator, and amaller concentric knob for precision tuning and selector-switch.

MODEL MTU "SUPER": Complete with tubes (6BQ7A cascode amplifler, IN82 low-noise silicon diode, 6X4 vacuum-tube rectifler, 6AF4 oscillator). Individually packaged in corrugated carton, with instructions. LIS $\dagger$ PRICE: Mahogany, $\$ 39.95$; blond, $\$ 42.95$.

A further refined and restyled "Star" (Model ICU) of which tens of thousands are in daily use. Ideal in weaker-signal areas or locations where greater gain is desirable. The best performer of any UHF converter in its class. Smartly styled cabinet in mottled mahogany plastic (blond optional at slightly higher price).

MODEL LCU "STAR": Complete with tubes (6AF'4 oscillator, 6CB6 I.F. amplifler, IN72 crystal mixer). Individually packaged in corrugated carton, with instructions. LIST PRICE: Mahogany, $\$ 29.95$; blond, $\$ 32.85$.

## "DELUXE" Series DUC

- Finest wood cabinet
- In mahogany or blond
- High-power two-unit chassis
- Cascode amplification
- Three-cavity coaxial tuner
- Superlative sensitivity, selectivity, gain

The ultimate in performance and rich appearance. Housed in handsome wood cabinet finished in mahogany or blond. Gold-finished cor-rugated-motif shadow-box frame for recessed slide-rule dial. Two gilt-center dials for tuning and selector-switch. Styling in such excellent taste that it "belongs" with the most elaborate TV console. Two-unit high-power chassis, with power supply including vacuumtube rectifier, and three-cavity continuous all-wave coaxial tuner. Superlative sensitivity, selectivity and gain.

MODEL DUC "DELUXE": Complete with tubes (6BQ7A
cascode amplifter, IN82 low-noise silicon diode, 6X4 vacuum-tube rectifier, 6AF4 oscillator). Individually packaged in corrugated carton, with instructions. LIST PRICE: Mahogany, $\$ 49.95$; blonde, $\$ 52.95$.

# UHF CONVERTERS. TUNERS. TEST EQUIPMENT 

*Patent applied for.

Fasiost, cheapest, neatest concealed UHF conversion job. Installed without puiling out heavy chassis; with out fussing with turret tuner; without realignment bothers; without getting interference from adjacent chamme's.
Yet the Hideaway provides continuous high-ratio tuning over entire UHF hand; high signal-to-noise ratio; preselection for clean interference-free pi-tures; high sensitivity.
Seat metal cabinet mounts at rear right of TV cabinet, with slide-rule dial showing, and with tuning knob and selector switch at right of cabinet. So small, it attaches to any TV set (mounting brackets supplied). So simple, it works on indoor antenna in most localities. So inexpensive, that evern the oldest tradeins rate this UHF conversion. So necessary, that even the brand new TV set needs it when UHF stations come along. Also, it can be used as a top-of-cabinet converter.
Available in three different models for three different operating requirements and in corresponding price ranges:
MODEL HT-1 - The price leader. Yet a complete coaxial tuned ${ }^{1} \mathrm{HF}$ converter. Takes minimum power from TV set, with simple socket connections. Ample sensitivity in most UHF areas. Preselection means clean pictures with minimum "snow." Cuts out interference in areas with two or more VHF or IHHF stations. On-the-button tuning. LIST: $\$ 15.95$
MODEL HT-2 - Self-powertd, (otherwise same fine features as HT-1. No nexd to make any power connections inside the TV set. Just connect with TV set and antenna. LIST: $\$ 18.95$
MODEL HT-3 - Seli-powered, plus additional lownoise amplification. Ideal in weak signal areas. A wonderful buy for those who want superior IUHF performance. LIST: \$21.95

## GRANCO UHF SIGNAL-GAIN GENERATOR

Type SU-200 Granco UHF Signal-Gain Generator, is a new type of instrument for UHF television areas,

## THESU-200 FEATURES...

- Coaxial tuning elements
- Accurate tuning over entire UHF band
- Calibration in both frequency and cnannel numbers
- Balanced detector meter circuit and gain control
- Simple operation for quick measurements

## APPLICATIONS .

1. Measures gain, tracking, calibration accuracy and range of UHF tuners, converters, antennas, strips, boosters, and receivers.
2. Acts as signal power source for various types of measuring equipment, such as VHF bridges and slotted line.
3. Ideally suited for development, production, and communication testing.
with more versatility and usefulness than any other similar instrument within at least twice the price.

## SPECIFICATIONS...

Frequency Range: $440-910 \mathrm{mc} \pm 2 \%$ in a single direct-reading tuning range.
Output: CW
Spurious Frequency: None
Leakage: Negligible
Output Voltage: 2 volts available across 50 -ohm unbalanced or 300 ohm balanced termination.
Cables: 1. 3 -foot cable with 300 -ohm halanced pad termination. 2. 3 -foot cable with 50 -ohm unbalanced termination
3. 3 -foot twin lead cable.

VHF Input Impedance: 300 olims lalanced.
VHF Detector Sensitivity: 200 MY with VHF gain control set at .5 and meter pointer at midscale.
UHF Output Terminal: BNC Panel Jack type UG 291/U.
VHF input Terminal: $\mathbf{3 0 0}$-ohm twin lead receptable.
Controls: Meter switch - UHF output - VHF input UHF output control - varies from 0 to 2 volts. in db and voltage -6 db to $+12 \mathrm{db}-.5$ to 5 .
Dimenslons: $101 / /^{\prime \prime}$ high $\times 81 / 8^{\prime \prime}$ wide $\times 8^{\prime \prime}$ deep.
Weight: 5 pounds.
AC Input: 11 T volts 60 cycles 30 watts.
Price: $\$ 99.50$ (Dealer's Net).

## OAK auxiliary speaker switch

## ESSENTIAL IN CARS or with REMOTE TV or JUKEBOX SPEAKERS

Does all that the old style 3 way rear seat speaker switch could do . . . Plus: the advantage of the best impedance match to the radio at any volume setting used . . . Plus: sound distribution as you want it.

Either speaker can be made the louder, by the flip of a switch, while both continue to play together.

- Front Speaker
- Rear Speaker
- Both Speakers in Parallel
- Both Speakers In Series

## Greater — Selectivity-Sensitivity Compact - Durable - Efficient

The Neatest little BIG VALUE package. TENNALOOP is a tiny antenna made possible in this size and form by the use of a ferrite-magnetic core. No longer is it necessary to use the oldfashioned 'loop' antenna.

| \$.95 LIST PRICE | "Tennaloop" is "all" directional |  |  |  |  | $3$ |  |  |

## ALLIANCE TV PRODUCTS <br> ALLIANCE TENNA-ROTORS • UHF CONVERTERS • BOOSTERS

## ALLIANCE TENNA-ROTOR

The Alliance Tenna-Rotor, available in three models illustrated below, is a TV or FM antenna rotator. Designed to rotate all conventional type antennas. It consists of a fully enclosed electrically driven rotor into which the antenna center-post is clamped. Four-conductor "zip" cable connects rotator with plastic control case placed near receiver, which plugs into any 60 cycle 110 -volt AC house circuit. A selector switch controls rotation clockwise or counter-clockwise to point antenna in any direction for optimum reception.
Alliance Tenna-Rotor reduces interference, improves quality of picture, eliminates ghosts, aids fringe reception. It is especially useful in multi-station areas and wherever there are signals from the more critical UHF stations. Will add distance to your reception.

Mosf Widely Advertised Rotator on the Market

## FULLY AUTOMATIC MODEL U-83

## "SET IT AND FORGET IT"

 This deluxe Model U-83 is the only fully automatic rotator on the market.
## BEAUTIFUL NEW STYLING

Simply set the pointer - antenna automatically turns by itself and stops at the direction shown on the indicator dial. New styling plus the exclusive automatic feature makes Model U-83 the ultimate in rotators!

## MODEL T-10

This finger-tip electrically controlled Alliance Tenna-Rotor is noted for extreme accuracy, compactness and smart styling. Pressing attractive tilt bar controls rotator and a pointer on the control case dial shows compass direction to which antenna is pointed.
Both new Model Alliance Tenna-Rotors, the U-83 automatic, and the T-10, have increased speed of rotation and incorporate features that make for faster installation, trouble-free operation and unsurpassed performance. The new rotator unit has doubleaction magnetic anti-drift brake plus smoother synchronization with control units. Alliance Tenna-Rotors are pre-sold through TV advertising!

## MODEL F-4

Model F-4 has a three-position selector switch to control the rotator. Throwing switch to right or left rotates rotor shaft clockwise or counter-clockwise through a complete 360 degree arc. Center OFF position enables operator to select exact position for "peak" reception! A screen illuminates to tell when limit of travel in either direction is reached.

More Than 2,000,000 Alliance Tenna-Rofors Are In Use!

Model BY-90

## ALLIANCE UHF CONVERTER

Alliance UHF Converter, a proved, dependable, quality Converter that's built to last!

Model BY-90, the Alliance UHF Converter, covers all channels - both UHF and VHF, when connected with any VHF receiver. Requires only a few minutes to install without the need for special tools or technical skill. A three-position "master-control" switch on panel assures UHF station tuning - normal operation of the VHF set - on-off switching of Converter and set. This Converter is noted for outstanding selectivity and gain to provide superior picture quality. An excellent performer in fringe areas or where a UHF signal strength is weak.

## ALLIANCE CASCAMATIC AUTOMATIC TV BOOSTER

Model BB-2 Alliance Cascamatic is a fully automatic television booster, is pre-tuned to all VHF channels and features the "California" circuit. The Cascamatic mounts out of sight on back of the set and requires no manual control because it furns on and off automatically, with the set. Equipped with three tubes. Affords excellent high gain reception - especially useful in fringe areas. Quickly installed.

## ALLIANCE TENNA-SCOPE TV BOOSTER

Model BB-I Alliance Tenna-Scope is a popular TV Booster for all VHF channels. Manually controlled, it permits critical tuning to each channel. Features an automatic "on-off" switch so that set may be used with or without the booster in the circuit, has unusual high channel reception characteristics - amplifies picture and sound uniformly - is an excellent performer in TV fringe and surburban areas.

## ALLIANCE THRUST BEARING BRACKET

The Alliance Thrust Bearing Bracket, accessary ta Alliance Tenna-Ratar, is made ta pravide added suppart for all heavier canventional type antennas. Used with Alliance Tenna-Rator, it makes an ideal installation. Especially suited for multibay and stacked array an-
tenno types. The Thrust Bearing takes the weight aff the ratar unit and transfers it ta the graund. It assures extro rigid support and maximum resistance to high winds.

C.R.T. EXTENSION

For use with all picture tubes: Model SE-3 - $36^{\prime \prime}$ long, 6 -wire Model SE-4 - $72^{\prime \prime}$ long, 6 -wire For use with magnetic focus tubes only:
Model SE-1 - 36" long, 5-wire
Model SE. 2 - $72^{\prime \prime}$ long, 5 -wire

## ANODE EXTENSION

 voits breakdown.

Model YE-1 - $36^{\prime \prime}$ long Model YE. 2 - $72^{\prime \prime}$ long
A handy extension for many late type TV recelvers.

HI-FI PUSH PULL SOUND AMPLIFIER

Flat within 1.5 db from $80-20,000$ cycles. Adds beautiful tone quality to most TV and radio receivers.

Output natched for most Hi-Fi speakers. Tubes: 1-6J5GT, 2-6K6GT.
Simple installation, remore output tube and insert plug.
Push-pull amplifier adds new, glorious tone to TV and radio sets utilizing one sound outpat tube.

Weather-proof ty leadin ENTRANCE DEVICES - LOW LOSS TV SOCKETS • SWITCHES • ETC.

## ROOF-THRU

Polystyrene bushing and copper flashing provides direct roof en trance of TV transmission line. Permits shorter lead-in, protects line from exposure to weather and eliminctes messy wires on side of house. Model 624 also accommodates rotator cable.

Cat. 624 ROOF-THRU for flat line. List Price $\$ 5.84$

Cat. 623 ROOF-THRU for tubular line. List Price $\$ 5.84$

## WALL-FEED

Installs under eve of house to bring leadin into attic. Completely weather-proof For any popular 300 ohm line. Also ideal for use in house trailer. Supplied with neoprene gasket and wood screws. Brown or ivory.

Cat. 626 WALL-FEED $\qquad$ ..List Price $\$ 1.26$ Cat. 626-PK WALL-FEED with Universal TV Socket and mating

## WALL-THRU

 Completely weather-proo polystyrene bushing for all popular types line. Outside plate provides anchor point for open-wire line. Rubber grommet supplied for tight weather seal. Universal TV Socket may be mounted on inside plate. In brown or ivory.
Cat. 625 WALL-THRU $\qquad$ List Price \$1.95 Cat. 625-PK W ALL-THRU with Universal TV Socket and mating Plugs List Price $\$ 3.00$

## 3-WAY TV ANTENNA SWITCH

Ideal UHF/VHF antenna selector switch. Low loss rotary type making silver-to-silver contacts. In ivory or brown polystyrene case. Solderless, easy to install. Extension knob supplied for easy access when mounted behind set.
Cat. F-20 3-WAY TV ANTENNA SWITCH $\qquad$ List Price $\$ 3.75$

## DUAL-MATCH 2-SET COUPLER

Efficient, compact bridging-pad coupler permits 2 -set operation from one TV antenna without interaction. May be installed outside in semi-protected area. Solderless connections to 300 ohm line. In sturdy polystyrene case.
Cat. 902 DUAL-MATCH 2-SET COUPLER $\qquad$ List Price $\$ 3.95$

## FLUSH TV SOCKETS

SINGLE LEAD-IN. For installations requiring single line and not utilizing rotator. Low loss, constant impedance socket with attractive ivory or brown wall plate. Solderless. Install with Cat. F-9, Mounting Brackets, Cat. F-8, Plaster Ring, or standard outlet box.

Cat. F-1 SINGLE FLUSH SOCKET $\qquad$ List Price $\$ 1.67$ Cat. F-1PK SINGLE FLUSH SOCKET with mating Plug and Mounting Brackets
$\qquad$ ...List Price S1.95 DUAL LEAD-IN SOCKET (Not illus.) Similar to F-1, above, but provides terminations for two separate lead-in lines.
Cat. F-11 DUAL FLUSH SOCKET $\qquad$ List Price $\$ 2.09$
Cat. F-11PK DUAL FLUSH SOCKET with mating Plug and Mounting Brackets

COMB. ROTATOR CABLE \& TV LEAD-IN FLUSH SOCKETS. Provides plug-in termination for one lead-in line plus polarized connection of rotator cable. Multiwire socket takes appropriate line plug, following page.

Cat. F-14 COMB. SOCKET for 4-WIRE CABLE..........List Price $\$ 2.09$ Cat. F-14PK Above, with necessary mating Plugs, mounting hardware

List Price $\$ 3.51$
Cat. F-155 COMB. SOCKET FOR 5-WIRE CABLE
List Price $\$ 2.09$
Cat. F-155PK Above, with necessary mating Plugs and mounting hardware ......................................................................... Price $\mathbf{S 3}^{2} .51$ Cat. F-18 COMB. SOCKET-SWITCH. Single lead-in sockel with 3 -way rotary antenna switch. Constant impedance, low loss. Brown or ivery.
Cat. F-10 SOCKET SWITCH
List Price $\$ 3.75$
Cat. F-10PK Above, with mating Plug and mounting hardware

List Price $\mathbf{\$ 4 . 4 0}$

## WALL PLATE SOCKET

No wall opening required to install this attractive TV lead-in socket. Mount on wall or baseboard with wood screws supplied. In brown or ivory polystyrene.
Cat. F-2 WALL PLATE SOCKET.....List Price $\$ 1.35$
Cat. F-2PK Above, with mating Plug,
List Price $\$ 1.65$

## UNIVERSAL TV SOCKETS

Compact molded polystyrene terminal socket or line tap for single TV lead-in. Mounts on wall, baseboard, metal chassis or direct on Wall-Thru. Constant impedance, low loss. In brown or ivory With wood screws.

Cat. 343 UNIVERSAL TV SOCKET $\qquad$ List Price \$ . 80
Cat. 343-PK Above, with mating Plug .................. List Price $\$ 1.05$
Cat. 344 Similar to No. 343, above, but with male pins.
List Price $\$ \mathbf{8 0}$
Cal. 344-PK Above, with mating Line Socket.........ist Price $\$ 1.05$

## LOW LOSS TRANSMISSION LINE CONNEGTORS • SPLICERS • MULTIWIRE CONNEGTORS • CRYSTAL HOLDER SOCKETS AND ADAPTERS

## UNIVERSAL TRANSMISSION LINE PLUG

Solderless constant impedance 300 ohm transmission line pluq. Mates with all MOSLEY Transmission Line Sockets. Precision molded polystyrene. Plated brass pins, set screws. Phosphor bronze contac: strips.

Cat. 301 TRANSMISSION LINE PLUG
List Price $\$ .30$

## TRANSMISSION LINE SOCKET

Constant impedance 300 ohm transmission line socket for use where mounted socket not feasible. Made of same low loss materials as Plug, above. Mates with Cat. 301 Plug, Cat. 304 Input Adapter, below, and with Cat. 344 TV Receptacle. Solderless.

Cat. 311 TRANSMISSION LINE SOCKET. List Price \$ . 30

## POLARIZED TRANSMISSION LINE CONNECTORS

Maintains impedance and polarity when used to connect 300 ohm transmission line. Made of low loss materials. Solderless. Use in pairs.

Cat. 321 POLARIZED TRANSMISSION LINE CONNECTORS
List Price, per pair $\$ .60$

## INPUT ADAPTER

Ideal plug-in connector for TV and FM sets, boosters, etc. Attaches to screws on antenna terminal strip of set. Mates with Cat. 311 Line Socke1. Solderless.
Cat. 304 INPUT ADAPTER.
List Price $\$ .30$

## TUBULAR TO FLAT TRANSMISSION LINE SPLICER

Solderless, constant impedance splicer for connecting round or oval 300 ohm line to standard flat line. Slot in splicer wall permits moisture to escape eliminating drip loop in tubular line. Molded polystyrene with non-ferrous set screws. Cat. 29-S TUBULAR TO FLAT LINE SPLICER.......... List Price $\$ .20$

## FLAT LINE SPLICER

Low loss, constant impedance splicer for joining sections of standard 300 ohm flat transmission line. Molded polystyrene with nonferrous set screws. Solderless.
Cat. 27-S FLAT LINE SPLICER $\qquad$ List Price S . 18

## ROTATOR CABLE CONNECTORS

## LINE PLUGS

Compact, polarized molded polystyrene plugs for many low voltage uses. Mate with appropriate Flush, Line or Base Socket. No individual set screws. Solderless. Plated brass pins. For flat or round cable. In brown or ivory.
Cat. 374 4-WIRE PLUG
List Price 5.75
Cat. 375 5-WIRE PLUG $\qquad$ List Price $\$$. 81
Cat. 378 8-WIRE PLUG List Price $\$ 1.00$

## LINE SOCKETS

Polarized line sockets to mate with above Plugs. Solderless. No indivdual set screws. Phosphor bronze contact strips. In brown or jvory.

Cat. 364 4-WIRE LINE SOCKET $\qquad$ ..List Price \$ . 96 Cat. 365 5-WIRE LINE SOCKET List Price $\$ 1.03$ Cat. 368 8-WIRE LINE SOCKET List Price $\$ 1.25$

## BASE SOCKETS

Compact, sturdy polarized sockets for mounting on wall, baseboard or metal chassis. Highest quality construction. Molded polystyrene with phosphor bronze contacts. In brown or ivory. Wood screws supplied.
Cat. 354 4-WIRE BASE SOCKET $\qquad$ List Price S1.37 Cat. 355 5-WIRE BASE SOCKET List Price $\$ 1.50$
Cat. 358 -WIRE BASE SOCKET $\qquad$ List Price $\mathbf{S 1 . 7 5}$

## CRYSTAL HOLDER SOCKETS and ADAPTERS

SINGLE CRYSTAL HOLDER SOCKET takes $.095^{\prime \prime}$ dia. pins spaced $1 / 2^{\prime \prime}$. Molded high temperature polystyrene with phosphor bronze one piece contacts and solder lugs. Mounts behind chassis or panel up to $1 / 8^{\prime \prime}$ thick. Punching template and mounting brass machine screw supplied.
Cat. 500 CRYSTAL HOLDER SOCKET $\qquad$ List Price S. 35
Cat. 53 3-GANG SOCKET for $1 / 2^{\prime \prime}$ spaced small pin crystal holders. Acrylic plastic $\qquad$ List Price $\$ 1.08$

Cat. 56 6-GANG SOCKET for $1 / 2^{\prime \prime}$ spaced small pin crystal holders. Acrytic plastic ................................................ Price $\$ 2.08$

Cat. 5-75 CRYSTAL HOLDER ADAPTER takes small pin $1 / 2^{\prime \prime}$ spaced holder and plugs into $3 / 4^{\prime \prime}$ spaced sockets or in any 5 or 6 prong List Price $\$ .58$ Cat. 75.5 CRYSTAL HOLDER ADAPTER receives pin spaced $3 / 4^{\prime \prime}$ and pluqs into standard $1 / 2^{\prime \prime}$ spaced sockets or octal sockets. List Price S .58

The MOSLEY Transmission Line Accessories listed on this, and preceding pages, are designed to fulfill the exacting requirements of present day television installations. Materials used include only those possessing low loss characteristics while careful engineering attention
assures that the line impedance be maintained wherever MOSLEY Accessories are used.

Convenience of facility and attractive appearance combine to make MOSLEY TV Accessories completely accept. able to all television set owners.

## Kit mesey OifIITIOA

## For Fast, Accurate Orientation of Any UHF/VHF Television Antenna

The Mosley "Orientor" is an isolation device that enables the installer on the roof to utilize the television transmission line to bring the video signal back up to him where it can be read in relative value by means of an ordinary volt-ohmeter. When using the Orientor, it is not necessary that an extra man be stationed at the TV set to relay infor-
 mation to the installer adjusting the antenna.

Other advantages include:

- Eliminates need of expensive instruments! - Use with any in expensive, portable VOM! - Requires no power! - Pocket size easy to carry - No special tools needed! - Sturdy-made for years of service!

Catalog 903 "Orientor" complete with set of leads, less meter. Dealer Net $\$ 7.50$

## SPECIAL TV WIRING ACCESSORIES FOR NEW CONSTRUCTION

Here are two new Mosley products designed especially to facil itate roughing-in television transmission line in new homes and other buildings. These products, for the first time, provide builders with components engineered for TV.

## MOSLEY TV CONDUIT

Special polyethylene Conduit for TV will not introduce signal lasses. $3 / 4^{\prime \prime}$ inside diameter. Flexible, easy to install. In 25', $50^{\circ}$ and $100^{\circ}$ coils.

Cat. 80-25 Cat. 80-50 Cat, 80-100
Dealer Net $\$ .15$ per foot

## MOSLEY PLASTER RING

Provides secure, rigid support for MOSLEY TV Outlet Sockets without signal loss. Use instead of electrical outlet box. For plaster thickness up to $11 / 2^{\prime \prime}$. Mounts easily and quickly to wood studding.

Cat. F-8 PLASTER RING
Dealer Net \$. 24 each

pIoNeER manufacturer and outstanding froducer of the finest tine of antenna mounting accessories in the television industry

## CHIMNEY UNI-MOUNT

Model UM-I ................... $\$ 6.80$
Constructed of embossed heavy-gauge steel, riveted for extra strength. Hotdip galvanized for lestiag weatherproof finish. Features snap-in mast holders with flared lips. $18^{\prime \prime}$ spacing between mast holders provides rigid support. Available with heavy-gauge, stainless-steel strap, Kwik-Klip Banding Closure and clever new Chimney Corner Guords.

Model EM-1 . $\$ 4.50$
Constructed of heavy gauge steel, embossed for extra strength and hot-dip galvanized for lasting, rust-proof finish. Unique bridge-type truss construction of lower-bracket provides extra strength and rigidity. 48" spread provides proper spacing between brackets insuring perfect mechanical support. Camplete with installation hardwase.

## MAST COUPLER

For connecting 2 masts. Heavygauge steel hot-dip galvanized, for $1 \frac{1}{4}$ " O.D. masts $\$ 1.00$

Accommodotes masts up to $11 / 2^{\prime \prime}$ O.D. Heavy single pin pivolal mast holder. Complete with 2 mast securing bolts and jam nuts. Heavily plated for rust resistance. Embossed for extra strength. Economy priced.

Also available for $\mathbf{2 "}^{\prime \prime}$ mast PFM-90LM
$\$ 2.65$

Constructed of heavy-gauge steel. Will accommodate masts up to $11 / 2^{\prime \prime}$ O.D.

Heavy-gauge steel, embossed at all critical points and heavily plated for rust resistance. Mast socket can be "walked up" to vertical position at which point it drops and locks se curely. Accommodates masts to $11 / 2^{\prime \prime}$ O.D. Assembled.

Model RM-20 for $2^{\prime \prime}$ masts........ $\$ 2.95$

## CHIMNEY UNI-MOUNT

Model UM-2ST
$\$ 7.60$
With 2 heavy-gauge, stainless steel straps, complete with all of the other feotures listed for UM-1. For extra heavy installations utilizing antenno rotator.

## EAVE MOUNT

Model EM-48—\$5.95
one piece construction of heavy. gauge steel, embossed, galvanized for lasting rust-proof finish. Unique construction of lower bracket provides extra strength and rigidity. Extended lip provides mast support during installation. Generous $48^{\prime \prime}$ spread bracket provides proper spacing between brackets, insuring perfect mechanical support. 3" embossed steel upper bracket features U bolt and clamp for Spintite fastening. Complete with installation hardware. Also available with $60^{\prime \prime}$ spread. EM-60. . $\$ 7.25$

DUO-PIPE MOUNT
Model P-1.. $\$ 2.50$
of extruded alumi. num; fits all size masts up to $11 / 2^{\prime \prime}$ O.D. Positive adjustment for all size pipes up to $6^{\prime \prime}$ in diameter. Complete with installation hardware.
Also available with stainless steel straps. P.1ST $\qquad$ $\$ 2.95$

## South River Metal Products Co., Inc.

pIoneer manuiactijer and outstanding productr of the finest line of antenna mounting accessoriss in the television industry

## ULTRA-HIGH FREQUENCY ANTENNA MOUNTING ADAPTERS

Model UHM-I
$\$ 3.00$

Mounts UHF antenna without disturb. ing present Installation. Fastens quickly to present mast with 2 sets of clamps provided. Of magnesium; ex. fends 5' ABOVE present antenna.

## GUY RING

Model GR-5 $17 c$

Heavy-gauge steet stamping, em. bossed. Accommo. dates either $\$ 3$ or 4 guy wires on even spacings. Fits $11 / \mathbf{4}^{\prime \prime}$ O.D. mast. Heavily plated for rust protection.

Standard Package: 25
Also available GR. 6 for $1 \frac{1}{\prime^{\prime \prime}}$ masts $25 c$ GR-7 for $11 / 2^{\prime \prime}$ masts......................... 256

GUY RING SUPPORT

MODEL RS-5 30c

Mast clamp for supporting floating Guy Ring Model GR-5. Fits $11 / 4^{\prime \prime}$ mast. Standard Carton: 25

CORNER GUARD
Box of six
49c

An exclusive South River device for protecting, strengthening, and safeguarding chimney and strapping. Prevents chipping of chimney. Permits uniform tightening of banding. Safeguards mounting equipment. Guards snap in behind banding.

chimney mount replacement BANDING KITS

Universal - may be used with any chimney antenna mount.
KIT A 12' galvanized.................. 51.70
KIT C 12 stajnless. $\qquad$ .$\$ 3.25$
Hardware identical to XL Kits
For Extra Large Chimneys
KIT XL•"G" i $8^{\prime}$ galvanized steel
$\$ 2.30$
KIT XL-"§r"' $18^{\prime}$ stainless steel.. $\$ 4.40$
Kits consist of:
2-18 $8^{\prime}$ 3/4" STRAPS with eyebolts atfached
2-Eyebolts Unatfached
4-Nuis to Fit Eyebolts
2—KWIK KLIP Strapping Fastemers.

ULTRA-HIGH FREQUENCY ANTENNA MOUNTING ADAPTERS

## Model UHM-2 <br> $\$ 3.00$

Permits mounting of UHF antenna BELOW present antenna instaltation, $30^{\prime \prime}$ from mast. Fastens quickly to present mast with 2 sets of clamps provided. Of magnesium.

MASTS STEEL TUBING Hot-Dip Galvanized Inside and Outside!

Another FIRST in the industry . . . 20, 18 and 16 gauge steel tubing, hotdip galvanized INSIDE AND OUTSIDE - overall protection affords long life, increases resistance of steel to the extremes of salt air and industrial atmospheris corrosions. Hot-dip galvanizing is the only experience. proven rust resistant finish known. Available in swedged $5^{\prime}$ and $10^{\circ}$ lengths, 10 to a bundle, in $11 / 4^{\prime \prime}$ and $11 / 2^{\prime \prime}$ dia.
Also available: Aluminum tubing, 635.76, special tough structural alloy, .054 wall by $11 / 4^{\prime \prime}$ dia., $5^{\prime}$ and $10^{\prime}$ lengths. Plain or swedged end.

Stronger,
Tighter-Twist GUY WIRE

Does the best installation job South River's new hot-dip galvanized guy wire is carefully drawn with a strong, tight twist for extra durability under stress - provides tensile strength up to $70,000 \mathrm{lbs}$. per square inch. 18 gauge or GENUINE 20 gauge, both available in elther 4 or 6 strands. $1,000^{\prime}$ metal spool, or continuous loops of $50^{\prime}$ and $100^{\prime}$.

TS-551 HILOSWITCH 2-position Antenna Switch for asarily and correctiy swirching any 2. antennas in any sombination of Efficient also for switching ans: 2 recelvers to 1 antenna. Easy to iestall - cuts instailation tiroe no soldering * posisive contset.: minimum leaksge. Individually bazed. 12 to master certon. Shipding Woight 3 Li/ust for

TS. 587 HILOSWITCH
3-position Antenms switch for easily and correctily switching any 2 or 3 antennas in ary combination Fificient also for switcolng any 3 receivera to 1 anteans. Easy to install - cuts instamation timeno soldering - posilive contacts. minimum leakage. Individually boxed. 12 wo master curton. Shipping Weight 4 Libs.

TC-313 TWINTENA
2-Set Coupler designed to permit simultaneous operation, under suit able conditions, of 2 TV recelvers matce common antenna. Unily matched resistance elements only
therefore does not affect impedance haracteristics of afrect impedance characteristica of transmission line, remains essentially uniform. Me. duces oscillator radiation. Basy to Install - no soldering - positive contacts - minimum leakage. IndiFidually bored. 12 to master carton.

TC. 374 TWINTENA
DeLuxe 2-Set Coupler dosigned to permit simultaneous operation under suitable conditions, of 2 TV receivers from a common antenna. Utilizes matched coils only; therefore cannot affect impedance characteristics of transmission. Result: bandpass response of line remains essentially uniform. Reduces oscillator radiation. Easy to install - no soldering . positive contacts - minimum leakage. Individually boxed. 12 to master carton. Ship. Wt. 3 1/2 lbs. List Price $\$ 4.95$ ea.

"PENNYUE" MODEL WT-39 An FM-TV Interfer ence Eliminator for FM band interterence Adjusts to give clear vision, uncluttered sound. Easily in. stalled. Packer 12 on display card. 1 card to carton. Shipping Weight 3 lbs. List. Price \$I.98 ea.

No. 612 ATTENUATOR
3-position Atmenuator. Quickly evaluates snd corrects signai wperload problems. Can be used as: Trouble shooting tool and permanent home installation, Trauble Shooting Tool: Serviceman uses it to qulckly check which channelg are operating at too high a level. Permanent Home nel. Operation simple - reaults amazing. Individually bozed. 12 to master carton. Shipping Welght 4 lbs. List Price $\$ 4.95$

No. 77 E 2-SET COUPLER Economy 2 -set Coupler designed to permit simultaneous operation, under suitable conditions, of 2 TV receivers from common antenna. Individually boxed. 12 to master carton. Shipping Weight 3 lbs.
ist Price $\$ 1.75$

TS. 127 JR. HILOSWITCH Economy 2-position switch for easily and correctly switching any 2 antennas in any combination of UHF, VHF, FM, to a receiver. Easy to install, no soldering, positive contacts. Individually boxed. 24 to master carton. Ship. Wt. 4 lbs. List Price $\$ 1.95$

1. Take preassembled unit from carton.

2. Snap open Anfenna.

3. Tighten Three u-bolts to permanently secure Antenno to mast.

4. Simply attach lead-in line to terminals of driven element.

CR-88

An improved corner reflector designed to cut installatian time in half and to end $99 \%$ of future maintenance problems.

Better than three extra hands when mak. ing installations on windy rooftops . . . Just zip out the sturdy, light.weight preassembled unit from carton . . . snap open reflector . . . tighten three U bolts on mast . . . attach feed line . . . and there you have if!

Imagine freedom of both hands without the acrobatics generally needed in the installation of other antennas. PENN TELEVISION PRODUCTS' CORNER RE. FLECTOR is balanced so perfectly that the weight of ice loads will always be evenly distributed. There are absolutely NO loosely packed parts to lose since everything is COMPLETE on the one unit.

These superior features have made PENN TELEVISION PRODUCTS COMPANY justly proud of their newest and finest achievement in the U.H.F. field.

## NEW BUD FILTERS TO REDUCE OR ELIMINATE TELEVISION INTERFERENCE

The sources of television interference are most often short wave
broadcasting stations, amateur radio transmitting stations, diathermy equipment, X-ray equipment, automotive ignition noises
or similar sources. The basic problem of eliminating this interference is that of rejection of the signals received from these sources.

## LF-601 LOW PASS FILTER

Interference to television recelver reception caused by transmissions from an amateur station can be caused by harmonics or by shock from the transmitter. The shock from the transmitter fundanental can be cured at the television receiver with a Bud HF-600 high pass nlter Harmonics can be greatly reduced or eliminated at the transmitter by use of a Bud LF-601 low pass flter.

The LF-601 high attenuation low pass flter has the following characteristics:

1. Minimum attenuation of 85 decibels on all frequencies above 54 megacycles and a minimum of 93 decibels above 70 megacycles.
2. Maximum rejection is adjustable from 55 to 90 megacycles. This tunable feature provides two slots at least 100 decibels down.
3. The cut-off frequency is 42 megacycles.
4. The unlt will easily handle a full kilowatt modulated on a. reasonably flat line.
5. The insertion loss is less than one DB.
6. Since the design of this flter provides an adjustable feature, the unit can be used with either 52 ohm or 72 ohm conx.
7. Each inductance is in an Individually shielded compartment.
8. All capacitors used are variable.

LF-601
Dealer Cost $\$ 13.50$

## WIRELESS PHONO OSCILLATOR WO-6A

This compact unit is designed to enable any standard record player to be easily converted to wireless operation. Record reproduction is then possible through a regular radio receiver without the necessity of cumbersome inter-connecting wires. Installation is simple according to the complete instructions furnished with each unit.
The circuit incorporated in the Wireless Oscillator is of such design that faithful reproduction is assured. The unit comes completely wired and tested including tubes and is finished in black enamel. Operates from 115 volts AC or DC. Frequency range is approximately 1100-2150 K.C. Actual weight 1 lb .
WO-6A
Dealer Cost $\$ 9.00$

## COMBINATION ANTENNA MOUNT

This new Combination Mount is the latest addition to Bud's complete line of television antenna mounts for every location . . . to meet any condition.

Made of two sheets of extra heavy gauge, tough steel, the upright portion is welded together for a perma. fient bond. Spread portion is accurately formed for peak or wall installation.
Sturdy construction guarantees permanent, trouble-free mast installation.
The Combination Mount has a baked, black enamel finish to prevent rust. Furnished complete with plated mounting hardware. Will accommodate up to $11 / 4^{\prime \prime}$ mast.
AM-83

GUYING CLAMPS and MAST COUPLERS

GT-68 Guytie-A vise grip clamp to hold guy wire at any polnt.
AM-66 Mast Coupling - Used to extend antenna height.
GT-68
.Dealer Cost $\$ .33$
AM-66
Dealer Cost $\$ .60$

## HF-600 HIGH PASS FILTER

The HF 600 high pass filter is designed to have a cut off frequency at 42 megacycles, thus this filter rejects signals from 0 to 42 megacycles. It is within this range that the majority of signals causing interference would be received. Since there is no attenuation above 42 megacycles, picture strength or quality is not affected.
This unit is easily installed and complete installation instructions are included. The filter is housed in an attractive aluminum case $31 / 4^{\prime \prime}$ is housed in an

## ADJUSTABLE CHIMNEY MOUNTS

Very easy to install on any size chimney Without use of special tools. The NEW BUD STRAP CLAMP simplifes and speeds up installation. A rugged antenna Installation is assured.
The Twin Mounts deslgn allows unlimited spacing between the brackets, thus providing maximum strength. AM-86-Heavy Duty Chimney Mounts - Made from $1 / 8^{\prime \prime}$ steel - $21 / 2 "$ wide enabling the overlapping of more than one brick and can be used to support any size antenna mast from $1 / s^{\prime \prime}$ to
$11 / 2^{\prime \prime}$ diameter.
AM-88 - Economy Model Chimney Mount - Construction and design same as AM-86 except for the width of the bracket
which is $11 / \%$. Also made from 1 p steel and wlll gupport Which is $1 / 4$. Also made from $1 / y^{\prime \prime}$ steel and wlll support mast up to $1-5 / 16^{\prime \prime}$ in diameter. These chimney mounts are sury hardware. The brackets are finished by painting with black rust-resisting paint and all hardware is plated, assuring black rust-resisting paint an
a long lasting installation.
AM-86 . . . . . . Dealer Cost $\$ 2.10$
AM-88..... Dealer Cost $\$ 1.60$

## HEAVY DUTY WALL MOUNTING BRACKET

For an Installation requiring maximum strength and weather resistance. The 16/ spacing on the wall allows lag bolts to enter $2 \times 4$ joists under the wall siding, making a solid support for the antenna. Made of $1 / 8^{\prime \prime}$ steel $2^{\prime \prime}$ wide. Painted with a black rust-resisting paint. A steel brace is furnished for use as a brace on the upper bracket and permits the supporting of heavy television antenna. Brackets are ad. justable to accommodate masts $11 / 2 "$ in diameter. The AM-60 will allow a $12^{\prime \prime}$ space between the mast and the wall. The AM-89 will separate the mast from the wall by a space of $16^{\prime \prime}$. Supplied complete with lag screws and all other hardware.
AM-60 ....Dealer Cost \$3.00 AM-89 ....Dealer Cost \$3.60

## R. L. Drake Company

## Television Interference Filters

## 300 ohms optimum impedance

LIST

IV-300-HP For very high attenuation at all I.F. Bands below
50 Mc. Very low insertion loss at both UHF and VHF TV
channels

$\$ 5.95$

TV-72-HP Same as above for 72 ohm input.......... . . . 5.95
TV-300-50HP For use on sets with 20 Mc I.F.'s . . . . . . 4.95
UHF-300-HP For use at UHF Input Only. Very high attenu-
ation at all Intermediate Frequencies below 350 Mc. Low
insertion loss at UHF .............................. . . 3.25

## 300 ohms optimum impedance

TV-300-45T Peak attenuation adjustable 40 to 46 MC. Low insertion loss at adjacent TV channels 3.25
TV-300-FMT Same as above-adjustable 88 to 108 Mc ..... 3.25
1 Kw, rating

TV-52-20LP 52 ohms impedance, attenuates all frequencies above 20 Mc . 12.95*
TV-52-40LP 52 ohms impedance, attenuates all frequencies above 44.5 Mc . ..... 12.95*
TV-300-LP Same as TV-52-40LP except 300 ohms ..... 12.95*
-amateur net
300 ohms, 1 Kw . rating
TV.300-10HW For 10 and 11 Meter Band use ..... 10.95*
TV-300-20HW For 20 Meter Band use ..... 10.95*

The above Half Wave Filters will attenuate all harmonics from the band for which it is designed.
-amateur net

## "Tenna-Mix"

Crossover Network
"TENNA-MIX" Lumped constants filter type for combining UHF and VHF TV inputs or antennas. Low loss

Available Soon

LN-5 500 Watt rating AC-DC, dielectric loss type constant 'K' Filter. Attenuation increases as frequency increases. Very good filter action at UHF and VHF frequencies. For use on either the receiver or the interference source . .

## OVENS FOR TEMPERATURE CONTROLLED CRYSTAL UNITS

MONITOR manufactures a wide variety of ovens for temperature-controlled crystal units. Two typical examples are illustrated above. Units are available which will accommodate one or more of a large number of holder types. Heaters are normally furnished for either 6, 12 or 24 volt operation, but special values can be furnished.

MONITOR ovens feature an hermetically-sealed thermostat and will maintain very close remperature control over a wide range of ambient temperatures.

Write or call for specific data.

## Monitor Products Company

## 815 FREMONT AVENUE

# JAMES KNIGHTS <br> COMPANY, Sandwich, III. 

## JK STABILIZED H.7

Frequency Range 3 to 16 mc Holder material black phenolic
Pressure mounting, stainless steel elec. trodes
Water and Dust Proof
Military type FT243 holder,
CAATC No. 3R1-1

## JK STABILIZED G-12

Frequency range 99 to 180 kc with high stability GT cut for frequency standard use.
Also 550 to 1500 kc for high stability. F.C.C. Approved for broadcast transmittar use without temperature control. Write for specifications $\mathrm{H}-300-097 \mathrm{~B}$ and engineering bulletin No. 13.

JK STABILIZED H-4
Frequency Range 1800 kc to 16 mc Holder Moterial Black Phenolic
Pressure Mounting, Stainless Steel Electrodes
Woter and Dust Proof
Militory Type HC1/U Holder
Write for engineering bulletins Nos. 2 and 8.

JK STABILIZED HEAT JKO-9
Holds two type H17 units (Military HC6/U)
Normal temperature $75^{\circ} \pm 5^{\circ} \mathrm{C}$.
Ambient ronge - 55 to $70^{\circ} \mathrm{C}$.
Heater 6.3 volts, under 1 omp .
Stondard octal base

## JK STABILIZED BROADCAST UNIT

 JKS7M \& JK87MFrequency ronge 400 kc to 1750 kc adjustable $\pm .01 \%$
Normal temperature $60^{\circ} \mathrm{C} \pm 2{ }^{\circ} \mathrm{C}$ (adjustable $\pm 10^{\circ} \mathrm{C}$ )
Ambient range for $60^{\circ} \mathrm{C}$ operation, -20 to $+58^{\circ} \mathrm{C}$
Heater 6.3 volts af $11 / 2 \mathrm{amp}$
JK57M has standard 5 pin base, JK87M has octal base
Low temperature coefficient plate will stay within FCC tolerance during stay within FCC tolerance during warm
F.C.C. approved for broadeast use

JK57MT \& JKB7MT have thermometer
JK STABILIZED H-18
Frequency range BO kc to 2 mc Hermetically sealed metal holder Wire mounted, plated crystals
H18 has octal base, H18-L has 2 pins $1 / 8^{\prime \prime}$ dia. on $3 / 4^{\prime \prime}$ centers, M.18-5 has standord 5 pin fube base.

JK STABILIZED G-9, G-9J
Frequency range 1 KC to 300 KC and 1.2 to 30 MC

Hermetically sealed glass holder Wire mounted, gold or silver plated crystals
6V6GT envelope, octal base
MIL HC-15/U
Write for engineering bulletins Nos. 9 and 14 and H-300-20JA Spec.

## JK STABILIZED H-9

Frequency Range 85 to 300 KC Holder base slack Phenolic
Holder can Anodized aluminum
Wire mounted plated erystal
Water and Dust proof
Especiolly light and compact.

H-17

## JK STABILIZED HEAT JK07, JK07E

Will hold any JK type crystal except H-6, H-18T and H-19
Normal operating temperature $50^{\circ} \mathrm{C} \pm$ $2^{2^{\circ}} \mathrm{C}$
Will hold temperature as much as $75^{\circ} \mathrm{C}$ above the ambient.
Supplied complete with Johnson No. 237 socket.
JKO-7E has sealed-in-glass thermostat for greater precision and longer life. Available as JKO 7 or JKO7E with 6.3 volt 10 watt heater or 115 volt 12 watt heater on either model Ideal for frequency skandards and broadcast (FM \& TV) FCC approved.

TYPE VD5
Frequency range 1,000 to $6,000 \mathrm{Kc}$. Single or dual crystals. Mounts in special 3-prong socket, pin diameter $.562^{\prime \prime}$, spaced $.500^{\prime \prime} \times .8125^{\prime \prime}$

TYPE XLIT00
Exact 100 Kc ., used extensively in frequency standards. Mounts in $3 / 4^{\prime \prime}$ crystal socket or standard 5 -prong socket.

Frequency range 1,500 to $30,000 \mathrm{Kc}$. Fixed air gap, standard $.486^{\prime \prime} \times .093^{\prime \prime}$ or standard octal socket.
 metal case, 1500 Kc to 75.0 Mc frequency range. (Jan type $\mathrm{HC}-6 / \mathrm{u}$ ) Pin is $.050^{\prime \prime}$ diameter, spaced $.486^{\prime \prime}$.

## TYPE GM1

Fixed air gap, 850 to $20,000 \mathrm{Kc}$ frequency range. Available in standard $3 / 4^{\prime \prime}$ and G.R. $3 / 4^{\prime \prime}$, 5/8" $7 / 8^{\prime \prime}$ or $.850^{\prime \prime}$ spaced pins.

## TYPE CBCD

Frequency range 60 to $10,000 \mathrm{Kc}$. Available with 6,8 , or 10 volts, $\pm 1 / 2$ degree C. temperature stability. Standard 5 -prong socket.

## TYPE DFS

Features separate 100 and $1,000 \mathrm{Kc}$. crystals in one mounting, with accuracy $\pm .005 \%$ over range of $-10^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}$ when used
 in recommended circuits.

## TYPE VDO

Frequency range 1,000 to $10,000 \mathrm{Kc}$. Single or dual crystals with 6 volt oven $\pm 1 / 2$ degree temperature stability. Mounts in standard 5-prong socket.

CRAFTSMANSHIP IN CRYSTALS SINCE 1931
HOLLISTON, MASS

# American Beauty <br> ELECTRIC SOLDERING IRONS 

Embodied in these Electric Soldering Irons are features of construction and design that specialized experience - since 1894 - has demonstrated to be desirable for efficient and lasting service. Hundreds of thousands are in use throughout the world in a wide variety of manufacturing plants; in service, maintenance and repair shops; Army and Navy Services; in telephone, telegraph, radio and TV stations. Because of their proven efficiency and durability, they are preferred by those who measure
No. 3138 Designed primarily for production and maintenance in radio, telephone. telegraph, ignition, switchboard and telephone installation work and similar industrial applications.
No. 3158 For the same purpose as the No. 3138 but for work requiring an iron of greater capacity.
No. 3178 For use on still heavier work; for light commutators, service and production work. A very useful iron for general purposes.
No. 3198 For heavy work of all kinds. Supplies a large volume of heat at high temperature. Used by manufacturers in many different lines; for shop, service, production work, etc.

No. 3128A A companion iron to No. 3128 -the angle shape permits easy applica. tion to soldering operations difficult to accomplish with the conventional straight No. 3128.

No. 3128 For servicing TV, electronic and radio equipment and similar light work.

## SPECIFICATIONS

Available in standard voltages and for 32 volts. No. 3138 also made for $6,12,24$ and 64 volts All irons can be equipped with three-conductor cord, one wire grounded, at slight additional charge Separate heat-insulating stand supplied with each iron.

## American Beauty copper tips

American Beauty Copper Tips are made from commercially pure, drawn bar copper rod and are heavily nickeled to resist corrosion and oxidation. Tips are available from虎" to $11 / /^{\prime \prime}$ in diameter. Standard shaped tips with which various models are equipped supplied when so semi-chisel shaped tip (No. 3738-S) can be supplied for No. 3138 a special long, vision and radio work. All tips eternalloy-plated - for extra lps shown at right can be supplied either iron-plated or "IP" to cataog numbers indicated or "EP" for eternal. For iron-plate add the suffix - to cataog numbers indicated or "EP" for eternalloy-plate.

INSTRUMENT SOLDERING IRONS
FOR FAST SOLDERING OF SMALL CONNECTIONS EFFORTLESS TO USE - OUTPERFORM LARGER IRONS Three distinct styles to choose from—SUPER-PENCIL. BANTAMWEIGHT and capacity and differ only in method of holding same soldering efticienoy and capacity and differ only in method of holding.
More powerful than wattage rating indicates. Tiny tips outperform frons With latger tips and higher wattage. Light weight reduces operator fatigue Nickel-chromlum mica-wound olements. Element. tip and housing all made No special alloys to increase efficiency. Engineered for maximum performance. For constant duty preciston solderina of inatruments electronic devices. jewelry and all light or intricate sub-assemblies, small

## SUPER-PENCIL IRONS

hot tip - COOL handle

All the adrantages of a soldering pencil but a full-fledged industrial soldering iron with tip and element as separate parts and both individually replace and higher watteges whang on on tips outperform 1 runs with larger tip

## BANTAMWEIGHT HATCHET IRONS

PERFECT BALANCE-LESS FATIGUE-BETTER SOLDERED
JOINTS FOR INACCESSIBLE PLACES

"Can also be furnished in higher rattages.
The same tron as super-Pencil except in hatchet type--he same tiny tips tips and irons with higher wattages. Weighs only 3 oz See Bulletin 25 H for Further Details

## PIN-POINT SOLDERING IRONS

FOR PIN-POINT ACCURACY ON PRECISION SOLDERING
(These two fitems also listed on page 2)
Ship Wt., 1/2 $\mathbf{~ b b .}$
Length $8^{\prime \prime}$

Ship Wt., $1 / 2 \mathrm{lb}$
Length $8^{\prime \prime}$
No. P-26
30*Watts
3/16" Tip
Price $\$ 5.00$
*Can also be furnished in higher wattuzes.
The same iron as Super-Pencil except with conventional handie and longer case for soldering in tight places. The same tiny tips out-perform Irons with arger tips and hicher wattages weighs only 3 Oz

See Bulletin P-25 for Further Details

## FEATHERWEIGHT HATCHET IRON

So light its welght is hardly noticeable ( $51 / 2$ ozs. less cord), but more power ful than the wattage rating indicates. Hatchet deaign makes Iron offortleas to use. No transformer or other cumbersome and expensive equipment required. At 60 Watts has successfully replaced irons up to 100 Watts in many instances.

See Bulletin No. 30H for Further Dotails

# SOLDERMASTER Royal Blue Line ELECTRIC SOLDERING IRONS 

GENERAL INFORMATION-Replaceable elements. Best grade of Madagascar mica for insulation. No. 56 B has brass-sheathed cart ridge element. Best grade nickel-chrome resistance wire. Replaceable hard drawn copper tips. All one piece swaged cases
gun metal finish. Equipped with 6 ft . Underwriters' Approved heater cord, rubber plug. Continental or English type plug 25 c extra list. Stand for resting iron furnished.

VOLTAGES 110/120 220/250 A.C. or D.C., ANY CYCLE SPECIFY VOLTAGE WHEN ORDERING

## FOR FASTER SOLDERING ... LONGER IRON LIFE

MAINTAINS DESIRED IRON TEMPERATURE BETWEEN JOBS - PREVENTS OVERHEATING SAVES ELECTRIC CURRENT - ADJUSTABLE TO ANY SIZE IRON SAVES tIME - NO LONG WARM-UP PERIOD

A practical, time and money saving device which accurately regulates and maintains soldering iron temperature between jobs. Lengthens iron life by reducing tip oxidation and amalgamation of tip with solder which increases with over-heating.
When placed on stand, iron rests in a copper cradle which conducts heat of iron and actuates a bimetal to open or close a switch. Temperature is easily regulated by an adjusting slide at bottom of stand. As iron is removed from stand, full current is instantly supplied. Stem rest adjustable to accommodate various lengths of irons. Stand is a heavy gray iron casting-stays firmly fixed without being fastened.

## - SOLDERING POTS

Ruggedly constructed, cast iron pots for production work. Elements are easily replaced even while pots are hot.

Net Price Cat. No. $12-1 \frac{1}{2} 2^{\prime \prime}$ dia. Cap.
3/4 lbs. .............................. $\$ 4.95$
Cat. No. 36-21/2" dia. Cap.
2 $1 / 4$ lbs. .-......................... 6.05
Cat. No. $60-31 / 2 \prime$ " dia. Cap. $33 / 4 \mathrm{lbs}$.

## - SPOT SOLDERING MACHINE

Model " $F$ " is a treadle operated machine which feeds solder forward as the iron moves away from the work. Suitable for spot soldering where a mechanical connection has first been made. Net price ....................................................................... $\$ 16.50$
Model " $N$ " is a treadle operated machine for the advancement of the iron, but without a solder feed attachment. Net price................................ $\$ 8.25$

## - GLUE POTS

The catalogue No. 700 Glue Pot is of two quart capacity. It is the water jacket type and has a gasket sealed element and thermostat completely protected from moisture. Thermostat is normally set at 150 degrees for use with glue, but can be set at various temperatures for use with wax, etc. Net price ...................... $\$ 20.35$

# SOLDERING IRONS 

## Equipped with Long-life Calrod* Heaters FOR MANUFACTURING AND SERVICE OF RADIO AND ELECTRONIC EQUIPMENT

* Kegistered trade-mark of General Electric Co. ASK YOUR G-E DISTRIBUTOR FOR A COPY OF BULLETIN GEA-4519.

HIGH-SPEED SOLDERING. You can solder as fast and continuously as the nature of the work will allow. - UNIFORM PERFORMANCE. Operating charac teristics remain constant day after day. No appreciable decrease in efficiency even after months of service.

- EASY, LOW-COST REPAIR. Assembling and disassembling are easy.
- LONG LIFE AND LOW MAINTENANCE. Life is lengthened, and over-all costs are kept low because sturdy construction obviates need of frequent repairs.
- THEY NEED NOT BE RETURNEDTOTHE FAC. TORY FOR REPAIR. Irons can be repaired on the job without special tools or skill.

## LIGHTWEIGHT INDUSTRIAL IRONS

(Approved by Underwriters' Laboratories)

+Tips must be brazed on. Se enstructions included with irons.
\$ Migr's suggested retail in, e.

## INDUSTRIAL SOLDERING IRONS

For light, high-speed soldering, such as assembly of radios, telephones, switchboards, appliances, meters, and instruments, and installation and repair of wiring and wiring devices and ignition. Also, for medium, intermittent soldering on tinware, wiring, plumbing, and Einsmithing. Excellent general-purpose iron for service and repairmen, for thop and farm.

## MIDGET SOLDERING IRONS

## APPLICATION

This 8 -inch, $13 / 4$-ounce featherweight ilon for close-quarter soldering with pin-point precision is used where conventional irons might cause damage . . . be clumsy to handle . . . be more expensive to operate. The Midget literally goes places with greater efficiency and less power with no sacrifice in heat or speed. With its fingertip operation, this iron will help make an expert out of any solderer in a short time.

The Midget has lronclad copper tips either $1 / 4-$, $i_{6}^{3}$ or $1 / 8$-inch diameter, as desired.

THIS MIDGET DOES A BIG JOB IN

- Boosting Production Rates
- Increasing Operator Efficiency
- Cutting Down Employee Fatigue
- Saving on Repair and Maintenance
- Reducing Rejects
- Manufacturing and Repairing:

Radios and other electronic equipment
Meters
Instruments
Jewelry
Appliances
. . . and many other products
requiring precision soldering
RATING: 6 VOLTS, 25 WATTS

Net weight iron including cord $\overline{\mathrm{B}} \mathrm{oz}$.
Shipping weight complete iron 8 oz.
Standard package consists of 6 irons of one tip size. Tip and heater assemblies can be purchased in any quantities.

1/4-in. dia tip, Cat. No. 6A210

## SPECIAL TRANSFORMERS (OPTIONAL) FOR G-E MIDGET SOLDERING IRONS

Single-tap, Cat. No. 6A362

Four-tap, Cat. No. 6A364

Specially designed 115-volt transformers are available as optional equipment in two types:

1. Single-tap $115 / 6$ volts-for use where only one soldering heat is required
2. Four-tap $115 / 6.3 / 6 / 5.7 / 5.4$ volts - gives wide range of heats (flom 25 to 35 watts) for close temperature control of tips
Transformers are small, lightweight, but sturdy. Their 6 -foot extension cords can be plugged in any 115 -volt a-c circuit.

| Description | Cat. No. | Pricet |
| :---: | :---: | :---: |
| Single tap | 6 A362 | \$5.70 |
| Four-tap | 6A364 | 7.60 |

GEA-4519

## THE MIDGET OFFERS MAJOR ADVANTAGES

Low-cost soldering-Solders more efficiently, using only approximately one-fourth wattage normally used.

Fingertip operation-Only $\&$ inches long, weighis but $13 / 4$ ounces. Styled for fingertip grip.

Quick, continuous heat-Famous G-E Calrod heater built into Ironclad copper tip for rapid heat transfer.

Easy renewal-ronclad tip and heater assembly can be replaced as a unit merely by unscrewing from handle.

Long life. low maintenance-Low voltage permits use of heary. long-lasting nickei-chromium resistance wire. Less maintenance is required with long-lasting hronclad copper tip.

+ Manufacturers' suggested retail price.

## KWIKHEAT THERMOSTATIC SOLDERING IRONS

## Built-in Vanatta Automatic Thermostat

## KWIKHEAT TYPE NO. 200 HOT IN 80 SECONDS 150 Watts - 115 Volts AC Only

Weight of Iron with Tip............... $.7_{1 / 2} \mathrm{oz}$. Shipping Weight per Iron with $38^{\prime \prime} \times 1 / 4^{\prime \prime}$ Dia. Tip and
 Length of Iron with $3 / 8^{\prime \prime} \times 1 / 4^{\prime \prime}$ Dia. Tip...........123/4" Length of Heater Cord

## HOT IN 80 SECONDS List Price

Iron complete with tip........ $\$ 7.75$
Replacement Elements ...... 3.15
Tip $3 / 8^{\prime \prime} \times 1 / 4^{\prime \prime}$ Dia. Pyramid Point55

## CHECK THESE

ADVANTAGES
KWIKHEAT JR. has been designed to meet the demand by the electronics industry for a lighter and smaller PRODUCTION tool. The element is readily replaced in the field by use of screwdriver, pliers, and small punch or nail.

## CORROSION RESISTANT

Core assembly and outer shell are made of STAINLESS STEEL.

## HOT IN 80 SECONDS

The watt density of the heating element is very high and completely controlled by the thermostat.

## TEMPERATURE

While the thermostat is preset at the factory, two standard temperatures are available-Standby Irons, used for intermittent bench work, servicing, and engineering, set at $700^{\circ} \mathrm{F}$; PRODUCTION Irons, used for constant high speed soldering, set at $800^{\circ} \mathrm{F}$.

## TIPS

Tips, plunger type $3 / 8^{\prime \prime} \times 1 / 4^{\prime \prime}$ diameter x $4^{\prime \prime}$ long, plated to reduce corrosion. It is advisable to keep tips inserted completely in the cavity of the element for complete temperature control.

KWIKHEAT TYPE NO. 300
HOT IN 90 SECONDS
225 Watts - 115 or 230 Volts AC Only
Weight of Iron with Standard No. 1 Tip ........ 14 oz. Shipping Weight per Iron with No. 1 Tip and resting stand ......15/2 lb.

Length of Heater Cord $\qquad$
HOT IN 90 SECONDS

## List Price

Iron complete with tip ..... $\$ 12.25$ Available in other AC Voltages
Available with 3 Conductor Cord add 2.50
Replacement Elements ..... 8.60
Tips, any style
TEMPERATURE
The Kwikheat Element can be set at the factory to any desired tip temperature between $275^{\circ}$ and $875^{\circ}$ F. Additional charges for this service:

1 to 49 .............. $\$ 1.00$ ea. 50 to 99 ............... . 50 ea.
100 or more .....standard price

## CORROSION RESISTANT

Tips and core are forged of tellurium copper alloy and plated for resistance to corrosion.

## HOT IN 90 SECONDS

Kwikheat Thermostatically controlled soldering irons are the only irons containing built-in thermostats, allowing a much greater watt density with less radiation of heat.

## TEMPERATURES ARE PRE-SET

The use of recently developed alloys have permitted the increasc of thermostat temperatures with reduced creep.
WHEN IRONS ARE TO BE USED FOR HEAVY OR HIGH SPEED SOLDERING - SPECIFY A PRODUCTION IRON.

## \#20 ANTIFREEZE COMPOUND

A lubricant for all soldering iron tips. Prevent sticking, increases conductivity between tip and core.

Please contact your jobber for trade discounts.

All Models ter 60 C) 120 Y. AC Only

- INSTANT HEAT. No wasted time or current. Weller Guns pay for themselves in a few months.
- DUAL HEAT SAVES TIME AND MONEY. Tip life greatly ancreased by using high heat only when necessary. Switch instantly to high or low heat as job requires.
- EXCLUSIVE TIP-GRIP. Wiping action of tip-fastening nut eliminates contact resistance and oxidation. Assures full constant neat.
- DUAL SPOTLIGHTS ON ALL MODELS. Locate work quickly-even in dark corners.
- HIGH-IMPACT HOUSING-PERFECT BALANCE. Rugged Hycar phenolic plastic housing protects against damage. Streamlined design and built-in transformer give pistol balance and soldering convenience.
- SLIDES EASILY INTO TIGHT SPACES. Longer reach slips easily between wiring - handles difficult, deep-corner jobs with ease. Speeds work and ends damage to insulation. - LOW-COST, REPLACEABLE WELLERTIPS. Change tips in a jiffy. Chisel shape for faster heat transfer.

"DUREVER" Soldering Tips are pure forged copper, shaped to your favorite style, with a special mefal coating that will preserve the original shape of the tip by protecting the copper from corrosion and oxidation. Will outlast copper tips, cannol amalgamate with solder, do away with the necessity for dressing or filing. Can be readily tinned without filing and hold their original shape. Circular on request.

when there's a soldering job to be done ... remember the line

## Ungar DOES A BETTER JOB

## the world's most versatile line of ELECTRIC SOLDERING TOOLS

On the job, doing a better job, you'll find this famed family of versatile soldering tools everywhere ... on production lines and in home workshops... in service organizations and testing labs.
The Ungar Electric Pencil Handle with its series of interchangeable Soldering Tips has been deliberately designed to reach into those hard-to-get-at soldering points, speed soldering production and to replace the big, bulky soldering irons that promote fatigue and add costly man hours to overhead. No wonder the industry calls them "Ungar's Little Angels".

NO. 776 UNGAR PENCIL HANDLE
for use with all Ungar thread-in tips
Feather-light, less than 5 -inches long. Extra length brass shell firmly engages all threads, keeps heating unit tight; spring action rivet assures positive contact; extra flexible cord protected with molded rubber sleeve prevents wear; cooler handle of durable molded plastic, perfectly balanced; form-fit cork grip keeps handle tilted at 10 degree angle, eliminates need for extra handle-rest, keeps hot tip point up, away from bench surface; ceramic insulation for double safety. Underwriters' listed (110-120V., $371 / 2$ Watts).

No. 776 Handle \& Cord Set only $\$ 1.15$ ea.

## WASSCO ELECTRIC PRODUCTS CORP., <br> JOLIET, ILLINOIS <br> RESSTIANGE SOLDERING EQUPMEENT

FOR THAT "HARD TO SOLDER" GROUNDING LUG ON CHASSIS—FOR ANY TOUGH SOLDER JOB— Where instant intense heat is needed to solder heavier parts-or on delicate work WHERE PROLONGED HEATING WOULD BURN OR MELT SURROUNDING INSULATIONtO ABSOLUTELY ELIMINATE "COLD" SOLDERING JOINTS.

## EVERY PLANT, LABORATORY AND SERVICE ORGANIZATION SHOULD have at least one set of wassco resistance SOLDERING EQUIPMENT.

Wassco Glo-Melt Power Units shown above have the exclusive 24 heat feature. Very efficient on largest down to most delicate, small soldering job. Transformers have extra iron and copper for hard repetitive service. Cases are steel, ventilated and finished in attractive gray hammerloid. Snap switch, pilot light and five foot cord.

An extremely versatile material with uses for industrial, decorative and general applications. Wide array of colors, from silver and gold through the spectrum to red and black. Will not peel, chip, tarnish, or rust.
May be formed to Loudspeaker Grilles for radio and television sets, Machinery Guards, Window Display Backgrounds and Figures, Chair Seats and Hampers. Truck Bodies, Fire Screens, Lockers, Air Filters, Walkways, Flying Trays, anc many other items, as well as Air Conditioner Grilles, Ventilator Gril!es, Shelves, Trays, Storage Bins, and
Home Accessories.
"Expamet" may be cut, formed and shaped easily without use of special tools. American aluminum specification 25 . It has also been manufactured from sheets conforming to 3 S and 52 S . Twelve standard sizes of mesh from $1 / 8^{\prime \prime}$ to $6^{\prime \prime}$ shortway of mesh

KESTER "RESIN-FIVE" CORE SOLDER
Formulated especially for Radio and TV; will easily solder such metals as brass, zinc and ferrous alloys. it is non-corrosive and non-conductive.

KESTER PLASTIC ROSIN-CORE SOLDER
The most widely used solder in the TV and radio field. All Kester Solders are made from the finest tin and lead available.

No. 41 - Electricians' Diagonal Pliers -
Hardened and tempered in oil. Narrow nose for radio and electrical work.

| Size | 4 in. | 5 in. | 6 in. |
| :--- | :--- | :--- | :--- | :--- |
| List Price |  |  |  |
| Can be furnished with insulation stripper. |  | $\$ 2.62$ | $\$ 3.08$ |

Can be furnished with insulation stripper.

## No. 654 - Utica Long Needle Nose Side Cutting Pliers

This is a long, fine, spring-tempered nose, side-cutting pliers, drop forged and with hand-honed cutting knives
Size
6 in 7 in.

## No. 777 • Utica Long Needle Nose Pliers

This pliers has a long, half-round, spring-tempered nose for very fine work in assembling small electrical apparatus.

## No. 776 - Curved Needle Nose Pliers -

This is a long curved spring-tempered Needle Nose Pliers for use in deep and narrow places. It may be used without turning or twisting the hand in the assembling of small fixtures, electrical apparatus, etc

Size
6 inches
List Price
$\$ 3.00$

## USTICA

## No. 82 - Utica Chain Nose Wiring Pliers

This is a special Radio Repair Man's Pliers having a chain nose for those who prefer this type of construction.
Size 8 inches
List Price
$\$ 2.80$

## No. 46 - Midget Diagonal Pliers

A small Diagonal for radio and electrical work. Hand honed edges with a slim nose for use in cramped quarters.

Size ................................... 4 inches
List Price ... ..................................................... ... .. ... \$2.50

## Utica Radio Pliers

This is a General Radio Repair Man's Pliers. It has a certer cutter and flat scored nose for looping and bending
Size
List Price $\$ 3.60$

This is a Custom-built pliers designed for flush cutting in contined spaces. Can be furnished with spring in handle.

```
Size,
List Price

This plier is intended to general use where a short nose is desired for getting int difficult places

Long Needle Nose Pliea with Cutter

No. \(81026^{\prime \prime}\) No. 8103 7"
An exceptional handy and useful plier, well proportioned with long thin nose, designed for reaching into tight places

No. \(81046^{\prime \prime}\)
A long, bent, thin nose plier. The angle is arranged to give full clearance and prevent skinning of knuckles.

Newly designed long nose plier suitable for working in confined places.

Has long, thin, sure-grip jaws to reach in*o places where fingers and ordinary plers will not go.

No 8201 41/2" No. \(82036^{\prime \prime}\) No. 8202 5" No. 8204 71/2" Specially designed for electricians, ra dio and TV service men and automotive mechanics Powerful jaws cut close and quickly
Heavy Duty Diagonal Cutting Plier

No. \(820571 / 4^{\prime \prime}\)
One of the most powerful diagonal pliers made. Long handles give a 20 to 1 ratio of leverage to cut with minimum effort.
Heavy Duty Linemen's

No. 8302 71/2" No. \(830383 / 4^{\prime \prime}\)
One of the most popular pliers in use today. Has extra powerful leverage and reinforced cutting knives.

A top quality slip joint combination plier. Has all the quality features of higher priced cutting pliers at modest cost.

This plier incorporates the best features of a regular side cutter with the versa. tility of a slip joint combination plier.

Extra long, wide, flat nose makes this an especially useful tool Plier is tempered so jaw will not spring undes pressure
Long Flat Nose
Plier

No \(85026^{\prime \prime}\)
Same as No. 8501 except supplied withour cutter

Fitted with duckbill type jaws wider and heavier than those of the ordinary flat nose for firmer gripping service.

Especially designed 3-position jaws accommodate small to medium large nuts, bolts, etc Fine for delicate radio and
 Built to provide an especially secure grip on medium to large bolts, nuts, pipes, etc. 3-position jaws open to \(5 / 8^{\prime \prime}\). \(3 / 4^{\prime \prime}\), respectively
VACGRUV Adjustable Plier Wrench, Chrome
 A general purpose, heavy duty tool with 5 -position laws that open to \(11 / 8^{\prime \prime}\) Doubles as pipe wrench, gripping plies and hand vise.

\section*{VACO RADIO and TV KITS}

ZBX 51 Screw Driver Kit
A fine, all-purpose kit of interchangeable regular and Phillips blades that fit same handle. \(6^{\prime \prime}\) extension makes 10 combinations possible. In durable leatherette bag.

\section*{ZSX 61 Nut Driver Kit}

A most versatile and complete hexagon wrench kit for radio, television or any other work requiring speedy nut setting. All sockets are super hard for maximum utility and long life. \(6^{\prime \prime}\) extension makes 10 blade lengths possible. In handy leatherette tool roll.

\section*{ZA 70 Allen Driver Kit}

This useful kit consists of 6 hexagon driv. ers, handle and bag. Will service hexagon recessed opening screws Nos. 4, 5, 6, 8, 10, \(1 / 4^{\prime \prime}, 5 / 16^{\prime \prime}\) and \(3 / 8^{\prime \prime}\). Each bit is extra long and may ground back as wear occurs.

\section*{ZU 75 Universal Driver Kit}

Here is a kit that is universal in its applications since it will serve all three types of the most popular screws in use today-regular slotted, Phillips, and clutch head. All popu. lar size blades are included-3/16" and \(1 / 4^{\prime \prime}\) for regular slotted screws; No. 1 and No. 2 Phillips; 5/32" \(\times 3 / 16^{\prime \prime}\) clutch head.

\section*{27-Piece TV and Radio Kit}

NO. TV 27 KIT-Contains practically every hand tool necessary for television and radio work, plus extra pockets for pliers and other personal tools according to individual preferences. Contains one each of the fol. lowing: ZH 1 medium duty handle; ZH 2 heavy duty handle; ZX 56 extension; A 132 1/4" stub; 1/4", 3/16", 1/8" regular bits; No. 1 Phillips and No. 2 Phillips bits; 3/16", \(1 / 4^{\prime \prime}, 5 / 16^{\prime \prime}, 11 / 32^{\prime \prime}, 3 / 8^{\prime \prime}\), \(7 / 16^{\prime \prime}\) and \(1 / 2^{\prime \prime}\) hex. wrenches; AT 45 metal tip aligner; .A \(116.23 / 32^{\prime \prime}\) pocket clip; P 01 \#0 Phillips thin blade; OK 24 1/8' screw holding; VR 261 1/8" insulated blade; OK \(383 / 16^{\prime \prime}\) screw holding; VR 381 3/16" insulated blade; VB \(2101 / 8^{\prime \prime} \times 10^{\prime \prime}\) non-magnetic adjuster; AT 510 5/32" fiber aligner; VO 2 medium offset; VO 1 small offset.

\section*{14-Piece TV and Radio Kit}

NO. RT 14 KIT-Here's a handy, convenient kit for radio and TV service men. Contains nut drivers, Phillips and regular drivers, plus ZH 2 heavy duty handle and famous Vaco \(6^{\prime \prime}\) extension which dou. bles the usefulness of each driver. In durable leatherette tool roll.

\section*{VACO PRODUCTS CO., 317 E. Ontario St., Chicago 11, Illinois \\ Warehouse Branches in Principal Cities \\ In Canada: Vaco-Lynn Products (of Canada) Ltd.}

No. 2195 Service Kit
A GENERAL PURPOSE ELECTFICAL, RADIO AND TV KIT containing everything needed for making clean, fast, trouble-free electrical connections. No soldering! No fuss or muss! Kit includes . . . No. 1900 Crimping Tool and Terminals Nos. 2300, 2301, 2302, 2400, 2401, 2402, \(2600,2601,2602\), and \(3300 \ldots\) all in a clear plastic box with tight-fitting lid. Individual bins marked with terminal stock number cards.

No. 1900 Crimping Tool

No solder... no iron... no heating.... a perfect connection every time with this tool and Lynn Lightaing Solderless Ter. minals by Vaco! Crimping tool has wire cutters, indenting die, wire-stripping die, shock-proof, slip.proof plastic handle sleeves. For No. 22 te No. 10 gauge wire.

1. Cut Wire. Use the wire cutter built inwo the crimping toolto cut wire proper length.教

Wide Assortment of Solderless Terminals for General Use, Radio and TV

Extra long barrel on terminal provides easy crimp and perfect contact. Only ONE crimp necessary. Barrel always remains round.

\section*{TOOLS FOR CRAFTSMIN \\ \\ GREENLEE} \\ \\ GREENLEE}

\section*{NO. 735 KNOCKOUT PUNCH SET}

Designed primarily for the electrical trade to permit fast, easy enlarging of knockouts and cutting of holes for conduit in metal boxes and cabinets. Also excellent for automobile work where holes are needed for heater pipes and other accessories. Simply insert the tool in a knockout or small drilled hole and give the screw a few turns with an ordinary wrench. No. 735 set has four punches for cutting \(7 / 8,1 \frac{3}{32}, 1 \frac{1}{32}, 1 \frac{17}{6}\)-inch holes for \(1 / 2,3 / 4,1,11 / 4\)-inch conduit. Set is neatly packed in leather case illustrated. The \(1 / 2\)-inch punch will cut a \(7 / 8\)-inch hole for \(1 / 2\)-inch conduit where no standard knockout is provided when a \(\frac{7}{16}\) " hole is drilled.

\section*{Heavy Duty Drive for \(1 / 2^{\prime \prime}\) Punch}

To increase length of service of the \(1 / 2\). inch Knockout Punch in cutting \(7 / 8\)-inch holes in heavier-gauge sheet metals, the No. KR5 Drive Screw with No. KR4
Drive Nut illustrated is recommended.

\section*{NO. 737 KNOCKOUT PUNCH SET}

Similar to the No. 735 set, but consists of only two punches for cutting holes to accommodate \(11 / 2^{\prime \prime}\) and \(2^{\prime \prime}\) conduit. Packed in leather case.

\section*{NOS. 738 AND 739 KNOCKOUT PUNCHES}

For cutting holes to accommodate \(21 / 2^{\prime \prime}\) and \(3^{\prime \prime}\) conduit. Design is similar to that of smaller GREENLEE Knockout Punches: insert in a knockout or drilled hole and turn drive nut with an ordinary wrench. Packed and sold individually.

\section*{NOS. 741 AND 742 KNOCKOUT PUNCHES}

For quickly making smooth openings for \(31 / 2^{\prime \prime}\) and \(4^{\prime \prime}\) conduit. Hole is clean, no filing of burrs necessary. Operation is similar to that of other GREENLEE Knockout Punches. Simply insert in hole for \(1^{\prime \prime}\) conduit and turn drive nut with an ordinary wrench.

No. 740 Knockout Cutter
Companion tool to GREENLEE Knockout Punches. Enlarges knockouts to take \(11 / 2,2,21 / 2\) and 3 -inch conduit. Operation is simple since an ordinary wrench drives the tool. Cutting is done by the drive action of two wheel cutters. Special discs can be furnished for cutting odd sizes of holes from \(1+\frac{5}{6}\) to \(31 / 2\)-inch diameter. Packed in leather case.
 NO. 7646 HYDRAULIC
KNOCKOUT PUNCH DRIVER
A powerful portable hydraulic unit for driving all GREENLEE Knockout Punches. Also drives GREENLEE Radio Chassis Punches using \(3 / 8^{\prime \prime}\) or larger drive screws. Quickly, easily cuts holes in 10 -gauge metal. Excellent for use in tight places. Packed in metal case. List price complete, \(\$ 96.00\). Weight, 20 lbs .
knockout punches - list prices and weights (wts. in lbs.)

\section*{No. 730 ROUND PUNCH}

Swiftly cuts clean, accurate holes in radio

No. 730

No. 731 chassis for sockets, switches, controls and other equipment. Operates simply with an ordinary wrench for drive power . . . just insert in a small drilled hole and turn drive screw. No reaming or filing . . . hole is smooth, perfect. Seventeen sizes from \(1 / 2\) to 21/4" diameter.

\section*{No. 731 SQUARE PUNCH}

Cuts square or oblong openings as desired. Available in three sizes for making \(5 / 8^{\prime \prime}, 3 / 4^{\prime \prime}\) and \(1^{\prime \prime}\) square holes. Drive screw fits into \(1 / 2^{\prime \prime}\) hole, which can be drilled or made with \(1 / 2^{\prime \prime}\) No. 730 Greenlee Round Punch. Operates with an ordinary wrench for drive power. Individually packed.

\section*{No. 732 "KEY'" PUNCH}

Quickly, easily cuts holes for keyed radio sockets. Operates on same principle as other Greenlee Radio Chassis Punches ordinary wrench supplies the drive power. In four sizes to make openings of \(15 / 16^{\prime \prime}, 1^{11} / 64^{\prime \prime}\), \(1^{17 / 64 \prime}, 1^{21 / 64 \prime}\). Drive screw fits into \(1 / 2^{\prime \prime}\) hole. Individually packed.

No. 732

\section*{No. 733 'D" PUNCH}

Simplifies and speeds the work of making "D" shaped openings for high-frequency, miniature tube sockets and other equipment using this type opening. Available in \(1 / 2^{\prime \prime}\) and \(5 / 8^{\prime \prime}\) sizes. Operates on same principle as other Greenlee Radio Chassis Punches with an ordinary wrench supplying the drive power. Drive screw fits into \(3 / 8\) drilled hole. Individually packed.

WALSCO PICKUP CARTRIDGE MOUNTING SCREWS

Machine and self-tapping screws of various lengths. Whatever your problem, the solution can be found in this assortment of small machine and self-tapping screws of various si\%es. spacers are also included.

\section*{WALSCO PHONO PANEL MOUNTING SPRINGS}

Very resilient, very strong, precision-formed. This is an assortment of conical springs for shock-resistant mounting of record Assorted changer units, etc.

WALSCO RUBBER GROMMETS

Protect insulation from raw edges of holes in
metal chassis. Easily \(\begin{array}{lllllll}\text { metal chassis. Easily } & 11 / 32 & 1 / 8 & 3 / 16 & 1 / 16 & 1 / 4 \\ \text { squeezed }\end{array}\) \(\begin{array}{llllll}\text { squeezed into place; give } & 7 / 16 & 3 / 16 & 7 / 32 & 1 / 16 & 5 / 16 \\ \text { a neat, practical finisl. } & 9 / 16 & 1 / 4 & 1 / 4 & 1 / 16 & 3 / 8\end{array}\) \(\begin{array}{llllll}\text { a neat, practical finish. } & 9 / 16 & 1 / 4 & 1 / 4 & 1 / 16 & 3 / 8 \\ \text { Extremely useful for } & 5 / 8 & 3 / 8 & 1 / 4 & 1 / 16 & 1 / 2\end{array}\) \(\begin{array}{llllll}\text { damping vibration when } & 13 / 16 & 1 / 2 & 9 / 32 & 1 / 16 & 1 / 2 \\ \text { mounting certain parts. } & & & 1 / 8 \\ & & & & & \end{array}\)

WALSCO CORD STRAINRELIEFS

For POSJ of POT (plastic) cord. Prevents chafing of ac power cord where it enters chassis. Takes strain off terminals. Protects against breakage of conductors due to sharp kinking over metal edge. ATTACH TO CORD WITH WALSCO RUBBER CEMENT.

WALSCO CABINET FEET
Supplied in two types-with tacks or screws-WALSCO Cabinet Feet are made of synthetic rubber. Wood screws are supplied with screw type feet. However, machine or sheet metal screws will fit.

ASSORTED STANDARD MACHINE SCREWS
Various Sizes, Lengths, and Styles.

WALSCO SMALL MACHINE SCREW AND NUT ASSORTMENT
Extra small screws needed in experimental and repair work for fastening small parts, replacing rivets, etc. Special assortment of Nos. 2 and 4 screws with nuts to fit.

Easier than riveting, faster than machine screws-
 WALSCO Self-tapping Screws cut their own threads in either metal or plastic. Just drill a hole and drive the screw-no nut or tapping necessary. Just the thing for mounting parts to chassis, replacing rivets, eyelets, etc. Listed here are all the popular sizes used by major manufacturers.

\section*{WALSCO RACK SCREWS AND CUP WASHERS}

Nickel-plated WALSCO oval-head screws and cup washers give a workmanlike finish to panels mounted on racks or in cabinets. Recommended for studio and laboratory installations.
\(\left.\begin{array}{l}\text { Size } \\ \text { Screws }\left\{\begin{array}{c}\# 6.32 \times 5 / 8^{\prime \prime} \\ \# 8.32 \times 5 / 9^{\prime \prime} \\ \# 10-32 \times 3 / 4^{\prime \prime}\end{array}\right. \\ \# 6\left(7 / 16^{\prime \prime} 0.0 .\right) \\ \# 8\left(1 / 2^{\prime \prime} 0.0 .\right) \\ \# 10\left(9 / 16^{\prime \prime} 0 . HARDWARE MANUFACTURING CO. INC. BROOKLYN II, N. Y.

\section*{CONTROLLED TORQUE KNOBS with the built-in SAFETY FACTOR}

Model K1375

Model X1376

JAN CONTROLLED TORQUE KNOBS are designed to safeguard delicate and castly instruments against careless or inadvertent cranking beyond their normal stops. Designed for multi-turn devices such as variable capacitars, inductors, potentiometers, etc., the knobs work on the principle of the slip clutch, automatically disengaging and slipping when a predetermined torque is exceeded. The knobs which are fluted to aid in sensitive adjustment also have spinners for fast turning. Featuring distinctive styling, the knobs measure \(17 / 8^{\prime \prime}\) O.D. \& 15/16" thick. They fit standard \(1 / 4^{\prime \prime}\) diameter shafts.
Model K1376 is the same as the model KI375 with the additional feature of a retractable spinner. The retractable feature is useful when equipment must fit into small storage spaces or where there is danger of inadvertent movement of protruding controls. It has a positive toggle type action, being spring loaded either open or closed.

\section*{"JOLTA" SHOCK TESTER}

Madel No. 1001
This new shock tester for meters and small mechanisms provides for rapid and precise testing of the ability of components to withstand shock stresses. Designed for laboratory testing of instruments such as relays, electric meters clocks and other electrical and electronic devices, it is accurately calibrated for direct readings in accord with specifications now required in most military and commercial contracts. Known as "JOLTA," the tester is a sturdily built bench model machine capable of accommodating all shapes and sizes of specimens up to a weight of 4 pounds and measuring up to \(5^{\prime \prime} \times 5^{\prime \prime} \times 5^{\prime \prime}\). Mechanisms may be tested while in actual operation and under electrical load. Computation charts are supplied.

Designed to comply with specifications JAN-S-44 and MIL-STD-202; Method 202.

\section*{PANEL BEARING \& SHAFT ASSY.}

The versatile Panel Bearing and Shaft Assembly is used for control of a remote component. Passivated stainless steel shaft is \(1 / 4^{\prime \prime}\) dia. with one end flatted for attaching to control knob by set screws. Supplied completely assembled with two retaining rings, jam nut with lock washer, and brass panel bearing, nickel plated. Fits all panels up to \(\frac{3}{16}\) " thick; mounts in \(f_{\frac{1}{2} " ~ d i a . ~ h o l e . ~}^{\text {l }}\) Cat. No. 'L'" Shaft Length AP15350 Panel bearing assy. \(\begin{array}{lr}\text { APPI5350-1 } & \text { Without } \\ \text { API5350-2 } & 1^{\prime} 5^{\prime \prime} \\ \text { API5350-3 } & 3^{\prime \prime} \\ \mathbf{B}^{\prime \prime}\end{array}\)

\section*{JACK COVER}

These sturdy Jack Covers are used to keep out dust and mois ture and to prevent inadvertent disturbance of control settings. They are made of steel and fin ished in enamel, after bonderizing for rust prevention. Supplied assembled with stainless steel spring, hinge pin and neoprene pad. Fits on jack or panel bushings. For black wrinkle finish, specify (-1), smooth gray (-2) and olive drab (-3).

\section*{INSULATED UNIVERSAL COUPLINGS \(\pm 30^{\circ}\)}

\section*{ELIMINATES BACKLASH AND COSTLY fLEXIBLE SHAFTS!}

This varsatile and extremely durable nylon coupling makes it passible to join two parallel drive shafts offset from each other plus or minus 30 degrees in any direction and separations greater than 3 inches.
- Secures firmly to the drive shaft thru a nickel plated brass insert and 2 set screws.
- Used with \(1 / 4{ }^{\prime \prime}\) coupling shaft of any length (not furnished).
- Shaft is keyed to the coupler by zinc plated steel pins supplied by JAN.
- Eliminates backlash and replaces costly flexible shafts.
- Provides for insulation and coupling from front panel to remote control such as potentiometer, selectar switch and other devices (rotating).

Cat. No. AP 15299

\section*{BEZEL ASSEMBLIES}

JAN BEZEL ASSEMBLIES consist of cast aluminum alloy bezels finished in smoath dull or wrinkle black enamel paint, Buna-S rubber shock mounts, scale calibrated light filters and mounting hardware. JAN EDGE-LIT BEZELS have engraved calibration scales on the window and accommodate pilot bulbs for edge lighting. All JAN BEZELS are designed for universal application

\section*{MAGNETIC SHIELDS FOR CATHODE RAY TUBES}

JAN MAGNETIC SHIEIDS are made af the highest grade af magnetic metals and are carefully annealed by a special pracess ta ossure aptimum arientatian af the specific grain structure af the allay. JAN SHIELDS prevent distartian and intensity modulatian of the electran beam due ta stray magnetic fields and pratect persannel against the dangers af accidental tube breakage. Maunting holes are tapped far \#6-32 screw.
All cathode ray tubes with curved faces are underlined. Bezels with designations ( -1 ) are used with these tubes only. All others not underined are flat faced tubes which are used with bezels designated as ( -2 ). See inside page for specifications on JAN BEZEL ASSEMBLIES. - Opening for anode provided when required.

\section*{LUCITE FEEDER SPREADERS}

Designed for all average feeder requirements. A 600 ohm line can be made with any size wire from No. 12 to No. 18 by using one of the spreaders listed below. The spreader used for this application depends on the wire size. Further data on this subject is available in any antenna handbook. These spreaders are furnished with locking screws to clamp the wire in place. All spreaders are \(8 / 8^{\prime \prime}\) in diameter.
\begin{tabular}{lccr}
\hline Catalog No. & Wire Splicing & Std. Package & Dealer Cost \\
I-1900 & \(2^{\prime \prime}\) & 25 & \(\mathbf{\$ 0 . 3 0}\) \\
\(\mathbf{I - 1 9 0 1}\) & \(4^{\prime \prime}\) & 25 & .36 \\

\(\mathbf{I}-1903\) & \(6^{\prime \prime}\) & \(2)^{\prime \prime}\) & .42
\end{tabular}

\section*{PANEL BEARING ASSEMBLIES}

Nos. PB-530 and PB-531 consist of a regular \({ }^{1 / 4}\) " shaft bearing with \(6^{\prime \prime}\) and \(3^{\prime \prime}\) length of \(1 / 4^{\prime \prime}\) brass rod inserted and held in pluce by washers to prevent shaft from shifting. These two assemblies will facilitate the panel control of condensers, potentiometers, etc., which must be mounted a distance from the panel. Bearing fits in \(13 / 32^{\prime \prime}\) hole and on panels up to \(5 / 16^{*}\) thick. No. PB532 is bearing only without shaft.

PRODS•LEADS•JACKS•PLUGS

\section*{"VISE-GRIP" TEST PRODS}

No longer is it necessary to use a soldering iron or screw-driver to replace a broken or worn lead on a test prod or plug. To install a wire in this unique, patented prod, merely insert end of wire in hole, screw down handle to finger tightness and a positive contact is assured. By far the fastest. most efficient way of doing this joh,

TEST PRODS WITH 1" PLASTIC HANDLE

Prod is made of brass rod, and is nickel plated. Plastic handle is threaded at one end and prod screws into same.

\section*{TEST PIRODS WITII 4" PLASTIC HANDLE}

Prods are identical to those described above. Plastic handle is \(4^{\prime \prime}\) long and male of the best material obtainable.

\section*{SUPER TEST LEADS}

Cat. No. 97

\section*{SMALL JACKS}

These panel mounting jacks are desirable for control panels and similar spplications where space is at a premium. Parts are accurately nachined, with cadmium plated finish and contacts are formed from spring brass. Each jack comes complete with insulating washers and will accomnodate standard plugs. Overall length is/:".
\begin{tabular}{lccr}
\hline Catalog No. Contacts & Distance Behind Panel & Dealer Cost \\
\(\mathbf{J}-1038\) & \(15 / 6^{\prime \prime}\) & \(\$ .33\) \\
\(\mathbf{J}-1058\) & 2 & \(15 / 16^{\prime \prime}\) & .55
\end{tabular}

\section*{ALL-PURPOSE JACKS}

Although small in size. this is one of the fnest lines of jacks avaliahte. The careful design and high quality naterials used in these components assure long, dependable service. Circult opening ?nlitcts are made of pure silver and the laminated
hikulite insulation prevents breakdown between hincilte insulation prevents breakdown between
sinings at all ordinary. voltages. Supplied with panel insulating washers. Height \(1 \% /{ }^{\prime \prime}\), distance banel insulating"

\section*{FLEXIBLE SHAFTS and COUPLERS}

When construction necessitates the mounting of condensers or potentiometers away from the panel and at unusual angles, these Flexible Shafts simplify panel control problems. Both lengths are remarkably free from backlash and will turn at any angle up to \(90^{\circ}\).
Nos. FS-859 and FS-860 have \(1 / 4^{\prime \prime}\) bushings sweated to each end to fit either plain or insulated couplings. Nos. FS-862 and FS-863 have Steatite insulated couplings attached to each end to fit \(1 / 4^{\prime \prime}\) shafts.

\section*{"QUIETROLE" the preferred, standard product of the industry!}

Your guarantee for quieting noisy television and radio controls, switches and other moving parts is QUIETROLE. Here is the original, non-inflammable, most reliable lubricant-cleaner on the market today . . . developed through years of factual and authentic research.

\section*{mfd. by QUIETROLE COMPANY}

SPARTANBURG, S. C.

\section*{(1) VINYL COLOR TAPE}

Our newest. Vinyl plastic tapes in eight colors and three widths ... \(1 / 2^{\prime \prime}, 3 / 4^{\prime \prime}, 11 / 2^{\prime \prime}\) ... 108" long. For use wherever color can help in wiring, indexing, coding, etc. Conforms to irregular surfaces. High dielectric resistance. . . up to 1000 V . per mil of thick. ness. UL listed. Packed in colarful self-service carton.
Also available in large size rolls in four widths, \(3 / 8^{\prime \prime}, 1 / 2^{\prime \prime}, 3 / 4^{\prime \prime}, 1^{\prime \prime} . .36\) yds. long. Ideal for the industrial user.

\section*{(2) PLASTIC ELECTRICAL TAPE}

Plastic Electrical Tape Master Shop Package. This tape is thin and is used in places where space is limited. It has \(150 \%\) stretch, high dielectric resistance, resists weather, water, oils, acids and corrosive chemicals. It conforms readily to irregular surfaces. Package contains 5 rolls \(3 / 4\) inch by 44 feet each.
(3).010 PLASTIC has the general charater. istics of regular Plastic except it is heavier for heavy duty wort such as winding heavy cables, heavy electrical harness and for use in tape winding machines.
(4)

Plastic Electrical Tape Counter Display Carton. DUTCH BRAND Plastic is also avail. able in an attractive point-of-sale display carton containing two dozen consumer size rolls \(1 / 2\) inch by 150 inches. A convenient size for small repair jobs.
(5) Plastic Tape "Tool Kit" Rolls. Convenient size roll for the hame workshop or repair trade. DUTC.H BRAND Plastic Tape has many uses around the home and is widely used for professional work. Rolls are \(3 / 4\) inch by 20 feet long. Packaged both in Counter Display Carton of 18 rolls and Junior Shop Package of 5 rolls.

\section*{(6) FRICTION TAPE}

DUTCH BRAND Friction Tape-This tape has long life, extra strength for easy use. One layer resists up ta 2000 volts. Combined
whith DUTCH BRAND Rubber Insulating Tape it produces highest dielectric resistance. Individually boxed and packed in attractive display carton. Each No. 8 roll contains 68 it. of tape.
(7) Narrow Width Friction Tape. The handy size for radio and electrical appliance repair shaps, electrical contractors, industrial users The tape comes in a convenient \(3 / 8\) inch width roll, handy for small work.
Sprecial Width Friction Tape-Available in special widths for special uses ... comes in widths \(1 / 2,1,11 / 4,11 / 2,2,3,4\) inches and wider.

\section*{(9) RUBBER TAPE}

Fer perfect insulation it fuses instantly with. out heat. Has extra high dielectric strength - resists up to 18000 volts through a single thiskness. Strong, durable and non-corrosive to electrical conductors. Assures positive in. sulation for high tension lines where highest dielectric resistance is needed.

\section*{(9) "DB" WIRE CONNECTORS}

Solderless. Vibration Proof. Weather Proof. Long Skirt. "DB" Wire Connectors are now available for the convenience of the many customers who buy and use the welt known DUTCH BRAND Electrical Tapes. Those who Ub: wire connectors for many installations will find that "DB's" are a quality product. Available in four standard sizes to meet all needs. They resist pull-out and vibration... are weatherproof and are molded with the necessary length to give full insulation protection. U.L. listed.

\section*{(10) CAULKING \& SEALING COMPOUND}
 CONNECTORS

\section*{TELEVISION "HANDI-KIT"}

For Television servicing. Contains nine (9) latest tools especially designed tor television needs. Includes aligner for IF and RF and "K-Tran" Transformers (No. 978); slim alignment tool for cramped spraces (No. 6161); Extra thin long ( \(9^{\prime \prime}\) ) aligner (No. 6162); thin diameter tuning wand (No. 6163); tuning wrench (No. 6164); dual aligner, narrow shaft (No. 6166); Stackpole core aligner (No. 6170); deep nib aligner (No. 6156); narrow insulated screw driver for deep tuning (No. 6157). Packed in attractive leatherette case for easy carrying. A real combination value.

No. 6165
Dealer Cost \(\$ 4.50\)

\section*{TELEVISION SERVICING . . . ALIGNING TOOLS}

DEEP-N: \({ }^{\text {B }}\) "KLEER ALIGNER"

All-insulated aligner with clear flexible low lose rod (1/4" dia.); amber plastic handle. Metal nib for No. 6 stuls entirely insulated and set within barrel end. For tuning IF and RF shielded ecoils and trimmers. Overall length: 4".

No. 6846
Dealer Cost \(\$ 0.42\)

\section*{THIN ALIGNER}

Has extra thin recessed bladr; durable slim metal shaft for cramper probing. Amber Hlastic handle. Especially suitable for Admiral and similar type TV receivers. Measures of" werall lemath.

No. 6849
Dealer Cost \(\$ 0.66\)

\section*{"LONG STRETCH" FIBRE TV ALIGNER}

Ideal for probing in cramped, inaccessible areas. A louble haded aligning tool, measuriny \(12^{\prime \prime}\) in length. Made of durable fibre for romplete insulation and sturdiness. Narrow sluaft is \(1 / 8^{\prime \prime}\) in diam.
No. 6159

Dealer Cost \$ 3.84

\section*{DOUBLE END "KLEER ALIGNER'}

Low-loss (CLEAR PLASTIC all-insulated shaft. Has two recessed blades set within rod ends, completely insulated. One blade suitable for No. 6 serew and smaller; other blade for No. 4 screw and smaller. Slaft is \(7^{\prime \prime}\) long \(\times 3^{7}{ }^{7}\) diameter.
No. 6193 ............................Dealer Cost \$ . 60 Display Card of 12 above
No. D-76193
Dealer Cost \$7.20

a low-loss Clear Plastic all-insulated aligning tool. Narrow shaft. Has recessed insulated blade on one end; extended blade on other rud. Designed for many aligning uses. For trimmers, IF transformers, etc. Measures \(\mathbf{i}^{\prime \prime}\) in length \(\mathbf{x}_{3} \mathbf{J}^{7}\) " diameter.

No. 6192
............................Dealer Cost \$ . 60
Display Card of 12 above
No. D-76192.
Dealer Cost \(\$ 7.20\)

Aligning tool of tough fibre with insulating aminer plastic handle for standard IF, RF and "K.Tran" midget transformers. Measures \(61 / 2\) overall length.
No. 6850
Dealer Cost \(\$ 0.51\)

\section*{'KLEER-TUNEK" \\ \(\square 8\)}

Low. loss clear hastic rod measures an \(^{7 \prime \prime}\) in dia. Insilatine amber plastic handle. Has recessed hlade for No. 6 studs. All-insulated. Measures * \(1 / 2\) " overall length.

No. 6848
Dealer Cost \$0.66

Extra thin, extra long ( \(9^{\prime \prime}\) ), bone fibre alipn ing tool, \(6 \frac{1}{2 \prime}\) blade. Specially designed for adjustment of nested iron cores of "Admiral," "Thenith" and similar make TV sets. Permits use on RCA front ends and normally inacces. sible areas.
No. 6162
Dealer Cost \(\$ .73\)
Display Card of 12 above
No. D. 76162.
Dealer Cost \(\$ 8.76\)

\section*{TUNING WRENCH}

Theulated fibre tumine wretel with extra thin recessed blade. Extra thin screw driver blade on other end ( \(4 \%\) " I. .). Tenite handle. Eapecially designed for "Zenith" TV sets, etc.
No. 6164
Dealer Cost \(\$ 0.48\)
Display Card of 16 above
No. D. 76164
Dealer Cost \$7.68

\section*{DUAL ALIGNER}

Dual purpose narrow shaft, fibre alignment tool for trimmers, If transformers, coils, cont densers, pushi-hutton tuners, etc. Recessed screw nib, on one end; metal serew driver on other end. Has an extensive application in TV servicing. Used on RCA, Bendix, and other type receivers.

No. 6166

2670-4-Prong
...\$ . 55
2671-5-Prong

ICA SMALL RIBBED BAKELITE COIL FORMS
Rugged and durable, these coil forms are designed fo long service. Measures \(13 / 8^{\prime \prime}\) diameter, \(21 / 4^{\prime \prime}\) high with molded ribs for low-loss winding and special rim on top. There is a recess in the rim to insert the ICA Round Labels to signify wave lengths.

2159-5.Prong
2160-6-Prong

\section*{INSULINE CHOKES}

\section*{INSULEX R.F. CHOKE COIL}

HIGH FREQUENCY. Consists of four narrow sections each universally wound spaced on an Insulex form. Designed especially for high frequency receivers.

Low distributed capacity. Supplied with wire lealls for mounting. May be mounted in grid leak clips.

\section*{ICA INSULEX R.F. CHOKES}

Can be used in any circuit or position. Designed particularly for short wave but equally effective over the broadcast band. Insulex forms are used with a special Radio Frequency Lacquer for impregnation and ample moisture proofing. Solder lugs for firm electrical and mechanical contacts.

FILTERVOLT NOISE FILTER
An efficient filter for disturbances caused by
 electrical appliances. For use with any all. wave or broadcast receiver.
Rated conservatively at 250 watts for 32,110 and 220 volt AC or DC circuits. Can be installed either at the radio or at the source of disturbance.
Contains heavy duty R.F. chokes, large filter capacitor, and has a "Pl" Filter circuit Hransement.
No. 338.......................................

\section*{ICA \\ FILTERVOLT}

Improves extremely noisy radio reception due to interruptions in power line caused by electrical appliances, lights, etc.

No. 394
Dealer Cost \(\$ 3.00\)

\section*{SIMPLEX FILTERYOLT}

Eliminates Radio Noises Caused By-

- Electric Shavers
- Reírigerators
- Fans - Elevators
- Motors, etc.

No. 90.
Dealer Cost \(\$ 1.17\)

\section*{UNIVERSAL VOLTAGE REGULATOR}

Voltage flictuation often occurs not gradually but suddenly, thus bringing a tremendous strain on the tubes. This regulator protects tubes through scientific regulation of current huctuations. Housing body and end rings are neatiy constructed and of perconstructed and of perFor all Japanned metal. For all Radio Sets, AC,

\section*{EAR CUSHIONS}

Made of soft rubler. Ideal for the amateur wireless op erator, etc.

No. 195
Dealer Cost \(\$ .84\) pr.

No. 92.
Dealer Cost \(\$ 1.17\)
ICA 3-IN-T RADIO TUNER

runctions as either an Antenna Tuner, Wave Trap, or Aerial Eliminator. Operates on any make or model radio set.
As an Antenna Tuner, it will improve the reception of a weak station. As a Wave Trap, it will separate interfering stations and im. prove selectivity. As an Aerial Eliminator, it makes unnecessary the outdoor aerial. Easily installed within a few minutes.
No. 93.
Dealer Cost \(\$ .60\)
Complete with Instructions.

\section*{Portables}

Eliminates necessity of outdoor or indoor antenta. Replaces the antenna coil in portable or midret siets.
 Easily assembled.
...........................Dealer Cost \$ . 83
No. 4385

ICA TENNA-SCOPE

No. 4380 .

A new style built. in tuned radio an. tenna. Easily connected. Eliminates use of outside aerial and ground. Fea. and ground. reativity - Hirhe tivity - Himher signal to noise ration no soldering connected, no soldering.
...Dealer Cost \(\$ 2.00\)

\section*{IMPROVED ICA DELUXE SIGNA-TONE}

\section*{AUdIO OSCILLATOR - CODE PRACTICE SET - KEYING MONITOR}

The ICA Signature is a perfected Audio Oscillator, having 3 different output frequencies and a continuously variable volume control. The Audio notes are similar to those of high quality commercial CW stations.
1. CODE PRACTICE SET-A numher of phones and keys may he connected for intercommunication or for classroom or

2. KEYING MONITOR-An invaluable aid in improving any ham's "fist." Will follow the "bug" at all speeds. No well-equipped station should be without this keying monitor. (A double pole keying relay is required for this function-one set of contacts for keying transmitter; other set for monitor.)
3. MODULATION SIGNAL-The steady note of the Sipnature is ideal for adjusting both the Modulator and modulated stages of your transmitter for \(100 \%\) modulation.
4. SIGNAL TRACER-By feeding the output of the Signatone into each stage of your modulator and listening to the output of that stage, defects and "bugs" can eusily be located. Complete with 50 B 5 and 35 W 4 tubes and self-contained speaker for 110 V AC.DC.
No. 4300-Dealer Net Cost
\(\$ 15.75\)

\section*{. 3301-Classroom Model (No Speaker)-Dealer Net Cost \\ 13.50}

\section*{ICA UNBREAKABLE MORSE CODE RECORDS}

Learn the International Morse Code Quickly, Easily - Uses EYE - EAR Method. The Complete Linguaphone Code Equipment consists of 5 Double-faced, electrically transcribed records in durable album. Contents: 3 Tables, 10 Lessons.

[^31]:    Since 1927, PAR-METAL has been a pioneer in the design and creation of superior metal equipment for the radio and communications industries. This experience in combination with skilled craftsmen and high quality material, have made PAR-METAL PRODUCTS the standard of the industry.

[^32]:    *Racks for 19"' Wide Panels are also made as standard units in 24" depth. All Universal Racks are obtainable with open sides for use as single units, or units.
    unde ganging in rows: removable side panels are available as standard
    a

    Open side racks may be intermixed and ganged with Series PX-6718 and Series FX-6718 Racks listed on this page.

[^33]:    ALL PRICES R.O.B. LONG ISLAND CITY, N. Y. - FOR WEST COAST PRICES, ADD 10\%
    Export Dept.: Rocke International Corp., 13 E. 40th St., New York 16, N. Y.

[^34]:    All prices F.O.B., Bronx, N, Y.

[^35]:    - SERVICE PARTS DIRECTORY FOR RCA VICTOR TV RECEIVERS (1946-1950)

    SP-1007 ( $107 /$ B' $^{\prime \prime} \times 163 / 4^{\prime \prime}$ ) - 80 pages. Schematic Diagrams and replacement parts lists for all RCA Victor television receivers manufactured from 1946 thru June 1950 ( 56 models). Large-size book opens so that each schematic diagram faces its corresponding parts list for quick reference. Price, 75 cents per copy.

[^36]:    Radio's Master - 19tl Edition

[^37]:    Page L-30

[^38]:    SPECIALTIES MANUFACTURING CO. DETROIT 38, MICH.

[^39]:    $\ddagger$ Radio frequency interference suppressed. †Recommended for 24 volł bałtery sysfems
    All models designated above are housed in attractively finished grey hammerlaid metal cabinets. The feafure cut above ilfustrates Heavy Duty (IHS) Model Inverters. Dimensions of Standard Model (ISR) Inverters $83^{\prime \prime} \times 9^{\prime \prime} \times 51 / 4^{\prime \prime}$; shipping weight. I9 $16{ }^{\prime \prime}$.
    Dimensions of Heavy Duty Model (IHS) Inverters, $61 / 2^{\prime \prime} \times 111 / 3^{\prime \prime} \times 81 / 2^{\prime \prime}$; shipping weight, 30 lbs. Dimensions of Low Power Model (LIG) Inverters, $55 / 9^{\prime \prime} \times 4^{\prime \prime} \times 63 / 4^{\prime \prime}$; shipping weight, 8 lbs.
    "'P' Inverters are corrected for loads having power factors as low as $50 \%$. For correct replacement vibrator. consult Inverter Vibrator Guide.

[^40]:    ＊For operation on 115 volts DC，connect a 2200 ohm resistor in series with the coil．

[^41]:    All Primary Windings for 60 cycle operation. $\ddagger$ Designates part number to be removed from next catalog.
    §Output changed by means of tap on primary winding. Rating is for a single section choke input filter using a 6 mfd. condenser.

[^42]:    All power transformers are designed for 115 volt, 50 to 60 cycle operation. For any other voltage 50 to 60 cycle operation add $25 \%$ to list

[^43]:    All models arailable with additional line winding (125 and 500 ohms) at extra cost of $\$ 6.00$ net for models with numbers up to T0-3:20 and $\$ 10.00$ net for models T0-330 and TO-350 Molels with lime winding are designated by model numbers ending in " 5 ." For example, Model T0-300 with additional model numbers ending in linding is specified as TO-305.
