VOLUME XLV NUMBER 11

NOVEMBER2005

North American Shortwave Association — America's Shortwave Broadcast Club

Quality Equipment From Universal Radio

PASSPORT TO WORLD BAND RADIO 2006

A must have book for every world-band listener. Provides complete visual data on all shortwave broadcast stations. See at a glance: station name, location, frequency, lime, language and power. Plus candid, hard-hitting reviews on world band radios. The world's #1 selling shortwave guide. Indispensable! 592 pages. Expected 10/31/05.

#1006 \$22.95 \$18.90

Order #0014

GRUNDIG

The incredibly attractive Grundig YB-550PE combines form and function to offer an excellent shortwave experience. Six tuning methods are available to make tuning the bands easy and quick. Enjoy AM, FM, FM Stereo (to earphone jack) and full coverage shortwave from 1710-30000 kHz. Direct keypad frequency entry is possible or Up-Down tuning is available to suff the bands. A bar-graph tuning meter puts you exactly on frequency of the store of the puts you exactly on frequency.

YB-550 PE

tions. The built in clock can wake you to the radio audio or a buzzer. The large backlil LCD shows time and frequency. Comes with a carry case. 3.5 x 5.75 x 1.375 inches 10 oz. (The 550ACA AC adapter is optional order #3039 *12.95). PR-550

RFSPÂCE SDR-14

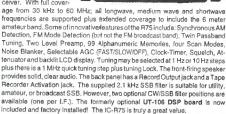

The RFspace SDR-14 is a 14-bit software defined radio receiver, offering a broad range of spectrum analyzer

O ICOM IC-R75

shots, spectrograms and complete specficiations.

Universal Radio is pleased to continue to offer the ICOM R75 receiver. With full cover-

ICOM R75 Order #0175 *569.95

etón FR250

Be prepared and aware with the etdn FR250 emergency radio. This affordable portable receives AM, FM 88-108 MHz and seven spread shortwave bands. This radio an be powered from four different

sources: the built-in rechargeable Ni-MH rechargeable battery, from 3 AA batteries, AC daptor (not included) and from the dynamo crank. There is also a built-in triple white LED light source and mini earphone jack. A fine-tuning control knob is superimposed on the main tuning control knob for precise tuning. The FR250 is not only perfect for emergencies, but also for camping, liking, or anywhere you need to stay in touch Order #0250

HUGE FREE CATALOG

Our new 2005-2006 catalog is the largest ever! Printed July 2005, it features 108 pages of everything for the radio hobbyist. Please call toll-free to request your free copy today. 1 800 431-3939

N424 Notes

Rich Cuff send word that his local electric utility in the Lehigh Valley, PPL, an early experimenter with BPL market tests, decided in early October to abandon further efforts to commercialize the technology. This is based on a report in the local Allentown newspaper. This is certainly a positive interesting trend in the shortwave radio community. About time!

From A.J. Janitschek of Radio Free Asia (RFA), we learn that the Technical Operations Division has just released of the company's eighth QSL card. The card is scheduled for distribution from September 1 to December 31, 2005. This QSL card commemorates the ninth anniversary of RFA's first broadcast which took place on September 29, 1996; this broadcast was in Mandarin Chinese. Since then RFA has grown to 9 Asian languages broadcasting a total of 36 hours of radio programming daily; primarily on shortwave frequencies. RFA welcomes all recepsubmissions tion report www.techweb.rfa.org (follow the QSL reports link) not only from Dxers but from its general listening audience as well. Reception reports are also accepted by email at gsl@rfa.org. For anyone without Internet access, reception reports should be mailed to: Reception Reports, Radio Free Asia, 2025 м Street nw, Suite 300, Washington DC 20036, USA. Upon request, RFA will also send a copy of the current broadcast schedule and a station sticker.

The Board of Deputies representing the full member clubs of the European DX Council (EDXC) held Internet meetings during the summer. Harald Gabler of the Rhein Main DX Club is a new member of the Board. Membership is open for clubs and individuals (10 Euros) living in Europe completing the new organization of the EDXC allowing individuals to join based on the Prague meeting. Article 6 of the statutes states that "Any

individual DXer living in Europe shall be entitled to become a full member of the EDXC, even if he or she is a member of a DX Club or of an umbrella organization of DX Clubs which is also a Full Member of the EDXC." The selection of a new Secretary General and Assistant Secretary General needs to be done. **Tibor Szilagyi** has offered to host EDXC Conferences in St. Petersburg, Russia (19–22 October 2006) and Lugano, Switzerland (1–4 November 2007). The Board has asked for other conference bids.

Bob Padula announced the release of two new products for shortwave enthusiasts. The first is the Australasian Shortwave Guide No. 20 (ASWG). The ASWG is 40 pages with over 700 entries, covers the international shortwave transmission period commencing October 31, 2005, and concluding on March 26, 2006, known as the "BO5 International Transmission Season." It provides comprehensive information of English shortwave schedules to Australia, Asia, the Far East, the Indian sub-continent, and the Pacific, and for broadcasts in all languages to Australia and the Pacific. Schedules of Domestic Services in English from Asia-Pacific countries are also featured. The data is arranged in two sections, by studio country and starting time. Each entry shows broadcasting organization, frequency, starting time, finishing time, language, target area, transmitter site, transmitter country, studio country, and days of operation. Schedules of Digital Radio Mondiale (DRM) transmissions are included, as well as general international broadcasting news. The ASWG is compiled from an extensive worldwide network of broadcasters, frequency planners, engineering consultants, professional monitors, and members of the Electronic DX Press Radio Monitoring Association. For mailing to Australian address the cost is A\$10-cash, personal check, bank check, Australian Money Order, financial institution check, mint Australian

stamps, or PayPal. For mailing to countries outside Australia US\$10 / 10 Euro / A\$15 (cash, 8 international reply coupons, Australian mint stamps to the value of A\$15, international bank transfer, international bank draft, or PayPal). Cash payment in any other currency is acceptable, to the equivalent of US\$10. Orders and payments should be sent to Robert J. Padula, 404 Mont Albert Road, Mont Albert, Victoria 3127, Australia (Email: bobpadula@mydesk.net.au).

The second item is the first release of a brand new product The Australasian Shortwave Digest No. 1—Compact Disk. It is a CD containing a wealth of information about world shortwave broadcasting and related topics. The CD contains (1) the complete Master file (MS Excel format) of the BO5 Edition (No. 20) of the Austrasian Shortwave Guide (see above), (2) The Spectrum Study (MS Excel format), covering the AO5 period, (3) the complete Database (MS Excel format) of the AO5 Edition (No. 19) of the ASWG (March 27-October 30 2005), and (4) an audio-visual introduction from the author. showing and describing his home-based monitoring equipment and antennas, as well as some video clips taken on recent - monitoring expeditions to the mountains around Melbourne. Also, many original articles, professional essays, and on-line links to articles about the history, evolution, and present-day structure of Australian shortwave broadcasting. Plus, much, much more such as original previously unpublished articles, including "QSLs in the New Millennium", "Keeping DX/Monitoring Records", "The HF Broadcasting Bands", and "Ethics for DX Hobbyists." For mailing to Australian addresses A\$20—cash, personal check, bank check, Australian Money Order, financial institution check, mint Australian stamps, or PayPal. For airmailing to countries outside Australia US\$20 / 15 Euro / A\$25 (cash, 14 international reply coupons, Australian mint stamps to the value of A\$25, international bank transfer, international bank draft, PayPal). Cash payment in any other currency is acceptable, to the equivalent of us\$20. Just like above, orders and payments should be sent to Robert J. Padula, 404 Mont Albert Road, Mont Albert, Victoria 3127, Australia (Email: bobpadula@mydesk.net.au).

Thanks to Harald Gabler we learn that the Rhein-Main-Radio-Club of Germany (P. O. Box 700849, 60558 Frankfurt) is celebrating its 30th anniversary. In honor of the occasion, the club held a DX-Camp at Langenselbold near Hanau on 29 September through 3 October. The club is publishing a decorative QSL card wall calendar with the best OSL cards of the last 30 years, which can be seen at http://www.rmrc.de/content/ index fset.html. It is available in German or English. The Rhein-Main-Radio-Club is taking orders for the 2006 QSL card wall calendar for only 14.80 Euro each to their account at RMRC-Konto: Heinz Schulz / RMRC Konto Nr. 686512 309-BLZ 250 100 30-Postbank Hannover. SWIFT-/BIC-Code: PBNKDEFF—IBAN: DE89 2501 0030 0686 5123 09. Anyone follow that? You may want to write to the club or e-mail Harald (DrGabler@t-online.de) for alternative payment information.

The DX season is kicking into high gear and more darkness means many more low band DX opportunities. The changing DX conditions will bring different DX conditions and new listening targets. The club's electronic Flashsheet helps members stay on top of the action with breaking shortwave news and information. If you are a current member of the club and want to receive the electronic Flashsheet just drop Rich D'Angelo (rdangelo3@aol.com) a note with your email address, location and membership expiration date from your mailing label. You can participate by sending your latest logs to the electronic Flashsheet edited by Ray Bauernhuber, DXRADIO@webtv.net. Each week the electronic Flashsheet brings a lot of exciting, late breaking DX news and information to our members. The electronic newsletter is an excellent supplement to the monthly Journal for the timely dissemination of DX loggings and breaking news. This is a service that is only available to our members. Deadlines are posted in the NASWA Flashsheet each week. Let's keep Ray busy!

Please remember to direct all communications about subscriptions, bulletin delivery issues, *Thanksgiving dining suggestions*, the use of PayPal as a payment method, etc. to Bill Oliver at the club's Levittown address or to his electronic address, weoliver@

comcast.net. The regular postal address is the familiar 45 Wildflower Road, Levittown, PA 19057. Inquiries sent to Wyomissing only slow down the process. Thanks! That's it for this month. Enjoy this month's edition of the *Journal*; it's another good one.

Calendar Of Events

- Nov 18 Meeting. Philadelphia Area NASWA Chapter. Kulpsville Holiday Inn, Kulpsville, PA at 7:30 PM. For more information contact Dan Cashin at 610-446-7831 or Internet: dcsckp@aol.com.
- Nov 18 Meeting. Boston Area NASWA Chapter. The Boston Area DXers have found a new location for meetings. Inquiries about the BADXers may be sent to Paul Graveline at 978-470-1971 or Internet: ctreditor@aol.com. The URL for the BADX guys is http://www.anarc.org/naswa/badx/
- Nov 19 Meeting. Reading (England) International Radio Group meetings will be held in Meeting Room 3, Reading International Solidarity Centre, London Street, Reading from 2.30 p.m. to 5 p.m. Further info from Mike Barraclough mikewb@dircon.co.uk
- Dec 10 Meeting. The Cincinnati/Dayton Monitoring Exchange (MONIX) meets at the Lebanon Citizens' National Bank (LCNB), 425 West Central Avenue (Ohio 73), Springboro, Ohio at 7:00 PM. For more information contact Mark Meece at 937-743-8089 or e-mail at <antennapig@siscom.net>. For additional information about MONIX, check out their web site at http://www.siscom.net/~mmeece/monix.html
- Mar 3-4, 2006 Convention. The 19th Annual Winter SWL Festival, sponsored by NASWA, will be held at the Best Western—The Inn at Towamencin (Kulpsville to the rest of us), located at Exit 31 on the Northeast Extension of the Pennsylvania Turnpike, on 3rd and 4th March 2006. Richard Cuff and John Figliozzi co-chair the organizational committee. Of course, it's never too early to begin planning. Watch the pages of the Journal for registration information and other pertinent details. See you there!
- May 4-7, 2006 50th Julilee DX Camp and Convention. The Danish Shortwave Clubs International (DSWCI) will hold its 50th year Jubilee with a DX Camp and AGM on 4-7 May 2006 at the beach resort of Vejers near the westernmost point of Denmark at the Scout camp. The DSWCI is preparing a large program of activities which include: a DX-Camp from Thursday afternoon throughout till Sunday morning; a cultural tour on Friday to the town of Varde including an Danish painting exhibition; various historical exhibitions and publications about the DSWCI are planned; the Annual General Meeting Saturday morning; some of the founders and old-timers will be invited; various DX-related lectures Saturday afternoon; special DX-broadcasts and a Jubilee Dinner Saturday evening. More details, including participation fee, will be forthcoming at a later date. Non-member DXers and broadcasters are welcome.
- Aug 19, 2006 2006 Madison-Milwaukee Radio Get-together. The 13th Annual Madison-Milwaukee Get-together for oxers and Radio Enthusiasts will take place in Milwaukee, wi on Saturday August 19, 2006, with Tim Noonan hosting. Please contact Tim at dxing2@aol.com for additional information Further information will appear in the Journal as the event draws near.
- Sep 1-3, 2006 Convention. The National Radio Club and the DX Audio Service will hold their annual convention at the Best Western in Akron, Ohio on 1-3 September 2006. Room rates are \$68.00 per night. More information to follow.
- Mar 9-10, 2007 Convention. The 20th Annual Winter swl Festival, sponsored by NASWA, will be held at the Best Western—The Inn at Towamencin. Join us for this 20th anniversary extravaganza in the DX Mecca.

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: rdangelo3@aol.com) or Ralph Brandi (Internet: ralph@brandi.org).

Musings

This column provides a forum where members can express comments, ideas, and thoughts about NASWA or the SW radio hobby. Please feel free to comment on anything presented this month (or previous months). Opinions expressed here are are solely those of the submitters. Please submit all Musings to Richard A. D'Angelo, 2216 Burkey Dr., Wyomissing, PA 19610 or via email: rdangelo3@aol.com.

Terry Klasek <taklasek@sbcglobal.net>, Hazelwood, Missouri

Dit -dit - dah - dit -dit, Flash! Hello DXers!!

I spent three hours over at Earl Higgins home this morning. We talked about all kinds of things as I showed up to pick up two boxes of old DX mags he wanted to dispose of.

Imagine my surprise as the first zine I pulled out was a DX News (NRC) from 1982, and it had a musing from me in it!! Ernie Cooper titled it, "Terry's Loop is Pooped!" I miss 'ol Lefty, and his wry wit!

In the course of our talking Earl was suggesting that he would like to have a DX get - together at his place in a month or two. I volunteered one of the zany films I was involved in making, and I can bring some old QSLs. If need be I can help cook, Bar-B-Que or help get snacks ready.

Anybody interested in getting together in the Saint Louis area?? Should be a real BLAST!
- I will bring a complete set of SLIDX newsletters, and they are froth with humor!

Cheers to all! Terry

Toshi Ohtake <ohtaket@yahoo.co.jp>, Tokyo, Japan

NHK terminated its domestic short wave relay. According to NHK Engineering Head Quarters, termination of domestic short wave relay was decided in March and actually terminated by the end of May. NHK had been using the relay for almost 60 years, but satellite link and quality land line were more reliable and convenient these days, so all relay was terminated. Just for your record, the terminated relays are:

Location	Power	(W)	Mod	Carrier Freq (kHz)
Sapporo (Ebe	etsu)	6 0 0	DSB	3970.0 6005.0 9535.
Tokyo (Shob	u)	900	SSB	3607.5 6175.0 9550.
Nagoya (Nab	eta)	300	SSB	3970.0 6005.0 9535.0
Osaka (Mihai	ra)	300	SSB	337375 5428.0 9181.0
Fukuoka (Ka	suga)	300	SSB	3259.0 6130.0 9535.0

HCJB will resume Japanese service from HCJB Australia. Mr. Ozaki of HCJB Japanese Program announced the Japanese service would be resumed this year using Australian transmitter.

This will be weekend only and morning transmission. On September 25, meeting with Mr. Ozaki and Mr. Dennis Adams, Regional Director of HCJB World Radio Asia Pacific was held in Tokyo.

According to Mr. Adams, resumption of the Japanese Service is dependent on availability of the second transmitter of HCJB Australia, which is being transferred from Ecuador to Australia. It is most likely sometime in December. The antenna will be the same one currently used, so the beam will be East Asia direction targeting China, not to Japan. In the future HCJB Australia will deploy new antenna system to be installed in the land in North adjacent to the current antenna site upon a lease agreement. At that time more efficient antenna system with Japan and much more target beams will be built.

This is all for this month. Wish you good DXing!! Toshi

Scott Walker <n3sw@arrl.net>, New Cumberland PA

This is a query I put out on the Ten-Tec mailing list a while ago. No hams who own this receiver responded, so they must be 100% satisfied with their RX-340s. I thought you might run it in "Musings" just in case some shortwave users would agree with me and respond. Thanks.

To any Ten-Tec RX-340 owners: Are you, as I am, somewhat disappointed that there seems to be no new features being released for this receiver? I have emailed TT asking for a Noise Reduction feature similar to the one in the Omni VI but was told there is nothing in the pipeline. Why should I have to use an outboard NR box when I own a state-of-the-art DSP-based and upgradeable receiver? They even put two "Opt" buttons on the front panel for what I assume were anticipated enhancements, but...

Maybe if they got many requests, they would reconsider updating the feature set for the 340? What would you like to see as new features?

Scott Walker

Doug Robertson, 4045 Sunset Lane, Oxnard, CA 93035-3950

David McLaren and Bob Fraser have been concerned with the future of Sony Worldband radios in recent Musings letters. On 22 September, 2005 Sony detailed a major restructuring plan, aimed at turning around the struggling electronics and entertainment business. Sony announced a new strategy to reallocate resources suggesting it would look to trim its product lineup or downsize poorly performing businesses.

Welsh-born Howard Stringer, Sony's new CEO and the first foreign born Sony CEO who took the reigns in June, and President Ryoji Chubachi face formidable challenges in reviving Sony's core electronics division which bled red ink the last two years due to intense price competition.

The announced reorganization will axe 10,000 jobs and 11 plants, shrink or eliminate 15 business categories. Stringer's actions are meant to cut costs, speed new products to market and better coordinate separate business units. A completely different Sony is expected to emerge. They intend to focus on three core units: electronics, games and entertainment. Most of the action will target the electronics business, which accounts for 70% of Sony's sales. Sony will merge many semiautonomous electronics divisions and put them under the direction of a few top executives.

Sony expects to shed its old brand image and become something more exciting. They intend to leave the consumer electronics business and become a digital company competing against computer vendors. They have identified high definition video products, mobile devices, and their superfast Cell chips to differentiate products from rivals. TVs, digital imaging products, portable audio and DVD recorders are to be the focus areas. They expect their next-generation DVD Blu-ray disc to be key to the company's future.

In the face of the bold plan to save the company, can Sony's small volume, slow selling Worldband radios survive? Doubtful. But stay tuned.

73, Doug

Al Quaglieri al@alcue.com, P. O. Box 888, Albany, NY 12201-0888

Ah, lawyers: the true face of DRM. At its root, DRM is no more than a marketing initiative for a proprietary codec.

As much fun it is to twiddle around your radio's innards to (maybe) decode a DRM broadcast, as many broadcasters get bamboozled into implementing an unproven technology, as many glowing press releases are issued about how the marketplace will soon be awash in cheap all-mode receivers, at the end of the day DRM's primary goal is to enrich its creators.

It's all pie in the sky. Listeners who want to hear DRM broadcasts apparently have to be within eyeshot of the transmitters, as multihop propagation—the backbone of international broadcasting—seems to render DRM unlistenable.

Until I see evidence to the contrary, I will continue to contend that all the DRM listeners in the world would comfortably fit inside a high school gymnasium, with room left over for a basketball game.

Meanwhile, the HF bands continue to become polluted with wideband DRM QRM, all for the sake of anticipated profit.

Here's wishing the entire enterprise an unceremonious and costly demise.

. Al Q.

Steve Rosenblatt <SMR1000@aol.com>, Cleveland, Ohio

Over the past month, I spent a lot of time on the internet learning about antennas. I set up a great longwire antenna in my backyard. Quite frankly, I was so proud of my new project and I was anxiously awaiting the DX season. Just this morning, I received a letter from the homeowner's association notifying me that I must take down the antenna. Needless to say, I am absolutely livid. It is a simple wire and not at all unsightly. In this day and age, I am just appalled that this obviously upset one of my neighbors. Dx'ing gives me such enjoyment and I'm really pretty unhappy about this decision.

Do you have any ideas about another type of antenna?? I guess I could use a DX Sloper, but my backyard isn't really perfect for this. However, this may need to be my next step. Is there any other type of antenna that would work in this situation. Are there any kinds of indoor antenna which work well?? I only am interested in DXing, so I'd need to use something that is useful for far-away signals. In the age of ebay, etc, I'd go so far as to say that price (within reason) isn't an issue.

I really would appreciate any advice that members could give me. After years of surgical training, I finally have returned to SWL and I don't intend to let a couple of shallow neighbors keep me away.

Thanks so much for your help!! Steve

Lawrence H. Bulk klibcomm@joimail.com, 138 Dogwood Drive, Mullica Hill, NJ 08062-1909

I read Alan Johnson's review of the Wellbrook ALA 330S Active Loop Antenna in the October 2005 issue with a great deal of interest as I own two of them I use one with my AOR AR7030 Plus and the other with my Grundig Satellit 800. I have both of them mounted in my attic at opposite ends and they are both mounted on Radio Shack TV rotators.

Obviously, I like them very much and I have to say that I found this review to be right on the mark. I hope it encourages others to give this antenna a try. I know that most people don't like to buy a "pig-in-a-poke," especially when it is costly, but I hope that SWLers who are plagued with electrical noise at their location or who find atmospheric noise a major problem in the summertime will give this antenna a try. I believe that they will find it well worthwhile even as a supplement to a passive wire antenna. It's the best shortwave antenna I have personally experienced.

I would like to make a couple of comments: It's a pity that Mr. Johnson didn't investigate The Shortwave Shop. Andy Ikin prefers customers to buy through them (they are his only distributor other than he himself) as he would rather have them handle the billing/shipping logistics. The Shortwave Shop does indeed take credit cards I bought both of my Wellbrooks from them. I telephoned them as one would telephone any US mail-order shop (just remembering the time difference), gave them my CC number, address information, etc., and got the ball rolling. My first antenna came in less than two weeks; the second one took rather longer as Andy Ikin was really backed-up at that point. I found both Andy Ikin and Rob Burrows, the owner of The Shortwave Shop, to be considerate, helpful, and VERY enthusiastic. (The Shortwave Shop's telephone number is 011 44 1202 490099 - my long distance service charges 5¢ per minute to the UK.) No \$25.00 bank draft charge and a much easier ordering process!

I have told Rob Burrows that he really needs to upgrade his web site to permit secure ordering. He has been promising me that he would "shortly" do this; I've been waiting almost two years! Maybe if enough people tell him this should be done, he will finally get around to doing it. But ordering via telephone is certainly not difficult.

I also bought my AOR receiver from him; he, unlike the US distributors of that radio, was willing to work with me and AOR UK to allow me to buy a factory-customized radio.

Another comment I would like to make is that, if one is mounting the antenna in an attic or a sheltered outside location, the steel plate can be mounted directly to a piece of PVC pipe; as that pipe "gives," the steel plate will essentially re-thread the pipe. It worked fine for me. In an attic one can use Radio Shack's inexpensive TV Rotator (\$75.00) and its cable (\$15.00); this works very well.

Finally I would like to mention that a spare power supply and spare fuses can be easily and inexpensively purchased from Allied Electronics (remember them?). They're on the web and you can also telephone them. The power supply is a Stancor STA-300R and is Allied's stock number 928-9895 and the fuses are Littelfuse Part Number 218.315; Allied's stock number is 845-0067. I paid \$10.72 for a spare power supply and \$1.44 each for a few spare fuses (note that Andy Ikin supplies a couple of spare fuses with the antenna).

Thanks again for a great review and a great magazine to which I look forward every month.

Lawrence

Jerry Lineback <jalinebk@satelephone.com>, 506 S. Lawrence, Scranton, KS 66537

I thought I would let everyone know that there has been a 180 degree change in my plans. My fiancée left her job in San Francisco and will now be working for Dartmouth College in Hanover, NH. Before moving to California two years ago, she lived for several years in Deerfield, MA, and is happy to be back in New England. We have rented an apartment in Lebanon, NH. She started her new job on 17 October. I will follow after the first of the year. While dates have not been chiseled in stone, I hope to be there before March and may be able to attend my first Winterfest.

We most likely will be moving to a house in late 2006. Until then, my DX/ham shack will be the cab of my truck out in the parking lot. I would be interested in making contacts with individuals and shortwave groups in New England and nearby areas.

Although I still have the 315-degree Beverage up, my radio-time has been severely limited by sorting, packing, and mowing the grass. Near record rainfall has provided an abundant supply of the green stuff this summer.

My prime 10-acre DX property is still available, any takers?

Jerry

Ron Howard <howard@redshift.com>, Carmel, CA

Greetings from Monterey.

Having recently enjoyed hearing Sarawak FM (7130//5030 kHz), I thought it would be fun to attempt to make contact with some of the station's staff, via e-mail, by utilizing the extensive listing of e-mail addresses at their web site (http://www2.rtm.net.my/rtmsarawak/contact.htm). Not with the aim to get a traditional QSL (hoping my mailed report might do that) but mainly just to let them know that someone in America has enjoyed listening to their programming and to see what type of general response I could elicit. Their national language was not that easy for me to work with, resulting in my e-mail to them only including a few miscellaneous words in Bahasa Malaysia, plus to be somewhat culturally sensitive, I included "Ramadan Mubarak" (Arabic for "May your Ramadan be blessed.") and a full sentence asking if they understood English, with the remainder of my e-mail in English. Because of the language factor, I did not know what to expect in the way of how many would take the time to respond to me. Sent 25 individual e-mails, with one that bounced back, [AtikahMahli@yahoo.com], being either disabled or discontinued.

Within a period of one week I received four e-mails: Sent an e-mail to "Jai," who responded from an e-mail address of "Atun Ahmad Ibrahim [puteri_jengking@yahoo.com]," with a nice "terima kasih" (thank you) note in Bahasa Malaysia and she asked if I knew their language.

Izah Faezah [ezahswkfm@yahoo.com] responded with a brief note in a mix of simple English and Bahasa Malaysia and she wished me a "Happy Ramadhan."

Azaz Azmi responded from an e-mail address of "sulaiman adam [adamjust@yahoo.com]," with a note all in English: "I'm so glad that you're listening to Sarawak FM. I hope we keep in touch and I would like to hear more from you (about yourself)." He also included information about their web site.

Saiful Arini W., who mailed from "Arini Saiful [syaiary@yahoo.com]," wrote not from Sarawak but from Kuala Lumpur (Nasional FM, Tingkat 2 Selatan, Wisma Radio, Angkasapuri, 50740 Kuala Lumpur, Malaysia, phone 03 22849776) and indicated "I'm very sorry to reply to your email in the Malay/Malaysia language. And as a Malaysian I should be proud of my mother tongue and I feel proud to know that you had wrote one sentence in Bahasa Malaysia. Thanks a lot." Interesting linguistic nationalism. His e-mail provided information about the various Sarawak stations, in Bahasa Malaysia, with basically the same information as provided at the Sarawak FM web site. Wrote that if I ever came to Kuala Lumpur, to give him a call.

All of them wished me a Happy Ramadhan, so I responded by sending them a Ramadhan Malaysia greeting e-card (via a Singapore web site), with a simple "terima kasih" message. Was an interesting experiment and all in all, the results were fine.

Ron

Richard A. D'Angelo <rdangelo3@aol.com>, 2216 Burkey Drive, Wyomissing, PA 19610

As the day light periods shorten and the weather begins to cool down, it is time for planning a few DX peditions for the coming season. We are tentatively scheduled to visit French Creek in mid-November and again around the third week of December. A final DX pedition should happen in late January. As always, I am looking forward to these French Creek DX peditions. They provide a nice alternative DX venue with solid time behind the dials without the usual household distractions.

A quite month on the QSL front with nothing too exciting happening in the mailbox this month. Radio Free Asia finally released cards that have the 18th Winter SWL Festival theme. We heard about these from AJ at the last FEST but there was quite a backlog of reports to clear out resulting in the delay. The Radio Polonia verification was for a follow up report. They seemed genuinely friendly and somewhat disappointed that I didn't get a reply from them for my first report.

73, Rich

FRENDX: Twenty-Five Years Ago (November 1980)

Roll Call introduced 54 new and re-joining members including Kirk Trummel and Terry Klasek. Don Jensen was elected to fill the vacant Executive Council seat. A total of 209 ballots were cast with Don receiving 96 votes and runner up Tom Alleman 63 votes. The revised NASWA Radio Country List & Awards Program booklet was available from HQ for \$1.00. In the Shortwave Center, editor John Moritz presented features by Pitt McNeil (Records of Central Andean Music), Bob Foxworth (Dream Shack), Bill Whitacre (Pirates: There is a Difference) and Ralph Perry (Sumatran RRI's). In Listeners' Notebook, editor Glenn Hauser carried a report on Joseph Costello and his plans to launch commercial shortwave station WRNO. Members receiving awards from Dan Henderson included Michael Hardester, Paul Buer, William Krause, John Kapinos, Dave Valko, Bill Taylor, Rowland Archer and Kevin Mikell. In the QSL Report, editor Sam Barto noted 108 countries were reported. Don Erickson was taking pre-publication discount orders for the 1981 World Radio TV Handbook for \$15.00. In Frendx Credits, editor Gregg Bares noted 70 reporters contributing. Among the faithful were Brian Alexander, Rowland Archer, Grgg Bares, Ray Baurenhuber, Ernie Behr, Charles Bolland, Paul Buer, Vlad Cucura, Larry Cunningham, Richard D'Angelo, Marlin Field, John Fisher (MA), Bob Fraser, Glenn Hauser, Charley Hoffman, Jerry Lineback, Don Moore, George Poppin, Steven Reinstein, Harold Sellers, Dave Valko, and Richard Wood.

BBC World Service Developments

Transforming the BBC World Service for the Digital Age

This past week, the BBC World Service announced changes in making as it transforms itself for the media world of 2010. The BBC will be cutting 10 language services, and using the resulting savings to fund the development and launch of an Arabic language TV channel in 2007. Most of the languages to be eliminated are Eastern European languages; Thai is also one of the languages to be eliminated.

Thankfully, English will remain a "core language" for the BBC world service. This doesn't mean there won't be changes in the BBC's English-language services in the years to come, however. Music and entertainment services will be deemphasized: previous information indicates that music and entertainment services will be moved to the weekends. His strategy is the result of audience research indicating that news and information services were valued services provided by the BBC. Shortwave use will continue to decline, as the BBC believes the most effective way of serving listeners in developed countries is via FM in major cities.

The BBC sees its target North American audience as "decision-makers and opinion formers", the same term applied to the North American audience when shortwave services were reduced in 2001.

These changes were deemed necessary because the Foreign & Commonwealth Office—somewhat like the US State Department in mission—wouldn't offer additional budget for the BBCWS to launch this new Arabic television service. The BBCWS felt this Arabic TV service was more important than these Eastern European radio services, so they took the hit.

BBC seasonal changes

Thankfully, there aren't overwhelming changes in the B-05 schedule for the World Service. Shortwave frequencies in North America will not change, nor will their times of use be changed. However, the one-hour time shift that has become standard for 2200–0400 UTC will continue. For example, *The World Today*, which aired at 0200 during the summer, will now air at 0300. The shifting of entertainment programming to the weekend will not happen until March 2006.

So, here's what to expect from the BBC's scheduling on shortwave targeting the Caribbean and the Americas:

0000-0100 5975 (Montsinery) Sun—Top of the Pops; Mon—Documentary 1, Sports International; Tue-Sat—Outlook, Off the Shelf

0200-0300 5975 (Montsinery), 9825 (Skelton), 12095 (Ascension) Sun—Play of the Week; Mon—The Ticket; Tue—Health Matters, The Word; Wed—Go Digital, Everywoman; Thu—Discovery, Sports International; Fri—One Planet, The Interview; Sat—Science in Action, Heart & Soul, The Instant Guide

0300-0400 5975 (Delano) Sun—From Our Own Correspondent, People & Politics; Mon-Fri—The World Today; Sat—Assignment, Charlie Gillett

1000-1100 6195 (Montsinery) Sun—From Our Own Correspondent, Reporting Religion; Mon-Fri—World Update; Sat—Global Business, The Interview

1100-1200 11855 (Montsinery) Sum—Documentary 2, In Praise of God; Mon-Fri—Caribbean Report, Caribbean Sport, Caribbean Magazine, Analysis, Sports Roundup; Sat—World Briefing, World Business Review, Sports Roundup

1200-1300 11855 (Montsinery) Sun—Newshour; Mon-Fri Caribbean Business, Caribbean Report, Caribbean Magazine, Newshour; Sat—Newshour

1200-1300 9605 (WYFR-Okeechobee), 15190 (Bonaire)—*Newshour*

2100-2130 15390 (Greenville, NC USA) Mon-Fri (only)—Newshour

2100-2200 11675 (Montsinery) Sun—Newshour; Mon-Fri—Sports Roundup, Caribbean Report, Newshour; Sat—Newshour

2200-2300 5975 (Montsinery) Sun—Documentary 2, In Praise of God; Mon—Health Matters, The Word; Tue—Go Digital, Everywoman; Wed—Discovery, Sports International; Thu—One Planet, The Interview; Fri—Science in Action, Heart & Soul, The Instant Guide; Sat—Play of the Week

2300-0000 5975 (Montsinery) Sun-Thu— The World Today; Fri—The World Today, World Football; Sat—The World Today, Reporting Religion

In addition to these, following is a list of frequencies and times for shortwave transmissions targeting other regions that may be audible in the USA and Canada.

0300-0600 7160as (W. Africa) 0300-0700 11765sa (W. Africa) 0400-0700 6005as (W. Africa) 0500-0600 9410cy (W & S Europe) 0500-0700 6195g (W & S Europe) 0500-0800 9410g (N. Africa) 0600-0700 7160g (W. Africa) 0600-0800 9410g (W & S Europe) 0700-0800 11765as (W. Africa), 17830g (W. & C. Africa) 0700-1500 17640q (N. Africa) 0700-1700 15485q (N. Africa) 0800-2100 17830 (W. & C. Africa)-1000-1100 Sat-Sun only 1000-1600 9740sg (far east-generally audible in Western North America) 1500-2300 15400as (W. Africa)

Transmitter codes:

cy—Cyprus

g—United Kingdom (no transmitter specified)

sa-South Africa

sg-Singapore

Not all of these may propagate, of course...but these looked to be the most likely candidates.

Other frequencies in wide use globally are 6190, 11940, 15310, 17790, 21470; they're in use somewhere at least 12 hours/day. Unfortunately, with the reduction in shortwave hours to Europe from last March, one can no longer make the same blanket recommendation regarding 6195, 9410, or 12095.

The End of Outlook

It was also recently announced that *Outlook*, the 45-minute daily magazine / human interest program, will end production in March 2006. The BBCWS has stated that this genre of program will continue, but apparently the new program will be different enough from *Outlook* that it's worth the trouble to come up with a new program name. Frankly, I'm skeptical—the *Outlook* program has been a long-revered component of the World Service schedule, and to abandon that name seems like a waste of brand equity.

RCI Frequency and Programming Changes

Listening to Radio Canada International in the evenings has been difficult for the past year, as the traditional early-evening (2200–0000 UTC) timeslot was abandoned for later times, and the frequencies chosen didn't propagate well to much of Eastern North America. Good news—the B-05 schedule brings a restoration to early evening programming from RCI, with, it's hoped, more usable frequencies than before. Additionally, some of the domestic CBC programming that RCI retransmits to North America is leaving the air, which will necessitate some other changes.

First off, here are the new transmission and programming schedules for broadcasts targeting North America, plus those targeted elsewhere that should be audible in Eastern North America:

0000-0200 9755 kHz: Sun—The World This Weekend, Madly Off in All Directions, Global Village; Mon—The World This Weekend, Maple Leaf Mailbag, Writers & Company; Tues-Sat—The World At Six, As It Happens

1400-1700 9515, 13655, 17820 kHz: Sun—The Sunday Edition; Mon-Thu—The Current, Sounds Like Canada, Outfront; Fri—The Current, Sounds Like Canada, C'est La Vie; Sat—The House, Vinyl Café, Quirks & Quarks

1800-1900 17740 kHz (targets Africa): Sun—Maple Leaf Mailbag, Spotlight; Mon-Fri—Canada Today, followed by Mon—Media Zone; Tue—The Mailbag; Wed—Spotlight; Thu—Business Sense; Fri—Scitech File; Sat—Business Sense, Scitech File

2100-2300 15180 kHz: Sun—Cross Country Checkup; Mon-Thu—Freestyle; Fri—Talking Books, Freestyle; Sat—Definitely Not the Opera. Freestyle is replacing Roundup—Host Tetsuro Shigematsu announced that Freestyle will begin on Nov. 7 on CBC's domestic services; no one at RCI knows exactly what this new program will be about.

2100–2200 9770 kHz (targets Europe): See the programming for 1800 UTC 19770 kHz; only change is that *Canada Today* will be the European version; the 1800 edition is produced for an African audience.

2200-2230 11990 kHz (targets South America): Sun—Maple Leaf Mailbag; Mon-Fri—The World At Six; Sat—Madly Off in All Directions

2300-0000 6100 kHz: Sun—The World This Weekend, Maple Leaf Mailbag; Mon-Fri—The World at Six, As It Happens; Sat—The World This Weekend, Madly Off in All Directions The services I've shown that target other than North America are for frequencies originating in Sackville. Provided the frequencies are propagating at that time, they should be reasonably audible in North America.

Speaking of the CBC, there's no word yet on when the Sirius and XM satellite radio offerings will officially be launched in Canada, though both companies state it will be "in time for the holidays". Sirius continues to state that they expect the CBC Radio One service to be available to existing USA subscribers as well. This will take me back to my younger days, when Toronto's CBL / 740 was a regular visitor—days and nights—to our suburban Buffalo, NY home.

Radio Netherlands Shuffles Too

There are a few programming changes coming up at RNW, even though broadcast times and frequencies to North America aren't materially changing.

Added—Saturday Connection; Dropped—Europe Unzipped, Wide Angle and Insight. Saturday Connection is a new series, produced by the Newsline team, that will be a "lighter-in-feel" news analysis program, like Newsline, but with some listener feedback added. Like Newsline, there won't be a permanent host, at least not yet.

Moved and lengthened—Amsterdam Forum. With the debut of Saturday Connection, Amsterdam Forum will move to Sundays and will be lengthened to 55 minutes. I respect this program because it's tackled some thorny issues that North American stations would not deal with as forthrightly—for example, the role of religion in society—due to their sensitivity.

Moved—Vox Humana. With the repositioning of Amsterdam Forum to Sundays and UTC Mondays, Vox Humana, yet another fine documentary-oriented program focusing on human interest themes addressing the heart more than the head, moves to Saturdays and UTC Sundays.

Radio Prague for the winter

I might be partial to Radio Prague—because my brother-in-law and his family live in the Czech republic—but I consider Radio Prague's English-language broadcasts generally to be the best-crafted broadcasts originating from the former Warsaw Pact countries. Radio Prague has made some slight modifications to their weekly schedule; here's what you can expect each day for the Winter 2005–2006 season. Note that the programs for a given day air in the evening programs targeting North America at 0100, 0200 and 0400 the next UTC day.

Sun—Mailbox—answering letters, e-mails and phone calls; Letter from Prague—a personal view of life in and around the Czech capital; Encore—A monthly look at what's going on in the world of Czech classical music; Magic Carpet—music that goes beyond the borders of different genres—also once a month; Czech Books—Czech writing today—once a fortnight.

Weekdays—Each weekday broadcast starts with a news bulletin followed by a current affairs program; following these are the following feature programs:

Mon—One on One—an informal interview show, where you have the chance to meet some of the most interesting figures in Czech life today.

Tue—Talking Point—a closer look at the issues—big and small—shaping the day-to-day lives of people in the Czech Republic.

Wed—Czechs in History—remarkable people and events in the history of the Czech Lands (once a month); Czechs Today—a Who's Who of personalities shaping contemporary Czech society (also once a month); these alternate with the biweekly Spotlight—a popular feature in taking us to different corners of the Czech Republic.

Thu—Panorama—A look at interesting social and cultural developments beneath

the surface in the Czech Republic today; *Czech Science*—everything about Czech science, past and present (once a month—now at full feature length)

Fri—Business Briefs—the latest business news; The Arts—reports on the rich cultural life of a country in the heart of Europe.

Sat—Current affairs omitted, replaced with Magazine—The show that starts where the news ends—bringing the stories you might otherwise have missed; ABC of Czech—unraveling the mysteries of the Czech language; One on One—another chance to hear Tuesday's interview.

On Saturday evening and Sunday morning, at selected times (2230 Sat, 2330 Sat, 1400 Sun), Radio Prague broadcasts *Insight Central Europe*, the Central European current affairs magazine, produced in Prague in cooperation between Radio Prague, Radio Slovakia International, Radio Polonia, Radio Hungary and Radio Slovenia International:

Frequencies targeting North America: 1400–1429, 21745 kHz; 2100–2127, 5930 kHz; 2230–2257, 5930 kHz; 2330–2357, 5930 and 7345 kHz; 0100–0127, 0200–0227 and 0400–0427, 6200 and 7345 kHz. Website, with extensive on-demand and live audio: http://www.radio.cz.

Non-Shortwave Suggestions

Ireland—Seascapes

I've mentioned RTE Radio 1 before—Ireland's national spoken-word radio service. There are plenty of treasures there that are now available to us via the Internet courtesy of live and on-demand webcasting.

Folks who have been listening to the BBC World Service for 20 years might remember *The Seven Seas*—this was a quaint, 15-minute weekly program on maritime issues. That program morphed into *On The Move*, which concerned itself with transportation issues in general, and then left the air.

RTE Radio 1 still offers a weekly program on maritime topics, called *Seascapes*. This program provides comprehensive coverage of all aspects of the marine sector, presented by Tom MacSweeney, RTE's Marine Correspondent. *Seascapes* invites listener contributions. The 24-hour *Seascapes* phone line—+1 353 1850 715 170—is always open for listener views on maritime matters, or you can e-mail seascapes@rte.ie.

Following the autumnal time change, Seascapes will air at 1930 UT Thursdays, with a repeat Saturdays 0530. Each week's edition is available via on-demand webcast until the next week's edition; you can also listen live online as well.

New Zealand-Nine to Noon

With Radio New Zealand's National Radio now webcasting more of its programming live and on-demand, here's a chance to hear programming during a time of day when Radio New Zealand International—the international service—does not propagate well to North America. Nine to Noon is a magazine-formatted program, airing weekdays locally from 9 AM to 12 noon (!) that investigates everything from hard news to lifestyle issues, with the help of newsmakers, overseas commentators and correspondents, fellow journalists, experts in every imaginable field, writers, reviewers and ordinary New Zealanders. The program gets noticeably lighter in tone and content as the New Zealand morning progresses. For an international audience, the feature airing at 9:45 AM New Zealand time-2045 UTC-may be the most interesting because it's an interview with an international correspondent—the location of which rotates daily, National Radio's USA-based correspondents are interviewed on local Wednesdays (UTC Tuesdays).

Nine to Noon is available on-demand, parsed by program segment (see below); the last 25 minutes of the program air on RNZI at 2235 UTC.

RNZ's *National Radio* has its new website online

I've been watching this for several months; Radio New Zealand's National Radio, the spoken-word public radio service similar to Australia's Radio National and the BBC's Radio 4, has finally launched their new website (http://www.radionz.co.nz) and has increased the availability of live and on-demand audio. The live audio remains available around the clock, as had been the case during the testing period; 'round the clock live audio is now provided for Radio New Zealand International as well.

I frankly don't think some aspects of the new website are optimally arranged; for example, audio for *Checkpoint*, the two-hour evening current affairs program, is only listed by individual story; you can't simply click once and listen to the entire program from start to finish. I've been in dialogue with the RNZ webmaster, who says he's working on a fix for this inadequacy; he has invited me to be a beta tester once he has the web code in place. Also, the most recent audio for a program isn't always listed on the information page for that program; the audio for many programs can be found by searching the "Find Audio" link.

Despite these shortcomings, it's good to see National Radio join the ranks of the world's best English language spoken-word public service broadcasters (now there's a mouthful) with comprehensive live and ondemand audio availability.

RNZI changed its frequencies effective October 30th; those audible in North America should include 0400-0759, 15720 kHz; 0800-1059, 9885 kHz; 1100-1259, 15530 (probably not the greatest—beam is away from the USA); 1300-1650, 9870 kHz.

Until next month, 73 DE Richard

Shortwave Center

John Figliozzi • 45 Algonquin Rd • Clifton Park, NY 12065 • jfiglio1@nycap.rr.com

This month we have but one article for you. The good news is that it is a new one penned by one of our members, Eric Bueneman. It's an analysis/opinion piece on DRM and its prospects for the future. It should generate some discussion among the membership here in Shortwave Center or in the Musings section. (At least I hope so.)

The bad news, of course, is that there's only one this month. Now might be a good time to explain the difference between a club bulletin like *The Journal* and a magazine like *Monitoring Times*. A magazine can pay its writers and the money paid to receive it is called a subscription. A club bulle-

tin, on the other hand, depends on the voluntary efforts of the club membership and the money paid to receive it is called a membership fee. Frankly, without both your monetary and intellectual support the club—and its bulletin—cannot succeed.

Won't you consider contributing an article to *The Journal*? We'd really like to have you be a part of it. And wouldn't it be neat to see your byline and your words in the best darn club bulletin on the planet? You betcha!

Happy Thanksgiving and we'll look forward to a *Shortwave Center* next month with much more of what we all like. You!

DRM is not The Answer to Shortwave's Woes

By Eric Bueneman (NØUIH)

Over the past several years, an unproven technology has made the rounds on the shortwave bands called DRM, or Digital Radio Mondiale. Their proponents claim that it will save shortwave and medium wave (AM) radio. Well, I have some news for you. DRM will not save shortwave broadcasting; it will make matters much worse.

American broadcasters are testing a similar, unproven system called "HD Radio," in other words, in-band, on-channel digital audio broadcasting, or IBOC-DAB. So far, IBOC has been a disaster, proving that digital radio signals cannot fit into such a small slice of radio spectrum. On the medium wave band (530-1700 kHz in the United States), if your local AM station broadcasts in this format, expect at least 60 kHz of spectrum (30 kHz either side of the main channel) to be wiped out by digital sidebands. It's worse if you're close to the transmitter site; as much as 100 kHz of spectrum (50 kHz either side) either suffers from massive interference or wiped out entirely. On the FM band (87.9 to 107.9 MHz in the u.s.), the damage is just as bad: 600 kHz of spectrum (300 kHz on, either side of the center channel) is wiped out by digital sidebands.

The amount of spectrum wasted by DRM is generally 30 kHz (15 kHz on either side of the main channel). For example, let's look at the early evening DRM transmissions via Radio Canada International's Sackville relay on 9800 kHz. First of all, the typical shortwave receiver is not equipped to decode DRM transmissions. Therefore, all you get is digital hissing sound effects. The DRM transmissions from the Sackville relay station not only wipes out 9800 kHz, but makes the portion of spectrum 15 kHz either side of the main channel (a stretch of radio spectrum between 9785 and 9815 kHz) is wiped out by the DRM sidebands coming from Sackville. And without special circuitry, the average shortwave listener, even on a car radio with a shortwave converter (such as the MFJ-306) cannot decode the DRM broadcast.

The one thing that DRM and "HD Radio" have in common is that the sound quality leaves

something to be desired. Have you listened to an Internet radio station via dial-up modem? This is exactly what digital signals, regardless of where they come from, sound like when the signal strength is reduced. Unlike with analog radio, in which you can still hear notes or verses of a song or a word of a sentence when signal strength declines, a digital audio signal will not allow you to hear those missed notes, verses or words that you can still hear on analog radio. In fact, you can miss a group of notes or a whole verse of a song, or even an entire sentence or paragraph of spoken word, when the signal strength of a digital radio station is reduced. That will make the listener frustrated to no end. And what about the listener without the means to decode DRM broadcasts? He or she is left out in the cold.

DRM is definitely not the answer to the woes of shortwave radio, nor will it "invigorate the band," as proponents claim it will. One alternative way that shortwave radio can be reinvigorated is with an aggressive promotional campaign. Promoting shortwave radio, especially as an alternative to corporate-controlled medium wave and FM radio, has been one thing that shortwave *broadcasters have failed to do, especially in more localized print media like the local newspaper. The world's shortwave broadcasters missed a golden opportunity when the American commercial broadcast business became virtually unregulated in 1996. Since that time, commercial radio program quality has been on the decline. Shortwave broadcasters needed to promote the better quality of programming, more realistic viewpoints and better quality news programs than the corporate-controlled American AM and FM broadcasters are willing to provide. For those who only have AM and FM in their cars, the only alternatives available are independent commercial stations and non-commercial educational radio stations, including those who are member stations of National Public Radio (NPR) and/ or Public Radio International (PRI). XM and Sirius Satellite Radio doesn't offer much of an alternative, either; the cost is much higher for satellite radio than shortwave (\$10-20 per month for satellite radio, free of charge for shortwave).

Shortwave broadcasters also missed a golden opportunity to promote another advantage over AM and FM: superior signal coverage. For instance, let's look at the stations operating with 50,000 watts of power. For FM radio, this is half the maximum power allowed in some areas, while it is the maximum allowed in other areas of the United States, in terms of effective radiated power. The coverage on FM at 50,000 watts ERP is often limited to a 70-mile radius around the transmitter site. This is also the maximum output power allowed for AM broadcast stations in the United States. An American AM station can only cover a portion of the United States on 50,000 watts (four-fifths of the U.S., at the very most); the same amount of power would go much further on shortwave: virtually covering an entire continent with a clear signal. Even more powerful signals can bring a local-like signal to more places. For example, take the signal of the Radio Netherlands relay via Bonaire on 9845 kHz. When they broadcast in English to North America, much of the continent is blanketed with a local-strength signal. This is another advantage that shortwave broadcasters can use to promote the services they offer to the listening public.

In general, shortwave broadcasters have done a poor job in promoting themselves to the general public.

They have failed to exploit the better programming; If shortwave is to survive, it is with better promotion and a more active listener community.

Another alternative is to be politically active; one way to do this is to petition the Federal Communications Commission to require that all mobile receivers currently manufactured for the U.S. marketplace that currently receives AM and FM transmissions to also be able to receive at least four shortwave bands, preferably the ones most used by shortwave broadcasters. The only way one can receive shortwave transmissions in a mobile application is to purchase a shortwave converter, such as the MFJ-306. I've had some good listening experiences with that particular model. Had there been a good in-dash mobile AM/FM/SW receiver available in the U.S. marketplace (especially one with a CD player, auxiliary jack to plug in an MP3 player or public service band scanner, or even AM Stereo), I would have bought it in a second. Unfortunately, the minority rules at the FCC: they insist on feeding radio dominated by illegal "shock jocks" and extreme right-wing talk show hosts.

Broadcasters who have stopped targeting North America on shortwave or stopped shortwave broadcasting altogether have really suffered. For instance, take the BBC World Service. There is no reliable shortwave frequency available for listeners in North America. Most of the AM and FM stations carrying BBC World Service programming do so at a time of day when most people are sleeping. For example, the local BBC World Service outlet, KWMU (90.7 MHz), carries BBC World Service between 11:00 p.m. and 5:00 a.m. local time. More people would listen if they scheduled BBC World Service programming during prime-time hours or even 24 hours a day, seven days a week.

Deutsche Welle literally shot themselves in the foot when they discontinued broadcasts in English on shortwave to North America. Unlike with BBC World Service, DW programming is largely unavailable in the United States. Even though the same program distributor (Public Radio International) sends both BBC World Service and Deutsche Welle programming to U.S. stations, very few, if any, U.S. AM and FM stations have picked up DW programming; therefore, access to the U.S. marketplace is largely cut off. Before

DW dropped shortwave in English to North America, the Antigua relay regularly put a local-like signal into the central United States; ditto with BBC World Service.

Making matters worse is the corporate domination of the commercial radio industry in the United States. The largest AM and FM broadcasters, such as Clear Channel Worldwide, Infinity Broadcasting and Cumulus Media, prefer to air largely extreme right wing talk programming which espouse largely unrealistic world views, unlike the more realistic world views presented by the largest international broadcasters. The quality programming put together by international broadcasters would have found a much larger audience had corporate broadcasters sold several of their 50,000-watt medium wave stations to relay companies similar to VT Merlin, which would have used those facilities for broadcasters like the BBC World Service, Deutsche Welle, Radio Netherlands and Radio Japan to send their programs into a wider segment of the U.S. marketplace, especially at night.

Broadcasters who discontinued shortwave broadcasts altogether, such as Radio Vlaanderen International or Swiss Radio International, have largely cut off information on their countries to the listening public. Not everyone has Internet access; nor does everyone have a subscription to XM or Sirius Satellite Radio. Therefore, we'll never hear what's going on in Belgium or Switzerland without Internet access, or hear Deutsche Welle programming in the U.S. without buying a satellite radio subscription.

In general, shortwave broadcasters have done a very poor job in promoting themselves to the general public. They have failed to exploit the better programming and superior signal coverage; nor have we, as a community, pressured our communications authorities to give us the kind of receivers and access to programming we deserve. If shortwave is to survive, it is with better promotion and a more active listener community, not with a destructive technology like DRM. And that's the truth.

Kim's Column

Dr. Kim Andrew Elliott • 5001 25th St. North • Arlington, VA 22207 • ibcast@mail2kim.con http://www.kimandrewelliott.con

This column, with links, is available at this URL publicized only to NASWA members: www.kimandrewelliott.com/board.html

Hoping no one would notice?

The topmost authority of U.S. international broadcasting (VOA, RFE/RL, RFA, Alhurra, Radio Sawa, the Martís) is the <u>Broadcasting Board of Governors</u>. The BBG is supposed to be bipartisan: four Republicans, four Democrats, and the Secretary of State as an ex officio member. (In practice, the under secretary of state for public diplomacy—now Karen Hughes—attends the Board meetings.)

On September 6, President Bush nominated Mark McKinnon to fill one of the seats on the BBG. Mr. McKinnon was once a Democrat, might still technically be a Democrat, but more recently he was the communications director of the president's *2004 campaign and a staunch Bush ally. In kimandrewelliott.com, I wondered if Mr. McKinnon was nominated for a Republican seat on the BBG or a Democratic seat. The BBG spokesman would not respond to my question about this, because, he said, it was a White House nomination. I didn't think the White House press office would respond to the likes of me, so I put out an appeal to any journalist with the chops to look into this matter.

Finally, on October 19, the Washington Post's In the Loop column reported that McKinnon was originally nominated to take the expiring seat of Democrat Joaquin Blaya. After protests from Senate Democrats, including Joseph Biden, the White House switched the nomination to fill the seat of Republican Fayza Veronique Boulad Rodman.

Fayza who? Apparently, Veronique Rodman was appointed to the BBG by the president in 2003 during a Senate recess, thus sidestepping the Senate confirmation process. She was not reappointed at the end of 2003, so that Republican seat has—if I have this

right—remained vacant since then. Mrs Rodman is public relations director of the American Enterprise Institute and wife of a prominent Pentagon neocon.

The federal government has spawned many bipartisan commissions. The Bush Administration might be tempted to fill the Democratic seats on these commissions with Zell Miller type Democrats. And Democratic administrations have probably tried the vice versa. But in the case of the Broadcasting Board of Governors, bipartisanship is essential. It, in theory, prevents the Board from beckoning the content of U.S. international broadcasting to veer in one direction or the other. The audience would quickly detect the bias.

Ideally, the BBG should not only be bipartisan, it should also consist of respected journalists who appreciate the value of editorial independence. Even better, these journalists should have overseas experience so they know something of the role that international broadcasting plays in countries where the domestic media are deficient because of a poor economy, or government control, or both.

Perhaps the solution would be to give the Associated Press a five-year contract to govern U.S. international broadcasting. The AP is a cooperative of newspapers and other news organizations whose ownerships represent the spectrum from Republican to Democrat, conservative to liberal. It is also the largest newsgathering organization in the world, whose resources would allow U.S. international broadcasting to be competitive with BBC World Service and BBC World. The AP might balk at becoming associated with what many (mis)perceive as a U.S. propaganda operation. But the contract would be for five years, with no kibitzing by the government during that period. At the end of the five years, if the AP, or the government, or both, is not satisfied with the arrangement, it would end.

Speaking of Karen Hughes

As I type this, she is on her second "listening tour," this time to Indonesia and Malaysia. As with her first listening tour to the Middle East, she has been speaking at forums, where the audiences, instead of being swayed by her presentations, have given her earfuls of opposition to U.S. policies. And it is those statements against U.S. policies that capture the headlines and the prominent paragraphs in the news reports about Mrs. Hughes's visits.

What is the strategy here? Is it some sort of reverse psychology thing that only the senior circles of U.S. public diplomacy can understand?

During an appearance in Indonesia, she said that Saddam Hussein had gassed to death "hundreds of thousands of his own people." Actually, even though Saddam Hussein is responsible for some 300,000 deaths in Iraq, the number of Kurds who were gassed was about five thousand. That's a ghastly enough number, sufficient to have served Mrs. Hughes's rhetorical purpose.

During her previous trip, to the Middle East, she incorrectly told Egyptian opposition leaders that the phrase "one nation under God" is in the U.S. Constitution.

Now U.S. public diplomacy is not U.S. international broadcasting. The latter is in the news business, and it must be accurate to maintain its all-important credibility. Public diplomacy is more of a public relations activity, but credibility still counts. Mrs. Hughes's casual regard to the facts diminishes the effectiveness of U.S. public diplomacy, which is already in a very, very bad way.

The problem, I think, is that Mrs. Hughes and the two women who preceded her as under secretary for public diplomacy have been trying to reverse negative world opinion by hitting a PR home run out of the park. They would have been better off just trying to hit singles: slowly but steadily moving world public opinion about the United States, initially from "dislike strongly" to "dislike somewhat." That could make the difference between "willing to participate in violence against the United States."

This can be done by using public diplomacy to set the record straight wherever and whenever the facts about U.S. policies are distorted by disinformation. Hence the need to maintain credibility by keeping our own facts straight.

Also, Mrs. Hughes might consider staying in Washington and letting her interculturally savvy practitioners in the embassies do the listening. Based on what she heard in the Middle East, she arranged for Palestinian officials visiting Washington to (and to their great surprise) meet the president. She is famous for having the ear of the president. Getting the word about world opinion to the president before the administration takes actions that further antagonize publics abroad could be Mrs. Hughes's particular contribution to public diplomacy.

The VOA unions speak

On October 21, the Washington Times published a <u>letter</u> from the presidents of the two labor unions representing VOA employees. They were responding to a Times <u>editorial</u> about Radio Sawa and Alhurra. They wrote that U.S. international broadcasting, as "part of the public-diplomacy apparatus of the United States government," should "have its pollsters ask is whether Al Hurra's audience has changed its opinions about the United States."

As a dues paying member of one of those unions, I must respectfully disagree. For the sake of its credibility, U.S. international broadcasting was separated from U.S. public diplomacy by legislation in the 1990s. Audiences tune to U.S. international broadcasting to get news that is more reliable, comprehensive, and objective than their state controlled domestic media. Thus informed, these audiences are bolstered against disinformation and better equipped to form their own opinions about current affairs. This is a subtle and long-term process, and it probably can't be measured by polls showing opinions about the United States improving from year to year.

Views expressed are my own. More at kimandrewelliott.com.

FOR YEARS I'VE GRIPED about never having enough schedules on hand at the change of broadcast season...well, as they say, be careful what you wish...I've been bombarded with them! So this month's column will be as many of these as I've had a chance to format. Will resume mixing skeds with DX news in next month's column!

BHUTAN BBS to expand its SW services. Contrary to what was reported in the various e-groups some time back instead of shutting down their SW sces BBS is going to continue and will also expand their SW services.

Incidently I visited the AIR high power transmitters at Khampur at outskirts of Delhi alongwith other dxers and the station engineer over there Mr. V.K. Baleja informed that he recently came back from a trip to Bhutan after doing extensive repairs on the BBS sw transmitter (50 kW SK45S3).

Apparently the transmitter had modulation problem & Mr Baleja was deputed to fix the same.

He showed us the photo's of BBS transmitter & the repairs carried on over there. He also informed that BBS is soon going to install another 100kw sw transmitter with the help of Indian govt. (Gupta-IN-DIA, hcdx Oct 23)

ALASKA: KNLS 9655
f/d "Studio in
Anchor Point"
cd. in 56 ds.
w/ station
pennant and
ltr. (HumenykONT).

AUSTRALIA: Radio
Australia
9475, 17750 &
15515 via
Shepparton f/d
"Shepparton
Transmitting
Site" cd. in

41 ds. w/ schedule. v/s Ian Johnson. (Humenyk-ONT). 9580 via Shepparton nice looking cd. w/ sunset photo and insets of the site on the front and f/d on the back in 2 mos. w/ schedules. The QSL was mailed from Singapore? (Berg-MA).

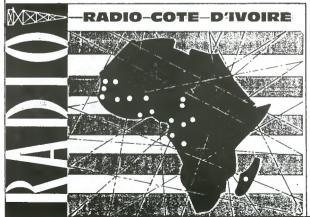

BONAIRE: Radio Japan 11935 the station verified the special 70th Anniversary of "Hello from Tokyo" program w/ a f/d "A Midsummer Night's Spectacle" cd. in 88 ds. v/s T. Sato. Unfortunately, the card neglected to indicate it was the special anniversary but I did receive a program schedule, 2005 calendar, report form and station info. (D'Angelo-PA).

BULGARIA: Radio Bulgaria f/d cd. in 2 mos. The station returned the \$1 I sent them. (Littlefield-NY).

CLANDESTINE: Minivan Radio 13855 via Julich I received a f/d "Miami Bayside Market Place" cd. from v/s Jeff White at WRMI in 348 ds. WRMI is the program broker. (D'Angelo-PA). Radio Hoa-Mai 11555 f/d "Map" cd. in 33 ds. for \$1.00. v/s Trinh Ngoc Anh. (Wilkins-CO).

cd. in 33 ds. for \$1.00. v/s Trinh Ngoc Anh. (Wilkins-CO).

EQUATORIAL GUINEA: Truth for the Word via Radio Africa 15190 the station signed and stamped my prepared cd. and sent a short ltr. thankme for the reception report. v/s Don Blackwell, Director of Broadcasting, All in 90 ds. The ltr. stated: We have found it to be most helpful and have even used it to correct a problem with our broadcast over Radio Africa. The very specific details that you included are very beneficial". Not sure what I said but I haven't heard the station since. Hi.! (D'Angelo-PA)....So your the one! I haven't re-

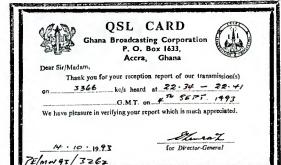

ceived them at all...Sam.

EURO PIRATE: Radio

* Orion 5714.9 very
nice QSL w/ logo
and cartoon in 1
day for an e-mail
rpt. 150 watts.
Addr: P.O. Box 9,
8096-ZG Oldebroek,
Netherlands. (Berg)

HOLLAND: Radio Nederlands f/d cd. in 1 mo.(Littlefield-NY).

HONDURAS: HRVC 4819 station sent back my prepared cd. w/ a brief ltr. in 19 ds. for \$1. (D'Angelo-PA).

INDONESIA: Kang Guru Radio

* English 9680 via Radio Republik Indonesia very friendly e-mail re-ply in 1 day for an email rpt. v/s Rachel Pearson. Addr: KRGE, POB 3095, Denpassar 80030,

Bali, Indonesia. Her and Kevin Dalton are the KGRE announcers for the Sunday and Wednesday programs. (Howard-CA).

INDIA: All India Radio 5010 via Thiruvananthapuram f/d cd. in 214 ds for a taped rpt. v/s Y. K. Sharma. (Klinck-NY).

v/s Alan H. Weiner. I sent many f/ups to Alan over the years, parti-

MEMBERS NOTES: A big thank you goes out to Jim Vaughan and Ken Lyon for their assistance in obtaining a 1970 WRTH. Thanks guys....Sam. Mark Littlefield sent me a very detailed listing of stations QSLed and how long it took to get a reply. Thanks Mark...Sam, Joe Wood sent along a report for marine utility station WLO in Mobile, AL. He received his reply in 6ds. Several years ago a report I sent to WLO resulted in a QSL and a very nice coffee mug. I still have it..Sam 610AM 95,7FM .____ A Rádio de Minas

cularly when he had his syndicated program over private shortwave stations in the late 80's and early 90's. On a lark, when I sent my report to WBCQ I included a few notes from the handwritten log book that I kept for a July 24, 1987 reception. He included the letter in the envelope w/ the WBCQ QSL and mentioned they had misplaced many reception reports in the aftermath of Radio New York International. Not as cool as the picture postcard of the MV Sarah some of my friends received, but I'll take it. (Lay-NC)...Very nice.

LATVIA: Radio Tatras International

* mods Kreicbergs, KREBS
TV Director in 2 ds.

NOTES: Scott Barbour says he has slowed down a bit in sending reports.

He is being much more selective to those he reports to. Good idea.

Sam. Wendel Craighead returned from his fourth wonderful vacation at Bao Loc in Vietnam. He did a little DXing and is now sending out reports. One of our new reporters Mark Littlefield says that he became interested in SWL when he got his first ham license in 1952.

He uses a Ten-Tec RX340...You sure came back in with a top of the line receiver...Sam.

BROADCASTING HOUSE P. M. B. 1012, BENIN CITY, NIGERIA.

17/6/ 1983

BD/EMG/17/Vol.1/28

Mr. Samuel L. Barto, 489 King Street, Bristol, Connecticuit, U. S. A. 06010.

Dear sir,

Thank you for your nice letter and the Reception Report on our Short-wave Transmitter 802683 on 4.932Hz in 60 meterband. We have checked your report wit; the day's loggings and found out that you were really tuned to our frequency on the 13/479.

At the moment we have since shut-down on that frequency following the Federal Government Orders that all State Radio Stateons should Transmit on Medium Mave frequencies. We are now on 774KHz in the Medium Wave Band.

We sincerely hope that you will still keep us informed if by chance you receive us on $774 \mbox{GHz}.$

Thanks.

Yours faithfully,

L.I. Asoera Chief Tech. Officer

AND SALES OF STREET

* other Katie photos in 10 ds. Card was marked QSL #1. The transmission was from Monticello and the broadcast was from the ship. My rpt. was sent to the Monticello addr but the return addr was Radio Free Mt. Airy, 28723 Ridge Rd., Mt. Airy, MD 21771. (Berg-MA). 7415 f/d "Planet" cd. in 9 ds. for \$1.00. v/s Allan Weiner.  1113 EE gospel songs, organ mx, and EE prgm "Back to God," occasionally overwhelmed by
 bursts of RTTY; fair/qood 10/15 (Ronda-OK)
- 4650.03 INDONESIA-PAPUA RRI Serui 1103-1117 10/7 Arabic-?; continuos Koran chanting, presumably for Ramadan, w/ brief talk b/w chants. Still going at t/out. Poor. (Barbour-NH)
- SWAZILAND TWR 0347 choral gospel mx, some in EE; sometimes drowned out in pulsing QRN. By the time I went back to TWR 3240 to check if freqs were //, 3240 was gone; F/G 10/15 (Ronda, OK) 0412-0436 9/26, M w/long GG rel talk, some choir vocals mixed in. Singing ID & change to EE preacher at 0430. Fair. (D'Angelo-PA) 0434-0450 10/12 M in EE with reminisces of his military service First log of this station and country. Faint. (Wood, TN)
- 4779.97 GUATEMALA R. Cultural Coatan 0155-0232* local rel mx, ranchera mx, SS anmts IDs 0158 & 0218. S/off anmts 0231 & off. Poor to fair with some rtty-ute QRM. (Alexander-Pa 9-10) 4779.98 1030 10/8 1030 full ID w/station name, village, department, country, frequencies, into religious program 1031, another ID 1035 (Brandi-NJ) 4780 poor 1052 10/15 w/group singing; better 1152 recheck; exceptionally strong 0019 10/16 (Ronda, 0K) 4780 0050-0102 9/30 long talk by M, ID ToH, more by same M. (Taylor-WI)

- 4780 DJIBOUTI R. Djibouti 0314 9/28 AA mx, W talking 0329 including ID "Radio Djibouti", theme music, into news report read by M, ending 0340, more music (Brandi-NJ) Strong 2145 10/7 animated talk, HoA mx; upbeat intro theme to nx at 2201. (Berg-MA) 2146 10/7 vern YLs & kids doing call response HoA mx. Touching. M DJ bantering w/ kids in studio. Ramadan related? f-g (CrislerSmith MD)
- 4783v MALI RDT Malienne Bamako 0557 10/8 IS, anthem, anmts by YL. (Fiora, Italy)
- 4800 GUATEMALA R. Buenas Nuevas 0203 10/13 SS ID, into call-in pgm; ancr complained that phone system was not working properly; audio quite tinny usually better in local mornings around 1200. F/P 10/13 (Ronda, OK)
- 4819.1 HONDURAS HRVC, LV Evangelica Tegucigalpa 0536 9/25 SS, local mx. (Fiora, Italy) 4819.5 0202-0215 9/29 M&W SS ancrs w/apparebt nx or actualities. (Taylor-WI)
- 4835 AUSTRALIA VI.8A Alice Springs 0820 9/24 live sports prgm with cmtry and conversation, poor but readable, and better than //4910-Tennant Creek which was also hrd. 4835 went off at 0829, 4910 followed a few secs. later. (Berg-MA)
- 4845 MAURITANIA R. Mauritanie 2330 10/10 brief flute mx, into AAR talk by M ancr; best in LSB often the only readable 60 meter station heard at this hour local late afternoon. (Ronda, OK) fair 0040-0052 10/1; continuous ME mx w/o anmts. Hvy hum and RTTY QRM. Poor. (Wood, TN) 2339-2345 10/1 FF/AA; lots of typical mx at S9 most times with deep fades to S5 for short periods. ID presumed as ID not heard during my short listening period. Possible AA langauge w/ occassional FF heard. (Montgomery, PA)
- 4885 BRAZIL R. Clube do Para Belem 9/25 PP, local mx. (Fiora, Italy) 0427-0432 10/12 really nice dance club mx. Fair. Also 0054-0100 10/1 M PP ancr w/mx from KC and the Sunshine Band and other selections of up tempo brass oriented pop mx in both EE and PP. Partial ID 0055. Fair with static. (Wood, TN) 0427-0432. Really nice dance club mx. Fair. (Wood, TN).
- 4885 BRAZIL RDif Acreana 0102-0135 9/30 PP sports, ID 0134. (Taylor-WI)
 4905 CHINA Xizang PBS Lhasa, surprisingly good at 1100 10/7 with talk by M&W and background
- mx, 4905 slightly the better than 4920. (Berg-MA)

 BRAZIL R. Anhanguera Goiania 0541 9/25 PP, local mx. (Fiora, Italy)
- 4915 GHANA R. Ghana 2209-2230 9/23 M EE nx, ID, continuos C & W style ballads thru t/out. Fair at t/in becoming unusable as co-channel Brazil f/in. (Barbour-NH) 2141 10/4 vern M&W in heated discussion (politics/rel) p-f (CrislerSmith MD) 4915.05 2118 9/25 EE rel pgm, ending around 2135-2140, into soft R&B music, occasional anmts by M about world news coming up,
- time pips, ID "This is Radio Ghana. The news." Starting to mix with Brazil by 2200 (Brandi-NJ)

 4930 BOTSWANA VOA 0421-0426 10/12 M EE political cmtry; stock market nx and ments of Nigerian LNG. ID at 0424. Fair. (Wood, TN)
- 4950 ANGOLA RN 0240-0304 10/8 PP, various hilife and pop-like music selections w/ "Nacional" zingers. Pips/ID 0300 into (p) news headlines then back to mx. Fair. (Barbour-NH)
- 4965 ZAMBIA Voice Africa 0358-0420 10/12; first log of this station. W EE nx, TC as "South African Time." Several ments of Zambia. Following prgm sounded like a US morning "drive time" prgm with IDs as "The Voice" and "The very best of gospel music." Tk of Angola. Skeds and freqs. Faint. (Wood, TN)
- 4985 BRAZIL R. Brasil Central Goiania 0544 9/25 PP, M talk, local mx. (Fiora, Italy)
- 4999.7 COSTA RICA R. Buenos Nuevas 0047-0051 9/30 M SS talk, ID 0050. (Taylor-WI) 5005 EQ GUINEA R. Nac. Bata; *0458-0530+ 9/12 s/on with long NA followed by continuous Af folk mx, hi-life mx & Afro-pop mx. Fair. (Alexander-PA) 2215-2301* 9/24, lively pgm of vocals until 2230 SS ID by M, nx. Many mentions of Malabo. Nice "Radio Nacional, Bata" ID 2236 prior to returning to lively vocals. Closedown ID & s/off anmts 2256, then long orchestra NA from 2257. Fair to good signal. (D'Angelo-PA) 2209 9/25 long talk in vernacular language w/musical accompaniment; music, closing anmt (at very low modulation), followed by EE NA. (Brandi-NJ) 2130-2145 10/8; first noted 2130 with fairly clear signal but soon began to fall apart with noise problems by 2145. Lots of fades. M SS ancr w/long talks and interludes of some really nice mx. Recheck 2210, reception much better with a S7 signal level with some fades. (Montgomery, PA) 2155-2300 10/1, first noted on air at 2115 but too weak to really copy much. By 2200 male announcer in SS with news items. S5 signal level but audio modulation a bit low. Have checked prevous evenings and appears to be getting better as the days pass. Rapid or freq fades from S5 to S9 at times, 2200. News over at 2207 and then to SS mx prg. Some fantastic mx at 2217.
- Usually on longer. NA off and carrier gone at 2252. (Montgomery, PA)

 MADAGASCAR R. Madagasikara *0254-0310+ 9/11 s/on w/IS, choral NA at 0257; opening anmts in Malagasy 0259. Rel pgming with rel choral mx & talk. Fair. (Alexander-Pa 9-11)

Excellent listening. Back to news items at 2227 by same male announcer in SS. NA at 2249.

5019.87 **SOLOMON IS.** *SIBS* better-than-usual signal at 0915 10/7, but blocked by strong carrier opening on 5019.94 at 0933. Carrier was probably Horizonte, but never had any prgmng and SIBS was back on top after 1000, still there at 1100. (Berg-MA)

- 5025 CUBA R. Rebelde 0100 10/1; three M in SS with live sporting event. Lots of crowd noise and stadium ancr in background. G-VG. (Wood, TN)
- BURKINA FASO R. Burkina 2300 10/4 FF ID (I presume)...into vocals. (Davisson-OH) 2250-2305 10/5 Afr pop mx w/short FF anmts by W; 2259 M w/anmts & talk. Moderate signal with heavy low side interference. SINPO 32322. (Jim Evans, TN) 2338-0001* 10/14, information program hosted by two M in FF w/short musical segments. Program close with postal mailing address for Radio Burkina at 2358. After that M gave brief anmts with instl mx at closedown. Fair to good. (D'Angelo-PA) 5030.01 2100-0002* 9/30 FF talk, phone talk, Afro-pops. Fair. Gene Scott not on this freq lately. Scott still noted on their other freqs. (Alexander-PA)
- 5035 BRAZIL R. Aparecida 0021-0045 10/15, M&W PP talk, soft vocal selections, ID 0030. Poor to fair and //9630 which was poor. (D'Angelo-PA)
- 5050 USA WWCR 0103 10/1 M w/EE talk of the Torah and Book of Deuteronomy. In my part of the South, the M would be referred to as speaking with a "Mush Mouth." VG (Wood, TN)
- 5054.58 COSTA RICA Faro del Caribe semi-normal audio when hrd 9/30, a little low and sometimes swallowed up by the carrier, but better than usual. Hrd at 0845 with mostly talk, ID 0859, still there at 1015. (Berg-MA) 5054.6 0500 10/10 rel pgm "El Camino de la Vida", address in Mendoza, Argentina; ID as Faro del Caribe 0502 w/MW frequency 1080 kHz, rel mx; nice signal (Brandi-NJ) 5054.6 0051-0115 9/28, M long SS talk, then light instl mx 0057, more alk & vocal to 0100 ID. Next program was mainly vocals hosted by M&W Poor to fair. (D'Angelo-PA)
- 5055 CUBA R. Habana 0115-0130 9/29 W SS, bridge music, MID, same YL talking at length. (Taylor-WI)
 5446U USA AFRTS (Key West) 0105-0113 10/1; baseball game with 2 M ancrs in EE. The Red Sox of Boston were playing the Yankees of New York. The Red Sox were winning handily. ID at 0107. F-G. (Wood, TN) 5446.5, 2214-2225 10/8 EE talk show on investments; pgm called "Money" ID as National Public Radio. Job hunting the next topic on the talk show. S3 signal level with slight fades (Montgomery, PA)
- 5469.9 LIBERIA R. Veritas Monrovia 2120 9/30 two M talking. (Fiora, Italy)
- 5755 USA KAIJ Frisco, TX, 0114 10/1; the late Dr. Scott with prayers and explanation of Biblical Greek. VG. (Wood, TN)
- 5900 **BULGARIA** *R. Bulgaria* 0120 10/5 M in EE w/skeds, freqs; then thanks to listeners in several languages; good. (Wood, TN)

Again, please note my new postal address: 4205 Friendfield Trace, Little River, SC 29566. The email address remains the same: troplogs@zerobeat.org. —DanF

On the Short Waves by Jerry Berg

<www.ontheshortwaves.com> Update, September 23, 2005—Under "Articles, Research, etc.," "Pot Pourri": The American Shortwave Listeners Club is most often associated with Stew MacKenzie who became its Publisher in 1966 and Executive Editor in 1967. However, the club was founded in 1959 by Ken MacNeilage and Maxey Irwin. Here are two early copies of the club bulletin, "swL," one from January 1960 (the second issue of the bulletin [p. 4 is missing]) and the other from March 1960. Thanks to Bob LaRose for these.

<www.ontheshortwaves.com> Update, October 7, 2005—Under "Articles, Research, etc.," "Pot Pourri," a 1928 pamphlet from KDKA containing a list of American and other stations, photos of the KDKA facilities and station personalities, and a time line of KDKA "firsts." Note the references to pioneer stations KFKX and 8XK on page 2. Rather than enter his dial settings in the spaces provided, this listener preferred to make his notes on the cover!

<www.ontheshortwaves.com> Update, October 15, 2005—Under "Articles, Research, etc.," "Pot Pourri," more on the voa floating radio station, USCGC "Courier": another postal cachet, this one issued on the occasion of the ship's visit to Detroit in 1967, three years after she left voa service, and a "Welcome Aboard" sheet containing some interesting information about the ship's pre- and post-voa service.

- 15896D **GERMANY** bit express at 2018, pop mx, only occasionally breaking thru and never for more than 10 seconds; S/N around 9 dB, going as high as 12, when audio tends to break through periodically, but not good enough for quality listening, xmtr only 100 watts per website (Brandi NJ 9/27)

Company Store

Mike Wolfson KB8TYT • 1842 Mifflin Ave. • Ashland, OH 44805 • mwolfson@bright.net

Hello again everyone. First of all, I want to remind everyone about the Company Store's special on 2006 Passport to World Band Radio. We are offering the book at the same price that we sold them in 2005, \$18.90 not including shipping. Shipping for the book will be \$4.00 for the U.S. and \$8.00 for Canadian orders. Anyone ordering the book from outside of Canada and the U.S. should contact me ahead of time so that I can find out what the actual shipping costs will be. Thanks to our suppliers, we're able to hold the price to the same level as we've offered the book at for the last couple of years. In addition, I'm extending the deadline for orders at this price postmarked by 15 December, 2005. Also, I have word on the 2006 WRTH. We will be offering them at a reduced price as well. Until 31 January, 2006, the price to club members will be \$26.90. That's a \$3.00 savings off the regular price. Shipping charges will be the same as for Passport. Finally, a number of members have expressed an interest in having the "Store" carry ball hats. I've worked out a deal with our supplier for normal cloth caps...with one difference. Instead of the usual plastic size adjustment tab in the back these will have velcro instead. The hats will cost \$12.00 with \$3.00 shipping to U.S. addresses and \$6.00 to Canada. If you're ordering from somewhere else, please get in touch with me so I can find out exactly how much the shipping will cost. That will do it for now. Hope everyone has a good one. I'll be back next month. Until then, good listening. Mike

On the Short Waves by Jerry Berg

<www.ontheshortwaves.com> Update, October 22, 2005—Under "Articles, Research, etc.," "Pot Pourri," some memories of Gilfer Associates, Inc., a favorite shortwave mail order house in the 1960s, 1970s and after. Oliver P. (Perry) Ferrell and XYL Jeanne began the business circa 1952 and were well-known in the DX community. Perry died in an automobile accident in 1984 and Jeanne carried on the business until she sold it in 1994. Gilfer closed in 1997. Here are some Gilfer catalogs from 1970 and 1974 (I'm still using those Telex CS-7 headphones). R.I.P., Gilfer and Perry Ferrell.
