VOLUME XXXVII NUMBER 6

JUNE 1997

Monitor MORE with advanced equipment from Universal Radio!

SW-2

Dollar for dollar, the new Drake SW-2 has to be the best value in shortwave radio today. Here is a table top receiver, with a truly impressive array of features and capabilities, at a price that everyone can afford. Never before have you been able to get so much radio for so little money. Of course the SW-2 covers all longwave, medium wave (AM) and shortwave frequencies. Single sideband is easily tuned with separate LSB and USB positions. Amplitude modulated signals sound great through the front firing speaker. When a shortwave signal does start to fade you can engage sideband selectable synchronous tuning to stabilize and improve the signal. The capable memory system is nonvolatile and stores 100 channels (storing frequency, mode and detection). Memory recall may be accomplished by either keypad entry or by rotating the main tuning knob while in memory mode. Other refinements include: RF Gain, Tuning Bar Graphs, 100 Hz readout and Dimmer. Dual antenna inputs accept either a PL-259 coaxial or wire feedline. A mini earphone and 1/4" external speaker jack are provided. The optional remote lets you operate this radio from across the room. The oversized digital display is large enough that you can actually see the frequency from across the room. Universal is excited to offer this exceptional radio value. The reliable. American-made Drake SW-2 carries a limited one year warranty. Order #2222 \$489.95 (+\$7)

Japan Radio Co., Ltd.

Famous for its top-gun receivers, Japan Radio Company once again pioneers with a brand new model at a surprisingly affordable price. incredibly attractive and compact radio delivers hour-after-hour of listening pleasure with high dynamic range and synchronous AM detection to help tame fading. Dual IF filters (6/2 kHz) are supplied, with a third optional position available. Tuning the radio is smooth as silk via the large indented main tuning knob. The easy-to-read LCD type display shows you the precise frequency to 10 Hz! The variable Noise Blanker is effective against pulse and ignition interference. The sophisticated memory system stores 100 channels with frequency, mode, AGC, attenuator, VFO, bandwidth and NB status parameters all stored. Both memory and frequency scanning are supported. The Clock-Timer function enables the radio to turn on and off at a specific time and the clock can be set for UTC or local time. The Tone Control, AGC and 20 dB Attenuator let you refine the signal to your personal taste. Other refinements include an analog S-Meter, Tilt-Bar, Up/Down Tuning buttons, Dual VFOs and Dial Lock. Rear panel jacks include: External Speaker, Record Jack, FAX/RTTY Line Out and DB-25 RS-232C port. Switch selectable dual antenna inputs are featured to support both wire-type or coaxial-type lead ins. A built-in RS-232 post facilitates connecting a personal computer (4800 baud, 1 start bit, 8 data bits, no parity, 1 stop bit). Exact price is unknown at press time, but is expected to be under \$1000.

GEnie: R.DANGELO3 Internet: r.dangelo3@genie.com

Recently, Harold Cones, Chairman of the Administrative Committee of the North American DX Championships, announced the results of this year's contest. First place went to Benton Owsley of Ventura, CA with 949 points (294 stations in 125 countries); second place went to Ed Rausch with 653 points with Bill Breeden finishing in third place with 616 points. Congratulations to Benton!!! Also, nice work Ed and Bill for your fine showings in this year's NADXC. All awards and certificates are in the mail. Once again, thanks to Harold and his committee for another excellent and challenging event. Watch the pages of the Journal and the Calendar of Events for news and information about the 1998 North American DX Championships.

The May edition of the Journal was a little different. Due to the wealth of information contained in the English Schedules and Listeners' Notebook columns, a number of regular features had to be held back. All material held back last month will eventually appeare in the bulletin. Also, I neglected to welcome Mark Fine, the new editor of our English Schedules column, to the editorial staff. His first column appeared in last month's Journal. Mark replaces a "retiring" Tom Sundstrom who prepared that column for many years.

Last month I mentioned that Bill Oliver had a new e-mail address

colore@philly.infi.net> and he was looking forward to hearing from his fan club. Well, I neglected to mention that his other address <naswal@aol.com> is still active. Now you have two electronic ways to reach our publisher! Also, I understand the US Post Office still delivers mail "the old fashion way" to our headquarters address.

ANARC SWL Ham Net

Tune in Sunday mornings at 10 A. M. Eastern Time on 7240 LSB for the latest in shortwave, medium wave and longwave listening, DX tips, and up to the minute hobby news. Contributors share their DX tips via their own amateur radio stations or by telephoning a "gateway" station who then broadcasts the relayed tips. Contributions are also accepted via the Internet Relay Chat (IRC) channel #swl while the net is in progress. Net Controls Dave Kirby N1DK, Hausie WB4JSP, and Bob Curtis WIEXZ host an always lively gang of DX monitors. (Best heard in the eastern half of NAm) Net info is also available at http:// /www.trsc.com/swl net.htm>.

Each year at the Winter SWL Festival a silent auction is held with the proceeds going to help struggling folks in Africa through the Christian Blind Mission International. Long time club member, Rev. John Eckert takes care of the arrangements. Alan Harkey, from the Mission, sent a nice thank you letter recently thanking all that made the donation possible. THANKS to all of you that participated in the auction!

The DX season is winding down. There is still some good stuff to hear on the bands during the summer months. Remember to listen and report. Thanks to the effort of our membership, Harold's hearty band of editors, Ralph's design work, and Bill's publishing talents, the Journal continues to be THE source for shortwave broadcast news and information.

That's it for this month. Enjoy this month's edition of the JOURNAL; it's another good one.

Our Motto is - "Unity and Friendship"

Calendar Of Events

- Jun'97 Convention. The 31st Annual European DX Council ("EDXC") Conference will be held on 6-9 June 1997 at the Hotel Lazne in the eastern part of the Czech Republic. It will be organized by the Czechoslovakian DX Club. Information can be obtained from Jaroslav Bohac, Jizerska 2900/11, 400 11 Usti n. L., Czech Republic; FAX +42 47 5211819, e-mail: khonzik@bbs.infima.cz.
- Jun 20 Meeting. Philadelphia Area NASWA Chapter. Kulpsville Holiday Inn, Kulpsville, PA at 7:30 PM. For more information contact Dan Cashin at 215-446-7831.
- Jun 20 Meeting. Boston Area NASWA Chapter. The Lexington Club, Rts. 4 & 225, Lexington, MA at 7:30 PM. The location is 1/4 mile west of Rt. 128, Exit 31. For more information contact Paul Graveline at 508-470-1971 or Internet: 74007.3434@compuserve.com. Check the BADX Web Page: http://www.grove.net/~badx/>.
- Jun 21 Meeting. The Miami Valley DX Club (all band orientation) meets at 1:00 PM. For more information plus this months meeting location contact Dave Hammer at 614-471-9973 or write to MVDXC, Box 292132, Columbus, OH 43229-8132.
- Jul 13 Meeting. The Tidewater SWL's meet at 6:30 PM. For more information plus meeting location contact Joe Buch at 804-721-2782 or Internet: joseph.buch@dol.net
- Jul'97 Convention. IRCA Convention will be held in Costa Mesa, CA on July 25–27 at the Holiday Inn Bristol Plaza. Registration is \$35.00 which includes the banquet. Contact Mike Sanburn, P. O. Box 1256, Bellflower, CA 90707.
- Aug'97 Convention. WTFDA Convention has been tentatively set for August 1-3. Convention host John Broomhall is exploring two sites: North Georgia mountains (about 75 miles from Atlanta) and in or near Metropolitan Atlanta. Activities include station tours, amateur TV demonstration, FCC Regional Field Office visit, guest speaker(s) and informal Q&A panel discussion. Further details when received.
- Aug'97 Convention. The annual DX summer meeting of the Finnish DX Association will be held in Oulu, in Northern Finland. The meeting is being arranged by DX-Club of Oulu, a local branch of FDXA, on 1–3 August 1997. Further information is available from Ari Kilponen, Annantie 7 G, FIN-90560, Oulu, Finland or e-mail: ark@pp.netppl.fi
- Aug'97 Convention. NRC Convention will be held Labor Day Weekend (Aug. 29–Sep. 1) in Delaware. Further details and information will appear when received.
- Oct'97 Contest. 1997 Adventist World Radio Contest. Further information will be published in the Journal or you can send a self-addressed stamped envelope to 1997 AWR Contest, c/o Dr. Adrian Peterson, Box 29235, Indianapolis, IN 46229.
- Feb'98 Convention. New Zealand Radio DX League will hold its 50th anniversary convention sometime in February 1998. Exact dates and venue have not been established. Information from NRZDXL, P.O. Box 2956, Wellington, New Zealand. Further details and information will appear when received.
- Mar'98 Contest. 1998 North American DX Championships. Further information will be published in the Journal or you can send a self-addressed stamped envelope to 1998 NADXC, c/o Dr. Harold Cones, 2 Whits Court, Newport News, VA 23606.
- Mar'98 Convention. The 11th Annual Winter SWL Festival will be held at the Kulpsville Holiday Inn (Exit 31 on the Northeast Extension of the Pennsylvania Turnpike) on 13–15 March 1997. Organized by the infamous "gang of three" (Messrs. Brown, Cones, and Field) this all wave gathering attracts about 200 hobbyists each year.

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: r.dangelo3@genie.com) or Ralph Brandi (Internet: ralph@mcs.com).

Musings

This column provides a forum wheras members can express comments, ideas, and thoughts about NASWA or the SW radio hobby. Please feel free to comment on anything presented this month (or previous months). Opinions expressed here are are soley those of the submitters. Please submit all Musings to Richard A. D'Angelo, 2216 Burkey Dr., Wyomissing, PA 19610 or via email - r.dangelo 3@genie.com

We'll begin this month's collection of Musings with those items squeezed out of last month's Journal:

Eric Bueneman (N0UIH), 631 Coachway Lane, Hazelwood, MO 63042-1347 (E-mail: EricB631@juno.com)

At a hamfest on January 27, I managed to purchase an MFJ-1778 G5RV antenna. Although a G5RV antenna is designed for HF Amateur Radio operation, I wondered how such an antenna would do in an SWBC setting. So, I plunked down my \$27, and bought the antenna.

With the antenna still rolled up, I was able to pull in Radio Quito from Ecuador on 4919 kHz at near-local strength. I put up the antenna in the attic of my house a week later, and was virtually amazed at the performance of the antenna, as compared to the homebrew antenna (made of, strangely enough, a metal coathanger and speaker wire) I had been using since late 1991. For instance, tropical band stations were coming in much better and with more frequency. For example, GBC from Guyana on 3290, which had been barely heard on the homebrew antenna, had a fair signal with the G5RV. The best Radio Australia frequencies in the wee hours of the morning local time (after 0800 UTC), 9580 and 9860, were blasting in like locals. I was able to hear a lot of AM (MW) broadcast band DX on the new antenna, and heard LW beacons as low as 300 kHz with it, too. I noted local signals from the "LM" beacon on 338 kHz from St. Charles, MO and the "ST" beacon on 404 kHz from Cahokia, IL.

The new antenna has allowed another new interest...DXing pirates! The first pirate I heard was "Up Your Radio Shortwave" at 0205 UTC on March 16, heard on 6955 kHz USB. I've also heard "WARR" and Kiwi Radio, among others. I had not heard a pirate station on SW in fifteen years of Dxing prior to the abovementioned date.

73. Eric-NOUIH

Errol Urbelis, 563 Meadow Road, Kings Park, NY 11754-5009

After looking over my QSL collection many times, I always stop and look at the KJES QSL card from the Lords Ranch in Mesquite, New Mexico. You know the station, the one with the kids doing the Bible programs. The last QSL from them was on a 3 x 5 index card; boy does that stand out.

I was wondering (about 500 times), wouldn't it be nice as a courtesy gesture to have a QSL card printed up for them. I really think it would be a good will endeavor on NASWA's part being a major shortwave club worldwide.

I have spoken to several DX'ers at the Winter SWL Festival who agree with my opinion about spreading friendship as well as the good name of NASWA. I had a nice chat with Bill Plum, our ace mint stamp guy who also does some QSL card printing, who wouldn't mind doing the job at a reasonable rate. We all know what a great job he does with the FEST pennants in years gone by. Hope we can get the ball rolling on this project as I am sure it will turn out for the best.

73s, Errol

John T. Wagner, retired! < WAGNERND@AOL.COM>

Sub: SWL Mobileering

Rich, I just finished reading Alan Johnson's very accurate review of the new AKD HF-3 Portable receiver (I believe the Lowe SRX-100 to be the very same receiver). If I might I would like to add a few comments pertaining to Alan's excellent reviews & the help Alan and the entire Journal staff has been to me & my little corner of the hobby. First I would like to add that the big benefit to me for lending Alan a steady flow of new Giz Mo's for use in the Journal is a very big help to me and worth what little I have invested in postage expenses from sending Alan some of my fun hobby things. I am very well repaid by being able to read Alan's & Joe Bush's equipment reviews & tec. articles.

I am not a newbie anymore I guess, but I sure gain a lot of hobby knowledge with every edition of the Journal. I have the luxury of being retired with plenty of time to play "Radio". I am continually amazed as to how the whole Journal staff are able to work full time, write articles that really add to my hobby fun & yet still have time to do some tuning on their own. My hat is off for the entire staff & even those club members who send in their logs. Reading the equipment lists as used by the contributors is very educational as well. Good job & thanks to you all!

Back to the AKD HF3 for a moment. I have fun working with new SWL'ers. One of the most common hobbyist complaints that I hear is "I don't have enough time to tune"! How true that lament is! Hearing that as many times as I have motivated me some 8 months ago to spend some of my lucky leisure time trying to develop a useable mobile SWL system. Anyone who has ever climbed into a car with a portable hoping to steal a few extra minutes of SW listening has full knowledge as to what an amplified alternator sounds like! Until recently that was my experience.

I have been trying a lot of various portable receivers & by shear luck, & the process of elimination, have stumbled onto a very workable mobileering method. There are a few other SW portables that also work rather quietly in the mobile environment. I have a good list for later sharing if anyone is interested. Finding a very good mobile portable such as the AKD HF3 was not the biggest challenge. To cut to the chase, the antenna was! I sure tried a lot of commonly advertised mobile antennas. Expensive ones also. I have to pat that Palomar Super Snooper on the back. Yes, I know that others have their own private & favorite mobile antennas. But, that Sooper Snooper by Palomar is a very fine mobile antenna clear across the entire SWL range, including ssb on the Ham Bands! The cost is right also. As I recall the Sooper Snooper was only \$40, very reasonable if you've checked the price of mobile antennas lately! It is also a very good base antenna for YB 400's, San. 909's ect.

The use of that antenna is not relegated to a Radio Shack window mount either. I also use a trunk mount and an adapter for very stable & full general coverage SW mobile coverage! That Sooper Snooper is a very good investment, mobile or base! Again, I whole heartedly agree with Alan's review. But for a very good & a very reasonable SWL mobileering ride that pair does do a very commendable job. No regrounding of my antenna mobile either!

Thanks very much to Alan & the whole Journal staff. The entire hobby is the better on account of you good people! 73

And now the lighter side of shortwave radio comes the following from Paul McDonough and the BAD guys. The only thing you need to know before reading the posting is that the BAD Guys meet at a health club. Hopefully, the rest is self-explanatory.—RAD

Paul V. McDonough cdonou@world.std.com>, Somerville, MA

Subject: Rules For Next BADX Meeting

Hi folks.

Seeing as how out-of-control the last meeting was, I propose a new set of meeting rules based on the last meeting.

- ¶ No more belly-dancers during the meeting. It really throws peoples' concentration off.
 The clinking of the castanets makes it hard to hear the DX tapes.
- f Wait to tap the keg until AFTER the meeting. I didn't like it when I came back and found someone had put the keg hose into my R8. I came back from the break and there was beer shooting out of my S-meter. I hate it when that happens.
- f No more belly flops from the window into the pool during the meeting. I think we scared some of the pool occupants.
- f No more playing tape recordings under water in the pool. Although I appreciated listening to what an auroral trans-polar signal sounds like with all the fluttering and stuff, I think we scared health club members.
- f Fist fights will only be allowed in the parking lot after the meeting. (Come on guys, the R8A isn't THAT much better than the R8.)
- f I don't think the health club appreciated us hooking up the Baygen wind-up radio to the-Stairmaster and making that innocent woman generate electricity for our radio.
- The sauna is downstairs. I don't think it was funny cranking up the temperature to 90+ degrees and breaking the thermostat. I knew things were bad when the health club started distributing towels to our group.
- ¶ Just as dwarf-tossing is bad, so is tube-rig-tossing. When I missed catching the Hallicrafters and it went through the wall, I don't think I should have been blamed for the damage. (I hope the meditation group next door recovered from the intrusion. Too bad about the acupuncture guy though. Do we have insurance?)
- f Pizza is not a toy. Throwing the slices at the ceiling and making them stick really isn't funny. I hope they don't fall down during an important health club meeting or something.
- f Sticking the new member into the VCR probably wasn't our best moment. We should work on our greeting skills. (Making him sniff the white-board markers during the whole meeting probably wasn't a good idea either. I'll make it an action item for the next meeting.)
- 9 Calling Port Moresby from the health club phone to ask if they have Prince Albert in a can at the radio station was not a good idea. But that's just my opinion.

Anyway, I hope the next meeting is better than the last one.

Enjoy, Paul

P.S. For the humor-impaired, all of the above is a joke. Only 8 people showed but we still had a good meeting. Since so few showed, I thought it would be funny to make up some outrageous things that happened. Now get back to your SW radio!

Contribute!

Send your loggings and QSL information off to our Distributing Editor, Fred Kohlbrenner (2641 South Shields Street, Philadelphia, PA 19142). He will forward them to the appropriate editor. Remember, Fred has now expanded his business to include QSL report information and totals for the Scoreboard column. He can also be reached through the Internet at: fkohl@ix.netcom.com.

And now, on to the new Musings ...

John Lyon, 2346 Dorothy Avenue, White Bear Lake, MN 55110

You just never know when you'll hear a rare one, or end up Dxing the darndest places. I was minding my own business, attending the 15th annual Minneapolis/St. Paul International Film Festival last week. I've occasionally seen a glimpse of a radio tower in the Third World films I prefer, but this time DX fell right into my lap. After seeing a Tunisian feminist film (no, that's not a misprint), a weird Welsh murder mystery, and a Cuban slapstick road movie, for a break the next film I chose was billed as a kind of environmental documentary. The Swedish film, The Atlantic (1996, 80 minutes, English subtitles), was said by its producer-director-cinematographer to be "about islands in the Atlantic." It turned out to be one person's idiosyncratic watery road movie down the Atlantic Ocean from north to south.

Interspersed with long, loving shots of the sea in different moods and lighting, were stops at Iceland, the Azores, and Cape Verde. Then to my surprise, the narrator announced that we were approaching St. Helena. The film cut to a quick shot of St. Helena's broadcast facility building with identifying sign out front. It looked similar to any small town station in this country. Then the film's director utilized a neat trick to emphasize St. Helena's isolation in the South Atlantic. Street scenes of downtown Jamestown were shown like any travelogue, but the audio track was a news broadcast from Radio St. Helena. A young lady with a lovely, winsome, British accent is saying that one of the ships, which call six times a year on the trip from the U.K. to South Africa, has arrived. She is quite specific about the details, saying how many people arrived, the nature of the cargo, and even how many sacks of incoming mail. Passengers sailing the next day are told when and where to have their luggage ready. The broadcast continues with a shot of another announcer reading local want ads and advertisements, including pet health remedies. There is even a clear ID.

I missed this year's fall broadcast of St. Helena, and here it was loud and clear. And me without a log sheet or even a tape recorder. The signal strength was S9+40, and best of all no subtitles in this segment. When I got home, I didn't say anything to my wife. She'd never believe I was Dxing, along with several hundred strangers on a Sunday afternoon, in a dark theater. And I'll have to admit as Dxpeditions go, this one was decidedly unusual.

FRENDX: Twenty Five Years Ago

Renewing members included Ralph Perry and Ed Kusalik (4th year), Chris Lobdell (5th year), Edward Shaw (6th year), and Edward Pyatt (7th year). Awards Chairman Warren Nordgren issued the Continental Dxpert award to Al Sizer; Ron Howard received the WorldWide Dxer and Missionary Station awards. Corresponding Secretary Ed Shaw began editing a new column, called Mail Call, dealing with mail from members. In the Shortwave Center, John McNeil of Radio Vila in the New Hebrides provides an inside letter to Ralph Perry and NASWA; Don Jensen writes about his first station heard 25 years ago, HCJB. In the Open Mike column, Perry Ferrell talks about improvements to the Barlow XCR-30. A QSL from the Pathet Lao Clandestine highlighted Gregg Calkin's QSL Report column. Frendx Fotos featured Russell Lay, Dan Henderson, and Tom Gavaras.

George Maroti < curious.george@worldnet.att.net>

First, let me say that I'm very glad that I joined NASWA last October. I find the Journal very helpful in logging and verifying new countries. Also, the spirit of dedication of the editors and contributors every month has also inspired me to try to contribute to each issue. The way I see it, the quality of the Journal each month depends directly on everyone's input.

I was fortunate to pickup back issues (1989-1996 complete) of the Journal at the Kulpsville silent auction. In one issue, there was an announcement for a New York metro area SWL meeting.

Does a New York metro area chapter of NASWA exist? If so, please give me the name and address of someone I can contact. If not, could you please provide me with a list of all NASWA members in the New York metro area (NYC, Westchester & Putnam counties, Long Island, northern New Jersey and Connecticut)?

I'm very interested in starting a New York chapter of NASWA. I find it very hard to believe that in such a large metropolitan area such an organization does not already exist. Have others tried and failed? If so, I'd like to be able to contact them to find out why/where things went wrong.

Any advice you might have on starting a NASWA chapter will be appreciated.

I really enjoyed many of the columns from the past Journals, such as DX'ers Forum, and the African/Asian/Latin Destinations columns. Is there any chance these columns will appear once again with new or updated topics? I'm sure the answer depends on someone taking the time to write these columns, but in case you wanted ideas, I thought a revival of these columns would be a great addition to the Journal.

Thanks in advance for your help. If I should be directing these questions to someone else, please let me know.

Keep up the good work! George Maroti

Errol Urbelis, 563 Meadow Road, Kings Park, NY 11754-5009

I have been a DX'er since 1957 and have been a member of many SW clubs. I joined NASWA back in 1963 and then after a few years hiatus rejoined again in 1970. Really enjoy the club (the best for SWBC). I do a lot of DX'ing and of course slack off during the summer and join in on the cruise night scene with my Z-28 Camaro. I have two great hobbies, SW radio most of the year and hot rods during the summer months. After 40 years of DX'ing I have a few comments.

I personally don't enjoy receiving picture postcard QSL cards without any kind of identification on the front so I know who it is. I have a good memory but not that good for 40 years of DX'ing.

Also, why does the VOA issue those rather large QSL cards when it takes up almost a whole page in my QSL album. Miss the old standard size cards from the 50-90's.

What ever happened ro "Radio Africa" from Equatorial Guinea on 15,186 kcs? I have not heard them since Oct. 29, 1996 and I listen daily for them. I did call "Pan Am Broadcasting" in Cupertino, California (1-800-726-2620), who runs the station. I talked to Terry Kramer (YL) who assured me they were still broadcasting. Maybe she is right, but that's sure a lot of days I haven't heard them.

OK here's a winner. I noted that some DX'ers have a hard time getting QSL cards from some stations. What I want to know is what is the procedure for sending reports to Embassies? Any help on this matter is most welcomed.

Fellow Long Island DX'er Nick Terrence in Huntington and I would like to be able to contact other Long Island SWLs. I know there are other guys out there because I see their names listed in the new members section. I have tried since 1970 by putting ads in NASWA but no one calls. I see there are members getting together in PA, Boston, and DXpeditions all with great success. My phone number is 516-269-5913. I'll be waiting for your call.

I have gone to the last 4 FESTs and even won an MJF clock this year. I sure hope to meet you all again in 1998.

Mindy Scheer < Mscheer@worldnet.att.net>

I have always enjoyed doing business with Gilfer in the past, but unfortunately I seemed to have been taken on a subscription to a yearly shortwave journal that I subscribed to. I called the toll free number several times and there was no answer, I sent e-mail and never got a response.

I spoke to a woman who answered the phone back in February who was aware of my problem. You would think they would have the decency to give a refund for the unshipped copies before going out of business.

Mindy

Gary Otteson <otteson@pobox.upenn.edu>

Mark Fine's email address is indecipherable in my May '97 copy of the Journal, so I thought I would write here to express my approval of his new English Schedules. It's a very nice job once you get used to the new format. Very thorough and accurate, with not a few pleasant surprises.

Thanks, Gary Otteson

We have lots to report on this month, so let's get to it!

Lost Our Lease!

A major world event takes place at midnight on June 30—the handover of Hong Kong to China, as Britain's 99 year lease on the territory expires. China Radio International will air a special program on the event on July 1 in all its broadcasts. Radio Australia, Radio Japan and the Voice of Free China will likely have extensive reports and special programming, as well, in the days surrounding the handover. Consult Mark Fine's English Schedules section of May's Journal for times and frequencies of their transmissions.

The BBC will have extensive coverage, as well as several special programs, leading up to the event. In addition to programs listed in the BBCWS Highlights section below, listen for daily reports from Hong Kong in the week prior and three days after the handover in Newshour (daily 1300, 2000). John Tidmarsh of Outlook (Mon.-Fri. 1405, 1901*, 2305; Tue.-Sat. 0430) goes to Hong Kong to talk with local people as well as journalists and commentators about their thoughts on this historic event. Focus on Faith (Fri. 0230, 1130 and 1930*) will hear the views of Hong Kong's Christians, Muslims, Buddhists and Jews. Megamix (Tue. 1930*, 2330; Wed. 1430) will have a special program highlighting the views of Hong Kong's youth. On Handover Day, June 30 listen to live coverage of the official ceremonies between 1600 and 1730 and hear special editions of Newsdesk at 1030 and 1800.

BBC World Service Highlights

Listings are for the Americas/Europe stream. Days and times are in UTC. Frequencies for North America include 5965, 5975, 6175, 6195,9515,9590,9895,11750,11865,15220

and 17840. In a few cases, programs can be heard via the Americas/Europe stream only on frequencies intended for Europe. These are denoted with an * and these frequencies usually are listenable in parts of North America: 15485, 12095 and 9410. Times marked with an # means that the program also can be heard in western North America via the Asia stream on 9740.

Several series that began during May continue into and through the month of June. Consult May's EL for details.

Classical Music

The Composer of the Month (Thu. 0730, 1530#) is Benjamin Britten. Performance (Wed. 1515) focuses on the life of conductor George Szell, who was Music Director of the Cleveland Orchestra from 1946-1970. Dying Notes (Tue. starting the 17th 0145, repeated Thu. 0530) is a 6 part series which looks, tongue-in-cheek, at the often bizarre methods used to dispatch opera singers. Schubert and Friends (Sun. starting the 8th 1515) invites you to four modern day "Schubertiads"—informal musical gatherings held at homes in London and the surrounding countryside.

Drama and Readings

Here are the *Plays of the Week (Sat. 2230; repeated Sun. 0530, 1830*)* for June:

Aman, presented in two parts, (31st/June 1st; June 7/8th) is an intimately personal story of a young Muslim girl's coming of age in the 1950's and 60's. In Way Upstream (14th/15th), when two couples run into trouble on a boating trip through Britain's scenic waterways, handsome and capable Vince comes to their rescue. But, Vince is not all what he seems. The Monkey King (21st/22nd and 28th/29th) is a two-part dramatization of a richly comic novel by Timothy Mo set in 1950's Hong Kong.

A four part drama, The Hong Kong Holding Company (Sat. beginning 14th 1901*, repeated Mon. 0330), will be unique for a couple of reasons. First, because it follows the lives of a Hong Kong Chinese family in both London and Hong Kong documentary style with real historical events as a backdrop, including the handover of Hong Kong to China. And, second, because each program will be completed only minutes before broadcast to ensure topicality.

Off the Shelf (Mon.-Fri. 0715; Tue.-Sat. 0345) presents a thirteen part reading of The Last Time I Saw Jane (hegins 9th) by Kate Pullinger about a Canadian journalist working in London, who begins to reconsider her past and Canadian identity.

This month's *Short Stories* (Sat. 1245; repeated Mon. 0030) come from Ireland, Austria, Australia and Kenya.

Education

*Learning Zone begins two new six-part series this month. Body of Knowledge (Fri. starting 27th 1230) examines the major organs of the body and outlines ways of keeping them healthy. The World of Television (Sun. starting 22nd 2310) looks at the growth of the medium and its implications for national cultures and values.

Entertainment

Brain of Britain, the annual quest to find the general knowledge champion of the UK, returns for a 17 week run. Incredibly the BBC has managed to schedule this popular program only at times wholly inconvenient to nearly every Western Hemisphere listener (Sat. starting 28th 0730; repeated Mon. 1830*). Masterbrain, a contest between the previous year's radio and tv winners and runners-up, acts as the annual curtain raiser and airs the week prior.

Features and Documentaries

In Encyclopaedia Historica (a 13 part series Sun. starting 29th0130, repeated Mon. 1515), writer Edmund Hall presents an alphabetical selection of entries from different encyclopedias of varying ages, highlighting the way in which thoughts have changed. It's Your Verdict (5 weeks, starting Sun. 8th 1401)

gives listeners the opportunity to render their judgments, once they have heard the facts about particular human issues in the news and two experts discuss the contrasting views surrounding them. Red Hills of Home (Tue. starting 17th 0030, repeated 1515) offers us four people of different backgrounds who lived through the Zimbabwean war of independence and reflect on changes there since that time. In two half-hour programs, Stories for Life (Sun. starting 29th 1701, repeated Tue, 0630 and 1130) features Dr. Augustus Casely-Hayford using 1,000 year old oral histories to explain life in one of Africa's great ancient empires-that of Ghana. Assignment (Thu. 1830*, Fri. 0530 and 1030) has a special Hong Kong edition (25th and 26th). The series Hong Kong: Imperial Orphan continues from May, (Consult May's EL for schedule.)

Religion

The Four Caliphs (Sat. beginning 21st 0130, repeated Mon. 0615 and Fri. 1515) tells, over four weeks, the story of the early Muslim community after the death of Mohammed, including the historical basis of the split between Sunni and Shia Islam.

In Praise of God (Sun. 1215, 2230) will originate from St. Andrew's Church, Kowloon in Hong Kong the day before the handover to China (29th).

Sport

Wimbledon Live offers special live daily coverage of one of Britain's major sporting events (90 min. daily starting 23rd 1630).

Youth

Beginning on June 1, the World Service will present, on a monthly basis, a Youth Debate (first Sun. of each month 1401) providing an opportunity for young people around the world to discuss with each other issues of importance to them.

Radio Netherlands Highlights

Documentaries

During June, RN's 50th Anniversary celebrations continue when Ginger daSilva interviews **Dutch Prime Minister Wim Kok** (5th/6th) in part to compare his views today

with those he expressed twenty years previous to RN in another interview when he was a labor union leader. In the subsequent three weeks (12th/13th; 19th/20th; 26th/27th), a three-part series entitled Cities will air. A coproduction with Ireland and Scotland, Cities will take three capital cities (Amsterdam, Glasgow and Dublin) and compare them with three cities in each country (Rotterdam, Edinburgh and Cork) who see themselves in competition with their capital and vice-versa. (Thu. 0052, 0452; Fri. 2352 on 6020, 6165, 9590 or 9845.)

Mirror Images

RN's arts and cultural program visits the prestigious *Holland Festival* which celebrates its 50th anniversary in June as well as the alternative *Oeral Festival* on the island of Terschelling with its unusual performances celebrating the theme "Gone with the Wind". (Wed. 0052 and 0452 on frequencies listed above.)

China Radio International Highlights

Listeners' Letterbox answers questions about China's educational system (22nd/24th). Chinese Folktales highlights a legend of the Dong ethnic group of southwestern China which involves the White Hair Waterfall and The Long-Haired Girl (14th). Music from China (21st) features the prize-winning music of composer Wang Yougui from Guangdong Province. Wang's "Spring Story" dedicated to Deng Xiaoping has made him especially famous. Song of the Week (29th) brings "The Year of 1997" which celebrates Hong Kong's return to the Chinese motherland. CRI's broadcasts are one hour long and these programs will be heard during the second half-hour of each transmission on the days listed (one day later UTC in transmissions to North America and the Pacific between 0000 and 1200 UTC). Consult Mark Fine's English Schedules section in May's Journal for times and frequencies.

Deutsche Welle Highlight

On the 23rd, Arts on the Air (Mon. 0132, 0332, 0532) will have a special edition look-

ing at why musicals have taken off in Germany to the extent they have over the last decade, when ten years ago they were virtually non-existent.

European Summer Music Festivals

This month begins the annual summer season of historic European festivals of music. Coverage of these prestigious events should be prominent in the shortwave broadcasts of the host nation. Music and reports will likely be offered in programs highlighting domestic events and in regular arts and cultural or music programs. The BBC's Meridian arts program (see April EL for schedule) may also feature some of the larger and more well-known events. Here are the places and dates for June's festivals:

Austria: Vienna Festival (through June 22); Styrian Festival (in Graz June 21-July 20). Belgium: Flanders International Festival (month-long). Britain: Glyndebourne Festival Opera (month-long); Aldeburgh Festival of Music (13th to 29th). Germany: Schwetzinger Festival (through June 11), Ludwigsburg Castle Festival (month-long), Munich Opera Festival (from June 29). Italy: Maggio Musicale, Florence (through June 30); Ravenna Festival (from June 19); Festival of Two Worlds, Spoleto (from June 25); Festival International Luxembourg: Echternach (month-long). Netherlands: Holland Festival (month-long) [see Radio Netherlands Highlights, above]. Russia: White Nights Festival in St. Petersburg (June 18-30). Spain: Granada International Festival (from June 20). Sweden: Drottningholm Court Theater (month-long). Turkey: Istanbul International Festival (from June 15). (source: New York Times Travel section, March 16. 1997)

Potpourri

There are several important elections this month. The second round of the French parliamentary elections takes place on the 1st, Canada votes on the 2nd and Croatia votes on the 15th. Expect RFI, RCI and Croatian Radio (and their neighbors) to

have special coverage and analysis. In past elections, RCI has broadcast continuous coverage throughout the North American evening, alternating with a half hour in English followed by 30 minutes in French...On May 16's Feedback program, Roger Broadbent of Radio Australia reported that the major cutbacks to RA's budget (see previous months' EL and Listeners' Notebook) will likely result in greater reliance on Cutbacks to the ABC domestic services for programming and abandonment of the 24 hour English result in greater reliance on service in favor of an 18 hour service. least some for programming and changes should beabandonment come apparent by of the 24 hour English July 1...Speaking of changes, RCI's schedservice in favor of an ule will start to undergo an extensive retrofit with the end of several domestic network programs that have been a staple of the international broadcaster's schedule for some time. Morningside had its last broadcast on May 30 and others will bow out during June...Pete Myers, one of Radio Netherlands' prominent and accomplished announcers, has not been heard on the listener contact program Sincerely Yours for some time now due to a serious illness, according to RN's On Target biannual magazine. Here's hoping Pete a complete recovery and early return to the radio microphone. He is sorely missed.

International Calendar for June

(special programs may be broadcast)

1-Children's Day (China), National Day (Tunisia); 2-Anniversary of the Republic (Italy), Coronation Day (Britain), Bank Holiday (Ireland), Queen's Birthday (Australia and New Zealand); 4-Flag Day (Finland); 5-Constitution Day (Denmark), Liberation Day (Seychelles), Ascension Day (Orthodox Christian); 6-Memorial Day (South Korea),

National Holiday (Sweden), King's Birthday (Malaysia), Hindu Holyday: 7-Independence Day (Norway), National Day (Chad): 8-Oueen's Official Birthday (Britain). Children's Day (USA); 9-Sikh Holiday, Dragon Boat Festival (Hong Kong. Singapore): 10-National Holiday (Portugal). Prince Philip's Birthday (UK); 11-Shavuot (Israel), Kamahamieha Day (Hawaii): 12-Independence Day (Philippines. Russia): 13-Corrective Radio Australia's Movement budget...will likely (Yemen): 14-Flag Day (USA), Day of Grief and Hope the ABC domestic services (Lithuania): 15-Pentecost (Orthodox Christian). Fathers' Day (USA); 16-Soweto Day and Youth Day (South Africa); 17-Republic Day 18 hour service (Iceland), Unity Day (Germany); 18-Evacuation Day (Egypt); 19-Revolution Day (Algeria); 20-Flag Day (Argentina); 21-Viking Day (Denmark); 22-Midsummer Eve (Denmark and Sweden); National Sovereignty Day (Haiti), Uprising Day (Croatia); 23-National Holiday (Luxembourg), Midsummer Day (Sweden, Denmark, Estonia, Latvia); 24-Peasants' Day (Peru), King's Day (Spain), St. Jean Baptiste Day (Canada [Quebec]); 25-National Day (Mozambique), National Holiday (Slovenia); 26-Independence Day (Madagascar and Somalia); 27-National Day (Diibouti); 28-St. Paul Day (Cyprus); 29-Independence Day (Sevchelles), St. Pe-

> Yes, I know, know! I've been threatening to air some personal views on all the shortwave service downsizing that has been taking place of late. But, as you can see, copious amounts of program news have left little space for these musings. I'm assuming you'd rather have this hard information rather than listen to my rantings! (We'll see if we can find the space next month.) Until July, then, good listening!

ter and Paul Day (Malta, Chile, Peru): 30-

Independence Day (Zaire, now Congo).

Listening to the Spanish Civil War 1936 to 1939

by Alan Davies

In the mid 1930's Spain did not arouse much interest among listeners. True, each Spring EAQ on 30.4 meters ran a special program for the London chapter of the International Short Wave Club, and EAJ-1 in Barcelona had a ventriloquist for its announcer squeezing boot polish advertisements in between the records of dance music.

Then on July 18th 1936 the army generals launched are volt against the recently-elected left wing Popular Front government, and for the first time listeners overseas could actually hear what was happening in a war. True it helped if you understood Spanish, but as the Government tried to enlist help from the democracies, and the Insurgents from the Catholic countries, the airwayes were full of programs in English, French, German and even Esperanto. Eventually it was the totalitarian powers who became involved, in spite of all signing a "non intervention treaty". Italian and German soldiers, sailors and airmen fought for Franco. Soviet experts helped the Republic and volunteers from around the globe fought with the International Brigades.

It was not always clear who you were listening to. Transmissions that closed with Viva la Republica and the playing of the Marseilles and the Internationale (confusing, as they were the national anthems of France and the USSR) along with the jaunty Hymno Riego (the anthem of the 2nd Spanish Republic) indicated Loyalist stations. The rebels, soon called the Nationalists, closed with Viva

Espana, Viva Franco and a series of marches, including the Marche Real (the current Royal Spanish anthem) and sometimes the Italian Fascist Giavanezza and the Nazi Horst Vessel Leid. Yet Radio Verdad (Truth) pretended to be in Spain, but used Italian broadcast stations after their domestic transmissions had finished, while the EAQ transmitters radiated the Deutsche Frieheit Sender for the illegal German Communist Party, supposedly in Germany.

In the confused opening days of the war, the 40 meter amateur band was full of humanitarian traffic, hams handling inquires and messages for friends and relatives trapped on the other side of the lines. No call signs were given, just the name of the town, and the procedure was roughly as follows: Hello Madrid, Hello Madrid. Here is Tetuan Juan Gomez, Juan Gomez, please inform his wife of XXXX street, Madrid, that he is safe. However this soon stopped as death squads in both zones carried out summary executions of suspected enemies and spies. Many hams were killed at this time.

The amateurs also transmitted war news and opinions. In Nationalist Spain they relayed Radio Nacional and it was possible to hear General Queipo de Llano's 2300 hour chat repeated on channels right across 40 meters. Competing on the same band from Republica Spain were stations representing the various political factions. Radio CNT and Radio FAI for the Anarchists, PSU-1 for the Socialists and ECP-1 and ECP-2 for the ill-fated POUM, familiar to readers of George

Orwell's Homage to Catalonia. It became possible to plot the war's progress as Republican stations disappeared to be replaced by Nationalist ones. In the absence of real news both sides invented it, as when Lisbon radio, supporting the Nationalists, transmitted in November 1936 an entirely imaginary eyewitness report of General Franco entering Madrid on a white charger, a full 18 months before the city finally surrendered in March 1939. Yet Spanish speakers did hear in March 1938, FR-1 the naval station in Cartagena gleefully announced the destruction of the insurgents cruiser Baleares by Republican destroyers.

EA7AI operated EARR to call CO USA on

14140 khz and gave regular phone contacts and war news to radio amateurs across the world after relaying news from Radio Nacional. The station was on the Madrid front and in March 1939 as the war ended, could be heard giving coded messages to the Nationalist fifth column in Republican Madrid

Though peace came in March 1939 it proved short lived as 40 meters lost its amateurs at the start of World War II. In September the only phone station to be heard was the anguished news bulletins from beleaguered Warsaw, and the plaintive playing of the Polish national anthem to assure the world that resistance was continuing.

Toys for the Boys

This article first appeared in the Danish Shortwave Club's Shortwave News

by Barbara Lodge, England

-that was the title of an article in the WRTH in 1991. Despite not being "one of the boys" I allowed myself to read it, with no lasting effects. Except that I was left with the query, as a short-wave radio listener myself, why is short-wave radio apparently a male-dominated pastime? After all it is a long way from the traditional rough-tough contest sport image of men's acceptable interests. And I had a further query: do men and women listen to the short-waves in different ways? To which the answer is a qualified Yes.

The strict DX-breed, involved in chasing logging obscure stations appears exclusively male. I know no true women Dxers. I do know, however, some female listeners to shortwave radio programs.

The words used by male DX-ers to describe their activities are a start to explaining the divide. They speak of a "good catch" and "digging out" a station; They spend long anti-social hours crouched over their receivers waiting for their exotic prey to "come through" before it is bagged by the click of a tape recorder. The advice to clandestine radio enthusiasts is to "search the area" for the station, as it "roams out" to avoid the jam-

mers. The picture is of Dxers displaying the skills of ancient hunters, who had to log the strength, whereabouts and distinguishing features of their quarry, and note the weak member of a herd, which could provide the next meal. And all this information is changed with the seasons, as indeed does DX data. So perhaps DX-ing is not that far from the sweat and struggle of original male combatit is simply that as in many areas of lifetechnology has cleaned up and distanced us from what is really going on. And the ignoble scanner receiver is surely the radio equivalent of the machine gun.

To return to the hunter bearing the trussed-up version or boar home: it was here that the wider, more social use of the carcass fell to the women in the cooking, preserving, production of clothing and so on. And to push the hunting/settlement analogy further, this is the way with shortwave radio - women tend to use the contents of the broadcasts; men, that is Dxers, and interested only in that sound-bite which allows them to identify the station and claim the QSL trophy.

If there is such a thing as "female listening", what might it entail? Well, of course, some of the international broadcasters, such as Radio Bulgaria, produce "women's programming",

of old-fashioned, stereotypical format. Even the BBC's internal broadcast, the nearly fiftyyears-old "Woman's Hour", adopts a stance which attracts people as listeners, rather than a specific sex - the "woman" tending now to refer to the producers and contributors. In

any event, women shortwave listeners are grown-up enough, not to require a tiny part of the output to be devoured to their presumed minority interests. Only Radio for Peace International attempts to deal with broader women's issues in an analytical way. It is therefore of concern to me, that certain international broadcasters are considering cutting their services. No doubt some of this can be blamed on the chronic world recession and the need for cutbacks, however there is also the feeling that people are hear-

ing the programs but not listeners to the content.

Except that I was
left with the query,
as a short-wave radio listener
myself, why is short-wave radio
apparently
a male-dominated pastime?

~~~~~~~~~~~~~~

A

With an overemphasis on SINPO ratings or the soundbite to identify the stations (which leads Dxers to be more interested to the sixties record playing at a certain time and frequency than the words that link the program together),

broadcasters could be forgiven for feeling that it would be cheaper and easier to transmit a continuous identification signal for OSL collectors.

The ill-fated Archduke Franz Ferdinand shot hundreds of bears and boars and deers, until he was shot himself, his assassination sparking off the First World War. The wall of his hunting lodge in the mountains beyond Prague are fur-lined with the rows of stuffed animal heads. The archduke may have had a gargantuan appetite, but it seems impossible that he could have consumed more than the tiniest fraction of what he hunted. He is an example of distortion of the atavistic hunting instinct - of the kill without the social use. And some aspects of straight Dxing, dare I say it, have that same sterile feel. It seems to me, that if we do not "use" the content of the broadcasts, we risk losing them altogether. Yes, we would be left with local stations to dig out, and the fascination of clandestines and jammers, but the world picture would be smaller and poorer. So let us delight in the electronic magic of the being able to hear a small voice from afar, yet at the same time nurture the radio programs. Let us treat the radio programs how the program makers intended them, by listening to them, understanding them and if appropriate by giving feedback. If we don't they may die. And nurturing is not, after all, an exclusively female quality, is it?

So is the conclusion that the radio subjects attracting women listeners are as diverse as the women themselves? Probably. Speaking personally as a linguist, traveler and musiclover, shortwave radio is obviously a treasure-chest for me. But it has a far more serious and valuable function in the diversity of news and views available. Perhaps this is an obvious point, but it needs looking at in the context of the filtered and limited information all countries receive from their own press and media services. The well-known intellectual, Noam Chomsky, sees these powerful organizations as agenda setters and largely responsible for thought control in democratic societies, to the extent that sometimes it may seem that "history is what appears in the New York Times". The antidote is to review as wide a range of news sources as possible, to hunt out nuggets of information, "to compare yesterday's lies with tomorrow's leak" in order to try, at least, to build up a full, truer picture of events in the world. Shortwave broadcasts are a great tool in this search. How many radio in Britain were tuned to how many countries, for example, during the Gulf War in an effort to counteract the sanitized version of news permitted by the armed forces? Speaking personally again, I want to know what is going on because of my involvement in international human rights - but anyone and everyone needs knowledge to exercise some power in their own personal sphere, however large or small.

A Short But Very Efficient 60 Meterband Antenna

Neal A. Perdue

A pet project of mine through the years has been to try to develop short antennas for use on the Tropical bands by those dxers with limited space. Many base-loaded and helically-wound vertical designs have been tried, some pretty decent, but I have never found a vertical which really approached the performance of a full size inverted-V or dipole on those bands.

Originally, when I came upon this antenna, I was trying out a 1/10 wave design which I had reason to believe might work. It didn't. In the course of the experiment, I disconnected the GND side of the antennas and there was an immediate and dramatic increase in signal strength. Using only one side of the inverted-V antenna, which is only 9.5 ft long for 60 meterband operation, signal strength was within 1 S-unit of that of the full size 96 ft. inverted-V. An added bonus was significant noise-reduction properties.

I frankly do not understand exactly why this antenna performs so well in a region of the RF spectrum where "plenty of wire" has always been the accepted rule of thumb. But, it stands to reason that if you can't get? wave of wire up (two? wave sections for a dipole or inverted-V) some length of wire must be better than some other length. "Get as much wire up as possible" is not a viable theory, especially now that most receivers have 50 ohmantenna impedence networks. Too much wire can actually hurt your reception. My 90 meterband inverted-V is pathetic, without a tuner, on 60mb.

This antenna is non-directional. It can be used, on the band it is cut for, without a tuner, but an inexpensive random wire tuner is recommended for optimum performance. Only the center-conductor of the coax is connected at the receiver or at the antenna switch, so the more expensive coax-tuner is not required. This antenna is not recom-

mended for image prone receivers. It is definitely recommended for receivers with 50ohms antenna imput circuits, although the impedence of the antenna is not 50 ohms. Image prone receivers need resonant antennas to help them out. This antenna is not resonant, but provides the best performance of any antenna I've ever tried out which is not resonant. It is truly a remarkable performer. considering it's size. Typically, a loss of about 1 S-unit will be observed compared to a full size dipole. This is certainly negligible to Dxers with limited space. Excellent results have been obtained here with a height of only 25 feet at the feed point. With a 90degree included angle at the apex, at this height, only 55 feet of ground space is needed for the inverted-V, with rope coming right down to takes at GND level.

Regardless of location of the antenna, I would suggest 40 feet of RG-58/U coax since that is the length used successfully here. It is questionable whether or not this section acts as part of the antenna when used as a "floating GND" as it is in this design. Actually, it's more like a shielded downlead. The shield of the coax is connected at the feedpoint as with a dipole to one leg of the antenna. The center conductor is connected to the other leg. The difference is that only the center conductor is connected to the receiver. For 60mb operations, each leg is 10 ft long, with 6 inches folded back on the insulator. For 90mb, use 14 ft. 9 inches on each side also with 6 inches of it folded back. A difference of an inch or two is no big deal.

I see no reason why this antenna could not be used indoors, in either a dipole or inverted-V configuration. Don't coil the coax, though as this will effectively load the antenna to a different resonance. Yes, it will, even though it's shielded! If space limitations are all that are keeping you from Tropical band DX, don't pass this up. I've worked 12 years to come up with this one. It's a good one. Please use it, someone.

Listener's Library

T. J. "Skip" Arey N2EI
P. O. Box 644
Waterford Works, NJ 08089
Internet: tjarey@mosquito.com

As things go, this is my "Back from Kulpsville" edition of Listener's Library. There were quite a few interesting books for sale and on the silent auction tables. But this year what caught my eye was a series of books from one of our fellow ANARC clubs The National Radio Club. As most of you know, the NRC is a Medium Wave club. Their journal DX News has had some remarkably professional technical articles over the years, particularly in the area of antennas. Many of these medium wave designs have potential for Tropical Band listeners so they are worth a look by shortwave folks as well. Al of the books we will examine here can be ordered from the

National Radio Club Publications Center PO Box 164 Mannsville, NY 13661-0164

All the prices listed are for non-members. You get a better deal if you join the NRC.

THE NRC ANTENNA REFERENCE MANUAL—Volume One 50 Pages \$9.95 ISBN 1-878994-01-8

First printed in 1975 and update in 1995, The manual is a serious collection of articles published in DX News prior to 1974. This volume mainly concentrates on basic medium wave antenna construction including loop and longwire designs. Additionally there are a series of antenna amplification systems. All of the designs and electronics work are within the scope of the average hobbyist. Each design includes helpful illustrations. While many of the drawings are crude in appearance, they are complete and easy to follow. Included is the classic design for an

Altazmuth Loop. In past years at Kulpsville you may have seen Dave Schmidt's display of this loop antenna. It measures about four feet per side. Relax, there are also designs for a two foot loop that is easier to manage. You will also find basic information on classic Beverage design as well as tuned longwires. Remember folks, next time you plan to put up a "wave" antenna for shortwave, remember just how long one of these beasts needs to be to work efficiently on medium Wave. In amongst the construction articles you will

COCOCO

Many of these medium wave designs have potential for Tropical Band listeners so they are worth a look by shortwave folks as well.

cococo

find a lot of solid antenna theory that is widely applicable in the general monitoring hobby. Over the years I've built quite a few of the designs out of this book. (I'm a DC to Daylight guy, remember?) Loop antennas are great a busting through the noise and getting at the signal. If you are good with woodworking you can make some of these designs into beautiful pieces of furniture that you would be proud to show even you nonhobby friends. If you're not good at woodworking (like me) you can just use the designs to scare people with. A four foot loop has a "Mad Scientist" look about it.

THE NRC ANTENNA REFERENCE MANUAL—Volume Two 47 Pages \$9.95 ISBN 1-878994-02-6

There are a lot more things you can do at lower frequencies and volume two takes you down these paths. This book includes technical articles originally found in the 1974 through 1981 issues of DX News. There are several additional designs for loops and loop amplifiers, all of which expand upon those found in volume one. You will also find references to ferrite core loops that allow for high performance in a much smaller space than a full air core loop. Where volume two goes beyond is in the area of antenna phasing. Two antennas can be connected through a phasing unit to allow for significantly improved performance. Antenna phasing is an underutilized technology that deserves a good look by all radio monitors. This volume includes the designs of Mark Connelly WA11ON who you may remember won this years DXer of the Year award at the Kulpsville Winterfest. Once you get a look at the attention to detail that he places on his phasing unit designs you will understand why he is so well respected in the radio hobby. The articles break down the relatively complex process of phasing unit construction so that anyone can make a working unit and benefit from its use with almost any two lengths of wire. If you want to really see spectacular performance, apply phasing technology to a pair of beverage antennas. You'll never turn back to a regular longwire again.

This volume
includes the designs of
Mark Connelly WAIION
who...won this year's
DXer of the Year award

While the first two books are for the general hobbyist, these next two dig a bit deeper into the hard theory and design issue of antenna that many folks enjoy studying.

LOOP ANTENNA DESIGN AND THEORY 79 Pages \$12.95 ISBN 1-878994-13-1

As I've already pointed out. The loop antenna design has a lot to offer folks at the lower end of the shortwave bands. This book digs deeply into the math and science that explains why these designs have so much potential for the radio monitor. You will learn about topics such as loop pattern distortion that can actually be used to the monitors advantage when it is fully understood. Further advanced loop construction articles can be found with special concentration on the use of ferrite rods for antenna construction. These ferrite designs have great potential for use on the lower shortwave bands and their inherent directionality can sort things out on a crowded portion of the bands. Again, several designs for antenna amplification are included. If you have an interest in taking the loop concept to its maximum expression, you need to give this book a look.

BEVERAGE AND LONGWIRE ANTEN-NAS DESIGN AND THEORY 68 Pages \$7.95 ISBN 1-878994-11-5

I've saved the best for last as this volume has direct application across the shortwave spectrum. Many of us from time to time have strung really really long wires in hopes of snatching a few hard to catch signals. Most of us have operated on the basis of "get the longest wire up possible and hope nobody gets choked by it". Serious longwire antenna construction is based on sounder theory than that. This book puts down the foundation to allow you to construct wire antennas that are optimized for your particular application. The book includes a full technical analysis of the Beverage antenna design supported by diagrams and all that hard math that proves how things work. Further study of two-wire phasing is discussed including phasing unit designs. This book and a big roll of wire will change the way you do your listening forever.

Mobile SW Listening

(Part 3)

This month I will give you some antenna tips for mobile SW listening.

The one rule of thumb you should observe is that the longer and higher a mobile antenna is, the better it will work. You should limit your antenna height to 13 feet above ground to avoid hitting overpasses and tunnels.

Placement of the antenna on the vehicle is important. The farther away the antenna is from the engine, the less the pickup of radiated ignition noise. Experiment with grounding the coax at the antenna or leaving it floating. Select the option that results in less ignition noise. If you mount your antenna on the trunk lid, make sure you install a grounding strap from the lid to the frame. Also bond the tailpipe to the frame in several places to prevent the tailpipe from acting as an antenna to radiate ignition noise. Use a short piece of coax braid from large diameter coax like RG-8 for the braid.

SWLs are lucky to have CB and amateur radio antennas available at reasonable prices. Antennas designed for these services can also work well for SWLing.

A good choice for general daytime listening is the stainless steel CB whip marketed by Radio Shack (catalog 21-903 at \$15.00 US). This antenna is rugged. I have one mounted on the roof of my Ford Ranger pickup truck. The tip reaches a height of about 14 feet. I use a short piece of nylon fishing line tied to the tip of the antenna to pull it back slightly to keep it legal. The full size CB whip antenna also performs a community service by automatically pruning low-hanging tree branches as you meander down the road.

Antennas mounted on the vehicle roof are essentially nondirectional. If you mount the antenna near the rear of the vehicle, the directivity will favor signals arriving from the front by a few dB. I use a magnetic mount on the roof of the truck to hold my antennas. The mount has three circular magnets, each about 5 inches in diameter. A T-shaped aluminum structure connects the magnets. This mount has successfully held my unguyed helical whip at speeds of 65 MPH.

If you do not mind drilling holes in your vehicle, you can use a standard ball mount sold by Radio Shack (catalog 21-1115). Do not waste your money on a spring. They are lossy and cause your antenna to lean and whip around in the wind.

The stainless steel whip offers broad frequency response compared to shorter loaded antennas. My CB whip performs well from 9 to 30 MHz for receive-only use. For lower frequencies, a loaded antenna starts to work better. The lower you go, the bigger the advantage is for the loaded antenna.

A loaded antenna is one that has a short physical length compared to a 1/4 wavelength. The inductive reactance of a coil of wire cancels the capacitive reactance of the short antenna so the antenna becomes resonant. Loaded antennas tend to be narrow bandwidth devices. Efficient coils narrow the antenna bandwidth. So maximum performance at the lower frequencies is a compromise between gain and bandwidth. You either need a lossy loading coil, several antennas, or a base matching unit.

I use a fiberglass helical whip resonant at 7 MHz to cover 4.8 to 9 MHz. The antenna is a fiberglass rod with a wire wound around it. The coil makes the antenna resonant at 7 MHz. The small coil diameter and long coil length make the antenna more lossy and thus broader than more efficient designs preferred by hams. The fiberglass whip is only about 7 feet long so it does not need to be pulled back to be street legal. Fiberglass is more fragile than the stainless steel CB whip so I do not recommend it for public service tree pruning.

There are several brands of helical antennas. They are all essentially the same and sell for about \$20. I bought mine from Lakeview Company, Inc. 3620-9A Whitehall Rd, Anderson, SC 29624. They charge \$7 per order shipping and handling so you may also want to order a Model 375 magnetic mount at \$37.95 US. It is the one I have used for 5 years. Just be sure you stick it where you want it the first time because it will be hard to remove once it sucks onto your vehicle.

Amateur radio and CB mobile antenna mounts use 3/8 inch, 24 tpi female receptacles. The antennas can be fitted with quick disconnect fittings to permit quick removal. The mating base mount provides a transition from the 3/8 inch 24 tpi male screw threads to the quick disconnect. Radio Works, Box 6159, Portsmouth, VA 23703 sells a transition and 5 antenna adapters for \$23.75 US. Phone: 800-280-8327. Ask for their model 103S. They also sell fiberglass helical whips.

John Wagner, a NASWA member in Pickerington, Ohio, reports success using a Palomar 36 inch whip antenna called the Super Snooper mounted on a window mount sold by Radio Shack (catalog 20-023 at \$15.00 US). John has been experimenting for the last two years trying to develop the most cost-effective combination of receiver and antenna for mobile listening. He uses his Super Snooper with a Sangean 909 portable radio. He powers it from a separate battery. The battery isolates the radio from the car's

electrical system to keep noise to a minimum. The battery is a sealed lead-acid type sold by Radio Shack for camcorder use. If you use an external battery, make sure the voltage matches your radio. You could fry all the semiconductors in your radio if you connect the wrong battery or if you connect it backwards. I will have more on using your portable in the car in a later installment of this series.

For the purist there is also the screwdriver antenna, so named because it uses an electric screwdriver to turn a threaded nylon rod to raise and lower the loading coil within a tube. Finger stock at the top of the tube connects to the coil. The number of turns above the top of the tube determines the loading inductance. This antenna offers continuous operation from 3.5 MHz to 30 MHz. You can peak the antenna at any frequency within the range by switching the motor on and off. The hitch is cost. In my opinion the use of a screwdriver antenna is not cost effective for receive applications. If you think you might want one, High Sierra Antennas, PO Box 2389, Nevada City, CA 95959 sells one for \$275 US. You can check out their catalog on the web at ">http://www.hsantannas.com/info>">

Use good quality coax between any of these antennas and your receiver. Double shielded cable like RG-213 or RG-6 will minimize noise pickup on the lead-in. Be sure to route the lead-in so it does not pass near the electric fuel pump wiring, the engine ignition wires, or the car's computer to minimize noise pickup from these sources.

If you decide to run a converter ahead of your car radio the simplest approach is to use the antenna that came with your car. On some vehicles, however, the factory antennas have a preamp at the base which will not work on SW because power is needed from the radio and the converter cannot pass the current.

That's it for this month. Until next time, stay tuned.

Equipment Reviews

Alan Johnson 2490 Sharon Way Reno, NV 89509 CompuServe: 76665, 1756 Internet: 76665, 1756@compuserve.com

The Becker Mexico Car Radio

Good shortwave reception in the car has been a dream for many of us who spend any appreciable amount of time behind the wheel. There have been various approaches to the problem in the past, such as using a portable radio in the car with an external antenna or converters, which shift segments of the SW bands in frequency so that they can be received on the car's AM radio. There have intermittently been radios which can be mounted in a car's dash which provide SW coverage. This is the ideal solution, in my mind, as it provides a secure location which is usually easily accessible by the driver. Models have occasionally been imported from Europe over the years, usually with limited shortwave coverage. A few years ago, the Phillips DC-777 in-dash receiver was available. It did an admirable job of receiving SW signals and provided a wide range of coverage, but many units had premature display and keypad failures.

A New Option

The German firm, Becker Automotive Systems, which has provided the radios used in Mercedes-Benz automobiles, is now promoting and distributing the Mexico 2340 car radio. It is an in-dash AM/FM/SW radio and stereo casette tape player. An optional CD changer can also be added to the system. The amount of shortwave coverage that it provides is limited to the major international broadcasting bands (and not all of those), but it is well built and sounds great.

The Specs

The Mexico is manufactured in Germany and is designed for mounting in a DIN stan-

dard dash cut-out (approximately 7 inches wide and 2 inches high—the radio requires 6 3/8 inches of mounting depth). It is designed for four channel installations and provides 15 watts of continuous power (25 watts peak) per channel. In addition, there are pre-amplifier outputs available for use with higher power amplifiers in custom installations. The frequency coverage of the radio is LW: 152-282 kHz, MW: 531-1602 kHz, SW: 5900-15700 kHz and FM: 87.5-108 MHz. The shortwave coverage is continuous, between the limits of 5900 kHz and 15700 kHz, when using keypad tuning. The band limits when the unit is being tuned in Search mode are: 49 mtrs/5900-6250 kHz, 41 mtrs/7100-7550 kHz, 31 mtrs/9300-10000 kHz, 25 mtrs/ 115000-12100 kHz, 22 mtrs/13600-13800 kHz and 19 mtrs/15000-15700 kHz. There are a variety of tuning methods-manual tuning in one kilohertz steps on LW, MW and SW, search tuning in five kilohertz steps (10 kHz on MW and 3 Khz on LW), direct keypad tuning and memory presets—10 each on LW, MW and SW, 30 on FM and an additional 10 Autostore FM memories. The cassette player is auto reverse and has both Dolby B and Cnoise reduction (a feature that was missing on the Phillips unit), as well as program scan and search features. There is an infrared remote control pad and the radio has a security code feature which inactivates the radio when power is removed, until the correct code number is entered. The lower half of the front panel, which contains the LCD display and keypad buttons can be detached from the main unit for additional security. The color of the LCD display can be adjusted in 15 gradations from red to green to match the car's lighting scheme. I presume that the unit is single-conversion and no selectivity figures are given, other than the audio frequency response, which is listed as 50–3,000 Hertz in AM mode and 20–15,000 Hertz in FM.

Installation

Unless you have had previous experience with autosound equipment installation, it is probably best to have the Mexico installed by a professional. There is no standard for the way that the connectors that plug into car radios are wired and installation involves tracking down which wires are positive or ground and whether they are switched by the ignition key or not. Then there are the speaker leads, which are usually straight forward. However, my car system uses a separate tuner/amplifier system, so I also had to figure out the control line that turns on the amplifier when the radio is switched on. Since the review radio was loaned to me. I didn't do a full installation—doing it properly would have involved cutting up the Becker's wiring harness to make proper connections. In this case I used in-line tap connectors from Radio Shack to wire up the radio, Since room was tight. I only connected two audio channels and left the rear inputs on my car's amp system floating. These tap connectors work fairly well, but I wouldn't recommend them for a permanent installation, as the connection can be intermittent, especially with smaller gauge wires. The best method would be to solder the connections or to use the appropriate size "wire nut" type of connector. I used the car's standard antenna.

Operation

I would have liked to have been able to have done a review based on several weeks listening to the Becker Mexico at various times of day. However, due to the installation—wires hanging out of the dash with the radio balanced precariously on the console, I couldn't. My impressions are based on a couple of hours use on a Saturday afternoon, with the car parked in the garage. I must say, that in spite of the inadugate test conditions, I was favorably impressed. The sensitivity seemed quite adequate and the search tuning mode stopped right on the carrier frequency of the detected stations. The sound was very pleasing, both on shortwave and FM. There was some whining noise (not from the alternator as the engine was off), but I suspect that it was due to the fact that I had left the rear inputs of the car's amp unconnected, rather than a fault of the radio itself. Due to the relative lack of stations in the daytime, I wasn't able to make a judgement concerning the set's selectivity.

Summary

If you're looking for an in-dash car radio that provides shortwave coverage, this is your only choice, as far as I know. The frequency range is somewhat limited-although there is some possibility of future models having additional coverage of the 16 and 13 meter bands, but the range is certainly acceptable for listening to the major (and some not so major) international broadcasters. I don't think that the car environment is very conducive to DX'ing anyway, due to wind and road noise, as well as the need to pay attention to the road instead of ID's buried in the noise. The unit is somewhat expensive at less than \$600, but Becker has a reputation for quality and durability. After the initial installation, an in-dash unit such as the Mexico is certainly the most convenient way to get shortwave reception in a car. The unit is distributed in the US by Becker of North America, 16 Park Way, Upper Saddle River, NJ 07458, (201) 327-3434. Contact them for a list of dealers. Thank you Bill Crookham for providing the review unit. GN/

FOR SALE: DXtreme(tm) SWRL. The Shortwave Reception Log V2.0. Lets you log the stations you've heard, create reception reports automatically from customized templates and scripts, and track your monitoring station performance. SWRL(tm) features integration with Microsoft applications for the creation of reception reports, a full range of inquiries, and an extensive on-line help system. Runs on 486S+ PCs running Windows 3.1 or 95. Regularly \$26.95, only \$19.95 for NASWA members. Demo is available. Write for data sheet or visit us on the web at HTTP://www.dxtremc.com/dxtreme/. DXtreme Software, 26 Langholm Drive, Nashua, NH 03062. E-mail <dxtreme@ix.netcom.com>.

Listener's Notebook

Al Quaglieri P.O. Box 888 Albany, NY 12201-0888 FAX. (518) 453-0864 Internet: alcue@albany nel

AH, THE LIFE of an editor...it's one of Albany's three true Springtime days (sunny and mild), and here I am banging away at my computer! The only consolation is that it took the contributions of a whole bunch of other shut-ins (i.e. you boys and girls) to make this, our biggest June column ever, a reality. So hats off to all you paleface moles...now go out there and get some sun before your family throws a shroud over you!

Frequencies marked "x" carry "Grandstand", a separate sports service, at 0200-0800 on Saturday and 0300-0800 on Sunday. (BBCM)

Radio Australia has announced special frequenciess for coverage of the Australian cricket tour of the UK: Coverage of all one-day internationals (from 22nd May) and tests (beginning 5th June) will be from 0910-1300 and from 1430-1800; for Asia, 15510 kHz for the entire coverage period and 9580 kHz from 1600; for the PAC and PNG (hours not specified), 9860 kHz. (11-May/Radio Australia/BBCM/WWDXC TopNews/Bueschel-FRG)

Radio Australia's Crisis:

The final Budget breakdown for RA shows future funding arrangements as such: Department of Foreign Affairs and Trade to contribute A\$4m, and the Department of Communications and the Arts to contribute A\$3.2m for a shortwave and satellite service to PNG and the South Pacific. ABC will add to this funding to provide Indonesian, Mandarin, Khmer and Vietnamese programming estimated at A\$4.7m—meaning total funding of A\$11.9m for Radio Australia in 1997/98. The National Transmission Agency will receive funding of A\$2.5m for shortwave transmission costs from Brandon, Queensland and Shepparton, Victoria. The Darwin facility will no

longer be used for RA shortwave, and the NTA will explore possible future uses of the Cox Peninsula site. (13-May/Francis/EDXP).(What happens to the Northern Territory Shortwave Service, running 50 kW from Alice Springs, Tennant Creek, and Katherine? !!! Padula-EDXP) Seems the fate of Darwin is hotly contested: Radio Australia general manager Derek White told an interviewer the need for the Darwin transmitter was more important now that the Australian Broadcasting Corporation (ABC) board had decided to retain services in Mandarin (Standard Chinese), Indonesian, Vietnamese and Khmer. "We are doing our best to reach our audience in Asia from our transmitters in Shepparton [Victoria], but it's a great distance further away and that station is primarily designed to reach a Pacific audience...The fact is that Darwin was our most powerful set of vocal cords into Asia and it is a decision of the government that we have not been funded for that transmission. That transmission is operated by the National Transmission Agency—it is not ABC funds that pay for the transmission, it is entirely a government decision that that transmitter would not be available to us."

So, to recap: Languages staying: English, Tok Pisin, Bahasa Indonesian, Mandarin, Khmer and Vietnamese.

Getting the axe: Cantonese, Thai and French.

Losing: more than half the current staff (from 144 down to 67) (various BBCM reports)

BOLIVIA 4449.97 *R. Frontera*, Cobija, Pando 0120 Gorgeous music featuring harmony female vocals, syncopated guitar and percussion. Ads and announcements mentioning Pando—one used Blondie's "Call Me" as background music. Well-modulated, room-filling audio at peaks, though troubled by thunderstorm QRN. 0155 canned ID with echo effect. (6-May/Novello)

4599.92 R. Perla del Acre, Cobija, Pando 0150 SS pop and dance music, pre-pubescent-sounding female DJ between songs, but no ads, promos, or jingles of any kind. 0225 man: "Bienvenido, el mensajero de Perla del Acre..." and mensajes punctuated by flute music. Some ads during this program, too. 0245 turned it back over to the young woman who said a few words ending with "...la misma hora. Bye bye." and off. (8-May/Novello)

4599.95 R. Emisora Villamontes, 0258-0307* music, talk M anner, s/off at 0307. (25-May/Barrera-ARG)

4649.03 *R. Santa Ana*, 2335–2359 May 24, hrd a program with messages, at 2356 typical bands music, ID hrd at 2359 as "Radio Santa Ana." (24-May/Barrera-ARG)

4926.51 **R. San Miguel**, 0308-0323 salutations by the Mother's Day in Bolivia, mx, ID at 0319 as "...Radio San Miguel, el programa de las multitudes." (25-May/Barrera-ARG)

4945.02 *R. Illimani*, La Paz; 0912-0920 weak signal. (27-Apr/Nozaki-JPN)

5952.32 *Emisoras Pio XII*, Siglo XX; 1104–1108 program "Encuentro Nacional." (27-Apr/Nozaki-JPN)

5964.73 *R. Nacional de Huanuni*; reactivated its morning transmission. Noted at 0903, poor. (27-Apr/Nozaki-JPN)

6085.36 *R. San Gabriel*, 2201–2230, News and ads in Aymara, at 2207 messages, at 2208 heard "Radio San Gabriel" within a message, at 2229 again hrd "San Gabriel", ads. (2-May/Barrera-ARG)

6194.60 *R. Metropolitana*, La Paz; 0900-0906 fair w/folklore of Altiplano, M&W talk in Aymara. (4-May/Nozaki-JPN/Relampago DX)

6556.98 *R. Television Colonia* has been reactivated. I heard the station between 0005-0155, when it closed down. It was all-religious programming. ID at 0026 and at 0059 as: "La Radio que escuchas es Colonia, transmite desde Yapacani, St.Cruz, Bolivia, America Latina." Lo & distorted modulation, strong carrier with hum. (30-Apr/Iverson/Nordic Shortwave Center/DSWCI)

9717.1 R. La Plata first heard with weak signals 2110 with a special program about Colombia, its politics, economy, radiostations (even played a short ID of Radio Caracol), peaked 2120-2140 when the signal was fair! Fine ID at 2111 and again at 2126. I think this is a first for me, so extremely pleased to hear it. Has it been off for some months? I seem to have it last reported anywhere late November 1996. (21-Apr/Krone-DEN/DX Window/DSW-CI

Eleven mining, popular and community radio stations in the provinces of Oruro and Potosi have reached an agreement to further development. Yesterday they created a major radio network aimed at improving living conditions in their districts. The meeting, organized by Radio Pio XII, opened on Monday [14th April] and gathered staff from Radio Eucalipto of Eucalipto, Radio Challapata of Challapata, Radio Cooperativa Minera of Poopo, Radio Fantastico of Pasnia, Radio 16 de Marzo of Mina Bolivar, Radio Horizontes of Huanuni, Radio Amanecer of Huari, all of them in Oruro Department. Other members of the network include Radio Reflejos of Llallagua, Radio La Voz de Minero of Siglo Veinte, Radio Uncia of Uncia and Radio Pio XII of Siglo Veinte. The great radio network will become effective on 3rd May, when each of these radio stations will pick up the demands and needs of Oruro and Potosi Provinces. One of the network's main objectives is to open up prefectures and the central government so they can listen and attend to the communities' demands, strictly supervise management of the people's money, keep the network members updated and have the western provinces listened to throughout the country. (16-Apr/R. Nacional de Bolivia/BBCM/Krone-DEN/DX Window/ DSWCI)

Ref May LN and the mystery of the meaning of "Radio A.N.D.E.S.": While reading the Spanish portion of the bilingual newspaper sent to me by the station, I ran across an article which disclosed the meaning of the name of the station. The station serves a union which has members in five provinces in Potosi, and the initials making up the station name stand for the first letter of each of the five provinces:

[A]ntonio Quijarro [N]or Lipez [D]aniel Campos [E]nrique Valdivieso [S]ud Lipez

As the article says, "Estas 5 provincias forman radio A.N.D.E.S.", that is, "These 5 provinces form Radio A.N.D.E.S." (Lazarus)

BOSNIA-HERCEGOVINA RTV Sarajevo replaced 7108U by 7102.5U+carrier. Observed being football nx at 1530–1600. QRM by Budapest on nearby 7105 kHz, 1530 Romanian, 1600 Ukrainian. (18-May/Bueschel-FRG/WWDXC TopNews) [Heard well here too evenings-AQ]

BULGARIA Radio Bulgaria noted on NFs for Z97: 9700 Serbo Croatian *0530 16 May; 5850 Bulgarian to Balkans 2110, // 5860 17 May (Padula-AUS/EDXP)

CANADA 4877.5 RCJ 2340 Another 90-meter RCI subharmonic (along with 4812.5) showing very weakly here carrying an interview with woman reminiscing about her childhood. Fair on 9755 fundamental. (11-May/Hill)

CHILE 3180.84(H) Emisora Tepual, Puerto Montt 0334-0349 folk mx (cueca chilota), umbias and ID hrd at 0347 as "Radio Tepoal" and "En su sintonia CD159 Emisora Tepual, en amplitud modulada, desde Puerto Montt." Very weak signal. (25-May/Barrera-ARG)

5824.90 R. Triunfal Evangelica, 2233–2304, lot of gospel music, then praises by the Bishop and Director of the station, Fernando Gonzalez Segura, non stop gospel music. On May 3, heard the s/on at 2200 w/ID as "Esta es Radio Triunfal Evangelica....", on this day heard on 5824.94 khz (2-May/Barrera-ARG)

CHINA RFI uses Xian for EE to India 1400-1500 now on 11910 (ex 7110). (Padula/EDXP)

CLANDESTINE-AFRICA 7999.6 V.O.Sudan 1603-1655+ Arabic with Salem Aleikum and ID 1603, fair. Later, 1650, 12008 was audible in parallel, but extremely weak. (27-Apr/Krone-DEN/DX Window/ DSWCI) CLANDESTINE-ASIA 5407 Radio of the Provisional Government of National Union and Salvation of Cambodia is on the air on this freq from 2330-0130 and from 1130-1330. (Lohuis/DX Window/DSWCI)

COLOMBIA H2460.4 R. Viva, Pasto, fundamental anncd 1230, good during local darkness. Carries lots of local adverts and some Sistema Super hook ups (Bogota 970 kHz), but even in the course of their local prgr they use the slogan "La Superestacion". Mentions phone as 219366 and 219368. (18-May/Klemetz-COL) 0301 zd string with plenty of echo on anncts, big "Radio Viva" ID by M, and into modern tropical music with serious dance beats and SS ragamuffin rap. M DJ generous with IDs. (24-May/Novello)

H3126.3 La V de Pradera, Pradera, Valle, 2315 with program "Destapando colas", annoing 1600 kHz. S/off 2359 with NA. Poor signal and distorted audio. (18-May/Klemetz-COL)

6063.8 Colmundo Bogota, noted with their new 5 kW @2155. (17-May/Klemetz-COL)

CONGO-DEM. REPUBLIC (ex-ZAIRE) From late April through mid-May, a station supporting the rebel Alliance of Democratic Forces for the Liberation of Congo-Zaire and calling itself "Radio Butembo, Radio of the People," was heard broadcasting in Swahili and French on 7060 kHz. Station was located in the town of Butembo, in the eastern Zairean province of North Kivu, and was monitored from around 0500-0730*.

With the shift in government, the former OZRT [Office Zairois de Radio et Television—Zairean state broadcasting organization] has been re-christened Radio-Television Congolaise]. Former Voix du Zaire, 15245 kHz, is called Voix du Congo as of 17-May. (BBCM)

The former Radio CANDIP [Centre d'Animation et de Diffusion Pedagogique], Bunia, 5066 kHz, is now Voice of the People. Schedule is 0400-0800 and 1000-1700. (BBCM)

CUBA Radio Havana Cuba noted on new 13680 with SS 2130 (10-May/Padula-AUS/EDXP) Noted on new 13715 with EE 2030–2130 // 13725-SSB (15-May/Hambly/EDXP/Padula-AUS)

DENMARK updated *Radio Denmark* schedule thru 26-October, all programs in Danish:

7465 9560 9965

0030-0055

(27-Apr/Koie-R. Denmark/BDXC/Nieuwenhuis-HOL)

ECUADOR In compliance with a government request, HCJB World Radio plans to relocate its international transmitter site at Pifo, Ecuador, just east of Quito. Ecuador's Civil Aviation headquarters recently announced that a new Quito airport will be constructed near Pifo. HCJB has owned the 110-acre transmitter site for which the station is negotiating for government compensation. The site houses 11 transmitters, as well as 32 antenna systems and

towers. HCJB President Ron Cline calls the relocation is a huge job of up to four years, but says the government's decision is no disaster for HCJB. He says, "God has a great plan for us." He says HCJB will study how to best continue gospel radio broadcasts worldwide, and that relocation will allow ministry reorganization in light of new opportunities worldwide. (HCJB/Simpson/EDXP/Padula-AUS) This means HCJB will no longer attempt to broadcast direct from Ecuador to Europe (they're already seeking a relay), and may also have to use a South American relay to reach North America. The whole shebang could take up to 4 years to pass, but at the end of that time we may no longer be able to hear HCJB direct from Ecuador. (HCJB DXPL/Hauser/WOR)

3568.7 new station Radiodifusora Luciernaga del Condor, Yanzatza, Zamora Chinchipe, nightly from before 2300; announces 1100 and "3.57 onda corta" saying "dos frecuencias al servicio de la comunidad chinchipense, Luciernaga del Condor." Signoff was at 0230 (without NA or annot, just petering out after a pasillo). (18-May/Klemetz-COL)

4850.7 Emisora Luz y Vida reactivated, usually not on the air before 2300. (Klemetz/DatelineBogota) presumed the one here 0115 time check, romantic songs. Gone or f/out 0141 (4-May/Krone-DEN/DX Window/DSWCI)

4918.97 R. Quito, 0653-0658 boleros music, ID at 0658 w/jingle "Radio Quito...La Voz de la Capital desde la mitad del mundo...escuchan Radio Quito, La Voz de la Capital..." then ads. (25-May/Barrera-ARG)

EGYPT Radio Cairo noted this afternoon (2200-) on 9900 kHz with much-improved audio. It's obvious they've been doing some major work on their audio link to the transmitter, and it's about time. With the distortion gone, now you notice annoying level discrepancies between announcers (very low) and music (solid). Plus, now that you can hear the programming, you realize we haven't been missing much—today was a snoozefest talk on tourism followed by a program of rap music). (27-Apr/Quaglieri) I bet this is the new 500kW transmitter that has been installed at Abis. Obviously they're not using audio compression. Without it, most SW broadcasters would sound like that. (Sennitt)

Radio Cairo, Z97: AA to Australia 2000–2200 on 11990; EE: 1215–1315 to S. Asia 17595, 1630–1830 to C&S Africa on 15255, 2030–2200 on 15375 to W. Africa, 2115–2245 to Europe on 9900, 2300–0030 to EC N. America on 9900. (Bob Padula/EDXP)

EQUATORIAL GUINEA 5003.46 R. Nacional Bata, 2146-2200*, local folk music in Vernacular, at 2157 National Anthem, then s/off at 2200. (2-May/Barrera-ARG)

ETHIOPIA 9704 1459 R. Ethiopia signing on in V with good signal and clear "Radio Ethiopia". Although not in EE quite easy to discern. They use a long chime rather than the BBC type pips for a time signal. (6-May/Norrie/DX Window/DSWCI)

VO Tigre Revolution in Tigrignian 1500-1600 new 6315, and 5500 kHz (x7515). Also noted at 0330, 0400-0500, Sat/Sun til 0800. (8-May/PanI-view-BUL/WWDXC TopNews/Bueschel-FRG)

FRANCE French from RFI Issoudin to India and SEA 1500-1600 on new 15405 (ex 12030). (Padula/EDXP)

GEORGIA Georgian Radio's external service identifies itself in Russia as "Radiostantsiya Gruziya"; the English service announces itself as "Program Georgia." This schedule has been compiled from monitoring observations and station announcements. Broadcasts are irregular and not all transmissions have been confirmed.

(BBCM)		

Voice of Hope via Georgia: 1800-2000 English 9310 (BBCM)

Tests from High Adventure Ministry VoHope 15/ 16 May on 12120 kHz from Tbilisi were very successful. Regular service to begin June 4th. Good signals in SoAS. Progr consisted of the service meant for 9310 kHz as indicated in the announcements. Gave the UK address. (15-May/Goonetilleke-SRI/UADX/RN/WWDXC TopNews/Bueschel-FRG)

GERMANY On 25 April, *Deutsche Welle* officially inaugurated its new Nauen transmitting site, placing four new 500-kW transmitters online. A state-of-the-art antenna system will enable pinpoint signal targeting, and the facility is already capable of digital shortwave transmission. (BBCM)

GUATEMALA An unidentified station was heard with maximba music on 6180 kHz at around 2300. Possibly a Guatemalan? Radio Nacional? (Hauser/WOR)

HUNGARY *Radio Budapest* observed on new 11685 with Hungarian 0030-0100 (16-May/Padula/EDXP)

ICELAND 13860, Rikisutvarpid, (probably), 1913–1930*, talks M&W anners with news and comments, probably in Icelandic. (2-May/Barrera-ARG) Last sked I have for them shows:

sked I have for them shows 1215–1300 11402 13860

1410-1440 11402 13860

1855-1930 7735 9275

1935-2010 11402 13860 2300-2335 9275 11402

Frequencies station is known to use: 3242, 3295, 7870, 9275, 9282, 11402, 13835, 13855, 13860, 15770 and 15790 kHz. (direct)

INDIA 4790 AIR External Service *0000-0030* I've been hearing the morning Tamil service--a fixture on 4990 for many years--on new 4790 // 13795 and 9910 several evenings since May 5. Most days it mixs at equal strength with co-channel Peru--except for May 6, when it was astoundingly powerful, totally burying the OA and by far the strongest AIR signal I've ever heard on 60 meters! Not sure if this is still the Chennai transmitter--but wherever it is, it must be running at least 250 kw. Even more perplexing, where does this leave AIR's regional transmission from Itanagar, which is also supposed to be operating here from *0025? (Hill)

Here is the answer: AIR Itanagar is now on 4990 kHz moving out of 4790 kHz making Azad Kashmir Radio clear. AIR Madras moved in to 4790 kHz replacing and making way for Itanagar from 4990 0000-0115, both morning and evening transmitters. (24-May/Goonetilleke-SRI/UADX/WWDXC TopNews/Bueschel-FRG)

4800 AIR Hyderabad *0020 Usual AIR regional s/on format of test tone, IS, "Vande Mataram," talk in Indian language; quite strong. Hyderabad isn't a regular even when several other 60M AIR outlets are coming in well, which they were this evening. Probably Guatemala QRM is the main reason this one doesn't make it very often. (12-May/Hill)

All India Radio is negotiating for a relay station in either West Africa or the West Indies. This will enable AIR to reach the Americas where there is a large concentration of Indians. Meanwhile, in Doddaballapur (45 km from Bangalore), All India radio has installed six 500 kW SW transmitters. The area of the antenna farm is 260 hectares and has 35 remote controlled antennae using 21 towers. Using them, programss can be beamed in eight different

directions. Programs are fed via satellite link from Delhi, but in case of failure a local tudio will step in with 'canned' programs which will be updated every week. (19-May/Ghose-IND/WRTH/DXW/WWDXC TopNews/Bueschel-FRG)

The following AIR stations were on extended hours for the Indian election period (8-10 May), all monitored in Mauritius: 5050, 5005, 4972, 4850, 4840, 4820, 4775, 3945, 3915, 3347, 3247kHz. (Vaghjee-MAURITIUS)

INDONESIA 2580.5 Unidentified. First realized it was an Indo when it relayed Jakarta at barely perceptible level at 1200 0wn prgr from 1229 -mx relatively clear but speech astoundingly weak. Could be RSPDIZ Timor Tengah Selatan reactivated & down from 2582. (5-May/Foster/OZDX/Yamada-JPN/Jembatan DX)

2695 RPDT2 Ende. 1459* after brief rendition of the old Hawaiian theme (12-Apr/Foster/OZDX/Yamada-JPN/Jembatan DX)

2899.3 *RPDT2 Ngada*, Bajawa. 1420 Lagu-lagu pop and kontak pendengar 1457 signed off after wavelength and morning s/on time. A shift down from 2904. Can be a very good clear signal some days. (12-Apr/Foster/OZDX/Yamada-JPN/Jembatan DX)

2960 *RPDT2 Manggarai*, Ruteng. S/off between 1420 and 1430, (12-Apr/Foster/OZDX/Yamada-JPN/Jembatan DX)

3190v RRI Bandung (presumed). Certainly an Indonesian station,w/impossible FM'ing signal and ending Jakarta relay at 1522 Could be Bandung which has had transmitter problems in the past and ended up near here, e.g. 3181. (2-May/Foster/OZDX/Yamada-JPN/Jembatan DX)

3214.8 RRI Manado. 1245 Local pops. 1259 RPK. 1300 Jakarta nx relay. 1313 Local pops. Fair to poor. (18-May/Yamada-JPN/Jembatan DX)

3223 RRI Mataram 1012 Islamic recitation, weak but improving Also past 1532 on Apr 23 with bad modulation. Irregularly on air in April/May. (16-Apr/Foster/OZDX/Yamada-JPN/Jembatan DX)

3231.8 RRI Bukittinggi. 1502 RPK (Other station had already connected to Jakarta nx). 1503 Suddenly Jakarta nx relay. 1520 Local pops. Poor. (17-May/Yamada-JPN/Jembatan DX)

3250 *RRI Banjarmasin* 1317–1400, local pop music program with relaxed DJ. Tentative ID at 1329, but clear ID 1358. transmitter off air for a minute at 1339. (20-Apr/Boogert-SIN/DX Window/ Yamada-JPN/Jembatan DX)

3277 UNID noted 2205 at DX-Camp of the AGM of DSWCI in Lohals/Langeland. RRI Jakarta reactivated? At same time RRI Jambi could be observed

very well on 4925 kHz. (16-May/Helmbold-FRG/ WWDXC TopNews/Bueschel-FRG)

3325 RRI Palangkaraya 1317-1400. I checked this one frequently while listening to RRI Banjarmasin. Dull program with a lecture and some strange music. ID at 1359. 45444 (20-Apr/Boogert-SIN/DX Window/DSWCI)

3344.8 RRI Ternate 1948 IS, 1950 opening mx & opening anmt by M, then reading of Holy Koran. Fair. (10-Apr/Yamada-JPN/Jembatan DX)

3355.3 RRI Sumenep 2000 Jakarta relay, inaudible by 2010. Now reactivated, have detected the carrier (usually all you get) from around 1600. (Foster/ OZDX/Yamada-JPN/Jembatan DX) RRI Sumenep? RPK was only heard at 1859. Very weak. (10-Apr/Yamada-JPN/Jembatan DX) 1732 RRI Sumenep (presumed) with phone in, the phone ringing was not bad signal but the voices a bit low in audio to discern a great deal. It seemed to be a request show, music but not really western style was played. It was a busy line. Positive BI language and SCI at 17.59 confirmed that it was an Indonesian. I would love to get an ID on this one. Thanks to Dx-Window contributor who alerted us to this station. If WMR comes on earlier than they predict it may be my last chance to ID this RRI station. (5-May/Norrie/DX Window/DSWCI)

3904.8v RRI Banda Aceh 2328 Faintly audible several days since May 4 with short announcement by pleasant-voiced female announcer in Indo, then some kind of IS (not "SCI") and woman back for nonstop talk till 2345 or so. After brief musical interlude, woman takes the mike again. Begins to weaken around 2350 and is essentially gone by 2355. Some days, the freq reading is down closer to 3904.7. Weak signal and ham QRM combine to make copy exceedingly difficult at best. (Hill)

3905.0 RRI Merauke 1245 "Angkatan Bersenjata," 1300 Jakarta nx relay, 1306 tlk by M, 1308 EE pops, 1328 IS, 1329 local nx entitled "Warta Berita," 1341 local instrumental mx, 1359 closing anmt & closing mx. S/off at 1359. (19-Apr/Yamada-JPN/Jembatan DX)

3934 RRI Semarang 1910 Not a real log, because all we can get these days is a not so strong carrier. Running late 8/3 though usual s/off is 1705*. ZLXA 3935 is an everpresent pest. (Foster/OZDX/Yamada-JPN/Jembatan DX)

3959.7 RRI Padang. After Jakarta nx at 2108 it continued w/relay of Jakarta's Programa Nasional 1 until approx 2200 signed off. (12-Apr/Foster/OZDX/Yamada-JPN/Jembatan DX)

3959.8 RRI Palu 1359-1410+, unfamiliar piano IS at 1359, with 4+1 TP's at 1400. W ID as "Inilah Radio Republik Indonesia Palu;" same W ancr with local nx until 1410. Station has been very regular

here, and today was in the clear with an excellent \$9+ signal. (14-Apr/Martin/Cumbre DX/Yamada-JPN/Jembatan DX)

3960 RRI Palu 1559 ID, 1600 Jakarta relay 1/4. However, by 1604 recheck it had already gone off before the relay concluded. (Foster/OZDX/Yamada-JPN/Jembatan DX)

3976.0 *RRI Pontianak*. 1502 All night wayang kulit which was not relayed Jakarta nx on the hour. Still heard at 1900. Fair. (10-May/Yamada-JPN/Jembatan DX)

3996.2 RRI Kendari. 1530 Local nx w/ments of Kendari Usually on 4000 at this hour. 1600 warta berita ASEAN from Jakarta and 1607 back to own prgrs. I'd expected it would close before 1600. And what of RRI Pontianak 3996?! (2-May/Foster/OZDX/Yamada-JPN/Jembatan DX)

4000.0 RRI Padang 1552 Local pops, 1559 M ID "Radio Republik Indonesia Padang," then RPK. 1600 Jakarta nx relay. Fair. (1-May/Yamada-JPN/Jembatan DX)

4606.3 *RRI Serui* 1402 EE pops including mx by Beatles, 1419 local pops, 1458 RPK, 1500 Jakarta nx relay. Fair to poor. 0.1kHz down from usual frequency. (29-Apr/Yamada-JPN/Jembatan DX)

4750 *RRI Ujung Pandang*. 2150 Conversation with doves cooing in the background. Additional freq, significantly stronger than //4753.4 on 4/4. First noted it on 1/4 past 2230. (Foster/OZDX/Yamada-JPN/Jembatan DX)

4753.3 RRI Ujung Pandang, 1220 Jakarta nx relay. 1230 W ID "Kembali...Programa Satu, Radio Republik Indonesia Nusantara Empat Ujung Pandang," then "Berita Keluarga" by W. 1235 Local mx. Fair. (3-May/Yamada-JPN/Jembatan DX)

4790 RRI Fak Fak 2113-2117 2 M tlk, long speech by W, flute mx.//Ujung Pandang. (25-Apr 25/Gornati-ITA/Yamada-JPN/Jembatan DX)

4845 RRI Ambon 2123-2126 in // to my logging on 4790. (25-Apr/Gornati-ITA/Yamada-JPN/Jembatan DX)

4925.0 *RRI Jambi* 1129 IS, 1130 Local nx entitled "Warta Berita Daerah". Fair. (2-May/Yamada-JPN/Jembatan DX)

4931.6 RRI Surakarta (p) 1559 RPK, 1600 Jakarta nx relay, 1606 Wayang kulit. Very weak. (4-May/Yamada-JPN/Jembatan DX)

5040.0 **RRI Pekanbaru** 1705 telephone conversations. Fair to poor. Usually s/off at 1705. (28-Apr/Yamada-JPN/Jembatan DX)

5059 RRI Yogyakarta 1324 local pops, 1329 IS, 1330 local nx by M&W. Poor. (27-Apr/Yamada-JPN/Jembatan DX)

6024.7 RRI Banjarmasin 1650 Indopops, QRM'ing Kuala Lumpur's CC service 1/4. However, next day it was on alternate 6031.0. (Foster/OZDX/Yamada-JPN/Jembatan DX)

6071 RRI Jayapura. Noted at *1157 swapping from 6070 (1156*) and continuing past 1400. Could replace long unheard 9612. (24-Apr/Foster/OZDX/Yamada-JPN/Jembatan DX) 1450 Local pops. 1459 RPK. 1500 Jakarta nx relay. Poor. Thanks David Foster for this information. (17-May/Yamada-JPN/Jembatan DX)

6154.2 RRI Biak. 0740 Old-style mx, on earlier than previously hrd 0800 signed on. ID 0759. Drifted up a little too. (16-Apr/Foster/OZDX/Yamada-JPN/Jembatan DX)

6188.9 RRI Manokwari. 0944 Country mx a la PNG. As usual weak to very weak. (16-Apr/Foster/ OZDX/Yamada-JPN/Jembatan DX)

7098.5 RRI Yogyakarta. 2316 Still taking Jakarta relay with report from Department of Religion. Returned to own studio 2319. (14-Apr/Foster/OZDX/Yamada-JPN/Jembatan DX)

7173.2 RRI Serui 0735 tlk by M & W. Poor. (2-May/Yamada-JPN/Jembatan DX)

9525.00 *RRI Jakarta* 1208-1220 In here with Jak news until 1209 then ID followed by more comments. Signal was fair but had plenty of long path fading. (9-Apr/Bolland/Cumbre DX/Yamada-JPN/Jembatan DX)

9679.9 RRI Jakarta 1240 dangdut mx, 1259 RPK, 1300 S/off. Fair to poor. (1-May/Yamada-JPN/ Jembatan DX)

9705.0 RRI Pontianak 0618 drama, 0635 local pops, 0654 s/off. Fair. (2-May/Yamada-JPN/Jembatan DX)

15125.0 RRI Jakarta. 0655 "Angkatan Bersenjata" which is usually heard at 0710-0800. 0700 "Fokus Berita" including "Informasi Haji." 0731 W ID "Inilah Radio Republik Indonesia Stasiun Nasional Jakarta," then local pops. Fair. (2-May/YamadaJPN/Jembatan DX)

RRI Sorong 4874.3 (ex-4874.6), reactive since late April, now signs off at 1340 after local news, entitled "Berita Terakhir" at 1330. (Yamada-JPN/Jembatan DX)

RRI Banda Aceh on 3904.8kHz reactivated in the beginning of May, but was inactive again since May 12. Sign off time was 1350. (Yamada-JPN/Jembatan DX) RRI Samarinda on 3295.3kHz reactivated on May 13. after 11 days absence. Signoff time is still 1515. (Yamada-JPN/Jembatan DX)

RRI Jakarta on 15150kHz is inactive since the beginning of May. Evening program is heard on 15125kHz instead of it. But 15125kHz is "Programa Nasional Satu". Its sign off time is 1300. (Yamada-JPN/Jembatan DX) RRI Medan on 4766kHz is inactive since April 7. (Yamada-JPN/Jembatan DX)

V.O. Indonesia 9525 reactivated on 4 May. (Yamada-JPN/Jembatan DX)

The local news title at 0530 of *RRI Pontianak* on 9705kHz is "Warta Berita Daerah." (Yamada-JPN/Jembatan DX)

RRI Ujung Pandang on 9552kHz now airs local news at 0630. (Yamada-JPN/Jembatan DX)

RRI Serui now uses 7173.2 local evenings and 4606.4 local nights. (Yamada-JPN/Jembatan DX)

RRI Padang again using 4000.0 as alternative frequency to 4003.2. (Yamada-JPN/Jembatan DX)

RRI Samarinda 3295.3 unheard since May 2. (Yamada-JPN/Jembatan DX)

According to the station, *RRI Tanjungkarang* 3395 is using a 1976 Harris transmitter and a multitrap dipole antenna. (Yamada-JPN/Jembatan DX)

Corrrections to Finn Krone's extensive Indo monitoring lists in last month's LN: 3976kHz is apparently *Pontianak*. 4697kHz is *RKIP Suranaya*, not RRI Surabaya. (Yamada-JPN/Jembatan DX)

IRAN 7215 VOIRI 0027* Ending broadcast in Chinese; IS and into Middle Eastern language at 0030, but cut off at 0034. According to the Z97 schedule, Chinese isn't aired at this time or on this freq. Wow, Teheran departing from a published schedule? (29-Apr/Hill)[who'd have thought???-AQ]

IRIB in Arabic 1330-1700 add 9650 to // 11995 kHz. (8-May/PanIview-BUL/WWDXC TopNews/Bueschel-FRG)

ISRAEL KOL Israel has added three more English broadcast. The new transmissions are: 1000–1015 or 1015–1030 on 15640 (Northern Europe)—— 1500–1525 on 9435 (Middle East / Eastern Europe) and on 11695 15640 (Western Europe)——1545–1555 on 12080 and 15650 (Western Europe). (Hanlon/Four WInds/Serra-IT)

ITALY AWR Forli replaced 11610 by 11795 kHz for Arabic at 1000-1100. (19-May/AWR Wavescan/ WWDXC TopNews/Bueschel-FRG)

ID, "R Tawantinsuyo, primera en el corazon del pueblo, por sus cuatro frecuencias, onda media, tropical, corta y FM 94.6". (18-May/Klemetz-COL)

6188.1 R. Oriente, Yurimaguas; 2212-2250* advs Todos los dias hay accidentes de transito en Yurimaguas, maneje con cuidado program Consultorio Agrario, tratan sobre la siembra de la soya poring. s/off 2247 w/NA. (3-May/Arrunategui-PRU/Chasqui DX)

6203.72 R. Cuzco, 2150-2157, melodic music by Jose Luis Rodriguez, at 2157 ID as "Desde el Cuzco al mundo, esta es Radio Cuzco..." by M anncr, then music. (3-May/Barrera-ARG) 0906-0930 fair w/nonstop OA folklore. (4-May/Nozaki-JPN/Relampago DX)

6250.7 R. La Voz, Andahuaylas, steady on this frequency for about two weeks, fading in by 2230 and still going for another couple of hours. (Klemetz-COL)

6261.1 JBL (or: JVL?), nightly with fair signals, for example May 10, 0015. (Klemetz-COL). R. JVL, also identifying itself as "Frecuencia Musical (and: Frecuencia Nacional) de los 62-60". Frequent adverts for Electronica El Futuro, Av. Tupac Amaru 105, run by some-one by the name of Leon Villanueva, which makes me wonder if this fellow has something to do with the station. A young basketball player by the name of Ester was invited to say hello on the air. As

a student at the local Colegio Juan Velazco Alvarado (Peruvian military dictator from the 70's) she greeted "la audiencia de R. JVA", which, if a 'Freudian slip', would indicate that station name is JVL rather than JBL. (20-May/Klemetz-COL)

6329.0 *R. Estacion "C"*, Moyobamba, San Martin; 2320-0003 nx program El Patrullero 6325 ID "Por estacion "C" NOTA: A las 0000 entran en // con R. Mar de Lima y la senal la cortan." (25-Apr/Arrunategui-PRU)

6420.3 *R. Mi Frontera*, May 9, 0140, good signal, noticed thanks to phone alert from Osterholm in Finland. Not on the air same evening. (Klemetz-COL)

6479.82 R. Los Andes, 0212-0220, May 4, folk 0A music, at 0218 "Son las 9 de la noche con 18 minutos", pgm hosted my M anncr. (3-May/Barrera-ARG)

6520.2 *R. Ondas del Rio Maranon*, Aramango, Bagua, May 10, 2250 to about 2345 s/off, w/ preview of music request sessions for moms to start May 11, 1000. Slogan: "una senal viva surcando los Andes del Peru". Fair signal. (10-May/Klemetz-COL)

6535.8 R. Huancabamba, Huancabamba; 2255-0010° advs ID "Huancambamba, la nueva alternaticva radial, estamos difundiendo una programacion variada para todos los gustos y para diferentesades animado por diferentes comunicadores sociales...Radio Huancabmba, transmite para todo el Per y el Mundo la emisora de las grandes mayorias, escuchada por mas peruanos..." (26-April/Arrunategui-PRU/Chasqui DX)

6797.73 Radio Ondas del Rio Mayo, Nueva Cajamarca; 1135–1138 fair w/canned ID and many local advs. (4-May/Nozaki-JPN/Relampago DX) 0012–0045 mx ID "Y estamos saludando a traves de las Ondas del Rio Mayo..." advs Botica San Juan la que cuida su salud mx chicha ID "A todos los amigos que escuchasn las Ondas del Rio Mayo de esta localidad de Nuevo Cajamarca y a lo largo y ancho del Peru..." (25-April/Arrunategui-PRU/Chasqui DX)

6895.0 *R. San Miguel* with slogan "la onda integradora", May 9, until s/off midnight. (Klemetz-COL)

6997.6 R. San Ignacio "la voz de la peruanidad", reactivated and on a new frequency, around 2300, with music, and lots of dead air. Good, strong signal. (9-May/Klemetz-COL) R. San Ignacio, Av. Santa Rosa 751, San Ignacio (Jaen), has been off the air for the last few days. Station is run by Cesar Colunche, who used to run R. Huancabamba, 6281v, silent for the time being but to hit the air again soon, per Colunche, May 11, when he was entertaining studio guests such as Lucho Julca, owner of Estereo 100, and Oscar Vasquez Chacon, ex-DJ on R. Frecuencia San Ignacio, 5700, and now mgr (not the owner) of R. Peru, 7032. Colunche said he'd take

phone calls at (0)94 716238 plus two other numbers. I gave it a try, but at the other end was a chap by the name of Evaristo Campos, who wasn't even at the station but at his own car repair business at Av. Santa Rosa 701. Colunche got the message, however, and in discussing habits of "radioaficionados" on the air, he remembered his "gran amigo Takayuki" who went to see him at R. Huancabamba.- This R. San Ignacio operation seems to be totally different from the one which was on 6751 in June 1995, on 6747.2 from Aug 1995 to July 1996, when they moved to 6746.2 and, in Sept, to 6753.3 which was to be their last recorded frequency. (Klemetz-COL)

7032.0 R. Peru, San Ignacio, reactivated, and on a new frequency, ex-5926v, May 10, 2250 and later with tropical music and ads. Uses slogan "R. Peru, la frecuencia internacional." DJ says they are on FM stereo in addition to SW. Poor-to-fair; R. San Ignacio, in the same town, on 6997.6, is considerably stronger. (10-May/Klemetz-COL)

7141.96 R. Ayabaca; 1154-1200 poor. Eventually I caught its signal here in Japan after hearing it during my stay in Lima in January 1997. (4-May/Nozaki-JPN/Relampago DX)

PHILLIPPINES Radio Veritas changes effective 4th May.

1430–1525 Russian 9665 (ex-9670) 0000–0025 Sinhala 11820 (ex-9670) 0030–0055 Tamil 11820 (ex-9670) 1500–1555 Filipino 9540 (ex-11715)

POLAND Polish Radio Warsaw summer English schedule:

1930-2025 7285 6095 6035

(BDXC/Nieuwenhuis-HOL)

New relay outlet of Polish Catholic assoc. Radio Marya, noted on SW 6255 kHz at 1900–2000. Had tremendous signal, so assume at least 100 kW, not Amateur Radio equipment in use. (8-May/Bueschel-FRG/DX Window/DSWCI) Powerful signal, S9+40db in Moscow,perhaps via a transmitter somewhere in the European part of CIS. (8-May/Pashkevich-RUS)

SOUTH AFRICA The Investment Channel has ceased broadcasting from the Sentech site, the last program airing at 2200 on 12 May. (Kathy Otto-SEN-TECH/RNMN) [This should come as no surprise to anyone who managed to catch one of their short-lived, amateurishly dull broadcasts, all of which made the station sound more like a fancy solicitation scheme than a legitimate news and info organization. Good riddance!-AQI

The new World Music Radio—WMR—will commence broadcasting as of May 31st 1997 and will be on the air every Saturday and Sunday at 1800-2200 on two frequencies: 3345 kHz (for Southern Africa only) and 6290 kHz for "the rest of the World". The transmitter site is South Africa, and Africa will be the prime target area for the new broadcasts of WMR. However the strong signals of the 250 kW transmitter is also believed to be well heard in parts of Southern Asia, the Middle East and Europe. (DSW-CI Hotnews) Tests in mid-May widely heard in target area and elsewhere.

SUDAN State-owned Sudanese Radio in Omdurman is continuing to broadcast test announcements in Amharic and Somali inviting listeners to report on their reception. They are transmitted on 9024 kHz between 1530-1700, when the station begins its regular external service broadcasts on that frequency in French (at 1700-1800 and English (at 1800-1900).—The frequency of 9024 kHz is also used at other times of the day for Sudanese radio domestic service broadcasts in Arabic. The station is using this particular frequency in order to jam the broadcasts of the opposition radio station, Voice of Sudan, which transmits on 8000, 9025 and 10000 kHz at 1715-1915. (3-6 May/BBCM)

SWEDEN Radio Sweden, Stockholm, observed on NF 7135 with EE 0230-0300 to Americas, 10 May. Also on NF 9430 with EE 2120-2200, QRM from Athens 9425. (17-May/Padula/EDXP)

TAJIKISTAN VoTibet 1220–1255 new 11570 kHz via Dushanbe 200 kW, 125 degr. (also bought transmission time on 11550 and 11560 kHz.) Ex Tashkent-7400 kHz. (8-May/PanIview-BUL/WWDXC TopNews/Bueschel-FRG) Its also interesting to note that VOT is sticking very close to Radio Free Asia's Tibetan broadcasts. When VOT was on 7400, RFA was on 7355 and now RFA is on 11575 just 5kHz up! VOT closes at 1257 and RFA starts at 1300! (Goonetille-ke-SRI/UADX)

A Tamil group in London—former BBC employees—are planning their own organization to provide news service to Tamil-speaking areas of the world. IBC—the *International Broadcasting Corporation*-conducted their first test on 15, 16 and 17 May at 1330–1430 via Dushanbe, Tajikistan on 12070 kHz for south India and Sri Lanka. 24-hour broadcasts

have already begun on satellite, and regular short-wave broadcasts—from 1300-1400—also may have begun by time you read this. (15-May/RN Media Network/BBCM) Test reception only fair at best due to signal strength. Might shift to another CIS location. Yet to see whether this is a genuine broadcaster or a politically motivated station. (19-May/Goonetilleke-SRI/UADX/WWDXC TopNews/Bueschel-FRG)

THAILAND 6149 Radio Station Or Sor broadcasting from the Royal Palace in Bangkok was heard in Northern Thailand at 0330 until sign off at 0500. (Lohuis-THAI/DX Window/DSWCI)

BBC World Service is moving its 6085 to 6140 kHz at 1400–1500 via Thailand relay. (WWDXC Top-News/Bueschel-FRG)

TURKMENISTAN During a recent visit to *Turkmen Radio* in Ashgabat, I got the following information in addition to a QSL. Although the WRTH still mentions the "Voice of Turkmen" programs, they were dropped when Turkmenistan became independent on October 27, 1991. Their true Foreign Service seems to have remained largely unknown. It was started on September 4, 1993. When it ended on April 18 last, they had English Mondays to Fridays at 1900–2000 and Russian at the same time on Wednesdays. Frequencies: 279, 675, and 5015 kHz. The service may return some time in the future, however. (5-May/van Delft/DX Window/DSWCI)

UNITED ARAB EMIRATES—ABU DHABI Final J97 schedule, all programs in Arabic:

0200-0400 6180 9695 15315 17770 21735 0400-0500 6180 9695 21630 21735 0500-0600 7215 9695 21630 21735 0600-0700 7215 15265 21735 0700-0800 7215 15265 17760 0800-0900 13605 15265 17760 0900-1300 13605 15265 17760 21735 9605 13605 17760 1300-1400 1400-1500 9605 11945 13605 17760 1500-1600 9605 11945 13605 15265 1600-1700 6180 9695 9770 13605 15265 1700-1800 6180 9695 9770 11710 15265 1800-2000 6180 9695 9770 11710 11945 2000-2200 6180 9770 11710 11945 (Padula-AUS/EDXP)

Abu Dhabi noted from 0850 on unlisted 17825 and// 17885 in AA, music and announcements. On 17885 from 0900 terrible mess with Kuwait. (27-Apr/Ludwig/EDXP/Padula-AUS)

URUGUAY CX8 R. Sarandi bought Radio Libertad Sport for \$1,130,000, to be part of a multimedia sports group. CX18 Radio Libertad Sport (890 MW & CXA61 6045, inactive) will be renamed as "Sarandi Sport". Concerning the SW activity of the now sold Radio Libertad Sport, its uncertain what will happen. The "Radio Integracion Americana" project on 6045 is now confirmed as defunct. (9-May/Nigro/DX Window/DSWCI)

5780U Uruguayan Navy ute transmitter, Montevideo used as feeder to relay soccer match transmissions from AM stations in Montevideo to the crew aboard of the school ship "Capt. Miranda" for important matches playing the "Libertadores de America" Cup. Hrd on May 6, relaying CX22 R. Universal (1070) 0110, and CX16 R. Carve (840) the next day. This 5 kw transmitter was also heard relaying radiotelephone family chats. (6-7-May/Nigro/DX Window/DSWCI)

USA The Voice of Greece is planning on using VOA sites at Delano and Greenville to reach North America. Watch 9590 (Delano) between 1200–1350. (VOG/Bevis/Hauser/WOR)

Last month's LN discussed another new U.S. in-dependent shortwave station being planned for Macon, Georgia. Now comes news that a new station planned for St. Mary's, Georgia, has been approved by the Feds and issued the callsign WEUR. (McClintock-WWCR/Hauser/WOR) [Don't know if these two are one and the same station, but no doubt each will fill an important void in the current international broadcasting spectrum, helping to cement the sterling reputation for fairness and quality entertainment already established by this nation's independent shortwave voices.—AQ]

UZBEKISTAN Radio Tashkent to SoAsia morning service 0100 English, 0130 Dari, 0200-0230 Pushtu, observed here in EUR on new strong 7195 kHz.//medium leveled 7190 and 9375 kHz, and poor 9530 kHz in parallel. (2-May/Bueschel-FRG/WWDXC Top-News)

VIETNAM new v7153 kHz RTV Bac Thai, fade in approx. 0945–1430*, most of the time Hanoi relay / /5924.5. Local program at around 1300 til s-off, take care with ID's. (4-19-Apr/Schulze-PHL/DX Window/DSWCI)

ZAMBIA By time this hits print, Zambia National Broadcasting Company (ZNBC) should have two new 100-kW transmitters online. These new Continental senders—paid for and installed by the Chinese government—will replace aging senders provided by the Chinese some two decades ago. Three new "lazy-H" antennas (60, 49, 41 mb) are also being installed in conjunction with the new transmitters. (1-May/Stubbe/HCJB/BBCM/DX Window/DSWCI)

Pirate Radio Report

Chris Lobdell P.O. Box 146 Stoneham, MA 02180-0146 Internet: piradio@usa1.com

Hi and welcome to another PIRATE RADIO REPORT. Sorry about last month but a rather large schedules section got us bumped out of the line up. Anyway, we're back and all information for both the May and June editions is included in here.

Return Of The AM Pirates!

When I talk to many DXers about listening to pirate stations, one of their main complaints is that the stations broadcast in sideband, the signals are drifty and hard to tune in, plus the music sounds terrible in sideband.

Well, I've got good news for you. The month of May brought the appearance of two new pirates who broadcast in AM. Both stations have very nice sounding audio and strong signals throughout North America.

Who are these pirates you ask?

Well, the first one to make an appearance was KRAP. KRAP was first noted on May 5th putting in a great signal on 6950 kHz around 0030 UTC.

The station op goes by the name of Fred Flintstone [gee, I wonder if he's related to Yabba Dabba Doo of Radio Two?]. The format for this one seems to be classic rock from the 70's and 80's. According to the maildrop operator, they will be using Box 109, Blue Ridge Summit, PA 17214 as their forwarding address.

The second station, RADIO METALLICA WORLDWIDE was first heard here around 0025 on May 10th on 6955 kHz.

This outlet likes to play hard rock as its name implies. Dr Tornado is what the operator calls himself. He claims to be "the most powerful pirate station in the nation" and says he's operating a full 10 kw!

No one knows if he's telling the truth of course, but he's been heard in Scotland,

Germany and Uruguay so one thing's for sure, he's definitely not using one of those 10 watt "grenade" transmitters. RADIO METALLICA WORLDWIDE has yet to announce a maildrop but promised an internet address soon. As soon as we find out what it is, we'll announce it here in the PIRATE RADIO REPORT.

Radio Ship Project Floundering

As I mentioned last month, I got in touch with Allan Weiner, who is in charge of outfitting the ocean going tug Electra as a floating radio station.

What Allan said was that the religious group funding the project has failed to come through with a promised \$20,000-30,000 that would complete the repairs to the ship's hull and pay for the transmitters.

The project is in limbo until the money is received, if it is received at all. Weiner did disclose the destination of the ship was to be a Caribbean country.

I guess we'll just have to see if this project sinks or floats!

1997 Pirate Radio Directory Available

The 1997 edition of the Annual Pirate Radio Directory edited by George Zeller and Andy Yoder is now available. This soft cover, 8.5 x 11 inch format book from Tiare Publications lists all North American shortwave pirates that were heard in 1996. The book lists addresses, format information, DJ names and includes a brief history of the station's activities.

You can buy this from Andy Yoder's Cabinet Communications for \$11.00 plus \$2.00 shipping and handling in the USA. PA residents must also add sales tax. Make checks or

money orders payable to Cabinet Communications. Their address is Box 642, Mont Alto, PA 17237. It will also be available from Universal, Grove and direct from Tiare Publications as well.

Radio KAOS Calls It Quits!

I'm afraid to say that another popular pirate has made it's last broadcast. This popular station was heard from coast to coast with a nice blend of music and comedy. Joe Momma and company, you will be missed!

Book Review

ACCESS TO THE AIRWAVES-MY FIGHT FOR FREE RADIO by Allan H. Weiner [as told to Anita Louise McCormick].

[Loopanics Unlimited, soft cover, 1997.

Did you ever wonder why Allan Weiner would go through so much toil and trouble to set up two radio ships only to see them fail? Well, this excellent new book on the life of Weiner shows what makes him tick. It traces his life as a boy who used to take radios apart and put them back together, through his high school years where he was constantly in trouble with the authorities all the way up to the present.

I found the book to be great reading! All the information about the outfitting of the Radioship Sarah and Radio New York International is in there as well as ill fated Fury 5/ Brother Stair radio ship project.

There are some interesting segments of the book which cover Weiner's involvement in legitimate radio undertakings in New York and Maine which demonstate his desire to make radio profitable under adverse circumstances.

I think you'll find ACCESS TO THE AIR-WAVES an interesting read. You can order the book directly from Loompanics Unlimited by calling toll free 1-800-380-2230 [360-385-7471] The book is \$17.95 plus \$4.95 S&H in the USA. My book arrived in about a week.

Loggings

Thanks to Dan McCarthy in Georgia, we have loggings!

MYSTERY RADIO was noted from 0130-0200 UTC on April 13th with uninterrupted music and a couple of IDs on 6955 kHz USB. They use Box 146, Stoneham, MA 02180 as their maildrop. [McCarthy-GA]

RADIO EUROGEEK was noted on April 7th on 6955 kHz from 0217-0244 with parodies of movies, pills and an announcer sounding like Harpo Marx. Write to them at Box 28413, Providence, RI 02908 [McCarthy-GA]

RADIO KAOS was heard on April 13th with their last broadcast on 6955 kHz USB from 0002 UTC but the signal was covered by two other pirate signals. Not much was heard. [McCarthy-GA]

WREC/Radio Free East Coast was heard on 6955 USB from 0225-0245 UTC on April 13th with a comedy program. You can write to them at Box 1, Belfast, NY 14711. (Mcarthy-GA)

Come on guys, how about supporting your club and sending in a few logs for next month?

Vote In The Pirate Pol!!

I'm still looking for your votes for your THREE FAVORITE PIRATES! If you can't think of three that you like, just send in one or two choices, that's fine! Also, if there's a particular pirate program that you liked, past of present, let's hear about that too! Because last month's column was missing, we are extending the voting period until July 1st. Also, please send your pirate logs as we need them! They can be sent via Fred Kohlbrenner or directly to me. I'll be waiting for them!

With the longer days, the 43 meter pirate band should propagate longer into the evenings. Remember to tune to either side of 6955 because if you don't check the adjacent frequencies, you may be missing something!

Until next month, Happy Pirate DX!

QSL Report

Sam Barto 47 Prospect Place Bristol, CT 06010

SPECIAL OFFER: Your QSL Editor is offering foreign postage stamps to use as enclosures or gifts with your reception reports. We are offering 600 stamps for \$5.00; 1300 stamps for \$10.00 or 2000 stamps for \$15.00. With each \$5.00 order we will include absolutely free at least 300 US stamps, most of which will be commemoratives! Thats a total of 900 stamps for only \$5.00; 1900 for \$10.00 or 2900 for only \$15.00. You will be amazed at the types of stamps in the package. Please try to inclu include two or three dollars for mailing costs. Most domestic orders orders will be mail Express..Sam.

Last month we left off at Sulawesi so we will pick up the QSL Column from that point...Sam.

Jerry Lineback 220 West Third Garnett, KS 66032

Greetings and welcome once again to the SCOREBOARD. The SCOREBOARD is a quarterly feature of the NASWA JOURNAL. In it, DXers, from beginners to seasoned pros get to share their progress in the hobby. C/H = countries heard and C/V = countries verified. Country counts should be made according to the NASWA Radio Country List. You must update at least once a year. The SPOTLIGHT this issue is on North America. Thanks to all contributors. You can use E-Mail to jalinebk@kanza.net

Another nice turnout this month despite the early deadline. Contributions received here after May 1st will be forwarded to the editors in June when go back to our regular 10th of the month deadline. When typing up your contributions please remember to leave two blank lines between each item, and don't forget to include your name with each item too.

Have a nice summer everyone!

SA.

MFJ News Release

MFJ ENTERPRISES, INC., P.O. Box 494, Mississippi State, MS 39762 USA Phone: (601) 323-5869 FAX: (601) 323-655;

NEWS RELEASE For Immediate Release

Richard Critz Stubbs Jr., KC5NSZ (601) 323-5869

MFJ-1026 can turn your antenna into a directional receiving phased array and 60 dB null wipes out interference and noise... for only \$139.95!

When you plug your station antenna into the MFJ-1026, your antenna system turns into a directional receiving array! You can place a null up to 60 dB deep on any type of noise and interference arriving from any direction and wave angle. Wipe out interference and noise before it gets into your receiver!

It works on all modes — SSB, AM, CW, FM — and frequencies from VLF to VHF. You can instantly change from nulling to peaking a signal at a push of a button and improve weak signal reception!

The MFJ-1026 will wipe out all kinds of interference! Lightning crashes from distant thunderstorms, severe power line noise from arcing transformers and insulators, lamp dimmers, touch controlled lamps, electric drills, motors, industrial processes, TV birdies and more can be eliminated with the MFJ Deluxe Noise Canceling Active Antenna.

With the MFJ-1026 in line at your station, you can eliminate unwanted signals and expose hidden stations. Is a strong local ham overloading your sensitive receiver? Cast a deep null on him and literally take him out -- you won't even know he's there. You can even dig out a weak station hidden under a powerful one on the same frequency! Null out your local AM broadcast station, underneath you might find an exotic, distant station on an island you've never heard of!

The MFJ-1026 is far more effective than a noise blanker. A noise blanker can't completely remove much stronger interference than your desired signal. It can't prevent overload by canceling noise before it gets to your sensitive receiver. A noise blanker can't peak or null signals.

The MFJ-1026 is better than a phased antenna. Your antenna and a MFJ-1026 in line can electrically "rotate the array" while the antennas remain physically stationary. You can adjust both direction and wave angle of null or peak.

MFJ's Deluxe Noise Canceling Active Antenna can be used as an adjustable phasing network. You can combine two antennas to give you various directional patterns and improve receiving signal levels.

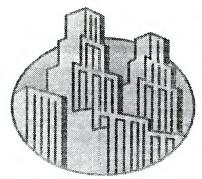

MFJ's new noise canceling active antenna is very easy- to-use. It simply plugs between your transmitting antenna and transceiver. To null, adjust amplitude and phase controls for minimum S-meter reading or lowest noise. To peak, push reverse button. Use built-in active antenna or an external one. Has constant amplitude phase control. A RF sense T/R switch bypasses your transceiver when you transmit. Adjustable delay time. Uses 12 VDC or 110 VAC with MFJ-1312B, \$12.95. 6 1/2 x 1 1/2 x 6 1/4 inches.

MFJ-1025, \$119.95. Similar to MFJ-1026 less built-in active antenna, uses external antenna.

The MFJ-1026/1025 noise canceling devices come with MFJ's famous "NO MATTER WHAT" one year unconditional warranty. MFJ will repair or replace (at their option) for one complete year.

For your nearest dealer or to order, call toll-free 800-647-1800, fax 601-323-6551 or write to MFJ Enterprises, Inc., 300 Industrial Park Road, Starkville, MS 39759.

ORCHID CITY SOFTWARE

VOYAGEUR V1.1 for DOS

The newest database suite from Orchid City Software has just been completed. It is the Voyageur v1.1 Radio Database for DOS. The Voyageur v1.1 is a comprehensive suite of database programs for Broadcasting Radio Station's information geared towards the Radio DXer and Listener. The program includes the following database programs:

- RADIO STATION DATABASE More than 10,000 records of Radio Station schedules and frequencies plus more.
- UTILITY LOG WRITING A program for writing log reports and printing in a number of different formats. Type it once and print multi formats.
- RADIO STATION ADDRESS Thousands of Radio Station's Addresses and other pertinent station information. Prints mailing labels. Save time and let the program print your report addresses on a mailing label. Each record's address can be printed individually or all.
- RADIO STATION SLOGANS Never miss an station's ID because you don't know what to expect. This database has hundreds of station slogans in Spanish, English, Indonesian, French, Portuguese and more.
- RADIO STATION DX/SWL PROGRAMS GUIDE You want to know what's going on in the DX/SWL world? Here's a list of DX/SWL program schedules. Find any program by the day of the week, time of day, station etc.

Each of the database programs in the suite is easy to use with extensive sorting plans. The Voyageur v1.1 is completely read/write and can be updated, changed or data added. Each database contains thousands of records already. To receive your copy send \$29.95 ppd to

ORCHID CITY SOFTWARE P.O. BOX 18402 WEST PALM BEACH, FL 33416
