

DX N

VOLUME 39

FEBRUARY 12, 1972

NUMBER 17

"After 5 years with the NRC renewal in the World's best DX Club is a must. Thanks to the volunteers who make the NRC possible. " (Ken Chatterton, N.Y.)

IN THIS WEEK'S DX NEWS...

The Golden 20's - Ben Vein The NSP Situation: A Broadcaster's View - Jerry Starr

NEW NRC MEMBERS THIS WEEK ...

- *Benjamin Calucci, Rio Piedras, Puerto Rico
- *A.Y. Papafingos, Riverside, California
 - *Rogers Deakin, St. Louis, Missouri
- *Albert Mariani, Springfield, Massachusetts

Welcome to the NRC, gentlemen; we hope to be reading of your DX activities often here in DX NEWS. Dr. Deakin is the last of the "missing" 4 new members whose applications were stolen along with GPN's car last November. We apologize for the delay but as GPN told his insurance company, it just couldn't be helped...

RENEWALS...

Woodward... Foutz... Wilkinson... Northup... Chatterton... Hardison... Seaver...

NOTES FROM HQ...

No IDXD Monitor Reports this week; last minute call from Foxy reports that circumstances beyond his control prevented completion of his section this week; back on regular schedule next issue. Hottest tip of the week, he relays, is the Peruvian, R. Nacional de Peru, Iquitos being heard on 1017 kHz from its normal channel of 1030... Credit Department: last week's publication session -Big George Kelley, Lynn & Cary Pall, Diane and Carlita Nelson. Composition of this week's DX NEWS: Big George, Randy Kane, & GPN... Latest word from the Wilds of New Jersey is that the World Radio Handbooks are in the mail & will probably have been received before you read this... High latitude cx are definitely on the up-swing; perhaps an early termination of the Midwinter Anomaly?... Phillips/Peterson: Who or what is, was, or will be Lash LaRue? Most interesting letter in from Zbigniew Ogorek in Poland; held for next week...

BGK-NRC CONTROL

Since the collapse of CX in Mid-November I have done little DX, however, here's what I've heard. 11/15 Horby, Sweden-1178 very strong with female announcer in Swedish at 5:30 pm, some Barcelona underneath. Country number 69. After this date CX have been mustly poor, occasionally fair, 11/22 GJSA-1230 Que. s/off good in French at 1 am, 12/2 Agadir, Morrocco-1196 good with Far East style mx at 4:59 pm. 12/4 WPIK-730 Va. s/off heard well o/u WPIT at 4:44 pm. WECB-650 Emeralum College Boston with rock show u/W5M at 5:15 pm , has been heard during the day ever since, 12/20 WOBR-1530 NC heard well on test at 4:10 am u/WCKY OC, This was a very auroral evening. 1/2 WFBC-1330 SC, good at 3:48 am w/ID, then into MOR mx, 1/10 CHWO-1250 Ont, with great signal at 3:33 am w/MOR and ID o/u Pittsburgh. 1/13 WHNC-890 NC, finally heard at 4:48 am w/ET ID; all I ever get at sunset on this channel is super-pest Algeria, 1/25 WRIZ-1550 Fla. s/off good in EE at 5:47 pm. 2/2 CHRD-1480 Que. fair at 10:10 pm w/FF MOR, WBEC-1420 Ma, also finally heard, at 10:30 pm w/rock. 2/7 WGBI-910 Pa. good w/CW mx at 1:Zl am ID as "GBI Country". CJOX-710 Nfid. alone and strong at 1:30 am relaying CJON-930. CFCY-630 P. E. I. finally heard after years of trying. Time was 1:35 am w/SID, under lots of OC's, CFCB-570 Nfld, amazingly strong at 1:45 am with Fake Drake format "3 weeks ago today", hi, The best catch of all this morning was BBC Radio 3 synchronous stations on 1546 kHz at 2:30 am with a dynamite signal. Highest power of any of the 11 stations is only 1 kw. A quick check on 1457 revealed that they could have sold time in Boston this morning: \$9+20. It has been brought to my attention that I've never introduced myself in a Musing, so to be consistent, I won't. Goodbye.

CARY PALL --- 220 Kelton St., Apt. 18, Bosstown, Mass. 02134 or 5 Second Musing this issue; sorry bout that, but last night's cx warrant reporting. 2/6 PM: CHLC-580 very loud at 10:30, twas nothing compared to the fantastic sigs from the Maritimes and Newfoundland, as CBT-540 wiped out 540 on the TRF, and very possibly the 540 Nova Scotia icebox, as the echo effect was fairly pronounced when the two stns //'ed GBC net nx. Of course, when there was no net pgmg, the icebox was leveled by CBT's powerhouse signal. CX to Northern Europe was fantastic, as BGK told above. 2/7 AM showed only two new loggings; WGLI-1290 w/rr and ID's also WAVZ-1300 noted for the first time here; sort of an E. Long Island-S. Conn. opening (take note, Cliff Reno). BGK's log of the 1 kw GBer must have really been a thrill, congrats on that one! Other recent DX feats include CHRD-1480 on 2/2, HJCN-1100 on 11/15, CBNM-740 on 11/9. Only TA's this season were Portugal-665, BBC-647, WDR-1586, and Dakar-764 with decent sigs. Haven't really gone digging, tho. Hopefully, we'll be able to pull in a few more b4 the season ends. By the way, KNBR bombs in un I-80 in Pa. on MM's. Don't forget to keep a finger on the dial, hi, 73 gang. #

I. Sennington Farmaworth decided not to join the MC C. Last week I. Sennington Farmaworth's receiver sent up in amoke. Does this tell you comething? Join the MC CPC, write Jerry State for all the info.

- W B H W 1170. We hope that WWVA will not mess this program up after being silent at this hour for the last couple of years, lo and behold they were ON last week. We'll drop a note to WWVA begging them to make way'for this brand new station. Morse Code IDs, tones, warches, and voice IDs. Donald Powers, C.E. HASS EDMUNDS.
- W E E Z 1590. The write-up appeared last week, but remember, this features our own NRC buddy, Dave Schwidt taking non-collect phone calls, and awarding special prizes. Send reports to him at WEEZ, 3500 Edgesont Avenue, Chester, Pa. 19015. IAVE SCHWIE.
- W A Y T 1510. IRCA's Steve Tasffe will be at the mike at this brand-new station, & he too will take non-collect phone calls, at 219-563-1161. They'll be testing their new equipment, and using Middle-of-the-Road music and quele tones, and IBs, of churse. Address reports to Rosewary Eppley, Secretary, WAYT Radio Shorth Wabash Street, Wabash, Indians 46992. Tough channel, but give this fine new station a real good try! STEVE DAFFE.
- W N I O 1540. With both 50kws WPTR and KEEL silent, WNIO will be taking advantage of this as they conduct equipment tests on this silent day for the two 1540 giants. 286 in Nasmau may bother some Hasterners, though. They'll use Top-40-type music and Voice IDs. There is a chance of a stand-by by ZNS. Bend your reports to the Chief Engineer, Mr. Charles Ring, WNIO, Box 605, Miles, O. 44446.

K S R M - 920. Reports go to an old DK friend, Mr. Bert McAllister, News Director, KSRM, Box 489, Soldotma, Alaska. If memory serves correstly, Mr. McAllister was Chief Engineer at KSRC-1430, Mount Vermon, Washington. We got the info from the NHHC via IRCA, and have no direct info as to what sort of program it'll be.

On the face page of the January 29th BK NEWS, KLUC-1140 was listed for Feb. 14. We believe this is Feb. 21, as their regular frequency check is on the third Monday at the specified time. A card received here from "FAT" of the Flash Alert Service also lists the date as 2/21, so the write-up'll be in next week's issue.

The SVEC-AVEF DX special for VIMA appeared on January 24th; not 1/31.

GEORGE B. SHERMAN - 104 Pinewood Circle - Rosemount, Minnesota - 55068 Great DX of MM 12/27! HJDP-1020 R. Colosal @ 12:45 fair w/KGB KGBS nulled; XEAO-910 w/"A-O" ID @ 2:30; sounded more like 5kw than listed 250w. KCMO-1000 Seattle w/local NX mentioning Bellevue @ 3:57 poor u/KTCK/XECY; WKJB-710 P.R. surely the one w/SSB @ 4:15 poor u/QRM; WLCY/WTOB-1380 OCs IDed @ 4:20 good w/KRKO. SSS on 12/28 was KBHM Mo. s/off QRMing WGAR @ 6. 1/1- A new year, a new station & a new country as I heard R. San Pedro-850 Honduras @ 1:01 good w/ KOA nulled; KJIM-870 Tex. u/WWL @ 6:33pm; KFSC-1220 Col. w/SS till EE s/off @ 7: 02. 1/2 brought more good SSS w/additions of KUOA-1290 Ark. @ 6:30 s/off o/u KOIL; KSTR-620 Col. through mess @ 7:15 s/off & KERN-800 Col. s/off @ 7 o/XELO CKIW w/mention of polka & c/w format. MM 1/3 was another good one w/WEBR-970 N.Y. briefly atop WNSW @ 2:55; WCAO-600 Md. o/all w/rr @ 3:30; YVOZ-1200 Finally @ 4:23 during WOAI SP; KDRG-1400 Mont. testing new lkw XR @ 4:45 good w/WIUZ; WKVA-920 Pa. s/on-SSB good @ 5:30 spoiling possible WJAR which would be a new state. 1/10 must've been the best in years as I counted 25 TA hets! WRAT-1400 Ind. was rather poor on DX due to local KEEY (ex-WMIN) who is now NSP-MoR. Portugal-782 a shocked me w/good audio @ 2:50 during WBEM SP. KING-1090 fair w/rr u/KAAY OC @ :-3:12; CFJC-910 B.C. good o/all w/mx @ 3:55; KFXD-580 Ida. o/u CKY w/rr @ 4:05; CENM-740 Nfld. s/on @ 4:29 w/O Canada, province #8; KBIG-740 Cal. OC, ID @ 4:43; CEN-640 Nfla. u/KFI & //-740 @ 4:37; WINR-680 N.Y. good w/no QRM & rr @ 4:50; CFOS-560 Ont. s/on @ 5:45 w/KIZ. YVIX-570 noted fair o/WFAA @ 5:05, 1/11, during WKEN SP, while I was looking for WMCA which does not exist, hi. 1/16- DX included possible HIBE-1180 s/off w/march @ 1:25 after "tropical" mx & this is their reported s/off time, but not counted as not IDed yet. After giving up on 1180 due to KSTT-1170 slop, I tuned to 1040 & was surprised to hear PRG2 w/MoR till 1:45 ID as "R. Tupi, Tupi, Tupi". Then they faded u/R. Tropical. Country #33 & best foreign catch in some time / There'll be plenty of good foreign DK here soon as I just bought an HO-129-X. 1,351 heard. 73 & good DX.

BIAKE LAWRENCE - Box 803 - Canon City, Colorado - 81212

Many an issue has passed without a Musing from this once-weekly Muser, so it's time to change all that. A Realistic TRF received before Christmas has halped DX considerably because of its ability to null, & its sensitivity. I have heard three new countries (Costa Rica - TIHB-700, El Salvador - YSS-655, & Surinam-725) along with other goodies like TGRT-664 WSUN-620 HJJX-770 CMCA-830 & WIMJ-620. Some of the more recent DX follows. 12/30- I found KYVA-1230 IDing on f/c-TT @ 2:05am, a new r/c? 12/3lbrought YND-675 @ 1:10am. KOHH-580 S.D. came in w/ID @ 6:30pm 1/2. 1/3- KLTR-1580 Okla. in @ 6:30pm w/NX from the Okla. Net. Mexicans XEBU-620 & XEFD-590 came in on 1/7 @ 7:18 & 7:35pm, respectively. 1/10-Two TESTs were heard this AM: WWJC in very well @ 2:31 w/MoR, an ID, & a TC; and WHAT-1400 fair w/TT & CW IDs @ 3:09. I was rather surprised to hear WHAT. On 1/ 11, I heard KIKZ-1250 s/off @ 6:59pm w/SSB. Much-wanted KJCK-1420 Kan. came in 1/12 @ 6:12pm. 1/13- Station #900 was heard in KROE-930 Sheridan, Wyo..w/NX at 6:53sm. It seems after I passed 900, several of mu much-manted stations started pouring in. Examples: On 1/15, three long-desired stations, KINA-910 (@ 6:20pm). KFMJ-1050 (@ 6:28 s/off), & Krsy-1230 (@ 7:10) were finally heard. Equally longsought KEZY-1190 Cal. heard @ 7:220m 1/16 w/rr. MN 1/17 mid two good surprises: First, WHEX-1580 heard on very end of TEST giving what sounded like s/off & mailing address over the "Happy Day" mx @ 3:59am. Then, WTAE-1250 in fair @ 4:36 w/ rr & contest promo. 1/23- KRAN-1280 Tex. Elling & asking for calls @ 1:33am. 1/25 - KVMC-1320 Tex. s/off-SSB @ 7:02. Roger Winsor: Your 1050 GSQ mentioned in the 1/22 edition could very well be CJNB, but I'm not absolutely certain. ERC, what doma "FFC" stand for I know it's French-something. (Right, Blake - French-Onadian station -EC. The 1/22 edition was very interesting, especially the articles on station classifications and DX nostalgla. I would like to see more of particularly the latter, as I'm interested in old radio. An interesting note:

notes: The CE at local KRIN-1400 told me that while he worked at KIAM-1450 Alaska (a mighty 250w) they received a report from New Jersey! That's pretty hard to believe. 73s. (I'd love to see that report - ERC)

BHICE WINKELMAN - 1404 Alumni Place - Lawrence, Kansas - 66044

1/28. Greetings once again from the frozen wastelands of Kansas! More DX from Ellinwood over Christmas break: 1/9- WCKZ-1570 V/s/off @ 6:15 pm w/plug for FM outlet. 1/12- WCIS-1580 w/ID @ 5:11am; WRGA-1470 w/s/on playing Dixie @ 5:30am. KRYS-1360 @ 5:46 w/Community Bulletin Board, good and solid for irs lkw; WDMG-860 ID heard 5:55mm; CHML-900 w/ID @ 6am. 1/13- WIDG-940 w/r/c, ID @ 12:03am, then TT, very glod, no sign of KICA. DK from Lawrence on my trusty Sony portable sitting next to the window: 1/23- KFUO-850 w/s/off @ 6:59pm, no SSB. This is the station at Concordia Seminary in St. Louis. 1/27- KWHG-1500 w/ mx, ID 6 6:27pm at a fair level, then quickly dropped down but s/off still barely there 6:28-6:30pm w/SSB. That's the extent of my IN during the last ferwekks of any note. I am starting a new log from here in lawrence this week & nosity clears and locals logged so far so nothing exciting to report. Apologies Dep't.: To you guys on thd Flash Alert Network - sorry the KNEX-1540 info was too late to be of much value to you. I called HQ & was informed it wouldn't make it to DX NEWS in time but I didn't get hold of Flash Alert earlier due to the press of enrollment last week - sorry. Super-pest KXEL would make it tough anyway. 363 heard from Ellinwood, likely to be we maximum from there as I will be moving to Kansas City this Summer & want a fresh start! DK NEWS would be a bargain a twice the new rates! I will send in my renewal tonight before Kansas U. tries to take it away from me: 73 & bone DX.

JOSEPH MARKEWICZ - 1394 Elgin Avenue West - Winnipeg, Manitoba R3E 1B6

One network that not too much is known about is the "Contemporary News Network." The key station in Western Canada is CKY Winnipeg, which gets the accurate news faster than Winnipeg's other adult radio (that's one of CKY's promos). Anyway, here is a list of the Coast-to-Coast stations: CKIM Victoria! CKX: Calgary; CHAB Moose Jaw; CKIG North Vancouver; CHED Edmonton; CKY Winnipeg; CFRA Ottawa; CKBB Barrie; CHER Sydney; CHUN Toronto; CKPR Peterborough; CFOX Montreal; CJCH Halifax. I've heard CFRA give a Coast to Coast Canadian ID but the other stations don't seem to. The above list was aken from a calling card or you could call it a business card of Bob Lamli of CKY so it should be accurate. Some people have been wondering if we verifies. I asked this question to someone who works at CKY & he said "CKY does verify. However it does not verify every Tom Dick or Harry who sends in a report." Now you know what CKY's policy regarding reports is. Even though CJOB has installed a new XR I don't think it improved their coverage area that much. Before CJOB put in a new XR, both KFEO & KNBR were easy in CJOB's null. Now CJOB is very easy to null & many new stations have been making an appearance on 680. Also KFEO is causing CJOB's signals to flutter at times, right here in Winnipeg. I'm not the only one who has noted this. It's interesting to see that WDGY can still bomb out KBMR during the day. Comparing KHMR signals w/KFYR's I've concluded that KHMR sounds more like lkw than ten. KFYR could be passed off as a local here during the day & night. Just the other night XEVIP-1560 was heard again w/very strong signals. XEVIP was much stronger than weak XERF & stronger than already strong XERM. Are they really 500w at night? Don't tell anyone but they were heard on a ten transistor portable. I start writing my exams on 2/14, so not much listening done. 73.

MIKE SCHEKL - 5005 South Utah - Davenport, Iowa - 52804

short intro. I'm 102 and go to West High School (I graduate in May). I used to use an Electro-Brand 14 transistor portable but it got dropped five stories and wasn't much ledt to it. I have now a YS-60 six transistor. Anybody know its manufacturer? It looks like a small TV set. Antennas aren't my bag, seems like I'm placing them twice a day. Right now I'm using a 10' length connected through an antenna tuner (that doesn't work). You know, KOMA-610, KXXI-630. Changing the subject, I plan to get a casette recorder because I never thought to use one as a

6

continuous monitor. A rehash of 1971 - I started the year with 206 & ended with 398 (sob!) Maybe I break 500 before the year's out. Recent DX: it rolls in: 1/21- WKYZ-1250 @ 12:58 r/c, WBBK-1260 after WIBV s/off w/r/c @ 1:05, KABR-1420 @ 1:25 w/TT & WLET-1420 @ 1:30 ID as WLET, Georgia. 1/22- WVCM-1420 Iuka, Miss. w/ET w/a c/w album @ 4:14. WIAQ-1410 @ 5 s/on, WDDX-1420 @ 5:01 w/r/c. KIIK-950 @ 6:05pm SSS w/sports results. KFMJ-1050 Tulsa, CK @ 6:30 s/off w/mention of FM affiliate. It was no go at 1/3 TEST on KUFK but @ 5:45 s/off, after KFMJ went off I heard SS & thought of XEQ but heard the s/off. SN 1/23- a failure, except for infrequent KNBR. 73 & a happy 1972. (Welcome to the NRC's busings corner, Mike - we hope to hear from you soom again, but please double-space?" -ERG)

KKITH BIRLINGMAIR - Route 1 - Box 44P - Rockton, Illinois - 61072

Did you ever try to type a report in the dark? I was sitting here ten minutes ago tuping one to WRMI-910, when the lights went out. This on 1/24. A brief description of the WX. It has rained much of the day. It is now below freezing. It is impossible to walk safely on the road. I know - I tried. And on top of all that, a 40MPH wind from the W has come up. Nice. DX: 1/19-I logged WXCL-1350 w/lots of ads @ 9. KLOU-1580 w/WX (thunderstorms - I heard 'em), & heavy rr, 10:57. 1/20- I logged WIXN-1460 W/MoR & ads @ 5:19pm. KCTA-1030 in w/Bible program & s/off @ 7:03. KLRA-1010 heard w/light rr 7:11. KRLD-1080 @ 7:38 w/MoR, uncommon. SS on 960, w/MoR mx, loops SE, HJHN? SS on 970, loops SW, XEJ7 Times, 10:04 & lo:09 respectively. 1/22- Good PM for s/offs, all 1580. KAMI Mebr. @ 6:30. KLTR Okla. @ 6:42. KPIK Col. 7. Still 1580, not s/ offs, though - KLOU Ia. w/hard rr o/u WCIS, which had light rr. Both reported. Those two @ 7:15. CHOK-1070 heard w/light rr @ 10:45, rare. XEABC-760 u/WJR @ 11:35. KRMG-740 heard for first time @ 11:38 w/address given twice. 1/23- WHNL-910 heard w/light rr 2:37am. CKCY-920 heard w/standard rr, a pest that won't verie. Time, 2:57. XBCR-1030 had definite R. Centro IDs & their six-note IS @ 3:26. HJAI-1040 in w/fair signal, & IDs as R. Tropical, same as last year. Mx was a "cumbia?" This @ 3:39. WIMA-1150 heard w/NX & WX @ 4:03. WINN-1240 heard o/others on the frequency @ 4:09. Do they verify? They usually dominate 1240 at night. WKNR-1310 heard w/WX & rr @ 4:23. WTRX-1330 w/NX @ 4:42 o/u WFBC w/rr. 1/24- XEB-1220 o/u WGAR w/exceptional signal, no tax, @ 2:23. XELO s/on @ 3. all SS, on 800. KNBR-680 in very well w/MoR & MX @ 3:30, umn. Next, CMKP-670 tentstive, SS @ 4. I heard @ mentioned. CMQ/CNHQ // 640-630. All these noted between 4:06 & 4:27: WSUN-620 WDAF-610 WIBW-580 KSD-550 OC & KTCK-1000, all unn. Highlight of the night, KGBS-1020 in very poorly @ 4:28 w/only # minute of KDKA QFM, poor log. WWRL-1600 heard again, dominates nights after KCRG s/off. Time, 4:50. WDEE-15100 heard, IDs as the Big Dee, @ 5:28. WFBC-1330 again, I got log this time, 5:48. WSYD-1300 heard w/ID & NX @ 6:30. XEWA-540 s/on in SS @ 7:01 w/high style mx, IDed as "ch-kees ch doble-voo" - where's the A in XEWA? Winds now up to 55 MPH, house shaking, no school, maybe? 73s.

RON MERDEN - 7 Blueberry Hill - Groveland, Massachusetts - 01834

On 12/7/71 I went up to Evans Radio in Bow, N.H. I bought a used Hammarlund HQ-180AC & brought it home & started in DKing as soon as possible. I put oft about 150' of copper wire going W. Stations that I have received since then are as follows: WACE-730 WHCU-870 WHYI-960 WHII-1100 WLCY-1380 (on an ET) WNDR-1260 WHXW-990 (for a 50kw station it is quite difficult to receive, directional S), WRCH-910 WKDR-1070 WKLX-1350 & WGGO-1550 on their TEST. I have received quite a few locals I had been trying for. Verifications are coming inst a medium speed, about 45% of the reports have been verified. I am sending out f/ups, about one a week. I lost about two weeks' time 1/4-1/17 because my selectivity was slowly going on my set. I had to take it back up to Evans to have a tube replaced & to have it lined up/ The rough part of the school year is up now so maybe I'll get a bit more DKing done. I got accepted to Alderson-Broaddus College down in Philippi, W.Va. I hope they will let me put up some kind of an antenna down there. Good DKing.

DEADLINE IS EVERY THURSDAY FOR MUSINGS. PLEASE DO NOT FAIL TO DOUBLE SPACE YOUR REPORTS TO MUSINGS. KINDLY INCLUDE ONLY DX AND DX-RELATED ITEMS IN THEM. -ERC

INTERNATIONAL OFFICIAL PROPAGATION AGORDON NELSON 48 HARDY AV WATERTOWN MA 0272 DX DIGEST & FEATURES

REPORTEDLY IN OPERATION

Madeira Islands. CSB91, Posto Emissor do Funchal now operates with 1 kw and a 150' antenna; a new improved antenna is expected to be in use very soon not already employed; a power boost to 10 kw is in the offing when funds become available. (Ogorek, Poland) Note: EDMUNDS, TAYLOR, AND DANGERFIELD. (I've been after this one for about 6 years now and have never even had an SAH with Vatican; very likely both a power boost and antenna improvement - this is now the best bet for a new country for almost all of us... Editor) On 1529 kHz.

South Korea. The following stations are not included in the 1972 WRTVH: HLAS-680, 10 kw, Seo Hae Broadcasting Company (SBC); address Jook Seong Dong 44-2, Kunsan. HLAA-1220, power unknown, Choliru Broadcasting Company, Kwangju. The KBS station HLCS, Sokcho, has moved from 1570 to 1170 and is heard with very strong signals in Japan. Presumably a substantial power increase; said to be beaming programming to North Korea and has been heard in Sweden so may well be highly directional. South Korea is still jamming broadcasts from the North; strong jamming noted in Tokyo after JST midnight on 625, 695, et al. (Lars Ryden, Japan)

North Korea. Continues nightly broadcasts of figures (code), read by woman announcer. Hrd after JST midnight on several N. Korean MW frequencies such as 655, 695, 735, etc. (Ryden, Japan) One percent instructions for North Korean intelligence agents; 99% random garbage to keep NSA busy... Ed.

Tahiti. Tahiti on 740 announces as 20 kw. (Pete Taylor, in the South Pacific)

Bulgaria. A new station is heard in Sweden on 762 kHz; no further info. (ARC)

Gabon? Arctic reports reception of a West African supposedly identified as Gabon on 1416 kHz. (ARC) Perhaps indeed Gabon (unheard in North America to date); also possibly mis-ID of Bamako, Mali, also currently operating around this frequency? (Editor)

India. The EBU reports an unid Indian station on 725 heard at local sunset; no further information. Split frequency Indian stations are most important since the offer the only chance of reception here in North America; the last time EBU reported an Indian on 725 it turned out to be SRS in Surinam in Hindi; we had to set the pro's straight, to their considerable embarassment... This one looks o.k., though, since there's no chance for a Surinam-Europe path being open around European locan sunset. Any more information? (Editor)

CLANDESTINE & Otherwise ...

"Voice of Greek Democrats Abroad". On 12/21 the pro-communist clandestine Greek-language station, the "Voice of the Truth" broadcast the following: "The Voice of the Greek Democrats Abroad broadcasts every Tuesday evening... on 998 kHz from 2145-2200 CET... directed mainly to expatriate Greeks in the East and West..." Hmmm, the closest high power Russian transmitter to Greece is Kishnov, Moldavia on 998 kHz... Such subtlety... (Editor)

THE NSP SITUATION A BROADCASTER'S VIEWPOINT

Jerry Starr WHOT Radio Youngstown, Ohio

In recent times a great deal of hue and cry has gone up within the DX community concerning stations operating on a No-Silent-Period schedule. In recent months a number of NRC and IRCA members have suggested writing to stations asking for silent periods for the sake of the DXing hobby, a few have even asked members to write to the FCC asking them to require silent periods in order to preserve the hobby. While one can understand their zeal toward such efforts, remember that there is always two sides to every story. Having been a DXer and broadcaster for the past 18 years, I feel I am qualified to speak on the subject in a fair manner from a realistic standpoint.

The first thing to consider is almost a fact of life: NSP stations will always be with us. Like it or not, that's the way it is. Even those crusading for letter-writing campaigns must realise in the back of their minds that NSP stations will go right on with their schedules anyway. Now before you start calling them names, let's look at it from their side. Let's deal in facts,

There are, at the most, a thousand meduim-wave DXers in the country, probably half of these are what would be called "active" DXers. Out of 180 million people, this is really a tiny part of a percent of the people served by the broadcasting industry. With less than 4500 AM stations on the air and less than forty percent of these holding full-time licenses, that's really not a great number of stations for the population.

One argument is "Nobody really listens to radio at three or four o'clock in the morning" but this is just not true, Many people get up at 5 in the morning, many get home at 5 in the morning. Anybody living in or near any city with industry knows this. Any metropolitin area has people awake, going and coming at all hours, and these people are all prospective listeners. With most television stations off the air at that time, radio becomes their only connection with the outside world, their only source of broadcast entertainment or information. Suppose you are an industrial worker driving home after working a late shift at, say, 3:00 AM. You turn on your car radio and there's nothing there. Get the picture? Suppose there is some sort of a national emergency, you hear the sirens and turn on your radio and there's nothing there! It could happen.

Now look at it from another angle. It's Monday morning and a handful of DXers are trying to hear something through WCCO, for example. Wouldn't it be foolish to believe that there aren't more people trying to hear WCCO than those few DXers who are trying NOT to hear it? Think about it. And in the case of the higher-powered stations, people in the rural areas who DO get up very early in the morning count on their favorite station being there. Whether you want to admit it or not, NSP stations ARE offering a service to their listeners, listeners who number many times the DXers in a given area on a given day who wish the station was off the air. A station's primary obligation is to serve the people who want to listen, the regular or steady

listener, rather than the small number of DXers who think the station is a pest. If you think that people aren't listening to any station at any hour of the day, you're wrong. Stations that air commercials or announcements inviting listener response in the early morning hours find again and again that people ARE out there. Again, it's a fact of life, sad but true.

By this time, I imagine some of you are thinking I'm one of the bad guys for saying things in favor of NSPers. Well, being an avid DX fan, I've sat up and called a NSP station names just like you have, but being in the broadcasting business I also can see the other side of the coin. Sure, I wish WHOT would go off the air once in awhile, I'd like to hear something else on 1330, but I also realise the reason it is NSP.

Now for the letterwriting campaign. I'd be willing to bet that if DXers wrote letters to a thousand stations asking for silent periods, the results would be zero. While some stations agree to standby for short periods for a DX special on their frequency (a'la WHN) it is doubtful that any station would permenently alter their NSP schedules in response to DXers letters. Stations just don't work that way. Such letters would be viewed with thoughts ranging from "That's interesting" to "They've got a lot of nerve". The only result I can forsee for writing such letters is antagonism. An NSP station friendly to DXers, the ones that take the time to answer with veries, might decide "the hell with these guys". In fact, this has already happened. Stations with NSP schedules are on the air to serve their listeners or to make some money, usually a combination of both. Let's be completly realistic about it, while YOU think the DXing hobby is the most important thing you do with your spare time, to a station DXers are an insignificant minority, another fact of life. Call me names if you like, but that's just the way it is. If there were a hundred-thousand DXers, things might be different but that just isn't the case.

The best advice I could give about NSPers is: Learn to live with them, they'll be there whether we like it or not. They are a child of our times, a 24-hour-a-day society begats 24-hour-a-day stations.

If you still want to write letters, try this: Write to NSP stations and ask when their next silent period is scheduled. Even "NSP" stations have occasional silent periods, as you know. A station would probably be willing to tell you when they are off the air, even if it's only once-a-year. This information would be very useful for DXing purposes and in scheduling DX tests. Try it.

I hope I have shed some light on the NSP situation. This isn't an endorsement of NSP schedules by any means, I'm just telling it like it is. 73 and Good DX!

3

Greetings. With this issue, we can safely announce that we're caught up again. CX have been strange, w/ things going from dead to noisy, hi. As not much to note here, we'll move on into DX:

That's all, folks...

Now, if I may, some suggestions to Western CPC'ers: Really rough EC logs are Ore., Ida., WYO. How 'bout some tests from here, such as:

KWJJ-1080, KXL-750, KSRV-1380 for Ore. K3EM-1110, for Idaho KG30-1530, KEMD-980, for Wyo.

Those would seem best from the East. Other good bets from CPC from rough states: KS80-11h0-SD, KGCX-1h80-MT,

For WC'ers needing Easten states, I'm trying for another WRAN-1510-NJ test, and I'd appreciate other suggestions for Del., R.I., CT., the the latter

THE GOLDEN 20S

I thoroughly enjoyed reading Gordon Nelson's treatise "Down to Earth Grounds" describing a splendid ground system for your receiver. The January 22nd issue carried a most interesting report from Ray Moore on the late Ollie Ross' ground: four feet of copper tubing and rock salt!

For those who may be interested I have been a DXer for some 49 years but not continually active in the hobby, have been an NRCer nearly four years; I'm retired and in my middle sixties.

It was my good fortune in the early twenties to become fascinated with radio. How many can remember these old call letters DN4, AMB, PWX? Perhaps just a few old-timers. It was great, fellow DXers, twisting the dials in those days. There was no R.F. pollution then, no disturbances, no manmade noise or static as we know it today. Every radio station in the San Francisco bay area would sign-off every evening for a half-hour between 7:30 and 8:00 PM in behalf of the DXers!

In these early days interred Ford radiators, copper washboilers, dead B batteries and other metals were used for radio grounds with varying success. The water-pipe ground, the gas-pipe and the steam-pipe are merely hitching posts for electrical devices and should always be avoided by the serious DXer due to their high resistance. For those who are using the above type grounds I suggest you peruse GPN's reference on this subject in the November 27th issue of DX News.

During the early twenties I lived with my family in a hilltop home in Piedmont overlooking the San Francisco bay. Our location I felt was ideal for reception. I was sort of crank on antennae so I engaged an amateur operator in the neighborhood to assist me in installing the aerials. Three separate long wires of varied lengths were put up at different angles. Later I acquired a Radiola loop. Does anyone remember them? The next phase was a good ground. Let me relate the story of my ground system since it reminds me so much of Ollie Ross' copper tubing and rock salt ground.

In 1926 a wireless and railroad telegrapher, C.H. Preston of Chatsworth, California began experimenting with chemical grounds. While first developing this ground he used blue vitriol (copper sulfate -ed.) and copper plate but the chemical action soon consumed the copper plate. Later he worked out a formula containing several ingredients wherein neutralizing chemicals preserved the copper in its original state and permitted the action of the sulfate to grow into a spongy mass of copper while collecting its own moisture. The container was a heavy gauge copper cylinder about five inches in diameter and some two feet long.

The efficiency of this ground system proved so successful it was introduced to the radio market known as the "Permanent Radio Ground". It was featured in Radio Doings, the popular radio magazine of that era. Several radio stations including KNX installed the special size (weighing about 200 pounds) designed particularly for the broadcasting industry.

For several years these grounds were sold to radio listeners throughout the Pacific Coast. I was one of the early users of this excellent system, having buried two of the copper cylinders outside my DX den window. Some of my record DX catches were: 7ZL Hobart, Tasmania-516 meters (583 KHz-ed.), 250 watts; 6ST Stoke-on-Trent, England-288.5 m (960 KHz) 200 watts; CHNS Halifax, Nova Scotia-365m (825 KHz) 100w; KFIU Juneau, Alaska - 10 watts; KRC Changchai on 365m 100w. My domestic DX included 36 verified stations

14 in New York state including Ollie Ross' WOKO but their location in 1927 was Peekskill, N.Y., transmitting on 233 meters (775 KHz) with a power of 50 watts. Perhaps one of my best domestic catches was a small station in NRC HQ's present backyard- WAGS, Somerville, Mass. on 250 meters (834 KHz) and just 5 watts! Another rare catch was a 30-watter in New Bedford- WIBH on 209.7 meters (700 KHz). Regrettably I had to give up DXing and did not return to the hobby for many years.

As broadcasting progressed the word meters was fast becoming obsolescent. Yesterday it was kilocycles. Today it is kiloHertz. How quickly time passes! Life is just a perpetual succession of events, kilocycles and kiloHertz enter and make their exits, like friendly guests; so I likewise must make a hasty exit...

CONGRATULATIONS,
To long-time WRCer Frank Wheeler, on the birth of a grand-daughter, Miriam

To long-time MRCer Frank wheeler, on the birth of a grand-daughter, while Elizabeth Straite, on 12/22/71. She is Frank's first grandchild, and saistations go out to Frank on this happy occasion! Frank adds: "She's a real doll!"

DAN K. PHILLIPS - X-2 Seminary Village - Louisville, Kentucky - 40207 I look forward to hearing from Dick Truax when he arrives here in Louisville. My number is 893-2482. I'd also like to welcome ALAN PETERSON to the NRC. After trying for seven years to get him interested, and no luck, then GPW does it in one week - Wow! However the address he sent me must be wrong, as I sent him a two-page typewritten letter and it was returned to me because the Post Office mays "no such address or person." (Maybe he's the cousin of the guy at 11226 -ERC) DX has hit a slumber point here - CX don't seem to be as good as they were in October except for so many Auroral-type days. 12/22-MXPQ-1520 s/off @ 5:30 slong with WACA, s/off @ 5:30, two new coes for me. 1/13-WARD-540 s/on 8 7:45 o/CHK/WHIC, latter looped. 1/24- WHYT-1110 HS @ 10:42am. They are doing a good job with 250v for o/100 miles. 1/30- WHTE-620 m 9:30pm for call change. This is the third call for this station - they used to be WROL. 1/31- Three fulltime stations logged this morning which is unusual. CJRS-1510 IDed 8 2:45am (Yeah, Willis Lewis, I finally heard an ID). WHR9-950 8 3:40-3:55 for another good one. Finally WFML-760 @ Wan while trying for Starr's WQLN. I've tried for this one for years and years and now it is covering the frequency with beautiful signals. If Alan Peterson wants that letter of mine, he'd better What ever happend to Iash Iarue? send along a change of address card.

ERMIST R. COOPER - 438 Bast 21 Street - CARRIER ROUTE 56 - Brooklyn, N.Y. 11226 Halleluinh! Three veries in here - a v/q from CHRM-740, a CBC St. Johns w/q it is; a w/1 handwritten from WKTJ-TEST on f/up, and a fine v/1-SS from HIJE-830, Santo Domingo. I wonder if my friend Cemar helped out on this one? It is very much appreciated if he did: Only DX date this week was MM 1/31, and like Foxy Foxworth says in this issue (in Musings!), this was a morn to remember in the N.Y.C. area, with ANers WOR-710, WABC-770, WCBS-880, WWRL-1600 all off, but on occasionally testing during the course of the morning. On 1600, Only CJRN was noted, AM, & not yet on 710. On 770, I took a log on HJJX, Radio Tequendama, in Bogota, only to find I have this one verified under a former slogan, Emisoras Monserrate". I noted a whole raft of open carriers on 1380 most of the morning, and at various times I heard IDs from WLCY and WM. Also noted was WENZ-1450 back on AN-IN-NH. Once again, GES-560 really took over that frequency here at 3:45am s/on, but it seems they don't get inland at all. This PM, I noted WRIZ-1550 in SS but s/off of course is in EE, this month @ 6:15pm. On yes - one more v/1, that wog0-1550, telling of the next TEST on 2/28, also with 84 and 250 watts. My verie specifies I heard them on 84 watts. I too enjoyed Mike Collins' article on classifications of BCB stations, and also "Those were the Days" by Pay Moore - however, I hadn't been aware that I am considered a tough Editor. If I had have been, there never would have been an IRCA! CUNT.

TON MCCOUNTER - MRC - Box 83 - Bloomington, Indiana - 47401

Hi. DX continues to be decent as most time has been spent primarily on Mrs. 1/17-WCCM-1450 f/c-TT L&C (may be r/c) @ 1:1lam, good signal for a graveyarder. WHEX-1580-THST fair 2 on, taking calls on the air & playing rr. Then came WEYY ET w/c/w @ 3:20 for another newie. then WKIG r/c flipped in CK for 46.6 logged on 1580 thus far! 1/23-SSS, WGTA-950 s/off easy @ 6pm for #82 from Ca. (They signed off 30 minutes too late.) They s/off 15 minutes AFTER WXIW went off. Ga. stations are known to do this it seems (WSIZ & WLOR are two other examples). I have no complaints though, hi. 1/24- KWFR-1260 r/c-tt fair 1:26am (QRM from WFBM OC & an unusually strong KYA, S.F. For 1,000w non-directional they really get out!) WDXB-1490 @ 1:41am w/rr on the "Mason Dixon Show", #102 logged from Tenn. (my best state!) XEEU-1550 I think was the guy AN here MA (noted 3:08am) in KE w/Saul mx (they gave spots for some bank, hi ERC!) Then WCGO-1550 TEST w/instrumental mx & TT on Saw PSA! (#61 logged from Fla. as well) Then came #49 on 1550 as KCCM Comanche Effed w/quick ID & CC, a fairly lucrative frequency for KTs I'd say! (Now a KOBY TEXT on a MM 3-5am would be a nice 'lil addition!) KRVH-880 ET/TT 3:50am o/u WCBS, first time noted on this frequency (rimally.) I've logged & verified KNVM on old 1010 6 555 (friendly station) 25cv. They sent the works. Recent veries here include: v/1- WCON-1450 (enclosed CM & bumper sticker too) & WIFE-1310 (v/q &CM also - took f/up though). v/f- WKKE-1380 (finally) & WWJC-850-TEST (I've also got 'en v/2-ed back on the old 1270 frequency). Anyone having trouble verifying WTIS-1370 just send me your report & I'll secure a verie for ya! Also my new CM list is out - if you'd like a comy just give me a write. Also WBAT-1400 was on per DX sked - they skipped out to the WC! Over 2,000 domestics logged here now. 73.

FRANK WHEELER - Erie, Pennsylvania

I'm glad to see one of the Erie area boys joined the NRC, Dick Quimm of Fairview. We cail each other almost daily. It reminds me of years ago when I first got started DXing, when I awakened all the rest of the family at 2 am to tell them I got XEW, my first Mexican! I enjoyed Ray Moore's "Those were the days". I see he thinks I'm one of the oldest members - he is right. I too have copies of the old Radex magazine. These were the days when you could get a 50 watter on the HIR I got 1YA 18 mornings straight, and have never heard them since. That's when you hardly heard of a 24 hour station, & most everybody off the air when the f/cs were on. Now for my reception. While trying for stations for the Domestic Contest I picked up the following new ones: WAIK-1590 Calesburg III. III. 5:32pm 11/18, WGOE-1590 Va. 6:59am. WIRV-1550 Irvine, Ky. from 3-3:15 am test 12/6. WKTJ-1380 Me. on for IRCA @ 3:13. They sent a v/f, 12/6. WORR-1530 N.C. 4:02am NRC TEST 12/20, report sent, no verie to date. WMNA-1340 Va. 7 am 1/3, my first new one in '72. WHEX-1580 Pa. 2:45am on for NRC, I sent report 1/17. I had a TT on 1440 from 1:15-2:20 1/16 (one hour & five minutes) & they never gave a call or location of any kind, only TT. I was really disgusted as I stayed on that frequency & could have tuned elsewhere. I had a couple like that the week before. (It could have been the lk hetrodyne from R. Luxembourg, no?)

CHARLES L. SHAFFER - 1216-139 S.W. 2nd Avenue - Gainesville, Florida - 32601

I just joined the NRC in December, so you are reading
first Musing. I am 22 years old & an electrical engineering student at the U. or
Flordia here. I've been into SWLing since 1959, but only seriously into BCB
since 1969, & didn't get around to it in an organized way until more recently.
I've been a ham since 1965 (WB4CAP) & have held my first class phone license something over five years. I've worked part-time off & on as engineer for WRUF-850 &
WKKE-1370. I DX w/a National HRO-500P & "tee" antenna 60' high w/180' flattop.
I have ordered the reprint on the altaz. loop but won't be able to use it inside
the apartment; shucks. I collect patterns & CMs but somehow just can't get excited about veries. Recent catches: KIEA-550 KINI-560 KILI-610 WJDX-620 w/ET,
WJW-850 KKJK-950. I had a thrill here recently when two Fla. stations departed
from 1050, aparently at the same time. I'm currently trying for some more WC
stations, only KFI/KNX/XEPS to date. Also, has anybody ever heard WFAB-990,
WLFO-1220, or WMEM-1490 outside of South Fla.? My current total logged is 447,

with 357 domestic, 16 countries, 29 SH, 3PH. (?? -ERC) I'm just inching it up, but I look forward to every NRC Special. Flash - WPDQ-600 & WINZ-940 have switched from Top 40 to Solid Gold. Twenty-four hour phone here is 904-373-4401. CU in Miami! I enjoy the column! (Thank you C arles, & welcome to it, and to the NRC, and also, thanks for the double-spacing! -ERC)

PIERRE TREMEIAY - 1124 - 2e Avenue - Quebec 3, Quebec

Hi NRCers. Local CJRP-1060 finally increased its power to 50kw one month later than expected. Its nighttime power remains to 10,000w though. 12/9- CKCW-1220 w/NX on top of frequency entirely dominated by WGAR. Time was 11 pm. 12/10- WYYZ-1270 @ 1:25am. 12/27- MM @ 2:30am. WONE-980 showed for a new log w/NX. WISN-1480 coming in w/MX & rr @ 3. 1/3- CKEL-1410 noted w/no sign of CEMER. & MPOP off. about 2am. CHYR o/WOLF battling as usual on 1490, 2:15. 1/13-WTFX=1330 @ 3:30am. 1/14- W?A?-630 - time was asm. undoubtedly WMAL. 1/24- WIMJ -620 1:30am. CKWS-960 w/s/off & CENS taking over @ 2. CKIM-1570 recently fired their AN DJ. Everything seems to go wrong @ CKIM since two or three years. If we would count the number of employees fired since 1969, we could probably have a few stations go on the air. In the overall ratings for the Montreal area (the last ones issued by the BEN) they slided in 13th place far behind some FMs like CJFM & CFGL-FM. CJMS & CKVL are still the leaders as far as the ratings are concerned in Montreal. I'd be interested to trace cassette tapes of my FF locals & semi-locals for anyone else's locals. My main interest is the rr format. If interested. please do not hesitate to write. Verie came from KLIF-1190. This 60page DX NEWS wagen real Christmas gift for all us NRC members. Keep up the good work at BPC. 73.

JEREMY A. FORSTER - Box 245 - Wolfville, Nova Scotia

This is my first June, so an intro is in order (original, hi). I'm 19 and in my third year at Acadia University (here in town), majoring in Spanish. I've been DXing for about four years. I DX all bands. My RXes are a Marconi CSR5-A 11 tube superhet & a Sanyo ten transistor. The CSR5-A was built by the Canadian Marconi Company (1927-1944) for government purposes. If anyone is familiar with it, I would appreciate hints on how to get the most out of it. On BCB it covers only 1490-1600k. Is there some way to get the other frequencies? A week ago I tried out a Beverage of a sort. I joined six lengths of 100 vire (sizes 18-22). I placed the insulated wire along the ground, in a more or less straight line facing S, through my neighbors' backyards. So far they haven't said anything (it snowed the next day, hi). The end is attached to a 560 ohm resistor. It isn't grounded. Should it be, via a metal pipe or something? The near end is attached to RG-U58 coaxial connected to the antenna terminal of the CSR5-A or the telescope antenna of the portable. It's probably one of the poorest Beverages ever er built, as I have little knowledge of such things. So far, it seems to bring in an unbelievable signal increase. It brings in stations and countries from IA that I never heard before, e.g., Radio Mil-1180, Dominican Republic. I hope to carry out some tests to see what the aerial really can do. I plan to write in often, & next time I'll tell of some DX catches. I have three QSL (look out, leaders, here I come!, hi); R. Belize-834, heard @ 4am, 3/13/71, sent 3/15, received 3/29; CHNS-960 Halifax, WBHN-780. They sent a sked, nice letter & CM, also WBHN-TV, Ch. 2. Do I stop getting DX NEWS for that, hi? 73s & best of DX. (Welcome to the NRC, Jeremy, and we're looking forward to those promised DX Musings! -ERC)

CARY D. PAIL - 220 Kelton Street - Apt. 18 - Boston, Massachusetts - 02135

Hi there. I'm now beginning my fourth year in NRC - a re-intro for those who don't know me. I'm 18, married since August, & a freshman at Grahm Jr. College. Major is radio production. I am also involved in the production and music dep'ts at Grahm's carrier-current WCSB-640. DX has been limited due to school work as well as BPC duties. In fact, approximately 600 copies of MNEWS are in the back seet of my Toyota awaiting only stamps and address labels. DX totals from Bostown: 172 heard, 30 veries, 23 states, five provinces, 11 cmm-tries. Best catches include REC-647 665-Portugal, Senegal-764 & KNRR-660, all on a Radio Shack TRF portable out of the box. I was recently in Dayton, 0. (FIASH-land)

and heard at least one interesting thing on BCB - KNER/WINE-680, w/wmaq-670 all carrying NBC network NX at the same time. Quite an experience, somewhat similar to what southern MYers experience w/wwva/wwwe-1170. If you have never experienced this echo effect, try tuning in two stations running network programs // to each other. Do it now. I hope the dues hike hasn't affected too many WRCers adversely - if you could see the amount of work that goes into each copy of DX NEWS you'd be glad to pay twice the price. I kjow I would. For the money, you can't get anything better. If you look at what actual DX info is contained in other clubs' bulletins, you'll find that it is vapor compared to the solid info DX NEWS offers EACH WEEK. A little carried away there, but that's how I feel. ERC, remember those immortal words of Mick Danger, Third Eye: "If the world were flat, all the Chinese would fall off!" (and there'd be no F layer either, hi). By the way, congrats to ERC on WERA - I told you three years ago WEFM lived, hi! That's 30 so remember, Capt. Glotz is right on. 73, & Muse often.

BILL FEIDT - 8708 Contee Read - Apt. 14 - Laurel. Maryland - 20810

I have been doing my Musings on Monday evenings this season in order to be able to include info from the MM session, but it seems the P.O. cannot consistantly get a letter from Laurel to Brooklyn in three days. So, I will do my reports on Sat. or Sun. from now on. I have some old DX NEWS wimeo style bulletins from circa 1958-9 which I intend to dispose of in one way or another. Would anyone be interested in having these gratis? If so, please contact me. I have very little new DX this week, but one very interesting SSS TA opening to report. 1/25- WHEE-1370 Martinsville, Va. was in quite well @ 5:25pm w/"Evening Egition" NX to 5:30 s/off w/"This is my Country" used as anthem: then announced PSA of 500 w. WBRY-1540 Woodbury, Tenn. from 5:58pm w/rousing march to s/off w/SSB; this is a call change from WEFJ. 1/26- WKCY-1300 Harrisonburg, Va. @ 5:12pm s/off o/u semi-local WFRR. Then on 1/28 I noted one of the best SSS TA openings I've ever experienced. I first heard a jumble of SAHs on 1475 around 5:30pm. A little later one became dominant w/fairly good audio, but was unID. Vinnitas-1546 was in very well. Nice-1554, Monte Carlo-1466 & Porto-1578 were all as strong as I've ever heard them. 1484 sounded like an American Graveyard frequency, but nothing dominant. I had at least two signals on 1367 & possibly a third; one was almost certainly R. Nordsee w/rr format. I had an interesting reception on 1286 w/a man talling in what may have been Portuguese; signal was quite strong, but audio rather weak; probably needed CSB3, but not enough to be sure. I may have had a second signal here also around 6:25pm, but things were beginning to drop out by this time. By 6:40 only the normally consistant TAs remained & they were quite weak. The opening was highband only; Lisbon-665 was noted, but only very weakly, while the highband signals were very strong. This was a very strange opening. since CX were otherwise slightly quasi-Auroral, w/many of the U.S. clears very much weaker than usual: WOWO, normally a powerhouse, was extremely poor. The next evening, 1 /29, was definitely Auroral - no TAS at all, clears missing. 73.

BOB FOXWORTH - G.P.O. - Box 2111 - New York, New York - 10001

Here's another Musing. Gee, it's great to see one's name in print. I enjoyed seeing the local gang at the confab 1/22. I also enjoyed reading Mike Callins' "Clears and Classifications" and think it was very illuminating. I recall in 1962 at the NRC Indianapolis Convention that a rep from WIW was there w/ maps & charts showing what kind of coverage they could expect w/renewed usage of their existing 500kw XR. Their reliable Grade B coverage would extend roughly to Newada. Strangely, none of the superpower advocates have been heard to advocate more stringent standards of receiver performance which would allow residents of so-called "white" areas to get signals at night that their five-tube wonders don't seem to be able to get ordnarily. It was good to hear Ross Hansch on the WHEX TEST. Also near-neighbor Steve Howe, an IRCA type who lives in Great Neck. On the local scene, WIHE has been fined a grand for failure to reduce power during CH. This seems like a lot but I understand this offense has happened before. Also they were in trouble once allegedly for improper logging of spots for an fair involving their staff. At any rate if I can borrow someone's Rustrak chart recorder. I will build a diode loop detector and monitor them for CH

Hereward. Living about 1,000' or so from their tower, I should have enough signal to work with. Needless to say this would prejudice my chances of ever getting part-time work there, haw haw. The second 4VEC TEST was in easily on 830, WCCO no trouble again. This was on 1/2% & again the NRC loop came to the resume. No, I am not in the employ of others to extol the loop, I just think it is the greatest thing I've ever tried. I note Page Tahlor's concurring remarks in a recent Musing. My wife is a regular reader of DX NEWS, naturally Capt. Glotz is her flavorite feature. IDXD the most unfavorite, too. On NM 1/31 about 2am, all four NEW Biggies - 660-710-770-880 were silent. Incredible. Were was off for tower inspection, but QNN was rough. I feel a major depression is needed to clear the air of all the AMers.

JOHN W. HOOGERHEIDS - 3 Marquette Drive - Marquette, Michigan - 49855 I was out of town for a week & no DX at all. But on went the radio 1/23 & I found Auroral CX & unn WHIG-1470 w/hockey @ 7pm. Also a new log in WFRC-1600 Reidsville N.C. atop v/WX @ 7:15. An SS who was a DOMESTIC atop on 1590 @ 7:20. Much noise & static prevented ID, on SE Beverage, which I repaired today w/eight breaks in deep-deep snowdrifts. 7:30mm, first loss on CTTR-1150 Trois Rivieres in loud in Auroral donut hole, thanks to ties in DX NEWS. COME-610 noted @ 12:03 s/off w/Oh Canada 1/24 for good log on my rarest & most difficult frequency. OC noted on 860 v/ID @ 12:20am as WXAP, Atlanta, Ga. Must be new call for old WERD but I have not seen call change listed. KWIC-1240 Decorah Ia. s/off @ 1 w/lots of mention of Iowa State College Network. Seemed like a religious song at s/off. KPUR-1440 Amerillo loud @ 1:10 r/c-TT for new log. WLDY-1340 r/c-TT 1:35. 1/25- Bitter cold outside - -150 @ 8pm & great Aurors in effect. Audio on 1505, maybe Anguilla. Also SS on 1540-1170-1575, loud Costa Rican here. TIJJC-R. Columbia @ 8:05pm. 1150 had XEJP R. Variadades atop 8:15. R. Menumenta 1-1375 TIMAR Limon @ 8:20. ZIK-1100 w/EE-accented announcer w/rr u/ WKYC for many country @ 8:45pm; R. Continental, YMAU-890 loud @ 8:45. Fifth new foreign log of night @ 9:45pm, in HIJP-1010 R. Comercial, D.R. atop 10:10pm. Her explain this one to me - an Aurora so strong @ 9pm 1/28 that all 50kw clears are gone to IAs, but WDR-1586 & France-1554 as loud as I've ever heard 'en, & the earliest I've ever logged 'en also. Why? First new log on 1020 was EJCC, R. Substemma in well on 1045; hets on almost all splits. Best one on 1385 believed to be R. Hoyer, also 1285 believed to be R. Grenada, YNRPS, & 1435 believed R. Kelkboom. Other unID splits on 1145 1455 1465. An IA on 945 IDed as Ecuadorian R. Ifem; 995 as R. Suceso, Gauyaquil, 965 R. Managua, 975 had two on, dominant Ondas del Pacifico, weak one on 985, Peru I presume, RPP Lima; weak IA on 1105. I never noted this split before. Dave Gleson, would this be Ecuadorian, 500w

RICH RICHMAN - 14 Bast Cheshire Place - Staten Island, New York - 10301

Here I am with my first appearance in these pages for 1972. WERW1170 N.J., heard for the first time on E, 12/31, from 10:30 to 11 a.m. w/h.sy
Listening background mx, & editorials. No verie in yet. The 1/29 DX NEWS states
that WWVA is now silent MMs, approximately 1 to 5 a.m. However, on MM 1/31, I
found WWVA Newsman Bill Hughes playing c/w, stating that he was hosting the AN
show. This was @ 12:16am. This had been the time for religious programming.
Does this mean another MM clear channel is now shut off? Good-bye hopes of snagging KVOO. WJDN-1530 N.J. is now playing c/w on Sundays from noon until s/off.
I'm the proud recipient of four "Electronic Awards" on the "Bob Jones New York at
Night" show on WHM-1050 - they're won by identifying the singers of obscure
songs. That's my biggest claim to fame so far in '72, hi. 73s.

Pelileo?

MORTON D. MEMMAN - Box 276 - North Plam Springs, California - 92258

HQ sent me a 2RE v/q. Will the person it belongs to write me
& claim it? It covers verification of a lkw TP. Also if anyone received 1950

v/ls belonging to me I'd appreciate receiving them at my presett address. I
guess HQ is so overworked they don't know who sent in those veries a year or
more ago. (They probably got switched with someone else's, Mort - I'm sure the
Party of the Second Part will write you -ERC)

PLEASE REMEMBER TO DOUBLE SPACE. DEADLINE IS THURSDAY. THERE'S A 30-LINE LIMIT!

BOB SHAW - 234 Columbus Street - Elyria, Chio - 44035

Mx RX is still a (Philly) dog, hi, but it has brought a few catches this week. 1/25, a Tuesday, better than MM: HIMS-570 o/u WMCA w/ads, uptempo mr (merengues?) & R. Cristal IDs during WKHN SP. WINK-1240 1:54am w/WX & SID, not sur3 if RS. WENK-1240 f/c-TT w/phonetic IDs 2:07; must be a r/c as it was listed in DDXD for December. WUPY-970 on emergency for coldwaye & snow, sounding quite grave, dominating 2:15. KFWF-920 concluding ET/TT/wx w/WX forecast of -100 @ 2:30. PM, much-wanted WIZE-1340 7:03 w/WX; sounds rr but is really Top 40 (they Were a daytime regular at school.) 1/26- KLTI r/c ID @ 2:10; I think they said they were leaving the air then. They were not heard at listed time. RJR-550 w/ SID & ID by YL @ 2:30, quite strong. Believe it or not, this is my #1 Jamaica. I counted up my countries and was surprised to find this was only #20. 1/27-KRMS-1150 concluding ET/OC 2:08, dominant. 1/27- WYNK-1380 I&C w/c/w & political ads 6:14pm. They must be 5,000w now. 1/28- WKTY-580 w/MX & sports for W. Wis. 2:33am. Dince when have they been AM? (Probably since midnight, hi). 1/30- WHEC-1460 is apparently no more; Rochester was heard to ID as "Waxie 14" and what sounded like WAXZ @ lam concluding NX & playing rr. MM 1/31- KOMB-1550 1:13 ID for f/c-TT/ax, clear but weak. WKAQ-580 in SS w/SID @ 2:35, strong, P.R. #1. Plenty of TT, no IDs during KTYN time. They're needed, too. Anyone remember the last time WJR-760 was off? I was thinking about it & I don't remember this ever ocurring. Also true for WIN-700, although it seems to me they used to be off Mes - is that right? I'm very much afraid these ANs are not going to go away; the wee hours may not make that much money for them, but as the population and inflation increase, the revenues certainly won't decrease. Understand, I'm not celebrating; it's just that I think those who say the "trend" toward Alling is over are wrong. I hope I'm wrong, instead. When I heard WOGO I was not aware it was a Special; was their 3:04 ID on 84w? 73. (They were on 84w. 3:00-3:30 -KRC)

JERRY STARM - WHOT Radio - Youngstown, Chio - 44505

Greetings. Strange reception @ 2:45am on 1/7. I noted a strong het on 930 that turned out to be from WPAT off frequency, measured at 931.8k. I called the station and talked thw switchboard into connecting me with the XR. The engineer was very friendly, & said they were measured by Cambridge Crystals on 1/1 # wereOK. I reminded him that if the XR gets off frequency far enough & the frequency drifts outside the passband of the frequency monitor, the meter will return to zero. He thought for a second and said "You're right, and come to think of it, we've been reading exactly zero for two days. Usually we're a few cycles I suggested the crystal oven may have blown a fine as this happened to me once. He maid he would check again with Cambridge in the morning. On 1/8 the het was gone. Also on 1/7 I noted ET/TT 2:08 from KICS-1590 w/several announcements. 1/10- I had WBAT-1400 IK in both modes, best copy just prior to 3. On 1/15 I got home early for some afternoon, ME & noted WHEC-660 smahing WHEC # 2:18 & one of my closest unbeards, WCA-950, dominating 6 2:47. 1/17 found 1980 a busy frequency. During the excellent WHEN TEST, I noted WT: from WETT 2:30-2:51 w/c/w & jingles & r/cs from MBHY & WKIS-740 all alone @ 4:02. 1/24- I noted WGDO-1550 W/TT & mx # 3:20-4. DK MEANS arrived 1/25 w/notice that this me a TMST & that peart of my reception was w/their Saw PSA. Recent veries: w/1- WKXX-1380 for 1971 report, WHEN-1340 WKIG-1580 for 10/71 report, WASC-850-THEF, WING-860 also for old 1971 report. No f/up on any of these. v/q- WMB-740. 73 & good IM & don't forget YAD-II. If you're planning to come, now is the time to let me know so we can start mking plane.

OAKIAND ATHLETICS' PADIO NETWORK

(from 1/29/72 Sporting News, which does not supply the frequencies - ERC). Key station of the network this year will be KEEN, San Jose, with KEST which was the flagship station last year, still remaining on the A's network. Also, Cakland BB games'll be on: KMG, Stockton; KEET Reno; KTIM man Rafael, KBLC Lakeport, and KPOP, Roseville.

WE WOULD LIKE TO OR? THE PULL NETWORKS FOR ALL RASEMLL TRANS - IF YOU CAN SUPPLY ANY, PLASE SEED THEM IN ON A SEPRENTE SHORT FROM YOUR MURINUS REPORT, AND WE'LL. HE ONLY TOO HAPPY TO PUBLISH THEM ERRE. NO NOT INCLUDE PM OR TV STATIONS.
